* A Swedish commercial has a young man ask his date if she wants to "taste the sausage". She's disappointed that he meant it literally.
* A Swedish high school textbook on mathematics includes a problem where the student is to figure out for how long Captain Picard from
* A Swedish insurance company is currently running radio commercials of the form: insurance clerk repeats the claimant's story, with every third word or so bleeped. The claimant confirms that this is what happened, and the clerk tells him that no problem, we can cover that.
* A Swedish PSA featured a man correcting a bathroom graffiti, reading "Robert är kuk" [Robert is cock] to "Robert är en kuk" [Robert is a dick], while awkwardly leaning over a guy standing next to him at a urinal.
* A Swedish textbook explains vector properties through an example including a fisherman, his fishing rod, and a fish. The book explains that "a fish with a flair for mathematics would have a good reason to suspect that the force generated [on the fishing rod] would display vector properties". Yes, the mathematical knowledge is attributed to the fish.
* A Swedish TV ad for Vicks Blue cough drops has a man trying to call attention to a running purse snatcher, however his voice fails him. He's offered a pill, his throat clears, and he shouts loudly across the street where the man's escaping — "Stop the thief!!" Everyone turns towards him, including a man carrying a rafter, who accidentally knocks the purse snatcher out cold as he comes running.
* A Swedish urban legend says that draft dodgers who claimed to be homosexual were sent to a gay-only boot camp on the isle of Gotland. The idea of an island full of armed gays, who would presume that all rookies were gay as well, would deter teens from feigning homosexuality. Apparently, the gay unit was a fiction made up by the military. During periods of Swedish history, homosexuality has been considered a disease or a crime, but it was never considered a valid reason to avoid the draft.
* "A Sweet Resolution," where it's revealed that the "static" the person calling tech support needed help with was actually just them opening a candy wrapper.
* a sweet, seemingly perfect girl with an unemployed father and horrible insecurities confirmed that Lila had a repressed dark side.
* As we find out, from what's implied, their mother, Ragyo, was a downplayed and more justified portrayal (along with being something of a
* As weird and scary as the Mechanicus and their worship of the Omnissiah and the Machine Spirit is, there are disturbing indications that
* As well, a number of orcs were aged into adulthood by the warlocks to fill the Horde's armies. One notable subject was the half-orc Garona, as part of an effort to
* As well as a fairly good percentage of the things Red Mage says. "There is no problem that can't be solved by creative and vigorous use of animal husbandry!"
* As well as any Pokémon with the ability Intimidate (Gyarados, Arcanine, Arbok, etc), which lowers the Attack stat of any opposing Pokémon that sees it enter battle.
* As well as a place in Arlen called "The Caves": a place where teens went to make out, drink beer, and do drugs back in
* , as well as a rare example of the butt-bite being an entirely positive experience. As the DVD text describes, "when bitten by a Bottom Biting Bug, people with hunched backs will have their posture corrected, depressed people will start to laugh, and people who had no confidence will suddenly become self-assured — those bitten are cheered up until they seem like entirely different people".
* As well as a soundtrack CD and artbook, the NIS America Limited Edition of
* As well as a universe filled up entirely with money. Two of them, in fact.
* As well as Bart referring to a "flying novelty disc" instead of a Frisbee.
* As well as being scavengers of carrion, crows are known for their large and visually striking funerals held for fellow crows and favored humans and pets.
* , as well as believing they aren't good enough for the other. It takes an accidental confession on Bolo's part for both to realize the truth.
* As well as catapult bombers, or alternatively equip one of the above with depth

charges or bombs. This was actually surprisingly successful, as it allowed battleships and cruisers to score a number of sub kills. While a sub could normally try and fight off a lone plane, in this case surfacing in range of a battleship or cruiser with spotting assistance would be suicidal.
* As well as Conan deliberately inducing Eureka moments to Kogoro due to Kogoro's
* As well as Eric Berne's early model that essentially viewed some behaviour patterns as internal roleplaying sessions between one's learned roles (mostly reduced to basic "parent" and "child") and the part that isn't in this game and as such is more "rational". Which may be weird, but much less so than the facts he tried to explain.
* As well as five Marks: Antony, Lepidus, Cicero, Brutus, and Corvinus.
* as well as for the Equalists states that Asami designed the wingsuits for the new Air Nation).
* as well as griffen, griffoun, griffun, griffyn, grifo, grifon, grifyn, grefyne, gràobhín, griphin, griphon, gryffen, gryffin, gryffon, gryfon, gryphen, and gryphin.
* As well as him appearing in a cameo, both Danny and Joyce in the original
* As well as his very outspoken left-wing political views, which, since the '70s, have been a defining character trait of his.
* As well as hosting a vast collection of magical books and objects including a ladder that moves on its own accord, the Library of Magic in
* As well as in the fifth season, where Frank throws a heavy object through a gate wall screaming "ABORT":
* as well as items to support the Quirks of himself and his followers in combat.
* As well as James Potter and Sirius Black, who were directly compared to the Weasley twins. Remus Lupin and Peter Pettigrew too, to an extent.
* As well as killed several elves, one of them with a shot to the stomach.
* as well as Mia to the player. He gets up to chase you down only a minute later.
* as well as possessing an affinity for Primordial mantra, by the time Izuku takes the entrance exam he is an unstoppable juggernaut that dwarves all of his fellow contestants in terms of points.
* As well as Ren, Iron Maiden Jeanne, Lyserg and the rest of the X-Laws, and a number of others. The
* As well as Sheogorath, the Daedric Prince of Madness. Can't get much crazier than that.
* As well as some of the Goa'uld technology (e.g. hand devices) are only usable by someone who is or was a host for a Goa'uld (or Tok'ra) symbiote.
* As well as some of the prosecutors. Jack "Hang 'Em High" McCoy, in particular, is known for hiding evidence, bullying witnesses, and generally
* As well as that, one episode revealed that the three non-CO doctors, the head nurse and the chaplain also pull double duty commanding vital support functions like sanitation and the mess tent
* As well as "That Summer", with the twist being that the narrator was a teenager whose first sexual encounter was with an older widow:
* As well as the ancient civilization that colonized the other planets of the solar system and created the Stardroids in
* As well as THE ANGRY MARINES!!! The only chapter that has a tank that they use to fire their marines directly into the heat of battle, and power feet, for kicking the enemies of the Emprah in the balls.
* As well as the fan-favorite, "The Rock's gonna take your little [beloved object], [shine it up real nice/dust it off], turn it sideways,

* as well as the other people from their ninja village live up to their names, relying on extreme speed and precision to eradicate enemies before they even realize what's going on.
* As well as the pendants you collect from the Light World dungeons to get the Master Sword.
* As well as the rest of the tracks on "Pretty. Odd.", such as "From A Mountain In

The Middle of the Cabins"?!
* As well as the "Snow Scouts Alphabet Pledge", which parodies the Boy Scout Law (see
* as well as timed ones from Leader monsters, whereas magical monsters had very few ways to get a status buffs at all. This got progressively worse since fighter monsters could wear better armor, get skills to boost their weapon skills (and the weapons gotten improves) while magical monsters could only wear a small selection of non-armor magical gear.
* As well as Vegeta in the Namek saga. Krillin blew a hole right through Vegeta to give a power boost strong enough to beat
* As well as "Whacking Day", where Principal Skinner locks Bart, Jimbo, Kearney, Dolph and Nelson in the school's basement. Bart manages to escape, which sets the rest of the plot into motion. At the end of the episode, Skinner finally remembers that the others are still locked in the basement.
* As well as "Wheel of Responses" for when Venom is back in town, and Fury believes that Spidey knows more than he's letting on.
* As well as Wonder Girl, their mother, Hippolyta, and every Amazon on Paradise Island had the physique of a pin-up girl, yet every one of them could toss a Nazi soldier through the air into a river ("The Feminum Mystique"), lift a car ("The New, Original Wonder Woman"), or easily overpower thugs ("Wonder Woman in Hollywood").
* As well as, you know, everyone. Do they even have homes? And beds that they actually sleep in, other than their desks?
* as well as Yukio if he happens to be awakened within the fanfiction.
* as well. Bangladesh always wanted to kill prisoners, the Baron would stop her which encouraged people to surrender.
* As well, Commander Primary Xerox, a Computer Tech based Mad, can't actually
* As well, Grand Arbiter Augustin IV, the guildmaster of the Azorius Senate on Ravnica (as of the original Ravnica set) is legless (and blind), floats around in his magically hovering throne, empowered to legislate utterly by the guildpact.
* As well, in Catholic tradition, each Saint has a Feast Day and a list of attributes, and many are patrons of particular professions, places, or against particular dangers. For example, St. Jude, who helps impossible cases, St. Cecilia, who protects musicians, and they didn't draw the name
* As well, in episode six, we're introduced to Washu, who's Ryoko's "mother" and is incredibly smart, and Tsunami, who has a major connection to Juraians and Sasami in particular. Both of those are explored more in the first two episodes of the second season.
* As well, in every case, the rest of the reason Hogwarts is unsafe is because it's an inside job.
* As well, Makuta Teridax's nature as an entity composed of gas and armor is revealed in-universe when the Piraka attempt to steal his mask off his
* as well of the situation meant Britain had to declare war on Finland. Four virtually aggression-free years of war followed. There were one or two situations where carrier-borne British aircraft attacked German airfields in the far Arctic north. British planes on long runs to Russia over-flew Finland but very carefully dropped no bombs and engaged in no actual combat. And that was it. There is also an apocryphal story that a Royal Navy pilot, shot down over Petsamo whist attacking a German air base, apologized to his Finnish captors for the inconvenience, and sincerely hoped no Finns had been hurt, only Germans. And that was it...
* As well, the film's main antagonist, Oogie Boogie, is a sack man filled with terrible things, such as insects and snakes. He refers to himself as the Boogie Man once:
* As well, the Grey Wardens are only interested in the very best. Everyone else doesn't have good odds of surviving
* As well, there are a number of minor examples who are engineers for the Normandy. Gabby and Kenny in particular within
* As well, the song "Wicked Young Man" seems somewhat of a reaction to the demonization of music and video games in the wake of the Columbine massacre.

* As well, they have a tendency to go into far more detail than is necessary, when short, curt responses that aren't lies could still keep the secret. Compare
* , as well. This, understandably, sends Tokyo into complete chaos, as everyone scrambles to figure out the situation as the number of conceptions grows by the day.
* as well to the real world to become his successor. Lastly it also seems that DC One Million takes place in the future of All Star Superman as Solaris and Kal Kent appear and happens to be the story of how Superman ended up having to fix the sun. To sum it up, almost all of Morrison's major works for DC are welded together, though admittedly some of the links between them are vague.
* As well with CN (the other WB owned network), they had shows that lasted 78 episodes: Dexter's Laboratory, Powerpuff Girls, and Ed, Edd,n Eddy, Billy and Mandy, FHIF, and KND.
* As we see with some Insurrectionist elements, humans and other species aren't immune to this either.
* as whatever made that musician unique or influential is exaggerated or misinterpreted by imitators. This can especially be true with innovators with a constantly evolving technique, style, sound or choice of gear, or one that has a certain amount of mystique to them.
* as when her magic starts to burn out, blood shows up in the trail she leaves behind, and she's seen lying in a pool of her own blood as her powers finally go away for good.
* A swiffer cleaning pad advert put a positive spin on it, by portraying various messes as lonely and lovelorn people for whom getting "picked up" by the product is a good thing for them.
* A Swiffer Sweeper commercial featured this. A woman was in the bathroom giving herself a facial. Her two children look in, see her wearing the facial mask, and run away screaming.
* A swift internet search for "electrosex" will reveal the many uses of a TENS unit and their ease of acquisition.
* A Swiftly Tilting Planet, as the Echthroi have created a Might-Have-Been (a hypothetical timeline that is in the process of supplanting the true timeline) where the world is destroyed by nuclear war. He must discover the source of the chain of events that leads to humanity's destruction and put it right.
* A Swiftly Tilting Planet, Bad Futures are called "Projections." Charles Wallace and the flying Unicorn occasionally get blown into them.
* A Swiftly Tilting Planet little control over what they do, he still influences them in tiny ways. The fact that he has a time-traveling unicorn helps a lot.
* A Swiftly Tilting Planet. Said townspeople happen to be Puritans at the height of the American witchcraft scare, so it's treated by the townspeople as a sign of devilry.
* A Swiftly Tilting Planet (such as Charles) or share a strong bond of love (Meg/Charles and Meg/Calvin) can kythe.
* A Swiftly Tilting Planet when a Native American woman who has married a Welsh settler in Puritan America is denounced as a witch and sentenced to be hanged. The evidence against her: that she didn't scream during childbirth.
* A Swiftly Tilting Planet. Zillah, a Native American woman, doesn't cry or scream while giving birth, due to her culture. The suspicious Puritan townspeople (who already blame her for the current drought) use this as evidence that she's a witch.
* A swinging blade is one of the many traps Agatha's group contends with in
* A swing version' "Boogie Woogie Bugle Boy" about a boogie-woogie trumpeter who gets drafted.
* As with all other metahuman strains, a number of divergent metavariants have emerged among dwarf populations. These are gnomes, European dwarves with no facial hair and even shorter statures than normal; hanuman, Indian dwarves with extensive body hair, longer limbs and prehensile tails, who were originally thought to be Awakened monkeys; koborokurus, Japanese dwarves with thick body hair and large noses; menehunes, amphibious Hawaiian dwarves with even thicker hair, nictitating membranes and webbed toes, and claimed by myth to descend from Mu or

* As with artificial sweeteners, some soft drink companies (notably Pepsico) have released "throwback" versions of their flagship products, with sucrose instead of H.F.C.S.; they proudly tout these throwback soft drinks as being "made with real sugar!"
* As with before, failing the tutorial mission will result in the alien's immediate victory.
* As with everything psychopaths more insane and into even more brutal combatants, the Emperor's Children Legion in particular known to have about fifty percent of their bloodstream composed of nothing but combat stims.
* As with his original video-game incarnation, King K. Rool from the short-lived
* As with its entry in the 'Comic Books' section above, Grid's appearance as a
* As with KDY, the Corellian Engineering Corporation (CEC) enjoys its own
* As with large-scale shields, practically everyday military and secret agent tech in
* As with many Native American peoples, the Tainos of Puerto Rico were told that the Spaniards invading their land were gods. To make sure, they caught one and tried to drown him... and succeeded. Even then they had no chance against the invaders.
* As with many other famous people, there are theories about how Richie Valens,
* As with many things, the exact nature and significance of love in the comic is ambiguous, but
* As with most 19th-century based westerns, a recent civil war between a federal government and break-away "states" frames the story.
* As with most forms of warfare, the advancement of technology has turned the fighter pilots of most major militaries into functional Soldiers. They may have a reputation of being a cocky and arrogant Warrior stereotype on the ground, but when they're in the air, their job is to accomplish the mission with as few friendly casualties as possible (preferably none). Notably, modern pilots are communicating with friendly forces constantly, for better situational awareness and coordination. They often given up kills to other pilots who are better positioned to take the shot. They may even let enemy aircraft go if trying to persue the enemy involves overextending or getting out of position and putting friendly forces at risk.
* As with most of his satirical paintings, Hogarth fills every square inch of
* As with most space 4X games, all weapons in the game have a maximum range regardless of whether they're lasers, projectiles or missiles. Similar to
* As with pretty much every juvenile prank imaginable, this shows up in
* As with real people, no matter how serious or genuine the complaint some fictional characters
* As with Scootaloo in fic 2, fic 3's chapter 9 sees Celestia doing a spot-on impression of Twilight's squee from her story in "The Cutie Mark Chronicles", to celebrate the news that her sister and Pharynx are expecting, much to the couple's amusement.
* As with "Shatter", once the B Side to "Tumble And Fall", and then released on their
* As with Slayers and Grimms above, Hunters tend to be this by nature. The Winchesters in particular seem to have achieved something of a
* As with Spider-Man: One More Day, Straczynski gets let off the hook for Sins Past and the editorial staff took the blame. However it's difficult to ignore the fact that the actual premise (Gwen Stacy having not one, but TWO off-panel pregnancies before she died) was entirely Straczynski's idea. Though the editors did put the kibosh on Straczynski's original idea, which was for the kids to be Peter's children, and not Norman Osborn's!
* As with the above Jesus example, there was another incident with a woman at a well who gave Jesus water. Jesus asked her to draw a cup for him and she tried to refuse the request for being both a Samaritan and an adulteress (an adulteress at the time could mean a number of things). Jesus knew this and didn't mind either one. The detail in the story that it was about noontime has made some commentators think the woman was already being slut-shamed by her community. Why was she was getting water at the well alone at that hot hour instead of say earlier in the

morning with many other people? Because she was avoiding them.
* As with the above two, Skyler Page has all but disappeared after getting fired from
* As with "The Balloon People", an obvious elevator has an "Elevator" label on it.
* As with the book, the series opens with several rangers of the Night's Watch who end up getting killed or executed by the second scene.
* As with the comics, Cyclops and Jean Grey throughout the various X-Men cartoons, highlighted most obviously in
* As with the Film examples above, several TV series deal with the effects of war on both soldiers and civilians, including
* As with the games, it's Justified: Carmen is only in it for the thrill of the chase. And she WANTS to either win or lose
* As with their film, TV, and radio counterparts, Ford Prefect and Arthur Dent from
* As with the Literature example above, any game with a cyberpunk setting will have this trope in effect by default.
* As with the map icons for the first two Bowser levels in the original
* As with the Orwell example below, King's fear of rats appears again and again: "Nona," "Graveyard Shift,"
* As with the Trope page quote, Dutch comedian Harry Jekkers mentioned the fact that
* As with the U.K., Italy has its share of submerged towns. One in particular is situated in a lake that gets drained periodically, allowing the interested to go visit.
* As with traditional animation, the most basic components of computer animation are keyframes: each movement of a character is broken into a series of poses, and the intervening space is filled in with "tween" frames that transition between these poses. The trouble, however, is that computers are very bad at anatomy, and a poorly keyframed movement can find a character momentarily demonstrating any and all of the many jittery, twitching, gravity-defying, limb-flailing forms of Marionette Motion. Amusingly, a newer CGI animation technique known as digital puppeteering can help
* A sword (a full-size replica of the in-game sword Kilgorin, or Elexorien in some cases. About 80cm long, stainless steel)
* As would any number of the other members of the Pertwee clan, all of whom were every bit as conniving as the CPO.
* As would seem natural, plenty of advertisements for firearms, ammo, self-defense courses and the like are centered around trying to scare you into buying their products. Most often showing pictures of ski-mask clad bandits attempting to break into a home or the steely-eyed homeowners going for or using whatever skill is being advertised.
* Asylum. After the Kromaggs invaded, Thatcher collaborated with the Kromaggs when they invaded her Earth. She agreed to give them access to the oil reserves in the North Sea in exchange for leaving the United Kingdom alone. After the end of the Kromagg War, collaborators came to be known as "Thatchers."
* "Asylum" also has other species being partially converted into Daleks, breaking from the dogma a bit, but only as disposable servants.
* Asylum. A partial instance in this book. Daniel Crawford enrolls in a boarding school that used to be a mental asylum. He and his new friends explore some undiscovered corners of the building where they find some mementos had been left behind from the building's days as an asylum.
* Asylum, a psychological drama set in a New England mental institution, is told mainly from the perspective of the head nun Sister Jude and the wrongly incarcerated mental patients Lana Winters and Kit Walker—a closeted lesbian newspaper reporter and a working-class widower formerly in a secret interracial relationship, respectively.
* Asylum Demon bother to get the obscene amount of Strength required to wield the Demon's Great Hammer, the Great Club will actually be very slightly stronger than it (assuming both are at the same upgrade level).

* Asylum: In "Frozen Fear", Walter murders his wife Maggie with a hatchet. Later, Bonnie uses the same hatachet in an attempt to fend off Maggie's animate body parts.
* Asylum: In "Frozen Fear", Walter murders his wife Ruth and cuts her body into pieces. Later the individual pieces start moving around on their own to extract revenge on him and his lover.
* Asylum: In "Frozen Fear", Walter murders his wife so he can runoff with his young mistress Bonnie.
* Asylum: In "Mannikins of Horror", Dr. Byron has constructed a group of toy robots with human heads. When Dr. Martin crushes one beneath his foot, he discovers it has real internal organs.
* Asylum: In "The Weird Tailor", a magical suit designed to restore the dead to life is placed on a shop mannequin. The mannequin comes to life and attempts to strangle Bruno.
* "Asylum of the Daleks" also showed the crew of the crashed spaceship this way...
* "Asylum of the Daleks", but when he sees Oswin face to face the Doctor finds out that Oswin was actually turned into one of the insane Daleks long ago, and that she imagined making soufflés and still being human because she couldn't handle the truth.
* "Asylum of the Daleks". Considering that they were on the verge of a divorce, this came as a relief for most fans.
* "Asylum of the Daleks", despite being fascist in nature, they are also a parliamentary democracy. This is entirely reconcilable, however, by the fact that most of the relevant fascistic beliefs are literally coded into them on the genetic level and a cornerstone of their culture, so the chances of any Dalek voting against the EX-TER-MIN-ATE foreign policy doctrine (and domestic doctrine, criminal code, and legally mandated method of dealing with those that aren't Dalek enough) are minuscule at best.
* "Asylum of the Daleks"-era Daleks gone mad, with blink-and-you'll-miss-them background cameos from classic series Dalek models. Only the RTD Daleks do something meaningful to the plot.
* "Asylum of the Daleks" for you!" Then she realizes what she said, and a Dalek eyestalk starts coming out of her forehead. Fortunately, the Doctor convinces her to fight for control of her body, and she ends up helping them.
* "Asylum of the Daleks" had made as a fan, thus bringing it into the canon.
* Asylum of the Daleks in the episode feels unnecessary since they don't advance the plot in any way. It's even more grating seeing as neither the divorce nor what caused it is ever mentioned again after they've got back together at the end of the story!
* Asylum of the Daleks"; Oswin tells Rory, "Pop off your shirt, quick as you like." He assumes there's a legitimate reason for the request... there isn't.
* Asylum of the Daleks sobbing and screaming for help in sheer mindless terror, as they corner him and move in for the kill.
* "Asylum of the Daleks" survive the crash. He explains that he died "and the cold preserved my body". Then things get worse...
* "Asylum of the Daleks", the Dalek ray, complete with iconic sound effect, is used to stun the Doctor to bring him to, basically, Dalek city hall. The same presumably goes for Amy and Rory.
* "Asylum of the Daleks", the Daleks have added an even more revealing name for the Doctor: The Predator of the Daleks.
* Asylum of the Daleks", the Doctor argues that they're always so frightened he has something up his sleeve that they don't dare just shoot.
* Asylum of the Daleks) when he flat-out says that he loved her more than she loved him.
* Asylum opens up with Twilight Sparkle waking up in the titular asylum and being told that most of her life was just a dream, much to her horror. Also, in chapter eight Twilight wakes up in her old library and it seems the asylum was just a dream. But of course, this is not the case...
* Asylum or whether she's currently stuck in a dream created by some villain. Both

sides have their hints.
* asylums; places of humane treatment according to the Kirkbride plan. The problems occurred with overcrowding due to warehousing. Not just the mentally ill, but drug addicts, immigrants with nowhere to go, the unemployed, the "friendless", homeless people. Danvers was supposed to only have about 600 clients; it ended up with well over two thousand.
* Asylums. The stock joke is that the personnel isn't so different from their patients. The stock insanity is
* A symbolic one was shown between Jeanne and her lover when they became separated by the division of the forest and the Court.
* Asymmetric Dilemma comic strip, where a girl says, "If I had a book, I could read... if I could read".
* Asymmetric Dilemma: Mentioning two problems, the first insignificant and given in unnecessary detail while the second is more serious but mentioned as if it was less important than the other problem.
* Asymmetric Multiplayer: A multiplayer mode in which different players have totally different roles and capabilities.
* Asymmetric Multiplayer games pits a team of agile, stealthy, but fragile agents against a team of heavily armored and armed but not particularly mobile mercenaries.
* Asymmetric Multiplayer, hoping to throw the sniper player off of his/her trail.
* Asymmetric sparring... the trainer has a distinct martial advantage over the trainee, such as longer reach, padded armor, or is simply bigger and stronger
* A Symphony of Eternity has Metternich, who didn't go to military school, was forced to join the navy and is repulsed and disgusted by the military life, in spite of this or maybe because of that he currently is one of the most feared and effective sailors the Empire has.
* A Symphony of Eternity He's best friends with the resident Starscream.
* A Symphony of Eternity only where magic instead of technology is used in this epic Galactic War.
* A Symphony of Eternity. Technology, like magic in our world, has been mostly forgotten — so much so that when someone who knows technology, called a technosorcerer, appears it makes one of the Imperial Governors afraid that it could cause local rebels to wage full-fledged revolt.
* A Symphony of Eternity, the aliens are varried and diverse with no two characters alike and the story is set around the backdrop of an Epic Galactic War with roman legion like units and Greek Phalanxes fighting by the side of magically powered tanks and space fighters that share the sky and outer space with power armours and pegasus riders.
* A Symphony of Eternity who combined with a tendency to avoid battles, with his entire fleet, and come up with plans that focus on winning without fighting, at the very least facing the opposing fleet only with an overwhelming advantage to his side or distracting and bating on a large enemy force while others win, all with a minimal struggle or no battle at all makes him one of the most feared and successful officers in the Imperial Navy, a case where he's both the coward and the hero and the same time. So much so that he is made a Captain directly from civilian life and manages to become a Rear Admiral in less than three years! Unfortunately for him because of his astonishing victories, he's sent into even more dangerous zones of war.
* A Symphony of Eternity with two beams of energy, a liquid outer hull and a remote controlled mist engulfing it to help confuse the enemy.
* A symptom of ADHD is speaking faster and/or more than most people, often blurting out whatever pops into their head, due to impulsivity being one of the major symptoms. Bipolar people can also get like this in manic phases.
* As Yomen points out, Atium is worthless in his city because of the Empire's collapse. Only rare Mistborn (who can use any metal) can use it, so a city without Mistborn or access to trade with other Mistborn is sitting on a pile of worthless shiny beads. Even after it turns out that
* As you are helping a Mii propose to their sweetheart, their subtitles are color-

coded; the boy's are blue, while the girl's are red.
* As You Are: Made in 2017, set from the fall of 1993 to the summer of 1994.
* As you beat Bowser and save Princess Peach, the victory music drags to a stop as she reveals herself to be Kamek the Magikoopa in disguise. He then promptly
* As you can imagine, many places on earth have been called hell in a more tongue-in-cheek manner.
* As you'd expect for a show about a team investigating police corruption this happens repeatedly in
* As You Know... and this show, was reworked into "Ten Long Years" for her and Meg, in which they reflect on those events upon hearing of Christine's impending arrival in America.
* As You Know...: As you know, this is when a troper like you recognizes the act of characters giving out exposition nobody in the scene would need.
* As You Know... broke the fourth wall to mock his own use of this trope. More than two millennia later, characters still lecture each other about things the others know, usually to inform the audience of what's happening.
* As You Know...: Characters would routinely remind one another about the overarching plot in order to keep audiences up to speed.
* As You Know... that you use seawater to make concrete, so no-one ever bothered to write it down.
* As You Know...The characters already know this exposition, but the viewers don't, so it has to be stated onscreen.
* As You Know... where the player character has lived their entire life in the mage tower and can ask some very basic stuff about how things work there.
* As you learn basically in your first week of Contracts in law school—this doesn't always work in court. A famous case has a guy and his friend (let's call them Alan and Bob) drinking at the bar when Alan starts talking about some property he owns, and (he claims) jokingly offers to sell it to Bob for a very low price. Bob, who thinks Alan is being serious (or so he claims), says, "Sure, I'll take that." The court found that Bob was honest when he said he didn't realize that Alan was joking, and so Alan had to sell to Bob for the absurdly-low price. The record doesn't show whether they stayed friends.
* As You Like It also features a character called ‘William’ who is a simple-minded country bumpkin.
* As You Like It: And let us not forget fair Rosalind, who once did dress to become Ganymede. A shepherdess, Phebe, then fell for "him", and Rosalind did try to rebuff her.
* As You Like It and restored his dukedom to his banished brother. But before that, Hymen, the literal god of marriage, shows up to resolve romantic subplots and make predictions in rhyming couplets.
* As You Like It. Even marriage doesn't likely break it up, since they marry brothers.
* As You Like It, explains that Corin's going to Hell because he never went to court:
* As You Like It has an adorable romance with Orlando, a sweet poet who's been horribly mistreated by his older brother. She takes a liking to him, and teaches him to stand up for himself and about how love works in the real world, and falls in love with him in the process. They are happily married in the end.
* As You Like It), has two characters named Oliver (Orlando's eldest brother and the country priest) and two characters named Jaques (Orlando's middle brother and the melancholy wit in Duke Senior's retinue).
* As You Like It have multiple characters barefoot during the Arden scenes, to go with the general "back to nature" vibe.
* As You Like It) helps her love interest Orlando practice talking to the woman he's in love with— who is, of course, Rosalind.
* As You Like It marriages, and even the Greek god of marriage, Hymen, comes to attend the ceremonies.
* As You Like It—which at one point includes staging a wedding between the two.

* As You Like It, Rosalind's "Ganymede" disguise is portrayed as this. In these versions, Orlando recognizes her at once, she realizes as much, and their subsequent "tutoring" scenes together become coy, humorous flirtations between the pair, who through role-playing can be frank with each other in ways a young couple of the time ordinarily couldn't.
* As You Like It the idealistic, music-loving "Amiens", while Touchstone's subplot necessitates the inclusion of his love interest, "Audrey, a country wench", a country priest named "Oliver Mar-Text", and "William", Audrey's ex-boyfriend.
* As You Like It, there is a song that includes "The rest shall bear this burden." It's unclear whether this is part of the lyrics or a stage direction on the singing (i.e., "The rest of the cast on stage will sing the chorus") and professional troupes have performed it both ways.
* As You Like It, though earlier in the play, Rosalind says that the reason she'll disguise herself as a boy is that she is "more than common tall" and very tall for a girl, though of normal height for a boy.
* As You Like It to have Audrey eating a turnip the whole time Touchstone is attempting to "woo" her.
* As You Like It wedding, uniting the four couples who have come together during the course of the play.
* As You Like It when Orlando saves his life, he hooks up with Rosalind's cousin and best friend Celia.
* As You Like It, where Phebe protests against Silvius slandering her eyes thus.
* as you may have gathered, but it's hard to argue with the win records of robots like this.
* As you might expect, a man presented them with the cash value for the points and demanded the fighter jet. Fortunately, the judge used the Reasonable Person clause and decreed that Pepsi was not legally obligated to fulfill the man's wishes.
* As you might expect, for ponies to eat meat is considered distinctly icky in most contexts, though the fact that there's a pretty well-known distinction between sapient and non-sapient species cuts down on the
* As you might expect from such a classic horror weapon, scareactors wielding these have shown up quite a bit over the years, including horror icons like Michael Myers and Norman Bates.
* As you might expect from the Guardian of Time, Setsuna Meiou/Sailor Pluto in the
* As you might expect, many of these rules get bent or outright broken with some degree of regularity. (There's a joke that the seventh Tradition is "don't get caught".) The Camarilla is especially hard on those who break the Masquerade.
* As you might expect, recruiting commercials for the United States Marines do nothing to discourage the myth. One well-known and rather absurd commercial that was shown to express how badass they are
* As you might expect, revenge plays a big part in the musical adaptation of
* As you might have gathered from reading this list, this is true of many politicians, who transitioned into that occupation after gaining some degree of recognition elsewhere. Examples include military service, acting, business, and of course, many many lawyers.
* As you might imagine, this makes travel around Malfeas... interesting. Once you enter the dimension proper, you must cross Cecelyne, the Endless Desert, for five days to actually get to the Demon City. No, it doesn't matter if you're walking on foot, riding on horseback, or piloting a First Age airship. The trip
* As you might well infer from the above, Marritza isn't entirely motivated by a desire to force his fellow Cardassians to confront what was done in their name; he's suffering from severe
* As your empire progresses through time, you discover new technologies and civic developments. It's just about understandable how you can quantify an empire's science per turn (important discoveries and so on), but you also generate a quantified amount of
* As You Wish, but he falls in love with her and ends up being nice to her.
* As You Wish by Jackson Pearce, the jinn that appears to Kayla is supposed to grant 3 wishes to her as quickly as possible, as per protocol. One of her wishes is

to date the most popular guy in school, and the jinn starts to fall in love with her after she wishes this.
* as Zack Morris, in character and all, and used the "time out" trick at one point to explain something without Fallon interrupting him. When he timed back in, Fallon stopped for a second, then asked, "Did you just time me out?"
* as Zenos is preparing to kill him, Varis claims that Zenos wouldn't be able to accomplish anything toward his previously stated goals, and that Zenos would be completely inadequate as an emperor. He's right about both, he learned about the Ascians maybe weeks ago, he doesn't have a plan for that. And given that he lost Doma because he didn't kill Hien, and lost Ala Mhigo because he was reliant on Doman conscripts who had no reason to be loyal once Doma was freed, under Zenos's rule the Empire would have torn itself apart within the month.
* As Zess T. is Tayce T.'s grumpier sister, her dishes have nearly the same amount of careful preparation as to be expected from a good chef. She just
* At 0:27, billboards start flashing by with all of the Gym Leaders on them, sorted according to type. Some of their appearances are very small and difficult to see without pausing the video.
* At 0:31, Solrock and Lunatone can be seen with the Psychic-type Gym Leaders.
* At 0:33, various shadowy figures can be seen on the sides of the screen, including Alolan Persian, Absol, Purrloin, and Sneasel.
* At 0:38, racing shadows of many legendary Pokémon start appearing on the buildings.
* At 0:48, shadows of the Pokémon player characters run by, in the order of the generation that they were released.
* At 1:09, Reshiram appears behind N, and Zekrom can be seen behind Hilbert, both reflected in N's eye.
* At 11:30 there was an outbreak of spirit skywriting which continued for an hour and a half.
* At 12:30 the Embryo Stains invaded the marrow of a nightclub owner and forced him to compose terrifying poetry.
* AT-2 anti-tank missiles. It can't carry as many passengers but it more than makes up for that with its significant firepower.
* AT-43, and in the long run they'll win in the end as they can overwhelm their opponents with their numbers and technology, or outlast them.
* AT-43. But for the zombie-using corporation O.N.I., they decided to go back to the drawing board and bring back "traditional" tanks that are updated for current times. Their crowning achievement is the O.N.I heavy tank which is not only cheaper than any other factions' top tier vehicle, it boasts a resident mechanic for field repair and has the heavy maser cannon, the heaviest vehicle weapon commisioned from alien Cog faction. Interestingly, in reality the heavy tank and other O.N.I vehicles aren't tanks, with its 6 large wheels the heavy tank looks strongly like the Kodiak/Stryker LAVs in real life.
* AT-43 Dyson Spheres, so much in fact that they plan on putting every solar system they can find into them.
* AT43, especially the C-Naps subgroup that represents Cog civilian culture and enterprise. Unlike many examples, C-Naps has a very powerful and fearsome military of its own—they just hate going to war because it's expensive and distracts from more profitable pursuits. Their troops and strategies are geared to win battles quickly in order to minimize costs (and to avoid inflicting too many casualties on potential future customers). Fluff describes C-Naps generals (executives, more like) often negotiating trade agreements with enemies before a battle is even over; sometimes this comes at the cost of victory, but that's business for you.
* AT43 features suits of powered armor for nearly every army (including Space Gorillas).
* AT-43 long ago and created the ancestors of the other factions in the distant past.
* AT-43, only here they are made out of Nanomachines (the sci-fi clay), and have creepy doll faces.

* AT43 point and have become robotic hyper lifeforms, and their technology can do almost anything. The twist is they are really humanity who originated from Sol System, and the other human factions were created by them so they could harvest their planet when they used it all up.
* At 5'9" and 160-180 pounds, Rocky would make a small heavyweight. Someone of his frame would most likely fight as a light heavyweight or even a middleweight.
* At 6'9, Isis the Amazon is possibly the tallest woman to ever take up professional wrestling and is noticeably taller than most male wrestlers. Still, she claims to have been dolling up to get noticed by the movie industry and did score a leading role in some independent films.
* A T-800 without flesh cover is seen crushing skulls with his foot in the similar opening of
* At a 1965 live performance of Peter, Paul and Mary their rendition of "Puff the Magic Dragon" was prefaced by Paul giving a pompous pretend speech about dragons. After stumbling and starting over several times, he ended up referring to dragons as having "four separate and distinct nostrils and one monstrous scale...with thousands of tiny legs?"
* At a 2009 Apache Army show, Gosaku concealed a knife and used it to cut Mammoth Sasaki and Yoshihito Sasaki during a match.
* At a bit of a stretch, the phenomenon known variously as "hydraulic shock" and
* At about this same time, many pre-sweetened cereals also had their ingredients lists rearranged. By law, all ingredients must be listed in descending order of abundance. Before the Great Sugar Cereal Renaming, a box of (say) Froot Loops had its ingredients listed as "Sugar, wheat flour, oat flour, ...". Today, that same box of Froot Loops — whose recipe has not changed
* At a certain (non-secret) base in the US there is a room that can only be entered by using the phone on the outside of the room to call the people inside of the room to come and open the door. The phone on the outside of the room is a rotary phone and there have been cases where the new, younger people don't know how to operate the phone. One has to wonder what the purpose of dialing is if you'll only ever use it to call the other side to open the door. Given that the doors and walls may be several feet thick, the phone was installed to let the guards know who was on the other side of the door.
* At a Christmas party, he's also under the impression no-one ever thought of mixing orange juice with vodka. His "One With Everything" special, however, does seem pretty original.
* a tackle he made of Titans receiver Kevin Dyson stopping him from scoring the game-tying touchdown at the one-yard line.
* A Taco Bell ad featuring short-lived mascots Nacho and Dog (no relation to the chihuahua) had the two screaming loud enough to crack the glass on a distant alien spacecraft... because they had reached the bottom of the food bag. A moment later, they remembered they had plenty more bags in a short reach.
* A Taco Bell commercial had the chihuahua attempt to capture GODZILLA this way, as part of a marketing tie-in for
* At a Congressional hearing, Waller is asked about the difference of the Squad and Task Force X. At the time, the Task Force also included Checkmate who were still secret. Waller covered by claiming it was the same thing and "it's easier to get funding for something called a Task Force than a Suicide Squad."
* At a convention, LK explained the background of the entire gag, mentioning that in his version, "Steve" has pretty much become another word for "henchman".
* ATACs are super prototypes from which all basic ATACs were reverse-engineered.
* A Tactician's Testimony: Early on, Katri suffers an injury to her right leg, which constantly reopens until Serra heals it. Nonetheless, Katri suffers from a limp from that point on. In "False Friends," the issue is partially resolved when she receives a leg brace.
* A tactic some parents use, especially in families with two or more siblings. One example is a parent asking a child if they "want" to go to this place or that place, or if they want to do this thing or that thing.
* A tactic that players developed in Battlefield: Bad Company, which has survived

as far as Battlefield 4, is to set C4 on a light, fast vehicle like an ATV or Jeep, and drive at a heavy vehicle like a tank. Two packs of C4 will take out a tank, and as long as you bail out properly, the vehicle's momentum will carry it into the tank, and you can blow it up at your leisure. More inventive players have put C4 on unlikely vehicles, like helicopters, jet planes, and
* At Act III Scene V, Christian tries to talk to Roxane without Cyrano’s help. He cannot be eloquent, so a disappointed
* At Act II Scene III, Cyrano admits to himself he is one of those when he thinks to write a letter to Roxane and flee. Interestingly enough, he has a
* At Act II Scene IV, the poets comment about how the last night, only one men singlehandedly put a whole band of one hundred men to the rout, leaving his swords and hats by all Paris, and make assumptions about his character. Only the Audience knows that the hero was Cyrano, who is busy writing a love letter to Roxane, absentmindedly murmuring of his feelings.
* At Act I scene III, Christian wishes to throw his glove at De Valvert, but then...
* At Act I Scene IV, Cyrano is bothered by a Bore. It seems completely innocent on his part. After all, he’s a Bore, and this is not worthy a real retribution. So, instead of simply ignoring the Bore,
* At Act I scene IV, Cyrano talks about it to provoke De Valvert... and also because
* At Act I Scene IV, Viscount de Valvert shows his despise toward poets calling Cyrano one of them.
* At a Democratic primary debate at UNLV for the 2008 convention, one college student who got in had a whole list of questions. The people running the debate made her pick this one for Hillary Clinton: "Do you like diamonds or pearls?" (She liked them both.)
* At a different point, another character gets back at the cartoonist by
* At a different point, the ship AI plays a trick on Rimmer by giving him someone else's arm... and the arm attacks him repeatedly, including poking him in the eyes and grabbing him by the nuts.
* At Adobe Systems in the mid-90s, it was common to see charts on office walls showing the massive increase in paper use, coinciding with the advent of the "paperless office" meme. Hello, "Desktop Publishing"! Most folk do not understand how important paper and ink profits were to the companies that made copiers and printers. Sales people were often called "tonerheads" for this reason.
* At a fan convention in 2016, cross-promotion was announced with another popular MMORPG:
* At a funeral for one of Dracula's victims, a dog belonging to one of the guests refuses to go near the grave.
* A tagalong in one of the books even privately refers to him as 'The Chair'.
* at age 12, he has a rather nasty scar running diagonally from his shoulder to his waist. Naruto (at age 16) is very self-conscious about it and it's noted he never goes shirtless, even in the shower.
* At age 17, she escaped what she considered a difficult family by marrying a war hero. That was hardly shocking in 1945. Also not shocking was the fact that the "war hero" tore through her money, beat her black and blue, and used her contacts to land acting jobs, all the while trash-talking her to directors so they wouldn't hire her and she'd have to depend financially on him. Shocking was when she decided she'd had enough and divorced the lout.
* At age 96, Iris Apfel counts. She's an interior designer who's also renowned as
* At a glance, most viewers would probably consider Anai to be a dog, weasel, or meerkat, but he is actually a Japanese badger.
* A tagline from one of the Chiller channel's promotional ads is: "The tweets are coming from inside the house".
* at a great cost. Jaune encourages her to not let anything stand in her way. In any other situation, the words would be perfectly good advice, but because of Pyrrha's circumstances, it ends up hurting her.
* At a high enough speed, the kinetic energy of a missile will actually exceed the

energy output of its warhead, even a nuclear one. Such
* At a housewarming party that got a little bit out of control, Rene uses this trope to keep a hopelessly drunk Millefeuille out of trouble by
* a Tailed Beast Bomb clash between Kurama and 5 other tailed beasts. The resulting explosion could be seen from all the battlefields in the war.
* A Taint in the Blood, Kate is captured and tied to a camp bed in an old cabin. She escapes by breaking the bed till she can squirm across the floor, and then lighting a Coleman stove and using it to burn through the rope.
* , a take-off of the standard fairy tale, the hero (and his less useful older siblings) are all sent off on the Quest because of their father's fatal flaw: GREED. The king wants gold very, very much. In fact, that whole family loves gold just a little too much to be healthy.
* Atalanta, befitting a serious, noble huntress, speaks in an old, formal Japanese manner.
* Atalanta from Greek mythology - a beautiful blonde who was also a skilled huntress and athlete. She had suitors lining up to try and beat her in a foot race.
* Atalanta. In some versions, Atalanta killed them herself. In other versions, Meleager rescued her by killing them.
* Atalanta made a deal with her father so she would only marry the man who could outrun her in a race (she was a really, really fast runner). Some versions also held that losers of the challenge would be killed. Hippomenes (
* Atalanta says she took a vow of chastity after breaking up with Achilles.
* Atalanta, who would only marry a man who could defeat her in a foot race. The losers were executed. (In more extreme versions, the idea was to
* At a later point, Dusty gets lost over the Pacific Ocean after the unfriendly competition sabotages his radio navigation (by chopping off his aerial in mid-flight) and has to land on a moving aircraft carrier. Dusty is a
* At a later point, the same Troll God makes some of the characters "invisible" by breaking each second into two pieces, with the invisible guys only present for the smaller piece...again, he believes it works, so it does.
* At a later point when the party is on route to attack the villains at their base, Virginia gets struck by a poison by the main villain during a cutscene event. She is treated for it, but her Vitality gauge is drained and cannot be refilled due to the poison's lingering effects. After they beat the villains, Virginia gets time to fully recover from the poison, and as such restore her Vitality gauge.
* a tale content would have protected it from this kind of bullshit by now.
* A Tale of... after her sisters Hazel and Primrose die at the same time. She's soon kicked out of her forest and left on her own.
* A Tale of... and taking over, Gothel promises her sisters not to use the younger undead in her hoard.
* A Tale of... at the hands of both the people of her native village and even her own brother, King Triton.
* A Tale of... deconstructs this trope. From her POV, it seems like Snow White has gone mad due to her father's death, to the point where she takes comfort in talking to woodland creatures.
* A Tale of Egypt. It leaves out the Hebrew incidents and the punishment of Moses' generation not seeing the Promised Land.
* A Tale of Fiction: Sneaky's eyes are always black, no matter how much shapeshifting he does. Subverted, though, because he's a nice guy and the protagonist. While shapeshifted into human form, he usually wears sunglasses to blend in.
* A Tale of Fiction than almost anybody else from his hacking activities and works against them, but otherwise is a harmless and funny (if porn-addicted) guy.
* A Tale of..., it's shown that Snow White and her parents don't usually dress formally. The Queen dresses up the most but that is simply personal preference. At his wedding, the King actually wore his military uniform.
* A Tale of..., Snow White's biological mother was named "Rose". She died of an unknown illness when Snow was an infant.
* , a tale of the "kind and unkind girls" has the girls meet up with the

personified months. Be polite to them. (If they ask what you think of the months, as they do in other variants, find something praiseworthy in each one in its place.)
* A Tale of..., "These stories are heavily influenced by The Odd Sisters, and they have quite taken on a life of their own, and I find they are very frequently directing the plot." This would explain why they go from being secondary characters in the first story to being occasional POV characters who are directly responsible for most of the plot points in the second story.
* A Tale of the Unwithering Realm, come from Ur, where the construction of the Tower of Babel was successfully completed.
* A Tale of the Unwithering Realm, or the creatures from medieval travellers' tall tales (headless humans with faces on their chest, men with a single giant foot, etc.)
* A Tale of the Unwithering Realm. They're golden ring-shaped portals whose rims have the form of three-dimensional Mobius strips, and when they are active a rainbow of colors and a spherical light-bending interdimensional rift appears in the middle.
* A Tale of the Wicked Queen ask Snow White if her stepmother is an evil one like in fairy-tale. They're disappointed to find out she is not.
* A Tale of the Wicked Queen, much of her abuse comes from trying to shield her daughter from the outside world and from men (the Prince in particular).
* A Tale of The Wicked Stepmother. Cinderella’s father, Sir Richard, is abusive to both his new wife, whom he only married for her inheritance from her late husband, and to her two daughters. He makes them do chores and stop their lessons for ladies, while blatantly favoring Cinderella. He doesn’t plan to present Anastasia and Drizella alongside Cinderella because he says they’re too ugly.
* A Tale of Time City as well. Time City is not technically another world per se, but it runs along the much of the same ideas.
* A Tale of Time City exists in its own personal timeframe outside the rest of time, but nonetheless, the time travelling doesn't make internal sense. Still a good book, though.
* A Tale of Time City It is essentially a chilled cake on a stick, with a warm, buttery center. Not long after the book's writing, the "lava cake" became popular — a cake with a solid exterior and molten interior. The only true difference between the two is the stick.
* A Tale of Time City. Statues, glass domes, technology which looks like 'a pipe organ' and the caskets (which are actually some kind of advanced time-battery-thing), amongst others. The people wear jumpsuits most of the time, but robes are donned for official functions.
* A Tale of Time City there's a lot of time travelling, but you can only change the past in an "unstable era". The characters travel three times to the same station platform in 1939 in an attempt to change the results of events, but the results are unpredictable and they never manage to improve the situation. Meanwhile, the changes they cause create greater instability each time...
* A Tale of... to villainous/antagonistic characters and positing they take place in a shared universe.
* A Tale of Two Cities, a nobleman whose speeding carriage has just crushed a child flips a coin onto the street to the grieving father. The father and all commoners in audience react with outrage. The incident shows the growing discord between the classes that ultimately leads to the French Revolution and Reign of Terror.
* A Tale of Two Cities, Gaspard, whose son has been killed after being run over by the Marquis St. Evremonde's carriage, hitches a ride underneath the carriage (this is ominously hinted at when the narrator describes the carriage as being heavier than usual) in order to follow the Marquis to his chateau and kill him.
* A Tale of Two Cities has some difficulty with this trope: The first 6 chapters are actually very good. Interesting, full of intrigue, likable characters. Then, after finishing Part 1, (the first 6 chapters), there is Part 2 (the next 24 chapters), which is a long sluggish read setting up for part 3 (the last 15

chapters), which is very good.
* A Tale of Two Cities. Maybe it's not true love, but considering the circumstances, one could do much worse.
* A Tale of Two Cities: Mr. Lorry. He is a 75-years-old businessman, his business includes being a banker, hostage negotiator, and help refugees to flee the country.
* A Tale of Two Cities, soldiers arrive during the siege of the Bastille only to turn their guns against its defenders.
* A Tale of Two Cities: Sydney Carton's considerably less competent boss Stryker rises to question Barsad in court. Carton scribbles a note saying "No questions now. Later on if you're not too silly we'll land him." Stryver then blurts out "No questions now, later on if you're not too silly—" before catching himself.
* A Tale of Two Cities: The Marquis is a classic example of the evil marquis. His carriage runs a child down and not only does he give the grieving family a single coin as compensation but is also more worried about the health of the horse who trampled him than the boy himself.
* A Tale of Two Kingdoms, after dealing with the goblin menace, the fairies offer you to stay with them. Forever. If you fail to decide quickly enough, the screen fades to white and leads to a bad ending.
* A Tale of Two Kingdoms, for every ending except for the best one (mostly because you left the assassin on the loose...)
* A Tale of Two Kingdoms has "gronk" as a generic Goblin swearword, cuss and interjection, plus assorted bits of "slang". They also use 'Pinkskins' and 'Pinkies' as a slang for humans.
* A Tale of Two Kingdoms. It explains how honorable it is to cast sand at the enemy's eyes during a swordfight.
* A Tale of Two Kingdoms, the antagonist sorcerer curses you with inverted mouse controls.
* A Tale of Two Rulers after her fiancee Ganondorf breaks open her door, soaking wet, wanting to ground their daughter Rinku because Rinku pushed Ganondorf into a lake.
* A Tale of Two Sisters and enters Soo-yeon's former room, her breath is visible and she is shaking rapidly. It's a sign that Soo-yeon's ghost is present who then proceeds to attack Eun-joo.
* A Tale of Two Sisters is Korean, and Korea is no slouch in this department, also putting out movies like:
* A Tale of Two Sisters mentioned above. Unlike the film, in the tale, both sisters were killed by the stepmother, though, paradoxically, it had a happy ending (courtesy of reincarnation).
* A Tale Of Two Sisters to demonstrate that the nightmares don't end even if you're awake and the sun is shining through the window.
* A Tale of Two Springfields" sees the town tearing itself apart and finally dividing in two sections a la East and West Germany because of a chain of events which is started (and is mostly led) by Homer being unable to tolerate having to remember area codes.
* "A Tale Of Two Springfields" starts off with a plot about Homer trying to get rid of a rabid badger that's occupying Santa's Little Helpers dog house and badly mauls him when he tries to get it out. However, the plot then switches to Homer being mad about the town switching to two area codes. When the badger pokes its head in through the window and snarls angrily, Homer tells it to go away because they have bigger problems to deal with, and the badger sulks off. It reappears during the
* "A Tale of Two Stans" shows that Stan's first business ventures involved these as well. Compared to the one he would make for the Mystery Shack, they were comparatively low-key.
* "A Tale of Two Stans" shows that Stan's various scams and swindles have gotten him chased out of at least twenty states.
* "A Tale of Two Stans". When the Author gets to the creation of the Journals, Dipper interrupts his story twice with his fanboy squeeing.
* A Tale of Two Suns: Circinus seems quite cultured and polite, but it barely masks

her ruthless and corrupt nature.
* A Tale of Two Suns. However, the Rainbooms admit she isn't wrong to say that Sunset's life has been less than perfect and they haven't been perfect friends.
* A Tale Told by an Idiot: A dimwitted character tries to explain a situation, but is not easily understood.
* A Tale Told by an Idiot tries explaining what actually happened with... results.
* A Talking Cat!?!, Trent. (Bonus points for the fact that both the boys go swimming in the pool together at one point.) It's worth noting that the company that made this movie also specializes in explicitly homoerotic films.
* A talking fox to the White Witch, who has Edmund, one of the prophesied kings of Narnia, captive.
* at all: Al exclaims that he hates his brother, Ed and Winry consider a divorce, Al has to go back into his suit of armor, and one of the babies in question is knocked up by the other at age twelve. Every heartwarming moment that comes attached to the kids is balanced by something darker.
* At All Costs will Eloise Pritchart allow the man she loved to die for nothing.
* at all for a member of a presenting team who were intended to be surrogate parents to the nation's children. This set the tone for Standards: Blue Peter presenters were held to notoriously high expectations for conduct and behaviour ever after.
* at all have predefined "story" beats, no matter what it tries to tell you. And this is always a good one for putting the Bachelor/ette on the spot.)
* At all.. If a Devil Fruit user touches Seastone - a material that has been described as "solid sea" - they'll feel the same effects as if they were fully submerged in water.
* at all — has its ingredients listed as "Wheat and oat flour, sugar, ...".
* at all, resulting in Supes being dumb. He's not capable of much thought beyond "SMASH" himself, and comes across as aloof to his fellow Autobots. In the original comics, he was so flawed that he couldn't distinguish between Decepticons and humans, since the moral complexity of a guy being coerced was beyond his ability to grasp, and only supreme effort on Silverbolt's part stopped him smushing the guy in front of lots of bystanders.
* at all than those that attempt to help them ascend. Witness: Daniel Jackson.
* at all. The Necrons on the other hand have small numbers but can self-reanimate and do have very strong weapons useful against high-class targets like Land Raiders. Combine those two and it creates an army that can take on pretty much everything while having so many bodies the enemy cannot possibly dish out enough shots to get rid of the Orks in front to get to the Necrons hiding behind them who are shooting right back at said enemy. The only thing holding this army back is, as usual, the ridicolous price since Orks require absurd numbers and Necrons are simply that expensive to field.
* at all times. Notably, during the Water 7 arc he imagines he and Robin dancing in a fairy tale-esque setting.
* A Talmud sort of urban legend says that a Bible copier accidentally replaced an aleph with an ayin, turning "Fear thy Lord" into "Frag thy Lord" (or even worse), resulting in a nonplussed God ripped him an eye (ayin) out, in good ole "An eye for an eye" tradition.
* At a lot of clothing stores, the "uniform", as it were, tends to encourage workers to wear the brand. Woe betide shoppers who happen to be wearing clothing from that brand, or even clothing in a similar style.
* At a meeting with some griffin gangsters, he eats meat and lets his love of ground beef slip (cows are sentient in Equestria).
* At American universities with successful sports teams, this can be the only way for students to get tickets.
* A Tampa reporter was filing a report about high gas prices when two cars had
* AT&T commercial involving a reporter named Slate Sanchez, who is reporting from a demolition site; this commercial was part of their "alter ego" series. He isn't an AT&T user, so he and his crew have no service and are unable to receive a call that they are directly in a new demolition zone. Cue a warning

klaxon, the TV going out and an explosion sound.
* AT&T opened its first public videophone booths in the US — the Picturephone Mod I — in 1964, and was predicting a landline based/dedicated-hardware videophone as late as 1993. These were even on the market for a while in the US, but too few people wanted them for it to be commercially viable in the long term and they mostly just faded away.
* AT&T's own cell service, to crash for a few minutes from too many people trying to watch it.
* At an anger management group, Locke goes into a bitter diatribe about his biological father conning him out of a kidney with feigned love and affection. And meets his love interest, who comes up to him after the session to tell him she shares his disdain for the sad sacks filling the group.
* Atanarjuat: The Fast Runner, a 2002 film produced entirely by Inuit, is a reasonably good movie... but the fact that it won 20 international awards and was nominated for ten more can really only be explained by people's appreciation for the fact that a film made by, for, and in the Inuit community (with all of the dialogue in Inuktitut) was able to dance at all.
* A Tangled Web (1931): Aunt Beckie puts on rouge before her last family gathering, shocking her living companion, but insisting on it. Then she orders Nan to wash off her rouge — over Nan's objection that Aunt Beckie was wearing it herself. Afterwards, Nan amuses herself by setting out to romance a young man to take him from his fiancee.
* A Tangled Web (1931), the Dark and Penhallow families have intermarried almost exclusively, to the point that during the time period the book takes place, pretty much all the marriages and relationships shown are between cousins.
* A !Tangled Web (1981). A significant argument is whether it is in fact possible to sell land at all, because it is unclear if it is something that can be given value.
* A !Tangled Web (1981)": Hangaway tablets, which hit "like a pile driver."
* A !Tangled Web (1981)": Interstellar travel is casual enough that Starlodge is willing to spend a large amount of money building a resort on an alien world.
* A !Tangled Web (1981)": Navarro overhears two !tang talking, with one telling the other never to make any reference to human body odor, no matter how vile it may be.
* A !Tangled Web (1981)": The reader doesn't find out Navarro's final deal until the !tang do.
* At an ice-skating event, Moe insists that all figure skaters are gay. Canadian figure skater Elvis Stojko points out that this is a common misconception as he has a girlfriend in Vancouver, to which Moe retorts, "Made up girlfriend,
* At Anime Expo 2007 one of the highlights, and there were precious few as it was horribly mismanaged, was Momoi. She even cosplayed as a schoolgirl while on a judging panel, and after the winner for the event was announced gave an impromptu performance for the crowd.
* A Tankard of Moose Urine level as mass-produced American beer, and isn't actually that difficult to find on an import market.
* A Tankard of Moose Urine, you gotta wonder — but that beer is in fact a microbrew, making it one of the better beers available.
* A tank is featured on the cover of the very first issue of the very first
* A tank was one of the various equipable weapons available during the second half of
* At an LLF show Princess Sugey wanted to contest Nikki Roxx in a 'test of strength'. At first she seemed too short to force Roxx to comply but then made the referee get on his hands and knees so she could stand on him for leverage.
* At another point, Dave forgets that he's able to travel through time.
* At another point, early in the game, GLaDOS delivers a thinly disguised insult, and then a few minutes later decides to
* At another point in the book, when the wizards are facing down the notion that they are the only men and Mrs. Whitlow the only woman who are likely to come along for some time (like thousands of years), they speculate that there must have been a Mr. Whitlow at some point, because she's, well,

* At another point in the movie, Agent J returns to headquarters and is puzzled why the same staff members are still active, despite it being very late at night. He half-sarcastically asks Zed if anyone ever gets any sleep there, to which Zed explains that they actually operate on Centaurian Time, which has a standard 37-hour day. He assures that J will get used to it after a few months — either that, or have a psychotic breakdown.
* At another point in the same episode, she pointed out that due to NDAs with her clients, she couldn't share their names without a warrant. She wasn't trying to be unhelpful (and said as much), she just knew that if she didn't she could easily be sued by her clients (who, in turn, could be ruined by revelations of visiting her). Very much
* At another point in the series, Miles acquires a zero-g "bed," and decides to give it a whirl, musing on the rumors of the fantastic nature of sex in zero-g. He crawls out a few minutes later after deciding that the bed smells like "at least three" people had recently been investigating those same rumors.
* At another point in this series, Han Solo uses a "hyperspace microjump" to position the
* At another point, Opus ends up wandering lost and semi-delirious in the desert. Suddenly, he's back home in Bloom County. He announces how happy he is it was all just a dream. Milo then says "No.
* At another point, Protoman adds a fresh level of murk due to a) lacking
* At another point she notes with some frustration that she probably would have fallen for anyone who helped her in that situation. She's glad that it was Koyomi since she'd like him anyway, but her complicated relationship with Kaiki shows that she's probably right. It's strongly implied that she fell in love with him briefly because he at least understood her. In the present, it makes their relationship quite complex because she can't bring herself to hate him, no matter what she says to the contrary.
* At another point, the Toughs as a whole get rather unwillingly saddled with the mission to hunt down Breya for Xinchub.
* At another point, Tomoya declares as a joke to his class that Kyou is bi and, when she becomes very angry and threatens him to take it back, that she's a lesbian, only for him to freak out when the situation backfires and everyone starts thinking he's gay or bi, too. Weirdly, while in the original Ryou was comically (and thankfully) totally okay with each idea, the anime tries to increase the tension by making her become teary at the thought of her sister being gay, making the scene potentially rather uncomfortable to anyone who's had to deal with homophobia in loved ones in real life.
* At another point, we see a newspaper with a headline about Eagleton dropping out. When the paper is turned over, we see that the Watergate story is below the fold.
* At another time, he tries to create his vision of a "perfect father" because he doesn't want to bring his dad in for Parents Day.
* At another time, she sewed a "cute" patch on Happosai's gi (which, unbeknownst to him, contained a "Woman Repellant" scent.) Happosai is delighted at the "cute little piggy," which a flustered Akane claims to be a dog.
* At another time, while he's holding an ally about to fall down a chasm with both hands, he needs to fire both his guns, and then he catches up his friend again.
* At a November 2017 NFL game between the Chicago Bears and Philadelphia Eagles, a Bears fan waved a sign logo as a way of expressing dissatisfaction with Bears head coach John Fox ("Fire Fox").
* A "tantrum spiral" is what happens when one unhappy dwarf finally tips over the edge and ends up setting off other unhappy dwarves. Dwarf A doesn't get enough sleep one night, goes on a rampage, and cuts Dwarf B's wife in half. Dwarf B finds out his wife is dead, goes mad with grief, and smashes a statue Dwarf C rather liked. Dwarf C finds out about the statue, and you can see where this is going. For many players, this is part of the appeal of the game.
* At Any Cost, the non-human natives have warriors who fight for glory, hunt human livestock as rites of passage, and are barely organized so despite their ability to

teleport they don't make any ground in the war with the human colonists. While the humans have soldiers, who are organized but poor fighters and hampered by incompetent leadership. Then the humans hire Hammer's Slammers, a mercenary company of elite fighters with excellent organization and experienced leadership and the war is over in a couple weeks.
* At any ending where someone escapes, the announcer comments that all doors other than the Number 9 Door have been unlocked.
* At any given moment in the Village, the water, the food, and even the air may be spiked to make you more comfortable. Constant drugging is all part of being in
* At any rate, he's pissed off enough at Zarniwoop for first abducting him and then bursting his bubble about how he survived the Vortex that he eventually slugs him.
* At any time a recent face-turned-heel character is dominating in the ring, fans will chant "
* at any time in the game, victory was practically guaranteed. Cowher's teams found themselves in this situation 104 times during his tenure; they won 102 of those times.
* At a party in the early Sixties, Marianne Faithfull was introduced to a gentleman in the music business who laughed at someone having such a silly stage name. It's her real name.
* At a party in Virginia, Claire is wowed to meet a former British colonel named George Washington.
* At a pep rally in the same episode, Oz muses that the cheerleaders' spelling has improved.
* Atapuerca's "Skull 17" has been lauded as the oldest unambiguous instance of murder, some 430,000 years ago. The owner of the skull, a male
* A tarantula hawk wasp targets a tarantula's belly because it is less armored than the rest of it. It will flip the spider on its back or attack when it rears up to attack.
* At a Renaissance Fair, a woman hits on Peter by asking if he wants to "take a gander under [my] frock"; confused, he gets a goose and shoves it under her dress.
* A target might notice an attempt to pick his pocket, but can't stop the thing from being taken. Regardless of how big the item is, how it's secured or whether the target is watching, the check is always a flat DC 20. A level 3 character can literally steal the shirt off someone's back with 100% success.
* Atari 2600 becomes part of this when his breath touches one of the three pigs.
* Atari 2600 claimed in response to criticism that the game was meant to depict a consensual sex scene where Custer seduces the woman. However, between the context of an American officer having sex with an Indian woman, the fact that other Indians seem to be shooting at Custer as if they're defending her, the fact that the woman doesn't move and is up against a cactus (implying her to be restrained somehow), and the lack of any story to imply seduction, with the back of the box saying "she's not about to take it lying down"... well, suffice to say the accusations that the game depicted a rape were hardly unfounded.
* Atari 2600 controller now since it uses the same connector, but that wasn't an option in the 70's.
* Atari2600 game library isn't quite as overwhelming as the above, but 565 games is nothing to stuff at either.
* Atari 2600 on the Atari 2600 other than curiosity as to how bad it is.
* Atari 2600. People often complain about the graphics and quality of the games (especially arcade ports).
* Atari 2600 received heavy criticism, the president of the company that created it said "our object is not to arouse, our object is to entertain". This despite the fact that its cartridge calls it "erotica".
* Atari 2600, showed General George Custer walking up to a Native American woman and raping her while under arrow fire. Points are awarded for doing the deed. It caused a storm of outrage when it was released.
* Atari 2600. The peripheral was shown at CES, and after complaints of forehead pain, the peripheral was never released to the public.

* Atari 8-bit. Not only is sublight travel performed by setting your spaceship's engines to fire continuously (consuming energy in the process), but if they get damaged your ship abruptly comes to a halt, leaving you to sputter to the nearest starbase for repairs.
* Atari as a result of the studio purchasing Midway's assets. Speaking of...
* Atari began doing business as Syzygy Co. in 1971. A year and a half later, it incorporated as Atari, Inc.
* Atari Breakout" in a Google Image Search will result in that very game becoming playable. You might forget why you were searching for a picture in the first place.
* Atari console and 800 computer) designed what would become the Amiga. Frustrated that Atari wouldn't produce it, he left, starting his own company, Hi-Toro, to build it. Hi-Toro went bankrupt, but Commodore bought them and the Amiga design, eventually manufacturing it themselves.
* Atari) featured American football played with robots. The ball itself becomes critical and tends to explode as each down progresses; destroyed robots must be replaced by money earned by the player.
* Atari filled with feral beasts, bloodthirsty dinosaurs, giant apes, and strange monsters, all fighting each other while volcanoes erupt all around.
* Atari Force comic book series pulls this on a backwater planet creature that he enters into to become born in the form of Martin Champion, speeding up the process to the point where it ends up killing the mother.
* Atari Force game cartridges. The second series kept the backstory and the characters, but was otherwise an original sci-fi romp.
* Atari Force is equipped with a Multiverse warp drive that allows its passengers to travel through both normal space and multiple alternate dimensions.
* Atari Force: Mostly subverted with some exceptions; Taz will only speak one word of (barely intelligible) English at the end of a word balloon.
* Atari Force, published in the early 1980s, depicts a near-future world where video phones would be in use, even in the universe of New Earth where the series' second team would have their adventures.
* Atari Force second series has a cybernetic camera eye plugged into his left eye socket.
* Atari Force spaceship was actually a museum piece, and it was still functional and fully stocked!
* Atari Force temporarily had this ability with the organic eye that the Tazlings had given him.
* Atari Force, the friendly toy robot, Bob, who could only say his name cheerfully, went evil after one too many flushes down the toilet. It could still say nothing more than "Bob", but it said it in a much more menacing voice to the point it was obvious that if its vocabulary were bigger, it would've been saying the trope title verbatim.
* Atari Force, the Hukka gets so annoyed with his robotic play friend Bob that he attempts to flush him down the toilet. However, he ends up unleashing Bob's evil side.
* Atari Jaguar other console developers would altogether abandon using their consoles' bit sizes as indicators of how "powerful" their systems were in part because of this.
* Atari Jaguar purely in the realm of fiction even after legitimate attempts to make them fifty years after the real war, the chaingun sprite was essentially unmodified.
* Atari Jaguar was planned to have a model combining the CD attachment with the console. This may never have gone further than mock-ups, with the Jaguar's CD add-on selling poorly and Atari Corp. approaching bankruptcy at the time.
* Atari Jaguar, wastes no time noticing and sums it up the absolute best:
* Atari Lynx: There are no (Buy a Lynx) subliminal messages (Or two) in this game (Buy a Lynx).
* Atari Lynx to escape the refrigerator and return himself back to normal.
* Atari pinball are wearing white ball-shaped helmets and skintight suits, complete with utility belts.

* Atari's Jaguar console was boasted as "The first 64-bit console", with the tag line "Do the math!" This was because it had
* Atari's Yars are giant mutant houseflies. When a young Yar warrior in the story goes off to battle, his mother's huge multifaceted eyes have tears in them.
* Atari. Traditional basketball scoring is used, but the lack of referees and the addition of weapons meant players would simply attack each other and then scored baskets while their opponents were down.
* Atari was formed- so they could credit the developers of their games.
* Atari was founded in the early 70s by Nolan Bushnell, Al Alcorn, and a third guy named Ted Dabney who dropped out. Guess which one is no longer remembered.
* At Arm's Length allowed for the introduction of a new character, one that was in their Character contest back in 2012. This character appeared in a flash of light, and apparently is from another reality. Sadly, nobody knows how he got there, or if they will be able to send him back.
* At Arm's Length and natural magic powers. Mortal witches can manipulate magic, but still require magic artifacts to channel their spells.
* At Arm's Length and seemingly main magical entrance portal to Earth Houston. Apparently monsters like to target Hermann Park.
* At Arm's Length and well into their 200s, while their mortal husbands are in their 20s.
* At Arm's Length, an expy of both Hunter S. Thompson AND Spider Jerusalem. Views the world in black and white and sees himself as a messenger appointed to bring the truth to the masses.
* At Arm's Length are fully capable of having children at any time, but social norms tend to prevent this. Also, the biological clock normally doesn’t start ticking until a few millennia, eliminating the desire to have children for quite a while. Enchanters who have children while they’re still relatively young, or have more then one, are typically frowned upon.
* At Arm's Length, as well as an unseen minotaur who was mentioned by Sheila to have been carrying a .44 Magnum when they encountered him.
* At Arm's Length fic started in 2016 that describes what the manga could've been like had Kaoru's father survived and returned home after the first arc of the story. A year later, an official sequel manga began that includes (among other things) the reveal that Kaoru's father is still alive.
* At Arm's Length got one when they introduced the first place winner of their character contest. A human from a parellel world appeared in front of Reece and Sheila, and the two used a disguise spell to make him appear as something from their world, only for something unexpected to happen, resulting in the human's gender to be switched in the process.
* At Arm's Length is the recipient of one of these in the story "Light The Candles."
* At Arm's Length, magic and magical beings are kept hidden from several mortal races including Earthlings. As part of the deal that allows Ally, Reece and Sheila to stay on Earth, they have to keep their background as Enchanters hidden from everyone, including their husbands. The main characters have issues with this policy, and are increasingly questioning the rationality of keeping the big secret in the face of increasing magical threats to Earth.
* At Arm's Length: Stopping someone from attacking by holding them back with one arm.
* At Arm's Length: The main characters wear reasonable shirt and pants combos into battle (save for Kiley, who wears a tube top), but their arch-nemesis Temujin looks like she bought her outfit from the barbarian section of Victoria's Secret.
* At Arm's Length, there's a reason why long-living four-armed supermages haven't conquered the known galaxy: they borrow EVERYTHING. Even the rebel protagonists borrow all their non-magical techniques from ancient history and modern television.
* At Arm's Length: To hold back a shorter attacker, a taller person just holds them by the head at arm's length.
* At around the same level that the Master Spectre gear becomes available, players can also begin to obtain Colossus Armor, which surpasses every other armor type in

terms of damage resistance. Other armors are better in shields and/or resistance to enemy powers, but those factors aren't important. Unlike the Master Spectre weapons, Colossus Armor requires the player buy a specific license, and then
* At Arras in May 1940, shortly before the fall of France, a posse of British tanks charged the Germans, who quickly found out that their 37mm anti-tank guns were useless against the thick-skinned Matildas
* Ataru (Form IV/Aggression) is especially useful against a single opponent but like Makashi leaves the player open to blaster fire.
* Ataru Moroboshi. In one episode, where a computer hooked up to his brain shows that he loves EVERY girl the most. (Even Lum, a girl who he has been trying to avoid for oh, the entire series?)
* Ataru Nakamura, a Japanese singer-songwriter and actress. She came out as a transgender woman on her official website on 11 September 2006.
* Ataru will not give up any opportunity to go out with, ogle, or feel up a girl... except for his hot alien princess fiancée, Lum, who's the
* A taser can be used to deliberately inflict pain, when operated in
* Atashin'chi because you won't be able to hide it anyway because of this inevitable trope.
* Atashin'chi, where even in close-up shots extras are gray, ghost-like blobs.
* ATASHINORIRI, so it takes all the possible failings of a visual novel (laughably bad art, shoehorned anime slang, flat characters who only serve to be fanservice, and very unsatisfying endings) and exaggerates them for comedic effect.
* A Taste for Death and insists on keeping them alive to die in some slow and entertaining way, despite two of his underlings (who have lost to Modesty and Willie before) advocating that they should kill both straight away.
* A Taste for Death: Fights an epee duel with Wenczel, stripped to the waist. The Fanservice is lampshaded as an attempt to distract one of the villains. It's also noted that although the venue is the ruin of a Roman arena, the settlement it was situated in was quite small and in a remote corner of the empire, so it probably wasn't used for actual gladatorial combat in the old days and Modesty's fight with Wenczel might well be the first fight to the death that's happened there.
* A Taste for Death, Modesty and Stephen idly wonder how Willie is doing on his vacation in America. Modesty notes that it's the middle of the night over there and says he's probably in bed. Cut to Willie, wide awake, in the middle of trying to evade a gang of kidnappers.
* A Taste for Death, two criminals steal a police car and the uniforms of the officers in it, using them to impersonate police and get the drop on Willie.
* A Taste of Armageddon died. Because there's no way to actually damage their opponent's infrastructure, victory for either side was impossible and over the generations-long conflict, the actual body count was orders of magnitude higher than a real war would have been.
* "A Taste of Armageddon" will destroy the entire inhabited surface of Eminiar Seven.
* "A Taste of Catnip" has a bulldog scaring Daffy, who is having delusions of thinking he's a cat. When the bulldog sees Daffy meowing and hissing, he throws a bottle of alcohol away.
* A Taste Of Cold Steel: The plot of this martial arts film revolves around a band of warriors fighting for the Purple Light Sword, a weapon whose blade can emanate a purple glow that illuminates a radius of several meters. The wielder of this weapon is invincible and practically indestructible.
* A Taste of Freedom" that "Court's kinda fun when it's not my ass on the line. Nachos?"
* A Taste Of His Own Medicine and sees him glance at the candles in the room, despite having no way of knowing how Lord Vetinari was being poisoned.
* A Taste of Honey and even threatens to kill him should he ever betray her.
* A Taste Of Honey and record the Japanese song "Sukiyaki" as a ballad, just as original artist Kyu Sakamoto had 18 years later. Using English language lyrics, Johnson's move paid off big, and "Sukiyaki" reached No. 3 on the Hot 100 in the summer of '81. Although they did have several songs score fairly big on the R&B

charts, no other song of A Taste Of Honey's has reached the Hot 100's Top 40.
* A Taste of Honey and refuses to believe Lucrio when the latter points out the truth of things.
* A Taste of Honey, Aqib arranges himself with his fate and loves Femysade in a way, eventually.
* A Taste of Honey Aqib as her husband expressly because his submissive character and slight build turn her on. As an added bonus, he's also a couple of years younger than she is.
* A Taste of Honey are combined with interstellar travel, so-called gods using sci-fi gadgets and superpowers that seem like magic but are actually science. The people fight with spears and swords and the gods use tablets.
* A Taste of Honey: During the height of the disco craze, this dual-female-fronted R&B band's song "Boogie Oogie Oogie" became a number-one hit in 1978, in which the ladies laid down the groove both vocally and on guitar and bass. In 1981, they returned to the top 5 with a Westernized ballad version of Kyu Sakamoto's peppy No. 1 hit from 1963, 'Sukiyaki' — which lyrically has nothing to do with the hot beef preparation of title in either English or the original Japanese.
* A Taste of Honey it's more feminine — and submissive — than those of more skilled dancers.
* A Taste of Honey. Usually she uses it to make arrows fly where she wants them to, but she also lifts the heavy new gate of the Menagerie to assist the workers in raising it.
* A Taste of Killing and Romance slaughters a target's entire family, the last survivor of the massacre is their pet Pomeranian… which he shoves into a washing machine with the spin cycle turned on.
* A Taste of Power: Where you are given a strong character or ability early on, but lose it quickly.
* A Taste of PowerWhere you are given a strong character or ability early on, but lose it quickly.
* A Taste of the Good Life and to continue trying to regain her daughter's trust.
* A Taste of the Good Life, Ebony Glimmer secures her divorce from her abusive husband by threatening to slit his throat if he doesn't sign the papers.
* A Taste of the Good Life ends with Ebby pregnant with Main Course's foal, who was later revealed in a blog post to be a colt named Ginger.
* A Taste of the Good Life him and calling him a softie for taking her in.
* A Taste of the Good Life, Scootaloo comments that when she was out on her own she would have tried to sneak into restaurants for scraps. "Heck, I would have eaten the empty bowls if I could have." This gives Main Course the idea of making edible soup bowls out of bread rolls.
* A Taste of Their Own Medicine by putting her into the same situation as the victim... but the real killer is in love with the woman, and exposes himself when he panics and tries to halt the trick early.
* A Taste of Their Own Medicine: Someone receives the same bad treatment that they showed/were going to show others.
* A Taste of the Lash, Azil returns with horrible scars and disfigured hands.
* A Taste of the Lash: The Babylonian Code of Hammurabi mandates this for some crimes, c. 1780 BC.
* A Taste of the Lash: When someone is strapped down and whipped as a punishment.
* At a time long before synthesizers were even realistically possible, let alone affordable, The Silver Apples were making electronic music using a home made instrument nicknamed the Simeon. Essentially just a collection of 30 something oscillators tuned to different pitches and triggered using telegraph keys, playing it required using ones hands, feet AND elbows. Oh, and the guy playing it was also the singer. A detailed schematic of the instrument is supplied in the liner notes for their eponymous album, as well as a breakdown of the drummers (equally impressive) drum kit.
* At a time when most of his popular songs were guitar-influenced, Cat Stevens had a Top 10 hit with his cover/arrangement of "Morning Has Broken" from
* At a time when shooting movies on film had fallen out of favor in Hollywood

outside of the indie scene,
* A Tatooine prop, the krayt dragon skeleton, while not re-used in filming
* At a travel agent's seminar, an anecdote was told about Ireland Tourism trying to come up with a snappy tag line, however, they quickly realized that "Come for the Craic" would probably not go over well in America (craic being Irish slang for fun, pronounced exactly as crack).
* AT-ATs., but liked the idea so much they combine the two into a single Nobody that they dub "the Smo-body".
* AT-AT. This was subverted occasionally though, in that some vehicles that were called transports in fact weren't.
* At Atticus Hoye's house party; Alfie is dared to teabag a swan, and is later
* Atatürk is all over Turkey, apparently not just the founder of the country but of just about every local establishment and tradition. He did change many things in Turkey mightily, among them constructing a modern, staunchly secular and Western-Oriented republic out of a recessive and staunchly Muslim
* A taunt added in a late 2016 patch, called the "Scotsmann's Stagger", has the Demoman continuously drinking from a bottle while tipsily walking forwards and letting out drunken in-game lines with every few steps.
* At Aunt Fran's funeral at the beginning of Season 3, Vint slams the hearse door, causing the casket to slide out and roll down the interstate on-ramp, while Bubba eats all the food at the wake, thinking it was a coming-home party for him.
* At Austerlitz, Napoleon was outnumbered and outgunned by the Allied army. His opening move was to retreat from the Pratzen Heights that dominated his chosen battlefield and letting the Russians occupy it. Between that, Napoleon feigning being hopelessly outmatched and knowing it and some of his troops retreating at what appeared to be the wrong moment, the Austrians and the Russians launched their attack... leaving the Pratzen Heights free for Napoleon to reoccupy while placing themselves in the best place to be shelled. In a partial subversion, Russian general Kutuzov had seen through Napoleon's plan right away,
* At autopsy, Vicks Vaporub is standard equipment, especially for 'stinkers'. A little under the nose helps a lot with the gag problem.
* Atavar have at least a combat and science caste. The combat caste is bigger, broader, and have more square faces than those of the science caste.
* Atavar takes place in a future where humanity is extinct, having left behind a race of robots called UOS. UOS is bent on wiping out all life in the galaxy. Nice going, humans.
* Atavar, the Kalen are at war with the Uos, a race of killer robots originally created by the now-extinct humans.
* Atavar, the Kalen inject Atavar with a...thing... to realign his language neural centre, allowing him to speak their language.
* At a very young age, Azula was shown easily pulling off firebending techniques her older and relatively skilled brother, Zuko, struggled with. She is also one of three characters in the original series who know how to use lightning and the only one known to generate hotter, blue fire. This is in addition to being
* Atavus female uses a modified ID portal to go back to the distant past, when the Atavus ruled the Earth, and humans were still cavemen. Renee goes after her and then jumps back. The Atavus female enters the portal, but Renee has already turned it to face a wall. The Atavus ends up embedded in it.
* Atavus (i.e. modern humans). Then a meteor storm forced the Atavus into slumber, allowing humanity to rise.
* A tax collector's house is raided in connection with his stalking of a political rival! This has since mushroomed into allegations that Gaetz was in a pay-to-play scheme that included paid travel and hiring escorts in exchange for doling out political favors to marijuana companies, attempted to obstruct justice by intimidating a witness, and had inappropriate relationships with female staffers.
* A Taxi Driver is a cynical taxi driver who is unwittingly thrown into a student uprising in Gwangju when he agrees to take a German journalist there.
* A taxi driver picks up a suspicious man at the airport. Once the man has taken seat in the cab, he draws a gun and forces the cabbie to drive him into the woods.

Once they are there, the man drags the driver out of his cab and rapes him behind a tree. Then he orders the cabbie back into the car and flicks his wallet. "Okay, here's a thousand bucks." Cue the taxi driver gasping. "A thousand bucks?! I would have
* A Taxing Woman the heroine gets a line on the bad guy's criminal empire by auditing the bedsheets and laundry at one of these. Also, the theme rooms depicted have to be seen to be believed. These hotels are even clearly visible in real life from the Narita Express train (or at least they were back in 1995).
* At Barack Obama's 2009 inauguration, Sasha, his 8 year-old younger daughter, was provided with a Scully Box that matched the color of the podium.
* At Baseball games, the crowd will sometimes sarcastically clap and cheer if a pitcher finally throws a strike after a long string of balls and hits.
* At Bertram's Hotel, Canon Pennyfather turns out to be a Nazi war criminal in disguise.
* at best considered to be to Maria Sharapova what Tim Henman was to Andy Murray.
* at best in fact die on the operating table, but fortunately his new Belisarius Furnace pumped his hearts full of stimulants and resuscitated him.
* at best, the Russians have undoubtedly felt that they could do better:
* at best to this, who get largely consistent use, which are Kitty Pryde, Magik, Jubilee (sometimes) and X-23.
* At breakfast, Ian asks Nick how to say "thanks for the food" in Greek; the phrase he gives Ian (which Ian happily says to Maria, his future mother-in-law) means "Nice boobs." Everyone stares at Ian... and then Maria wordlessly
* At Carla and Turk's wedding, Carla's brother gave The Todd a pick-up line in Spanish: "Tengo herpes genetal," which means "I have genital herpes." (Though it should be written as
* At certain times of the year in the polar regions of the earth, the sun will be visible for months at a time. This phenomenon is known as
* At Chef's plagiarism lawsuit, the judge tells him that if he fails to raise the royalty money then he'll go to prison for
* At Cowpens, one reason for this tactic was simply because the American commander expected the militia to run and therefore asked them to just get off a round or two before retreating. Behind the militia was a river and a line of Continental and State troops to keep the militia from running too far. Once the militiamen broke contact, friendly Dragoons rounded them up and regrouped them as a new rear line (this being one of the traditional roles of mounted units). The Continentals were well trained enough to recover from a temporary reverse in the manner described. This battle ended up being the basis for the climactic battle in the movie
* A TDA Love Triangle with Betty, Cody, and Gwenny: Bridgette and Gwen both find themselves slowly developing feelings for Cody after their respective breakups with Geoff and Trent, creating a love triangle.
* A TDA Love Triangle with Betty, Cody, and Gwenny: Cody, as usual. He openly admits being a horny teenager, but he's also a very Nice Guy who will put the girls' comfort and necessities over his hormonal urges. He even feels guilty over having lusty thoughts on Gwen and Bridgette once he knows about their past bad experiences with guys.
* At D-Day, a German officer locks Jun-Shik and Tatsuo in a room with two machine guns, forcing them to fight off the American landing.
* At Dead of Night primarily takes place in the Sea View Hotel, where the protagonist and player character Maya is being chased around by Jimmy Hall.
* At different times during Series 6, all three of the eventual finalists struggled with puff pastry. What's the technical challenge for the final episode? A dessert made with puff pastry. Paul freely admitted that he picked it specifically to see whose puff pastry skills had improved, and the bakers recognized what was going on as well.
* At Disneyland Resort in Anaheim, there are days when the managers all dress in character costumes for a day. The sheer number of "forgotten" major characters is mind-boggling, and the fact that they
* At E3 2013, Geoff Keighley interviewed Don Mattrick (the then-President of

Interactive Entertainment Business at Microsoft) about the
* A Teacher (2020): The premise of the series is an affair between a male student and female teacher. It explores the damaging fallout on both parties, especially how it psychologically scarred the student.
* A Teacher (adapted from the movie of the same name) is an entire series dedicated to a relationship between a female teacher and her male student, followed by the devastating fallout once the relationship is revealed. The show initially seems to portray the teacher in a broadly sympathetic light, but it eventually evolves to reveal that the affair had terrible consequences for the student's mental health and affected him for years afterward.
* A teacher at Mahora mentions off-handedly that with the links between the magical and mundane worlds severed, the magic world will be advancing faster—about six times. This will let Ala Alba return to school before summer break is over, despite spending months away.
* A teacher at the school, Mr. Morrison, worries that his knowledge of the
* A Teacher's Glory after Zabuza breaks him free but tells him to sit the fight out.
* A Teacher's Glory Anko ends up on both sides of this tropes. She feels this way toward the Third Hokage, who took her into his trust when everyone else suspected her of helping Orochimaru, and she earns this from Ino for giving her a frank analysis of her skills and actions, encouraging reassurance, and advice.
* A Teacher's Glory are giant arboreal carnivorous sloths, but they are still creatures even jonin prefer to avoid when they can.
* A Teacher's Glory blankly kills every enemy who resists. Afterwards, she nearly kills a prisoner who starts making noise about breaking free, then vomits once Sakura talks her down.
* A Teacher's Glory, but intersperses it with breaks to train their minds and behaviors, such as taking Sakura on shopping sprees every ten days where they get all dolled up and practice infiltration skills by imitating useless noblewomen.
* A Teacher's Glory has Zabuza sit down to a (non-poisoned) picnic with Asuma and Anko before they fight, because Asuma believes getting accurate information on Mist is more important than immediate killing Zabuza.
* A Teacher's Glory Naruto develops a technique that does this... explosively. It temporarily burns out victims' ability to use chakra as well, which is useful to keep prisoners from escaping.
* A Teacher's Glory quips "Are we having fun yet, cousin?" just before she collapses at the end of their fight. Awesome because it was almost played straight: Neji collapsed seconds after she did.
* A Teacher's Glory, Team 7 decides to get Naruto medical attention after he's badly injured in the Forest of Death rather than try to continue the exam. It helps they all realize there would be plenty of promotion opportunities in the future.
* A Teacher's Glory the first time Sasuke finds any girl attractive is when he watches Sakura gut and dissect a tiger he and Naruto just killed.
* A Teacher's Glory the invasion was, the corruption is actually more important and devastating after all.
* A teacher, while learning Welsh, was late for one of her classes due to the cold weather and the slippery pavements. She rushed in and excused herself, in Welsh, due to the ice on the street. Unfortunately, ice or frost (rhew) is easy to confuse with sex (rhyw). Hilarity ensued.
* ate all the rest. No honor among thieves doesn't begin to describe that.
* A team at Brigham Young University has created a real holographic image projector. It works by quickly moving a small particle around using a laser beam. Currently the projection is really tiny, but it's the closest thing we have to this trope in real life.
* A team called the Atlantic Schooners, based in Nova Scotia, was approved to join the
* A-Team Firing anyway when local fauna volunteers to turn a beach-volleyball match into an impromptu skeet session.
* A-Team Firing, since soldiers trying to achieve it really don't mind not hitting

any enemies while doing so).
* A team got put out in fourth place by a matter of minutes in season 27 (!) because one of the partners wasn't a good enough swimmer and spent several hours trying to do the obligatory swimming task.
* A team previously in Tokyo and now in Sapporo is the Hokkaido Nippon-Ham Fighters. (The company
* a team together to deal with the rise of the Inhumans, and Simmons being absorbed by the Kree artifact.
* ate a polar bear deserves an honorable mention as well. Actually, the Inuit has legends of the shark attacking kayaks, and although no confirmed cases of human predation exists, given its willingness to eat bears and reindeer, it is not wholly unlikely that it would take a human from time to time.
* A teaser short for the 150th Strong Bad Email has Strong Sad showing off storyboards for a bizarre, avant-garde Strong Bad Email, which involves Strong Bad checking his email in the middle of a desert, Coach Z holding a pear covered in googly eyes while coffee pours down his face, Strong Bad talking with the embodiment of his innermost desires (played by a masked Homestar), and the reflection of Strong Bad shedding a
* At easier difficulties, mages (Adepts) rule, when you can take down hordes of space zombies without firing a single shot.
* A Tecate "cerveza" radio commercial aired in California in 2007 has the word "beer" beeped out.
* A technical example in Thor Odinson — he'd been sort of de-ascended into James Potter as part of a first run at the humility thing — (it went kind of pear-shaped) and dying as James essentially resulted in his ascending into Thor once more. Since this was hideously traumatic and decidedly unwilling, he went somewhat nuts and had to have a memories removed.
* A Technician can make use of the Fugitive's movement boost to set up turrets and mines quickly before an assault starts, and pairing with the Tech's sniper perks with the Fugitive's Run-and-Gun perk will make them an accurate yet fleet-footed marksman, with both the former and latter setups thinning out assaults before they get too close while allowing them to quickly reach and reactivate stalled drills, or reload empty turrets.
* A technique he'd had a chance to practice on Ein four episodes earlier, when the pooch threw himself off a bridge to escape a dognapper.
* A technique popular with some British Drill Sergeants, especially on very rainy days, is to parade the recruits, and ask, politely:
* A tech support specialist tries to help an elderly man with a computer issue, but the man keeps referring to the problematic program as "Truman". After some conversation, the specialist realizes the program in question is Textbridge OCR. He's then able to help the man with his issue, but never figures out where he got "Truman" from.
* at Edward and Nancy's wedding, "Ever, Ever After" is interrupted by her cellphone ringing which she throws away.
* a teenage Bellatrix Lestrange was described as one of these, playing mind games and saying things just to get a rise out of people.
* A teenage boy fell in love with a sexbot that his rich parents bought him. So when his sleazy stepfather decides to "use" the robot in his absence, he kills him out of jealousy and ends up in an Iso-Cube.
* A teenage boy holds his classmates hostage with a bomb strapped to his chest but it turns out he does not control the bomb. The bad guys sitting in a van nearby are telling him what to do and threatening him.
* A teenaged patient asks Dr. Cox how he's doing, and he replies that he's recently lost the ability to process dairy, leading to Carla saying "Woah! T.M.I! Am I right, Josh? Too Much Information?" Dr. Cox then tells Josh that he'll have a word with his parents "and you can chat with
* A teenage girl accidentally kills her younger brother when he catches their uncle forcing himself on her (which results in a child) and threatens to tell their mom; as the unfavourite, she knows her mom would sooner believe she'd forced

herself on her uncle than the other way around. Her mother later kills her husband who loudly tries to take the blame for killing her son. She even acknowledges that all this could have been avoided if she'd been a better mother so her daughter could feel like she could trust her.
* A teenage girl goes missing and it's believed she was murdered by a man on trial. She's found having an affair with her music teacher and convincing herself they're in love. Her mother is upset as she
* A teenage heir, Yukitaka, demands that his 22-year-old butler, Munukata, perform his household duties consisting of a maid uniform in chapter seven of the manga,
* A teenager does this for Dawn when they're out parking — he turns out to be a vampire, and Dawn is seen at the end of the episode cradling his letterman jacket after staking him.
* A teenager got into a fight while suspending the bully for harassing a disabled student.
* a teenager's bike so he can get to the zoo before Tony, Harry and Teddy do.
* a teenager who killed his mother's murderer, only for the victim's relatives (backed by a lobbyist group) to sue in civil court to block the deal, which could set a very problematic precedent. So how do they solve it? When the opposing attorney in the case calls the criminal defendant as a witness, Novak and the judge persuade the defense attorney to let him testify in the civil case, knowing that in order to make his point, the plaintiff's lawyer will have to badger the boy into talking about the shooting. As soon as he does, the defense attorney appeals to the criminal judge for a mistrial, based on the fact that the defendant has just been compelled to incriminate himself in court, thus violating his Fifth Amendment rights. The criminal judge agrees and declares the case dismissed with prejudice (meaning he can't be re-tried on those charges). Casey immediately uses this as a basis to argue for the dismissal of the civil case, since there is no longer anything to fight over. The civil court judge agrees and dismisses the case.
* A-Teens Teens, who covered Abba songs for a late 90s/early 2000s tween audience. This gimmick only lasted on album before they broke off into a reasonably successful standalone group.
* ate her. Some versions also have Hera giving birth on her own to Hephaestus as a response, etc. (Of course, the second myth would contradict most versions of the myth of Athena's birth, because they claim that Hephaestus used a hammer and chisel to split Zeus's skull open and free Athena, meaning he would have had to have been an adult at the time.)
* Ate His Gun: Someone commits suicide by firing a gun after putting it in their mouth.
* At eight-year-old Shar's new school, naturally there are boys who give her a hard time when she cries at things that remind her of her murdered parents. Alex lets the school staff know about the problem, pointing out that it's possible she'll flip out and scratch them up with her nails or something. The real danger isn't her nails, though, it's her epic-level
* Ate It All: Character eats all the food, even though it was meant for a group.
* ate it that could take over other people's bodies, eventually devouring them from within.
* A televised commercial for Irish Spring body wash has a feisty redhead deliver an ass-smack to an athletic lad in a pub. Viewable on
* A television ad for Bet 24 (an online gambling service) features gaffe-prone sportsman Mark Wary (previously seen on comedy programs
* A television show can do this with its story arcs; alerting you that just because the episode ends, the plotline will continue. Take the
* Atelier Annie books are rather weak physically but give their users decent magic boosts.
* Atelier Annie. The bizarre part is that they genuinely mistook him as a girl, while his co-workers in the Committee see him as a guy just fine.
* Atelier Annie while delivering a package next door to Annie's workshop, and even with a globe and a compass he still gets lost. He was in denial until he gets the compass fixed.

* Atelier Ayesha: Includes 2 characters previously DLC on the PS3 version, as well as new bosses, a hard mode and gameplay tweaks.
* Atelier Ayesha, it holds tomes on a large number of subjects from before the Dusk (though naturally, the only people known to come there are after either alchemy tomes or stuff on flowers). The only problem is that it's filled with rouge Slags (aka worker robots) that the lone caretaker can't really do much about. Not helping is its location in the middle of a great big hole in the middle of a large, dense forest.
* Atelier Ayesha: The Alchemist of Dusk: At one point, Nanaca mimics her brother Juris's harsh tone, only for him to approach right behind her.
* Atelier Ayesha: The Alchemist of Dusk may be in-universe butch, but visually this would be a very Feminine/Feminine couple.
* Atelier Escha & Logy: Alchemists of the Dusk Sky after the vaccine she submits to Central is chosen as the best of the submissions.
* Atelier Escha & Logy: Alchemists of the Dusk Sky, Nio asks Escha and Logy if they heard a strange voice. Logy accidentally let slip that he heard Escha talking in her sleep after she fell asleep while doing paperwork.
* Atelier Escha & Logy: Alchemists of the Dusk Sky, though in that it's less that she takes a break, and more that she takes a break while she's ON THE CLOCK. Anyone who's worked retail can tell the difference. On the flip-side, Logy describes the cauldron process Escha uses for synthesizing items as inefficient compared to the methods in Central City. And, indeed, whereas it can take days to synthesize items using the cauldron, weapons or armor imbued by Logy always take only a day to complete, no matter how good they are. And the disassembler works immediately.
* Atelier Escha & Logy, you can only carry over battle equipment (weapons, armor, and accessories) to New Game Plus. However, you will eventually unlock a research subject that gives you the adventure equipment (usable items such as bombs and medicine) from your last playthrough. Additionally, the true ending requires you to have finished the games as both Escha and Logy, making it only available during New Game Plus.
* Atelier Firis: The Alchemist and the Mysterious Journey, sometimes when using the rest option in the Atelier, Firis will mutter stuff in her sleep such as that she wants to go outside, or saying to her parents that she did well.
* Atelier games have New Game Plus, which is activated by loading a save file from after the ending cutscenes. You usually get to keep whatever equipment your characters were using, but everyone is returned to level one. Some games also have special content exclusive to New Game Plus:
* Atelier Iris 2 had something similar to this when transitioning between Felt and Viese.
* Atelier Iris 2's Max addresses Felt by increasingly bizarre permutations of his name, at one point referring to him as "Klein" (the name of the protagonist from the previous Atelier Iris game). If corrected, he'll call him Felt for the remainder of the current conversation, so apparently he's just that bad with names.
* Atelier Iris 2: The Azoth of Destiny. Equipping a new weapon, armor or accessory will grant a character a skill, but unless you spend some time grinding to master the skill, the skill will only remain available while said item is equipped.
* Atelier Iris 2: The Azoth of Destiny. The all-powerful sword (capable of destroying continents) insists on killing to get rid of obstacles and complains about Felt's moral choices.
* Atelier Iris 3: Grand Phantasm falls in love with the short receptionist Phenyl after she beats him continuously. Following this scene, he is referred to as having newly-discovered "masochistic tendencies" in the character codex.
* Atelier Iris 3: Grand Phantasm. Their young get together in neutral zones and commiserate over how idiotic they think their parents are acting.
* Atelier Iris 3 simply wants to use the Escalario to stop Uroborus from awakening. To do this, he tries to kill Edge and Nell, and kidnap Iris, the only person able to use the Escalario.
* Atelier Iris after overhearing him recite a declaration of love and thinking he

was talking to her.
* Atelier Iris: Eternal Mana has Lita thrown an insult at the protagonist when they first meet because he couldn't beat a hawk monster on his own, and we're supposed to know they're a couple from the intro a few minutes before that.
* Atelier Iris: Eternal Mana. Veola, a shopkeeper and inventor, is able to use books you find throughout the series to discover formulas for powerful items, and often claims that Lita would only use the books to bash someone on the head with.
* Atelier Iris series to be released outside of Japan. Its predecessors still haven't been.
* Atelier Lydie & Suelle: The Alchemists and the Mysterious Paintings:
* Atelier Lydie & Suelle: The Alchemists and the Mysterious Paintings) Throughout the game, the player's role is to control the two main alchemist characters, Lydie and Suelle, as they complete objectives and tests to advance in this ranking system with the goal of becoming the best atelier in the kingdom. You start at Rank G and the final task of the game is to take the test for Rank S. Completing it locks you into the game's ending.
* Atelier Marie and Elie programs going on for both the original games and the PS2 compilation for well over a decade, before a French team finally delivered the game in English in March 2018, roughly 20 years after the games first hit shelves in Japan.
* Atelier Meruru: Much like Totori, it also included new dungeons, enemies, costumes and bosses, along with other tweaks.
* Atelier Meruru: The Apprentice of Arland, if at any time you allow Meruru's popularity to drop to zero, then Rufus comes to the workshop, chastises her, and then sends her before her father Dessier, who is so mad at her that he reneges on his promise and ends her alchemy studies immediately, followed by a Game Over without even getting the Bad Ending (and thus no "Castle Life" Trophy.)
* Atelier Meruru: The Apprentice of Arland, Meruru gets this from her father, Dessier, if she achieves her goals.
* Atelier Meruru, you can only see Gio's character events during NG+. Finishing his events will unlock him as a playable character, and he is necessary for some endings which makes them NG+ exclusive.
* Atelier of Atelier Sophie and Atelier Firis removes the english dub completely.
* Atelier Rorona (by her own admission and that of her peers) and doesn't digest long names very well. She calls her childhood friend Cordelia "Cory", the dancer Lionela "Liona" (and she also has nicknames for her two kitty puppets), and tries to get Sterkenburg the knight to answer to "Sterky", but it doesn't stick (most people call him "Sterk" anyway).
* Atelier Ryza 2: Lost Legends & the Secret Fairy difficulties unlocked right from the start, which is the only way the game will pose any kind of challenge for an experienced player.
* Atelier Ryza 2: Lost Legends & the Secret Fairy in one shot. Cutscene Power also applies to the Colossus Soldier itself, since once your party regroups and heads back to fight the boss, it's not particularly strong, and any decently-equipped party should have little trouble taking it down, despite the preceding cutscene showing it wiping the floor with the heroes.
* Atelier Ryza 2: Lost Legends & the Secret Fairy: The Emerald Band isn't exactly a pistol, but it's close enough: it's a bracelet which uses alchemy to launch a magical string which Ryza can use to swing across pits like Tarzan.
* Atelier series don't have an antagonist, as the plot usually revolves around proving one's self or reaching goals.
* Atelier Sophie: The Alchemist of the Mysterious Book. By the end of the game, they're "looking forward to spending more time with each other." In the next game they're travelling to the Examination together, though by that time their relationship is one of equals, as Sophie has become a master alchemist in her own right.
* Atelier Sophie: The Alchemist of the Mysterious Book Sophie's companion Plachta is a talking book who also floats in the air.
* Atelier Totori: Included more content in the form of new dungeons, enemies,

costumes and integrated DLC.
* Atelier Totori Plus garnered attention shortly before its release outside Japan by receiving the highest rating in Australia possible (R18+) without getting banned entirely. Averted in other regions. Especially ridiculous considering the PS3 version released only two years prior with a very tame PG rating.
* Atelier Totori: The Adventurer of Arland of this. In nearly every conversation with him, the characters freak out after his first line and wonder when he showed up. In his case, it's because he has so little presence that even his own daughters often forget he's there.
* A telling of "The Legend of John Henry" was made in the 1970s (nominated for an Academy Award) with (mostly) still pictures that evoked 19th century photography.
* At Emma's first birthday party, Joey didn't realize they needed to bring presents. He improvises and does a 'dramatic' reading of one of Emma's favorite books. It sounds like a recipe for disaster, but her parents and grandparents actually love it and he earns points for moving everyone to tears.
* A templar named Carroll guards the docks and only way to the Mage's Tower. Showing him the treaties will elicit this response from him:
* A "temporal physics" law justifies the three-person-team combat system: no more than three people can jump in time at once (although the universe apparently allows single-person jumps, like
* A temporary cease-fire to gather the wounded from the battlefield is broken by a suspicious German soldier.
* A temporary example of an abandoned theme park was Kentucky Kingdom in Louisville, which closed in 2009 amid the bankruptcy of Six Flags (which had operated the park) and remained closed until
* A temporary static effect may appear, combined with an ominous sound effect and a lowered field of vision.
* A temporary version occurs whenever a human with an unlocked Aura uses a TM to learn a move in
* a ten-floor hospital, this refers to a patient near death; i.e. soon to be transferred to the afterlife. A Rocket Room is a ward with a high rate of these.
* a tenuous hold on reality, but he's a genius when it comes to assembling and programming computers.
* A teratoma is a type of tumor in which tissues of very different type (compared to tissues which would be normal for that location on the body) may form
* a terminally ill new character, has decidedly lower stakes than other arcs; the B-plot involves Asuna mending her relationship with her mother. Both are relatively lighthearted compared to the preceding Phantom Bullet arc and the following "Alicization" arc.
* A term that's gaining in popularity is "Affluenza", where someone's wealth is claimed to lead to moral decay because of their firm belief in this trope. This proved controversial in 2013 when it was used as a legal defense
* A Terra Cotta Warrior has an immortal falling for the reincarnation of his old flame.
* a terraforming device both sides were intended to activate together.
* A terrified BLU Spy drops an entire cinderblock after he upsets a RED Heavy by stabbing his Medic in
* A terrorist attack on a U.S. logistics convoy in Iraq left several soldiers killed or injured early in the fighting so a contractor truck driver picked up a rifle from an injured soldier and started fighting alongside the rest of the soldiers. The convoy commander even stated that the driver's actions played a substantial role in driving off the attack. Said contractor was awarded a Bronze Star for Valor and subsequently fired for violating the above-stated prohibition.
* "A terrorist doesn't let strangers into her flat because they might be undercover police or intelligence agents, but her children bring their mates home and they run all over the place. The terrorist doesn't know that one of these kids has bugged every room in her house, made copies of all her computer files and stolen her address book. The kid works for
* A Terrytoons cartoon from the mid 50s featured a pelican as an antagonist. The

singers in the background noted that the pelican's beak can hold more than his...(
* A tertiary storyline from the first half, Regina's search for the Author in order to find her happy ending, dominates the second half of Season Four, as it becomes a race against Rumpelstiltskin and the Queens of Darkness
* A Tesco's (British supermarket) commercial does the taking scissors to version, with the point being that the (admitted quite nice looking) clothing is so cheap the partner/husband is simply able to buy a replacement.
* ate some bad poke" after atomic testing done in Pacific Ocean. The radioactive seafood he consumed gave him the ability to shoot force beams out of his eyes.
* "A Test for Robyn": Robyn puts off studying for a major history test - so much that she can't even answer simple questions about the material in class - and is forced to cram the night before. On the day of the test, she's confident at first but goes blank during the test and resorts to cheating. Afterward, she tearfully confesses and is allowed to retake the test because of her honesty, and resolves to study for tests way in advance from now on.
* "A Test of Strength", a pirate being sucked back into the latter ends up crashing into her and sending her tumbling with him back to his ship, where she is promptly captured by Hondo.
* Ate the Spoon: A substance is shown to be highly corrosive by having a spoon dissolve the instant one tries to use it on the substance.
* Ate the Spoon: A substance is shown to be highly corrosive by having it destroy a spoon being used on it.
* ate (uncle or aunt). There seems to be considerably less stigma compared to the American counterparts, though. The English terms "sir" and "ma'am" themselves are considered safe and neutral default address in most situations.
* At every Notre Dame football home game, without fail, the 1812 Overture will play at the end of the third quarter, after which an Indiana state trooper will dispense safety advice that concludes with an incredibly lame
* A textbook example occurs in a YA novel by Steven Oftinoski that reads in some ways like an homage to
* A textbook example of the narcissistic gloating Jerk Jock is superstrong Captain Hammer, the nemesis of Dr. Horrible in
* A textbook used for sixth formers in the UK took great pleasure in explaining just why so many aristocratic Russian women fell for Rasputin. "This is known as 'liking a bit of rough'."
* ATF agent William Queen spent two years undercover as Billy St. John, a member of the Mongols motorcycle gang, and admits he grew to liking the gang he was in and found them kinder than many law-abiding folks he knew. He felt somewhat sorry for turning them in when his job investigating and spying on the gang was over.
* AT Fields...which halts it for a bit, but it's no worse for the wear even minutes afterward. Later, the Fifth Angel Ramiel shrugs off firepower that would put the above paragraph to shame.
* At first, Annie seemed indifferent to Jack's attempt to flirt with her in chapter 31 of
* at first, anyway) example: Harry Dresden and Karrin Murphy. (He's canonically 6'9"; she's five feet tall.)
* At first, anyway. When he gets upgrades that allow him to experience pain and fear, he begins to wonder if humanity is all it's cracked up to be.
* at first. As the author put it, "But you said nothing happened last time," practically sounds like a doctoral thesis coming from a character known for lines like "Your fuck is shit, dickass."
* At first, battles were a lot more common and weren't treated nearly as seriously as they are in later books. In later stories, an border skirmish is a big deal and cause for concern about Clan wars, where in the early books it was the standard response to finding a trespasser: fight first, ask questions later. ShadowClan driving WindClan out in the first book
* At first, Cavalier and Skybolt only get mentioned to show how dangerous The Don really is, and why The Don runs the campus. They're central to the Fey and Generator story "Christmas Elves". And then what they do next drives a lot of the

plots for Winter Term.
* At first, even Black Mage seemed to minorly operate on this (well, more
* At first glance the German attacks on France in 1914 and 1940 seem eerily similar. In reality this is an imperfect example. Fall Gelb was significantly different from the Schlieffen Plan. In 1914, the Germans tried to bypass the French army and take Paris by going through central Belgium. In 1940, they feinted as if they were going to do that again, drawing the best and most mechanized British and French units into northern and central Belgium to stop them, and then cut through southern Belgium to encircle those British and French units, forcing them to retreat through Dunkirk. In short, Fall Gelb succeeded largely because the Allies were expecting a repeat of Schlieffen.
* . At first glance, the last few sentences are unintelligible gibberish. However, if you read the story carefully, they become completely clear.
* At first glance, the model of Ultramarines Second Company Captain Cato Sicarius makes you think, "Wow, that's a lot of bling, looks pretty gaudy to me." Then you read his fluff, and you realize that
* At first glance, the Order of the Harvest Moon from the adventure game
* at first glance, the photograph on the right appears to be an advert for an expensive watch, but it's actually a continuation of the advert on the left, for a laptop.
* At first had feelings for his mother. This gets weird seeing how he is openly disgusted at his mom's sexual advances in every other comic.
* At first, half bloods had to pray to their parent, or focus most of their energy to use powers like lightning bolts or huge waves. But by the final battle, Jason manages to summon a storm, and Leo enough fire, to defeat Gaia, without breaking a sweat.
* At first, Harry is hesitant to tell Murphy or the Alphas much about the real goings-on of the supernatural world for precisely this reason; he notes that the White Council gets real uppity about vanilla mortals, especially law enforcement, knowing anything about them. Fortunately, the White Council doesn't really learn that Murphy is aware of their existence, and they're too busy with the whole war against the vampires to terribly care.
* at first, his rage boils over and he kills Shisui, whose only crime was trying got get his friend to calm down, when he also mentions that Fugaku also lost the Uchiha Secret.
* At first, it looks like Grandpa Rome likes only his youngest grandson Veneziano and completely neglects older grandson Romano due to Veneziano having more talent than his brother, but it later turns out that he
* At first it seemed like May would join the school cheerleading squad, and one cover even showed her in the outfit, but it's becoming increasingly unlikely with each new issue of
* At first it seems to be the same with Simon and Isabelle, because he is a vampire, and she is a
* At first it's just hinted at, with the titular blue alien trying to fit in at
* At first it's left unclear if Queen Maeve is a closeted lesbian or bisexual as she dated Homelander (in terms of him, it was to keep her public image acceptable) and dated a civilian woman before, even though she is only involved with men in the comic.
* at first later and it's hard to remember that he seemed wimpy at first.
* At first, Mexican people claimed they didn't understand Panamanian singer Flex/Nigga when he talked. Fortunately for them, now he talks a lot slower.
* At first, old Whitebeard appeared to be like this, ripping up Shanks' letter and demanding he come in person to deliver his message. However,
* At first, one shot of the Zat gun was an Agony Beam, but it eventually became "phasers on stun."
* At first, Sam Tolhurst comes across as a sympathetic character, with a tragic backstory, (on the run from accomplices of her drug dealer husband) and is portrayed as a good match for Jack. Unfortunately, when they get engaged, and especially after getting married, she becomes a possessive controlling bitch,

especially towards Jack's ex-wife Martha. At first, this is justified (specifically when she walks in on Martha wearing her wedding dress), but the writers derail her during her exit storyline. She murders a criminal who had been blackmailing her to force her to hide him, after which we learn that she had lied about her backstory — she was the ringleader in her husband's drug operation and was on the run because she'd allowed him to take the fall. After she's exposed, she kills herself and almost succeeds in framing Jack and Martha. The worst part is that the writers left several details out of this retcon, (the fact that she'd tolerated Shane's drug dealing up until she'd witnessed him killing someone in cold blood, and the fact that he'd been doing it to raise money for their terminally ill daughter). While it would have been entirely plausible by this point to handwave these as Sam's lies to Jack, they are unmentioned in the letter which reveals the truth, and Jack himself doesn't bring them up when he confronts her about it.
* At first, she doesn't see the problem with her ability, which basically means she can have sex with whoever she wants and given that she's a
* At First Sight features a rare male example in Val Kilmer's blind character.
* At first sight, King Verence II and Queen Magrat from (among other novels)
* At first, the melody, while it was waiting for words, had the dream-logic title
* At first, the premise is fairly Enlightenment. The villain, Rafael Montero, is a Spanish colonial governor and aristocrat, wedded to the old ways and firmly believing in his right to rule the peasants, who's chased out of office by the Mexican War of Independence. The hero, Diego De La Vega, opposes him, fights for the people he oppresses, and seems supportive of said revolution - at any rate, he expects that it'll allow him to hang up his cape, since there'll be no more need of Zorro once the Spanish are gone. However;
* At first there was the United Earth Government, born 90 years after the
* At first, the T-1000 seems like it's the soldier the resistance sent back to protect John, until the T-800 shot him multiple times and he reformed afterwards.
* At first the team suspects he didn't do it but he confesses. He only killed the young man out of mercy because healing him would mean he goes right back to cold, blooded torture. The young man's surviving sister chooses to not press charges, clearing Ducky of legal guilt but morally Ducky finds no absolution in this action. He must bear the weight until he dies.
* At first, the Wastelanders welcomed Cross and his Authority as saviors; hoping-beyond-hope that they would crush the deranged cultists and bandit tribes and bring-about a new golden age for Humanity. In Cross' mind, he did just that; however his tyrannical methodology alienates the local populace from his cause and sparks a
* at first was thought to have been stabbed with a spear but it turns out he died from being pushed of some stairs onto a spiked-fence. 5 years prior, the victim himself (allegedly accidentally) pushed a fellow actor from the same stairs and onto the same spiked fence while filming a scene, killing them. What makes this worse, is that the person who killed Hammer did so in self-defense, when Hammer himself went to get his revenge on them for his treatment after that accident he had caused. Thus it's more then likely that Hammer was accidentally killed in the exact same way and place that he accidentally killed someone himself, due to the fact that he had accidentally killed said previously mentioned someone.
* At first Willow and Tara are this to the viewers, as tons of implications are dished out long before they outright say anything. The rest of the cast who don't interact with the two of them together much are far more surprised to find out. Lampshaded when
* At Frankfurt, they were unsuccessful in the group stage, resulting in them starting off in the Lower Bracket. And then they performed what is arguably the greatest Lower Bracket run of all time, defeating Fnatic, Mineski, Virtus.pro, TI5 runner-up CDEC Gaming, EHOME (who also had started from the Lower Bracket as well), and TI5 champions Evil Geniuses to face off in a grudge match against Team Secret, and capped off their unbelievable run winning 3-1 against them.
* At Freeze’s hideout, Poison Ivy ambushes Robin, and after interrupting him when he tries to arrest her, offers him a kiss. Batman ends up accidentally

interrupting them right before their lips meet when Bane throws him over the rails, startling them both.
* ATF ships tend to be spiky and angular, with lots of silvery gray (
* At Gates Edge, a poltergeist that lives in his office. They become good friends and Roy manages to invite the ghost to live with him as a roommate.
* At Gates Edge doesn't need to sleep but he would find it soothing to watch his friend Roy sleep. Roy admits that he would have found it creepy for anyone else. Since it’s Edward, who he knows is harmless, he just finds it cute.
* At Gates Edge, Edward died to save his brother who was taken by the Gate of Truth in their attempted resurrection of their mother. Edward is unable to move on, he believes he can’t because he committed the sin of human transmutation.
* At Gates Edge who takes commitment very seriously, but is physically incapable of touching due to being a ghost.
* at girls, though in the 2010s they revamped it for an unisex audience. Another company has the "Creepy Crawlers" oven aimed at boys. It creates candy versions of "gross" or "scary" animals like spiders or scorpions.
* ATG Ms rifled gun (as tested by the British army in the Challenger Lethality Improvement Programme (CLIP)) and being the fastest of the western tanks. The doctrine of the German army is to quickly drive up to the enemy, fire a few rounds and then get the hell out. In training, experienced Leopard 2 crews hit around 95% of the target while standing and only 3% less accurate while moving. There are even (forbidden) techniques of getting out three rounds in about five to seven seconds, which includes one round in the cannon, one in the hands of the loader and the other on the foot of the loader. After the first round is fired the loader rams the second in and pushes the third up with his foot, after that he can quickly ram down the third one. Much faster than any auto loader on the Russian T-90 series. To put is simple: This tank is fast and packs a hell of a punch.
* At Ground Zero itself, many people were forced to flee for their lives to escape the collapsing buildings. Shown in the documentary
* A Thailand commercial shows a woman somehow increasing her bust size using her "love handles". What's the product?
* a Thai person calls his home country poor but refers to China as "Pooh". To add insult to injury, he added a photo of people in a Polish city gathering around in Pooh Bear suits. wearing Pooh Bear masks as an insult to president Xi after Myanmar protestors were disappointed upon finding out that China has voiced their open support for Myanmar's military government.
* Athaliah (Jezebel's daughter) is said to have had all of her grandkids killed. Only one of her grandsons was saved, so she almost destroyed David's royal line.
* At Halloween, Frankenstein's Monster, Count Dracula, a Mummy and a Werewolf decided
* Athamak sailwings are a very ancient race, but have been steadily deteriorating for a very long time. They must periodically undergo long hibernations, but their brains decay during these periods and cause them to awaken as beasts until they can consume a large quantity of brain matter; even when they do this, they often regain only parts of their previous faculties, decaying in intellect and knowledge with every cycle. They are also unable to reproduce, and thus cannot make up for any losses in their numbers.
* At harder difficulties, everything is pretty much immune to those abilities until their primary defense is stripped, making the direct damage classes (Infiltrator and Soldier) the best. That said, leveling the Warp power, by taking Energy Drain as your secondary power and picking the Assault or Sniper Rifle on the Collector ship, it is possible to build an Adept that can deal death at all levels.
* Atharon , acting and behaving the same way author would have done in the world. Only Nick has six-pack instead of beer belly. And magical powers.
* Atharon averts this. Although magical resurrection is possible, it takes a lot of energy and carries a heavy price for the person doing the resurrection.
* Atharon. To even survive in that world, a person has to be a master of something, whether a fighting skill or carpentry (so you're hard to replace). Some of them work as a teachers for the new generation.

* A, the 4th Raikage—Killer Bee's older brother—is more of a straight example: he's
* Athea is almost always seen with her owl, except for that time she was an anthropomorphic owl herself.
* A theatre company stages a play called "The Last Man" that resembles the plot. When Yorick hears the ending, in which the last man commits suicide, he comments that it's a terrible ending.
* A theatre in London did one of Shakespeare's plays using the original sounds. It was almost incomprehensible to the modern ear.
* At height of their fame, Family Force 5 were often promoted as a Christian alternative to
* Atheism is common in Lamordia, a domain where mad-scientist-style skepticism prevails. In other domains, heretical philosophers sometimes speculate that divine magic is actually derived from the Dark Powers, rather than the gods it's commonly attributed to; however, as most ordinary people have never even
* Atheist: a person who doesn't believe in gods / athiest: the most athy person.
* Atheist Eve started out with a short bob, but was suddenly drawn with long hair in a strip focusing on evolution. It's been that way ever since.
* Atheist Hell consists of spending eternity listening to badly thought-out arguments for Satan's existence.
* Atheistic Satanism like that of Anton Lavey on the other hand do not believe in any form of survival of the Self after death, but they do regard the individual as the only true "god" a Satanist should worship, in other worlds, for every Satanist they themselves are their god. This is why in Laveyan Satanism the person's birthday is the most important holiday.
* Atheist prevents anything pertaining to the gods, such as praying, using altars for curse-testing or sacrifice, and buying Protection from priests.
* Athel Loren is also home to hosts of tiny malicious creatures called
* Athel Loren with a host of even more capricious and supernatural forest spirits:
* A theme of the series as a whole. Summed up in one book that says that to be human is to be "the place where the fallen angel meets the rising ape."
* A theme so common in youth-oriented music from the 1950s and early 1960s
* a theme. The film came out in 1979, thus predating trance music as such.
* Athena also has her fair share of tics, but one actually stands out as the developers have
* Athena and Helios leave an unconscious Kratos at the very same cliffs where he will attempt suicide
* Athena and Hera supported the Greeks during the Trojan War because they resented prince Paris for choosing Aphrodite over them in the infamous beauty contest.
* Athena Asamiya she seems to have gotten over it and has nothing but respect for him.
* Athena, Athena loses one hit point each time she swings the powerful Flame Sword. This can't kill her, because the sword powers down when she gets low on health.
* Athena cannot 'turn off' her powers, which she's had since birth, and therefore barely understands the concept of privacy.
* Athena Cykes, a lawyer, has a phobia of courtrooms. This stems from a childhood incident where
* Athena Cykes" in court). In the third case, Athena notices that Juniper is unusually distant when she stops using the nickname.
* : Athena Cykes initial goal is to get her best friend Juniper Wood and her co-worker Apollo Justice together. After she is successful, she extends her quest to other couples such as Maya Fey and Simon Blackquill.
* Athena Cykes is a capable junior lawyer...who stops every other case dead in its tracks for an impromptu therapy session using a highly advanced computer system she keeps in her necklace.
* Athena Cykes to an extent too, she's happy to make noise be it with her mouth, blowing a animal trainer whistle (shown if you show her said whistle in the DLC case of Dual Destinies), or slamming her desk as hard as she can. She even voice trains with Apollo as shown by the Prologue anime of Spirit of Justice.

* Athena Cykes), willingly testifies that she saw Trucy murder Valant and commit other crimes in #1.
* Athena, goddess of wisdom, was associated with owls, and owls show up on ancient Athenian currency (Athena being the patron goddess of Athens).
* Athena has knocked Clara unconscious; going so far as to lure Athena away from her so she wouldn't see it, in case she awoke.
* Athena is actually a robot created by Drakken. She reveals this to Kim when she opens her face and shows off her circuitry.
* Athena is also on record for turning Arachne into a spider. There are various versions of just exactly why:
* Athena is the goddess of Strategy, because she is the goddess of science and crafts. Ares is the god of fury and bloodshed. So they sort of divide up aspects of war.
* Athena is the goddess of wisdom and intellect and is known for her cunning and inventiveness. Though she prefers tactics and strategy instead of brute force, there are accounts of her incredible physical feats, such as crushing the giant Enceladaus with the island of Sicily. She is also undefeated in combat. In the
* Athena likes to keep her own hands clean and manipulate others to do the fighting for her these days, and seems to enjoy the chessmaster adaptations her little brother Ares has developed over the years to combat her. She will also fight herself, but usually that ends things too quick for her liking and is not really her style.
* Athena may count as this due to being the one who taught Hayate. She certainly had skill in the End of the World
* Athena/Minerva, for example, is sometimes a virgin goddess but sometimes described as having kids.
* Athena plays with this one, supposedly being the same age as the male lead for her first two appearances, while
* Athena's a superheroine, who retired because hardly anyone could keep their eyes, or their hands, off her body. 20 years later, she's a single mom who nearly everyone
* Athena seems to have escaped this, likely due more to a lack of screen time or the fact that the story tends to be more serious when she pops up.
* Athena Voltaire A female Indiana Jones much cooler and better-dressed than Lara Croft.
* Athena Voltaire and the Brotherhood of Shambalha, it's her that people are waiting for, and Desmond gets demoted to servant.
* Athena Voltaire and the Feathered Serpentproperly (meaning fatally, for a lot of the Nazis involved).
* Athena Voltaire and the Immortal Power, Major Klimt has dinner with a captured Athena and colleagues aboard her airship.
* Athena Voltaire and the Isle of the Dead is reasonably intact despite having sunk in the Atlantic over a hundred years ago. The damage to the ship (dynamite is required to access the hold) is attributed to the people who sank it, rather than the ocean.
* Athena Voltaire and the Isle of the Dead, this is what happens when people who are already dead are exposed to the waters of the Fountain of Life; the crew of Fontenda's ship were killed in a pirate attack, but then brought back as zombies when barrels of Fountain water which were on board burst.
* Athena Voltaire (which she got involved with thanks to her father, who knew people in the world of travelling entertainment thanks to being a stage magician). She then became a pilot for hire, which is behind most of her adventures. She's good enough to take out attacking fighters more than once without needing to shoot back.
* Athena was associated with carnage and slaughter. When the militaristic Romans aligned myths about Ares to their god Mars (believed to be the father of their founder Romulus), they dropped all the stigma and made him second in importance only to Jupiter.
* Athena was born from Zeus' head, and while in some versions she's his alone in

others she had a mother, the goddess Metis, who was pregnant when Zeus
* Athena was more merciful to Tiresias, who did the same thing; she simply rendered him blind. (Some versions of the myth say she did it simply to ensure he would never again see what he wasn't meant to see.) The myth also says she gave him the
* Athena (who is supposed, and is already a prize-winning manga artist… seriously, with the luck factors so hard down his throat, he really had to be to make it past the age of 8…
* Athena why the Cylons hate humanity so much in one episode. She replies that during Galactica's decommissioning speech during the pilot episode, Adama asked whether humanity deserved to survive. Then she adds "Maybe you don't."
* Athenaze: An Introduction to Ancient Greek contains a gem of a sentence that translates to "Xerxes ordered his men to take the Greeks from behind."
* Athenian crimes had the same punishment, his constitution did set death as the punishment for numerous minor offenses. Unlike the Bloody Code, however, he justified his... erm... liberality with the death penalty by saying that it was the only fitting punishment he could think of for certain minor crimes, and as for worse offenses, there really isn't any worse punishment than death, is there? The Greeks weren't particularly fond of torture at this point. From this, we get the term "Draconian" to describe harsh laws; the fact that his name means "dragon" is merely a poetic coincidence.
* Athenian Navy also tended to be most favorable towards going to war, because being a galley rower was a better-paying and much more prestigious job than was available to them in peacetime.
* Athenians' work. However, they did arrive in the vicinity of Athens in time to have possibly contributed to the Persian fleet's decision to withdraw.
* "Athens and Sparta Adventures" (and Sparta is, in comparison, more chill). She does admit that he is an interesting character to write though…
* "Athens and Sparta Adventures" (as she puts it), something she cannot understand. Meanwhile, while Sparta has his fans, he isn't nearly as popular as Athens.
* Athens and Sparta — Generally speaking, Athens is harmony, while Sparta is discipline.
* Athens and Sparta: Two rival or warring factions are neighboring cities, countries, or ideals.
* Athens definitely had a strong military side and they had reasons to consider their military power as famous as that of the Spartans, notably through the largely Athenian victories of Marathon and Salamis in the Persian Wars. The main difference was that in the time after that Athens concentrated on the naval, diplomatic and economic sides of war. But the Athenians' growing military and economic power was what led the Spartans to decide to go to war against them in the Peloponesian War.
* , Athens is attacked by a Moussaka accidentally rendered gigantic by a ray from an alien spaceship.
* Athens. Nafplio was from 1821 to 1834, until King Otto removed its title.
* Athens to punish the major crimes, and thus death, while inadequate, was still the closest it could get.
* A: The one with a degree in English says "Would you like fries with that?". The one with the Theater degree says "Good evening, I'll be your server tonight. The special of the evening is Medallions of Wild Boar in a Cranberry-Dijon Reduction, served on a bed of Ramps sautéed..."
* a theory is an allegory of the Tower of Babel. It also turns the mask into a punishment from the gods and Link into a messianic figure sent to "redeem" Termina from their "sins".
* A theory that the cast represent the seven deadly sins: Mary Ann is envy, the Professor is pride, Ginger is lust, Mr. Howell is greed, Mrs. Howell is sloth, the Skipper is both gluttony and wrath (or Mrs. Howell is both sloth and gluttony—over indulging herself with her hundreds of outfits), and Gilligan himself is Satan. An alternate form of the theory assigns Gilligan gluttony (either because he
* Ather City. Don't bother asking which one, because it seems to spontaneously

apply to every sword he picks up.
* At her first appearance, Merudy is a much smaller girl than other girls like Erza and Juvia, but she seems to be slightly bigger than Wendy, yet she is one of the most powerful wizards of the strongest dark guild in the whole region.
* At her insistence, since she demanded he emulate rival host Number One, who seduces women by causing them harm.
* At her school, a classmate boasted that she is descended from a God who had a fling with a mortal, although Susan worked out that if this happened to her great-great-great-grandmother, it made her classmate at most a hemisemidemiGoddess with quite a lot of merely human stuff diluting the divinity.
* At her school, Death's daughter Susan demonstrates unerring and somewhat inhuman accuracy at any sport involving sticks, being able to swing a hockey or lacrosse stick with such strength and accuracy that the ball or puck goes
* Atherton The House Of Power: Atherton is a satellite shaped like a traditional wedding cake with three layers, although the layers move up and down unexpectedly.
* Atherton Wing's infatuation with Inara Serra is this. Although he initially comes across as romantic, Atherton quickly reveals that he still very much sees the "courtship" as a transaction and stops acting nice when he realizes he can't buy Inara's exclusive attention.
* At her worst, Luna has her moments of being this. A lot of Luna's exasperation came from dealing with Usagi's immaturity, but there were times when she was just mean to her for no reason. She does the same thing to Artemis as well, but shows far more violence in dealing with him.
* a) the stories the Crosses told and that the Raiders told would have been recorded in the briefs both sides filed with the court, so changing the story now would raise all kinds of questions about "Why are you changing your story? Were you lying then or are you lying now?"; and
* ATHF has a lot of these, such as the "Vegetable Man" and the creepy puppet thing the Plutonians were watching, and most are included as DVD extras.
* A thief attempts to snatch the purse of Jean "incredibly powerful psychic with an incredibly short fuse" Grey. It doesn't end well for him. But at least Hank didn't lock him down in a basement and re-engineer him his genes, so yay?
* A thief gets a tip from a fellow criminal to hit an old lady's house. He was told
* A thief gets locked in at Gracy's Department Store in "The Hide-Out" in
* A thief intends to use refund fraud by picking up the 'selected' items based on the receipt he just picked up in the trash and ask the cashier to return "his money" in the shop.
* A Thief in the Night films (a Christian End Times series). After the Rapture and subsequent emergency, the UN reforms itself into the UN Imperium of Total Emergency. It proceeds to do evil: forcing people to get branded, controlling food supplies, having their own secret police, etc.
* At high enough levels, honesty magic, or alethiomancy, is inherently incompatible with fiction, which is ultimately an elaborate form of lying. In one blog entry, FanOfMostEverything wonders if this is the reason behind the "Applejack is best background pony" meme.
* At higher levels, there's Thieving Talons of the Magpie, which allows you to steal another being's supernatural powers.
* At higher levels, Warriors could still hold their own, though they required full suits of top-tier armor and high-end weapons all sporting as many enchantments as was possible in order to keep any sort of pace with the harsher monsters and possible PvP encounters. High level mages, on the other hand, were capable of obliterating absolutely anything in their path no matter what they wore—even completely naked, a high-end mage could wipe out the game's 'Boss' in only a few choice spells. Warriors were wise to keep their PvP flags permanently turned off, lest a stark nekkid mage toddle over and utterly vaporize them before they could so much as close to melee range.
* At higher stages of the tailed beast forms, the user's skin is flayed off by the strength of the chakra, but at the same time is healed fast enough that they aren't

killed. Those that have befriended their inner demons can become the full beast without issue, though the lesser forms still present the skin problem.
* at high speed. He gets slammed into a billboard where he remains motionless for three seconds before falling down.
* at him; he's not exactly portrayed as a happy, admirable, or attractive individual, after all. Obviously, those who tend towards an extreme of either won't laugh at all.
* at him whenever he accidentally put things in an occupied slot, something which he was prone to doing a lot since the slot each item would be stored in was determined by a complex formula based on the item's name. Rose's tree modus was only accessible at the root, and would constantly collapse and drop everything if that item was accessed. Once the full extent of humor had been milked and the story grew more serious, though, the troubles were phased out.
* "A Thing About Machines" has a whole bunch of machines start rising up in revenge against one man who's been abusing them.
* A Thing of Vikings; after Tuffnut saves Marte from her abusive husband, he turns down the offer to sleep with her because he feels that it would be taking advantage.
* A Thing of Vikings as proof of her martial skills and for comedy, showing that she's carrying at least half a dozen knives on her person (excluding the last one, strapped someplace where only her lover usually sees it).
* A Thing of Vikings. Dragons make it so easy to conquer that Berk with a relatively small force conquered Vedrarfjord by accident when they only wanted to get rid of the king. When they do it on purpose, Harthacnut's reign over England and Denmark ended in short order.
* A Thing of Vikings for telling other fishermen from other villages about the dragons that Mildew was training for Mac Bethad.
* A Thing of Vikings) from the Bog Burglar guest house at the end of Thawfest, assuming that Merida has been spending more time with her new best friend, Cami. Upon hearing her call for Merida, upstairs, Cami and Merida bolt from the bed and start sorting out clothing—unsuccessfully.
* A Thing of Vikings (Gudmund Hallvarsson) is a literal Black Viking—an Afro-Norse warrior who is the child of a retired Varangian who returned to Sweden a generation earlier with an African concubine.
* A Thing of Vikings, Heather defects from the control of her king and spymaster to the Hooligans because she'd fallen in love with Fishlegs due to his kindness.
* A Thing of Vikings, Hiccup and Berk taming dragons becomes the singularity for their world and changed history. By taming dragons, they became a significant military, political and economic power almost overnight.
* A Thing of Vikings, Hiccup turns down all politically advantageous marriage proposals in order to marry Astrid, the girl he loves. He literally pays a literal king's ransom on top of that just to show the world just how much she means to him.
* A Thing of Vikings in defending his home and his people, and the shattered (and much reduced) fleet ends up running for its life, thoroughly traumatized.
* A Thing of Vikings, it is at least strongly suggested that other dragons think of Night Furies as 'Nightscreamers'.
* A Thing of Vikings, it is noted that dragon attacks in China are interpreted as symbolic of the emperor losing their heaven's mandate of their right to rule.
* A Thing of Vikings King Donnchadh mac Brian, Hiccup pointedly refuses to kill the king, citing this trope as one of his reasons. He doesn't want King Donnchadh to become a martyr, or to have an army under his banner seeking revenge against Berk. In defending his decision, Hiccup points out that the Cycle of Revenge is at the heart of the story of Ragnarok; Odin banished or tortured Loki's children out of fear, which prompted Loki to kill Baldr, which drove Odin to punish Loki, which would lead to Loki joining the jotunn against Asgard.
* A Thing of Vikings make it clear that there will be growing pains and chaos in the short term, in the long term the future looks bright, with humans and dragons working together to make a better world.
* A Thing of Vikings moment, "literally sending tongues to wag all the way to

Rome."
* A Thing of Vikings: Most dragons are on the same scale as more mundane animals, but there are a few that are large enough to fit this trope.
* A Thing of Vikings, quite a few kings, bishops and other political figures from outside of Berk see the dragons as demons and regard Hiccup as a sorcerer who commands them. Harthacnut referred to him as a "sorcerer-smith" and was particularly unnerved by his artificial leg, which allowed him to walk normally.
* A Thing of Vikings, the Varangian Guard of the Byzantine Empire is a central focus for Snotlout's personal character plotline—and Snotlout ends up introducing Dragon-Riding to the Empire, who cheerfully adopt it as their new great weapon.
* A Thing of Vikings to Berk, using a flock of dragons to lift the house-size mass of bone and scales to its new resting place next to the mead hall. Several teeth as long as people are tall are also mounted above the door, scales the size of dinner plates are gifted to the merchant for making the voyage, and fragments of bone were collected and carved into art pieces that are gifted in later chapters during Hiccup and Astrid's wedding.
* A Thing of Vikings, turns her down, and beats a hasty retreat. Gobber finds the whole thing hysterical.
* A Thing of Vikings when Snotlout tries to challenge Hiccup in a three-stage contest of strength, speed and wisdom; even after Snotlout lost the first two rounds (Astrid fought on Hiccup's behalf due to his lost leg and Hiccup and Toothless beat Snotlout and Hookfang in a race), he still tried to insist on taking the third test, which actually got him declared the loser of all three rounds as he didn't show the wisdom necessary to recognise that winning that round wouldn't have made a difference and he would have been tested in his weakest area anyway.
* a thinly-disguised actually seems excited at the prospect of going to one of Sarah's tea parties.
* A third (and notably dangerous) example is Yoshikage Kira's Bites the Dust, which uses this in combination with
* A third character unexpectedly coming to the rescuer's help after they let the rescued's hand slip.
* A third dub was commissioned around 2000, which saw distribution by Media Asia in PAL territories like the UK, and was featured on the initial HKL DVD in 2001. This has Jack Murphy (as Ka-kui, again named "Jackie" like the New Line dub), Andrea Kwan (Selina), and Rik Thomas (Inspector Wong) among the cast. Has different Anglicized names for most of the characters that are somewhat closer to their Cantonese names.
* A third early attempt at archetype classification was made in 1988 by author and game-designer
* A third edition supplement includes a Large and larger size only feat called Large and In Charge. It adds knockback to the user's attacks of opportunity, allowing it to abuse
* A third episode features a bus crash following a robbery attempt. Of the three witnesses, two refuse to testify while the third, who was injured in the crash, claims to have not seen anything. When further pressed, the "injured" man is discovered to have gotten on the bus
* A third episode had a more short-term version, with Michael and Sam ripping a safe from its concealed spot inside of a bank's floor panels and smashing it around (via tossing it off a second floor) in order to force it open.
* A third episode has, about halfway through, a wife confess she killed her husband after he'd made her fear for her life... except her testimony claimed she shot him at point-blank range (she's blind and had her other hand on him when she shot) when the ballistic report indicated he was shot in the heart from twenty feet away, with that being followed by it being confirmed he was shot by a
* A third example, also from "Monty Can't Buy Me Love," is when Mr. Burns, Homer et al have finally found the Loch Ness monster, who proves impossible to subdue. Finally Mr. Burns walks toward the monster with a stern look in his face. We expect an epic fight where Mr. Burns is revealed handing out an

* A third example is in the Gospel of John when Jesus is not speaking in proverbs. The disciples all notice.
* A third example is mentioned in passing in "Mr. Monk goes to Mexico"; a tourist had apparently been killed in a lion attack a year before the similarly mysterious case in question (another tourist drowning in midair while skydiving).
* A third example occurred during the holiday season of 2008-2009, when
* A third example, though not happening in a nightmare, involves Billy and Grim turning into each other after they switch roles for the day. When Mandy sees the results, she just goes "I need to stop drinking steak sauce..." and walks off.
* A third faction of Ultramarines fans reject both Ward (for portraying the Ultramarines as a
* A third fanboy was recently introduced for the third creator figure—the
* A third featured Rowan Atkinson reading a fairy tale from a book, explaining that once "
* A third-gen iPod nano can survive multiple trips through the washing machine with no apparent damage.
* A third group comes from Rihannsu of mostly Ship Clan descendant, who reacted to the increasingly oppressive ways of their government by building new generation ships and escaping to space.
* A third instance has Francine trying to make it through her first fast on Yom Kippur. When she gets hungry, she turns to TV to get her mind off it, only for all the shows on to be about food. Dissatisfied, she turns to reading, only for all the books she picks out to have titles relating to food.
* A third interpretation is that of a staightforward superhero, rather close to
* A third is the garden of Eden, with God actually being okay with the apple thing, but telling them they have to cover up the tits. No... just the lady tits.
* A third of those people left, mostly for Canada; these people were given the title
* A third omake, posted between chapters 25 and 26 and written by both Evilhumour and Anon e Mouse Jr. (but without his self-insert), focuses on Father Evergreen Road.
* A third one has Ashley inadvertently describe Nanase followed by Nanase sneezing. This is used as a segue to briefly shift focus to Ellen who is sitting next to Nanase.
* A third one in the sixth episode is the appearance of a long yellow hand, belonging to the father of the Yellow Guy.
* A third one is Chatham, Cheatham and Runne. If you ask to meet a senior partner, you will inevitably be told:
* A third party may deliberately or inadvertently reprogram the A.I., break its
* A third party publication for Third Edition subverts this even more with Amazons: all of them are stunningly beautiful women, on the other hand, they are bloodthirsty
* A third-party supplement introduces the Chaos Mage class, whose practitioners risk accidentally mutating their own bodies with their magic. One option is a gradual transformation into a giant sedentary womb that continually gives birth to bizarre and unique monsters.
* A third-person shooter of the universe is being created, starring the
* A third source of superpowers comes from Dials, or sea shells of shellfish that live in the sky-sea shallows of various Sky Islands. There are many styles of shell, each with at least two versions of the same effect. For example, Flame Dials emit fire when the apex of the shell (that acts like a button) is pressed, but Heat dials only become hot. Sky Island warfare is the skillful use of Dials, including embedding them into normal weapons, effectively giving them permanent enchantments.
* A third takes place at Wimbledon. A man blamed the defending champion for his mother's death because
* A third target is the stereotype that students are always poor, in constant need of money, or even starving.
* A third time has Apple Bloom do this to Spike in "Just For Sidekicks", when he won't let her and the Cutie Mark Crusaders off the train to the Crystal Empire (as

they're not supposed to be there and he doesn't want to get in trouble).
* A third type of headdress worn by Setesh's (AKA Seth) Jaffa is mentioned in a joke but never shown, as Seth has long ago been exiled.
* A third urban legend tells of Pepsi-Cola accidentally translating their slogan, "Come alive! You're the Pepsi Generation!" as "Pepsi brings your ancestors back from the grave." Got a
* A third variation has the parrot forgotten in the icebox for an extended period of time while the owner is distracted doing something else. Panicked, they open the fridge and find the bird frozen solid—flipping them off with both barrels.
* A third way was later introduced, but since this consisted of having a very angry Solar Exalt
* a third wife, Marie Dage, although she is currently dead at this point.
* at his best while the guy that actually tried to make up for it took the blame certainly didn't help).
* At his debut, Tremal Naik hunts tigers for a living, and while he has a couple guns he has trouble procuring ammunition and would rather not shoot them, thus his go-to strategy is to lure them into certain areas where he previously dug a pit with spikes on the end. This is especially notable because he's strong enough he could conceivably take on a tiger bare-handed and knows it... But he's nowhere near stupid enough to get in a situation where he has to.
* At his friend Spud's funeral, he at first talks about how Spud was a great wingman, but then brags about his sexual conquests, to the shock and disgust of Gibbs and Jodi. When Gibbs gives his eulogy, Palmer interrupts Gibbs to generally brag about how cool he is.
* At his trial, Charles I was found guilty of treason, murder, rapine, burning, spoils, desolation, damage... and mischief. This last one is not really an example of
* Athleta Christi was shortly after Hunyadi dealt him such crushing defeat at the Siege of Belgrade that the Ottomans were unable to advance into Europe for 70 years. Today he is a Hungarian national hero and also revered as an example of chivalry in Serbia, Romania and Bulgaria.
* Athletes, gym bunnies and other exercise enthusiasts may drink smoothies regularly for various reasons and some of the 'home brews' may seem downright horrific to the uninitiated, particularly those made by amateur bodybuilders. Raw eggs and oatmeal often go into the blender if the drinker can't afford an expensive protein powder.
* Athletes will occasionally imposes challenges on themselves to make a
* Athletic Arena Level: Football and Baseball and Hockey, OH MY! And all of them are trying to play at once.
* Athletic commissions often seem not to exist, and the boxers only answer to the promoter (and/or their manager). They never have to get physicals, blood tests, drug tests, etc. Doesn't apply if it's specifically stated to be an underground/illegal bout.
* at Hogwarts. The Muggleborn have absolutely no trouble recognizing the incredibly out-of-place "first-year students".
* At Hogwarts, things blowing up or catching fire is about the least harmful thing that can happen in a classroom. Spilled potions cause boils to sprout all over, or cause whatever they hit to swell to enormous size (whether that's hands, nose, eyeballs, you name it.) Then again, the explosion of the Swelling Solution
* Athol, Massachusetts is known to have been one of the rural Central/Western Mass towns that Lovecraft based the town of Dunwich off of. While not known to be especially prone to spooky phenomena, it
* At Home Among Strangers involves a White Russian bandit gang, some time after the Whites have been decisively defeated by the Bolsheviks in the Russian Civil War, still roaming the Russian interior, robbing trains. There are still some true believers, but bandit leader Brylov recognizes that the war has been lost, the Bolsheviks are victorious, and there's no point fighting them anymore.
* At home, when moving a boiling pot of pasta to the strainer in the sink, he drops it because he isn't using potholders.

* At Home With the Braithwaites had the patriarch David Braithwaite who nearly killed his brother in a fight over his ex Alison, then punched another man over her. Mike Hartnoll threatened his estranged wife's lesbian lover with a gun
* At Home With the Braithwaites, the mother of the family wins 37 million pounds on the lottery... and doesn't tell her family for weeks. Naturally, wacky hijinks ensue.
* A thorough letter was found about what would happen if someone disables the Oil Rig's reactor cooling systems: a megaton-sized meltdown (
* A) Those that are about social interaction/behavior/social structure without fitting any of the indexes to the right, and
* Athos is underpopulated, but since its entire population is male, it requires Uterine Replicators for anyone to reproduce. The actual cost of raising children to the age where they are self sufficient is a major part of the planetary government budget, unlike most other planets where it is part of the informal economy. There is a credit system where men earn the right to father children through voluntary civil service. As Athos is gradually terraformed, the population is slowly being allowed to grow, with new reproduction centers getting built as appropriate.
* A Thousand Acres) is the reappearance of Jess Clark (the Edmund character) after 13 years away in Canada, having fled the country in 1966 to escape Vietnam.
* A Thousand and One Knights in Wonderland is changed from a woman into a man through a dragon's curse. Which is perfect for him because he has fallen in madly in love with a princess.
* A Thousand and One Nights. Those stories have been wildly popular with Europeans and Americans ever since, despite featuring Arabs and Persians as their main characters.
* A Thousand Answers, a gambling man with a supernaturally good winning streak. Dio handily beats him in a bet, but feels oddly uncomfortable when his victory becomes clear. Whether D'Arby is a genuinely talented gambler or using an early iteration of his descendants' Stands is never definitely answered.
* A Thousand Clowns found ways around the restrictions on nudity in the Costume section: Nick's "favorite toy" is Bubbles, a battery-powered electric statue shaped like a topless hula dancer whose chest "lights up". Even Albert appears to have a "strange interest" in Bubbles...
* a thousand Demi as a companion for himself, which is why she's small, cute, and more emotionally developed despite being some six hundred years younger than him.
* A Thousand Pieces Of You. The whole storyline of the books is about two scientists traveling from universe to universe and finding trouble in each one.
* a thousand prisoners, almost three hundred of whom had been serving life sentences for terrorism offences.
* A Thousand Skies (as their crash made national headlines, anyone looking for them already knows they're in distress).
* A Thousand Splendid Suns, Mariam is unable to have a child, leading to her abusive husband to favor his fertile second wife, Laila.
* A Thousand Suns wasn't "Waiting for the End", but rather "The Catalyst".
* A Thousand Words all of which Jack gives incredulous expressions at.
* A Thousand Words, Jack is shown bringing the book to his own publishing company to work out a deal.
* A thousand years after the main story, the Earth has spent five hundred years recovering from its attempts in the previous segment, and is slowly doing so, with disguised help. This segment is specifically inspired by the above-mentioned
* A thousand years ago, Celestia banished Nightmare Moon to the moon as a
* a thousand years old, be one of the only existing prophets in the world, and be such a powerful wizard and (implied) swordsman to boot definitely deserves a mention here.
* A Thread of Grace: Renzo Leoni has elements of this. His ability to play this role allows him to get close to the Nazis who are in charge of his area of Italy.
* A threat of sending someone to Castle Heterodyne is usually responded to with stark terror in
* A three-episode arc in Season 7 involves Chief Carver and his sister, whose drug

and alcohol abuse led to her abusing and neglecting her three children, often deserting them for days at a time. Carver eventually takes them in and raises them as his own, although they are old enough that they still called him "Uncle."
* A three-legged race where the racers wear kilts, that wasn't cheating. Also, Dirty and Dastardly Dalton disguised themselves as Snagglepuss and created a fake Finish Line to delay the Yogi Yahooeys. In the end, the Rottens lose 25 points for using the threadmill, 25 points for forging the rulebook that made the use of the threadmill seem legal, and 25 points for delaying the Yogis. (Who got 5 points of bonus in reparation, allowing them to beat the Scoobies for the gold medal)
* A three-man team is actually sanctioned by the gods; breaking it often leads to misery. In
* A three-part mini-arc in Season 4 involved Mr. Garrison coming out of the closet.
* A three-part series of eyecatches, for various anime, can be found on Youtube using links
* A Threesome Is Hot: Being turned on at the thought of having sex with two people at the same time.
* A Threesome Is Hot where, in three-way polyamory, it's cool to have two women and one man, but disgusting to have two men and one woman.
* A throwaway joke in another episode mentions that she is also fluent in Spanish. Eventually it's revealed that she can speak
* A throwaway line a while ago basically said Queen Hippolyta is in a relationship with General Phillipus, and
* A throwaway line mentions that his favorite cocktail to offer a date is a "roofie colada"
* Athrun Zala, Nicol Amalfi, Dearka Elsman, Yzak Joule and Natarle Badgiruel from
* A thwarted example occurs in "Best Day Ever" when Tukson attempts to bail from the White Fang by escaping to Vacuo. Unfortunately for him, it doesn't work out as Cinder's henchmen corner and eventually
* A THX sound test in one episode made one unlucky moviegoer's head pop.
* Atia sends her hired man Timon to murder her daughter's former husband Glabius. Glabius asks for his servants to be spared, but Timon refuses as Atia can't afford to have her daughter finding out an apparently random act of street violence was actually her doing.
* A tie-in book called "The Simpsons' Family Album" did, indeed, feature a much younger Bart naked, butt-up on a bearskin rug. As the cover illustration.
* A tie-in book has a Space Corps psychological test which includes the question "If you could go back in time and kill Adolf Hitler as a baby, would you?", to which Lister answers "
* A tie-in comic about Nero says that a stellar cartographer on Rura Pente and
* A tie-in comic book, prompting him to declare that the modern world is moving a little too fast.
* A tie-in comic shows that Garrus learned to shoot well from his father as a boy (in a typical "shoot a can from far away" scenario). He actually calls his father while defending his base on Omega to say goodbye, only for the father to brush away the sentimentality and go straight to business ("How many targets?"). The conversation ends when Garrus spots the N7 armor and smiles.
* A tie-in commercial for Volvo has the car company trying to market their vehicles to preteen girls by equating the danger one can face (shown via Bella unsuccessfully trying to ride a motorcycle) with the safety and security of a luxury car. Don't forget your financing options and down payments, girls.
* Atif Rafay, who (with the help of his friend Glen Burns) allegedly murdered not only both his parents but also his severely autistic older sister in Bellevue, Washington in 1994. The case is notable in that while the crime was committed on American soil, all the people involved - victims and suspects - were Canadian citizens; the Rafay family had moved to Bellevue from Vancouver, BC not long before the murders and both Rafay and Burns went back there after being released and before coming under official suspicion by Bellevue's police. This resulted in cross-border cooperation between Bellevue police and the RCMP to get confessions

and arrests, snags involving the possibility of the death penalty
* A Tiger Of Malgudi, by R. K. Narayan, is unsurprisingly from a tiger's point of view. Narayan's treatment is realistic, except that the tiger can understand what humans say, though he can't talk.
* Atilla and the Great Blue Bean (2007) farts constantly, this is because he eats so many beans a day because they're his favorite food.
* Atilla are described as predominantly blonde, in contrast to the dark-haired Romans.
* a time-duplicate of Fry becomes significantly more mature and different looking after 12 years. The fire that burnt up his hair and screwed up his voice helped.
* "A Time For Giving", though not a part of the official Dabchick episode lineup, features Dixon's two wool puppets singing "Silent Night".
* A time-honored tradition among GMs who have heard one too many comments from their players about the Coalition is to run a campaign where they are part of one of the Nonhuman Tactical Strike/Elimination Teams, the Coalition's "Supernatural SWAT": this provides an excellent crash course in just how dangerous supernatural creatures or powers can be. Actually seeing a Master Vampire run amok in a crowd of normal people, a dragon suddenly shapeshift to their real form in a store and fry the owner for an error in pricing, or a mage or psychic go from docile and obeying your orders to killing your buddies in the time it takes to blink tends to bring people around to the Coalition viewpoint about the suppression and control of the supernatural very quickly.
* A time honored tradition in professional wrestling is putting on a show in front of soldiers for Christmas, such as when
* A Timeless Romance: Or, as Starfire says in Chapter 3 upon being told her past self and Danny's from their Paris date were brought from the past, "Allow me to see that I straighten the story...".
* A Time Odyssey, where a dying alien civilization (only few peoples left) and 2 Human-made AI decide to use their last strength to send the third AI back to Earth to give humans more information on the Firstborn.
* a time of new beginnings Maki (and, by extension, Maki's twin brother Mikado).
* A Time Out of War: Two Union soldiers on picket duty declare a truce with their Confederate opposite so they can go fishing in the river. When one of the Union men hooks something in the river, the Confederate thinks it's a catfish, because it isn't moving. It's the dead body of a Union cavalryman.
* A Time to Kill (and the book it's based on, naturally), so very much. He hid inside the local courthouse so he could commit premeditated murder against two men-redneck racists who kidnapped, raped and attempted to murder Carl's daughter and were likely to escape punishment for their crime unless Carl resorted to vigilantism.
* A Time to Kill centers around this trope. Ten-year-old Tonya Hailey is brutally raped and nearly killed by two men, and her father Carl Lee takes revenge by shooting the rapists down outside the courtroom. The rest of the story follows Carl Lee's murder trial.
* A Time to Kill had a TV show once. Unfortunately, it got cancelled in the late '80s...
* A Time to Kill, Jake, Harry Rex, Lucien, and Ellen are all preparing for the big trial when Lucien decides to give out some instructions to Ellen (Roark):
* A Time to Kill: once after Carl is badgered into shouting "Yeah, they deserved to die and I hope they burn in hell!" and once after the unintentional victim of his shootout says he agrees with the main character's actions and that they should "turn him loose!"
* A Time to Kill. They support Carl's conviction (he murdered two white rapists who were likely to get off scot-free for molesting his daughter), and Freddie Lee Cobb (whose grandfather was a Klansmen) enlists their help to sow mayhem. They protest in front of the courthouse, starting a riot with a black crowd, which interupts the court's proceedings. The Grand Wizard is killed, but Freddie and the remaining Klan members continue to intimidate and send death threats to Jake to make him step down as Carl's defense attorney. He doesn't.

* A Time to Kill) to give his closing argument, he decides to throw out his well-reasoned points of law and instead appeal directly to the humanity of the jurors will an emotional, tearful speech. It works.
* A Time to Kill would like you to know that, Yes, they deserved to die and he hopes they burn in hell.
* A time-traveling Captain America runs into himself from the year 2012. 2012!Cap assumes that Present!Cap is Loki in disguise, and a Mirror Match
* a time-traveling Geoffry Wilder trying to avenge his deceased son Alex Damn... just damn...
* a time-traveling Harry and Tom draw on the faces of the Gryffindor fifth-year boys, including Harry's past self.
* a time-traveling Harry comes to this realization while considering the pros and cons of a triad marriage with Amelia and Julia.
* a time-traveling Iris Potter decides to adopt a then six-year-old Tom Riddle. She has some interesting thoughts while shopping for a training wand in a children's store.
* a time-traveling Tonks punches a wall after Mr. Weasley is attacked by Nagini and she realizes that she'd forgotten about the incident.
* a time-travelling Harry attacks Abraxas Malfoy and several other Death Eaters after they show up to terrorize Diagon Alley. When Malfoy sees the lordship ring of a formerly-extinct family on Harry's hand, he goes into shock and keeps repeating "It can't be..."
* A tinfoil poster exists of Popeye with the words "No Smoking" on it; while it has noble intentions, it blatantly overlooks that one of Popeye's character trademarks is that he smokes a corn-cob pipe (which is predictably absent from the poster).
* at in the Doctor just accepting a race of slaves at face value so quickly...
* At issue 162-164, an all-out battle for the crown of Acorn was fought between The Freedom Fighters, Mammoth Mogul and the Destructix, and Ixis Naugus and the Arachne. Naugus joins with Mogul during the battle when he was told by him that Mogul was the founder of the Order of Ixis, turning the battle into a simple two-sided war. The battle was interrupted by Dr. Eggman, however, and he captures Mogul, Naugus, and their forces back to his capital prisons. The Freedom Fighters won, but at the cost of
* A Title That Has a Rather Large Length at About Two Standard Deviations Above the Average Title Length
* At its most cynical, DLC in general can be a form of this, especially if the content was originally intended to be included in the original product but cut to generate more money later. This also enables companies to charge more for season passes and complete "Game of the Year" editions.
* At its root, though, this is why all of the earlier Riders — more often than not created by evil terrorist organizations — have to
* Atium mistings (who can use just one metal) exist, they're difficult to find because TLR suppressed knowledge of their existence; anyone not in the Steel Ministry thinks it's a waste of time and money to test for it.
* At Jamba Juice, the music that plays is from disks sent to the stores from the company. In an effort to be more hip, the disks have been including more recent hits, like
* Atkinson has a particularly impressive ability to make just about any word into one of these, solely by his use of inflection, starting in
* At Knotts Berry Farm, the "Boardwalk" area, which now holds most of the park's thrill rides, was previously called "The Roaring 20s," a literal
* Atlach=Nacha, an obscure H-game where you play a shapeshifting spider demon (a Jorougumo to be precise, see Mythology above) in high school.
* Atlanta an expansion franchise twice, in 1972 with the Flames and in 1999 with the Thrashers. Both teams would subsequently relocate to Canada, with the Flames moving to Calgary in 1980, keeping the Flames name, and the Thrashers to Winnipeg in 2011, becoming a revival of the Jets.
* Atlanta are a more downplayed example of this, although they do have a child

together. They live together off and on as well, although, for the most part, they aren't together.
* Atlanta: At an Oktoberfest celebration Earn and Van play something called "Hootz-Kutz" which involves people sitting in a circle and passing ping-pong balls around and tossing them at a cup in the circle. No one ever explains to Earn how or why you're supposed to pass or shoot and he amazes the crowd by just leaning forward and dropping the balls in the cup (apparently something no one has ever thought of).
* Atlanta, despite having a Black cast and writing team (in addition to being pretty weird), has gathered excellent ratings, critical acclaim, and a large amount of awards.
* Atlanta Falcons quarterback, leading to the arrest and conviction of Vick and four others.
* Atlanta, Georgia saw the freeway revolts in the late 1960s/early 1970s. Had it not been for the revolts of several city neighborhoods that would have been at risk of getting razed, the freeways could've been a lot different. Namely, instead of terminating in Buckhead, the Georgia 400 would have continued south through East Atlanta, approximately 2-3 miles east of the Downtown Connector (which carries I-75 and I-85), and connected with I-675 at the south end of the Perimeter (I-285).
* Atlanta has to be scuttled that afternoon, the Japanese Bosun's Mate with the motor launch helped evacuate the ship's crew and the men they had rescued. In the end, he saved over a hundred lives.
* Atlanta Nights is to see what a deliberately awful book would be like.
* Atlanta Nights that set out to — and eventually did — prove that you can make a book a #1 bestseller if you load it with enough sex, regardless of the actual literary quality.
* Atlanta. Nobody knows what he is, and the other characters speculate that he might be anything from Indian to Dominican to half-black, half-Asian.
* Atlanta P.D. Officer James Burns was charged with the murder of Devaris Caine Rogers as well as assault with a deadly weapon and violation of the officer's oath. Burns responded to an off-duty police officer's call regarding suspicious activity around an apartment complex. He shot unarmed Rogers in the head. Chief Turner terminated Burns after an investigation declared excessive force.
* Atlanta Radio Theatre Company the dictator-to-be that was assassinated by the time traveler.
* Atlanta's "Atlanta Burned Again Last Night" has a similar plotline to "That Summer", between a 17-year-old boy and a woman in her 30s.
* Atlanta singer Alicia Bridges got pegged as a "disco diva" when her dance-oriented "I Love the Night Life" became her biggest/
* Atlanta's Mercedes-Benz Stadium has a retractable roof that opens and closes by sliding eight triangular pieces on rails back and forth so that the opening that is made dilates like an iris. The stadium opened in 2017 (though it would be another year before the roof itself was finished). Previous stadiums with retractable roofs usually moved the one or two pieces to the side like a sliding door.
* Atlanta sports talk radio station WCNN (680 "The Fan") had a series of spots for morning host Christopher Rude's show "The Rude Awakening" which touted him as "the least interesting man in Atlanta radio" (apeing Dos Equis beer's
* Atlanta superstation Peachtree TV has aired a commercial that sets "Married Life", the main theme from
* Atlanta: Teddy Perkins wishes to turn his creepy old house into a museum, complete with gift shop. He has an eerie room dedicated to "great fathers", including a model of his own abusive father (unless you subscribe to the theory that "Teddy" is the father), whose face is blank.
* Atlanta the tale of Florida Man, a creepy criminal responsible for a bizarre crime spree.
* Atlanta. The wolf mascot of "Coconut Crunch-Os" cereal tries to steal some cereal from a bunch of black kids, only for a white cop to show up and beat the crap out of him.
* Atlanta: This nine-man band had Top 10 hits right out of the gate with "Atlanta

Burned Again Last Night" and "Sweet Country Music", quite an impressive feat for an independently-signed country band at the time. Although they later got distribution rights from MCA Records, nothing else they put out afterwards made a dent, although "Dixie Dreaming" came the closest, peaking at No. 11 in the summer of 1983.
* Atlanta to promote his mixtape and defend an apparently transphobic tweet he made (he was just responding to someone that he didn't have to have sex with Caitlin Jenner). He is very irritated to find out he won't be paid for the appearance.
* Atlanta to taking illegal drugs, so she's being fired anyway. The only benefit confession gave her was a few extra days to get her things together.
* Atlantic 10 Conference (founded in 1976; sponsored football from 1997–2006)
* Atlantica. After Ursula is defeated, Triton begins to trust Sora, ends the exile, and allows him to seal the keyhole.
* Atlantica is no longer a combat-themed world, and focuses on getting ready for Sebastian's big musical score.
* Atlantica Online both have an offensive ability that makes up to two enemies take damage over time and more damage in general. The Monk on the other hand has purely supportive abilities, but all three have a decent attack that can hit flying enemies. Attacking is much needed, too, as a lot of experience comes from killing blows.
* Atlantica Online makes its money by means of an Item Mall, where various items can be bought for real cash, such as the Blessing Potion (which makes the players group much stronger for a limited time), Mounts (faster movement and other boni) or certain valuable items that can also be gotten in-game. All these items can also be traded with other players, allowing customers to make in-game money for real money as well, provided they can find someone rich enough. Some items are also occasionally given away for free or can be found during seasonal events.
* Atlantic City, but Lou is ecstatic when the police sketch over the news looks nothing like him—he knows that he's going to get away with a double murder.
* Atlantic City. But when he finally winds up having to kill two real gangsters, he is thrilled to death, gleefully bragging to a random hotel clerk about how he just committed a double murder.
* Atlantic City casinos are advertised as 'the place where the most winning is done'. The odd wording intentionally masks that despite how much 'winning' is done, there isn't a margin of profit from the wins. If they are merely boasting exceptionally high player traffic, it may also be accurate to say those casinos are the place where the most
* Atlantic City: Ebonics in the hood, Philly Italian historically and near the casinos.
* Atlantic City. Even when it's not aping something it's often ludicrously garish. That the rest of Atlantic City—heck, Atlantic County—has been kind of a mismanaged shithole for decades only accentuates the camp.
* Atlantic City has the distinction of being the original setting for the board game
* Atlantic City, Sally's husband Dave shows up in Atlantic City with Sally's sister Chrissie, whom Dave has impregnated, in tow. Sally is super-pissed about this.
* Atlantic City, sometimes the opera music is coming from Sally's tape player, and sometimes it's playing over the soundtrack, like when she leaves her apartment to dash off to class.
* Atlantic City treasurer James Neary refuses to recant his testimony against Nucky when Jimmy Darmody orders him to do so. Jimmy and Richard Harrow proceed to burst into Neary's office while Neary is boning his secretary doggy-style. They shoo the secretary out, make Neary type a confession at gunpoint that exculpates Nucky, then shoot him in the mouth and stage his death as a suicide.
* Atlantic ocean. The ax blade for instance, carved the Grand Canyon, and a large barrel of water that spilled created the Mississippi river.
* Atlantic Records when he moved to the fledgling label, which later reissued the album.
* Atlantics, Ada and Souleiman are making out behind an abandoned building, but Ada stops him from going further because she hears footsteps. She's right, and the are

accosted by an old man who makes them leave.
* Atlantics, Ada has been arranged to marry Omar. Though her friends say she is lucky for the opportunity to rise in status by marrying a wealthy man, she is bitterly unhappy about it and only complies because her parents force her to, as she loves Souleiman.
* Atlantics Ada sneaks in and out of her parents' house through the window in order to go party on the beach and at Dior's place.
* Atlantics: Detective Issa is supervised by a gruff older man with a mustache who frequently questions his work ethic and capability, and threatens to take him off the case.
* Atlantics The ghosts are portrayed more sympathetically than usual, and their demands are presented as entirely reasonable.
* Atlantic Wall was built underground. Several sections have been restored for tourists but even those that have been left to rot are often in good enough shape to visit.
* Atlantis across the globe, along with their pyramid-building techniques.
* Atlantis (a failure as they are pacifists, and also driven to near extinction by pollution), and many others.
* Atlantis: An ancient island civilization which sank into the ocean for one reason or another.
* Atlantis and its self-caused destruction figure heavily in the back-story of
* Atlantis and Jason and friends starting his quest to find the Golden Fleece.
* Atlantis are bandits who capture travellers, take all their belongings, including weapons, then release them to be hunted.
* Atlantis by Charles Berlitz, explores this angle. No sarcasm here: if you want to read about Alien Astronauts in the context of abandoned Atlantean technology causing planes to fall out of the sky, this is where you want to go.
* Atlantis-class battleships don't fit this trope, as they don't carry Puddle Jumpers. However, given that their primary weapons are swarms of guided drones, this makes sense.
* Atlantis considers it to be separate objects. The city was created by a female time traveler using a macro she designed that basically works like a nano-scale 3D printer. Sorceresses and other inhabitants typically move around the city using levitating platforms.
* Atlantis did reveal that the city's survival to the present was the result of an altered timeline: when the "original" SG team came through from Earth, they found a ruined city whose shield AI had incrementally sacrificed everything but the control tower to the crushing depths over the centuries in an attempt to conserve power — power which the SG team drained completely by rocking up and turning on the lights. The only team member to survive the subsequent destruction of the city did so thanks to time-travelling to the weeks before the city was abandoned by its original inhabitants... then took the long way back, popping in and out of a stasis pod every few centuries to cycle the shield's drain on the power supply — so more of a Ragnarok-inoculation than proofing, in the end...
* Atlantis DSV. It was destroyed in the end, but it destroyed several times its own weight in Macronesian submarines before that happened.
* Atlantis Found, a character looks into Dirk Pitt and reports that his background looks like a series of adventure novels.
* Atlantis Found: Collapse the Ross Ice Shelf to basically wipe out humanity, ride the cataclysm out in special arks with 300,000 people who think an asteroid is hitting Earth and rebuild humanity on your own Nazi-inspired terms.
* Atlantis from being crushed underwater after it has run out of energy wasn't even included until someone traveled to the past from a future where the city and its occupants were flooded, for instance... Quite natural because the Lanteans probably didn't forsee that they would submerge the city on the bottom of an ocean and then leave it unattended for 10,000 years.
* Atlantis gate is like a digital counterpart to the original gate's analogue. Just as indestructible as its predecessor, these gates don't spin at all. Instead, the spinning is replaced with the glyphs lighting up like LEDs, and the sound of stone

grinding against stone is replaced with distinctly electronic humming. Additionally, unlike its Milky Way counterparts, many of these gates are in orbit around planets, requiring a ship capable of flying through the gate to traverse safely.
* Atlantis had suffered extensive tile damage that concerned the crew. Due to poor images, Mission Control said it was of no concern. While the astronauts did not like that assessment, they decided to carry on with the mission regardless. Mission commander Robert Gibson later said that if the shuttle began to experience trouble during reentry, he would tell Mission Control "exactly what (he) thought of their analysis."
* Atlantis had to flee the planet The Atlantis Expedition found it on after they pissed off the Pegasus Replicators.
* Atlantis, Hercules covers Pythagoras's eyes when Jason walks into the house naked.
* Atlantis II, stepping through a painting is a mandatory part of the Ireland quest. It's not immediately obvious that you can do that, though.
* Atlantis in order to gain enough power to cleanse the world of evil. He gained his three primary followers by manipulating their lives in order to orchestrate tragedies that would drive them toward the same vengeful misanthropy as himself and sign up with his cause.
* Atlantis. Instead of simply being underwater, it was buried beneath the ocean floor, and still inhabited.
* Atlantis: In "The Day of the Dead", Pasiphae raises as an army of dead soldiers through black magic. They're similar to Romero-style zombies, even passing on their condition through bites, except to kill them their hearts must be damaged rather than their brains.
* Atlantis: In the mountains above Atlantis lives a witch who grants wishes. When Hercules wishes that his girlfriend would fall in life-long love with him, she gives him a potion that (a) causes her to fall in love with him, and (b) poisons her so that she would die within days. Hercules didn't specify how long life-long was to be, after all.
* , Atlantis is a magitek starspanning empire a thousand years after they return to earth and conquer it.
* Atlantis is apparently a popular vacation spot for witches. One of Sabrina's dates takes her there offscreen. She remarks that the fish was fine but the chips were a bit too soggy.
* Atlantis itself is the mother of all failsafe failures, a spaceship without an airtight interior. If the shield fails in space, everyone dies, as the crew unpleasantly discovers when they run into power problems while moving it to another planet.
* Atlantis itself was almost a lost colony during the first season as they were completely cut off from earth.
* Atlantis itself, which became an underwater city with very advanced water-fuelled technologies.
* Atlantis (Lemuria) in the middle of the Atlantic Ocean's counterpart (the Great Eastern Sea).
* Atlantis: Milo's Return antagonist with hardly any redeeming qualities to his name?
* Atlantis: Milo's Return has Kida unable to comprehend why a spear is displayed inside a glass case:
* Atlantis: Milo's Return in the first segment as the main antagonist. Its humongous, octopus-like tentacles are seen emerging from the water, but the whole beast is only shown in the climax of the segment, as the heroes fight it underwater and get to see its fish-like body and head.
* Atlantis: Milo's Return secrets (Atlantis), but Milo decides not to. The spirit spares them, saying they understand the importance of keeping a secret, and lets them go.
* Atlantis: Milo's Return), the team is driving through the Arizona desert when they pick up a mysterious Shoshone man who they appear to pass several times. Turns

out he is a Wind Spirit guarding a mass trove of ancient artifacts, and his search for a stolen pot is what's causing the mess in the southwest.
* Atlantis: Milo's Return: While traveling to Hellstrom's castle, Audrey questions the idea that the storm they're flying through is caused by the power of the old gods. Vinny lampshades this immediately by pointing out that they have already encountered several entities with godlike powers.
* Atlantis no Nazo, mummies are the toughest enemies that can be killed. They move very slowly, but are tall enough to block narrow passages. Some of them spit fireballs.
* Atlantis, or something like it, features as part of the back-story of
* Atlantis plays a Wraith in season 2's "Instinct". In season 4 she returns as Dr. Keller.
* Atlantis, possibly based on Santorini Atoll, and never intended to be taken literally. The books that serve as the source of the "legend" say this explicitly.
* Atlantis returns for Aquaman's home stage, and to a lesser extent Black Manta's.
* Atlantis series are non-standard, and depend entirely on what wrong choice you made to bring them about.
* Atlantis series take part, in order: In prehistoric times, in the middle ages, in 2020, in the early 20th century, and in 1937.
* Atlantis singlehandedly ruins Greece's drunken party by crashing it, riding a unicorn and accompanied by a fairy and leprechaun. This causes all the drunk countries (who think they're hallucinating) to go home and sleep it off.
* Atlantis somehow gets swept into a mythical Atlantis in episode one. The rest of the series is set there.
* "Atlantis SquarePantis": the inside of the bus that takes the gang to Atlantis is rendered in CG.
* Atlantis (the city) used a wormhole drive (rather than a hyperspace drive) to get from the Pegasus Galaxy to Earth (in the Milky Way) in a split second, where Hyperspace was taking weeks. Our Wormholes Are Different indeed.
* Atlantis: The Lost Empire a chalk map that rubs off on Milo's shirt is not reversed, as the gag of Milo having to stand in that position would have been voided. The directors were amused that test audiences complained more about that detail and its plausibility than in the following scene where a photograph whirs into life in a 1920's movie style.
* Atlantis: The Lost Empire after Fenton Harcourt refuses his proposal and speeds away from the Smithsonian Institution in his car.
* Atlantis: The Lost Empire, after Rourke is transformed by the crystal's power, there are several bizarre glowing red veins visible all over his crystallized body.
* Atlantis: The Lost Empire, after the attack by the leviathan has left the expedition trapped under the ocean with a huge destruction of equipment, great loss of supplies, and many (off-screen) deaths, Rourke notes that their survival as well as any chance of finding Atlantis "rests with [Milo] and that little book".
* Atlantis: The Lost Empire) along for the ride. At one point everybody sounds off after falling down a hole. For the longest time he was still there shouting "Zoltan is okay!" even after his character had been written out of the script.
* Atlantis: The Lost Empire and a floaty popping up. Description can be seen at the page quote.
* Atlantis: The Lost Empire, and he also provided the voice in Spanish for both the European and Latin American versions.
* Atlantis: The Lost Empire, are all based on and powered by crystals.
* Atlantis: The Lost Empire are deliberately designed to be an ethnic mish-mash, since they predate the various ethnicities. Common features include medium brown skin, full lips and white hair.
* Atlantis: The Lost Empire are projected by several massive golems who stand at set spots around the border of the city.
* Atlantis: The Lost Empire, as he is the only one who enthusiastically takes to the exotic Atlantian food and utensils.
* Atlantis: The Lost Empire, as she can hold up a nasty, especially towards her former boss Rourke for betraying her for his greed.

* Atlantis: The Lost Empire as she disrobes. When he steps into the water, he immediately gets a giant air bubble in his trunks, which he sheepishly pushes down.
* Atlantis: The Lost Empire as their memories fade. They can't even read their own language any more or even use their own technology.
* Atlantis: The Lost Empire at the balloon in revenge igniting it and causing it to fall back to the ground, presumably crushing Helga in the process.
* Atlantis: The Lost Empire begins with a young Kida crying for her mother, the former Queen of Atlantis as she is sacrificed by the Crystal to save her kingdom from a tidal wave. This fails, and as a result the Queen dies and Atlantis ends up underwater. Milo was also briefly shown as a child in both an old photograph of his as well as on an old film reel just right after the titles appear.
* Atlantis: The Lost Empire by being a linguist, having studied language almost all his life.
* Atlantis: The Lost Empire by Pasquale Anselmo, who gave Vinny a southern accent to make him stick out more in the Italian dub and be accurate to him being from Palermo, definitely upped the character's charm.
* Atlantis: The Lost Empire by using the last of her remaining life to fire her flare gun at the zeppelin.
* Atlantis: The Lost Empire close-up of a mechanical iris and a fiery pupil. "Jiminy Christmas! It's a machine!"
* Atlantis: The Lost Empire, cranking up the suspense and lulling the audience into a false sense of security before the inevitable happens.
* Atlantis: The Lost Empire died while recording dialogue for Cookie, so Steven Barr voiced him in the scene near the end where he says goodbye to Milo.
* Atlantis: The Lost Empire: During their expedition to find the lost city, the team comes across two paths. Upon examining the journal, Milo points to the left path. However the left path has a monster that the team backs away from immediately. Upon examining the journal again, Milo notices his mistake and points to the right path.
* Atlantis: The Lost Empire: Earlier in the film, Milo comments how the Shepherd’s Journal mentions something called "The Heart of Atlantis", but it abruptly cuts off. He muses that it’s "almost like there’s a missing page". Then, after Milo and Kida discover the truth about the Heart of Atlantis…
* Atlantis: The Lost Empire, except at the end of the film when she switches to a less revealing royal outfit.
* Atlantis: The Lost Empire features a bizarre lunch with even more bizarre utensils. Everyone's squicked by things like the live "noodles" except for the doctor, who think's it was strange that no one else was eating.
* Atlantis: The Lost Empire fits this to such an extent that he invokes Darwin by name.
* Atlantis: The Lost Empire get into a fight on top of the zeppelin. Helga throws the first blows but Rourke knocks her down.
* Atlantis: The Lost Empire has a pretty awesome and crazy slasher smile when he tries to kill Milo with a fire axe. You can clearly tell the guy has gone batshit insane, especially after his attempt to steal the artifact had been ruined by Milo.
* Atlantis: The Lost Empire have forgotten much of their culture over the centuries, to the point that few of them can read their own writing.
* Atlantis: The Lost Empire he wouldn't live to see the finished film. The only scene Varney didn't get to record lines for was his goodbye to Milo, with Steve Barr filling in for him, instead. The film is dedicated to Varney.
* Atlantis: The Lost Empire. In a conversation with Milo, Audrey mentions that her father wanted two sons: one to follow him into the mechanic trade and the other to become a middleweight pro boxing champion. Instead, he got two daughters. Audrey's the mechanic, and when Milo asks about her sister, Audrey replies that "she's 24-and-0 with a shot at the title next month."
* Atlantis: The Lost Empire inhabited by humans who had a technologically advanced society centuries ago before they were submerged beneath the ocean by a self-inflicted disaster.

* Atlantis: The Lost Empire in the triple digits that will likely never be topped again in a Disney movie.
* Atlantis: The Lost Empire into some kind of weapon. The details are vague, but it is implied it caused the giant explosion that caused Atlantis to sink into the sea.
* Atlantis: The Lost Empire is a lot uglier and more disproportionately built than the other characters, along with a pair of rather weird telescope-glasses.
* Atlantis: The Lost Empire is another example. She wears what amounts to a bra and sarong for the whole movie. Except in the ending, where she starts wearing a long, flowing dress instead.
* Atlantis: The Lost Empire. It didn't help that he was describing the Leviathan, "a creature so frightening, sailors were driven mad by the mere sight of it," beforehand.
* Atlantis: The Lost Empire. It gets blown up by an explosives charge in the climax. Earlier, a rock bridge collapses as the expedition tries to escape an attack on their camp, sending everyone to the bottom, though unharmed and with their equipment intact and putting them much closer to Atlantis.
* Atlantis: The Lost Empire: Kida takes and wears Milo's glasses while showing him around Atlantis for the first time due to never having seen the object until now.
* Atlantis: The Lost Empire, Kida takes off her sarong before getting in the water, rendering Milo a babbling mess when she asks him if he can swim:
* Atlantis: The Lost Empire, lots of effort is devoted early on to establishing a huge herd of interesting supporting cast members, who then spend the rest of the movie tripping over each other for screen time to the point where it feels like all of them got shortchanged. If the proposed TV series had materialized, they would have each finally gotten a chance to shine.
* Atlantis: The Lost Empire, making it sink and helping Milo stop him.
* Atlantis: The Lost Empire Milo accuses Rourke and the crew of being mercenaries.
* Atlantis: The Lost Empire, Milo chooses to stay in Atlantis while his friends decide to leave with the gold.
* Atlantis: The Lost Empire, Milo enters his apartment to find Helga inside with a proposal from Mr. Whitmore to lead an expedition to Atlantis.
* Atlantis: The Lost Empire. Milo fits perfectly the nerd description being lean, with glasses and a bookworm; Kida even lampshade it when they met:
* Atlantis: The Lost Empire Milo goes from being freshly fired friendless nerd to having an expedition financed to search for his dream. By the end of the movie he basically has everything he ever wanted.
* Atlantis: The Lost Empire, Milo has a line: "I know how to swim pretty girl—good! Pretty good, I swim pretty good."
* Atlantis: The Lost Empire, Milo slashes the crazed Commander Rourke with an irradiated glass shard from the Heart of Atlantis' tank. The crystallizing energy then spreads through the villain's body, painfully and graphically mutating him into some kind of crystalline monster that can only howl in agony. His death by propeller mere seconds later comes off as a blessing.
* Atlantis: The Lost Empire: Mole. When Cookie is serving up dinner, he slops baked beans onto everyone's trays but refers to it as Caesar salad (for Sweet), escargot (for Audrey) and oriental spring rolls (for Mole). Mole looks at his tray, disappointed, and protests to Audrey that he wanted the escargot, and Audrey shoves her tray at him. Mole abandons the "spring rolls" and digs into the "escargot", even though it's the same greasy food.
* Atlantis: The Lost Empire Mole with soap if he doesn't leave Milo alone. Mole hisses and recoils like a vampire confronted with a crucifix, fleeing for his bunk.
* Atlantis: The Lost Empire more surprising, albeit less plot-relevant, that the rest of the crew is in on it (only briefly, though). When he pulls a gun on Milo, Milo isn't so much surprised as he is angry with himself for not realizing Rourke probably came for more than the scenery.
* Atlantis: The Lost Empire: Mr. Whitmore was a friend of Milo's grandfather Thaddeus. After an argument about the Shepherd's Journal, the following bet was made: "Thatch, if you ever actually find that so-called journal, not only will I finance the expedition, but I'll kiss you full on the mouth." Whitmore remarks to

Milo, "Imagine my embarrassment when he actually found the darn thing."
* Atlantis: The Lost Empire Ms. Packard complains about one of the bad jokes on the intercom announcements:
* Atlantis: The Lost Empire often gets the complaint that a herd of supporting characters with strong personalities and screen presence are left battling for limited screentime (and all end up being shortchanged), and more time could have been devoted to exploring the setting as well.
* Atlantis: The Lost Empire. Only one of them still functions by the time the heroes arrive at the gateway to Atlantis — there used to be an entire fleet of them back in Atlantis' heyday — but it's more than enough to trash their sub and kill over a hundred people.
* Atlantis: The Lost Empire opens with Milo giving a presentation on a chalkboard; he steps into the display when he accidentally erases part of it. Later, he also draws a diagram of the "trap" at the entrance to Atlantis.
* Atlantis: The Lost Empire: Princess Kida heals Milo Thatch's wounds with her hands after the latter is badly injured. (Technically, though, the healing properties are contained in the crystal shard that she wears around her neck.)
* Atlantis: The Lost Empire right after she is transformed back from her crystalline form.
* Atlantis: The Lost Empire shows why people riding in hydrogen-filled dirigibles shouldn't back-stab badass subordinates packing flare guns.
* Atlantis: The Lost Empire's influence, though whether they all forgot with time or never knew to begin with wasn't revealed.
* Atlantis: The Lost Empire sinking their ship, killing said Vikings, and causing the Shepherd's Journal to float away into the Atlantic Ocean...
* Atlantis: The Lost Empire speaks English this way. The same applies to all the other Atlanteans as well. For bonus points, Kida's father was voiced by Leonard Nimoy himself.
* Atlantis: The Lost Empire tells a story about how there used to be a mystic named Zoltan (who used to speak in the third person, for some reason) along for the ride. At one point everybody sounds off after falling down a hole. For the longest time he was still there shouting "Zoltan is okay!" even after his character had been written out of the script.
* Atlantis: The Lost Empire. The city is powered by a crystal called the Heart of Atlantis, which is what sunk it in the first place. Princess Kida was a child at the time of the sinking but is still young and spry hundreds of years later in 1912.
* Atlantis: The Lost Empire, the explorers come across a field of sunken ships ranging from Greek triremes to more modern iron ships shortly before being attacked by the Leviathan.
* Atlantis: The Lost Empire. The former is twenty-something, while the latter is over 8,000 years old. However, it's pretty strongly implied that the crystal at the heart of Atlantis is responsible for Atlanteans' longevity, so anyone who stays in Atlantis will enjoy it as well, regardless of their origin.
* Atlantis: The Lost Empire their diplomat, although that doesn't stop Mole from trying to volunteer.
* Atlantis: The Lost Empire: The lives of the citizens of Atlantis are prolonged by a piece of a comet which they call the "Heart of Atlantis". Kida herself is roughly 8,500 — 8,800 years old (according to Milo), but she physically appears to be in her mid-20s.
* Atlantis: The Lost Empire, the rich Mr. Whitmore gives Milo Thach the Shepard's Journal at his late grandfather's request. Mr. Whitmore considers the idea of Atlantis to be a hoax and the journal useless, with or without Milo's linguistic talents. As he continues to shoot down Milo's ideas of an expedition and pointing out how no one will help him, Milo explodes and affirms he'll find Atlantis even if he has to do it alone in a row boat. Mr. Whitmore then smiles and congratulates Milo; Seeing his determination convinces Whitmore to go forward with fully funding a large scale expedition to find Atlantis.
* Atlantis: The Lost Empire, the title city has guardian golems which project an

impenetrable protective shield over the city. This is why it sank mostly-intact into an air pocket rather than being trashed completely (though the outermost areas were out of luck, having been established after the shield system and were thus beyond its border). It was also called into service to protect the city from a volcanic eruption, and showed the ability to harden and crumble the magma that covered it.
* Atlantis: The Lost Empire, the titular kingdom's capital is protected by a massive air bubble but the outskirts are exposed to the ocean and in ruins.
* Atlantis: The Lost Empire, the voice of Cookie, who died more than a year before it came out. He was dying of lung cancer at the time, and he performed the role knowing full-well he wouldn't live to see the finished film.
* Atlantis: The Lost Empire. This is written on the vehicle, but when your people were stuck in flood-survival bunkers long enough to forget how to read their own writings...
* Atlantis: The Lost Empire throughout the entire film. This may have been one of Mike Mignola's contributions to the character designs.
* Atlantis: The Lost Empire, to the point where he's the only one who can translate the Ancient Atlantean text carved into a wall to contemporary Atlanteans.
* Atlantis: The Lost Empire: Vinny, being Italian, gestures with his hands whenever he speaks.
* Atlantis: The Lost Empire way down and is crushed by a flaming Zeppelin. Rourke winds up as a blue crystal monster and ultimately gets hacked up in the propellers of his aircraft. In a twist, the crew who abandoned the plan are richly rewarded by the grateful Atlanteans with a huge pile of treasure that the Atlanteans have no practical use for anyway.
* Atlantis: The Lost Empire "went down with the sub" since he chose to stay behind in Atlantis instead of going back with his teammates.
* Atlantis: The Lost Empire when the professors at the Smithsonian try to get away from Milo.
* Atlantis: The Lost Empire, where the King actually ends up dying of internal bleeding.
* Atlantis: The Lost Empire, while Whitmore is going over the gang's cover story:
* Atlantis: The Lost Empire while working in New York as a cook in a restaurant. It's truly baffling how he got a spot on the expedition at all.
* Atlantis: The Lost Empire. White hair seems to be a racial trait of all the Atlanteans, suggestive of their longevity (but not their age — the children have white hair, too).
* Atlantis: The Lost Empire who goes on an adventure to find Atlantis vindicate his grandfather's life-long work. He shares the screen with a herd of supporting characters all with strong personalities and screen presence.
* Atlantis: The Lost Empire." (who voiced Cookie the cook). This is actually the last film to ever star that actor.
* Atlantis: The Lost Tales, has her kidnapped so that he can become King.
* Atlantis: The Lost Tales it's revealed that the Stonehenge was built to hide a terrible power and the Moai statues were made to appease a non-existent god.
* Atlantis: The Lost Tales takes over, when women are made into second-class citizens.
* Atlantis: The Lost World generic RPG setting. In the land of Uallach, one member of the Ancient Order of the Council is chosen to lead that group for a term of a year and a day.
* Atlantis The Lost World: The Kanawalla desert of Mu has scorpions that are only three inches long but have venom so virulent it can kill a mule in seconds.
* Atlantis, the main team is split 50-50 between Earth humans and locals — Sheppard and McKay from Earth, and Teyla and Ronon from the Pegasus Galaxy. This stays for the rest of the series.
* Atlantis: The Second Age surviving on what remains of its crystal technology.
* Atlantis: The Second Age: The world is destined to be dominated by seven different species over its existence. Humans are the fifth of these races, making the Jinn, Ophidians, Lemurians, and Atlanteans all Precursor races, and making

humanity fated to be itself a Precursor for two future species. Somewhat unusually, none of the old Precursors have gone extinct yet, but their numbers and powers have been greatly diminished. The Atlanteans are still trying to cling on to their power, but humans are already in the process of taking over.
* Atlantis: The Second Age to create Great Works to show that you are worthy of the gods' favor. If you get too much power without showing that you deserve to wield it, the gods will smite you for your hubris and lead you to your doom.
* Atlantis: The Second Age to use lots of Hero Points to do things that could only possibly be done by those greatly favored by the gods.
* Atlantis: The Second Age you get additional experience from fighting naked (though simply not wearing any kind of armor is enough to get this bonus).
* Atlantis the small craft with their guns (to be fair, those guns are meant for bigger fish, that's why they have Darts).
* Atlantis, the world with Atlantis in it is based mostly on Greek Mythology and culture. However, many of the characters seem to find public violent games, tournaments, public executions, etc. horrible. In ancient Greece, people would pay to see these. Why else would they exist? Generally this is sometimes subverted though, as said violent games and such are always shown drawing huge crowds who often cheer and clap when someone kills another. Even hero Hercules talks happily about all the food available during one such tournament, usually when the heroes voice concern about them its more out of somebody they care about might die or the methods of execution are legitimately incredibly cruel even for the time period (most famously the brazen bull that cooks people alive).
* Atlantis thousands of years in the past, which motivates an Arkanian fanatic trying to rebuild the empire to take Atlantis out of the sea disregarding that it would cause a tsunami.
* Atlantis Underwater Tycoon have included penguins among the free-roaming sea life.
* Atlantis was also part of the pseudo-religious and pseudo-scientific Nazi Esotericism believed to be the homeland of the "Aryan" race and some sort of Utopia that later decayed due to "racial mixing", a belief still held by modern followers of Esoteric Hitlerism and other neo-Nazi religions. Interestingly the Nazi belief is quite the opposite of the Theosophic and other mainstream Esoteric schools which actually see the Atlantis as a lower level of evolution compare to us and that believe that the Atlanteans far from being "white" were brown-skinned and/or Mongoloid.
* Atlantis was Poseidon's seat of power. As in the myth, Poseidon's armies of Atlantisians moved to the conquest of the world only to be routed by Athena and her Saints as they attacked her Sanctuary (near modern-day Athene), with Athena then sinking the whole place and
* Atlantis was the "jewel of the Empire" according to an alien villain in
* Atlantis were somewhat advanced in comparison to neighbors, Atlantis was a self-contained city-state that enslaved the crew of any ship that discovered their location.
* Atlantis, where the Atlanteans invented a time machine and escaped into the past when their city was destroyed.
* Atlantis, who blame them for all the pollution coming from the surface world.
* Atlas/Frank Fontaine; during the climax, he has the audacity to call you ungrateful and even claims that he’s the closest thing to family you have.
* ATLA shipping fanfics that have Sokka starting a relationship with another character have Sokka and Suki brake up prior to the start of the story. Always because of the long-distance issue as well, with some adding Suki cheating on him on top of that in fics where their relationship is no longer amicable.
* Atlas is home to large fields of plants resembling floating green balloons tethered to the ground by think stalks.
* Atlas mechs both have weakpoints. For the Atlas, the shoulders, knees, and crotch all have plating that can be shot off to stagger it and interrupt an attack in progress, as well as the giant vent on the back (although this is harder to get a bead on). Shooting the lumps on a Scion's back can have the same stagger effect on

top of dealing a pretty decent chunk of damage to the Scion. On higher levels in multiplayer, knowing this is essential.
* Atlasnaya is mentioned to have lost an arm and leg each to an accident after she was sold to the Bratfa.
* Atlas of Medieval America by that point; California splits into the northern "Republic" and the Scientologist-controlled southern "Free Zone"; the "Territory of Iowa" is a military dictatorship controlling all land between the Missouri and Wabash rivers; the "State of Deseret" is a Mormon theocracy controlling Wyoming and parts of Utah and Ohio; Washington DC became a city-state under the control of the American Non-Denominational Church similar to the Holy See, with the Supreme Court and Chief Justice filling the roles of the College of Cardinals and Pope; it also mentions several warlords in the East and hydraulic empires clustered around rivers in the Western desert.
* Atlas of Worlds added a second seperate final boss, the Maven. The Shaper and the Elder can still be fought by collecting fragments from influenced maps.
* Atlas, one of Guadalajara's top two teams, not only tend to lose the derby against the local Chivas, but also have never won a single championship since 1951.
* Atlas Reactor has several freelancers primarily wielding guns and evoking this trope:
* Atlas Reactor: Kaigin has smoke bombs, which block enemy line-of-sight and turns him invisible until the next round. Celeste has smoke grenades, which produce less smoke but deal damage when they hit.
* Atlas Reactor. Once deployed Rio hovers above a 16-square region of the map and automatically deals damage to anything caught underneath, with Grey able to either move Rio or supplement his damage with her own weapons. Rio is treated as a terrain feature and cannot be attacked, only flying off the map if Grey is killed.
* Atlas Reactor who currently run Atlas. Several of the Freelancers you can play as were veterans of the War, having gained Resurrection Contracts due to their actions during the war.
* Atlas Shrugged, being an Objectivist treatise, is all about how the markets will inevitably select the most skilled and deserving people. Despite this, the creators kept working to make the films despite each one flopping horribly in the box office, thereby ignoring the markets. As if that wasn't bad enough, they turned to Kickstarter to get the last one funded, breaking one of the central tenets of Objectivism by asking others for help instead of doing things themselves.
* Atlas Shrugged "crave the validation that having the hero join [them] would bring" exactly.
* Atlas Shrugged Dagny flies an airplane when she goes searching for John Galt. It is never mentioned why or how she knows how to fly.
* Atlas Shrugged examines this trope with Dagny's obstinate refusal to abandon Taggart Transcontinental as a lost cause, despite all the evidence of its decline and predictions of its imminent demise (which turn out to be true). Dagny is eventually convinced to leave it all behind, but Eddie Willers never learns to leave the dying railroad/dying world and presumably dies with it.
* Atlas Shrugged: Galt's engine is called out as working on a new principle and proving several laws of physics to be false. Unkind people have suggested it harnesses the power of Plot.
* Atlas Shrugged gives a surprising example: Ragnar Danneskjold is a renegade pirate modeled on a romantic image of vikings. He should be a warrior. But as the book progresses, it becomes clear that what makes him so devastatingly effective is that he is an almost pure soldier:
* Atlas Shrugged, giving food and shelter and later a job to a homeless man, or devoting their life to (what they see as) recovering stolen wealth and returning it to its rightful owners, with no monetary or material benefit to themselves, they will find a way to rationalize it as being "selfish."
* Atlas Shrugged hang out. It's designed to look like it's underground but is actually on top of a skyscraper. The basement design is symbolic of the fact that despite their wealth and power, they cannot aspire to greatness, they have to drag it down to their pathetic level. It's established that the drinks are rubbish so

they only drink there because it's a fashionable place, which shows that they are conformists. Still, were it not for the bad drinks and the even worse company, you have to admit, it would be a pretty cool place to be. It looks underground, but it's not!
* Atlas Shrugged, Hank Rearden is completely prepared to hate Francisco D'Anconia for his perceived worthlessness. When they actually have a conversation, Rearden realizes that they share a LOT in common.
* Atlas Shrugged has three sides: the strikers, the scabs and the looters.
* Atlas Shrugged He likes the fantasy, but he likes the power he gets from harming others just as much.
* Atlas Shrugged invented, then destroyed, a futuristic power generator that converts atmospheric static electricity into direct current. The setting qualifies, but the theme is D'Punk inside out, with typical protagonist/antagonist roles reversed.
* Atlas Shrugged involves business owners and entrepreneurs going on strike when laws become too restrictive for them, causing society to collapse. The owners simply walk away from their businesses. Skilled workers, some for similar motives and some in sympathy with their former bosses, refuse to accept promotions or greater responsibility
* Atlas Shrugged is suddenly an established technology as it was in 1957, when the novel was finally published. Sure, the story takes place over a few years, but said story involves the greatest geniuses and innovators mysteriously disappearing.
* Atlas Shrugged. It's worth noting, though, that Galt himself was interrupting what would have otherwise been another in a series of speeches filled with government propaganda.
* Atlas Shrugged, John Galt, to show up. It takes about 400 pages for some of the instigating action to take place. That first portion of the book is taken up with introducing the characters, establishing just how bad the "looters" are and setting the stage for their truly awful deeds.
* Atlas Shrugged, John Galt, unwilling to countenance the socialist direction in which the U.S. government is inscrutably headed, institutes "the strike," encouraging all of the major players who run the industry, banks, etc., to quit their jobs and join him in his secret hideout of Galt's Gulch. As the government becomes more tyrannical, his idea spreads and more and more people begin quitting their jobs or working under their means, refusing to be exploited. In response, the government institutes Directive 10-289, in which nobody is allowed to quit their job. If they do, they are branded as an outlaw, and their job is given to somebody else that isn't currently employed, regardless of that person's ability to actually do the job.
* Atlas Shrugged — the man who has never experienced "fear or pain or guilt". This is supposed to be a good thing.
* Atlas Shrugged—thus, Jim wants Cherryl to remain uncultured and resents all her efforts to improve herself.
* Atlas Shrugged moments before we discover exactly what he was willing to sell his word and his soul for.
* Atlas Shrugged, only to find it worthless. He tells reporters shortly before the story breaks that he came to New York to "witness the farce" (everybody thought he was referring to a sleazy divorce scandal). Shortly afterwards, we find him telling Dagny how amused he was at the prospect of the collapse of Wyatt Oil and all of the world's great industries that he would destroy with more apparent pranks. Later subverted when we find out that he is one of the "destroyers" (or strikers) who is destroying industry so the looters will gain nothing of value and capitalism can start anew after their downfall.
* Atlas Shrugged Part II features an appearance of Sean Hannity along with fellow Fox News denizens discussing the plot of the film. Their opinions are exactly what they would have been in real life.
* Atlas Shrugged: Rearden fantasizes of using Dagny to satisfy his "degrading need," but when he turns his fantasy into action, he finds to his shame that she's as "depraved" as he is, and is quite proud to have slept with him.

* Atlas Shrugged, she spends the next day and a half shutting out every cognitive process not related to fixing the problem.
* Atlas Shrugged take place in NYC. Darn near lampshaded in the final scene, when the banker is noting the location of his investments, and all of them are totally or partially in New York.
* Atlas Shrugged. The book spends so much time on his perfection and how Dagny Taggart is his only perfect woman, it's impossible to imagine him just having sex for the hell of it. This also applies to Dagny's other lovers. She had sex with both Francisco and Hank Reardon. Reardon hated his sexual urges which drove him to his frigid wife and Dagny was Francisco's first. It's difficult to imagine them moving on and settling for someone else.
* Atlas Shrugged: The Cobra Commander Dialogues's use of the trope. As Cobra Commander notes, he has vastly more experience than John Galt at intercepting and subverting broadcasts, and through quick, simple and effective denunciation of Galt and his followers, ensures the world all but surrenders to Cobra. Hilariously, a part of his plan involved letting Galt begin his broadcast, only to cut him at critical moments. Galt's offended he's lost his chance to rant.
* Atlas Shrugged. The events of the book involve the society of the United States undergoing a degeneration into extreme economic collapse, both because of the actions of the looters in the government, as well as the ways in which John Galt and the strikers react to these actions.
* Atlas Shrugged, the idea that such a thing would cause anything but a minor scandal—let alone convince Rearden to sign away his life's work, which he swore he would never do—just comes across as bizarre.
* Atlas Shrugged (Then again, by the book's morality, this is the looters' and moochers' fault rather than anything to blame on the protagonists...)
* Atlas Shrugged the protagonist Dagny Taggart spends half the book searching for a man she calls "The Destroyer" and "The Most Dangerous Man Who Ever Lived", vowing to save the world from him. When she finally finds him (the famous John Galt), she falls in love with him at first sight, but still tries all she can to thwart him for another quarter of the book. (Rand's posthumously published Journals include a planned scene where she actually hands him over to the police and then bursts out crying when he is taken away; in the actual book, she only pretends to do it in order to save his life).
* Atlas Shrugged they make money; subverted when Hank's Rearden's money fails to protect him during his divorce trial; played straight when Rearden is allowed to buy resources and sell his products how he wishes, despite legally binding orders to the contrary.
* Atlas Shrugged, though used unconventionally. First seen when a technology that allows electricity to be gathered from the atmosphere without any adverse side effects, pollution, or factories, lightweight and apparently easy to construct, is hidden by its inventor out of fear that the setting's collectivist governments would exploit that inventor and people like him. Later the same principle is applied to innovation and skilled labor in general, to greatly destructive effect.
* Atlas Shrugged treat their employees with the utmost respect and consideration. Dagny is quick to thank and promote employees like Owen Kellogg who distinguish themselves well with their ability and effort, and Rearden pays higher wages than any union would ever demand... in exchange for the most talented, competent, capable work force money can buy.
* Atlas Shrugged uses "Kiss the Sky" by Shawn Lee's Ping Pong Orchestra.
* Atlas Shrugged, when Mr. Thompson tries to coax John Galt into sacrificing his principles to save the country without giving him orders. Galt twice asks Mr. Thompson if what he's telling him is an order, and Mr. Thompson is quick to insist it's not.
* Atlas Shrugged, where ambition is pretty much what makes the heroes good. But also played straight! James Taggart, Wesley Mouch, Dr. Robert Stradler and others are descend to horrific levels of evil (e.g. letting an entire trainload of people die simply to avoid being blamed for delaying said train) due to ambition. The difference is Dagny, Reardon, Galt, etc. can actually do the jobs they have

ambitions to hold.
* Atlas Shrugged, which emits sound waves capable of destroying anything within 100 miles.
* Atlas Shrugged, which he regarded as such utter garbage that he decided he would never read again, making the bookmobile driver's whole plan null and void.
* Atlas Shrugged Whilst she is clearly an idealized author avatar, a significant portion of the book's female audience has found Dagny provides a satisfying fantasy for them, as well.
* Atlas Shrugged, who essentially make themselves into an "Aristocracy of Pull".
* Atlas Shrugged without finding some chain-smoking rich industrialists. The mystery behind a symbol on a cigarette box is even part of the plot.
* Atlas Shrugged, would not be tolerated in a modern left-wing organization, being rather anti-modernistic and anti-woman.
* "At Last" is now universally associated with Etta James, who recorded it in 1961, but it was written in 1941 for the Glenn Miller Band. Many people might associate it with
* At Last the 1948 Show) is a parody of nostalgic conversations about humble beginnings or difficult childhoods. It features four men from Yorkshire who reminisce about their upbringing. As the conversation progresses they try to outdo one another, and their accounts of deprived childhoods become increasingly absurd.
* At Last the 1948 Show — and, sure enough, the head of children's television and a group of Eskimos smash straight through the placard.
* At Last the 1948 Show supposedly kept shows sitting on shelves for months or years before finally deciding to air them. (Not to mention the fact that ITV didn't actually go on air until 1955.)
* At Last the 1948 Show, the sketch is now more associated with Monty Python.
* At Last the 1948 Show (which may or may not be labelled "SWAG"). The best example is the "Burglar Hides in the Library" sketch - not that the other library patrons take much notice of the burglar's attire until a police sergeant shows up looking for him - while "Uncooperative Burglars" features burglars who are more understated in their clothes (flat caps, neckerchiefs, and a swag bag but no masks or striped jerseys) but more open in their defiance of the law.
* At Last the 1948 Show) with the elliptic; 82 degrees, says Diamond. Finally, Baby Face asks for the square root of 7,974; 89.3, says Diamond. Baby Face says he now has to kill Diamond - he knows too much.
* Atlas, who Zeus condemned to hold the sky on his shoulders. (This is usually misinterpreted as the Earth.)
* At LAX Airport, a thief picked the pocket of a Marine off to a tour of duty at Okinawa, but didn't ask where the Marine was coming or going, and certainly didn't count on him having already changed his money.
* Atlético-MG had 30 years as this following the first official Brazilian championship in 1971
* At least 100,000 years ago, the Grunt homeworld of Balaho suffered a total environmental collapse caused by overindustrialization. Even nowadays, Balaho has not yet never fully recovered from that disaster, as it is
* at least 18 pages (front and back), explaining why Ross was defensive about falling asleep while reading it at 5:30 AM.
* at least 50, because the younger one is in the spring of their life.
* At least according to the Romans the native Britons would often scream at the top of their lungs when attacking. Combine this with spiked hair, blue warpaint, and the fact that they were usually half again as tall as the Romans, and you can see why they made them nervous. Not that much use against actual tactics, mind you...
* At least a couple of characters, upon learning the Doctor has two hearts, have asked if he has two of anything else.
* At least a few authoritarian regimes have their own civilian computer networks that are cut off from the wider internet as a means of controlling the populace and stopping the flow of critical international news and dissent.
* At least a few times a season, a GI of the week got a Dear John letter. An

Italian is distraught upon receiving a "Dear Giovanni" letter.
* At least a few years ago, every single fashion doll was a Barbie doll, regardless of whether or not it was made by Mattel. Just so long as it could wear the same clothes as a Barbie, it was a Barbie.
* (at least after the timeskip) that Hancock is in love with him and wants to marry him, he just isn't interested. Which is pretty impressive, since Hancock is considered to be the most beautiful woman alive.
* At least a partial justification for them, seeing as a combination of
* at least Ashi survived the fall, but the jury is out on her other two sisters. Given they don't appear again, it's safe to assume that they're gone for good.
* At least as of 4th Edition, and we're in 7th as of 2016, this is portrayed not as a suicide attack but as a
* at least as old as the Roman Republic. However in armies where there were actual generals (command and control specialists) as opposed to warleaders (badasses who point swords and say charge), the custom was to ride on a horse back and forth along the line allowing the commander to personally intervene in a crises. This was dangerous work in itself, often more dangerous than being a private. But it wasn't the same as personally using weapons.
* At least a third of the Union Army in the American Civil War (as many as a million troops) were seventeen or younger. Boys as young as thirteen fought in combat (especially under the Confederacy), as opposed to drummer boys who were technically noncombatants.
* at least a woman identical to (and named) Meg, but is most likely actually Meg's past life. Lois' past life, on the other hand, marries Stewie's past life when she's misled to think Peter is dead.
* at least a year going through constant hazing, both in and out of the ring, until the veterans are satisfied you have the "mental fortitude" to make it in the business.
* at least before going back to break through the door to the bathroom.
* at least before the older Jonas murders Martha in front of the younger Jonas to ensure his own timeline proceeds as happened
* at least creative, having them take the form of everything from gladiator-style swordplay to ice hockey.)
* At least Darcy is motivated by genuine concern for his friend's happiness and regrets his actions when Elizabeth makes it clear that Jane really
* at least deadliest natural disaster in history, the Yellow River flood of 1887.
* at least early on), and Seiya did so while hidden behind a rock, hurrying up before he knew Shaina was looking for him and would slaughter him if she caught him unarmored.
* At least every other episode, Stan does something that would get the twins sent right back home to their parents if the cops were the least bit capable at their jobs. At best, he tends to turn a blind eye to all the potentially dangerous shenanigans that Dipper and Mabel get up to, and at worst... it's outright stated that the three of them have spent at least one night in jail.
* at least February of 2013... but wound up not playing at all for the rest of that season.
* At least for a segment of fandom that worships him like a god. The other half seems to hate him.
* At least for kendo, there is reason to look into your partner's eyes, as letting your eyes wander may give away your intention; but the eyes can remain visible as long as the mask conceals familiar facial features, and swordfighters express far more with their body-language than their eyes, which traditionally are concealed behind a helmet of some sort, anyway.
* At least for the latter's first few appearances, the relationship between the Doctor and the Master was
* at least four of the men, especially knowing the lengths to which tobacco companies went to deny or downplay the health risks of smoking. These days, the only places where you can advertise tobacco products are either on printed media like magazines, billboards, or the internet, and you must put in a noticeable

warning about the specific health risks involved.
* At least from his son Shinji's perspective, Paul Patton Jr. gets little to no respect, both in and out of his
* At least half a dozen aliens here and there have been found off-world, presumably brought to earth and integrated into human society, and never seen again. The Witness Protection Program must have a permanent office set up in Colorado Springs, CO, and/or Stargate Command has a permanent liaison with the WPP.
* At least half of any given fandom regarding the fandom itself. Especially the
* At least half of the women in One Piece are attractive and above the 172 cm line.
* At least half the cast of the show fits under this trope, with special mentions for Cheryl/Carol and Pam. Pam in particular has slept with every main cast member except for Cheryl/Carol and
* at least happened. How long they were in existence before that is unknown but they're said to be the embodiments of Life and Death in the Pokéverse.
* At least he was reunited with his true love, a little strawberry milk carton.
* at least his third public appearance on the surface). The episodes immediately following? A 2-part story arc all about how Richard Dawkins and Mrs. Garrison turned the entire planet into straw atheists.
* At least, hope without the willpower to change things is meaningless, as in
* At Least I Admit It: A character claims that they're better from other people who do the misdeeds they do simply because they have the courtesy to not deny that they've done wrong.
* At Least I Admit It: Admitting my many flaws and shortcomings, no matter how bad, makes me better than all of you!!
* At Least I Admit It: Admitting that you do wrong makes you better than the other guy.
* At Least I Admit It: A person who calls out another person for wrongdoing is themselves no saint, but excuses that they at least don't deny or lie about their misdeeds.
* At Least I Admit It: Being open about your flaws doesn't make you a bad person, and let's leave it at that.
* At Least I Admit It: Sure, we may have done very terrible things (which are for the greater good, by the way), but that doesn't make us any worse than the next hypocrite!
* At Least I Admit It: Yeah, I might be an asshole, but at least I don't bother hiding it like a pussy!
* At least in 2nd and 3rd edition, it was frequently mentioned that one of the components for the ritual of lichdom a wizard had to make was a potion of extreme deadliness. So deadly that, if the wizard fails in his bid for lichdom, he would die, and the gods would not be able to resurrect the fool if they wanted to.
* At least in Canada, people will sometimes use (or at least recognize) the military slang "klicks" as an abbreviation for "kilometre" and also use it as an abbreviation for "
* At least in China and Japan. In September 2020, two famous Japanese
* at least in early appearance, she depended on magical artifacts and theatrics, having no real innate powers of her own.
* At least in Europe, “Crying in the Rain” is an a-ha song. Who are the Everly Brothers anyway.
* At least in Germany, instead of saying "kilometre per hour", many people tend to use the abbreviation "
* At least in Germany, ring tone subscription providers and their ilk actually enlarged their fine print to be legible after taking
* At least in hindsight, the first two-part story has her go through an analogy to the viewer surprised to like the show (similar to the Rainbow Dash example below), where she goes from "What am I doing here, this is stupid, it's not my kind of thing" to "These ponies are awesome."
* At least in older stories (before pop culture made them rather Disney-fied and cute), this is usually one of the defining traits of

* At least in Ryougi's case, she is explicitly stated to come from a different universe, as
* At least in the case of the Elder Things, their city may have been
* At least in the dub, their real names are Bunny and Klatt, which suggest that they may also be a shout-out to the original Bonny and Clyde.
* At least in the early seasons, the Bajorans are former terrorists who have given up their violent ways for politics (PLO and IRA), and newly-liberated Eastern Europeans on the verge of political anarchy.
* At least in the first few pages of the book the Space Marine had the excuse of being under the influence of a berserker pack. The rest of it, not so much.
* At least in the Hidden Leaf Village, the academy is shown to be more of a basic skills course that focuses at least as much on academia as it does on combat skills. Though the main cast all decide to take the chunin exams early in their careers, the average genin will usually first spend at least a few more
* At least in the manga version this is also downplayed a bit because with the exception of points where
* At least in the new series, the Twelve Colonies are implied to have been in contact since their founding, making it fairly reasonable that they would have a fairly unified culture. The really surprising thing is that different skin colors and British accents still exist, and yet don't seem to map at all to colony of origin.
* At least in the revival version ("Big Bad Voodoo Daddy"), it's pretty explicit in the opening lyrics: "Last night I was dreamin'/Dreamed about the H-Bomb"
* At least in the United States, there will always be some channels which probably wouldn't change their programming even at
* At least in the US and most other Common Law countries, this type of contract has a legal remedy because it's well-known no one reads them. Imagine what a pain it would be if you had to read these every time you rented a car, bought a cell phone, and so on. Now imagine the headache if a company did slip some truly odious language into the fine print somewhere, say, a $10,000 USD cancellation fee for your cell phone contract. This type of contract is called a
* At least into 2013, this guarantee still applied in Mexico... for competitor Pizza Hut.
* At least in WWE, Gunn, who himself had a background of being a toughman, noticed this and suggested to hold off the match between them until the end, but was condescendingly told that they believed in Williams's ability to win. This mockery likely fueled his drive to win as, after Williams tore his hamstring in the match, Gunn managed to win via knockout. After winning the Brawl for All Gunn was sent home, having heat with management for ruining their plans for Williams, as he would only be brought back at Wrestlemania 15 to be fed to Butterbean in a Brawl for All match as a punishment before being fired afterward.
* At least it was good fortune later on—at the time, they assumed the ships were part of the fleet that had just chased them, and made another blind jump. That one didn't work out so well, hitting the mass shadow of a large comet, damaging the ship's FTL drive and killing most of the crew.
* at least it was here knows they're in love with each other, but no one wants to interfere.
* at least it was here. Pyrrha's step-mom was a bit better, but could only do so much to counteract her wife's problems.
* At least it was; nowadays you can do it in your kitchen. Isn't science grand?
* At least it was, until the comic story "Untold Tales From the Big Superhero Wish!" revealed that this origin story caused a lawsuit, and as a result, The Chin was given a new origin all to similar to Superman.
* At least milder variants of this are widely expected in Japanese business culture, especially for the
* At least once a generation, American politics tends to become utterly dominated by the persona of a single president; this is despite the fact that the American political system actually has
* At least once, Catherine deliberately tried to gross out the rookie cop that was

supposed to be guarding the crime scene. She excused him to let him get some fresh air (and possibly puke in privacy,) which was a big mistake, since the killer was still in the house and attacked her.
* At least once, Holmes's disguise was also mostly due to acting, in "The Final Problem"—Watson is supposed to meet Holmes at a train station and instead is joined by an old Italian priest in a cassock. The priest changes his expression for a moment and Watson realizes it's Holmes. (The cassock is his only physical disguise.)
* At least once, however, in one Strong Bad Email, there is an instance of a character eating something unintentionally, as when Strong Bad and The Cheat (wearing a towel) give Coach Z what looks like a bowl of ice cream (with toasted coconut), which he eats:
* At least once, people seeking medical treatment have entered the hospital which serves as the set.
* At least once per game), you will fly through a tunnel, bunker, or some other underground structure in order to destroy something inside, usually during the last or second to last mission.
* At least once with Squidward. It only exacerbates the feud he set up between Spongebob and Patrick, since they fight over who's going to take care of him.
* At least one 1920's bank robber favored involuntary Outside Rides — he would put a solid row of hostages on his getaway car's running boards until he got out of town.
* At least one animator has discussed this from a creative standpoint, lamenting the downsides of working on an adaptation that only lasts for 13 or so episodes. She feels that the anime ends before the animators can really get a sense of the characters and how to use them, as well as occasionally resulting in weak endings.
* At least one antagonist, Kodachi, uses this to get the drop on Akane once.
* At least one Artificial Intelligence created by the Mechanicus is rumored to exist in the present-day, but that's a noted exception due to being made by
* At least one author has written a series whose entire focus is on this sort of thing.
* At least one barroom trivia game had a multiple choice question asking "
* At least one case involved the camera being tampered with by someone on the inside.
* At least one chain of stores in Pennsylvania ends all prices in wacky numbers like .88 — but the reason is so that, after the 6% sales tax is added, the prices come out to even dollars.
* At least one college psychology textbook lists the four 'F's of psychology as fighting, fleeing, foraging, and
* At least one commentator has said something along the lines of "I like hardcore matches because the rules are simple - there are none!"
* At least one commercial for a cellphone carrier ends in this way: the cellphone is a gift, and "her parents would
* at least one continuity the madness of the asylum and its inhabitants warped space and time.
* At least one craft guitar and guitar gear maker, which shall not be named because no one wants to be whacked, but whose clients included a
* At least one Dark Eldar Kabal is mentioned in the background to have maintained "pain farms". Dark Eldar in general have huge factories where thousands of slaves work to produce weapons and food, but they don't really bother to farm slaves. There's hardly any need to bother when you have a whole galaxy full of "free range" ones.
* At least one Discworld book points out that in nine out of ten situations, there's just
* At least one documentary show had a scene of frogs doing mating calls at night. Sounds included chirps, whistles, a whimper, and something akin to a rapid fire toy laser gun.
* At least one early story depicts prehistoric Krypton as being encased in what's only described as a "chrysalis", a semi-solid barrier encasing the entire

atmosphere of the planet. On occasion slimy pieces of it can slough off and drip onto the surface, completely enveloping anything unfortunate enough to be caught under them.
* At least one episode featured a defendant who reluctantly pled guilty to a murder that he is later exonerated of. The twist was that his lawyer was crooked and strong-armed him into taking the plea deal for a bribe from the actual guilty party. As a rule, though, most defendants on the show will plea out once enough evidence piles up against them, but usually not until they've gone to trial.
* At least one episode has a suicide staged as a murder by a broke guy hoping his life insurance policy will provide for his brother. Unfortunately, the CSIs end up figuring out the truth.
* At least one expert concluded from a nearby Secret Service agent. Under this theory, most of the subsequent inconsistencies and suspicious behavior were the result of the Secret Service desperately trying to cover up this incredible screw-up. In 2017 declassified CIA files corroborated this theory, as they clearly stated that two persons had to have been involved.
* At least one game was won by a participant shouting "MORNINGTON CRESCENT!" as soon as the game began. This led to some grumbling from the chairman,
* At least one Golden Corral restaurant keeps one small table always decorated in the military tradition, with an explanation posted of each symbolic part of the table. It's touching and refreshing, oddly, all at once, to see such a memorial setting put out in the eye of the general public.
* At least one group of adventurers has made it through without a single casualty by having a team of dwarves dig around the traps and obstacles with non-magical mining equipment over the course of several weeks. The writers planned for ethereal travel, melding into stone, magical defenses, teleportation, etc. but never expected an ordinary pickaxe and a group of patient, careful adventurers.
* At least one group of dumb criminals tried to dispose of (a very large amount of) cannabis
* At least one group of Glassblowing students have set up a still, using the incredibly hot air coming off of a glass furnace. Unlike most example, most of the alcohol produced was used for fuel in torches to shape the glass without causing it to melt.
* At least one historian has suggested that Custer's legendary recklessness was the result of a "Death Wish" caused by Custer's discovery that he was suffering from syphilis, which at the time was incurable, ultimately fatal, and caused delusions of grandeur and obsessive-compulsive behaviour.
* At least one Hollywood-themed week in 1998 used neon palm trees and a giant 'HOLLYWOOD' sign taken from the short-lived 1992 CBS game show
* At least one human, Dr. Lauren, was deliberately allowed to know about the Fae, on some
* At least one human Saint Germain in Season 3 was ballsy enough to refer to
* At least one insignificant TNA wrestler got this kind of sendoff when his "Feast or Fired" case (all the other cases hold title shots) revealed "Fired". A brief montage ended with the words, "We hardly knew you," which was probably delivered
* at least one instance an episode. Some of them, like the Dance of Joy, became running gags that by the end of the show's run seemed more or less normal in comparison (to the extent that Larry did the dance with Balki a few times).
* At least one instance of an African/Asian elephant hybrid was born in the Chester zoo in 1978, named
* At least one interpretation of him can actually use multiple animal powers at once, such as replicating like an amoeba when he's a bull (that would be "Animal Man", from
* At least one killer, particularly one who caused domino-effect killings (he shoots at Gang A, who retaliates against Gang B, who retaliates
* At least one lab has a sign in the hallway reading: "CAUTION: Active Robot." Do not stand in its way, or else.
* At least one magician has had a routine where he's handcuffed by volunteers, supposedly to do a trick, his hands are hidden and he's continually pulling out one

hand or the other (sometimes with the cuffs dangling from it) to "assist" the volunteers in setting up the supposed trick or "correcting" things they've supposedly done wrong.
* At least one math textbook asks the volume of a cylinder with a height of q and a radius of sqrt(t).
* At least one member of the Cybird staff has admitted to having a fetish for men with
* At least one men's singles figure skater has (semi-)joked that they have a
* At least one Merrie Melodies short has a mother rabbit doing this to her son, "PETER!!".
* At least one model railroader (the late John Armstrong) has re-created the Nighthawk Cafe as a model railroad structure, in the process working out how to make it actually work in 3D (not a trivial process). It has since been made available (with the permission of Armstrong's family) as a kit.
* At least one more was added in Cataclysm. This one is actually called a "Very Light Sabre", and is among the best weapons you can possibly get at the time of the quest... which is level 3 — and exclusive to gnome warriors. Each gnome class gets its own
* At least one nineteenth-century scientist insisted upon tasting every substance he discovered, though it was known, even then, to be very dangerous. He was found dead surrounded by dozens of substances, and with no way of knowing which did him in. Another discovered a compound which was absurdly sweet and incredibly tasty. He threw a party in which all the guests joined him in taking shots of the stuff. They were all dead by morning.
* At least one notable instance involving psionic powers (which may or may not qualify as
* At least one novel has indicated that group marriage is legal on Earth (at least two of which were
* AT least one of the other Mooks is seen with a new metal arm and a desire to get back at the Freelancers for it, so at least they didn't all get out unscathed.
* At least one of the preview builds for Windows 8 can be forced to load the Aero desktop interface from Windows 7 by modifying the Registry. However, this disables all the enhanced Desktop Mode functions that the Modern UI would implement.
* At least one of these is justified. Especially at the end of Disk I, because the person looking at the party is none other than
* At least one of which refers to a fictional place — they edited together "I'm On Saints' Row, Bitch" for
* At least one one Vietnamese soldier has his head cut off (and several others lose limbs) when Sammo Hung unleashes his
* At least one or two challenges per episode on the Spanish game show
* At least one other commercial has used this theme, also in the 90s; a commercial for Nestlé Buncha Crunch.
* At least one PBS affiliate interrupted their airing of after his passing.
* At least one person addressed some of these issues, such as decreasing the interrupting nature of many of the hints and adding a new control scheme without motion controls, but the conflict between the game's linearity and the rather slow pacing remained.
* At least one Renaissance faire has one of these, in which fairegoers can buy a certain number of mushy tomatoes and throw them at the poor sod who gets paid to stand there. Fortunately, the poor sod in question is entitled to hurl as much verbal abuse upon the throwers as he likes.
* At least one school nurse only took her student's temperatures orally but used rectal thermometers because she felt the shape helped the kids keep them in their mouths.
* At least one season 4 episode (shortly after BJ's and Potter's arrivals) made mention of Nixon as Vice President. Even if you push it back before the inauguration and have it be after the election of Eisenhower and Nixon in November 1952, it doesn't explain numerous references to Truman being President later on and the episode that spans the entire year of 1951 with BJ and Potter there from the

beginning.
* At least one spy in the American Civil War resorted to this rather than let the documents they were carrying be confiscated by the enemy.
* At least one star capable of producing a GRB is pointed at the Solar System, is extremely old, and may fire it off in the next 200,000 years.
* At least one story in the Thor comics (right before Walt Simonson's legendary run) involved Thor discovering a cult in Chicago (portrayed as good hearted but misguided) that publically worshipped him - he responded by making a comment to the effect that he no longer desired worshippers. The same storyline introduced a Fundamentalist Christian supervillain named "The Crusader".
* At least one story suggests they are actually thrown out of time. In one source book dealing with different blood ancestry gifts (stuff like having dragon descendants, etc.), Illithid blood powers are in the people who are the Illthids' ancestors. Thus, some humans are Abusive Precursors.
* At least one surviving victim of an attack by a pet chimpanzee (Charla Nash) had her face torn off. She's had a facial transplant since.
* At least one theory about the death of Amelia Earhart is that she was injured in her crash onto a Pacific island, and survived long enough to be consumed by a horde of
* At least one time the series used this trope absolutely correctly. Bugs claims to have been kidnapped at Encyclopedia's behest (how a 5th-grader was able to hire and control adult
* At least one undertaker near the US-Canada border took advantage of this during Prohibition. You can pack a
* At least one variant of this story has an old enemy from before he began wearing the mask slip into a party the masked man is throwing and steal his mask, hoping to ruin his enemy. Instead the above realization occurs.
* At least one version of the alien "Blood Brothers" required them to be near each other in order to keep up their massive strength.
* At least one version of the bawdy poem "The Ballad of Eskimo Nell" involved one of the characters' castration by Nell's vagina in a vain attempt to please her.
* At least one version of the software used "0" as the number to track statistics not applicable to a specific player (e.g. a bench minor for Too Many Men on the Ice would track the offending player's number as 0 as the penalty is against the team, not a specific player.)
* At least one version of the team's creation revealed the entire idea was a revolt on
* At least one video has emerged of protestors accidentally setting themselves ablaze with poor Molotov throws.
* At least one webcomic author is well worth the price of admission alone.
* At least one writer (Stanley Sargent) almost quit his craft after a particularly caustic review by Joshi.
* At least only the Monroe Republic — the warlord state the series so far takes place in — has been confirmed to be a warlord state. The other republics haven't even been mentioned by name, let alone what governmental structure they've adopted).
* at least on the surface and in a couple of flashbacks to her Hemry high days in the show proper.
* At least partially justified by many supernatural threats being more or less
* At least partially justified with Katerina Ivanovna Marmeladova, stepmother of Sonya from
* At least Saber is reasonably mature, even if she's inexperienced and her wish is to childishly undo her mistakes. In
* At least seven episodes have been banned in the Japanese version to date (the dub has yet to get to "200"/"201"):
* At least she kept top billing. Fritzi Ritz had a similar flapper theme, but was pushed to the side by her niece and the strip renamed
* At least some games in the series have the iconic plumbob appear over the logo before the title screen.

* At least some MTF changelings, such as Tabby Cat, have given birth in the past.
* At least some of his paranoid state is due to being under the influence of...
* At least some of Shawn's laziness is explained as being a reaction against his father's absurdly overbearing attempts to groom him to
* At least some of the player characters are apparently the descendants of the player characters from the original GBA games (example: Matthew,
* At least some resemblance to living things with which we are familiar. They eat, sleep, reproduce, etc.; they are clearly organic beings, or else
* At least some types of bending are affected by celestial bodies. Waterbending is stronger at night and, like ocean tides, is affected by phases of the moon, being strongest during a full moon. Firebending, on the other hand, is stronger when the sun is up during the day and can receive an immense enhancement by the presence of a certain comet, but fails completely during a solar eclipse.
* at least teenagers and above. There's also reviews for 18+ yaoi manga in every issue of OtakuUSA, as well as a J-List ad which shows the covers to several eroge games.
* At least that justifies the pure-blooded Saiyans' hair styles. Goten, on the other hand, has the same hair as his father even though it was established in the precious arc that half-saiyans' hair does change. That means Chi-Chi has been cutting his hair like that since he was a baby. GT has him specifically avert it with a few different hairstyles, some of which still fall here.
* At least that Parade has both history and was originally (and still is) run entirely by Macy's employees. To the point that all featured performers are
* At least that's how it looks in published joke collections. Spoken audibly it would rather be "FIIK" ("Fuck If I Know").
* At least that's how Spartan propaganda (along with some of their aristocratic fanboys from other Greek cities) idealized it. More prosaic truth seems to be that a lot of day-to-day Spartan training (and the
* at least the action or the reader would have known everything would go well.
* At least the Katzes just had a daily strip briefly... but in the 1910s.
* At least the latter groups were raiding and killing each other well before the mascot's death (or before you have any quest relating to the war), and were in an arms buildup at the time of it. The mascot was just the final straw.
* At least the nuclear fuel rod cask was fine. A miniature nuclear pile was built to power some instruments that were to be left permanently on the moon, but just in case the mission never got to the moon, a ceramic cask was built to contain the nuclear fuel, and it was designed to survive a fiery reentry to Earth... just in case. And survive it did.
* At least there are now 52 universes but none of them are the ones that were destroyed (though some are like the ones lost.)
* at least the size of a Jumbotron, airing looped ads for their shows, restaurants, etc. Much of the Strip exterior of Planet Hollywood consists of giant screens, each airing a different set of ads; Wynn Las Vegas adds the twist that its marquee is taller than it is wide, and the hotel sign travels up and down it to "change" the ads.
* At least the Vikings won that game. Roy Riegels of the California Golden Bears ran the wrong way in the 1929 Rose Bowl against the Georgia Tech Yellow Jackets, only being stopped a couple yards from his own end zone by his own teammate before getting dogpiled. The next play was a blocked punt which yield two points to Georgia Tech, the ultimate difference in an 8-7 loss.
* At least the writers seemed to acknowledge that Tuvok was a tightass even by Vulcan standards. From the episode "Flashback":
* At least they're long enough to qualify as feature-length episodes, unlike "iStart A Fan War", "iPsycho", "iQuit iCarly", iAnd so on...
* At least they remember the important things. In the short "Good Night," Eleven has this to say when Amy comments that his companions are such tiny parts of his life that he must hardly notice them:
* At least, this used to be the case. Banks are adding increasingly more checks to get in. In the case of

* At least those still have the original name, unlike the Peach Bowl for a time (it got back its old name, though prefaced by Chick-fil-A, in the 2014 season).
* at least three times. (although playing Claudius did, apparently, give him some temporary trouble in that area).
* At least three times their holographic technology has accidentally created fully actualized sentient beings. Though in each instance, there was a deliberate action taken that simply had an unintended consequence. Which is really rather
* At least to the extent anyone in the series could be considered a "hero"
* At least twice, his boss, Mr. Phillips, threatens to let Mike go. The first is in "Double Parked," after the boss learns that Carol is heading up an effort to save a neighborhood park where the company is seeking to build a new courthouse and Mike balks after he is told to tell Carol to cease and desist. The other is after Carol — who was under Mike's strict orders to not use the phone, to rest her voice after having her tonsils removed — unknowingly insults Mr. Phillips during a phone call; she had thought it to be Mike to test her, and when Mike tries to call Mr. Phillips back to explain, he gets a short retort and an earful of telephone slam.
* At least twice in Chapter 24, Team Rocket was heard being sent blasting off.
* At least two American entrepreneurs who intended to tour Diana exhibitions around the USA, centred on the clothes and her personal style, have become ruinously bankrupt. One, Kate McEnroe, even lost her main job as a TV executive amid allegations of financial embezzlement and misrepresentation. Maureen R. Dunkel, a similarly motivated entrepreneur, crashed owing over $1,500,000.
* At least two Christmas card designs from the early 21st century place Santa Claus in the Nighthawk Cafe, at least one of them with several reindeer sitting at the counter as well.
* at least two comedy programs that have involved people trying to get into prison for some reason by deliberately pulling a fire alarm when they knew there was no fire - only for a fire to break out in the area shortly before the fire department arrives.
* At least two different versions of the tall tale of Pecos Bill describe the Great Salt Lake as being made of tears. In one version (the one used in
* At least two episodes feature Helga's older sister Olga break down crying so much that her makeup runs down her face and it looks like she's
* At least two episodes have one. The school festival two part has a scene with Naraku visiting a demon with very big ears to search for one of the last jewel shards. And the final episode of the first Inuyasha series, has Kagome trying on new shoes after her old ones got acid-eaten and heading out again.
* at least two futures were completely ruined and another almost blown apart because of one man's personal vendetta.
* At least two of the great silent comedians suffered injuries that cost them part or all of one or more fingers.
* At least two of the hijackers went to a flight school, though, and received commercial licenses.
* At least two of the Jager generals display this attitude about their followers as well.
* At least two of the three seen-onscreen members of the Makara bloodline of
* At least two other instances involve a guy banging his head against the partition in the police car in full view of the car's camera saying how he's going to get out/get back at the cop due to 'police brutality'.
* at least two other sketches poking fun at the trope. One in which the princess refuses to marry the frog-man who could leap to the top of the glass hill she was imprisoned on and ran off with the architect who built it, and one where the Cinderella type refused to marry the invisible prince despite being able to see him because he was even uglier than her stepsisters.
* At least two Plokavian ships show up; one was an arms dealer's ship that was barely seen before it was blown up; the other was much, much larger and also was barely seen, but it appeared to exercise some kind of official Plokavian authority, so it probably wasn't just a merchant ship like the first one.

* At least two short stories by Neal Shusterman, "The Body Electric" and "Loveless" used second-person narration.
* At least two species (Combee and Salandit) need to be female in order to evolve and they also have the same gender ratio.
* At least two species (the Mugger crocodile and American alligator) have some grasp of
* at least two vocal factions of similar size. Fans who don't care about the character don't count as a faction. There must be both fans and haters, and both in similar amounts.
* At least two Winnie the Pooh-related cutaway gags use this as part of the gag. In "Road To the North Pole," Pooh finds out that Eeyore is a grouch all the time because "I have a nail in my anus." In "Saturated Fat Guy," Pooh – when lodged in the door to Rabbit's house (after overeating) notices what feels like a fist up his rear and, when commenting about why Rabbit isn't using his shoulder for leverage, is told, "Don't worry about it!"
* At least until a car accident gave him amnesia all the way back to college, erasing the past 10-20 years or so from his memory (
* at least until a series of events led Fry to become his own grandfather.
* At least until his son gets killed, at which point he promptly and quite literally goes nuclear
* At least, until it reveals its true form: a gigantic clown/cake/worm thing with rows of razor-sharp teeth and a ravenous appetite for human flesh.
* At least until it was syndicated for national broadcast, meaning all references to Christianity were removed. However, after a
* At least until Season 6, when he takes up listening to punk music and
*), at least until Tarkin realize the efficiency expert actually knew his job and informed the crew.
* at least until the Druids of the Claw shapeshift the gender divide is eased so that Night Elven females can become druids and men can become fighters, but the overwhelming majority of Sentinels are still women, while there is only a single male priest of Elune seen in-game. As probably an inverted reference to this, the Blood Elf guards are all male.
* At least until the last game, when it becomes a normal sword-shape. Boo.
* at least until the late 1960s. The Doctor had visited Earth literally hundreds of times and never even realised they were even there since he can't remember seeing them.
* At least we still have an on-going novel and manga which both contain far more detail than the anime. (And may give more hints the
* at least with proper hygiene, nutrition, regular exercise and barring any serious illness or injury, you can expect to live to a ripe old age.
* "At least" would be appropriate. People playing "scenario" paintball (in the woods with ambushes and camo, as opposed to open field with team-colored shirts and short-range engagements) and airsoft realize very fast how
* At least you can actually get the bandana and stealth camo on the lowest difficulty settings and use them on the highest difficulty setting if you don't care about rankings or the emblems. If you do care about emblems, however, the Big Boss emblem is totally bragging rights-oriented. To get it, the game requires you to beat the game in under five hours, kill no one, never get spotted, never use the headband or stealth camo, and use no healing items, all on the hardest difficulty. Your reward for doing so is a facecamo that makes enemies scream or faint upon seeing you, as well as drop free items. If you can manage to meet the requirements to get the highest ranking in the game, then the facecamo isn't worth it. You're definitely good enough to not need it.
* At least you got to crank down the difficulty for that, and it's really not that much different from all the high speed chases you routinely get into. The sniper mission, however, could really throw you for a loop. From massive shootouts with bullets flying everywhere in a small space to being able to take one, maybe two shots at a distant target with a
* At level 14 the Totemist class from Magic of Incarnum can bind the Phoenix Belt

soulmeld and set himself on fire for continuous Fast Healing 1. Yup, you can set yourself on fire to HEAL. Actually a decent idea in a grapple-focused build.
* At live shows in Connecticut, a pun made from the state's name and a powerful (or common, if you're British) swear that also means "vagina" is made pretty much always.
* At LLF's fourth Anniversary show Polly Star, who had been voted "bitch of the year", ended up on the receiving end of her usual strategies in the second fall of her
* at long last at their worst. And even then the task he accepted was arguably beneficial to the world of Azeroth - to destroy The Lich King, and he specifically attempted to turn away from Kil'Jaeden and create a place for himself after his first attempt failed.
* At long last averted for good in 2021, when the Bulldogs won the College World Series for their first-ever NCAA title in a team sport.
* ATL, poor aspiring artist Rashad meets mysterious girl New-New at a skating rink. He doesn't know much about her background but eventually finds out that New-New is filthy rich and her real name is Erin.
* ATL Stories From The Retrofuture, but it certainly ended up with the United States broken up since there is the Republic of Georgia with Atlanta as its capital. Characters often mention "The West" as a foreign area, as well.
* ATL Stories From The Retrofuture is a hyper-advanced robot suspected of being A Crapshoot by governments the world over, but he seems to want nothing more than to keep Atlanta safe.
* ATL Stories From The Retrofuture, Morgan's older sister Marge Eisenhower is a tried and true private detective. She's even got the suit and tie, trenchoat and fedora style going on. Even when she's not investigating anything...
* ATL: Stories from the Retrofuture, robots are extremely commonplace, and just dumb enough that anyone with enough know-how can reprogram them to become mindless killing machines. Morgan doesn't seem to have too much trouble fighting any of them, but when they attack together, they're as threatening as a zombie horde.
* ATL: Stories from the Retrofuture to their employees. She mentions having to wall jump using her boots to get to an order in time once. It sounds very dangerous but keeps the pizzas very warm.
* Atlus (1996-ongoing) their new flagship franchise over the other games in the series.
* Atlus and the most common method used was Twitter bots. What also baffled fans about the no spoiler policy is how the game was already out in Japan several months before the English release and thus spoilers were already on the internet to begin with.
* Atlus and they didn't get it yet, so they went ballistic. Truly, Atlus does get off on our tears.
* Atlus being filled in with blood before the other letters are filled in with the appropriate blue.
* Atlus has registered a "Devil Hunter" trademark. One can only assume
* Atlus is quite serious in its themes about infidelity, crossroads of life, and sexuality. They score very well with critics to this day.
* Atlus's lack of a dedicated European branch or partner caused this to happen to their games for a long time.
* Atlus USA provides Feelies with some of its larger-profile titles through its Atlus Spoils program, which offers things like soundtracks, artbooks, and sometimes even plushies related to the game at no extra cost.
* At many colleges/universities, you are not required by law to attend your classes (whereas skipping school in primary schooling without a valid excuse is always met with consequences). While instructors often frown upon skipping, and may include penalties per class if you do miss one, there's nothing legally saying you have to attend. Many students with learning disabilities (including those who are great at learning new information on their own but not in a classroom or lecture hall environment) see this as a boon.
* At Martin's, where the front door was in the back, right next to the stairs.

Still opened right into the living room, though.
* At midnight the word 'harmony' disappeared from the vocabulary of everyone in the city.
* A T-Mobile commercial from 2018 features a man on hold with his current cell provider's customer service. He attempts to press "0" to no success because the automated answering service does not consider it a valid option. He is shown running about his day including dancing to the hold music. When the call is finally answered by a man named Daniel, he immediately puts the man on hold again.
* A T-Mobile commercial has family sitting around the table. The teenage daughter lists who of her friends she made her "Fave Five." Then her
* Atmoran Atmorans, with their average height being much taller than modern men.
* Atmorans and was buried with full honors befitting any great warrior, with guards even stationed at his tomb, which would one day become Jolgeirr Barrow.
* Atmosfear (AKA Nightmare), which has the players at the mercy of an angry, petty demon-god called the Gatekeeper. The players roleplay his minions, either his Herald, a monster beholden to him, or a "soul ranger" attempting to steal a key from a herald.
* Atmosfear for the game. On the video, a character and main antagonist called The Gatekeeper interrupts the game and announces the effect. About halfway through the game, The Gatekeeper asks for the player who, before starting the game, was selected to be the 'Chosen One.' He asks, "did you miss me?" to which the Chosen One will almost always say, "no." The Gatekeeper will respond with a snide and dismissive, "shut up."
* Atmosfear games are hosted by female historical figures who start out as beautiful young women and slowly morph into hideous monsters the longer the game goes on; a warty witch in the third game's case, and a bat-human hybrid in the fourth game's case.
* Atmosfear): Players attempt to confront their fears while collecting "Keystones" then returning to the start.
* Atmosfear: The video acts as a clock while players compete with the board game. At certain times, the host (or guests) would announce changes to the rules to keep the players on their toes. The host wins the game if time runs out without a winner.
* Atmosphere Abuse, they built a massive underground base that could house them for decades.
* Atmosphere Abuse: Trying to kill Earth's population by messing with or getting rid of the atmosphere.
* Atmosphere him accidentally with his super strength. The other friend, heard in the background, is heartbroken and laments "Why you gotta squish my friend, dude?...That dude owed me, like, five dollars. Why you gotta kill him?"
* "Atmospheric Beasts" are often this. Their sizes vary, but the largest are often said to be over a hundred feet in length.
* Atmospheric black metal/noise act The Real Housewives of Gomorrah bring us "
* Atmospheric Diving Suits, especially the more modern ones, could be seen as a type of Powered Armour.
* at most; then he commits suicide, not in small part because of his grief for her death.
* at most true that longer swords are, well, heavier (specifically, a longer sword has a higher moment of inertia than a shorter sword; this means reaching a particular angular velocity requires more torque/angular force) which is what the different weighting ratio is specifically designed to compensate for. Although some extremely large swords may have weighed as much as 10-12 pounds, these were purely ceremonial weapons never intended for combat. Even an executioner's sword would seldom have weighed more than 8 pounds, and relied instead on blade geometry to concentrate enough mass behind the blow.
* At Mt. Ordeals, Golbez sends Scarmiglione after Cecil to stop him from becoming a Paladin. Scarmiglione is used specifically because he is undead and Cecil is a Dark Knight using swords based on darkness, which would have no effect on the undead.

* At nCw Femme Fatales, Mary Lee Rose had been very open with the fact she had no desire to wrestle
* at night, and hence, couldn't be observed taking down prey until night-vision video photography was an option, accounts for much of this.
* at night at the Le Mans 24 hours, and you'll see just how little of the track ahead is barely visible to the drivers. Sometimes you don't know a corner's coming until they actually take it.
* At night, the citizens of Barovia bar their doors and tremble in terror. Strahd attacks the
* At night time, you can turn on a flash light so you can actually see what you're doing and don't have to stumble around blindly in the dark. Animals mercifully don't spook or react to it.
* at nine, was put in command of Mobile Division 6 because she was considered expendable in case anything went wrong and she had to take the fall for it, and Hayate herself notes that the officers at headquarters tend to see her as a young girl first and a Lieutenant Colonel second, indicators of factors apart from a belief in Hayate's merit.
* At no point does Miles Edgeworth ever say "You are not a clown. You are the entire circus." That quote is from an edited screenshot.
* At no point in his long career was (now-retired) war correspondent Joe Galloway ever shy about rushing headlong into danger for the sake of a story. Most famous was his conduct at the Battle of Ia Drang during
* At no point in the Bible or any of the books that didn't make the cut is it said that there were an ox and a mule present in the Nativity scene either. Luke mentions a manger doubling for Jesus' cradle, hence why it's assumed that the birth took place in a stable. The specific animals come from the first live enactment of the Nativity scene in 13th-century Italy, where these two might have been added just because there were no others around.
* At Numantia, the sight of the Romans' ten elephants first made the Numantines flee behind their walls. But when the Romans tried to tear down the gates of the city with the elephants, the defenders threw rocks at them until a lucky shot injured an elephant on the head. The animal panicked, which in turn panicked the other elephants, and they trampled the Roman forces. The Numantines then made a sortie and killed three elephants and 4,000 men. This was such a catastrophe for the Romans that they called the day damned and never fought a battle on the same date, and the war against Numantia prolonged for almost ten years.
* At NXT Takeover Chicago, one of Hideo Itami's (KENTA Kobayashi) moves was called Kobayashi-style by an announcer.
* A "Toa" is a Matoran that has been transformed into a powerful hero and protector.
* A Toast to Tomorrow one of ex-secret agent Tommy Hambledon's subordinates in the Berlin police force brings in a fellow ex-agent on suspicion of having started the Reichstag fire. The other man gives his name as "Johann Schaffer". Once they're alone Hambledon comments on it.
* Atobe Keigo's World of Ice, which attacks his opponent's weak spot... and takes the form of flying shards of ice. Yes, this is still about tennis.
* At Ocean Park in Hong Kong, the Raging River flume ride formerly played an evil laugh in the tunnel before the final drop.
* A to do list for investigations, which flat out states when you need to present evidence to characters.
* Atoli and Shino are palette swaps. Of course, this is easier to understand when you remember that this takes place in an MMORPG; that, and the fact that they look the same is a major plot point. Also, all the NPCs running around "The World" consist of palette swaps.
* A Tolkien-related lawsuit is the reason why the game has Balors instead of Balrogs and treants instead of Ents.
* Atollon is a desert world with large coral formations and inhabited by
* Atom Ant appears under a rock Doggie Daddy flips over looking for Auggie in "Gorilla in Our Midst."

* a tomboyish charm are said to be the most notable aspects of her figure.
* a tombstone with Andy's name on it to the family dinner. Andy looks annoyed and baffled at all this before busting out laughing.
* Atom, by Valery Bryusov starts with "What if those electrons // are worlds with five continents, // arts, knowledge, wars, thrones // and memory of 40 centuries?" The idea seems to have been quite widespread back then.
* Atom Egoyan, a pair of missionaries interrupts the final scene, and without knowing what's going on, likely change what would be the expected way to end the movie to something a little less predictable.
* Atom Egoyan, where practically every scene is set at a famous Toronto landmark or another.
* ATOM GRRRL!!, Big E does not take kindly to a police officer trying to bribe sexual favors out of her.
* ATOM GRRRL!! have been released that restore the adult content removed from their Steam versions.
* ATOM GRRRL!!, it's implied in the text that Big E's killings are quite brutal, though all the audience sees is a splatter of blood on top of the current background.
* ATOM GRRRL!!, Jessica and Big E meet after Jessica saves Big E from being raped by a mafia member.
* ATOM GRRRL!!. Jessica starts muttering the lyrics to "Amazing Grace".
* ATOM GRRRL!!, Jessica suddenly turns chibi upon pulling a gun out at the dealer at the casino. This happens again with an image of Jessica and Anna cuddling.
* Atomic Betty and her family. Betty and her maternal grandparents are galactic guardians; her uncle from "Rodeo Robots" is a cowboy; and her parents, while almost never seen fighting, have shown Greenbeard's gang what they're made of. And they thought they were fighting against actors.
* Atomic Betty and her friends who swoon over "him" from the stands. Then Betty takes her helmet off. Penelope storms off angrily while her friends just laugh it off.
* Atomic Betty: At the end of the episode "No Business Like Snow Business" Betty gets on the boys' hockey team, unbeknownst to Penelope and her friends who swoon over "him" from the stands. Then Betty takes her helmet off. Penelope storms off angrily while her friends just laugh it off.
* Atomic Betty: At the end of the "No Business Like Snow Business" Betty gets on the boys' hockey team, unbeknownst to Penelope and her friends who swoon over "him" from the stands. Then Betty takes her helmet off. Penelope storms off angrily while her friends just laugh it off.
* Atomic Betty: Betty to Noah in "Beach Blanket Betty" while they were surfing.
* Atomic Betty episode "Atomic Roger", this happens to Betty when Roger's ship takes off right in front of her.
* Atomic Betty episode "The Future is Now". Past!Penelope didn't believe.
* Atomic Betty like himself to be great villains. And considering how much scenery he chews in the average episode, it's safe to say he takes this belief very seriously.
* Atomic Betty, Maximus. The second time she ends up with the leader of a gang of biker vandals. Sparky tells her that her dates are villains he fights and tries to save her, but she's usually smitten with them and doesn't listen to her son.
* Atomic Betty on; when he finally does learn Betty's home planet is Earth, it doesn't take much effort to quickly convince him otherwise, with the characters hammering home how such a backwater location couldn't possibly be the home of one of the galaxy's greatest heroes. Earth's status as this is also why Galactic Guardian HQ is moved there that same season after the original location is destroyed, as no one would expect such an important organization to operate there.
* Atomic Betty protect the universe from all manner of intergalactic crime and villainy.
* Atomic Betty". The video link is bad and both of the "do not" parts of X-5's transmission is cut off, causing Sparky to become frustrated and cut a wire randomly.

* Atomic Betty whose toy shop is located on a planet orbiting the North Star. Betty has encountered him a few times due to various villains going after him for Christmas-related schemes.
* Atomic Betty with a stronger focus on comedy (exemplified by the addition of a silly skit at the end of every episode).
* Atomic Betty X5 admonishes a trick-or-treater wearing a robot costume and speaking in jarring Robo Speak that "Robots do not talk like that".
* Atomic Blonde (bisexual female main character, queer female supporting character; subject matter includes queer female romance)
* Atomic Blonde: The protagonist's heterosexual affair with a male French agent in the graphic novel is turned into a same-sex romance in the film.
* Atomic Blonde: While virtually every other death in the movie is extremely brutal and leaves horrible, disgusting corpses, Delphine is garrotted, while she is wearing her underwear, and there isn't as much as a line across her neck.
* Atomic Bomberman: Blown-up bombers are reduced to a pile of ashes except for their eyes, which remain suspended in mid-air for a moment before dropping.
* Atomic Bombings of Hiroshima and Nagasaki, and with them the Cold War and arms race as the threat of nuclear war suddenly entered the public consciousness worldwide.
* Atomic Bombings of Hiroshima and Nagasaki remain controversial to this day, but those who defend them claim that, despite the horrific damage and cost of life, they prevented a longer and inevitably more bloody invasion of Japan. At the very least, they unambiguously saved the lives of almost every Allied POW being held by Japan. Their captors had orders to kill them if it was announced the Allies were actually invading Japan.
* Atomic bombs are called "superbombs", and theoretical hydrogen bombs are "sunbombs". When an atomic bomb goes off, it produces a "toadstool cloud".
* Atomic F-Bomb: Someone hollers the word "fuck" or another swear word as loud as they can.
* Atomic Highway, autogyro pilots, and "raiders" who get whatever's available). Atomic Highway being the kind of game it is, there's an entire chapter dedicated to taking commonly available vehicles like family sedans or medium trucks and bolting on the requisite armour plates, guns and rams, just so the Road Warriors and Haulers get to ride the post-apocalyptic highway in style. And violence.
* Atomic Highway to the playable "Trogs" (humans who, after the apocalypse, settled in caves and subway systems).
* Atomic Kitten and Natasha is wearing a rather loose top throughout - while Jenny and Liz are in bikinis. Natasha is also lying or sitting down in a lot of her shots and is the one driving the car in the road scenes, allowing the wheel to hide her bump.
* Atomic Kitten - "It's OK" and "Always Be My Baby", both about relationships that ended badly but the singer has now moved on and can still look back on the good memories.
* Atomic Kitten of the group and remained in the public eye the most. Ironically for a reunion, Kerry replaced Jenny when she was pregnant.
* Atomic Kitten's video "The Tide Is High (Get The Feeling)", Natasha Hamilton was eight months pregnant and no attempt was made to hide it. In fact, the dance moves the girls used were choreographed to accommodate the baby bump.
* Atomic Kitten tried, their covers of "The Tide Is High," "Eternal Flame" and "Locomotion" getting attached to a few movie soundtracks. It didn't take and they remained in the UK for the rest of their time.
* Atomic Kitten were on their third album, tensions between Natasha Hamilton and Jenny Frost were very high. Natasha was dealing with postnatal depression and her commitments to the group had slipped - leading to her no-showing several publicity events. Right before a photoshoot, Natasha turned up with a new hairstyle identical to Jenny's. Things got very heated once they went on their tour - and Natasha even no-showed a gig in Dublin because she'd had a fight with the other two.
* Atomic Laundromat people expecting him to display some negative feelings about his situation, or at least show some curiosity or interest in superheroics.

* "Atomic Monster Theater" setting. Scoop Mellin is an overweight, balding rat in a cheap suit who always gets his story. He's often present when space aliens or
* Atomic Puppet. A 12-year-old kid and an adult superhero (who is at least 40 years old based on some lines) turned into a talking sock puppet.
* Atomic Puppet: Although the outlines are thicker than most examples, the shapes and designs are thin-line.
* Atomic Puppet. AP is absolutely convinced that Bubbles, the pet cat of Joey's dad, is a supervillain named Disastro bent on taking him down from the inside, whereas in reality, Bubbles is simply just a ditzy cat. However, it gets played straight in "AP vs. Disastro II" when Bubbles is turned into an evil genius actually bent on destroying AP.
* Atomic Puppet are two very good friends whose only love is over comic books and superheroes.
* Atomic Puppet. As Atomic Puppet, they're a two-in-one superhero who take on anyone that threatens Mega City and make them pay with a one-way trip to the Sun.
* Atomic Puppet as Joey has to hide his secret identity from his family and at school, while AP has to put up with the troubles of being stuck on Joey's hand all day (such as Joey grabbing a hot oven tray) and tries to act own his accord.
* Atomic Puppet, both immensely praised series), and the Dallas Morning News called it "a hoot of a superhero show". However, casual fans and viewers were more mixed to the series, with the show earning a lousy 5.1 on IMDb and user reviews on Common Sense Media dismissing the series as generic and mediocre.
* Atomic Puppet, but she became an evil psychic after encountering and marrying an alien entity from another dimension.
* Atomic Puppet called the werechicken, a mutant chicken that becomes a monster when exposed to moonlight.
* Atomic Puppet center on Joey and his dad Phil doing activities together. For example, "Survival of the Feltest" has the two go hiking in the wild and Phil teaches Joey some survival skills.
* Atomic Puppet during a soccer game against alien invaders. As Joey tries to rally the demoralized team at halftime, melancholic music plays... which turns out to be coming from Robo-Ron's built-in gramophone.
* Atomic Puppet enjoys messing around with others, especially AP and the show's villains.
* Atomic Puppet had one. Even as a sock puppet, he still has a little bit of it.
* Atomic Puppet has a bit of a fanbase, despite the fact that Joey finds Warren to be a nuisance most of the time. It might have something to do with Warren's hobby of spying on him.
* Atomic Puppet has a large spikey hairdo that sticks up high. It's been mentioned that he tends to take very long showers because "it's a lot of hair to wash".
* Atomic Puppet has Mega City, your classic superhero-protected metropolis where supervillains and giant monsters of every kind show up on a regular basis to give the local do-gooders plenty of action.
* Atomic Puppet has this relationship with the Felt family's pet cat Bubbles. AP claims he's a supervillain conspiring to destroy Atomic Puppet from the inside, but Bubbles remains just the ditzy, overweight feline the family loves.
* Atomic Puppet in a failed coup. Only a few other characters know about it too: aforementioned ex-sidekick Mookie, Joey's best friend Pauline, and several other superheroes.
* Atomic Puppet; in fact, the show was not even listed or mentioned on its official website in any way, shape, or form. Pretty much the only way people could find out it existed was by randomly stumbling across its lone mid-afternoon timeslot or by checking the scheduling on Disney XD's official website. Unsurprisingly, the show only lasted a single season because of this and was immediately removed from the network's lineup once its finale aired.
* Atomic Puppet is a giant slug-like monster with the ability to shoot slime from his body pores. The slime causes people hit by it to become angry at each other, and in one episode, it broke Joey and AP apart.
* Atomic Puppet: Joey and AP once fought a giant mutant spider that had bull-horns,

crab-like claws, and the ability to spit webs (which sounds remarkably similar to the Ushi-Oni mentioned above). It also appears in the show's intro.
* Atomic Puppet: Joey's mother Vivian, while a very sweet and loving woman, is overly worrisome about what her adolescent son does, despite also being completely oblivious to the fact that he's Atomic Puppet. She's much better than Mookie's mother though, who is very controlling of her 35-year-old supervillain son.
* Atomic Puppet Rudolph Mintenberg creates some so he can form a superhero partnership with Atomic Puppet.
* Atomic Puppet, the main is used as a parachute sometimes since he's a sock puppet. Has saved Joey's life on more than one occasion.
* Atomic Puppet was about Joey going on a fishing trip with his dad. Naturally, it went sideways when the villainous Megalo-Don showed up and tricked Joey and AP into helping him oppose the lake's ruler, King Hydronomous.
* Atomic Puppet, which he can put on his hand to become Atomic Puppet.
* Atomic Puppet, who is a complete narcissist unable to find a good story since Captain Atomic was turned into a sock puppet.
* Atomic Puppet, who is based in Los Angeles, as both the titular character and Joey Felt. The show otherwise uses Toronto-based actors for the rest of the cast.
* Atomic Robo #5 as Louis and Martin, respectively, the two bumbling Action Scientists who almost accidentally end the universe.
* Atomic Robo adaptation has a single, universal Vehicles skill that can be used for anything from sedans to space shuttles, while grittier versions can break it down a lot further.
* Atomic Robo - and then proceed from there. Explosions have the pleasant trait of being hard to miss, even for the most clueless player character.
* Atomic Robo, at one point Robo is dogpiled by guards while invading a Nazi facility, but he's so strong that he just ends up dragging the entire pile through a couple of rooms. Eventually he gets annoyed and sets off a grenade.
* Atomic Robo calls this tactic the Big Damn Explosion, because usually that's the most visible way to do it.
* Atomic Robo) can provide; it also renders the character proof against less powerful attacks that aren't literally bullets, although it comes with a mandatory cost or weakness. For example, as in the comics, Robo's own "Just Guns?" mega-stunt makes him bulletproof — and provides him with an armor rating against heavier weapons, too — but leaves him vulnerable to strong electromagnetism.
* Atomic Robo dated a girl named Helen in the early 1930's. She even gave him his first kiss (even though he has no mouth), but she was a little squicked when she found out that, chronologically, he was only seven years old at the time.
* Atomic Robo: Despite having spent most of his scenes in the story complaining about being in a hurry to complete his scheme, Edison still spends three pages monologuing to the captive Robo about what he's doing, which gives Tesla time to track them down and turn the tables.
* Atomic Robo, even compared to his contemporaries. Take, for example, when he mistakes Robo for a pygmy dressed in ceremonial black ritual armor:
* Atomic Robo) final time, it shows up six years ahead of the formula's projections by manifesting itself in Louis and Martin's quantum decomputer.
* Atomic Robo has CHOKAITEN; a rogue Japanese military unit that has been waiting six years since the end of the war to unleash a devastating super weapon that will sink the North American continent.
* Atomic Robo; having reached the limit of what they can deduce about the villains' plans, the heroes allow themselves to be captured on the accurate assumption that one of the villains will fail his roll against gloating and explain exactly what they're up to.
* Atomic Robo is a famous robot Action Scientist who is immune to small arms fire. That doesn't stop people from trying to shoot him.
* Atomic Robo is a humanoid robot whose head is a smooth, rounded lump of metal - his most expressive features are his eyes (he gets a lot of mileage out of his eyelids). Despite this, he acts like a snarky, down-to-earth guy whose job just happens to involve mad scientists, talking dinosaurs and other weirdness. We even

see his pop-culture-filled "adolescence" growing up with Nikola Tesla.
* Atomic Robo is all but unfazed by light gunfire, and even heavier weapons don't do much:
* Atomic Robo is capable of feats of science that astonish Robo, such as the "timevolution" of a T-rex egg into the weapon-encrusted FUTURESAURUS REX, but he's also fundamentally kind of a moron who dedicated quite some time to building a machine with the sole purpose of sending Robo unsolicited bulk email.
* Atomic Robo is designed to adhere to this as much as possible for a series that involves sapients robots and talking dinosaurs.
* Atomic Robo is either an uplifted dinosaur clone who happens to be completely insane, or a dinosaur given intelligence by the time-travelling disaster that caused the K-T event...who happens to be completely insane.
* Atomic Robo is just a bit too scrambled to manage anything that doesn't sound infantile.
* Atomic Robo. It apparently originated in them having two opposing theories on black holes, with Stephen Hawking winning out. When Robo was sent on a two-year mission to Mars, Hawking told NASA that Robo had a standby mode he could spend most of his time in, which he doesn't. This resulted in Robo having to spend that entire time awake and aware. He managed to use his time by arranging rocks on Mars' surface to spell out "Stephen Hawking is a bastard", visible from space.
* Atomic Robo Majestic agents consists of Cecilia Hirsch, Adetokunbo Aafolayan, Dervil Meaney, Ping Hayashi, Odin Ortega, and Kathy McCulloch.
* Atomic Robo mentions the tried-and-tested means of accelerating play, the Big Damn Explosion, in which something explodes, like a car, a rocket-propelled grenade, or a car struck by a rocket-propelled grenade.
* Atomic Robo: NASA hired Robo to accompany the Viking probe to Mars, but then didn't pack him anything to read, because one of his enemies had snuck a note into his file describing a fictitious "power save state" that would get him through the trip with no need for entertainment. When the year-long trip is over and the billion-dollar probe is all set up...
* Atomic Robo of his arch-nemeses) Baron Von Helsingard uses this trope to seek ultimate power, and gains quite a following in the process. And later in the series, two leading members of Hitler's Weird Science division are revealed to be secretly working for the cloned brain of Helsingard all along.
* Atomic Robo only, a new one of which gets activated and installed in a ready-made robotic body whenever the current iteration of Helsingard perishes.
* Atomic Robo on the grounds that they were always there, you just didn't notice them.
* Atomic Robo opens with the Allied forces storming the beaches of Sicily in July 1943.
* Atomic Robo: Recurring villain Dr. Dinosaur manages to be funny in just about all of his appearances, being a sapient dinosaur who considers himself an evil genius when his grasp of science qualifies more as technobabble gibberish at best.
* Atomic Robo, Robo is stuck in a meeting with Sir Richard Branson regarding the CC&Rs Tesladyne has apparently been violating. To escape it so he can deal with the more pressing crisis he was just informed of, Robo asks where the nearest bathroom is. Branson tells him without thinking, and by the time he remembers robots don't need to use the bathroom, Robo's already gone.
* Atomic Robo. Robo seals off the lab as Jenkins re-enacts just about every classic horror scene upon the vamps.
* Atomic Robo, Robo's experimental plane turned spacecraft is destroyed and he uses the largest piece as an improvised heat shield. Being a robot helps him survive long enough for the Action Scientists to catch him with the launch assist plane.
* Atomic Robo RPG, which runs on Fate, uses Absolute Physique for this. It lets you bypass most or all rolls of Overcome for Physique and just lift something automatically. Note that you'll need another Stunt to do more damage, though — Overcome actions are largely independent of Attack ones. (Robo himself handles this with a Weapon rating on his melee attacks.)
* Atomic Robo sees the titular character seize control of a Nazi kill sat.

* Atomic Robo, she does not react well to the discovery that Robo is only 7-years-old.
* Atomic Robo: The Free Comic Book Day 2010 issue is about tracking down believed-extinct terror birds. Naturally, one attacks them.
* Atomic Robo: The reborn Tesladyne is under stress because Robo brought back part of ALAN's programming and didn't tell anyone. As ALAN is getting introduced to the new recruits, Foley says that she's backing Robo in this because she thinks he's right:
* Atomic Robo, the sentient, intelligent, super-strong robot built by Tesla in the 1920s is one of a kind, and Tesla made certain no records or information on the countless innovations in Robo exist outside his own mind. In a letter from Tesla in the back of Volume 2, he states that this was because he would not allow living beings to be created as weapons.
* Atomic Robo to reduce the significance of any historical figures' effort or sacrifice.
* Atomic Robo) turn out to be a biological form of this. If left unchecked, they will eventually devour the Earth, then the solar system, the galaxy, other galaxies...
* Atomic Robo who happens to be a laser-shooting dinosaur. The judge is right in the middle of holding him in contempt when all hell breaks loose.
* Atomic Robo, with a story expressly mocking/deconstructing the idea of Robo having a kid sidekick and ending with him bluntly telling the sidekick that she can't possibly work with Tesladyne until she's an adult.
* Atomic Robo, young Robo attempts to battle the eponymous menace when it attacks while his creator/father-figure Nikola Tesla is out of town. Halfway through the battle, Tesla calls to check that he's doing his homework, and Robo has to pass off the background noise as a radio serial he's listening to.
* Atomic Rockets brings up this trope on a regular basis as bad design. You have to provide air for all that living space!
* Atomic Rockets differentiates between the "stream of bullets" and "really long string" types, referring to the first type as "Space Fountains" and the latter as "Beanstalks," although interchangeably with "Space Elevator." The Space Fountain type can use the magnetically accelerated lifting medium as elevator cables by coupling payloads to the particle stream with electromagnets as well. They have the advantages of 1) being able to be built anywhere, not just on the equator, and 2) can be made safer than an unpowered tower with redundant streams. Furthermore, it details the related "Lufstrom Loop" concept, which uses a "ribbon" of steel plates arranged into a conveyor belt, but otherwise acts similar to a fountain-style space elevator. It resembles a huge bridge rather than a giant beanstalk.
* Atomic Rockets for an exhaustive analysis of the logistics of governing an interstellar empire.
* Atomic Rockets is a website that starts with this trope, but uses it as a launchpad to explore very hard science-fiction ideas about space flight. It refers to "raygun gothic" as "rocketpunk", to follow "steampunk" and "dieselpunk".
* Atomic Rockets pages, detailing real-world spacecraft designs (both ones that have really flown and those on the drawing board), issues with extraterrestrial colonies, how a war in space might actually be fought, etc.. Yet even on these hallowed pages, a form of the Sci-Fi Ghetto occasionally appears. Sometimes when a proposed technology simply could not work in the real universe — due to violating Einsteinian relativity or conservation of momentum or whatnot — the site labels it as "pure science fiction."
* Atomic Roooster features a flying bird with naked human breasts. In a transparent cube.
* Atomic Runner Chelnov has the final boss fight atop the Statue of Liberty's shoulder.
* Atomic Samurai only needs one visible swing of his katana to cut a horde of monsters into shreds, with hundreds of slashes seen coming from all directions.
* Atomic Shark, and emitting enough heat to cause things around it to burst into flames. It's also more or less a swimming one megaton nuclear bomb that will

detonate if killed. Just to make things stupider, some fish that the shark passed nearby become irradiated also, are caught and served up at a seafood restaurant, and cause both the kitchen and a diner to explode.
* Atomic Shark gives us one that boils the water, sets things on fire, and/or blows things up by its mere proximity.
* Atomic Shark strongly implies the kid was faking unconsciousness in order to get kissed by the young woman he has a crush on.
* Atomic Skull doesn't have his traditional flaming skull head. Instead he has a normal head with a wrinkled face and wears a helmet
* Atomic Superpower: Characters possess the ability to generate and control radiation.
* atomize whatever they hit! Appropriately, these weapons also have a huge blast radius. This can even turn the most heavily armored vehicles and Star-Gods into (metal)chunky salsa in one blast.
* Atom Punk, which could in theory remain operational for hundreds of years. Of course, they're still in need of incredibly resilient reaction control mechanisms and functional cooling to prevent a runaway meltdown...
* Atoms. It was orginally thought that an atom was the smallest indivisible particle. Then we found out they were made up of smaller particles.
* Atoms of noble gases, with eight electrons in their outer shells, don't attract nearly the attention that they did before all of those other atoms came by and gave them electrons.
* Aton, astronomer and scientist, is now the local city leader. He spends the first part of the movie obsessed with a mysterious woman, and stubbornly insisting that they live in a city of light.
* At once subverted and played straight in "An Echolls Family Christmas", a first-season episode of
* At one college, professors who were "in lecture" had "il" after their names. Which resulted in the sign, "Professor Brown is il. (sic)"
* A toned-down version of this is what caused Rumple to realize He truly loved Belle in
* At one dinner the mike he was sitting beside was one when he was talking with someone else and caught him calling the congressional Republicans assholes for their latest antics. However, there's a sneaking suspicion that he'd taken a cue from
* At one Halloween party, one girl comes dressed as a superheroine, and Torg notes how "odd" it is that
* Atonement: According to Ciara, this is Tether's real power. Her "True Healer" shard suppresses the shards' need for conflict, causing capes who spend a lot of time around her to become more stable and allowing her to redeem numerous villains.
* Atonement. Briony encounters her older sister Cecilia having sex with her lover Robbie in the library. The two awkwardly leave the site upon discovery. Briony has already had her suspicions about Robbie due to several previous events that tell her Robbie is sexually abusing her sister, when in fact all the instances were consensual. Their discovery here is thus the final nail to the coffin that causes Briony to pin Robbie for revenge.
* Atonement, Briony Tallis thinks her older sister Cecilia is being sexually harassed by their childhood friend Robbie Turner. (The sex they had was consensual.) When her cousin Lola gets assaulted at night and doesn't remember anything, Briony concludes that Robbie must be her attacker, even though he's innocent. Only Cecilia and Robbie's mother believe him. Briony's accusation and testimony drive the plot of the novel.
* Atonement by Ian McEwan plays with this. The film has a straighter use of the trope.
* Atonement can build anything from robotic drones to Powered Armor to surveillance tech, all with little to no loss in quality.
* Atonement, Clepsydra gives Francis Krouse the mission to 'capture a Pandora clone', expecting Pandora to eat him.
* Atonement definitely fall into the "friends their whole lives" category. He's the

son of a servant and she's the daughter of the wealthy family.
* Atonement, Elias Anders has the power to create 'tunnels' of normality within otherwise stopped time, allowing him to effectively teleport.
* Atonement gets headaches if she asks too many big questions. It's a limitation put on her power by the Entities.
* Atonement has Amy Dallon, who makes sure that Crawler meets a gruesome end after he kills her father just as she was getting to understand him.
* Atonement has biokinetic hero Amy Dallon. Her lay-on-hands to heal is her biggest use of her power, though it's far from the only one. At first, she sticks to it because she's scared of what she can do, but after hanging around with Riley and Pandora, she starts relaxing somewhat and helps them with their biotechnological experiments.
* Atonement have killed off Amy's father just as she was getting to understand him. He might have lived longer that way.
* Atonement is an interesting variation: his upbringing qualifies him for an officer rank, but he is forced to be a private because of his criminal record (he was imprisoned for a rape he did not commit).
* Atonement power only works on objects she can see, and only nonliving ones. As such, her powers are largely useless in the dark (Which Grue exploits during their fight in the mall) and against enemies with Super Toughness, since the majority of her attacks are dependent on brute force — she has it especially hard against Horde, whose minions are to shrug off her attacks, and can't just be thrown aside.
* Atonement: Robbie Turner is wrongly accused of rape and gets sent to prison and later the army for a crime he didn't commit. The rude letter he wrote Cecilia and Briony's testimony just implicates him even further, as does the fact that he's the gardener's son - and all other suspects are from the upper class. The actual rapist gets away with it.
* Atonement, Theo Anders wears a set that he built with a little help from Chris. Its full capabilities aren't identified, but it can be equipped and removed at will, stores and charges his drones, and includes a television screen inside the helmet.
* Atonement: The Slaughterhouse Nine might have gotten a new member in Ruin had Mnemosyne not interfered, turned Burnscar against the rest of the Nine, and freed Hunter.
* Atonement this trope - Briony writes the book after she grows up to attempt to atone for her sins.
* Atonement, through Briony's mistake in believing Robbie raped someone as a result of what she'd seen briefly while it was dark.
* Atonement, Vista and Sophia are the only Brockton Bay female Wards. Vista's not happy with her bully of a partner and is predictably pleased when Madison joins the team.
* Atonement. While working as a nurse, Briony has to tend to a French soldier near death. He's delirious and thinks she's an English girl he met in his childhood. Briony plays along with this. Just before he dies, he asks if she loves him and she says yes. The book and the film make it clear that she did, if only for a few moments.
* Atonement who shrugs off any hit (excepting other unstoppable powers like Flechette's Sting).
* Atonement with Pandora Prime in charge, but then she got killed off and the other bodies she'd made eventually settled into 18 distinct personalities in constant telepathic contact. Due to their self-biokinesis, each personality usually has one body to herself, but they're capable of changing that at whim.
* At one of his concerts, Dave Chappelle finally chewed out fans for endlessly repeating
* At one part, Gaila tries to get Quark involved in weapons trading, but it turns out that Quark actually has a conscience and can't handle the idea of 28 million people dying as a result of his actions.
* At one point, Aang also dreams of losing control of the Avatar State, and is outside his body while it was killing people.

* At one point a background conversation can be heard between two angaara wondering what this "ice cream" thing the humans have is. When one realises it's like something similar they have, they exclaim a relative of theirs who makes and sells it can make a fortune.
* At one point, a black character takes clear offense to a white character sitting next to him and asking how it's going.
* At one point, a bunch of popup windows with Homestar's face in it appear, including one actual popup window! Although, it only works if Pop-Up Blocker is disabled.
* at one point - a cannonball. He gets around this by wielding alternate weapons like crossbows and tasers, as well as wearing a bulletproof vest because the bullets tend to curve towards center of mass. He also doesn't attract rubber bullets.
* At one point, a character becomes addicted to an unknown neurotoxic drug secreted by an insect. The drug appears to help the insect maintain a
* At one point a character is found watching a video online. The video in question? It was a drug-induced dream sequence of a DIFFERENT character.
* At one point a character with the power to "absorb any ninjutsu" is able to absorb the water being pulled out of thin air by another character, but can't absorb the sand that Gaara carries around and creates by grinding up nearby rocks. The implication is that when the element they need isn't nearby ninjas just create an artificial substitute with their own chakra, which is convenient but inferior in some ways to the real thing.
* At one point, a fan noted that one of the villains of the show, Rob Lucci, had a name that that could be interpreted as "To rob the light" based on the (inaccurate) fact that Lucci is the Italian word for light. Oda's response was to the general effect of:
* At one point, a former Spetsnaz commando says Serbs are tough warriors and that he knows it because "he fought them in Chechnya". This is a big research failure. Firstly, there was not a single registered Serbian fighter in Chechnya. Secondly, Serbs never fought against Russians; on the contrary, Russia is considered as Serbia's friend and ally. Thirdly, at the time the Russians and Chechens fought each other, Serbs had
* At one point, after being on the receiving end of some of these attacks, Jackie parodied it with a line of his own: "Baboon Leaves Tuckus Exposed".
* At one point, after Eric has missed an opportunity to get Laurie in trouble with Red for making out with her professor, this exchange happens:
* At one point after killing Todd while assuming Janelle's form, the T-1000 is seen leaving the Voight's house, briefly looking into the bathroom as he does. While Janelle is killed offscreen (hence the T-1000 taking over her form), there was originally a scene where the T-1000 kills her in the middle of a shower.
* At one point, after yet another incident when the Joker nearly kills her, Ivy freaks out in frustration and demands to know if Harley understands what just happened, and Harley tells her that yes, she knows he was trying to kill her.
* At one point, a group of bandits tries to steal tax money the Earth Queen demanded Korra deliver to her in exchange for helping find the
* At one point, Ahriman was offered a "reward" for being such a good pawn in Tzeentch's service:
* At one point (albeit in non-canon filler), Riff builds a machine that lets the gang view versions of themselves from
* At one point Alita pulls out her robot heart to use as stakes in an arm wrestling game - placing it directly on the table, on her right side. It's still attached and functional though.
* At one point, a Manticoran diplomat intentionally exploits this trope just to issue a calculated insult to a Solarian admiral, by
* At one point, an airship crewman gets told that he's now working for the heir to his boss; his reaction is to ask one of the others if he was just '
* At one point, another character asks him what it's like in the trenches. All the sounds of the dinner party they're at goes muted and distant for a moment as he

looks stricken, remembering, and then he mutters that he can't talk about it.
* At one point a point is made of the wonderfully-made reinforced hinges on the door of the notorious bar The Mended Drum. The point made is that they held up beautifully as the whole frame was ripped from the wall.
* At one point a portal to another universe is created, and deliberately tuned to an uninhabited world ("Earth Gimel") so that it can be exploited for resources and used for mass evacuation in case of disaster.
* At one point, Ash actually asks Pikachu to jolt him to help him think.
* At one point, a shape-shifting ghost assumes Mario's identity and runs off with all of his party members. Aside from a few party members pointing out his somewhat different personality, they buy his impersonation without question. (In a
* At one point, a Sobeys (Atlantic Canadian grocery store) had both of its "S"es burn out on its sign, reading
* At one point, a train station is mentioned to have three shops - one is a computer repair shop. Another is a blacksmith shop. Have fun figuring out what time period those two establishments could coexist in.
* At one point, a vampire confronted by Harry believes himself safe because Dresden would never dare reveal himself to the world by openly attacking him at a crowded convention. In response, Harry points out that he's in the phonebook, under "wizards".
* At one point, Ax gets asked about where he's from. After his first response ("I am from the Republic of Ivory Coast") doesn't work, Ax just lists off a bunch of
* At one point, Barney decides to sober up after becoming horrified when he sees a video of what he's like when he's drunk. He joins Alcoholics Anonymous, and actually stays sober for some time after that episode (usually drinking coffee rather than beer). He eventually relapsed, however.
* At one point, Belkar beheads Yikyik the kobold and wears his head as a hat. He later uses the head of Yokyok, the son of the first kobold, as a tortilla bowl.
* At one point, Billy Hazard leaves his unit so he can go check on Ashton. He reasons with himself that he'll be back before his unit will see combat again, then stays gone for eight months. When he returns, sure enough, his unit hasn't been called into combat in his absence.
* At one point Bond escapes his cell. Instead of trying to escape from the farm, he finds Goldfinger and the two sit drinking lemonade while Goldfinger explains his plan.
* At one point, Bond loses all his 10 million because he wagered it for his kings full of aces. Le Chiffre, however, had a four-of-a-kind, which is higher than Bond's (already high) full house.
* At one point, Broadway is shown in the alternate universe, complete with a poster for the musical
* At one point, Bruce Wayne is forced to fall back off a high rise tower to avoid getting shot. He falls several stories before
* At one point, Calvin uses the MTM to contain some lightning in an attempt to stop a storm from doing any further damage. He later uses it for revenge on Socrates.
* At one point, Carl unknowingly scares away Charles Muntz's dogs with the feedback from his hearing aid, which was supposed to
* At one point Casey puts together a computer simulation between planet eaters and -destroyers, which in addition to the Planet Devourer includes
* At one point, Cecil uses the skills he learned earning the "Advanced Siege Tactics Badge" to bust into a armored bunker.
* At one point, Celestia, Luna, and a royal guard casually discuss other MLP Abridged Series.
* At one point Class 3-E all decide that, as assassins, they should have codenames. Koro-sensei likes the idea and approves of it, but with a catch: no one is allowed to choose their own codename, the rest of the class does. End result is everyone winds up with embarrassing codenames and having to answer to them all day long.
* At one point, Cole Wilson tries to emulate him by wearing aviator sunglasses,

which Brent objects to because cool shades are
* At one point, Col. Potter is required to sell the idea of making military service a career to his senior officers. At this, draftees Hawkeye, B.J. and even Winchester all break out in derisive laughter at the idea and tease Houlihan and Father Mulcahy who are genuinely interested. Eventually, Hawkeye snarks at Col. Potter's pitch one too many times and the CO loses his temper, gives up and bawls out Hawkeye for his attitude.
* At one point, Crais mentions that Spetsnaz GRU (Special forces of the Russian military intelligence) were under KGB command (that is, under civilian command). How can a civilian agency command a unit of its military counterpart? Furthermore, the KGB had its own Spetsnaz units, and they were strong rivals with the GRU. For a detailed explanation, see
* At one point creator Greg Evans had planned a storyline which revealed the reason
* At one point, Croshaw considered "moving to that steaming shithole across the ocean" because he was sick of the Australian Media Board's aggressive censorship policies, which he then likened to traditional right-wing conservatism in the States.
* At one point, Dave asked to hang out with Rose later but she couldn't because she already had plans with Kanaya
* At one point, Delenn mentions that the humans are the only known race who would build a station like Babylon 5, where
* At one point, Derpy's mother gives her muffins, which make her sick and she has to be taken to the hospital. The implication is that Derpy's mother tried to poison her, but she could have also eaten too much.
* At one point, Dominic was recovering from temporary blindness and had only gotten back his sight in one eye. He wore an eyepatch until his vision recovered; combined with his artificial leg, this gave rise to at least one
* At one point, Drakken even delivers a visual presentation to Kim on how he intends to
* At one point, Dr. Asimov figured out how Benevolent AI would eventually become
* At one point during a D-Team segment, Diana is given the option to
* At one point during Blue Angels shows the audience will be focused on the main group, while the two solo jets each make a low pass right over them, demonstrating how the F-18 Hornet can be on top of a target before they hear them.
* At one point during Super Bowl XXXI, as the Green Bay Packers were getting into position on a first down, one of the TV commentators remarked on how the Packers, trailing the New England Patriots 14-10 near the start of the second quarter, were really struggling to make plays, particularly on first downs, and "can't really do anything against [the Patriots'] defense". Almost the instant the last word left his mouth, the ball was snapped to Favre who proceeded to connect with Antonio Freeman for an 81-yard touchdown, putting the Packers up 17-14. From that point on, the Packers ruled the day, holding the lead for the rest of the game and ultimately defeating New England by a score of 35-21.
* At one point during the Premiership of Conservative Party Prime Minister
* At one point during the Sauceror's Nemesis Quest, they create a potion that turns them into a slime, allowing them to infiltrate the slime convention. You can't use skills and are treated as though you don't wear any equipment. So, totally useless. Now, there is a bonus dungeon inhabited by other slimes called the Slime Tube. It is a rather high-level zone, usually reserved for Aftercore. so, if you go into this tough area in that useless form, you get an
* At one point early in Act 6, Jane is shown to be in possession of a
* At one point, early in the series, Ranma was sent flying into a wall hard enough to leave a sizable crater; the foes claimed he had broken every bone in his body, and, indeed, his bones and joints kept popping and snapping audibly. However, he recovered from these injuries (even
* At one point, even Juliet and Mason were a Beta Couple, due to the fact they had been in a romantic relationship before each one became Justin and Alex's girlfriend and boyfriend respectively.

* At one point, Evil Bakura tries to impersonate Normal Bakura. He mentions his "Britishness", says he had to do British things like "drink tea and eat bangers and mash" because he's British — and everyone falls for it.
* At one point Fauxlivia gives a nonplussed reaction to Peter's mention of
* At one point Fei, Citan, and Elly discover that when in Solaris, one should not eat the food. Ironically they discover this in the food plant itself. Fei and Elly break open a few barrels at the end of the production line to appease their growling guts. They even comment on how good it tastes. Citan refrains, but lets them eat anyway. The characters then walk into the
* At one point, Fiver exclaims "O embleer Frith!" in exasperation. Given that "embleer" is not only Lapine for "smelly" but a fairly strong all-purpose insult (the glossary at the end points out that it's used to describe the scents of predators, for example) and Frith is their god (who also happens to be the sun), the phrase might be akin to blasphemy.
* At one point, Flash's powers were stated to be the result of interference by Mopee, a magical extradimensional imp responsible for several origin stories, including some Marvel ones. This has been ignored since.
* At one point, Frasier tries to explain why Martin found him apparently evesdropping on him and Ronee, which was because he'd been eating an apple when they entered the flat. Martin shrugs this off, apparently having heard this a
* At one point, Game Master Konishi tells Neku and Beat that she's going to hide in the same place for seven days, while they try to find her. However, she's able to move all over the city, because the "one place" she chose was
* At one point gets his body taken over by the ship's computer AI, forcing him to do exercise up until he faints... and even after (his body jogs on, with his head lolled to the side).
* At one point, Gil and Tarvek realize that the first generation Dingbots (the ones Agatha makes herself) are profoundly different from the standard AI of the Clanks (robot soldiers and/or servants) that exist all over the
* At one point, G'Kar is having dinner with the captain of one of the few Narn battleships to survive the war against the Centauri. The captain expresses amazement that G'Kar somehow managed to get "breen" imported from their homeworld despite the Centauri occupation, but G'Kar explains that despite the smell, taste, and texture being identical, it's actually Swedish meatballs from Earth. He goes on to claim that every known sentient race in the galaxy has their own food identical to Swedish meatballs, and describes it as a mystery that would either never be solved, or that "would drive you mad if you ever knew the truth."
* At one point, GLaDOS calls Chell a "dangerous, mute lunatic" to her face.
* At one point, Gonzo tries to get out of looking after Miss Piggy's dog by claiming "Oh my god! I left an anvil in the oven!". Of course, this being
* At one point, Guy uses his field move to destroy a missile in a cutscene. If you glance at the bottom screen, you can see his TP actually drop, like if you used the move in gameplay yourself.
* at one point had the title character kill a couple to heavy metal music... and then he changes the station on the radio and the music changes to "Wake Me Up Before You Go-Go" by Wham!.
* At one point, Hamel tells Olin that he's not important because he wasn't in the Anime adaptation.
* At one point, Harry alludes to a game of chess with Ron that he might not have lost so badly if Percy hadn't been trying to help him every second.
* At one point Hawke can comment on some dirty image Isabela apparently saw in the Amell family crest, and when s/he finds it s/he says "Sweet Maker! I can't unsee that!"
* At one point Hawkeye and BJ try to take Corporal O'Reilly into an officers-only area with them. Hawkeye plucks a pair of captain's bars from BJ's shoulder, attaches it to Radar's cap, and (inspired by the ranks of lieutenant-colonel and sergeant-major) declares him a "corporal-captain". And this
* At one point, he almost says this one verbatim; "How dare you pity me?!"
* At one point he also has to dummy up birth records when someone starts looking

into his past.
* At one point he builds a supercomputer out of a bunch of cloned Hitler jar-brains wired together.
* At one point he comes face-to-face with a blood-sucking, demonically-strong vampire assassin... which
* At one point he compares her to "the male golems", before reminding himself that they
* At one point, he decides the speech won't do anything, so he just goes straight to the asskicking.
* At one point he dismounted from a set of parallel bars by going down the stairs. When he saw that a bunch of people had seen him fall, he said, "Ah, that felt good!"
* At one point, he does manage to become a true Soldier at the Rear, and it makes his life measurably worse. Instead of being in a unit that spends great portions of its time securing and guarding planets after combat, his garrison status lets his superior officer assign him to increasingly dangerous special assignments, including a liaison position with
* At one point he had upwards of six love interests, all of whom were infatuated with different shadows.
* At one point he has a fight with a nameless Jagermonster who wants a bigger part. On another occasion, Oggie meets him, and joyously recognizes him as his
* At one point he says that djinn in general like to constantly top themselves when it comes to entrances, both for fun and because a flashy entrance can startle an unprepared magician enough for them to mess up the summoning, allowing the summoned creature to get their vengeance.
* At one point he starts mouthing off to a bigger bad guy than usual, and everyone is horrified. He points out that if he
* At one point, he tells an appreciative waiter that the three of them should go out for a drink sometime.
* At one point, he throws a fit over Cyclops naming his new mutant school the New Xavier Institute for Higher Learning, believing it to be in bad taste, probably because Cyclops killed Xavier (in self-defense and while possessed, but Logan likes to ignore that). This is despite Logan having named
* At one point, he tried to help Republicans come up with some better zingers:
* At one point, he was mostly a heel and opposed Hulk Hogan, Macho Man, etc., but was still genuinely best friends and tag team partner with Sting.
* At one point, homophobic politician George Bush Sr. used as a theme song the intensely gay "The Best of Times" from
* At one point, Honor inadvertently creates a constitutional crisis when she forms
* At one point Ichigo wakes up shouting "Catnip?!". He immediately forgets what he was dreaming about.
* At one point in Act 5, the Homestuck disc was scratched, forcing the audience to go to one of the characters (a certain Doc Scratch) to salvage it. In the meantime he took over the comic, changing the scheme of the website to white text on dark green, and introduced a banner at the top of the page. For each panel, the banner changed as well, telling a story in tandem and often mirroring the events of the panels. Not only that, but when
* At one point in Act 5 when some fans were complaining quite loudly about the way the story was progressing, the Author self-inserted and threatened to make the reader go through
* At one point in "A Day For Eeyore", when the titular donkey gets rescued from the river, he argues with Tigger about whether or not he was bounced into the river. The narrator promptly interrupts, much to the confusion of everyone (except Tigger, of course), then he turns the pages back in order for everyone to see the scene and find out. Earlier in the same short, the narrator has to tell Pooh why he used sticks instead of fir cones for Poohsticks (you know, that game where you drop sticks from a bridge).
* At one point in "After Hours", Superman, Batman, and Spider-Man go back in time to shortly before

* At one point in "August", which is set in Ancient Rome, a disguised Emperor Augustus meets a man who was born into slavery, but was later freed and grew up to become a wine merchant with his own large collection of slaves. This is treated as an inspirational
* At one point in case 5, the player will have a blowfish that has not been prepared properly (read:
* At one point, Indy tries to return to his office and is besieged by students because he hasn't been grading any of their work. He has to climb out the window to escape.
* At one point in Episode 10, everyone except Sora and Shiro look like sticks figures.
* At one point, in his introduction, Kurama says he's 300 years old. Later he claims to be a thousand.
* At one point in its history, Grayson had a civil war brought about by zealots who thought the main government wasn't eschewing technology
* At one point in Kai Abridged Episode 2, Freeza asks "What the Space Fuck?"
* At one point in Marvel Comics, organizations like S.H.I.E.L.D. are shown to have entire departments dedicated to detecting and interfering with teleportation. The problem is there are countless methods being discovered, so there is endless effort to block each specific one.
* At one point in "O is For Opposite", Opposite Ms. O gives Olympia the nickname "honey bunny". She also refers to her and Otis as "my darlings".
* At one point, in response to how HYDRA is normalized in the Framework reality, Simmons tells a kid that all HYDRA are Nazis "and don't you ever let anyone forget it."
* At one point, in revulsion of the fact that nothing was happening, Lemurian at one point thought up the "Ghost Town arc", where the characters would be dropped in a desolate town without food, water, or their powers for a week, the arc was discarded when a player pointed out that the arc wasn't proving anything, because it was pointed out to be almost exactly like the complaint: Nothing happens.
* At one point in "Subspace Emissary" mode, Princess Peach offers Fox a cup of tea to defuse a fight between him and Sheik. Not only is she able to pull a tea set out of thin air in the moment Fox glances away, but Sheik is also able to pour herself a cup during that same moment.
* At one point in the books, Rumpole offers a toast up to the world's criminals, without whom everyone at the Bailey would have to find another job. Most of the other lawyers respond awkwardly.
* At one point in the early days of Spider-Man's career he joined a team called the Brooklyn Avengers. Since the regular Avengers had just appeared, Spidey assumed the two teams were on the same level. As it turns out, they were not. The Brooklyn Avengers were all people who lived in the same brownstone and got exposed to radioactive bedbug spray when their landlord forgot to tell them the building was being fumigated, and so they got superpowers. Spidey joined them for a few weeks but proved to be the only competent member of the team, growing increasingly frustrated by their blundering until he finally pulled a
* At one point in the first season, she levitates and throws a massive chunk of earth through a portal. It's clear that the rock is heavy. Really heavy.
* At one point in the game, the party is captured and stripped of all their equipment, being forced to stealth their way around until they recover their equipment and unable to even attack without weapons. Since Ayla
* At one point in the Kipling stories, Kaa the python hypnotizes a troupe of monkeys into becoming his helpless (ahem) dinner guests; later on, Mowgli singes Shere Khan's fur with a burning branch, and when that fails to get rid of him, Mowgli and the wolves stampede a herd of water-buffalo over him. As if that wasn't enough, in the story "Red Dog", Mowgli causes the marauding dogs of the title to be attacked by millions of angry bees; those who survive this by jumping into the river are attacked by Mowgli with a knife, and any that are left must then face Mowgli and his enraged wolf pack. Incidentally, Mowgli does most of this while he's naked. It should come as no surprise that none of this (save the part where Mowgli

fights Shere Khan with a burning branch) makes it into the Disney version.
* At one point in the late 80s the WWF had Jims coming out the ying yang. Jim 'The Anvil' Neidhart, Jim Powers, Jim Brunzell,
* At one point in the main quest you either have a vision of the past or travel back in time a couple thousand years. When you do this, you find that people speak the same sort of English they do in your time, though this may be a function of the vision/time travel, rather than a true case. It's fairly vague on this point.
* At one point in the main quest, you go undercover as one of the evil cultists you've been searching for. Turns out their initiation rite is sacrificing some poor sap to their god. It's very hard to save the guy as
* At one point in the manga, Mikoto complains about the measures taken to prevent people like her from reading manga in the stores without buying it (which, obviously, reduces profit for the authors). Seeing how Mikoto is a manga character, the author immediately punishes her by a
* At one point in the narration, he remarks that "Paul's not my real name," which apparently he doesn't tell anyone, because
* At one point in the original series, it's stated that the translation is supposed to be unnoticeable. The fact that Sarah Jane Smith stops to wonder why she can understand Italian (in
* At one point in the "Palm Springs Weekend" two-parter, Kelly gives Zack a shoulder massage after he strained his muscles trying to impress an aerobics instructor who happened to be Jessie's future stepmother.
* At one point in the saga, Arya also mentions an in-universe false common belief that they kidnap human babies, leaving an evil doppelganger in their place, a belief she's not very pleased about.
* At one point in the series, Jake morphs into a rhinoceros to charge through a compound. He finds that it's easier to rhino through doors than walls, but his vision is so bad in that shape that he has a little trouble seeing which is which in time.
* At one point in the series, little Manny accidentally watches one of Rodrick's horror movies instead of his kiddy cartoons. Greg stumbled upon a couple of Manny's
* At one point in the series, Misato thinks that buying the EVA pilots a steak dinner would bankrupt her. Realising this they take her to a fast food place instead. Becomes
* At one point in the series, the Vortigaunts are shown to at least have
* At one point in the show's development, Ladybug and Cat Noir were going to fight alongside at least three other heroes: Mercury, Melodie, and Kid Mime. Fans have given them civilian names (Alan/Allan, Allegra, and Claude, respectively) and generally use them as Félix and Bridgitte's circle of friends.
* At one point in the Storm of Chaos campaign, the Empire were getting owned by Chaos Daemons, until Teclis turns up and
* At one point in the suburbs chapter, you have to hide in a house and act as a sniper to defend Ellie and two brothers you befriended from a group of hunters, including an armored car. If you don't take out enough hunters fast enough, you're shown a cutscene of the group being killed.
* At one point in the third book, Jon and Bran are passing through the same abandoned town at the same time, but are unaware of the other's presence.
* At one point in the Xindi arc, a prisoner refuses to take Captain Archer's threats seriously, so Archer sticks him in the airlock and starts venting out the air. He makes a convincing enough show that the prisoner gives in; we're left to wonder how far Archer might have gone otherwise.
* At one point in the Yuuzhan Vong/New Jedi Order series, Vong bioweapons are eating through a capital ship's hull. The fighter pilots then use their exhausts to burn them off without blasting at the ship.
* At one point, Italy calls Germany for help because "There was a pretty girl, so I hit on her, but it turns out the pretty girl was France in disguise!" Since France has a noticeable beard, one has to wonder how Italy made that mistake.
* At one point it got so ridiculous that the only thing that they would allow him in prison was pen and paper. He noted to himself that he

* At one point, it's mentioned he won a battle by tricking the enemy commander into making a bad maneuver by giving a false report, using the enemy nation's native language to convince him that it was legitimate.
* At one point it's mentioned that Minds created without emotions and passions similar to those of biological beings universally Sublimate almost immediately.
* At one point, JC Denton is sent to look for a young woman named Nicolette Duclare. He meets a girl in a French club that promises to take him to see her. When he meets up with Nicolette, it turns out that she is the same woman he met in the club earlier.
* At one point, Jimmy calculates the maximum possible number Sheen's IQ could grow to.
* At one point, John makes the exact same pose with a sawn-off shotgun as he does in the cover art of the original game. He's even missing his hat.
* At one point, Jon tells Garfield that he can kiss his dinner good-night if he throws another snowball at him. So Garfield just throws the snowball at Jon and actually kisses his food bowl good-night.
* At one point, Julia catches a red Gyarados which she names Geraldine. A regular Gyarados would be troublesome enough, but Geraldine has been forcibly evolved against its will, was captured by Team Rocket and experimented on, is scared of Pokemon battles, and developed some form of PTSD because of her experiences. Ultimately, Julia comes to sadly realize that simply giving Geraldine love and care won't magically heal her and that she needs professional help, so she gives Geraldine up to a Pokemon Rehabilitation Facility that can give her the therapy and support that Julia can't give her. This story arc was based on the authoress being forced to give up one of her cats because she was unable to pay for or help it with its many health issues.
* At one point, Kaede gets slammed into a wall after getting blindsided by Ku Fei during a
* At one point, Karkat suggests (not entirely seriously) that stabbing people might be Jack Noir's way of greeting them.
* At one point Kevyn warns his comrades against killing Shufgar, as that will lead to "A dark place."
* At one point, King in the North Robb Stark orders his vassal (and uncle) Edmure Tully to hold the line against the forces of the Mountain while Robb campaigns in the west. Eager for glory and not content to fight a defensive war, Edmure goes on the attack and captures an enemy-held mill. Robb castigates him upon his return: his plan had been to goad the Mountain into pursuing his forces and subjecting The Mountain's army to a
* At one point Klaus claims that the Germans have several common phrases, and most involve genocide.
* At one point, Klinger worried he really was going crazy. He gestured towards the dress he was wearing and asked Sidney Freeman, "Would a sane man dress like this?"
* At one point, Kotetsu tries to prove to an Apollon Media security guard that he's Wild Tiger
* At one point, Leonard tries to give him a fist bump. Sheldon just kind of looks Leonard's fist before grabbing it and turning it into awkward fist bump/handshake combo.
* At one point, Lucy's extended misunderstanding of trees, up to and including claiming telegraph poles were a special type of tree developed for the phone companies, gave Charlie Brown a sore stomach. When she got up to leaves jumping off trees in autumn to escape the squirrels, even Linus could endure no more and developed a stomachache of his own.
* At one point Lulu suggests she learn some elemental magic to help her master her fear. Rikku's Sphere Grid runs straight into
* At one point, Marlin and Dory are looking for a way to Sydney and Dory claims she can speak whale and asks a whale for a ride to Sydney. They end up in the whale's mouth and it spouts them out in Sydney. While
* At one point Marlin tried to branch out by adapting the time machine technology into a

* At one point, Marshall actually calculates that, given the number of women Barney's slept with, compared to the sheer number of women he hits on, his success rate is actually only a little over 1%, despite having slept with more people than the rest of the main characters combined.
* At one point, Maya sneezes and sets off Lotta's camera, wasting another roll of film.
* At one point, McQueen turns on the radio just in time to hear Dick Brickman present a breaking news report about the case he's currently working.
* At one point Minister Sheng's litany of complaints begins with having dogs defecate in his shoes, being told he was smelly and being insulted by local children, and ends with his office being burned to the ground.
* At one point, Monica learns that Gary is going to ask Phoebe to move in with him, and asks that she doesn't tell Phoebe. Monica manages to hold out for a
* At one point Mr. Horrible Gelatinous Blob (who's in a bit of a bad mood) tells Cubert and Dwight (who broke his window and are apologising at their father's behest) to "Kiss my ass...which I don't have!", provoking a fight with Hermes and the Professor.
* At one point, Murphy offers to Harry to call in SWAT and National Guard forces to help them take care of "terrorists" (Fallen Angels). Harry is horrified, explaining that the Fallen would take this as a
* At one point, Official Errata contained two contradictory answers as to whether Immaculate Monk Dynasts got the Enlightened Charms in addition to their 5 Immaculate Martial Arts Charms or not. Both answers were later removed, leaving it completely up to the ST.
* At one point of the game, Orange Kid mentions an invention he's creating that will turn boiled eggs back into raw eggs.
* At one point, on a whim, they decide to steal a tank off this train they were investigating. Marco declares he should drive,
* At one point, Oz yells at somebody because they've made Gilbert upset and states that
* At one point parodied when he attempts to activate a special move in the laboratory... by screaming louder and louder.
* At one point (particularly in the Davison era), there was a No Hugging, No Kissing, No
* At one point, Peter makes a bet with Flash Thompson that he'll have a date for the upcoming school dance to show his confidence that he actually has one. However, his intended date cancels. When Peter ends up at the dance with
* At one point, Picard commands the holodeck to recreate a specific date and time in a Parisian café, complete with accurate interactive portrayals of everyone who was present in the café at the time, in order to relive a memory on a whim. His subsequent disgust at himself for doing so clearly indicates this is not a holodeck program he'd built himself - the data already existed in the computer.
* At one point Rainbow Dash herself does it, which shuts the main character up mid-rant. As she notes to herself, when Rainbow Dash is raising an eyebrow, it's time to stop what you're doing.
* At one point, Raj tells his parents that he wants to marry for love, and his father tells him that only idiots do that—you'll end up unhappy either way; at least if it's arranged you'll end up in a beneficial arrangement.
* At one point, Rasputia, clearly wanting to provoke jealousy, tells Kate that she and Norbit have sex all the time and in a wild way. Kate, who was drinking, chokes immediately and makes an expression of horror and disgust as Rasputia continues talking about her sex life with Norbit.
* At one point, Ravio launches on a full-blown lecture of how exactly magic functions.
* At one point, Rex tries to get across a sidewalk while hiding underneath a bush disguise. However, with each step, he loses some of the leaves, ultimately being left with just one.
* at one point, Rich invoked this trope to cut off rampant speculation (with the

implication of, "I didn't elaborate on this more than was necessary for the story, so this is as good as any explanation"):
* At one point right after confederation, Sir John A Macdonald (the first Prime Minister of Canada) was at a diplomatic reception in Washington, D.C., where he struck up a conversation with an American senator's wife. When he revealed he was from Canada, she began asking about his Prime Minister, stating she had heard stories that he was a drunk and a rogue. Sir John A agreed with her on both points, at which point the senator himself wandered over and fully introduced him.
* At one point Rika commits suicide in front of Shion, by holding a knife to the wall, and slamming her neck into it. It's a lot more graphic in the anime adaptation, since the visual nover was limited to only describing it and using a blood graphic.
* At one point, Rincewind the Wizzard needs to open a lock and uses Mind Over Matter to do so. However, it appears that it
* At one point Roger and Steve are playing detective when Roger calls Steve's character "Squirt Cinnabon Wheels". When Steve asks where the name came from, Roger said he "
* At one point Sam has the Ring all to himself, and the Ring gives him visions of becoming a mighty lord, overthrowing Sauron, and transforming Mordor from a wasteland to a gigantic garden. But Sam rejects this because he only wants to tend a garden on his own, not to lord it over others (and have them do the gardening), and when tempted to simply have a ginormous garden to himself,
* At one point Satou secludes himself from the outside world (even more) to fill his hard drive with porn. When he runs out of disk space, he starts deleting other stuff. Like his operating system files.
* At one point, Sisko says, "I wasn't yelling. I was expressing my opinion loudly." It seems to run in the family, as his father once claimed "I wasn't sleeping, I was checking my eyelids for holes."
* At one point Skye says she can't believe people think Ward is boring after she sees him perform a badass action beat. Prior to
* At one point some Controllers make a correct guess that the "Andalite bandits" (as Visser recognizes the morphing-able guerillas) are possibly humans. But none of them dare to advise their dreadful leader that he could be wrong.
* At one point someone mentions humans being infected with a disease, and Ada calls them crazy. Diseases are for animals, humans don't get them. This is another of the
* At one point Spencer mentions he almost didn't recognize Sam and Freddy since they weren't sitting on his couch.
* At one point, Stahma points to Datak's origins in the lower liro and asks if this is really the sort of culture he wants to maintain on Earth. Datak angrily replies that, yes, he does, since he is now on top, "pissing on those below".
* At one point, Stewie also attempts to blackmail Brian by putting nude pictures of himself on Brian's laptop and threatening to pass it to the FBI.
* At one point, Stewie causes Matthew McConaughey to go down in an air accident and then says that Ron Howard is next. And then denies it. And then invokes The End (Or Is It?) (
* At one point, Tarakudo shouts Jade awake from a nap, causing her to blurt out "The burger crocodile!" He's not sure he wants to know what she's talking about.
* At one point, Thaddeus gets a fitness tracker, which reveals that he's only taken eleven steps. He then adds that maybe two of them were from when he sneezed really hard.
* At one point, thanks to the amazing mundanity surrounding the Dalns gods—their “worshippers” are more like employees and, in fact, don't even know what “worship” means—George speculates that they're actually phonies who set themselves up as gods. The various reveals about them during the book (e.g., they had a court fight over who was to control C'hou) leave the matter ambiguous, but they are definitely
* At one point, the actress playing Mahidevran and the actor playing her son Mustafa are five years apart. And that's before the

* At one point, the Autobots use an attack pattern called Omega Formation to attack Blitzwing. Since the
* At one point, The California Milk Processor Board, the creators of the
* At one point the characters consider adding another category to this list when they get their hands on a particularly large
* At one point the character Wynne speculates that the Jesus-equivalent Andraste might have secretly been a mage as mages were capable of routinely performing all the various miracles that were attributed to her. (You can also find a book making this claim in Orzammar, whose description says it was saved from a fire.) Since the Chantry was founded as a rebellion against an oppressive magocracy and has very strict rules to keep mages from ever ruling over non-mages again, this is considered a rather drastic heresy.
* At one point the crew has to make sure that a bar permits mechanical lifeforms, suggesting that racial segregation is allowed to be practiced in the galactic community. None of the characters complain about this or see it as unreasonable.
* At one point the Daleks are shown in conflict with the Movellans, who are tall beautiful androids. However the Movellans ended up winning the war with a virus.
* At one point, the First Doctor has ended two stories abnormally unhappily — turning an entire planet into a wasteland, committing a genocide against every Dalek there, and watching two of his companions get
* At one point the Government wants to promote the use of British products and cut down unnecessary imports by distributing "Buy British"-lapel badges... Made in Japan, of course.
* At one point, the Harkonnens used artillery against survivors of the attack on the Atreides complex who had holed up in caves, without being able to bring the large household shield generators. The attack is noted as extremely demoralizing specifically because in modern combat, the role fulfilled by artillery is obsolete; no artillery does any good against shields.
* At one point the human names were considered to be somewhat canon, as Himaruya answered a fan question and said that they would find out one day why Ludwig didn't have a surname. But as it was an old question on the deleted blog and the names have not been ever officially used, it remains unknown if that "significance" will ever come to light.
* At one point, the Ice Dragon, boss of the Ice Cave, paints himself red and calls himself a Fire Dragon to fool adventurers.
* At one point: The man who built the wall that's supposed to stop you had to take a few shortcuts in building the wall (and you can read his mind to find out how to get past it).
* At one point, the narration notes when Matthew's eyes darken that Robin had thought this was literary license until she watched as his eyes turned black as his pupils dilated in shock upon telling him "Well, the problem with that, Matt, is that I don't love you anymore."
* At one point, the Nirvana does have to "go poop", as one of the characters puts it.
* At one point the nurse tells Zim he's extra human for having multiple organs, while Dib almost gets hauled off by the MIB for missing some. Oh, and for having a cow-in-the-box for lungs, but you know what we mean.
* At one point, the old man Sigma makes the completely deadpan and hilariously untrue claim that he's 22 years old.
* At one point, the other deputies roust the prostitute hangout, only to find Deputy (Jim) Dangle among them, dressed as one. He tries to invoke the trope and convince them that he's undercover, but the others slowly catch on to the fact he is moonlighting as a gay prostitute as they leave.
* At one point, the outlaw Tom O'Sevens is listing his grievances against the Lannisters, and he names at least five Pates he knew whose deaths he blames on them, including his cousin Ser Pate who was killed in a tourney by
* At one point the player is transferred to a squad known as the "182nd Suicide Kings" due to their extremely high turnover rate (their emblem is a King of Hearts playing card with the King's sword through his head). This is because they have one

of the most dangerous jobs a fighter pilot can have: thin out the AAA fire on capital ships so bombers can get through. This is a game where
* At one point, there is a support group for people with family members who have been Ret Goned. Then some of the Ret Goned are retroactively de-Ret Goned. The former support group members go to the remaining support group to thank them for their support during the Ret Gone period, but because the de-RetGoning was retroactive, the support group don't recognize them and think they're being mocked.
* At one point, there's even an episode in which they need to go to a different dimension, using a portal which is said to randomly appear anywhere at any time.
* At one point, there was also an amusing series of videos created by (female) TGWTG fans dressing up as their favorite (male) reviewers and demanding that the fandom fix this crackfic singularity gender bend... thing.
* At one point, there was an extremely popular deck combining some of the most powerful pendulum monsters in the game. The deck was nicknamed Pepe, and some of the key cards include
* At one point, there was a popular image macro making the rounds on Facebook which made fun of fans of
* At one point there were churches that separated male and female churchgoers. They eventually became very obscure, and to nobody's surprise, the last church that did separation of gender discontinued it in 2017.
* At one point, the scientists at Los Alamos entertained the possibility that a single atomic bomb could turn out to be one. Before the detonation of the first nuclear bomb, Trinity, bets were taken about the yield of the explosion. Predictions ranged from a
* At one point the series specifically says that Andalites took 3,000 years to go from achieving powered flight to putting a man on the surface of another celestial body. Ax is astonished that humanity made that leap in less than 70 years... and when you see it put like that, it's hard not to agree with him.
* At one point, the spoiled foods in the fridge have a bit scene of their own, complete with a solo song by a moldy tomato.
* At one point the Strike Team realizes that their clubhouse has been bugged. They all laugh along loudly as Shane tells a long drawn out joke for the benefit of whomever's listening, while at the same time using paper and pen to plan how to move forward.
* At one point the Terran government tries to charge Kevyn with treason for mass-releasing the teraport designs. He points out that it was his now-deceased
* At one point, the TV ads for Mighty Dog™ brand canned dog food went with a
* At one point, the twins trick Pinkie Pie into putting a diaper on so they can treat her like one of them.
* At one point, the US Air Force sponsored a free, downloadable version of
* At one point the Vong also run into trouble when their living armor has an
* At one point, the Wizard held auditions for the fourth member of his latest Frightful Four in
* At one point they switch because Mary Kate doesn’t want to go to tutoring lessons while Ashley has a crush on the tutor and wants to get closer to him. The gig is up once the original girl assigned fails a makeup test yet the girl he tutors shows drastic academic improvement.
* At one point things got so bad for the Green Lantern Corps that the last Guardian teleported to Earth and threw a ring at a random person. Eventually they got better.
* At one point this is inverted with Han. He threatens to shoot a man to force him to comply with Han's orders and is told that of course Han Solo, hero of the New Republic, is not going to murder an unarmed man in cold blood. Much to Han's annoyance, this is correct and he gripes about how things were easier when people dismissed him as a mere criminal.
* At one point Thom Merrilin's reaction to a statement by Elayne suggests that the Lord Captain Commander of the Whitecloaks, then Pedron Niall, was close to or more powerful than the Queen of Andor, one of the more powerful of the nations, as there are apparently Whitecloaks in and from every land. The 'from' bit is as close as

indicating they have large scale support as exists, one supposes.
*): At one point, three of the four A-Team members (including an unconscious BA) are in the back of their plane, when their pilot Murdock comes back to join them. Face's immediate reaction: "If you're our pilot, who's flying the plane?" The "cue the crash" part of the trope, however, is subverted when Murdock explains that he let his nephew Daniel Jackson, who's also a capable pilot, take over.
* At one point Tony Stark wonders aloud how Fury can see the monitors on his left, since he's missing his left eye. He's told that Fury just turns his head.
* At one point, to stave off boredom, Darth Vader cashed in a debt Wilhuff Tarkin owed him and had the Grand Moff hunt him down, as he expected him to actually give him a challenge. When Tarkin instead
* At one point towards the end of the game you have to read the residual thoughts on a corpse in the morgue. Natsuki, another member of your
* At one point Twilight notices a hatch in the ground with a ladder in it
* At one point, Urich accuses Ellison of being paid off by Wilson Fisk and ensuring that his remaining career is limited to fluff pieces. After Fisk kills Urich, Karen angrily confides in Matt that Ellison shouldn't have even been at Urich's funeral pretending to be his friend. The arrests, however, prove that Ellison is not complicit.
* At one point, Vic realizes that a fellow officer is wearing a wire for IA. Vic then uses this to record himself "confessing" to the cop that he's not bad, he just actively cultivates a reputation as a corrupt and murderous cop to intimidate gangs and crooks into thinking he's a loose cannon.
* At one point we do see Spencer's bedroom, which looks the same as the studio, same with Carly's room before its redesign.
* At one point, we see students from all four Kingdoms lined up wearing their uniforms. Vacuo's boys stand out, because it's clear their "uniform" is just "
* At one point, when a profile turned up something like "middle-aged white man who hates his job," Morgan sarcastically offered to go arrest half of D.C. Fortunately for D.C, they can usually narrow it down eventually.
* At one point when Cecil says he will take a look at the traffic, he proceeds to do so... without particularly describing it to the listeners, but mutters a few observations to himself.
* At one point, when Hercules was asked to compare his recent companions to his legendary companions, he feigned ignorance when it came to Amadeus Cho due to this; the answer that he was thinking but didn't voice was Hylas.
* At one point when Stitch is misbehaving by destroying things, as he approaches and rips a painting by Lilo, she protests, "that's from my Blue Period!", a reference to Picasso.
* At one point, when the Scarface doll is destroyed, Wesker uses a sock puppet that he called Socko in his therapy. Socko is a lot nicer.
* At one point, while on a "date" with Akane, Ryōga (who has good eyesight) is frisked in the darkness of an ocean-themed haunted house by Shampoo. Elated by what he thought is a forward advance from Akane, he quickly turns around and hugs the first thing he found — a giant ocean sunfish model. He thinks Akane feels a little chunky, but he still doesn't open his eyes to realize his mistake.
* At one point while pursuing a mysterious figure across Gotham's rooftops
* At one point you cannot get past a northern checkpoint because the game involves going around with a king who has been transformed into a monster, and they won't let a monster in. However, at this point the hero has learned a spell to teleport him and his party to any city he has been to. If the story treated this spell as existing, he could go through the checkpoint alone, reach the next city, return, then teleport back to the city with the king and party. For that matter, half the stores in the game sell an item that has the same effect (Chimaera wings), so it wouldn't necessarily have to be the hero who could go alone. Heck, they could find a random guy who's been to the city and pay him to transport them there. If the game's plot considered this, though, then keeping borders secure would be nearly impossible.
* At one point, you can try explain the conspiracy you're working against to a

minor character, who'll react with amusement and think you're a complete nutter.
* At one point you could get a 20th-anniversary commemorative collection of the
* At one point, you find an audio recording from a woman named Diana that claims that during the events at DCOM, 6 people died and 3 survived. However, of the 9 characters in
* At one point, you get treated to Garrus teaching Shepard a tango, making Shepard dance in the process.
* At one point, you have to go into the minds of a few people to assemble a disguise to trick the warden. A lazy or creative player might think that just jumping into the warden's mind would be quicker. The game will let you try it, but all you'll get is an amusing note explaining that the warden is protected against psychic interference. Similarly, if you try to jump into any of your fellow campers' heads, you'll get a notice saying that the mind-jumping device won't work on minors.
* At one point, you meet a caretaker of an American history museum in Rivet City who has made quite a few mistakes (for one, he thought the Declaration of Independence was flown to Britain on a plane), even with the history that occurred before the game's timeline diverged from real history. This is justified in-universe by the nuclear war, the fact that the best sources of info in the Capital Wasteland are currently overrun with Super Mutants, the Brotherhood or both, and because other groups like the Slavers are actively attempting to destroy historical artifacts for their own ends.
* At one point your characters' weapons are taken when you're captured by the enemy. Unless you have
* At one point your suit's AI recognizes that you need confidential information about the Breathedge corporation to survive, which its programming will not allow it to tell you. However, its programming
* At one point, Yuna actually calls him out directly on this. She wants to communicate with the cactuars in the Cactuar Nation, but Benzo, the Al Bhed kid who understands their speech, isn't around. She asks Shinra if he can communicate with them and Shinra gives his standard excuse, to which Yuna responds that Benzo is also just a kid. Shinra seems
* At one time, Barney drank a bottle of organic juice which Homer had accidentally made with peyote and began seeing a monster. He promptly got out a drink of alcohol, so that a more familiar
* At one time in England, the period of time that a couple must be married for a spouse to have claim to a share of inheritable property.
* At one time, it was almost a point of pride for many punk rock, heavy metal, and hard rock bands to get themselves banned from venues and hotels, typically after trashing their rooms or starting riots at the venues, but also for violating local obscenity laws. Several have been banned from performing in entire states or countries, usually on obscenity grounds.
* At one time it was a pretty common rumour that completing extreme mode 10 would unlock Alessa's dress as an alternate costume. What you actually unlock is the God Of Thunder outfit.
* At one time, "Lite" had no meaning and could be legally used on packages of lard. "Light" often referred solely to color, and not caloric content. Consumer attention paid to this term, though, has resulted in changes to marketing and (in 1993) to
* At one time the Normans were repulsed and about to rout. Sichelgaita rode ahead the army, undressing herself and yelling naked: "Are you men or maidens? Follow me!" Anna Komnena, the Byzantine historian, compared Sichelgaita "like the Amazons of the old".
* At one time, the Officio Assassinorum decided to create the ultimate assassin.
* At one time there was a series of advertisements for a building society, starring
* A Tongue That Cannot Lie by Karine Polwart. Specifically: "Afflicted, addicted / I pray for a potion / to take all these visions away"
* atoning petty criminal has a real knack for getting along with people, is

actively working hard to become a better person by righting all his past wrongs, in the process making his town a better place, and is willing to make great sacrifices for the people he cares about. Sometimes he relapses, but he brings up some interesting questions on morality and what makes a good person.
* Aton: Supporting unrealistic expectations of what a female adventurer should look like since the art in First Edition.
* A Toohey's ad which appeared to be featuring the Man With Silly Hair growing beer in these giant cocoon-like plants.
* A Toon Boom commercial has a movie shoot where this trope is supposed to happen, but one of the actors is distracted with his game.
* A toothpaste ad had a pair of identical twins on a double date, who decide to go to the toilets and swap dresses to see if their boyfriends notice. The one who uses the toothpaste being advertised naturally has better teeth than the one who doesn't, and her boyfriend immediately recognises her.
* At OPA, Harrison and Abby find their fellow Gladiators Huck and Quinn "incesting all over the office".
* Atop a Mountain of Corpses: Someone stands victoriously on top of a pile of the dead bodies of the people they killed.
* atop. Bulletproof vests and kevlar helmets have made this practice safer to the riders than what it used to be in WWII.
* A topic of the episode "Lisa the Iconoclast", in which Lisa discovers the town's founder, Jebediah Springfield, was actually a pirate who even tried to kill
* At Opie and Anthony's Traveling Virus Comedy Tour's 2006 stop in Philadelphia, comedian
* Atop Jupiter Lighthouse prior to its lighting, Agatio and Karst also have Mind Read text, though Sheba isn't in the party at that time, either. Both are thinking that
* A top No. 6 official makes unwanted advances on Dogkeeper in one scene because he thinks she's a prostitute. He also hits on Nezumi.
* Atop the Fourth Wall), always greeting viewers with "Hello My Children!"
* Atop the Fourth Wall, and given the rise of ad blockers, people watching the videos without watching the ads means he has less money to pay the bills with.
* Atop the Fourth Wall and in part due to his own desires) has always made his comic book show priority over HOPR due to wanting to use official DVD's for his clips and because they're MUCH more time consuming compared to his once a week comic reviews.
* Atop the Fourth Wall, and that people are going to love the ending he's writing.
* Atop the Fourth Wall: Apparently, Donald Trump's claim that windmills cause cancer can be traced back to a lie Allen told him to stop him from trying to take Comicron-1 from Linkara.
* Atop the Fourth Wall around the time they broke up, she has since appeared in Vlogs and Behind The Scenes roles on crossovers with Linkara and they have planned to re-introduce Iron Liz.
* Atop the Fourth Wall as "a gaze into the eyes of madness" to how its author, Bill Jemas, thinks the world works.
* Atop the Fourth Wall', as 'Over There' needs to take care of itself.
* Atop the Fourth Wall: At the end of the Sleepwalker storyline, a page appears on Linkara's chair saying that he's invited to "A Contest of Champions".
* Atop the Fourth Wall. A typical example from him usually follows this format:
* Atop the Fourth Wall, a villain appears behind Linkara, shoots him in the back, and calmly removes the magic gun from Linkara's unconscious body and walks away.
* Atop the Fourth Wall, boosting his popularity tenfold, many such video reviews were simply him preforming the text reviews.
* Atop the Fourth Wall, both Linkara and the audience assume it was Mechakara who broke the Continuity Alarm. However, when he's finally confronted, he admits he didn't do it. As it turns out, it was Linksano who broke it.
* Atop the Fourth Wall, but on three occasions thus far he has literally set the comics on fire once he's finished reviewing them. It is important to note that he only used this AFTER setting a comic on fire....

* Atop the Fourth Wall", but that in order to do it, he announces that he will be breaking his own rule on continuity, only for the Continuity Alarm to immediately go off, incurring his wrath.
* Atop the Fourth Wall: "... Cause I've got a brand new combine harvester..."
* Atop the Fourth Wall comic was dedicated to Marcus Almand, a late friend of Lewis'.
* Atop the Fourth Wall contributors have tied him up, kidnapped him, tricked him, blamed him for things he didn't do and yes attacked him.
* Atop the Fourth Wall creeped him out as a kid, and represented this by making it a Lovecraftian monster.
* Atop the Fourth Wall curse, he just doesn't use the "more colorful four letter words" to prove that he doesn't need them to be funny. You can hear him curse a few times in Behind The Scenes videos. This is saying something compared to nearly all of his colleagues. During a live charity drive, he offers to say "Fuck" if enough money is donated. The other reviewers point out that he just did.
* Atop the Fourth Wall, cutting to video of him laughing as he grabs a gun, walks off, empties the magazine, and his laughing turns to screaming.
* Atop the Fourth Wall drive Linkara to drink; when issue #3 comes around, even his alter-ego Holo-kara manages it.
* Atop the Fourth Wall during the most recent review of a 2001: A Space Odyssey comic.
* Atop the Fourth Wall, ending a 12 year run as Dr. Crafty moves on to personal projects.
* Atop the Fourth Wall episode "Captain America Goes To War Against Drugs", Captain America reels off various things he's heard by people underestimating him. Linkara adds how the story of "Surely, he couldn't have eaten all the donuts" may not be what they want to hear.
* Atop the Fourth Wall, etc.) are actually just toys that he's been enchanting using a magic book that can turn the image of something into the actual thing. Oddly, there's still genuine sci-fi stuff; its quite explicitly only the borrowed technology that was actually magic.
* Atop the Fourth Wall for an annual series called "Longbox of the Damned". Each year also features a special Halloween story, usually involving Linkara dealing with supernatural horrors:
* Atop the Fourth Wall Harvest and what the villain could offer. A benefits package? Flex time? Paid vacations? A starting salary in the six digit range? When Harvest says the team should embrace his offer, Linkara notes there are free donuts in the employee lounge every Monday.
* Atop the Fourth Wall: Harvey Finevoice is able to figure out the clues in the book about the Entity at once. As such, he jumps to the top of its priority list to consume. The Ninja Style Dancer was grabbed earlier than the rest of Linkara's household for similar reasons.
* Atop the Fourth Wall has had these ever since Mechakara's introduction.
* Atop the Fourth Wall has Linkara explain some obscure facet of comic book lore related to whatever he's reviewing, usually followed by a beat, and something along the lines of "comic books are weird".
* Atop the Fourth Wall, however, does have scheduled advertising in the form of a "mid-roll" ad. While other users tend to ignore the mid-roll (although the Nostalgia Critic sometimes lampshades it), Linkara has a set of specially prepared bumpers to put around it.
* Atop the Fourth Wall in a barren universe, Lewis dubbed over his lines due to weather conditions.
* Atop the Fourth Wall in hopes Linkara would defeat Lord Vyce, since it considered fighting him to be too inconvenient.
* Atop the Fourth Wall, in that the character's interactions map perfectly to characters being introduced to be killed off by a masked killer, with the unfortunate twist that no such killer ever appears.
* Atop the Fourth Wall" into one of these, with a random word or phrase replacing "kewl".

* Atop the Fourth Wall: Invoked by Linkara's "Arsenal of Freedom" which is made up entirely of toys and prop replicas; handwaved in that they turn out to be enchanted to work like their "real" counterparts.
* Atop the Fourth Wall is a child character being killed or otherwise endangered solely for the sake of shock value or plot contrivance.
* Atop the Fourth Wall. Justified in that Linkara created Linksano, because he felt bad about asking Spoony to play Insano for him over and over. And of course it's also lampshaded because he is Insano's counterpart from alternate reality.
* Atop the Fourth Wall. Lewis has stated that every appearance of Mechakara contains some kind of clue to his identity or his ultimate goal against him.
* Atop the Fourth Wall. Lewis was revered as one of the nicest members of Channel Awesome all the way until he left.
* Atop the Fourth Wall: Linkara himself faces the Personification of his fandom.
* Atop the Fourth Wall, Linkara just hires him as a tech-expert and he becomes a (so far) loyal ally.
* Atop the Fourth Wall. Linkara makes it clear that he's not asking her to help kill herself, though, as she can transfer her consciousness off the ship.
* Atop the Fourth Wall: Linkara will read a character saying a stupid plan or inaccurate statement, summarize it in a triumphant tone of voice, and then go "Wait..." with confusion in his voice.
* Atop the Fourth Wall Mechakara and Mirrorkara used him for his plans (and stole and killed the real clone).
* Atop the Fourth Wall Mecha-Kara attacks Cable for this reason, as he was out to kill Linkara after he teleported him away and stole his gun.
* Atop the Fourth Wall mocks this whenever it is encounter. "That's right people, don't have anything unique or special about you, perhaps it's not "normal""
* Atop the Fourth Wall of the Tournament Of Champions arc: even though months passed between matches for Linkara, some of the competitors only experience a few hours in their respective universes.
* Atop the Fourth Wall. Once to deride Linkara for mistakes he's made (Linkara later used magic to teleport to his house and beat him) and again for calling him a rip-off for doing an episode on comic book advertisements.
* Atop the Fourth Wall, one of the alternate universe opened up was where Spoony and Linkara were models, and they ended their skit on a bunch of fashion poses as the cameraman took their pictures.
* Atop the Fourth Wall opens with a drunk Linkara. Even when it's a holographic version of him! The very first review ends with this:
* Atop the Fourth Wall: Parodied during the Youngblood #9 review. Linkara gets to the point where Badrock sees a group of weightlifters on Malibu Beach and starts laughing at them. When one takes offense...
* Atop the Fourth Wall parodies the "extreme" attitude that pervaded superhero comic books in the 90s through the character of "'90s Kid."
* Atop the Fourth Wall, particularly misogynists — both of which he's staunchly against. It would be difficult in this day and age for an Internet reviewer to wear a fedora with complete seriousness.
* Atop the Fourth Wall (pictured above), and he noticed that it also applies to him as well, since his real name is Lewis Lovhaug.
* Atop the Fourth Wall, Pollo's new robot design was decided by a submission contest. As was the theme song. Even the the songs that weren't picked got their due when being played as ending themes.
* Atop the Fourth Wall review he held up a series of signs in the wrong order in one scene, so Linkara edited the footage to put the right text on top of the signs with an added: "Ninjas put their words in the wrong order to confuse their foes."
* Atop the Fourth Wall review, Linkara is confronted by all his friends that his current plan (hijacking the world's satellites to target a superweapon on short notice) is highly immoral. After explaining his reasons (but not even attempting to defend the morality of it) he tells them to either stand by him or leave. The usually inspirational trope is inverted when not even Pollo is willing to stay.
* Atop the Fourth Wall reviews, the (Two-Thousand-and)Nineties Kid revealed that,

by his time, people would be using USB drives stylistically molded to resemble floppy discs.
* Atop the Fourth Wall run out of the Clone Saga. A split second later, his face drops and he shouts "DAMMIT!"
* Atop the Fourth Wall said "Isn't it weird how someone talking in the third person suddenly increases their awesome factor by 20%"
* Atop the Fourth Wall's "Athena #1" review, Linkara officially announces that he is straight, to counter accusations that he dislikes women being objectified in comic books because he is gay (rather than feminist disagreement with the concept of boob windows and constant ass shots).
* Atop the Fourth Wall set them on fire if they force his hand about blocking his path, and the stack quickly falls apart.
* Atop the Fourth Wall's "Leaves of Grass" review, Linkara ends up commenting on how it's a comic book, yet the teenage villain in the B-plot still looks like he's still been cast with a 30-year-old actor.
* Atop the Fourth Wall's Marville #5 review, the issue takes a potshot at scientists. Cut to Dr. Linksano doing this trope to the screen (and, presumably, the comic). Later, when the issue outright calls anthropologists people without jobs, Linkara invites the audience to do the same to the comic.
* Atop the Fourth Wall spoofed this, with Linkara’s robot double pointing out a plug, and Linkara snapping, “Shut up, hippie! He gave me a discount!”
* Atop the Fourth Wall style setting for the character's home, which was what a lot of people had been fearing if such a bill passed.
* Atop the Fourth Wall summarily cut off when an oblivious Linkara whacks him with the door.
* Atop the Fourth Wall's voice for his hosting persona Linkara was much softer and calmer. Similarly, his secondary character 90's Kid (also played by Lovhaug) had a much deeper and less hammy voice early on.
* Atop the Fourth Wall, the Gunslinger trapped the cast in their apartment and set up a device that lowered their inhibitions and increased their anger; between the tension of the situation and pre-existing conflicts in the group, the situation shortly got violent.
* Atop the Fourth Wall: The Movie, Linkara is forced into a deal with a government agent about his spaceship. Afterward, the agent makes some gestures of goodwill to try and gain his trust, to which Linkara responds that he appreciates, but that they're definitely never going to be friends nonetheless. Cut to a drunken Linkara slurring "You are the best friend ever!" A caption show this is four years later.
* Atop the Fourth Wall, there usually is one major villain per story arc:
* Atop the Fourth Wall. They're all so interchangeable that Linkara makes a running joke of referring to individual early Image comics as any of the other, similar early Image comics by "mistake".
* Atop the Fourth Wall. This comic is also mentioned to be his favorite comic of all time.
* Atop the Fourth Wall This does not however include any of the robots or AI Linkara has worked on, as Nimue, Pollo, and Holokara remained functional when he lost his ability to use magic.
* Atop the Fourth Wall to realize the alterior motive of Linkara's apology. He swears to get revenge for Linkara's actions, almost certainly resulting in the future Linkara was trying to prevent.
* Atop the Fourth Wall trying to get Harvey to accept his son's death and that Linkara will never replace him.
* Atop the Fourth Wall usually sports a sadistic grin on his face when he's harming Linkara.
* Atop the Fourth Wall was in two parts, with the first ending with "To Be Continued...Right Now!"
* Atop the Fourth Wall: "What these comics are trying to tell us is that love ultimately leads to death, destruction, and the devil. In other words, love no one. Ever."
* Atop the Fourth Wall when Linkara discusses the Legion of Super-Heroes'

convoluted Post-Crisis history. He ultimately convinces himself that these sorts of things are a good idea.
* Atop the Fourth Wall", where the heroic champion of the universe Linkara has a crush on Harley Quinn, a comic book villainess.
* Atop the Fourth Wall. Which means that since Vyce was the only one who could go toe-to-toe with the Entity in a physical battle, when Linkara takes Vyce out, he attracts the Entity's attention...
* Atop the Fourth Wall, who was tortured and killed in order to make the ultimate weapon for a cult. Needless to say, the gun killed the cultists, proving that they had, in fact, made the ultimate weapon.
* Atop the Fourth Wall, who was turned evil, then back to good after vocal backlash. Many of the characters who have a fanbase, thus can be revived or restored at will, but not every B- or C-Lister does, thus it could be years or decades before they come back. Ultimately, he cares for when DC or Marvel kills someone because, otherwise, who will?
* Atop the Fourth Wall will usually make note of something like this happening. If a book is utter crap, but has great artwork, Linkara will not shy from complimenting the art and making sure the viewers know he likes the artist's work. He will then break apart the story and show us its faults, thus proving that good artwork does not a good story make.
* Atop the Fourth Wall with 2090's Kid's totally Kleenex slang! Sewing machine! Linkara never got an answer as to what the slang means, though he did get a lesson in grammar changes over time that was oddly insightful. Oh, and "Robitussin" is the gravest insult ever devised—never say it to someone.
* Atop the Fourth Wall with Lord Vyce, who always speaks in a deep, growling baritone.
* Atop the Fourth Wall, "You are... confusing me. You are attempting a deception!"
* a Tornado games, having the Animal Friend, Coo, and the Parasol copy ability would have you spinning around like crazy too.
* a tornado), the city underwent a forced evacuation in 2006, with most of the remaining residents fleeing after said tornado touched down in 2008. The last surviving resident (and town pharmacist), Gary Linderman, passed away in 2015, and the site has been officially earmarked for future cleanup by the Environmental Protection Association. As it currently stands, though, Picher is uninhabitable and many of its buildings are left in serious disrepair.
* A torpedo boat performing a joust against a gunship — and winning by using a boat-wreck as a ramp and torpedoing it
* Ator the Fighting Eagle: Ator and his sister Sunya are "in love" and want to marry, only later to find out that Ator was adopted, meaning they aren't siblings at all and can now safely marry.
* Ator: The Flying Eagle themselves to be blood-related, yet wanted to boink anyway.
* Ator The Invincible is the leader of a cult worshiping it as their dark god.
* A "tort" is an act causing injury to another, for which the actor must compensate the person injured. A "torte" is a kind of rich, multilayered cake, often flourless. A "tart" is either a kind of filled open pastry, a sour flavor, or a whore.
* A torture chamber can be found in the Scarlet Monastery; their head interrogator really seems to enjoy his job.
* Ato smuggles knives into the Questport Temple, where weapons of any kind are absolutely forbidden.
* A Tostitos corn chip commercial shows two men, clearly politicians, standing at podiums arguing how the other is unqualified. One of them accuses his opponent of flip-flopping (taking one position then later switching and taking the other, like being in favor of individual ownership of guns, or opposing abortion, then changing to the other side), and the guy can hear the song "Tequila" by the Champs, and then decides to tell everyone to start partying, and the chips and dips come out. When the word "tequila" would be sung, the one-word product name is used. The sponsored product, an anthropomorphic bag of tortilla chips who is dancing, announces, "I'm

Tostitos and I approved this message!"
* A total inversion of this trope occurs in this joke from classic Greek philosophy times: "This is the portrait of Menodotis...which resembles about
* A totalitarian authority so harsh that one wishes to die or escape from it.
* A Totally Fun Thing That Bart Will Never Do Again": The family is stranded on Antarctica. We then see Bart as an old man but how/when they were rescued is never explained.
* A total of five space probes have been sent out, or are on their way out, of the solar system (Pioneers 10 and 11, Voyagers 1 and 2, and New Horizons). On them contains information about both the location in space, as well as
* A total of four of these exist in WoW — A red one, which is a rare world drop, a bright orange/pink one which is also a rare world drop, and two blue ones — one is a quest reward, the other has a chance to drop off a boss inside an instance. The blue ones can be enchanted with a fire enchant, which makes them glow purple.
* A Total War Saga: TROY breathes this trope as part of its "truth behind the myth" approach to the Trojan War. All throughout the game are references to Greek Mythology conveyed through more realistic and plausible explanations that could have inspired them.
* A Total War Saga: TROY: Cerberus, the massive, demonic, multi-headed, snake-tailed and -maned hound who guards the entrance to the Underworld, is recruitable as a unique and very powerful unit accessible through a quest line that culminates in a battle against the hound and an army of shades at the gates of the Underworld.
* A Total War Saga: TROY: Giants are immense, but humanly so, soldiers who can be recruited on certain islands. Their size and heavy armor allows them to serve as living siege engines, as these are otherwise missing in the firmly Bronze Age setting.
* A Total War Saga: TROY, the Corybantes were human worshippers of Cybele. In the game, they're giant lion people.
* A Total War Saga: TROY: The Hydra's vitality levels are initially quite low, and so the player needs to restore the creature's strength to access its full potential. This can be done by feeding defeated enemies to the monster... or by sacrificing your own troops.
* A Total War Saga: TROY, the wife of King Menelaus of Sparta, Helen, leaves him to join Paris of Troy, beginning the game's conflict. Meneleus wears a horned helmet into battle and has a horned bull as the icon of Sparta.
* At other points, Gul'dan and Cho'Gall. Until Cho'Gall becomes more interested in the end of the world than in the Legion and wanders off.
* At other times, people have fooled Daleks by dressing up as Robomen or Dalek troopers. In the former case, the deception was falling apart, but was saved when the Dalek were distracted by an attack by people without disguises. In the latter, the deception worked until they were seen in the self destruct chamber.
* A Touch of Cloth), but the gun isn't loaded. Convinced Jack isn't a cop, Macratty kills Twitch himself for good measure.
* A Touch of Cloth when Jack Cloth suddenly and inexplicably hooks up with the only available main character — his nemesis, who killed his wife and who he was inches away from killing for most of the series, and who is also another man, with no indication given to Jack's (or his) orientation prior.
* A Touch of Cloth, where it isn't the horrifically mutilated corpse that makes the detectives gag - it's pictures of Piers Morgan.
* A Touch of Cloth while listening to it. One of the assisant detectives then hands Jack some photo evidence, and Jack then enters the interrogation room:
* A Touch of Darkness from the future appears, warns her past self not to speak with Hiram Lodge, and is then dragged back through time by a clawed hand and killed. Homura isn't phased, since it happens to her a lot.
* A Touch of Evil: If you select a Town Elder with the Coward Secret to join your Hunting Party, there's a very real risk of that Elder abandoning you in the middle of the fight.
* A Touch of Evil set in a secluded village of Shadowbrook in the early 19th

century, where player-controlled heroes battle classic Gothic villains like vampires, ghosts, and reanimated monsters.
* A Touch of Evil: The Rat's Nest minion can be a really nasty challenge, as a conga line of rats grows every round. However, the reward for beating it is worthwhile.
* A Touch of Evil: The Succubus minion gets an extra Fight Die against male Heroes.
* A Touch of Evil: Virtually all Ghost minions require you to use Spirit instead of Combat in a fight.
* A Touch of Evil: When a Hero with a Possessed card Knocks Out another Hero, that player gives their Possessed card to the other player.
* A Touch of Evil: You get one of these when using the Necromancer in the Advanced Game. The game starts with three Walking Dead minions on the board, and a new one crops up at the beginning of each Mystery Phase.
* A Touch of Frost by everyone including: Inspector Frost, her best mate, her boyfriend, her Dean, her stalker's best mates.
* A Touch of Frost, Frost asks Toolan if he managed to get the evidence from the camera for a murder that had happened in an alley, only to be told that it was facing the wrong way.
* A Touch of Frost has a fairly prominent bullet scar on the left side of the head from the depressed and drunken act of stupidity that earned him the George Cross.
* A Touch of Frost has a rotating cast of sidekicks. The most prominent ones are DS Hazel Wallace and DS Clive Barnard.
* A Touch of Frost has David Jason's Inspector Frost (Britain's answer to Columbo) seeking to investigate a suspected murder on an Army base. Frost is hindered and frustrated by the Royal Military Police (who at the time of screening were following the old principle of demarcation between British civilian and military authorities: if a serious crime happened on a military base, it was for the RMP to investigate and no business of the civilian cops, whose remit ends at the barracks gates). Frost sees how amateurish and incompetent the Army cops are at investigating murder, and gets involved anyway: as he uncovers skullduggery, financial corruption, bullying, illegal sale of military equipment, etc, the Army cops eventually realise they're all on the same team. Eventually.
* A Touch of Frost have been set both before and after the 1994 changes (which introduced the "But it may harm your defence" line). Those set shortly after the change had a running joke in which Detective Inspector Frost would keep forgetting the new wording, usually having to read it out from a piece of paper in his pocket.
* A Touch of Frost, Inspector Frost is being disrespectful to his superior as usual.
* A Touch of Frost. Jack Frost, a Detective Inspector in a provincial force, regularly threatens anyone who doesn't talk to him with visits from bodies varying in importance from the local Trading Standards Authority to Interpol. Particularly unconvincing as he treats everybody not on his team so badly that he's unlikely to get co-operation from the guy in the next office along let alone people in another country.
* A Touch of Frost. This turns out to be a mistake as he finds himself under pressure to throw more games.
* A Touch of Hope based on the real-life Dean Kraft who is known for his ability to heal those who are beyond medical help with exactly this trope.
* A tough-looking brawler enters the bar, and orders a tankard of beer. He throws the beer away, and begins to chew the tankard itself. All other guests leave the scene in disgust, except one puny, small man. After the brawler has eaten the tankard, he throws the handle away. The puny man stares at him. The brawler says: "What are you looking at?" The puny man says: "Why did you throw the handle away? It is the tastiest part of the tankard!"
* "A Tough Winter" (1930) — Features comedian Stepin Fetchit, well known for playing an exaggerated African-American stereotype.
* a tour helicopter crash into the Cartago Aviary but the helicopter breaks the cable of the Gondola Lift in its fall, making several cabins full of trapped visitors crash.

* A tourist goes to a restaurant in Spain. While looking at the menu, he sees a that-day-only special showing a dish of rice with a monstrous sausage and two huge meatballs on top. He asks the waiter for the special, but once it arrives, the tourist is furious to see the sausage is barely two inches long and the meatballs the size of eggs. He finishes it, but then calls the waiter and demands a serving more in line with the advertising, but the waiter says:
* A Tourist's Guide to Lancre at the Goat & Bush to take the middle path.
* A Tourist's Guide to Lancre, which notes that "It's not a proper Witch Trial without a big bonfire afterwards"... meaning of course, that once witches have demonstrated their skill in an organised competition, it's nice to have a bit of a carnival atmosphere and baked potatoes.
* a tournament with ChickFight, although ChickFight did "return" to work with APW.
* At over 1.6 million words as of June 2014, it's recommended to take your time reading
* A Town Called Dragon: Mickey earlier tried to warn everyone about what he discovered to be a terrorist cell up in Devil's Peak, but turns out to be a team of German scientists looking for the dragon egg. When he tried to warn the police about the dragon, he gets disbelieving looks until one of the officers found a huge pile of dragon dung with a severed human hand in it and then seeing the dragon's molted husk.
* A Town Called Dragon: The viking ordered to take the dragon egg to present day Colorado kept a journal and ensured it as a warning to others, and doubles as an instruction manual on how to kill dragons.
* "A Town Called Mercy" begins and ends with a woman narrating how her great-grandmother, the little girl seen at several points in the episode, witnessed the events.
* "A Town Called Mercy": Kahler-Jex is revealed to have created several on his home planet in order to end a war. One of them, the Gunslinger, is still around, and quite impressive.
* "A Town Called Mercy". The Doctor and the Ponds are arguing about what to do with an alien war criminal who's been hiding out in the title town... right in front of said war criminal. He coldly reminds them that he's "still in the room."
* "A Town Called Mercy": The Gunslinger has a large energy weapon in the place of his right hand.
* "A Town Called Mercy": When the Doctor finds out what Kahler-Jex has done and Kahler-Jex then tries to defend his actions (and the situation reminds him a little too much of his own with the Time War) the Doctor gets so angry he drags him out of town for the Gunslinger to kill him and when Jex tries to get back in to safety he pulls a revolver on him.
* A Town Called Panic, the main characters ride a falling rock for so long that they eventually lapse into a card game on top of it.
* A Town Hates a Boy, covered in Episode 28, the Lisa in the story invents a perfume that makes people want to kill the wearer. At the end of the episode, a scientist sniffs (actually due to an impending sneeze) and Lisa runs away screaming, thinking he's sniffing at the perfume.
* A town in Washington State called Bainbridge Island passed a law making it effectively impossible to open a drive-thru fast food restaurant within the city limits, which covers the whole island, in order to protect local businesses and maintain an artsy, backwater feel (the island is a minor tourist spot due to being on the other side of a scenic ferry from Seattle). A lone
* A town, later on, sees one of these rampaging through the streets. Up until they meet the heroes coming the other way, who mow a path.
* A Toyota commercial has a hybrid car speeding along with three black horses, three white horses, three hang-gliders, and three fighter jets to show that
* A toy sold by vendors during the Midsummer Fire Festival is a set of matches that you can use to do this to yourself.
* A to Z Mysteries book "The Absent Author" revolves around the kidnapping of the eponymous mystery author. Turns out the whole thing was a hoax in order for the author to investigate how real kids solve mysteries.

* A to Z Mysteries, following the adventures of Bradley and Brian Pinto (Josh's younger brothers), Nate Hathaway (Bradley's friend), and Lucy Armstrong (Dink's cousin).
* A to Z Mysteries gives us the two stamp thieves Otto Bird and Doris Duncan.
* A to Z Mysteries has the three main kids visit Dink's Uncle in New York City.
* A to Z Mysteries is this. His friends are quick to point out the owner of the hotel's lack of humor.
* A to Z Mysteries, the three main kids confront their prime suspect over a stolen lottery ticket.
* A to Z Mysteries. This story revolves around a series of pet kidnappings ultimately solved by the police. Even when the three main kids discover a pattern in the kidnappings, Officer Fallon says they already made the connection. The kids hide outside the thief's next victim, but the police show up before they can even catch the petnapper.
* A to Z Mysteries Thumbs is implied to have lost his thumb in a bear attack that he walked away from otherwise unscratched, but no details are given.
* A to Z Mysteries to try and scare the kids into thinking that there is a vampire loose in town.
* At Paragon tier, Minerelle bursts through a window, advises everyone to take a nap soon, blasts an illithid with massive psionic damage, is almost instantly killed by the backlash, is healed from the brink of perma-death by Kodrinscheiner, and immediately flees screaming into another dimension. All in one turn. Leaving everyone else in the room completely bewildered.
* At Paul Allen's Science Fiction Museum there's a display with Robbie and The Robot next to each other. They converse with each other
* At present, Japanese law allows adopted siblings to marry, which has
* At present, the Asari are considered this, as they were the first race to the Citadel and have maintained a considerable gap from other races in terms of technology. As revealed in the third game,
* At present, this is illegal in many countries (though what may be done clandestinely is anyone's guess).
* At Proxim bridge in central Hyrule east of the Great Plateau there is an NPC named Brigo. He is guarding the bridge and, after first talking with him, should Link move to jump off the side of the bridge, Brigo will think he is about to commit suicide. Brigo then talks Link out of it.
* a track based around this, where David Attenborough's narration from a real nature program is edited so it sounds like he's describing social interactions at a night club instead:
* A traditional human version of the trope occurs in Universe B-2: Roxy has a crush on Dirk, who is gay.
* A traditional Irish blessing: "May you live as long as you want and never want as long as you live."
* A tradition on the Tony Hawk skating games has been to include a short video of bails: namely, when the professionals (and sometimes the Neversoft programmers) attempt skating tricks and ...well...fail.
* Atraeus mission, the first manned flight to Titan. One episode involves a scientist trying to build a Subspace Ansible for real-time communications and telemetry with the ship. Given that this is Eureka, this ends up causing a big problem (although, not by itself).
* A traffic accident between two screaming, foul-mouthed, ethnic cliché taxi drivers.
* A traffic light color scheme is used for the security turrets, bots, and cameras: red ones are hostile and green ones have been hacked to be on your side. The lights on the Big Daddies' suits' portholes are similar: yellow light means it's neutral, green means it's hypnotized, and red means it's hostile.
* Atra first confesses to Mika, then gets Kudelia to join their relationship.
* A Tragedy of Impulsiveness, if the protagonists had thought things through before they acted, the tragedy could have been avoided.
* A tragic case was the murders of Marlen Ochoa-Lopez and her son Yovanny at the

hands of Clarisa Figueroa, who was motivated by the recent death of her own child. Marlen was lured under the pretense of free baby clothes and was killed and thrown in a dumpster. Yovanny did not survive being ripped from his mother.
* A tragic example, but in countries with a severe crisis in resources, paper money is hard to find. By 2018, the paper crisis was so severe in
* A tragic example in a "Batman Adventures" comic: the Riddler pulled off a robbery so flawless he could have easily gotten away and Batman couldn't have stopped him. Still, he was
* A tragic example in the Oak Ridge Boys classic, "I'll Be True To You." She has loved and waited for him for years while he has played around and ignored her. By the time he realizes she truly is the love of his life, it's too late. In her loneliness, she drank herself to death. Now she
* A tragic example was actress Carole Landis. A beautiful blonde who became famous for
* A tragic example, when Cloud and Sephiroth's rematch goes horribly wrong Sephiroth defends himself by attacking. While Cloud manages to hold back in time, Angeal who was intervening ends up taking the blow and gets horribly wounded.
* a tragic incident from her youth needs it to avoid being seen as weak.
* A tragic take on his is the relationship between Shishio Makoto and Komagata Yumi. She was his retainer and caretaker, always frustrated because she wasn't an
* Atragon on its bow and can function in the air, under the sea and dig through the ground.
* a trailer animated episode "Zombie Island... in Space", the Queen of "London, England" is flanked by a couple of guards, who don't move a muscle when she's captured by a giant zombie robot.
* A trailer for a BBC sketch show showed a man falling off a roof, with a lorry below marked "Soft and Fluffy". Then it pulled away, and another one marked "Sharp Porcelain Objects Inc." took its place.
* A trailer for a sequel was released a few years later. It goes from the same kind of dramatic action movie as the first one, to a buddy cop movie, to a romantic movie, to a Christmas movie, to a terminal disease movie, to a zombie flick.
* A trailer for begins with an at first prosaic, then progressively frightening, commercial for a beauty product. This is also a bit of world-building, as the product's manufacturer was the amoral pharmaceutical conglomerate from the games, Umbrella Corporation.
* A trailer for. Bugs Bunny's silhouette then appears in the other zero to laugh at Sam's expense and call him a maroon. The 007 then turns upside down and pulls back, revealing the film's correct title.
* A Trailer for Every Academy Award Winning Movie Ever features a shot of the lead couple by a fireplace.
* A Trailer for Every Academy Award Winning Movie Ever has most of the tropes in popular Oscar winners.
* A Trailer for Every Academy Award Winning Movie Ever includes a token Manic Pixie Dream Girl in the form of Lead Female. She helps Wealthy, Successful Protagonist to open up and enjoy his life to the fullest, though she does share that role with Inspirationally Disadvantaged Guy.
* A Trailer for Every Academy Award Winning Movie Ever. It's parodied, like all other tropes in it.
* A Trailer for Every Academy Award Winning Movie Ever movies where every single line is this.
* A Trailer for Every Academy Award Winning Movie Ever. The Insightful Best Friend is sipping wine in the bathtub and says "This scene doesn't make it to the final cut of the movie."
* A Trailer for Every Academy Award Winning Movie Ever with all characters laughing and the protagonist noting "It's not going to be entirely a dramatic film. Because we laughed there."
* A Trailer For Every Christian Movie Ever". The cast is the producer/writer/director, his high school sweetheart, and his best friend.
* A trailer for the first half of Season 3 finishes with Baltar begging

desperately for Gaeta to shoot him. In "Exodus Part 2," he is way calmer about the request.
* A trailer for the second half of Season 3 had Dee saying, "I'm going to bring Starbuck back to Apollo" in a cheery way. In the actual episode, "Rapture", she said it with resignation.
* A trailer park has a sign counting the number of days without a tornado. And it's reset between scenes.
* A trailer, the scene of him inadvertently showing off his cooking skills in this manner during a school trip (much to the admiration of several female students and much to Maruki's own confusion) was largely seen as funny by players as opposed to the unnecessary shoehorning in of a meme.
* a train appears. He has no option but to run straight down the rails and through the tunnel. While carrying a princess on his back.
* A trainer from Hoenn appears in the Silver Conference at the end of the Johto era, and this leads to the original series ending with Ash travelling to Hoenn. The last episode ends with Pikachu sick.
* a train rescue operation goes awry thanks to his "intervention", he decides he can't do anything right and is poised to drink himself into oblivion, before his friends intervene and convince him that he doesn't have to go through his problems alone, starting him on the path to sobriety.
* A train robber got to yell "Damn it! What are those guys doing?" in episode 22.
* A-Train starts out as a jerk and gets worse from there. He is right, though: his killing of Robin wasn't intended, while the same can't be said of Hughie's acts with the Boys.
* A trait displayed by those who joined Drew Gulak's Campaign For A Better
* At random times during the day, the Bott Radio Network in Kansas City will have the announcer say "SIN", and then cut to a different commercial. No one seems to know what commercial that's supposed to be.
* a tranquilizer rifle; Only instead of tranquilizer, the darts are filled with Jarate. Each shot result in a yellow blast like standard jarate with the same effect.
* A Transformer can survive an insane amount of punishment, and many characters come back after being declared dead, or taking an amount of damage that really,
* A transformer claims to be an atheist intelligent designer (Shockwave) in the Marvel comics makes this even funnier.
* A translator at the UN wondered out loud why the General Assembly passes so many resolutions on Israel and the Palestinians every year while ignoring many other conflicts around the world,
* A Trap for a Necromancer when the situation asks for it. As long as she knows Roim to be safe, she's ready to go out and hunt for thieves and renegade necromancers.
* A trap for the Pteranodon is prepared and staged at the Sydney Harbour Bridge.
* A Traveler at the Gates of Wisdom as red dye ingredients; He later acknowledged his mistake but found it amusing nonetheless and said that it will be kept in future editions.
* A Travelers Insurance commercial shows a dog reading a newspaper headline "CAT BURGLAR STRIKES AGAIN", and imagining a cat in a domino mask sneaking into his doghouse.
* A traveller enters a local watering hole in the Irish countryside/South African veldt/New Zealand tablelands, and says to the bartender, "Nice part of the world this is." "Couldn't agree more," the publican responds. The blow-in asks, "So how do you pass the time here?"
* A traveller wandering on an island inhabited entirely by cannibals comes upon a butcher shop. This shop specialised in human brains differentiated according to source. The sign in the shop read: "Artists' Brains $9/lb Philosophers' Brains $12/lb Scientists' Brains $15/lb Economists' Brains $19/lb." Upon reading the sign, the traveller noted, "My, those economists' brains must be popular!" To which the butcher replied, "Are you kidding! Do you have any idea how many economists you have to kill to get a pound of brains?!"

* A Treasure In My Garden: In the episode "Boxes", when the box the boy is riding in gets sucked up by a tornado, he starts spinning around it. He's seen as a man, then an old man.
* A Tree Grows in Brooklyn, as you might expect, has a motif of a species of tree that reflects on the toughness of the people in Brooklyn by being the only kind that can grow in their neighborhoods.
* A Tree Grows in Brooklyn Ben and Francie meet when he is eighteen and she is fifteen. By the end of the book she is almost seventeen.
* A Tree Grows in Brooklyn, but Katie tells what she knows as best she can, using blunt words where she didn't know other ones.
* A Tree Grows in Brooklyn, Francie Nolan claims her name is Mary Frances in order to win a doll at a charity Christmas party. She feels guilty about lying, but reasons that she can take the name Mary when she makes her Confirmation. When she announces this intention, her mother tells her she can't because her real name is Mary Frances Nolan.
* A Tree Grows in Brooklyn, Francie's mother won't let her get a fashionable bob because a woman should have long hair as her "secret" beauty that only her lover/husband (well, presumably Katie means husband) gets to see when she unpins it at the end of the day.
* A Tree Grows in Brooklyn, Francie wets her pants at school when her teacher won't allow her to leave the room to use the facilities.
* A Tree Grows in Brooklyn had a Halloween nightmare ballet for Johnny. It was unnecessarily melodramatic, but unlike many contemporary examples it was recorded for the original cast album.
* A Tree Grows in Brooklyn is pretty heavy on the "women treat each other worse than men treat women" idea, with the obvious example being the neighborhood women who harass and eventually stone a girl who has a baby out of wedlock. The narration explains how miserable these women's marriages are.
* A Tree Grows in Brooklyn, Johnny and Katie Nolan share the janitor work at a neighborhood school, until the night Katie gives birth to their daughter. Johnny, having been kicked out of his own house by her sisters, gets drunk (as per tradition) and totally forgets about going to work. Turns out a pipe burst and flooded the school, and he's gotten them fired. To hide it from Katie, he goes back to singing and waiting tables, which is what he did when they met, and never holds a steady job again. Presumably his cover couldn't have lasted that long (it was her job too, after all), but we're not told when he came clean or how she took it.
* A Tree Grows in Brooklyn knows when she gives birth to her son Neeley that she'll love him more than her daughter Francie, but promises she won't show it (she fails). She rationalizes much of her favoritism by saying that Neeley needs more encouragement, while Francie is strong like her and will get what she wants somehow. For example, when she can only afford to send one of the kids to high school, she says it should be Neeley because he won't go unless she makes him, but Francie will get an education because she wants it.
* A Tree Grows in Brooklyn, the crooked meat dealer is outwitted by a clever ploy Francie's mom told her to use, and responds "Sweet Jumping Christopher!"
* A Tree Grows in Brooklyn, the favorite terms are "to get (or get a girl) in trouble" and "shame". An Italian "gets in trouble", and her father locks her up so the neighbors won't "see her shame increase". He also sees that she only gets starvation rations of bread and water in hopes that she and the baby will die in childbirth. Childless Aunt Sissy feeds the girl and eventually takes the baby without the father knowing. She also fakes a pregnancy since her husband refuses to adopt.
* A Tree Grows in Brooklyn, the other little girls in Francie's neighborhood play a game where they have to whisper the name of the boy they want to marry, and the only person she can think of to say if she's ever asked is her father.
* A Tree Grows in Brooklyn wants a child more than anything, but all her pregnancies result in stillbirth. She finally fakes a pregnancy and adopts the child of an unwed Italian girl, and about a year later becomes pregnant for real and has a healthy baby boy.

* A Trekkie's Tale, and has become part of everyday's lexicon, although the term has been disputed on its meaning.
* A trend in 21st century rnb/rap songs is that a rapper will be rapping about a woman he saw in a club who he thinks is perfect and who he'll always treat right. This is popular enough to be the subject of most mainstream rnb these days.
* A trend in the NHL (and throughout North American hockey) is to include a cream (off-white) color usually called either "vintage white" or "antique white" to approximate the natural discoloring of an eighty-year-old wool sweater. The first instance in the NHL was with the Minnesota Wild's introduction of their third jersey, and the All-Star Game jerseys from that year (which they hosted), all in a fauxback style, though the off-white was part of Minnesota's official color scheme (called "Minnesota wheat" by the team). The NHL has since only used "antique white" on designs not of genuine NHL vintage, instead using them for mash-ups, original designs, and uniforms throwing back to, or inspired by, non-NHL teams (such as the Calgary Flames' Heritage Classic homage to the Calgary Tigers, or the Vancouver Canucks' Millionaires uniforms).
* A trend is for cable companies to trash phone companies which want to provide TV services. Suddenlink Communications ran one in which "customers" knock the phone company for wishing to provide TV service while pointing out how allegedly poor they are at providing Internet service. Without any irony whatsoever, the commercial then points out that Suddenlink is providing phone service just moments after asking viewers why one would ever want TV from a phone company. A lot of these used to focus on that the phone company wasn't actually the one providing the service. Instead, the phone company is usually partnering with a satellite provider to give the TV service. We also used to see the back-and-forth about "dedicated connections" vs. "availability" and "speed." Satellite/phone/DSL bundles would claim that they provided "dedicated connections" to customers, while the cable companies' customers had "shared connections." Of course, they didn't mention that these "dedicated connections" are not to each home, but (at best) to each street. The cable companies have responded with the fact that DSL's highest speeds aren't even available to most phone customers. They happen to be right about that, but they've made some fairly over-the-top commercials regarding download speeds. Cox Communications advertises their "PowerBoost" technology vs. the ability to take "power naps" during DSL downloads.
* a trend started by "The World's Ugliest Man" The French Angel, who had migrated to Boston Massachusetts when France fell to the Nazis. His distinct appearance was the result of acromegaly.
* A trend to make the grounded characters more accurate to their actual versions, started by Alan the Video Maker, uses this in spades; While roses are now used to recreate the ruffles on Doris' shirt, chef hats are used to recreate long sleeves, and headbands (and MS Paint sketching) are now used to make the hair of Mami (and Dora). However, problems ensue as these props do not have a structure, causing them to go out of place when the character is moving.
* Atreus has a large number of unique lines depending on what a player does, even some off-the-wall behavior. For instance, if the player has Kratos attack while there are no enemies present (for example, if you're trying out new moves), Atreus may ask "Are you... exercising?"
* Atreus inherited his father's temper. While it's counterbalanced by
* a T-Rex and a Robot. After they both let out their brutal attacks, neither side seems to be winning. Oh yeah, did you forget that KIZARU is still here? Urouge lets out an 'Oh Crap' face before getting sent flying into three buildings.
* A T-Rex being in the game, that was already well-advertising long before the game was out. It's pretty powerful... and sleeping in the Cascade Kingdom. You are
* Atreyu spends what he feels is just less than a day at the Southern Oracle but actually a week has passed for everyone outside the Oracle, though it is slightly averted as time did pass for Atreyu as he notices his wounds are significantly healed.
* A Triangle in the Stars, and hates what her species does and has made her do.
* A Triangle in the Stars. Because of this, the Cluster doesn't exist, and a few

Gems are different. Not to say that there aren't minor references to the episodes afterwards, however.
* A Triangle in the Stars, however, in that she goes along with her new crewmates because she's curious about them and Earth, and is rather happy helping them.
* A Triangle in the Stars in Chapter Forty-Seven. Wendy tells a scary story, and Bill tries to help it by supplementing it with an image of the monster. He laughs. The others don't, and Connie calls him out, which confuses him for a bit.
* A Triangle in the Stars: This is one of the main reasons Bill often underestimates Steven and what the boy can handle. It shows signs of fading around Chapter Forty-Four, but he's still worried.
* Atriarch seems to receive no updates except to add yet another year to the copyright span (but even that seems to have stopped as of 2012). The character races aren't completely fleshed out, either; the full profile for the Unarra has been "coming soon" since 2003.
* A Tribe Called Quest, which, depending on who you ask, is a second Even Better Sequel (and a lot of people who don't think it's better still think it's a damn good album).
* A Tribute to The Likely Lads episode "The Longest Day", had Rodney Bewes (the original Bob) as the newsvendor.
* A Trick Of The Light, it's mentioned that Clara Morrow frequently makes snorting and grunting noises in her sleep and occasionally mumbles weird things like, "But Kevin Spacey's stuck on the Moon."
* A Trick of the Tail involved a satyr-like "Beast" venturing from his paradise out of boredom and coming across the human race. Not only did he consider the beings strange, he was subject to their mistreatment as he was caged as an exhibit.
* A trilogy of TV ads for an Argentinean advertisement agency (links
* A trio of American hikers that were detained in Iran because the government thought that they were spies. The penalty for spying is death and the one woman they released was tried in absentia when she doesn't return, and naturally Iran was under a lot of international pressure to not do anything stupid (like killing three more than likely innocent people because of mindless paranoia). They were sentenced to something like three years in prison. Not enough to provoke the US into invading, but enough to
* A trio of annis hags blowing their saves and concentration checks when
* A trio of mischievous Dusks constantly doodle on Roxas while he was in a coma in
* A trio of policemen who look a lot like The Greasers appear in one episode of
* , a trio of random thugs attempt to mug Toshinori Yagi. Luckily for them, he's out of time for the day and can't transform into All-Might. Unluckily for them, Izuku is nearby and smashes them himself.
* A trio of "traceurs" serve as couriers for mobster Billy Russoti in
* A Triple Fighting Chance!. Likely for being the final battle in the match, it received a boost in fluidity as soon as the Gym's roof got destroyed and the rain kicked in. The music used during the scene made it look even more impressive.
* A triple-release on the same day, for the same movie. On October 21st, 2015 we got
* A Triple Subversion occurs in the episode "Bart Gets An Elephant." Two men are carrying a
* A Trip To Japan, it's revealed that 426 is just as inept at Japanese as he is at Tantalog.
* A Trip to the Moon follows a group of astronomers who travel to the Moon in a cannon-propelled capsule, explore the Moon's surface, escape from an underground group of Selenites (lunar inhabitants), and return to Earth with a captive Selenite.
* A Trip to the Moon, where the space capsule crashes into the eye of the Man in the Moon.
* "A Trip to the Planet" movie: planned but never released, dubbing intentions unknown
* Atris herself will call Handmaiden out on jumping ship from Atris's mentorship to the Exile's, and in cut content where Handmaiden has to fight her fellow

sisters, she remembers the lessons she learned from sparring with the Exile in order to win.
* Atris is in a similar position to Nihilus. In promotional art she even appeared literally opposite of him, both as the counterpart face of the Lightside of the Force on the official site and elsewhere, and shown doing battle with him in a couple of art pieces. On the cover, she is also shown battling a random Sith assassin. However, not only does she also have only two or three major appearances, but in none of those appearances does she battle Nihilus or any Sith whatsoever. In fact, ironically enough,
* Atris then later broke their oath by asking the Exile to teach her the ways of the Jedi.
* A triumphant segment of "Run Free" starts blaring when Spirit first thinks he's being released from the Lakota village... until the mare he's tied to stops abruptly at the edge of the village, stopping Spirit and the BGM as well.
* A "Triumph the Insult Comic Dog" bit has Triumph turning this on its ear. He goes and makes fun of hundreds of
* A Triumph, the main character's son wets the bed and his parents wake him up to take him to the bathroom.
* A Trivial Pursuit": When Twilight explains to Spike that Pinkie Pie's involvement in the Trivia Trot game is throwing off all of her calculation, she grabs the dragon in her hooves and shakes him vigorously.
* At Robo Games 2015, a real-life prototype of the neurocranial transmitter headband from
* Atrocitology: Humanity's 100 Deadliest Achievements even happened, and in other cases everyone agrees that a lot of people died, but there is legitimate disagreement about how many, and from which cause.
* Atrocity Exhibition (1980) about people who pay to see a barely living man in an asylum. "For entertainment they watch his body twist."
* A Trojan Condoms commercial claims that the United States ranks between two African nations in HIV cases. This means nothing since the population of the USA is much higher than either of those countries!
* A Troll also has a legitimate job as a toll taker of a bridge into Lancre. It's mentioned that people crossing the bridge pay a certain amount to cross, and 10,000 gold pieces to bring a billy goat across. A footnote mentions, "Trolls may have been slow,
* A Troll in Central Park before calming down long enough to just say the title.
* A Troll in Central Park. Especially in hindsight, given the shot of the Twin Towers covered in flowery vines.
* A Troll in Central Park find the antagonists, Queen Gnorga and Llort, far more likable than the largely cloying protagonists Stanley, Gus and Rosie, thanks in part to how hammy and over the top their acting is.
* A Troll in Central Park getting Stanley's Green Thumb powers for no given reason that restore him.
* A Troll in Central Park green thumb, which can grow plants and bring them to life, and even create enormously tall plants as well.
* A Troll in Central Park has Stanley, the titular troll, getting a kiss from a toddler girl named Rosie. He literally flies into the air screaming with joy and some green energy coming from his lower regions. Yeah...
* A Troll in Central Park, he claims that one of the reasons he makes the videos is to try and convince studios that they shouldn't just resort to padding and pandering when making kids movies when great and memorable films could be made instead.
* A Troll in Central Park is banished to "a place of rock and steel, where nothing grows." Guess.
* A Troll in Central Park is her society's norm, said moles look hideous.
* A Troll in Central Park, she passes a series of mirrors, each one cracking to a more severe degree than the last, until she torches the last one before it can crack.
* a troll's head explodes after Harry casts Reducto into its open mouth.

* A trope cannot be Exploited if there is no way for any character, good or evil, to benefit from it.
* A trope-worthy twist on the source novel turns up at the very end of the 2013 stage adaptation of
* A Tropical Fish Yearns For Snow, and for much of the series it's left ambiguous as to whether they're merely friends or have feelings for one another.
* A Tropical Fish Yearns For Snow, Konatsu Amano, one of the two main characters, has to transfer from her high school in Tokyo to a school in Ehime, resulting in her feeling out of her element. While there, she befriends Koyuki Honami, who also doesn't have many friends due to being seen as perfect and unapproachable.
* A Tropical Fish Yearns For Snow, this is the basis of the friendship between the two leads. Konatsu Amano is a transfer student from Tokyo who feels out of place in the small town, while Koyuki Honami is a model student whose perfect reputation makes her seem unapproachable.
* A Tropical Fish Yearns For Snow.) What follows is a very slow evolution of their feelings towards each other while living in this quiet seaside town.
* Atropus, is heralded by a global increase in strength for necromancy, making it easier to raise the dead, but also harder to control them. Eventually, everyone who dies will be revived regardless of how they died.
* Atropus, the undead afterbirth of a long forgotten god, takes the form of a sapient,
* At Rorke's Drift, entrenched rifles slaughter Zulu warriors armed with "spears and shields of oxenhide".
* At roughly the same time, Captain Tagon was killed, partially due to faulty intelligence
* A Truce While We Gawk: Something so astonishing happens, it interrupts a fight as the fighters turn to gawk at it.
* a truck comes back out of the painting to run Wile E. over. Then he gets better and tries it himself.
* A trucker is hauling a load of computers through Silicon Valley and gets lost. He walks into a bar and asks the bartender where he is. The bartender starts to answer but at that moment a guy with taped glasses and a pocket protector comes through the door. The bartender grabs a shotgun from under the bar and blasts the guy right in the chest, dead. The trucker is shocked by this, but the bartender explains "It's okay - we have too many nerds here in Silicon Valley. They declared open season, there's no limit!" The bartender gives the trucker a map to get him where he needs to go and the trucker drives off. A few blocks later the trucker takes a turn too sharply and all the computers fall off the back. He gets out to survey the damage and sees hundreds of nerds coming out of the woods and helping themselves to the computers! The trucker remembers what the bartender said, so he grabs a gun from the truck and starts picking the nerds off. Suddenly he's slammed to the ground by a cop. "I'm sorry!" the trucker says, "I was told it was open season!" "Yes," says the cop, "but you can't
* . A truckload of captured zebras are machinegunned in the middle of the road.
* a truck that jumped the light," but instead says "Il a été débordé par un diable qui a sauté le mou." ("He was overflowed by a devil that leapt the soft") Correct is "Il fut/a été écrasé par un camion qui brula/a brulé le feu rouge." It goes on to talk about how different English translations of the French "sauter" could have one talking about a cork fusing instead of popping out, etc.
* a true example of the trope that bears his name, and, like the Riddler, is one of the few villains to escape Batman in their first encounter.
* A true handyman only needs two tools: Duct tape for things that move when they shouldn't and WD-40 for things that don't move when they should.
* A True Hero: A person or group proves themselves more worthy of the title of "hero" than others.
* A True Hero: One person or group proves themselves more worthy of the title "hero" than others.
* A true story involved a patrol officer who carelessly opened a box with a bomb

in it getting one of his hands (and one hand of his partner) blown off. The second officer (eventually nicknamed "Captain Hook") came back to the force despite having a hook for his primary hand.
* A truly bizarre example with the town of Santa Mira, California, which due to serial
* A truly bizarre take on this is Mhasha Zakk the Dustman taxidermist mentioned
* A truly dark example in season 19's "Send In the Clowns." A teen goes missing in New York and a butcher is accused of the crime. It turns out she's been having an affair with her music teacher who hailed her genius at the piano. The cops bring them both in as the girl's mother slaps the teacher and starts ranting about his seduction methods with obvious first-hand knowledge. She confesses to her husband she had a one-night stand with the guy...17 years ago. "Do the math." The man himself is utterly horrified, nearly throttled by the husband and it's reported he's on suicide watch. His daughter's reaction? She's
* A truly disturbing example in the form of Marla Singer, who could perhaps best be described as what happens when the Manic Pixie Dream Girl grows up. Marla is dirty, living in poverty, and clearly suffering some form of mental illness, and gets into a fairly unhealthy relationship with Tyler. The narrator is dissatisfied with social norms and consumerist trends, but lacks the will to break out of the mold on his own, leading to his association with Tyler. Marla actually infuriates the narrator because she simply doesn't care about anything. She even calls him out on all his selfish justifications for his behavior being no worse or different than her own.
* A truly epic arc concerning vampires, which began with the introduction of an Alternate Universe Future Badass version of Flandre Scarlet and came to its conclusion with the defeat of none other than The Lord of Evil, Dracula himself. The more over-arcing Are machines sentient? arc, began with the freeing of Dee and her sister Bit.
* A truly insane example of Breakcore genre-blending is Igorrr's music, which mashes up (to name a but few genre) Breakcore, Baroque, Death/Doom/Black Metal, Polka, Gregorian Chant, Cabaret Music, Swing, Noise, and things less classifiable. And
* A truly psychotic version of Sergeant Grimshaw (see film examples above), seemingly based on Gunnery Sergeant Hartman, appears in
* A truly spectacular example (and equally marvelous send-up) is the kung fu dinner theatre sequence from
* A truly stunning number of the contestants seem to think they're hot stuff and will tell Gordon Ramsay (who is effectively one of the top chefs in England if not the entire world) that he's wrong and they know better than him. This was later exemplified in Ben from Season 7. While having the stereotypical "I'm hot shit" view can be expected in this sort of reality show, he would constantly respond to any challenge he lost by claiming in his private camera sessions that he should have won, and often responding to the real winner that he felt they didn't have any real desire to win. This included contestants who Ramsay would personally compliment. And when he was brought back to help the final two in the finale, he spent the entire time reminding the camera that he was actually better than
* a truly terrible person, and Bob doesn't want the evidence revealed since it would result in someone going to prison for something he doesn't think of as a crime.
* A truly uncomfortable elevator scene took place in a later episode of
* A truly ungodly long list, complete with ongoing discussion, can be found
* A truly unusual example comes from Root in Person Of Interest, with much more depth and with two different relationships. She serves as a platonic version of this to Finch, trying to improve his relationship with
* A truly vast number of freeware games — especially Japanese games — open with ripoffs of old video game loading screens. For example, "Kobami" from
* Atrus, at the beginning of the game, hands you a(nother backstory) journal, which appears in your inventory.
* At San Diego Comic Con 2010, James Robinson, in response to Roy Harper's right

arm being hacked off in
* At San Diego Comic Con, Hasbro always keeps selling exclusive goodies from several of their franchises. In 2012, that was a large brushable figurine of
* At San Diego Comic Con in 2013 while promoting the second season of
* "At Seventeen" by Janis Ian. The 1975 single used friendlessness and inability to make friends among its several themes.
* At several points, attempts have been made to give Superman weaknesses and vulnerabilities in order to have him being seriously threatened and make him relatable. Kryptonite was the first such attempt, but then writers simply took off with it, inventing literally dozens of forms of kryptonite with each one affecting him differently. It got so bad that some people did the math and calculated that Krypton must have been a planet roughly the size of the entire solar system in order for so many different chunks of it, randomly distributed throughout space by the planet exploding many light-years away, to have found their way to earth. Then the idea was put up that if he was cut off from the rays of our yellow sun, then his powers would quickly fade. Okay for a while, but then it was retconned that his cells all acted as storage batteries, storing sufficient amounts of energy to keep his powers going for quite some time, even if cut off from the sun. Superman is also depicted as being vulnerable to magic to the extent that it affects him as much any human, established long ago considering how
* At several points in AAI Edgeworth will hit a brick wall with his confrontations, but then the player is reminded of past innocuous scraps of conversation, then links together half a dozen or so pieces of logic, which leads to a whole new perspective on the case. Sufficiently awesome music starts up to accompany this.
* At Shiroyama, the samurai of the Satsuma Rebellion are simply too far outnumbered by the Imperial Japanese Army, and go out in a blaze of glory.
* A T-shirt in the 2013 Signals Christmas catalog featured a flaming pictograph of a man and the slogan "I tried it at home."
* at Simon Blackquill's trial for the murder of her mother, Athena tried to speak out in Simon's defence but no-one understood her. As a result, courtrooms remind her of both that moment and her mother's murder, triggering PTSD in her. She gets over it by the end of the game.
* At some colleges (even stereotypically unsocial and nerdy ones) this can hold disturbingly true. Even if there are no social cliques, there will be sexual cliques. If you make this graph with math majors, they'll call them
* At some earlier point in the series, After one of the many, many, many, many,
* At some of the larger anime conventions (Otakon held in Baltimore, for example) the attendees don't dress exclusively as anime characters anymore and the Con is flavored by whatever's "hot" at the time regardless of its nation of origin. At the 2008 convention (right after
* At some point after Jon leaves him with the rest of the Watch for the fake defection, Ghost was captured by Karl and Rast and is caged. How he was moved from a trap to the cage is never explained.
* At some point, British stations began alternating between both versions as well.
* At some point during his years on Earth, Zim developed a taste for the planet's seafood.
* At some point in the 1960s, McDonald's applied product-specific lyrics to the old gospel tune "Down By The Riverside": "McDonald's is your kind of place..."
* "At some point in their lives, all kids think their parents are evil. What if they
* At some point in the mid-2010s, Mexican Televisa-owned network Canal 5 would frequently upload disturbing videos on their Twitter account between 3-7 a.m. in the morning, and then quickly take them down. Most assumed it was Canal 5 trying to start an ARG to capitalize on the Selene Delgado
* At some point in the process of writing some of the more recent spin-off comics, the writers appear to have decided that all the above were effectively
* At some point, Marshall Willenholly reacts to hearing a rather asinine plot point with, "Sounds like something out of a bad movie." (All characters in the

scene then again glance at the camera.)
* At some point, most silly works will include efforts to make a flying tank. Sometimes this will be to just slap wings on that ever-so-aerodynamic thing, the main battle (or light) tank.
* At some point Rygel decides to torture a captured Charrid with his own instrument. He mentions he knows Charrid torture instruments well, including that they contain a pain amplifier.
* At some point, SpongeBob has advised Mr. Krabs that "licking doorknobs is illegal on other planets."
* At some point, the show itself decided to start playing with this, so instead of just replacement words you also have scenes like "Granville, come and sp-sp-sp-sp-spray this p-p-p-p-p-p ... oh, never mind, I've done it myself now."
* At some Reform Judaism synagogues, a popular "joke" to lead into the sermon is, "x% of deaths occur in a hospital, x% of deaths occur in a car, x% of deaths happen in the home...[continues on for a while] while there have been only
* At some ski areas, when a chairlift gets replaced, the replacement sometimes doesn't follow the same alignment as the lift it replaced. As a result, you can see a visible scar on the mountain where the original lift operated. Sometimes bits of the old infrastructure are still intact:
* At some speeches about Autism, a few speakers mentioned being told to
* At Somosierra, Napoleon faced a highly fortified, windy mountainous ravine that was his only way towards Madrid. Instead of assaulting in full force, he sent his personal retainer unit of cavalry (several hundred at most). Taking the Spaniards completely by surprise, they scattered the dumbfounded defenders for long enough that the rest of the army could secure the positions. Notably, historians debate whether this was the plan, an awkward result of misunderstood order to scout ahead, or the cavalrymen wanting to show off.
* At Song III, Martin Fierro declares that the Indians dominate this weapon so well, they have
* At start of the story Peter has a crush for Liz Allan. However, she is Flash's girlfriend and initially considers Peter something of a loser, even taking part in the general ridicule that Peter endures on a daily basis. After, she hears an ailing Peter had donned a Spider-Man costume in order to save Betty Brant from Doctor Octopus and develops a crush on him. By this time, however, Peter's interest has waned considerably, as he notes that Liz never showed any real interest in him until he began dating Betty Brant and assumes that Liz's feelings are little more than a schoolgirl crush.
* At Steamboat Ski Resort in Colorado, which uses a lot of theme naming for different parts of the mountain, the runs on Storm Peak have weather-themed names.
* At Steve and Karen McDonald's wedding in 2004, Tracy Barlow revealed that Steve was the father of her newborn daughter, Amy, which prompted Roy and Hayley, who she had sold her daughter to and who named the little girl Patience, to leave in a hurry and for Karen to belt her in the face, leaving her with a black eye. She still had that black eye when it came time for Amy's Christening some days later.
* At Sudbury for Pro Wrestling Eve, Alpha Female went to market in between workouts(which consisted of pressing Nikki Storm) to obtain meat, which she ate raw after rinsing in a sink.
* Atsuko Nishida, the artist of many iconic Pokemon including Pikachu & Bulbasaur, is notoriously camera-shy. Very few photos of her exist, and in 2018, she spent an entire interview hiding behind a giant Pikachu doll.
* Atsushi Kanamoto/Johnny Black. He's a minor but named member of Laughing Coffin, and later plays a small role in Phantom Bullet,
* Atsushi Nakajima and Kyouka Izumi also count. Even at their first meeting (when they were still enemies), Atsushi saved her from suicide bombing. When Kyouka joins Atsushi's side, they are often seen clearing missions together, most notably the preventing of the whale ship's descent. In
* Atsushi Onita got the idea to use landmines triggered by barbed wire, and later, plastic explosives concentrated in specific parts of the ring after founding
* Atsuya, who has the blessing of high Physical Defense, extremely high Magical

Defense, and slightly good Magical Attack, but slimes have been shown to outspeed him.
* At Swim-Two-Birds, in which an author creates a bunch of characters for a simple morality tale, and they promptly rebel. It doesn't end well for the author.
* At Swim, Two Boys. Among other things, when she's doing laundry, much is made about the transfer of the stains from the dirty clothes to her own apron.
* At Swim, Two Boys by Jamie O'Neill: a queer romance set at the time of the Irish War of Independence.
* attached itself to Aiden. Finding out what happened to Sonja's body is part of the plot, and they are confronted by a Masked Man. No prizes are won for guessing just whose face is hidden under that mask: Sonja's. And this doesn't get revealed until the very definite Final Boss battle.
* attached to her in "Bonding" and interrupts Professor Dementor's ranting to ask why he doesn't just get on with his plan. Annoyed, both Dementor and Kim tell her that that's the way these things are done.
* Attaching an object that causes other objects to gain momentum with one of those items using a rigid body (like glue and planks) yields
* attaching a Remnant to Valkyrie... all except for that first one, who goes so far as to cripple the ones who try running away.
* attaching electrodes to her brain, first by cutting the top of her skull off.
* attaching the security to a random piece of hardware and carrying it with you all the time, causing Ozpin to hide his cane.
* attack a dreadnaught end up on the receiving end—"over two thousand missile launchers" that have each fired "at least one" projectile.
* Attack Animal, even smaller and or less skilled wrestlers can potentially beat men. Size advantage and sexual dimorphism mean a lot less in the coils of a boa constrictor.
* Attack! Attack! Attack!: A character's strategy consists of nothing but attacking the target mindlessly.
* Attack! Attack! Attack!: Incapable of realizing when a fight is unwinnable.
* Attack! Attack! Attack!, notably the Netherlands whereas others are more known for a highly defensive style, most notably Italy.
* Attack! Attack! Attack! strategies that inevitably fail spectacularly and get everyone except him killed. So it doesn't come as a huge surprise when it's revealed he's working with the bad guys and has been deliberately setting you up for failure in an attempt to weaken the House of the Chosen so he can take over as it's new Margrave. He's also a new character who is only introduced in Maldraxxus, which makes him an obvious pick compared to established heroes Draka and Alexandros.
* Attack! Attack! Attack!. Their commanders favor speed over everything else, as such they field light and medium mechs, against opponents who like fielding larger and more heavily armed Omnimechs. The worse example is Khan Raina Montose, who led the disastrous invasion on Clan Jade Falcon's occupation zone, which resulted in the former Clan's destruction.
* Attack! Attack! Attack! these men to battle (it's said his pistol has shot more cowards than enemies). Sure the losses are horrendous, but the Imperial Guard is literally trillions strong, and his every battle was a success justifying them.
* Attack Attack! (the US band) released an album in 2012 titled "This Means War."
* Attack Drones, finally two hyper-beam javelins also stored on the forearm shields. To counter the sheer bulk of mass added to the Unicorn, two massive rockets and propellant tanks sourced from a Base Jabber Type 94 are attached to the rear of the Full Armor Unicorn, which can also be fired off as impromptu rockets.
* Attack Drones. Most of these are riders mounted outside the ship rather than launched from an internal hangar or bay.
* attack each other; their HUD commands them to "KILL" their opposite number. Inevitably, they malfunction, and the "KILL" command is demanded of human targets.
* attacked by black police officers, likely inspired by Officer Coffey.
* attacked by the Godwin family and their ninjas....Things just went more and more wrong from there.

* attacked her apartment and nearly killed her sister, she understandably refuses.
* attacked Iranian uranium enrichment plants by raising and lowering the speed of the centrifuges, causing physical damage.
* Attacked the other villain for completely unrelated reasons, and is furious to find out that they
* attacked the Titan's weak point (No-Sold?) it and flicked her off into the distant caverns.
* Attacker You!; and more prominently the Saiei team lead by Heinz and Crosby, a duo of notoriously bitchy and contemptuous foreign girls who often take advantage of their strength to bully and browbeat their opponents.
* Attacker You!, the coach of the volleyball team learns that protagonist You has a crush on him when he sees her mumble, "Coach," in her sleep, with a smile on her face.
* Attacker You! title that makes it look like that You and her "boyfriend" Sho are both equally important protagonists.
* Attack Force who want to drive people crazy by contaminating the water supply with a superdrug.
* Attack Force Z commando force encounter a villager and ask for directions to their objective, then shoot him with a silenced submachine gun so he won't tell anyone of their presence on the Japanese-occupied island.
* Attack Force Z the commander shoots him, so he won't be captured and give away the mission under torture.
* Attack from Mars has its playfield's edges decorated with several smaller saucers with LEDs built into their rims
* Attack from Mars has the Attack Mode, wherein you travel to various cities and stop the Martians from damaging their famous monuments (i.e. straightening the Tower of Pisa).
* Attack from Mars homages were similarly centered on Europe and the United States.
* Attack from Mars insists it's a case of parallel development instead.
* Attack from Mars involves Martians invading the Earth, with the player being tasked with repelling them.
* Attack from Mars: Shooting the flashing lane at launch gives extra points and sets the bonus multiplier at 5x (or greater). If you hold the left flipper while launching, the ball will go around to the left flipper for a chance at a Super Skill Shot. You then have a few seconds to hit one of the shots, either any of the two loops or ramps, or any of the Force Field targets. If you hit the shot, it will either complete the requirements for that shot for Total Annihilation, or start an Attack Wave.
* Attack from Mars. The Conquer Mars achievement stays lit permanently for the rest of the game, meaning you only need to accomplish the other five much easier objectives to rule again.
* Attack from Mars: The Martian's ships are equipped with force fields, and the player must disable them to start a City Mode.
* Attack Hello: Physically attacking someone (in a friendly way!) as a means of greeting.
* attacking a monster with its weakness of fire causes it to explode spectacularly.
* Attacking a ship carrying his own son due to Kerrigan being onboard;
* Attacking fullbacks working with their winger is a relatively new invention. Improved athleticism meant that fullbacks can run the length of the field to attack the opposition, then "track back" to do their defensive duty. Where previously fullbacks did little more than track the opposition wingers and stuck to their own half of the field to defend, it was realised that should they push up in attack, their opponent in attack would be the often defensively deficient opposition winger. The introduction of 'overlapping', where the fullback would run past their winger to provide options for a cross was also another revelation.
* Attacking the allied that the Solarians have been blissfully oblivious to suddenly makes it terrifyingly clear to them that the proper designation for their huge fleet is "targets".
* attacking, the author is apologizing for the poor writing of some of the stories

(which the brothers, and the audience, actually lived through).
* attacking the Emperor however, the prison they were sent to was very nice and luxurious and they appeared to be fed good food and were engaging in artisan crafts like painting and origami.
* attacking. Think of the old 2D army example of enemy units that only have armor on their front, because they're not supposed to retreat - and they're also meant to be used in blitz attacks that win on the first strike, so they're not well-prepared for being overwhelmed from every side. The issue is that in three-dimensional space, there are six "sides" (forward, rear, left, right, and also top and bottom), and Dominion ships are also troop carriers that deploy soldiers into combat zones, so their bottom shielding is pretty strong too. Examining a captured Jem'Hadar ship, however, Starfleet realizes the top-side shields on Dominion ships are incredibly under-powered, compared to the other five sides. This is exploited during the battle to retake Deep Space 9 at the beginning of Season 6: just as the Federation fleet is being overwhelmed, Klingon reinforcements suddenly arrive, making a Z-axis strike from "above" the plane of the battle, hitting many Dominion ships on their weakest side, and evening the balance of the battle.
* AttackingTucans get a Big Wallet if you complete the Oceanside Spider House on the second or third day.
* AttackingTucans spends all his LP's being silly and talking about the most profound of things, yet he scored a 4.0 in high school and his official IQ test came back as 142, GENIUS LEVEL. 18 POINTS LOWER THAN STEPHAN HAWKING. HOW.
* attack is used as a finishing move. They simply assumed Liu Kang did a double-fist punch.
* Attack Its Weak Point: Being is vulnerable at a specific and obvious part of their body.
* Attack Its Weak Point: Like Achilles himself, a specific body part is particularly vulnerable to direct damage.
* Attack No. 1 are two of Fujimi's best students (especially the latter) and talented volleyball players (especially the former).
* Attack No. 1 Kozue Ayuhara is the heroine, who transfers to Fujimi college and impresses the volleyball coach when she tries out. After making friends and enemies, the story highlights her struggles and triumphs as she matures and tries her hardest to become the best volleyball player in the school, Japan and the world.
* Attack No. 1 Kyoko and her brother loved tennis, but their mom hates and forbade sports because, in her opinion, such activities are dangerous and would be bad for her children's academic grades, so she's at first very disappointed when her daughter joins Fujimi Highschool's volleyball team.
* Attack No. 1. Manga started in January 1968, Anime started in December 1969.
* Attack No. 1 (Started in 1968, but continued through the early 70s.)
* Attack of the 50-Bit Nicelander. Things are funny up until the point everyone learns that the game can not handle Gene's added bit-space and might malfunction because of it. With many non-Fix-it-Felix Jr. characters blaming him for the inevitable crash, Gene actually goes on a rampage in Niceland after suffering a breakdown and nearly takes out Felix and Ralph in the process.
* Attack Of The 50 Foot Cheerleader, though the low-budget legend is uncredited in the first.
* Attack of the 50 Foot Eyesores, with local advertising icons run amuck.
* Attack of the 50-Foot Whatever: A giant (something) goes on a rampage.
* Attack of the 50-Foot Whatever: Character grows vs. character shrinks
* Attack of the 50-Foot Whatever: The story has a giant (something) going on a rampage.
* Attack of the 50-Foot Whatever: The story has a giant (something) go on a rampage.
* Attack of the 50-Foot Whatever: turns out they were responsible for the destruction of the blancmange at Wimbledon.
* Attack of the 50-Foot Woman: a commentary on the conformity of 1950's gender roles and how society reacts to their defiance, or a silly B-Movie?

* Attack of the 50-Foot Woman, a doctor speculates that Nancy's condition is caused by a hormonal imbalance. Her husband's response is "Congratulations, doctor. You've just discovered a new form of PMS."
* Attack of the 50-Foot Woman, after Nancy grows all that it shown is her huge hand inside her bedroom. She is only seen in full after she breaks out to look for her husband, ten minutes before the end.
* Attack of the 50-Foot Woman: Being the titular 50-foot (15 meters) woman, Nancy Archer towers over her husband, Harry.
* Attack of the 50-Foot Woman fits this formula. Men are abusive, sex-obsessed monsters? Check. Women are weak, spineless victims? Check.
* Attack of the 50-Foot Woman — the doctor treating Nancy remarks that at her new size her heart is under tremendous strain due to the change in her mass, and that any undue stress may cause it to give out.
* Attack of the 50-Foot Woman, Nancy's doctors use Acme Medical Supplies to get everything they need to keep her sedated and restrained. The deliveryman is incredulous at the order, which includes morphine and plasma by the gallon, an elephant syringe, and lengths of heavy chain and meat hooks.
* Attack of the 50-Foot Woman, two teenagers making out are among the first to see the giant Nancy approach town.
* Attack of the 50-Foot Woman uses this to give the title character her size.
* Attack of the 50-Foot Woman was summed up in TV listings as “Woman meets giant alien. Woman turns into giantess. Woman catches husband with another woman.”
* Attack of the 50-Foot Woman, where a woman named Nancy Archer becomes a giantess after contact with an alien. She seeks revenge on her philandering husband.
* Attack of the 50-Foot Woman, where the scientist introducing the movie assures us that everything that happened is absolutely true.
* Attack of the 50-Ft. Cupid has Franny trying to figure out how she can stop the titular gigantic cherub. Remembering her little brother Freddy snarking about using a reverse setting on the Biggerizer so she could shrink her mouth, Franny gets the idea to use the invention to enlarge herself so that she and the giant Cupid would be on equal footing.
* Attack of the 50-Ft. Cupid has Franny wake up to the sight of what she later realizes are the bare buttocks of the titular Cupid.
* Attack of the 50-Ft Half-Klingon stomps on her philandering husband, then scraps her boot back-and-forth for good measure. As they're on the holodeck, she points out it won't kill him thanks to the safety protocols. Just hurt a lot.
* Attack Of The 60 Foot Centerfold is a parody of the "50 Foot Woman" movies. A "Plaything Magazine" centerfold-of-the-year contestant (and eventually, her rival) becomes a giant after trying out a strange "beauty injection".
* "Attack of the 60 Foot Lesbian Octopus" by Does it Offend You, Yeah?
* Attack of the Airships, but is paired with Bowser's military invasion of the Mushroom Kingdom where he takes Peach's castle through outright blitzkrieg.
* Attack Of The Beast Creatures made of acid, which coincidentally looks exactly like normal water. When one person tries to cross it, his body gets dissolved until only the skeleton remains. It's never made clear how such a large body of highly corrosive acid came to exist, nor how the tropical rainforest on the river bank manages to prosper.
* Attack of the Clones a group of fans gained a little notoriety for lining up for weeks outside Graumann's Chinese theater... a theater that announced that it wouldn't be showing the film.
* Attack of the Clones also has some infamous moments, including when Anakin fails to use two lightsabers for more than six seconds, not helped by the fact that he seems to deliberately holding his handle so that it can be cut. Then there are the extreme close ups which prevent the audience from seeing how the blades are effectively connecting. Anakin also seems to deliberately leave an arm exposed so that it can be cut in half. Then the Yoda fight begins and Dooku appears to be flailing at the ground while Yoda barely seems to strike at any part of Dooku's body as most of the attacks are clashes aimed for blades.

* Attack of the Clones, although very briefly during his fight with Obi-Wan.
* Attack of the Clones, among the patrons in the club where Obi-Wan finds Zam Wessell are Anthony Daniels (C-3PO) and Ahmed Best (Jar Jar Binks).
* Attack of the Clones, Anakin demonstrates his tech savvy by ordering the gunship he's on to target the Techno Union Hardcell-class ships (the ones that look like and take off like real-life rocketships) right above their fuel cells.
* Attack of the Clones, Anakin, Padmé, and Obi-Wan are almost killed by animals in the arena on Geonosis.
* Attack of the Clones, Anakin uses the Force to levitate a piece of fruit off Padmé's plate. He then cuts it up for her and levitates it back a piece at a time.
* Attack of the Clones, an assassin tries twice to kill Senator Amidala. When the Jedi capture the assassin, Jango Fett enacts this trope with great prejudice.
* Attack of the Clones and his son Boba speak with their actors' native New Zealand accents because Lucas heard them and thought they sounded so exotic they had to keep them.
* Attack of the Clones, and is killed by Mace Windu on Geonosis, but his death inspires Boba to take up bounty hunting and follow in his footsteps.
* Attack of the Clones and joined the Sith. He is convinced that the best way to save the galaxy is to destroy the Republic and the Jedi by any means necessary, and then simply start over. That Dooku was willing to ally himself with Palpatine, fully aware that he was responsible for a lot of what he hated about the Republic (and that he trained the man that killed Dooku's beloved apprentice), is testament not only to Dooku's dedication but to Palpatine's persuasive abilities.
* Attack of the Clones and was replaced by Tux Akindoyeni, who looked different enough to be a separate character. In contrast with Allie and Gallia, there was extensive confusion between Kolar and Koth from 2002-2005 with many sources misidentifying Kolar as Koth.
* Attack of the Clones are either this, garbage, or just plain normal, depending on your point of view. But a special mention goes to his confession on Tatooine:
* Attack of the Clones at the end, we see a bunch of star destroyers ready to take off in the background.
* Attack of the Clones before being led to their execution by the Geonosians ... which doesn't exactly go as planned.
* Attack of the Clones. Count Dooku is sent to stir up the galaxy against Chancellor Palpatine in order to make it so the latter can justify seizing more power. The reason it's the former and not the latter is the troops on the ground had no idea they were just cannon fodder for Palpatine's goals and the Separatist cause was never meant to succeed.
* Attack of the Clones decided not to use the stock sound effect of lightning and thunder coinciding with each other during the thunderstorm on Kamino, instead having the lightning happen a few moments before the thunder crashing.
* Attack of the Clones, despite being "older" technology, has a much more sensible beetle-like design, with six legs and a low profile for stability.
* Attack of the Clones drop the hint rather than doing so himself, leaving him free and clear of any accusations despite the hinting being obvious and heavy-handed.
* Attack of the Clones during the battle in the Geonosian arena when two battle droids suddenly run away from Obi-Wan after seeing the acklay behind him. His response is to slice the thing to pieces.
* Attack of the Clones ends with Anakin and Padme marrying in secret, with only the droids as witnesses.
* Attack of the Clones enters and greets Anakin, he subtly smiles at the camera, as a nod to his hatedom.
* Attack of the Clones exactly what's going on with the Sith conspiracy. It backfires: they take the wise course of action and decide not to flat out believe it, but keep their eyes peeled.
* Attack of the Clones, except that instead of being packaged, he's sent out with the combat droids after having his head switched with one. Elsewhere in the factory, Anakin has a piece of machinery welded together around his arm and is

unable to free himself for several minutes, then finds out it destroyed his lightsaber.
* Attack of the Clones featured harder drugs such as ryll and glitterstim (which was, incidentally, the "spice" that Han used to smuggle for Jabba the Hutt).
* Attack of the Clones features Dex's Diner, where Obi-wan goes to speak to the owner/chef, Dexter Jettster. Apparently Dex has a bit of a past, and not only sells food, but information.
* Attack of the Clones features the Battle of Geonosis, with the freshly-revealed army of Republic Clone Troopers slugging it out against the fleeing fleets of the Confederacy of Independant Systems.
* Attack of the Clones: Force avalanche / Force reflect/absorb (when Yoda turns Dooku's lightning back on him, and later absorbs a second one)
* Attack of the Clones got this treatment for a Hungarian fan meeting. The redubs feature Anakin and Padmé discussing the state of the music industry, a drunken Anakin gambling away all their money, and Padmé leaving the oven on on Naboo, causing a fire that destroys Anakin's toy car collection. The best thing? It's all done by their real VAs from the actual Hungarian dub.
* Attack of the Clones had a few interesting deleted scenes. One was a simple lab scene where Obi-Wan analyzes the poison dart he got from the bounty hunter. It was deleted because they realized it didn't move the plot "We didn't know anything going in and we knew nothing going out" and a simple mention of it in a later scene was enough.
* Attack of the Clones had numerous occasions of clones running headfirst at heavy armed and armored droids (and they were being cut down by the dozens as a result).
* Attack of the Clones. Having subdued Anakin (via force lightning) and Obi-Wan (via asskickery), Count Dooku is just about to deliver the fatal blow to Obi-Wan when... Anakin makes a miracle recovery and blocks Dooku's lightsaber just in time. Or look earlier in the film, when Yoda arrives on Geonosis with the clone army. Or when Anakin and Obi-Wan save Padmé from the poison millipede... things.
* Attack of the Clones implies that window was indeed regular glass or another easier to smash material which are common in senator apartments on Coruscant and other Expanded Universe works have shown that a Jedi's Force Push can shatter the regular transparisteel windows anyways.
* Attack of the Clones. In fact, Vader slaughters so many of the Sand People they begin to worship him as a god.
* Attack of the Clones, instrumental in giving Supreme Chancellor Palpatine emergency powers he requests to fight the Separatists.
* Attack of the Clones, it's shown that people living on Tattooine see it as a heroic deed as Tusken Raiders are universally xenophobic in the extreme and a significant threat to farmers or anyone living outside the few cities.
* Attack of the Clones, Jar Jar Binks's only two lines of dialogue put him square in this category.
* Attack of the Clones, natch. That romantic episode on Naboo is set during a warm, gentle summer, and then suddenly Anakin's mother dies on Tatooine and the Clone Wars are kick-started.
* Attack of the Clones: Obi-Wan Kenobi, Anakin Skywalker and Yoda vs. Count Dooku
* Attack of the Clones of clones (conventionally ten to twenty thousand infantrymen or a couple hundred armored vehicles).
* Attack of the Clones Old Master, of course. And even then he holds his own.
* Attack of the Clones: Once on Kamino when the clones provide a display for Obi-Wan (seen in the page image), and again at the end when the clone army marches in formation on Coruscant as they depart for war.
* Attack of the Clones onward, Anakin Skywalker wears...black leather. In-Universe this had more than few Jedi worried about his mental state and intentions.
* Attack of the Clones, Padmé confesses her feelings to Anakin right before they're brought out to be executed.
* Attack of the Clones, Padme frees herself from capture by the Geonosians and takes part in defending the Jedi against the droid army attack and the pursuit of Count Dooku.

* Attack of the Clones: Padme gives one to Anakin as they are being dragged off to be publicly executed, deciding that since they were going to die anyway, their doomed romance might as well be acknowledged.
* Attack of the Clones says "aiwha" is a deliberate corruption of "air whale".
* Attack of the Clones, select a poster behind Dex in his diner and you'll access a slideshow of rough, hand-drawn student posters: one has C-3PO advertising a Spanish language class.
* Attack of the Clones) show him with human ears instead of the antennapalps he has in the movie, as they were based on reference photos from before his ears were replaced in post-production.
* Attack of the Clones sources, the game is Nuna-ball: similar to football, but usually played with a nuna (a living creature that inflates like a pufferfish) instead of a ball. Another game can be seen, which looks like droid football.
* Attack of the Clones: Spice Miners on the moons of Naboo are the primary suspects of Padme's assassination attempt, until Obi-Wan finds out that Count Dooku and Viceroy Gunray are the real culprits.
* Attack of the Clones. Supposedly, he wanted to be able to spot himself easily in large fight scenes (and purple was his favorite color).
* Attack of the Clones that R2-D2 had the ability to fly was cheered enthusiastically, even though he never showed this ability in the original trilogy.
* Attack of the Clones, the crew played a prank on him by showing him a Yoda model with Dracula fangs. Lee found it amusing.
* Attack of the Clones: The desert planet of Geonosis becomes the site of the first battle between the newly-formed Republic Clone Army and Separatist droid forces.
* Attack of the Clones: The dress Padmé wears at the lake house combines a halter top, backless to the waist, with detached sleeves and filmy drapery for an elegantly sexy look.
* Attack of the Clones, the droid army in all three prequels, and the Imperial military in the original trilogy are all Soldiers, using training and unit discipline (or programming in the droids' case) and usually superior numbers to overcome their opponents.
* Attack of the Clones the Galactic Republic, with the latter being formed after the fall of the latter. Yet this contradicts references in the films where the late government is clearly called "the Old Republic". However, that could be generic "old" or just lumping them together, since for instance the French Fifth Republic followed the Fourth Republic, though both are called "the French Republic" as well (being two succeeding versions of the same thing).
* Attack of the Clones, the Jedi Order's surest sign of its blindness to the growing threat of Palpatine's scheme is when Obi-Wan was looking for info on the planet Kamino and there was none to be found. The Head Librarian, Jocasta Nu, is so sure of the archives' comprehensiveness that she automatically dismisses the planet's existence without considering any other possibility of why there is no record. It finally takes one of Yoda's child students to suggest the obvious: that the Archives' records were tampered with to hide Kamino's existence. When the order's Chief Librarian is that stubbornly unwilling to acknowledge such a realistic possibility within the terms of her own calling, it's no wonder that Palpatine is able to crush the Jedi.
* Attack of the Clones the Jedi rescue team that Mace Windu brings to Geonosis to save Obi-Wan, Anakin and Padme counts. They make a dramatic entrance at the Geonosian Arena, and are promptly surrounded by an army of battle droids with nearly all of the Jedi being killed within a few minutes.
* Attack of the Clones, there was a scene of Palpatine watching the Clone Troopers goosestepping as they prepare to be deployed for war in such a way that very closely resembles Hitler's watching the soldiers.
* Attack of the Clones, there was Dex, the owner and chef of Dex's Diner. Seeing as his place was popular with merchants, smugglers, and other frequent travelers, and how he's traveled all over and done more jobs than can be counted on his four hands, he often overheard things that no-one else did, and was willing to sell the info. In the movie, Obi-Wan goes to him to find information on the Kamino cloning

project; he identifies the reclusive race whose world is so obscure that nobody noticed it being missing from the Jedi archives from a simple metal dart.
* Attack of the Clones. The scene is dead silent for about ten seconds, and absolutely spectacular as a result.
* Attack of the Clones. These guys apparently liked their fights a bit more one sided than they already are, given that they chained their victims up. Which ironically saved them all.
* Attack of the Clones, the separatist leaders have a real-time holographic projection on a table showing the battle for them. The star map Obi-Wan and Yoda use in the younglings scene is another example.
* Attack of the Clones, the shields on anything smaller than a capital ship would be unable to defend against these charges, supporting this idea that the planar shockwave is in order to produce a much more powerful blast.
* Attack of the Clones: Though Cliegg Lars mourns deeply for his wife Shmi Skywalker after she is captured by Tusken Raiders, he also very bluntly and matter-of-factly tells Anakin that his mother is dead already and he needs to accept that. Anakin ignores him, tries to rescue Shmi from the Tuskens, and succeeds only in getting there just in time to watch her die in his arms.
* Attack of the Clones to take on the Separitist's Droid Army. Most don similar-looking white armor and obviously bear similar faces. However, some clones do go out of their own way to try and make themselves be their own individuals in order to stand out, by painting their armor, dyeing their hair, shaving their head or growing their hair out to try different hairstyles and even getting special tattoos on their faces. In fact, there were so much of them made that the first generation of stormtroopers were mostly veteran clone troopers.
* Attack of the Clones uses a ship equipped with a (unrealistically small) solar sail to escape from a battle.
* Attack of the Clones wants revenge on Padme Amidala more than anything else. He tells Count Dooky he'll only join the Separatists in exchange for her head on his desk.
* Attack of the Clones was eventually pared down to a shot of her in hologram.
* Attack of the Clones: When Anakin and Obi-Wan first meet Padme at her apartment, Jar-Jar gives a quick one with a grin, as if he's saying to the audience "Meesa still here!"
* Attack of the Clones, when Anakin and Padme are about to kiss, then she decides not to.
* Attack of the Clones, when Anakin is trying to fight against the Geonosians inside of the Droid factory, he at one point gets his arm trapped within a piece of molded armor, and is drawing closer and closer to a crushing machine/cutting machine, causing the audience to think he'll lose his arm as a result of the battle. Turns out he actually loses it during the battle with Count Dooku towards the end (but it does cut his lightsaber, making the next one be the one be the "family heirloom" Obi-Wan passes to Luke later).
* Attack of the Clones, which are more heavily armored and aggressive than the regular droids.
* Attack of the Clones. While the latter manages to take the win, it isn't an easy one and more due to luck.
* Attack of the Clones, who gave it away in an interview. As a result he was kicked out and Hayden Christensen got the role instead.
* Attack of the Clones who was manipulated by the Sith to build a clone army.
* Attack of the Clones, with Dooku offering to team up with Obi-Wan to defeat the Sith. Dooku's motives for making this offer are a bit unclear since Dooku himself is a servant of the Dark Lord he claims to be opposed to. Most likely he wants to destroy Darth Sidious and become the new Sith master with Obi-Wan as his apprentice, but the way he frames it makes it seem like he's been infiltrating the Sith to destroy them from within (unlike Anakin to Luke, who makes no bones about the fact that he wants to rule the Empire from the Dark Side).
* Attack of the Clones with the rockets: good rockets leave white trails of smoke while evil rockets leave black ones.

* Attack of the Clones. Yet the explosion itself is dead silent, with only the shockwave afterwards being heard.
* Attack of the Clones, Yoda and Dooku have a telekinesis-and-Force-Lightning wizard's duel, before fighting it out with lightsabers.
* Attack of the Cyberman", the mercenary Lyton has his hands crushed to bloody pulps by a Cyberman.
* "Attack of the Cybermen". The Doctor is locked in a storeroom containing explosives. Explosives just powerful enough to blow a large hole in a thick futuristic metal door without harming a person crouching at the other end of the small room.
* "Attack of the Cybermen" was credited to "Paula Moore", which disguises an extremely complicated and disputed story as to who wrote it. Although the specifics have never been nailed down, the most commonly accepted version of events is that it was largely written by script editor Eric Saward, based on a story outline by continuity advisor Ian Levine. "Moore" (an ex-girlfriend of Saward's, whose real name was actually Paula Woolsey) just agreed to act as the story's author (and allowed the usage of some elements from an unrelated outline she'd previously submitted) so as to get around BBC regulations preventing Saward from being credited as script editor on his own work.
* Attack of the Deranged Mutant Killer Monster Dark Lord, we get this moment during the Ballyhoo Breakfast Show:
* Attack of the Ghost Riders would seem to be this trope, or at least that's one way of interpreting it.
* Attack of the Giant Leeches: Giant leeches attacking a southern swamp town. The movie plays up the tension between the big-city hero and the locals, many of whom are poachers he is trying to catch.
* Attack of the Giant Leeches: There are two giant leeches terrorizing the town.
* Attack of the Giant Leeches: The titular monsters dwell in the swamps of Florida.
* Attack of the Grey Lantern album, called "An Open-Letter to the Lyrical Trainspotter" was a piss-take of the sort of fans who would analyse their lyrics looking for meaning. Ironically, this was a song where the lyrics had a definite meaning and message:
* Attack Of The Killer B's was also a compilation album of B-sides released in 1983. Included were songs such as "You're My Favorite Waste Of Time" (Marshall Crenshaw), "In The Sticks" (the Pretenders), "Babysitter" (the Ramones), and "Love Goes To A Building On Fire" (Talking Heads).
* Attack of the Killer Refrigerator, it's the fridge from hell's logic!
* Attack of the Killer Tomatoes!. A boy is fishing when his dog hears the tomatoes coming and goes to investigate. The boy notices and asks, "What is it, Spot?" An articulate voice is heard from off camera: "Gosh, Billy, I don't know! You stay there; I'll go look!"
* Attack of the Killer Tomatoes!) and even reenacted part of the movie in the opening credits.
* Attack of the Killer Tomatoes! as he’s always questioning his plans and his leadership. In the second season, Zoltan and his five goons actually dethrone Gangreen and took over the world from him.
* Attack of the Killer Tomatoes! before this, fall passionately in love in the last sixty seconds and sing the beautiful romantic duet appropriately titled "Love Theme from Attack of the Killer Tomatoes" before literally Walking Off Into The Sunset Together.
* Attack of the Killer Tomatoes!, but his name is changed to Dr. Putrid T. Gangreen. In addition, Greg Colburn and Greta Attenbaum, two characters from the original 1978 film, appear under the names Floyd Bridgework and Mary Jo Nagamininashy.
* Attack of the Killer Tomatoes! by Sam Smith, a black man who disguises himself as such notable non-black people as Hitler, Abe Lincoln, George Washington, and a blonde girl, all while making not the slightest effort to disguise his skin color. He even managed to convince the tomatoes that he was one of their number until he forgot and asked for ketchup.

* Attack of the Killer Tomatoes! cartoon has painfully, glaringly obvious, conspicuous CG. But then, given the source material, it's probably intentional.
* Attack of the Killer Tomatoes! cartoon, the Killer Tomato Task Force had to fake one to get past the tomato guard and rescue Doctor Gangreen.
* Attack of the Killer Tomatoes!: Chad Finletter manages to put a dent in Doctor Gangreen's plans.
* Attack of the Killer Tomatoes! constantly mentions the stupidity of his minions, especially in reference to his main minion Igor. Zoltan and his band of tomatoes are more competent but still manage to enrage him.
* Attack of the Killer Tomatoes!. Costumes-production management-assistant director-second unit director-properties-all purpose bit player-location scout Costa Dillon, producer-director-editor-music composer-music editor John De Bello
* Attack of the Killer Tomatoes! couldn't exist without the eponymous killer tomatoes.
* Attack of the Killer Tomatoes!: Dr. Putrid T. Gangrene qualifies, what with his diabolical plans to conquer the world with giant killer tomatoes, tomatoes turned into people, people turned into tomatoes, etc., etc. Don't call him mad, though. HE IS NOT MAD. A little angry sometimes, but not mad!
* Attack of the Killer Tomatoes! Even Wilbur Finletter pulled this trope in one episode!
* Attack of the Killer Tomatoes!. Facing an army of homicidal love apples, pizza shop owner Wilbur Finletter voices his rage at the global ban on tomato cultivation, which has forced him to sell tomato-free pizza: "You killed my business, prepare to die!"
* Attack of the Killer Tomatoes!, Gangreen creates a vampire tomato complete with Romanian accent. He turns humans into vampires by kissing them on the neck (to appease his first victim, a network censor). The male vampires have tuxedos and capes, while the female vampires wear black one-piece bathing suits and black capes. Soon the entire town - and nearly the entire cast - is transformed into vampires.
* Attack of the Killer Tomatoes! has the hero at gunpoint and is just about to tell him the secret of how he controls the killer tomatoes before shooting him — when the crazed parachuting flyboy from earlier in the film crashes into the room and runs the villain through with a sword.
* Attack of the Killer Tomatoes! have the same weakness, in the form of a song called "Puberty Love".
* Attack of the Killer Tomatoes! is to raise an army that allows him to take over the world.
* Attack of the Killer Tomatoes!, "Master of Disguise" Sam Smith blows his cover after infiltrating the tomato camp, by asking for ketchup to put on the arm he's about to eat.
* Attack of the Killer Tomatoes! of blatant product placements because they allegedly ran out of money partway through the film and needed an extra source of funding).
* Attack of the Killer Tomatoes! or any other Saturday morning cartoon. A lot of people still to this day might have a surprise to know that there were live-action movies before.
* Attack of the Killer Tomatoes!, the eponymous tomatoes are defeated by playing the fictional artist Ronny Desmond's new hit song "Puberty Love," which causes them to shrink and become vulnerable to crushing.
* Attack of the Killer Tomatoes!: The second season has the titular villainous veggies and the tomato centurions now being capable of chowing down on humans.
* Attack of the Killer Tomatoes! to fight the tomatoes. The credits actually list them as "Every screwball in San Diego County."
* Attack of the Killer Tomatoes! were smaller than people, they were very large for tomatoes, though one human-stomper-sized tomato did appear at the climax.
* Attack of the Killer Tomatoes! when the scientist is examining a killer tomato the size of a beach ball.
* Attack of the Killer Tomatoes! when you decide to parody the B-movie horror

genre.
* Attack of the Killer Tomatoes!, which is as flat-out crazy as the second film.
* Attack of the Killer Tomatoes!... Yep, ketchup is apparently really bad for you.
* Attack of the Killer Whatever is about a serial killer who becomes mutated into a monster made of feces.
* Attack of the Killer Whatever: Something that would not usually be dangerous becomes a monster.
* Attack of the Monster Appendage: A limb, often independent of a body, is a dangerous monster.
* "Attack of the Mousers". Thankfully, April and the turtles are able to escape before the mousers explode and subsequently destroy the Stocktronics Labs.
* Attack of the Mutant gets off the bus at a stop they didn't want to. Turns out this stop is the headquarters of the infamous supervillain, the Masked Mutant, who can transform into anything and anyone.
* Attack of the Mutant Penguins has good penguins aiding the heroes to defend Earth against evil alien penguins.
* Attack of the Political Ad: Electoral candidates are fond of mudslinging against their rivals through media advertisements.
* Attack of the Puppet People to being shrunk, put into suspended animation and only being let out for the toymaker's amusement, as well as almost getting killed by the puppet maker in a murder-suicide due to the cops getting suspicious... Tell him to move out from in front of the door (which he does) and storm out of the room like he had insulted them.
* Attack of the Sabertooth Oh no! A crazy saber-toothed cat is running amok in the forest! Even more oh no! They somehow convinced John Rhys-Davies to do this movie!
* "Attack of the Saucer Crab". The title device has a weapon that it uses to annihilate a building and destroy the occupant. Jan specifically calls it a "disintegrator ray".
* Attack of the Show!: In "Wonder Woman's Guide to Office Safety", Cheetah emerges from a refrigerator after being formed from an old lunch containing correct chemical components essential to creating her.
* Attack of the Show! ran promos of this sort, with generic blurbs from industry publications. "TV Guide raves: 'It's a [...] show.' See the show that Entertainment Weekly called 'on at 7 (6 central)'!"
* Attack of the Show! sketch had Apple buying a state and founding their own country, iDaho.
* Attack of the Show! uses a zooming "attack" to cut between segments.
* Attack of the Super-Monsters, a memorably bad live-action/anime combination, had sentient dinosaurs (played by hand puppets) returning to take over the Earth in 2000.
* Attack of the Super Wizards. The comic also includes ersatz versions of Krypto, Lois Lane, Batman, Wonder Woman, Cthulhu, Alan Moore, and others.
* Attack of the Teacher Creature. Most readers don't realize this due to the obscurity of said book, however.
* Attack of the Teacher Creature - the werewolf is really just a wax sculpture.
* Attack of the Teacher Creature, where Rupert and Earl return...again.
* Attack of the Town Festival: A town holding a festival is under attack.
* Attack on One Is an Attack on All: If you harm even one of us, you better be ready for war.
* Attack on One Is an Attack on All: You harmed one of our members of my group, nation, or race. Now all of us are gonna tear you apart!
* Attack on the Heart: Killing someone by directly inflicting damage to the heart.
* Attack on the Heart: Someone kills someone else by shooting, stabbing, or otherwise injuring them in the heart.
* Attack on Titan: 3DMG in reality would encounter much the same problem jetpacks do, not enough fuel. And operating one safely, forget it. Damn if it doesn't look cool though.
* Attack On Titan A Blacksmiths Tale Psychic MC, Dillon's character arc of learning to live with himself and his girlfriend Annie has been essentially in a limbo state

for years at this point, with nothing really changing his situation. The second he gets "better", something else dramatic happens and we're back to square one. this is in addition to canon storylines taking much longer than necessary due to a slow update cycle.
* Attack on Titan: A company of brave soldiers fight the people-eating giants who terrorize humanity and pursue the answers behind the horrifying mysteries of their world. It is basically a Heroic epic focused on Eren, but places major emphasis on his companions in the survey Corp., especially Mikasa and Armin.
* Attack on Titan actually wasn't supposed to be Jean, but rather a generic soldier representing humanity. However, given the number of people claiming it to be Jean, the production staff has acknowledged it as so.
* Attack on Titan, a decision that Eren had convinced Levi to accept, also calls out the other Survey Corps members for not intervening to try to stop Eren.
* Attack on Titan, after getting severely cut up by Captain Levi, the Female Titan collapses against a tree and slumps her head forward. This exposes the nape of her neck, the weak point of all titans. Mikasa goes for the opening, which is exactly what the Female Titan was expecting her to do. Levi gets injured saving Mikasa and then has to sit out a major battle.
* Attack on Titan", after which Dimo gives in and gets out of the way.
* Attack on Titan. A human society under constant threat of extinction will naturally value its soldiers and military. In the world they live in, being in the military is well-regarded and the only way to advance socially; those that choose manufacturing or hard labor are considered cowardly. This leads to a lot of ordinary young men and women enlisting to save face and are hoping to make something of their lives (Jean enlisted because it's the only way for commoners to get into Wall Sina, Connie wants his village to think highly of him, etc.) even though a lot of them frankly have no place being on the battlefield. Even if they're physically capable of passing training, most lack the mental fortitude to actually fight in traumatic and stressful situations, leading to their quick deaths. Most of the Garrison and Military Police Brigade members freeze up and falter in combat, with only a few (mostly in the Survey Corps) being both brave and skilled enough to fight Titans on a regular basis. Possibly Reconstructed with Armin, who isn't very suited for soldiering but still remains valuable on the battlefield because of his intelligence.
* Attack on Titan aired the dub at 11:30pm, which is close enough to the trope.
* Attack on Titan a kind person, but not nearly as innocent or virtuous as most people are lead to believe.
* Attack on Titan, allowing the villains to seize their target and escape.
* Attack on Titan, amidst all the other problems involved, calmly telling them who is in charge of what as the guns were pointed at him.
* Attack on Titan: Among the regular titans are "Abnormal Titans", who display radically different and often much smarter behavior. The decimation of Eren's squad at the Battle of Trost begins with an ambush by an abnormal who jumps out from behind a belltower. During the 57th Scouting Expedition, Sasha nearly gets run down by an abnormal who crawls on all fours like a spider.
* Attack on Titan and hand-to-hand combat because the unique biology of Titans makes projectile weapons nearly useless, though cannons still get used in Titan defense to slow them down and rifles are kept around to enforce the law and to deal with possible civil wars or uprisings.
* Attack on Titan and is later stated to be one of the best at hand-to-hand-combat. That Annie was his teacher is left out, removing an important aspect of their relationship.
* Attack on Titan and no one manages to score a kill before everything goes horribly wrong.
* Attack on Titan and often responds to requests for information with a shrug or vague answer that clarifies absolutely nothing.
* Attack on Titan and suspended himself in mid-air using the equipment. He suffered a cardiopulmonary arrest and was pronounced dead when he arrived in the hospital.
* Attack on Titan" and then loosed his hunters and hounds on her for fun.

* Attack on Titan anime, Eren's dream is shown to be a variety of disturbing images of the Titans, dead humans, and ends with the scene of the Titan picking up his mother as shown later in the episode.
* Attack on Titan anime is its supposedly slow pacing. However, this complaint is way more common among those who watched the show in simulcast (and thus had to wait a whole week for each new episode) than among those who watched the whole thing in a few days.
* Attack on Titan anime when the Colossal Titan appears the second time.
* Attack on Titan Annie, who firmly states that people are by nature scum only concerned about themselves — those select few that go against the tide and have strong, unselfish convictions are greatly admired by her and considered "Special".
* Attack on Titan are, in absolutely all other respects, ordinary human beings. However, they're also the only race in the world who have the ability to transform into Titans, which happens whenever their bodies absorb Titan cerebrospinal fluid. Their ability also doesn't correspond to the traditional laws of biology; not only is the Eldian ability passed on to all descendants without dilution (unless the other races of the world are more "Eldian" than they care to admit), but the Founding Titan has the ability to remake the biology of all Eldians simultaneously, which was done at one point to grant them immunity to a plague.
* Attack on Titan are somewhat slow after the Titan attack at the start of the series, focusing on character interactions and world-building. Once the Titans show up in Episode 5 and all hell breaks loose, though, the show picks up and becomes a much more enjoyable watch. Though this only occurs in the anime; in the manga, the author chose to put the training mini-arc after the Trost battle was over, probably because he precisely wanted to avoid this trope. The drawback being that we are introduced to a lot of characters we don't know anything about right off the bat.
* Attack on Titan: Armin devises two in Episode 8, and a third one in Episode 11.
* Attack on Titan as a means of fighting the Titans, given their height and their one weak spot being on the base of the neck.
* Attack on Titan. As such, it has a completely different look and feel compared to the Wit Studio-produced first three seasons.
* Attack on Titan attacks northern Wall Sheena (the innermost wall), the troops prove rather ineffective, partly because they'd never dealt with Titans before.
* Attack on Titan AU fics usually follow the canon with little deviation until at least the Battle for Trost.
* Attack on Titan behind him, they run for the hills. Eren, being the cocky kid he is, thinks he scared the bullies off.
* Attack on Titan being forced to give the 104th training squad a sex ed class, which is funny enough. What makes it hilarious is that most of the cadets are totally clueless about sex and reproduction.
* Attack on Titan being prone to biting his tongue whenever he attempts to ride on horseback and speak at the same time. It serves as a sort of instant karma, as it usually occurs when he's running his mouth.
* Attack on Titan being that they didn't give him the pony he wanted has lead to Zeke being portrayed as obsessed with ponies in some circles.
* Attack on Titan. Black people have been observed here and there in the manga. Some seem to belong to the upper class, others are from nations subjugated by Marley. Onyankopon belongs to the latter group. He joined Armin's side under Yelena's leadership, in the hope of liberating his people.
* Attack on Titan. Both sides have much more in common than they would like to admit, and there is plenty of debate over what it means to be a soldier. It isn't really clear which, if either, is actually better.
* Attack on Titan) by comparing its direction with his earlier misinformation.
* Attack on Titan can be described as "Colossus Climb the Anime Series". The eponymous Titans range from being as large as houses to as tall as a skyscraper, and to reach their weakpoints, humans have to use waist-mounted grappling hooks.
* Attack on Titan chapter 38, the soldiers trying to locate the breach at night express the fear that Titans could be anywhere nearby and they wouldn't know until

it's too late due to the tiny pool of light provided by their torches.
* Attack on Titan characterization, as he learns to cope with his new status.
* Attack on Titan: Characters will often have long, complicated conversations while galloping on their horses. In real life, riding a galloping horse takes a bit of concentration, and you’d need to seriously be shouting at people riding next to you to be heard.
* Attack on Titan "Colossal Edition" that compiles the first five volumes of the manga, courtesy of Kodansha Comics. Another "Colossal Edition" compiling volumes 6 through 10 was released the following year, and volumes 11 through 15 the year after that. It's safe to assume the rest of the series will follow suit.
* Attack on Titan cosplay group that met at Anime Expo 2013 used the term "Troops"; whether this is widely accepted and used remains to be seen.
* Attack on Titan could count as this, with Erwin as the charismatic commander of the Recon Corps and Levi as his icy, bitter, and sometimes downright brutal second-in-command. This might be a subversion, though — Erwin can be just as dangerous as Levi in his own way.
* Attack on Titan deconstructs this. The military system in place makes sense on paper: the best and brightest defend humanity's center (the Military Police Brigade) and the rest either maintain the walls or go on scouting missions (the Garrison and the Survey Corps, respectively). This means ultimately the best soldiers are likely never to be where they're needed most, making them useless to the overall war effort. Few of them ever actually participate in combat. Additionally, any exercises that they do would involve drilling with their guns (as they are responsible for maintaining law and order) so the 3DMG skills that got them to the top are stagnated and see little further use because they're at the top.
* Attack on Titan. Despite several people in the series being highly proficient at fighting, the vast majority of humans are just regular people that enlist in the military hoping to never actually have to fight, which explains the high casualty rate of every expedition.
* Attack on Titan, despite that only the top 10 trainees in each class can join the Military Police, it's the weakest of the three corps because of their almost total lack of experience. The Survey Corps, which is also the least respected by the way, is the most powerful one, since they fight titans all the time. Soldiers who survive their first battle are regarded as real soldiers by Erwin Smith, which means the Military Police is full of "pseudo-soldiers".
* Attack on Titan, dies, Hanji points out that if the cause of death were a heart attack like the medics ruled, it would have lasted on average 15 minutes, and had symptoms beforehand instead of being instant death.
* Attack on Titan due to the grievous injuries they suffer in their battles.
* Attack on Titan. During the Battle of Trost, in which Wall Rose, one of the two remaining walls protecting humanity from the Titans has been breached, he says that anyone who doesn't want to fight is free to go, as long as they're willing to let their families be devoured by the titans. Considering that when Wall Maria had been breached, the result was a refugee crisis and the government sending a fifth of humanity to their deaths as a way of population control, he's not exaggerating when he says failure is not an option. Most of the soldiers agree to stand their ground, and with their help, the wall is sealed once again.
* Attack on Titan elements that would ultimately come to separate the second half of the series from the first.
* Attack on Titan, episodes 5 to the beginning of 13 take place in one day.
* Attack on Titan. Eren is soundly trounced by Annie during combat training, and is immediately impressed with her skill. This leads to them becoming close friends, with her teaching him how to fight.
* Attack on Titan Erwin Smith is a Mastermind, as he is perfectly willing to sacrifice his men to combat the Titans. Jean Kirschstein on the other hand seems to be developing slowly into a levelheaded leader.
* Attack on Titan. Essentially, he's responsible for setting a lot of the main events of the story in motion.

* Attack on Titan: Even though Titans spend all their time trying to devour humans, they don't actually need them for nutrition. Once a titan's belly is full, is spits up everyone it ate and goes looking for more. They only seem to need sunlight, as they become inactive at night.
* Attack on Titan, exploring how humanity deals with extreme circumstances like famine, land shortages, floods of refugees, and of course giant monsters that want to eat them.
* Attack on Titan fandom are quite close, especially on Tumblr and Twitter, despite being from complete opposite genres. Interactions mainly consist of jokes of characters crossing over, comparisons being made between them, or roleplaying.
* Attack on Titan fandom is also friendly with this fandom, mostly for the whole "Jaeger" connection.
* Attack on Titan features a scene where Pieck jokingly calls Porco "Pocco". Porco then reminds her that he'd told her never to call him that again.
* Attack on Titan features. However, some Titans stand out in this regard:
* Attack on Titan features several, as a direct result of Wall Maria being abandoned at the beginning of the series.
* Attack on Titan for a news report about an earthquake in Wakayama prefecture.
* Attack on Titan forever are acknowledged by the story, although various characters are in denial of both. The outermost wall is breached in the first chapter.
* Attack on Titan for humanity if Wall Rose falls as well. This harsh realization is what motivates everyone to stand their ground.
* Attack on Titan, for seemingly no reason. Our heroes are vastly out-gunned by the Titans, and they don't even have the consolation of dying a meaningful death, as the Titans don't even need to eat humans to survive –- they just think we taste good. The show gradually becomes less Lovecraftian as we learn more about the origin and motivation of the Titans, and as the heroes discover methods of fighting back.
* Attack on Titan from surviving a severe food shortage during her childhood. As such, she tends to habitually snag food whenever she sees it and is affectionately teased by her comrades for her thieving habits.
* Attack on Titan generally shouts and screams at one another or themselves as if they are in constant overdose of adrenaline.
* Attack on Titan: Glowing Ore harvested from the Reiss family's underground cavern. Thought to be produced by some sort of Titan power. It emits more light than a torch, and with appropriate manufacturing, can greatly extend nighttime operations.
* Attack on Titan good at detaching himself long enough to do whatever is asked of him. Beneath his stoic mask, he's a traumatized mess that hates himself and suffers nightmares about the people he's hurt.
* Attack on Titan, had a "disagreement" during hand-to-hand training which escalated into an impromptu match. Like high school students during a hallway brawl, the rest of the Trainees stopped what they were doing to watch, and some even started placing bets (Jean bet his entire dinner on Mikasa).
* Attack on Titan had to be scrubbed after an acrobat who was a key part of the staff died in a freak accident.
* Attack on Titan, Hajime Isayama, mentioned that his favorite character is Jean Kirschtein due to his ability to be blunt and say exactly what he's thinking despite the circumstances.
* Attack on Titan, Hannes declares his intentions to fight and defeat a Titan to save Eren & Mikasa. He charges ahead, gets one solid look at the Titan, immediately grabs Eren & Mikasa, and runs away with them instead. Most definitely NOT played for comedy.
* Attack on Titan has arms long enough to touch its ankles. Unique from other examples in that he uses these arms as a sort of human catapult, able to throw objects at near Mach speed.
* Attack on Titan has Levi always look stoic and angry, pretty much all the time. However in the OVA when he does crack a smile, it's pretty amazing and

heartwarming. And then when he smiles in the main chapter, it leaves everyone present absolutely stunned.
* Attack on Titan has Mikasa Ackerman: very attractive and, while jaded and ruthless, still a heroic character.
* Attack on Titan has numerous examples of this trope. Given the grim, and oftentimes cruel, setting that the story takes place in, the ability to deliver hard, verbal slaps to the face is almost a necessity.
* Attack on Titan has pretty great animation in general, certain action scenes involving 3D Maneuver Gear and other bits are given amazing, and sometimes very realistic animation and detail.
* Attack on Titan: Has the cheerful and outgoing Hange Zoe, who is a veteran member of the Survey Corps.
* Attack on Titan has two compilation films entitled "Crimson Bow and Arrow" and "Wings of Freedom" respectfully.
* Attack on Titan have wings on their crest, representing freedom. Fitting, considering they are the division that spends the most time outside the Walls and scouting the world for humanity. And thus we explain the anime's second opening theme by Linked Horizon.
* Attack on Titan having feelings for Krista. The former is officially stated to be in love with her, while the later has a crush that may or may not be serious. Krista, for her part, hasn't shown that she considers either one of them as anything more than a friend.
* Attack on Titan. Her archery skills were previously shown when she fought a Titan with only a bow, and lived to tell the tale.
* Attack on Titan. He wakes up in a fright with Mikasa nearby and tells her that he felt as if he had an extremely long dream but couldn't remember any of it. Mikasa then notices Eren crying and asks him why, and Eren couldn't answer that either. This was a change from the original manga where Eren only saw a seemingly older Mikasa with shorter hair telling him that she'll see him later before waking up.
* Attack on Titan in English. He primarily narrates the opening to an episode, recounting important past events or narrating important pieces of information.
* Attack on Titan in Episode 2 mentions that the territory outside of Wall Maria is unknown due to it being lands infested by Titans.
* Attack on Titan: Interestingly, the anime identifies its episodes as belong to these as well as each episode being part X of an arc. They are: The Fall of Shiganshina, The 104th Trainees Squad, The Battle of Trost, Night Before The Counteroffensive, 57th Expedition Beyond the Walls, and The Raid on Stohess District. Fans commonly refer to the last 3 as sub-sections as part of the Female Titan arc.
* Attack on Titan. In this post-apocalyptic setting, most of humanity is content to stay within the fortified walls of the last remaining settlement that the Titans are always trying to breach. The Corps are the only ones brave (or stupid, if you believe some citizens) enough and skilled enough to stray outside to fight them, but even they tend to have tragically short lifespans. Referenced by the first opening theme, as the German at the beginning translates to "Are you the prey? No, we are the hunters!"
* Attack on Titan involves giants who indiscriminately eat people, it shouldn't be surprising that this happens fairly often.
* Attack on Titan involves the singers promising pie if the audience lets them live.
* Attack on Titan is interchangeably referred to as "Char," "Lottie," and "Charlie" by her friends and family.
* Attack on Titan is one of the physically weakest characters in the Survey Corps, but eventually finds himself in this role to make up for it.
* Attack on Titan is replaced with his cheeseburger lunch being stolen on the first day of school.
* Attack on Titan is they are so easy to dull and break, each soldier carries twelve of them and can still run out.
* Attack on Titan is this to Commander Erwin, who is one of the few people Levi

respects. Though that doesn't exempt Erwin from Levi's rudeness.
* Attack on Titan: Its fast-paced mixture of action, gore and drama drew much more than ordinary shonen readers, despite being published on Bessatsu Shonen Magazine. The popularity of some characters among female readers earned it a spin-off runing in Aria, a Shoujo Magazine that boosted its sales over 500%.
* Attack on Titan: Its first season was 25 episodes long, then its second season was 12. The third season is quite unusual: it was 22 episodes in total, but it was split up six months apart into a Part One and Part Two consisting of 12 and 10 episodes, respectively. The fourth and final season was then scheduled for a very odd episode count of 16 episodes.
* Attack on Titan: It's not of uniform thickness, though, giving the impression of a brush pen.
* Attack on Titan, it's unlikely that any of them will explicitly get together in the story.
* Attack on Titan: Jean briefly discusses this in Episode 18, when they're ordered to stand guard in the forest of giant trees, mentioning that an unpopular commander may find themselves getting attacked from behind by one of their troops. Armin wonders if he's really going to do that, but Jean tells him he was just thinking out loud and will follow the orders.
* Attack on Titan Jean, who recalls seeing Marco's mangled corpse and those of the unidentified ones. Remembering how Marco was a born leader and saying that Jean, despite knowing and admitting that he's a coward, would make a great leader, Jean heads to the other survivors of the 104th squad and tells them of his decision: he will join the Survey Corps, to fight against the threat of the Titans in hopes of not losing anymore friends and having to witness these cremations.
* Attack on Titan joined in this trope with the release of the second official Guidebook.
* Attack on Titan: Junior High are no longer just lumbering, flesh-eating zombies, and actually attend school like the human children.
* Attack on Titan: Junior High, implied to be a senior before she becomes a ghost.
* Attack on Titan: Junior High: In the opening, Armin uses his futon as a hang glider as the human students fly around a Titan classroom.
* Attack on Titan: Junior High it... for a female Titan who was his real secret admirer. He then goes crazy at the revelation.
* Attack on Titan just in the nick of time during the Battle of Trost. Bonus points for actually riding horses from place to place before switching to Maneuver gear.
* Attack on Titan later confirmed they had been so equally matched the instructor had to interfere and call it a draw.
* Attack on Titan. Later, he's also willing to consider that Eren's problem may be faulty equipment, rather than incompetence. It is, however, noted that training is exceptionally unforgiving and instructors regularly do things like cut safety lines to gauge a recruit's reaction. Those killed during training are written off as having never had a chance to stand against the Titans anyway.
* Attack on Titan Levi makes a rash decision to try and go after Erwin on his own, despite the weather making visibility almost nonexistent, leaving his best friends Isabel and Farlan alone in truly dangerous conditions. As Levi rides out, he runs across the devastation left in the wake of a Titan attack. Upon realizing that his friends are in danger, Levi turns back but is too late. He runs across Isabel's severed head and witnesses a Titan finishing off Farlan. Not more than a moment later, Levi unleashes a truly terrifying assault on the Titan, drawing out the attack as long as he can while screaming in anguish. After he finally delivers the killing blow, Levi stops and stands above Isabel's remains with his head lowered, and sobs.
* Attack on Titan, Levi's squad conducts a series of perfectly coordinated and precise strikes on the Female Titan with minimal spoken communication.
* Attack on Titan long delay in the production of the 2nd anime to allow for story developments to catch up and to avoid this happening again. It seems to have worked: after the second season aired in 2017, the anime has managed to continue releasing annually after that, with Season 3 divided into two parts in 2018 and

2019, and the same goes with the first part of the final season in late 2020 to 2021. The manga ended in 2021 which gives enough time for the second part of final season to be produced and released on early 2022.
* Attack on Titan, made by Hajime Isayama himself, pokes fun at some of the fandom's memes and shipping pairs.
* Attack on Titan manages to have two distinct tones for each medium; the anime is notably more serious in atmosphere than the manga—of which teeters between stomach-churning gore and campy discussion about secret butt-wiping techniques.
* Attack on Titan: Many civilians look down on the Survey Corps as lunatics and a waste of their taxes.
* Attack on Titan matters, leaving them either dead or thoroughly broken.
* Attack on Titan, meaning that the person in question is actually an enemy.
* Attack on Titan, Mike Zacharius suffers a brutal one when the Beast Titan removes his 3D Maneuver Gear and leaves him to be eaten by several Titans of differing sizes and all he can do is scream as he's devoured.
* Attack on Titan narrowly avoided this fate after failing his mission. It took 4 years of exceptional military service on the front lines to get his superiors to allow him to finish his Tenure.
* Attack on Titan. Not a good idea considering she's likely the second most powerful human in the world and, much more, she's perfectly willing to face down everything from a squad of cannon-armed soldiers to entire hordes of Titans to the world's strongest man himself just to keep Eren safe.
* Attack on Titan of Jean being the backflipping soldier in the opening, Jean was shown performing that exact move as an escape maneuver when his group encountered the Female Titan.
* Attack on Titan of the Titans, he probably would have succumbed to despair long ago.
* Attack on Titan once the real fighting starts since they have no real experience fighting Titans.
* Attack on Titan on her, and Eren later charges straight through a building to get at the Female Titan later in the fight.
* Attack on Titan. Ostensibly they want Wall Rose permanently sealed off for humanity's safety but really they don't want Wall Maria to be retaken so as to profit from the lack of farmland and high number of starving refugees.
* Attack on Titan OVA, which is based on the manga's "fake previews", takes the point of view of the supporting 104th trainees, and is meant to be much more comedic and nonsensical than the rest of the series.
* Attack on Titan, particularly the anime. The series doesn't miss a chance to ramp up the music, animation and acting whenever a plot development or action scene occurs. The manga itself also uses melodrama to punctuate the sheer dread, panic and gut-wrenching tragedy of both war and nature in general.
* Attack on Titan promises not to hurt the Titan she's fighting...and immediately killed it, saying a variation of this.
* Attack on Titan reveals some subtle foreshadowing about their true nature.
* Attack on Titan, Sasha Blouse's energetic disposition and pluckiness lands her here. As emphasized in her introduction: Shadis sentenced her to run until she collapses, and she does it without complaint. What got her upset was being denied any dinner. Sasha later has several brushes with death, but never loses her optimistic nature.
* Attack on Titan says Ymir's feelings are romantic in nature, though it's still unclear whether Krista likes her that way or if it's just platonic.
* Attack on Titan, simply by saying that if he does so, he'll be reunited with his father. Reiner realizes too late that his father wants nothing to do with him.
* Attack on Titan's suicidal martyr complex than her dishonesty in not admitting to herself that she has one.
* Attack on Titan), students who want to join the Military Police Brigade prioritize 3D Maneuver Gear training over melee combat training. This means that the soldiers who would be expected to fight human-sized opponents more often are actually the least qualified ones to do so.

* Attack on Titan style, until he snaps out of his funk and returns to "kill all titans" mode.
* Attack on Titan summons Titans to swarm and eat her body before the Survey Corps can capture her, he observes that the Titans did not eat a human as they tore the Female Titan apart. He takes this to mean the Female Titan-shifter escaped and is hiding among them in disguise. He is proven right moments later when she attacks Levi's squad.
* Attack on Titan survivors of the final engagement are the main characters and one random guy.
* Attack on Titan takes on shades of this very early on and rolls with it. The protagonists' powers are well-defined through experiments and antagonists have a tendency to pull out new ones every so often. Even fights will usually hinge on calculated gambles and reverse psychology. This is perhaps best demonstrated by the massive fight of the Return to Shinigashima story arc, which included such plays as the enemies nuking a city using their preestablished powers while the protagonists get around them via trickery and attrition.
* Attack on Titan than the world itself. Also, one of the manga's biggest questions — just what the hell Eren's father hid in his basement — only got revealed in September 2016, more than five years after the manga first started publication.
* Attack on Titan that the horses have been specially bred for speed and endurance. Good thing too, they're the only way to escape a Titan on open terrain.
* Attack on Titan that without love they're "doomed to repeat it all again. The same history. The same mistakes. Again and again." While it hasn't yet been made clear exactly what he's referring to, the context implies he's talking about this trope.
* Attack on Titan: The anime provides a chilling example in the score. It might as well be the punctuation mark on the end of hope. The first episode also pointedly has the church bell ringing when the front gate opens, not long before the Colossal Titan appears. At least the second time around, the bells signal for civilians to evacuate and they successfully do though the connotations are still the same.
* Attack on Titan: The blood splatter and several 3D maneuver gear scenes are done in CG.
* Attack on Titan, the branch of the military devoted to reclaiming lost territory, is a firm believer in this.
* Attack on Titan, the Female Titan hears a roar and the sound of rapid footsteps. She turns around in confusion just in time to take a punch to the face from the Rogue Titan.
* Attack on Titan the higher-ranking members of the Police Brigade are seen slacking off, forcing the new recruits to do all the dirty work.
* Attack on Titan The how and why of their abilities drives the story, but the fact of their existence is enough to distort the world's military politics around themselves.
* Attack on Titan: The merchant in Episode 6 whose cart is blocking the escape route for the civilians because it's stuck in the narrow passageway. The civilians try to get a soldier to arrest him, but the merchant fires back by saying he's the one who brings the food for the peasants. He also tries to make Mikasa cooperate, but she instead forces him to remove the cart so the civilians could escape.
* Attack on Titan, the Military Police, whose ranks are made up of only the top ten trainees of each class, count "bodyguard for the king" among their duties. The irony that this means that those with the most skill at fighting titans are kept the farthest away from the fighting is fully lampshaded, although the main character's class is the exception as several of the top ten volunteer for the front line instead. Later it also emerges that the Military Police are hopelessly corrupt.
* Attack on Titan. The military was providing medical care for their ailing father, who was able to "die in comfort" thanks to their child's service.
* Attack on Titan: The overall goal of the Titans, though they're more interested in devouring the humans than the base itself. A more specific instance occurs when

Titans occupy the Garrison HQ during the Battle of Trost, forcing the troops to attempt to retake it so that they can refill their 3D maneuver gear gas and keep fighting.
* Attack on Titan, there are more straightforward examples in the form of cities like Zhiganshina and Trost, placed just outside of the main structure of the walls with outcroppings surrounding them. The heavy guard and gun presence on the walls of those cities is actually a cost saving measure for the rest of the wall; manning the entire wall would spread defenses impractically thin, so the cities are set out as bait to draw the Titans to specific points where defensive elements can be concentrated.
* Attack on Titan There are other female Titan Shifters, but none who are part of the unit.
* Attack on Titan, there is Hange Zoe, whose life philosophy is pursuit of knowledge, and she gets pretty excitable when the opportunity presents itself to learn something.
* Attack on Titan, the remnants of humanity live inside an area protected by three absolutely massive ring walls. All the lands outside are claimed by man-eating giants that have hunted humanity to near extinction. The plot of the series is kicked off when the walls begin to fail...
* Attack on Titan: The Titans (giants) love to play with their food (humans), and will bite off people's bodies in bits spraying blood everywhere in the process. Or even just injure humans so they bleed out and leave them to die. The scariest part is that they don't even need to eat to survive. They eat humans for fun, and just throw them up later. So all the casualties in battle are pretty much killed for no reason.
* Attack on Titan: The Titans; the fact that how they work makes very little sense is an important plot point, as one of the Survey Corps' stated objectives is to better understand Titans and how to better defend against them/kill them.
* Attack on Titan, the Walled City is pretty much all that's left of human civilization (at least as far as it's known) after the Titans ate everyone else.
* Attack on Titan, this is the standard operating procedure, where one group distracts the titan and the second group (usually more skilled) goes for the kill. Sometimes this works and sometimes it doesn't.
* Attack on Titan, this turns out to be how Eren's parents became a couple. An epidemic had swept through the village, and among the victims of the disease were Carla and her parents. Grisha was the village doctor that cared for them and saved the village by developing a treatment. The couple ended up falling in love and married soon after.
* Attack on Titan thrives on people doing horrible deeds in the hopes of good outcomes.
* Attack on Titan throws several curveballs regarding the nature and motives of Titans within the series, most of which just raise more questions than provide answers.
* Attack on Titan Titan, he takes it down by spinning up and down its arms and legs to avoid its attacks and disable its limbs.
* Attack on Titan) to be dumped so the cart carrying them can escape. And none of the soldiers, including Levi, are happy with it.
* Attack on Titan to Levi's squad, and was the most supportive and kind member.
* Attack on Titan, to put it simply. True to form, the typical Titan is a humanoid creature about 50 feet tall, being described in the series as 15 meters. Some can grow to be hundreds of feet tall and there are several smaller variations, though even the "tiniest" Titan will still be about 9 feet tall (3 meters). The largest one in size is the Colossal Titan, standing at 60 meters (almost 197 feet).
* Attack on Titan to the way it ended up in the manga, since it more closely matched his original plan for how he wanted that scene to go and he regrets not using it. In fact, he outright pushed for many of the changes himself in order to 'improve' on the manga.
* Attack On Titan Tribute Game, defeating the Colossal Titan requires scaling it to get at the nape of its neck. Unfortunately, the hitbox is pretty small relative to

the rest of it, and players attempting to slay it are in for a lot of frustration as it moves around. It even has a red smoke shield that kills any player still on its body for a certain amount of time.
* Attack on Titan used by the protagonists are created with closely guarded secrets by the most prominent blacksmiths.
* Attack on Titan Vol.3 Blu-ray. This spin-off features Levi as the main character and serves as a prologue to the main series.
* Attack on Titan was inspired by an incident that occurred while author Hajime Isayama was working at an Internet cafe, in which an irate customer seized him by the collar and yelled at him. This incident caused Isayama to reflect on how frightening it is to meet someone you can't communicate with, and created the silent, monstrous Titans to express that fear.
* Attack on Titan wear flowing capes which nock at the shoulder; those riding horses all wear capes which, weirdly, move about in perfect synchronization (each cape moves exactly the same on every rider!!)
* Attack on Titan were woefully naive about just how terrifying Titans were. Even after their hellish training, most start panicking during their first mission and die like flies.
* Attack on Titan, when a third of humanity's territory is overtaken by the titular giants, a fifth of the population— mostly refugees from the lost territory— is hastily conscripted for a suicidal counterattack. While the best-case scenario is obviously for the attack to succeed and the territory be retaken, the government barely even tries to conceal that the true objective is to reduce the population to free up food and resources for those that remain. It does not succeed, and the attack force is lost nearly to a man.
* Attack on Titan when he admits to the grieving woman and all those around him that his and the sacrifice of everyone before him has been entirely senseless and that nothing has been gained in their forays into the Titan-infested lands beyond the Walls.
* Attack on Titan when he's assigned to Levi's Special Operations Squad.
* Attack on Titan, when the heroes finally make it to Eren's father's basement, the key Eren had been carrying this whole time won't fit in the lock. Levi loses patience and just kicks the door down.
* Attack on Titan. When the main form of combat is high-speed aerial acrobatics, goggles are pretty much the only way to keep from losing one's vision-correction apparatus. They also serve much in the same way as pilot's goggles, although that raises the question of why more characters don't wear them, as only Hange is shown to wear them more-or-less regularly — and she wears glasses anyway.
* Attack on Titan, where the mouths are also simplified and follow words rather than expressions and the 'clean' style leaves the faces with no reference marks for expression whatsoever. This leads to some rather Narm -ish moments in the earlier episodes where characters are screaming at each other and trying to chew the scenery and 'emotional' reaction-shots are spammed... with every character bearing exactly the same facial expression as the 'peaceful times' illustrating dinner scene from the first episode.
* Attack on Titan. While it's obvious why the humans are fighting the Titans — they don't want to get eaten — it's not clear what the Titans are, where they came from, or why they eat people. So their motives, if they're even intelligent enough to have any, are completely unknown, and so the struggle continues.
* Attack on Titan. While Jean tries to comfort him, Connie and Sasha can barely stop themselves from laughing.
* Attack on Titan. While most adults commit horrible acts fully aware of what they are doing, many of the 104th Trainee Corps express callous attitudes or commit cruel actions because of their inexperience or emotional immaturity:
* Attack on Titan. While not strictly undead, Titans lack many of the hallmarks of living beings and make about as much sense as a zombie in terms of how they function.
* Attack on Titan while the 104th Trainee Squad are doing an exercise, Connie leaps

in to steal a kill from Jean. Subverted though, in that Sasha then goes and steals it from Connie.
* Attack on Titan: While the majority of characters are anything but this when faced with a Titan the same can't be said for Eren who won't give up even when in a Titan's mouth about to be chomped.
* Attack on Titan, with a tendency to linger awkwardly on the outskirts of conversation.
* Attack on Titan, with society labeling anyone that doesn't enlist a coward. For many children, the military is their only option due to widespread poverty and food shortages.
* Attack on Titan with understanding the Titans, she is the closest thing to a scientist in the Scout Regiment. She also wears glasses.
* Attack on Titan, won't hear and try to come back to the Titan that's about to eat her.
* Attack on Titan worth of character deaths, revelations, and plot twists. You miss one chapter or episode, and the next one has you lost.
* Attack on Titan. Years ago Mikasa's parents were murdered in front of her, Eren killed the criminals and then took her into his family; after the disappearance of Eren's dad and the death of his mother, he is the only family she has left.
* Attack on Titan, yet they will only eat humans, who haven't been available to eat in large numbers for nearly 100 years. It's implied that because of their lack of digestive systems, they eat humans just because they're tasty. If the observations about them slowing down when they're deprived of light are any indication, their bodies act like solar panels to absorb and use energy.
* Attack on Titan. Ymir's in love with the shorter and more feminine Krista.
* "Attack Pattern Delta consists of flying straight at the enemy in the only direction they can actually shoot back".
* Attack Pattern Delta" involves flying directly at the only guns the enemy has. Who exactly wrote with the Rebels' playbook?
* Attack Patterns Alpha, Beta, Delta, and Omega are all Tactical techniques which are extremely useful in battle (Evasive maneuvers, as mentioned above, is also available). Gamma is given to a Jem'Hadar ship, for whatever reason. Pilot Specialists also get Attack Pattern
* Attack Reflector cannot use its effect while attacking, meaning you need to lure the opponent into hitting it.
* Attack Reflector that can reverse even the strongest attacks with ease.
* attack series. In Double Dealing Character and Hidden Star in Four Seasons, due to the circumstances surrounding the incident in each case, Marisa's signature Love Sign "Master Spark" gets a Palette Swap in each (In the former, she Bewitched Weapon "Dark Spark" due to her Mini-Hakkero being possessed, and in the latter, she gets Love Sign "Master Spark Frozen" due to being infused with the power of winter).
* attacks Queen Chrysalis in the ICC, there are no repercussions beyond kicking her off the premises.
* Attacks that hit the whole screen or disable enemies in some way tend to be ineffective against the vast majority of Robot Masters and bosses. That said, there's usually one Robot Master who isn't immune, and they tend to get completely screwed by it. A good example is Torch Man from
* attacks with English names Whether this is due to it being influenced by anime, or due to the creator's wife being Singaporean, is up for debate.
* Attack the Block. And a fur so dark it always appears pitch black, thus the teeth are the only visible trait.
* Attack the Block and a small-time drug kingpin seeking to exploit the chaos to kill them.
* Attack the Block has aliens landing in London, but it's not exactly the postcard version.
* Attack the Block has an all-black version of the Studio Canal logo (completle with unusually black clouds), to match the colors of the film's aliens.
* Attack the Block have no eyes, and are implied to perceive their surroundings by

scent and echolocation.
* Attack the Block, the main teens are implicated in mugging a woman. In the end, after fighting off an alien invasion, they're arrested for that crime as well as blamed for all the alien-related deaths.
* Attack the Block, who are first shown mugging a woman but become heroic after they team up with her after aliens attack.
* Attack the Injury: Exploit a character's injury (whether suffered before or during the fight) to win.
* Attack the Injury: In this case, the weak point was created, either before or during the fight.
* Attack the Injury: Someone tries to attack an existing injury, usually in an attempt to gain the upper hand in a fight.
* Attack the Mouth: Someone is hurt or killed by being attacked in their mouth.
* Attack Vector: Tactical, an air-to-air modern age fighter combat game.
* Attack Vector: Tactical features only humans fighting other humans. These humans have only explored and colonized a relatively local part of interstellar space, though.
* Attack Vector: Tactical, lasers are actually built with energy inputs, conversion efficiencies, wavelengths and diffraction limits and aperture sizes to build the weapon tables. One damage point is 50 MJ delivered 'roughly instantaneously' over an 8 cm diameter spot size - this is roughly the equivalent of 12.5 kilos of TNT detonated into a focused spot the diameter of a soda pop can. The conversion efficiencies and laser wavelengths were chosen to make the game interesting, but within those bounds, they're scientifically accurate. The coilgun rules walk the launching player through four frame of reference shifts to present a firing card that ends up being the ducks eye view of a shotgun blast, and coilguns can be very long ranged.
* Attack Vector: Tactical. Ships are visible long before they reach effective guns range. In other Ad Astra titles, stealth in space is allowed, in large part because they're not aiming for as much of a hard-science feel.
* Attaining level 50 with a certain race can Unlock that race, allowing a player to play as that race for classes which do not normally allow that race, such as making a Chiss Jedi. Attaining level 50 with a Human (which can be used for all classes in the current game) adds a small Presence buff for all characters.
* attains all of their knowledge and memories (including muscle memory).
* At tax time, you often see people standing out on street corners, waving to cars, dressed as Lady Liberty or Uncle Sam. A Maple Leaf, if you're in Canada.
* attempt, and, using a device, age accelerated her baby into a teenager and implanted her mother's memories into Shego's brain, with some tweaking to make Shego believe she willingly joined Drakken.
* attempt, as every time she faints, she faints so deep that the water (or indeed anything else) doesn't even come close to making her stir, so everyone eventually gives up, leaving her to wake up from her dead faint naturally on her own many hours later.
* Attempted and averted in a strip by Argentinian cartoonist Quino. A man desperately crawls into a bar/diner and begs for a drink, "to forget her". The worried bartender asks him: "To forget who?". The man stops for a second, opens his mouth, and closes it. After a minute of futile attempts at remembering, the realization strikes, so he smiles, straightens up, grabs the menu and orders a normal meal.
* Attempted and briefly successful: Jack confronts Gavin Volure, a friend of his who he believes to be a successful businessman, but is actually a criminal under house arrest for tax evasion. Gavin enters the restroom and continues talking to Jack. However, his responses seem rather generic, and Jack catches on quickly. He opens the door and sure enough Gavin has fled out a window and left a tape recorder. The tape goes on to compliment the acoustics in the room and then break into song.
* attempted assassination of Gabrielle Giffords. When he was finally ruled competent in August 2012, he and his lawyers agreed to plead guilty in exchange for

a life sentence (Arizona has the death penalty). Considering that it's anyone's guess whether Loughner could have been kept on the "mentally competent" list for the full duration of a trial, the deal was accepted.
* Attempted aversion/bizarre example: Judd Apatow wanted to shoot an actual birth for
* Attempted aversion by the wonderfully talented William Forward who played Lord Antono Refa in seasons two and three. Forward made every attempt to emulate Jurasik's bizarre creation.
* Attempted, but failed in "Two Days Before The Day After Tomorrow". Stan wants to just confess what they did to avoid the usual antics, and it doesn't work, instead turning into an
* Attempted but ultimately subverted with a Florida teenager, Jacqueline "Nikki" Reynolds in 1997. To wit, she was adopted by a loving Christian Fundamentalist couple as a baby, but grew into a rebellious/mentally ill teenager and began to date a boy who the parents did not approve of.
* Attempted by a tree witch in the "To Cut a Woman's Hair" episode of
* Attempted by Maurice de Bracy and Brian de Bois-Guilbert when they abduct Rowena and Rebecca in
* Attempted by Preston Northwest once Bill Cipher and his fellow demons
* Attempted by Rudy in the Nazi timeline. He's caught in Curtis's bar during lockdown and tries to explain his presence by claiming to be Curtis's lover. As this is a Nazi timeline, this doesn't work out very well for them.
* Attempted by Wrestling/Dolph Ziggler in 2011, where he cut his bleached blonde hair into a brunet buzzcut. But
* attempted coup nearly scuttled Japan's surrender even after the atomic bombings of Hiroshima and Nagasaki, with the intent to stop the intended announcement of surrender by the Emperor and get the country to fight to the bitter end.
* attempted, did it with more success thanks to being filmed at Shepperton Studios' backlot.
* Attempted (failed) positive example: on the Martin Luther King, Jr. memorial, a quote was mashed up into "I was a drum major for justice, peace and righteousness." The problem: it was a rhetorical device from
* Attempted in "No Laughing Matter" where Luan tries to give up telling jokes, and her siblings try to tempt her by setting up jokes, but she isn't tempted.
* Attempted in season 1 when the Hood tries talking out another vigilante, the Savior, from performing
* attempted, intending to install an engine at the Earth's core, but failed.
* Attempted in "Traitor". Dayna (played by an actress of West Indian descent) is worried
* Attempted in-universe in "Ghost Story". The kids are, as the title would suggest, telling a
* Attempted movement. Detroit Spiritualists Thomas Bradford and Ruth Doran wanted to test whether or not an afterlife truly existed, so they came up with what they believed to be the only way to conclusively prove the existence (or lack thereof) of an afterlife: Bradford would commit suicide, and afterward his spirit would relay details about the afterlife to Doran. He went through with the suicide, but Doran would later report that she never received any messages from him.
* Attempted multiple times by the Beagle Boys and Magica against Scrooge's Money Bin in the
* Attempted offscreen by Owen Sleater on Joe Masseria in a Turkish bath.
* Attempted once on Diabolik himself. Diabolik resisted for a while, then 'broke'... And lured most of his captors in a deadly trap before returning to their base and kill them all. That's what happens when you deal with someone nicknamed
* Attempted on Ginko by some criminals, and failed miserably. After all, if the guy's
* Attempted, on the titular mecha, multiple times, by the main team of
* Attempted Rape: A would-be rapist tries to attack someone but ultimately fails.
* Attempted Rape but they end up kissing in the hospital room. Thea returns the favor by saving Roy in the season finale, further cementing their relationship.

* Attempted Rape fill loosely inspired by the infamous "Financial Crisis Gang Bang" comic falls under this heading; in it, Canada is extremely angry at America and decides to rape him as "punishment", but Canada is "too polite and too French to make sex unpleasant".
* Attempted rape plays a major role in Roman's backstory, but he wasn't the one who was being targeted. Roman tried to stop a fellow Beacon student from raping a Faunus woman, but Roman was the one who ended up expelled when the woman refused to back up his story. This left Roman jaded and cynical. While in jail, he was asked to do a crime and that started his life of crime.
* Attempted Rape than once. Tends to be less common these days as it can be seen as trivializing or downplaying the effects of sexual violence.
* Attempted Rape. The character is burned at the stake soon after English guards tried to rape her and she fought back.
* Attempted Rape, the giant Tityos is tortured forever in Tartaros for trying to rape the goddess Leto.
* Attempted Rape was captured by a nearby building's security camera. The news station kept playing it like it was a blooper reel, and the general population found it to be funny too. Apparently the "humor" was supposed to be that Grace bowed her head and said a quick prayer before picking up a broken bottle and defending herself, or the laugh was supposed to be that her friend Ricky came rushing in to help her and he wasn't wearing a shirt. Either way, the reaction of most viewers was that it wasn't funny.
* attempted suicide by fire as a protest against bad conditions in the country (he died later in the hospital). Besides a full-blown revolution in Tunisia, Bouazizi's actions have inspired four copycats in Egypt, where the Mubarak regime fell one month after Bouazizi's death. Other Middle Eastern nations - Jordan, Syria, Algeria, Libya, Bahrain, and Iran - are undergoing mass protests in response to what happened in Tunisia and Egypt.
* Attempted tells Megumi that Pretty Cure can't be in a romantic relationship. It's hinted, though, that something in the past that Blue did lead to him invoking this trope.
* attempted the Jury buys the prosecution's theory out of sheer indignation at them and they're convicted.
* attempted this when he got himself put in charge of moving to a different building, threatening to abuse his power to assign people cubicle locations: "I banish you to the cubicle closest to your boss!"
* attempted to burn an EU flag in his back garden, leading to him constantly staring at the flag in disbelief and wondering why his tiny cigarette lighter (also a point he was criticized for) was only singeing the flag's corner. The fact that he went on to upload the video after all of this was just the icing on the cake.
* attempted to develop a drug to dampen people's violent impulses. It didn't work: most of the population they tested it on became so apathetic they basically just laid down and died, and the few that didn't instead had their violent impulses clocked Up to Eleven
* attempted to participate in a conversation. The exact length of the "cycles" she mentioned was not stated, and considering the nature of the Borg could be anywhere from seconds to years (though probably closer to the latter).
* attempted to ritually sacrifice himself to the elven creator god Asuryan
* attempted to rob a convenience store occured, as the saw wouldn't start properly, and he had to run away before being eventually caught by the police.
* attempted to set up an insanity defence was based) spotted him as a phony, it was confirmed via a simple trick by another doctor, Martin Orne, and the whole charade collapsed.
* Attempted unsuccessfully by Jamie Minor. She tried sneaking into her workplace by the air ducts but got trapped, and was found dead over a month later.
* Attempted weaponisation of this trope in Season 8 episode “Cassandra”.
* attempting a vacation when she runs across a doll that seems able to control humans around it. Usually to perform violent acts against themselves.
* Attempting common tasks in a manner the trainee is not familiar with, such as

fighting while leading with their other hand or wayfinding in foreign territory
* Attempting—out of anything less than desperation—to use obsolete weapons, tactics, or styles of warfare against the very weapons and technology that
* Attempting something that requires deep concentration while there are distractions, ranging from obnoxious noises to a whole other facet of training to deal with
* attempting suicide, claims that Ren and Ryuji, who'd talked to Shiho earlier, had been bullying her.
* Attempting to allow an entire stadium full of innocent men, women, and children to be consumed by alien lifeforms.
* Attempting to cross flowing water is enough to outright kill a vampire.
* Attempting to cut the train, disconnecting the passenger cars (uncoupling the train will activate the air brakes, causing them to stop)
* attempting to kidnap her, and finally inducing her death. Understandably, his "love" was unrequited.
* Attempting to mimic the success of The Kings of Comedy Tour, The Blue Collar Comedy tour bombed in theaters, but did much better on DVD. The two followup movies bypassed the theaters completely after it was realized their audience didn't want to see it in theaters.
* Attempting to murder his unborn child by poisoning the mother succeeds in killing only the mother. The child ends up in the hands of Madoc who, having his hands on a secret member of the royal family and aware of Dain’s depravity, decides to shift loyalties, resulting in Dain’s murder just as he was about to be king.
* attempting to pick up a small marble that is perfectly shaped to slip from his fingers every time he manages to grab it. Nermut considers this to be a punishment for himself as well, since he has to sit and watch until it's over.
* attempting to rape Hera (and only sort of succeeds; he rapes a cloud nymph in the form of Hera from which the centaurs are born). An infuriated Zeus banished him to Hades, where he's strapped to a flaming wheel and left to spin around for the rest of eternity.
* Attempting to scroll down with the down arrow while watching a movie or TV show and there is a pause in dialogue, as a result of spending copious amounts of time reading on the computer.
* Attempting to use one's car alarm remote to lock/unlock one's home's front door.
* Attempting to use the car radio's volume control to make human passengers louder.
* Attempts at doing something different (such as one Scottish sign showing men in kilts and women with extremely large breasts) can be hilarious.
* Attempts at reviving dead people with alchemy creates a badly-constructed human body made from chemical elements. This body, which has no soul or consciousness and only the most rudimentary of biological functions, usually expires within moments of its 'birth'. One alchemist in a bonus chapter managed to create a body that was capable of maintaining biological functions... but all it could do was sit there, with brain functions barely above a vegetative state. And while the characters believed there was a soul in the body, there's no way of telling whether it was the soul of the dead person the alchemist was trying to revive, or just some other random soul.
* attempts at telling the others that the Mannish Baby is one of Dio's minions forces him to try and make it expose its true colors. It ends up working in their favor since it allowed Kakyoin to bring his Stand to the dream world.
* Attempts had been made for ages to sell 3D accelerators, and while 3dfx's Voodoo made a good argument, it was a combination of
* Attempts have been made to teach primates sign language. Teaching them to make signs is very possible, and several have been taught to make hand signs (usually based on American Sign Language), but they're incapable of using them in a coherent fashion that would resemble language; while they can associate a sign to an object or person, they can't string them together into grammatically correct sentences. For example, Nim Chimpsky's longest "sentence" was "Give orange me give eat orange me eat orange give me eat orange give me you."

* attempts. It doesn't work, mostly because the hero isn't in the mood to just let him get away.
* Attempts of the writers to give a scientific explanation for this (
* attempts on Hitler's life between '34 and '44, not including 10 or so in '33, and another 4 before that.
* attempt, so while he tries to court her and sets up an engagement dinner, they don't actually get married.
* attempts to become this by sabotaging the pyramid Skeletor had built to drain Orko's magic so that the magic flows into Negator instead. Unfortunately for Negator, Skeletor saw the betrayal coming and imprisons Negator in another magic-draining pyramid.
* attempts to bolster their public image with an ad campaign reminding the public that they're not serial killers. When presented at the Awards for Advertising American Ads, it wins the award for Best Improved Image. The audience is so disgusted with the pro-NAMBLA PSA that even a member of NAMBLA takes offense.
* attempts to commit suicide to prevent himself from becoming a monster, and then after she heals him for six months, uses it as a bargaining chip
* attempts to do the chair-hop, but ends up simply falling over, knocking over a steel drum and landing in a gushing pool of gasoline. This doesn't end well.
* attempts to execute his nephew after believing he murdered his son Tugtekin, only stopping after Tugtekin is brought to him alive.
* attempts to explain everything with a hastily-improvised sob story about a crippled boy attempting to train a horse to win the Grand National. He stops halfway through when Dougal reveals that they found out the real culprit while Ted was out of the room.
* Attempts to teach small children and animals how to behave are at risk of falling foul of this trope if the time between the misdeed and the scolding is too long. Instead of correcting the misbehavior, this can actually make it worse by creating stress and confusion.
* attempt (they end up not finishing the job because Achoo the dog kept barking). As before, it doesn't work out well for them: Rosto the Rogue is rather annoyed by them trying to kill one of his friends outside his court and has them beaten to death.
* attempt they have to pass the deck to the proper dealer, but once the deal is complete, the hand must be played.
* attempt to explain to his class how the perceptions we have of a person can influence our reactions to his/her behavior. Only Cromartie could take a topic as dull as that and make it so bizarre and funny.
* attempt to revive it by just repeating "Gold ore," and then added, "I got all day. How long have you got?"
* Attenberg, it is established that Bella is more sexually experienced and that Marina feels inadequate. And then hardly a conversation goes by without Marina calling Bella "whore", "stupid", or (depending on the translation) either "wild animal" or "predator".
* Attenberg, it is likely that much of the conflict and cruelty between Marina and Bella is actually neither conflict nor cruel.
* Attenberg. Much of her strange behavior in the film could be explained as her trying to cope with her dad's impending death.
* Attenborough himself has ended up on the receiving end of this, though
* Attenborough who is best described as a crazed muppet. In fact, his
* Attending Your Own Funeral: A living character attends their own funeral, whether they've been faking their demise or were simply mistaken for being deceased.
* "Attention and Initiative", because it shows RED Team not responding to any threat to their progress, noticing the problems just in time to help but not actually helping.
* Attention Bandits for its positive portrayal of stuttering: it was presented just as a distinctive quirk, rather than a disability or a drawback.
* Attention-Deficit Disciple, whose sidekick starts to join in to the disapproval of their leader.

* Attention Deficit Disorder Man; the only way ADD Man was able to defeat him was by making him injure himself from his own products, giving him nobody to sue but himself.
* Attention Deficit... Ooh, Shiny!: A character is easily distracted by the most trivial of things.
* Attention Deficit... Ooh, Shiny!: A character who has trouble paying attention and gets easily distracted by the most trivial of things.
* Attention Deficit... Ooh, Shiny!: Has no attention span and is easily distracted.
* Attention Deficit... Ooh, Shiny! interrupting that train of thought.
* Attention Deficit... Ooh, Shiny!: You're easily distracted by something.
* "Attention duelist! My hair is definitely not leading you into a trap!"
* Attention everyone! She's here, she's nice, she's friendly... she's a rotten kind of cute, give it up, for the ZOMBIE ENJO KOSAI. Inspired by the song Zombie Prostitute, by Voltaire.
* Attention Please is a dance-rock album that sounds nothing like their usual metal/hardcore/noise oriented albums.
* Attention Scum had a recurring skit starring Johnny Vegas: 24 Hour News, As Read By a Man Who Has Been Up for 24 Hours. It started as a reasonably coherent, if tired and slightly drunk sounding location anchor, but gradually devolved until it was just Johnny Vegas in a rumpled and soiled business suit with a bottle of cheap booze yelling "NEWS!" over and over again.
* Attention-seeking. A lot of paranormal investigators who subscribe to the view that ghosts are spirits believe that this is the major reason for most hauntings.
* Attention Whore: A character feels entitled to the attention from others.
* Attention Whore: A character who is desperate enough for attention that they'll do anything to get it.
* Attention Whore: A trope about characters who do stupid things in order to get attention, not related to prostituition or lust.
* Attention Whores to do exactly that. It's only after the incident with Kano that Mikogami wises up and agrees to give Tsukune and co. the right to defend themselves.
* Attention Whore: Will do anything to be the center of attention, good or bad.
* Attention Whore with the need to always be the smartest person in the room. While not as infuriating as Harmodius is, he still leaves many of his allies rolling their eyes.
* AT-TE TV series. Although not specifically referred to as a transport, it is one, and also mounts enough fire to be a respectable threat in their own right.
* At Texas A&M, wild applause is the customary response to someone accidentally trying to leave via one of the fire exits, which sets off the dining hall's fire alarms. Meanwhile, dropping a tray gets you a resounding cry of "
* At that moment, her fellow Autobot Bumblebee happens to show up, and that
* At that point is was more about a lack of energy from eating the junk food rather than any weight concerns. However, Raven does have a vision of a
* at that point it could have meant, in context, 'damn it' (Which even seemed likely, given the word itself, and the færies pointing out that every human language originated with Gnommish). But that seems fairly mild. Bottom line, it's vulgar.
* At that point, the game was supposed to split into two branching storylines, one following the NSF and another for UNATCO. Of course, we only have the NSF storyline, which as many players remember, is mostly
* ; at that point the writer seems to have forgotten something important.
* At that point they'd been drifting for at least twelve hours with the heating turned to the minimum possible level in order to preserve their compromised life support power. Jack even says that he's "done the freezing to death thing before" when trying to convince Teal'c to turn the heating back up a little bit.
* At that point, they don't know they've kinda fallen for each other. Ryuuji intends on pursuing Taiga's best friend, Minori, while Taiga intends on pursuing Ryuuji's best friend, Yuusaku. This mutual agreement to help each other get the girl/guy is what starts them on the path that yes, they have indeed fallen for each

other.
* At that same time, he has the same level of Haki that Hancock does, but can't control it and can't do anything more than render people without sufficient force of will unconscious. Luffy's shown occasional flashes of other types of Haki use (against Mihawk, he avoided losing a hand because he saw a flash of what Mihawk's next attack would be), but they too were uncontrolled and he didn't even seem to realize what had happened. After training with Silvers Rayleigh, this has now changed as he's become both skilled
* At the 10th Anniversary Show, which was held on November 23, 1999 as their November PPV,
* At the 1980 Drum Corps Associates finals, the Westshoremen decided to release live doves at the end of their closer
* At the 1983 NHL All-Star Game, Campbell Conference goaltender John Garrett played well enough to be voted the game's MVP... until
* At the 1994 King Of The Ring tournament, Jim Neidhart interfered in the WWF World title match between
* At the 2000 US Golf Open, there was a 21-drive salute in honor of defending champion Payne Stewart, who died in a plane crash the previous October.
* At the 2003 Badd Blood pay-per-view, Steve Austin and Eric Bischoff had one as the first event of the Redneck Triathlon. In reality, they used pre-recorded belches.
* At the 200+ level mark, fights between equal level solo magical and fighter monsters would be very hard for the magical monster's player since their attacks could not penetrate and they had no defense. Only by using sneak tactics like stunning, teleporting enemies into traps (which Builder clan mates had to prepare for the magical monster) and other means could they hold their own...all of which were not that effective against the fighter player to begin with, which
* At the 2010 Nuit Blanche Art Festival in Toronto, there was an exhibit consisting of a sign encouraging people to "line up here!". What people didn't realize unless they read the guidebook was that the line itself was the art piece, and in reality it led nowhere.
* At the 2011 Kids Choice Awards, Po was imitating Willow Smith by singing "I whip my fur back and forth." While he was shaking his butt, we hear a loud ripping sound. Jack Black asks Po if he's okay and Po responds by saying "Fine, just a little...wardrobe malfunction. I feel a breeze!" Po walks off covering up. A second later, Po comes back and shouts "KCA's rule!" forgetting that his behind is exposed. He then realizes and runs back in embarrassment.
* At the 2012 NATO summit in Chicago, several veterans threw their medals in the streets.
* At the 2012 Olympics, reigning women's vault world champion McKayla Maroney was expected to win the women's vault title easily, an expectation that was only solidified after Maroney qualified into the vault final in first place by nearly half a point (a significant margin in gymnastics) and then hit an epic vault in the team final two days later. During the vault final, Maroney fell on her second vault and ended up finishing in silver medal position. Her reaction to this turn of events (which probably wouldn't have been so unpleasant for her if not for the extent to which everyone expected her to win gold)
* At the 2014 Kids' Choice Awards, there was a tribute to Dan Schneider. However, much of the tribute revolved around shows from the 1990s and 2000s such as
* At the 2014 Paris Motor Show, Lamborghini released the Asterion LPI910-4 hybrid concept car. "Asterion" happens to be the name of another hybrid —
* At the 2014 World Championships, US gymnast Mykayla Skinner hit the best floor routine of her career up to that point in the event finals. Her teammate Simone Biles was
* At the 2015 WWC Euphoria, Angel Fashion used a wedgie the way most wrestlers would use "short arms" and "Irish whips", to pull Mike Mendoza toward him as he attempted to create distance and then whipped him into the ropes by his trunks.
* At the 2020 Super GT season finale at Fuji Speedway, the KeePer TOM'S Toyota Supra team were dominating the race and was on track to secure the title for both

them and driver Ryo Hirakawa when they ran out of fuel
* At the 23rd World Martial Arts Tournament, when Goku doesn't recognize
* At the 8th Anniversary Show (held on April 29, 1997, instead of the usual date of May 5),
* At the age of 11, the Dalai Lama befriended Austrian mountaineer Heinrich Harrer, who was 36 at the time. They remained friends until Harrer's death in 2006.
* at the age of 26 she freaked out and was spending over half her monthly pay on botox.
* At the age of only four, Jerry Garcia was holding a piece of wood for his brother to chop. His brother miscalculated and accidentally cut off most of his middle finger.
* At the All Valley Championships, Johnny finally gets to see the aftereffects of his
* At the American Museum of Natural History, one of the dioramas is of a whale skeleton on the ocean floor, covered in sea snow.
* At the American Music Awards in 1991 to present an award, this being during the height of "Bartmania". She was pregnant during her first trimester, but the costume was baggy enough to hide her belly.
* At the APEC 2015 Summit, held in Manila, Canadian Prime Minister Justin Trudeau and Mexican President Enrique Peña Nieto got the attention of the Philippine media and netizens
* At the back desk (На задней парте)
* At the Back of the North Wind has it that the protagonist told all his adventures to the author near the end of his life; Macdonald himself appears as a character in the last few chapters.
* At the Battle of Agincourt King Henry didn't have enough men to guard the French prisoners of the first wave and simultaneously repel the counterattack of the second wave. So he killed the (unransomable) commoners and spared the knights (this was expected under chivalry rules too, although not always honored).
* At the Battle of Dale (which took place around the same time of the Battle of Minas Tirith), King Dáin II Ironfoot dies defending the body of King Brand of Dale outside the gates of the Lonely Mountain, after the people of Dale have fled there.
* At the Battle of Dhi Qar, Arabs belonging to the Banu Bakr tribe had to contend with an army of the Sasanian Empire and some of its Arab allies. To prevent their forces from retreating, some of the Banu Bakr commanders cut the camels' saddle straps. This paid off, since the Banu Bakr won the battle.
* At the Battle of Fort Pillow during the American Civil War, some black Union troops were shot by Confederates rather than having been taken prisoner. The Confederate government had actually declared they would not take black troops prisoner at first, but relented when the Union threatened retaliation by doing the same.
* At the Battle of Gronder Field, if you have Edelgard and Dimitri fight, Edelgard will muse that they can fight all they want if the Empire and the Kingdom go to war. Dimitri tells her that this is not something to joke about, since he finds the prospect of fighting her troubling.
* At the battle of Kilmichael during the Irish war of Independence, a group of British soldiers fake surrendered before commencing fire again, causing the deaths of three IRA men. The IRA commander then ordered that they be wiped out to the last man.
* At the Battle of Waterloo, the Prussian forces arrived on Napoleon's right flank, after he'd already been fighting for hours against Wellington and the other allies. He'd actually already defeated them at Ligny, but failed to destroy enough of them to take them out of the equation.
* At the beach, Jon tried to get the attention of a girl by screaming "Shark!". He was trampled by everyone who ran away out of fear, was slapped by the girl and, when he said things couldn't get worse, a shark appeared.
* At the beach when he glances at Joe in his millionaire costume, he walks away

only to stop in his tracks and return to have a closer look.
* At the beach, when Ryuji questions why Futaba believed the Phantom Thieves could save her by changing her heart, Futaba's explanation of why she needed to reach out to the Phantom Thieves, and why she wasn't sure she could fully trust them is cut out.
* At the beggining, one of the names for MMA was "No Holds Barred". When the UFC started to discuss with local athletic comissions, "No Holds Barred" was discarded as a name both because it sounded too extreme and because that with the new rules, some holds were indeed barred.
* At the beginning (1916, see above), the Dowager Empress narrates that the 300th anniversary of the Romanow dynasty's rule over Russia was celebrated. In
* At the beginning, a general drives into the mother's driveway to tell her three of her four sons are dead. Even as she sees the cars come up the drive, she comes running out onto the porch. She seems tense when she sees an Army general, but her legs just give way under her and she plops down onto the porch as she sees a priest.
* At the beginning and end of "Planet of the Shapes" from the same album, "Even a stopped clock gives the right time twice a day. Even a stopped clock gives the right time twice a day. Even a stopped clock gives the right time twice a day. Even a stopped clock gives the right time twice a day."
* At the beginning as young Manolo speaks with his father about missing his mother, Carlos explains that while family is remembered with love, we can always feel their presence. Ghostly versions of family members begin appearing all over town near their shrines, showing love to the living.
* At the beginning, it's revealed that Marlin and his now-probably-deceased wife Coral met when Marlin asked if there was a hook in his lip. This sounds like a line a fish might use to tease around the idea of kissing, but Marlin has been shown to be a bit of a worrywart even before the barracuda incident (when it showed up, he insisted she get inside), so it's unknown why he was asking.
* At the beginning, Jason wonders aloud, "Are the Avengers even, like, a thing anymore?" and other characters regularly wonder
* At the beginning, Kaga Koko does this to Mitsuo on her daily routine, and even promised to marry him when they were kids, but then he talks seriously with her about not reciprocating, and promptly rejects her, she understands and starts spending more time with Banri.
* At the beginning, Millard Fillmore Pierce is dispatched to investigate an attack from one warring planet on a battleship temporarily dry-docked on a neutral world in the war zone. Before he can even start heading towards the planet in question, he stumbles on not one, but two interdimensional invasions. Guess what he hasn't even started on when the book ends?
* At the beginning of "'03 Bonnie and Clyde" Rue masturbates while fantasizing about Jules.
* At the beginning of "A Complete History of the Soviet Union, Arranged To The Melody From
* At the beginning of a Level 6 strip me." At the end of the strip, Mimic does exactly that (using Y.T.'s stretched body to cross a chasm); the lamia ain't happy about it.
* At the beginning of Alleyway, an old Breakout clone for the Game Boy,
* At the beginning of another episode, Mom makes muffins, acting in Dexter's typical grandiose manner ("AT LAST! MY MUFFINS ARE COMPLETE!"), while Dad screws around the kitchen in a very Deedee-like fashion. It's here that viewers are clued into who takes after whom.
* At the beginning of "Arthur's Family Vacation", Arthur's daydreaming about joining Buster at Camp Meadowcroak for another summer when D.W. bursts into his room chants the tune at him. "Guess what, Arthur? You can't go to camp! You can't go to camp! We're going on vacation! We're going on vacation! We're going on vacation..." There are also a couple of music cues which use the same tune. One is lighter and bouncier and use for humor; the other is slower and more somber and accompanies some of the characters' more disappointing moments, including the scene

where D.W. tells Arthur about the family vacation.
* At the beginning of "Bowser Junior's Clown Car!", Bowser goes through his box of items from his senior year of high school (
* At the beginning of "Bowser Junior's Curse!", Junior tells Joseph and Cody that Bowser bought a toilet that can flush 18 golf balls. Cut to Junior doing just that.
* At the beginning of chapter 3, Shinji sees Asuka wearing nothing but a towel. He tries very hard to not drool over her naked legs.
* At the beginning of "Deep Space Homer", he's expecting the "Worker of the Week" award because every other worker already received it — but instead, it goes to an inanimate carbon rod.
* At the beginning of "D.W. Tale Spins," D.W. puts on Arthur's glasses to imitate him before claiming she can do anything he can.
* At the beginning of "Eek, a Penis", Mrs. Garrison starts having an identity crisis while teaching and runs out of class. Principal Victoria asks one of the students to fill in as a sub, with only
* At the beginning of Episode 7, Konata starts abruptly acting out this trope towards Tsukasa and Kagami. Kagami asks what's going on, and her response to this behavior and the explanation that Konata has become hooked on
* At the beginning of episode 7, which was released around the time MasakoX left
* At the beginning of her story, Tressa Colzione has a bottle of wine she bought stolen from her by a group of pirates, who also steal the goods of an elderly man in her town. Tressa's plan to get the goods back? Offer a cask of wine to one of the pirates as an "apology" for thinking she and Rippletide stood a chance against them... except
* At the beginning of his set during one of his tours, he said (paraphrasing): "You are all here to listen to a bitter old man rant and rave for an hour, and that's very sad." Naturally, the audience roared with applause at this.
* At the beginning of "Honor Thy Ed", the Eds are making "tacos" out of paper plates, grass, and crayon shavings and Eddy adds his older brother's Armenian
* At the beginning of Inquisition, the player character is the only one to survive an explosion that killed hundreds of people, including
* At the beginning of "Is There an Ed in the House?", he draws a portrait of Rolf... with a monster looming behind him. Ed gleefully explains "Rolf's head is about to be
* At the beginning of "Lock-Up," the Scarecrow escapes from Arkham, not for any particular plot but because he's that terrified of the title character.
* At the beginning of "Marceline the Vampire Queen", the episode which opens the Stakes arc of
* At the beginning of "Moe'N'a Lisa", Homer wakes up to find a string around his finger, among other reminders that he has to remember something. To his annoyance, Marge tells the family that they're going to see Grampa compete in the Senior Olympics.
* At the beginning of "No Meals on Wheels", Herbert the pedophile buys supplies to build this kind of trap, including a teddy bear to use as bait.
* At the beginning of one chamber, GLaDOS helpfully informs you that touching the
* At the beginning of Paul Scott's Raj Quartet, set near the end of the British Raj in India, Ronald Merrick, a policeman in his early thirties with repressed homosexual and sadomasochistic tendencies, becomes strongly attracted to a young man of 22. This young man is good-looking; he is stuck-up; he is Indian, whereas Merrick is white, and feels superior for it; he was raised in Britain, in a much more upper-class milieu than Merrick's, so Merrick feels inferior...it's a perfect storm. Merrick ends up ruining the young man's life. Someone else comments that Merrick "chose" Kumar because he was "unable to love. Only he was able to punish." In a later book an older Merrick reappears, and it emerges that he has been sleeping with young Indian men. In between we meet Count Bronowski, an urbane elderly Russian who falls in unrequited love with young men; he recounts how he once loved an 18-year-old boy who loved a girl, and he is currently just as hopelessly in love with his young social secretary, Ahmed Kasim. There's also a rare gender-swapped version of the trope in which an ageing lesbian falls in

unrequited love with younger women. The trope is averted with Pinky, a 20-year-old gay man: he is frequently offered boy prostitutes on the street but "it wasn't a boy he wanted, but someone of his own age."
* At the beginning of "Powdered Toast Man", the narrator is going on about the titular character, such as who he is and where he came from from. At last...
* At the beginning of "Princess Twilight Sparkle - Part 1", Applejack proudly states that the Mane Six are united by the Elements of Harmony, and no royal duties are going to change that. "Right, Everypony? Right, Pinkie Pie?" But Pinkie is daydreaming about "creamy, creamy frosting". After Fluttershy helpfully wipes her friend's mouth, she adds "We should take that as a 'yes'."
* At the beginning of "Pups Get Growing", Mr. Porter is working with Ryder and some of the pups on making the world's largest pizza. When Skye opens a sack of flour, it causes her to let out a big sneeze blowing flour all over everyone. Mr. Porter then has everyone sneeze all at once, and this blows the flour off everyone.
* At the beginning of season 3, Rick got himself arrested by the galactic federation as part of a plan to destroy it from inside and to get revenge on Jerry for wanting to sell him off to the bureaucrats, which once Rick came back to Beth with the kids, he can pose himself as a hero that got rid of the federation's rules, Jerry instantly tries to prove again that Rick is a complete monster for making him lose his job (while he ignored that his family was suffering with the new government), Jerry then makes Beth choose between him and Rick, which obviously chose Rick as he made everything back to before the aliens colonized earth.
* At the beginning of season 4, Daisy, AKA Quake, is this. Due to her vigilante actions against the Watchdogs and their allies, the public only knows her as a dangerous bank robber and terrorist. It doesn't help that her powers are overly destructive; she took out a bridge while capturing some fleeing Watchdogs. No one else was hurt, but that's still the kind of thing that freaks people out.
* At the beginning of Season 4, Sean Walcott is distraught over the grisly deaths of his parents, who seem to have been completely normal people. By the end of the episode,
* At the beginning of "SHED.MOV", Spike, Rainbow Dash, and Pinkie Pie are riding on top of each other and saying, respectively, "Bababababababababababa", "Shishishishishishishishishi", and "Mamamamamamamamamamama".
* At the beginning of the 1997–98 NHL season, the Buffalo Sabres showed a video of highlights from their previous season ... completely devoid of any acknowledgement of coach Ted Nolan, who all the players agreed had been a big part of their division title win that year (he had even taken home the Jack Adams Award as coach of the year), but was fired afterwards due to conflicts with goalie Dominik Hašek. Nolan wouldn't get another NHL job for nine years, and wouldn't return to the Sabres until 2013.
* At the beginning of "The Boys of Bummer", coach Ned Flanders wears a black armband and asks the little league team to
* At the beginning of "The Boys of Bummer", Ned is wearing a black armband and tells the kids to win the game for Groundskeeper Willie... because he made the armband for him.
* At the beginning of the cartoon "Weasel While You Work", Foghorn Leghorn rolls the sleeping Barnyard Dawg up into a snowman.
* At the beginning of the cinematic where Arthas returns from Northrend and
* At the beginning of "The Death of Chivalry", you have an encounter with Saradomin. He remembers your participation in the "Battle of Lumbridge" world event from 2013, and which side you were on. If you did not participate, he concludes you are one of the Godless and treats you with suspicion.
* At the beginning of "The Doctor Dances", the Ninth Doctor is his surrounded by a possessed child and its clones. He forces them to retreat by repeatedly shouting "
* At the beginning of the episode “Dirty Dog” Rocko’s dog Spunky is stinky from not having bathed in months, some flies buzz around him, he farts and the stench is so powerful it kills the flies.
* At the beginning of the episode, “Marks for Effort”, the Cutie Mark Crusaders do this again to try to peek into the School of Friendship.

* At the beginning of the episode, "Birth of a Salesman", Grounder tries to answer the door, but Wes Weasley crushes him with it when he opens it.
* At the beginning of the episode "How the Cookie Crumbles", Arthur and his friends (except Muffy) are shown as cookies, trying to avoid Muffy, who wants to eat them.
* At the beginning of the episode "The King is Dead", the fire department attempts to "save" a fish under a frozen lake. They get the fish out of the water, then when it starts to suffocate
* At the beginning of the episode "The Prank Call of Cthulhu", Mandy says something backwards that turns out to be "Cartoons will rot your brain".
* At the beginning of the episode "Tricycle Thief", Angelica rides Susie's tricycle without her permission and ends up crashing it into a garden gnome and flying into a mud puddle. The babies find this hilarious, but Angelica storms off in a huff.
* At the beginning of the episode "Urgo", the team is going through the Stargate while O'Neill is making some joking aside. When they emerge from the event horizon, O'Neill is pursuing his monologue... except they're back at the SGC after a three-hour timelapse, and have no memory of visiting another planet.
* At the beginning of the episode "Water Problem", Motu is about to eat some samosas as per usual when Patlu reminds him that the doctor has warned him not to eat outside foods due to a stomach problem. Motu eats the samosas given to him anyway... but he takes the shells off of them and only eats the insides. He explains to Chaiwala that he can't have
* At the beginning of the game the Number Nine Man enters a numbered door by himself and explodes because of small bombs placed in his stomach, foreshadowing the rules for the nonary game. You have to walk past a bloody puddle of his remains if you chose to go through that door. Later on another man dies in a similar way when being thrown into the number 3 door by himself.
* At the beginning of the "Hardy Pig Boys in the Mystery of the Zombie Queen of the Amazon Outer Space Bee Woman Case: Based on a novel by Jane Austen."
* At the beginning of their hunt for the source of the Nile, Clarkson interrupts his own epic narration with a scratch to note that five minutes into the special, they've already found it.
* At the beginning of the "Jinchuu" arc, a flashback shows that near the end of the civil war, Kenshin fought a massive samurai working for the Shogunate and cut off his sword hand. When the samurai demanded Kenshin kill him because of this, Kenshin refused. The samurai did
* At the beginning of the Kubitarou case, it's explained that the spirit is likely the ghost of a notorious
* At the beginning of the manga, it's revealed that Ichigo had been carefully cultivating this kind of image when Kon, using his body, tears that image to shreds by romancing the females in his class. Ichigo is
* At the beginning of the movie, a couple of boys were complaining that Protozoa's music sucked because you can actually understand his lyrics. They must listen to a lot of death metal. Also, read below and judge for yourself how understandable it really is.
* At the beginning of the movie, Leonardo da Vinci is shown testing a flying machine outside his castle. Five hundred years later, Eddie and Anna escape from the castle by using the flying machine to glide to safety.
* At the beginning of the movie, Mike and Sulley are excited to see a new commercial for their company. When they finally appear on screen, the Monsters, Inc. logo appears covering up nearly Mike's entire body. When the commercial ends, Mike stares in shock for a while and says, "I can't believe it." After another pause, he jumps for joy shouting, "I was on TV!". The same gag is repeated again at the end of the film. Mike sees a new magazine with him and Sulley on the front cover, but Mike's face is being covered by the barcode. He responds by saying, "I can't believe it... I'm on the front cover of a magazine!"
* At the beginning of the movie, some Russian mobsters thought that Black Widow would be defenseless while tied to a chair. She proved them wrong, kicking their

asses
* At the beginning of the movie, we see a ramshackle house with a starry sky above, and hear a husband and wife fighting. Unless you know what you're looking for, by the time you notice that one of the stars is moving and getting brighter, it's already been moving for some time.
* At the beginning of "The O Team", Olympia and Otis are called by Oprah into her office. Oprah begins to shout at them that they solved their 49th case, then she takes out earplugs that she had in her ears and asks them to repeat what she told them.
* At the beginning of the Season 10 episode "D'oh-in' in the Wind", Mr. Burns calls in the entire power plant workforce to help him open a jar of pickles he's having for lunch. Not a single employee manages to get it open, prompting a frustrated Burns to make a recruitment film and hire some new blood.
* At the beginning of the second game, the rebels are certain that the war will be over within a month or so (to be fair, the surprise attack they launched at the end of the first game was so successful that they had good reason to believe so). A month later, the rebels have
* At the beginning of the second Meap episode, the animators who made the trailers to it were described as a "ragtag group".
* At the beginning of the second year, Ceilidh finds out from Ryan that
* At the beginning of the series, Domyoji himself could qualify as a male example. Luckily he mellows out a bit.
* At the beginning of the series, Irina tries to extract some information out of Nagisa by planting a 30-hit French kiss on him.
* At the beginning of the series, Lina and Gourry form a duo and Zelgadis is an enemy, then later fighting against both sides, and finally settles in as an ally.
* At the beginning of the series, Sansa thinks she is going to be a fairy tale princess and that Joffrey is her
* At the beginning of the series, the title character wears her hair shorter than many men, both for practicality of wear in spacesuits and due to
* At the beginning of the series, we have the Sound Genin, used by Orochimaru in the Chunin Exams. Dosu actually realises this, but all three meet a premature demise before he can do anything about it.
* At the beginning of the series, Yusuke is killed in a car accident through some grand cosmic accident: he performed a
* At the beginning of the short, "Concord the Kindly Condor" from the
* At the beginning of the Skypiea arc, the crew run into fog-shrouded figures that seems so tall they
* At the beginning of the story, Kyril has racked up a high body count of orc and goblin kind, leading to many believing that he had an intense hatred of them. In fact, he defies
* At the beginning of the story, many of the WWE Divas wind up as casualties of DEAR's group attacks, including
* At the beginning of the third season (Try), the joke had run its course and fallen into disuse. So they brought it back and flipped it. Amelia jumps from a ridiculously tall tower and scares everybody, but this time she casts the levitate spell right before landing. The kicker? She risked her life and limb just to heal a small bump on an old woman's head.
* At the beginning of "The Wacky Molestation Adventure", after Kyle asks to go to a concert where the band's name alone tips them off that they shouldn't let him, they say he first needs to clean out the garage, shovel the snow out of the driveway, and
* At the beginning of the Zou arc, one half of the Straw Hat Pirates are looking for the other half (having been separated earlier during the events of Dressrosa) and upon finding their
* At the beginning of three versions of Chapter 12, Seteth claims that
* At the beginning of "Tikka To Ride", Lister tries to explain how they recovered being killed by their future selves. The basic premise is easy enough (well, "easy"...), but Lister's grammar is so awful that the cameras keep exploding on

him.
* At the beginning of "Treehouse of Horror XXI", when Professor Frink accidentally fast-forwards too far and spoils the rest of the episode, he declares himself unworthy of wielding the remote and uses it to
* At the beginning of "Uprooted", after some acrobatics with Rainbow Dash, Silverstream makes a typical superhero landing, even cracking the ground. That's in a
* At the beginning of "Valor y al toro", when the two protagonists are about to get on a cruise for their mission, Filemón tells Mortadelo to pack only whatever is indispensable for the mission. Filemón gets angry when Mortadelo shows up later with a big bag and reminds him of how he only had to pack whatever was
* At the beginning of Volume Four, Jaune's gear is upgraded with metal left from Pyrrha's armor.
* At the beginning, Peggy's teaching Minh how to play Boggle, and the only words we see her come up with are "bametomyam," a Thai spicy noodle soup
* At the beginning, Sabine gives one to Ezra when he asks about the secret mission, despite having already been told it's a secret.
* At the beginning, someone completely removed one of the Pyramids of Giza and replace it with an inflatable model without anyone noticing. While the audience was first led to believe that
* At the beginning, some teenager tries sneaking into the van through an open window, which shuts while he's halfway through it, slicing him in half.
* At the beginning we see the Mosasaur's silhouette in the dark background with its jaws open as it's prepared to munch on a mini-sub.
* At The Behest Of The Dead, not only has the supernatural been revealed, the necromancer main character, Phineas, is the one who made it happen. He is the sole entity responsible, and is held as such by the rest of his kind.
* At the bend of the river Scheldt, legend tells of a giant who demanded toll from everyone who wanted to sail past his fortress. If they couldn't or didn't want to pay the toll, the giant (Sus Antigoon) cut off their hand as punishment. Silvius Brabo, a Roman soldier, sought to bring an end to Antigoon's cruelty and defeated him. After this defeat, Brabo cut off Antigoon's own hand and threw it into the Scheldt. Supposedly, this is where the city of Antwerp, Belgium got its name from. "Hand" and "Werpen" (to throw).
* At the Beyond Wrestling Armory Amore on September 30, 2012, Charade botched a double moonsault and landed on his head, fracturing his skull. He attempted to continue the match, kicking out of Black Baron's first pin attempt, but not the second. It was only his third professional match. Fortunately, he recovered in six months and now wrestles for
* At the birth of said child, they agree to try again, before something wrecks it again... Is anyone else tired yet?
* At The Bottom Of Lake Missoula, the protagonist Pam is told by the dean of her school that a tornado has stuck her family's home.
* At the center of the Earth, there was a miniature space with another, small Earth. There was so little gravity down there that the ducks were able to walk on thin air because of that, but also able to walk on the ground. Of course, the author may have thought this actually made sense.
* At the center of Ulthuan's inland sea is the Isle of the Dead, the nexus of a great spell woven by ancient High Elf mages to bend the Winds of Magic into their current configuration. As a result of this localized
* At the climax Ford barely makes out of the way of an enormous gasoline explosion
* At the climax he uses them to hunt Clarice Starling in a pitch black house, sneaking up behind her and preparing to kill her with a bullet to the back of the head. Luckily
* At the climax of Act 2, following the main character being trapped in a room for the entire weekend following Yuri's suicide, we get this line from Monika immediately before everything goes to shit in Act 3:
* At the climax of "Agent Orchid's Almost Half Hour Talent Show", Otis assures

Orchid that Olympia — who had been so busy gathering performers for the eponymous show that she forgot to think of something for herself to do on stage — will think of something to perform. A couple of seconds later and Olympia, stricken with
* At the climax of the film, Barry confronts Elena in a field, discovers that he can't move his feet,
* At the climax of the first movie, the antagonist Lord Farquaad is swallowed by a dragon... and the entire town bursts into cheers. Then again, on the "Karaoke Party" DVD bonus feature, he's heard singing "Stayin' Alive" from
* At the climax of "The Robots of Death", Dask reveals his real identity by showing himself to the others wearing
* At the climax of the story, Jason even dresses up as such a Santa (with devil horns, no less) to further
* At the climax of the Tenrou Island Arc, Natsu unlocks Lightning-Flame Dragon Mode when fellow Dragon Slayer Laxus gives him his magic to fight Hades. During the Grand Magic Games, Gajeel remembers this and chooses to replicate it while fighting Rogue's
* At the climax of the Tribunal shootout, your skill check to dodge Kortenaer's Last Breath Bullet
* At the climax of the Wedding Arc, the Mane Six, Cadence, their friends, and the large army's worth of allies they're built up from the residents of Canterlot assault the royal castle, where
* At the climax, Paul has shaken off mind control but pretends to still be under the influence to gain entry into the warehouse where the Vasyn is being kept. George is
* At the climax, Reign smashes Kara through several buildings with one single punch.
* At the climax, she briefly takes control of the ship after the senior staff are incapacitated.
* At the close of every ballet class and performance, dancers perform what is known as "révérence", or a series of curtsies, to the teacher, the audience, and the orchestra/pianist, as applicable.
* At the close of the first Act, the airmen/actors are playing the old game "Time Bomb", which was a windup toy bomb that set off an alarm when it was supposed to "explode". The first round one of the airmen/actors panics, tossed it to the wings resulting in a HUGE explosion. Then the officer/actor brings out another one ... winds it up ... and
* At the conclusion of the German version of Grobschnitt’s 1975 album
* At the conclusion of the Refusal War between Clan Jade Falcon and Clan Wolf, the Falcons ended up winning it in this manner. Three reasons why it led to this outcome: 1) despite the fact that the Falcons managed to wear down the Wolves by sending in less experienced second-line units and then eventually killed off both Natasha and Ulric Kerensky with underhanded ambushes, they unknowingly failed to eliminate Vlad Ward, who eventually became a sole witness to their uncharacteristically cowardly acts and took issue with them later on, 2) after rubbing out most of the Wolves, they tried to eliminate the Wolves' offshoot faction Clan Wolf-In-Exile (which comprised of the original Warden members of their parent Clan) but were fiercely pushed back by Phelan Kell and his Kell Hounds mercenary unit, therefore failing to prevent their escape to the Inner Sphere and 3) after taking a horrendously unacceptable amount of casualties inflicted by the aforementioned factions, the Falcons were rendered completely unable to resume the Invasion of the Inner Sphere so much that they had no choice but to absorb the remaining Wolves who did not break off to join Clan Wolf-In-Exile in order to re-bolster what little manpower they had left. Things took a turn for the worse for the Falcons when Vlad Ward, who had survived the war, witnessed their suspicious strategies and called out their two highest ranked leaders, saKhan Vandervahn Chistu and Khan Elias Crichell, for their acts by initiating his own Trials of Refusal and eventually defeated them both to death; the former in traditional one-on-one BattleMech combat and the latter getting literally beaten to death in one-

on-one hand-to-hand combat on the floor of the Clan Grand Council when the Falcon Khan was just elected as the next ilKhan to resume the invasion despite his old age and his Clan already saddled with the aforementioned casualties. Vlad, now the newly appointed Wolf Khan, then reconstructed the Wolves by turning them into a Crusader Clan that bore no relevant history with the original Warden era and now resets their goal of retaking Terra and conquering the Inner Sphere again all to restore the glory of the Clan and immortalize his own name, once the Truce of Tukayyid expires.
* at the cost of her own life force and she slowly starts to feel slightly exhausted each time she does so. When she tries to cast Raise to revive a fallen soldier, the spell's power is too much for her to handle and she falls unconscious. She is unable to use her healing powers completely, but she does recover them later on and learns how to cast spells without using her own energy.
* at the cost of shattering the bones in his hand and arm. As Momo points out, Izuku was so focused on helping/avenging Mina that he cost them a second party member to take out just one of a dozen enemies they were facing.
* At the Council of Constance (1412–23), one of the Cardinals had corrected an error of
* at the creation of Megatron himself (it also shows too many Constructicons gathered around the table compared to the normal 6-bot lineup, leading to additional wankery about what happened to those missing members prior to any of their chronologically later appearances). Each of these pieces of info are generally incompatible with the others, but that hasn't stopped some fans from building incredibly elaborate theories as to how they can all co-exist while still making something that resembles sense.
* At the Crossing-Places their own cemetery. A while later the man's young daughter comes looking to find out whether he's dead or alive. The squire shows her his grave, expecting her to be comforted that they gave him a semblance of a Christian burial, but of course she's dismayed because he should have had a Jewish burial by his family.
* At the Crossroads, and cannot tell one direction for another. Urban vampires seem to have developed a strong resistance to this weakness, especially those that frequent downtown districts (probably by building up an immunity from all the intersections).
* At the current state of the art, the US Navy's 'Aegis' missile defense technology is essentially undefeatable except by a wave (or waves) of inbound threats larger than what the system is capable of handling (which it does by launching counter-missiles rapidly enough to simultaneously engage them all).
* At the Dark Tournament, after Chu stumbles on stage, he drunkenly yells into the jeering crowd:
* at the dawn of time. They have very little use for anyone not a slave or an experiment.
* at the demon equivalent of reaching adulthood.. She decides they work better as something like a fashion accessory anyway.
* At the dinner table in "Valar Dohaeris", Margaery Tyrell and her brother Loras are seated next to each other, while Queen Cersei and her son King Joffrey are positioned at the opposite ends. To maintain symmetry, the Tyrell siblings would normally have been placed across from each other. Not surprisingly, Margaery and Loras are a harmonious
* At the Earth's Core. In this enjoyably unrealistic depiction of prehistoric life inside the Earth, a man-eating plant makes a brief appearance, interrupting a fight scene between the hero and an adversary. Needless to say, even though the two men had been trying to kill each other only minutes before, the hero saves his opponent from the clutches of the carnivorous creeping vine, and the two become fast friends, joining forces to defeat the evil Mahars that rule the underground world.
* At the Earth's Core Jonah builds a new robot, Growler, a super chill, easy-going musician programmed to take everything in stride with a very familiar muppet voice. The other bots react with hatred toward the newcomer. Jonah's response is bafflement and he straight up admits he was invoking this trope.

* at the edge of despair to an actual love interest. And at least one (likely far more) of those clones is also attracted to him, for similar reasons.
* At the Edinburgh Science Festival 2015 strand "The Idea Factory", the lecture theatres were decorated with large lightbulbs with unusually shaped filaments (a microphone, a tuba, a TV set, Vitruvian Man...)
* At the end, after getting thoroughly trounced by Po, he fails to understand the meaning of the Dragon Scroll that he had sought for so long, which is that you don't need to seek out some ultimate secret to reach your full potential: the power is already within you. His pride does not allow him to consider that he might have been wrong about everything, and he
* At the end, after the war is stopped, and the two races agree to live in peace, one of the Krann leaders sends the arrested dictator along with a small portion of the fleet after the original Lethanta asteroid ships, which were secretly sent with a group in case the Krann succeeded. The leader is skeptical that the peace will hold (too many generations of hate), and is determined that, should the inevitable war resume, none of the Lethanta survive.
* At the end, after Twilight leaves with the crown and the portal closes, the Humane Five revert from
* At the end, all the transporters on the Enterprise fail after Picard is beamed over. Their only recourse is to have Data
* At the end, B.A. announces that he booked them passage on a freighter for the return trip and volunteered the other three to pay for it
* At the end because they were pre-spaceflight that the Empire will help them rebuild, and that their presence will no doubt screw up what was left but at least they'll treat them like people.
* At the end, Chell is finally set free by an emotionally exhausted GLaDOS and dropped off in the middle of a wheat field, the
* At the end, Doc delivers one to Marty and his girlfriend Jennifer when
* At the end, Helen catches a falling Jack-Jack. Justified more than most examples because Helen used her elastic powers to slow down Jack-Jack's fall for several feet before actually stopping it.
* At the end, however, the real culprit is revealed to be Hugo, who, during his inspection the previous day, threw a bunch of greasy rags on the floor; Bob missed one under the stove and it ignited during the night.
* At the end, Imran Zakhaev takes over a Loyalist nuclear launch facility and launches nukes at the United States in retaliation for the continued US and British presence in Russia, but again the game doesn't really explain how they were able to crack the coded locks, as the US forces had to badger the Russian Loyalists just to get the auto-destruct codes. Of course, this is also in itself an error, as stated above - there are no "auto-destruct" codes.
* At the ending of the first game, they put a hoop falling from the air after
* At the end, it turns out to be a cooperative study between the Earth and Ebon governments to determine how well human troops can withstand punishment without breaking.
* At the end, it uses an anneagram (a nine-pointed star), which doesn't seem that
* At the end, most of the Creations are shown going home to their own stories, save for
* At the end, Nate and Elena lean in suggestively towards one another, and are suddenly interrupted by Sully who disrupts the romantic moment. Nice going, Sully. He
* At the end, Nuke is called up to the majors from the A-ball Durham Bulls, having never gone through the AA or AAA levels. This is extremely improbable as he probably would have been moved up during the season if he'd been dominating A ball. You can't use the Majors expanded September roster as a reason since the Bulls season wasn't over. Minor Leagues that are affiliated with Major League teams end their season in August
* At the end of 2016, after the success of the first revived series, two Christmas-themed celebrity episodes were recorded at the same time they were shooting the upcoming 2017 series. The event was taken much more seriously this

time
* At the end of 2017 and just before airing their annual “The Year” retrospective, ABC aired a new special called “The Year: In Memoriam.” It featured interviews with current personalities sharing opinions and stories about icons we lost in 2017 (Tracy Morgan talking about Don Rickles,
* At the end of 2019, however, Marvel Television was shut down, meaning all future TV shows will be made by Marvel Studios themselves. As such, they will be considered to be full-fledged entries to the franchise on the same level as the movies themselves, averting this trope entirely. All of the above shows that are available on Disney+ —which is to say, all but the Netflix ones— are listed under their
* At the end of 3rd edition, Mephistopheles provides incredible amounts of power to mortals (through control over Hellfire) for almost nothing, but Devils in the
* At the end of a business meeting facilitated by Dogbert at Dilbert's request, Dogbert says that his takeaway was the realization that he was the only one there with anything to say, and requests "a moment of silence to honor me for my brilliant work despite being surrounded by dolts." Alice and Wally, seated on either side of him, are scowling.
* At the end of a commercial break, he expressed his hopes that the audience members at home were still alive and had not been slaughtered by a psychotic murderer lurking right behind them. But just in case, "Welcome murderers!"
* At the end of a conversation" that started about a girl who died by drinking too much water that eventually turns into a bit about a girl who who will only talk about cats.
* At the end of a February 2003 show, Horatio Sanz came out in a sweater, sang “You're Special”, and said “Thank you,
* At the end of a funeral service, the pallbearers carrying the casket accidentally bump into a wall. They hear a faint moan. They open the casket and find that the woman is actually alive. She lives for 10 more years and then dies. Another funeral service is held, and as the pallbearers are carrying the casket out, the husband shouts "Watch out for the wall!"
* At the end of a game, the table plays the chorus from "Nobody Does It Better" while lyrics are shown on the display.
* At the end of "Agatha Raisin and the Walkers of Dembley", Agatha brings home a copy of the nude yoga DVD. As she and Gemma sit down to watch it, they immediately start tilting their heads at an odd angle.
* At the end of "All's Fair in Oven War", Cletus gets revenge on James Caan by having the Spuckler clan ambush him at a toll booth, which Caan hates for
* At the end of a mediocre 1991 season, Chicago Cubs announcer Harry Caray assured fans, "As sure as God made green apples, someday the Chicago Cubs are going to be in the World Series." Fast-forward 25 years later, when the Cubs appeared in the Fall Classic for the first time since 1945 and then won their first World Series since 1908. Cub fans didn't forget Caray's statement, as many of them left bushels of green apples on Caray's grave (Caray died in 1998).
* At the end of a month long arc in which Garfield and Odie are lost, the pair end up in a pet shop
* At the end of And Eternity, God is impeached by the United States government. The actual rules for Godhood aren't very clear; Hinduism's gods are implied to also be active.
* At the end of "And the Soft Opening", the third-season premiere of
* At the end of an Ernie and Bert skit, a frog jumps into Bert's bowl of oatmeal, and he screams. Bert may have been screaming from the surprise, or it might have been annoyance at having the frog in his oatmeal.
* At the end of an interview, having thought that the broadcast had ceased, Mel Gibson added a little something to the end of his farewell to the interviewer
* At the end of another episode, Bill, who cuts hair at the army base, corrects a recruit who moans about being made a jarhead. "Jarhead is the Marines. You're a
* At the end of another episode, Chilindrina finds El Chavo crying and he confesses that he had thrown, dirtied and stomped on Quico's clothes, Chilindrina

tries to calm him down saying he had it coming as he and his mother had done the same to her father's clothes, but Chavo adds that Quico was
* At the end of another episode, Scooby really does catch a cold and soaks his feet while Shaggy serves him
* At the end of another sketch, which has Benny playing a famous rock star, it seems he's in a car with happy people with champagne and beautiful women, and it pulls away, and a lonely Benny rides home on his bicycle.
* At the end of any type of "Neutral" route; after you beat what appears to be the final boss,
* At the end of a (possibly gaiden) manga belonging to the X series, X made a cross out of junk to put in the tomb of a fallen enemy and asks Zero: Where do reploids go when they die?
* At the end of Avery's W-B short "Screwball Football," a toddler in the stands guns down the man who keeps sneaking licks of his ice cream cone.
* At the end of "Bad Bad Rubber Piggy", Zim sends a warning to himself back in time, but it has to replace something and that something turned out to be his brain. Rather than keeling over, he just kind of sat there, drooled, and moaned a bit. This is somewhat justified, as one (unaired) episode established that the Irken's (Zim's race) PAK (backpack-looking thing) is the actual "brain" of the organism, the body serving as something to carry the PAK around (though this does bring up the question of why there even
* At the end of "Bartifical Intelligence", Homer wakes up to find that he hasn't been made into a pathetic cyborg — he's just been possessed by the devil. A brief splash of holy water results in him babbling angrily,
* At the end of Ben and Reed's brief scuffle, Ben headbutts Reed in a manner that looks extremely stilted.
* At the end of "Birdy and the Beast", Tweety adds a tally after getting rid of his latest cat, the tallies going up to the very top of his tree.
* At the end of Blizzcon 2018, spokesman Wyatt Cheng announced there would be a
* At the end of "Bob's Birthday Wish" when the Opera Singer accidentally wakes Hissy up while singing
* At the end of Book 9, he shoots Citizen Chairman Saint-Just and restores the old Republic.
* At the end of Book II, Orry Main finds his wife, Madeline, whom he hasn't seen for more than two years. When he finally finds her, he sees his baby for the first time. Madeline had been pregnant with Orry's baby when she disappeared over two years ago, but when Orry meets his baby, the baby is only about six months old. This becomes more noticeable when Charles Main, Orry's cousin, makes it back to Augusta's house for the first time in two months. When he gets there, Washington informs him that Augusta is dead, but that she had died giving birth to Charles' baby. When Charles had seen her two months prior to this, she wasn't showing the least bit of being pregnant. When Charles meets his baby, the baby looks to be two years old or older even though it couldn't have been more than two months old within the timeline.
* At the end of both paths is a great pavilion with an area only accessible by someone with a particular quest. This area has
* At the end of "Bowser Junior's Broken Leg!", Chef Pee Pee beats Junior up to the point of breaking his left leg after finding out that he was
* At the end of "Bridge to the Turnabout," Iris decides to confess everything to Phoenix, regarding herself and her twin sister Dahlia, whom Phoenix had dated until she was arrested for murder.
* At the end of "Cabin Fever", it's shown the rocket Ed used to escape landed him on a tiny island with two shipwrecked guys, who are passing the time waiting for rescue by playing Charades (badly).
* At the end of "Captains Outrageous" the crew celebrate Mulcahy's long overdue promotion to captain:
* At the end of "Cereal" with Binky as he is walking off from Arthur and Buster trying to avoid spoilers about their next podcast.
* At the end of Chapter 10, Mikkel decided that he no longer wanted the

* At the end of Chapter 19, Cross has this reaction after they leave Luffy behind to fight Crocodile...and the rest of the crew agrees to let him give out some spoilers about the upcoming battles.
* At the end of "Company Picnic", Mr. Krabs puts Plankton on a paper plate and tosses him over the horizon, causing him to explode.
* At the end of "Cross-Time Capers", Magneto confronts the Future Brotherhood, and ominously looks like he's about to kill them for their actions, before the issue ends, without confirming whether he actually did or not.
* At the end of Day 4, when some of the more-maligned cops get their own demon-summoning COMPs, they decide that since Tokyo is locked down and isolated, that they're gonna disregard law and order (or rather, what little of it remains due to, again, Tokyo being cut off from the rest of Japan) and murder
* At the end of "Death", Marvin Marsh tells everyone he's planning a trip to Africa, and says over 400 people in Africa are eaten regularly by lions every year.
* At the end of "Dome of Doom", this happens to Eustace after he pigs out on the produce grown in the bio-dome.
* At the end of "Donor", it is revealed that the supposedly dead Dr. Renee Stuyvescent is still alive, having received a full body transplant. She is secretly observing Dr. Peter Halstead and Deirdre Laird at a soccer match. The implication is that she will once again try to kill Deirdre so that Peter can be hers.
* At the end of Doug Walker's "Aristocrats" video, there is an outtake of him saying these exact words.
* At the end of each chapter the player's accuracy and kills are tracked by the game. This has led to both 100% and
* At the end of "Equinox", though she's not seen actually tearing anything off, Janeway is seen marching back and forth in front of the survivors of the
* At the end of every Shakespearean comedy, "marry and settle down" hits any number of couples. Particularly at the end of
* At the end of "Evicted!", Finn and Jake discover their tree house is being flooded with worms, and they get hypnotized by its king. Do they snap out of it and fight him? (cue the end credits)
* At the end of "Fairy Idol", Chester used his last wish to make everything be like he never found Norm's lamp.
* At the end of "Fastest with the Mostest", Wile E. stares at the Road Runner, still standing on a floating piece of rock, much to Wile E.'s confusion. He
* At the end of film, prior to the credits, a flashback scene has Frank Hart accidentally triggering the restraining system when he thinks he's using the remote to change the channel on his TV.
* At the end of first year, Yukari announced that the entire class may move up to second year. Cue the dancing outlines!
* At the end of Fyre, the quote takes up the final page of the series.
* At the end of "Get Mystique", Raven, grievously wounded by Wolverine, begs him not to walk away without finishing her off. He ignores her, and walks away, leaving her to expire slowly and painfully, screaming and cursing at him (don't worry, she gets better).
* At the end of government ads and Public Service Announcements in Australia: "Authorisedbytheaustraliangovernmentcanberra"
* At the end of "Happily Ever Odd", Donnie, serving as his brother's best man at his wedding, is revealed to have eaten five of Oona's lab carrots, and as a result, he has grown tall enough to where he can't even stand up properly and has to crane his head forward in order to fit.
* At the end of his act he drops the accent and introduces himself by his real name. He was on one of Jerry Lewis' MD telethons more than twenty years ago. Jerry had chanced upon his act and asked him to perform on the telethon because he (Jerry) was completely taken in by it and was so surprised he was almost shocked by the reveal.
* At the end of His Ministry on Earth, and forty days after His Resurrection, Jesus apparently decided his followers knew enough to be getting on with, and ascended into Heaven before their eyes. Though, of course, with Jesus it was really

more like going back home.
* At the end of his personal end-game sidequest, Robo picks up two weapons: the Terra Arm and the Crisis Arm. The Terra Arm is his best weapon by stats alone. The Crisis Arm has the potential to be even stronger then that. Its damage algorithm is decided by the last digit in his current HP count. If that number is 0, it does nothing. If that number is 9...
* At the end of his story, Cyrus is seen teaching a class of eight students.
* At the end of his tyrannical rule, King Sombra was turned into this and imprisoned far away from his kingdom.
* At the end of "Ice Cream Scream", it turns out that the reason the ice cream truck won't stop for Dexter is because a while back, Dexter once paid the man in
* At the end of "iFight Shelby Marx," Carly, Sam, and Shelby spit take in unison and slow motion for the camera to show the audience that they've become close friends.
* At the end of "Independent Movie", Stan, Roger, and Toshi's father Hideki celebrate hitting it big and then suddenly pull guns on each other. The screen goes black, a gunshot is heard, and Roger says that Hideki was the one who got shot.
* At the end of "Into Harmony's Way", Peter gets on a bus and shoots himself in the head. His silhouette is briefly made visible in the window by the flash from the gun.
* At the end of it all, the Cat in the Hat sings "Just Shout Hooray", sometimes being accompanied by the Little Cats and/or Terrence.
* At the end of "Jet Shrinks the Kids", Mindy uses the shrink ray in reverse to become a giant and startles Mitchell in the process.
* At the end of July, Yu meets Yukiko's parents, who'd known about his relationship with her for some time, even though Yukiko only recently told them about it. While Yukiko is somewhat nervous, the Amagis strongly approve of Yu, even if they conclude that it's too soon for him to tie the knot.
* At the end of "Kiss Kiss Bang Bang", the whole team, having gone back to earlier that day, are told that they must avoid themselves.
* At the end of Laszlo & Gary's "Don't Touch That", a recording engineer begs him not to touch a big red button on the control panel even though he's curious about what it does; he touches the button and the song ends with a loud explosion.
* At the end of "Life of O'Brian", Olive assures Olive and Otto that the laser chicken egg that she used to bribe O'Brian with isn't close to hatching. Not a second later and absolute fear settles on the faces of all three agents as the egg begins to hatch, and they immediately take off running just as the blasts from the baby chick start destroying the Tube Lobby.
* At the end of "Life of O'Brian", Olive boasts that she knows a lot about laser chicken eggs and assures Otto and Oscar that the egg she bribed O'Brian with isn't close to hatching. Sure enough, the egg begins to hatch, and everyone is quick to retreat.
* At the end of "Magical Mystery Cure", Pinkie declares, "best coronation day
* At the end of "Mandy Bites Dog" Mandy's dog Saliva has finally had enough of Mindy insulting him so he snaps and starts acting viciously, Mindy reacts in fear and can audibly be heard wetting herself.
* At the end of "Marge vs. the Monorail", Lyle Lanley escapes from Springfield on a plane and it looks like he's about to become a
* At the end of Marvel's Damnation miniseries, Mephisto is dethroned from Hell and imprisoned in a cell of the Hotel Inferno he raised in Las Vegas. Aside from the loss of his throne and thus the blow to his ego, no visitors are actually barred from visiting him by mystical means, so he's still entirely free to cut deals with mortals as much as he likes. He's shown in multiple other titles after his imprisonment negotiating with clients with the only indication he's still imprisoned being one wall of the room being cell bars.
* At the end of "May the Best Pet Win", an example of this is shown when Rainbow Dash's new pet tortoise Tank flies by wearing a visibly-enchanted propeller on his shell.
* At the end of "Me and Bobby McGee", popularized by Janis Joplin, it reveals that

Bobby is gone and the rest of the song was all memories:
* At the end of Meet the Medic, it turns out that he accidentally sewed Archimedes
* At the end of "Midnight Train to Kingston", Murdoch is seen to have survived his jump from the bridge in pursuit of James Gillies and Juia treats his injuries (including reducing a dislocated shoulder). Murdoch, Julia, and Brackenreid discuss whether or not Gillies survived his fall (clearly possible since Murdoch did), and Crabtree joins them to tell them they can't find Gillies or his body.
* At the end of "Million Dollar Abie", Abe and Lisa are floating on balloon-held lawn chairs to avoid the bulls running rampant through Springfield below. Unfortunately, some bulls come along with floating chairs of their own.
* At the end of "Mommy's Bosses", Richard develops telekinesis after going off the promicin inhibitor. To his surprise, he is able to move a coffee cup just by thinking about. In "The New World", he inadvertently causes numerous objects in his 4400 Center apartment to fly across the room as he is stressed about Lily's
* At the end of most of the later episodes, you see earlier versions of some of the scenes where the dialogue gets progressively weirder/more inappropriate/just plain stupider until one of the actors breaks character and goes 'Oh, God, we can't use that!'
* At the end of "Muffy's Soccer Song," an adaptation of "Muffy's Soccer Shocker" from
* At the end of "Murdoch.com", Inspector Brackenreid attempts to get Crabtree to punch him to make up for his manhandling of Crabtree while he was
* At the end of "New and Old Flames," Arthur tells a reporter, regarding film of Elliot/Cheerleadra fighting a fire golem, that "what was seen was what was," the first public acknowledgment that magic exists. From then on,
* At the end of one episode, Bart does this to Homer several times, getting him in the eye, the ear, the other eye, etc.
* At the end of one episode, Elliot comes up with the idea with J.D. to attempt the "triple giant doctor". They attempt it with J.D. on top, Lonnie in the middle, and Elliot on the bottom. It doesn't go very well.
* At the end of one episode, Lana threatened to reveal Sterling's emotional trigger to Pam
* At the end of one episode then-Captain Cragen lampshades that this trope actually helps criminals
* At the end of one of Amelie Nothomb's novels (the one about the ballet student), the protagonist meets Nothomb
* At the end of one short, a picture of some bizarre looking burger is shown that you have to freeze frame to catch. There is no reason for this other than the show just being weird as usual.
* At the end of "Oscar Strikes Back", when President Obbs ends up getting fired and has to
* At the end of "Our Selena is Dying", Martha Brockman is in a hospital wrapped in bandages after being severely burned in the fire that killed her sister Selena and daughter Diane (whose youth and identity she stole). It is noted that her left arm seems to be healing at an accelerated rate. One nurse then tells another that she does not know how she got the burn on her left arm, indicating that Martha has already begun to
* At the end of "Peas in a Pod", when Lumpy's clones replace everyone else in town, one of them is seen on fire.
* At the end of "Picture if You Will" when D'Argo pulls Chiana out of Maldis' illusion they fall over and land with Chiana lying on top of D'Argo. It's one of several
* At the end of "Rabbit Transit", when Cecil Turtle's trick on Bugs causes Bugs to get arrested for speeding, Cecil is the one who says "Ain't I a stinker?".
* At the end of S5 Ep6 "Chimera", McGee sums up the situation involving a Navy research ship that isn't, pirates who are actually Russian sailors on a state-sponsored covert op and a Soviet nuclear warhead that the US thought that the Russians didn't know about but clearly did. And now we know that they knew.
* At the end of "Sandkings", a colony of Sandkings has established itself in an

isolated wooded area. In "The Voice of Reason", Randall Strong warns of the threat that they pose while "Final Appeal" reveals that it took the better part of a decade to eradicate them.
* At the end of Sawatari Makoto's arc Amano asks what Yuuichi would ask for if he could make a miracle, Yuuichi tells her its obvious and it cuts to his wish;
* At the end of "Scorned", a story in the fourth issue of the first volume of
* At the end of Season 10, Sarge threatens to make hamburger out of Grif and Simmons if they don't stop bickering and get to work.
* At the end of season 11 episode 52, a Galactic Prison officer asks Moondance and Shadowstar who sent them for the nuclear power, and then the lights go out, and
* At the end of Season 12, Kelly Kline goes into labor wearing a white nightgown and makeup, barely breaks a sweat and dies in childbirth looking angelic. Possibly justified since her child is a highly powerful angel/human hybrid so it's possible he prevented the process from being too painful for her.
* At the end of season 12's "The Ballad of Filthy Muck," what appeared to be Patrick covered in mud and grime turns out to actually be another individual entirely who happened to have an uncanny resemblance. The real Patrick had decided to take a shower after he was kicked out of the Krusty Krab for being unhygienic earlier, just so he could order food again.
* At the end of season 13 episode 52, at Star League, Xingyue has an emergency meeting that's about
* At the end of Season 1, Scott and Derek are soundly thrashed by the Alpha before
* At the end of Season 2 Episode 7, Dib and Viera make it clear to Steve that they do
* At the end of Season 2, when all of Azazel's children meet up, they start comparing their powers: super strength, mind control, etc. Then one woman tells Sam Winchester to stop angsting about his death visions and says it could be worse. Her uncontrolled power was killing people she touched accidentally, stopping their hearts, which killed her girlfriend apparently.
* At the end of Season 3, Zane looks like he's been destroyed in the process of permanently defeating the Golden Master, but at the end of the episode uploads his consciousness into a new body based on
* At the end of season 4 episode 52, Big M. and Little M. find a tablet with a name list
* At the end of Season 4 of the revived series, the Doctor attempts to save
* At the end of season 4, Treister hands command of The OSI over to Col. Hunter Gathers — a man who was inspired by
* At the end of season 5 episode 52, Big M. and Little M. get the mystic stone (which is a competition reward for 3rd place, which the turtle won) and see
* At the end of season 5, his and Scully's office is burned in a similar fashion.
* At the end of season 6, Cersei Lannister burns down a significant portion of King's Landing to wipe out all her enemies in one fell swoop before crowning herself Queen and intending to start another inbred royal line with her brother Jaime. When the new Targaryen-Stark alliance presents her with evidence of the undead army planning to invade the Seven Kingdoms, she pledges to aid their war effort but is really planning to let the continent go to hell and hope that she'll survive it.
* At the end of Season 7, after having tracked down The Creator, Sonic kills him after a mild disagreement, just as Tails points out they didn't get to ask why The Creator was screwing with them in the first place.
* At the end of season 7 episode 52, a smoke emerges on Planet Xing,
* At the end of season 7: the Ancient weapons platform in Antarctica which was discovered and activated just in time to defeat Anubis' fleet.
* At the end of season seven, Barney and Quinn are trapped by airport security because he has a mysterious box containing a magic trick that he refuses to explain. Everyone starts getting reasonably pissed off until he caves and just does the trick. You can probably guess what sparkly jewelry is at the end of it.
* at the end of season three) in favor of more immediate ongoing plots in two time periods.

* At the end of "Slides and Ladders", when Omelda is featured on Orchid's podcast, the Investigation agent asks her to name all 932-and-a-half floors of the van. She complies, and begins listing all of them off. When the episode ends, she's
* At the end of "SpongeBob in RandomLand", SpongeBob and Squidward return to the Krusty Krab to find a customer complaining that he never got his order delievered. SpongeBob happily gives him the order he and Squidward were trying to deliver.
* At the end of "SpongeBob Versus the Patty Gadget", SpongeBob collapses after the fight and we're shown a close-up of the spatula dropping from his hand. It immediately cuts to Squidward placing flowers on the grave,
* At the end of "SpongeBob vs. the Patty Gadget", a funeral is held for the titular machine.
* At the end of Stars Eternal Sailor Moon uses her power to make Nehellenia remember her true dream from when she was a child before it was corrupted by her intense desire to stay young and youthful, a desire to find people out there who could care about her and not put her on a pedestal.
* At the end of "Stu and Stewie's Excellent Adventure", Meg calls forward on her transition to a male in the future by learning that a boy she was courting at the public pool was named Ron, and then commenting on how she always liked that name.
* At the end of "Summerween", the gang watches a horror movie marathon, which includes a film called
* At the end of "Sunday Cruddy Sunday", Vincent Price has difficulty starting a bus without stalling.
* At the end of Tatarigoroshi-hen, Keiichi is pushed off a bridge by Satoko (who, after finding him over Rika's corpse,
* At the end of "That's off the Chain", Lindsay goes on her swearing tirade against Heather and we get to see a shot of a loon looking surprised at what Lindsay is saying, just like the other contestants. After Lindsay's
* At the end of that two parter, the team finds out that there really are
* At the end of the 15th mid-season finale, "You're Getting Old". As
* At the end of the 2003-2004 TV season, ABC had been floundering for a few years, even becoming the first of the original Big Three networks to fall to fourth place in overall network ratings (falling behind FOX, who was surging behind
* At the end of the 2010/11 season, Danny Messer took and passed the Sergeant's exam. At the beginning of the current (2011/12) season, Danny had obviously decided to take the position, leave the lab, and become Sergeant Messer.
* At the end of the 27 July 2009 episode, Nicholas Parsons introduced an audio clip of Clement Freud, who had died the previous spring, speaking on the subject "How I hope my epitaph will read" from the 29 January 2001 episode as a tribute to his memory:
* At the end of "The 2G Kidnapping Case", armed men kidnapping Fuerdais shot and killed Tsui Kin Hong while doing close protection duties with the SDU.
* At the end of the anime-only Shimabara arc, the tomboyish Misao puts on a cute and frilly dress and uses a
* At the end of the Aralakh Company mission, Grunt kills around a dozen Ravagers in quick succession, which is fairly impressive given that they can both take and dish out a ton of punishment. Most impressively, he can one-hit them with a shotgun, a weapon that isn't well designed to punch through Ravagers' heavy armour.
* At the end of the arc, the Adversary decides to hold off on the invasion until they have the Fables living among us all killed so they can't intervene.
* At the end of the Arlong arc, the Arlong Pirates are taken into Marine custody. However, Hatchan escapes into the seas, opens a takoyaki restaurant and eventually returns to his native Fish-Man Island.
* At the end of the Avatar arc, the Avatar cultists are arrested by Gajeel Redfox and the Magic Council, never to be seen nor heard from again.
* At the end of the "Backstage Pass" story, Gary and Dillon are kept up by Zii and Yuki having sex.
* At the end of the Baltic War arc, Gudrid stands up to Thorkell and chews him out for trying to make Thorfinn into a warrior again, offers to duel him in Thorfinn's stead rather than let Thorfinn hold a weapon, and then punctuates it by giving a

public
* At the end of the book, the Last Men, realizing that changes in solar radiation will destroy all life in the solar system, launch a gigantic project to fire the
* At the end of the Bring Out Your Dead bit, someone comments that Arthur must be a king because he hasn't got shit all over him. The French at the end dump shit on him. Twice.
* At the end of the Bronze Age (between 1206 and 1150 BCE), many highly advanced civilizations existed in the Eastern Mediterranean region. Among these were; in Egypt, the New Kingdom; in Anatolia, the Hittite empire; in the Levant, the Canaanite cities; and in the Aegean, the Mycenaean culture. Almost overnight, all of these civilizations collapsed or were destroyed, beginning a dark age that lasted for several centuries. The cause of this Bronze Age Collapse is still a mystery. Various theories have been proposed, including volcanic eruptions, drought, earthquakes, invasion by "the Sea Peoples", internal rebellions and all of the above with the natural disasters aggravating the human threats. But no one knows what could have wiped out so many powerful civilizations in such a short time and without leaving any conclusive evidence as to what really happened.
* At the end of the Candice Bergen episode, Kermit appears with a "pie for Fozzie Bear" (the culmination of a
* At the end of the Captain Kremmen radio series, our hero decides to take a well-earned break from saving the universe and go to the
* At the end of the cartoon, Bugs pretends to be a bear attacking Elmer, while the real bear held up the same signs from before.
* At the end of the Cell Saga, King Kai, Bubbles, and Gregory aren't brought back to life after Cell self-destructed on their
* At the end of the chapter "We Don't Go To Ravenholm", Father Grigori disappears into a crypt behind a wall of flames while shooting at zombies. Whether he survives or not is left ambiguous.
* At the end of the climactic battle, Tai Lung gets a hope spot of his own, when he declares that
* At the end of the comic, Charlie Brown may have succeeded. Lucy was called inside when Charlie Brown was about to kick the football, so she asked Rerun to hold it. In the strip itself, when she later asked Rerun what happened, he said: "You'll never know!" However,
* At the end of the conversation chain, the aspirant wins a full-ride scholarship to attend a prestigious university on the Citadel, and can barely contain his excitement.
* At the end of "The Crossing" now-wanted HR member Simmons kills Detective
* At the end of the day, the mortal form dies, and she's waiting for herself.
* At the end of the day, the South got pretty much everything it wanted, with slavery traded for segregation and black suffrage taken away through a set of sneaky laws known as Black Codes, or Jim Crow laws. These included but were not limited to poll taxes, literacy tests, and having to guess how many items were in a full jar — but you were exempt from these tests if your grandfather had been eligible to vote, which mean all white males were in and black males were out. This situation lasted for almost one hundred years, until the
* At the end of the Deferi/Breen story arc, the Ancient Humanoids/Preservers are revived and decide to once again explore the galaxy and meet their descendants, making it one of the few cases where the Precursors come back.
* At the end of the Disk 2, Garnet tries to get an Eidolon that she can use to save her mother from Kuja in battle. The Eidolon she finds is Leviathan — whose attack is to conjure up a tidal wave to wipe out his enemies. As Queen Brahne is with the royal fleet on the ocean (while Kuja is airborne on his silver dragon), Garnet is heart broken she can't use Leviathan to help.
* At the end of the eighth season episode, "Requiem", Clark pushed himself through Lana Lang's kryptonite radiation so that he could hug and kiss her one last time after Lana was forced to permanently absorb kryptonite with her alien power skin to stop a kryptonite bomb from destroying Metropolis.
* At the end of the episode, after Clara admits that one gay marriage isn't the end

of the world, it shows that the world has indeed been taken over by Nazis riding dinosaurs.
* At the end of the episode "Anthology of Interest", Professor Farnsworth concludes his What-if Machine is broken, saying that it's "not worth the gold it's made of", before simply tossing it in the trash.
* At the end of the episode "Barting Over" Homer acts in a commercial for Viagra-gaine, a drug that "gives you hair and what you need down there" and has side effects including loss of scalp and penis.
* At the end of the episode "Bet to Be Blonde", we get this exchange:
* At the end of the episode, Cartman gets thrown in front of a school bus by the school staff and was declared that he committed suicide. Cartman gets back at the staff with certain cupcakes...
* At the end of the episode, Chuckie jumps in the leaves about 6 times.
* At the end of the episode, "Chuckie Vs. The Potty", Angelica wets the bed. Justified, since she's at the normal potty-training age.
* At the end of the episode, Clem can opt to do this to Sarita, who gets bitten on the wrist during the escape from Carver's compound. Subverted at the start of Episode 4, when she gets mauled by walkers anyway.
* At the end of the episode, Clementine is given the option of doing this to Sarita when she's being attacked by a walker, though regardless of your decisions, she dies in the next episode, either from being eaten by walkers or blood loss/sepsis.
* At the end of the episode "Cobra's Creatures", the Joes quip to the incarcerated Dr. Lucifer that he should look them up in the next 200 years, implying that his sentence will last that long.
* At the end of the episode, Dale carries Chip while using makeshift wings. Foxglove reminds him of the logic of carrying anyone their size and falling ensues.
* At the end of the episode "FOX-y Lady", Peter asks Lois how she lost her job at FOX News. She answers, "Oh I don't know. Does anyone really care?" Peter says that she's right- by the end of every episode everything is back to normal.
* At the end of the episode "Fred Flintstone: Before and After", where Fred joins a group called Food Anonymous to help him win a weight loss contest. After winning, Fred resigns. However, it seems that those who join are permanent members as the head of the group steals Fred's dinner (a trait that Food Anonymous employs) and runs off, ignoring Fred's claims that he resigned as he chases after him.
* At the end of the episode he gives them the 50 bucks and lets it all out.
* At the end of the episode, his father sees the doll and also imagines it speaking to him. He briefly argues with it as if it were his actual wife, then he pulls its head off.
* At the end of the episode, however, he brings the book of heroes, the Enchiridion, to the evil Lich possessing a snail (although it could also be due to deception of The Lich's part).
* At the end of the episode, it is revealed that Jean was planning to sell the vase at her next garage sale for five dollars
* At the end of the episode, Jerry finds out his girlfriend has just married another mouse. Utterly dejected, he joins Tom on the trail.
* At the end of the episode, just as she is about to admit that she kissed him, Mal assumes she instead
* At the end of the episode, Lassiter invites Shawn into the interrogation room and hooks himself up to the machine. He then proceeds to tell Shawn that if he ever hurts Juliet in any way, he will discharge his pistol. Repeatedly. The result? Zero deception.
* At the end of the episode "Mystery of the Rings", after Scott Trakker is chewed out by his father Matt for disobeying him and is told that he'll be grounded, Scott's robot friend T-Bob asks to take Scott's picture because it may be the last time they see Scott smile for a while. T-Bob's statement gets a chuckle out of Matt.
* At the end of the episode "Showdown", Jonah Hex has a knife-sword fight atop an airship.
* At the end of the episode, SpongeBob manages to come up with a softer and wider-

ranging version of the act that elicits this reaction from his entire audience.
* At the end of the episode "The Chips Are Down", D.W. and Binky make friends and Binky admits to his friends that he likes ballet (which he'd been keeping a secret). Buster, who's a bit of a
* At the end of the episode, the gang yoinks his recorder away and plays it for their amusement.
* At the end of the episode "The Halls of Time", Billy and Irwin accidentally put theirs, Mandy’s, and Grim’s
* At the end of the episode "The Irish Pub Formulation", Leonard does this when he found out the flavor for Sheldon's snow cone is Mango Caterpillar.
* At the end of the episode, "What's Eating the Flesh", a body-eating virus consumes the Action League's bodies. Bill cures the league, and The Chief still needs a golf ball for his tournament, as he lost the ones he hit earlier. At the tournament, he uses The Flesh's head as a golf ball and gets a perfect "head-in-one".
* At the end of the episode, when Hawkeye does give her back to her brother (who announces his intention to sell her again), she goes with him ...
* At the end of the episode, when Karen Page visits Ben at his office, the copy on his desk shows the subway story got buried in the back pages, right on the same page as a "rescued cat" story.
* At the end of the "Everything but the Rain" flashback arc, Ryuuken walks out into the
* At the end of the extended version of "Da Vinci's Notebook", Ramon finishes his poem about how everyone gets a girl except him with:
* At the end of the "Family Land" episode, the Smiths have managed to liberate the Family Land theme park after a weeks' worth of forced imprisonment, which caused untold deaths.
* At the end of the fifth episode, Kaoru says he's better than any teacher she's known, and he calls after her, "Just wait... I'll become a damn great teacher!"
* At the end of the fifth trial, Monokuma executes Kokichi even though it is unclear if he killed Maki or if it was a suicide. Kokichi is found innocent when Maki shows up alive and well.
* At the end of the fight with the male MUTO, Big G is clearly watching, waiting and
* At the end of the film, Barry seems to be unable to achieve an erection
* At the end of the film, captain Aubrey comments that they need to get going before "God forbid, peace breaks out." To a modern eye, this seems so callous most people would blow it off a sarcastic joke. To someone like Jack Aubrey, a junior commander without significant political connections in the early 19th century, peace would mean being stuck on shore with half-pay and no prospects of either a ship command or promotion, and poverty being a very real threat if he didn't manage to stash away enough money from taking prizes before then.
* At the end of the film, he goes on explaining his idea for a new film, a
* At the end of the film, Henry is seen playing Little League baseball...which, having played professionally for a year, he would be ineligible to play.
* At the end of the film, their teacher, Miki Saegusa, is seen drawing a rose in space, which foreshadows the eventual fate of Biollante.
* At the end of the film, the same sort of montage selects various programmes showing
* At the end of the film, this happens to be true and Anna says "I knew you could do it."
* At the end of the film when Simba is reuniting with his friends and family after the battle, the rain causes the mane on Simba’s crown to be matted down and more closely resemble a scrapped hairdo his animated counterpart
* At the end of the final battle, after it becomes clear that Tom plans to kill Visser One using his own personal Blade ship, the visser essentially surrenders to the kids once they arrive on the bridge.
* At the end of "The Fire Phantom", Jimmy and Clark catch up with each other and compare notes on the evening, with Jimmy telling Clark how chilling it was. Clark

suggests that he build a fire. Jimmy immediately says that he's had enough of fire for the evening.
* At the end of the first act, Thor tries to get to his brother Loki, but provokes Iron Man and Captain America by stealing him out of SHIELD custody. What follows is a short but intense brawl of pure, delightful fanservice,
* At the end of the first book, Adele Mundy adopts (for want of a better term) Tovera, an Alliance
* At the end of the first book, when Ender is speaking to Peter (thanks to relativity, Peter's an old man while Ender is still a teen), Ender calls out Peter on deliberately using Battle School slang in their conversation. Peter replies he's doing no such thing: the Battle School slang that Ender knew has been incorporated into the standard Common language over the years.
* At the end of the first day of the trial in Turnabout Reclaimed, after Phoenix has successfully cleared Orla's name:
* At the end of the first episode, Nobue writes, "Ran away from home" on her little sister Chika's sleeping face. Of course, her little sister had just made a birthday card that said, "To my Big Sister, who's been putting on a little weight lately." Mi-chan sees it and doesn't let anyone tell Chika.
* At the end of the first film, Hagrid reminds Harry that the Dursleys don't know underage magic is forbidden. The second film cuts the letter informing the Dursleys of that fact after Dobby levitates the cake. Yet Vernon suddenly loses his fear of Harry and barricades him in, despite having no reason to believe Harry wouldn't turn him into a frog or blast the bars off the windows (especially since he leaves Harry his wand and trunk).
* At the end of the first film, half-dressed Bridget runs after Mark who seemingly left her when it's freezing. They're reunined, he hugs her and they kiss, it starts snowing and he covers her with his coat.
* At the end of the first film, the male protagonist buries his cheating wife alive in his grave, alongside the body of her boyfriend and the money that they were trying to steal. He avoided getting embalmed because his wife wanted him in the ground as soon as possible.
* At the end of the first game, one is destroyed but it takes nearly an entire fleet with it. There are still thousands more out there.
* At the end of the first game, Six Majin is seen again, but is now big enough to circle the earth in a few strides.
* At the end of the first game, Snake can try to save Meryl depending on a choice made during an
* At the end of the first movie, a young Wendy can be glimpsed, in a scene taking place shortly after the birth of Tinker Bell herself. This makes little chronological sense, as everything about the way Peter Pan and Tinker Bell are treated in the first film implies they've long been outstanding inhabitants of Neverland, enough that they've both passed into Earth's folklore by the time Wendy is 12 years old. (
* At the end of the first movie, the human Pinkie Pie tries to follow Twilight Sparkle back to Equestria, but bumps into the wall where the portal was, since it has just closed.
* At the end of the first part of the first game, Max is knocked out with a spiked drink in a bar full of corpses and wakes up tied to a chair in the basement of another building, talking to Frankie "The Bat" Niagara. Frankie proceeds to use Max's head for batting practice. Averted later, though: after he's knocked out with an overdose of Valkyr, he wakes up in the same place, since he was left for dead.
* At the end of the first race McQueen is talking to the rusteez representative explaining why he doesn't have headlights.
* At the end of the first season, Jeffrey Sinclair became Ranger One, the leader of the
* At the end of the first season, the Earth Alliance version of this amendment was invoked when President Santiago was killed in a space accident, with Vice-President Clark assuming power
* At the end of the first season the protagonists end up being trapped in

Hyperspace, and at the beginning of the second season one of them comes out 15 years later the same age, and much of the season is her searching for her uncle, who is still trapped there. At one point it's suggested that by the time they find him his son maybe be twice his age.
* At the end of the first season (which in chronological order would be the sixth episode), it is left very vague as to whether
* At the end of the first trailer for the series, the logo of The Clone Wars (the red variation used for the final arc) burns away, revealing the
* At the end of the following episode, Bartlet tries to resolve the situation by walking to Capitol Hill to negotiate another compromise solution (earning large amounts of positive press along the way). When the Speaker and his allies respond by keeping Bartlet waiting as they try to decide on their demands, he simply walks away, leaving the Speaker painted as the one responsible for the continuing shutdown.
* At the end of the fourth (and final) season, Ron was worried about a straighter example of this happening (as at this point, he and Kim have become an
* At the end of the fourth season, a group of redshirt Others attack the redshirt mercenaries and kill them all...with, you guessed it, the exception of their leader.
* At the end of the game, Gordon Freeman destroys the dark-energy teleporter Dr. Breen intended to use to teleport himself out of Earth, the platform that was lifting Dr. Breen then collapses and thus seems to fall to his death. However, in the sequel Episode One
* At the end of the game, it was originally going to be revealed that
* At the end of the game, when Joker succumbs to his Titan poisoning and dies, Batman carries his body all the way out of Arkham City, placing it on the hood of a GCPD police car before leaving in silence.
* At the end of the game, when Kim describes your behaviour to Jean, he will tell him you
* At the end of "The Great Snail Race", Sandy shows up to give Spongebob a kick in the rear
* At the end of "The Hatching", one of the reptile eggs is still intact, and begins to hatch.
* At the end of "The Heads", a mugger tries to mug the protagonist after he has been through hell escaping a Rokurokobi and being accused of murder. He then gives him the detached head as compensation, whereupon it comes to life and eats the mugger.
* At the end of the Ice Truck Killer arc, where he's walking up to the office Hollywood style — red carpet walkway flanked with adoring fans.
* At the end of "The Indestructible Man", Joel reads aloud an affidavit that he and the bots have agreed to sign, stating that they will never make any more
* At the end of the interval, Mrs Reece leads a competition with audience interaction.
* At the end of their failed invasion of the Milky Way, a group of fifty or so Reapers who survived flee to the Andromeda Galaxy in order to start over. And separately from them, the Reaper
* At the end of "The King of Town", everyone has a laugh at the expense of the King of Town when Homestar reveals the King ate his own missing sheep.
* At the end of "The Last Work", Julia swears revenge on the K-Team, and some of them say they still want to fight.
* At the end of the level "The Covenant", the Arbiter, Gravemind, and the Prophet of Truth all have a scene together. Truth's participation ends with:
* At the end of "The Longest Night", Derek Morgan is blindsided by the UnSub and bound with duct tape, allowing the UnSub to kidnap Ellie Spicer. The team, thus, must rescue Morgan from the Spicer house before they can continue with the investigation.
* At the end of the "Lord of Terror" arc, the eponymous character, in the final form of the Ultimate Destruction Program, is defeated by Belldandy and Skuld, when Belldandy decides to

* At the end of the manga, Eren dies for real, being beheaded by Mikasa as a necessity to stop The Rumbling (An Apocalypse How.
* At the end of the Marquis de Sade's story "Florville and Courval" (from his collection
* At the end of "The Mattress", Phil presses a button on the control panel to Lou's new Sleepmaster 2000 mattress, making it fold up between him, Tommy, Chuckie, and Lil. The latter three all glare angrily at him for doing so.
* At the end of the Mercury Lighthouse you face a brutal fire-elemental
* At the end of the Merrie Melodies short "Boulder, Wham!", Wile E. Coyote attacks Road Runner after Road Runner rushes across the gap to see who is beeping. It had the whole cloud of dust, several poking out body parts and even cat sound effects. After the dust clears, Wile E. Coyote stands midair next to a cliff, while Road Runner stands safely on the cliff.
* At the end of the movie, after they've both earned a modicum of respect from the other, she steals his wallet again, and he calmly tells her to give it back. "Old habits die hard" indeed.
* At the end of the movie, a man calls another man gay. In response, the second man stabs the first one through the chest with a sword. The first guy just grouses, "Oh, come on!"
* At the end of the movie both the Skeksis and the Mystics are gone. And only two known Gelflings are left to rebuild the world: Jen and Kira.
* At the end of the movie, David's creator seems to think that the fact that David acted against logic (which would dictate that it is impossible for a robot to turn human) to obtain his mother's love is proof that he himself is capable of true, unconditional love.
* At the end of the movie, Harley Quinn and Cassandra are driving away in a car together.
* At the end of the movie, they (jokingly) discuss the potential sequel, "
* At the end of the movie, when the Vulcans in the first contact envoy have a seat at the bar, the leader of the envoy shoots up when Zephram starts up his favorite drunk dancing song on the jukebox ("Ooby Dooby" by Roy Orbison) at maximum volume. After seeing no real cause for alarm and that it's just
* At the end of "The Moving Finger," poor Howard Mitla has dispatched the finger that was poking out of the bathroom sink's drain, but he made such a commotion doing it that his fellow tenants called the police. As Officer O'Bannion is trying to figure out just what the hell went on in Howard's bathroom (there's blood, vomit and drain-cleaner all over the place), he and Howard hear a loud splash inside the closed toilet. Howard notes that a hand has probably got more than one finger on it, and warns the officer that it's not a good idea to lift that lid. Officer O'Bannion grasps the toilet seat lid....and the story ends.
* At the end of "Them, Robot", Homer is fishing with robot worker A63 and orders it to take the boat out to sea, despite its objection that it can't turn into an outboard motor. It sticks its head in the lake and pretends to be a motor before pressing a button that
* At the end of the music video for "Concrete Angel" by Martina McBride, the little girl's only friend and guardian angel appears watching the event, then disappears and hugs the little girl. They then walk over to a group of other children who died by abuse and join them, finally having friends and peace in the afterlife.
* At the end of the "Name-Hunt Station" sub-arc, Princess Yuri Jahad gets into a fight with Slayer Karaka. Though both are shown to be extremely powerful, Yuri clearly has the upper hand because nothing Karaka can do to her manages to do any damage — not even reflecting the power of her own attacks against her. Likewise, she isn't even hurt by Karaka's spheres of darkness that are supposed to completely annihilate an opponent on contact.
* At the end of the narrative, Mormon is made the general of the Nephite armies specifically because (much like Nephi a thousand years earlier) he was really big and strong even from his youth. In addition to his military exploits, he was also an accomplished historian and scholar (he clearly admired Moroni so much that he

named his son after him) who ended up abridging a thousand years of the spiritual history of his people to form the record that bears his name.
* At the end of "The Next April Fools Thing", Stinkoman punches Bubs so hard he goes flying into space, leaving behind a twinkle that becomes the words "Happy April Fools' Day".
* At the end of the "Oily Hare" short, a Texas oilman dynamites Bugs Bunny's rabbit hole in hopes of an oil gusher. But instead it ends up
* At the end of "The Ones We Leave Behind," having resigned from the
* At the end of the Oración Seis arc, Jellal allows himself to be arrested by the Rune Knights. Eventually, Ultear and Melty bust him out of prison so they can form Crime Sorcière.
* At the end of the Painted Black arc, Mr. Verres does this to both Tedd and Grace.
* At the end of the pilot episode, a female radio announcer ponders whether Mr. Tall, Dark and Unavailable has returned after an absence of three years. The joke being that what they think is Batman was actually Kate Kane in a batsuit.
* At the end of the pilot, the main characters are escaping the police and President Nixon in an explosion of fireworks. This issue is never brought back up in the following episodes.
* At the end of "The Planet Splitter", Wendy and Marvin take away Wonder Dog's steak bone (he's on a diet) and leave. Wonder Dog pulls out another steak bone, takes a bite out of it and winks at the audience.
* At the end of the plot in the comics, Xander, who is a pure human,
* At the end of the prologue, Askeladd's final moment leads him to sacrifice himself rather than betray either Canute or his homeland of Wales. What makes it more an example of the trope is that he tries to keep Thorfinn from getting involved to the last, and as he lies dying tries to make Thorfinn realize he's got more to live for than his empty vengeance.
* At the end of the radio episode, Usagi is writing a love letter to Tuxedo Mask — which Naru snatches off her. Miss Haruna comes into the room and — rather than scolding Usagi for doing it during class — chases the two around the room, just as excited to read the latter as Naru. The English dub changes this to
* At the end of the Red Ribbon Army arc, Goku chases down Pilaf and his henchmen to reclaim the last Dragon Ball he needs. During the fight, Goku's pants are burnt off, but does nothing to stop him from continuing the fight.
* At the end of the Renho arc, Katsura is subjected to a similar beating from much of the cast due failing to mention that
* At the end of the reveal, Sakurai explains that their main focus was making sure every fighter from the previous games returned, "so I'm kind of hoping you aren't expecting too many new challengers" (at this point, the only new characters unveiled were the Inkling and Daisy) — immediately before revealing that Ridley had finally been
* At the end of the same book, Tavi becomes the first Aleran ever to see a female Cane, meaning that the invasion force wasn't just an invasion, it was a desperate attempt at
* At the end of the same book, the Vordak fight on the skyship deserves special mention. If you don't have the Sommerswerd, you have a grand total of four rounds to win
* At the end of the same episode, Riley asks the party to name literally any property. Hazel picks
* At the end of the Season 12 episode "The Maternal Conclusion", Stuart and Denise try to convince Denise's roommate to move out, arguing that they're deeply in love enough to commit to each other together in the same room. Denise's roommate asks Stuart to tell Denise that he loves her — he does — and then asks Denise to say it back to Stuart (she does), before asking Stuart and Denise to say it to HIM. Cue Stuart and Denise staring back at him in awkward silence.
* At the end of the season 2 arc, Terra turns to stone while using her powers to extreme effect to stop the volcano from forming under the city.

* At the end of the season 2 finale, Queen Chrysalis and her changelings are hit with a powerful magic spell and are sent flying over the edge into the distance. This seems fairly
* At the end of the Season 4 premiere, the Mane Six receive a mysterious box
* At the end of the Season Five finale, Dean has gone to live with his old flame and is trying to settle down to life without Sam. Pan back from Dean at the dinner table with Lisa and Ben, to see
* At the end of the season Rose, her mom (whose counterpart was turned into a Cyberman) and Mickey are trapped in the alternate universe. And the surviving versions of Rose's parents hook up and decide to have (another?) kid. In a later season the universes cross over again and Mickey decides to return to his home universe as his gran's counterpart has died of old age (rather than tripping on a carpet like his own gran).
* At the end of the season, there's Arisa, Suzaka, and Nanoha's family discovering Nanoha and Fate's secret as
* At the end of the second book, Iseult manages to rig Threadstones she and Safi are wearing to fulfill similar function.
* At the end of the second part, Sarah Jane reveals she's been keeping tabs on other former Companions and mentions some of the things they've done since leaving the Doctor. When she mentions what's happened to Ace, it contradicts
* At the end of the second prequel book, all that's left of the Wardens in Ferelden are Duncan and
* At the end of "The Second Raid", Kaname does this to Sousuke who raises his arms to hug her back, only to
* At the end of the second season, the Centauri use mass drivers to bombard the homeworld of their long-time enemies the Narns. In Season 3, the effects are shown — including altered climate due to atmospheric dust.
* At the end of the second volume a far more ancient war is hinted at. It's supposed to have been scarily similar to the current civil war, hinting that history is repeating itself, but that's all that is said about it.
* At the end of the sentence, a long, messy line trails off of the "D" and moves off of the page, indicating that
* At the end of the series 8 episode "Mummy on the Orient Express", while on the phone to Danny, Clara quite loudly and deliberately says "I love you" while looking directly at the Doctor. Her actress,
* At the end of the series, Hakoda exclaims he's the "proudest father in the world".
* At the end of the series, Mavis Vermillion dies when her mutual love for Zeref Dragneel breaks their curse.
* At the end of the Shakuras mission chain (and after securing an evacuation route for the Dark Templar), Artanis is assigned a final mission by Vorazun, leader of the Nerazim: overload the planet's core through the Xel'Naga Temple, resulting in an
* At the end of the Shie Hassaikai arc, Overhaul is seen being transported to the villain hospital strapped to a gurney with his hands sealed inside a special shackle, designed to prevent him from using his (touch-based)
* At the end of the short "Super-Rabbit," Bugs becomes a Marine. In real life, the U.S. Marine Corps were so thrilled by that ending that they actually inducted Bugs into the force as a private, complete with dogtags; he was regularly promoted until the end of World War II, where he was officially "discharged" with the rank of Master Sergeant.
* At the end of the short, the husband and wife somehow do not notice that
* At the end of the show's run, Grand Nagus Zek retires to spend more time with Quark and Rom's mother, and he names
* At the end of the Sixth Doctor serial "The Trial of a Time Lord", the Doctor has overcome all the Valeyard's convoluted plans, and seems to have defeated him, only for
* At the end of the Skypeia arc, Conis tells the Strawhats that she wants to join them in exploring the world. Her father Paguya then tells them that Conis's mother

Serra previously sailed with another crew of Blue Sea pirates: the Roger Pirates.
* At the end of the story, Kagome is made to believe that she is living a normal life, forgetting all about the Feudal Era and everything she did there, while trapped INSIDE
* At the end of the story, Luna admits that she was lying about that and the posting was
* At the end of the story (the original ending), Martin says that he learned his lesson about lying, and includes claiming Lincoln was sleep-talking as one of his "lies". However, Martin didn't actually lie; he was truly stupid enough to believe the lies of Papa Wheelie and Chandler, and Lincoln really was sleep-talking.
* At the end of the story, when Holly sacrifices herself to kill Azathoth and is subsequently brought back, she discovers she has lost the ability to change back into Steve at all.
* At the end of the Strong Bad E-mail "Extra Plug", Strong Bad tells everyone not to move, and then Homestar and Strong Sad start singing about how badly they have to pee.
* At the end of the tax year the IRS office sent an inspector to audit the books of a Synagogue. While he was checking the books he turned to the Rabbi and said, "I notice you buy a lot of candles. What do you do with the candle drippings?" "Good question," noted the Rabbi. "We save them up and send them back to the candle makers, and every few years they send us a free box of candles."
* At the end of the test footage, Deadpool says hi to Tom Rothman, a Fox CEO at the time the test footage was made (
* At the end of the third and final installment, some time after meeting the
* At the end of the third book, Janos Slynt sends Jon Snow out to treat with Mance among the wildlings, with the secret mission to assassinate him. If he does this,
* At the end of the third episode, Excel is interrogated by soldiers speaking outrageously bad English. "Hwat is yo porpoise?" "Commandah, she's got it!"
* At the end of the "Top 15 Personal Favorite Jokes" episode, being a clip show, Linkara opted to use the
* At the end of the "Treehouse of Horror VIII" segment "Easy Bake Coven," this happens:
* At the end of the trial, however, she has a breakdown upon realizing that the Deadly Prank
* At the end of the trilogy, when Thrawn dies, Pellaeon takes command of the fleet, and several books set later have him reporting to or working with various high-ranking Imperial
* At the end of "The Trouble with Centigurps", Otto takes down the storage container with the lone Centigurp to the Storage Room. He opens it, and finds nothing but a light, a desk, and Octavia. Otto asks where exactly all of the stuff in the room is stored, but Octavia simply answers with, "It's complicated."
* At the end of the truck ride in Mission 4, Duke and his henchmen show up, but then disperse without further word. A cutscene would have taken place here, followed by a boss fight with
* At the end of the two-hundredth episode, the same Easter Egg is seen, re-edited and dubbed over to make it relevant to the two-hundredth episode.
* At the end of the volume, after Beacon is overrun by Grimm, several friends are dead, Yang's arm has been cut off by Adam Taurus of the White Fang, and her partner Blake has run off, she repeats her uncle's words to Ruby as a clear sign that she's hit the Heroic BSoD
* At the end of the war, after the Emmerians liberate Gracemeria, the Estovakians then deploy the Chandelier, a giant railgun that was originally going to be used to defend against the Ulysses asteroid, but wasn’t completed on time, and was then repurposed into a weapon of war.
* At the end of the war, just when the Radical Eruseans had surrendered, and the last Arsenal Bird was shot down, two
* At the end of the War of the Beard, the Dwarf king Gotrek took the Elven king's Phoenix Crown as compensation, it still remains in the Dwarfs' treasury to this day.

* At the end of the "Wet King" episode, Sergeant Keroro ends up tied up like this outside the Hinata household, with bruises.
* At the end of "The Whale who Wanted to Sing at the Met", Willie the whale is singing to a packed house in Heaven; the final shot is of a "Sold Out" sign on the Pearly Gates.
* At the end of the X-men graphic novel "God Loves, Man Kills," Magneto calls the X-Men fools for not taking his side in the matter of homicide of mutants in the name of Christianity. Wolverine thinks maybe that's so but there are certainly no shortage of windmills at which to tilt.
* At the end of "Time to Time", Lorelle Palmer has officially joined the time travel for hire agency Chrononics in 2059.
* At the end of "To Boldly Go, Part 2", Spock has a discussion with Kirk with about emotions, as he blames himself for
* At the end of "Torg Potter and the Sorcerer's Nuts", Gandeldorf manipulates the House Cup at the last moment by giving his niece a trillion points. The comic especially lampshades how he's stealing the victory from House Wunnybun (Slytherin), and he explains this is because he can't treat them well because they're supposed to be the bad guys so they need to stay that way.
* At the end of Uryu's fight with Haschwalth, which ends with the latter
* At the end of Volume 3, Adam vows to Blake that he will destroy everything she cares about. When he sees her horrified reaction upon realising that Yang is trying to find her, Adam decides to start with Yang, cutting off her arm when she rushes in to save Blake. Blake is so guilt-ridden that she goes on the run.
* At the end of Volume 3, Yang experiences an emotional collapse that makes her completely give up on life and take to her bed in depression. She spends most of Volume 4 recovering from it.
* At the end of Volume 7, his response to the news that Salem's about to attack Atlas in person, leads him to take a series of measures so extreme that the heroes finally oppose him fully. The volume ends with some of the heroes on the run from him, some arrested, and him transforming into a Hero Antagonist
* At the end of "Water, Water Every Hare", Bugs ends up back in his water-logged hole and wakes up with a start, telling himself "Must've been a nightmare." Then Gossamer (who had earlier been shrunk by Bugs) goes by in a tiny rowboat and quips "Oh yeah? That's what you think!"
* At the end of "What's Up, P. Buddy?", Dez has to explain to Tsuni why she and a bunch of others are at an abandoned factory. Deciding the real answer
* At the end of Wrathion's questline in Pandaria he begins ranting about how Wrynn threw away a golden opportunity when he didn't use the Siege of Orgrimmar as an opportunity to subjugate the Horde. The previously silent innkeeper then berates Wrathion for completely missing the lessons of Pandaria: It is the conflict between opposites that makes them stronger; destroying one will weaken the other. Wrathion
* At the end of "Wynken, Blynken, and Nod", it's revealed that the eponymous boys were only the facial features of a kid, and the "shoe" they sailed in was said kid's trundle bed.
* At the end, one of the heroes, Balwin, succumbs to vampirism after Yorga is killed and instantly claims Cynthia as his own victim right after he saves her.
* At the end, Pocahontas gives John Smith something from Grandmother Willow's bark to "help with the pain" after
* At the end, Quasimodo is hoisted up over the crowd's shoulders in triumph.
* At the end, Seth manages to get out from under criminal prosecution by cooperating with the Feds, but the movie ends just as Federal agents storm J.T. Marlin after Seth walks out, leaving it ambiguous exactly what happened to Chris and the rest of the company, or if any of them got away.
* at the end, Stacy encourages Candace to finally bust the boys once and for all, but once Candace gets to Mom, her wicked witch theme plays forebodingly, before telling her mom to get some pizza for dinner.
* At the end, the curse is broken when Shampoo kisses him while she is in her cat-form.
* At the end, the Doctor leaves for what seems like a few minutes. He comes

back... and two more years have passed for Amy. Naturally she's pissed off, but agrees to go with him... even though she's to be married the next day.
* At the end, the eponymous ghost gets similarly long number... and is sitting next to the voodoo priest with the next number to be called (4). Betelgeuse tricks him and steals the voodoo priest's number... but gets his head shrunk in retalation.
* At the end, the family gets to see this trope from their point of view when they invite the Gleason family to dinner at their house. Meg, the daughter, takes food from multiple dishes at the buffet table, when the Chinese custom is to take from one dish and finish the serving before taking from another. Mrs. Gleason mixes the prawns, gravy and rice together on her plate, and Mr. Gleason struggles with using a pair of chopsticks.
* At the end, the Mole lights a match, unaware of the gas leak, which makes the town explode.
* At the end the of Soul Society arc, Ichigo is attacking the revealed Big Bad, only to be stopped along with the music ("Number One").
* At the end the pirates themselves surrender when called upon to do so in Queen Victoria's name.
* At the end, the protagonist dies, having lived ~60 years in a few months
* At the end there is also a classic example of the airport dash, as protagonist - upon return to his real life - runs to catch his real life ex-girlfriend (wife in the alternate universe) before she jets off to Paris. The scene includes a staple of the trope, love beyond a magic barrier, which requires the dashee to yell his declaration of devotion from a safe distance. On-lookers typically ignore the ruckus, as why would a manically yelling man be scary at an airport?
* At the end, we find Daffy was shrunk to only a few inches high when he runs out of a tiny hole in the ground and tries to steal a pearl
* At the end when Nick and Judy are getting their first assignment, Nick states that Bogo should have a line of inspirational greeting cards, which causes the rest of the officers in the room to chuckle.
* at the end when they got together when she keeps taking photographs of him at dinner with Lydia, Charlotte and Ricky Collins. It appeared on twitter accompanying the web series.
* At the end, while walking out of a movie theater, Alyssa (the female lead from
* At the end Wonder Dog goes to a room labeled "Justice League Commissary" and "Wonder Dog's Food Storage", with areas labeled "Steak Bones" and "Sausages" that hold those items.
* At the end, Zack offers to pass off his project as Cody's so the later won't get a bad grade, but Cody decides to just accept the C the teacher gives him. He perks up later on once he discovers he can designate the class as "Pass/Fail" so it won't affect his GPA.
* At the final battle with Majin Buu, Vegeta tries to convince the Earthlings to raise up their hands to give Goku the energy he needs to form the Genki Dama powerful enough to kill Buu. Vegeta tells the Earthlings to consider this act as their first step to becoming a
* At the final confrontation against the Bene Gesserit, a centuries old order claiming to have the moral high ground even as they ruthlessly manipulate people through multiple generations of eugenics, when
* "). At the finale, it is revealed that much of the story is the dream of the protagonist Paul. However, this experience allows Paul to realize how destructive his obsession over his dead wife can be, thus compelling him to let go of his past, leaving the eponymous "Dead City" and starting anew.
* At the final shootout, the private-eye-turned-killer crashes into the requisites set and realizes he is a clay figure. Everyone else would have Gone Mad from the Revelation
* At the first crafting table, you're given a couple of items and asked to create a sword. However, due to the particular set of ingredients given to you, you can create a lever instead. Doing this nets you an achievement and a bemused reaction from Petra, who tells you to try again.

* At the first opportunity to present itself example with "you" and "Lord Yu" and used it several times in a single review. He even did it in a subtitle once:
* "At the first sign of trouble, we'll abort the mission." — This guarantees that not only will the mission go south, but also that any attempt to abort the mission will fail — either
* At the First West Coast Computer Faire, Apple engineer Steve Wozniak had made several gag brochures for a successor to the MITS Altair called the "Zaltair." The ad copy was filled with absurd claims, like having 18 expansion card slots, a new "BAZIC" programming language that could be rewritten by the user, and a case that will "add to the decor of any living room." People bombarded the MITS stand with questions about the new model, and it wasn't until late in the day that anyone caught on to the joke. Today, these brochures are highly sought-after collector's items. What made it plausible was Woz's unorthodox sense of humor and that everything listed there
* At the funeral, Mick Rory sheds a couple of manly tears, which Earth-X Snart tells him, "It's ok, let it out, big guy." Mick then claims it was allergies.
* At the funeral of Maryland Senator Elijah Cummings, Kentucky Senator Mitch McConnell attempted to shake the hand of pallbearer Bobby Rankin, only for him to refuse, and New York Senator Chuck Schumer observed with a smirk.
* At the Future there is a hoverbike race minigame you play against badass
* At the Gilmore's Friday night dinner, their house is part of an architectural tour, so they have tourists going through the house while the Gilmore family is eating. Richard is getting irate at all the people traipsing through the house, using the piano, etc. At one point, the tour guide lady is voice-over-heard saying: "The house was built in 1906 by [some architect, can't remember the name, let's say: 'Sterling']". Richard slams his napkin down, jumps up and goes off-screen to confront the tour guide, saying: "That's it. The house was built in 1907, and it was a protege of 'Sterling's'!!".
* At the go-home show of 2013's TLC pay-per-view, it had gotten so bad that the audience practically ignored the in-ring characters and commentators' efforts to sell Cena's title-unification match against
* At the Golden Globes in 2013, Connie Britton was nominated for Best Actress In A TV Drama for
* At the Grand Galloping Gala when they have to investigate a nudist resort, while the modest Chloe refuses to strip down or even look at them, demanding them to put their clothes back on even as they walk in and ignore her protests. She does go in when they identify the suspect, if only to arrest him... but she still demands they all get dressed first.
* At the Great Siege of Malta in 1565, the Knights of St. John were led by Grand Master La Valette, who was 71 at the time, while the Ottomans were led by Dragut Reis, who was 80, and their ground forces were led by Mustapha Pasha, who was 70. All led from the front, and La Valette and Dragut were both wounded in action.
* At the Hall of Justice the Super Friends' computer has a scan report device marked "Scan Report".
* At the haunted house ride in the British theme park Drayton Manor, the entrance to the actual ride was set up (though it might have changed by now) as if the participants are volunteer paranormal investigators, and at one point the park employee/lead "investigator" makes a reference to all the previous investigators still being missing. Later in the ride intro/experience, a painting comes alive, warns people to get out, then tells them to look up. Those floating bodies slowly tumbling about on the ceiling were very convincing...
* At The Heart Of It All, with the mention of a band who "played music by throwing chainsaws down stairways into flaming pianos".
* At the height of his madness series, Dr. Tenma takes over the Ministry of Science and demands to see "Tobio" again. Fully believing that Astro is Tobio, he asks him to join him. When Astro refuses, Tenma snaps completely and tries to commit suicide.
* At the height of its power in the 1800s, the British Empire became famous for this. It was said that the empire could quiet the whole of China by simply

dispatching a single warship
* At the height of its rampage in the mid-2010s, the Islamic State was notorious for destroying several ancient ruins in the lands it conquered. Sadly, this was among the
* At the height of the British grave robbing trade, stealing the corpse itself wasn't actually against the law: officially, a dead body had no monetary value, so taking one wasn't a criminal offense. Stealing anything buried with the corpse
* At the height of the Bundy/Studd-Machines feud, Heenan introduced his own stable of "masked" wrestlers during a segment of "The Flower Shop" with Adrian Adonis. It was obviously Studd and Bundy wearing paper masks, and they quickly revealed themselves to scornfully mock Andre.
* At the height of their power, the Forerunners maintained a network of slipspace portals throughout the entire galaxy which allowed for quick passage through their entire empire. One of these portals is used in
* At the height of the Mexican-American War, the Republic of Yucatan was still formally independent from Mexico after declaring its independence in 1841. The U.S. government, however, treated the Yucatan as being part of Mexico and blockaded the nascent state. With America's blockade, no international support (even after offering its sovereignty), the ongoing Mayan uprising known as the Caste War, and the continuing chaos in Mexico, the Yucatan government, in desperation, openly requested annexation to the United States. U.S. President James K. Polk loved the idea, as did American expansionists, and the "Yucatan Bill" actually passed the House of Representatives, but it failed in the Senate, due to Congress's hesitance to commit to a war against the natives with a war in Mexico ongoing. After the Mayan insurrection was put down, the Yucatan Republic eventually agreed to re-confederate with Mexico.
* At the height of the moral panic over video game violence in the '90s,
* At the height of the song's popularity, Kohl's used a product-specific cover of
* At the high school level and below — and in some cases, the collegiate level and some non-major league level sports leagues — there is a "mercy rule," which serves to either end a game after a prescribed point in the game or kick into effect a rule that hastens the end of the game once the winning team's margin reaches a defined point. This is as opposed to playing out a one-sided game to its natural conclusion under normal rules. Common applications:
* At the house party episode, Ned accidentally kisses Moze because she wore the same dress as his crush Suzy. Over the course of the series, Moze can still feel the sparks from that kiss and tries to forget all about it. When she tries to kiss her crush
* At their junior prom, Sheldon proposes to Emily in front of the entire student body.
* At their peak, before the Varelsi threatened the remaining star systems in the universe, the Jennerit Empire from
* At their wedding, Derek tells Susan that she's glowing, by which he means she's actually glowing green.
* At the July 4, 2016 edition of Raw, a huge food fight broke out backstage.
* At the Landsmeet, you've brought the nobility together to expose the crimes against your order and get the country re-focused on fighting the Blight. It's entirely possible to play your political cards right so that basically the entire country's on your side, at which point your political opponent challenges you to a duel. You can nominate a champion, or you can just throw down with him yourself and finally
* at the last corner of the last lap of the last race of the season to steal the 2008 championship from Felipe Massa. Often accompanied by James Allen's commentary: "IS THAT GLOCK?! IS THAT GLOCK GOING SLOWLY?!"
* At the last scene, old and new Zorro are fighting their archenemies to the death, Zorro 2 (Alejandro) manges to kill Captain Love first but unfortunately Montero kills Diego first but is then killed due to being tied to a falling crate of gold.
* At the latest point in their timeline, the Air Watch are collaborating with

Unseen University — and specifically HEX the thinking engine and his human associate Ponder Stibbons — to devise a training simulation for their pilots where
* At the less radical end, Honor herself and a number of other characters are genetically engineered for living on high-gravity worlds. And the relatively recently-introduced prolong treatments have vastly expanded the life expectancy of anyone who can get them. It isn't actually known whether later-generation prolong recipients will ever experience old age. In wealthy star nations, the treatment is nearly universal.
* At the "Lights, Motors, Action!" stunt show at Disney's Hollywood Studios (and the original French show "Moteurs...Action!", a stuntman in the third sequence is shot by the hero and falls about four or five stories onto an air bag. In the fake "finished film" sequence shown at the end, the stuntman is shown falling onto a car, the roof of which essentially disintegrates like it was made of sugar glass.
* At the memorial service for Nelson Mandela, a man named Thamsanqa Jantjie stood alongside the world leaders eulogizing the civil rights icon "translating" into "sign language". Except he was basically just moving his hands around and faking it the entire time. So not only was it an example of this trope, it was also a major breach of security.
* At the midpoint of each subsequent episode, the plot rewinds to establish how a second storyline progressed to intersect the first storyline.
* At the Missile Base, failure to alter the coordinates of several missiles results in a scene where your home is promptly obliterated by said missiles without even so much as a time limit. Also, the obvious Non-Standard Game Over of not taking out the boss of the dungeon before the Missile Base blows up.
* At the moment the man-portable drone systems are controlled by Xbox controller, while the Humvee-deployed ones are controlled by laptop/PS3 controller. There are also iPhone-controlled devices that the militaryis prototyping, in an effort to invoke this trope. It helps that the control scheme is dead simple and takes 5 minutes at most to be proficient. And that's just the stuff that they'll tell you about.
* At the moment, the total human cast of Real Life has passed 7 billion. If you include all the humans who have died, the number goes up to (an estimated) 108 billion. Unfortunately, you can only maintain a stable, social relationship with
* At the most blatantly obvious, the Osean Federation is the United States with a dash of Japan in terms of ethnicity and military elements, with the branches of their armed forces explicitly called
* At the Mountains of Madness also has some shades of this. While still a pretty dark story compared to some of the more extreme examples on this page, it does contain one of the only monsters Lovecraft wanted us to somewhat sympathize with (the Elder-Things). Also while Danforth is psychologically messed up by... whatever it was he sees at the end, he has it pretty easy compared to some of Lovecraft's other characters. (Some versions add mention of him being committed to an asylum, but in the original novella it's mentioned that he still acts his normal self most of the time outside of the occasional strange muttering.)
* At the Mountains of Madness as the Elder Things and Yithians being very advanced aliens and possibly in possession of insanely durable materials construction and preservation technologies, but still....
* At the Mountains of Madness could be considered a variation of sorts. It's written as an account by one of the surviving members of the expedition regarding just what the heck happened, but it still serves a similar function. Lake's report on his discovery would be closer to a straight example, though it doesn't record the actual horror that he experiences. Also in a weird, twisted sense, the artwork which tells the story of the rise of the ancient empire of the Elder-Things, and their fall at the hands of the Shoggoths.
* At the Mountains of Madness later discovers the camp wrecked, and the dogs and scientists all killed except for one missing man, who they assume went insane. It's only when they find his dissected body that they realize the horrible truth — the so-called fossils are actually sentient aliens capable of hibernating for

millennia, and once had a civilization superior to man's.
* At the Mountains of Madness", the aliens themselves seem to agree that everything the protagonist has gathered could be dismissed as cheap forgery.
* At the Mountains of Madness, the Elder Things communicate by making piping sounds with their multiple breathing tubes.
* At the Mountains of Madness: "The leathery, undeteriorative, and almost indestructible quality was an inherent attribute of the thing's form of organization, and pertained to some paleogean cycle of invertebrate evolution utterly beyond our powers of speculation."
* At the Mountains of Madness. The source book for the later even references the former, letting the keeper decide whether the two campaigns are canon with each other.
* At the Mountains of Madness, which reveals that ancient aliens who lived on Earth before humanity inspired the ancient legends that Lovecraft hinted at in earlier, more fantastic stories...
* At the Movies, Siskel and Ebert were co-presenting film review programs for 24 years.
* At the Museum of Science and Industry's U-505 exhibit, you can buy a full range of "Rosie the Riveter" projects —
* At the New York Renaissance Faire, Sheriff of Nottingham Philip De Marque has been killed off a number of times at the end of many years' story lines.
* At the opening stage of the Battle of Budapest in December, 1944, Soviet messengers who were delivering the demand from General Malinovsky that the trapped German and Hungarian garrison surrender were shot either on the way or on the return trip. Nobody knows the specifics of the circumstances or if it was intentional or accidental. Regardless, the subsequent battle became particularly brutal and the German defenders of the city were nearly annihilated, along with a large number of trapped civilians.
* At the Opera Tonight! If your characters are looking for a classy evening out, it doesn't get much classier.
* At the Orange Show Speedway in San Bernardino, California, in the late 90s, they had a racing class called trains, which consisted of three cars hooked up to one another, racing on a figure-8 circuit. The one in front had only gas and steering, the one in the middle was empty, and the one in the back had only brakes and steering. Did we mention that the cars actually are on a single level track, so they can crash into each other in the middle? That's probably why they don't run it anymore.
* At the orbit of Mars or beyond, you'd freeze, but rather slowly. Even in the outer solar system, you'd be slightly more concerned about running out of air or contracting the bends than freezing to death.
* At the other end of the scale, a book you can sensibly carry around with you, measuring just 14.1 x 4 x 20.4cm (5.5" x 1.6" x 8"), is
* At the other end of the scale, there are characters who can snap a
* At the other end of the spectrum, is the just plain crazy Tiax, who informs you: "One day, Tiax will
* At the other end of the spiritual spectrum, this trope causes trouble in Heaven in
* At the other extreme, Olympic basketball player and world's tallest professional model
* At the outset of the series, there has been a civil war raging in Arcasia for over a hundred years. The Countess Persephone's father was slain in it, Duke Nobel proved his skill as a military commander during it, and Bruin, Tiecelin, and Grymbart fought in it, occasionally referencing battles, camp life, what the weather was like before an engagement, etc. The war drove an entire region to famine so extreme that its people had to resort to
* At the outset of the War on Crowned Death. Once, when assaulted by a priest of Crowned Death, Mercury is confronted by the priest's apparent invulnerability. She proceeds to throw everything and the kitchen sink at him. Unfortunately, this includes the

* At the outset, vampires' hunger for blood can drive them into an animalistic frenzy, making it quite risky to be blood-starved in public when
* At the pier, Hiro assures his team that Baymax can handle Yokai. Cue Baymax come flying through the air and
* At the post-TI5 shuffle, Puppey was the only remaining member left on the squad, with KuroKy leaving to form his own 5-man team, to eventually be signed by NA/EU organization Team Liquid, s4 returning to Alliance, and Arteezy and zai returning to Evil Geniuses. Puppey's new roster included the unpredictable yet talented Jacky "EternaLEnVy" Mao and his longtime partner Johan "pieliedie" Astrom, talented Romanian midlaner Aliwi "w33" Omar, and Danish veteran Rasmus Berth "MiSeRy" Filipsen. The team, like the previous iteration, was loaded with talent. They finished 2nd at The Frankfurt Major and 1st at The Shanghai Major. But like before, problems started to arise.
* At the practice session for the 2017 Four Continents Figure Skating Championship, the announcer mistakenly announced Japanese figure skaters Yuzuru Hanyu and Shoma Uno as being from China. When they got to "Boyang Jin, from China!" (which was correct), Hanyu and his coach Brian Orser
* At the prom afterparty, Ben sets a county record for longest keg-stand. Radar describes him as some kind of "autistic savant".
* At the Psy Academy, a student's cape more or less has the same role as a belt does in martial arts, first students have a red cape, then a blue cape and then a black cape while professors have a white cape. In the first game, your character has just earned their black cape. By the time you reunite in the second game your friends Guy and Anya have theirs. You can also snark at another classmate for still being a blue cape after the four-year
* At the qualifying round of the bike Grand Prix near the end of the series, Kibault
* At the request of the coutnry's state television, the 2018 Hungarian adult comedy cartoon
* At the (rushed) conclusion of the conflict with Mammoth Mogul, Tails — now the more-or-less omnipotent Titan Tails — uses his power to overcome Mogul, then gets to recreate the universe. He leaves it the same as it was before, except with Mogul sealed away.
* at the same meeting. The resulting fight resulted in all of the warlords' deaths.
* At the same moment, Air Force One flies like a bat out of Hell to escape the Washington fireball; at the last second, the flames touch the rear of the aircraft, but the pilot manages to escape.
* At the same prom Buffy picked up the "class protector" award, Xander fully expected the
* At the same roast, Artie Lange himself joked, "It's the whiskey talking; I'm going right to rehab after this." He did two years later.
* At the same time, Accelerator was fighting Amata Kihara. In the course of that fight,
* At the same time, another washer woman is tied up in a similar compromising position, and while it's hard to be sure, she's making noises like she's being raped by Titi's mentor off-panel (and finding it annoying at worst.).
* At the same time as it screwed the OpenSolaris community, Oracle's behavior stifled the development of OpenOffice. Many of their developers were laid off or left on their own accord, they went on to form The Document Foundation and fork OpenOffice into LibreOffice. Oracle did eventually just give OpenOffice away to the Apache Foundation, but that only created a bitter
* At the same time, Chi-Town (founder and seat of power for the Coalition) was pretty tolerant and open until Nostrous Dunscon decided to declare war on them and fling hellish magical
* At the same time, Dean towards Castiel. No matter how angry Dean may get with Cas in the short-term, he
* at the same time for airplane spins or giant swings. While wrestlers being able to lift double their weight isn't anything new, keep in mind that Bate is barely older than a teenager, thus making his feats of strength all the more impressive.

* At the same time it is stated in the books that the prophecies are just a guideline under which events
* At the same time, it's played straight by the fact that the Terrans, Argons, and Aldrinites can easily understand each other despite each having been separated from the other for nearly 800 years.
* At the same time, it's still clear the toys have complex inner lives without Amber, and there are even sections of the game where you play as Ted without Amber being present at all.
* At the same time machine learning algorithms were developing in order to understand increasingly complex data used by businesses and scientific institutions. To be useful these algorithms needed to uncover important features from data. Among these techniques was the artificial neural network (developed in the 1970s) which attempted to mimic the way that data is processed by neurons in the human brain. There was some success with this technique and by 2000 such networks could read printed letters in images. Around 2010 a subfield of neural networks known as deep learning exploded onto the scene. These AIs operate similarly but filter the information through many layers with the lower layers processing the things found by the higher layers. Watson players (not real money, though).
* At the same time of Vittorio Emanuele's exile in Brindisi, the Germans formed a puppet state in the occupied territories, with Mussolini proclaiming Rome as the capital... But due the city being too close to the front lines he had to set shop in various cities in the North (most notably Salò, hence its popular nickname as "Republic of Salò").
* At the same time, one of these abstract beings (Morpheus himself) claims that he and his siblings are merely the servants, the dolls, of mortals. For better or for worse, mortals are the dominant power in creation.
* At the same time, played straight in one of the season 4 episodes: when a Raptor jumps barely a stone's throw from the Galactica's hull, the gravitational shockwave tears out a good chunk of the hull and catastrophically damages the Galactica's already strained superstructure. So it's not like "you can't jump next to other ships", it's more "you CAN jump but you're a safety hazard for anyone nearby".
* At the same time she thinks Maya's crush on her is idol worship because Maya did not know her real self.
* At the same time, slightly played straight; while both Karen and Lala are Greco-Roman wrestlers, Lala was trained in the traditions of
* At the same time, such cynicism led to the slow death of the traditional circus in the industrialized world: clowns became regarded as
* At the same time that Ultra-class protomechs appeared, ten and fifteen ton Ultralight Battlemechs also made their debut. They're
* At the same time, the crew also created the character Gregory, who is physically disabled after a stroke, specifically for Timothy Omundson for his return to acting after a similarly debilitating stroke.
* At the same time, the Invid's invasion of Earth is the final phase of their own Tactical Retreat: the entire Invid race was busy fighting a costly battle on Tirol and the rest of the former empire of the Robotech Masters, but as soon as the Sensor Nebula warned her that Earth was full of Flower of Life, from which is made the Protoculture that powers their technology, the Invid Regess took her half of her race and moved to Earth, abandoning the Regent and his half to the
* At the same time, the League's founder, All For One, is a subversion of this Trope. He adopts this rhetoric in his speeches to his followers, and seeks out those on the fringes of society to bestow his "gifts," but his kindness is transparently false. In reality he only recruits people who are the victims of prejudice or who fail to fit in because they're vulnerable and more willing to buy into his beliefs, much like how real cultists seek out new members. Flashbacks show him smiling as he proudly tells his brother about killing large groups of his "ungrateful friends" who realized what a monster he was and tried to walk away.
* At the same time, there was a turtle knock-off of both in Australia:
* At the same time, the solar wind creates an even larger shield that protects our

solar system from cosmic rays.
* At the same time, the trope is averted, however; diamonds are the rarest item in the game, and can be crafted into the strongest armor and tools available. And a record player.
* At the same time, the Warrior of Light is seen facing off and then fighting a massive hoard of
* At the same time, they have the word "cruiser", which is a naval term, despite the Race hailing from a
* At the same time though, people on Earth remembered it quite well and were doing fine.
* at the same time, too, who is closer to her age and did in fact love her when she was a young girl.
* At the same time, whenever the authors start to explore the default antagonists, it often turns out that the
* At the school dance, much to the frustration of fans as this has been building up for literally the whole show up to that point (okay, it's only the end of the first season) before they're interrupted by a tornado warning.
* At the school itself, some organizations such as intelligence and law enforcement agencies, various national militaries (via the school's UN-sponsored JROTC program), corporations (primarily technology companies looking for talented
* At the siege of Thebes, Athena is just about to bring Tydeus immortality, when she finds him chewing on the brains of the guy he just killed. Before she can go back home, she has to scrub her brain out with a ceremonial fire of purification and water from a special river. Needless to say, no immortality for you, Tydeus.
* at the site of whipcracker and plaiter. Current record with 4.5' stockwhip is 272 cracks per minute. This must sound like some submachinegun.
* At the Smithsonian, Steve hides his identity by wearing a big jacket and a baseball cap. Only one awestruck kid recognizes him, but is convinced to keep it secret. May help that Captain America hasn't been in the public eye much for over 70 years in-universe, and his costume usually covered half his face and deliberately drew attention to his chest (no, not for
* At the south coast of Hyrule, a woman named Loone can be found snuggling with a Sheikah orb she's named Roscoe, who she speaks to as if it were a lover. However, if Link brings her pictures of Guardians, the mechanical menaces of Hyrule too dangerous for most people to approach, Loone will be so enamored by them that she'll ditch the orb and act like she never cared about it. Subverted, however, if Link lures over a real Guardian, to which she'll scream and run for her life (without Roscoe).
* at the speed of plot by the Doctor himself on more than one occasion.
* At the start of 2010, Evan Bourne was a jobber getting squashed by
* At the start of 2010 there was the random team of Matt Hardy (white guy), Maria Kanellis (white girl) and the Great Khali (Indian) for a few weeks.
* At the start of Ami's introduction episode, Usagi is laughing her head off at a comic book. Her mother scolds her for the noise but then Usagi shows her the comic — and she bursts out laughing too.
* At the start of an episode Aki, is showing everyone some old photos of Natsumi and Fuyuki when they were kids. She shows an old photo where after having wet the bed, Fuyuki has been hung on the washing line next to the blanket he soiled. Fuyuki quickly tries to cover up the photo.
* At the start of "Boss Mabel", Dipper dresses as a "pre-teen wolf boy" for the tourists at the Mystery Shack. Later, Soos gets to dress up as "Questiony the Question Mark", which he realizes might not have been such a great idea when he finds his costume a little too revealing.
* At the start of Chapter 37, we get Antimony's emotionless monologue as
* At the start of Christian missions into Nordic countries, the missionaries very quickly learned that the idea of a
* At the start of Episode 2, Dib makes a comment about planning for whatever evil plot Zim is up to, and it immediately cuts to Zim and Skoodge
* At the start of "Harley and Ivy", the Joker asks for the gun to fire at the

pursuing Batmobile. Harley hands it to him while she drives, he pulls the trigger... "Bang!"
* At the start of his part Zane fits this trope. He used to be more of an achiever and found that his
* At the start of Issue #1, Otto swears to become a hero and leave his past behind. A couple of pages later, he gets quite angry at the "unmitigated gall" of a bunch of C-List villains using the name of "his" old group, the Sinister Six.
* At the start of Lone Star's rescue of Princess Vespa, a group of Spaceballs object to him parking his ship outside the detention block. "Hey! You can't park here!" "Yeah! Can't you guys read? No parking!" The heroes proceed to ignore the demand.
* At the start of Season 2 Drusilla and Spike filled this role, then when Angelus initially did his
* At the start of season 2 episode 5, the idyllic BGM is interrupted by the heroes'
* At the start of Season 2, Ryan Wilder finds the Batsuit and puts it on without any idea of how to use it. On firing the grapple gun to escape from a couple of thugs, she ends up swinging back-and-forth above their heads while they shoot at her — fortunately the Batsuit is bulletproof.
* At the start of Season 2, the Boys are meeting with their CIA contact Susan Raynor when she has a
* At the start of Season 2, the catchphrase "Me Want Food" becomes popular, and a South Asian food vendor still renders this simplistic caveman-English as "I Am Wanting The Foods".
* At the start of Season 3, Larry is excited about Sunnydale High football's prospects.
* At the start of season 3, one of the men Fisk hires for an attempt on Rostam Kazemi is identifiable by Matt due to having a missing finger.
* At the start of Season 3, Xander and Cordelia are eager to see each other again,
* At the start of season five, Stottlemeyer does pick up a girlfriend in the form of suave realtor Linda Fusco, but it doesn't last. The first reason is that Stottlemeyer's police duties mean that their dates are frequently interrupted, postponed, or cancelled completely, to the point in "Mr. Monk and His Biggest Fan," Linda has to "buy" Stottlemeyer at a
* At the start of season four, she tells Castle she doesn't remember anything about the events of the Season 3 finale.
* At the start of Season Six, Dean is woken up by this radio alarm playing "Beautiful Loser" by Bob Seger, which then provides the background for a
* At the start of "Squidward the Unfriendly Ghost", SpongeBob and Patrick play a game that consists of doing, well,
* At the start of "Stare Master", Sweetie Belle's attempt to help Rarity by retrieving some ribbon leads to this, creating a huge mess in Rarity's shop.
* At the start of Steve Rogers and Sam Wilson's night of drinking in
* At the start of the 1982 baseball season, Atlanta Braves pitcher Pascual Perez was scheduled to make his major league debut at the Braves' home park of Atlanta-Fulton County Stadium but was late getting there. He was on the city's Perimeter Highway (Interstate 285, which circles around Atlanta) and didn't know how to turn off onto Interstate 20 to get to the stadium. He earned the dubious kickname "Perimeter Pascual".
* At the start of the 20th century, Richard Strauss had severely pissed off various publishing houses by his successful campaigns to improve the position of composers with respect to publishing and performing rights. Being under contract to deliver a set of his famous
* At the start of the Cold War, heavy 7.62mm battle rifles were issued, but were quickly obsoleted due to their larger calibers being superseded by lighter 5.56mm weapons that performed just as well for less weight. Many such battle rifles have since gotten a second lease on life as sniper or designated marksman rifles - some, in fact, being much
* At the start of the Drum Island arc, most of the crew realize that the

temperatures were dropping as they approached the winter-seasoned island and take appropriate measures to keep themselves warm before they even reach the dock. At first, they spend a little time in the village so they get to know what is going on around the island and gather supplies for the long trip up to the mountain in the center of the island. After leaving the village, roughly three hours into the trek up the mountain,
* At the start of the episode "The General Flipped At Dawn," Henry calls his senior officers in for a meeting, right after an exhausted Hawkeye and Trapper come out of the O.R.:
* At the start of the episode, when told his ship can't dock in Japan, the admiral of the American fleet announces "FUCK THEM!" (in English) while flipping the bird.
* At the start of the film, Black Widow is implied to have allowed herself to be captured so she can hear the bad guy's plans.
* At the start of the final round of "I Would Do Anything For Loaf", when Alton announces that the dish is cupcakes:
* At the start of the first book, Adrian doubts that the supervillain
* At the start of the first episode, Tails shows off the 7th Chaos Emerald to Sonic and notes that he came across it during one of his test flights - just like he did near the beginning of
* At the start of the first episode we see First Officer Rhade drilling the ship's crew and demanding they go faster, while Captain Hunt calmly observes.
* At the start of the fourth case of the first game, you see someone apparently being shot dead
* At the start of the fourth season, a journalist discovers Deku as All Might's successor, but ultimately decides to keep it a secret and instead write his story about what All Might does after his retirement, which cuts to All Might sneezing in the school staff room.
* At the start of the game, Atrus hands you a (backstory) journal and the aforementioned prison book. When you link to Riven and are caught in the cage trap, one of Gehn's guards notices you in there, reaches between the bars, and wrestles it away from you. The book is then taken by a rebel who ambushes the guard and frees you.
* At the start of the game, Bernard tries to back out of the rescue mission, but decides to stick around when Dave tells him that Sandy's the one they're trying to rescue.
* At the start of the game if you are careful you can turn around and jump the "broken" bridge, bypassing the entire first island.
* At the start of the game, Reviel saves Luna from a group of bandits, but mainly because they tried to mug him rather than because he wanted to save the girl. He's also a
* At the start of the game, the Soviets launch a surprise invasion of the United States by loading up their troops on disguised cargo ships and sneaking them into Washington State, past the U.S. Navy. They quickly overrun Seattle and Tacoma and spread out inland as the Americans, who have most of their troops in Europe, struggle to stop them.
* At the start of the game, you can't understand dragons. Later on, however, they appear to start speaking to you in English. This is actually because as a Dragonborn, you start learning words of the
* At the start of their battle, Marvel hits Superman with a brickwall that shatters upon impact. As he is being blown off by a single gust of
* At the start of their fight, Hordy Jones gets this when he realizes just how powerful Luffy really is when he drops half his forces with Conqueror's Haki alone.
* At the start of the manga very few Pokémon resembled their official designs. Rumor has it the designs were based off what the mangaka thought the sprites looked like, not their actual designs,
* At the start of the Middle School Flashback Arc, Junichiro playfully punches his old playmate/rival/sparring partner in the chest over showing up to the first school they attended together in a girls' uniform, only to
* At the start of the movie, he makes this threat against a whole car full of

Asian gang members, ending in this gem:
* At the start of the movie the stolen shuttle does this to its carrier aircraft during its getaway.
* At the start of the musical (just before he meets Donkey) Shrek mentions he went past "William and Kate's castle" (a reference to Prince William and Kate Midleton).
* At the start of the second series, Claudia Brown has never existed, though this was foreshadowed. There were other differences, such as that they had a new base, and the identical Jenny Lewis existed.
* At the start of the second series the crew give a similar speech to Kryten, who hadn't realized his masters had been dead for centuries. And even after they tell him, it still takes a few minutes for it to register.
* At the start of the series, Negi attempts this on Asuna when she finds out he's a mage.
* At the start of the series, Sisko discovers that "Old Man" Curzon Dax who was his mentor for many years, is now the attractive Jadzia Dax, due to the Trill having a symbiote who carries their memories to a new host body. Odo speculates that he's interested in her romantically, and Sisko does end up sleeping with an
* At the start of the series, Tanjiro is on his way back home from selling charcoal when an old man named Saburo insists that he stay the night at his house, since it's getting dark and demons attack at night. Tanjiro accepts despite not believing in the existence of demons, and this saves him from
* At the start of the series, Tanjiro is on his way home from selling charcoal when an old man named Saburo stops him and insists he stay the night, since it's not safe to travel after dark with demons around. Tanjiro agrees and returns home the next morning to find that a
* At the start of the "Squidward the Unfriendly Ghost", SpongeBob and Patrick are playing a game that involves bubble-blowing, moving pieces on a chess board with your breath, carrying rocks around, climbing a tree, and other craziness. At one point, Patrick triumphantly shouts "I lose!", until SpongeBob reminds him, "But it's not Tuesday, Patrick."
* At the start of the stand off between Simba's pride and Scar's old pride in
* At the start of the third season Ben treats Kate to a pleasant breakfast on the beach, explaining that he wanted to give her something nice as "the next few weeks are going to be very unpleasant."
* At the start of "Three's a Crowd", Pinkie Pie barges in the Library by pushing the door from its hinges, slamming Spike underneath.
* At the start of WW2, most of the principal combatants were issued with anti-tank rifles. Given armour thicknesses in tanks of the era, it was not unreasonable to issue very large single-shot or limited magazine rifles, using armour-piercing bullets that could penetrate up to an inch (25mm) of tank armour. But the weapons themselves were large cumbersome monsters which were generally hated by men detailed to use them, with good reason. Britain's Boyes Anti-Tank rifle was 5 feet 2 inches long (1,575mm), weighed 35 pounds (16kg), and fired a massive 0.55" (13.9mm) round. A man tasked with carrying a weapon four times the weight of the standard SMLE rifle and twice as long then had to brace against the massive recoil energy generated on firing. The Soviet PTRS-41 was even larger: 83 inches (2,100mm) long and 46 pounds (20.3kg), but larger still was the Finnish Lahti L-39 20mm rifle (nicknamed the Elephant Gun; 87 inches/2,200mm long and 109 pounds/49.5kg), capable of defeating almost all Soviet armor.
* At the start, only Churchill and Gray were in support of intervention, and both the leadership and citizenry the U.K. were unwilling to get involved in the war. It was the (vastly exaggerated) atrocities
* At the start, the conductor actually does, if you look closely at his face while trying to conduct, he looks unimpressed. The piano teacher is not pleased either.
* At the start the Romans fought with the phalanx (introduced in Italy by the Greek colonies in the south), and in that time the preferred model was the
* At the story's end, Keras defects to the humans. Kirk apologizes to Sarek for the misunderstanding. Sarek tells him it's okay as he saw Keras himself and admits his own son would have been fooled by the resemblance.

* At the strip club, Angel takes Erik and Charles into a separate room for a "bed dance" (as evidenced by the fact the two men are shown reclining on a bed). Bed dances (a somewhat rare variant of lap dancing) weren't introduced until at least the 1990s.
* At the tail end of 2014, Havok was about to lose a title shot against knockouts champion
* at the tail end of 2020. The following episode had Orton clarify that he didn't drop the match.
* At the tail end of August in 2014, Luscious Latasha ended "Brittany"'s two-year SCW Florida Women's title reign. Few people were happy with the ending due to Latasha's cheating, so when it was clear next year that Brittany wouldn't be staying with a now Spike TV lacking
* At the tail end of the Credibility Gap's version of "Who's On First?" (dealing with a three-act rock concert featuring the Who, the Guess Who and Yes), L.A. Times editor Mr. Higgenlooper devolves into Angrish when his attempt to finish the ad becomes as much a non-starter as the attempt to start it was.
* At the time, Gina G's "Ooh, Aah...Just a Little Bit" was considered this for both the United Kingdom and the contest as a whole, as it was much more electronically-driven and contemporary than most of what was sent to the competition in the mid-90s. While it only finished eighth, it was still a huge hit and scored a Grammy nomination.
* At the time, Holmes is hardly fazed. He just blandly wonders if Watson could be allowed to dissect Blackwood's brain after the hanging. The clear intent was to set Holmes up to lose his cool once the things Blackwood says begin coming true.
* At the time, Lordi's "Hard Rock Hallelujah" was this for Finland, but seeing as they've sent several rock songs since then, it's much more common nowadays.
* At the time, merchandising involved selling posters, tie-in books, maybe t-shirts.
* At the time of filming, Coors would not ship beer more than 1000 miles from the brewery in Golden, CO. Possibly due to their beer not being pasteurized. Texarkana, TX, is roughly 975 miles from Golden.
* At the time of release, some fans floated the theory that the final episode of
* At the time of the release of the game, the official Ace Attorney Twitter tweeted...
* At the time of this trope, divorce wasn't considered a polite topic of conversation, so this could be used as a complete euphemism. Here's a middle-class example from the original
* At the time of writing (November 2014), no method exists for human beings. However, we
* At the time of writing, there are some TV ads trying to promote travel to Canada. The problem is that most of them have no dialogue, and none of them tell the viewer anything about Canada.
* At the time Richard Maltby Jr. wrote the lyrics of "Fandango," his son was one year old, his wife, Janet Brenner, was co-producing
* At the time the book was written, Fetal Alcohol Syndrome was not known to exist. Huxley made up a condition that later turned out to be real, and even managed to get the symptoms right.
* At the time this fan film was made, the mix of Marvel characters seen in "Be a Team" had their official film and television rights scattered across multiple companies
* At the time when JVC's VHS and Sony's Betamax formats were battling it out for dominance in the home video market, Philips tried to push their own format, Video 2000, in the UK by having comedy duo Mel Smith and Griff Rhys Jones front a radio campaign where Jones, as a quick-talking salesman, tries to sell it to Smith, a slow-witted customer who is obsessed with the latest Japanese technology, by pretending the company is actually Japanese and is pronounced "Firips".
* At the time when Prince was "the Artist Formerly Known as Prince", Tony Martin and Mick Molloy did a bit on the
* at the time) wouldn't have survived. Cyclops saves him, painfully, by staggering

his optic blasts to cushion his fall. Keep in mind that Cyclops' beams are a concussive force, so he basically slowed Wolverine's fall by firing full body slugs at him, hence Wolverine yelling out in pain the way down.
* At the top of the food chain for most of each game will be the Fallen Empires, ancient civilizations that have been traveling the stars since before yours was in diapers; they are the most powerful factions for the entire game until regular empires (usually yours) eventually overtake them. Most of them request things of the younger empires, or even give them gifts if they like them for one reason or another. When they make demands while they dislike you, however, it's usually because you've done something that they don't like, and they want you to stop. Fail to obey, and there will be suffering.
* At the top of the Mercury SuperChair on Peak 9, there's a shed near where traffic from Lift E enters the clearing. The shed is formerly the vault from Lift B, the double chairlift the Mercury SuperChair replaced. Lift B's liftline is still mostly intact.
* At the train station, Kazuho falls asleep on the bench, and the girls don't realize she's still there until the train's already leaving.
* At the Turner Classic Movies 2010 Classic Film Festival, screenwriter and actor Buck Henry revealed that he was an extra in
* At the turn of the millennium, Microsoft released two operating systems with confusingly similar names, Windows 2000 and Windows Millennium (if you worked tech support at the time, you could expect about half your calls to be from someone claiming their computer runs "Windows Millennium 2000"). While 2000 earned a reputation as being stable, sturdy and nearly above any reproach
* At the US Space and Rocket Center in Alabama, there's a restored trailer where lunar astronauts were quarantined, complete with a vintage Scrabble board. The restoration people had some fun and spelled out "Lander", "Rover" and "NASA" in the tiles on the board.
* At the very beginning of "If you've got it, flaunt it," Ula hits a tuning note, which then proceeds to segue into the piano melody, to Max's confusion.
* At the very beginning of one chapter, Joker drugs a Hong Kong movie star named Jackie Lee so that he can impersonate the actor as part of a jewel heist. At the very end, there's a brief cutaway showing that Jackie is still tied up in the ambulance Kaitou left him in.
* at the very beginning of the game. But then you fight him again with stats appropriate for that stage in the game, and he is still largely a non-threat due to his abysmal Speed and lack of any powerful Skills despite being a Level 18 Sorcerer. Hard Mode does toughen him up considerably, though, giving him the Dragonskin ability (the only other enemy who has it is the Final Boss), as well as the very dangerous Vengeance skill.
* At the very beginning of the original theatrical and VHS release of
* At the very beginning of the universe, before expansion got very far, everything in existence was close enough together for sound waves to travel normally. Here's an approximation of
* At the very beginning of "They Were Expendable" the author explains what that word means. Your commander gives you a machine gun and tells you to hold off the people chasing them. You ask how long and he says, it's not how long, just do it. The machine gun, and the soldier, are being sacrificed to give the others a chance to escape.
* At the very bottom is the Worker Caste, which consists of regular Workers, non-Yuuzhan Vong slaves, and Shamed Ones, who are the lowest of the low.
* At the very end, another example happens during a flashback involving Kamen and Hiro, when
* At the very end, a picture is shown of a very young Maya and Mia restoring the vase, implying that it happened a lot before.
* At the very end of "So Totally Spaced Out", the Gigglepies have been
* At the very end of 'Terrier Stricken', Claude cat is thrown into an empty swimming pool after being dragged through various obsticles in a house.
* At the very end of the 6th trial, after voting time and the students worry that

abstaining from voting was pointless, because Keebo and the Mastermind will both vote for each other.
* At the very end of the aforementioned episode, we get to see a talking flower from Rainbow's delusion return, with the rest of the cast seemingly all reacting to it, but don't seem to be surprised, implying they might
* At the very end of the end credits (in earlier seasons) is a garbled, demonic-sounding sound clip. Playing it backwards reveals it to be creator Maxwell Atoms saying, "No, no, no! These are the
* At the very end of the episode "Fall Weather Friends", Applejack and Rainbow Dash run towards the camera and then run out.
* At the very end of the game, Apollo must decide whether to return to the Wright Anything Agency with his colleagues, or stay in Khura'in to clean up the legal system. Thought "
* At the very end of the game we do meet two humans and learn there IS a difference between them and Homs
* At the very end of the movie, Harley looks into the camera and says via voiceover "Yeah, yeah. I made the kid my apprentice. Call me a softy." Then she says aloud "I dare you."
* At the very end of the series, all 250 AKB fans who attended Minori's graduation concert become this for Minoru, having watched his farewell confessional and convinced to keep the memory and good will of Minori alive out of respect. Not a word gets out to tabloids (thanks to Miss Aphrodite and Raoul's help) or on the Internet, at least from what we see of the four months after Minori's graduation.
* At the very end of the single-player story, if you actually want to hear the
* At the very end of the trilogy, it's heavily implied that the series'
* At the very end when Father forces a rejoining, he purposefully inverts his ultimate shield to weaken Father.
* At the very last moment turns into a memory and puzzle game, with you attempting to disarm a nuclear bomb up until that point you don't have to use your brain much.
* At the very least the planet Felucia possessed a very unique looking, completely alien ecosystem. Even though it seems to suffer from similar atmosphere and gravity....
* At the very start of Episode 2, the protagonist Lee finds a man caught in a bear-trap, with zombies being drawn to his cries for help. You can choose to either leave the man to his fate or cut his leg off to free him.
* At the very start of the film, Kubo does his signature "if you must blink" speech, but tacks on a few things to provide some backstory exposition, which makes it seem like he's directing this specific speech at us. It's like he's telling us to pay attention.
* At the very start of the game, Flowey tries to trick you into believing that the white bullets he shoots are "friendliness pellets." If you dodge them enough times, he will lose his temper and tell you to "RUN. INTO. THE. BULLETS!!!", before replacing "Bullets" with "friendliness pellets" (in lowercase, unlike the rest of the sentence), a surprisingly literal version of this trope.
* At the very start of the game, Jiub, your fellow prisoner aboard the Imperial Prison Ship, is shirtless. Despite his
* At the very start of the story, Mizuki manipulates Naruto into stealing the scroll of forbidden jutsu, then plans on disposing of Naruto once he's done. Thankfully,
* At the very start the story Ichigo's family is attacked by a hollow and they are all badly injured
* At the very start, you can refuse the Pure Heart that Merlon tries to give you by saying "No" three times (with Merlon getting increasingly desperate each time.) After that, he'll wander off worrying, and it's a
* At the very tail end of the 1970s, a Bloody Mary-style urban legend developed from the East Japanese version of
* At the White Tower, when Lieyla of the “Terrible Trio” walks right up to him and unexpectedly socks him, sending him flying several dozen feet back. Being

* "At this particular moment in time I don't think I've had a healthier or more deeply felt respect for any object in the universe than this here shotgun..."
* At this point, destroying the Disc itself probably couldn't kill Vetinari.
* At this point in the movie, Bruce actually has been given God's powers, making this a play on the trope.
* At this point, Parson has "won" the battle and is now having to deal with the aftermath. It seems like every story told in Erfworld so far deals with impossible odds.
* At this point, the Goa'uld are all but destroyed and no longer a threat to Earth; thus, a new villainous faction is introduced, the Ori. Whereas the Goa'uld were aliens posing as gods, the Ori basically
* At this point, the only part of her fanon characterization to not make it into the show is her being the mother of Dinky, a background filly with a similar color scheme.
* At this point, the show's been around for long enough that Stacy and Clinton don't even
* At this point X gives up and gives Niko a camera phone so he can go to the place the guy hangs out and send him pictures so he can point out who the target is.
* Attica, the latter shown explicitly to have been born as a video game.
* Attic, Basement and Beyond plays this trope as an embodiment of one of Ned's fears, in particular, his fear of the unknown.
* Atticus claims the door to the next car is locked. When asked how to unlock it, he says you have to put your hand on the knob and turn. As a corgi, this would naturally present some problems for him.
* Atticus' father, Lord Sinderby, is particularly incensed, for reasons related and unrelated to religion. On the latter front, Lady Rose's parents are about to get divorced, and Lord Sinderby believes divorce to be a disgrace (which it admittedly was even in the 1920s, though that opinion was on its way out). As for the religious objection, Lord Sinderby wanted his grandchildren to be raised Jewish, which would not be possible for his son's children by a Gentile wife; as Judaism runs in the maternal line, the children would have to convert as adults to be considered Jewish under Jewish law).
* Atticus Finch and incorruptible attorney who fights to the bitter end to save an innocent black man's life.
* Atticus in "The Beep Test", who desperately tries to avoid the test purely so Tamara can't beat him. Once she sprains her ankle, he's totally enthusiastic for it.
* Attila after Attila ultimately ends in the death of the Hunnic King.
* Attila and invades the Roman empire for her sake. Attila and the lady are both portrayed as down-to-earth politicians who know exactly what they are doing. She wants freedom, he wants an excuse to invade the empire, and they could both use the good PR of an epic romantic tale for the masses to admire.
* Attila enemy leader Attila for Odabella. Odabella loves Foresto, but some stagings imply that she isn't quite indifferent to Attila, either.
* Attila: Flavius Aetius knows that he is given a lease on life by the ruling dynasty in Rome because they need him to fight their current enemies. So in order to make himself irreplaceable, he purposefully makes such an impression on the young Attila that he can argue to the Emperor that Attila won't invade the western empire because he fears Aetius. Placidia points out how awfully convenient it is that Aetius' good health has become so important to them now.
* Attila Mon Amour, using it as a metaphor to explain the strategy he should use against the Romans.
* Attilan is home to the Inhuman royal family and puts a spotlight on Crystal.
* Attilan Rough Riders was gifted such a horse by the Adeptus Mechanicus. He was known for previously riding a lot of horses to death.
* Attila's Slave , when Atila the Hun gathers all his allies, the Sarmatians arrive with a large number of warrior women, described as "Amazons with cat eyes and panther muscles"
* Attila the Hun and his hordes had burnt, raped, and pillaged their way across

Italy and were about to sack Rome, Pope Leo I and two other ambassadors met with the barbarian leader. No one knows exactly what they said, but Attila and his army abruptly turned around and left.
* Attila the Hun, busy during a campaign, sends one of his first lieutenants to attack a city, while Attila and the rest of the army are occupied with another. When the lieutenant comes back, Attila asks him where the loot is. "There is none, answers the lieutenant. We burnt the city, so after there was no booty". Then, the lieutenant is hanged by feet, and has to write a hundred lines of "Rape first, pillage next, and then burn."
* Attila the Hun by asserting his dominance over the Scythian peoples with the supposed "Sword of Mars"; the Romanisation of this legend suggests that this might be one and the same as (or was identified with) a sacred "Sword of Ares" worshipped by them a few centuries earlier. A "Sword of Attila" is currently residing in the Kunsthistorisches Museum in Vienna, but it's been dated to the 10th century.
* Attila the Hun campaign is narrated by a Frankish monk named Armand, who reminiscences about the destruction and death brought about by Attila's reign.
* Attila the Hun discovered this sword and used it in his invasion of the Roman Empire.
* Attila the Hun is portrayed as a hybrid. He has the mindset and outlook of a warrior and is more interested in plunder and slaughter than conquering land, but, much like Genghis Khan several centuries later, he shapes the Huns into an army with the organization to field large siege engines, enabling him to sack cities and fortresses that were previously almost impregnable to opponents such as Arminius.
* Attila the Hun is reputed to have had no sense of humour. Allegedly an envoy from the Eastern Roman empire who met with Attila once at dinner described it as follows: "By mixing up the languages of the Italians with those of the Huns and Goths, [an entertainer] fascinated everyone and made them break out into uncontrollable laughter, all that is except Attila. He remained impassive, without any change of expression, and neither by word or gesture did he seem to share in the merriment...." The impression left was that Attila lacked a sense of humor and cared about nothing but power.
* Attila the Hun playstyle means that he tends to struggle to take advantage of territorial gains due to razing cities to ash instead of rebuilding them.
* Attila, the Huns have him buried during the night (for reasons of secrecy) together with treasure of various kinds, and afterwards kill all who were involved with the construction of the tomb as a precaution against grave robbers.
* Attila the Hun Show" (which parodied American sitcoms) and the "Interesting People" sketch, in which Michael Palin can be seen reaching off camera to turn the applause on and off. In the National Bocialist rally scene, all the applause for Mr. Hilter's speech comes from a gramophone which Ron Vibbentrop is working.
* Attila the Hun was believed to have wielded a sword made from meteorite, which the Romans nicknamed the "Sword of Mars".
* Attila the Hun was the leader of the Huns because he was the strongest of them all.
* At times a blessing or a curse for those who are "visual learners". Visualizing things can be reflex and incredibly hard to filter out - a predictably exploitable trait.
* at times been proposed don't exist—they did happen, just in secret.
* At times, Dr. Goodman seemed to be something of this in the first season of
* At times, he would end up in New York in a time before the World Trade Center was built, but in any establishing shots of the city, the towers would be there.
* At times regular soldiers try to murder the sergeant, but, being a veteran from the
* attire doesn't suit the arctic weather and Sanji once again gives Nami his jacket, he even fist pumps with excitement when she takes it gladly in the anime.
* Attitude Era as "The Eighth Wonder of the World", and thus Chyna was next in line after him.
* Attitude Era, creating a time when everyone was a wrestling fan or at least knew about it in some way.

* Attitude Era, fans were chanting "ASSHOLE! ASSHOLE!" every time he spoke.
* Attitude Era in a First Blood Match. The match stipulation is whoever bleeds first loses, however Kane wore a full body suit and a mask at the time, so he had no exposed skin to bleed from.
* Attitude Era. It was never revealed who was behind the camera. According to WWE's web series, "Five Things," the person running GTV was going to be Tom Green as part of a working relationship between WWE and MTV. However this angle never played out, so when GTV was dropped, the man behind the camera remained a mystery for at least a decade.
* Attitude Era showcased their Divas in strip matches (called variously "Evening Gown Matches" or "Bra and Panties Matches") - and many teenage boys tuned in just for that.
* Attitude Era: Started in 1997, it was a period when the then-WWF began to go with a bolder and more mature direction with their content, causing a resurgence in ratings after WCW had beat them to the punch for years.
* attitude story.. as they dish out five-pound fines or in extreme cases condemn the defendant to a month in jail.
* attitude, that with the success of their last photoshoot together, they are going to have a few more, wishes Adrien a happy birthday and leaves.
* Atton Rand for most of the game (and can be redeemed by the Exile's influence).
* Atton Rand had, to a certain extent, intended Trigger to be a sort of
* Atton Rand has admitted to having a talent for writing these kinds of characters, having written six out of the fifteen major doctors in the RPG (Zenna, Pierce, Wade, Crusher, Copper, and Shaw).
* Atton Rand introduced a number of NPCs during the Adventurers' Island story arc, resulting in his own primary character being taken out of focus in favor of stories focusing on the various medics and Kate's efforts to fit in with the team.
* Atton Rand primarily strove for realism in his later posts starting with the Adventurers' Island arc- which gradually came to be written with this line of thought. He even had the character of Kate Bishop- a young, innocent teenager really not cut out for working on the battlefield- and if anything is ultimately broken by the war.
* Attorney Lionel Hutz once helped a client with a false-advertising lawsuit against
* attorney. People tend to get very upset when you gun down their lawyers, but as Captain Tagon says to one such upset client: "Get as mad as you want. You'll have a hard time suing me."
* Attorneys at Flaw, stashing your money in a Swiss bank account makes it safe from being lost if you bungle a lawsuit — but the win condition is accumulating a million dollars in cash on hand, and Swiss bank money doesn't count.
* Attorneys often do this to their clients, not out of exasperation or any other ill-will, but to prevent said clients from saying something that might be used against them in the courtroom.
* Attorneys who teach in universities are often known for being this, as
* attract a lot of girls). He's quite clueless to people's advances, but when he does catch on, most of the time he quickly and awkwardly refuses.
* attracted to Jane). She also goes along with it when Elroy tries to have sex with her.
* Attractive Bent-Gender: A character looks attractive when disguised as a member of the opposite sex.
* Attractive Bent-Gender whith the person (usually a man) becoming sexier after the transformation.
* Attractive Bent Species: A character changes into a highly attractive member of another species.
* Attractive Bent Species: A human transformed into an animal is attractive to other animals (or vice versa).
* Attractive Bent Species: When other animals think your new form looks sexy!
* Attractiveness Discrimination: Attractive people tend to be treated better than unattractive people.

* Attractiveness Discrimination: I'll only go out with you if you're hot. I dislike ugly people.
* Attractiveness Discrimination: I only go out with pretty people, not with ugly losers like you, so get lost!
* Attractiveness Discrimination: Your looks will get you discriminated against regardless if you're gorgeous or butt ugly.
* Attractiveness Isolation: A conventionally attractive person has trouble finding love due to people being scared to talk to them.
* Attractiveness Isolation: An attractive character is alone because no one dares to ask them out.
* Attractiveness Isolation: They're very attractive to the point that people are too intimidated to ask them out.
* Attractiveness Isolation: When someone who is otherwise attractive has trouble getting a date due to potential suitors believing that person won't want to return their affections.
* attractive woman is also good. This person typically meets a lot of potential marks and is looking for which one will be easily fooled by the story being told by the group. A common name for this role is the roper.
* attractive woman. The reason he was unwilling? He had just finished having sex with another attractive girl who was joining a convent the next day and wanted to get her fill of sex while she could. As a result, for the first time in his life, Bud was all used up when the second girl came around and dragged him off.
* Attractive women are often seen as inferior wrestlers or are pre-judged to have gotten their jobs on looks rather than athletic merits or wrestling skill. This attitude dates back to
* Attractive Zombie: A zombie that is good-looking in spite of being an undead corpse.
* Attractive Zombie: A zombie who is beautiful and attractive in spite of being undead.
* Attractive Zombie: A zombie who retains his/her good looks in spite of being a living corpse.
* Attract Mode, Damnd (the Round 1 boss) calls Haggar and tells him to turn on the TV. It reveals his daughter Jessica with her hands tied behind her back.
* Attract Mode, disarm-kill on a spear-wielding guard and the hidden gun — are replicable in gameplay.
* Attract Mode includes the message "Dedicated to the Memory of Jack Bushell."
* Attract Mode shows falling cherry blossoms along with the opening narration: "A samurai fears not death. Struggles to triumph over evil. And lives for one purpose: TO DESTROY ALL ENEMIES!"
* Attract Mode to be crossbows in the game, but it was removed for the final version and replaced with throwing knives.
* attracts to him as it and it protect his teammate and has absolutely no effect on the Ground-type Rhydon.
* At trial, the lawyer doesn't even show any significant effort, presenting the bare facts of the case without any grandstanding. Unfortunately, Dante still ends up looking really bad because his boss hired Randall (yes,
* attribute to Weird Al repositories such as Napster, where searching on Weird Al would produce any number of non-Al music, some of it obscene or offensive, with his name on it. (Weird Al is on record as saying that this mistaken identity, rather than any theoretical lost revenue, is the biggest unwanted effect piracy has on him personally.)
* Attrition: The First Act of Penance by SG Night. Nelle and Oron are another example, albeit to a lesser extent.
* ATT. The catch-all query area for vandal reports, quick questions, and other stuff.
* Attunement for Blackwing Lair and the Molten Core raids allowed players to teleport directly into the instances, whose actual entrances were located deep inside other dungeons.
* a Tumblr blog dedicated to archiving the strange daily experiences of Florida

natives.
* A Tumblr post speculated that a rabies epidemic would act similarly to a zombie apocalypse in the
* A Tumblr user posted how they found a tree with strangely large cucumbers hanging from it. They took one home to try it, but disposed of it (by throwing it into their neighbor's hot tub, but that's besides the point) after being disgusted by the taste. The user later learned from comments that it was actually kigelia, a poisonous fruit. Of course, they panicked, but apparently ended up fine.
* A tuna company that gets a shipment of accidentally bleached tuna and markets it with the slogan "doesn't turn pink in the can!" A common variation includes a competitor selling the pink product putting out a competing slogan, "never bleached!"
* A turian remarks that the water on Kadara tastes, after being filtered so drinking it does not result in instant death, like a krogan's undersuit.
* a Turkish beauty queen walking out onto a hotel pool area or because the bikini looks like silly underwear cannot be determined.
* A Turkish designer named Adil Işık has a clothing line named after him. Of course the website would be "Adil Işık" followed by ".com". However, Turkish letters can cause trouble in URLs, so it's written as adilisik.com instead...and "Adil'i sik" means "Fuck Adil".(Not as in "Man, fuck that guy.", but as in sexually violate him.)
* A turret section on a dinghy that's speeding forward. Various enemies try to predict your trajectory and shoot you, but you can briefly speed up or slow down the dinghy to make them miss.
* A turtle falls in love with an empty shell, thinking it's a female turtle. When he sees that "she" isn't moving or breathing, he thinks "she" is dead, but then realises it's just an empty shell.
* A turtle's heart can keep beating unaffected even if removed from the body due to very strong cells that act as pacemakers.
* A Tusken raider who communicates with the protagonist using sign language is played by deaf actor Troy Kotsur, who is fluent in Native American Sign Language and also assisted in developing the Tusken sign language used in the show.
* A TV ad for Helio mobile products had a daughter bring home a man of a different race. She doesn't care about the very offensive things her parents say, but she does get upset over their calling his Helio a "phone".
* a TV ad: France's equivalent of a SWAT team is raiding an apartment building and hits a particular door with a battering ram: This takes several tries, and only makes a huge hole in the wall around it, with the door and its frame still standing.
* A TV ad had a young woman driving the advertised car, following along to a "Learn Italian" tape when a distinguished man pulls up next to her. He talks to her in Italian; she breezily replies in Italian (subtitled) "Good toast, waiter. I would like a slice of suitcase!" and drives off. Hopefully she picks up a bit more before her trip to Italy.
* A TV advert for "Pot Noodle", a British snack food played up a whole bunch of Welsh stereotypes about mining for the noodles that go into it at the "Crumlin Noodle Mine". See it
* At various points throughout the show Harm, Mac and Singer gets the chance to be Acting JAG for short whiles. Sturgis takes over as Acting JAG for an extended period of time between Admiral Chegwidden's retirement and General Cresswell's appointment.
* At various South African diamond mines there used to be (and probably still is) an X-ray machine through which all workers have to pass on leaving to ensure that they did not seek an unofficial bonus to their paycheck.
* A TV biopic about Bojack's former co-star Sarah Lynn had Bojack played by
* A TV commercial for Converse sneakers depicts a bunch of young people dancing in a nightclub in slow motion. Onscreen text scrolling upwards describes how this commercial was made by a bunch of old white men in a corporate office whose knowledge of teenagers and young adults is entirely derived through focus testing.

At no point in the commercial does it ever remotely suggest the viewer to buy Converse sneakers, nowhere do the shoes ever appear in the commercial, and the logo doesn't even show up until a less-than-a-second shot at the end.
* A TV commercial for the Navy Federal Credit Union who used to train IED-sniffing dogs sitting in a pickup with his wife's Shih-Tzu, who he "just adores." It's the way he says it without showing any emotion that both qualifies the ad for this trope and sells the moment.
* A TV commercial for the radio duo of Steve Dahl & Garry Meier showed a billboard advertising them being hit with a giant tomato. There was also a real Steve & Garry billboard with a tomato attached, as well as Steve & Garry t-shirts.
* At very least Scratch can speak, although he's the only familiar with any lines of his own in the series. At very least Scratch and Edgar can, additionally, act as living voice recorders for their summoners.
* A TV presenter tries to prompt guest Anne Elk (Miss) to tell her theory about the brontosaurus.
* A TV report once mentioned that only three major industrialized countries do not have some form of public health insurance: The US, Mexico and Turkey.
* A TV show interacts with or makes mention of the network's logo bug floating in the corner of the screen
* A TV show makes jokes about the ads which run at the bottom of the screen during a show
* A TV special on Richard Kuklinski (a.k.a. "The Iceman") explained how he once committed an assassination with two accomplices. He then brought one of the accomplices along with him to kill the other accomplice (he poisoned him and when he didn't die fast enough he strangled him with a phone cord). The other accomplice had a blinding flash of the obvious and realized that he was next.
* A TV spot for Verizon Wireless has a creepy motel night clerk inform a guest that there's only one room left, and one he probably won't want anyway: "It's a dead zone. Can't get your calls, your precious e-mails. It's like you don't even exist." When the customer points out that he has the Verizon network, the nonplussed manager ripostes, "Towels are kinda scratchy!" (Cue
* A TV without signal, even on most modern media, is shown with TV static. This has largely fallen out of favor due to the shift to digital TV, where one without signal is usually just given a "no signal" message (although it can still be seen if you try to get over-the-air analog stations). Even many analog TVs since the late '80s have the ability to mute static and blank the screen if there's no signal.
* A TV-Y example: During the battle between Twilight and Tirek in the
* at Wake Forest, 2016: Down 7 with 15 seconds left, Virginia goes on a 9–1 run to win 72–71,
* At Walt Disney World in Florida, after Halloween has passed the Magic Kingdom's central icon Cinderella Castle gets an overlay of lights that make it appear iced over at night. The stage show
* A tweak to Ultimate Cap's origin established that the head scientist was simply a cruddy record-keeper and did not write everything down before rudely getting shot.
* at which point he says "Not me. Him," pointing to the girl's car. They open the back doors and find a man hiding there with a rope and a knife. It turns out that the attacker was hiding in the car the whole time, and the truck driver was only following her to protect her. Whenever the high beams turned on, the attacker had risen up behind the girl and was preparing to strike; he dropped down and hid again when the beams shone.
* A Twilight Landing, Twilight (who has been transformed into a human and deposited on Earth) finds the sausage patty Jo gave her early on delicious — that is, until she learns what was in it.
* at will (meaning once per combat round) and is limited only by the number of minions they are willing to sacrifice. (The section where its combat tactics are explained even suggests two clever ways it uses this ability, suggesting that they

tend to be quite liberal with it.)
* at will. While Spidey is certainly fast, capable of appearing as a blur to normal humans at peak, he's still below the level of your average speedster. But this is the closest they could get to justifying why Spidey could pull this off.
* At Winters End and tribes of baboon-like primates who see themselves as the true heirs of humanity.
* A twist but still played straight in " The Miracle of Thanksgiving". While Danny says this verbatim when he accidentally burns the turkey after putting it back in the oven to defrost it more and lying about it being fine, it's DJ who invokes the trope by saying she was in charge of making the turkey and had she defrosted it properly in the first place Danny wouldn't have needed to put it back in the oven.
* A Twisted Tale; in a world where Elsa and Anna were separated as children and practically nobody knows Anna even exists, Hans attempts to court Elsa and then Anna as part of a scheme by the Duke of Weselton to get a king on the throne who would make a better trading deal with Weselton, but Hans' efforts to win them over fail as Elsa never sees him that way and Anna's already into Kristoff by the time Hans learns she even exists.
* A Twist Of a Tale actually told Bart and Lisa a more convincing version.)
* "A Twist of Ed" in the first minute or so of the episode, Marie pins Double D down, puts on red lipstick, says "Pucker up, ovenmitt" and kisses him and her lower lip fills the screen
* A twist on the "nonstandard game over" trope is the "lock game" scenario, where the leading contestant's score at the end of "Double Jeopardy!" is more than double that of the second-place contestant ... assuming, of course, he/she does not bet more than what he'd be left with if he were incorrect and the second-place player was correct and bet enough (This is known as "
* A twist with Antimony and James, who didn't grow up with her but who
* a Twitter account which tweets solely hypothetial pictures of hybrid creatures.
* A Twix commercial has a woman making several insulting comments about her boss to a new employee... only to discover she's the boss' daughter.
* A two-episode arc immediately following the "Dr. Jekyll" arc guest-starred
* A two-female version is found in Brienne and Catelyn, which may cross over into
* A twofer from season 3: Gbenga Akinnagbe auditioned for the role of Marlo Stanfield before being cast as Chris Partlow. The role of Marlo instead went to Jamie Hector, who had originally auditioned for the role of Cutty Wise.
* A two-fold example from "Fly Away Homer." Homer's not allowed on any airplanes because he's too fat, causing him to miss out on most of the family's cruise vacation. While Homer protests to get a flight company for heavyset people started, he's also forced to do repairs on the plane. All that hard work makes Homer slim down until he's no longer fat... just in time to get to the cruise and discover Marge and the kids have become overweight from relaxing and eating without his usual antics keeping them occupied.
* A two-handed sword said to have been owned by Scottish hero William Wallace is 5 feet, 4 inches long (163cm), and weights 6 lbs (2.7 kg). However, it is at the very most a composite creation put together long after Wallace's death and may or may not contain any parts of Wallace's real sword.
* A two-issue story in Quasar had the eponymous hero sent to investigate strange energy readings. When he gets there all he and his companions see is a trinary star system, unremarkable besides the stars all being implausibly close to each other. It's only until he investigates further that they all realize it's not three stars but a singular, utterly massive
* A two-minute video ad for the mobile application "Xero Touch" stars a charming mid-thirties-looking wrench wench, who monologues to the viewer as she goes about her workday, explaining how much the app helps her keep track of what she earns and spends, as her charts materialize on-screen...while, of course, being gritty and cute.
* A two-panel comic features a hunter wandering into a section of the woods filled with trees that have cash sprouting from their limbs, and turning to the reader to comment "Great.

* A two-part episode featured Shougo Soumei, the president of a small-time entertainment company, who was having some problems with the TV station's manager Raisaku Nakame; he had been extorting him, and then wound up dead as the result of poison. Shougo was discovered to have hidden some evidence, then tried to take the rap for the crime until Conan-via-Kogoro revealed the true culprit...
* A two-part episode that features live-action guinea pigs attacking cities in an obvious
* a two-person one starts when Draco insults Remus' status as Harry's guardian.
* at work, complete with a dented tin mug with "World's Best Bottom" scrawled on it). His ex-wife promotes the worker that Earl subbed for to manager, and he gives everyone raises and benefits (like health and dental insurance).
* At World's End. As a result of her leadership, the East India Company (who came in expecting to massacre a bunch of unorganized pirates) instead found themselves facing an actual organized resistance.
* At Worlds End, Davy Jones himself pulls this one off with his tentacle beard.
* At World's End has a return of the half-barrel hinge on a jail door, enabling Jack to extricate himself again after one of his hallucinated doppelgangers notices it, and he remembers "leverage".
* At World's End has the final battle where the Flying Dutchman and the Black Pearl are mast-locked and fighting over a maelstrom.
* At World's End, it happens when Pintel and Ragetti are confronted by Barbossa.
* At World's End of citizens thought to be involved with pirates, notably including a young boy amongst the victims. The scene is a sad counterpoint to Jack Sparrow's rescue from a similar fate, at the end of the first film.
* At World's End when facing off against Jack, Barbossa, and Elizabeth on the sandbar.
* A two-season Taiwanese adaptation in 2001-2002, and its later 2018 remake. Has the
* At yet another time, Gibbs dope-slaps both Tony and Ziva simultaneously, but Tony complains that
* at youngest 9 and at oldest 12 but can put on an incredibly adult voice when she wants to. This is apparently not just for the audiences, as it's implied (and even stated in one of Keiichi's character songs) the other characters hear it but never say anything.
* "At Your Best (You Are Love)" was originally an Isley Brothers song dedicated to their mother before
* "At Your Service, Madame" - A mother sow is almost robbed blind by a con-man... er... pig (
* a type of fairy who appear as beautiful women with cow or horse tails. Although they are often eager to marry, they are also very strict and demanding, and if you even think of turning one down, she will kill you.
* A type of mental health therapy works on this basis: in "logic-based therapy" a patient is taught to recognize the illogic of the thought patterns that lead to depression, anxiety or phobia, thereby eliminating the problem.
* A type of sexual slavery shows up in a lot of Werewolf fiction, such as the
* A type of "squash match" is very frequently seen in sports – most often, the high school and collegiate levels – although these aren't referred to as squash matches, although it is almost always an assured win for one of the teams by a sizable margin. Still, the resemblance is uncanny: A team – often in an early-season exhibition or non-conference game – will play against an overmatched opponent. These games often allow players to practice plays and skills in actual game situations and gain confidence, get fans to become familiar with whom the top players will be (and their attributes), plus help coaches to assess talent of both starters and reserves (frequently, a junior varsity player will see quite a bit of action) and determine regular-game rotations, things the team needs to work on and so forth prior to playing the "meat" – i.e., conference portion – of their schedule. This is pretty much the rule for homecoming games. Losing the game would dampen the celebration, so these matches are usually played against a weak opponent. Why does the overmatched opponent agree to this? At the

college level, the answer is almost always
* a type of vampire being what it is, though, they aren't all evil, and one, Thomas Raith, is one of the main characters.
* A type of wasp from the family Braconidae uses caterpillars as hosts, and can even
* Atypical (bisexual female main character, queer female romance subplot)
* A typical feature at anime conventions is "cosplay chess," in which cosplayers become chess pieces on the board and act out fight scenes when one piece has to take another.
* A typical first runs of each game in the series take between 6 and 8 hours. Repeat runs take much less time to complete.
* A typical reason for Frasier showing up, usually responding to something during work hours. In the finale, his response to seeing Diane again is to darkly mutter
* A typical side effect of destroying Plug Robonoids is they spray goop everywhere afterward. The first time this happens in
* A typical tactic of siege warfare is to dig a tunnel under the wall of the besieged fortress / city and then collapse or blow it up to destroy the wall under it, or to just dig a tunnel inside and open the main gate by surprise.
* Atypical to the drugstore to help him buy condoms for his first sex act. Sam picks up a box of condoms, and asks the pharmacist if he can try them on and return them, gives a fact that the first condoms were made of leather, and asks if "ribbed for her pleasure" is a guaranteed statement. The clerk responds by asking them to just take the condoms.
* A typical tough guy. The gruff, mean, sometimes scarred and withdrawn warrior. Could go so far as to be a
* a typical tourism website Eroda is the focus of the music video for the song "Adore You" (many people noticed that Eroda was "Adore" spelled backwards).
* A typical use of this, for example, occurs in "Mr. Monk and the Very Very Old Man," in which a politician accidentally killed an innocent teenager in a drunken hit and run years before the plot happened. Unable to resist confessing somehow, he wrote a letter detailing his guilt and put it in a time capsule, which was supposed to be opened again sooner than expected if the world's oldest man were to live five more years. The politician was eventually forced to kill the man in order to stop the time capsule from being opened, during which he also had to kill a security guard. He goes down for triple homicide in an attempt to cover up his single hit and run.
* A typo mentions Reyna and her sister Hylla getting stuck on Calypso's island instead of Circe's. For context: people can only leave Calypso's island once they and Calypso fall in love with each other.
* A Tyson commercial plays with this by having a group of three kids playing video games spontaneously stand up and praise one kid's mom for making them the ready-to-serve chicken wings while dramatic music plays in the background. However, a fourth kid is seen a second later switching off the stereo and the music ends.
* Aubrey De Grey is probably the most famous example in modern science. He has come up with his own theories and has even gone so far as to speculate that, once technology can stop and reverse aging, people will have to file a form to have children and then wait for other people to die (through natural causes or requested suicide) to be given the go-ahead.
* Aubrey herself has an Asian mother and a white father and went on to marry Jason, who is white.
* Aubrey himself is the subject of an inferred crush by an older man, the Sailing Master on his first command. Nothing specific happens but it is remarked upon by certain crew members who know the Sailing Master from previous service.
* Aubrey-Maturin, a highly entertaining & authentic cookbook full of Napoleonic-era recipes (and of clues as to why Jack Aubrey had trouble keeping the pounds off!).
* Aubrey-Maturin, and Thomas Cochrane, the real-life British officer he is based on.
* Aubrey-Maturin, apparently castrating their male captives as a matter of course.

* Aubrey-Maturin, as it was customary at the time that officers of seized ships be stripped and searched for valuables, which led to a lot of officers having to carry gold bullion or coins sewed into their jackets. This is how many officers of the "Prince de Conty" drowned when the ship sank off the Bretton coast of France in 1746.
* Aubrey-Maturin books. At the time this was generally the only option for serious limb injuries, especially with the risk of gangrene. Unlike many surgeons though, Stephen did his best to preserve limbs, only amputating as a last resort. Jack Aubrey suffers a serious arm injury during the battle between the USS Constitution and HMS Java, and his arm is only saved due to Stephen's skill and patience. Stephen is also forced to apply this trope to himself when he suffers frostbite in his toes whilst crossing the Andes, informing the crew (during dinner) that he "removed the peccant members" with a chisel.
* Aubrey-Maturin books. Aubrey's log is referred to occasionally, along with the logs kept by the Sailing Master, the midshipmen (which Aubrey reviews as part if their training) and there is also a scene where Aubrey specifically refers to his log while appearing before a Navy Board, but the use of "Captains Log" as exposition never appears.
* Aubrey-Maturin books, has a generous assortment of scars which he acquires in large part, during the events of the series. His subordinate Tom Pullings has severe facial scarring, Babbington has an amputated nose (which Doctor Maturin is repeatedly called upon to testify was lost due to frostbite, rather than syphilis), and a number of minor characters have assorted deformities. Maturin acquires serious damage to his hands from French torture (it is implied his fingernails were torn out) that make it harder for him to play his cello, but it got better later on, although only in a relative sense. This is largely omitted in the film adaptation, although Pullings has minor scarring, Midshipman Blakeney has an amputation of one arm, in his role as a composite of several minor characters, and in a reference to the torture, Maturin flexes his fingers before he plays cello.
* Aubrey-Maturin, but he delights so much in his own jokes that it's hard not to laugh with him.
* Aubrey-Maturin enough to know he's too ugly for her to be legitimately interested in him.
* Aubrey-Maturin featured among other convicts being shipped to Australia, one Salubrity Boswell, whose husband had been sent there already, so she decided to follow him, first by getting his brother to get her pregnant so she wouldn't be hung, then by assaulting the judge who sentenced him. Stephen Maturin calls her "a female worthier of a nobler age."
* Aubrey-Maturin: In O'Brien's series, reference is made to a Royal Navy tradition of the period to mark cannon balls POSTPAID. Why? Because stopping the Royal Mail was a capital offense.
* Aubrey-Maturin.) It doesn't help that they call each other things like "my joy", "my heart", "my soul"... Stephen's LOVE INTEREST even says to him that "anyone would think you were married to that man"!
* Aubrey-Maturin mentioned above, namely one with command of his own ship, he is always referred to as "Captain Aubrey" as with all officers who command naval vessels, but does not receive promotion to full Post-captain until later in the series, making him this trope to begin with.
* Aubrey-Maturin novel series, being a story of British Navy men, naturally has these for the lead characters - Jack Aubrey, of course, has his wife Sophie, and Stephen Maturin has Diana Villiers and, after Diana's death, Christine Wood.
* Aubrey-Maturin novels; when he receives the letter in which she breaks their engagement, he can feel the ring inside the envelope before he even reads the message.
* Aubrey-Maturin on account of the state of medical knowledge in the early 19th century—they wouldn't have known any better).
* Aubrey-Maturin Otherwise avoided because Maturin is otherwise the most sophisticated character on board.
* Aubrey-Maturin: Padeen seems to be stuck in one of these in regards to Clarissa.

* Aubrey-Maturin physicians. Some have little more than a steady hand with an amputation saw, and given the high rate of drunkenness among naval surgeons, possibly not even that.
* Aubrey-Maturin physician who even speaks Latin. It's well-founded, as he was able to perform a successful evacuation of a subdural hematoma (bleeding into one's brain) aboard ship during a battle, and with 19th century technology, too!
* Aubrey-Maturin saga. In the book "Desolation Island", the HMS Leopard springs a very large leak and is in danger of sinking. Captain Aubrey lets the men bring out the boats and gives his First Lieutenant dispatches for the authorities, while he himself prepares to go down with the ship. The situation eventually improves, thankfully.
* Aubrey-Maturin saga. Some of the middies start out inexperienced, but prove themselves and rise up the chain of command, as in the cases of Pullings, Babbington and Mowett. Others, like Blakeney, are more known for causing trouble such as swallowing the ship's grapeshot.
* Aubrey-Maturin: Secret agent Duhamel falls victim to this when trying to defect.
* Aubrey-Maturin series; almost any animal immediately takes to him, including sloths, wombats, dogs, cats, orangutans and aardvarks, usually with hilarious results. The only exception is a llama.
* Aubrey-Maturin series. An ever-suspicious, untrusting, icy-eyed intelligence agent who can kill without blinking — and a compassionate, liberal-hearted doctor, who adopts orphans, lends money without a thought, campaigns against slavery and sexism, and cares deeply for his patients and his friends.
* Aubrey-Maturin series - any fan referencing it will probably include the words "debauched sloth", or just the whole line: "Jack, you have debauched my sloth!"
* Aubrey-Maturin series. As an odd, solitary physician over the age of thirty, no one expected him to get married. When he and his wife maintained separate residences, people actually thought it made a lot of sense.
* Aubrey-Maturin series can speak English, French, Spanish, Catalan and Latin fluently. He can speak Ancient Greek and Portuguese well, though of the latter he says in one of the later books that he has trouble with pronunciation. Over the course of the books he learns Urdu, Arabic and Malay, as well as picking up some Polynesian, Turkish and Berber. His cradle tongue was Irish, but by 15 he had forgotten it; by the second book he can subconsciously understand the Irish-speaking mutineers, and by the fourth he is writing political propaganda. In the rest of the books, he is fluent again.
* Aubrey-Maturin series have absolutely no problems lying as much as they can without breaking the law and provoking internation incidents. Aubrey himself will lie like a rug in his personal life, and Maturin is a full-time spy.
* Aubrey-Maturin series, himself falls prey to a wide variety of injuries and ailments over the course of the series. His self-diagnoses are almost always on the mark, too, though he notably fails to recognize his own addiction to the (opium-based) alcoholic tincture of laudanum.
* Aubrey-Maturin series, in addition to being a learned physician, is also an expert swordsman and marksman.
* Aubrey/Maturin series: In the second and third novels, Mrs. Williams does not permit her daughter Sophie to marry Jack Aubrey until he can prove that he is able to support her. Luckily for Jack, Sophie resists all attempts to marry her off to someone else until he earns a fortune from the East India Company.
* Aubrey-Maturin series is accompanied by a Newfoundland named Pollux.
* Aubrey-Maturin series is more fortunate in the matter of prize money; when he has money problems, they tend to come from unfortunate investments on land.
* Aubrey-Maturin series is rife with whores. Stephen blames this on the land rather than the sailors.
* Aubrey-Maturin series, numerous privateers are encountered, and for a time Captain Aubrey himself becomes a privateer captain (though he much prefers the term "private man-of-war" or "letter of marque.")
* Aubrey-Maturin series offers various iterations of this, particularly involving the British-American War of 1812 — sailing ships may have been at sea for

months, and not be aware of current events; this can be further complicated by two ships having different sailing dates, and hence different notions of the situation. Averted, in that this is a well-known problem and sometimes results in awkward stand-offs while the situation is resolved.
* Aubrey-Maturin series of naval history novels. Although a well-respected physician and natural philosopher, after having been at sea for nearly 20 years he can barely row a boat and still doesn't understand basic nautical terminology.
* Aubrey-Maturin series, spent some time "before the mast" early in his career. He was disrated by his captain because he'd violated orders, smuggling a whore aboard ship and hiding her in the cable tier. He also got flogged. He spent some time as a common sailor before earning his way back into the captain's good graces and being rated midshipman again.
* Aubrey-Maturin series, Stephen Maturin acts as a Watson in all matters nautical, conveniently (for the reader) refusing to learn to tell one sail from another however long he lives on a ship.
* Aubrey-Maturin series, Stephen Maturin has one of the earliest "revolving pistols", in around 1812. Note that these were flintlock rather than percussion cap, required you to spin the drum by hand, and had a tendency to jam.
* Aubrey-Maturin series, Stephen Maturin is tortured by French officers in Mahon. Details are sparse: his fingernails were pulled out among other things (the damage to his hands remains throughout the rest of the series, impacting his musical skill), but not only did he not break, even to revealing his nationality, he steals important papers while he is being rescued.
* Aubrey-Maturin series, Stephen Maturin ponders Sophie Williams' talent for prevarication.
* Aubrey-Maturin series, the passionate, loud, lusty, and rather promiscuous Jack Aubrey falls deeply for Sophie Williams, a proper, virginal, and as it turns out rather undersexed young lady. His best friend wishes them well, but privately predicts woe; her cousin, Diana Villiers, doesn't bother to be private about it.
* Aubrey/Maturin series. The stakes may include death, imprisonment, or financial ruin; but a chase may last hours or days and for most of the crew there's not that much that can usefully be done once the sails are set. The daily life of the ship goes on pretty much as normal including eating, sleeping, and playing music even though the crew is engaged in a deadly struggle with an enemy.
* Aubrey-Maturin series, this is par for the course for Jack Aubrey. After he's fired his pistol, he'll use it as a makeshift buckler while killing people with his cutlass.
* Aubrey-Maturin series, where Jack carves his initials into the mast of a ship as a small boy and sees them there years later as the ship's captain.
* Aubrey-Maturin series (which are not such distinct populations) would know that now.
* Aubrey-Maturin series. While sodomy is technically a hanging offense in the Royal Navy, the more liberal sort of officer - such as Jack Aubrey - tends to turn a blind eye to it unless it's excessively blatant, or is coupled with some other breach of the Articles of War that can't be ignored. The main problem that Jack has with gays in command positions is not so much their sexuality as that the favoritism they show their partners has a very bad effect on their ships' order and discipline.
* Aubrey-Maturin's first book, Jack Aubrey is sleeping with the Port Captain's wife, which has severe consequences for his career ongoing as said Port Official knows and constantly goes out of his way to deprive him of men, supplies and delay news of his successes to England which probably prevents his promotion
* Aubrey-Maturin, shades weren't considered cool at the time and were more medicinal in nature, being first used in Europe to help correct certain vision impairments. This is borne out when a fellow spy hears of Maturin's towering reputation and notes upon meeting him that he'd been expecting someone more heroic-looking, not someone who wore shades against the sun.
* Aubrey-Maturin side of this trope: Stephen Maturin, co-protagonist of the series. His hair is black, of course, and his skin tone is almost invariably described as

"pale" or "sallow".
* Aubrey-Maturin start having a bit of good-natured fun with the whalers, like having them ask the gunner for "a length of firing line". Works nicely because the civilian whalers and the naval crewmembers operate by two sets of discipline and two sets of jargon.
* Aubrey-Maturin.) Stephen Maturin then uses his powers of persuasion to see to it that Aubrey, though screwed out of his victory by a spotlight-stealing admiral, still gets chosen as the messenger and thus gets a plum command.
* Aubrey-Maturin, the duty is understandably highly unpopular among both officers and crew.
* Aubrey-Maturin The hardships of the spy life are well explored (derision from friends and confidants, inability to discuss work, torture, living on the run), and while Stephen is a capable assassin, his biggest successes are always the result of paperwork and manipulation (the best example being a "dropped" notebook, which contained "evidence" that a number of key assets in the French intelligence service had gone rogue).
* Aubrey-Maturin, though, is in full play, as demonstrated during many sea battle scenes.
* Aubrey-Maturin who once captured him. They pass the time by refighting the battle in question with pieces of bread.
* Aubrey Plaza, the actress who plays Julie, has stated that the reason her character acts so hostile towards Scott is because she has an unrequited crush on him. Bryan O'Malley, the creator of the comics, disagrees with this, but Edgar Wright, the director of the movie, supports it.
* Aubrey's crew press-gang at least one man, a bailiff ("tip staff") who is (quite legally) attempting to arrest Aubrey for debt. Aubrey has taken measures for his own protection, however; his boatswain and barge crew are called, a general melee ensues and the unfortunate tip-staff finds himself aboard ship, sailing on the tide, where his authority is not valid. Aubrey declares him "impressed" and orders him to be signed onto the ships books. Whether this is actually legal is questionable, but Aubrey clearly expects to get away with it and since the incident is never referred to again, presumably does so. There are other references to "pressed men" and an episode in which Aubrey's crew conceal Maturin's servant Padeen when escaping from Australia, using skills learnt hiding seamen from "the Press"
* Aubrey throws himself on top of Hodgins when a bomb rigged into a corpse goes off on
* Auburn University's sports teams are the Tigers, not the Eagles or the War Eagles. "War Eagle" is a cheer that Auburn uses, and the name of its fight song, but it has nothing to do with the team itself. The school itself even has
* Auburn went on to win the SEC championship. Thanks to #10 Michigan State upsetting #2 Ohio State to take the Big Ten championship, Auburn got pushed up to #2 on the BCS rankings and played in the BCS Championship Game, where they lost to Florida State.
* Auction-Aire managed to develop a following and was beating Godfrey pretty bad in the ratings by the end of February 1957.
* Auction Kings, art tends to sell for a fraction of its value. Some people bring in gold or silver pieces and are annoyed when they go for little more than scrap value. Specifically, Paul tells sellers to expect to get only 20% of the appraisal value.
* Auction Kings, Bob runs an auction house. Paul runs an auction house. Elijah is considering joining the auction world as well.
* Auction Kings, Cindy has done this to Jon via Using a toe-pulling device on Jon's fingers to find out if he left a case unlocked. Don't mess with Cindy.
* Auction Kings, everything from fake swords to a very beat up piano. Even worse is when the item would be worth more if it were real or in good shape.
* Auction Kings has speed rugs. Sell as many rugs as fast as you can! Takes Jon all episode to prepare for it, though.
* AuctionKings, Jamie loves to make passes at Cindy. She is generally unimpressed.

* Auction Kings, Paul auctions a valuable Nazi ideology handbook. Bob buys it to donate to a museum.
* Auction Kings, Paul has sold a couple cannons, along with the usual antique guns.
* Auction Kings, Paul has sold several. The recreation of the Delorean from Back to the Future impressed the crew from the actual movie enough that one of them came to the auction to promote it.
* Auction Kings, Paul loves the 1980s. Jon loves old toys. Neither of them are knowledgeable enough to bypass calling an expert when items of the appropriate era show up though.
* Auction Kings, some people bring in a piece, and then keep it in the auction when it appraises for far less than what they want. When the item sells for less than they wanted, they get pissed.
* Auction Kings: The experts tend to do this. It's their job. One expert in particular valued a case of Billy Beer at... nothing. He suggested Paul recycle the aluminum cans.
* Auction Kings, the experts will usually give a detailed history of the piece they're looking at. If there's no history to be found, they'll explain why that is.
* Auction Kings, the muff pistols were designed to be used in this manner. Given that each only held a single shot, it's fairly justified.
* Auction Kings. When a drum set comes in, Cindy reveals she has a drum set at home and knows how to play. It turns out she knows how to play exactly one beat, which she does continually.
* Auction Kings, when a piece comes in that no one has any idea what it is, the team will sometimes discuss what it could be while they wait for the expert. Sometimes, even the seller is clueless. At least once, even the expert was stumped.
* Auction of Evil, even before the J-Team and Guardians get involved to retrieve it.
* Auction sites such as QuiBids that advertise fantastically low prices on goods either leave out or bury in the fine print that you have to pay
* auctions While higher-quality sushi is still available at sushi restaurants, sushi is also available in supermarkets.
* Aucturn is alive. Want more details? You don't, but here you go. The entire atmosphere is a noxious mix of toxins that causes hallucinations, while simultaneously making it nearly impossible to see more than a few feet. Notable locations include the just-as-squicky-as-it-sounds Loving Place, a mountain that is actually the gestating child of the planet itself, and a titanic pyramid that houses a cult to the gods of the Dark Tapestry. The planet is inhabited only by its native monsters, eldritch beasts drawn to its power, and crazed cultists. The planet is hypothesized to be the egg of an Outer God, and worst of all? It's getting closer to Golarion.
* Audacious is the first extrasolar planet humanity colonized, and has essentially three semiautonomous nations of respectively American, European, and Chinese descent on it (each of which has its own house in the planetary legislature and gets its own powerful vice president). People not descended from those original settlers don't get to vote and form a permanent underclass.
* Audacious. Kris goes on PT with the Marine guards at the Wardhaven Embassy on New Eden and is handed a sweatshirt in Navy blue and gold... with a bulls-eye on the back.
* Audible Gleam...and then Cereza's doll, Cheshire, even does it too, and meows as it does so.
* Audible GleamIf it just looks shiny then it could be mistaken, but if it makes the noise too then you know it's meant to be taken as shiny.
* Audible Sharpness is sometimes accompanied by the blade twinkling or shining as it makes the noise.
* Audible SharpnessIt's easy to tell when a blade is sharp because it makes a "sharp noise."
* Audible Sharpness of a sword being drawn from a scabbard or a knife being waved around.
* Audible Sharpness was going to be averted, until test audiences had trouble

accepting the absence of that sound.
* Audible Sharpness when they're touching something metallic. Air does not count. Nor, unless it's built incorrectly, does the inside of the scabbard.
* Audible Sharpness: Whether from a sheath, a scabbard, or from simply being picked up, bladed weapons tend to make the same 'shing!' noise when being drawn
* Audie Murphy, both the book and the movie script, and acting as an informal press agent for Murphy. Murphy's second wife, Pamela, was also something of an Promoted Fangirl. She had been trying to meet him ever since she saw him on the cover of Life magazine in the mid-forties, and finally succeeded in the early fifties. They dated steadily while the divorce from his first wife was finalized, married shortly thereafter, and despite some rough periods remained married until his death.
* Audie Murphy ended up earning him the Distinguished Service Cross, second only to the Medal of Honor (he would famously earn that later anyway).
* Audie Murphy. Enlisted in the US Army at 16 by falsifying his birth records, and proceeded to win more medals than he had places to put them in WWII. This included every single medal awarded by the US at the time, several more than once, along with medals from the French and Belgian governments. He then came home and starred in several war movies as a young recruit who performed heroic deeds on the battlefield, including
* Audie Murphy German machine gun position at L'Omet quarry (killing four and wounding three), shooting a sniper between the eyes near Brouvelieures after the man wounded him with a hip shot, and single-handedly holding off a German attack at Holtzwihr, where he jumped on the .50 BMG machine gun of a burning tank destroyer and killed or wounded fifty Germans with it to cover his unit's retreat.
* Audie Murphy his Medal of Honor, he was contacted by officers in the rear and asked how close the Germans were. Murphy responded, "Hold on and I'll let you talk to one," put the radio down, and kept on fighting.
* Audie Murphy songs. In addition, he occasionally worked as an undercover agent for the police, investigating drug dealers and possibly the mafia. And this was a guy who didn't live to see retirement age! He was also an advocate for soldiers and veterans who suffer from PTSD.
* Audie Murphy. The ones he did wear grabbed the attention of everyone who knew what they were looking at.
* Audience-Alienating Premise are furries, due to the film giving several of the animal characters very sexualized anthopomorphic designs.
* Audience-Alienating Premise: A work fails to find an audience because it has a premise that is widely considered to be too boring, controversial, weird, etc.
* Audience-Alienating Premise: A work fails to find an audience because its premise is widely considered to be too strange, boring, controversial, etc.
* Audience-Alienating Premise: A work fails to find an audience due to having a premise that is considered too boring, controversial, weird, etc.
* Audience-Alienating Premise: A work's premise turns away enough buyers to cause the work to become a commercial failure, regardless of the work's quality.
* Audience-Alienating Premise: Often results from reworking a genre in ways that would turn off fans of that genre.
* Audience-Alienating Premise: The very idea of your work drives viewers away.
* Audience-Alienating Premise: You fail to attract the audience's interest.
* (audience: AWWWW!). Elliot was initially portrayed as a competitive and smug know-it-all—her genki tendencies didn't show up until the second season.
* Audience-Coloring Adaptation: An adaptation that has a lasting effect on the opinion of the overall franchise.
* Audience-Coloring Adaptation: An installment that affects opinion on the general franchise.
* Audience-Coloring Adaptation: A work that affects opinion on the overall franchise.
* Audience-Coloring Adaptation's mother was always called "Widow Twankey" — but that was originally a pantomime joke, based on the name of a cheap brand of China tea.
* Audience-Coloring Adaptation: The adaptation greatly influences the original work

in the eyes of the audience.
* Audience-Coloring Adaptation: Your work permanently colors the franchise.
* Audience Game: We don't have enough time left for a new game, so who wants to win a Crockpot?
* Audience Murmurs: A crowd reacts to something by whispering among themselves.
* Audience Participation, a member of the audience goes "nya nya nya nya nya" after Frank N. Furter uses the "sonic transducer" to freeze Brad, Janet, and Dr. Scott so that they couldn't move their feet (or wheels) in the laboratory.
* Audience Participation: A performance requires the audience to say things in response to what the characters say.
* Audience Participation are pretty iconic...especially the picture of Frank N. Furter lounging around on them).
* Audience Participation around this, where the object of it was to add new paragraphs.
* Audience Participation Failure: The audience disrupts the performance by not giving the expected responses.
* Audience Participation Failure: You fail to get audience backup in your show or song.
* Audience Participation; one viewer suggested that Rugnetta's interpretation was valid for the first three seasons, but the fourth season was a shallow aping by inexperienced showrunners. Another viewer suggested that Community couldn't be a postmodern work due to it being in the strict structure of a sitcom. A third viewer argued that Community was a modernist work rather than a postmodernist one due to it buying into the very meta-narratives that Rugnetta said it criticizes. Even show creator Dan Harmon got in on the discourse, albeit with a joke and a link rather than an argument of his own.
* Audience Participation Song. Filk has historically placed a premium of audience participation and jamming.
* Audience Participation, when Frank N. Furter is seen floating on a life preserver in the pool during "The Floor Show", the audience yells, "Hey, waiter, there's a fly in my soup." "Shut up, everyone will want one."
* Audience Popularity will start hanging around the group just to feature them more prominently.
* Audience Reaction. Describing how the characters react to something scary isn't needed. Just because something scares them, that doesn't mean it scares us as well.
* Audience Reactions if someone tried to propose them today. Because people like venting their hatred and we had looser standards in the past, the pages became too much of a prevalent part of the site to just remove, and so they are allowed to stay, albeit with strict limitations: Dethroning Moment is limited to one example per person per work, and the others are only allowed when it's clear that the vast majority of a work's audience think the example qualifies and there are no or very few people who actually like it.
* Audience Shift: A franchise installment aimed at a different demographic than previous installments.
* Audience Shift, when the Stooges turn a trio of Chinese officers into Stooge clones. Moe's clone gives a Chinese general the famous eye poke, but Moe tells him, "Uh-uh. That's Number 21. We don't do that anymore."
* Audiences often expect the initial spank on the ass to be a routine part of childbirth, to "help" the baby draw the first breath by crying. When a baby is born off screen, the sound effect after the mother's screams die down will usually be a smack first, then a baby's cry. It actually happens that way rarely, if at all. Past generations sometimes held a newborn upside down by the ankles and thumped the back to clear the air passages, but in real life, most babies breathe and cry on their own when they are born. If that isn't happening, modern medical personnel employ some other means of intervention.
* Audiences often interpret games in this way, e.g. if a soccer player misses an open goal in the first half, it'll be forgotten, but if he misses an open goal in the last second, he'll be blamed for losing the game. Both misses were equally bad, but only the latter is seen as significant.

* Audience Surrogate: A character who represents the feelings of the audience.
* Audience Surrogate enters the room, he claims that it's obvious the character isn't really there, and is probably about three feet tall and standing in front of a blue screen somewhere. Jim then picks up the Doozer, demonstrating that it is actually a radio controlled puppet, and then begins the segment on how characters like that are made.
* Audience Surrogate, so as to elicit jealousy from the audience and a vicious desire to see the villainess smashed to smithereens in retaliation.
* Audience Surrogate who also get to be more grown-up, cooler and more fun than the children. Many, many children in the UK have grown up wishing the Doctor would whisk them away for adventures in his TARDIS.
* Audience? What Audience?: Other characters can't see the metafictional elements that one character can.
* Audience? What Audience?. Pinkie Pie and Rarity look more than a little confused as if wondering "Who are you talking to?"
* Audience? What Audience?: Someone mentions something that implies the work is fictional (like writers, an audience, etc) and another person is just confused.
* Audi has had "Vorsprung durch Technik" ("progress through technology") since
* Audio Adaptation as Neil and Terry. Adam Young is played by Adam Thomas Wright.
* Audio Adaptation, Gaiman plays Seth, the villager who discovers baby Tristran.
* Audio Adaptation, one of the calls on the White Rabbit's time in the song "Decisions" is "a meeting of the Rabbit Guild".
* Audio Adaptations naturally have to create plots out of whole cloth, to convert a three panel gag strip into a half-hour sitcom.
* Audio Adaptation, Stephen Briggs reads Maurice's lines in a pseudo-American accent, making him sound even more like a used car salesman.
* Audio Adaptation: Visual media is adapted to an audio play or radio program.
* audio adventures (Eighth Doctor). Turns into "extremely scary" when Zagreus possesses the Doctor. "Zagreus sits inside your head/Zagreus lives among the dead/Zagreus sees you in your bed/And eats you when you're sleeping." Sleep tight, Time Lord kids!
* Audio-animatronic figures of Jack Sparrow and Captain Barbossa have been added to the
* Audio books are pretty much the biggest source of Larynx Dissonanace. Most have one person playing EVERY character so, unless the book being read only has characters of one gender, this is going to happen. That said,
* Audio-comedy troupe The Credibility Gap recorded a variation in which Harry Shearer played a concert promoter and David Lander played an editor trying to write an ad for the
* Audio Games: Games specifically designed to be played without the use of graphics.
* Audio has been released of at least one victim of 9/11 who was speaking to 911 when one of the WTC towers he was in collapsed.
* Audio jacks are measured in millimeters, with the 3.5 mm length being the most common.
* Audiomaster 3000 (Mexico City. Merged with Candiani Dubbing Studios.)
* audio or video distortion whatsoever except around a small burrow of sorts. Yet when Jay climbs up the tower, you feel like you're gonna die!
* Audio outputs temporarily muted. Do not adjust the playback volume Trying to play a video file which happens to have a particular stealth signal in its audio channel will cause this trope 20 minutes after playback. It is supposedly aimed against piracy, but will also hit fair use rights such as on-disk backups of legally owned Blu-Ray disks.
* Audiophile equipment tends to be this by design, for a number of reasons depending on component.
* Audiosurf, the road the player is traveling down sometimes bumps and bounces to the beat. This varies depending on the song the player is playing, though; plenty of songs produce a relatively smooth track. Background elements such as towers pulse, spin, and change color.

* Audiovisual works — by nature, most audiovisual work is made explicitly for domestic consumption with little intention of exporting it. The only exception would be if it has already been released in some markets and proven successful.
* Audi's "e-tron" range of electric and hybrid cars may raise a few chuckles in France and Quebec, as "étron" is the French word for "dung".
* Audition, Aoyama is injected under the tongue with a paralytic agent that seems to start working in seconds.
* Audition Fail (3-17-09): The audio from the "Interpretive Dance Win" continues into the "Today's Fail Powered By..." and the credit page.
* Audition, he really would have been better off with any of the failed auditionees.
* auditioning its own staff to star in big song-and-dance musical adverts (see what they did there?) Halifax adverts merit a trope all of their own....
* Audition, the killer loves to sew eyes shut and poke needles under the eyes, but never harms the eye directly.
* Audition, which is so scary that it turns the next half hour of violence-free romance into pure terror.
* Auditorium-Gymnasium. After a while the university just adopted that as the formal name, though a later alteration changed it to Moby Arena (which sort of ruins the joke).
* Auditors of Reality get into it, with one wondering what would happen if gravity became personified — and had a crush on someone.
* Audit Threat: As a government official, I order you to tell us what we want to know or else we'll have to tax you!
* Audra MacDonald did a mic drop at the end of the 2013 Tony Awards ceremony,
* Audra McDonald) and her animal charges. When he keeps messing up the order, he develops some Hash House Lingo to try and remember what the animals ordered, eventually settling on "beggon, red flips and Bert" (respectively: bacon and eggs, raspberry pancakes and blueberry oatmeal).
* Audrey, after finding Jack was alive, gets taken out in the last episode of the mini-series.
* Audrey Hepburn (1964), for which Nixon gained much notoriety, as news-eager journalists ripped apart the customary veil of secrecy. Industry buzz has said this to have been the cause of Hepburn's failing even to get nominated for an Academy Award for the demanding role. Interestingly, the DVD features the original footage of Hepburn singing, and while she's not as skilled as Nixon, she certainly doesn't embarrass herself. Most notably she refused to do another musical afterwards unless she was allowed to do her own singing.
* Audrey Hepburn actually wanted to be a ballet dancer, not an actor. She trained as a child but had to give it up as she entered her teens because she, well, lived in Nazi-occupied Holland. She and her family went through extended periods of starvation during the occupation which stunted her metabolism and weakened her bones. When the war ended, she tried to pick it back up again but she just physically couldn’t do it. She struggled with the toll her formative years took on her body for the rest of her life and contributed to her relatively early death at 63.
* Audrey Hepburn as a courier and raising funds for them by performing ballet. Later in life she worked extensively with UNICEF.
* Audrey Hepburn didn't have much in the way of formal schooling, but she was extremely well-read, could speak at least seven languages fluently, and was a talented piano player.
* Audrey Hepburn, directed by her then-husband Mel Ferrer. It was one of the least successful movies of her career.
* Audrey Hepburn felt a strong connection to Anne Frank after reading her diary when it was published. They were only a month apart in age and lived less than 100km apart during the war. The diary even mentions in passing an incident of five men getting shot for resistance against the Nazis on the same day that one of Hepburn's uncles was shot for doing the same thing. She got to know Frank's father Otto after the war and he wanted her to play his daughter in the movie but she

refused because she felt so guilty about what happened to Frank while she survived. However, later in life she used the book to help raise money for UNICEF, which was her great passion in life.
* Audrey Hepburn has UST between Sister Luke (Hepburn) and the doctor she works for, Dr. Fortunati (Peter Finch), while she is in the Congo.
* Audrey Hepburn in which a seasoned photographer teaches a much younger bookish woman to become a model.
* Audrey Hepburn one showed her, with an incredibly grim expression on her face, cradling a child dying of starvation) helped raise world awareness of the disaster. She was strongly influenced in her work by memories of the hardships (including starvation) that she herself had to endure as a teenager in Nazi-occupied Holland.
* Audrey Hepburn. She is credited as "special appearance by..." and it would become her last film role.
* Audrey Hepburn these days is held up as a fashion icon for her thin willowy figure. This came as a result long periods of starvation during the Nazis' occupation of the Netherlands - which wrecked her metabolism and led to her rather early death at age 63.
* Audrey Hepburn wears a very lovely black lace half mask to a restaurant rendezvous in
* Audrey Hepburn when she forgets to turn on the oven in the first place.
* Audrey is more ambivalent, but he too does want to see active combat when his country goes to war.
* Audrey jumped up 20 spots on the baby name chart in 2006 after it was used as the name of the mom in
* Audrey Marie and Garrett Dylan were in the background of the first WWE Wyatt Family promo before their live debut, but were both released and didn't join the Family.
* Audrey Raines was close to assassinating Christopher Henderson, but her morality got the best of her.
* Audrey Rose concerns Ivy Templeton, a preteen girl tortured by horrific nightmares of dying in a car crash. When her parents are approached by a man named Elliot Hoover who claims that Ivy is the reincarnation of his dead daughter Audrey Rose (who died in a car crash at the exact moment of Ivy's birth), Ivy's father refuses to believe it. He holds fast to his belief even after the evidence becomes overwhelming enough to have convinced his wife, leading to serious tension between the two.
* Audrey Tautou, whose innocent romantic spirit is symptomatic of her complete and utter detachment from reality.
* Audrey, Wait!: James' first line of real dialogue with Audrey after she tries to make conversation with him is "...the store needs more butter pecan."
* Audrey, Wait! music enthusiasts, and this is their go-to conversation topic.
* Audrey, Wait!. Random Accident varieties are from the customers in the Scooper Dooper, and Sharon is the jealous rival type.
* Audrey, Wait! that also turns into an infamous Ear Worm worldwide, shaming all parties involved.
* Audrey, Wait! The character introduces the uniform (bright pink hat and T-shirt) and slogan (also "Scooper Dooper!") with all the affection people might give a used piece of toilet paper.
* Audrey Wells died of ovarian cancer two years before the release of
* AU fanfic had Gabriella and Troy share a mutual dislike of eggs. To say nothing of the setting, namely casting Gabriella as a well-off Jew and Troy as one of the Hilterjüngen in Nazi Germany. Luckily, the author canceled the fic after coming back from a long hiatus and realizing that it was kind of terrible.
* Aufmarsch I West movement, a movement seeking revenge for France's defeat in the Franco-Prussian War and the re-annexation of the province of Elsaß-Lothringen (Alsace-Lorraine) had become a dominant force in French politics and was not to be denied. More importantly the French felt that this was an excellent time for a war: deadlock in the German and Austrio-Hungarian parliaments meant they hadn't increased their military spending and thus capabilities to match the 1905-1914

Franco-Russian increases, but that was set to change in the near future. Moreover the French did not feel they could count on Russian support in a war that mostly or only involved French (and not Russian) interests. Serbia was a cause that Russia was willing to fight for, and the French might not get another chance like it again.
* A UFO documentary in the '90s made a claim that UFOs and aliens were the second most popular topic on the Internet. No points for guessing the most popular topic.
* Au fond de temple saint vow to renounce her so they do not become enemies.
* Auf Wiedersehen, Pet after he returned to his Teeside home to find that many of his friends were working abroad on German building sites.
* Auf Wiedersehen, Pet episode Wayne notices a young woman hanging around outside the construction site, and thinks she might be waiting to be picked up by one of the workers; Barry notes that he's heard of rock groupies, but not cement groupies.
* Auf Wiedersehen, Pet featured this in its first title sequence with one of the characters walking towards the dole office in front of Saatchi & Saatchi's famous 'Labour isn't working' poster.
* Auf Wiedersehen, Pet: In "Last Rites", Oz develops a sideline in selling pornographic videos. When his mate Headly Irwin dies, Oz tries to smuggle the videotapes back to Britain in Headly's coffin.
* Auf Wiedersehen, Pet, Neville wakes up after a night on the town in Dusseldorf with a strange woman's name tattooed his arm. He spends the rest of the first series worrying about how he is going to explain this to his wife when he returns home.
* Auf Wiedersehen, Pet the opening Central logo (a white globe) shrinks down and dissolves into a live action shot of a white roulette ball at the start of the opening credits.
* Auf Wiedersehen, Pet: The Turkish pimp in series 1. Ally Fraser showed potential to be this when he warned Wayne off Vicky.
* Auf Wiedersehen, Pet, while the lads are working on relocating the Middlesbrough Transporter Bridge, Dennis consults their structural engineer:
* Auf zwei Planeten, the half-human, half-Martian Friedrich Ell is the son of All, a Martian spaceship captain stranded on Earth, and a German governess working in Australia. Ell was raised by both parents on Earth, but became a full orphan just before turning 21 (All never found a way to return to Mars). In the course of the novel another human/Martian couple is formed, consisting of German scientist Josef Saltner and the fair La, but the book ends before the two can seriously start to think about having children.
* Auf zwei Planeten: The Martians' eyes can turn almost entirely black, but that is because they evolved on a planet much further from the Sun than Earth and so their pupils can dilate so much that they cover most of the visible parts of the eyeballs.
* Auf zwei Planeten, was printed in 1930 in the school magazine of the Hermann-Lietz-Schule, which the 17-to-18-year old Braun attended. The titular station ("Lunetta" = "small moon") is among other things used for weather control, using a giant mirror.
* Auf zwei Planeten, which was published a year earlier, Oß, the leader of the Antibat faction in Martian politics, wants to retaliate against the rebellion of Earth against the Martian "protectorate" by introducing the dreaded Martian disease Gragra there. However, when this morally abhorrent plan becomes known to the public, he is resoundingly defeated in the elections, enabling a peace treaty between Mars and Earth to be concluded.
* "Augen Auf" by the band Oomph takes phrases from the German version of "Hide-and-seek". "Augen Auf, Ich komme"
* Auggie Smith prefers Irish coffee: "I like my women how I like my coffee: Filled with booze!"
* Aughra too is meant to be a combination of male and female genders, being a large, burly, mustachioed humanoid with the voice of a bossy old lady and a feminine-sounding name.
* "aught" can mean either anything ("for aught we know"), or nothing ("The decade

from 2000 to 2009 is sometimes called the aughties, due to the zero in the second digit position").
* Augie Doggie and Doggie Daddy. Similarly, there is no mention of whoever gave birth to Augie.
* Augie Doggie and Doggie Daddy stays silent — until the twenty-four hours are up.
* Augie Doggie, Yakky Doodle and Shag Rugg hanging out and going on wacky adventures.
* Augie March (2006) and its breakout hit "One Crowded Hour" that the band experienced real commercial success, but their first two albums and the two EPs that preceded them were beloved by those who had heard them.
* Augie Polk and Patrick Mahon play it up to pathetically comical levels; McNulty tasks them with putting a face to Avon Barksdale, the new Baltimorean druglord.
* Augie's singing is an early joke in "Yogi's Tummy Troubles" with how it causes pain to anyone who hears it, and returns when the whole town sings it in order to get free from Yogi's stomach.
* augmented, and it's not a really good lampshade all things considered.
* Augmented Fourth) after the king violently objects to their performance of "Ode to a Duck".
* Augmented Reality and FullDive. Unlike the BIC, NeuroLinkers are completely non-invasive and can be taken off with no ill effects. Completely ubiquitous by 2046.
* Augmented Reality field, thaumaturgy is treated the same as any other science, and there are farms for raising magical creatures for their parts which can be used in spells—which in turn leads to arguments about "factory farms" and "free-range."
* Augmented Reality Glasses (who, as a result, only he can see). She has her own robot chassis, but it's locked up in Robot Jail at the time (she tried to upload herself into a fighter jet) and she's essentially doing community service. Later on, she shows up "in the flesh".
* Augmented Reality mask that is supposed to kill anyone else who puts it on. Not only does it fail to explode, but it doesn't log out when it got taken off the spy, allowing the woman who killed him to search through his files and discover all his secrets.
* "Augmetic" limbs are very common in the setting. Curiously for such an otherwise over-the-top setting, in
* Augury: Ancient Roman prophecy from watching the movement of birds and other animals during thunder and lightning.
* August 10, 1995, St. Louis Cardinals visiting the Los Angeles Dodgers. The Dodgers held a promotion that day where they gave away free souvenir baseballs to fans before the game. Some innings, lots of beer, and several close calls by the umpires going against the Dodgers later, fans show their displeasure by throwing thousands of said baseballs onto the field. Play was initially suspended so that the balls were cleaned up before being resumed, but then one fan threw another ball to center field and the umps immediately forfeited the game to the Cardinals - as of 2018 this was the last forfeit in Major League Baseball. (The Dodgers have given away baseballs since, but now it's
* August 13th, 2007: Erin Thorn who is playing for the New York Liberty at the time, landed a jump shot which assured her team victory over the then-league-champion Detroit Shock in a game the Liberty needed to win in order to even have a chance at making the playoffs.
* August 1914: This happens a lot in the latter stages of the Battle of Tannenberg, as Second Army falls apart, mainly due to the sheer cowardice of most of the Russian generals. Late in the story, tens of thousands of Russian soldiers are trapped in a German encirclement. General Nechvolodov, one of the few competent Russian generals, enters the outskirts of Willenberg. There are hardly any Germans in his way and all he needs is some support from divisional headquarters to push on another mile or so, open up a link to the Russians inside the encirclement, and allow thousands to escape. But instead he gets a telegram from his gutless commanders telling him to withdraw.

* August 1944, with the Allies liberating France and approaching Paris,
* August 2019 saw the first report of an actual crime in space, albeit not a violent one. Astronaut Anne McClain was accused by her wife Summer Worden of illegally accessing the latter's financial information using a computer on board the International Space Station. Incidentally, this also makes McClain the first openly homosexual astronaut.
* August 30, 2008, and May 15, 2015, both have Garfield using a book to hide that he's eating behind it.
* August 3, 2008 strip has Jon look down and see that his fly is down after repeatedly telling Garfield that he isn't so smart, much to Garfield's amusement.
* August 6th, 1945,lucky man in modern history due to those circumstances.
* Augusta Gone is meant to symbolize her character properly going off the deep end and when she checks herself into a teen rehab centre, the psychologist forbids her from wearing her punk-rock/heavy metal clothes. Compared to the extremes some rocker chicks go for, Augusta looks quite tame and actually suits the look.
* Augusta National hosts the Masters every April. The tournament is strategically timed to coincide with the blooming of the
* August Derleth, who was an avid admirer of Lovecraft, as well as a devout Christian, and couldn't or didn't want to understand Lovecraft's intentions to depict the universe as a hostile and uncaring place where humanity has absolutely no special position, and instead made Earth the central battleground for cosmic incarnations of good and evil. Latter contributors to the Mythos often kept the Elder Gods, but made them less "good" than "uncaring but opposed to more dangerous things".
* Auguste Comte devised a humanist "Religion of Humanity" complete with its own feast days (to commemorate figures in Western history) and clergy.
* Auguste Rodin has a divine reputation among sculptors, comparable to Vincent Van Gogh in the sense that it was disliked at the time, but is now been seen as genius.
* Augustine Of Hippo are highly admired within the Catholic Church for their contributions to the development and exposition of Christian doctrine, and respected by lay writers for being as insightful as secular philosophers.
* Augustine Of Hippo: Bishop, theologian, philosopher, and Doctor of the Church. He is perhaps best known for living a decadent life as a youth before eventually converting to the Christian faith. His writings helped shape western philosophy and western Christian theology.
* August, Irene and Invel all serve as Zeref's closest allies. August serves as the leader of the Spriggan 12 as well as the strongest member, Irene is the strongest female of the 12 who also equals August in power and Invel is Zeref’s chief-in-staff and stays at his masters side at all times.
* August is also a general of Alvarez, but for the most part, he's calm and pacifist in nature -
* Augusto Pinochet. Actually, all of the various organizations of this type during Operation Condor would qualify, but the DINA is perhaps the most infamous.
* Augusto Pinochet ("Burn Alive Case"), which had the military invoking the trope on the photographer Rodrigo Rojas Denegri and the college student Carmen Gloria Quintana after an anti-dictatorship rally in 1986. Rojas died four days later whereas Quintana barely survived but was almost completely disfigured.
* Augusto Pinochet, but also demonizing the option itself, claiming that "A victory of the "No" option will mean the return of the Popular Unity (UP), and eventually a return to a crisis period". Despite this, the "No" option won, and none of this occurred.
* Augusto Pinochet: Military dictator and President of Chile (1973-1990).
* Augusto Pinochet Molina, the grandson of the Chilean Dictator Augusto Pinochet Ugarte, frequently shares the American "free helicopter ride" memes.
* Augusto Pinochet to manufacture sarin gas, according to FBI reports.
* Augusto Pinochet was revealed to have embezzled tens of millions of public funds in Swiss bank accounts. This made most of his remaining supporters turn against him.
* August: Osage County are just the tip of the iceberg of family skeletons.

* August: Osage County for Supporting, despite the fact that the two characters had previously competed against each other in Lead at the Tonys when it was a play on Broadway.
* August Rush is essentially one long setup for this, a combined non-romantic (parent-child) and romantic (the two parents) version.
* August's chapter includes the series's obligatory bath peeping moment and the mother of the one of the heroines baits the boys into thinking she wants to join in. Once they lower their guard, she beats them up and delivers them to the girls for further punishment.
* August Strindberg in his play ERIC XIV follows the folk characterization of Goran Persson, who is traditionally considered Eric's "evil genius" with his commoner mistress and later Queen Karin Mansdottir as his "good genius". Actually, Goran is a case of the faith favorite who has no choice but to be faithful, as he can expect to outlive his patron by about five minutes. (As happens in the denouement.)
* August Strindberg: In Sweden Strindberg is seen as their most talented playwright of all time.
* August: Summer heat or lounging in the sun, since there are few recognized holidays during August in the United States, and some of the hottest days of the year in the US fall in this month.
* August Underground, but it was changed fairly late to a title that was the random combination of August (when filming took place) and underground film.
* August Undergrounds Mordum is shown having sex with his sister, spilled intestines, and a dead little girl.
* Augustus alludes to this, saying, "Like, are you familiar with the trope of the stoic and determined cancer victim who heroically fights her cancer with inhuman strength and never complains or stops smiling even at the very end,
* Augustus De Morgan's 1915 comic poem "Siphonaptera" describes an infinite chain of parasitism made of ever larger and ever smaller fleas.
* Augustus, follows suit in the following episode, "Caligula". A political rival of Tiberius since his declaration as Emperor (first believing that her husband Germanicus should be Emperor instead, then pinning her hopes on Nero succeeding him), she is banished to the island of Pandataria at the same time Nero is imprisoned. When Tiberius indicates that he has no plans to reverse Sejanus' decision to exile her, she forcibly starves herself to death to ensure that her blood is on Tiberius' hands.
* Augustus, "...from time to time until the end of his life... was seen wandering through the rooms of the palace, beating his head against the wall and crying out... 'Quinctillius Varus, give me back my legions.'"
* Augustus Giovanni, who wants so desperately to become this. After the Giovanni became the new masters of necromancy in Kindred society, Augustus set into motion plans for the Ritual of the Endless Night, wherein the clan seeks to tear down the Shroud that separates the living from the dead so they can rule as gods. This requires gathering 100,000,000 souls— at one point, members of the clan planned to get half of these by acquiring the Fetters of wraiths, and the other half by triggering a global thermonuclear exchange.
* Augustus Gloop is a glutton whose parents just won't stop feeding him.
* Augustus Gloop, the first Golden Ticket finder, is the subversion. He is just as happy and constantly upbeat as Charlie and his family regards him as
* Augustus, the Imperial German Bodyguard, whose job it was to protect him from the Praetorian Guard (whose loyalties were much more suspect).
* August Without Emperor, would have to rely on persuading the JGSDF soldiers from various garrisons to go with the plan. However, the Cabinet Research Office (currently known as the Cabinet Intelligence and Research Office) and the JGSDF Military Police were able to suppress most of the coup by using force to persuade various JGSDF formations to stand down, though a few others stood by Tokyo and did not join. One JGSDF formation was forcibly disarmed after they refused to stand down. Ex-JGSDF officer Akimasa Fujisaki was able to hijack the Sakura Shinkansen with active pro-miltiarist soldiers to assist.
* AU had them cloned to replace them, thanks to the help of a bio-medical 3D

printer. The narrator explains such technology was developed by the military in order to help the soldiers with severe combat injuries, allowing them to recover with less pain and reduce time or probabilities of organ rejection.
* Au Hasard Belthazar is conveyed entirely from the perspective of a donkey.
* A.U includes images showing the main characters and said characters.
* A UK ad for Flora butter has two children making breakfast-in-bed for parents on their anniversary and then walking in on the two of them 'wrestling'.
* A UK advert for Barclaycard in May 2018 featured The Electric Mayhem talking about gigging in Britain, with cameos by the rest of
* A UK advert for Bird's Eye frozen peas shows a group of kids (and Suggs from Madness) watching a small figure made of peas beating up some broccoli. Suggs explains that this is because peas contain more iron than broccoli, and one of the kids says "Cool. Let's eat them." The peas panic.
* A UK advert for Fairy dish detergent had a long picnic table with place settings representing all the dishes washed by a bottle of "the leading washing up liquid", and then a much longer table, which of course represented Fairy.
* A UK advert for Sky Movie Channels has a family "entering the world" of Sky Movies, becoming
* A UK advert for Tesco featured a Mrs. Belcher, who insisted "It's pronounced 'Bell-SHARE', actually," though no one seemed to believe her.
* A UK advert for the Christmas season 2018 shows the very familiar sight of a red lorry decorated with Christmas lights driving along a snowy road ... before the logo on the side is revealed to not be Coca-Cola, but Kevin the Carrot from Aldi's 2017 Christmas campaign.
* A UK advert for Volkswagen (with the slogan "You get what you pay for") in which a father leads his son past a sleek shark cage stall to a rundown Budget Shark Cage stall whose owner assures them "We're as good as the others, more or less" as the boy watches the lock fall off the cage door and then the door swings open.
* A UK advertisement starts with Marcia Cross by an ad in which Cross was annoyed and bewildered that her agent wanted her to be "the face of potatoes".)
* A UK advertisement used models seductively posing in their underwear to sell sofas. That's right,
* A UK advertising campaign for Pampers disposable nappies featured women going into labour, going through labour, and holding their babies afterwards, set to the chorus of "Push It" by Salt 'n' Pepa, giving the song a completely different meaning without changing a thing.
* A UK Christmas card has a queue of Elvis impersonators outside Santa's workshop, while he says to Rudolph "
* A UK commercial for Kelloggs' Crunchy Nut depicted a man so desperate to enjoy a bowl of the cereal that he climbed onto and rode his dog to avoid a traffic jam. After about a week of airing un-subbed, text along the bottom appeared proclaiming "DO NOT TRY THIS AT HOME WITH YOUR DOG". The ad
* A UK commercial for the supermarket Aldi (part of a series in which someone explains that a brand name product and an Aldi product are just as good, then gives an amusing punchline) has a man in a white coat saying that Aldi washing powder is just as effective in cleaning his coat and that people assume a man in a white coat is a doctor.
* A UK McDonalds ad shows a pregnant woman searching the fridge and not finding what she's looking for, so her husband goes out to find it, but the late-night grocers and petrol station are sold out, and everywhere else is shut. Eventually, he tries Maccy D's and returns with a burger box containing just the pickles.
* A UK supermarket promoted their vanilla extract (or it might have been vanilla ice cream) as being good and natural, containing no 4-hydroxy-3-methoxybenzaldehyde. Which, if taken at face value, means that their vanilla product has no vanillin, the naturally occurring molecule responsible for vanilla's taste.
* Auldey's yet cheaper Tamiya copies from the likes of Jiada, Gokey and Heipao among countless others.
* "Auld Lang Syne" a slow, sad song about ageing, nostalgia, loss, and regret,

although it gets sung as a happy, bouncy bit of festive trivia. "Auld Lang Syne" sung properly will make the hairs stand up on the back of your neck.
* Aulë, Vala (i.e. "archangel" of sorts) of all makers, craftsmen, and scientists (Sauron and Saruman were both Maiar under him)
* Auli'i Cravalho voices the title character in the original English and reprised her role in the Hawaiian dub.
* Älä itke Baby Jane ("Don't Cry Baby Jane"), where the protagonist Baby Jane contemplates suicide for being severely abused by her wicked stepmother.
* Äppelkriget (The Apple War) begins with a German businessman arriving in Änglamark (the pastoral setting of the movie) and deciding to build a giant recreation park there, with stopping this taking up the rest of the film. It ends, after this is achieved, with an Anglophone businessman arriving in Änglamark and deciding to build a giant recreation park there...
* Ärli, dedicated medics of the Secret City, second only to Healers, but with less rigid moral compulsions. Exclusively male and living in a monastic order. No reproduction details given.
* ättestupa of the Pre-Christian Scandinavians. Elderly members of community were thrown off a cliff and euthanized as useless eaters.
* Aum Shinrikyo as it was until 1997 and its reorganization and rename (the "awaken the god of destruction"/"destroy the world"
* Aum Shinrikyo. Fortunately, he was convicted anyway and sentenced to death.
* au naturel by the fact that the couple are in the middle of makeup sex.
* a unified vision for the Free Folk to follow reason most Free Folk follow him.
* a uniform from her old school, not a Fūrinkan High uniform. (In the anime, she puts on the standard girl's uniform on two occasions.)
* A Union", Clarke basically does this when she agrees to join Anya in a 'peace union' and only learns when she's taken to Anya's tent that this basically means she and Anya are now married. However, once the misunderstanding is cleared up, Anya affirms that she won't do anything to Clarke that Clarke doesn't want her to do, and Bellamy agrees to help support the 'lie' of their initial marriage until the events in Mount Weather help Clarke and Anya develop deeper feelings for each other.
* A unique case has the wife of a pro athlete killed. It turns out she was a trans woman who faked her death with the help of her then-wife before transitioning. Said alleged widow is more frantic about the secret being revealed and her ex assumes it's because of how it will give them bad press. In reality, she is worried the insurance company will want back the million dollars she got off the life insurance policy she put out on her ex's old identity. It's this, more than the public reaction, that drives her to kill her ex.
* A unique case of someone underestimating the potential of one of their own creations appeared in
* A unique case: When LXDE, another GNOME 2 clone that focuses on being lightweight, decided to switch from GTK to Qt and forked themselves into
* "A unique collection of tales that are contemporary classics—from the most productive period of
* A unique feature in this game is the Active Time Event system which shows you cutscenes of what other characters are doing while you're out questing.
* A uniquely multinational European military brat is Pittsburgh Steelers offensive tackle Alejandro Villanueva. He was born in Mississippi to a Spanish Navy family attached to NATO, and attended a US-run high school in Belgium for NATO brats before going to West Point and taking a commission in the US Army.
* A uniquely orky variation happens in one chapter where oneork manning a turret isn't firing for fear of hitting their own.
* A unique variation comes from Yusho Sakaki, an Entertainment Duelist in
* A United Kingdom love story of Prince Seretse Khama of Botswana and his wife, Londoner Ruth Willams.
* A United Kingdom PSA about domestic abuse called "If You Could See Yourself, Would You Stop Yourself?" has the boy in a relationship with a girl looking at himself through a thick-glass window mistreating his girlfriend when she refuses to

go along with what he's trying to force her to do with him. He bangs on the window, hoping that he would get himself to stop what he's doing.
* a universal defense against magic. But the latter has only happened once.
* A universal special rule called "Deny the Witch!" grants everyone a limited form of anti-magic. Psychic powers come from
* A universal trait of all the styles is the more skilled the bender, the less physical effort required to do so akin to a muscle. A master like
* A universe (known to fans as the Rejuve Universe) was created by author Lurking Dragon in which technology exists for rejuvenating people to children aged e.g. 5 or 6. The newly rejuved people are the same people as the pre-rejuved old people, retaining their memories and knowledge, but acquiring the emotions of a child. While primarily used as legal punishment (criminals are rejuvenated back to children where they are raised by a new set of parents - sometimes several times - and have no power of their own), it is sometimes used in an emergency to save the life of a severely injured or sick person.
* "A universe of mystery. A universe of magic. A universe of awesome good... and terrifying evil." —
* A university professor came up with a revolutionary new method for grading his students:
* A university professor once failed a student for comparing the social media culture of the United States and Australia because, since it's a continent in its own right, she wasn't aware that Australia is an actual country. The mistake was later rectified after the student was able to convince her that Australia is an actual country. She was fired for her ignorance and passive-aggressive
* Aunt Amy is once brought in to settle a dispute between her sisters, with the expectation that, as the smart, detached outsider of the family she could easily resolve the petty conflict without getting drawn in. It took her all of thirty seconds to join the bickering, leaving Daria and Quinn to solve the problem themselves.
* Aunt Becky) had taken part in efforts to get a college admission exam rigged so that their daughters could be admitted into a college. Both eventually pled guilty, however, this trope especially applies to Lori Loughlin who pleaded not guilty at first. Felicity Huffman was sentenced to 2 weeks in prison for her role. She was also fined $30,000, and has to perform 250 hours of community service.
* Aunt Clara stopped appearing after the death of Marion Lorne in 1968 and it is never confirmed whether or not the character is still alive. Esmeralda was brought in as a
* Aunt Dimity and the Buried Treasure. Dimity was taken by surprise (thinking they were only this trope), plus she was mourning her fiancé and couldn't return his feelings; she says, "I could do nothing but gape at him like an addled goldfish." He left the café abruptly, and though she searched for him in an attempt to explain, she lived out her life without finding him and asks Lori to do so.
* Aunt Dimity and the Buried Treasure, Lori is in her dusty attic to retrieve a blender for new neighbours from among the many duplicate wedding gifts she and Bill have stored there when she sneezes, and the jerk of her hands topples the boxed small appliances "knocking me onto my bottom but doing no real harm until a plummeting juicer struck the flashlight and sent it spinning around the old trunk and into the dark corner."
* Aunt Dimity and the Deep Blue Sea, and the lights go out just after he recounts a creepy detail. Before the lights come back on, he illuminates his own face this way with a lit match.
* Aunt Dimity and the Deep Blue Sea, Sir Percy is recounting a local ghost story, and he's just relayed a creepy detail when the lights go out. Lori's reaction: "I gasped, nearly stabbed myself in the face with a forkful of lamb, and knocked over my water glass."
* Aunt Dimity and the Deep Blue Sea, Will and Rob build "a complicated complex of sea caves for their seal pups, using blankets, tables, model cars, knights in armor, plastic dinosaurs, and a variety of other items seldom observed in the wild

by the Seal Conservation Trust but which my sons deemed essential to a baby seal's happiness."
* Aunt Dimity and the Duke, Emma is addressed as "ma'am" several times by a young man on staff at Bransley Manor, the first stop on her planned garden tour. She's making the trip to Cornwall alone, since her companion of fifteen years has just married a younger woman, leaving her a single and (self-described) frumpy forty-year-old woman.
* Aunt Dimity and the Family Tree. After a farcical round of introductions, Lori pipes up:
* Aunt Dimity and the Family Tree, when the doorbell rings at Fairworth House just after Willis Sr.'s housewarming party, Willis Sr. mentions that he's expecting neighbour and art restoration expert Grant Tavistock to return for the soot-covered painting in his study. Lori refuses to carry it to Grant's car because she doesn't want it to soil her lovely dress. Willis Sr. pays her a courtly compliment on said dress, Lori thanks him, and then: "I curtseyed in a ladylike manner, then hiked up my lovely dress and set off for the entrance hall at a distinctly unladylike jog."
* Aunt Dimity and the Family Tree while concealing her presence there from the other villagers (particularly a trio of single women who've set their caps for eligible widower Willis Sr.). Naturally, things don't go as planned...
* Aunt Dimity and the Lost Prince, romance novelist Felix Chesterton writes under his wife's name (Frances Wylton). Frances explains to Bree and Lori that he thought his work would do better under her name, but his secret was exposed by a persistent fan, and his sales actually increased.
* Aunt Dimity and the Lost Prince, settling in Britain five months before Mikhail was born.
* Aunt Dimity and the Lost Prince, she befriends a poor family from a nearby town and invites them to visit her cottage near Finch on a regular basis.
* Aunt Dimity and the Lost Prince. She declines the use of her title, saying, "I've never been much of a lady." She is openly atheist and spent much of her life travelling wherever she pleased. In her old age, she disregards doctor's orders to be in a room with her books (too dusty) and a fire (too ashy). Inviting Lori and Bree in, she says, "Bung your bags and jackets there and bung your bums anywhere you please." After that, she gives them inside dope on how to enter the Markov house (Mirfield) as well as a master key she persuaded a young Mikhail to steal when they were children.
* Aunt Dimity and the Lost Prince. Unfortunately, she does so during a February cold snap and cannot open the windows for ventilation without risking freezing and/or bursting the plumbing pipes. This brings her to Lori's doorstep in hopes of a place to stay for a few days.
* Aunt Dimity and the Village Witch. Fearing dire possibilities if the Bowenists come to Finch and actually settle there, Lori's neighbours Charles and Grant suggest she consult her husband Bill on potential legal remedies. Bill tells Lori that certain things are illegal (loitering, harassment, and so forth), but there's no legal way to prevent the New Age cultists from coming to Finch or buying property in the area.
* Aunt Dimity and the Village Witch. The vicar's wife Lilian Bunting also describes other methods of interrogation/torture, condemns the very idea of torturing other people for such specious reasons, and is visibly distressed at the prospect that the villagers will learn that such was Margaret Redfern's fate.
* Aunt Dimity Beats the Devil. It comes complete with local villagers who tell visitors the place is haunted.
* Aunt Dimity, Bill bemoans the disturbance the police investigation brings to his clientele:
* Aunt Dimity: Detective adviser and confidant, as good as states outright that Prunella has gone to Hell). Pretty much everyone but the narrator and her immediate family has a motive, and there's a very long chain of witnesses providing evidence pointing directly to someone else, who has evidence pointing directly to someone else, who has evidence pointing directly to someone else... The final witness actually reveals the truth: Pruneface died of an accidental head injury, and the

witness assumed she'd only been knocked out and went about their day.
* Aunt Dimity: Detective, Lilian Bunting asks Lori to entertain her nephew "Nicky" while she and her husband attend Prunella Hooper's inquest. Lori expects to receive a visit from a small boy, and is surprised when thirty-something Nicholas Fox introduces himself.
* Aunt Dimity: Detective, she jokingly asks Nicholas Fox to teach her to play poker, since he so much better at concealing his feelings than she is.
* Aunt Dimity Digs In and wade in a nearby stream to cool off until Emma's dog Ham bounds in to join them, causing them to flail for balance and land in the water. At least they got cooled off.
* Aunt Dimity Digs In. Anxieties over which of the two might reveal the secret (the elder sister dating the archaeologist or the younger trying to save a drought-stricken farm from total ruin) drive the family animosity.
* Aunt Dimity Digs In different kinds of mead. Derek Harris has to persuade Bill off the pub floor, off Bill's bicycle, and into his pickup truck to get Bill home. Next morning, Bill is still green about the gills and occasionally vomiting, and Derek's wife Emma brings homemade thyme honey and strawberry leaf tea for his hangover.
* Aunt Dimity Digs In, Lilian Bunting is recounting the tale of a former schoolmaster who sired many of his pupils without bothering with the formalities of matrimony, when Lori says, "Wow. The PTA meetings must've been—" In response to a sound from the village square, she stops, then says, "What's that noise? It sounds like..." Then Lilian's eyes meet Lori's and they both say "Peggy Kitchen."
* Aunt Dimity Digs In. Of course, it doesn't help that her granddaughter Rainey starts to spill the beans.
* Aunt Dimity Down Under was a black miniskirt paired with "a clinging black sweater that covered her tattoos but didn't quite cover her tummy."
* Aunt Dimity Down Under when they meet Lori and Cameron for dinner in Ohakune, New Zealand. His description of Bree: "Nice kid, good manners and sharp as a tack." The Velesuonnos go on to say they were shocked at the recent changes in her appearance, particularly the choppy haircut.
* Aunt Dimity Goes West, Lori goes from the recurring nightmare of being shot and menaced by Abaddon (back home in Finch) to dreaming of blue-eyed cocker spaniels, who remind her of the Colorado cabin's young caretaker Toby.
* Aunt Dimity has its own twist: Dimity is dead. She communicates with Lori, the daughter of her oldest friend, by way of a magical journal. Lori and her husband Bill (a attorney specializing in estate planning) are among those who do the legwork in the material realm.
* Aunt Dimity. Lori has just discovered Dimity is writing to her from beyond the grave, and Bill finds her just after the first time this happens. Lori tells him about it and shows him the journal page, which looks blank to him — until Dimity writes something to Bill which only he can read. Later in the series, Lori demonstrates the journal link to Emma Harris, and Dimity addresses herself to her as well.
* Aunt Dimity novels, Dimity is a highly skilled one. She introduced Lori's parents, she presciently told a then-twelve year old Bill Willis that he and Lori would wed, and has a hand in pairing Emma and Derek (then a widower with two children).
* Aunt Dimity's Death, Lori's mother Beth is revealed in Lori's recollections and a thorough review of her decades-long correspondence with Dimity.
* Aunt Dimity's Death, When Lori asks Bill how he got the irises in the Willises' parlour in early April, he starts to reply, "Where there's a Willis—". Lori groans to cut him off.
* Aunt Dimity's Death working as a temp and having lived in a succession of cheap apartments after her divorce. Most of her things are in boxes, and she sleeps on a mattress on the floor. She describes her feelings on seeing the Boston office of Dimity's American attorneys for the first time: "Great, I thought, Willis & Willis Meets the Little Match Girl." After coming into her inheritance, she at first displays a certain reluctance to spend money, but eventually is found

consigning her old wardrobe to Oxfam in favour of items like silk-lined custom trousers, handmade Italian boots, and a sumptuous black cashmere swing coat. "I'd never been a clotheshorse, but I was learning fast."
* Aunt Dimity series, and in some respects, Dimity herself. Lori has some knowledge of old books and manuscripts (which does come in handy from time to time), but she inherited a fortune from Dimity and so favors and help each other with their cases.
* Aunt Dimity series, attorney Bill Willis had a scraggly beard, a paunch, and thick horn-rimmed glasses when Lori met him. He lost all three and Lori describes him as being "quite literally, tall, dark and handsome."
* Aunt Dimity series, Bill and his father are noted to dress this way, with Willis Sr. retaining his sartorial habits into his retirement.
* Aunt Dimity series, Bill Willis was introduced with a beard, a paunch and thick horn-rimmed glasses when Lori first met him. He later lost all three, and Lori subsequently describes him as being "quite literally, tall, dark and handsome."
* Aunt Dimity series, Dimity will sometimes initiate a conversation by making her journal fly off the shelf in the study. She will also occasionally place Reginald so as to draw Lori's attention to something.
* Aunt Dimity series, especially when they demonstrate their goodness openly. Also, among Lori and Bill's wedding gifts is a portrait of Bill on horseback and wearing armour—and his glasses.
* Aunt Dimity series, Lori is very apt to do this when given unexpected or astonishing information. Humourously related to her inability to conceal her feelings.
* Aunt Dimity series, some of the comedy is physical, including the occasional pratfall:
* Aunt Dimity's Good Deed, Gerald Willis produces a box containing the remains of Sybella Markham Willis and explains the story of how the Willis family came to be on both sides of the Atlantic. Willis Sr. promises to arrange for the remains to be buried with her husband in the Willis' family plot in Boston.
* Aunt Dimity's Good Deed. They were passed from father to eldest son for some three hundred years.
* Aunt Dimity Slays the Dragon, Bill lifts the day pack Lori prepared for the family outing to the opening day of King Wilfrid's Faire and gives a low whistle:
* Aunt Dimity Takes a Holiday. The notes' author employs the classic pasted-letters-cut-from-printed-material technique.
* Aunt Dimity there have been a number of close calls, often when one or both characters has gotten wet from rain and needs to dry off and/or warm up.
* Aunt Dimity: Vampire Hunter, Lori's working hypothesis explaining the creepy looking vampire the twins saw in the woods turns on this idea; she thinks the neighbouring DuCaral family had a crazy son they kept in the house rather than an asylum, and the man escaped (possibly more than once) and stood in the woods watching the boys.
* Aunt Dimity: Vampire Hunter, Lori tries very hard to remain upright while following Kit down a steep hillside, only to land on her rump in Gypsy Hollow. Kit teasingly suggests renaming the place "Lori's Bottom".
* Aunt Dimity when they finally meet their great-grandniece Bree. They mention having seen tattoos on a sailor and a male farmhand, and while they express curiosity to see them on a young woman, they give no hint of condemnation of the practice. They are also familiar with the Maori cultural influence on New Zealand. After a bit of coaxing, Bree does push up her sleeves to show them, and she tells them about the morepork owl on her left shoulder. They also recognize the specific flowers (bamboo orchid, red mistletoe, and white tea tree blossoms) she has on her arms.
* Aunt Dimity wrote in the blue journal for the first time: "I glanced down at the journal, did a double take that nearly sent Reginald flying, and lowered my arm very slowly."
* Aunt Dolly does this to Wal after she hears him swearing at the livestock in an early
* Aunt Em to Almira Gulch "For twenty-three years, I've been dying to tell you

what I thought of you, and now—well—being a Christian woman, I can't say it!"
* Aunt Hayate", just like Hayate's subordinates, and even Nanoha and Fate themselves do while on duty.
* Auntie Anne's only sells pretzels, a variety of about ten types of pretzel in fact. Even other items they sell are still variants of pretzels including pretzel nuggets and the Pretzel Dog, a hot dog with a pretzel wrapping. They are also most commonly found in malls and airports but also in college student unions.
* Auntie Edna, Edna is in the same situation, but is doing it so she can design a custom-made supersuit for Jack-Jack.
* Auntie Edna short where he pulls an entire bolt of cloth out of storage unit.
* Auntie Edna so that she can make a supersuit tailored to his many powers.
* Auntie Mame and other popular novels, hid behind his pseudonym all his life and, in his twilight years, maintained his anonymity by butlering in California.
* Auntie Mame, Beau falls off a mountain instead. The film of the musical, meanwhile, has Beau killed in an avalanche.
* Auntie Mame is shown as free-spirited because she gives her nephew long pants to wear in his childhood.
* Auntie Mame is this for Patrick Dennis's pseudo-autobiographical novel. To quote Patrick Dennis:
* Auntie Mame, Mama hires Agnes to transcribe her thoughts for her book. Agnes does it so well she even transcribes people asking Agnes why she's writing so fast.
* Auntie Mame. The musical version gives them a duet about their relationship, "Bosom Buddies."
* Aunt Jemima, back in the early 20th century, was an African-American slave with a kerchief on her head. After the Black Rights movement in the 1960s, she was transformed into a middle-class African-American housewife.
* Aunt Julia and the Scriptwriter if they realized that the very sweet, silky voice of the soap heroines comes from an old, fat, badly dressed and worse groomed lady. The titular scriptwriter is also a radio actor: he is short and thin, but with a powerful voice and such a big charisma he gets a lot of admirers even with his poor looks, at least until the burnout begins to hit him hard...
* Aunt Julia and the Scriptwriter to include other types of news; but since they also leave the redaction office very often, leaving Pascual alone to his means, the problem only exacerbates.
* Aunt Julia And The Script Writer: Tons of women show up in the radio when Lucho Gatica pays a visit. They practically maim him trying to touch him.
* Aunt Lily takes a sword blow meant for Pip in the first series finale and admits as she dies (
* Aunt March becomes the relative who takes Amy to Europe, whereas in the book it's Uncle and Aunt Carrol and their daughter Flo whom Amy travels with.
* Aunt Marge never comes to visit again after she floats away from the Dursleys' thanks to Harry's magic accidentally going out of control.
* Aunt May could not believe it when Peter got a job in the Daily Bugle.
* Aunt May, during the Civil War when everyone knew who Peter Parker was and was out to get him, became a downright badass old lady, even going so far as to appear clueless when the Chameleon impersonated Peter while simultaneously tricking him into thinking he'd been poisoned with cookies full of sleeping pills and
* Aunt May gets a bridge dropped on her solely so that Tony can swoop in and adopt the boy as a son, sometimes with Pepper as his new mother. Occasionally, a different Avenger becomes Peter's primary caretaker before Tony comes into the picture, or several Avengers (sometimes in a
* Aunt May: In the comics it's hard to imagine changing her, but this, like most 2000s adaptations, ages her down on the grounds that Peter's aunt — as in, the sister of one of a
* Aunt May is more assertive than her mainstream counterpart. Until she learns during "
* Aunt May is such a load in Sixties comics, it's frankly bizarre. This isn't helped by her tendency of referring to "that awful Spider-Man," and her belief that

Otto Octavius is a polite and charming man — while he's holding her hostage and Peter is trying to rescue her. Aunt May is a bit different from the usual instances. She isn't insisting on following Spider-Man around, for example, or trying to hang out with him. She's a Load, but she's
* Aunt May was in a coma. She awoke, eventually, and shared many anecdotes and heartwarming moments with Peter and Mary Jane, and congratulated Mary Jane on her pregnancy. She even admitted that she had known that Peter was Spider-Man for some time, because Peter couldn't have lived under her roof for so long without her at least seeing the signs. She was in denial for quite a while.
* Aunt May was played like this a lot in the 1960s, especially with regards to "that awful Spider-Man" and Doctor Octopus (who charmed the socks off her and almost married her). That she liked to tell Peter that bohemian party-girl Mary Jane would make a good future wife for him seemingly was another instance of this, but in the 1980s it turned out that she was actually right. It was also later stated — in her backstory — that she almost married a
* Aunt Nell tells Lana that she's proud of her on her wedding day to
* Aunt Patty remarks "There goes the last lingering thread of my heterosexuality!" after seeing Homer run naked through the kitchen in the "Treehouse of Horror" segment "Clown Without Pity."
* Aunt Petunia, after being told she couldn't go to Hogwarts like her sister Lily, decided that all wizards and witches were "freaks" - an attitude she extended to her orphaned nephew (who didn't even know he
* Aunt Petunia. Her decision in this fic's timeline to marry a scientist instead of Vernon and her resolve to raise Harry as her own is one of the main divergence points from the canon storyline and the basis of the whole story. In spite of that major impact, Petunia doesn't appear all that often.
* Aunt Salem). She had been bewildered by all the weird stuff going on around Jaune; finding out that his teammates are experienced criminals dedicated to removing problems explains pretty much everything, even if she's still missing most of the key details. She also enjoys the political game the blackmail represents, and suggests that Ren leak some of the information that incriminates only her father.
* Aunt Sarah later does this to Lady's boyfriend Tramp, whom she thinks was attacking a baby, and immediately has him taken away by the dogcatcher (it was the rat that was attacking the baby, Tramp was actually protecting him).
* Aunt Sarah stays to take care of the baby while Lady's owners are away. She brings along her Siamese cats, who quickly get up to mischief. When Sarah comes in and sees the mess — along with her "innocent little angels" acting hurt — she blames Lady and puts a muzzle on her. The Siamese cats on the other hand, were both
* aunt. The latter is news to Alma, who has been employing Julia while thinking she was Sara, by extension Marta's mother, for most of the series.
* Aunt Tilly knows about the Amulet of Avalor, because she was the bearer before Sofia.
* "Aunt Tique"), who passed away at the ripe old age of 104. When he called a cousin to break the news, he got the question "How did she die?!"
* Aunt Wu's male assistant from the episode "The Fortuneteller", who never gets any lines but still managed to leave an impression due to his striking appearance.
* Aunty Donna always performs live shoes without shoes on, for reasons he refuses to explain.
* Aunty Donna's Big 'Ol House of Fun — Australia/US (although some media outlets explicitly refer to it as a US show due to the fact it was filmed in Los Angeles)
* Aunt Z, owner of the Colossus' only cantina, also constantly sports goggles on her forehead.
* Au Pair becomes the second type after mistaking a job opportunity as an executive assistant. She tames and befriends the two rambunctious children of their single, CEO father whose job duties prevent him from taking a more active role. She gets him to spend more time with his children and falls in love with him. Yeah, it's a

Disney Original Movie, of course.
* Auplopus wasps tend to bite off all the spider's limbs after catching them, both to make them easier to carry and to make sure that even if the paralysis wears off, the spider will not be able to escape.
* Aura Battler Dunbine are able to communicate in language. This is most likely an ability with Aura Power, which is shared among the people of Upper Earth as well.
* Aura Battler Dunbine are constructed using body parts from Byston Well's mythic beasts. Aura muscle come from tissue, armor from carapace, etc.
* Aura Battler Dunbine by 3 years, with Dunbine becoming Marvel Frozen's mecha.
* Aura Battler Dunbine, sets base in Washington as one of his first actions upon arriving at our Upper Earth, holding the entire United States as his hostage.
* Aura Battler Dunbine work and because it happened in a medieval setting full with unicorns, fairies... and giant robots. And that medieval world was a parallel dimension the main character arrived at through a dimensional gate.
* Aura Blackquill kidnapping Athena, with Phoenix never seeing her again.
* Aura is generated by the soul of all living things. Huntsmen train to harness Aura until it becomes second-nature, allowing them to instinctively activate their Aura to act as a personal shield that protects them damage. This training enables them to
* Aura is one of two Mercs unlocked for everybody, for free. She carries the basic Defibrillators that revive at close range, and can deploy Health Stations for fixed-location area of effect healing. She's also the fastest Merc in the game - and the weakest, with a paltry 80 HP. She's mostly viable for area defense and getting crowds back up quickly, with speed and her shotgun to flank enemies.
* Aura Kingdom, for some odd reason, the Eidolons based off of the archangels are all female.
* Aura Kingdom is restricted to greataxes as weapons. Predictably they're slow, but because they're so long they deal powerful damage to both the target and enemies within their range.
* Aura Kingdom Throughout the game, you will occasionally play as NPCs on Stealth mission-like quests to deliver items into certain locations without being spotted. If you are spotted, then you will have to try again. You may also have to kidnap some mobs and bring them in for bounty or as an item to continue quests.
* Aura Kingdom with their Envoy, letting them sense their emotions (Whether the Envoy wants them to or not).
* Aura Knights can summon aura around their bodies, blue in color, that enhance their strength and speed
* Aura Less Black And White, the Lower Class of Aura tried to kill all people with an aura level above low in Accumula Town by triggering a massive aura overload with aspirin pills filled with liquidized aura.
* Auralnauts Star Wars, are constantly high on a form of heroin called "midichlorians", and have a horrible galactic reputation for trashing honest establishments run by the savvy Sith businessmen. Add a bizarre subplot about one droid's descent into sociopathic madness, and you have a series as far from George Lucas' original vision as possible.
* Auralnauts Star Wars (he thought she'd been killed when Laser Moon blew up). Boba Fett walks into the room shortly after Leia — then as the family argument gets awkward, he slowly walks backwards, the way he came.
* Auralnauts Star Wars Saga, every serious personal conflict can only be solved by a dance fight. With glowsticks.
* Auralnauts' Star Wars Saga parodies this liberally throughout their videos, including Uncle Owen telling "Duke" that he needs to come inside because it's "Space-Thirty" at night.
* Aura Sphere, which is essentially a Hadoken. Other Pokémon are capable of learning the move and other similar attacks, the various "pulse" attacks, including Mewtwo. Starting with Generation VI, the Squirtle line is capable of learning Aura Sphere through breeding as well. Thus, Blastoise is capable of using Kamehameha literally.
* Aura tense. It gives you a sensation of inevitability on what the protagonist is

going through, with it adds to the other themes of the book.
* Aura vision is generally the first sign that someone has magical talent in
* Aura was created by the Morganna system from data collected about everything players did. She was literally Instant AI, Just Add Players. She is fully sentient to the point she has created Zefie, a daughter of her own.
* Aureals (aka Golden Saints) and Mazken (aka Dark Seducers), are two forms of
* Aureals (aka Golden Saints) and Mazken (aka Dark Seducers), two forms of
* Aureals (aka Golden Saints) are another race of intelligent lesser Daedra in service to
* Aureals who do not reproduce. They have no biological need for mammaries. It is somewhat more justified for the Mazken than for other "female" Daedra, as they are known to use their female forms to trick and seduce mortals. (Hence their alternative name, Daedra/Dark Seducers.)
* Aurelia and Leasath appear to represent the entirety of South America (with Aurelia as Argentina/Chile and Leasath as Brazil) with some Cajun influence as hinted by some of the
* Aurelia reveals she was raped by a family friend she'd turned to for financial help. After he tried to attack her again, she fought back, cutting him "low and deep" and fled with her son. It's not clear if she killed him outright but either way, she assures her husband he'll
* Aureolus Izzard devoted three years of his life to try to find a way to save Index's life after he failed to find a way to prevent her from having her memories erased while he was her guardian. Then he finally comes out of his seclusion and tries to implement his plan only to find that Touma had already saved her. He got
* Au Revoir Crazy European Chick. Perry gets forced to take the weird exchange student, Gobi, his family is hosting to the school prom. Once there, she immediately slips into a slinky black dress and takes on a murder spree across the city.
* Au revoir les enfants Jean and Julien bond over playing a piano duet while an air raid alert is going on.
* Aurian books. Complete with kid, and coming back as a ghost. Multiple times, until Death gets cheesed off and puts a stop to it.
* Aurian's lover dies, but spends the rest of the series jumping in and out of death trying to protect and help her, despite the fact that she's found a new love by then. Death is understandably not very happy about this, and tries to claim all three of them.
* Auric Enterprises: officially, an international engineering and metallurgical company. Actually a front which its director, Auric Goldfinger, uses to smuggle gold across international borders (and, eventually, to conceal grander and more criminal projects).
* Aurion: Legacy of the Kori-Odan). Lampshaded in that one of the early-game Steam achievements (for completing the hero's wedding sequence) is called "Bantu Wedding."
* Aurodium Sword is basically a PMC (of the real-life "non-mercenary" sort) that provides personal security for VIPs.
* Auron also loses it when he sees a memory preserved by the pyre-flies
* Auron and Lulu from the same game are guilty of this at certain points, but Auron's a badass so of course you'll listen to whatever he says, right? Right?
* Auron. As Yuna is preforming the ceremony to send Sin's corpse to the Farplane she stops when she sees Auron disappearing too. He makes her to keep going telling her "This...is your world now."
* Auron at one point tells Tidus that Jecht used to get his pilgrimage companions into all kinds of trouble when trying to help people because "it's the right thing to do". This includes trying to kill the Chocobo Eater.
* Auron is a living legend of Spira, the only guardian ever to survive a successful pilgrimage. Despite
* Auron is also an example since he was the guardian of the last summoner to defeat Sin.
* Auron only hung around after his death because he'd promised Jecht to take care

of Tidus, and to make sure Yuna grew up somewhere peaceful and free of corruption.
* Auron reveals himself to Tidus as an Unsent after fighting Yunalesca (but there were already many hints at this to the player) — the
* Aurora (2019), Alinua was a born with an intricate green birthmark that carries the Chimeric Plague. With it comes immense life-based powers that get stronger with age. Alinua says that eventually she will lose control of her powers and unleash the Chimeric Plague, killing herself and anyone in close proximity.
* Aurora (2019) are a fantasy variant of this trope, created by a mysterious mage who would curse people into half-animal beings with enhanced strength and healing abilities but no magic for the slightest reasons. They were treated as monsters at first until people realized they were victims and started treating them better... that is, until they discovered they could have children that would also be Ferin and they were driven out of human settlements due to being seen as an existential threat. They are treated somewhat better now but there is still heavy discrimination, especially for predator Ferin.
* Aurora (2019) beneath the surface are full of winding paths and tunnels, some of which are flooded, full of magma or molten metal, or saturated with poisonous air. The habitable parts are full of monsters and even if you manage to avoid them then the energy surrounding the place will eventually corrupt you and turn you into one of them.
* Aurora (2019): Chimeras, animals mutated into monsters by life magic, have glowing green eyes.
* Aurora (2019): Cloudchildren, a humanoid species that was artificially created a few centuries before the comic's time, resemble small elves or humans (they're never over four feet fall) with either avian, chiropteran or insect wings, and are fully capable of flight.
* Aurora (2019): Gods typically emerge as patrons of specific places, and while they can incarnate in a physical form they true consciousness is spread throughout their domain. Even when incarnated, they have at least some awareness of everything happening elsewhere within their realm. In the case of place-gods especially, there isn't generally a very strong distinction made between them and their domain — a city god and a city are, on a fundamental level, the same thing, use the same name, and are treated as the same entity by the story and the characters.
* Aurora (2019) has the Ancients, magically inert master architects who lived on the surface while humans and elves lived in caves to avoid the elemental winds. Even though they could not directly manipulate the elements they used tools to do so. However, their continent-spanning civilization tore itself apart in civil war. Today, the only traces of them are ruins, semi-fuctional war machines, and traces of their blood in humans and elves.
* Aurora (2019): Kendal came into being when the god Vash's incarnation developed consciousness after Vash's soul was stolen, so he was never a child.
* Aurora (2019) One application of Life magic is speeding plant growth. One of the main characters, Alinua, has especially powerful life magic, as shown in Chapter 5 when she grows a massive tree in just a few minutes.
* Aurora (2019), orange for fire, purple for wind, blue for water and white for stone.
* Aurora (2019): Spelleaters are serpentine creatures that feed on ambient magic, hampering nearby mages' ability to cast spells. They're normally small and can't absorb much magic on their own, but ones grown to unnatural sizes with life magic can create sizable areas where magic simply doesn't work.
* Aurora (2019): The Collector's end goal is to destroy the souls of every living thing on the planet, freeing the pieces of the Life Primordial within them.
* Aurora (2019): The god Vash's sword Kendal was forged by the smith god Tahraim after Vash defeated the storm god Tynan. It was forged from an ingot and a jewel that Vash had used to replace his right hand and eye, respectively, in the battle against Tynan. The jewel at the hilt glows the same color as Vash's eyes.
* Aurora (2019): The souls of the citizens of Vash-the-city can't be released from their bodies until Vash-the-god formally releases them. As Vash is unvailable, that means they're all currently trapped in should-be-dead bodies screaming for help.

* Aurora4x" enjoys this trope in full. Since ship/missile bases design is not limited by pretty much anything, its not uncommon to find 20-40 launchers on a ship, capable of firing MIRV's or two stage missiles in rapid succession. And MMM is pretty much required to get the Invader/Precursors ships...
* Aurora (4X), Nuclear Pulse Drive is the second tier of researchable engines. Subverted as its no different than any other engines including Antimatter drives.
* Aurora (4X), xenological excavations are a steady and relatively safe source of applied technology... Just remember to bring a competent military unit with you.
* Aurora after the reveal that Mulan is now harboring feelings for her instead.
* Aurora" - An American version. Aurora (SR-91 Aurora) is the popular name for a hypothesized United States reconnaissance aircraft, alleged to be capable of hypersonic flight. It is believed that the Aurora project was canceled due to a shift from spyplanes to high-tech unmanned aerial vehicles and reconnaissance satellites. Whether or not it ever existed, if it was ever officially "Aurora", the name was probably changed as soon as the rumors became public.
* Aurora as a baby name took a while to catch on, but it suddenly became much more popular in the 2000s notably around the time the
* Aurora Borealis appears to be trapped in a time loop that lasts a year and ends during a nuclear apocalypse during Christmas.
* Aurora Carriers are 1.2 km long, compared to the Federation and Rebel Carriers which are only 500 m long. Note they carry many more fighters than their counterparts and the Aurorans love their railguns.
* Aurora cautioning her not to. Her attempt to attack Snow failed and ended up causing trouble for the entire group.
* Aurora Cycle 48 ex-boyfriends. Each one mentioned is also mentioned with a pro and a con, the latter being indicated as the reason why she dumped that particular ex.
* Aurora Cycle, are connected via naturally-occurring FoldGates. There are also artificial Jump Gates, appearance-dependent on which species built them.
* Aurora Cycle: Each of the six specialties of the Aurora Legion is assigned a different colour:
* Aurora Cycle. Her reason for being on the team is a series of reprimands for incidents that included locking a fellow student in a lab to see whether her serum for a virus worked and repeatedly shooting her bunkmate with a stun pistol to figure out how it worked.
* Aurora Cycle: In the first book, Tyler and Kal have to sneak into a space station's central computer area so the squad's hacker can remote-access the computers. When they discover a computer technician is approaching the room, Tyler apologizes to Kal before kissing him, as Kal's species considers any form of physical contact highly intimate, before telling him to walk out of the room with him looking embarrassed.
* Aurora Cycle tends to use words like "biscuits" and "mothercustard" in place of actual swearing, to the confusion of some other characters.
* Aurora Cycle: The leader of one of the factions in the Syldrathi civil war is known as the "Starslayer" for an incident that took place a year before the beginning of the series where his faction somehow managed to cause the sun of the species' homeworld to collapse in and become a black hole, destroying the planet and killing over ten billion people.
* Aurora Cycle: This is what putting a location under Galactic Interdiction means. Galactic law dictates that any ship discovered trespassing in an interdicted area be vapourized on sight.
* Aurora Cycle Tyler Jones studied the famous generals Sun Tzu, Hannibal, Napoleon, Eisenhower, Tankian, Giáp and Osweyo.
* Aurora Falls, is just a simple ship's engineer with no weapons, trapped in a horrific situation with only his tools and knowledge to help him survive.
* Aurora Falls takes this entry and gives it an upgrade to make it more combat-capable with standardized stasis emitters and heavy repulsion cannons, among other things.
* Aurora Falls: The Valkyrie Field is used as an explanation as to how the

protagonist of the game can be continually resurrected from death.
* Aurora is a desert city state that resembles South America, with traits of ancient Arabia.
* Aurora, Norwegian singer-songwriter who has described dating both men and women.
* Aurora protagonist turns out to be the guy inhabiting his body after this, a consciousness who spontaneously comes into existence in the absence of Vash's soul.
* Aurora's Monster Scenes line of model kits featured a very fearsome-looking "sabre tooth rabbit" in a large jar as part of the
* Aurora's mother is either named Beatrice or Leah in canon (there are contradicting sources, but
* Aurora's name is always "Aurora", as opposed to the Fairies raising her as "Briar Rose."
* Aurora spends most of her movie in blue. The three good fairies weren't sure how to color code Aurora, as blue was the traditional feminine color while pink was the emerging feminine color. Prince Phillip brings a red cape and hat to the party. Disney Princess-gear Aurora always wears pink because Cinderella always wears blue.
* Aurora: Warriors & Weirdos. She believes it's good to be a "warrior of love" and to embrace what makes you unique. But she also didn't want them called "Aurorians" because they aren't "hers".
* Aurora was nearby 4546B in the first place was to construct a new phasegate in its system.
* aurors arrive to search Malfoy Manor and the elf who lets them in is not exactly loyal.
* Aurors (wizard SWAT teams) need high grades in every core subject at Hogwarts. After
* Aur, performing greater acts of evil out of misguided hatred; he is proving his own view to be right.
* Aurra Sing of the arc, and is the ones that the Jedi spend arc trying to capture, as indicated in the arc's very title, even before Tallet and Lekket hire her. Tallet and Lekket only appear in a single issue to hire Sing, and even then, Sing only accepts because the mission will also ger her an opportunity to kill her mentor, the Dark Woman.
* Auryn clearly is about one of these, who seduced the guys only to leave them high and dry. This is emphasized in the music video, in which we see the 'heartbreaker', played by Úrsula Corberó, seduce the five bandmembers and 'kill' them one by one.
* A US Army Cadence called "They Say That In The Army" is a song about all of the nice things promised by the army and the disappointing reality of what you get.
* A US Army infantry platoon has 9 basic battle drills numbered 1, 1A, and 2-8. They cover activities ranging from reacting to an ambush to knocking out a bunker. Learning them is one of a new soldier's most important responsibilities.
* A useful strategy for military or police forces who need to enter a building occupied by bad guys. Often preceded by a "
* Ausf. Achse game's pre-fight screens had cherry blossom petals raining down on the rivals's portraits.
* - a US federal case in which sailors forced passengers (including women) off an overcrowded lifeboat.
* A US Navy tradition is for one or two aircraft per squadron to be brightly painted with the squadron's colors and emblazoned with its emblems, while the rest are the usual haze-gray low-visiblity paint scheme. These aircraft typically "belong" to the squadron's commanding officer or executive officer, who being more senior fly less often and are not as likely to see direct combat. This allows the squadron to show off its traditions and pride while remaining maximally combat effective. The planes are still fully functional and deadly, however.
* auspex available to Astartes Tactical Sergeants and the markerlights used by T'au Pathfinders, that can be used to target enemy troops to give the wielder’s allies bonuses to their shooting.
* a US president from Texas that devolved into a quagmire and ended up overshadowing his presidency.

* Austenland, Captain East takes his shirt off at every opportunity, e.g. to wipe a female character's cheek. Exasperated, another male character asks why he can't just use a handkerchief.
* Austenland has been riding sidesaddle, but needs to ride astride to outrun a rainstorm. In this case, the dress is ripped vertically. (She still has some kind of long underwear to conceal her legs.)
* Austenland watch two other characters kiss in the distance, Jane and he discuss whether the other two are having a short-term fling or starting something more lasting; of course, they are really talking about themselves. Jane reuses one of the exact phrases from this dialogue later in the movie, applied to herself of course.
* Austen Tayshus's "Australiana" is over 4 minutes with no more than 6 seconds between puns. Most are Australia-specific including puns about locations, wildlife and even sheep breeds. He claims it's based on a true story with only the names changed to make it funnier. Then again he admits to spinning yarns.
* Auster has nice, balanced stats that make him well-suited for pretty much any job you stick him in.
* Austerlitz, Emperor Francis of Austria does not have a single spoken line. When Tsar Alexander (who does all the talking) is not pushing him offscreen, he can be seen fidgeting nervously with his various decorations and looking completely overwhelmed.
* Austerlitz. He got his right arm and the upper part of his ribcage shattered by Russian grapeshot as he was leading the charge. It took more than six hours to carry him to an ambulance, for lack of proper means of transportation. There, visits from his comrades and letters from his wife left him depressed enough that he was tempted to stop clinging on to life. When the fever settled in, though, he saved himself through quick thinking and a bit of hazardous self-medication involving massive amounts of red wine. In case his survival still wasn't precarious enough, he pissed off his surgeon and insisted on getting up not even ten days after he was wounded, leading to a highly predictable and nearly fatal fall (made worse by the fact that his servant caught him by the arms). According to Dr Percy, who briefly followed his case, he only had one in a million chance of surviving the shot in the first place (he owed his life to the fact that his bones were broken just the right way to prevent the bullet from hitting his lungs or heart), let alone making it with his arm nearly intact.
* Austin & Ally: Ally proposes attaching one on Trent, but Austin Trish and Dez disagree thinking it's lame. Towards the end of the episode, Ally attaches the signs on her friends to get back at them for making fun of her idea and the three are heard being kicked off-screen.
* Austin & Ally) and his sister Didi, Chuck gets revenge by setting off explosive jam attacks on all four members of the gang including Ally, who was never even in on the prank in the first place.
* Austin & Ally and later when Dez picks up Carrie to help her deliver several trophies at once.
* Austin & Ally Austin and Ally", instead showing a credits scene regarding Ally's parents. Same goes with "Proms and Promises", but ends with an argument with Dez and Chuck than a "On the Next". In both cases, many Auslly shippers were annoyed at the outcome.
* Austin & Ally Austin is eleven inches taller than Ally and twice as wide, the top of her head just reaches the bottom of his neck in heels. Its particularly noticeable in the opening sequence, where he crouches down quite a bit, so they are eye to eye.
* Austin & Ally: Averted: all four main cast members have appeared in every episode of the show.
* Austin & Ally called "What Ifs and Where's Austin", Ally, Trish and Dez imagine what their lives would have been like had they never met Austin.
* Austin & Ally Carrie. Their lack of intelligence causes them to go through a lengthy separation due to them each believing the other broke up with them. It requires a third party to explain they didn't.

* Austin & Ally: Exaggerated and played for laughs. Trish is known for getting new jobs and getting fired quickly. She often gets more than one new job per episode.
* Austin & Ally for himself. So he starts refusing to practice with her in private. Played straight when Austin and Ally perform "Don't Look Down" and "You Can Come To Me"
* Austin & Ally for Kevin Kopelow and Heath Seifert, who had worked on Nickelodeon hits in the past.
* Austin & Ally has a spot where he imagines his voice being changed to a chipmunk voice after a vocal surgery to remove nodules from his throat.
* Austin & Ally: He's wild and fun, while she's serious and responsible.
* Austin & Ally: In one episode the characters keep getting packages delivered to their businesses, with a joke being about no-one tipping the delivery guy. This takes place almost at random during the main plot about their businesses constantly getting robbed. Take a guess who the thief is.
* Austin & Ally Kira acts as one by dating Austin, while both Austin and Ally were struggling with their feelings for one another.
* Austin & Ally: One episode features a singing competition where it is revealed that the producers always have a joke contestant, who this time is a young girl with little singing ability. After the girl gets trained by Austin, Ally, Dez, and Trish, she winds up becoming an insanely talented singer who manages to win the contest.
* Austin & Ally or when he told Trish's boyfriend Jace that Trish entered the dance contest with Chuck.
* Austin & Ally sequence in which Trish becomes signed to Starr Records. However, she doesn't take her career seriously and starts writing selfish songs to brag about her newfound fame. She even tricks Dez into being her assistant and nearly destroys her friendship with Ally. This eventually leads to her downfall when the fans start to lose interest because of the jerkish songs.
* Austin & Ally shifted towards girls because Ally is just slightly more of the lead character due to Ally's music store being where the majority of the plot takes place and that it was Ally the audience was introduced to first. Not to mention, the show is more a vehicle for Ross Lynch than Laura Marano, thus why the Double Billing is not used in the opening credits. It's also notable for being Disney Channel's only live-action show with a male lead to launch since Disney XD broke off in 2009.
* Austin & Ally. The title characters, still in the awkward liminal area where they know they care about each other but aren't quite sure what to do with that information, are eager to reunite, only for one to wind up in Portland, Oregon, and the other in Portland, Maine. They try again, this time winding up in Washington State and Washington, D.C. Cue lots of teen angst and tender moments over the phone.
* Austin & Ally: This is when Austin is telling the gang how they were fighting over the only ticket to his gig in "Tickets & Trashbags".
* Austin & Ally: Trish often gives Dez a blunt "yes" whenever she's annoyed by him.
* Austin & Ally trope. Ally is the POV Girl, while Austin is the Poster Boy that drives the plot along.
* Austin & Ally, where the shopowners of the mall form one after mistakingly believing Austin to be the mall thief. According to them, they got the torches and pitchforks at the "Torches and Pitchforks store".
* Austin and Felicity Shagwell are in a tent unpacking gear to infiltrate Dr. Evil's island base. Their silhouettes look like Felicity is pulling various stuff—including twelve feet of rope and an umbrella—out of Austin's posterior... to the astonishment of Evil's
* Austin Aries after he saw Don Sterling lose his NBA franchise and decided his position wasn't secure enough. Aries and Roode kept opposing MVP, and became faces by default.
* Austin Aries events "as a fan". When word got out that TNA had fired him, he

signed an ROH contract then and there.
* Austin Aries selling tin foil hats to fans and taking pictures of himself unmasked. He has been spreading anti-mask conspiracy theories that promoters do not want to hire him as a result.
* Austin Aries, the object was Submission, but the submission would only count if the wrestler used the Crossface Chickenwing to do it.
* Austin Aries. Whether or not these programs actually helped him becoming more charismatic or not is a matter of debate. Half the crowd agreed with Aries in ROH.
* Austin Aries, who he proclaimed only cared about making sure the fans were entertained (presumably, those two things would be directly intertwined but whatever)
* Austin claims to be immune to the power of suggestion, so Mickey challenges him, then reveals that she's already tricked him (
* Austin has some chloroform that he brought with him in case he needed to
* Austin hospital skit, one of the things that Austin did to poor Vince is to give him a forceful enema right in Vince's ass.
* Austin insists that magic isn't real, it's merely the power of suggestion that will cause people to act out a curse.
* Austin isn't the only one. The third phrase results in Roboto's female assistant shockingly covering her lips after reading it. For reference, she's Japanese, so she should understand what he said without reading English subtitles.
* Austin Lounge Lizards) is "the one rotten fruit on the newt family tree".
* Austin Magic Pistol fired ping-pong balls at potentially deadly velocities using an explosive mix of water and calcium carbide. A small, handheld potato cannon. Not only did it produce an impressive fireball from the muzzle, but emitted fire and sparks from the breech that would singe the shooter's wrist, and could melt their face if the breech cap blew off.
* Austin marks perhaps the first instance of the trope in the history of the series.
* Austin overhears Ally and Jimmy discussing about selling his latest song which he is performing at Jimmy's Halloween party to Taylor Swift, unaware that they are actually organizing a duet for him and Taylor Swift at the party and plan on surprising him.
* Austin Peay has been a full member since 1962, but its football team left in 1997 before returning in 2007.
* Austin Powers about the nature of said mook's death. He generally has to be stopped by someone else before he'll move on.
* Austin Powers alone. He doesn't say anything but instead, he turns to his henchpeople and beckons that they join in. They soon start laughing together in a very awkward manner. The problem is, they're not quite sure when to stop, and no one wants to be the first to stop laughing... great awkwardness ensues.
* Austin Powers also uses four shots to activate each of the game's modes.
* Austin Powers and a vaguely Middle-Eastern man who angers Dr Evil but will just not die.
* Austin Powers and branch into legitimate corporate enterprise so as to better serve evil of course.
* Austin Powers....and then laugh some more....and then stop....and then start laughing again, because the scene apparently hasn't ended yet!
* Austin Powers aspects, it is predominantly set in the Sixties, with a playfield decorated in rainbow colors, bright flowers, and groovy lettering.
* Austin Powers as well as making "shag" a more popular term in the USA.
* Austin Powers, Austin comes from an exaggerated version of 1960's London to a realistic version of the 1990's, still dressed in a blue velvet suit with a lace dickey and a wildly obsolete hairdo. When he lands in Las Vegas, a tourist quickly asks whether he's in one of the shows. Rather than try to explain, he simply replies "no, actually, I'm English".
* Austin Powers, Austin gets Dr. Evil arrested in the very beginning, making it clear that something will inevitably go wrong. Dr. Evil even does a musical number pointing this out ("Austin caught me in the first act/it's all backwards, what's

with that"?).
* Austin Powers, Austin was flirting with Vanessa from the very instant that he awoke from his cryogenic freezing, but he only seemed to progress from purely-physical attraction to an emotional connection when she briefly posed for photographs for him when they were on a surveillance mission. After saying how beautiful she was he took her out for a night on the town, where she first began to return his affections.
* Austin Powers: Basil Exposition (with British Intelligence) is an obvious send-up of this type of character.
* Austin Powers, Basil's response to learning that Vanessa was a fembot is to sadly say that they knew all along... before moving on and never bringing it up again.
* Austin Powers because there are no doubles who are of his height, though having a stunt double background helped.
* Austin Powers but also is attractive to two guys. One kisses him and the other was way too interested in watching him dance provocatively in just his underwear.
* Austin Powers calls his Wedding tackle, meat and two veg, lads, undercarriage.
* Austin Powers: Dr. Evil, Number Two, Frau Farbissina and the rest of the gang. Dr. Evil's utter incompetence and sinister pinkie make him one of the prime examples of this. Then there's his hilariously traumatic childhood.
* Austin Powers, Dr. Evil says that the French would say that something has a certain "I don't know what." Dr. Evil is admitting that he doesn't know what the French phrase is, but the phrase he's trying to use, "Je ne sais quoi", actually means exactly that: "I don't know what."
* Austin Powers. Dr. Evil's nefarious plot is to use a "big underground drill" to penetrate the Earth's crust and plant a 50 kiloton nuclear warhead deep in the core of the planet. When the bomb detonates, every volcano on Earth will erupt simultaneously.
* Austin Powers for the Good Guys, who was only referred to as "The Mole" even though he had a recurring role in the movie.
* Austin Powers Goldmember, when Dr. Evil is hit in his crotch with a meteor globe. Goldmember, a eunuch, groans at the same time Dr. Evil does and puts his hands on his groin. Frau Farbissina also reacts.
* Austin Powers had a few, such as Tom Arnold as the cowboy in the "who does Number Two works for?" scene, Carrie Fisher as the father/son therapist, and three in deleted scenes restored for the international cut (Christian Slater as a guard who Austin hypnotizes, Lois Chiles as the wife of a steamrolled mook, and Rob Lowe as the friend of a decapitated mook).
* Austin Powers has Austin (with a little more help) invading Dr. Evil's underwater lair.
* Austin Powers has Frau Farbissina say that Scotty has gotten so evil he's losing his hair.
* Austin Powers has this memorable quote from Powers Sr.: "There's only two things I hate in this world: People who are intolerant of other people's cultures and the Dutch."
* Austin Powers, he seduces Frau while under its influence before returning to the present, leading to this dialogue:
* Austin Powers in Goldmember, after Austin learns that his father, Nigel, has been kidnapped, and the only clue is that the crew of his yacht have had their genitalia painted gold, Austin visits Dr. Evil, who is being held in captivity in a cell much like Hannibal Lecter's, to find out who is responsible. Dr. Evil reveals to Austin that Goldmember is behind the abduction.
* Austin Powers in Goldmember: Austin gets publicly humiliated twice by his father not attending an honor from the Queen, and earlier, his becoming valedictorian at spy school - both times a wizened old janitor/groundskeeper points and laughs loudly.
* Austin Powers in Goldmember, Austin was suddenly proclaimed that year's International Man of Mystery instead of Dr. Evil, who was anticipating the award all along.
* Austin Powers in Goldmember believes he is seeing an impossible silhouette of a

man with a small arm for a penis, who shakes hands with it and bites it before giving birth. It turns out to be Austin, Mini-Me, some tubing and an apple.
* Austin Powers in Goldmember, both Goldmember and Dr. Evil came up with designs for a tractor beam to allow them to pull in an asteroid down to Earth. Dr. Evil calls his "Preparation H" (a reference to a popular OTC drug for treating hemorrhoids), as Preparations A-G were unsuccessful.
* Austin Powers in Goldmember culminating in a flashback-inducing exclamation of "Daddy didn't love me!" by Austin. In return for a prison transfer he does eventually tell Austin what he came for, and as Austin rushes to the time machine Evil yells "You go now Mr. Powers! Fly, fly!"
* Austin Powers in Goldmember focusing more on Austin's relationship with his father as opposed to him falling in love.
* Austin Powers in Goldmember: In response to the silence when Dr. Evil makes a surprisingly good joke;
* Austin Powers in Goldmember involves Mini Me killing an uncooperative prisoner. When the guards come for an inspection, Dr. Evil and Mini Me proceed to quickly cover it up while a fellow prisoner does an impromptu dance to distract the guards.
* Austin Powers in Goldmember monster float and rolling through the streets. Two Japanese bystanders then have this exchange:
* Austin Powers in Goldmember... shabadylu...mil...shabady......uh, yen." The U.N. representatives calculate it in their heads and determine that it is a reasonable claim.
* Austin Powers in Goldmember, this is Mini-Me's statement to the World Councillors sentencing him and Dr. Evil (who is quite amused by the display.)
* Austin Powers in Goldmember to sneak around Dr. Evil's lab. Mini-Me was on the bottom.
* Austin Powers in Goldmember, where Austin's father is strapped to a conveyor belt-esque contraption that would eventually pour liquid gold over his genitals.
* Austin Powers in Goldmember, where Scott Evil's laugh sounds more like a mix between screaming and crying, is incredibly hilarious, and gets him reprimanded by Dr. Evil for doing it wrong. By the end, though, he's learned how to have an effective laugh.
* Austin Powers in Goldmember which elicit shocked reactions from Austin. Of course, once the objects blocking the subtitles are removed, the phrase is revealed to be perfectly normal. Mr. Roboto and Austin lampshade heavily on this trope.
* Austin Powers in Goldmember with the satellite that Dr. Evil tests his tractor beam on:
* Austin Powers: International Man of Mystery about losing one's head, while Vanessa waits patiently for him to finish, both seemingly well aware of this trope.
* Austin Powers: International Man of Mystery, a parody of Oddjob, who throws his shoe instead of a hat.
* Austin Powers: International Man of Mystery attached to their heads. as a gift from his newly evil son Scott.
* Austin Powers: International Man of Mystery but a feminist who considers him a pathetic and unattractive has-been. This aspect was abandoned in the sequels, where Austin is again considered the ultimate stud, making it a closer parody of the former show.
* Austin Powers: International Man of Mystery did alright at the box office (it recouped its budget), but not exceptionally. It was only when it reached home video that it became a pop culture touchstone and received a sequel.
* Austin Powers: International Man of Mystery, does not use this "30 years" convention, although it does briefly involve time travel from 2002 to 1975 and back.
* Austin Powers: International Man of Mystery ended, he initially assumes that the Communists won.
* Austin Powers: International Man of Mystery has four Latin Spanish dubs: two in Mexico, and two in Argentina. The cast of the second Mexican dub returned for the sequels.
* Austin Powers: International Man of Mystery. He also has allied female agents

falling for him in the other movies.
* Austin Powers: International Man of Mystery. Miss Kensington and Austin follow a pair of Virtucom employees into the restrooms, one a very tall and lanky man, the other an obese woman, and emerge seconds later in perfectly fitted uniforms. And spotted in the five seconds between leaving the restrooms and entering the employee's only area.
* Austin Powers: International Man of Mystery neatly takes the second version: hidden in his eyepatch is a sight-enhancing camera, allowing him to cheat at blackjack.
* Austin Powers: International Man of Mystery. One of Dr. Evil's best moments is during a group therapy session, casually dismissing his deranged childhood as "typical."
* Austin Powers: International Man of Mystery Part of how Austin and Vanessa are able to get into a compound.
* Austin Powers: International Man of Mystery: revolving bed and music. "Do I make you randy, baby?"
* Austin Powers: International Man of Mystery. Scott Evil wants to be a veterinarian.
* Austin Powers: International Man of Mystery. Scott is baffled as to why his father is not shooting his Archenemy on the spot and is instead sharing a meal with him.
* Austin Powers: International Man of Mystery that he's suspended over.
* Austin Powers: International Man of Mystery. "That looks like Uranus!"
* Austin Powers: International Man of Mystery, the Irish killer has his little charm bracelet from which he leaves little trinkets at the scene of each crime. Cue joke: Scotland Yard is "always tryin' to get me Lucky Charms!"
* Austin Powers: International Man of Mystery; the Ministry of Defense's assault team is adorned with red getup as they charge Dr. Evil's layer.
* Austin Powers: International Man of Mystery, there's a scene where a male character in a movie was filling a rubber balloon with air, for making balloon animals perhaps, and when a female walked by, the balloon in his hand (which was narrow but very long) expanded vertically upwards from his hand while he stared. She blows up a balloon as he describes his salacious first impression of her, then it deflates as she admits she did not reciprocate: "actually, I couldn't stop staring at your teeth."
* Austin Powers: International Man of Mystery to point that they already have happened. At last he throws up his hands and says, "Let's just do what we always do: hijack some nuclear weapons and hold the world hostage."
* Austin Powers: International Man of Mystery until finally being run over. As he's about 50 feet in front of it when he starts, this takes more than a few seconds.
* Austin Powers: International Man of Mystery when Dr. Evil drops Mustafa into a pit of fire, only for Mustafa to complain off-screen that he's "alive, but very badly burned". This goes on for some time until we hear someone shoot him; he then complains about being shot before finally being shot again, presumably finishing him off.
* Austin Powers: International Man of Mystery, when Powers attempts to play a CD on a portable turntable. An early script of the second film had Felicity doing the same thing at the very end.
* Austin Powers in the final scene with Random Task. Sure enough, Austin's still trying to claim it isn't his.
* Austin Powers in the first movie falls in love with and marries the daughter of his (married) female assistant from the 1960s, Mrs. Kensington.
* Austin Powers; in the first movie, he gets a vehicle stuck in an impossible position while trying to back up. In the sequel, he knocks over every possible object around him just trying to go forward.
* Austin Powers is pointed directly at the center drain. While it happens less often than it looks, should the ball wind up there immediately after the magnet lets go, the game will provide another ball with no consequences.
* Austin Powers marketing decision, you better believe. Whether or not it was

someone who had even met the actual decision-maker is another story.
* Austin Powers — Dr. Evil only wanted to survive his space exile, and Powers, to be there when his nemesis returned. Mr. Bigglesworth lost his fur to "feline complications due to the reanimation process," according to Mustafa.
* Austin Powers movie did this, complete with clueless Austin using the inappropriate pseudonyms Richie Cunningham and Oprah.
* Austin Powers movie, Dr. Evil teams up with Goldmember against Austin Powers.
* Austin Powers movie include a factory in Chicago that produces nothing but scale models of factories.
* Austin Powers movies, Dr. Evil goes to elaborate lengths to explain his latest world-threatening scheme to his henchmen. It usually ends with the show going awkwardly wrong and him being embarrassed.
* Austin Powers movies have the World Organization, which mainly listened to Dr. Evil's broadcasts and such. They only appeared in the third movie, though; the first movie actually used the UN and the second movie had Dr. Evil dealing with the 1969 US President instead.
* Austin Powers movies is a parody of diabolical masterminds in general and Blofeld in particular.
* Austin Powers movies. Keeps trying to blackmail the world with absurd schemes, even though Number Two is making the organization truckloads of money legitimately.
* Austin Powers movie, specifically one infamous scene involving the phrase "Number Two" being shouted in a public restroom.
* Austin Powers movies, when Doctor Evil returns, Austin Powers himself is unfrozen to deal with him. The first sequel plays it straight, with Austin following Evil into the past.
* Austin Powers movies where perfectly innocuous actions seen in silhouette are mistaken for something horrifyingly perverse.
* Austin Powers movies, where Scott Evil is quite offended by Dr. Evil's insistence on dining with his titular arch-nemesis, instead of shooting him in the head on sight.
* Austin Powers movie, this is the title character's initial plan as he and Vanessa are being lowered into Dr. Evil's pool of mutant sea bass.
* Austin Powers movie, where the agency (?) Austin works for has taken some of Fat Bastard's... err... stool for analysis. Austin spots a pot of what looks like coffee and pours himself a cup. After a bit of conversation...
* Austin Powers NAKED ON A COLD DAY! MARGARET THATCHER NAKED ON A COLD DAY!"
* Austin Powers plays with this numerous times. Usually by dragging it too far.
* Austin Powers plot of the story. Why? Because we have a secret agent using a time machine to go back to the sixities and fight a evil mastermind in his secret volcano lair.
* Austin Powers, Scott Evil's laughter, as well as Dr. Evil's horrified reaction to Scott Evil's amount of laughter, was more similar to Laughing Mad.
* Austin Powers series, once with Austin dancing in his underwear and being found by Vanessa, and once when he arrives on a beach wearing a bikini as Felicity notices.
* Austin Powers series, the only things he ever says are "Me" or "Eee" and during Dr. Evil's music video he says "You and I" in a deep voice.
* Austin Powers series, where Dr. Evil's Cool Chair keeps malfunctioning, or he just doesn't know how to work it.
* Austin Powers sexual harassment cases revealed during the 2016 election.
* Austin Powers sport large badges with his triangular logo over their left chest.
* Austin Powers' swinging bachelor pad has a fireplace that turns on when he claps.
* Austin Powers (the first one at least), Dr. Evil reveals that he is actually trying to kill his son Scott, for undisclosed reasons (apparently, he's not evil enough). He reveals this in family therapy nonetheless.
* Austin Powers: The Spy Who Shagged Meactivated portal-style time machine, only to smack into it.
* Austin Powers: The Spy Who Shagged Me A deleted scene shows that he keeps her in the trunk of his car to deflect gunfire.

* Austin Powers: The Spy Who Shagged Me, although the guards eventually do break their stillness to chase after Austin and Felicity at one point as well.
* Austin Powers: The Spy Who Shagged Me as a running gag, when referring to Dr. Evil's rocket that looks like a giant—
* Austin Powers: The Spy Who Shagged Me, Austin drinks Fat Bastard's stool sample, thinking it is coffee.
* Austin Powers: The Spy Who Shagged Me, Austin is holding a bottle of lotion when Felicity Shagwell shows her sexy back and he squeezes the bottle a little too hard.
* Austin Powers: The Spy Who Shagged Me. Austin Powers ejects Mini-Me from a moonbase toilet into the void of space. He recovers just fine after Dr. Evil retrieves him.
* Austin Powers: The Spy Who Shagged Me caused his rear view mirror to crack.
* Austin Powers: The Spy Who Shagged Me contains a secret menu, accessed if you wait around long enough on the special features menu for Dr. Evil's spaceship to fly into frame, and select the logo on it. The menu has several bonus features about, well, evil.
* Austin Powers: The Spy Who Shagged Me, Dr. Evil escapes into space in a rocket that has a more-than-passing resemblance to a giant—
* Austin Powers: The Spy Who Shagged Me, Dr. Evil's embossed logo can be found on nearly anything — makeup cases, motorized scooters, record turntables, even the doors of Dr. Evil's secret moon rocket.
* Austin Powers: The Spy Who Shagged Me, Fat Bastard steals Austin Powers' "mojo" (his libido and sexual prowess) for his arch-nemesis Dr. Evil. It's visualized as a red liquid with little male symbols floating in it.
* Austin Powers: The Spy Who Shagged Me: Felicity Shagwell enables herself and Austin to escape by baring her chest to the guard, causing him to stumble forward and into a lava pit.
* Austin Powers: The Spy Who Shagged Me gets us two Austins from ten minutes apart - they get on quite well together.
* Austin Powers: The Spy Who Shagged Me has a montage where he and Felicity goad a palace guard into participating in this.
* Austin Powers: The Spy Who Shagged Me. It's actually a bag on a table next to Austin, who's hunched over a map.
* Austin Powers: The Spy Who Shagged Me. It seems to affect Austin exactly 30 years in the future when he's unfrozen in 1999, as his mojo suddenly starts draining at the same rate that Fat Bastard is draining his mojo in the past — while he's in the middle of shagging Dr. Evil's assassin.
* Austin Powers: The Spy Who Shagged Me, the titular super groovy super spy suffers this problem. While shagging it up with an enemy spy named Ivana Humpalot, Austin's mojo (literally his libido/sex drive) is drained out of his body back in 1969, causing him to immediately go limp in 1999. In order to save himself from perpetual erectile dysfunction, he, therefore, has to boogie on back to the Swingin' Sixties. While there, he gains a new encouragement to retrieve his mojo when he meets sexy CIA agent Felicity Shagwell. The groovy hippie chick's desire to compete in the bedroom Olympics with the International Man of Mystery only increases his desire to cure his impotence and retrieve his precious mojo from Dr. Evil so he can finally take Felicity to bed.
* Austin Powers: The Spy Who Shagged Me this is present in the film's tagline of "First he fought for the crown, now he's fighting for the family jewels!" While done in a more comedic sense, Austin's desire to take down Dr. Evil becomes personal in the second film when the villain orders the theft of Austin's mojo, the physical manifestation of his libido, rendering the International Man of Mystery impotent. Naturally, Dr. Evil's revenge plan hits below the belt literally and causes Austin to pursue him relentlessly to reclaim his mojo and cure his erectile dysfunction.
* Austin Powers: The Spy Who Shagged Me to frighten the president and others into thinking the White House is being attacked. But tells him that's what's gonna happen.
* Austin Powers: The Spy Who Shagged Me: When his mojo is stolen, Austin is

rendered impotent. Aside from his erectile dysfunction, he also believes he cannot defeat Dr. Evil without it. However, in the end, he saves the world, defeats Dr. Evil, and wins Felicity's love without his mojo. In the end credits, Austin is confirmed to have his mojo back when he sees his past self shagging Felicity.
* Austin Powers: The Spy Who Shagged Me, where he returns to the '60s and demands his $100 billion, which the President of the US and his staff find equally hilarious, because that amount of money doesn't exist yet. He's told that he might as well ask for a gajillion-bajillion dollars.
* Austin Powers to cover the escape. He was able to manipulate the prison's populace after demonstrating how, you know, evil he is.
* Austin Powers too, as surely you'd be annoyed that EVERYONE was reciting the catchphrases by the time the second movie came out.
* Austin Powers trilogy obviously pokes fun at this with Dr. Evil's own schemes involving holding the world hostage. Interestingly, his right hand man, Number Two, is much more successful in raking in cash with various legitimate projects, and is quite frustrated when Dr. Evil still goes for the schemes that Austin Powers is more likely to stop.
* Austin Powers uses this trope in all its movies. For instance, Foxxy Cleopatra drops into the main plot about Austin and his father Nigel.
* Austin Powers when Number Two says they own the factories modeled, "-and a factory in Chicago that makes miniature models of factories".
* Austin Powers, where the spy is accused of being obsessed with daddy issues.
* Austin Powers, which is an absolutely massive mole engulfing his cheek. Eventually, Number Three encourages Austin to just get it out of his system. The lampshade hanging happens right away, the very first time the gag is used.
* Austin Powers who doesn't even have a name tag, and should just lie down right now. He complies.
* Austin Powers who has seduced the top agents of British Intelligence.
* Austin Powers, who he eventually overpowers and drowns in the toilet. While this is going on, the guy in the next stall is keeping a running commentary on what he's hearing.
* Austin Powers, who wrote and starred in the films, than Jay Roach, who directed.
* Austin Powers with the line "He has a little something that the French would call, I don't know what." "Je ne sais quoi" is literally French for "I don't know what", but a less literal, more accurate translation is "a distinctive, pleasant quality that can't be easily described or named".
* Austin provokes Mickey into insulting Lou to figure out why the neighborhood didn't like him. One of the things she mentions is that he was reluctant to talk about children, even with his wife. At that moment, Austin realizes that
* Austin Scholl - Writer, editor, comedian, musician, and voice actor. Head of the above groups.
* Austin's speaking voice is done by Jonah Bobo, and his singing voice is done by Thomas Sharkey (Seasons 1-3) and Nicholas Barasch (Season 4).
* Austin Tappan Wright, which is explained in more detail in Basil Davenport's treatise on Islandian history. When Islandians found out about the Gregorian calendar, they liked the idea, but adapted the month names so they would have the right seasonal connotations for the SOUTHERN hemisphere. Thus, "Octen" and "Noven" are roughly the northern April and May.
* Austin Texas' Asylum Street Spankers' song "My Favorite Record" has them quoting lines from their favorite records, and ending the song jerkily repeating a line like a scratched disk.
* Austin was on the other side of it a few years earlier during his feud with
* Austraeoh are named in old norse, if you're willing to stretch your suspension of disbelief a bit to make it work. Austraeoh is "East-Horse" (Aust is norse for East, Eoh is old english for horse), Eljunbyro is "Endurance (re)born", Innavedr is "Accomplish wind", Odrsjot is "Frantic companionship", Urohringr means "discordant ring" (uro-discordant, hringr-ring). Yaerfaerda comes from gær — fœða, or "yesterday-to give birth" or "foal yesterday" in-universe. Ynanhluutr is from innan-hlutr — "Inner Purpose"

* Austraeoh, Bellesmith and Pilate discuss the possibility that fate/destiny is actively protecting Rainbow Dash from death.
* Austraeoh spends entire chapters in-between the main storylines showing of the beautiful landscapes Rainbow flies through, particularily the first few chapters before she comes into contact with Windthrow.
* Austraeoh uses an interesting variant. The world is a flat plane with earth-like conditions on top and a chaotic netherworld on the bottom, and is a strip much longer in the east-west direction than north-south. In addition, it's eventually revealed that it is actually only a fragment of an enormous dodecagon-shaped world that was broken apart eons ago.
* Austraeoh. Whitemane and other lesser alicorn are also old, but note quite to that level of ancient.
* Australia again, but from the 1980's, The Dodgy Brothers from sketch show
* Australia also has a lot of these, the longest running being Saturday Disney.
* Australia also has its fair share of these, many differing from their British counterparts only so much as is necessary to avoid paying the BBC for the rights.
* Australia, An Australian reviewer chipped in to say that yeah, this is pretty much how Aussies would react under such circumstances.
* Australia began as a penal colony to remove cons from England's crowded prisons. However, as featured in
* Australia for the Faunus), it's located at the bottom right of the map, it's two-thirds desert, and its wildlife is noted to be far more dangerous than what is found on than the rest of the planet.
* Australia gets in on the act with the CFMEU (Construction, Forestry, Mining, and Energy Union) and the Communication and Electrical Plumbing Union.
* Australia had a landmark 1987 AIDS education ad which portrayed the Reaper going bowling...with people as pins.
* Australia has a number of distinctive examples (aside from the cicadas mentioned above):
* Australia has (had) a very strong Anglophile streak, lessening in the 1970s to be replaced by America, though that's more of a conflicted fandom. Australia itself was on the receiving end of this by Americans through the 80s with movies like
* Australia has had several dirty cops, which included a commissioner:
* Australia has some of the most infamous examples of introduced pests, many of which are so adaptable that they have proved a serious threat to Australian biodiversity, ecological stability, and in some cases, even to the economy.
* Australia has the male lead follow the trope nearly to the letter at a charity ball.
* Australia is also okay with swearing, for the most part; some radio stations are even fine with songs featuring the F-word being played mid-afternoon. Only racist epithets get outrage.
* Australia is much the same as Ireland with the regional factory in temperate Tasmania and the emphasis on fresh local milk. Comparisons usually call it a close contest.
* Australia is often joked to go through all four seasons in one day. Days have been known to swing from the high 30s and low 40s (90-100 for those using Farenheit) during the day to below freezing at night. (This is an extreme example but it does happen)
* Australia itself has quite a few takes on its own, including, but not limited
* Australia later had a famous example with the 2019 Federal Election. The reigning Liberal Coalition had been behind in the polls for years prior, and nearly every opinion poll agreed that it wasn't a question of
* Australia—most of the coastal land was covered in forest before European colonists decided it clashed with the wallpaper. This has backfired somewhat, since ecodamage is now causing desertification and thus
* Australian Aborigines are genetically more removed from Africans than Europeans, Asians, and Native Americans are. This is because their ancestors did not intermix with other humans in great numbers since they arrived at Australia c. 70,000 years ago, therefore keeping their genes distinct, while the others are descended from

more recent emigrants from Africa mixing with the older ones (humans did not come out of Africa all at once, but rather in waves).
* Australian accents are common if the show itself is British (or Australian).
* Australian actor and former pop singer Jason Donovan sued British magazine Face in 1992 for claiming he was gay. He was awarded £292,000
* Australian actor Nick Jameson also played a Russian character: Yuri Suvarov, the president of the country.
* Australian actor Nick Jameson played Russian President Yuri Suvarov in the fifth, sixth, and eigth seasons. Likewise, John Noble, also of Australian descent, played Anatoly Markov during season 6.
* Australian ads for phone company Vodafone at one point featured "Awkward" by indie band San Cisco, a song about being stalked by someone both in person and through repetitive text messaging. Awkward indeed.
* Australian advertisements for Arnott's "Tim-Tams" chocolate biscuits:
* Australiana. Incomprehensible to non-natives, painfully funny to non-natives with a working knowledge of the country, just painful to natives.
* Australian and New Zealand broadcasts were notorious for being censored, especially in the 1960s (though, fortunately for archivists, the censor authorities actually kept the scenes that were cut, which later were used to help restore missing Doctor Who episodes, or at least give a glimpse of lost stories).
* Australian astronomer Ruby Payne-Scott was forced to marry in secret because the law did not permit married women to hold a permanent position in the Commonwealth public service. She was eventually discovered and forced to leave her position, despite being a pioneer in the development of radiophysics and radio astronomy.
* Australian automotive accessories retailer Repco once had an ad that featured a motor enthusiast replacing his doorbell with one that made the sound of a revving engine (much to his girlfriend's disgust). They received so many inquiries about this, they started stocking a bell that made this noise.
* Australian band Powderfinger includes two Johns. One goes by JC, which doesn't really help since the other's surname also begins with C.
* Australian beer ads are either a hilarious send-up of adverts in general or filled with Australian in-jokes and parodies
* Australian botanist David Goodall was still working at 104 in 2018, when he opted to go to Switzerland for assisted suicide.
* Australian brewery Carlton & United's slogan for its flagship Carlton Draught: "Made from beer."
* Australian comedian Adam Hills has an artificial foot. In his stand-up shows he brings up that he often gets asked strange questions about it such as:
* Australian comedian Adam Hills often jokes about the Barmy Army taunting Australian cricket fans in a bar in Newcastle by singing, "We get three dollars to the pound!"
* Australian comedian Glynn Nicholas would use this to puzzle/punish latecomers to his show. Tipped off that some people were coming in late, he would tell the audience to laugh uproariously at a punchline. The latecomers would be allowed into the audience and Glynn would wait patiently. Then, when they had settled, he would pretend to be finishing the joke. Audience wets themselves laughing, with the exception of four unfortunates.
* Australian comedian Hannah Gadsby, in her final tour (which was recorded for Netflix), announced that she was going to quit stand-up comedy due to the anger she was feeling in her daily life not translating well to the career. However,
* Australian comedian Steve Hughes tells a joke claiming that this trope is the attitude Australians have towards naming most of the things in their country, citing examples such as the Sydney Harbour Bridge ("It's a bridge, it's in Sydney, and it spans the harbour!"), the Snowy Mountains and the Great Sandy Desert ("Took us ages to think of a name for that!"), the states South Australia and Western Australia, and the Northern Territories.
* Australian comedy duo The Umbilical Brothers frequently use impressions of Schwarzenegger as staples of their live-action and puppet routines.
* Australian cricketer Jason Gillespie once famously scored 201 not out after

being temporarily promoted in the batting order as a "nightwatchman" — the only batsman with an average under 20 ever to achieve this milestone. The very important qualifier is that this was against the highly unskilled Bangladesh, but that doesn't explain how he was able to outperform the other five batsmen who batted before Australia's declaration, all of whom had averages roughly two and a half times that of Gillespie. To top it off, Gillespie took 3/11
* Australian example: the Reading Writing Hotline (one three double oh! six triple fiiive oh six). At a post on tumblr put it: "Every Australian knows three phone numbers off by heart: their home number, their mobile number, and the Reading Writing Hotline."
* Australian federal election ensued in the Australian media over just how impossibly nonsensical the event was.
* Australian filmmaker Brad Carter made a video of himself and a friend going around Salt Lake City knocking on doors with copies of
* Australian films set in the 1930s that require shots of a train (such as
* Australian Football League match between Hawthorn and Essendon became notorious as one of the most violent in league history, with multiple fights breaking out between players. It became known as the "line in the sand match" when it was alleged that Hawthorn team director Dermott Brereton (himself a former Hawthorn player) told his team at halftime to "draw a line in the sand" against perceived Essendon aggression. (Brereton denied the specific wording, but admitted to telling the team to take a stand.) in the end, 16 players received fines from the AFL, three of them also drawing suspensions from four to six matches, and two other players were suspended for a single match.
* Australian Football League's Heritage Round is all about this, with teams wearing old versions of their club jumpers, or those of clubs they have some sort of connection to (for example, Fremantle wearing the South Fremantle or East Fremantle WAFL teams' jumpers). Also, fans of South Melbourne and Fitzroy may occasionally be seen wearing their clubs' jumpers at Sydney or Brisbane games (respectively), especially if they make a Grand Final.
* Australian Football League's in 1996 where the AFL turned the clock back a hundred years to when it began, bringing out vintage cars, styles of dress and radio to celebrate.
* Australian Football League situation for St Kilda. Fremantle lodged a protest, and a few days later the AFL ruled that the match ended on the first siren, the timekeepers and umpires wrongly allowed the match to continue, and St Kilda's behind didn't count, so Fremantle was declared the victor by a final score of 94-93, marking the first time in 106 years that a match result was overturned.
* Australian Football League, the "father-son rule" is designed to make it easier for clubs to recruit the children of former players.
* Australian Football League). They have since moved to actually play in Brisbane, and merged with Fitzroy to be known as the Lions.
* Australian Football League, which is decidedly oompah to hit the century-old feel of every other team song.
* Australian football team (Socceroos) kit in 1990 was a horrid mish-mash of random strokes of gold, green and white that became forever known as the 'spew jersey', which is Australian slang for vomiting, called so because that's what the shirt resembled.
* Australian Funnelweb Spiders are VERY territorial and VERY aggressive. That's not the scary part (well, not the
* Australian Gladiators: "Ouch! I broke a nail! Gotta stop punching those brick walls."
* Australian government is discussing cancelling the citizenship of people accused of terrorism.
* Australian Idol winner Casey Donnovan. She, her brother and stepsister were involved in a car crash on the way home from the local takeaway.
* Australian John Noble played a minor antagonist on the series who was Russian.
* Australian Labor Party senator Stephen Conroy, since out of power, took a cue from the Chinese and attempted to push through a law mandating that ISPs block

certain blacklisted sites entirely. The Liberal Party had a similar plan when they were in government.
* Australian Minister for Foreign Affairs Julie Bishop's stare has reached meme status.
* Australian mouse plague. Not only did the mice destroy the whole crop, the livestock were in danger of being eaten alive.
* Australian musician and alternative comedian Gregg Turkington also recorded an album of prank calls entitled
* Australian news reader Edwin Maher appeared on an Australian sketch comedy show (I think it was
* Australian night bombers routinely emptied their onboard chemical toilets over German targets, claiming they were reducing load for the return flight. Nazi Germany complained under the Hague Convention that the British were using illegal chemical weapons. The complaint was upheld!
* Australian novelist Joan Lindsay suggests in the prologue that her 1970 novel
* Australian Pay TV has several channels with this feature but it's generally +2. Thus to those in Perth the main channel is their -2, allowing them to watch a show ahead of time if the Sydney-centric channel is offered on their system. It also causes an unintentional example with
* Australian Politics parties named after themselves; Lambie has been re-elected several times with the "Jacqui Lambie Network" but Lazarus was not re-elected with the "Glenn Lazarus Team".
* Australian Politics this is Bronwyn Bishop's stock in trade, being a type one before becoming Speaker and the biggest fan of type two now.
* Australian pop singer Marty Rhone thought he was going to die in Vietnam and recorded "
* Australian Prime Minister Kevin Rudd as Tintin — artist Bill Leak was able to convince Moulinsart to back down after promising not to profit from his work.
* Australian Prime Minister Tony Abbott once spent a good minute of a one-on-one interview silently death staring the reporter after being asked a question.
* Australian radio host Philip Adams refers to his listeners as "Gladdies," a reference to a running joke that the only people who listen to his show are little old ladies called Gladys.
* Australian Rockabilly band The Living End and their self-titled debut album is considered an Australian rock classic. Hardly anyone even knows they made more music after it.
* Australian Rules Football. After Essendon lost to them in the 1990 grand final, the Carlton cheer squad (their team being a major rival of both Essendon and Collingwood) rubbed salt into the wound, with their banner for their first match the next year riffing on Essendon sponsor TAC's slogan: "If you lose to Collingwood in a grand final, you're a bloody idiot." Collingwood haters called the Magpies' tendency to choke in the finals the "Colliwobbles", and even post-1990, the fact that they have won only two premierships since 1958 (the aforementioned 1990 and 2010) means the term is still in use.
* Australian Rules Football" (an indoor variant of American Football) and occasionally the old American Football League (which was the NFL's rival during the 60s before it merged with it, becoming the AFC)
* Australian Rules Football: At Kardinia Park in Geelong, the opposition coach's box faces west, resulting in the sun being in his eyes late in the afternoon on sunny days.
* Australian Rules Football ball), though this is a very rare term. Sherrin is still definitely the dominant AFL ball producer, though.
* Australian Rules Football, commentators often use (Club nickname) or (Club colors) Army. Fremantle Dockers fans are a little more creative, with "Purple Haze".
* Australian Rules Football. Depending on who you ask, the result is either heaps of fun or incredibly annoying.
* Australian Rules Football Even injured captain Bob Murphy got a happy ending, with coach Luke Beveridge calling him up during the presentations and giving his

premiership medal to him.
* Australian Rules Football has had the Adelaide Crows failing to make it to the semi-finals by the opposing team scoring a goal in the last ten seconds of the last quarter. Twice.
* Australian Rules Football: In the 1970 VFL Grand Final, with Carlton 44 points down at half time, coach Ron Barassi brought Ted Hopkins on, who proceeded to rip Collingwood to shreds. Afterwards, Hopkins realised he could never do anything to top his achievements in that game, and retired.
* Australian Rules Football is a version of this, having so many players around the ball and likely opposition targets that the opposition can't get a clean possession. The Sydney Swans are noted exponents of this, while in the 2013 Preliminary Final, Fremantle did it well enough to beat Sydney at their own game.
* Australian Rules Football, players can be reported for "Rough Conduct" (formerly "Unduly Rough Play"), which covers any incident that isn't a specific offence (such as striking)
* Australian Rules Football sometimes gets confused with rugby, and has a similar reputation. This made worse by an exhibition match in London in 1987 between Carlton and North Melbourne, dubbed "the Battle of Britain", which is still infamous for the brawling that occurred today. Apparently, an ad campaign in England in the leadup to the game emphasised the game's violence.
* Australian Rules Football, the interjection "Yellow and Black!" in the Richmond Tigers' theme song "Tigerland" used to be just something the fans yelled out. It's now included in the official version.
* Australian Rules Football, the St Kilda Saints have won only one premiership, in 1966. The same goes for Port Adelaide Power (2004), but they are generally not considered to be this since they only joined in 1997, and their SANFL incarnation is the most successful club in that league. The Western Bulldogs long had the "one-hit wonder" tag as well, having only won the premiership in 1954, but they picked up their second flag in 2016.
* Australian Rules Football, the Sydney Swans had a long losing streak in 1992-3, which ended when they beat the Melbourne Demons. The next day, a newspaper cartoon featured two demons standing in a frozen-over hell, with one saying, "Looks like the Swans finally won a game."
* Australian Rules Football, the Victorian Football League began in 1897 with eight teams (Carlton, Collingwood, Essendon, Fitzroy, Geelong, Melbourne, South Melbourne and St Kilda). The Australian Football League (which it evolved into) currently has eighteen:
* Australian Rules Football to Aussie Rules, and many clubs have netball teams as well. In fact, a lot of local leagues have changed their names from "x Football League" to "x Football/Netball League" in recent years.
* Australian Rules Football to centre half forward!". Upon hearing of this, Hudson jokingly complained that God had never attended a single training session.
* Australian Rules Football, when their side cops a rough umpiring decision early in the match, fans will inevitably scream that the umpires "have been doing it all day!"
* Australian rum brand Bundaberg Rum features a polar bear as its mascot, the Bundy Bear, who prominently features in their advertising. Things do tend to be worse with "Bundy" around, but that's got more to do with how he's an enormous
* Australian/Serbian player Jelena Dokic's father/coach Damir was notorious for his aggressive and abusive courtside behaviour when she began playing in major tournaments. He also moved his family back from Australia to Serbia after accusing Australian tennis officials of match-fixing. She eventually managed to break away from him, sacking him as her coach and moving back to and competing for Australia.
* Australians have enjoyed Youth Group's rendition of "Forever Young", without realizing it belongs to German synthpop-menschen
* Australian singer Natale Imbruglia is often thought of as a one-hit wonder in the U.S., however, her one hit "Torn" (which was
* Australian singlet (what Americans call wife beaters or tank tops) makers Chesty Bonds had an ad campaign where the buff model makes an "ok" symbol touching his

thumb with his pointer finger to form a ring. Unfortunately when they tried to do business in Greece, they found out this was a symbol for being homosexual. The gesture has the same meaning in several other countries, and is simply obscene in a variety of others.
* Australian sniper, credited with over two hundred confirmed kills during the Gallipoli campaign alone, was said by his fellow soldiers to have a great sense of humor and a very distinctive laugh.
* Australian soldiers are renowned for being very professional and excellent at teamwork (though not always at taking orders). Small population countries do the best with what they have.
* Australians sometimes pick on New Zealanders with the "What's a Hindu" joke above.
* Australians tend to like Junkrat and Roadhog the best, even though Australia in the game is portrayed as a desolate, criminal-ridden wasteland and the two characters are outlaws because they're recognized as an homage to the
* Australians will likely be familiar with the deep croaking sounds made by Bladder Cicadas at dusk in the summer. If your garden happens to be one they like, they can get loud enough that you'll want to close the windows at dusk to muffle the noise they make.
* Australians would know a few examples. For example, the Mojo Jingle "C'mon Aussie C'mon" made it to #2 on the ARIA charts.
* Australian the teen in the eye. Australians still shocked from the shootings came out in support of the teen for standing up to racism, leading to the hashtags #Eggboy and #EggANazi gaining popularity on Twitter. Anning would lose his seat two months later.
* Australian troops also fought in the Hungry Jungle in WW2, on the Kododa Track and other parts of New Guinea, Borneo and Bougainville. They later took what they learned there and brought it to the Vietnam War, where they terrorised the Viet Cong.
* Australian TV actor and politician Ted Hamilton produced and played the Pirate King in
* Australian University Revues, particularly at the University of Sydney. Recent examples include "Livin' la Vida Broker", from the Commerce Revue, and 'Sing Us A Song, We're The Taliban', from the Law Revue.
* Australian wrestlers are virtually ignored, or if their immigrant status is known, it is not used as a source of Foreign Wrestling Heel heat.
* Australian Yellow Pages has had a few memorable ads, including the Goggomobile Guy and "Not Happy, Jan!"
* Australia plans to be this by 2016. Currently the only female combat soldiers in the Australian military serve within 4 Squadron, Special Air Service Regiment.
* Australia's 1999 Cricket World Cup results were a lot like this in the later matches. Their final match in the Round Robin Super Six stage against South Africa was won with only two balls remaining. Their semi-final match, also against South Africa resulted in a tie after a mix-up on the final ball allowed one of the South African batsman to be run out, resulting in a tie and allowing Australia to advance to the final due to a higher net run-rate.
* Australia's Big Day Out festival seems to have been killed by its disastrous 2014 shows. Two shows were planned for Sydney, but the second was cancelled after
* Australias Got Talent, in real life, on national television: after a successful audition, Nobel Lakaev skipped off in the wrong direction before he figured out that off-stage was over there and skipped right back across the stage, pointing sheepishly.
* Australia, similarly feature segments devoted to advertorial content.
* Australia's infamous huntsman spiders, which boast leg spans of up to one foot. Luckily, the species humans most frequently run into,
* Australia's Jacqui Cooper had injured herself before the Salt Lake City Olympics in 2002, and so it was left to Alisa Camplin (who herself was competing against doctors' advice) to compete in freestyle ski jumping. She won the gold.
* Australia's "Lesbian Vampire Killer", Tracey Wigginton, was only caught merely

because she accidentally dropped her credit card.
* Australia's Network Ten was found to have beached a broadcasting code forbidding this following its coverage of the 2007 ARIA Awards, when the logos for Toyota Yaris, Chupa Chups, KFC, and Olay were rapid-cut into the nomination segments.
* Australia's Next Top Model had a related incident when they actually announced the wrong person as the winner, and she'd already done her acceptance speech when the host revealed that in fact, the other finalist had won.
* Australia's recently gone a step further — in addition to the photos of what smoking can do to the human body (and yes, we're talking full-blown photos of the real deal for those who weren't sure), tobacco companies are now limited to plain packaging, meaning no colourful logos or eye-catching boxes.
* Australia subverts this due to influences from world war 1 and onwards due to the fact that being British cannon fodder is hungry work (General John Monash even had hot food delivered to the front line in the battle of Hamel). Their ration packs contain Cadbury chocolate and are universally considered awesome.
* Australia: The Confusing Country) advises against putting your arm down a wombat's burrow as the wombat will think its burrow is collapsing and push up; crushing the arm between the wombat and the burrow roof and causing you to bleed to death. It then adds, "This is considered the third most embarrassing known way to die, and Australians don't talk about it much."
* Australia trope. The widespread use of penal colonies came because British society decided the death penalty had become overused (by this period it was applicable to a wide variety of property crimes, not just the expected offenses of murder, piracy and treason), to the extent that juries were sometimes reluctant to convict criminals whose theft was perceived as too minor to merit execution. Penal transportation provided a non-lethal method of getting rid of thieves.
* Australia, which isn't something you want to teach Australian children, as the spiders in that country are among the most poisonous on the planet. It did accidentally air on the feed of Nick Jr. Australia gets (which is the same as the Asian feed) before a parent complained about it.
* Australia, with a colossally larger land mass than the UK, made the switch from Imperial to Metric road signs starting on the 1st of July 1974. A new metric sign was erected alongside each old sign and a large
* Australia You're Standing In It. Every "ad" they made, for every product they sold, emphasized that they had BOTH "gone crazy."
* Australium, it causes extremely high intelligence while simulataneously greatly reducing common sense. This resulted in Australia become an extremely high tech nation, but generally using that technology for only the most ridiculous things.
* Australophilia, Uluru, boomerangs and didgeridoos, and kangaroos and koalas.
* Australopithecus afarensis, as the males were nearly 50% taller than their female counterparts, such as "Lucy".
* Australopithecus is often described as an ape's head upon a human body. Aside from the size, telling apart their bones and human ones isn't easy even for specialists. Hardly surprising; resizing a few bones is much easier than the brain work, so of course that part was done quckly.
* Austria and Hungary (despite being "divorced"... it's complicated) are this to
* Austria and Hungary personality and yet they still are in a relationship with each other.
* Austria. For a country smaller than Maine, they sure have a lot of identical names, which they distinguish by adding "at XXX" or "in YYY".
* Austria has about 50 times the winegrowing area of England, making the one decidedly "lesser" than the other.
* Austria. He loves the fine arts and music and hates the outdoors — and is definitely more cultured than his wife Hungary.
* Austria-Hungary (Central Powers) wanted to crush Serbia's military Junta and end their campaign of state-sponsored terrorism by replacing them with a stable and peaceful government.
* Austria is one. and the fame of its pastries and coffee culture, it's not a surprise.

* Austrian artist Oskar Kokoschka, after being dumped by Alma Mahler (widow of the famous composer Gustav), ordered a life-sized replica of her to keep as a lover.
* Austrian club Red Bull Salzburg had a legendary reputation for failing to qualify for the
* Austrian made ones. The Australians don't even care because the Austrian bikes are "THE best bikes", and are able to run circles around their sheep. Not that they needed the extra help anyway since the Brits are absolutely hopeless with motorbikes.
* Austrian serial killer Jack Unterwager was able to serve only fifteen years of a twenty-year sentence for his first murder by becoming a bestselling author. This turned him into a public darling and a thought experiment for the intellectual class, the latter of whom saw him as an experiment to show that reform for violent offenders was possible. This essentially gave Jack all the immunity he needed to keep killing, using his celebrity status as a shield and rallying public support to his cause during his second and final trial.
* Austria seems like a weak country in the middle of Europe with no army to speak of. They aren't even a part of the NATO. However they have a defensive pact with the USA, Russia, the UK and France.
* Austria, too. Seen in the strip right after the "Chibitalia" chapter, where much to Hungary's shock he takes up the rest of Chibitalia's daily chores for once. Also seen in the Valentines strip, when Germany pointed out that
* Austria was a very strict father figure towards Chibitalia, and one of the punishments for his mess-ups was this.
* Austria would get lost if he went out to purchase a present for his ex-wife Hungary, he opted to make her a gift and ask someone else to give it to her. She was very much "aaaawwww" when she found out.
* Austromancy: Deriving meaning from watching the winds especially during thunder and lightning. “The winds of change”.
* Austroplatypus incompertus) is now known to demonstrate a simple form of eusociality, with a single breeding female producing lots of offspring that excavate tunnels in trees and care for her young.
* A (usually) unintentional example, but people often quote Polonius' line from
* Auswahlen kills Quincies by creating a silver blood clot in their bodies that de-powers them and kills them once it reaches their heart. Among the Quincies purged are Uryuu and Ichigo's mothers, Kanae and Masaki. Uryuu's father, Doctor Ryuuken Ishida, knows the secret to both Yhwach's and Uryuu's powers: Uryuu's immunity means that Yhwach cannot see into Uryuu's future while Yhwach will be fully de-powered for a single second if he ever comes into contact with the Auswahlen silver. Ryuuken's decision to autospy his wife's body to collect the silver enables a special arrow to be forged that Uryuu will be able to fire without Yhwach seeing it coming, but the act forever destroys his desire to be a Quincy. Ryuuken only reveals the secret when Uryuu is strong enough to fire the arrow without Yhwach foreseeing it and Ichigo is fast enough to act within that single second to kill Yhwach.
* Auta Magetta is a more direct example in that he is almost completely invulnerable and, when motivated enough, near unstoppable, even with Goku, Vegeta, and the like at the levels of power they're at. He has never been shown to have sustained physical damage of any kind. The only way he's ever been stopped is through exploitation of his low self-esteem and sensitive nature: If he hears anyone insulting him, no matter how mild, he becomes distracted and, eventually, unable to attack or even
* Autarchs have to master not just one, but several (preferably all) of the eight different Warrior Paths. They lead from the frontlines, where they enjoy the benefits of personal forceshields and plasma grenades, in addition to their pick from an inventory which includes personal teleport generator, wings, psychic amplifiers for their battlecry, a hand-held directed fusion beam gun, a monofilament web-thrower, and a rapid-fire AP rocket launcher.
* Autarchs through the entire army, they're still one of the most dangerous forces in the galaxy.

* Autechre uses this heavily. "Gantz Graf" is one of their more famous examples, and even their most innocuous songs have a fair bit of harshness to them.
* Auteur License: A creator is given freedom to complete their project the way they envisioned it.
* Auteur Theory case of duelling Word of God during the filming; the scene where Deckard essentially forces Rachael to kiss him (with all its squicky undertones) was another case where the screenwriters (and Rutger Hauer, who played Roy Batty) deeply disagreed with Scott's take on the material. It's very possible that the conflicts are what make the film such a cult hit: whatever your take on the film, it's likely there was someone involved in making it who shared that view, simultaneously vindicating your reading and providing lots and lots to debate about with other fans.
* AU that casts the monster characters as rambunctious kids around Frisk's age.
* Authentication by Newspaper: Has become discredited nowadays with the power of Photoshop and computers making it harder to. Not to mention the gradual decline in the importance and relevance of newspapers in today's age.
* Authentication by Newspaper to collect a kidnap ransom for a dead man, whose body was actually being preserved in a freezer. As this fraud just involved propping the body up for a photograph, it was a lot easier to get away with it.
* author. Also inverted in that meeting his wife Natalie helped Duncan realize he was bisexual, rather than gay.
* Author and explorer Michael Asher wrote about his experiences as a recruit in the elite Parachute Regiment and a real monster of a training NCO called Corporal Jekyll, who was a paragon of the "beasting" culture of the Paras in training, where if you were lucky it stopped on the acceptable side of bullying. He notes that he only once heard a word of encouragement and praise during his training, but that was enough to raise his morale to the point where he passed out as a Para. Asher also notes that later, when accepted for special forces, training was conducted largely in a more grown-up way that credited the SAS recruits with being sensible responsible adults - the shouting and screaming was a long way in their past, although the abuse was more psychological.
* Author Appeal, but this is a universe, crafted by a group of authors, built so the "just bugs me" moments of most comic books are handled, with incredible attention to detail everywhere. Over a hundred stories, dozens of full-length novels, and it's all free on a website.
* Author Appeal: Content featured in the work because it's what the creator likes.
* Author Appeal: Content included in the work because it is what the creator likes.
* Author Appeal, Eric Bischoff to a lesser extent, and the reason why Vince Jr's always trying to get Cena over even when someone else is selling more merchandise, and why Vince put on a ton of muscle when he got into the ring for the first time.
* Author Appeal. Matt Stone has said often he personally doesn't believe in any religion and Trey Parker says his idea of faith is difficult to explain, but he finds both religion and atheist viewpoints equally absurd to comprehend. In any case, most of their comedy is about upsetting people, so messing with everyone's perceptions of the world and faith is just part of it.
* Author Appeal turned up so high that the author is literally the only member of the target demographic.
* Author! Author!, Graham Dorn wrote his first "Reginald de Meister" novel as a satire of detective fiction. The public didn't spot the satire, and now he's the bestselling author of a detective series he hates.
* Author Avatar: A character who is intended to represent the creator.
* Author Avatar. A fan requested it at a book signing, and Kendall and her team set about to making it.
* Author Avatar and is begging Beckett to give Castle "permission" to sleep with her that Beckett feels the need to flee:
* Author Avatar, and others over the years. Literally whoever is writing the story for the comic.
* Author Avatar. Don't mix them up. And don't spell it "Spycho" either.
* Author Avatar, given that they share the same name (Alan Solivan) and that the

nickname "Big Nasty" came from a nickname the real Alan received in school.
* Author Avatar he is most likely Asian-American, but it's never been made clear.
* Author Avatar), her interactions with her new friend becomes understandably more complex, especially because as a self-described hobbyist Lisa is keen to bring up these topics with Anne as much as possible.
* Author Avatar. He's kind of a jerk, but he's still leagues more moral and rational than the other players, and is the only one who calls out things like El Disgusto's obsession with ninjas and lack of personal hygiene, Psycho Dave's white supremacy, etc.
* Author Avatar. However, one-shot human characters appear quite often.
* Author Avatar movies. An usher comes out to tell her the line is on the other side. Mae says that she's in the right line, the one for H2G2. The usher gives her a weird look.
* Author Avatars Sues, even if they're well-written, realistic, and don't take over the story — and, are all Sues necessarily stand-ins for the author?
* Author Avatar, tend to drag it through most of the major events of the show, such as villain appearances, regardless of what impact the new character has on the story.
* Author Avatar that she is, Comic Chris subverts this greatly, mostly in her earlier stories. Most of her battles seem to have her on the ropes, ending up rescued by someone else before she turns the tables on her opponents.
* Author Avatar, which is presented as Chaucer's transcription of all the tales the other people on his pilgrimage are telling, and he throws in a couple of his own.
* Author Avatar, who is likely sending different comics to different universes.
* Author Catchphrase: A phrase not necessarily spoken by a character, but appears several times throughout a novel.
* Author Daniel Cohen has penned a few books detailing urban legends:
* author describes himself and his wife as essentially a real-life Noah/Katie pair. Guess who Noah's crushing on?
* Author Ellen Raskin is making a point. The book was written in the early 1970s, and the Violet Westing story took place about 25 years earlier. Back then, women were
* Author Emile Zola wrote a famous accusation near the end of the 19th century, simply called "J'accuse" ("I Accuse") in which he criticized the French government for condemning Jewish military officer Alfred Dreyfus. Dreyfus was convicted of treason, but as it turned out antisemitism was the real reason-he got made the scapegoat. Zola's written attack was a huge scandal back then and he was prosecuted too, but later he was
* Author Evelyn Waugh was not only given one of these names, his first wife was also named Evelyn.
* Author Filibuster about the repeal of gay marriage in Utah, while being both condescending and insulting, asks how is it a good thing since, y'know, gay people marrying doesn't stop straight ones from doing so?
* Author Filibuster: The plot comes to a screeching halt while Aesop is delivering his moral.
* author for scoring higher than her, which messes up the art style until he's revived as a cyborg.
* author freetalk sections, the author mentions that she wanted to "make a supernatural manga without much of a romantic element".
* author initially) either distrusting him or outright hating him for most of the series.
* Authoritarian and totalitarianism is sometimes used conjectuarlly since their methods are similar to each other (for example the use of oppression, lack of freedom of speech, censorship, forbids individualism) and in some cases (read: CCP) it's pretty accurate.
* Authority, Control discovers that one of the scientists has created an even more elaborate room full of crazy in a ceiling crawlspace, featuring oil paintings of animals and creatures from Area X with printed copies of human faces taped to them. A sleeping bag and other things indicate said scientist actually lives there.

* Authority Equals Asskicking: Being in charge means that you are the best fighter.
* Authority Equals Asskicking: If the setting involves multiple sects, chances are the head of the sect will be one of the top tier fighters in the wulin...or at the very least, the main character will expect a tough fight.
* Authority Equals Asskicking so it's safe to assume that the higher up someone is in an orginizations hirearchy (religious or otherwise) the more likely it is that they can kick your ass.
* Authority Equals Asskicking: The higher a character is in his hierarchy, the better he is in a fight. Why? So it's easy to know who to look out for.
* Authority Equals Asskicking: The higher someone is in a hierarchy, the more badass they would be. Yes, even kings or generals.
* Authority Equals Asskicking the poems he wrote about how very good he was at beating the crap out of lions and elephants.
* Authority Equals Asskicking, you might be less inclined to disagree.
* Authority Equals Asskicking: Your skill in combat is equivalent to your rank in the hierarchy.
* Authority figures aren't above exploiting this trope for propaganda purposes, even if they don't really live up to it.
* Authority in Name Only: An authority figure who doesn't really have any power at all.
* Authority in Name Only: Someone identifies as being some kind of authority figure, but doesn't really have the power to make anyone do as they say.
* Authority story had the team face off against an alien life-form the size of the moon — "the closest thing to God" that had "planted" life millions of years ago. Subverted in that life on the planet didn't develop as it should have, leading to, among others, the rise of humanity.
* authorized the Yamato has, unbeknownst to its crew, played host to the spirit of Queen Starsha's dead sister Astra since the very beginning of its mission, and that's the reason the ship seemed almost alive both to its crew and to its enemies.
* Author Keiichiro Hirano explores a similar idea - that of "dividuals" - in his 2009 near-future science-fiction / political thriller
* author making the battle too large a scale than the budget available.
* author of ''Godzilla on My Mind'', suggests this film as being the turning of Godzilla into an American icon with the cheering he gets along with the MUTO love scene and violence being more overt than the Japanese films.
* Author Patrick O'Brian's Irish ancestry and his move to a Catalan town in his youth show up in the character of Stephen Maturin, as part of the
* Author Phil Foglio gave the response "sure, why not?" to a question about whether
* Author Phobia: The author's own fears come to fruition in their work.
* Author Powers: A character's godlike powers are justified by being the author of the work itself.
* Author Salman Rushdie went into hiding several years ago after a fatwa was declared against him. His location is still unknown, though he makes public appearances.
* Authors and other artists are infamous for this trait everywhere. An anecdote told (probably about more than one author) has him talk with another guy, and all the time he's just talking about his new book. Finally, even he seems to get that he spoke enough, so he turns to the other guy and says: "But enough about me. Tell me something about yourself. — How did you like my new book?"
* Authors, as a rule, tend to know multiple languages, if only to read particular authors in the original language, and there are cases where authors have become famous as English authors despite it not being their first language:
* author's dwarves. The dwarves mine, drink, sing, and fight goblins in their vast underground fortress.
* Author self-insertion characters tend to follow this naming convention (e.g. "Herald Myste," who represents
* author's notes actually said this of supporting characters Admiral Amnell Kree and her flag captain Bronok Zell. The former is a hard-bitten, no-nonsense Dominion

War veteran, whereas the latter is a Cardassian immigrant who takes very little completely seriously. The funny thing is, she requested him.
* Authors of Our Own Fate by Future!Sybil to prevent his rape of Mary.
* Author's Retaliation: A character is made to suffer due to offending the author of their own work.
* Author's Saving Throw after fans and critics reacted negatively to Duke making a similar joke in the original game.
* Author's Saving Throw: Changes are made to the work to appease audience complaints.
* Author's Saving Throw reveals that Hank developed a serum that let him pass for human for short periods. It also clarifies the true nature of his close relationship with Charles Xavier, establishing that he was the only one of Xavier's original students that stayed behind when Xavier shut the school down during the Vietnam War.
* Author's Saving Throw: The creators make changes to the work to appease complaints and criticisms from the audience.
* Author's Saving Throw tragedy. It was supposed to end with Mr Kennedy being Vince's son, but he got suspended the week of the advertised finale.
* Author's Saving Throw vs. retooling the offending element to make it better.
* author that Gabriel and Elderane are homoromantic asexual and their relationship is completely chaste, going no farther than hand holding or cuddling.
* Author Tom Wolfe famously wears identical white suits for all public appearances.
* Author Tract a charismatic leader is that they're all "scrawny weaklings."
* Author Tract in place of the games' billboards and signages, and restricts users of his game modding tools from utilizing his programs for authoring content he deems as offensive or contrary to his ideologies.
* Author Tract is briefly seen selling peanuts for a living. Another work by the same author features Hitler, who immigrated to the U.S. and became a painter/embarrassing dad.
* Author Tract: Most political cartoons will make their ideological bias and intended messages very obvious, though it is theoretically possible to make a cartoon about current events from a (relatively) more objective perspective.
* Author Tracts. When explaining why the future setting of the book uses corporal punishment rather than jail for punishment, a character explains that jails were a place for so-called "juvenile delinquents" to be surrounded by other criminals and learn how to commit far worse crimes than they'd been imprisoned for.
* Author Tract: The story is only there to be a framing device for the Aesop.
* Author Tract: The work is basically a heavy-handed rant expressing the creator's viewpoints.
* Author W.P. Kinsella wrote a fictionalized version of himself (named "Ray") as the protagonist of his novel
* Autism in Media: Works of fiction about autistic people and autism spectrum disorders.
* Autism spectrum disorders can cause extreme sensitivity to sound, and people on the autism spectrum sometimes cover their ears and hum to block out irritating sounds.
* Autistic License. Kudos to any actors with that level of stamina. Unless the variation is just him sitting the entire time, which only hammers the point home.
* autistic people are likely to find it hard to tell jokes in such a way that they are funny (or supposed to be) due to limited, if not absent, social skills.
* Autistic people will sometimes wonder why a friend blows up or ghosts them seemingly out of the blue. They may not have seen the hints the friend was dropping and will end up thinking this friend was doing this deliberately.
* Auto Berserk, screaming out in the middle of battle "I've got MORONS on my team!".
* autobiography features a variant of this. Alcatraz inserts the word "rutabaga" into random places in the narration as part of his general campaign to persuade us that he's an evil person.

* Autobiography of Red, Geryon's older brother insults, undermines, and sexually abuses him.
* Autobiography of Red: In Argentina, Geryon briefly mistakes a tuxedo-clad female tango singer for a man.
* Autobiography of Red. In one, which is closer to the original myth, Herakles kills Geryon. In the other, he seduces him and breaks his heart.
* Autobiography of Red. There are two volcanoes, neither of which erupts (though one of them figures into the climax in another way).
* Autobiography of Red to refer to someone who is incapable of achieving enlightenment.
* Autobot and human relations stay cordial for the second and third movies although strained thanks to the
* Autobot Jazz". "Jazz" cannot easily be trademarked because it is such a generic term.
* Autobots and Decepticons in any given series will last about five minutes.
* Autocannibalism when he accidentally cuts off his finger while attempting to cut a frozen hot dog, then grills said finger and eats it.
* Autochess, introduced a bunch of cute critters called Little Legends which serve as the player avatar in gameplay. One of the Little Legend Featherknights is a Pengu, Runeterra's version of penguins. Pengus also often show up in winter themed skin lines.
* Autochthonia employs a caste system, consisting of Populat (workers), and the Tripartite (threefold ruling caste) of Olgotary (secular administrators), Theomachracy (spiritual and morale maintainers), and the Sodalities (technical experts), with caste being assigned at birth through an assessment based on aptitudes displayed over one's past lives (one nation also has a professional military caste, the Militat). Differs from most, since there's actually a fair degree of social mobility within the actual castes (high ranking Populats can have more authority and privilege than low ranking Tripartites), and many nations incorporate a noteworthy degree of caste mixing; relationships between members of different castes are not uncommon, major social events tend to be shared experiences, and familial kinship (although generally a minor concern) can connect different castes (and, in the one nation that places strong emphasis on family bonds, even the highest-ranking Tripartite can be dominated by their lowly lever-pulling parents). They also have the Lumpen, the lowest caste who are given the most degrading jobs, have few personal rights, and are often victimised by others. Unlike the others, nobody is born to that caste; assignation to it forms the main criminal punishment (for any caste) in Autochthonian society.
* Autochthonia has its own version in the Elemental War (so named because it so devastated the mechanical ecology that it drove thousands of elementals violently mad), which was noteworthy for being an extremely violent, ethnically driven total war in a world where most fighting is skirmishes to steal resources and supply lines.
* Autodale, all of the citizens are white. Justified, in that Autodale's society is based on the idea that humans are only cogs in a machine, and to reinforce that, everyone is made to look practically identical, with identical clothing, hairstyles, and even masks to cover up their faces. Anyone who deviates from the norm is deemed Ugly and executed. And indeed, the sketchbooks of the creator lists "Black" as a trait that gets you branded as Ugly.
* Autodale. Autodale treats its citizens like cogs in a machine, they're there only to work and raise replacements for themselves, so it makes sense that something personal like a first name isn't desired.
* Autodale. In the behind the scenes video, David (the creator) explains that he was unhappy with the Shadow's design until he ditched the duster.
* Autoduel has all three participants in the cover scene having this same regret: the super who thought it was a good idea to lift a car over his head, the driver of the car who decided to take a shot at him with a pistol, and the driver of the other car who decided to ram the super from behind. (They all wind up in a "sandwich".)

* Autoduel series, came with its own miniature car repair set. This set included a very small hammer, wrench, and dangerously enough, Philips and Flathead screwdrivers. The screwdrivers were perfect for disassembling computers.
* Autoduel-styled post-apocalyptic 2030's of road-going car battles. Most cars are electric, but where gas is available at all it costs about $40 a gallon.
* auto-erotic asphyxiation. In his case, he was found hanging in his shower wearing women's lingerie and had scrawled obscenities in lipstick on his body.
* Auto Erotic Assimilation (in their case, their nipple-shape). This is in direct contrast to how they behave when they are under their control, the people they possess living better lives and the planet joining the Federation. When Rick (who is established as the Individualist to their Collectivist) reenters their lives, his short-sighted, hedonist ways prove detrimental to the stable life they built and she dumps him when she realizes this.
* Auto Exchange) are extremely popular amongst both automobile enthusiasts and graphic designers.
* Auto Exchange MERSEY EDITION) had an issue with mostly advertisers from Greater Manchester, with only pages 2-4 and the final pages and back cover being Merseyside / Cheshire advertisers - is this a Limelight Magazine?
* Auto Hunting, the Hunters are not a single monolithic organization. While their joint goal is to protect civilians from monsters coming out of interdimensional fissures, they are grouped into firms, guilds, clans, etc. which are all fiercly protective and territorial where it concerns their hunting grounds. And this is before international politics gets involved.
* Autoimmune disorders are, roughly speaking, where you are allergic to yourself, and they're definitely not fun.
* Auto-Incorrect: A spellchecker, autocorrect, or speech-to-text program messes up user input.
* Auto-Incorrect: Autocorrect or speech-to-text software screws up a statement.
* Auto-Incorrect: Didn't exist before spellcheck, didn't become common until the smartphone revolution.
* Auto-Incorrect: Texts do not convey accurate information because the autocorrect disagreed with the sender.
* Autolycus's career as the King of Thieves began when a crooked merchant named Tarsus murdered his older brother Malacus when Malacus confronted him over being swindled. Autolycus robbed the merchant of everything he owned as payback. In "
* automail at any opportunity to take something apart to figure out how it works.
* Automail can work as a replacement for limbs, but it requires functional nerves to get them to move. In addition, they malfunction under stress and require regular maintenance, so they aren't perfect-and-better replacements.
* Auto Man, Cursor, to create an aircraft and it swiftly catches them both.
* Automan. In the show it's a hologram so it apparently doesn't have to follow the laws of physics. Possibly the only car that could really use inertial dampeners.
* Automan is something different because he's dressed up in sparkly Future Spandex.
* Automan. The difference with him is that with enough power, Automan is able to have a physical presence in the real world that feels real and can interact with physical objects as if he is.
* Automata natural occurring solar flare activity has skyrocketed to the point that planet Earth is now mostly desert and radiation is slowly poisoning organic life.
* Automata; she moves as stiffly as the standard Pilgrim, but with the addition of a comical breast plate and a plastic face that resembles a mannequin's. She is stolen a second time and upgraded with a new biokernel that makes her sentient.
* Automata: Solar flares have decimated the human population of the planet, and are continuing to destroy the world.
* Automated active telemarketing systems take advantage of this. A call is made, and if a certain pattern of silence/sound/silence is detected (that would be a person saying "Hello" or their name and waiting for a reply), the system assumes there's a real person on the line, and the call is automatically switched to a live operator.
* Automated Alice Zenith O'Clock is happy to make up his own "frictional" words to

make his poems rhyme:
* Automated Automobiles, but also being a way to steal taxi driver's jobs, as the many Uber protests show. The controversies surrounding its former CEO Travis Kalanick haven't helped matters.
* Automated Automobiles). It's also hard to talk about self-driving cars without bringing up concerns over the possibility of such a car causing a crash due to a glitch, and arguments over who should be held responsible for the accident in such a situation.
* Automated Automobiles swerve and potentially crash into a wall at fifty miles per hour). The issue naturally raises the idea that a self-driving car must be programmed with the ability to kill in order to protect those it deems more worthy of saving, as cars can cause fatal injury in a crash.
* automated gun turrets, a certain scare chord plays when a turret activates.
* Automated key dispensers with visual displays of the rooms. When a room is paid for, the display goes dark and the key is dropped into a snack-machine style slot.
* Automated: Manually opened doors are near-extinct in the future. Even the most rarely used storage room will have an automated door, or at least a door that opens as soon as you press a button.
* automated suicide booths and vending machines labeled "Refreshing! Crack" are labeled as "Children".
* Automatic activation devices aside each other, creating no lift. Biplane and side-by-side are mere nasty nuisances, but the downplane malfunction is likely to be fatal unless the skydiver a) has enough altitude and b) manages to perform immediately main cutaway. And pray...
* automatically cause your Evil Genius to wander over to laugh maniacally at them - a process which can be exploited by moving them a long distance from the torture chamber, causing the super-agent to just sit there waiting for your arrival before the pain actually commences.
* automatically docks you points on the morality system dictated in the afterlife, mocking the stereotype of Florida being a corrupt and backwards location.
* automatically kind of a backpack on. [Especially embarrassing it is to notice when the backpack in question has no chest and/or leg straps...]
* automatically reported to a GM upon receiving the debuff, as the player would have had to deliberately and willingly break the rules of the game by using an exploit several times to get there.
* Automatically skipping over banner ads before realizing you're reading a text book and all the brightly coloured, highlighted boxes are in fact "important key information" notes.
* "Automatic" by the Brothers Conti is known entirely for being the song that features in
* Automatic food dispensers use "nutrifuel" to build food seemingly from nothing. "Soldier grade meatfuel" is when the dispensers ignore taste in order to increase efficiency; it's great fuel for meat, but the only people who will eat it are soldiers, and even then usually only when explicitly ordered to. More common is "people grade meals," which are prettied up and tastier, but cost more time and nutrifuel to make. They come from the exact same dispenser and are built from the exact same recycled biological material. The hopper is kept out of sight so that no one has to see exactly what goes into the dispenser.
* Automatic for the People on the Hot 100 and both rock charts wasn't "Everybody Hurts" or even the nearly-as-iconic "Man on the Moon", but "Drive".
* automatic is more accurate than the standard flywheel-driven automatic dart blaster revolvers by virtue of having vertical-mounted flywheels rather than horizontal ones. Too bad it's far too noisy for stealth attacks.
* Automatic Lover. She doesn't find the robot very appealing and sings about her desire for a human touch.
* Automatic New Game: If the game can't find a previous save file, it skips the usual choice of "New Game" / "Continue Game" and starts up a new game by default.
* Automatic Number-Plate Recognition capabilities have been built into a few static CCTV cameras in London, which then went on to provide a marvelous

demonstration of why this trope tends to backfire in
* automatic rocket launcher. Back those up with Dreadnoughts, fallen space marines on life support and entombed in armored sarcophagi with mounted autocannons and rocket launchers... really, we could go on all day.
* Automatic Writing: Writing that is done in a trance or otherwise super- or sub-conscious state. Alternatively, the writer may be fully awake or aware but writing a message that is somehow not from their mind.
* Automation, but the game has such detailed modeling of car design that the in-game tutorials are basically just really good educational videos.
* Automatons are entertainment robots that appear to be capable of many tasks, but on close examination are actually repeating the same movements over and over again, until they are turned off and reprogrammed. Newer models can store many minutes of action, so it's not always easy to tell (They
* Automaton Transfusion re-creates the above scene almost exactly, but with a zombie.
* Automatron DLC adds the ability to create robotic companions. Expect to invest a lot of time building the perfect robots, if not a full-blown robot army!
* Automatron pits the citizens of the titular harbor town, the synth colony of Acadia, and the Children of Atom against each other, as well as possibly the Institute or the Brotherhood if the Sole Survivor has allied with one of them.
* Automobile manufacturers will often use a single common chassis with minor changes to styling, features, trim, and tuning to produce cars aimed at different markets or market segments. Something similar happens with buses, where often one manufacturer will build the chassis and another the coachwork with the latter having sometimes estheticak differences within the same model depending of the chassis used.
* Automobiles Are Alien: Aliens don't understand cars and other automobiles.
* Auto Modellista is notable as one of the first auto racing game to use cel shading.
* Automotive antifreeze containing the toxic substance ethylene glycol is usually dyed green.
* Autonomic is a family-friendly podcast that uses an original RPG system and follows a group of middle schoolers with magical powers as they protect the citizens of the world of Respite.
* Autonomous air defense systems have rendered things like drones and ICBMs useless in the future of
* autonomous, an invisible boss that fights by beating on a giant bongo... the list goes on.
* "autonomous sensory meridian response" episodes), etc. And TV shows that show people signing for packages, punching in for work, etc.
* Auton spin-off, is set in the Warehouse where left-over bits of alien technology are sent after each alien invasion is foiled by the Doctor and UNIT. A scientist studying the artifacts inadvertantly reactivates a Nestene control pod, inspiring the Nestene Consciousness to have another go at invading Earth.
* Auton. (The filmmakers were able to negotiate licenses to use Lethbridge-Stewart and the Autons, but not anything directly related to the Doctor himself.) During pre-production, Courtney had to withdraw from the production due to health issues. In his place, the film features an entirely new protagonist named Lockwood, who's arguably more interesting than a reheated Brigadier would have been and went on to feature in two sequels that develop him in directions that would not have been possible with Lethbridge-Stewart.
* Auton when he reappears to the Doctor's shock in "The Pandorica Opens".
* auto-pillock wedged between some storage tanks on a space station, bouncing back and forth endlessly, though collision damage is far less deadly than it was in previous games.
* Autopilot involves the narrator forgetting his daughter in the back seat of his car on a hot day, with predictable results.
* Autopilot starts off with a parent's routine being thrown off...with heartbreakingly disastrous results.

* Autopsy from the third set of After Dark Horrorfest. The Final Girl manages to escape the insane doctor and nurse who had killed all of her friends. It is, however, subverted in the alternate ending where instead of escaping or being killed, she is strapped to a bed with all her organs removed but still functioning to keep the doctor's ailing wife alive.
* Autopsy Room Four. Two doctors about to do an autopsy lean in to kiss, only for their plastic face shields to bang into each other.
* Autopsy's features a man being ripped apart by hooks, with one of them stretching his tongue agonizingly far out of his body.
* Autopsy Snack Time. A similar rule applies to biologists, particularly those who work with dissections, parasites or decomposition.
* Autor, being a Drosselmeyer fanboy, is implied to be like this as well—he finds the powerful ability to
* Autoresolve has serious issues with range, speed, and accuracy, often to the point of straight-up ignoring them. This led to a bug where any ranged unit attacked would be considered able to return fire regardless of range difference, resulting in head-scratching victories where the winning army would lose artillery units and nothing else due to 'return fire' from units that shouldn't be able to reach them. This bug was so subtle it escaped notice for
* Autoresolve is a constant juggling act that never manages to please everybody. While it's routinely tweaked and re balanced to take new updates and patches into account it always seems to favor some units over others, discount the presence or abilities of others, or severely inflate or deflate the value of certain units, meaning it occasionally produces
* Autosave: The game saves automatically at points without the player's input.
* Auto-Scrolling Levels if players are able to move around during these scenarios, just to kill time. Players will also joke around like this when progression is normal, but only if it doesn't disrupt their clear times.
* Autoshop Of Horrors is about a psychotic who, inspired by literature about the ancient Aztecs, begins killing people so that he can eat their eyes, convinced that doing so would eventually imbue him with precognition.
* autotomy where, if they are grabbed by the tail, some or all of the tail will simply detach and wriggle to create a distraction. The lizard may or may not be able to later regenerate the tail, depending on species.
* Auto Trader magazine (North London & East of England, now merged into Central England edition) had mainly North London advertisers (and Marlow, Buckinghamshire) with the East of England advertisers and private ads making few appearances that week in 2010. In fact, only about 10% of the magazine had adverts in East of England (Suffolk, Norfolk, Cambridgeshire, Hertfordshire, Bedfordshire) with North London and Buckinghamshire making up the other 90% of them. It wasn't even promoted as a special issue, but the title's irony wasn't lost on readers.
* Auto-Tune, although it would return to prominence later in the decade by its frequent use by trap artists.
* Auto-Tune it. For a subsequent live performance, lip-sync to the Auto-Tuned track.
* Auto-Tune: Mocked all the time, yet a standard for all pop music since the late '90s. Improvements in the technology make it much easier to do without being obvious to most listeners, but at the same time the retro "robo-voice" sound is frequently used in exaggerated fashion for deliberate stylistic effect.
* Auto-Tune (pitch correction software): mostly in reference to its use as a distortion style.
* Auto-Tune the News Christine O'Donnell's famous "I'm not a witch" campaign ad, they altered part of it into "I'm not a witch, bitch".
* Auto-Tune the News: Steve Buyer warns that lettuce is exactly the same as tobacco, so be careful (and stop regulating tobacco).
* Auto-Tune the News, then combining them with backing vocals, clever editing, and witty lyrics.
* Auto-Tune. This can be handwaved as non-diagetic, especially because an alternate version of the song exists in the story which uses a lush 70s-style soft-pop

production with a dense string arrangement.
* Autotune was first used to correct errors in pitch. Many modern musicians use it to deliberately distort their voice so it's obvious that they're using Autotune, as well as for aesthetic effect, even when they're fully capable of singing themselves.
* Autour d'une cabine features a dirty old man peeping at a young lady as she changes into a swimming suit in a beach hut.
* Autumn Bay appears human at first glance, but closer inspection reveals his non-human nature.
* Autumn Bay are heard chanting "They don't remember...never remember."
* Autumn Bay Felicia Kingsley receives one from "a friend" when she is supposed to meet a contact. It is pinned to a post and has her name on it.
* Autumn Bay has been rebooted from its original, arguably very confusing form.
* Autumn Bay is maintained by this sort of group, known colloquially as "The Shroud".
* Autumn Bay, we have Stephen (mixed race male), Adam (white, male, and gay), and Callie (white female).
* Autumn Blaze than Pinkie Pie. Given that her fellow Kirin decided to stop talking, it's not surprising she'd have a lot to say.
* Autumn has huge binders full of blackmail material. For each and every person she knows.
* Autumn, on the assumption that they will eventually decay past the point of mobility.
* Autumn Visits: Six people find themselves face-to-face with the Envoys, who look just like them. Five of them (Kindness, Knowledge, Art, Strength, and Growth) cooperate with the originals, while the Envoy of Power simply shoots the politician he is duplicating with his own gun and takes his place. When later asked why, he simply replies that, while the other Forces only grow stronger with numbers, Power must be concentrated and never shared.
* auxilia, normal javelins, and cavalry equipped with both javelins and short spears.
* Auxiliary Units deliberately recruited known poachers on the basis that they'd had plenty of practice at sneaking around the countryside in the dark.
* AV15+ on iTunes Australia despite the Australian DVD release carrying an M rating.
* Ava believes she's a 21st century woman and has the memories to prove it. But it turns out that she's in fact a clone manufactured in the 22nd century with false memories.
* Avabel Online to earn the clothing. The three sets include a regular watermelon mask and suit, a gold watermelon mask and suit, and an uncarved red box-shaped watermelon and suit.
* Ava Crescentia was raised by a strict military father who taught her to value professionalism and hard work above all else. Because of this upbringing and her role as the Sunrider’s
* Ava Crowder was abused for years by her husband Bowman until she finally had enough and shot him dead. All the locals knew what was happening and have no real problem with what she did since they feel that Bowman deserved what happened to him. However, when they try to express this sentiment to her she rebukes them because none of them tried to help her when she was abused so their words mean nothing to her. The only one to apologize for his inaction is Bowman's brother Boyd and Ava forgives him after he risks his own life to save her from his father Bo Crowder.
* Avacyn Restored block has an example. Liliana Vess captures Thalia's companions and instructs her to destroy the Helvault (the magical prison housing a great many powerful demons, one of whom Liliana wants to have a word with) or let them die. Surprisingly, she chooses to release the demons. Ultimately, it is a subversion of the trope, since Avacyn, the angel protector of the plane, had also been trapped there, so things end up getting better.
* Avada Kadavra with issues than a straight murderer), which perhaps further

cleared Harry's name in an official capacity. Until Voldemort was properly exposed it would've been down to personal opinion whether he killed Cedric or not.
* Avada Kedavra is a proper Death Ray, which kills a living being without even leaving a burn scar, but breaks statues. Note that side effects such as this seem to be pretty common in the Potter 'verse, at least in the movie versions — every single aggressive spell throws its target through the air, no matter its actual use. Harry is known as the "Boy Who Lived" because he is the only person in the wizarding world to survive this spell.
* Avadon series, each game follows from the ending of the previous where the character remained loyal to the titular organization, rather than rebelling.
* Avadon totters on the edge of the trope without quite falling off, allowing for both humor and heroism in a totalitarian, ends-justify-the-means society that's one broken treaty away from bloody ruin.
* "AV" : "Aerodyne Vehicle" or "Aerial Vehicle"; essentially the universe's equivalent of a
* Ava Gardner; Annette Warren's singing voice was nevertheless dubbed over hers, but Gardner did her own singing on the soundtrack album and in other movies of the 1950s.
* Ava Gardner director Mark Robson by insisting that she do her own stunt work, including dodging blocks of concrete and heavy steel pipes.
* Ava has a scene where the 13-year-old title character and her 18-year-old lover rob people at gunpoint at a nude beach while wearing nothing but twigs around their genital areas.
* Ava has crush on her former friend Maggie. Not only is Maggie straight, she also hates Ava's guts.
* Availability of Prolong is the single biggest quality of life difference between various worlds. For instance, it becomes a plot point that the Kingdom of Manticore is welcomed in an area they annex simply because Prolong had not previously been available there, save to the very rich, but the Manticoran public health system guarantees it to all.
* Available as an augmentation, and superimposed over Denton's vision. It even increases weapon damage.
* Available as a player character professional edge in the RPG adaptation of
* available (Kirk's crew figured out how to do it without too much trouble back in the Original Series, and certainly still remembered how for the fourth movie; but every time Picard or his contemporaries encounter a time warp, it's a huge big deal for them to figure out how to get home), but the Temporal Prime Directive is a law specifically stating that even if you get the chance to time travel, you're not supposed to do it.
* available pet "colors" and thus seems purely aesthetic, as they are still capable of nearly everything that other pets are, from getting jobs to fighting in the Battledome - the only exception being that they, like Mutant pets, have unusual body types and thus can't wear normal clothing.
* Avalanche Express by Colin Forbes involves Western intelligence escorting a defecting Soviet general across Europe on the Orient Express. The Soviet wartime sabotage network along the route is activated to kill him, giving counter-intelligence agencies a unique opportunity to round up these cells in peacetime.
* Avalanche Express will provide sufficient explanation." She snarks that another explanation is that he's misusing his authority for immoral purposes.
* Avalanche, including "Gatorlanche, Horsetapus, Pugslide, Blitzfrog, Swanpedo, Frankensnake Riftbeaver vs. Outer Space Napalmuskrat, Streptococker Spaniel..."
* Avalanche Sharks: Jenna is seen eyeing guys with her friends and acting a bit flirty a few times but has a lot of scenes that could indicate an attraction to girls. She makes a toast to "Girls Gone Wild" at one point (although it's unclear if she was serious, or meant that in a sexual sense if she was), holds hands with Lacy once, spends a lot of time in the hot tub with just two other girls in bikinis (although Lacy simply makes a toast to her "best friends, ever" implying a lack of romantic feelings at least on her part), and shows a clear lack of interest when Randy flirts with her (although this is implied to be because of a crude double

innuendo Randy made).
* Avalanche spends about 75% of the movie setting up the characters before they fall victim to the titular disaster.
* Avalanche unfold over the course of the opening weekend of the resort.
* Avalanche used a variation of this for a T-shirt: "Your village called. They want their cosplayer back."
* A Valar prophet known as Mandos predicted that Morgoth would break out of his imprisonment at some point in the future and instigate the Final Battle, in which he will destroy all of Arda, and it will be rebuilt in a superior image after his final defeat.
* A Valentine's Day commercial parody encouraged guys to "give their special someone - some dumb little thing from CVS"
* A Valley Without Wind, and set up in such a way players make the plot as they go along. It does this by dropping the player into the world without a single clue as to exactly what put it in this state to begin with. The player has to unlock various "mysteries", then seek out secret missions to earn precious scraps of backstory piece by piece.
* A Valley Without Wind takes place on a world that has been shattered across time and then glued together completely at random. You can find frozen fields in a deep ice age right next to middle-age deserts, both sharing a border with world-near-death lava flats.
* A Valley Without Wind, which somehow manage to still immobilize for the same length of time despite instantly exploding on activation. Both types will only snap shut on enemies, ignoring yourself or any allies.
* Avalon activates in Shirou's soul just in time to save him from being destroyed from the inside out. Then it sends [[spoiler:Shirou to Arturia and activates its barrier function just in time to save Saber from the explosion of power from the Beam-O-War between her sword and Mordred's.
* Avalon Code by slamming the book on top of them, whether they're a person, a monster or an inanimate object. You can play mix-and-match with some of their attributes to weaken or strengthen them (making monsters easier or harder to fight) and do other tweaks.
* Avalon Code. Coincidentally or not, this was the original explanation for how Thor from Marvel could fly — you know, back when the writers were insane.
* Avalon Code. If the male player character chooses Georg's daughter Sylphy as a love interest, it can be assumed this trope would apply to their relationship as well, albeit not in-game.
* Avalon Code is that the world is going to end and be reborn. Your homework is to record everything worth keeping or changing.
* Avalon Code, Mayor Georg married the granddaughter of his first love.
* Avalon has a Destiny Spread that grants the character a "1 Point Druidic Secrets Advantage." But Druidic Secrets didn't make it to the printed book.
* Avalon High in the movie adaptation, despite what's depicted, a blocked extra-point kick returned for a defensive touchdown only earns two points, not six (and not even that, except in Texas and Massachusetts—in the other 48, it's an immediate dead ball).
* Avalon High, so the romances in Arthur legend apply to their reincarnations.
* Avalon High: the modern reincarnation of King Arthur becomes a couple with the Lady of the Lake. While he fends off the forces of darkness, she provides him comfort, Excalibur, and meta knowledge about how best to twist their story in this cycle.
* Avalon Hill. Capturing the capital of a minor country puts it immediately under a player's control. If the capital of a major country is captured, that country's player can try to retake it on their next turn. If the attempt fails, the country falls. The Soviet Union is the only exception: they do not surrender if the Axis captures Moscow.
* Avalon Hill in the Manor have been in it for so long that they will die of old age if it happens to them.
* Avalon Hill is 9, the target will instantly age up to 100 months (about 8 1/3

years).
* Avalon Hill magazine Volume 2 #2 article "The Sea of Tears". The Kraken is a sea monster with four long octopoid tentacles that extend from their head. They use them to grab and crush things they want to eat, including ships (to eat their crews).
* Avalon Hill's boardgame "Kremlin" represents the political power struggles within
* Avalon Hill was adjacent to an enemy unit hidden in cover, it could allow another long range unit (such as artillery or self-propelled artillery) to attack the enemy unit even if the long range unit didn't have line of sight to the target.
* Avalon, included mistranslated subtitles, unnecessary added narration and other editorial changes that, for fans of the original, ruined the film.
* Avalon includes a fully immersive computer reality, worlds-within-worlds, and a futuristic, dystopian setting.
* Avalon meant to support 5,000 passengers for four months while they socialize and train for their new lives on Homestead II, after 120 years in hibernation.
* Avalon. She's even able to braid it in no more than eight seconds due to not having it cut for twenty years.
* Avalons Reign is a completely legal drug injected through a needle (a "hypo") that fires off the pleasure center of the user's brain. Some people call it "orgasm in a needle", but others claim the high is much more intense than that. The company that produces it advertises the drug as non-addictive, but this does not appear to be true.
* Avalons Reign is that a portion of the population are sharing dreams.
* Avalons Reign, people can get ocular implants called OSIs that impart this function.
* Avalons Reign runs the corporation Sullivan Detainment, specializing in private prisons. He has no problem ordering the death of a politician who questions his business practices. On a smaller scale, Dirk Chambers, the manager of one of those prisons, is a drug addict who actually arranges for said politician's demise.
* Avalons Reign set in a world where corporations control almost everything and cybernetic augmentation is becoming common.
* Avalon, the legendary sheath of Arthurian myth, is a Noble Phantasm that granted immortality and invincibility to King Artoria Pendragon in her life. As per her legend, she lost it before she died, and for this reason she doesn't have access to Avalon when summoned for the 4th or 5th Holy Grail War. When she finally gets Avalon back in the Fate Route, she's able to
* Avalon, the main character is from Scotland and moves to Canada. Her name is spelled Ceilidh, but pronounced Kay-lee. Hilarity ensues.
* Avalon, the wealthy (compared to the abject poverty of her fellow players) Ash feeds her dog quality food, as contrasted to the gruel that her peers survive on.
* Avalon (they have some magic and some elements explained by more mundane factors).
* Avalon: Web of Magic can see the "magical auras" of people with, well, magic.
* Avalon: Web of Magic, never figuring out the "if something is weird, it's caused by magic" rule.
* Avalon: Web of Magics, she does not see herself as a human that has magic. She sees magic which has, secondary, a human identity...that is rapidly, joyfully eroding in the primeval sea of magic from whence it came.
* Avalon: Web of Magic the worlds and corrupt their inhabitants. However, our protagonists run a refugee camp on Earth, so the narrative is centered there.
* Avalon: Web of Magic three girls, Emily, Adriane, and Kara, find stones/crystals - that come from a fantastical alternate dimension in need of help - that grant them magical abilities.
* Ava Lord is pure evil but was extremely beautiful to the point where
* Ava Moon's escape from jail and implies that any further slip-ups will cost him his badge.
* A vampire actually makes sure to keep all mirrors out of their surroundings to avoid this. Unfortunately for him, this, along with the heavy curtains and slightly

suspicious behavior, causes Cordelia to figure out exactly what he is.
* A vampire can heal lethal damage (swords, etc) at the rate of one Vitae per point. This isn't bad: most vampires can just abduct some random passer-by, drain him dry, and be peachy. It takes three days and only slightly less blood than the average person
* A vampire could deliver a special bite to mark this human as their personal prey...
* A vampire goes to a bar and informs all the monsters there that Buffy is M.I.A., so the town of Sunnydale is largely unprotected. The leader of a demon biker gang thanks him, then casually rips his head off his shoulders with his bare hands, simply because he asks to ride with them and
* A vampire named Sally is able to discern Angua and Carrot's feelings for each other by
* A vampire planeswalker known as Sorin Markov is said to use sangromancy (blood magic), which enables him to drain the lifeforce of other beings, place curses on enemies, and possess the minds of others. It is also implied that he can leech mana from opponents. How exactly he uses blood is not stated. Sorin's grandfather Edgar Markov turned himself and Sorin into the first vampires on the plane of Innistrad using a combination of sangromancy (using
* a vampire. Torg has to choose between joining her and remaining a good guy.
* A Vampyre Story. All of them made some mistake, did something that made Shrowdy realize they were people of their own. All of them can be found in the same pit... what's left of them.
* A Vampyre Story. In a twist, Mona is in complete denial about being a vampire. Of course, while we're at it, Shrowdy's affections are less than wholesome. For a start, Mona's the latest in a long line of girls who have met exactly the same fate, except that all her predecessors got iced as soon as Shrowdy got bored with them. (Mona has lasted the longest of all the girls Shrowdy has thus imprisoned, which is either a very good or very bad sign depending on how you look at it.) Oh, also, this all started when Shrowdy's mother disappeared, and he chooses his victims based on their resemblance to said missing parent. Yeek.
* A Vampyre Story is adamant that, even though she can't go out in the sun, is incredibly cold and clammy, turns into a bat, and lives on a liquid diet in flavors of salt and iron, she's not a vampire. She's just cursed. (Spoiler: She's a vampire.)
* A Vampyre Story, makes a habit of kidnapping young women and then "disposing" of them when he gets bored. By the time the storyline proper rolls around, Mona is but the latest in an ever-growing line of women who have disappeared that way, and on top of that, she's either the woman Shrowdy's been looking for, or due to be axed at any minute, because she's lasted longer than any of her predecessors. Just for added creepy fun, it's very strongly implied that Shrowdy's victims are all chosen because they resemble his missing mother.
* A Vampyre Story: Mona discovers this restriction applies when she tries to enter the house of a man who mistreats his wife. How does she get in? By tricking the wife into inviting her. Mona gets it double-hard; the home in question doubles as a shop for the seamstress wife, which should theoretically at least give Mona a little leeway (for example, with the sign saying, "We're open, please come in!") but she still needs to fool the lady of the house into giving her a verbal invitation.
* A Vampyre Story: Mona hates Shrowdy, the vampire who turned her. Mostly because she didn't actually accept vampirism herself (and for most of the game is in complete denial about it), he just kidnapped her and did it anyway, because he's a creep like that.
* A Vampyre Story: the castle is on the middle of a lake, meaning the only way to from is by boat.
* A Vampyre Story, the heroine Mona de Lafitte lets out a huge belch when, late in the game, she drinks blood from the fat slovenly drunkard Bruno Stoker. She's mortified by the noise she makes, and hastily attributes it to the sheer quantity of booze in Bruno's blood. Must be all the beer he drank.

* A Vampyre Story, while Mona is largely uninterested in romance and just wants to resume her opera career, refusing to accept that she has been turned into an immortal blood-sucker and to generally be terrified of anything.
* a vandal who tore down and burned an American flag belonging to the local VFW post.
* Avan Jogia is also proving to be something of a breakout star, getting a starring role in the ABC drama
* Avantasia: "Half human and it's frightening to just guess the other half."
* Avantasia is a German power metal project. Their biggest hit? The pop ballad "Lost in Space".
* Avantasia Protag AU at the last moment after they exhaust their own attempts to escape while he's not trying.
* Avantasia Protag AU describes them as "sharing a single brain cell which gets passed around between the four of them."
* Avantasia Protag AU is still brilliant, but extremely lazy instead and spends all day sleeping.
* Avantasia Protag AU series. Although since he's a literal demon of sloth and despair, it's not exactly surprising.
* Avantasia Protag AU series are so well acquainted with the local police that they became friends with one. Jim the cop has fatherly feelings towards them and tries to keep them from getting into too much trouble. He also spends time with them off duty sometimes. They even all have his phone number on speed dial. Interestingly, the rest of the force seems to have made Jim their private cop because he's the only one they'll listen to.
* Avantasia Protag AU series. For all sorts of reasons. One or another of the main characters is usually the center everyone else is hugging. If it's Scarecrow, he usually objects but doesn't fight against it very hard.
* Avantasia Protag AU series, the magical world beyond imagination Avantasia has a bit of a mind of its own and for example may shift the location of the gates to its entrance to either make it easier or harder for someone to get in. It also may make food or water conveniently appear to lost souls.
* Avantasia Protag AU series. They tease each other and try to one up each other over silly things, but are friends who won't hesitate to rescue the other if danger appears or work together when the situation calls for it.
* Avantasia Protag AU. There are fun times, dramatic times, and peaceful times.
* Avantasia Protag Au though, his behavior and personality is portrayed positively and these traits sometimes end up saving the day.
* Avantasia? The Scarecrow Saga has tons of these, such as "What Kind of Love" about rejection and "Your Love is Evil". A dominating theme in the trilogy is the inability of the protagonist to find love or acceptance.
* Avantasia. They've put out a metal OPERA, which might as well be written by Tolkien.
* Avantasia, which is the first part of an ambiguous character drama about a self-destructive artist in the albums in "The Wicked Trilogy".
* Avant-garde composer György Ligeti (often heard in the films of
* Avant-garde Music, but even that was still quite melodic and harmonic.
* Avantheim, the only known Phantasma (Exceed rank number two) so far in
* Avant que j'oublie), a 2007 film about an ageing gay man, lover/beloved relationships between older and younger men are the only kind portrayed. Often, the older man feels more attraction and affection for the younger one than vice versa, and the younger man is partly in it to have money left to him.
* A variant appears in this movie, where Buck realizes his niece's boyfriend, Bug, is only interested in sex and sets out to scare him off, constantly talking amiably. It's actually creepy:
* A variant: Capturing an enemy warship intact netted Royal Navy officers a substantial monetary reward in the
* A variant children's game, Kill the Man With the Ball, has one player grab a football or soccer ball and run while everyone tackles and roughs them up until they surrender it by throwing it in the air for the next kid to grab. Rinse and

repeat; there is no score, almost no rules, and usually quite a few bumps and bruises on the way. School administrators ban it immediately, which makes it even more attractive to children. It has some worse names not to be repeated here.
* A variant comes up in another strip. Calvin says that he doesn't feel like going to school for most of the year for various reasons, and concludes that there would be only two days per year he'd feel like attending. They discuss what it would be like if Calvin got his way and only had to attend for those two days, and Hobbes concludes that Calvin would be a very old man by the time he got to second grade.
* A variant: Doflamingo's Birdcage technique is to surround a city-sized area with his impenetrable
* A variant happens between Kyo and Tohru, though he makes the promise through Tohru's
* A variant happens with the first Outriders attempting to break through the force field that surrounds Wakanda. The barrier closes on them partway through their intrusion, cutting them up.
* A variant has been speaking 100 words a minute slower than before the last election, and comparing his speech to that of a puppet.
* A variant has the men who wish for gold and silver die when they hit it, and the man who accidentally wishes for crap survives because it cushions his fall.
* A variant has the parrot say, "Jesus is watching you." Guess what the dog's name is?
* A variant: "I'm not sick, it's just allergies", or "I'm not seriously ill, it's
* A variant in "A Night at the Opera". The villains use a magic makeup to be able to pass through walls. Just as one of them tries to make their escape, Jade splashes him with water and he crashes into a wall.
* A variant in "Goodnight Vince", when Julie, Teddy, Danny and Michael talk about the prospect of traveling to the state championships in Bloomington:
* A variant: in "I Don't Wanna Know Why the Caged Bird Sings," the criminal Dwight's problems seem to stem largely from
* A variant in that scene: the film came out in 1958, when the Polish Communist government banned remembrance of the Uprising and the feats of the Polish Army in the West; the subjects are not outright discussed in the scene, but only alluded to, in order to get it past the censors.
* A variant in the crime "duo" of Scarface (a ventriloquist's dummy) and Arnold "The Ventriloquist" Wesker in
* A variant in the UK is ads for debt write-off services. These claim to be able to write off all debts taken out before 2007, either "thanks to a recent law change" or due to a "government scheme". All of this is lies; the worst that could be done is the debts are found unenforceable on a technicality, which is substantially different from a write off (the debt not being enforceable just means they can't take you to court over it, however you still owe the money and the bank can still mark you as having defaulted). Worse still, judges in cases that have gone to court have seen right through the intentions of people trying these technicalities and turned them down. Oh yeah, and
* A variant involving a secret door into a pyramid appears in an early episode of
* A variant is also used by Hahli, said to Karzahni, who has imprisoned her and her team in the
* A variant is keeping that information from their own management: "We will offer these low prices until our boss catches on" or "While the finance department is on vacation we can offer these low prices" or (for a radio station) "Our boss is away so we can give away these really cool prizes". This requires some
* A variant is Peppermint Patty; she'll get a dumb idea from a complete misunderstanding about something, ignore all common sense advice as she pursues this fixation until she humiliates herself, and typically blames the people who warned her for not stopping her.
* A variant is the one where Peter & Lois decide to have sex in his office.
* A variant is the "sung by movies" meme where various clips from movies are rearranged to have the characters "sing" some song. A user named dondrapersayswhat is the

* A variant is "Weight loss that scares doctors!", which sounds outright worrying.
* A variant is when the performers write their own songs, such as Katrina and the Waves or ABBA.
* A variant: It's not that Phoebe is embarrassed about telling Jason "I love you"; it's that, as a result of her empath powers, she says "I love you
* A variant: "My doctor has the hands of a pianist... in a jar of formaldehyde on his desk."
* A variant occurred once when Jon tried to say "I need Barry to add something" but got interrupted at "I need Barry—." Barry's text at the bottom replied
* A variant occurs in an episode in which Rachel is interviewing for a job at Ralph Lauren. At the end of the interview, the interviewer says goodbye and reaches to open the door for her. As she steps towards the door this inadvertently brings their faces close together and she instinctively pecks him on the cheek. Comic misunderstandings ensue. During a later interview (and after clearing things up about the kiss), she goes in for a handshake when he was actually walking past her, which causes her hand to bump his groin instead.
* A variant occurs in "The Last Roundup" when Applejack thinks she's managed to shake off her pursuing friends behind a long train. Rainbow Dash and Fluttershy simply fly over the train instead.
* A variant occurs in the second book, where the Manticorans introduce advanced technology to the (relatively primitive) planet Grayson, while the Havenites do the same with Grayson's fratricidal sister planet, Masada. Here, the tech gap is much narrower, as the Graysons and Masadans are well ahead of modern Earth, just way behind the Manticorans and Havenites. In the climactic battle, the Masadans have hijacked a Havenite warship that would normally make mincemeat out of the Manticoran ships, but the Masadans don't know how to properly operate it. In later books, the Graysons catch up with the Manticorans, to the point that the Grayson Space Navy is probably the fourth best in the galaxy (and the Andermani and Havenites only win by sheer numbers).
* A variant occurs in "Vanessa". A woman turns up in Schooner Bay with some old love letters from Captain Gregg to her great-great-grandmother, who was also named Vanessa. The captain finds himself falling for her, as he did for her ancestor in the 1840s.
* A variant occurs when Queen Daenerys Targaryen loses her temper at her advisor Jorah Mormont.
* A variant occurs where an office worker complains about the overly sexual music (ie. people moaning over a bass line) played by his extremely
* A variant occurs with sites dedicated to helping those who have been
* A variant of malevolent shipping: Ash and the king of Pokélantis, who takes Ash's form.
* A variant of said parasite, known as the "NE-β Type", appears in
* A variant of the accidental version occurs in "Rip Off." The body of the
* A variant of the card game War is discarding top cards if there are two or four of them (such as the aces of A-A-10-7). Since such
* A variant of the grenade hooked-to-the-door trick shown in the trope picture was very popular during the Utica, N.Y. mob wars of the 1960s-70s. The hitman would pop the car door of the individual he was hired to make go away, jam a grenade under the gas pedal, then flatten a closet hanger, slip the hook under the grenade pin and then (very carefully) twist the bent middle of the hanger around the inside door handle. Opening the door pulled the pin and the grenade went off just as the vic was sitting down, solving da boss's problem with dispatch. It was used with great success several times before people wised up.
* A variant of the joke, when even the options are only implicit: "What is your political opinion?" "Oh, as chance will, exactly the same as the gentleman over there with the tommy gun."
* A variant of the same story is told about Norbert Wiener, the MIT prof who coined the term (and subject) cybernetics.
* A variant of this can be seen in people who grew up in places located at high altitudes. While the gravity is the same, the air is substantially thinner, meaning

that people raised to breathe this air as normal often have heightened stamina when closer to sea level. This is part of the reason why mountainous East Africa (especially
* A variant of this has cropped up in modern cable television: About every half-hour on cable stations, the channel's commercials are pre-empted by the cable company's commercials. If you're lucky, they'll sync up correctly. A little less lucky, and the network's commercials will be interrupted in mid-commercial or the company's commercials will end early so that you can see the tail end of the channel's commercials. Even less lucky than that is when the company's commercials end
* A variant of this is an obvious and yet surprisingly common for newbie Game Masters.
* A variant of this is the basis for one of the side-quests in the Original Campaign of
* A variant of this meme exaggerates this to say that anime or manga featuring pregnancy, parenthood, or babies in any capacity,
* A variant of this occurs in the American Southwest, where scammers would sell off inaccessible desert land. The lots that are sold don't have access to utilities and are not accessible by road in many cases.
* A variant of this occurs in the side mission "Horror Show," when you venture into the basement of the Kingsmouth museum, and run into the janitor: this time, he's facing you directly, but he's kneeling head-down on the floor... and the moment he stands up, it turns out that he's been infected with
* A variant of this phrase "Let's get the facts" was one of Keisha's
* A variant of this song replaces the last two with "a blanket without a thread" (
* A variant of this theme happens with chefs and bakers who work with pizza ovens, or bread-baking ovens where the shelves are spaced closely together and the oven is comparatively deep so that the attendant has to reach deep inside it, even with the handy flat spade to get underneath the pizza tray. It is easy to graze your knuckles on a hot surface whist doing this. The natural reaction when burning the back of your hand on the roof or upper shelf of a hot oven is to snatch it away quickly in the opposite direction. Unfortunately if it's a pizza oven, the floor, or the next shelf down, are inches away — and just as hot. So you then burn the other side of your hand on the floor of the oven and snatch it away in the opposite direction.... Every novice working with this sort of oven does this at least once, to the great amusement of old hands.
* A variant of this trope involves people dying on their own birthdays. Elizabeth of York, wife of
* A variant of this trope is when something becomes so ingrained into your muscle memory, you don't consciously register yourself doing it. As a result, you can't remember whether or not you did something. Forgetting whether or not you washed your hair in the shower tends to be one of the more common ones.
* A variant of this trope: On online dating sites you will sometimes encounter
* A variant of this using a single character, then proceeds to give it a good old
* A variant on the above is a couple lying in bed in their underwear but high as a kite. They try to have sex but are too stoned to do it. The husband just ends up passing out on his wife.
* A variant on this joke has the angel give a single commandment to each people (a different one each time, and just the one the people in front of him won't accept). When the Jews find out that the commandment doesn't cost anything, they reply "We'll take ten of them!"
* A variant, or perhaps a subtrope, is when the bell of a horn (or megaphone, or loudspeaker) expands (sometimes with the neck stretching) as it makes sound. A really unusual
* A variant (photographs taken at the time by a third party, seen after the event) occurs in
* A variant pops up with Angry Jack's Shell Emporium. "Jack is really angry! Don't bring your kids."
* A variant prank is to make enough photocopies of your butt that you can tape

them end to end (so to speak) in a chain. Feed the chain into a scroll-fed fax machine, enter the fax number of someone you don't like, and when one end comes out, tape it to the other end. You are now sending an infinite series of butts to the other end (or at least wasted all their toner). Try not to do this at an office building, though, where they'll discover your prank through the exorbitant phone bill you've racked up in the process. Even if you do this at home, 1. Most fax machines also have caller ID circuitry built right in and will print your number and other condemning messages on the top of the page,
* A variant. Ran thinks that Shinichi has run off to investigate some kind of case, but in truth he's Conan, aged down thanks to plot.
* A variant: Rowena gathers three witches to propose her plans for a "Mega Coven," but all three scornfully refuse and are killed. Rowena then seeks out a pair of more susceptible lower-ranking witches to repeat her proposal to.
* A variant specific to tag team matches, and forming the standard psychology for most of them: The heel team is more skilled at actual tag team wrestling, isolating
* A variant strain of the virus that turns people into vampires transforms humans into loup-garous, mindless
* A variant that is likely an urban myth: when selecting an NCO candidate, the command simply tells the candidates they want a trench 30 feet long, six feet wide, and six inches deep. Of course no one knows why they were given these instructions and everyone complains or has questions. The best candidate is the one who first confirms they have correctly understood what command wants, then immediately yells at the others, "Alright, boys, grab the shovels. Who cares what it's for? Let's knock this out so we can get out of here!"
* A variant that's come up has been the 'weird trick' that enables you to lose weight, gain size in various intimate parts, pay off your credit card bill, banish diseases—and you name it. Newsmax has used this in a radio ad both alleging Obama Social Security cutbacks right around the corner and how to increase your monthly payments by using their 'weird trick'. The 'weird trick' in all instances of this seems to be that now, these adverts are not alleging a cover-up, so much as them accidentally gaining secret knowledge that even the conspirators haven't realized just yet. So in effect, you now have one up on them. Bypassing the target's defenses against claims of cover-up, these ads just say you were lucky enough to stumble upon this.
* A variant: the Hork-Bajir are a peaceful species, but to weaken them as a tool for the Yeerks Alloran decided to genocide them with a Quantum Virus, earning a
* A variant: the Martians' own name for their planet is Ma'aleca'andra, a variant of Malacandra, which is what Martians call their planet in
* A variant: Twitter accounts related to the ad itself. Examples include adding a username to State Farm's famous "Jake from State Farm" ad, and a Little Caesars commercial asking viewers to tweet out their disapproval over the lack of a new pizza they were shilling to a fictional LC employee's Twitter account.
* a variant uniform, these uniforms are called Surface Operation Blacks, and the most recent version has even removed the shoulder flash.
* A variant upon the introduction of Sherlock's brother in Season 2 of
* A variant used is when Max tries repeatedly punching a big guy in the gut, and the opponent confidently withstands it. However, something happens or is done to distract him from bracing himself and Max takes advantage to knock him out with a hard punch.
* A variant version of the "roborats" uses the portion of their brain connected to their whiskers, and the rat's natural tendency to move along a surface they can feel with them. Much like a person running their hand along the wall in the dark. This method allows for an essentially remote-controlled rat by tricking them into something they would do naturally.
* A variant was used when he came close to giving the correct answer but not close enough. The then host, Angus Deayton, said "More precisely?" Paul Merton repeated exactly what he had just said but slower and with much more careful diction.
* A variant: when Garak discovers Odo is suffering the effects of a devastating illness, he opens his mouth to say something, but Odo speaks first, telling him,

"If I don't want pity from the woman I love, Garak, I certainly don't want it from you." Garak then smiles, turns, and leaves.
* A variant where a character's muscle memory affects not himself but the audience: during the Yotsuba arc of
* A variant where the corpse wasn't actually present, but in all other respects, the students and teachers in the backstory to
* A variant with many scald-guard systems; the water will remain the right temperature, but the flow will decrease dramatically, slowing down any rinsing being done. Not painful, but still annoying.
* A variation also occurs in the episode that centers on Reese and Malcolm's
* A variation: Any submarine that sinks an isolated enemy vessel will by necessity end up abandoning the survivors to their fate — a submarine does not have the capability or resources to mount a rescue operation.
* A variation appears in a number of Watch novels. Nobby and Colon are sent on these by Vimes to prevent them from interfering with actual police work but often stumble upon important clues which are vital to solving a case. Also played with in that Colon occasionally sends
* A variation appears on the first half of the "Who Shot Mr. Burns"; on realizing that Mr. Burns has forgotten his name yet again despite all his efforts, Homer takes a deep breath and yells a profanity (starts with an "F", the rest is covered by the sound of an organ playing). It's given exactly the same treatment as this trope.
* A variation appears upon teleporting to a city under siege. You're told that no one has been able to enter or exit using teleportation magic. The player, of course, can come and go as he pleases, though he can't target a location more specific than the point he left the city. This is probably due to this ability being linked to the fact that the main character
* A variation can be done by a crowd slowly taking up a common chant, as in the final scene of
* A variation comes when Skyler panics that Ted is being audited by the IRS and is exasperated at his inability to process that he is facing a prison sentence for cooking his books. However, it's not the tax fraud itself she's worried about; the IRS' extremely high success rates at prosecution are because they have the power to audit and put surveillance on any people who might be connected to the fraud, and even a brief look at her will quickly reveal that she's laundering money, which will lead to
* A variation exists where the last man recommends hanging the thief, the thief is too tall to
* A variation from a different episode where the suggestion was "rejected perfume fragrances":
* A variation from a different sketch: The Swedish Chef's soufflé comes out of the oven so light it actually
* A variation from the legendary Fred Allen/Jack Benny feud: Allen once told Benny, "You couldn't ad-lib a belch at a Hungarian dinner." Benny's reply: "
* A variation goes like that: The third guy is the boss of the other two, and wishes "that those guys are back at work after lunch break!" The Aesop: Let the boss talk first.
* A variation happened to Jenette Goldstein at her audition for the film
* A variation happens after Iron Man/Tony Stark falls victim to an alien virus. In order to revive Tony, Maria Hill has to repair his arc reactor, and has to do so quickly enough so that his heart wouldn't stop. While guiding Maria, Tony passes out before he could point out the last wire to bypass. Maria decides to guess which of two wires she should bypass, and miraculously, Tony regains consciousness after she performs her guess.
* A variation happens in campaign 2 in Episode 92 while Caleb and Yasha have watch together, with Yasha
* A variation happens in one episode: Mr. Burns and another nuclear plant owner pit their plants' baseball teams against each other. Burns suggests a wager. His counterpart offers to bet a million dollars. Burns mocks the wager, and then

realizes what it is. He apologizes and accepts the bet, explaining he thought his opponent would
* A variation happens in the Season 4 flashbacks when Oliver Queen has infiltrated a mercenary group on Lian Yu. He tries to assure the slave workers that he is on their side, but as they've already witnessed Oliver killing one of their own (in self-defense) they are skeptical and insist that Oliver kill one of the other mercenaries as proof. As this is well before Oliver has a
* A variation happens in the short gothic story "The Romance of Certain Old Clothes" by
* A variation happens when Quagmire's father has a sex change and then meets Brian—the only one who doesn't know. He ends up sleeping with Q's father, and later finds out the truth. So does Quagmire, who immediately goes over and kicks Brian's ass. The beat-up Brian gets up and says, "Hey, I fucked your dad."
* A variation happens when Stewie, Brian, and Mort get transported back in time to Poland on the eve of
* A variation has a man surrendering to police, claiming he's Atilla the Hun. He's asked to breathe into a Hunalzyer. Nothing happens, so he's proven to be Alexander the Great as he actually breathed into an Alexander the Greatalyzer.
* A variation has appeared in an ad campaign with the disclaimer "offer not available in Manitoba"
* A variation has the explanation provided by the extremely appreciative wife.
* A variation has the third man arrive, have the task explained to him, and choose death after some consideration. The natives then proceed to execute him in the traditional way, by
* A variation have their lives on the line and the priest knowing Hebrew and being able to correctly answer the question. Since the axeman didn't speak a word of Hebrew, he mistook the priest's answer for an admission of ignorance, and he wound up getting the axe. Either way, the Jews win, everybody goes home, the end.
* A variation; Homer fails at humorous limericks. He tries to disprove this by saying "There once was a man from, I think it was Nantucket. And anyway, he had this interesting characteristic..." At this point he can't remember the rest, and Lenny and Carl just snicker at him. (There is a
* A variation in "A Little Peace and Quiet". Penny has a stopwatch with the power to
* A variation in a long-running Apartments.com campaign with its fictional spokesman Brad Bellflower;
* A variation in another episode. The crew finds a wormhole that allows them to communicate with a Romulan captain back in their home quadrant. While the wormhole is too small to allow a ship to pass through, they are able to teleport people through it. The Romulan captain beams over, only for them to find out that the wormhole connects to the past. They decide that sending everyone through would be a mistake, as they would risk altering the timeline. The Romulan agrees to take messages to Starfleet and their loved ones with him to deliver after the
* A variation in a simulation game's multiple endings are clarified in a later, mostly unrelated real-time tactical game's sequel. The
* A variation in Doppelgangland: Willow storms off after an argument with Buffy and Xander; but Buffy goes after her.
* A variation in "Off With Her Head". Kate has someone tied to a chair for interrogation purposes, but agrees to give him a glass of water. Rather than using it to cut his ropes it turns out he's already got his hands free; he smashes the glass and tries to cut his own throat so he can't be made to talk.
* A variation in one ad that had a mother unpacking a grocery bag and producing a bottle of Listerine, causing all her children to flee from its horrible taste. "Relax," she explains, "it's new Less Intense!" Also, Stridex facial pads ran an ad featuring a teenager staring at the pad in his hand and screaming as he slowly brings it to his face... only to find that it doesn't sting. The announcer explains that they no longer contain alcohol, so customers can get the same acne prevention "without the harsh experience".
* A variation in Season 4, where a guy a few years younger than Sam and Dean shows

up claiming to be John Winchester's son.
* A variation in Season Eight. In "Brothers and Mothers", Eric walked in on his younger brother Michael cuddling with their stepsister Paige and quickly came to the obvious conclusion. Eric was furious as he thought that it would have an adverse effect on the family, especially Karen and Mack's marriage, and the two of them got into a fistfight.
* A variation in "Sightings". Harm notices a puddle on the tarmac and touches it before rubbing it between his fingers. It's aircraft engine oil. Which wouldn't be weird to find at an abandoned military airfield except that it should have dried up long ago unless a plane was there very recently.
* A variation in that Forrest constantly seems to have bloodshot eyes, meaning that it's his sclera that look red while he goes around violently beating people up.
* A variation in "The Dark at the End of the Tunnel", when Frank Castle realises Colonel Schoonover's toolshed has a false wall behind shelving that hides a
* A variation in "The Evil Twin" when Krumitz and Brody make a breakthrough and try to congratulate each other. Krumitz goes for a high five, Brody goes for a fist bump, and they decide to compromise. Averted in "Selfie 2.0" as they exchange side-fives thrice, and then doing a groove upon celebrating running down all the names of the abducted women.
* A variation in "The Great Indoors", a few episodes after Candace and Jeremy became an
* A variation in the Irving Wallace thriller "The R Document.'' With crime so high, Congress is about to ratify the 35th Amendment which would give the FBI and federal officers far more power. However, Attorney General Christopher Collins lears that the FBI Director Vernon Tynan has been falsifying crime reports to create this Amendment. He plans to have the President assassinated and use it as the excuse to invoke the 35th which contains a secret clause he nicknames the "R Document" (as in "reconstruction"). This basically would completely do away with the Bill of Rights and in essence make Tynan the supreme leader of the country over the President or Congress. More chilling To Chris and his allies is the realization that Tynan isn't doing this for power but rather
* A variation in the second episode when Sherlock thinks he's proposing that he and John go on a date, owing to the fact that he
* A variation: in the very first episode, "Yankee White", DiNozzo hides in a body bag as a decoy, while the rest of the gang spirit the real corpse away. Hilarity and severe bruising ensues.
* A variation is Disney's successful line of preteen-oriented novels about the adventures of the teenage
* A variation is done by Light when he puts on a performance for cameras hidden in his room; while pretending to be focused on studying and munching on a bag of chips, he actually writes names in the Death Note that he receives from the news, which is being displayed on a miniature television hidden inside the bag, thereby keeping up his murder rate and casting off (some) suspicion.
* A variation is done in the episode "Our Mrs. Reynolds"; after Saffron shows up on the ship and explains her "marriage" to Mal, he initially laughs it off and insists that there's no way he'd get married until
* A variation is done with the crushed block of metal that used to be a '57 Plymouth in
* A variation is featured in Chapter 2 of the Imperial Agent storyline in
* A variation is practiced in the Southwestern U.S., using scorpions instead of beetles to make the whole thing more dramatic.
* A variation is shown in the episode "A Fridge too Far." The problem is that whenever any of the Loud siblings reserve leftovers, or any other type of food, and clearly state that it's not meant to be shared, the other siblings will happily eat said food without permission.
* A variation is shown in "the King is Dead." After Peter takes over Lois in directing and producing
* A variation is that a woman in a nearby stall keeps asking her what's going on,

thinking that she's watching a movie or something. Princess Carolyn gets concerned for why the woman's been on the toilet for so long, and the woman assures her that she "got up and came back later."
* A variation is the version of the submission man where a wrestler's manager, valet, or friend has to
* A variation is to have the killer send a message saying "Please catch me before I kill more."
* A variation is used by Corcoran in the second episode. He lets his enemies think that he has given up protecting Annie after Haverford's thugs break his leg but when Haverford tries to rape Annie
* A variation is used in the final arc: upon hearing about the bird people coming after Plum,
* A variation, Joey drinks formula, mistaking it for eggnog. Upon being informed it was formula, he didn't care, he just wanted more because it tasted good (though being Joey, it's possible he didn't know what "formula" was).
* A variation — in that it's a historical reenactment rather than planning for an upcoming battle — takes place in
* A variation occurred during the infamous "Punch-up in Piestany", an international hockey competition. In the final match of the round-robin tournament, Team Canada and Team USSR got physical and it eventually turned into a massive bench-clearing brawl (literally; players left the bench to throw down). Eventually, after all efforts to restore order failed, the match was called with no winner. Team Canada got PO'd at that point since that meant they were denied a chance at winning the tournament. When no one agreed with them, Team Canada then decided to invoke the trope and refused to stay for the awards presentation. The tournament officials basically went, "Fine.
* A variation occurred in the middle of a space battle between the Defiant and some Klingon warships, where a civilian transport decloaked and was promptly blown away by Worf, thinking it was an attacker. The episode, "
* A variation occurs, AGAIN involving Chandler, later in the show, with Rachel finding Chandler handcuffed to a chair in her boss' office, whom he's dating. Cue him insisting she uncuff him, and her wondering whether it's worth the risk of her boss knowing she was in there and firing her (he's persuaded to stay when she promises to be "very generous" when her friends ask about this). Chandler later gets revenge by leaving the boss chained up, in her slip, for Rachel to discover.
* A variation occurs between Katherine and Nadia. Katherine did not turn Nadia but
* A variation occurs during Ruby's introductory arc in the anime; when Ruby critically injures Tsukune, Moka is so enraged and grief-stricken at this that Inner Moka actually bypasses the
* A variation occurs in "A DeVille House Divided" when Vice Principal Pangborn unknowingly gets crude pictures of him put on his back by his nephew Morty.
* A variation occurs in a flashback to J.D. and Turk's college days. Turk talks J.D. into going to a party at a black fraternity with J.D. in blackface and himself in whiteface, saying it'll be fine as long as J.D. stays with him. He then conveniently wanders off just as the frat members open the door, making it look like J.D.
* A variation occurs in another episode where Bruno Mannheim finds himself on Apokolips and asks "Where in God's name are we?" to which Kanto replies, "That depends.
* A variation occurs in one of the anime omake: Tousen is seen using binoculars. This would be fine, except
* A variation occurs in the episode "Home Is Where the Heart Stops". Richard Castle is humming a tune when he unexpectedly gets in a fight.
* A variation occurs in the episode "Spin the Bottle", where a spell causes Angel to forget he is a vampire. When he looks in the mirror, he
* A variation occurs in "The Lost Tribe" when Daniel Jackson is about to die after two episodes of sniping with McKay. McKay starts to tell Daniel that he respects him, only to be interrupted by their rescue. When Daniel starts to show his appreciation at the end of the episode, McKay insists he was going to say something

negative, causing Daniel to exclaim "You can only give compliments to the
* A variation occurs in the two-parter "The Tower of Dr. Zolost." The titular doctor develops bombs that, when fired, cause anyone they hit to turn green and become deeply unhappy ("depressed" might be a better term, as they lose all motivation to do
* A variation occurs later in the film, when Col. Vogel and Indy fight atop the tank. Once Indy finally gains the upper hand, he smacks Vogel's head against the turret a few times... then he realizes
* A variation occurs later in the series, where Bulma meets Lord Zuno, the wisest person in the universe, and is granted three questions. She wastes two of them, the first by saying "Only three?!" and the third by asking him to confirm the information she got from her second question. Jaco gets one question and asks what Bulma's bra size is, in order to prove that Zuno is legit; she gets mad at him for squandering the question, but he points out that she's worse because she wasted
* A variation occurs throughout "Pet Sounds", with the kids trying to train Cody to do tricks, but with the show's regular quirky music instead of rock music.
* A variation occurs when a descending flight of stairs appears after Indy's father leans back in a chair.
* A variation occurs when an embarrassed Dorothy is recounting how she hooked up with her ex-husband in a car:
* A variation occurs when Bart gets a fake I.D. and uses it to buy Milhouse, Nelson, and himself some beers at Moe's. Before they drink them, they notice Barney and the other drunks acting like fools, which causes them to push the beers away and leave.
* A variation occurs when (black) protagonist Lemont is told by a little kid that he looks just like "that one guy running for president." Lemont points out that he looks nothing like Barack Obama, and tells the kid that making assumptions like that is racist. The kid replies
* A variation occurs with Mab herself in that no-one asks her for a magical gift, but she is granting it because as Christmas falls in the time of Winter and giving gifts to people is the tradition, she sees it as an obligation she has to a servant. And to say no to Mab would be an injury to her pride and that is never a nice ending. So, she gives
* A variation occurs with Sonic and Amy. Though Sonic is well aware of her feelings, the anguished declaration comes when Amy tearfully admits that she'd spend the rest of her life waiting for him, before falling to her knees and pleading for him to say that he loves her.
* A variation occurs with Tarvek's sister Anevka, given a mechanical new body plugged into life support with what remained of her own. However, Anevka still died, albeit slower than she would have normally, but, as she weakened, the machine itself took on her personality. By the time she was dead, the machine thought she was Anevka and had no idea that anything (such as the death of the real Anekva) had happened, and everyone believed the same, except Tarvek, who knew the truth. The mechanical Anevka eventually became conniving and self-serving, culminating in killing her father after his attempts to restore the Other "almost" killed her. No word yet on whether this cold-hearted behaviour was a result of being a clank or being an accurate copy of a member of the Sturmvoraus family.
* A variation of Death's Thanatos incarnation is the narrator in "Can't Take It With You" by
* A variation of the above is "offer not valid at international airports, Genting Highlands, Labuan Island, Pangkor Island and Langkawi Island", again mostly because of the former two being tourist traps, but Labuan, Langkawi and Pangkor are special exemptions because the entirety of the islands are declared as duty-free trade zones. Meaning that the price of goods in those islands are completely tax-exempt, and the companies don't want the complexities of dealing with the customs when it comes to the offers.
* A variation of the argument for banning the sale of violent games was the insistence that the
* A variation of the Empty Cop Threat comes from the prosecutors' frequent offers

to "take the death penalty off the table" in exchange for information. New York State hasn't executed a prisoner since the 1960s, and the death penalty was declared unconstitutional by the state's highest court in 2004.
* A variation of the mind uploads is immortality. Presumably Type II. Achieving negligible senescence is likely easier than transference of consciousness to a computational substrate, and the task has already been divided into engineering challenges and actively worked on by organizations such as
* A variation of the old "I'm innocent" vs. "You can't prove that" giveaway is used in another episode when the main character sits down three suspects and declares that he's going to have them fingerprinted to see who accessed a certain company computer. Two of the suspects become visibly upset and protest that of course their fingerprints will be on it because it's a public terminal. The third suspect says, "Go ahead. It'll just prove that I'm innocent," which of course immediately arouses suspicion because only the culprit could know that their fingerprints won't be found.
* A variation of the "Vanishing Hitchhiker" urban legend has a young couple pick up a roadside traveler with long dark hair and a beard. After telling them his destination, the man stays silent until the car pulls over—at which point he ominously intones,
* A variation of this appears in "The One That Got Away," in which Blanche reunites with Ham, the one man who didn't want to sleep with her in high school and makes it her sworn duty to seduce him just to maintain her reputation, even though
* A variation of this can be found in the third season. Zuko and Azula are fighting on a blimp when they both fall off. Zuko is then caught mid-air by Katara and the rest of the group on Appa, and he watches as his sister continues to fall without anyone to catch her.
* A variation of this happened in early season 2: Drusilla was introduced as a
* A variation of this happened right after September 11th, 2001 when Al-Qaeda destroyed the twin towers, damaged the Pentagon, and forced down another aircraft. After several more attempts, the United States began to extend surveillance programs, and other agencies got extra funding and jurisdiction. One of the things that spawned from this was the "No-Fly List" used by the TSA. It itself is a largely secretive list of names of people forbidden from boarding any commercial flight in the United States. While it was sound on paper, the problem is that people could be put on that list, never know it, and worse yet, only find out after booking a flight to an expensive destination.
* A variation of this happens between Arthur and Guinevere. In a second season episode, Guinevere is kidnapped by a warlord and held for ransom, mistakenly believed to be King Uther's ward. Arthur goes through hell to get to her, only to find that Lancelot got there first. He'd already admitted his feelings for Guinevere to Merlin on the trip there, and it was fairly obvious that he was planning to share them with Guinevere on rescuing her, only to be silenced at the sight of Gwen and Lancelot being rather chummy with each other.
* A variation of this is "flagship of my heart", a term which which originated in
* A variation of this is in Snow Patrol's music video for "Chocolate". The entire video revolves around people panicking while an hourglass and digital timer count down to 0. When it gets there, everybody huddles down, only for nothing to happen. The singer walks up and flips the hourglass over, which causes the timer to reset and the panic to resume.
* A variation of this is to give them their own unique "gifts" (telepathy, for example) that make them more distinct from their brethren, though all share the same aforementioned set of "normal" vampire powers.
* A variation of this is used in TNA, often as a "Feast or Fired Match". Several of the boxes would contain either direct awarding of championship belts or imminent title shots. One, often, would remove the wrestler from the promotion — and you wouldn't know what was in which box you got until you opened them at a later date.
* A variation of this is what destroyed the career of, and ultimately killed, Soviet gymnast Elena Mukhina, the 1978 All-Around World Champion. A year before the

1980 Moscow Olympics, Mukhina badly broke her leg and it initially healed poorly, resulting in multiple surgeries and an extended recovery time. Once she was healed, her coaches pushed her to get back into shape and get her skills back as quickly as possible, and she was also made to do additional grueling workouts to lose the weight she had gained while she was recovering, which just chewed up more of her energy. It all came apart two weeks before the Olympics when the exhausted Mukhina was unable to generate enough power into a risky skill (one which her coaches had pressured her to do despite her objections) and came up catastrophically short on the landing, breaking her spine and leaving her a quadraplegic. Mukhina never walked again and eventually died of complications from paralysis.
* A variation of this is when a wrestler (almost always a face) is injured days (or even weeks) before the match begins and is clearly not 100%. The heel will then target that particular body part in the hopes of permanently damaging that foe to the point that they can't continue. This happened A LOT with
* A variation of this is why business services and other companies that don't actually sell products to the average joe still pay top dollar for ads that run during the
* A variation of this (it doesn't involve the character's own life) plays an important part of the backstory of Amon Garcia, a secondary antagonist in the second season of
* A variation of this occurs in episode 16 of the first anime season of
* A variation of this. Outside from occasionally directing a Muppet insert,
* A variation of this promotion is still given to drive-thru customers by some of them during the weekday lunch rush. If your food isn't ready within a certain amount of time of your car reaching the pick-up window, you get a coupon for something.
* A variation of this shows up in Mike Resnick's science fiction novel
* A variation of this: the first Earth-like exoplanet to be discovered within its star Goldilocks Zone is named Gliese 581
* A variation of this, "the Furious Army", forms the backbone of Fred Vargas'
* A variation of this trope appears in the fourth season episode "2010", in which the four regulars do actually die, but they are considerably more resistant to the effects of the automatic security weapons than an unnamed extra who dies almost instantly. While they do eventually succumb after dozens of hits, they naturally survive just long enough to accomplish their mission, which is basically to push the
* A variation of this trope in his origin story — standing by idly as the burglar who later would murder Uncle Ben escaped — of course continues to be the driving motivation for Spider-Man himself.
* A variation of this trope is occasionally invoked for hostage rescue; if the suspects have at least one firearm trained on each door or window, the safest way of gaining entry is to take a shaped charge to a wall and attack from an unexpected direction. Naturally, this solution is not employed unless the police or Special Forces team can obtain the building plans, lest they blow a hole in a load-bearing wall.
* A variation of this trope kick-starts the plot of the 1999 Tivola game,
* a variation of this trope's great-grandson Kaidu Khan of the Chagatai Khanate, who would not marry any man who could not best her in traditional Mongol wrestling.)
* A variation of this trope shows up in medicine, but replace "ensign" with "new resident" and the "NCO and the squad" with "nurses".
* A variation of this trope takes place between Katara and Suki while the Gaang is on Ember Island. Suki assumes that Katara is talking about herself, when in fact Katara is asking about Suki's relationship with Sokka.
* A variation of this trope that has nothing to do with death: actors, actresses and fashion models who undertake their first nude and or sexual scenes on camera or pose nude for the first time often report that after a very difficult first time, subsequent occasions become less stressful. A recent example of this is
* A variation of this was done one night when Brain decided to put Pinky in charge

and Pinky suddenly came close to taking over the world. Near the end, Pinky admits all of his plan were bits and pieces of
* A variation on LWT's red, white and blue 'ribbon' logo was used at the start of the interview show
* A variation on the episode where Peggy finds Bobby is a better homemaker and assumes Hank doesn't need her any more. Hank wins her back by inviting her back home and showing her he cooked dinner for her himself, to a very competent degree. Of course, Hank is
* A variation on the theme is the joke where a customer rushes in, places a long and confusing order, says he'll be back for it in ten minutes... and just after he leaves, the clerk, who has a
* A variation on the theme was when Otto thought Homer called him a bum, and he didn't mind that; in fact, he admitted it. However, when Bart pointed out that Homer had
* A variation on the "would you believe" bit is "I did [action] [and it involved] [amazing thing]! Would you believe it? [amazing thing]!" "I find that hard to believe?" "Would you believe [not amazing thing]?".
* A variation on this frequently crops up in licensed roleplaying games: characters from the original canon will be given game statistics built on the presumption that such characters are
* A variation on this in the infamous "shrinking boxers" scene, as Rimmer walks in on Kryten and Lister and entirely misinterprets what's going on. Head tilting ensues.
* A variation on this is created between Gordon Freeman and Alyx Vance in
* A variation on this is used in at least a couple of places, including the mines underneath one of the Mana Forges in Outland and during one of the Harrison Jones quests in Uldum. Dead NPCs that will spawn additional creatures lie on the ground. The ones that will spawn creatures use a different model and are rendered in higher detail than other "background" elements, making it very easy to tell which bodies will spawn mobs.
* A variation on this one is the parrot is owned by a beautiful woman. The parrot says "nice tits, baby" while she's undressing, so she shoves him in the freezer to punish him. When she lets him out, the parrot says "What did the turkey do, ask for a blowjob?"
* A variation on this takes place in the Vocaloid song "The Butterfly, Flower, and Spider" by Hitoshizuku-P. The flower (C), a knight, and the butterfly (A), his childhood friend, are in love, but the spider (B), a prince, catches sight of the butterfly and wants her for himself. The butterfly begs the flower not to let the spider take her away, but the flower, who swore his loyalty to the spider, is unable to save her from the royal's clutches. It is essentially the regular type 12 except the arrows between B and C and between A and B are pointing in the opposite direction.
* A variation on this trope occurs in hospital emergency departments, in which an ambulance crew can radio a hospital dispatcher for "medical control" - asking a hospital-based doctor for instructions on how to manage a critically ill/injured patient while en route. The dispatcher's radio will emit a loud, harsh buzz/honk sound, audible throughout the triage area, when such a call is placed. If the call warrants assembling a resuscitation team, the dispatcher will then issue an overhead page to the rest of the department, indicating what the emergency is (adult or pediatric, medical or trauma) and how long before it arrives.
* A variation on this trope was used when Sydney was pretending to have been psychologically conditioned to turn her into an evil assassin, she was asked to kill somebody to prove herself. She didn't know who the person was or why the enemy wanted him dead, but she
* A variation or inversion of this happens in "Justice League Unlimited" where Hawkgirl has a blunt mace which seems to be able to...cut things like gun turrets in two along a fine line the way a magical sword or supermans laser vision would have but if she hits humanoids it seems to just knock them out cold.
* A variation: prior to same-sex marriage being recognized in the U.S., some same-

sex couples would
* A variation: Saya dresses up as a new student in order to attend class. She still can't resist flirting with Tadashi though. Tadashi immediately sees through her disguise, but Saya doesn't know that...
* A variation shows up anywhere there's monumental architecture of forgotten origins: among countless other examples, the Aztecs held the long-abandoned city-state of Teotihuacan to have been built by the Gods; 19th-century white settlers often attributed Mississippian earthworks to biblical figures, a mythical race of giants, or even God himself; the classical Greeks believed Mycenaean fortifications were created by the cyclopes; and the construction of Stonehenge has been associated at various times with giants, druid sorcerers, Merlin, St. Patrick, and aliens.
* A variation shows up in "Dragonshy", where Fluttershy slips while climbing down a rocky slope, sending her hurtling down into the other ponies in front of her, which sends them all down.
* A variation: Teal'c shows up in Sam's first Atlantis episode to wish her well.
* A variation that doesn't involve food, Garfield tries to use Jon's mouthwash:
* A variation, though with a band rather than a couple: On the panorama that forms the cover of
* A variation: Vimes is adamant that the Ankh-Morpork City Watch are
* A variation was once used by a popular Italian trio of comics, involving a seer.
* A variation when Schlock refers to the company lawyer as having "owned you with his legal-jitsu." Jitsu means art, so it actually is kind of appropriate.
* A variation where the guy goes into the fitting room alone. Five minutes later, the guy comes back and asks "Forget the condoms.
* A variation which features a specific location and country is "Oxford University, England" (the correct term is the formal "University of Oxford").
* A variation: while investigating the death of a millionaire inside his mansion's panic room, one of the CSIs accidentally activates the protocol that seals him inside. While he doesn't use the items in there to escape (his friends call a locksmith to do that), he
* A variation with an inanimate object being described—Pete tells Goofy that the extension cord to the RV is tiny and unnoticeable before ordering PJ to bring it in. PJ enters the room carrying an enormous pile of tubes so heavy he visibly strains under their weight.
* A variation with a treadmill and a sign which read "plot" was used to keep Karn occupied in one strip of
* A variation with Bart sprinting from his home to the school bus to escape a killer dog and convincing himself that he's safe when he gets to his seat, only to be chased right back out by the dog in the seat behind him.
* A variation with Cyclonus, who got to experience Tailgate, who he'd fallen in love with, come very close to dying something like four or five times over the course of MTMTE/Lost Light. Even when it appeared that Tailgate was actually dead, the universe managed to bring him back just to make Cyclonus go through it one more time.
* A variation with Flycatcher: he thinks his continual community service sentences for minor violations are cruel and unusual, but he's the only one who can keep The Woodlands floors clean, and it keeps him from going back to the Homelands to try and save his
* A variation with Greymon happened when Tai first gets his Crest. Tai decided that Agumon needed a huge amount of energy, so he forced him to eat a huge amount of food, leaving him overfull and sluggish. When Etemon set a brainwashed Greymon on them, Agumon was the only one able to fight it, at least partially because the other Digimon had to give up their food for Agumon, and Tai kept pushing him to fight in spite of his disadvantage and the other kids pleading with him to call Agumon back. The kicker comes when Tai deliberately puts himself in danger in order to
* A variation with "Owner of a Lonely Heart". The highest charting version of it in the UK was not the original, but rather a remix of it by British-Canadian DJ Max

Graham, which reached #9 in 2005, outpeaking the original by 19 spots.
* A variation with territory and country listed occurs in the case of "Northwest Territories, Canada." The American writers clearly didn't do their research because a portion of this region didn't enter the Canadian Confederation until 1870 (and the other sections were later divided up into separate provinces and territories over the next few decades), so in 1845, it should've been referred to as "North-Western Territory, British North America." James Howlett and Victor Creed were therefore born as
* A variation would be Herbal Essences shampoo, where apparently the product gives sex to the
* A variation would be saying that a popular musician (or actually anything popular) is part of
* avarice. It also changes its typing from Psychic/Ghost to Psychic/Dark.
* A variety more in line with the video game enemy variety — that is, flames with a face but no limbs — are among the enemies found in
* A variety of Berries can be used to weaken a single super-effective attack hitting a Pokemon. For fighters who have double weakness to a particular type, such as Whiscash, Togedemaru, Heatran or Aurorus, this might be a life saver.
* A variety of characters fill this role for Horne Fisher, the central character of
* A variety of comics that fit into various continuities. The original franchise spawned a bunch, and the 2001 reboot spawned a few, as did 'Rise'. The original film's comics also crossed with
* A variety of different-looking gems seen in the Diamonds' palace in "Together Alone" are collectively credited as "Jade".
* A variety of movies, TV shows, board games, video games, etc. have become the basis for themed casino slot machines since the
* A variety of semi-normal giant spiders: Black Widow (10-foot leg spread), Fiddle (8-foot leg spread), Giant (4-5 feet tall), Red (giant size,
* A variety of skeletons exist, displaying different levels of power and intelligence. They're usually the result of spellcasters using necromancy, but a few have been known to spontaneously awaken in places of evil. Usually. Of course, there are also liches and their variants (archlich, baelnorn, banelich, master lich).
* a variety of specialist ammunition types, allowing them to hurt almost any target.
* a variety of sports equipment: baseball bats, golf clubs, hockey sticks... he even produced a cricket bat in the first movie, prompting Raphael to mock him.
* a variety of styles - including their live-action voice actors! This is especially odd given that 12-year-old Dipper's voice actor, Jason Ritter, was 36 at the time and had a beard.
* A variety of weapons existed in the pre-gunpowder age for dealing with armor-clad soldiers and knights. Many of them were various types of
* A variety of wild forage, including various kinds of fruit, herbs, flowers, and mushrooms, provide buffs when cooked into food that can include instantly restoring stamina, making Link stronger or stealthier, or making him resistant to intense cold, burning heat, and electricity.
* Ava's Demon, and he himself is dogged by an entity that no one but he can see.
* Ava's Demon. At the moment she is born, the demon Wrathia possesses her body and has been bound to her body since then. Because of Wrathia's frustration of being stuck in Ava's body, she frequently controls Ava against her will and gets her in constant trouble. This has ruined any possible friendship for Ava, and her parents are nowhere to be seen.
* Ava's Demon, Ava is given these by Wrathia, which allow her to see haunted hosts and their demons. Through the lens, a pacted host appears as their demon while an unpacted host appears with a pattern associated with their demon that connects to where their demon is. It also shows injuries, such as Odin's bodily scar. At one point, the lens get cracked, causing strange starry fluid to leak from them. Odin gets some in his eye, which reveals that the fluid is responsible for the

supernatural nature of the lens.
* Ava's Demon, Gil is reunited with his former boarding school roommate Gev. While Gil is elated to see him, Gev can't remember him at first and is obviously uninterested when he does.
* Ava's Demon has aliens, interstellar travel, advanced technology, magic, potions, and "demons", which are like ghosts.
* Ava's Demon has taken place in-universe for a little more than a single day, despite starting its publication in 2012, in part due to regular hiatuses due to the author's health and other issues causing a lot of space between updates. By the end of 2019, Ava is no closer to reuniting the other demons than she was when the comic started, and even though she is surrounded by three of them, she only knows about two.
* Ava's Demon is on hiatus until early January so the author can work on its books.
* Ava's Demon: Pedri wears part of his wife's previous husband's skull as a mask in addition to a necklace made of skulls.
* Ava's Demon society with the motto "Failures don't get into paradise." Finally, he hasn't appeared in the current narrative, his appearances are told through very biased people, Wrathia, a brutal alien warlord who wishes to take him down and Gil a meek medic who idealizes him.
* Ava's Demon the TITAN propaganda poster in Gil's ship showing the order of cyborg implants in order to achieve "perfection".
* Ava's Demon was driven off of tumblr by the abuse she received after stating that there were no asexual characters in the comic and refusing aggressive demands that she include some.
* Ava's Demon with the author confirming his orientation, and Ava is as yet a matter of Word Of Bi.
* Ava Sharpe notes that hundreds of futures are blinking out of existence after this attack.
* Ava's rejection ends up driving Kayto into the arms of his chief engineer Chigara, who is technically a civilian, and by
* Avast Antivirus is infamous for its "sandbox" mode that is triggered when you open an executable for the first time. This is meant to help catch malicious software by running it for 15 seconds in an isolated environment. However, not only does it take up time, it can even interfere with the functionality of the file or files that depend on it, or even permanently cripple whatever software you were going to run, forcing a reinstall of it.
* Avast! Anti-Virus makes loud voice notifications. You are listening to a relaxing music with your headphones and then
* A vast fleet of Stannis Baratheon's ships bear down on King's Landing in Season 2's Battle of the Blackwater to put him on the Iron Throne he believes should rightfully be his following his brother Robert's death. The defending Lannisters launch but a single unmanned ship towards them. When it gets close, Ser Davos Seaworth sees a luminous green trail leaking out from behind it. He realizes that the ships are sailing into a vast death trap and jumps ship just before arrows from the mainland ignite an explosion of wildfire, killing
* Avatar. According to the Avatar Wiki, it's also done to conserve consumables like air and food. If the cryonic system fails in mid-flight, the passengers are euthanized so that they don't starve to death.
* Avatar Adventures' has a tendency to do this for incredibly menial things; for example:
* Avatar Adventures. Not actually a scary person (he is an angel after all), but he won't hesitate to kick some ass.
* Avatar Adventures RP, a whole group of heroes get punched all the way from New Mexico to London in a single blow by the 65-year-old ex-superhero/war veteran Commie Buster. As you might have guessed, it's a pretty damn awesome RP.
* Avatar Adventures universe, doubles as the Prime Minister of Canada.
* Avatar against the protagonist after his plans have been completely foiled.
* Avatar: a human soldier is granted control of an alien body to in order to learn their culture, but decides to take up the aliens' cause against human colonialist

ambitions.
* Avatar, all of the Na'vi characters only have one name. They don't seem to understand how human names work, as whenever they address Jake Sully, they pronounce it like one word (Jakesully), with the exception of his love interest Neytiri, who calls him Jake.
* Avatar, and he tries to explain to his teammates that he's on their side now, but they don't believe him.
* Avatar and the Airbending Fellowship of Vampire Slayers of being this. They are clearly insane.
* Avatar: An example of interstellar commerce with STL craft. Pandora is mostly valued for its Phlebotinum Monopoly, though it has an Exotic Alien society and ecosystem.
* Avatar, another Cameron film, were partially inspired by a dream his mother had about a tall blue woman. It seems to run in the family.
* Avatar are a missing link between the four-limbed sapient Na'vi and the rest of the six-limbed Pandoran wildlife. Strangely, their arms are partly fused, having a single shoulder and humerus but bifurcating at the elbow joint.
* Avatar are six-limbed blue nectar-eaters that breathe through opercula on their chests. While technically dubbed "direhorses" by humans, they get called "horses" for short a lot. Admittedly, they do look far more like a horse than anything else, such as the membranous "mane" and non-cloven hooves.
* Avatar arrives). The movie is set decades after first contact though, and initial peaceful relations had more or less completely fallen apart before this story begins.
* Avatar as part of the "Ride the Banshee" mode. The Limited Edition game also has one on the playfield.
* Avatar at the end of Book II. They apparently have a special meteorite that humans used to make televisions, and used it to invent the television.
* Avatar Battle Royale: Beren has he stolen a table (and since TSS takes place on a ship, the tables are nailed to the floor), and Mr. X's wallet. (Mr. X does not have a wallet.) Beren also steals Alana's rapier and uses the art change as a distraction; stealing the fourth wall in order to reveal it to the reader.
* Avatar brings us the Resources Development Administration (RDA), an interstellar mining and transportation firm which swings more meat than most countries.
* Avatar, but Jake and the Na'vi must fight Quaritch and his army to save the day.
* Avatar can be a Frontline Tactician, depending on how much you use them. It's lampshaded in one of the DLC maps:
* Avatar can interface with virtually every large animal and plant on Pandora through a sort of biological 'cable' (which is also present on said other lifeforms) due to their entire ecosystem being a sort of network, while humans back at base control their computers by touching 3D screens.
* Avatar: Colonel Miles Quaritch. After Eywa's intervention turns the tide against him, he escapes from his burning aircraft in his AMP Suit and goes straight for Jake's human body.
* Avatar concerning the alien language (Speak Na'vi), plants and wildlife taxonomy, a scale structure for the alien music, Pandora's physical properties etc. etc.
* Avatar Country, sends the courtier into exile, where he's captured by Avatar Country's enemies and - in a colossal bit of backfiring - is made to switch sides, eventually becoming the leader of their military.
* Avatar describes his long period of stasis as "15 minutes and an asskicking".
* Avatar, each half-human, half-alien Avatar is bound to a particular person's DNA. Jake is only brought along because his twin brother died — and the highly costly Avatar was meant for his twin brother.
* Avatar Earth has become. In the theatrical and original SE cuts, the Earth sequence basically consisted of little more than snippets from a scene that takes place in a morgue (which, with its rows of incinerators, bears greater resemblance to an industrial complex) where Jake, accompanied by a pair of representatives for Parker Selfridge's mining company, pays his last respects to his twin brother Tom.
* Avatar, especially Neytiri, who run around in skimpy outfits. The Na'vi are on

average 10 feet tall and easily dwarf any human.
* Avatar, etc. The extended cut also features sturmbeest, which for all intents and purposes are buffalo (even being hunted by the Na'vi on horseback to further their resemblance to Native American hunters).
* Avatar exist on one Avatar forum relating to how many times each poster has seen the movie. The second even has photos of ticket stubs as proof...
* Avatar for a start, Vlad's cloning, Danny becoming Public Enemy Number One). Many times, the scale fluctuates repeatedly in a single episode, where humor will be placed into an extremely serious episode.
* Avatar franchise, Avalor and its neighboring kingdoms are based on a mishmash of various Latin American countries. Cariza seems to be more based on the Caribbean islands judging by its Afrolatina populace, Cordoba seems to be based on Argentina and Uruguay due to Cordoba's main colors being similar to those two countries as well as Prince Alonso's outfit appearing to be inspired by historical Argentinian/Uruguayan fashion.
* Avatar: Grace looks down at her blood-drenched hands and the bleeding wound in her side. Voice deadpan, she says "This is gonna ruin my whole day." Quaritch also only deigns to acknowledge that his shoulder is on fire once his walker is deployed.
* Avatar has also cited his roles in both shows to be his favorite voice acting roles.
* Avatar has Colonel Quaritch's AMP Suit, which topples over when defeated, and marches in the Premium Limited Edition of the game.
* Avatar has six limbs: two pairs of forelimbs and one of hind. The Na'vi do not; this is explained in-universe by their evolution from the monkey-like creatures Jake sees on his first trip out which also have six limbs, but the forelimbs on each side are joined at the elbow - so, two total upper arms and four total lower arms. Presumably Na'vi arms have two parallel bone structures in them all the way down to the hands.
* Avatar has the Na'vi ride on Banshees, flying dragon-like creatures who form lifelong bonds with their riders. There is also the Toruk, an aerial apex predator ridden only by a mythic warrior of legend, which Jake tames in order to regain the trust of the Na'vi. Later on, in the climax, Neytiri tames a lion-like Thanator and rides it into battle against the human soldiers' mech suits.
* Avatar, hero Jake Sully meets and eventually mates with Neytiri, the daughter of the Chief of the Na'vi tribe. This gets him into some hot water when the rest of the tribe finds out.
* Avatar High is aimed at preteens despite being a high school sim on the Teen Nick website.
* Avatar if the word for "star" (tanhì; pl. sanhì) also was used for the Na'vi bioluminescent freckles, he said sure, why not.
* Avatar is a high-temperature superconductor which does this without needing to be well below freezing like ones currently available on Earth.
* Avatar is a room-temperature superconductor, which makes it absurdly valuable to the humans. To the Na'vi, it's worthless rock.
* Avatar is host to a giant organic computer network comprised of the nervous systems of all flora and fauna on the planet. The resident sapient species, the Na'vi, can link their own nervous systems into this network via a ponytail-like organ, enabling them to store and retrieve information, communicate across great distances, or gain control over nearby wildlife.
* Avatar" is military slang for kilometer, in case you were wondering.) Also normal person slang in Canada.
* Avatar is still the center of humanity but the ecosystem is or has been destroyed and the planet is covered with a towering urban sprawl. Extraterrestrial colonies primarily serve as resource gathering outposts.
* Avatar. It gets out that he picked the wrong person as the Avatar and then let the real one get away which gets the noble class of the Earth Kingdom on his back. In order to get them off his back, he concocts a poison that kills a bunch of people and almost kills his last true ally, Hei-ran (Kuruk's firebending teacher).

The novel goes out of its way to point that while Jianzhu is guilty, his mistakes have piled up on him and are taking their toll on him. By the time he and Kyoshi have their final showdown, he's a complete wreck.
* Avatar it is said that weapons on Earth are far more advanced than weapons used on Pandora, but the latter are far easier and cheaper to produce, especially when you are more than a few lightyears away from Earth. They are still kinetic though, just electromagnetic-based rather than using chemical propulsion (another reason they are limited to Earth's much weaker magnetic field).
* Avatar it's explained Grace opened up a school for the Na'vi and taught them English several years before the film opened. The school was also shut down some time before the film started.
* Avatar: It's only actually seen once, but Jake is considerably shorter than his 2 meter eventual spouse Neytiri, though in all but one scene, he interacts with her through his equally tall Avatar which he eventually permanently uploads into.
* Avatar, Jake, coming out of cryo, asks a med tech "Are we there yet?" The tech assures him "Yeah, we're there, sunshine."
* Avatar, Jake faces down a huge, charging rhino-like titanothere. When it stops and retreats, he thinks he's won, only to have to run from what really scared it off: the bigger and nastier-looking carnivorous thanator that was creeping up behind him.
* Avatar, Jake offers a handshake to Neytiri's father, only for him and his guards to misinterpret it as a hostile gesture and point their weapons at him.
* Avatar, Jake offers his hand to Grace who rudely rebuffs him. Later, he offers his hand to Neytiri's father, but her people are unfamiliar with the gesture and the guards point their weapons at Jake in response.
* Avatar: Jake's speech to the Omatikaya to unite the clans, with Tsu'tey translating for those who don't speak English. The film also implies similar speeches at the other clans, although they aren't heard.
* Avatar, Jake Sully and Grace Augustine are taken captive by the Na'vi. Mo'at releases them on the condition that they save her people.
* Avatar: Jake Sully and his alien catgirlfriend Neytiri get to live happily ever after. The last two humans on the planet (both friends of Jake's, remember) are likely going to starve or suffocate soon, and there's the fact that thousands of Na'vi are now dead (including Neytiri's father and former boyfriend), but at least the love-birds are together, right?
* Avatar, Jake Sully proves himself the leader of the Na'vi by taking, as his personal mount, the biggest, baddest beast in the sky.
* Avatar: Jake Sully's avatar leaps over a waterfall to escape a Pandoran beastie.
* Avatar: Jake Sully was more than happy to completely abandon his crippled human body and permanently transfer his mind into his Avatar body.
* Avatar: Jake Sully, who chooses what's right over what's easy, by siding with the Navi over his own people.
* Avatar Korra in a situation which requires a little more diplomacy and political maneuvering than she’s used to. That’s not to say she shouldn’t use violence — just a little less.
* Avatar Krishna's son. Ironically, Kama had interrupted his meditaton to get the catatonically depressed Shiva to notice and fall in love with Parvati, whom he was ignoring.
* Avatar Kuruk fell in love at first sight with Ummi and apparently never loved again after she was taken to the Spirit World.
* Avatar Kyoshi also had one in her hometown, interestingly... as she was the one who killed the aforementioned Chin, creating Kyoshi Island in the process.
* Avatar Kyoshi breaks her homeland off to keep it safe from Chin the Conqueror, Chin lets out a roar of frustration from the newly-created cliff...which promptly gives way from under his weight.
* Avatar Kyoshi calls this out when Aang tries to say she wasn't responsible for
* Avatar Kyoshi, the previous Earth Kingdom Avatar, was never seen in either show without her kabuki makeup but she towers over Chin the Conquerer when they
* Avatar: Legend of Diamond Tiara: Poor Starlight and Ahuizotl. Both of them find

out Silver Spoon's true nature much too late.
* Avatar-level bending may be justified (or at least plausibly hand-waved); in the Avatar-state, energy is apparently being drawn from elsewhere (presumably skimming from the entire planet).
* Avatar likes to call it, performance captured, which means full body movement including facial muscles and the eyes without any additional animation.
* Avatar — however, he has practically usurped command from Selfridge, his nominal superior, and is only really interested in aiding the RDA's goals because it enables him to continue his personal war with the Na'vi.
* Avatar — if you pay close attention as the ship arrives, you'll see heat sinks glowing red hot. It is also mentioned in the background that the first ISV, needing to use cold superconductors, was over 3 times the size due to the extra thermal load of the cooling systems for the engines, requiring much larger radiators.
* Avatar, most animals on Pandora breathe through spiracles in their chests rather than nostrils and possess six limbs or appendages.
* Avatar. Mulder and Scully argue about old lady that was haunting Skinner in this episode:
* Avatar, Neytiri's father is killed in the attack on Hometree. Sure enough, she gets her revenge using her father's own bow.
* Avatar, Neytiri walks into a window, then feels around it until she finds an opening.
* Avatar. Note that the cycle of Avatar reincarnation corresponds with the ancient Greek order: Air (warm and wet) to Water (cold and wet) to Earth (cold and dry) to Fire (hot and dry) to Air to etc.
* Avatar. Notice the guy on the catwalk whose cap gets blown off by the propwash.
* Avatar of bioluminescence, with larger animals and trees having less, although everything seems to have at least some.
* Avatar of Victory doesn't like people touching his things and screwing up his plans. When Shepard frees the Prothean he's using to spawn Collectors, he throws what amounts to a child's temper tantrum and ups his efforts to kill them.
* Avatar of Victory has the side effect of ripping the user's body apart from the strain. Shepard has done this to herself twice; once when beating down Morinth for tampering with her memories, and again when she rips apart a Phoenix task force after they kidnap her sister. Even Javik, who has had more time and practice to master the Avatar State, ends up pretty mangled when saving Shepard from Reapers.
* Avatar of Victory; whenever it tries to contact Shepard and her team, it always ends with it getting shot and having to repair itself with whatever clutter is nearby.
* Avatar on Pandora; it can afford to be, on account of the lower gravity.
* Avatar Portal's Tera253 has a repeated running gag on whether or not he/she is male or female. Even after the user produced "proof" of their gender, it is still a common running gag that the user plays along with.
* Avatar provides a non-psychic example: Na'vi intimacy includes the physical connection of nervous systems via the partners' queues.
* Avatar rather than military. James Cameron said he essentially invented the modern 'space marine' so if anyone should be allowed to use it it should be him.
* Avatar Roku acts through Aang to drive off a large firebending force.
* Avatar Roku also tried to shoo his dragon Fang away from an erupting volcano,
* Avatar Roku crushed on Ta Min since childhood and immediately sets to work wooing and marrying her after traveling the world without her for twelve years, never showing any interest in anyone else.
* Avatar Roku takes Aang on a spiritual journey, in which Aang learns about Roku's life, and about how strong friendships can transcend spirit and time, but anyone is capable of evil or good. After the revelation, Toph makes a point of asking Aang whether he thinks that friendships can truly transcend lifetimes. It's a thought-provoking philosophical question, but it's mostly also a reference to the fact that some of Toph's development designs (originally a
* Avatar) say that it is an ecological mess, including the quote at the top of the

page.
* Avatar's Banshees revolve around this. Basically, when a hunter is deemed ready, they travel to a nest of Banshees, and try to form a bond with them. They know they've found the right banshee when it tries to kill them. If the hunter succeeds, the Banshee will ride with that hunter and only that hunter for the rest of its life.
* Avatar's destructive mining operations and rather trigger-happy security forces.
* Avatar Selfridge from destroying a Hometree full of Na'vi children by telling him that he doesn't want that kind of blood on his hands. It doesn't work.
* Avatar, set in 2154. Apparently, progress stopped after 2003. This also applies to military uniforms. Apparently, modern military fatigues are still standard 150 years from now, even though, historically, uniforms can change pretty fast.
* Avatar, since it will make Kana 1/4 dragon, 1/4 human and 1/2 Kitsune or Wolfskin, along with their sister Selkie or Velouria. If the Avatar marries the latter two, or a Shigure fathered by one of the former two, Kana will be 1/4 dragon, 1/2 human and 1/4 Kitsune or Wolfskin.
* Avatar, so much so that they once had an entire section dedicated to this trope on the Trivia page.
* Avatar's plot, though humans don't change their bodies, instead remotely controlling eponymous avatars.
* Avatar State, which leads to Sokka knocking him out so the Gaang can leave.
* Avatar's top rival to the throne, as it's widely considered to be Nick's best show.
* Avatar. (Sully still falls in love with a Na'vi in his Avatar form.) The avatars are still different from the Na'vi, being Na'vi/human hybrids. They have smaller eyes and ten fingers and ten toes (the Na'vi have eight of each). Presumably, this is because a human wouldn't know how to function with only four fingers on each hand. Though they seem to have no problem getting used to the tail...
* Avatar: The Abridged Series, Aang describes his own move of freezing himself and Appa in a ball of ice as the "Best. Plan. Ever."
* Avatar: The Abridged Series, Aang takes the extermination of his people and the fact that everyone he grew up with was probably horribly murdered fairly well. Possibly subverted as a few seconds later, when he calls Momo a kitty and gets corrected by his companions, he enters the Avatar State in a rage.
* Avatar: The Abridged Series. "Alright, alright! Enough, with the vining [whining], already!"
* Avatar: The Abridged Series: "And then he beat the crap out of him, yelling about magic arrows and Illuminati or whatever. I'm telling you guys, he's batshit insane."
* Avatar: The Abridged Series, once June spells out that she wants to have sex with him instead of relying on innuendo, his voice deepens, he turns on all the lights by clapping, and produces music from his burning soul.
* Avatar: The Abridged Series: On top of causing massive property damages, the Gaang apparently hits a cat at the end of their mail chute ride in Omashu.
* Avatar: The Abridged Series this episode?" Turns out Iroh taught Zuko how to break the fourth wall.
* Avatar: The Abridged Series to do this if he ever gets caught in a storm.
* Avatar: The Abridged Series, when Chong starts playing the song "Secret Tunnel" about half a season ahead of schedule. He gives the excuse that he's "baked like an apple pie right now, man."
* Avatar: The Abridged Series, when Sokka learns the Mechanist can't get the war balloon to work:
* Avatar, the Bengal tiger was successfully rescued from extinction via cloning.
* Avatar, the characters who stay behind include Jake and the scientists. They all committed to assisting the Na'vi. There would most likely be consequences for returning to Earth, but the film does not spell out what, exactly, the crime they would be charged with. Jake feels otherwise. He joins the Na'vi in the most literal sense.
* Avatar, the earth has been doomed to die from the destruction of its ecosystems

in part to humans' role of contributing to global warming and deforestation. With the earth no longer a suitable home world, this is what influenced the RDA to evacuate humans into space colonization and eventually settling on Pandora.
* Avatar, the gas giant Pandora orbits, and its sibling moons, are prominent in its sky — as is, in one scene, either Alpha Centauri B or the drive flame of an RDA starship.
* Avatar. The human scientists and Jake Sully take on Na'vi form in order to better interact with them.
* Avatar: The Last Airbender – Smoke and Shadow own motivations to help out. Ultimately a weird case of "Girl's heart is somewhat in the right place, but god only knows where the hell the brain's at."
* Avatar: The Last Airbender – The Promise, after someone throws a rock at Sokka, Toph comes to defend him with this:
* Avatar: The Last Airbender – The Promise, but beyond that, there really isn't anything interestingly done with them bar maybe one moment where Katara reflects how their relationship mirrors the multicultural heritage of the colonies over which Aang and Zuko are currently arguing.
* Avatar: The Last Airbender – The Promise has forced Zuko to enforce a slew of distinctive Ozai-like decisions. Cue drama.
* Avatar: The Last Airbender – The Promise introduces Penga, one of Toph's students at the Metalbending Academy. As soon as Penga meets Sokka she is obviously smitten with the adolescent boy. Sokka responds with amusement and kindness, but of course no similar infatuation.
* Avatar: The Last Airbender – The Promise Ozai proves to be a very competent judge of Kuei's character during the Fire Nation colony crisis, and gives Zuko sound advice that basically boils down to "whatever you do, have the conviction to back it up".
* Avatar: The Last Airbender – The Promise shows that they survived.
* Avatar: The Last Airbender – The Promise. The members later apologized, saying they never meant to insult him or his culture.
* Avatar: The Last Airbender – The Rift daughter was a quiet, obedient girl, and not the ungrateful brat he feels she has become. His claim to have no family also fits when we find out he and Toph's mother separated due to the stress of her disappearance. Thankfully, their issues are resolved by the end of the story.
* Avatar: The Last Airbender – The Rift, General Old Iron and Lady Tienhai were friends until General Old Iron tried to kill the humans.
* Avatar: The Last Airbender – The Rift They can assume physical bodies in the physical world which makes them mortal, sort of, but even then if they are killed they change forms. The Lady Tienhai fell in love with a human and changed so she could be with him, and upon dying became a flock of birds, still able to resume her old shape but apparently content to watch.
* Avatar: The Last Airbender – The Search cheapening his character and the families tragedy by revealing he never actually loved them.
* Avatar: The Last Airbender – The Search is in some way, shape or form, a ploy by her mother to kill her before Azula can get to her first. Azula uses this belief as a means of latching onto some semblance of sanity and to keep her focused, as readers who watched the series before knows that Azula's been long broke-brained.
* Avatar: The Last Airbender – The Search is offered a much less attractive face by the Mother of Faces to test her sincerity; she accepts the new identity because she's on the run.
* Avatar: The Last Airbender – The Search: The Mother of Faces has an aura that makes forest creatures have human faces.
* Avatar: The Last Airbender – The Search. When Azula is captured, she suddenly looks very scared into Sokka's direction. He of course thinks she finally understood the force of mighty Mr. Boomerang, but it's actually a huge wolf spirit that escaped from the spirit world.
* Avatar: The Last Airbender – The Search, Zuko thinks to bring tea to Azula and Ozai to try to facilitate a conversation between the two of them. However, Zuko

completely forgets that his sister is still in a straitjacket. Azula calls him out on this, presuming that he wanted her to lap the tea out of the cup like a dog.
* Avatar: The Last Airbender: Aang aims for this. He has faltered (especially when Appa and Katara were endangered), but in the end, he achieves this.
* Avatar: The Last Airbender, Aang and friends infiltrate a Fire Nation temple and are confronted by a group of Sages who are loyal to the Fire Lord. However, one of them, Shyu, is still loyal to the Avatar and helps them on their mission. After they manage to escape, Commander Zhao angrily arrests all five Sages, despite the Head Sage's protests that only Shyu helped the Avatar.
* Avatar: The Last Airbender: Aang and Sokka act like this briefly in the episode "The City of Walls and Secrets", as they are trying (and failing) to behave like high society folk. In the end they bash their heads together from a contest to see who could bow better and end up on the ground with a headache. Aang ends up under the curtain he was using as a robe. Toph says the two would be lucky to pass as busboys.
* Avatar: The Last Airbender, Aang and the inhabitants of the Northern Air Temple defeat a vastly more powerful Fire Nation army by having complete domination of the skies. They manage to rout the whole force using no ground troops at all.
* Avatar: The Last Airbender Aang buys a bison whistle that Appa, his flying bison, hears and comes to.
* Avatar: The Last Airbender; Aang did have to bend his knees to support her.
* Avatar: The Last Airbender; Aang dutifully spends the series falling head-over-heels for her.
* Avatar: The Last Airbender, Aang gets his tongue frozen to his glider. Since he appears in the next scene not attached to the glider, he presumably detached himself.
* Avatar: The Last Airbender: Aang gets waterbending scrolls, Katara gets a vial of water from the Spirit Oasis, Sokka gets... a hearty pat on the back.
* Avatar: The Last Airbender, Aang goes through this phase in the episode "The Storm".
* Avatar: The Last Airbender. Aang had a blatant crush on Katara from the first episode, while Katara was generally too focused on the ongoing war to figure out her feelings on the matter, not even realizing Aang liked her in that manner until the final season. Katara would only allow herself to return Aang's affections in the final episode.
* Avatar: The Last Airbender", Aang had his first encounter with Azula on the construction site of Fire Lord Ozai's statue on the capture city of Omashu. It was originally a trade deal for the captured King Bumi for Mai's little brother, until the deal was called off and fighting ensued.
* Avatar: The Last Airbender, Aang is capable of picking up waterbending much faster than Katara. However, she quickly surpasses him in waterbending skills because he would rather play around than focus. The lazy aspect later becomes an issue when he's learning earthbending because as an airbender his instincts go entirely against what he's learning, leaving him unable to make any progress. He quickly becomes discouraged and it's not until Sokka's life is in danger that he can finally work through his mental block and learn to stand his ground against a problem instead of just dodging it as an airbender would.
* Avatar: The Last Airbender, Aang is so freaked out about fighting the Fire Lord, he trains non-stop for several days, neglecting to sleep. As a result of sleep deprivation, he has vivid hallucinations, both visual and auditory — pets start talking and sword-fighting, sheep cheer for the fighting pets, and rocks dance.
* Avatar: The Last Airbender" Aang is surprised by a soldier, causing two white flashes next to him and a clear blinking sound.
* Avatar: The Last Airbender Aang is typically bald (shaving one's hair is part of the Air Nomad culture) and has a distinctive tattoo of an arrow down his scalp. He spends the downtime between seasons two and three in a coma, where his hair grows in naturally (it's brown). After he's convinced to conceal his status as the Avatar in order to move freely through enemy territory, he continues allowing his hair to

grow.
* Avatar: The Last Airbender Aang, Katara and Sokka are accused of being this.
* Avatar: The Last Airbender, Aang lives in denial and it's the only thing protecting him from the same fate. The only two well-adjusted characters in the main cast seem to be Toph and Sokka, but considering the theme of this fic, their issues are yet to be shown.
* Avatar: The Last Airbender, Aang's blue arrow or the symbols for the four elements.
* Avatar: The Last Airbender, Aang's friends make a fluffy bed for him, which he loudly interprets as "a bed made of clouds" and another hallucination, and gets chewed out, before thudding.
* Avatar: The Last Airbender": Aang slams his head on a balcony banister after being a little too forward with Katara about his feelings.
* Avatar: The Last Airbender, Aang uses "monkey feathers" in a context that implies it's the equivalent of "motherfucker".
* Avatar: The Last Airbender: Aang was warned of the impending doom, but he didn't think it would get so bad. While Aang is frozen the Fire Nation wipes out his people (the Air Nomads) and conquers most of the world. Fire Nation culture changes to be brutal, nationalistic, prejudiced and joyless, but Aang plans to change that when he defeats the Fire Lord.
* Avatar: The Last Airbender, a bathing Katara swims by Toph and Sokka just as they are talking about her. This may or may not have been deliberately engineered by Sokka in order to get the girls stop fighting.
* Avatar: The Last Airbender, a blind girl who can sense vibrations through earth (as well as having pretty good hearing), pulls this when Katara denies having feelings for Jet.
* Avatar: The Last Airbender abound; one episode took place on a farm with pig-chicken hybrids.
* Avatar: The Last Airbender, a bunch of these in a row were used to great effect in Book 1, Chapter 10. This is also how a fight between Azula and Suki ended, with Suki's fate not discovered until next season.
* Avatar: The Last Airbender. A century-long world war, in which few people in the series aren't involved in, will do this to people.
* Avatar: The Last Airbender, actually stated that the reason he screwed with Aang so much is "Mostly because it's fun messing with people!"
* Avatar: The Last Airbender after only being around for three episodes.
* Avatar: The Last Airbender after the latter flew into their house to get food.
* Avatar: The Last Airbender after three seasons of handwringing and denial.
* Avatar: The Last Airbender against the Earth Kingdom, understanding they follow who looks most powerful.
* Avatar: The Last Airbender" agrees. It doesn't end well for Long Feng.
* Avatar: The Last Airbender, a huge burly man who uses a roaring shout to find his way around, but she loves this all the more.
* Avatar: The Last Airbender, Airbending can be seen as visible gusts. Given how people normally can't see air, this is done to give scenes a little extra flair. And to avoid having a character look like a dork throwing their arms around without some sort of visual to show that they are doing something.
* Avatar: The Last Airbender. A little different since the Avatar State isn't evil but rather an implacable force of nature.
* Avatar: The Last Airbender, along with several other villains, including Long Feng and Combustion Man.
* Avatar: The Last Airbender. Also, Momo's role is usually to lighten things up.
* Avatar: The Last Airbender. Also not a normal example, since Pakku presumably never knew the "rival" (Katara and Sokka's grandfather, who was apparently from the Southern Tribe).
* Avatar: The Last Airbender also released on Netflix a few months later with a similar boom.
* Avatar: The Last Airbender also shows this attitude when she wants to save a village from a Fire Nation troop (whose factory polluting the river is destroyed by

her).
* Avatar: The Last Airbender among the fans who gets easily taken down by popular benders like The Boulder while the fans cheer on his defeat.
* Avatar: The Last Airbender. An ancient, abandoned city is in pretty good shape, but then it turns out the inhabitants still live there, just in hiding. No proofing, just actual upkeep.
* Avatar: The Last Airbender and Aang's final decision against the Fire Lord.
* Avatar: The Last Airbender and, along with most of the characters being Asian, many of the lead characters are particularly dark skinned. Despite this, it is has become incredibly popular.
* Avatar: The Last Airbender. And before Azula and Zuko got into the action, their cousin Lu Ten (Iroh's son) served in the Fire Nation's army.
* Avatar: The Last Airbender and blasts the door out of the way on the 'two bits' with metalbending.
* Avatar: The Last Airbender, and create spirit seals that last for ten thousand years.
* Avatar: The Last Airbender and didn't learn of the mythology until long afterward.
* Avatar: The Last Airbender and discovers that he is, in fact, the sole survivor of the Fire Nation's act of genocide.
* Avatar: The Last Airbender and ends up encountering a violent blizzard. Zuko shelters then in a cave. Meanwhile, Katara, Sokka, Yue, Momo, and Appa are looking for them. Aang later regains consciousness and the Gaang eventually finds them.
* Avatar: The Last Airbender. And even then, the Avatar Spirit (Raava) dying seems unlikely.
* Avatar: The Last Airbender and got along badly with Iroh, from whom he usurped the throne, as he obviously wasn't a baby when he did that. Complicating the issue further is that Iroh had a son, Lu Ten, whom we only see as a portrait but looks to be in his late teens at bare minimum (possibly his twenties) at a time when Zuko, Ozai's son, was eleven.
* Avatar: The Last Airbender, and his order to them is to keep dropping rocks on a target far below—keep dropping rocks even after hours have shown that it has no effect. This is consistent across the series as a weakness of earthbenders, as a whole—they lack the imagination of water-or-airbenders, they're bad at changing their strategies, and they're stubborn as... well... as rocks.
* Avatar: The Last Airbender and his weapons to bring down his enemies. He's also very resourceful and a fast learner — see 'Sokka's Master' and how quickly he picks up swordsmanship having not been shown to have any prior experience in that particular weapon. He has, also, grown up in a tribe which relied on non-bending forms of combat for decades and picked up a lot on his own before being formally trained. That would have helped a lot when he met Piandao.
* Avatar: The Last Airbender and in the present basically nonexistent.
* Avatar: The Last Airbender, and other countries have dark pasts too).
* Avatar: The Last Airbender and received mental help, and she would've become the dorky variant of this trope (i.e. randomly spouting out how she feels).
* Avatar: The Last Airbender) and run the gamut of skin colours from pale (some Fire Nation and Earth Kingdom people and most Air Benders) to all shades of brown (the rest of the Earth Kingdom and Fire Nation and all Water Tribe members).
* Avatar: The Last Airbender and take him out with the all-powerful Avatar State, however he soon learns without control of this state he could easily hurt those around him and decides to take the traditional way by learning the bending arts first.
* Avatar: The Last Airbender, and the creators planned this out from the beginning of the series.
* Avatar: The Last Airbender, and the death did occur during a week-long blizzard.
* Avatar: The Last Airbender. And the worst part is that he's more than capable of doing that.
* Avatar: The Last Airbender And to show he hasn't learned his lesson, Iroh brings out some berries that may cure him or make him blind. Zuko insists they find a

doctor instead.
* Avatar: The Last Airbender, and Zuko lampshades it by telling his mother that he doesn't even know what it would mean for Azula to be happy.
* Avatar: The Last Airbender announced a live-action version of the series with show creators DiMartino and Konietzko as executive producers until they backed out of the project.
* Avatar: The Last Airbender, an production studio that will focus solely on Avatar media.
* Avatar: The Last Airbender, anytime Aang is in danger or this, it results in him transforming into the Avatar State.
* Avatar: The Last Airbender: a pan up from Zhao's command ship to the fleet he intends to destroy the Northern Water Tribe with. Also, the airship fleet in the grand finale.
* Avatar: The Last Airbender Appa is the last of his species, who were the original Airbenders. Aang's even referred to as a "Living relic" by Professor Zei in "The Library".
* Avatar: The Last Airbender. Apparently, this is a genetic trait: later, in season two, Sokka gets a little... intense while cheering and booing during the earthbending tournament.
* Avatar: The Last Airbender, are an important part of every army. Not only are they often at the forefront in every battle, but they perform important support tasks: waterbenders can heal wounded, earthbenders quickly build walls, trenches and fortifications, and firebenders drive much of the technology of the fire nation, like its steam tanks.
* Avatar: The Last Airbender are generally pretty plausible, but Asami's airship is as magnificent as it is impossible. It looks like the offspring of a blimp and a skyscraper, being mostly made of glass and metal and featuring an excessively huge and lavishly-decorated bridge. Eight comparatively small propellers attached to the back half of the ship (via huge and ornate metal frames) supposedly keep the monster airborne.
* Avatar: The Last Airbender are living legends, most notably Zuko, who became famous for his help in founding the United Republics, and Toph, who became famous for inventing metalbending and had many statues constructed in her honor. Bolin, one of the main characters, will usually also react as if he is standing in front of a legend. A less notable example is Katara, who despite being the wife of Avatar Aang, seemingly didn't get the same fame as the rest of the original cast; however in "The Spirit of Competition" Korra mentions Katara while healing Bolin, suggesting that most people at least know who she is.
* Avatar: The Last Airbender are very clear, making the eventual discovery that he is just as handsome as Zuko would have been without the scar that much more surprising.
* Avatar: The Last Airbender, Arnook, the chief of the Northern Water Tribe gives his entire civilization the option of fighting or not before the Fire Nation attack in the Siege of the North.
* Avatar: The Last Airbender as a female prison guard because she was such a fan of the series.
* Avatar: The Last Airbender as chi manipulation, but benders don't seem to be using nearly enough energy to do what they do, even assuming the human body contained enough energy for some of the Avatar-level bending, though it's never really stated how much energy the chi itself actually contains. This is especially obvious with waterbenders, who can change the state of large amounts of water from solid to liquid to gas and back again.
* Avatar: The Last Airbender as he tries to lead a massive group of wild animals outside of the city.
* Avatar: The Last Airbender. Aside from some mild survivor's guilt, Aang takes everything in stride.
* Avatar: The Last Airbender as in "darker, mature tone with more romance, sex, and blood", however a lot of fans have questioned the accuracy of the article due to the fact that neither the creators nor Netflix haven given any actual reason for

the latter's departures, so it's very likely that the actual reason behind their departures aren't the ones explained in the article.
* Avatar: The Last Airbender, as most of the graphic novel content was actually written by Gene Yang.
* Avatar: The Last Airbender as one of the professional earthbenders that Toph beats in "The Blind Bandit."
* Avatar: The Last Airbender as the title character's first line: "I need to ask you something... will you go penguin sledding with me?" He gets to do it not long after, but at the time there was no reason to say it.
* Avatar: The Last Airbender a three-way brawl between pirates, the Fire Nation, and Team Avatar occurs in a literal ball of smoke, as an excuse for frequent gags of this sort.
* Avatar: The Last Airbender. At the end when Zuko and Iroh manage to fight them off, Zuko request once again for Iroh to get dressed.
* Avatar: The Last Airbender, at which point he gets too embarrassed to fight and flees. Until he finally turns the tables:
* Avatar: The Last Airbender: Avatar Roku, Aang's predecessor as Avatar, died when he received a faceful of toxic volcanic gas.
* Avatar: The Last Airbender. Avatar Wan could also fall under this: after not eating for days he finds a Catdeer caught in a net; instead of eating it he rescues it from a group of hunters. This Catdeer resultingly becomes his loyal companion Mula. Wan was devoted to protecting all life, as when Raava and Vaatu were fighting he wanted them to stop due then endangering the lives of animals and spirits.
* Avatar: The Last Airbender avert this constantly. Both shows have many examples of benders using machinery and other devices alongside their bending to help them fight. Many machines can only be operated with bending, and new bending techniques can often result in new technologies. Even opening the spirit portals results in new, abet very dangerous forms of tech as spirit energy is extracted and studied.
* Avatar: The Last Airbender Azula does not seem to have had this though, since everyone who comes across her is immediately terrified of her.
* Avatar: The Last Airbender: Azula is almost always seen wearing makeup, and definitely evil. The only times the heroines wear make up is infiltrating a party and during a spa day.
* Avatar: The Last Airbender. Azula literally has no idea how to socialize normally without manipulation and has no idea how to turn off the commander mentality. It is equal parts hilarious, painful to watch and upon rewatch on finishing the series, somewhat sad.
* Avatar: The Last Airbender, Azula's "surrender" is immediately followed by her attacking one of her opponents and making a successful getaway in the ensuing confusion. All she needed was for Iroh to glance at Toph, and she takes advantage of it.
* Avatar: The Last Airbender: Azula, the Fire Nation princess, brings back Dai Li agents from the Earth Kingdom and they serve as her own personal elite squad of guards. This ends up being particularly useful to her during the eclipse: the eclipse may turn off Firebending, severely limiting a Firebender's ability to fight, but the Dai Li are Earthbenders, and thus are unaffected.
* Avatar: The Last Airbender bears great resemblance to a real-life railway cannon, and is referred to as such. Given the nature of the series overall, where almost anyone can manipulate elements into lethal ranged weapons at will, the concept of a firearm is a bit...redundant. Most "cannons" seen in both series are more channeling devices for benders than true independent weapons.
* Avatar: The Last Airbender before dying. And although we don't see the actual death, Kya- Katara and Sokka's mother- also gets quite a dramatic one as we see her sacrifice herself for her child.
* Avatar: The Last Airbender before placing them on the front lines of an assault unarmed, causing their own comrades to unknowingly slaughter them, believing that they're the enemy.
* Avatar: The Last Airbender: being a good bender more or less requires being a good martial artist; but the effectiveness of this fighting style is dependent on

the ability to bend an element, as standing ten feet away from your opponent and waving your arms around is not a viable fighting style unless magic is involved. This trope is both played straight and subverted.
* Avatar: The Last Airbender) believe this to be part of the duty of the Avatar.
* Avatar: The Last Airbender: Bending. Lampshaded in the very first episode:
* Avatar: The Last Airbender (bloodbending), and earthbenders' abilities can extend to sandbending, metalbending, or lavabending. There's also energybending, the manipulation of life energy that all the others developed from.
* Avatar: The Last Airbender, bloodbending is a forbidden subset of waterbending that allows talented waterbenders to bend the blood of a person, controlling them like puppets.
* Avatar: The Last Airbender books 2 and 3, Katara is said to have stayed by Aang's side the entire time he was unconscious.
* Avatar: The Last Airbender. Both couples even manage to sneak in some late-night trysts.
* Avatar: The Last Airbender, but appears in the Spirit World in Seasons 2 and 3 of the latter show with Baldwin still doing his voice.
* Avatar: The Last Airbender, but by far the ugliest part of the scar "just happens" to be under his hair when he grows it out during his quest for redemption.
* Avatar: The Last Airbender but it's not like she was a nice person to begin with either. Also, Princess Azula was the fourth in a family of psychos, and her (male) predecessors were all evil too.
* Avatar: The Last Airbender, but not much of a Black Sheep, at least not until he specifically rejected his father.
* Avatar: The Last Airbender, but she breaks through to him and is allowed to take the classes, doing so well that he designates her as a Master in record time.
* Avatar: The Last Airbender, but she cares very deeply for Zuko and it is only around him that her emotions become visible. The comics which take place after the events of the series show that she has also developed a soft spot for her little brother Tom-Tom, greatly contrasting her shameless apathy towards his kidnapping at the beginning of Season 2.
* Avatar: The Last Airbender, but since the heroes are the Fire Nation's biggest foes, they find it highly uncomfortable to see themselves dying while the audience applauds.
* Avatar: The Last Airbender, but the cartoon is still held in higher regard.
* Avatar: The Last Airbender, but there's a lot of crossover between the two fandoms, and most of those who aren't fans of both are still pretty cool with the other show.
* Avatar: The Last Airbender by hand, but the design turned out to be so complex that CG had to be brought in.
* Avatar: The Last Airbender by that point, and she's only 12 when we meet her.
* Avatar: The Last Airbender (by umekograsshopper) is a clip-show of blunt trauma that provides the only logical reason for Zuko's choice in the finale: brain damage.
* Avatar: The Last Airbender by various characters who all know more than we do.
* Avatar: The Last Airbender called "Sokka's Master", Aang and Katara do this while watching Sokka create his space sword. Also lampshaded in "The Blind Bandit" when Aang, Katara, and Sokka all peer out from behind a bush whilst sneaking around the Beifong estate, and then the camera flips around to show how ridiculous they look all schmooped up together.
* Avatar: The Last Airbender came under Fire Nation control. The only things standing against the Fire-Nation were small uprisings and guerilla armies. And then the comet came, giving the Fire Nation the ability to literally burn the continued resistance to the ground... of course, the good guys win, but without the Avatar they were basically screwed.
* Avatar: The Last Airbender can be explained with "spirits did it". Sokka even dismisses one incident with "That's Avatar stuff; it doesn't count."
* Avatar: The Last Airbender, can make use of light powers, Unalaq basically infusing water with light energy and Vaatu firing violet beams of light.

* Avatar: The Last Airbender can only be opened by five simultaneous fireblasts. A "fully realized Avatar" could do it single-handedly, but it otherwise requires five powerful and fully-trained firebenders.
* Avatar: The Last Airbender can't help but flex his "muscles" every time he sees his reflection. Even Suki, who knew him for literally a day notices it, and on their second encounter teasingly asks if he's been working out lately to provoke this reaction. Of course, he falls for it.
* Avatar: The Last Airbender cardinal point Air Nomad temples were destroyed by Fire Lord Sozin in his campaign to wipe out the airbenders and prevent the Avatar from stopping him.
* Avatar: The Last Airbender casually or missed early episodes may be lost later on, when things get heavy and the characters are already well-established.
* Avatar: The Last Airbender children with his non-bender wife are airbenders. (No word yet on if his youngest is one, he's only a baby after all.)
* Avatar: The Last Airbender. Come Korra's time, the Fire Nation is indeed much more peaceful yet pacifistic because even though they're atoning/have atoned for the hundred years war, too many are still easily remembering the Fire Nation causing that war and thus they don't want to risk more bad blood.
* Avatar: The Last Airbender comic "No Benders Allowed" plays this for laughs. The badass normals feel left out, so they form a little club that benders can't join. The benders initially think the club is stupid, but they all eventually beg their way inside. However, it's played a fair bit more seriously with Aang as when he's left by himself, it's a reminder of how he ended up isolated from his fellow monk children when it came out he was the Avatar a century ago.
* Avatar: The Last Airbender: Commander Zhao is requesting use of the Yu Yan Archers, an elite Fire Nation sniper unit, to capture the Avatar, but their commander is stonewalling him, claiming that the archers are too valuable to send after just one person. Cue the arrival of a messenger hawk with a letter for Zhao...
* Avatar: The Last Airbender: Commonly used in the Earth Rumble matches, but for both the ring and the entire series, Toph is the master.
* Avatar: The Last Airbender Complete with the line "My royal parts are showing!"
* Avatar: The Last Airbender contains a shot of a huge crowd of Fire Nation soldiers in front of an armada of ships.
* Avatar: The Last Airbender copper pieces? (He gets kicked out of the shop.)
* Avatar: The Last Airbender coup involves two of these from above and one from below a sewer grate.
* Avatar: The Last Airbender creators Michael Dante DiMartino and Bryan Konietzko make very few con appearances because their fans were stalking them and harassing the voice actors about fan shipping. They reject any invitation to a convention other than the San Diego Comic-Con due to its high security.
* Avatar: The Last Airbender dedicated to "you can shape your own destiny, and what the fortuneteller says is not set in stone".
* Avatar: The Last Airbender depicts the Fire Lord as a male-only position. Azula needs to produce a male heir but keeps having daughters. It was later revealed that the position of "Fire Lord" is unisex.
* Avatar: The Last Airbender: Despite being explicitly shown to be capable of flying into the clouds, Appa is frequently forced to dodge projectiles launched from catapults that couldn't be reaching heights of more than a couple hundred meters instead of just staying out of their range.
* Avatar: The Last Airbender, despite being originally aimed at boys aged below 12, has attracted many older female fans, mainly due to a crapload of characters serving the role of Estrogen Brigade Baits.
* Avatar: The Last Airbender, despite the fact that he is dating Suki. She later decides to "dump" Sokka in favor of the Dark One, while remaining friendly to him. Sokka takes this in stride, never attempting to indulge or dissuade her fantasies.
* Avatar: The Last Airbender did it in the episode "City of Walls and Secrets", with both Katara and Toph all dolled up and Aang stunned into blushing silence and a stumbling compliment before they had even left for the party.

* Avatar: The Last Airbender didn't expect to turn out this way, he certainly fits the mold. The previous Airbender Avatar, Yangchen, was also this (even if she was technically a nun). She tells him, in no uncertain terms, that his duty to the world outweighs his own personal beliefs and that he should kill Fire Lord Ozai.
* Avatar: The Last Airbender) directed tend to be the better looking episodes of the later seasons.
* Avatar: The Last Airbender. Doesn't help that the moon is brought up from time to time.
* Avatar: The Last Airbender does this during the "Ember Island Players" episode:
* Avatar: The Last Airbender does this on the episode "The Great Divide", where the heroes use it to ride fearsome creatures up a cliff.
* Avatar: The Last Airbender does this when the other members of Team Avatar plan on going to the Earth King's party to talk with him. Toph immediately points out that they have no concept of the higher-class manners that they would need to fit in (she pegs Aang and Sokka as servants, but figures Katara could manage). When called on her own terrible manners, Toph confidently states that she has been taught proper manners... and chooses to ignore them.
* Avatar: The Last Airbender does this with eye colors. Though it varies and there are definitely exceptions, each nation is generally associated with a particular eye color. Blue eyes are the signature of the Water Tribes, green eyes are the signature of the Earth Kingdom, yellow/golden eyes are the signature of the Fire Nation, and gray eyes are the signature of the Air Nomads.
* Avatar: The Last Airbender do wear a metal mask as part of their helmet which is somewhat skull-like, however.
* Avatar: The Last Airbender due to his duties as the Avatar and loyalty to his friends, Ozai values only his goal of world domination and will gladly engulf the world in flame to achieve it.
* Avatar: The Last Airbender, due to its wildly aggressive and unpredictable nature, but this is also subverted when Aang is taught that fire is essentially life and energy and the Fire Nation's modern use of it is a corruption of what it is supposed to be.
* Avatar: The Last Airbender. Each Bending discipline is further associated with an animal that invented the form (except for Waterbending, which the Moon inspired, though is still symbolized by koi fish).
* Avatar: The Last Airbender, earthbenders are this. Earthbending emphasizes strength and endurance, as well as a balance between offense and defense. Earthbenders must stand their ground and endure what their opponents throw at them, then strike back at the right moment.
* Avatar: The Last Airbender, eats, breathes, and sleeps this trope. Only his interpretation of his destiny switches twice every season.
* Avatar: The Last Airbender ends with a photo of Azula and friends smiling for the camera as the beach house goes down in flames.
* Avatar: The Last Airbender episode "Avatar Day". Aang is clearly too small for the adult-sized stocks, so he easily slips in and out of them while talking to his fellow inmates. This is all part of the episode's premise that Aang is voluntarily submitting to justice when he is obviously powerful enough to escape any time he wanted to.
* Avatar: The Last Airbender episode "Avatar Day" features a town where the justice system is called "justice" because it involves "just us": The prosecutor, judge, and jury is the same man while the defendant is only allowed to present their own testimony as evidence. Punishment is decided by the Wheel of Punishment, however, which ranges from "boiled in oil" to "community service."
* Avatar: The Last Airbender episode "Avatar Roku" the Gaang has to get to a temple inside the Fire Nation, the border of which is blockaded by the Fire Navy.
* Avatar: The Last Airbender episode "Imprisoned": Katara gets captured by the Fire Nation to rescue Haru, when he got captured because the Fire Nation gets knowledge that he can earthbend and Katara feels guilty for encouraging him to do so. Later the plan slightly changes when she wants to rescue the other imprisoned earthbenders as well.

* Avatar: The Last Airbender episode "The Avatar State", Aang has a nightmare where he sees himself in the Avatar state, and realizes just how terrifying an opponent he is to his enemies when he unloads the whup-ass.
* Avatar: The Last Airbender episode "The Beach." At the end of the second act (the party), Zuko pisses Mai off so much that she breaks up with him. They make up at the end of the third act (the campfire), and refreshingly, there is no groveling.
* Avatar: The Last Airbender episode "The Beach." He shoves a guy across a room just for talking to Mai.
* Avatar: The Last Airbender episode "The Cave of Two Lovers", the Gaang and a group of hippies find themselves trapped in a tunnel labyrinth. It's been established that the torches they have will last two hours each. Then one of the hippie girls lights five of them saying they are now good for 10 hours.
* Avatar: The Last Airbender episode "The Chase", when Aang tries to intercede between Katara and Toph's arguments:
* Avatar: The Last Airbender episode "The Deserter", Aang and friends are introduced to a gang of Fire Nation deserters by a man named Chey, who doesn't seem very popular amongst the gang. At the end of the episode, after the gang abandon their hideout to escape from Zhao, Chey returns from the forest wondering where everybody's gone.
* Avatar: The Last Airbender episode "The Ember Island Players" has a summation about the series up to that point, in the format of a Fire Nation propaganda theatre show.
* Avatar: The Last Airbender Episode), the one who always gets Chi-blocked by Ty-Lee, etc.
* Avatar: The Last Airbender episode "The Puppetmaster" has a possessed Aang and Sokka apologizing as they attack Katara.
* Avatar: The Last Airbender episode "The Runaway" starts with Katara turning Toph in to the authorities. Then we go back and learn how this came to make any sense at all.
* Avatar: The Last Airbender episode "The Siege of the North, Part 1", when Aang decides to actively fight against the Fire Nation invasion, there is a shot from behind of him holding his staff, followed by a pan up into the sky, which is identical to that at the end of the opening sequence.
* Avatar: The Last Airbender episode "The Storm", Sokka offers to help out a fisherman after hearing that he would be paid. Later, they are out at sea, struggling to stay afloat during a large storm.
* Avatar: The Last Airbender episode "The Tales of Ba Sing Se" ends with Momo squatting in a depression which turns out to be one of Appa's footprints on zoom out (though Momo already knew that).
* Avatar: The Last Airbender episode "Zuko Alone" is the only episode that doesn't feature any member of the Gaang at all.
* Avatar: The Last Airbender. Even after being forced to accept the call, he still holds some desire to be a normal kid. In the third season, he goes as far as to take the huge risk of enrolling in a Fire Nation school just to experience what it's like being a normal kid, despite his friends' protests.
* Avatar: The Last Airbender, even favored his younger daughter over his older son, making her his heir simply because she was more competent and more trustworthy. (Granted, for him competent = psychotic, and trustworthy = unquestioningly going along with his immoral schemes and war crimes.)
* Avatar: The Last Airbender. Even though Toph is blind, there was nothing to stop her from noticing the makeup during the kiss, but the resulting scene is funny because of Toph's deadpan delivery after she figures out it's Suki, not Sokka.
* Avatar: The Last Airbender (eventually), and a few minor characters, like Yue, Yugoda and the Cabbage Merchant.
* Avatar: The Last Airbender, every nation has a symbol but only the fire nation seems to love theirs. It's on all of the military uniforms and vehicles, the nobles work it into their everyday outfits, it's hung just about anywhere in a fire nation city or colony. A container of food can't even be sent to a poor fishing village without stamping it on. Explained in-universe that the Fire Nation has a much

heavier nationalistic mindset than other countries and everyone takes their patriotism a bit too far.
* Avatar: The Last Airbender. (Evidently he was a warlord trying to conquer her village.)
* Avatar: The Last Airbender (except the Air Nomads, who were always benders), so it's possible for the children of two benders to be non-benders:
* Avatar: The Last Airbender, exiled by the Fire Nation, flee to the Earth Kingdom and open up a tea shop, posing as Earth Kingdom refugees.
* Avatar: The Last Airbender explores the prolonged effects of Imperialism, foreign occupation, and genocide as much as it can while still being viewable for children.
* Avatar: The Last Airbender featured the attempt to make a trade of King Bumi for the Fire Nation governor's infant son. It did not go well.
* Avatar: The Last Airbender feature massively destructive bending duels: one between Aang and Zuko; and one between Aang, Zuko and Azula, which raze two abandoned villages to the ground. Justified since, with a hundred-year long war, some villages are bound to have been deserted.
* Avatar: The Last Airbender features commentaries for some episodes by the co-creators or other members of the production crew. They often give extra information on the story or the creative process. Or just make farting noises for half the episode.
* Avatar: The Last Airbender features The Chosen, who are the Kyoshi Warriors converted for Azula's purposes.
* Avatar: The Last Airbender firebenders. And Avatar Aang himself, although he had a strict No Killing policy, never showed an aversion to fighting or harming people.
* Avatar: The Last Airbender Fire Lord is a nice guy. His daughter Azula is no less evil than him, and probably quite a bit more crazy.
* Avatar: The Last Airbender focuses on the legacy the main characters left after the original series, as well as Korra being guided by Aang and Katara's middle-aged son Tenzin on her path to fulfill her role as the next Avatar.
* Avatar: The Last Airbender follows in its predecessor's footsteps in this way.
* Avatar: The Last Airbender, for all of its faults, does have a somewhat creative new weapon: giant siege cannons that the Fire Nation troops bend through amplifying their fire blasts in order to melt huge holes in the wall of ice protecting the Northern Water Tribe.
* Avatar: The Last Airbender for it. Iroh calls him out on it because his success rate is much worse than that of Indiana Jones.
* Avatar: The Last Airbender) for opening a sophisticated chamber door, he has his back to a wall and there is a lantern above his head.
* Avatar: The Last Airbender for political reasons, in line with this trope.
* Avatar: The Last Airbender for several of the characters (Aang, Toph, Zuko, Azula, and Suki being the major ones).
* Avatar: The Last Airbender for Singapore (especially the latter) and function as rather repressive Eastern societies whose inhabitants seem to be on the whole happy with their situation.
* Avatar: The Last Airbender from the very start of the series, both the audience and the protagonists fully aware that no matter how many enemies they face, he would remain their ultimate goal. In addition, Azula remains a massive threat for the rest of the series, even after her father takes a more active role.
* Avatar: The Last Airbender gets one. It has been continuously parodied/praised by the fandom.
* Avatar: The Last Airbender get thrown about like a ragdoll and desperately try to flee from a 12 year old child.
* Avatar: The Last Airbender, given he's being forced to face the fact that his father doesn't love him at all. He goes back into denial about it for a few years afterward, though.
* Avatar: The Last Airbender going to be a reincarnation of Aang's mentor Gyatso, so his intelligence might be a left-over from that.
* Avatar: The Last Airbender go on a quest and wind up discovering at least two still in existence, which Iroh had lied about having killed.

* Avatar: The Last Airbender had a memorable one in the episode "The Northern Air Temple".
* Avatar: The Last Airbender had a stunningly awkward pit trap for Aang when he tried to diffuse his embarrassment over a possible kiss with Katara.
* Avatar: The Last Airbender had child characters like Aang, Toph and Katara played by child voice actors. Effects of this trope came into play, Aang's voice deepened over the course of the show because of his actor. The line producers played around to ensure the contrast wasn't too great.
* Avatar: The Last Airbender, had coincidentally just died. The episode was even dedicated to him.
* Avatar: The Last Airbender had his lifespan cut short by being frozen this trope would be in full swing as Avatars are exceedingly long-lived (the oldest Avatar mentioned in canon, Kyoshi, was 230 at her death).
* Avatar: The Last Airbender had titled screens that refer to seasons as a "book" and each episode as a "chapter."
* Avatar: The Last Airbender, Hakoda invented tanglemines which would gum up the propeller of a ship and cause a terrible smell to force an evacuation.
* Avatar: The Last Airbender. Half the plot has to do with the organizer and other "wrestlers" believing that the reigning champ (Toph) worked with Aang and threw a match so they could claim the prize money.
* Avatar: The Last Airbender: Hama, one of the remaining Southern Waterbenders appears to be a kindly old lady. However, she developed a dark waterbending style called bloodbending. It essentially uses the water inside the bodies of humans, turning the humans into puppets beyond their control.
* Avatar: The Last Airbender happy to be ripped away from his crew and uncle and forced into a role making him the enemy of his birth nation.
* Avatar: The Last Airbender has Aang trying to find a crazy king's lost pet Flopsie as one of three deadly challenges. He thinks it's the cute and cuddly rabbit being chased by the 7-foot-tall gorilla-goat thing. He eventually figures out the trick and even learns an Aesop about it (after the climactic fight with the king, of course).
* Avatar: The Last Airbender has a fair share of this, perhaps most notably:
* Avatar: The Last Airbender has Amon taking Lin's bending, Jinora being unable to return to her physical body, and the Earth Queen's death and destruction of Ba Sing Se in its first three seasons. One would think that in the final season of Legend of Korra, the 10th episode would be insanely horrid for our heroes considering the higher stakes of that arc. Instead, Lin's rescue mission works and Zhu Li tells everyone what Kuvira's plans are.
* Avatar: The Last Airbender Has an example in the form of Prince Zuko. During his travels, he happens upon a village that is being menaced by earthbenders who are using the war his father started as an excuse to go around demanding food and supplies from people. He stays with a family in the village and befriends their young son, even going so far as to give him the knife Iroh gifted him as a child before heading off. Not long after, Zuko is stopped by the boy's mother who explains that the earthbenders returned and kidnapped him. Zuko tries to fight the earthbenders without the use of firebending but ends up having to do so anyway. Though the earthbenders are defeated, the bystanders are shocked to learn that Zuko is a firebender. One of them steps forward and reveals that Zuko is also the Firelord's son. The village rejects him immediately. Undaunted by their reaction, he tries to give the knife to the small boy once again prompting him to retort "No. I hate you!"
* Avatar: The Last Airbender has Appa the six-legged bison among others.
* Avatar: The Last Airbender has a universal fist-against-palm salute the characters find themselves in need of picking up on.
* Avatar: The Last Airbender has caused new Airbenders to start popping up all over the world, and rebuilding the Air Nation is a major subplot for the season.
* Avatar: The Last Airbender has "Combustion Man on a Train" where Aang fights "scary big explosion guy", while a little girl and all the other passengers learn to meditate as the train gets destroyed around them.

* Avatar: The Last Airbender has him retiring from the Fire Nation Army when he grew sick of war. The Firelord sent a hundred soldiers to force him to rejoin or kill him. He sent them all back.
* Avatar: The Last Airbender has it that he has a split personality because his mind is screwed up from the pollution in the river where he gets his water.
* Avatar: The Last Airbender has lots of very well done instances of kiddy horror.
* Avatar: The Last Airbender has multiple defectors from the imperialist Fire Nation:
* Avatar: The Last Airbender has no shortage of strong, able-bodied, females. So it's hardly any surprise that there's two examples of the trope:
* Avatar: The Last Airbender has Princess Azula trying to act like a normal teenager.
* Avatar: The Last Airbender has taken up residence there, spending her time terrorizing the aforementioned hillbillies and generally being herself.
* Avatar: The Last Airbender has the Avatar Spirit, and its various incarnations, including the main character. In addition, there are various other spirits, such as Tui and La, the Moon and Ocean spirits worshiped by the Water Tribes; as well as local guardian deities, such as Hei-Bai, a forest guardian, and the Painted Lady, a river spirit.
* Avatar: The Last Airbender has the same pairing, but is entirely platonic, despite being a romantic relationship.
* Avatar: The Last Airbender has this happen twice in "The Cave of Two Lovers".
* Avatar: The Last Airbender has three missing fingers, one for each failed attempt at creating a finger-safe knife sharpener.
* Avatar: The Last Airbender has two prison episodes (technically three, since one is a two-parter):
* Avatar: The Last Airbender has two simultaneous frame stories: Aang tells Katara of his days with the Air Nomads and when he learned he was the Avatar, and Iroh tells his ship's crew the story of why Zuko was banished.
* Avatar: The Last Airbender has Ty Lee, a bubbly pink-loving acrobat who loves performing for a crowd.
* Avatar: The Last Airbender have a sense of humor, it's just one he's really bad at using.
* Avatar: The Last Airbender) have a tendency to get complicated very easily.
* Avatar: The Last Airbender, have many historical inspirations without ever falling into straight allegories of any particular events.
* Avatar: The Last Airbender have one as they were established as a couple before the Maikouts happened.
* Avatar: The Last Airbender having a swordfight while koala-sheep cheer them on and a six-armed version of Guru Pathik floats by on a cloud singing a nonsensical song about chakras. After all this silliness, the final nightmare comes as a real shock: it's as weird and free-associating as the rest, but much darker and based on reality, in the way of really bad dreams everywhere.
* Avatar: The Last Airbender having to crawl underneath the boulder that's supposed to have crushed him, leaving the real Team Avatar confused over his fate). Turns out that Bryke planned for him to die on-screen, but the executives shot that idea down and refused to let them confirm it outright. (Well, until the commentary for the above-mentioned episode.)
* Avatar: The Last Airbender. He affectionately calls it his "space sword."
* Avatar: The Last Airbender he does a GREAT job of acting aloof to her, impressing Sokka.
* Avatar: The Last Airbender. He easily shoves him over, takes his knife...then demonstrates a better stance for him to use. (However, he uses this to have a long talk with the man and persuade him to give honest work another shot.)
* Avatar: The Last Airbender. He immediately asks her to go penguin sledding with him, and she confusedly accepts.
* Avatar: The Last Airbender. He is the one who comes up with the majority of their battle strategies.
* Avatar: The Last Airbender. He just wants to befriend everyone and takes his role

as peacekeeper very seriously, being one of the few people who are willing to give the Fire Nation a chance to redeem themselves.
* Avatar: The Last Airbender, he responds that the only thing they were hatching was "... an egg?"
* Avatar: The Last Airbender. He's trying to get struck by lightning so he can practice redirecting it, but the lightning doesn't even go near him.
* Avatar: The Last Airbender. His cheerful exterior and fun-loving personality is a way to cope and ignore the guilt he feels for running away from his home and people and getting frozen, allowing the Fire Nation to wage war for a century, wiping out his people. He finally faces his guilt later on when he's mentored by Guru Pathik.
* Avatar: The Last Airbender, his eight-year-old grandson, Meelo, has to be pulled away by his sisters from flirting with a girl who looks like she's twelve or so.
* Avatar: The Last Airbender, his son Tenzin is shown to have inherited his Airbending, and lives with his wife and three Airbending children in Republic City. Following the end of season 2, Harmonic Convergence granted many non-benders (including Tenzin's brother, Bumi) airbending, resulting in the birth of a new Air Nation.
* Avatar: The Last Airbender However, it's not clear how long the Comet's effects remain, with guesses ranging from a few hours to a few days.
* Avatar: The Last Airbender. However, seeing Katara help a couple deliver a baby named Hope gets him out of his funk.
* Avatar: The Last Airbender. However, this was because production on the finale had been delayed, and Nickelodeon didn't want to air less than half of a season only to have another hiatus right before the end of the series.
* Avatar: The Last Airbender. "I'm just a guy... with a boomerang... didn't ask for all this flying... and magic..."
* Avatar: The Last Airbender in a flashback, the two don't interact until the next season, with Mai instead being an ally to Azula (and thus technically Zuko's enemy). Once the pair are on the same side, however, they have an instant off-screen hook-up.
* Avatar: The Last Airbender. In an early season 2 episode, Team Avatar stumbles upon what they think is a celebration of the Avatar. It turns out that it’s an anti-Avatar event because the previous Earth Kingdom Avatar , Kyoshi, had murdered their leader. Aang stands trial in her stead only for her spirit to visit them and say that she had killed him. Aang points out that she didn’t confess to murder because she didn’t murder him, he chose to not move. Kyoshi later tells Aang that she sees no difference between killing him and letting him die because she was fully willing to kill him.
* Avatar: The Last Airbender: In Book Two's "The Earth King", as Team Avatar invades the Earth King's palace, Sokka accidentally opens a door with a woman (dressed decently) behind it who then yells "Burglar!" and throws herself to the ground. Sokka responds by immediately closing it and calling back "Sorry! Wrong door!".
* Avatar: The Last Airbender. In later comics, Zuko is willing to try to make amends; but given Azula's mental state isn't stable enough to try to reciprocate, much less Zuko handling the issue very poorly the first time around; the two got driven further apart. Zuko comes to terms with the fact that Azula is hurting inside, and that he cannot change her, but it's his responsibility to be there for her when she's ready to get her life back together.
* Avatar: The Last Airbender: In one episode, Aang falls into a floor of stalagmites, managing to stop himself between two moments before a third would have impaled between his legs.
* Avatar: The Last Airbender In particular, the Air Nomad and Water Tribe nations are the most tolerant towards same-sex couples, due to their beliefs towards pacifism and personal autonomy respectively, while the Earth Kingdom is the most homophobic due to its emphasis on tradition. The Fire Nation used to be tolerant as well, but homosexuality became illegal under Fire Lord Sozin.
* Avatar: The Last Airbender: In "Return to Omashu", the purple pentapus was seen in a bucket filled with water and inside a sewer when the gang used it to enter

Omashu. They are known to be clingy unless it was stroked in the head and leaves behind spots which they used to explain a fake disease, pentapox.
* Avatar: The Last Airbender intent on making everyone in Ba Sing Se unaware that there's a war in the first place.
* Avatar: The Last Airbender in the air. Appa tends to do this a lot, on account of being a ten-ton flying bison with airbending powers.
* Avatar: The Last Airbender; in "The Avatar State", Aang begs General Fong not to threaten Katara in order to trigger his Avatar State.
* Avatar: The Last Airbender in the episode "The Blind Bandit", Fire Nation Man is this for the Fire Nation.
* Avatar: The Last Airbender, in the episode "The Cave of Two Lovers", the hippie nomad tells the Gaang about the secret cave, though he doesn't recall the song about it very well ("Uh, secret tunnel! Secret tunnel!"). Eventually...
* Avatar: The Last Airbender. In the episode "The Waterbending Scroll", Aang is separated from Sokka by a huge cloud of smoke originating from smoke bombs used in a battle between pirates and firebenders. Aang, getting tired of the smoke, blows it away, hoping it allows Sokka to find him... only to find himself in the middle of a battle with no less than seven weapons pointed at him. He promptly brings the smoke back.
* Avatar: The Last Airbender in the episode "Warriors of Kyoshi," though he originally started showing off to get Katara's attention.
* Avatar: The Last Airbender. In the first two seasons he was said to have ruled during the first 70 years or so of the war, but come season 3 it is established that he only ruled for the first 20 years. Also a brief backstory released on the nick.com website implies that he was a young man who only recently became Fire Lord at around the time Avatar Roku died, but it is later established that Roku and Sozin were the same age and that Sozin had already been Fire Lord for a reasonable period by the time of Roku's death.
* Avatar: The Last Airbender: In "The Great Divide", Sokka and Katara resort to this after an argument between them quickly escalates.
* Avatar: The Last Airbender. In the last 4 episodes though, they travel from the Fire Nation to the Earth Kingdom and back again in less than 3 days. In the first season it was a bit more justified since they flew everywhere and the timescale was a lot less defined, but that just made the way Zuko easily kept pace in an obsolete steamship which was explicitly slower than them stand out.
* Avatar: The Last Airbender in the second half of the season one two-parter "Winter Solstice", after Aang rescues Sokka from the Spirit World.
* Avatar: The Last Airbender: In "The Southern Raiders", Zuko reveals to Katara that he can help her find the man who killed her mother. This prompts her to go off on a quest to find the killer and take his life, despite Aang's warnings nothing good ever comes from revenge and murder is never the solution. Later, when Katara finally finds the killer, she sees what a pathetic man he is and lets him live, giving up on her quest but making it clear that she does not, and will never, forgive him.
* Avatar: The Last Airbender in "The Tales of Ba Sing Se" when he sets free all the animals in the Ba Sing Se zoo. To be frank, the zookeeper wanted to move them to wider open spaces.
* Avatar: The Last Airbender in the World of Avatar is very common. However, she’s a member of the Southern Water Tribe, which has been targeted by Fire Nation raids in order to kill and/or capture every single waterbender that was produced there during the Hundred Year War. Katara is the only one left by the time the series begins, and the 14-year-old hardly has any waterbending experience because there have never been any other waterbenders around to teach her. A major subplot of the first season is Katara finding a Waterbending master from the Northern Water Tribe (which has mostly remained intact thanks to its isolation from the rest of the world) to teach her.
* Avatar: The Last Airbender in this paradigm parallels many of the struggles young adults go through all the time.
* Avatar: The Last Airbender into the Spirit World while leaving behind his body.

When a bender enters the Spirit World through a portal, their body gets to come with, so they retain their abilities.
* Avatar: The Last Airbender. In universe, it could be written off as Katara saving the water in case Aang had become mortally wounded, especially since Jett's wound was internal.
* Avatar: The Last Airbender involves an epic fight over a steam-powered gondola lift.
* Avatar: The Last Airbender", in which a cave-in causes Aang and Katara to be separated from Sokka, leaving Sokka with the hippie musicians.
* Avatar: The Last Airbender, in which the people in the background are always drawn fully-colored, though again, not always animated.
* Avatar: The Last Airbender, Iroh can't decide whether a plant he found is a type of tea leaf, or poisonous.
* Avatar: The Last Airbender, Iroh cries when the tea he warmed up gets smacked out of his hand by Zuko.
* Avatar: The Last Airbender, Iroh is seriously injured in an encounter with Azula and wakes up to find that Zuko has been caring for him. Zuko also made tea, saying, "I hope I made it the way you like it." Turns out, it wasn't the way Iroh liked it, but Iroh drinks it anyway! (Well, the first cup anyway- the second one goes out the window while Zuko isn't looking).
* Avatar: The Last Airbender: Iroh is usually well-behaved, but is not above a compliment or two for a pretty woman – or a not-so-pretty woman if he thinks it will get him preferential treatment. However, when June and Zuko are paralyzed by her Shirshu and June is thrown atop him, he doesn't move, even though Zuko points out the Shirshu didn't get him. He smiles, and June gives a quick look of outrage. She later refers to him as Zuko's "creepy grandpa."
* Avatar: The Last Airbender. Iroh, significantly, appears to have decided this and then waited passively for five years for the right opportunity; before this, he seems to have been a poster child for this trope.
* Avatar: The Last Airbender is a firm indicator to how light-hearted and whimsical or serious and edgy the current story is. Co-creator Bryan Konietzko has admitted that he based him on his childhood cat Buddy.
* Avatar: The Last Airbender is a long, narrow ledge across the body of water separating the main land from the city of Ba Sing Se. Because the Gaang and a pair of newlyweds had problems getting tickets for the ferry, they went there instead. Not only is navigating it already hard, the pass apparently got its name from the giant water serpent that lives there, trying to knock people off the ledge.
* Avatar: The Last Airbender is an example of this. Sure, some episodes were more filler than others but the creators had the whole series planned out beforehand. For example, in "The Northern Air Temple" characters meet an eccentric mechanist. His workshop is scattered with blueprints and other minor details — one of which is plans for a giant drill that doesn't show up until a season later.
* Avatar: The Last Airbender is an interesting case. The concept of an "Avatar" is one taken from Hinduism and Buddhism, meaning a god who has taken mortal form. However, there are many separate philosophies across the world which seem to hold elements from other Asian, Pagan and Native American belief systems. Specifically, the mythology of Aang as the Avatar is lifted directly from The Dalai Lama, down to reincarnation and being chosen at a young age by ancient toys and heirlooms from the previous Avatar's possessions. The creators even named him "Buddha Boy" as a working name before they came up with "Aang".
* Avatar: The Last Airbender" is an official parody of the fandom's infamously intense shipping wars, made up of fanart of assorted non-couples such as Katara and Zuko and Azula and Aang, before everyone breaks up due to incompatibility and goes back to the canon couples, begging forgiveness from the show's writers.
* Avatar: The Last Airbender is divided into four elemental nations. It is drastically different in terms of continent placement, with a landmass at each of the poles, and the Earth Kingdom being possibly bigger than our Eurasia. There's no equivalent for the Americas, Australia, and other continents.
* Avatar: The Last Airbender is how Aang cryogenically froze himself for 100 years,

waking up to find that a war with the Fire Nation started not long after he was frozen, wiped out his entire civilization, and has gone on since then. Sometimes, the show thematically explores the consequences of how things change with time — in an early episode, he meets his only known surviving friend, who is now much older than he is; and about mid-series, he finds what used to be an oasis in the desert to be completely dried up. This is most notably explored, however, whenever the Air Temples are visited — Aang is shown reminiscing about how things are so different in his old homes, especially since for him it wasn't even a year ago that they were full of life.
* Avatar: The Last Airbender is ominous to those who don't know a waterbender's about. Also parodied in a dream Aang had: he makes a dramatic entrance by kicking in the door, snapping his fingers, and fog rolling in.
* Avatar: The Last Airbender is prone to being on the receiving end of blind-insensitve comments. Of course, she also loves setting people up (Sokka mostly) to walk right into this situation. She even pulls this on herself where she makes the assumption that Katara's suggestion that she team up with Sokka to hang posters throughout the city was because Katara thought she was too weak to be left alone in the city and not that the fact that correctly hanging posters involves sight, as she unintentionally demonstrates.
* Avatar: The Last Airbender is so reviled is that it replaces the platform with a quarry, making the earthbenders' plight less "nothing to help us escape" and more "we can't be bothered to escape". The third season episode "The Painted Lady" features the Fire Nation fishing village of Jang Hui, which is made of wood and floats on a river.
* Avatar: The Last Airbender is stronger at night, due to the sun and moon respectively. A comet that passes by the world also greatly amplifies firebending depending on how close it is, a solar eclipse makes firebending unusable (and while the effects of a lunar eclipse are never shown, it would presumably do the same to waterbending), and waterbending is stronger depending on how full the moon is. We at least know that the moon has a Moon Spirit, whose existence effects the moon; if the Moon Spirit is captured or physically endangered in any way, the moon glows red, and if the Moon Spirit is killed, moonlight ceases.
* Avatar: The Last Airbender is that his ear is half burnt-off and shriveled.
* Avatar: The Last Airbender, it’s implied that he’s hit her in the past due to the way she cowers when he raises his arm. He also treats her a lot worse in general than he did in the show.
* Avatar: The Last Airbender: it actually has two walls, an outer wall to protect the farmland, and an inner wall to protect the city itself.
* Avatar: The Last Airbender it comes back and smacks him in the back of the head.
* Avatar: The Last Airbender: It is mentioned that the Fire Nation took Earth Kingdom prisoners-of-war, dressed them up in Fire Nation uniform, and dropped them off at the front lines.
* Avatar: The Last Airbender), it looks like the fans' fears were dead-on, as characters in the movie spout endless amounts of exposition, line after line, in an effort to compress the entire first season into one film.
* Avatar: The Last Airbender it over the course of the series. A childlike fondness soon becomes a crush that grows as he matures over the course of his journey.
* Avatar: The Last Airbender it possesses due to that. Also, he's a dork.
* Avatar: The Last Airbender It remains to be seen whether the two ever truly reconciled or not. It can also be inferred that preventing this trope is the reason why Zuko has only one child. And it is unknown whether this trope is in effect among Izumi's two children.
* Avatar: The Last Airbender. "It's a GIANT MUSHROOM! Maybe it's friendly!"
* Avatar: The Last Airbender): It's like Zutara with fifty percent less plausibility.
* Avatar: The Last Airbender It was probably a mistake to expect Azula to play fair.
* Avatar: The Last Airbender: Jeong Jeong, also known as "The Deserter", was an admiral in the Fire Nation Navy who grew disillusioned with the Fire Nation's

campaign of global conquest and defected. In the final season, he joined the Order of the White Lotus and helped liberate Ba Sing Se from Fire Nation occupation.
* Avatar: The Last Airbender, Jet tells Zuko he knew who he was the second he saw his scar. Zuko winces, thinking he’s been found out as the banished, fugitive of the Fire Nation, but Jet just says that he’s an outcast.
* Avatar: The Last Airbender: Katara does this to some poor Fire Nation soldier in the middle of bragging to his friends in "The Southern Raiders", though if he could swim it's doubtful he actually died.
* Avatar: The Last Airbender: Katara gives a Little No at the last second before Jet blows up a village dam.
* Avatar: The Last Airbender, Katara's and Sokka's father, Hakoda, has been fighting in the Hundred-Year War for the two years before the start of the story.
* Avatar: The Last Airbender, Katara simply uses her waterbending to bring Toph into the lagoon (that's barely knee-deep). Toph starts flailing around screaming that she doesn't want to drown, prompting Katara to part the water so she calms down.
* Avatar: The Last Airbender. Katara's skill at waterbending did manage to impress Pakku, who believed that women shouldn't learn combat-bending, when she instigated a fight with him, but he still refused to teach her until he learns that Katara's grandmother is actually his long-lost love, whom he drove away with his attitude. After he accepts Katara as a student and sees her progress, he chides all his other students for not keeping up.
* Avatar: The Last Airbender. Katara then has several nightmares throughout the story, most of which end with her uncovering Aang's face only to reveal that it's completely blank.
* Avatar: The Last Airbender. Katara, wanting to cheer everyone up, attempts this. It doesn't work, and in fact ends up bringing the mood down further, because...
* Avatar: The Last Airbender kidnaps and imprisons any Bender who is not Fire Nation. A type A ban.
* Avatar: The Last Airbender. Knowing the Dai Li would be monitoring them, Azula arranges for Dai Li agents to overhear Mai and Ty Lee "accidentally" outing themselves as Fire Nation infiltrators. This prompts the Dai Li, angry at the Earth King due to the recent imprisonment of their leader, to make an alliance with Azula and company where both sides look to use the other.
* Avatar The Last Air Bender. Korra and Kyoshi (in the books and comics) are confirmed bisexual, Aang is “very in touch with his feminine side”, and this may well be part of the psyche’ of all Avatars considering the Avatar can be male or female with each rebirth and are closely connected enough to their previous identities to consult with them.
* Avatar: The Last Airbender, Korra and Naga (bear-sized) are both instantly stopped by said darts, though Naga was shot by three at once just to make sure.
* Avatar: The Last Airbender less likely to start wondering about the rightness of the cause than the truth would.
* Avatar: The Last Airbender lets her deduce that the con artist actually hides the pebble inside his sleeve whenever he shuffles the shells. When she agrees to participate, she uses her earthbending powers to knock the stone back inside her chosen shell, thus ensuring her victory.
* Avatar: The Last Airbender love interest, Suki? Ended up tortured in a Fire Nation prison, with the audience and the main characters not even sure if she was alive. But as revealed in the Season 3 episode, "The Boiling Rock," she was! Hooray!
* Avatar: The Last Airbender, maintaining the "Avatar" prefix overseas. From the original series, two episodes went through this: "The Blue Spirit" was originally called "The Red Spirit" and "The Blind Bandit" was originally called "The Earthbending Tournament".
* Avatar: The Last Airbender, Mai watches an epidemic erupting in the city of Omashu and offers fireflakes to her dad (who is supposed to run the city).
* Avatar: The Last Airbender, Master Pakku immediately accepts both Aang and Katara as his students without any hesitation.

* Avatar: The Last Airbender — and it really emphasises the seriousness of the conflict.
* Avatar: The Last Airbender — by challenging him to a no-holds-barred duel in which Sokka's resourcefulness and creativity enable the beginner to keep stride with the master.
* Avatar: The Last Airbender, members of the Order of the White Lotus identify each other through a board game called Pai Sho. The secret handshake begins by opening with the white lotus tile (which the order is named after) placed in the center space, and forming a pattern across the board resembling a large flower.
* Avatar: The Last Airbender Meng, a pre-teen girl, calls Katara a floozy under her breath when she learns Aang (whom Meng had a crush on) prefers Katara.
* Avatar: The Last Airbender mentions his power was based on that of Imperial Chinese eunuchs.
* Avatar: The Last Airbender, metalbending techniques have become widespread, so the new kryptonite is platinum. Metalbending works by bending impurities within the metal, and platinum doesn't have enough impurities to bend.
* Avatar: The Last Airbender military after seeing the horrors of the Fire Nation's war for world domination, and in particular, his former student Zhao's lust for power.
* Avatar: The Last Airbender moment, two of the enforcers are moving along with the music.
* Avatar: The Last Airbender" Momo is asked for water by a very sick Sokka and Katara while Aang fetches the cure for what ails them. The well-meaning creature brings everything you can think of except for water, leaving Aang very confused at the episode's end.
* Avatar: The Last Airbender most of the time, but blows up in the episode "The Beach", where she actually shouts.
* Avatar: The Last Airbender. Most viewers are under the impression that the gun was on the mantelpiece (literally), it was used once, and that was that. But he ended up using it almost as much as firebending and it changed the course of the series many times.
* Avatar: The Last Airbender normally had a monopoly on honor related phrases (to the point where in the play version of the show, just about every line actor Zuko used had the word honor in there somewhere). This changes in the third season when both Aang and Sokka say that they need to restore their honor. Meta-lampshaded when Aang says, "I need my honor back," and it directly cuts to Zuko.
* Avatar The Last Airbender Northand South school, but she sees it as the point since they do something that used to be considered impossible until she learned how to do it.
* Avatar: The Last Airbender: Not CGI, but Katara's "hair loopies" were opted over overly-long hair because they were easier to animate.
* Avatar: The Last Airbender. Of course the trope is used multiple times:
* Avatar: The Last Airbender. Of course, this is specifically a world with mysticism of many stripes, so Sokka's main concern was that the town was letting predictions run their lives, to the point where they would not escape from a volcanic eruption because they were told it would be fine.
* Avatar: The Last Airbender of the finale), the short was almost unanimously well-received by both shippers and non-shippers alike. There was also an in-universe play near the show's end parodying the show itself.
* Avatar: The Last Airbender of the Gaang. He has used some tricks to recreate similar effects, like bombs as fake firebending or using air pressure (provided by airbending, but the witnesses didn't knew that) to make rocks float on the air and pretend it's earthbending. In one episode they even used sneaky application of bending to fake the actions of a powerful water spirit.
* Avatar: The Last Airbender of their actually being brother and sister is not addressed.
* Avatar: The Last Airbender of this), she knows how to get things done with words as well as rocks.
* Avatar: The Last Airbender of victims have come forth, so let's discuss it."

* Avatar: The Last Airbender once in the second season - After having dinner with the girl-of-the-day Jin, she pulls Zuko to a plaza with many dead lanterns. She mentions that the lanterns used to be pretty when lit. Not wanting to upset her, Zuko orders her to close her eyes, then he uses his firebending to lit all the lanterns (he's going incognito at the time). This impresses her enough that she goes to kiss him - and Zuko stops and run away. Downplayed because she's covering her eyes while he firebends.
* Avatar: The Last Airbender), one element in particular gives them some difficulty, depending on which element they mastered first. Air and Earth are opposites, same with Water and Fire. There are complimentary elements too, Air and Water carry similar principles (be flexible and adaptive), same with Earth and Fire (stand your ground).
* Avatar: The Last Airbender one of the crew comments that he half expects Aang to ask Iroh "I have this friend who's the Avatar..."
* Avatar: The Last Airbender one of their birthdays. Then the door opens and they fall in the ocean.
* Avatar: The Last Airbender one of the officer's birthday, and he's touched "the general" remembered. So not only did he have to serve on this crucial military operation on his birthday (though he probably considered it an honor), he gets dumped into the sea with the rest of the staff.
* Avatar: The Last Airbender on Zuko's part after the two seemingly got back together for good in the series finale episode "Avatar Aang".
* Avatar: The Last Airbender outside of Iroh's tea shop, which slowly pans up to the setting sun.
* Avatar: The Last Airbender over long periods of time, with new schools spinning off of the ancient traditions.
* Avatar: The Last Airbender: Particularly obvious with Momo's introduction.
* Avatar: The Last Airbender, part of her defense is that they probably stole it themselves.
* Avatar: The Last Airbender people!" (Also, Momo could talk, and said some very unkind things.)
* Avatar: The Last Airbender. Played for laughs in "Nightmares and Daydreams," but played seriously in "Day of Black Sun: Part 1."
* Avatar: The Last Airbender: Played with. Zuko is tracking Aang to capture him, but the records of his positions show his movement near impossible to predict. Zuko comments that he must truly be a master of evasion. Cut to Sokka saying, "You have no idea where we're going, do you?" as Aang is literally going wherever he wants to have fun at, e.g. a place to go surfing before heading off to a different location.
* Avatar: The Last Airbender. Player always controls up to 3 characters out of minimal roster of 4. When and only when you get a new character, you start getting puzzles for him.
* Avatar: The Last Airbender plays with this trope. acknowledging that he's already a hundred years late when it comes to his role as the link between worlds, Aang agrees to work with an Earth Nation general in order to trigger the avatar state at will and face the firelord prematurely. Nothing works until said general made it seem as though he was burying Katara alive at which point Aang enters the state nigh instantly but we ultimately learn that if Aang dies while in the Avatar State the Avatar won't exist anymore.
* Avatar: The Last Airbender, plus that way there's a close equivalence in Fire Navy and Army ranks, with Lieutenants and Captains in both, Colonels and Generals in the Army, and Commanders and Admirals (of which Zhao becomes one of a few appearances later) in the Navy.
* Avatar: The Last Airbender presses pretty hard on this trope. Fire is only dangerous when you touch it; this is justified in the case of Firebenders who can manipulate it, but it also happens for others. Smoke is pretty much nonexistent, even with non-bending fire.
* Avatar: The Last Airbender; presumably, they sling around burning energy. This also explains why they can force their fire to explode at will.
* Avatar: The Last Airbender: Princess Yue has white hair because the moon spirit

gave some of its energy to save her life when she was a baby. Eventually, she is called upon to return the favor.
* Avatar: The Last Airbender: Princess Yue's hair color was a plot point. She was actually born (or rather still-born) with dark hair like everyone else in the water-tribe (and pretty much everyone in the four nations). When the moon-spirit saved her infant life, her hair turned pure white and remained that way all her life.
* Avatar: The Last Airbender, "pro bending" is a team version popular as a spectator sport.
* Avatar: The Last Airbender pummels Aang into near-unconsciousness on top of The Drill and then ominously marches towards him while she readies a fire attack to presumably finish him off.
* Avatar: The Last Airbender quite comical until Aang tries a higher price which is only one copper piece higher. Pirate's not so amused the second time.
* Avatar: The Last Airbender) really lets the viewer catch the nuances of character development over the course of the seasons.
* Avatar: The Last Airbender Regular dogs and cats seem to exist however.
* Avatar: The Last Airbender, Republic City's power plants are staffed by lightingbenders.
* Avatar The Last Airbender Revised. Over the course of various battles and confrontations, the two develop a begrudging respect for each other.
* Avatar: The Last Airbender, right before Roku had to leave to start his Avatar training. Roku wore it for the rest of his life, even though he and Sozin stopped being friends long before that.
* Avatar: The Last Airbender, right before Zuko ninjas into the Northern Water Tribe to capture Aang.
* Avatar: The Last Airbender rolled around... Honestly, in the season finale, where would we be if Aang was two seconds too slow for that hammer swing?
* Avatar: The Last Airbender rule feels the need to defend her honor and allows himself to stand trial for murder. In a subversion, Kyoshi’s ghost appears and unequivocally said that she did kill him during the trial(even if, strictly speaking, murder isn’t exactly what she did. She just lets him fall to his death). Aang ends up saving the town and gets off with “community service”.
* Avatar: The Last Airbender. Said buzzard-wasp was struck down by Aang mere moments later.
* Avatar: The Last Airbender's Avatar Korra find themselves in this predicament.
* Avatar: The Last Airbender seems to be default. See Ty Lee's normal outfit and Katara's Season 3 outfit, as well as Suki's in the later half of Season 3.
* Avatar: The Last Airbender seems to fit the typical rebel hero, right down to causing a love triangle, until the kids learn how far he's willing to go.
* Avatar: The Last Airbender seem to be the transportation of choice in the Earth Kingdom.
* Avatar: The Last Airbender sees Toph in a vision before ever having met her (in a semi-mystical swamp with a loose connection to the normal flow of time). When they do run into her a short time later, Aang is positively convinced the she, and no-one else, is destined to be his Earth Bending teacher. The romantic part exists only in the minds of the fandom, as Aang was in love with Katara all along.
* Avatar: The Last Airbender segments, though they don't explain everything.
* Avatar: The Last Airbender seriously. After she shows him why he should, he swallows his pride and asks to be trained by them, impressing her. Suki falls for Sokka right away because Sokka showed humility to someone who is both a warrior and a girl, and Sokka falls for Suki right away because she's an amazing girl.
* Avatar: The Last Airbender serves as the heroes' main mode of transportation.
* Avatar: The Last Airbender serves as this, dealing with extraordinary threats such as the Red Lotus, a nebulous conspiracy that seeks to bring the world to chaos.
* Avatar: The Last Airbender, set 70 years after the first series, this trope has become less pervasive due to greater intermingling between nations.

* Avatar: The Last Airbender, she finally decided to simply wear her hair long as part of her disguise, while they were in Fire Nation territory.
* Avatar: The Last Airbender, she rubs salt in the wound by indicating this was all he was to her.
* Avatar: The Last Airbender shortly thereafter, not reappearing until the last half of Book 3.
* Avatar: The Last Airbender shorts that came with the second season DVD.
* Avatar: The Last Airbender shows, she continued using the nickname well into their adult years, to Aang's embarrassment.
* Avatar: The Last Airbender shows the same map in the first opening before zooming into Republic City, the main setting of the series.
* Avatar: The Last Airbender shows those who visit it images of people who meant something to them, or who will be important in their future. This can be horribly upsetting when the person you see just so happens to have died.
* Avatar: The Last Airbender shows up and knocks them into the nearby lake.
* Avatar: The Last Airbender, siblings Katara and Sokka are able to visit a school in the Fire Nation by posing as a married couple, Wang and Sapphire Fire. And to add to the subtext, Katara's disguise makes her look heavily pregnant.
* Avatar: The Last Airbender, signifying the great battle between Good and Evil that Aang is going to be in the middle of. Aang, of course, already knows about that and is much more interested in seeing if he will ever marry Katara.
* Avatar: The Last Airbender, since it's derived from their mystical bending powers; consequentially, their movements are more akin to those of a waterbender. They apply this power to use small sand skiffs to sail around in.
* Avatar: The Last Airbender sledding: the penguins have mouths and whiskers rather than beaks, as well as four flippers. They're still pretty cute.
* Avatar: The Last Airbender sneaks into Zhao's compound by hiding beneath a layer of dirt, in the road, then latching onto the undercarriage of a passing supply wagon.
* Avatar: The Last Airbender, Sokka agrees to play a game against Aang, making Sokka a muggle athlete attempting to play a sport that requires powers. Since the game involves that heavy wooden ball being launched around at high speeds with airbending, it doesn't take long before Sokka's attempts to stop Aang from scoring goals (and thus repeatedly getting hit with the ball) leaves Sokka bruised and hurting.
* Avatar: The Last Airbender, Sokka creates a scarecrow with a watermelon head to substitute for the Fire Lord during training. He dubs it the Melon Lord and assigns Toph as its actor. She happily takes the role.
* Avatar: The Last Airbender. Sokka explains that this is how their relationship works and since she's his sister, he doesn't mind getting the short end of the deal. This leads to Zuko borrowing a blanket to drape over Azula who is shivering from the cold and her own insanity.
* Avatar: The Last Airbender", Sokka finds several puppets in their innkeeper's cupboard. This foreshadows the puppet-like waterbending skill that Katara learns from the innkeeper by the end of the episode.
* Avatar: The Last Airbender. Sokka refuses to believe that a "bunch of girls" captured them, and tries to argue that "sneaking up" doesn't count as a fair fight. Confronting them later only confirms that they can, in fact, best him in a fair fight. Not only does he ask them for martial-arts lessons, he ends up dating one of them.
* Avatar: The Last Airbender, Sokka's swordsmanship instructor Piandao is quite like this.
* Avatar: The Last Airbender's sad passing, several episodes were written in the first half of Season 3 where Iroh was imprisoned and largely silent, which wound up serendipitously working out. His replacement actor Greg Baldwin briefly voiced a few lines in Season 2 to get viewers used to his new voice before the character fully returned later, and Greg does a good enough impression of Mako that those not in the know might not even have noticed (it helps that he was a self-taught Mako understudy before the latter's death).

* Avatar: The Last Airbender started out the series disliked by his crew, as he constantly pushed them while hunting for Aang. He eventually got a little better when Iroh told the crew about Zuko's seriously messed-up backstory, and Zuko risked his life to save a crewmember in the middle of a storm, allowing Aang to escape in the process. Zuko and the crew started to respect each other a little—at least enough for his second-in-command to stop challenging him to fights to the death.
* Avatar: The Last Airbender starts off as having no sense of humor, as the only time he laughed was out of spite for the pirates he was arguing with having their ship stolen. Azula has a sick sense of humor, though she has lack of humor moments as well ("It's okay, you can laugh. It's funny.")
* Avatar: The Last Airbender starts out by throwing about 15 characters out to the readers in the first 10 chapters. By the end of the series, there's a total of at least 60 or 70.
* Avatar: The Last Airbender subverts and plays with the trope. Katara and Toph are in a spa getting mud baths and facials. It's not considered horrifying until Toph uses earthbending to animate hers and freak out the spa employees.
* Avatar: The Last Airbender, such as building houses, heating and cooling drinks, powering steam-punk machines, and playing games. Of particular note, the Air Nomads deserve special mention for living up to "Everyone" part of the trope name; because of their spirituality, their entire population is born with the ability to airbend.
* Avatar: The Last Airbender, such as Iroh, Azula, and Firelord Ozai don't use actual guns, but fire off lightning bolts in a very similar fashion. Zuko, Aang, and Iroh can also catch lightning and redirect it. The "physics" behind it - separating negative and positive ki - is very reminiscent of polarizing the air or targets as several above weapons do.
* Avatar: The Last Airbender such as platypus-bears and wolfbats, apparently also has "tomato-carrots."
* Avatar: The Last Airbender, suffers from this the most (he got captured by a hole in the ground!), but Aang often receives the more elaborate setups.
* Avatar: The Last Airbender susceptible to a wide range of health problems. When Iroh said that Zuko's illness was an emotional illness, he very well may have been correct. (If Zuko hadn't been so stressed-out and angry all the time, his infection most likely would not have manifested itself so severely.)
* Avatar: The Last Airbender swimwear at the time, but it's also notable in that the only adjustment that he needed was his arm positioning.
* Avatar: The Last Airbender take place in a universe where there are four nations spread about the planet: Fire Nation, Air Nomads, Earth Nation, and Water Tribe. The Water Tribe occupates two different regions, the North and South Poles, as well as the small Foggy Swamp Tribe in the Earth Nation. The all-but-extinct Air Nomads were traditionally nomadic, though they had four temples that acted as their central bases.
* Avatar: The Last Airbender takes place during the Fire Nations industrial revolution, pitting nature vs science on the expected poles, as they are also environmentally harmful, which is also harmful to spirits. Science as a whole isn't treated poorly (positive examples include The Mechanist and Sokka), but its more often exploited by the Fire Nation, and the butt of some early jokes given the magical nature of the show.
* Avatar: The Last Airbender talk about their pasts quietly remembering them in the form of flashbacks.
* Avatar: The Last Airbender thanks to Cactus juice. Apparently nothing is quenchier.
* Avatar: The Last Airbender" that Azula's lightning attack on Aang in the season two finale succeeded in killing him and he was only brought back by Katara using the spirit water to heal him. He even says as much:
* Avatar: The Last Airbender that carries throughout the rest of the show.
* Avatar: The Last Airbender that chronicle the adventures of the Gaang that are not shown in the TV series.
* Avatar: The Last Airbender that has a total of 5 Achievements worth 1,000

Gamerscore, which you can unlock within the first five minutes of playing the game. The game gained a thriving aftermarket on Amazon and in gaming stores on the basis of this alone.
* Avatar: The Last Airbender that he could spend his life searching and never find a greater store of knowledge. The supernatural librarian, Wan Shi Tong, charges new knowledge from visitors and sends out fox familiars to retrieve more.
* Avatar: The Last Airbender that led to him being sentenced to being boiled in oil. However, when a Fire Nation squad invades the village and goes on a rampage, the terrified mayor quickly changes Aang's sentence to community service to allow him to fight the Fire Nation off.
* Avatar: The Last Airbender: The Air and Fire temples are both locked with mechanisms which can only opened by the appropriate bending discipline being used on the doors.
* Avatar: The Last Airbender, the Air Nomads are depicted as having had a caste system where they either kicked out Non-benders or forced them to work for them. Pema is the grandchild of a Non-bending Air Nomad who was kicked out. Pema is also a part of a Non-bender Equal Rights movement herself, showing that there's still problems between Bender and Non-Benders.
* Avatar: The Last Airbender: The antagonists have numerous, in a flashback, one thinks of sending new recruits in a suicidal charge to distract the enemy.
* Avatar: The Last Airbender, the author's final story before departing the series.
* Avatar: The Last Airbender, the Avatar from the sequel series, also has this ability and was trained by Katara herself.
* Avatar: The Last Airbender the ball in midair, at about 20 ft. above the court! The shot scorches the net and is the game winning point.
* Avatar: The Last Airbender, the Blue Spirit is Zuko's masked alter-ego.
* Avatar: The Last Airbender, the creators flew all over the world to find inspiration and art references for architecture and landscaping, studied martial arts in order to create realistic combat sequences, and hired someone with a PhD so that all the Classical Chinese ideographs seen in the series would be accurate. They also hired consultants for these things.
* Avatar: The Last Airbender. The Dai Li took pains to make sure it stayed that way to keep the people of Ba Sing Se from going into a panic and to limit the capital's involvement with the war that would screw up their way of living.
* Avatar: The Last Airbender, the different nations typically have names that follow phoneme patterns. The Water Tribe uses hard K sounds and lots of O's and A's (Katara, Korra, Noatok, Hakoda). The Fire Nation uses Z's, O's and I's (Ozai, Zhao, Sozin, etc). The Air Nomads use mostly real life Tibetan and Chinese names or names that sound similar. The Earth Kingdom has no strict pattern.
* Avatar: The Last Airbender, the Earth Kingdom is known for hurling massive rock projectiles shaped like Chinese coins, with square holes in the middle so they can be lifted up while standing above. Guess how Aang manages to dodge one of them.
* Avatar: The Last Airbender, the Earth Rumble Earthbending tournament seems to be a mix of kayfabe storylines and personas combined with earnest bending competitions. After Toph Beifong defeats The Boulder to retain the championship belt, Xin Fu opens the arena to all challengers and actually pays up when Aang defeats her. Later, when The Boulder notices that Aang didn't do any Earthbending and concludes that Toph and Aang conspired for her to take a dive, Xin Fu is outraged at the thought that he was cheated.
* Avatar: The Last Airbender The Ember Island Players play it straight. All of the adolescent characters are played by very obviously adult actors.
* Avatar: The Last Airbender, the essential areas of the main characters' pasts are revealed through flashbacks. Except for Uncle Iroh's; all that is revealed about his backstory come in the form of vague statements by characters who know more than we do.
* Avatar: The Last Airbender the Fire Nation kids gradually put headbands on so that the headmaster is tripped up with ringers for long enough that Aang can leave.
* Avatar: The Last Airbender the first time he saw Mai and Zuko in the same room together again.

* Avatar: The Last Airbender. The first time we see this, it's trying to attack a man for coming onto its territory.
* Avatar: The Last Airbender: The Foggy Swamp is initially depicted not as evil but definitely as very creepy (visions of the dead, scary noises, etc.). Meanwhile, the residents of the swamp are hunting the main characters for dinner. Though once all the misunderstandings are sorted out, it's not that bad a place.
* Avatar: The Last Airbender, the four main societies rely heavily on this, to the point where their technology parallels our own despite the mid-19th-century-esque setting. In fact, non-magical complex devices are occasionally referred to as "fake bending" (example: explosives = fake firebending).
* Avatar: The Last Airbender: The Freedom Fighter Smellerbee is frequently mistaken for a boy, a misconception which she is somewhat sensitive about and quick to correct.
* Avatar: The Last Airbender, the Gaang encounter a village of people who hate the Avatar because they blame one of Aang's past reincarnations, Avatar Kyoshi, for killing their leader, Chin the Great. Sokka and Katara try to investigate that Aang is innocent. In the end, after Aang dresses up as Kyoshi, she manifests through his body and tells the truth about what really happened. She confesses that she did indeed kill him, as when she separated the peninsula from the mainland to protect her people, Chin the Great was standing on a collapsing rock, and as he didn't move away, he fell to his death. The villagers still consider Aang guilty and decide to punish him by boiling him in oil, until Aang saves them from the Fire Nation and turn it into a celebration day.
* Avatar: The Last Airbender:" The Gaang hatches a plan to get Katara arrested for earthbending. When Katara says the cue, "I'll show you who's boss... Earthbending style!", Aang is distracted by a butterfly and doesn't perform his part. She then repeats the cue, angrily, "I said, 'Earthbending style!'", causing him to wake up and make with the fake earthbending.
* Avatar: The Last Airbender: The Gaang is being attacked by pirates, and Katara has just managed to perform the "water whip" correctly (she's been practicing it the whole episode). Aang and Katara immediately begin praising each other, until interrupted by Sokka, who has been taken prisoner.
* Avatar: The Last Airbender The gaang meets a family fleeing the war, in "The Serpent's Pass" episode, and accompany them to FullMoon Bay. There they see that there were countless others who were also fleeing the war, and had even set up a camp while awaiting safe passage to Ba Sing Se.
* Avatar: The Last Airbender, the gang is talking about some strange creature, and Aang simply gives a perfect flat "What."
* Avatar: The Last Airbender, the group are stuck in the desert with only a small amount of water in their pouch. Then Momo spills it and Sokka goes crazy... that is until Katara calmly bends the water out of the sand. Sokka sighs and says "Oh, I forgot. Bending."
* Avatar: The Last Airbender. Their animosity is played for laughs, and in the end they're tricked into making peace by Aang.
* Avatar: The Last Airbender their numbers seem to be recovering, if Zuko's pet dragon Druk is anything to go by.
* Avatar: The Last Airbender: The main characters use the sewers to sneak back into Omashu. There's also supposedly a "secret river" (but not secret enough not to be discussed in Fire Nation grade school) that leads to the Fire Lord's palace.
* Avatar: The Last Airbender, the main protagonists range from age 12 (Aang and Toph) to 16 (Zuko) and yet even the oldest male is seen as significantly shorter than adults who aren't portrayed as extremely short.
* Avatar: The Last Airbender" (the Mechanist), and "Azula's posse" consisting of "the gymnast" and "the bored girl" (he and Rob have considered several nicknames for the latter).
* Avatar: The Last Airbender, the Mechanist's people fight the Fire Nation with smoke, fire, and stink bombs. They also use presumably deadly fire bombs, though any death they might cause is obscured by the smoke and flash of the explosion. The fate of people "non-lethally" thrown off the cliffside of their mountain fortress

is never questioned. This becomes a standard for fighting on Avatar as a whole: people get flung around and bruised on screen all the time, but death is only ever implied and done off-screen.
* Avatar: The Last Airbender, the Northern Water Tribe eventually phased out their warrior caste in favor of adopting a professional military, while the Southern Water Tribe are still more warrior-like as they were in the Hundred Year War.
* Avatar: The Last Airbender the notorious deserter General Jeong Jeong in the same day? You'll not only keep you job, you'll get promoted and eventually become commander-in-chief. You have to wonder what Ozai would have done if Zhao's "doom the planet" strategy had worked out as intended.
* Avatar: The Last Airbender. The others weren't actually looking for the Avatar, but their reactions when they find out that that's him definitely fit. The kid had his reasons for trying to hide it.
* Avatar: The Last Airbender. "The Puppetmaster" is a horror, conveniently aired near Halloween.
* Avatar: The Last Airbender, there are a lot of romances between benders and non-benders:
* Avatar: The Last Airbender. The reason for this plays a part in the ending of the fic.
* Avatar: The Last Airbender, there's a tamer version of this. Team Avatar gets some pentapi (tiny octopi with five arms instead of eight) to leave sucker marks on their necks and faces. To get out of the Fire Nation-infested Omashu, they have to act like they're infected with a virus, persuading the guards to let them out.
* Avatar: The Last Airbender, there were four, all descendants of the last survivor. Korra manages to get some by the first season finale, but all airbenders we see aside from this small group of people are from the past. Then season 3 comes around, and now hundreds of airbenders are running around thanks to Harmonic Convergence.
* Avatar: The Last Airbender: The series is influenced by a variety of different cultures from Asia and even parts of the Americas and Oceania, although Chinese cultural influences are the most dominant.
* Avatar: The Last Airbender", the snow wall Sokka is standing on has plenty of these, including his snow watch tower, which collapses as Prince Zuko's ship approaches.
* Avatar: The Last Airbender (the wackiness by then having moved over to Toph and Sokka).
* Avatar: The Last Airbender The warden believes him, because the guard had earlier punished him for a trumped-up offense by throwing him in the same cell he used to escape.
* Avatar: The Last Airbender: The war with the Fire Nation, which began during the reign of Fire Lord Sozin a hundred years before the start of the story proper.
* Avatar: The Last Airbender. They both demand total obedience and subservience from their underlings, and the former permanently scarred and banished his son simply for speaking out of turn. The latter is an extreme perfectionist whose "friends" only follow her because they're terrified of disobeying her.
* Avatar: The Last Airbender, they find him back. Zuko also mentions his sister Azula offhandedly (she’s also the firebender in the opening credits) well before she’s introduced in the show.
* Avatar: The Last Airbender. They have the ability for their spirits to communicate with the next Avatar after death, and they appear to be able to share dreams.
* Avatar: The Last Airbender; they were one of Avatar Kyoshi's pet projects.
* Avatar: The Last Airbender, thirteen-year-old Prince Zuko's Agni Kai against his father could be seen as a particularly horrifying example of this. Zuko's kneeling, tears, and desperate pleas for forgiveness were all watched silently by a crowd of hundreds after he was tricked into a duel with the Fire Lord, and some individuals could be seen wearing creepily satisfied expressions when he got the scar.
* Avatar: The Last Airbender this by stating that Sozin ruled for 20 years after he started the war, Azulon was born the year the war started and ruled the next 75

years of the war, and Ozai in turn ruled for the last 5 years of the war.
* Avatar: The Last Airbender. (This is a friendship pairing, not a romantic one, mostly because if EVE found out, Azula would not survive the night.)
* Avatar: The Last Airbender. This is a friendship pairing, not a romantic one, mostly because if EVE found out, Azula would not survive the night.
* Avatar: The Last Airbender this is replaced with what seems to be a simpler seat... that's hidden behind a wall of flames in an otherwise unlit hall.
* Avatar: The Last Airbender, this is the first clue Jet (synonym for "black") is not such a good guy.
* Avatar: The Last Airbender This just makes the villagers even angrier until Fire Nation thugs raid the village, forcing them to rely on Aang and friends to fend them off.
* Avatar: The Last Airbender This just makes those trope subversions all the more jarring and awesome.
* Avatar: The Last Airbender, This seemed, at first, to be a recurring characteristic of the Avatar.
* Avatar: The Last Airbender this to preserve his cover identity and claims he wears it to cover an embarrassing scar.
* Avatar: The Last Airbender. This was likely because a definite "yes" would feel cheap, but a definite "no" would seem rather harsh.
* Avatar: The Last Airbender, though Aang's efforts do end up saving a village.
* Avatar: The Last Airbender, though Azula still remains an active threat along with him.
* Avatar: The Last Airbender. Though this is expressed only by minority firebender soldiers, who sport white, skeleton-like masks for intimidation. Also possibly justified by the fact that firebending probably involves a lot of ashes, grit, burning debris, and other stuff you don't really want to get on your face.
* Avatar: The Last Airbender Tim is the episode's writer, Tim Hedrick.
* Avatar: The Last Airbender to Aang, since he has a tendency to not taking his training seriously which is not good if the group wants to end a hundred-year war and their enemies chasing them.
* Avatar: The Last Airbender to Fire Lord Ozai, who is one of the greatest strategists in the series as she single-handedly masterminds a plan to take over the Earth Kingdom's capital, dealing the heroes a crushing defeat at the end of Book 2. The other is War Minister Qin, who is responsible for developing whatever military innovations the Fire Nation comes up with, including the Drill and the airships.
* Avatar: The Last Airbender to help them plan their invasion of the Fire Nation. Instead of using a stick to move the little pieces representing various troops, they just earthbend the pieces across the board.
* Avatar: The Last Airbender to help track down the man that murdered her mother so she can kill him. Aang tells them not to go because revenge isn't worth it and she should just forgive him, but Zuko agrees with her and they set off. They track the man down, but seeing how disgusting and pitiful he is she decides he isn't worth dirtying her hands. She and Zuko return and Aang assumes she's forgiven the man, but the only one she's willing to forgive is Zuko; The murderer was simply too pathetic to kill, but Zuko is genuinely remorseful and trying to repent.
* Avatar: The Last Airbender: Toph and her friends have never been shy about pointing out her blindness:
* Avatar: The Last Airbender, Toph Beifong, her father Lao, and her mother Poppy are the only characters to possess a surname. This itself isn't too far off with the traditional Asian theme of the series, in that traditionally, in East Asian cultures, family names were reserved exclusively for members of high nobility, much like the wealthy Beifong family, before common people started adopting family names for themselves. Alternatively, this may be due to the Anglicisation all of the names have undergone, which can be seen when comparing the names given to the Chinese characters occasionally used to spell them. An Ang as written, for example, is rendered as Aang when spoken, and Ai Luo becomes Iroh. In case you're wondering, yes that's probably how they made their names.

* Avatar: The Last Airbender: Toph does this to Sokka. Unusually, Sokka is actually the taller and longer-limbed party, but Toph is keeping him from taking back his club, which she has in her other hand, sticking out in the opposite direction.
* Avatar: The Last Airbender. Toph is captured by Xin Fu and Master Yu, (her old earthbending mentor) in a metal box, and tries to escape by saying that she needs to go to the bathroom. Yu almost falls for it when Xin Fu points out that this is probably a ploy and they ignore her request.
* Avatar: The Last Airbender: Toph is the only character to enjoy the completely biased Fire Nation-sponsored play recapping the Gaang's adventures (despite not being able to see it), in part because the play's version of her has much the same personality, if a laughably wrong physical profile (the play's Toph is a burly adult man instead of a twelve-year-old girl).
* Avatar: The Last Airbender: Toph's parents were unwilling to let their blind daughter practice any tougher earthbending than controlled forms and breathing exercises. Toph's preference? Underground earthbender show wrestling. She snuck into those under her parents' noses.
* Avatar: The Last Airbender: To some extent, Mai to Azula and Ty Lee. She's a year older than them and fits the aloof, snarky profile. Also, Katara to Toph, when they're not fighting or annoying each other.
* Avatar: The Last Airbender: Toward the end of the second season, the Gaang splits up and Aang decides it's finally time to tell Katara how he feels. He manages to get the word "I" out before Sokka unwittingly jumps in and gives him a noogie.
* Avatar: The Last Airbender tricked him into doing it again by throwing a chicken leg at him the first time they visited Omashu.
* Avatar: The Last Airbender trustworthy, even if that doesn't apply to all of them.
* Avatar: The Last Airbender Ty Lee and Mai decide they want to be out of the iron grip of Azula and try to leave her. This is the start of her downfall.
* Avatar: The Last Airbender Ty Lee hits on Sokka almost every time they share the screen together. Of course, she's not really that much of a villain, but she's Azula's sidekick and usually hits on him while they're fighting.
* Avatar: The Last Airbender. Ty Lee in a bikini also gets many admirers.
* Avatar: The Last Airbender universe, citizens of the Fire Nation are taught that the other three elements, water, air, and earth, are inferior to fire, and hold their users in lower esteem than firebenders. They are also a martial culture, where almost everyone serves in the military, and obedience to the state is taught in the national school curriculum. Although originally presented as villains in the show, it is later on revealed that firebenders are more nuanced and complicated. Regardless, they generally have short tempers and enjoy settling issues through combat.
* Avatar: The Last Airbender. Until one of the Fire Sages gained enough power to declare himself Fire Lord.
* Avatar the Last Airbender) uses various themes throughout her mostly unrelated stories: Azula is usually depicted as lesbian and in a relationship with Ty Lee, Ozai is physically and sexually abusive towards his daughter Azula, and Mai's parents are physically abusive.
* Avatar: The Last Airbender use to change their element between a liquid and a solid.
* Avatar: The Last AirbenderVariants on this game put restrictions on what you're allowed to click on. It is also known as wikiracing, when it is played in a competitive form, with the aim being to get from one page to another either in less time or less clicks than your competitors.
* Avatar: The Last Airbender, Wan Shi Tong, the knowledge spirit in the shape of an owl has come to believe this of humanity, saying that the only reason humans ever come seeking information is so they can use it to destroy others.
* Avatar: The Last Airbender war for world domination, and committed genocide against the Air Nomads.
* Avatar: The Last Airbender war in Ba Sing Se." (Do not mention the 100-year war.)
* Avatar: The Last Airbender was a waterbender who was imprisoned by the Fire

Nation during the Southern Water Tribe raids, but escaped through the use of Bloodbending, a creepy variant of Waterbending she developed while she was incarcerated. Upon her escape, she fled to a Fire Nation town and vented her hatred of the Fire Nation by imprisoning people herself in a mountain.
* Avatar: The Last Airbender" was highly precise but not very accurate.
* Avatar: The Last Airbender, waterbending is a primarily defensive art. Waterbenders do not have the more typically aggressive offensive moves, instead focusing on redirecting their opponents' moves away from themselves, and most of their offense comes from their defense by turning their opponents' energy against them. In the context of the Hundred Years War, the Northern Water Tribe demonstrates this strategy as a whole. As Zhao pointed out, they were able to survive a hundred years of war as the landscape itself was an icy fortress. However, they lacked the ability or resources to mount any offensive campaigns against the Fire Nation. Notably, Iroh's defensive tactic to redirect lightning is inspired by waterbending tactics.
* Avatar: The Last Airbender. "We are the sons and daughters of fire, the superior element!" a military rally is told. There's genocide in the back-story, attempted genocide in the climax, there's propaganda, revisionist history, indoctrination of the young, and the whole take-over-the-world thing.
* Avatar: The Last Airbender We don't find out what happens to them until over halfway through the next season.
* Avatar: The Last Airbender, we never see one, but it's referenced. When the kids are at a Fire Nation festival in "The Deserter", Aang spots a big crowd and wonders what it's for. Sokka says, "Knowing the Fire Nation, it's probably an execution."
* Avatar: The Last Airbender). Were they going to win and spend the next ten partying? On top of that, attentive viewers also would've caught Azula finding out about the invasion in season 2. There was pretty much no way it would've worked.
* Avatar: The Last Airbender. We see Koh wearing the monkey's face later in the episode.
* Avatar: The Last Airbender we see that, despite everything, Aang managed to grow up into a Cheerful Adult.
* Avatar: The Last Airbender. What's there to say? Ruthlessness and steadfast ambition run in the family.
* Avatar: The Last Airbender: When Aang needs to get to get to a Fire Nation temple, he finds a blockade between him and his destination. To get past them, he pulls Appa into a steep dive to build speed and then rushes past, dodging fireballs the whole way. Zuko, following Aang wherever he goes, is about to perform a more traditional run, but Commander Zhao decides to let him through and follow after.
* Avatar: The Last Airbender When a certain comet passes through the atmosphere it supercharges the firebenders' abilities, which is a major plot point throughout the series.
* Avatar: The Last Airbender when angered. It's unknown which they prefer.
* Avatar: The Last Airbender, when Azula gave a very threatening speech to the Dai Li, staring down one agent in particular who Mai later said looked like he was going to pee his pants.
* Avatar: The Last Airbender. When Bumi welcomes the Gaang to "Old People Camp," the Extras pop on screen to declare, "Dinner at 4 o' candle and bedtime at 6:30 o' candle."
* Avatar: The Last Airbender when earthbending gets involved, then subverted in one of the few deaths in the series.
* Avatar: The Last Airbender when former Avatar Kyoshi used the power boost of the avatar state to separate her home peninsula from the Earth Kingdom mainland, creating Kyoshi Island.
* Avatar: The Last Airbender, when he is trying to find a good weapon. He keeps falling over or smacking himself until he finds a sword.
* Avatar: The Last Airbender when he walks up to Aang and company and gives the first bit of the same speech, intonation and all.
* Avatar: The Last Airbender, when Katara gives a dramatic speech encouraging a group of prisoners to revolt... and they all pretty much ignore her, unconvinced

they can win. Thankfully, the second attempt goes better all thanks due to the one prisoner who actually knew Katara and had only been in the prison for a day.
* Avatar: The Last Airbender when Sokka, after declaring "We scammed that old lady good!" is stopped by a female security guard, who turns out to be Suki without her Kyoshi make-up.
* Avatar: The Last Airbender" when Sokka and Zuko leave, claiming they've gone fishing while they're really going to break Sokka's father Hakoda out of the titular prison.
* Avatar: The Last Airbender, when Sokka's and Katara's canoe runs into an ice field:
* Avatar: The Last Airbender. When the guard comes to tighten them, he heats up the metal, causing them to drop him.
* Avatar: The Last Airbender, whereas Zuko was going to suggest a more diplomatic approach.
* Avatar: The Last Airbender, where he revealed that he mainly stayed out of the spotlight because he just wanted to live a normal life, but still maintains a huge amount of respect for the show.
* Avatar: The Last Airbender Where Season 1 ends with the heroes victorious, season 2 ends with them battered and broken and having lost much that they had gained.
* Avatar: The Last Airbender where Toph, Sokka and Aang spend an episode cheating Fire Nation folk out of their money with such varied methods as cheating a cheater in Three-card Monte to a full-on flopsy scheme. They end up in trouble, but only because they indirectly become famous. They never give back any of the ill-gotten goods either.
* Avatar: The Last Airbender, where Zuko voices out against sending in a team of right out of training cadets into battle to be used as a diversion in the war. However it was this action that prompted his father to scar his face and banish him in the first place. Played straight almost all the time, to show the heroes/villains as prodigies, or tougher than the norm. The Heroes commonly go off against greater odds (like the earth kingdom palace guard) and come out on top, the entire Earth Kingdom army failed to stop the Fire Nation Invasion, and an elite team all went down against Ty Lee. During the Seige of the North Pole, this trope was combined with mooks, during the day, the (sun-empowered) Fire-Nation began defeating Water Benders left and right, during the night, the (moon-empowered) water benders beat them with ease.
* Avatar: The Last Airbender Which means to be sure he gets the heroes, he is willing to suffer one of the most horrifically agonizing deaths imaginable.)
* Avatar: The Last Airbender", which utilises spinning to generate the maximum amount of energy. Aang mostly just spins his staff.
* Avatar: The Last Airbender": While doing the whole detective shtick, Sokka wears one when investigating the giant footprint of Avatar Kyoshi.
* Avatar: The Last Airbender. While he's apparently accepted he will never be able to force Toph to come back home, now he just insists she cannot be the daughter he raised, and Toph isn't about to be something she's not to get him to pay attention to her.
* Avatar: The Last Airbender. While he's gone, the rest of the group fails to think of anything to do while waiting for him to return, due to Sokka being the team's strategist and the one who planned even their basic activities. Katara's poor attempts at comedy in place of her comic relief brother doesn't help matters.
* Avatar: The Last Airbender. While it wasn't exactly his home, Aang was rather alienated by the changes made to the Northern Air Temple so refugees could move in, but came to accept that it's their home now.
* Avatar: The Last Airbender: While stopping Chin the Conqueror and creating Kyoshi Island, Avatar Kyoshi causes Chin to fall to such a death when he stands on the newly-formed cliff, refusing to accept his defeat, and the rock crumbles. However, Kyoshi makes it very clear that she doesn't see the difference between a Disney Villain Death and killing him herself; the end result was that she was responsible for Chin's death.
* Avatar: The Last Airbender. While they both oppose the Fire Nation, the Gaang

follows this trope and Jet doesn't, much to the Gaang's horror when they find out about his plan to flood a village to kill some Fire Nation soldiers, even though civilians from the Fire Nation and Earth Kingdom would be caught in it as well.
* Avatar: The Last Airbender. While Zuko does still get in a few good moments here and there, it still felt like a long drag to resolve one character's story arc.
* Avatar: The Last Airbender, who are able to send jets of fire out their feet or hands, allowing flight.
* Avatar: The Last Airbender who can suck food into his cage, this doesn't work so well.
* Avatar: The Last Airbender, who is the only one who could possibly match the Fire Lord in battle, himself admits that if anyone else were to do it, it would be seen by history as senseless violence, or a power struggle.
* Avatar: The Last Airbender who think it's a sinful, evil cartoon. Because it encourages kids to do "drugs".
* Avatar: The Last Airbender", who waves a flag around, talking in a bad Russian accent, and then sings something which was probably not actually the Fire Nation anthem.
* Avatar: The Last Airbender will lead to trouble. At least half the fandom refuses to acknowledge that it exists and the other half that does sincerely wishes it didn't; this includes the creators of the animated series themselves.
* Avatar: The Last Airbender, with Aang trying to settle an ancient grudge between two gangs, neither one of which can agree on what started the grudge. Since there was no way to know which side was right or wrong, Aang just fibs and tells both tribes the "real" story, exonerating both sides in the dispute over who started the grudge and making them think the reason for being at odds really was a silly one after all.
* Avatar: The Last Airbender, with its female lead, completely lacks any sort of toyline.
* Avatar: The Last Airbender with Jet. When he's first introduced, he uses bird calls to communicate with the rest of his group.
* Avatar: The Last Airbender with no regard for how it would hurt the planet. This was widely considered a bad idea even by Fire Nation General Iroh and made a lot of people angry, including the Avatar and a very put-out Ocean spirit.
* Avatar: The Last Airbender, with the heroes barely escaping with their lives and leaving their parents captive.
* Avatar: The Last Airbender would obey anyone who said "The Earth King has invited you to Lake Laogai," without question, their compliant state signalled by falling limp and responding "I am honored to accept his invitation."
* Avatar: The Last Airbender, yet somehow managed to be pretty spot on about the metaphysics of the world.
* Avatar: The Last Airbender." Zuko and Mai's fight is basically this. Zuko is all emotion and he lets his temper and impulses get away from him. Mai is all stoicism to the point where she doesn't seem to care about anything and can't express any emotion. Eventually they come to understand each other, with Zuko learning to think more calmly and rationally and Mai learning to be more free with her feelings.
* Avatar: The Last Airbender, Zuko appears to be meant as Co-Dragon to Azula under Fire Lord Ozai, even if his heart wasn't really in it.
* Avatar: The Last Airbender: Zuko brings things from the house to burn in the episode where he, Azula, Mai and Ty Lee go to Ember Island. The house gets destroyed properly some episodes later as he attacks Aang in the process of training him in firebending.
* Avatar: The Last Airbender: Zuko defeats Zhao in an Agni Kai duel but doesn't kill him or leave him scarred. Satisfied with his victory Zuko walks away only for Zhao to get enraged and try striking while his back is turned. Iroh intervenes and knocks Zhao back to the ground, admonishing him for his disgraceful and dishonorable display in defeat.
* Avatar: The Last Airbender, Zuko encounters one of these, a plank falling out from under his ostrich-horse. He and his animal make it.
* Avatar: The Last Airbender, Zuko fears a dream Sokka has of the gang as penguins

and a Penguin!Suki giving him a bag to lay on is prophetic of a future pregnancy.
* Avatar: The Last Airbender; Zuko has a scar running across most of one side of his face, from his nose to his ear. His eye is surrounded by damaged tissue and looks unharmed, but Zuko lacks peripheral vision and has damaged tear ducts under it.
* Avatar: The Last Airbender. Zuko hurriedly mentions that he'll be sixteen in two months (sixteen being the age of legal majority in the Fire Nation), and the result is both funny and sad.
* Avatar: The Last Airbender. Zuko is also caught in much the same way after falling from an airship during a battle with his sister Azula.
* Avatar: The Last Airbender, Zuko is put in this position by Toph. She stays in a relationship with him but has a strong need to stay free. She goes her own way, sometimes appearing in Zuko's life again. He still waits, even being married to Mai, because it's Toph being unreachable that attracts him.
* Avatar: The Last Airbender, Zuko is thirteen when he attends his first war meeting, and is horrified at this type of military. Protesting gets him banished and a nasty scar.
* Avatar: The Last Airbender. Zuko never mentions a wife and Izumi’s son Iroh (who looks like Zuko) only talks about Zuko and Izumi, he never brings up his grandmother. Izumi only speaks for about thirty seconds in the show and has a non-speaking cameo a few episodes earlier so it’s not like she ever gets to say anything about her mom either. The creators also have explicitly ignored the question about who her mom is.
* Avatar: The Last Airbender Zuko takes his family's portrait and tosses into the fire without a second thought during the campfire scene. It's a powerful representation of how disillusioned he is with pretending his family isn't dysfunctional. Interestingly enough, Azula doesn't stop him from doing it either.
* Avatar: The Last Airbender. Zuko takes off his shirt and the camera cuts straight to nearby bikini girls enjoying the view.
* Avatar: The Last Alicorn: Discord explains his during a motive rant.
* Avatar: The Last Alicorn's last chapter, Twilight begins getting land for the future Republic City, and Tirek escapes his bonds, setting himself up as a future foe and the possible equivalent of Amon and a little bit of Vaatu for the future.
* Avatar: The Last Alicorn: Sweetie's plan to take over Fillydelphia and eliminate all the water and fire benders along with the avatar and the great dragon would've gone perfectly, if it wasn't for AJ learning metal-bending, allowing her to escape, and provide Team Avatar an avenue to escape.
* Avatar: The Last Alicorn: Zig-zagged with Nightmare Moon. On one hand, she's easily able to defeat Vinyl and Octavia and Twilight says she doesn't stand a chance against her, on the other, when it comes time to actually fight her, she gets one-shotted by the Elements.
* Avatar: The Legend of Korra establishes that the Avatar Cycle exists primarily because Wan came down with Spider-Man Syndrome.
* Avatar The mystic considers what to do with the dead body on his hands, when the obvious solution hits him. The story concludes with the reported death of the mystic, having made the lover his universal heir.
* Avatar, the Na'vi are amazing natural archers, have a deep empathy for their environment, are not ones to really mess around, and are tall, slender, and lacking in body hair. The Humans are incredibly skilled at craftsmanship, construction, and engineering, utilize big guns, mining machines, and high impact weaponry, live in dark multi-layered cities with lots of technology and little vegetation and natural light, mostly lack a spiritual connection with their world, and are rather gung-ho and upfront, not to mention short, stocky and hairy, when compared to the Na'vi.
* Avatar, the Na'vi has an alternet in the form of Eywa, an overmind-like, super-intelligent being made of alien trees, which is linked to most advanced life forms on Pandora and has a form of internet (i.e. instant global communication) built of its roots and seeds.
* Avatar: The nights on Pandora are lit by the moon's biolumiscent flora.
* Avatar, then you're really in trouble. On top everything else, humans can't even

breathe the air — it has too much carbon dioxide and hydrogen sulfide.
* Avatar, the protagonist is a human soldier falling in love with a warrior of the tribe he's hired to defend the evil megacorporation against.
* Avatar, there is a slight Interservice Rivalry within the RDA post at Pandora. The scientists of the Avatar Program wish to have a peaceful negotiation with the Omaticaya, but the security force, led by Quaritch, wants to use lethal force against them.
* Avatar: The titular avatars are Na'vi clone bodies that humans can remotely control to explore Pandora freely (something necessary since they can't breathe Pandora's atmosphere), as well as to earn the Na'vi people's trust and hopefully reach a diplomatic conclusion to their war. The protagonist agrees to controlling an avatar because he's paraplegic, and thus wants an avatar so he can walk again, temporary as it may be.
* Avatar. The whole fuss about the technological achievements necessary to pull the movie off, including 3D digital film cameras, motion capture refinements, etc. The never-fully-disclosed but definitely astronomical budget and the marketing-induced hype also contributed to its status as this.
* Avatar tried numerous times to penetrate it; one siege of note took six-hundred days just to break through the Outer Wall and the second one involved a giant drill. The only reason the city eventually falls is due to an inside job.
* Avatar Trilogy with this situation, as later editions dropped the aging aura as a ghost ability completely.
* Avatar U, is themed around university but isn't aimed at that demographic.
* Avatar under a tree, but his hiding place is not that effective; the beast still manages to claw at him fairly decently.
* Avatar uses for bending than there are combat uses. This makes sense given that bending, while uncommon, is not so much seen as a superpower as a special talent in the Avatar-verse (like double jointed or photographic memory), so people would use it for a variety of purposes.
* Avatar, uttered calmly as she tries to retain control of her Samson after it was shredded by heavy machine gun fire.
* Avatar via a 'plug' in their hair. Although the humans definitely have the technological advantage, and even then the Na'Vi seem to take to guns pretty quickly...
* Avatar was on track to better its box office record in 2019, both old and new fans alike were inspired to revisit it in its tenth anniversary year.
* Avatar was so bad, many critics began to dissect it and complain about even the slightest of its flaws, to the point where even that backlash and all its criticisms were considered overblown.
* Avatar was the most expensive film ever made for a reason. The otherworldly environments and creatures get a lot of screen time, and many scenes seem to be designed specifically to show contemporary advances in 3D filmmaking.
* Avatar: When Grace Augustine passed away, she became one with Eywa: The Great Mother of the spirit world of Pandora. The movie as well as Na'vi mythology implies that this happens to ALL life on Pandora when they die.
* Avatar when the heroes are trying to formulate a plan before the third act. Knowing the RDA will be coming to bomb the Tree of Souls that would all but decimate the Na'vi and their culture, pilot Trudy points out that the human research crew and Na'vi will be severely outgunned. Jake lays out their "home-field advantage" in that when the RDA navigate through the floating Hallelujah Mountains by air to reach The Tree, they'll be flying blind and have to fire line-of-sight, as the area's flux vortex will interfere with the RDA gunships' electronic instruments. In turn, the Na'vi and their banshees, along with Trudy (who unlike most pilots has flown the mountains) and her gunship, can use their experience with the layout to get the drop on the RDA, and attacking from above will give the Na'vi arrows the proper velocity and angle to penetrate the weak points of the gunships.
* Avatar who polluted their own home planet to the brink of ecological collapse.
* Avatar with Lissa, she confesses that she was pranking him to get his attention.
* Avatar, with the ability to use a hunting/war bow as tall as an average human man

and their bones are practically natural carbon-fiber.
* A vault of supernatural artifacts too dangerous to be used is protected by, among other things, an immense golem with a weakness-inducing aura. When they have to open the vault after a robbery, the supernatural entities are all visibly immoblized, while the ARCHON agents Maxima, Dabbler, and Sydney make short work of the golem. When asked why the aura didn't affect them:
* Ava XOX end up naked at school. She swears she will never use these.
* AV Club as "a better fashion statement than a gaming console", before using this trope by name upon realizing that the R-Zone looked incredibly stupid.
* AV Club episode "Dipper vs. Manliness" claims that "Dipper’s freakout over the woman looking for the 'mailman' has to be the best pun-triggered emotional breakdown of 2012."
* AV Club: he has said that he considers a D grade to be worse than an F because an F is so extraordinary in its horribleness that it is almost worth watching for that achievement, whereas a D is merely forgettable and dull.
* AV Club, such as "We Are the World", "Do They Know It's Christmas?", and more obscure efforts, pointing out more than once that the songs and videos made for them wind up coming off as narcissistic by promoting the celebrities singing them as much as, if not more than, the cause.
* A VCR flashing 12:00AM (and DVRs for that matter) have a clock either have an internal clock battery or can fetch the local time from the broadcast metadata.
* Avdol, leaving only his hands. He attempts this on Polnareff as well, managing to get his heels but ultimately failing to land the killshot. It pretty much kills Iggy in the 1993 OVA, though.
* A Veet ad had this. When they stated that eight out of ten women were happy with the product, they showed a lineup of eight women, with one of them being black. Curiously, they were all dubbed over with the same voice.
* A vegetarian that appears in one strip who insists that he may be weedy but is "deceptively healthy" bears a striking resemblance to Adams himself (who is a vegetarian in real life).
* A veil being a piece of cloth worn across or over the face, and a vale being a wide river valley.
* a veiled shot outside the bedchamber. By the next page, he's shown being dressed by two more of his concubines, while several of his harem are seen passed out on the floor around him—with another shown limp in her bed.
* Aveline and Donnic's first on-screen meeting consists of Hawke & Co. showing up to rescue Donnic from thugs.
* Aveline gets adorably flustered when faced with anything related to Donnic; Fenris flips out if he's
* Ave Maria: One of the ride services Moshe manages to call has the standard "For X, Press 1" option menu. The only problem is that Moshe is using the nuns' old rotary telephone. He slams the phone down in frustration.
* Avencast: Rise of the Mage enemies, but to draw them into striking range of their gigantic cleavers.
* Avencast: Rise of the Mage had one woman of the Kyranian empire send her children away from the civilization's final battle, though she intended for them to live rather than finish the fight later.
* Avencast: Rise of the Mage has a Spider Queen, complete with periodic additional mobs.
* Avencast: Rise of the Mage: The melee skill tree is called Blood Magic, but it's more likely to reference blood spatter from melee-range physical attacks than dark mysticism.
* Avenged Sevenfold album is dedicated to their late drummer, Jimmy "The Rev" Sullivan, who passed away after finishing the recording of the album in late 2009. Almost all of the lyrics were rewritten to reflect the band's pain over their loss. Even the CD case and booklet are filled with dedications to him.
* Avenged Sevenfold anyways)? Considering it's about a necrophiliac that kills his girlfriend, eats her heart and then gets killed by her resurrected corpse. Includes such lovely lines as

* Avenged Sevenfold, by the lines "Mother wash the devil from my hands" and "Somehow all the bullets bear my name" in "Angels", although the exact meaning of the song is somewhat ambiguous.
* Avenged Sevenfold has a song called "Buried Alive". Guess what it's about?
* Avenged Sevenfold involves both necrophilia between a live man and his love interest he murdered, the rising as a zombie of said love interest, the subsequent killing of the man by the woman, and their final marriage by an undead priest.
* Avenged Sevenfold. It's by little-known band Hell or Highwater, but M. Shadows does provide vocals.
* Avenged Sevenfold, particularly in the song "Paradigm", whose protagonist is saved from death and rendered immortal by technology, and wonders if he has lost his humanity.
* Avenged Sevenfold's "A Little Piece of Heaven" is a very disturbing example of this, in which a man kills his girlfriend for refusing his proposal, then has 'fun' with her corpse, before she becomes a zombie and kills him in return. They reconcile in hell, however, and come back to get married and engage in mass murder.
* Avenged Sevenfold's first number-one hit on the rock charts must have been a hard-rocking metal anthem, right? Wrong, it was actually a slow ballad called "So Far Away".
* Avenged Sevenfold's "Nightmare" has a little blonde girl covered in blood and smiling while tossing a ball around which is also covered in blood.
* Avenged Sevenfold's song about murder, necrophilia, zombies, and love, "Little Piece of Heaven" includes this gem:
* Avenged Sevenfold's song "Sad but True", adopting a similar structure, vocal melody and lyrical subject but giving it a more melodic and melancholic tone.
* Avenged Sevenfold The members noted that half a year after the release, there were still people who weren't even aware that a new album was out.
* Avenged Sevenfold, there is a line which says, "Ripped her heart out right before her eyes! Eyes over easy, eat it, eat it, eat it!"
* Avenged Sevenfold, we get a tolling bell directly after the end of the first chorus, as the music comes back in hard for the instrumental section and in the bridge before the third chorus. And they're definitely for doom, as the song is more or less whoever the narrator is telling the subject of the lyrics how he screwed up and is doomed for being evil. Oh, and how IT'S YOUR FUCKIN' NIGHTMARE!
* Avenged Sevenfold (whose name was inspired by the passage of Cain and Abel) Have a song based on the passage, Titled Chapter 4.
* Avengelyne: Co-created by Liefeld and model Cathy Christian, this character was a fallen angel who fought demons.
* Avenge Me! Ghosts can often appear to their closest friends or family. Like, you know,
* Avenge me sidebar. This one can also lead to ghosts becoming violent and angry if not avenged. They may explicitly say that they cannot rest easy in the graves until they are avenged.
* Avenger and the brief period of overuse that followed it being upgraded to the Delta version that, among other things, completed the transition to pulse cannons.
* Avenger-class, as well. In the lore of the series, Angra Mainyu was said to be so hideously weak that he barely even counted as a Servant, as in life he was basically just an unlucky peasant who got sacrificed because his village designated him as "all the world's evils." The one time he was ever summoned, he got killed almost immediately (which ended very badly, as no matter how weak he is, tossing the spirit of an embodiment of evil into your magic wish-granting device is a bad idea).
* Avenger constantly says she is a witch who wants to see the world burn.
* Avenger deals with a dying colony on Mars that's about to be crashed into by one of the moons.
* Avenger Goddess of another dimension, and can be bound to any object with the proper seal.
* Avenger Goddess, once Nick Fury learns that Natasha has been lying to him for years and maintained a joint loyalty to Fury and Diana, AKA Wonder Woman (who is

basically Natasha's adopted mother), he 'punishes' Natasha by assigning her the role of Tony Stark's PA as an undercover assignment.
* Avenger Goddess: Over the course of the flashback/World War II arc, it becomes rapidly apparent (and is eventually outright confirmed in Chapter 23) that for all his delusions of grandeur, the Red Skull is just Ares' puppet in his plans to test and corrupt Diana.
* Avenger/Jeanne is one to Saber/Arturia. One of Jeanne's abilities is Dragon Witch, which lets her control dragons. Saber has
* Avenger. Made even worse by the fact that the people torturing him included his friends and family, who had all agreed he was the source of evil.
* Avenger of Steel: Discussed by Black Widow, who notes that a lot of evil men are still fully capable of loving their mothers.
* Avenger of Steel, Natasha observes that this has been the World Security Council's recommended response to the last four major disasters- Loki's invasion, Zod's attempted terraforming, the Dark Elves' assault and the attack of Ao Shun the dragon- and each time it's been more practical to let the Avengers handle things.
* Avenger of Steel. Superman is shown to have a definite effect on the world other than supervillain battles.
* Avenger of Steel, when discussing how the Ancient One has a system for monitoring world leaders and influential figures to make sure that they're not possessed or magically influenced, and thus cannot be manipulated to cause wars or risk damaging the Sanctums by magical means, Clark reveals that apparently many of the crazier kings and emperors of antiquity were driven mad or possessed by magical beings, and that the Ancient One stepped up on surveillance due the existence of nuclear weapons and the like to ensure that they didn't do too much damage.
* Avenger Penguins episode "High Doom" shows Wild West outlaw Humongously Big Mad Joe and Caractacus P. Doom's ancestor Beauregard Doom falling into a jail cell.
* Avenger Penguins episode "The Quantum Mechanic" had Bluey's brain stolen by Caractacus P. Doom and his henchman Harry Slime. By the end of the episode, Doom and Slime are punished by having their own brains removed, with Doom's brain angrily chasing after Slime's brain while they're both in a giant jar.
* Avenger Penguins episode "The Quantum Mechanic" had Caractacus P. Doom steal Bluey's brain, leaving the penguin silent and sitting around doing nothing.
* Avenger Penguins has as its main villain 'Caractacus P Doom', and thus many of the episode titles had the 'Of Doom' tag.
* Avenger Penguins. However, the market in the early Nineties was already overloaded with them, so the biker penguins were soon forgotten and lumped in with the similar but "serious" cartoons of the time.
* Avenger Penguins was Dr. Caractacus P. Doom. Both Doom and his lackey Harry Slime had no hair on their heads.
* Avenger Penguins were co-written by Jimmy Hibbert (the voice of the Avenger Penguin Bluey, Bella, the brown Badly Drawn Brother, Poodle Stink, and Caractacus P. Doom's lackey Harry Slime) and Rob Rackstraw (the voice of the Avenger Penguin Rocky, the Doc from Saskatoon, Cecil Stink, and the Avenger Penguins' mechanic Irv).
* Avengers #200. Ms. Marvel is impregnated, gives birth, the child ages to adulthood, and "marries" his mother in the course of a few days. Look it up. Led to a big time
* Avengers Academy #25, Hazmat blasts X-23 with a toxic blast after X-23 stabs Mettle:
* Avengers Academy emits all sorts of lethal chemicals and radiation and must wear a Hazmat suit at all times to avoid killing everyone around her.
* Avengers Academy had a mother like this who gave him his drive to be famous. Even worse, at one point in the series, it's revealed that she allowed him to be sexually abused so that he would get cast in a commercial.
* Avengers Academy has also got hit with this due to its "free to wait" mechanics, and time-limited special events that are almost impossible to complete unless you pay real money to increase your resources.
* Avengers Academy has a straight scar going down the right side of his face, over

his eye and eyebrow.
* Avengers Academy has both Hulk and Frost Giant Loki. The former only has pants and shoes, and the latter wears a black fur shawl over his shoulders and leaves his torso completely exposed.
* Avengers Academy has Iron Man and War Machine, naturally, though they start off only wearing bits and pieces of their armour and slowly accumulate the rest of it as they rank up.
* Avengers Academy has Janet Van Dyne/The Wasp as this in a more pronounced from than the comics. Here she's also a fashion designer and also opens her own clothing store on campus.
* Avengers Academy has most of the kids except Reptil and Finesse manifest their powers in such a way with the crowning example probably being Striker manifesting his to fend off his child molesting manager.
* Avengers Academy has shades of this. While most characters have a study mission at the Timeless Archives, Jan has "Try to Study", which involves her sleeping on top of the desk. She gets better as she levels up, however, as she begins studying fashion and later entomology.
* Avengers Academy, in revenge for his attack on Tigra. While Tigra believes this was a totally inappropriate action and chews them out for it, she can't resist watching the scene, again and again...
* Avengers Academy, Maria Hill's hair gets progressively shorter as she ranks up.
* Avengers Academy Rockslide, as the name suggests, is a mutant whose power destroyed his original body but lets him animate stone, so that he's now a walking pile of rocks. Cut to her gripping her foot in pain. In the ensuing conversation about girlfriend difficulties with Mettle (another Avengers Academy student whose body responded to trauma by replacing his skin with a red metallic covering with little sense of touch), Rockslide points out that maybe people whose power makes their genitals less sensitive shouldn't expect a great deal of pity from people whose power means they have no genitals at all.
* Avengers Academy. Rockslide is a mutant whose body built out of solid rock. Hazmat is a mere human girl in a suit. Hazmat ended up hopping up and down while clutching her foot in pain.
* Avengers Academy, Superior Iron Man is interpreted as this for Tony. He goes mad with power after one of Loki's spells goes awry.
* Avengers Academy. Throughout most of the series, however, he's pursuing a white girl, Finesse, and only starts getting together with White Tiger after accepting everything between them is over.
* Avengers Academy will occasionally shout "STOP TAPPING HULK" when you select him.
* Avengers Adventure) ends up cut. In-universe, it's because Mark (Hulk's player) has concerns about the build. Out-of-universe, it's because the author had trouble finding clean enough screen caps.
* Avengers Adventure: Per Gwyneth's description, her character (Pepper) has such a high Linguistics score she had to invent languages to add to her character sheet.
* Avengers Adventure, Terrence (playing Rhodey) gets his own "epic aerial battle" against members of the Ten Rings while Rob (playing Tony) fights Obadiah Stane. Naturally, as no such scene exists within the original Iron Man movie, said battle goes unseen.
* Avengers: Age of Ultron, a brainwashed Hulk attacks Hulkbuster-Iron Man from behind. Tony calls him on it.
* Avengers: Age of Ultron addressing his men as the Avengers attack his facility.
* Avengers: Age of Ultron after Ultron puts Black Widow in a cell in his underground base, she manages to make a simple transmitter to communicate in Morse code, which allows Hawkeye to find her. Although given that Ultron later tells the Avengers that fighting them is what he most wants—"all of you, against all of me"—this may have been deliberate bait.
* Avengers: Age of Ultron: After Wanda brainwashes Banner and he Hulks out, he somehow manages to travel 400 miles from the African coast to Johannesburg in the span of a few minutes.
* Avengers: Age of Ultron AI using an Infinity Stone, but this time to learn from

the mistakes of the first experiment and do it properly. The other Avengers violently object, but the new AI is created, and not only supports humanity completely but is pivotal to stopping Ultron's plan.
* Avengers: Age of Ultron) also didn't go unnoticed. It doesn't help that "important" nations such as Germany and Russia in the same movies weren't replaced by fictional stand-ins.
* Avengers: Age of Ultron: although to him it's a meaningless but polite gesture, his ability to wield Mjolnir — which the other Avengers, including Quicksilver, couldn't wield and Captain America could barely move — cements both his power and status as a pure, good being (although Tony and Cap later both argue that because he's AI, it doesn't count).
* Avengers: Age of Ultron and directs the fight there, so that there won't even be any financial losses to anybody in the city, let alone loss of life.
* Avengers: Age of Ultron and join the Avengers during the final act of the movie.
* Avengers: Age of Ultron and mentally influences the civilians en masse to make them leave a war zone.
* Avengers: Age of Ultron and the base, revealed to be operated by HYDRA, cut all ties with the World Security Council.
* Avengers: Age of Ultron as a Russian spy/assassin is a brief, intense ballet scene during her training, where the instructor demands that they become "unbreakable".
* Avengers: Age of Ultron as Ultron sees the Avengers as "puppets tangled in strings".
* Avengers: Age of Ultron) as violent action plays on the screen... the last lines ominously spoken rather than sung by Ultron himself (James Spader).
* Avengers: Age of Ultron: Attends a party with the Avengers and gets drunk on Thor's mead alongside his WWII veteran buddies.
* Avengers: Age of Ultron becomes much less whimsical and more terrifying when sung by Ultron.
* Avengers: Age of Ultron being able to lift it causes Thor to instantly trust him completely.
* Avengers: Age of Ultron both subvert this, in different ways. As opposed to his comic book monotone, Vision in the film features the mellifluous British tones of the Jarvis A.I., as voiced by Paul Bettany. Ultron's voice has a synthesized-sounding buzz and metallic undertones, but he has a full range of tone and inflection underneath that buzz and distortion.
* Avengers: Age of Ultron, Captain America and Ultron battle on top of a moving semi.
* Avengers: Age of Ultron close siblings. In the climax, Vision catches Wanda in this fashion to evacuate her from the plummeting Novi Grad landmass before Tony and Thor blow it up.
* Avengers: Age of Ultron despite being a robot with no seeming need for human food. Ultron's penchant for snappy one-liners utterly ruins his scary factor. Compare to his first appearance, where he can barely talk.
* Avengers: Age of Ultron explaining that Jane was on a lecture tour while Pepper was busy running Tony's company.
* Avengers: Age of Ultron features Tron Lines that light up when her Widow's Bite gauntlets are activated, while in previous movies the Tron Lines just appeared on her gauntlets and gloves.
* Avengers: Age of Ultron filmed both endings and left it up to the studio to decide which would be used.
* Avengers: Age of Ultron happens and Ultron comes alive. And within about two minutes decides the Avengers need to go. Tony even points out when defending his apparent creation of a murder-bot that he and Bruce were nowhere near close to a working model. The implication is the Mind Stone itself had a part in it.
* Avengers: Age of Ultron has another case where one of the heroes tries to intervene in a Hulk rampage; this time Iron Man with special anti-Hulk armor he had prepared.
* Avengers: Age of Ultron has Bruce state to Natasha Romanoff that he "physically

can't" have children, which alludes to the 2008 film regarding his dilemma with Betty: if he gets too excited, he'll hulk out, which is why he physically can't have children, as he explains to Romanoff.
* Avengers: Age of Ultron has Captain America riding a motorcycle in the Hasbro version, and Iron Man riding a motorcycle in the Mattel version.
* Avengers: Age of Ultron has the arrival of the Hulkbuster, being the first thing in MCU to face and block Hulk's punch.
* Avengers: Age of Ultron has the Hulk go on another rampage, and Iron Man activates his Hulkbuster armor to stop him.
* Avengers: Age of Ultron His snark is comparable to his "fathers" Tony and J.A.R.V.I.S., so he's frequently spouting out hilarious one-liners.
* Avengers: Age of Ultron impacts the sole main cast member they are connected to.
* Avengers: Age of Ultron implying it to be Bruce with the subtlety of a brick to the face as she mentions traits that could only possibly refer to him, ending with asking if he thinks she should go for it. Bruce remains confused and still thinks she's talking about someone besides him until Steve spells it out for him.
* Avengers: Age of Ultron in isolation, to prevent the possibility of his movie spoiling the major twists of the other movies.
* Avengers: Age of Ultron, instigating an extinction-level event. The film's final act takes place in the floating city.
* Avengers: Age of Ultron introduces Dr. Helen Cho, a renowned Korean scientist who serves as a medical and scientific ally to the team. She's close friends with both Bruce and Tony, but like Alexander Pierce below, she is neither seen nor mentioned in any of the previous movies.
* Avengers: Age of Ultron, in what seems to be a throwaway scene, the Avengers try to lift Thor's hammer at their celebratory party, with none of them succeeding because "they're all not worthy". As Vision tries to convince them of his good intentions, he casually picks up the hammer and hands it to Thor. The Avengers promptly agree to follow. He uses it briefly in the final battle as well.
* Avengers: Age of Ultron is also very similar to Serbia's, being a red-white-blue tricolor (only vertical, like the French or Romania flag) with an eagle at the center. Generally the country is also notably more backward, with a restive population hostile towards the Avengers and the USA in general. It appears to be a mashup between the twins' comic book home country of Transia and the nation of Slorenia which Ultron massacred.
* Avengers: Age of Ultron is a mercenary and smuggler who's heavily involved in the black market arms trade.
* Avengers: Age of Ultron is genuinely working to atone for his arms dealer past, as they lost their parents to one of his weapons.
* Avengers: Age of Ultron is pulled out of storage into the Battle of Sokovia to rescue civilians trapped on an airborne chunk of land, as all the newer Helicarrier models were destroyed in the above-mentioned film.
* Avengers: Age of Ultron is similar to the Avengers jacket example mentioned above. The characters still wear individual costumes, but most of them have stylized "A" logos somewhere on their outfit.
* Avengers: Age of Ultron is the fact that its limbs are fully mechanical — the Hulk tore the suit's left arm off, but Tony wasn't maimed by that at all, and was able to easily attach a replacement arm.
* Avengers: Age of Ultron: Lampshaded. During the final battle against Ultron at Sovokia, Hawkeye (Clint Barton) saves Scarlet Witch (Wanda Maximoff) by grabbing her and diving into a building for cover. In an attempt to motivate her, he says:
* Avengers: Age of Ultron member of the team, and they get a perfect opportunity to get their revenge on him as an individual, not the group - but they go after the Avengers as a whole anyway (though this might have been spurred on thanks to anti-Avengers propaganda that HYDRA been spreading throughout Sokovia).
* Avengers: Age of Ultron, not seeming to realize that in doing so, there's not going to be anyone left alive to evolve.
* Avengers: Age of Ultron, once the plot's winding down, Steve and Tony argue with Thor as to whether Vision can lift Mjölnir because he's worthy or because he's

a machine.
* Avengers: Age of Ultron, only Natasha herself has learned to not sound Russian anymore).
* Avengers: Age of Ultron opens with soldiers rushing about because they're under attack... by the Avengers.
* Avengers: Age of Ultron: Parodied and defied when Tony Stark asks Ultron what he's planning on doing with the Vibranium ore that he stole. Instead of going on a monologue, Ultron mocks Tony's attempt to play on his hubris and attacks him.
* Avengers: Age of Ultron, Peggy Carter and Heimdall appear in Cap and Thor's "dreams" created by Scarlet Witch. There's also Julie Delpy as the head of the Black Widows in Natasha's "dream".
* Avengers: Age of Ultron, Quicksilver and Scarlet Witch both side with Ultron at first, before they realize that he's not a savior like he claims to be.
* Avengers: Age of Ultron says he is "as fast or almost as fast as a bullet." Still Quicksilver proved to be unstoppable to likes of Cap and Hawkeye.
* Avengers: Age of Ultron." She's even later seen continuing to check him out while she's supposed to be gearing up for the final battle with Ultron, prompting Pietro to toss a jacket to her to get her to knock it off.
* Avengers: Age of Ultron so he can replace everyone with Ultron bots. It's unclear if he's entirely sane during all this; he's genuinely confused when the Scarlet Witch, whom he befriended and wants to see survive, is horrified by his plans. And also doesn't seem to make the connection that Scarlet Witch and her brother Quicksilver are human, and would die if humanity is wiped out.
* Avengers: Age of Ultron sports a new outfit which has a relatively short coat.
* Avengers: Age of Ultron, tearing off limbs, cracking skulls, smashing them to pieces…
* Avengers: Age of Ultron that showed razors based on Thor's hammer, Cap's shield, Hulk's fists and Iron Man's armour while the voice-over explained "You could make a razor with Avengers technology," and then, as the bathroom was destroyed, "but you clearly shouldn't."
* Avengers: Age of Ultron that there are some drones attacking his position... after he's already been blasted into the side of a car.
* Avengers: Age of Ultron: The above six plus War Machine, The Vision, Scarlett Witch, Quicksilver, and Nick Fury's helicarrier against Ultron and his army of drones.
* Avengers: Age of Ultron. The force field around Baron Strucker's base isn't visible until Iron Man flies headlong into it. Jarvis even describes it as, "Some kind of energy shield."
* Avengers: Age of Ultron. The original program appears to be torn apart by Ultron so he could escape during the Avengers' party, but was in fact hiding, preventing Ultron from accessing nuclear launch codes. He is then used as the basis of The Vision's programming.
* Avengers: Age of Ultron, the total damage was far larger than the original (property damage to Manhattan vs. the complete destruction of a small Eastern European country). Again, there are fans who see it as a worthy successor to the original.
* Avengers: Age of Ultron: This is amped up particularly in the beginning with Wanda Maximoff before she's humanized a bit. She spends a lot of time in dark areas that exaggerate her pale skin and dark hair and make her movements and actions creepier. By the time she's a good guy, she's a great deal healthier looking, dyes her hair red, and dresses in brighter clothing.
* Avengers: Age of Ultron This was limited to the TV series, the later films never mentioned this ban.
* Avengers: Age of Ultron, though the tone is more resigned dread than sarcastic.
* Avengers: Age of Ultron, Tony (and Jarvis) scan the room Tony's in and find a secret room. Inside is the scepter of Loki that the Avengers are searching for.
* Avengers: Age of Ultron, Tony doesn't even look twice when Fury reveals himself in Clint's barn. The rest of the team doesn't seem fazed, either.
* Avengers: Age of Ultron, Tony finds one of these when investigating Baron von

Strucker's lair. Judging by his attitude after discovering it, he was anxiously expecting one.
* Avengers: Age of Ultron, Tony has a plan involving the casket they just recovered from Ultron.
* Avengers: Age of Ultron: Tony Stark in the Hulkbuster armor vs. a mind-controlled Hulk. They may be a bit smaller than other examples but the destruction is devastating all the same.
* Avengers: Age of Ultron, Tony takes the Iron Man suit even further with the Hulkbuster: a colossal suit of powered armor that itself fits over his normal suit of powered armor to let him take on the Hulk in an emergency.
* Avengers: Age of Ultron' to Steve, she simplifies her brief drastically.
* Avengers: Age of Ultron" to stop the Hulk. So when it needs to be employed, it serves this function perfectly.
* Avengers: Age of Ultron trying to find a way to kill him for what he did to their family.
* Avengers: Age of Ultron, Ultron is everywhere, all over the internet and can inhabit every robotic body he creates. He even lampshades this by destroying his current body mid-monologue and continuing to gloat without missing a beat in his brand new body.
* Avengers: Age of Ultron: Ultron's fight with Cap, Wanda and Pietro on board a speeding train ends in Ultron firing a burst of energy that kills the operator and destroys the train's brakes. The train crashes through a bumper block, and careens through Seoul's crowded streets for a short distance before Wanda uses her magic to bring it to a stop.
* Avengers: Age of Ultron: Ultron's sentry drones have blasters built into their arms.
* Avengers: Age of Ultron: Ulysses Klaue realizes Ultron is one of Tony Stark's creations when Ultron, after transferring a ten figure sum of money to Klaue for his vibranium supply, says, "It's like I always say, 'Keep your friends rich, and your enemies rich, and wait to see which is which.'" something Tony used to say.
* Avengers: Age of Ultron (Valkyrie) is 5'3¾ while the Hulk is at least twice that height. They've even given each other nicknames that resemble the trope name.
* Avengers: Age of Ultron version of this trope; having been created to bring "peace in our time" he initially intends on using his engineered extinction event to root out the weak, and guiding the strong himself. However, when he's abandoned by the Maximoff twins, and his new body is taken by the Avengers, he drops all pretense of altruism and decides to simply wipe the slate clean so he can rebuild alone.
* Avengers: Age of Ultron, Wanda is absolutely horrified when she is able to read Ultron's mind and discovers his plans to wipe out humanity.
* Avengers: Age of Ultron: Wanda Maximoff destroys Ultron Prime's vibranium body by pulling his "heart" (really a power source) out through his chest. Ultron is an AI, though, so he manages to exist through one final drone before he meets his final fate upon encountering Vision.
* Avengers: Age of Ultron we have Wanda and Pietro Maximoff, following in their comic counterparts' footsteps. The fact that their actors played husband and wife in another film just adds more fan video material.
* Avengers: Age of Ultron, when Cap battles Ultron on top of the semi truck, he gets flung not once, but twice onto the windshield of the car behind them. Later, he gets knocked into a car by a drone.
* Avengers: Age of Ultron when Tony Stark piledrives the Hulk into a skyscraper that is under construction during the fight in Johannesburg, but makes sure beforehand to buy the building before he commits to the act.
* Avengers: Age of Ultron where Tony gets the lion's share of the blame for creating Ultron, despite the fact that Bruce had quite a bit to do with it too. Of course, this is mostly because Bruce admits he was in the wrong and apologizes (and was a lot more cautious about the whole thing to begin with) while Tony thinks he was still in the right and keeps trying to justify his actions.

* Avengers: Age of Ultron, which contained the Mind Stone at the time. All three were created by Terrans, but given powers from an extraterrestrial source.
* Avengers: Age of Ultron while most civilians are shepherded off Sokavia, Tony detects a family in one of the buildings and flies in there to save them, even though the building itself is collapsing.
* Avengers: Age of Ultron with the Avengers (minus Hulk) vs. Ultron, Scarlet Witch and Quicksilver vs. Klaw's gang.
* Avengers: Age of Ultron would have made the logistics a little bit difficult even if they hadn't.
* Avengers (and presumably non-physical magic) affect him the same as any other human being.
* Avengers and Trollhunters: The Avengers are only in Arcadia because they picked up the energy from Claire's shadow portals and mistook it for some sort of backup plan of Loki's. Therefore, they're already on edge and quick to confront Jim and his friends when they realize the group is hiding something; the teens, already paranoid about potential Changeling infiltration, just as quickly lash out when confronted, leading to a fight that results in Claire getting hurt before anyone can calm things down.
* Avengers and Trollhunters: Unusually for this trope, it's the parents' idea to have the Trollhunters do this and it's primarily to defend them against third-party interference. The parents themselves had already (reluctantly) accepted their children's status as Trollhunters by the time this came up. Jim is actually very upset at the idea, being devoted to his mother, but she points out that it's not like he was planning on disappearing when he turned 18 anyway.
* Avengers and Ultron swore never to try to augment his replacements in that way again.
* Avengers Annual #10 over Carol's treatment both in-story and out-of-story.
* Avengers are about to make out when Speed interrupts them. The two have been dating since day one, so it's probably safe to assume that they've kissed before, but never on-panel.
* Avengers Arena and disgustingly violent. This was before anyone read a page.
* Avengers Arena box described above. Detractors' reactions have pretty much unanimously been "You could have brought the characters back another way and considered reviving their series instead of killing them in cold blood, damn it!"
* Avengers Arena is Arcade trying to re-establish villain cred by trapping a bunch of teenage superheroes in Murderworld and make them fight to the death.
* Avengers Arena, Nico Minoru loses an arm. The subsequent blood loss ends up giving her a power boost, though.
* Avengers Arena suffer this, but special mention goes to Hazmat, who is the only surviving member of the Avengers Academy kids that were sent there.
* Avengers Arena. There, Murderworld is a massive sealed environment, with trees, mountains, and everything in between.
* Avengers Arena, the two most popular Nuhumans, were conveniently left out of the story (save for a single panel showing images of them on a list of potential Kree targets).
* Avengers Arena tone. Readers were divided at best on the former and almost entirely despised the latter, which ended up getting axed at only ten issues.
* Avengers a short while after she left with him and having her scream at her useless ex-teammates for none of them doing anything about the fact she'd been raped and brainwashed. And most distressingly of all, that all of them took everything Marcus said at face value. Carol doesn't return to the Avengers, choosing to stick with the X-Men, as the Avengers shamefully leave realizing they betrayed one of their friends.
* Avengers Assemble #9-11 involves a bet between Tony Stark and Bruce Banner as to who can be the first to successfully rescue a missing scientist. The loser has to walk naked from Avengers Tower to the Baxter Building and back (in downtown Manhattan).
* Avengers, Assemble! along with his "Defenders" friends. The grenades are clearly special, as the smoke they produce also hinders the robots' sensors.

* Avengers Assemble, and ended with the Badoon vowing vengeance on the Earth.
* Avengers, Assemble! arc features a door that cannot be opened unless an Inhuman and a member of Wakanda's Royal Family open it together.
* Avengers, Assemble! are excessive (such as quoting it), to the point the show feels more like a promotion of the movies rather than its own thing.
* Avengers, Assemble!) based on The Avengers (two of which predate the movie).
* Avengers, Assemble! continues this trend, albeit much more obviously. Especially with vehicles and buildings.
* Avengers, Assemble!, features AIM creating a "gamma virus" that infects all of the Avengers except Black Widow and Hulk himself (who is obviously immune). The virus transforms the heroes into Hulking versions of themselves, and gradually makes them bigger, stronger, and more mentally unstable as time passes, with the eventual goal being total disintegration.
* Avengers, Assemble!: Following an alarm, Hulk rushes to the Stark Tower gym, bursting in through the wall:
* Avengers, Assemble! has a hilarious moment where Black Widow, having been bitten by a vampire, attempts to escape from Captain America and Iron Man... and promptly knocks herself out running into a mirror because she didn't see her reflection.
* Avengers, Assemble! has Iron Skull, Red Skull in a black Iron Man armour with red detailing lines, as well as his eponymous red head.
* Avengers, Assemble!: Hawkeye and Whitney Frost attempt to hold out against Dracula by using this trope. Dracula, being Dracula, finds a workaround by having his vampires simply tear the safehouse apart.
* Avengers, Assemble!. Hell, during Halloween circa the first season, they dressed up as their respective characters.
* Avengers, Assemble!. Here, he built the wings himself despite only being 18-years-old, taking after his aforementioned Ultimate counterpart, who likewise built the wings himself.
* Avengers, Assemble!. He spends roughly a decade there, but on returning to the present has only been gone for weeks.
* Avengers, Assemble!: If Captain America tells Tony that something might be a bad idea, you can just bet your eyeteeth it'll end up blowing up in Tony's face.
* Avengers, Assemble! is a Captain America fanboy who gets to fight alongside his idol after becoming a costumed hero.
* Avengers, Assemble! is called to assemble, and after a sequence of them all getting "the call", it concludes with them all together.
* Avengers, Assemble! is generally seen in a mixed reception kind of light. However, that didn't stop it from getting 5 seasons and 127 episodes, making it the longest-running Marvel cartoon.
* Avengers, Assemble! of people in the subway when the floodwaters hit. There's a throwaway line at the very beginning of the episode noting that the entire city had been evacuated. Exactly how they were able to get the entire city evacuated that quickly, especially for an event that's pretty common in their universe (originally it was a monster attack) is a story for another trope.
* Avengers, Assemble!, receives similar sentiments for the same reasons.
* Avengers, Assemble!, Tony decides to play a prank on Captain America by having the latter test his jet boots, and Cap gets set flying uncontrollably all over the place. Cap got his revenge by taking the boots off in-midair, which are then sent propelling straight towards Tony's rump.
* Avengers, Assemble!, Tony starts talking about the wonderful things he could do once he figures out how it works. One of them is "Transmute Jersey into...what's the opposite of Jersey?"
* Avengers, Assemble!, turning its effects back on Thanos and forcing him to undo all of it.
* Avengers, Assemble! (with the former as Stephanie and the latter as King Roland).
* Avengers between the Avengers & their allies against a villain and his armies.
* Avengers Disassembled storyline, although it's a toss-up whether it was actually him.

* Avengers: Endgame addressed some of this, albeit not particularly deeply).
* Avengers: Endgame. After a few moments of this, the film cuts to Nebula and Rhodey watching him — the music is actually just on Quill's Walkman and the scene was from his point of view, but all Nebula and Rhodey see is Quill dancing and singing off-key to a song they can't hear. Neither of them are impressed.
* Avengers: Endgame, after Frigga gives Thor some kind, soft, wise advice to help our God of Thunder get his fighting spirit back.
* Avengers: Endgame: After Tony Stark and Professor Hulk supervise the machinery assembling a new Infinity Gauntlet, and being understandably tense about it considering the power of the Infinity Stones they're manipulating, Rocket finds it funny to suddenly yell "BOOM!", making the two of them jump.
* Avengers: Endgame, after Tony Stark's daughter Morgan accidentally learns the word "shit" from him, he tells her not to swear, and then says "'Cause I got shit to do!". Cue her continuing to repeat the word...
* Avengers: Endgame a headbutt and almost breaks the Infinity Gauntlet's hand, until Thanos takes out the Power Stone to power-up his punch to titanic levels).
* Avengers: Endgame, all the while essentially abandoning Sharon and leaving her hanging dry.
* Avengers: Endgame and calmly steps off the elevator with the scepter.
* Avengers: Endgame, and cannot brief the other Avengers without meandering off into a rambling discourse about old girlfriends.
* Avengers: Endgame and with supplies depleted, he intends for it to be his final message. Luckily, he ends up saved soon after.
* Avengers: Endgame: Ant-Man is treated as this and is even a little hurt when the kids who came into the diner him, Professor Hulk, and Black Widow were having lunch at would rather take a picture with Professor Hulk than him.
* Avengers: Endgame are Disney movies is the card at the end of the credits saying that the films were "distributed by Walt Disney Studios Motion Pictures".
* Avengers: Endgame are taken out. However, once Cap manages to combine his borderline indestructible shield with Thor's hammer Mjölnir, he manages to stand his ground until Thanos overpowers him.
* Avengers: Endgame armor with the wrong colors, again due to working off concept designs that wound up being altered for the finished film.
* Avengers: Endgame as Captain Marvel arrives from space by smashing through and singlehandedly destroying said flagship.
* Avengers: Endgame at large, and as a result of being driven by a more contained number of narratives the overall lives of the Superheroes are considerably less eventful compared to their Comic Book counterparts.
* Avengers: Endgame at the same time and multiple stones on Earth at different times, even before Thanos went gathering them.
* Avengers: Endgame, before landing with his entire army in order to finish the Avengers and their allies off.
* Avengers: Endgame, both Iron Man and War Machine are on the same roster of Avengers for most of the movie. In the climax, Pepper Potts also shows up in her own suit of armor, making this a triple threat. Additionally, it should be noted that at the start of the movie, War Machine and Bruce Banner go after Thanos with Bruce once again in the Hulkbuster armor. Tony is not present for that particular mission, however.
* Avengers: Endgame, breaks his sword (which had withstood hits from Mjolnir and Stormbreaker, and torn chunks from Cap's shield), and rips chunks of armor off his body like tissue paper while suspending him in mid-air. If not for Thanos calling in an airstike that also decimated his own forces, Wanda would have undoubtedly killed him.
* Avengers: Endgame Bruce Banner's horrified reaction (and Rhodey's refusal to apologize) makes it that much funnier.
* Avengers: Endgame, but averted. When Scott Lang suggests building a time machine, the others becomes exasperated when it becomes clear that Scott is getting all his ideas about how time travel works from movies, including never meeting their past selves. The smarter heads explain that time travel works on multiverse theory,

meaning that nothing bad happens when Captain America and Nebula encounter their past selves save for it leading to them fighting. That said, they still have to avoid causing any massive changes, not for their own timeline's sake but in order to keep from screwing up the other timelines they visit.
* Avengers: Endgame, but when he starts disappearing under the many opponents, he cracks and desperately calls for help.
* Avengers: Endgame by shrinking down to insect size, crawling up Thanos's butt, and expanding to human or even giant size.
* Avengers: Endgame By the end of the movie, Black Widow and Iron Man end up dying to ensure that the day is saved.
* Avengers: Endgame. Cap proceeds to use Mjolnir and his shield in conjunction to deal out some cathartic punishment on the Mad Titan.
* Avengers: Endgame: Double subverted when Thor calls for Mjölnir while in the past. It follows from the reunion with his mother, but repeats the joke from the earlier films about Mjölnir needing time to arrive. When it does arrive, however, Thor is elated to discover he is still worthy and the tone turns back to genuine.
* Avengers: Endgame, due to him having been trapped in the quantum realm for five years/five hours, and hence needing to be brought up-to-date by the rest of the team on what happened since he was trapped.
* Avengers: Endgame: During the 2012 part of the Time Heist, Steve ends up encountering his past self while retrieving the Mind Stone and has to fight him. His past self, for the record, thinks that time traveling Steve is Loki using an illusion. The fight ends with time traveling Steve telling his past self "Bucky is alive!" to get him to let go of him.
* Avengers: Endgame-era Tony, who was still known for being a womanizing playboy. The plan starts with Scott shrinking down to slip inside past Tony's shirt.
* Avengers: Endgame from the previous film. It doesn't really become an epic superhero action flick until almost exactly the halfway point.
* Avengers: Endgame. Gamorra just shakes her head in disbelief and walk into the "Temple of the Power Stone."
* Avengers: Endgame gecko uses the Infinity Gauntlet to save people hundreds of dollars on car insurance.
* Avengers: Endgame: Gets referenced when the possibility of time travel is brought up.
* Avengers: Endgame has a deconstruction: Thor wears sunglasses at various scenes, but as a disguise to make him look cool and relaxed, when he actually has become a very depressed shell of himself.
* Avengers: Endgame has Ant-Man pitching he use of the Quantum Realm to time travel back to get the Infinity Stones. Captain America then asks if he's talking about a time machine. Scott denies it's a time machine (since it's more a process than an actual machine), but when he tries to explain this, he realizes the difference is inconsequential and concedes that, yes, it's a time machine.
* Avengers: Endgame has Ant-Man's van with the Quantum Tunnel. While it is the reason that Lang reappears after five years, afterwards it fails to be useful to travel back in time as Stark invents a better design. In the final battle, Thanos destroys the van before they can use it to send the glove with the Infinity Stones back in time and out of his grasp for good.
* Avengers: Endgame has Clint Barton (now going by The Ronin) kill several of these right before Black Widow recruits him.
* Avengers: Endgame has Hawkeye slicing at least one Outrider into two with his katana.
* Avengers: Endgame has Thor, now reduced to a fat, drunk and depressed recluse, being sometimes called a failure to his face, which he admits is "a little bit harsh...".
* Avengers: Endgame, he's an overweight alcoholic drowning in the misery of almost having killed Thanos. He can't even hear someone say Thanos's name he's so traumatized by it all.
* Avengers: Endgame, he's carrying a bouquet of flowers and a can of sauerkraut.

They're both for his pregnant wife.
* Avengers: Endgame, he visits a Decimation Memorial to see if his daughter Cassie was one of the victims. And then does a double take when he finds his own name there.
* Avengers: Endgame However Earth has been such an annoyance to him that the terror he's about to unleash is something he's going to enjoy.
* Avengers: Endgame if they get a picture with him. Scott obligingly takes the shot and then asks if they want one with him as well. They're like "no, we're good." Banner even tries to get them to until Scott just says for them to forget about it.
* Avengers: Endgame: In 2012, the time-traveling Tony Stark gets a door in the face thanks to the Hulk, very annoyed that he had to walk down the stairs from the top of the Stark Tower.
* Avengers: Endgame included a dedication to Lee as part of its re-release's post-credits scenes.
* Avengers: Endgame), including his main-timeline counterpart's death at the hands of Thanos.
* Avengers: Endgame in New Asgard, with Thor even helping them by threatening their opponents over the headset.
* Avengers: Endgame: In response to the popular fan theory about Ant-Man entering into Thanos' anus and then expanding himself to make Thanos explode, writer Christopher Markus revealed in an interview that it wouldn't work. Due the strong physiology of the Titan species, Ant-Man would be unable to expand himself and get simply crushed to death inside Thanos' body.
* Avengers: Endgame in the end, setting the stage for the rest of the franchise going forward.
* Avengers: Endgame. Iron Man also starts the movie as an emaciated husk that can barely even stand after spending some time in a spaceship with dwindling resources, and even when he's seen recovered five years later, it still takes some time for Tony to find his fighting spirit.
* Avengers: Endgame is heavily implied to be a prodigious tech genius as, while most girls her age are playing with dolls and stumbling through a jumbo puzzle, Morgan explores the garage, plays with her mother's high tech battle helmet and enjoys watching her father work and otherwise proves to be a bit more advanced than most 4 year-olds, all on top of being tooth-achingly cute.
* Avengers: Endgame is one of the most reviled storylines in recent Marvel history, this change was well-received, with some movie theaters reportedly breaking out into applause.
* Avengers: Endgame is surprisingly accepting of the name as it just makes it easier for him to remember.
* Avengers: Endgame. It passes through probably half a dozen hands by the end of the sequence.
* Avengers: Endgame, just saying his name cuts right through Thor's five year-long perpetual inebriation and reduces him to a blubbering mess.
* Avengers: Endgame likely made of the same metal as Corvus Glaive's blade. He uses it to hack Captain America's vibranium shield to pieces.
* Avengers: Endgame makes this out of the Hulk, as after Bruce Banner manages to merge his personalities ends up as his calm scientist self in the muscular body of his alter-ego. He even gets ashamed after time travelling and seeing the Hulk's savage and uncontrollable smashing.
* Avengers: Endgame not even flinching when he summons his Star-Forged axe past her head is simply "I like this one".
* Avengers: Endgame, once a time-travelling Thor tries duping his mother, Frigga reveals that given her upbringing by witches, "I see with more than eyes, you know that."
* Avengers: Endgame, once Nebula goes back to the past, her mind enters the network only she and Thanos's special equipment could access. Thus, two of her at the same time causes conflicts, namely her past self starting to get future memories and eventually the time traveller crashing down when attempting to return to her own period.

* Avengers: Endgame opens up multiple storytelling possibilities, which may or may not be explored in future movies:
* Avengers: Endgame other than Hank Pym. But then a time-travelling Nebula is captured by Thanos in the past, and her vial of Pym Particles is reverse-engineered and replicated to the point Thanos's whole army can be taken to the future.
* Avengers: Endgame people still living in said areas, but not nearly as much as there should be.
* Avengers: Endgame, Rocket manages to convince a depressed\fat\alcoholic Thor to join the plan by promising him beer.
* Avengers: Endgame, Scott Lang is the guinea pig for the first tests on time travel, but unfortunately things go awry and Scott is pulled out of the Quantum Realm at different ages. Finally getting back to normal, Scott feels his suit has been stained and questions whether it was his baby self, his very old self, or his current self who was responsible.
* Avengers: Endgame tests. Unfortunately, it results in "time going through him", turning him into an old man, a baby, and a teenager. By the time he's reverted back to normal, he finds out that he had peed himself somewhere along the way.
* Avengers: Endgame, Thanos finally ends up on the other end of this when he headbutts Carol Danvers as she's stopping him from using the Infinity Gauntlet. She doesn't even flinch and he has to resort to a trick (popping the power stone out of the gauntlet and using it in his off hand to blast her) to get her off of him.
* Avengers: Endgame, Thanos' killing half the population of the universe is undone in more or less the same day he did it. In the movie, it took the heroes five years to undo the damage.
* Avengers: Endgame, Thanos takes on Captain Marvel for possesion of the new Infinity Gauntlet. He manages to slip it on but she grabs the hand he has it on. Thanos tries to uses the power in it but it's not working, so he tries to headbutt her... and it has no effect, she doesn't even flinch and it was like he just hit his head against a steel wall. She then forces him to his knee and is set to clobber him, forcing Thanos to pull off the Power Stone from the gauntlet and punch her with it just to knock her away.
* Avengers: Endgame that he had a dream of them having a boy named after Uncle Morgan but they just kept the name when Morgan was a girl.
* Avengers: Endgame. The Avengers are using Scott Lang to test the time travel machine, but have yet to work out the kinks, turning him into a teenager, a baby, and an old man — who gives this trope after being zipped back and forth through time.
* Avengers: Endgame. The Avengers arrest Loki and cuff his hands in front. When the Tesseract is obligingly knocked right in front of him, Loki doesn't miss his chance to grab it and teleport out of there.
* Avengers: Endgame, the characters are told to adhere to specific rules when dealing with time travel and the Infinity Stones:
* Avengers: Endgame, the combined force of the Avengers, the Guardians of the Galaxy, and an army of Wakandans, Asgardians, and Sorcerers, charge against Thanos and his army in an even and epic clash, breaking down to showcase just about every Avenger in action.
* Avengers: Endgame (the former sacrificing herself for the Soul Stone, the latter using the Infinity Stones to kill Thanos) with no apparent ways to undo their deaths. Also, Hulk's arm is severely damaged (with the Russo Bros. saying it's permanent), and Steve Rogers/Captain America stays in the past with Peggy Carter, who he gets to share one dance with.
* Avengers: Endgame: The funeral of Tony Stark, which pans over all of his close family, friends, and allies and is interspersed with shots of the world slowly recovering, showing just how many people Iron Man saved and how many lives he touched.
* Avengers: Endgame. The only exception is his oldest son Cooper, who is played by the same actor in both movies (Ben Sakamoto) while his younger siblings were recast with kids that were older.
* Avengers: Endgame There's a planning phase as they gather everything they know

about the Infinity Stones and where they would be, then they split off into smaller groups, each targeting a specific Stone. And of course, not everything quite works out as planned.
* Avengers: Endgame, the start of the third act is Thanos's ship appearing over the Avengers compound and reducing it to rubble. Not a brick is left unsmashed. Despite this, literally none of the nine people in it are killed or even injured. Justified for some characters, such as Hulk, Thor, Iron Man and War Machine, less so for the others.
* Avengers: Endgame, the worst consequence anyone has to deal with is depression, rather than total infrastructural or societal collapse. Several characters even eat out at a restaurant in one scene.
* Avengers: Endgame to do it but his hand is too high behind Tony's head to make the prank work properly.
* Avengers: Endgame, Tony pulls this on Alexander Pierce and various unnamed HYDRA agents that were trying to stop his past self from leaving with the metal briefcase containing the Tesseract cube which eventually ends up in the hands of Tony from the year 2023 before Hulk knocks him out, causing the Tesseract to fly out of the briefcase and end up near Loki's feet allowing the trickster god to grab it and make his getaway while Thor, the HYDRA agents, and Alexander Pierce are too distracted to notice he escaped.
* Avengers: Endgame to unload another missile barrage on the battlefield (killing several of his own troops in the process) just to break her focus.
* Avengers: Endgame was originally going to be the one to sacrifice himself on Vormir, until the female crewmembers protested.
* Avengers: Endgame was reportedly cut severely down from its original length, with various scenes either being mentioned in pre-production interviews or added in later releases.
* Avengers: Endgame, when Carol Danvers shows up to help, Rhodey demands to know where she had been and why she didn't help sooner. Carol points out there are hundreds of worlds that need help just like Earth but don't have Avengers, so those worlds are her responsibility. She later returns to space to help those worlds again and does not return until the final battle with Thanos.
* Avengers: Endgame when it breaks down and runs out of fuel, leaving them stranded light years away from a civilized star system. After they run out of food, Stark records a message, saying his goodbyes, though he mentions the possibility that since they're floating so far from Earth that the message may never be heard by anyone else. Luckily, Captain Marvel manages to find the Benatar and brings them back to Earth.
* Avengers: Endgame, wherein Thanos's Snap causes him to lose his wife, two sons, and daughter. After that, the Marvel Studios logo sequence plays, and then there's another couple of scenes of Tony and Nebula getting back to Earth and the remaining Avengers rallying to track down Thanos, before the opening title.
* Avengers: Endgame where the scene is nearly identical to invoke this... only this time Cap enters the elevator and everyone is immediately suspicious of his request... Until Cap says the magic words, averting the fight.
* Avengers: Endgame, which pulled particularly above-average numbers in Japan even without adjusting for inflation.
* Avengers: Endgame: While discussing the targets for the Time Heist, Black Widow is astonished to realize that three of the six Infinity Stones were all in New York at the same time at one specific moment.
* Avengers: Endgame: With the Avengers being down a member following Nat's Soul Stone sacrifice, Doctor Strange, Black Panther, Shuri, Okoye, Falcon, Wong, various sorcerers (Tina Minoru and Hamir included), Stakar Ogord and his Ravager clan consisting of Aleta Ogord, Krugarr, Martinex, and Charlie-27, Spider-Man, Mantis, Kraglin, Wasp, Korg, Miek, Scarlet Witch, Bucky Barnes, Groot, Valkyrie, and Howard the Duck among many others arrive on Earth to make sure the Avengers don't feel outnumbered in their fight against Thanos and his army.
* Avengers: Endgame with the Russo brothers issued a letter again on social media, telling fans not to spoil the movie after the news of leaked footage from the movie

being shared online.
* Avengers et al) in the world never linked the "really tough metal" and "destroys metal on contact" dots together.
* Avengers event, the heroes are shown chilling. Wolverine passed out with dozens of beer cans surrounding him, Tony Stark sleeping in the couch, Spider-Man lying in a web hammock, and Hawkeye and Spider-Woman doing their business.
* Avengers evil plan, and didn't especially care whether the space fleet succeeded or not.
* Avengers features a little girl inflicting one of these on an alien centaur warlord who'd been threatening to kill her seconds ago (there was an accident when her neighbour suddenly developed size-altering powers).
* Avengers, Featuring N.G.E.N. – Start Your N.G.E.N.S! #0 features the Avengers teaming up with Northrup Grumman’s Elite Nexus.
* Avengers Forever where Kang allies with the Avengers to fight a Army Of the ages sent by his older self Immortus.
* Avengers Forever, Yellowjacket during his initial mental breakdown, Giant-Man and the Wasp from Rick's present, and Songbird and Genis-Vell from what appear to have been possible futures).
* Avengers Grimm and the opening of the movie implies that this is standard in their wars.
* Avengers: Infinite Wars, Avengers such as Natasha and Scott express their disbelief at the cliché lines sprouted by some of the Sith.
* Avengers: Infinite Wars: Chapter 18 features a holographic version of this once again allowing Natasha Romanoff to pose as someone else to thwart the villains' plans.
* Avengers: Infinite Wars, during the battle to re-take Ryloth, James Rhodes/War Machine inflicts damage on a Separatist ship by leaving explosives in the seat of his fighter and programming it to collide with the ship while he dons his armor and flies alongside it.
* Avengers: Infinite Wars features a scene where Bariss Offee finds herself watching Peter Parker/Spider-Man and Ahsoka Tano while considering Peter’s role in finding the cure for the blue shadow virus that almost killed the two Padawans, and then tries to focus on the Jedi mantra to avoid facing her feelings for her 'dear friends'.
* Avengers: Infinite Wars) has to specifically clarify that he should just be considered another soldier during a mission rather than a commander, even as Sam Wilson and Rhodey act as leaders of a flight division and Captain America is treated as a commander when on missions with the clones.
* Avengers: Infinite Wars; Scott Lang has the idea that the Avengers can make some independent credits for themselves beyond just fighting in the war by introducing billiards to the galaxy, with the possibility of bringing in further games later.
* Avengers: Infinite Wars, thanks to advice from Anakin Skywalker, Scott Lang/Ant-Man is able to shrink down and essentially take control of a droid soldier by placing himself in its CPU.
* Avengers: Infinite Wars, this likely applies to Hope van Dyne, Natasha Romanoff and Matt Murdock in particular, as they spent some time operating solo before the other Avengers found them (of the rest of the displaced heroes, either their activities have been clearly documented or they didn’t do much more than meet new cultures before the others found them).
* Avengers: Infinite Wars, when the Avengers join the Clone Wars, War Machine is naturally a particular example of this; most notable, he possesses six powerful anti-tank missiles, one of which blew up (although didn't kill) the nearly-unstoppable Durge, and another of which destroyed a Separatist ship once fired into its power core.
* Avengers: Infinite Wars, while Steve Rogers is the one who tells the Jedi Council about the history of the Avengers, Scott Lang also plays a part as he has recordings of the Battle of New York on his phone to give the Jedi an idea about what the other members of the team are capable of.
* Avengers: Infinite Wars; while the Jedi can sense the Avengers through the Force

to a degree (albeit mainly because of the void they create in the Force), none of the Avengers have any ability to sense and use the Force themselves, although it is noted that Pietro has traces of Force energy.
* Avengers: Infinity Quest have practically no in-betweening, with characters either moving around the screen while holding the same pose or simply snapping between poses.
* Avengers: Infinity Quest scoring. There are three potential colors -– bronze, silver, and gold –- that depend on precisely how well the player did (and reward them more accordingly).
* Avengers: Infinity Quest's playfield replaces the pinball in Stern's logo with the Power Gem, surrounded by the other five Infinity Gems.
* Avengers: Infinity Quest, the last listing is simply "Black Panther: Chadwick B".
* Avengers: Infinity Quest. They primarily appear in multiball and wizard modes, where most of their screen time is spent being attacked by whichever Avenger stars in the mode.
* Avengers: Infinity Quest while also visually dissuading the player from playing rough with the machine.
* Avengers: Infinity War Additionally, space-born gunslinger Rocket Raccoon is quite impressed by Earth weaponry, and offers to buy Bucky's M249 SAW from him.
* Avengers: Infinity War adopted children, who's shown holding her own against several members of the Avengers throughout the film, but unlike Nebula and Gamora who very begrudgingly followed Thanos, Proxima seems no less devoted to his goals than he.
* Avengers: Infinity War, a few Outriders try forcing their way past the barrier surrounding the Wakandan army. Some of them end up getting bisected at the waist.
* Avengers: Infinity War. After the Outriders start to fan out along the barrier, which would allow them to breach multiple fronts, T'challa orders to create a slight opening in the barrier so that the enemy forces go through there, creating a bottleneck situation. From there, he, his army and his fellow superheroes start to charge at the incoming Outriders.
* Avengers: Infinity War against Thanos considering he "always has a plan".
* Avengers: Infinity War: Although the domed force field over Wakanda's capital is already visible as a faint blue glow, Proxima Midnight tests it out with the tip of her sword, making it brightly crackle, while awaiting Captain America and Black Panther for a face-off.
* Avengers: Infinity War and a massive army of Outriders. Simultaneously to this is Iron Man, Spider-Man, Doctor Strange, and the Guardians of the Galaxy fighting Thanos on Titan.
* Avengers: Infinity War and Groot venture with Thor to Nidavellir to forge a new weapon for him, while the rest fly to Knowhere to check on the Collector and the Reality Stone in his possession.
* Avengers: Infinity War, and half of all life in the universe is wiped out. This includes most of the Guardians of the Galaxy, Hawkeye’s family, and most tragically, Spider-Man, who fades away in Tony Stark’s arms. Fortunately, the sequel manages to reverse most of the damage Thanos did through the snap by bringing all of its victims back to life.
* Avengers: Infinity War, and Maria Hill. The Collector however was actually an illusion created by Thanos's Reality Stone, so his "return" is debatable.
* Avengers: Infinity War, and Rocket consoling him in uncharacteristically gentle fashion.
* Avengers: Infinity War and she's still as compassionate as ever albeit a trained killer.
* Avengers: Infinity War) are the only superheroes who are still shown to be alive.
* Avengers: Infinity War, as nothing in the original myths stated that the dwarves were actually, physically short. It has been implied that their 'shorter stature' simply meant 'lesser in power to the gods', and that the image of them being shorter and stouter than a human was brought about when Christianity came along.
* Avengers: Infinity War, as Peter Parker's classmates look from the schoolbus to see a giant spaceship looming over New York, the bus driver asks:

* Avengers: Infinity War blasting away at the enemy, picks him up with one hand to give him better visibility while firing his own gun one-handed.
* Avengers: Infinity War), but fans still try to make said ice cream themselves.
* Avengers: Infinity War, but this movie made good use of the comedic pause.
* Avengers: Infinity War by converting nanites seamlessly into a wide array of energy, explosive, and even melee weapons. Peter Parker's new Spider-Man suit, which he gains before he and Stark travel to space, is similarly made of nanites that allow him to create four spider-like legs which he can use very creatively. Tony also uses the nanites to heal himself by spraying them onto open wounds.
* Avengers: Infinity War: Captain America, Black Widow, Bruce Banner, the Vision, Scarlet Witch, Bucky Barnes, War Machine, The Falcon, Thor, Rocket Raccoon, Black Panther and the Wakandan army vs Thanos, the Black Order, and the Outriders.
* Avengers: Infinity War claiming he was taught it at school as an elective.
* Avengers: Infinity War claims that Gamora is a terrible liar because he never taught her how to lie. That's why he can seemingly see through Gamora's claiming to not know where the Soul Stone is located. So he decides to get her to give him the info by torturing Nebula until she yields.
* Avengers: Infinity War, Doctor Strange is doing this as he's having spams from seeing millions of possible futures through the Eye of Agamotto.
* Avengers: Infinity War Doctor Strange uses formal phrases like "hitherto undreamt of" that earn him mockery from more vulgar heroes like Iron Man. Given that he didn't speak this way prior to becoming the Sorcerer Supreme, it seems likely that he's playing it up for dramatic effect, if he's not just used to speaking that way among his fellow magicians.
* Avengers: Infinity War, Drax and Gamora can't help but take in the God of Thunder's physique (Drax even describes him as "like a pirate had a baby with an angel"), much to the jealous chagrin of Peter Quill.
* Avengers: Infinity War due to his time as a fugitive. This is quickly lampshaded by Thor:
* Avengers: Infinity War: During the big battle in Wakanda, Thanos's Outriders pile up on the Hulkbuster and bring it to the ground under their number.
* Avengers: Infinity War, even as he encourages young Gamora to continue the game and ignore the sight of her people being shot dead en masse.
* Avengers: Infinity War examples above, smashes a hole through the hull of Maw’s ship so that he’s sucked out into space. Doctor Strange nearly suffers the same fate, but Spider-Man manages to catch him and drag him back inside while Iron Man seals the hull breach.
* Avengers: Infinity War exploring the fallout of his actions and how they are ultimately undone.
* Avengers: Infinity War features Iron Man and War Machine but they are on separate planets, fighting in separate groups and never interact with one another. However, Bruce Banner suits up with the Hulkbuster armor in the climax alongside War Machine, so there's at least one battle with two armored guys present.
* Avengers: Infinity War (for the Time Stone). And that is not counting various subplots that would be unclear without all the other previous movies.
* Avengers: Infinity War: Gamora says this to Thanos, when he tells her that he genuinely believes that he helped her planet by slaughtering half of its people.
* Avengers: Infinity War gave him the chance to prove his point, and sure enough, he passed on the opportunity to reprise the Red Skull role.
* Avengers: Infinity War giggles uncontrollably as a fan wonders how the "coolest black dude in the galaxy ended up with some whitebread-ass name like 'Chadwick.'"
* Avengers: Infinity War goes for the opposite message, which wouldn't be the case if the Aesop here was intentional.
* Avengers: Infinity War having a significant amount of screentime together, the writers deliberately avoided the obvious "No shit, Sherlock" joke.
* Avengers: Infinity War. He keeps trying to make jokes, but they keep becoming more and more strained. Rocket confronts him about it, and Thor admits that his life is at its worst right now, but insists that Thanos is going to end up dead just like every other enemy he has fought in the past fifteen hundred years. It's

clear that he's trying to convince himself more than Rocket.
* Avengers: Infinity War hostage by threatening to shoot them if they don't get answers.
* Avengers: Infinity War: In a flashback, Thanos is shown meeting Gamora as a child and giving her a double-bladed knife as a gift. At that moment his army start to carry out Thanos's genocide program by massacring half the population. As Gamora turns to look, Thanos gently pushes her face back to his gift instead. Of course, given that he's directly responsible for the death of her people, this comes across as quite hypocritical.
* Avengers: Infinity War into space, and rocket take off speed requires 18,000 miles per hour (nine times faster than a rifle bullet).
* Avengers: Infinity War: Inverted. During the battle in Wakanda, Thanos uses the space stone to turn the Hulkbuster intangible just before the latter attacks the former. Suddenly no longer able to hit Thanos, the Hulkbuster goes flying through him and ends up embedded in a rock wall.
* Avengers: Infinity War: Iron Man naturally does his iconic landing as his one-on-one fight with Thanos himself begins.
* Avengers: Infinity War, Iron Man uses his top of the line "Bleeding edge" suit, that uses nanotech to remodel itself according to what's needed. Which is cool...except the whole thing (which includes a crazy amount of stuff on top of the entire armour) apparently fits in a glowy thing with the volume of a unusually thick salami slice that Tony seems to have no issue carrying around 24/7.
* Avengers: Infinity War is a Dyson sphere surrounding a neuron star whose energy is harnessed by dwarves to make magical weapons.
* Avengers: Infinity War isn't fazed by aliens invading earth anymore.
* Avengers: Infinity War it and say that half of the Earth being wiped out caused the collapse of any real world military forces above the local level.
* Avengers: Infinity War makes it clear that the Hulkbuster is a definite mini-mecha, as Bruce operates it without further augmentation.
* Avengers: Infinity War, Mantis says that the guardians "kick names and take ass."
* Avengers: Infinity War moves onto Earth, of course it starts in New York City, as the Hulk crashes onto the Sanctum Santorum, and Thanos's Black Order is also looking for Doctor Strange. However, the other scenes on Earth are elsewhere (Edinburgh, Wakanda, and the Avengers HQ in upstate New York).
* Avengers: Infinity War movie - voices the Asgardian distress signal in the beginning of the film.
* Avengers: Infinity War of Peter's suit. Stark has to close the breach with his suit's tech to keep everything else from being sent outside. Can be justified by the large size of the ship, and the fact it seems to have lots of empty space inside.
* Avengers: Infinity War of the entire Marvel Cinematic Universe. While his intentions are perhaps more noble than those of most characters who belong to this trope, he's still ultimately seen as a villain.
* Avengers: Infinity War: On the way to Nidavellir, Groot really has to go.
* Avengers: Infinity War: On the way to Vormir, Thor responds to a rather bored "I Am Groot" with "You'll know when we're close."
* Avengers: Infinity War: Parodied. Thanos the Mad Titan is a galactic conqueror and his "children" are kidnapped members of species he has culled. When Thanos is in the process of capturing his favorite daughter, Gamora, he meets Peter Quill, and treats it like a perfectly ordinary Meet The In-laws situation.
* Avengers: Infinity War: Peter Parker is a teen who sneaks inside the Q-Ship in order to help Tony Stark after the latter has sent him away out of fear for his safety. In his defense, he notes that one can't be a low-key neighborhood hero if said neighborhood ends up being destroyed, and Tony can't object to that.
* Avengers: Infinity War, Peter Parker takes advantage of this to sneak out as Spiderman while his fellow school bus riders are distracted and terrified at the sight of the massive alien spaceship hovering over Manhattan, with Ned at one point screaming, "We're all gonna die!"
* Avengers: Infinity War, Peter Parker tells Stephen Strange his name, but on

hearing the other man say, "I'm Dr. Strange," Parker says, "Oh, we're using our made-up names? Then I'm Spider-Man."
* Avengers: Infinity War, Peter Quill (again) gives the middle finger to Thanos after putting a bomb on his back, while doing a backflip into one of Doctor Strange's portals.
* Avengers: Infinity War, Peter Quill asks Gamora and Mantis to go right. The other right.
* Avengers: Infinity War: Peter's school bus driver (who is unfazed at the idea of spaceships invading New York City).
* Avengers: Infinity War. Since Marvel Studios didn't have access to its top-tier superheroes like Spider-Man or the X-Men when the franchise began in 2008, they had to work with B-list heroes, which gave the studio more creative freedom in reimagining and altering the characters without having to live up to pre-existing expectations by the public. Furthermore, the lesser-known reputation of these heroes forced the writers to focus more on making the characters relatable instead of relying just on brand name recognition.
* Avengers: Infinity War spells give him a halfway decent counter to the Infinity Gauntlet.
* Avengers: Infinity War, Spider-Man does this when attacking Thanos through Doctor Strange's portals, although he's not really calling his own attacks as much as he is the tactics he's using to do them:
* Avengers: Infinity War's soul out of his body, something that only sorcerers were previously shown to be able to do.
* Avengers: Infinity War, strangling him, and eventually increases the pressure until his neck breaks, killing him.
* Avengers: Infinity War, Teen Groot pulls a similar move against Thanos' army of monsters.
* Avengers: Infinity War, Thanos' barren homeworld of Titan has two suns. One yellow and one blue.
* Avengers: Infinity War, Thanos has completed the Infinity Gautlet and accomplish his goal to eradicate half of the universe including many of the heroes. Right before he suffers the same fate, Nick Fury uses what time he left to send a distress signal on a pager with Captain Marvel replying.
* Avengers: Infinity War: Thanos is actually a subversion. One of the key factors of his plan to wipe out half of all life in the universe is randomness, seeking to make sure it's fair and dispassionate to everyone, not to ensure survival for "the worthy" or "the strong". He also considers simply erasing half the lives to be an act of mercy.
* Avengers: Infinity War, Thanos is stated to massacre half of the Xandarians to obtain the Power Stone from them. And later on, when Thor meets the dwarfs to forge a new weapon, the Dwarf King there states that he had to watch Thanos murder all the other of his kind leaving him the only one remaining.
* Avengers: Infinity War that can destroy entire worlds on their own. Together, they can unmake the Universe.
* Avengers: Infinity War that he was right about how to save Titan; that all the death and tragedy he’s suffered or inflicted weren’t all for nothing.
* Avengers: Infinity War, the Asgardian who sends a distress signal mentions that they are "twenty-two jump points out of Asgard".
* Avengers: Infinity War, the Black Order are called "the Children of Thanos". Additionally, Black Dwarf is renamed "Cull Obsidian."
* Avengers: Infinity War, the Children of Thanos attack Wakanda by summoning drop ships containing hordes of Outriders.
* Avengers: Infinity War, the Children of Thanos come from all species and creeds and are both male and female.
* Avengers: Infinity War: The Children of Thanos invade Earth in order to gather the Infinity Stones hidden there. After two brief skirmishes in New York and Edinburgh, they bring an entire army of Outriders to Wakanda.
* Avengers: Infinity War the equivalent of almost 40,000 years (using one day per future as a guide).

* Avengers: Infinity War the gathered Avengers' defense, closer to the facility they're trying to protect. They wind up having to open a section of the force field to ensure their enemies enter at the proper spot to be defeated.
* Avengers: Infinity War: The Outriders breaking through Wakanda's shield through sheer force of numbers are cut to pieces. Even the ones who make it through intact have large amounts of flesh burned off.
* Avengers: Infinity War The release, however, was then pushed a week forward to April 27th.
* Avengers: Infinity War the Wakandan army led by the Avengers charges toward a similarly charging army led by Thanos' children. Somewhat justified by the fact that the Wakandans (and most of the Avengers) excel in melee combat, with few specifically ranged weapons among them (Bucky is smart enough to stay at range when using his gun, but also closes to close range to take advantage of the fact that he's also a skilled close quarters combatant).
* Avengers: Infinity War they have at Thanos, even small arms. Justified in this case, the Avengers are the only things standing between Thanos and the last stone, and if he got his hands on it he would kill half of all life in the universe. With no time to prepare they just through whatever they had at Thanos in hopes that something worked.
* Avengers: Infinity War, they realize that they're both out for Thanos' blood and team up.
* Avengers: Infinity War they turn around to see Drax watching them with a bag of "zagnuts".
* Avengers: Infinity War: Thor is admiringly called a "handsome, muscular man" by Drax, who is literal and honest to a degree uncomfortable for most people.
* Avengers: Infinity War: Titan, Thanos' homeworld, which suffered apocalyptic disaster related to their resources. All that's left is massive amounts of wrecked buildings and walkways, since Thanos long since left his home behind.
* Avengers: Infinity War to almost everyone in the movie. His Children, especially Ebony Maw, worship him like cult members would.
* Avengers: Infinity War to reinforce Wanda and Vision during the Scotland fight scene involves Falcon swooping in and kicking Proxima Midnight through a glass storefront.
* Avengers: Infinity War trying to crash through it is utterly destroyed. It later contains the immense flow of Outriders, but the continuous pressure by the alien mooks allow a few to pierce through. Once the heroes understand they're at risk of being flanked, Black Panther orders a section of the shield to be opened to direct their attack where there are troops ready to fight them.
* Avengers: Infinity War uses the Power and Space Stones to shatter one of Titan's moons and launch the fragments at the good guys. They survive, but everyone except Iron Man and Doctor Strange is taken out of the fight.
* Avengers: Infinity War, Vision and Wanda Maximoff have secretly been meeting up for romantic holidays, even though Wanda is a fugitive and a member of the Secret Avengers, while Vision is a member of the New Avengers and part of his duties are trying to apprehend rogue superheroes.
* Avengers: Infinity War: Vision can phase into a human disguise over his normal synthezoid form. He loses the ability to do it when he gets skewered and gravely wounded by Corvus Glaive.
* Avengers: Infinity War. Wanda then dies when the Snap occurs, still crying over Vision's body.
* Avengers: Infinity War when he ordered Rhodey to arrest some of the Avengers while they were trying to stop an alien invasion.
* Avengers: Infinity War When Nebula tells Thanos that he should have killed her when he had the chance, Thanos taunts his least-favorite "daughter" that he didn't want to waste the spare parts.
* Avengers: Infinity War where Thanos obtains all six Infinity Stones and snaps his fingers, wiping out half of all life in the entire universe. This includes roughly half the heroes - including Bucky Barnes, Falcon, Black Panther, Scarlet Witch, Groot, Drax, Mantis, Star Lord, Dr. Strange, Spider-Man, Maria Hill, and Nick Fury.

The next movie reveals that others lost in the snap include the Wasp, Hank Pym, and Princess Shuri. Prior to that, Heimdall, Loki (reformed), Gamora, and Vision are all killed by Thanos too.
* Avengers: Infinity War where Tony looks like he's seriously reconsidering every single one of his life choices, while Peter looks at Tony with a "well, now what do we do?" look on his face.
* Avengers: Infinity War who are indiviually more powerful and tend to have unique abilities. He also has large wheel vehicles that function as heavy armor, and can call in support from space battleships.
* Avengers: Infinity War who don't appear would take all day, so the major exclusions include:
* Avengers: Infinity War, who is brought the next morning to the Avengers HQ in New York, and it's barely afternoon when the climactic battle occurs in Wakanda.
* Avengers: Infinity War who uses careful and deadly methods to achieve his goals.
* Avengers: Infinity War, with the former consisting of scenes focusing on the Guardians, Thor, and Thanos.
* Avengers: Infinity War, with Thor smacking into the canopy of the Guardians' ship.
* Avengers: Infinity War writers, Christopher Markus and Stephen McFeely said that Eitri created both Stormbreaker and the Infinity Gauntlet with dwarven magic and probably designed the Gauntlet to be vulnerable to the axe.
* Avengers in its second season due to there being too many adult viewers and not enough kids watching.
* Avengers is flying around smashing apart enemy ships under his own power!
* Avengers. It features Clint and Tony getting into drunken shenanigans and finding out the next morning.
* Avengers, it's moved to an abandoned Stark facility upstate by the end.
* Avengers marks his first cinematic appearance since 2012, though it's when Coulson was a younger man in the 90s.
* Avengers: Mech Strike, was launched to promote a line of toys from Hasbro and Lego.
* Avengers moment since many Marvel and DC heroes have this attitude toward aliens, surprisingly enough.
* Avengers: No Surrender akin to the Speed Force which he can travel to and fro from.
* Avengers: No Surrender, and by extension Bruce Banner, has this power. This is even more telling as, at this point, Banner had been depowered by Amadeus Cho, shot in the head and killed by Hawkeye, resurrected by the Hand and killed by the Unity Squad, resurrected again by HYDRA and left for dead in the destruction of the Resistance's base.
* Avengers: No Surrender, this is given as one of the reasons the Grandmaster and the Challenger chose to hold their cosmic game on Earth:
* Avengers: No Surrender. Which, in fairness, he is. But then, during a fight with Vision, he powers through his attacks and crushes Vision's head.
* Avengers of Panem, Katniss being entrusted with Captain America's old shield, repainted gold and black with a Mockingjay rather than a star in the centre, represents how she has become the new symbol for her country just as Rogers represented America back in his day.
* Avengers of the Moon, as a vessel with this form of propulsion can't just stop and pick them up again without becoming stranded themselves.
* Avengers of the Multi-verse: Episode 7 sees Zak and Argost dueling each other atop the roof of Weird World.
* Avengers of the Multi-verse; they get along well enough, but it takes them until the end of the second story in the series to nominate Danny as the leader.
* Avengers of the Multi-verse was made to defend Atlantis, but turned against its creators and destroyed Atlantis, forcing it to be sealed away.
* Avengers of the Ring receives a magical braise (a pair of silk boxer shorts) from her that works exactly as this trope suggests.
* Avengers of the Ring, the battle becomes so intense that Galadriel uses a lance

in combat rather than relying on her more ethereal abilities.
* Avengers of the Ring, when the Avengers are assured that the Sokovia Accords have been dissolved after the Snap in the face of the campaign against Thanos and Morgoth (Morgoth has the Mind Stone and Wanda Maximoff while Thanos assembled the Infinity Gauntlet using the Silmaril as a 'substitute' for the Mind Stone). Black Widow expresses concern that the government's offer could just be a trick by pro-Accord government officials to trap the Avengers, but the heroes are soon reminded that the return of the Hulk gives the Avengers a suitably big stick to deter such plans.
* Avengers of the Ring; with Spider-Man and Star-Lord both participating in the battle in Sokovia, at one point Quill calls Parker with the introduction “Hey Peter, it’s the other one”, acknowledging how they are the only two heroes to share a first name.
* Avengers, only to find out that they were on other missions. Other superheroes would eventually come to his aid, however.
* Avengers. Similarly, she's more emotionally open to her teammates (especially Steve) in the latter films while more of a dryly detached teammate in Whedon's films.
* Avengers speech to the others (and by proxy, to the writers of the original story who thought this was acceptable).
* Avengers Spotlight's future mentor. What's more, the Ancient One confessed that he only gave Druid his powers in the first place to make sure the process was safe enough to use on Strange years later, meaning Druid was basically an in-universe test run for Strange.
* Avengers, Steve and Tony wake up after a fight to find themselves connected by a piece of magic red string. Later, they find out it signifies the fact that they're soulmates.
* Avengers stupid; one has to wonder if it might have been averted if Thor hadn't been dead at the time.
* Avengers tells them "Back off, Jumbo" and flattens one with a punch while swinging the other one through the air by its trunk. Even war elephants don't stand a chance against the Emerald Amazon.
* Avengers. The Builders, an advanced race that took all the galactic powers of Earth-616 (the primary setting of Marvel comics) to barely defeat, are laughed off by an inter-dimensional traveler as "only" having influence in several thousand realities. Several more far more dangerous races such as the Black Priests, Ivory Kings, and Map Makers have since been introduced.
* Avengers: The Initiative, and accidentally blows out another recruit's brains.
* Avengers: The Initiative arc, it was discovered that if his opponents can control themselves during the fight and rein in their fears, he loses power.
* Avengers: The Initiative: Baron von Blitzschlag sort of did this; having been given the job of cloning a superpowered deceased trainee he decided to include some of his own DNA in the process to carry on his legacy. It didn't go all that well, as two of them died and the remaining one (not too surprisingly) rejected his ex-Nazi supervillain "father".
* Avengers: The Initiative) by slashing the front of her costume, therefore leaving her, ahem, open for a crowd of paparazzi photographers.
* Avengers: The Initiative. Everyone goes out of their way to say he's not a villain, while Gyrich's actions would say otherwise.
* Avengers: The Initiative had her powers removed by SPIN technology after refusing to go along with HAMMER's sinister perversion of the Initiative. Note: without her powers Komodo doesn't have any legs. Thankfully, a "cure" of sorts was eventually fashioned and she's back in action.
* Avengers: The Initiative: has an inversion: Komodo and Hardball. Komodo is female and reptilian, while Hardball is an attractive blond guy with energy powers.
* Avengers: The Initiative; he's either studying under Dr. Strange or looking for a man named Karl in Minnesota.
* Avengers: The Initiative is a Supernatural Illusionist. His powers produce whatever his foe most fears.

* Avengers: The Initiative is a textbook example of this trope. He eventually gets beaten within an inch of his life by one of his own recruits (though it's for using the term "New Warriors" as an insult, not because of his teaching style). He gets replaced by Taskmaster, who tells the new recruits he's not going to do the whole "Full Metal Jacket" thing. Tasky's method is more scathing sarcastic insults.
* Avengers: The Initiative is jittery, compassionate, and easily shaken, in an almost complete inversion of this trope... but she becomes a straight example later on as she is forced to be more violent more often.
* Avengers: The Initiative is just too angry to be shocked, and Dani Moonstar, who just puts him in a chokehold.
* Avengers: The Initiative, MVP gets shot in the head on his first day in basic training.
* Avengers: The Initiative now serving that function. Consisting of choice members of the original team, third-rate villains, and Initiative washouts, the Shadow Initiative is sent into hot engagements to soften up the enemy for the big guns. Of the 14 members who went on their first mission, 8 came back alive.
* Avengers: The Initiative of her fire powers wouldn't present a risk to him in the middle of a passionate encounter.
* Avengers: The Initiative selling so bad, out of planned 12 issues only 10 saw light of day, the concept has been buried for good.
* Avengers: The Initiative, Think Tank is a member of Montana's state superteam, Freedom Force. To all appearances, his head is a brain in a spherical glass case perched atop an otherwise completely normal human body. He's telekinetic and wears a headband and not much else is known about him.
* Avengers: The Initiative, this is specifically mentioned. Cloud 9 is shocked when she blows up an enemy plane, saying that "I mean in cartoons when that happens you see the guy bail out with a parachute..." Also happened in regard to the word rape during the West Coast Avengers storyline, where Mockingbird was drugged and raped by the Phantom Rider. It was usually referred to as him having forced her to love him (which was something the drugs also did). Averted in Hawkeye & Mockingbird, though, as she flat out tells the Phantom Rider that he raped her.
* Avengers: The Initiative) transforms into one during a training exercise in issue #1. This turns out to be a very bad idea; the arachnophobic Armory freaks out and accidentally kills one of her teammates.
* Avengers: The Initiative: When the new 3-D Man is sent to a superhero team in Hawaii he finds out one of his missions is to protect the state from the occasional kaiju that wanders over from Japan.
* Avengers: The Initiative, which sent poor Hank scrambling for his anti-anxiety meds.
* Avengers", the villainous robot laid waste to a small European country, and reporters on the scene don't go unnoticed. "Oh look, a human camera crew..." Needless to say, the screen goes to static pretty soon.
* Avengers Tower features team members that don't get featured elsewhere such as Iron Man, Wasp, and Hawkeye.
* Avengers: Under Siege and the original Korvac Saga, possibly a few other times.
* Avengers vs. X-Men, deciding that using their god-like power to eradicate war, hunger and strife is a perfect excuse to bring about peace to the world.
* Avengers vs. X-Men does a brutal one to Magma. He's held in a prison and she brings him dinner. Suddenly Clint starts yelling out that there's glass in his baked potato and he's cut himself really bad. Amara doesn't believe it, but she's a bit on edge and so she peeks through the open food slot to see if he's okay. For that she gets a metal tray tossed into her throat and while she's keeling over, Clint grabs Amara's arm and pulls it through the slot. He then threatens to break her arm if she doesn't open the door. When she refuses, he goes through with it and breaks her arm, threatening to keep working her over until he does. Luckily another X-Man is nearby and knocks Clint off of her. As punishment, Clint and other escapees are put in a Virtual World that keeps replaying them trying to escape and failing.
* Avengers vs. X-Men. Eventually, they had no choice but to bring him back as a

hero.
* Avengers vs. X-Men had the two superhero teams facing off over the fate of a mutant girl who, supposedly, will inherit the Phoenix Force when it returns to Earth and the conflicting sides trying to handle the situation to prevent a disaster.
* Avengers vs. X-Men is impressed (and that's saying something) by her power, claiming that it would take a person within the spheres a hundred years to take a single step.
* Avengers vs. X-Men, one Avenger mentioned that the reason why the Avengers had difficulty tracking down the Phoenix 5 (when they weren't blowing things up in public) was that they had no telepaths to scan for them, they were all on the X-Men. They had a bit more luck tracking Hope before the disaster that created the Phoenix 5, but that was limited - for one thing, their telepath, Rachel Summers, was acting as a mole for her dad.
* Avengers vs. X-Men on Utopia, which is unofficially a sovereign nation. Cap comes by and politely asks Cyclops to hand her over... Just so happening to bring along two dozen members of the Avengers and one of the SHIELD helicarriers. After being pushed around by humans for decades, the Mutants on the island don't exactly respond well and a fight breaks out almost immediately.
* Avengers vs. X-Men, Peter told Illana, "If I ever see you again, I will kill you." They have since made amends and are back to being a family.
* Avengers vs. X-Men, Rachel Summers describes being a previous wielder of the Phoenix Force, but she does not play an active role in the story, nor does she bring up her relationship to the Phoenix since encountering the blue shadow energy of the "Blade of the Phoenix". In three to five pages, describe her reasons for not interacting directly with the Phoenix.
* Avengers vs. X-Men. She then fast-forwards the two of them through time, as the Earth heals itself from the damage, eventually re-covering it in lush greenery and returning it to the animals. The issue then ends with the implication that Logan and Jean will now serve as the new Adam and Eve.
* Avengers vs. X-Men supervillain. Fans did not respond to the new status quo do in large part to fans largely agreeing with Scott or just finding him to be far less villainous than Marvel were saying he is, and eventually, the pair were killed off and resurrected to wipe the slate clean.
* Avengers were only split up between East Coast and West Coast, the two teams would meet up for an annual game of baseball. One of these games was interrupted by a cosmic being called the Grandmaster (who, as it happens, is obsessed with sports and games), but that's a long story.
* Avengers who's in the same tier as Thor or Hercules in terms of raw strength and invulnerability. In fairness to him, this wasn't an unfounded fear, as he was mortally wounded and rendered comatose in his first appearance.
* Avengers World, just to give more screentime to some of the underused players.
* Avengers World series that launched soon after, and under the same writer to boot.
* Avengers, Zemo no longer hides as a villain, and works with a Masters of Evil team consisting of Mr. Hyde, Taskmaster, Tiger Shark and Whiplash.
* Avenger, the civilization on Mars seems an awful lot like the city-states of ancient Greece.
* Avenger to show viewers that it is really Mars where the action takes places.
* Avenging Apes Of Africa who gain super-powers and human-like intelligence after being exposed to an ancient healing potion, growing up to become defenders of Africa's wildlife, specifically seeking to defeat the poaching kingpin Harry B. Richbone. Yes. This existed.
* Avenging Force returning to the role of Matt Hunter. When he was uninterested, the role was rewritten to be younger and was given to Michael Dudikoff instead and it became a standalone film.
* Avenging Force: The bad guys have a "hunting club" for this purpose. The main character is forced to participate in it as the prey after his sister is kidnapped.
* Avenging Force. The lead white supremacist's rant about liberals and communists

refers to 20 million Mexicans in the United States who would just "love to rebel and join the Socialist Republic of Mexico."
* Avenging Spider-Man by swinging a shard on a webline and cutting off his loincloth. Turns out shaming someone in battle also counts as besting them.
* Avenging Spider-Man past in thievery as if he hasn't done anything as petty. In another issue, his monologue concerning the Hobgoblin is about how the villain's smugness and thoughts of being better than everyone else grates on him.
* Avenging Spirit, you play as a ghost who's been brought to earth by a scientist, and you have to save your girlfriend from some gangsters. You have to possess the game's enemies in order to do anything- every time one body gets killed, you have to go right into a new one in a certain amount of time, or you'll run out of spiritual energy.
* Avenging the Villain: After the hero kills the villain, the hero gets targeted by the villain's vengeful loved ones.
* Avenging the Villain: You killed my evil leader, and now I will avenge him by hunting you down!
* Aventure Dennis, the protagonist fights Shadow Dennis, a palette-swapped version of himself.
* Aventures has the technology side, using a mechanical arm for diverse purposes. However he doesn't have racism against elves (the game master said the rivalry doesn't exist in his world), is closer to nature and doesn't have a drinking habit. A live adventure showed that his brethren are more cyborgs than dwarf and even for them Grunlek is different.
* Avenue 5 are all actors and models hired to look good while the real crew is hidden away in the lower decks of the ship. As Clark is stunned, Billie dryly asks if it never occurred to him that just maybe he wasn't the only person hired for looks more than actual expertise.
* Avenue 5, being exposed to the vacuum of space will immediately cause you body to freeze completely solid even before you leave the airlock.
* Avenue 5: In the second episode, the crew and passengers have a funeral for Joe by placing him in a coffin and ejecting it into space... but the coffin's weight means it doesn't get enough momentum and is stuck in orbit around the ship, leaving everyone to watch as it constantly circles them. Later, they have another funeral for some passengers who died from wounds sustained in the original accident, and try to solve the problem they had with Joe by using lightweight coffins and bursts of compressed air to push them past the ship's gravity well. But the gravity gets reset just as they're launched, robbing them of that momentum and leaving them also orbiting the ship.
* Avenue Beat - "I Don't Really Like Your Boyfriend" has the singer telling her friend to break up with her controlling boyfriend because she deserves better.
* Avenue of Mysteries, has its Mexican author-protagonist Juan Diego take an extended stay in the Philippines to fulfil a promise to a childhood friend.
* Avenue Q, about a recent college graduate named Princeton looking for his purpose in life while struggling through post-college poverty, ends with another recent college graduate showing up. Princeton realizes he could really teach this person something about life after college, and realizes his purpose is to take everything he's learned and put it into a Broadway show. Brian comments "Are you high?" and the kid flips him off and runs away.
* Avenue Q, and in the end they all decide they'd be losers if they went back, because they would be thinking "these kids are so much younger than me".
* Avenue Q are Brian (white Jewish male), Gary Coleman (black male), and Christmas Eve (Asian female).
* Avenue Q, as porn is not actually a stable investment at all in America during the show's run, as free sites like Pornhub have driven most pornographic production companies to near bankruptcy.
* Avenue Q: Both halves are funny, but by the end of Act 1 most of the characters have fundamentally screwed up somehow; Act 2 focuses on them realising what they've done wrong and making amends.
* Avenue Q but this was changed to avoid copyright problems. The name remained

unchanged.
* Avenue Q gives us the song "Schadenfreude": "You ever clap when a waitress slips and drops a tray of glasses?" "Uh-huh." "And ain't it fun to watch figure skaters falling on their asses?"
* Avenue Q has a few cut songs, as well as a fair number of songs that were written for promotions of the show. These are the cut songs:
* Avenue Q has a lyric: Except for death and paying taxes everything in life is only for now.
* Avenue Q has a whole musical number about it: "You can be as loud as the hell you want when you're making love!"
* Avenue Q has warnings such as "PARENTAL ADVISORY: 60% adult situations and 40% foam rubber" and "Not appropriate for children due to language and adult content such as full puppet nudity."
* Avenue Q. He's not part of the main ensemble of Avenue Q residents, but periodically shows up to interact with the main characters, who treat him with a mixture of amusement and pity. They all agree that while their lives are bad, his is the worst.
* Avenue Q in the song "Everyone's a Little Bit Racist", when Brian (who is engaged to a Japanese woman) protests he isn't at all racist.
* Avenue Q, in which a champagne pop is mistaken for a character's suicide in the final minutes but very quickly cleared up.
* Avenue Q is an immigrant who sings about how her life sucks, in part, because she worked in a Korean deli (or, in some versions, a Chinese restaurant) upon coming to America, despite being Japanese. In the Australia/New Zealand tour, she is played by Filipina Christina O'Neill.
* Avenue Q: Just grab your dick and double-click for porn, porn, porn!
* Avenue Q. Nicky himself sets them up, noting that he knows Rod's type, but it's deliberately left ambiguous whether he knew Rod liked him or whether he just guessed well.
* Avenue Q, Nicky refuses to give up his money by ranting "I can't! I need it! I'm homeless! I can't! I need it! I'm homeless! I can't...." until Princeton slaps him. Nicky calmly hands over the money then.
* Avenue Q, Nicky searches for a boyfriend for his friend Rod (who secretly has a crush on him), and finds Ricky, who is almost identical to Nicky, right down to having the exact same voice, except that he's gay. Rod is overjoyed.
* Avenue Q occasionally have Trekkie Monster give the audience an exasperated aside glance when Kate confidently claims that "Normal people don't sit at home and look at porn on the internet." Much laughter ensues.
* Avenue Q of Ernie and Bert) that it is OK to be gay, but making it clear that he himself is not gay.
* Avenue Q, particularly her use of Rs in place of Ls and the exclusion of certain articles in her sentences.
* Avenue Q, plus idiosyncratic grammar. Her pronunciation of "recyclables" as something along the lines of "lee-psych-er-a-burrs" is incomprehensible to anyone but her husband. One of her songs is "The More You Ruv Someone (The More You Wanna Kirrem)."
* Avenue Q, Princeton and Kate end up in bed together. Kate instructs Princeton on how to pleasure her by saying "A little to the left." Then she says "No, my left."
* Avenue Q. Princeton is a college grad, but he's still not ready for real adult life.
* Avenue Q. Princeton thinks he's finally discovered his purpose in life when he sees a kid fresh out of college just like he once was: put together everything he's learned about struggling through life after college and make a Broadway show out of it. The recent grad flips him off and leaves, and everyone else thinks it's a bad idea too.
* Avenue Q, Rod tries using "la la la" when Nickie tries to discuss homosexuality with him in the "If You Were Gay" number.
* Avenue Q says racial slurs against Kate Monster when she sees her and Princeton together.

* Avenue Q serves as an I Am Song for more than half the cast: Princeton, Kate Monster, Brian, Christmas Eve, Rod, Nicky and Gary each get a verse. Additionally, "Special" is Lucy The Slut's I Am Song.
* Avenue Q sings "My Girlfriend Who Lives in Canada", which provides the page quote.
* Avenue Q" song, as well as "If You Were Gay" and "Everyone's A Little Bit Racist," both of which are frequent sources of quotes and YouTube parodies.
* Avenue Q song "Schadenfreude", where one of the examples Gary Coleman and Nicky give of suffering that's fun to observe is "Straight A students getting B's".
* Avenue Q, specifically one about how he's already achieved his purpose and how everything since is just a "slow, tiresome walk to the grave", were cut following the real Coleman's death.
* Avenue Q's "The More You Love Someone (The More You Want To Kill Them)"
* Avenue Q, the characters frequently address the audience in a manner similar to Sesame Street, which the show is parodying. At one point, when the characters are trying to collect money, they literally run into the audience with hats and collect money from audience members (the money is donated to Broadway Cares).
* Avenue Q themselves, though the play is fairly mum on whether or not they're frequent masturbators.
* Avenue Q the puppeteer of the resident closeted homosexual Rod, John Tartaglia, is a gay man in real life, who's currently happily taken by his partner, Devin Neilson, who's also known as Tumblebrutus from the American tour of Cats.
* Avenue Q, there is a whole song where Rod dreams about Nicky talking in his sleep.
* Avenue Q to deflect suspicion and is clearly in love with his best friend and roommate, Nicky. When he comes out, no-one was aware it was even supposed to be a secret.
* Avenue Q use the bowtie/hairbow version, plus the 'female' bear has eyelashes and a pearl necklace.
* Avenue Q was going to have a lot of fuzz, similar to Trekkie Monster, but was shaved before production so she would look better with a male (and human) love interest.
* Avenue Q. When the real Coleman died from an epidural hematoma in May 2010 at the age of 42, that evening's performances of the show by the off-Broadway cast at New York's New World Stages and the national touring cast in Dallas were dedicated to his memory.
* Avenue Q when you notice that the voice of Nicky/Trekkie Monster has the only puppets that require two people to work (can be used by one, but not as effective).
* average five-year-old child that he is able to spot will be corrected before implementation.
* Average Joe and that, at the end of the day, they are no kinder or more intelligent than the attractive men.
* Average Joe (not to the mole) that he knows she's working for the unknown enemy...
* Average Joe was distracted by the Hunks' (Skins) bodies after they took off their shirts. Ditto for Larissa on "Average Joe Hawaii" when the Hunks took their shirts off for the Shirts vs. Skins dodgeball game.
* A verbal example comes from William F Buckley Jr. and Gore Vidal's debates during the Republican and Democratic National Conventions in 1968. What began as a debate on the Republican candidates quickly turned into a one-up contest, with both participants
* A Verizon cellular phone commercial has a biker getting ready to leave and telling his lady love that she can't come with him because he rides solo...and then she asks about the crowd behind him. "Well, except for my Network."
* Avernum 2 is destroying Empire's portal through which it sends reinforcements and supplies to Avernum.
* Avernum 3: exploring further east than the quests provide any need to will bring your party to an isolated town that appears unpopulated and undisturbed, except for a sickly odor, difficult to identify. A single inhabitant welcomes you to his Inn.

* Avernum are finite, and even beatable at higher levels, but they have a special trait that makes them more effective against player characters than against monsters.
* Avernum), a series of shareware RPGs, used it very straight. The introductory text suggests you were probably thrown through the one-way portal to the underworld for stealing a loaf of bread or speaking out (or even simply "not fitting in"), and NPCs you meet will admit to being there for anything from being on the wrong side after a regime change to having had rebels hold a meeting at their inn to, in one case, being lesbians.
* Avernum devastates everything right behind you. There are plenty of other times you have to outrun quickfire as well.
* Avernum did. Either way, it's a good thing it's down there—it's also what turns the caves' carbon dioxide into breathable air.
* Avernum games is applied through magic, gas, spider bites or worms' spit - it'll always look green, and work in the same way.
* Avernum has a number of scripted events where getting near to or examining bodies will spawn undead creatures to attack you.
* Avernum have a series of honorifics for various members of their communities; the three most common in-game are -Tel (for government officials), -Ihrno (for high-ranking mages and similarly powerful community members), and -Bok (a posthumous honorific; the Crystal Souls you meet all bear -Bok suffixes to their names).
* Avernum (in the flesh, at least) uses this line nearly word-for-word—however, she's not quite fluent in English, and it comes out as "peaceness" instead.
* Avernum "lizards." Avernites get their nationality insulted constantly: "worms" by Empire citizens and "voles" by people from the Abyss.
* Avernum, mostly averted the trope. Spellcasters could start the game with mass-damage abilities that rendered many encounters trivial, while the fighters just sat there playing meat shield and occasionally dealing a little damage. By the endgame, casters were still very important, but mostly for their ability to buff fighters into unstoppable killing machines that could actually damage the ridiculous piles of elemental resistances and immunities that were late game enemies.
* Avernum series lampshades it with the Empire, which is described as "Not the Something Empire or the Empire of Something. Why bother with names, when you are the only Empire around?"
* Avernum sets these up intentionally in the first three games. Learn the Priest spell "Move Mountains" and look for cracked walls, and you can sometimes get around the baddies (or at least find sealed-off rooms.) Sadly, as of the fourth this is no longer possible.
* Avernum shows a character bending to pick up a coin while, unbeknownst to him, an arrow whistles over his head. This is true to the game; the Luck stat (among other things) increases the chance that a fatal blow won't actually kill you.
* Avernum's sidequests involve a vampire who asks your party to deal with a group of ogres who have killed his beloved.
* Avernum summons two future versions of himself to assist him, and he does his best to keep his grammar consistent when shouting orders to them. He loses track and starts rambling when you kill both future selves and screw up the timeline.
* Avernum: The Heroic Brew tastes incomprehensibly foul, but turns even wimpy mages into unstoppable juggernaughts for a few rounds, nevermind the actual frontliners, who become godlike.
* Avernum, there is a much harder way to win the game, that preserves her life. You just have to never accept the plot token she gives you, leading to much harder battles in the end game, and having to fight the final battle several times.
* Avernum trilogy the Avernites have developed their own Portal Network which connects Portal Pylons located across Avernum to the main portal.
* Avernum you encounter a Cargo Cult that seems to worship random junk they've collected or stolen from various places. They do worship some valuable artifacts as well, but that doesn't make them any less deranged.
* Avernum, you get an ability called "Ritual of Sanctification" for a specific

quest in each game. (It's used to purify an evil altar.) You can use it several more times throughout each game, and at least once it's needed to complete another quest.
* Avernus itself is a Deathworld where over a million soldiers a year are killed by the native flora and fauna. On a good year. It was created by the Old Ones to breed anti-Chaos weapons, and in all the millions of years since, had never let itself get rusty.
* Aversa also falls into this since, like all flying units, she suffers from a crippling weakness to bows and wind magic, and can be easily curbstomped by any appropriately-leveled unit with access to either.
* Aversa Hit Rate +10 and has weaker stats in Paralogue 22 when she joins you. On the other hand she has learned Relief and Rally Movement.
* A verse of the song "Bring On The Men" from Jerkyll and Hyde is made of this.
* aversion are surveying a planet, Nog notes they are going to check other water sources to make sure the elements in the water they are reading isn't unique to the local area.
* Aversion: As mentioned in the article introduction, tasers and similar electric stun devices can
* Aversion: Conservapedia is often accused of this, but, sadly, the founder is serious: he works for a conservative interest group headed by his mother and founded it when a student cited that Wikipedia used CE along with AD, which inspired him to create a wiki without "liberal bias". It's used to teach in his classes, in fact. How many of the
* Aversion: Interestingly, most dangerously pressurized material is kept in cylinders which tend to not only be easier to store, but also tend to burst with a vertically aligned rupture which produces little shrapnel. Spherical containers are more likely to explode. This is due to a principle known as
* A version is shown on screen during Huey's monologues about how Peace Walker works in
* aversion Kirk and Spock go back to find McCoy and realize that the woman who has become a love interest for Kirk is the very one that MUST die for the timeline to be restored. Ultimately, Kirk decides he must let her die, but it was a difficult decision.
* Aversion: Lightning strikes that leave no apparent physical injury have been shown to often alter the personality of the strikee.
* aversion—the basic idea of "poor guys gains his fortune as an adventurous sailor" remains the same, though the adventures are different and his role in the main series is set after they're complete.
* aversion nature) of birth. The camera only being a foot away from his wife's... "area" also lends to this feeling.
* A version not well known of the myth state that what the box contained weren't evils, but blessings, and that these blessings will benefit the mankind as long the box was never opened, but a nameless idiot (and not pandora) opened the box, the result: the blessings flew back to the olympus, and when the lid was closed again, the only blessing that was lef behind was the hope.
* A version occurs in an episode where Drew is suspected of being a drug addict. The cop assigned to the case goes through his house, finding various evidence that means he
* A version of "Da Da Da" with rewritten lyrics was also used to advertise Ariston domestic appliances in the UK during the mid-80s.
* A version of Santa Claus routinely showed up in the various examples of
* A version of self-plagarism is how practicing works - and some creators doing this may think that is all they are doing:
* A version of shiritori played with catch phrases, one-liners, and assorted strange sentences is used for the
* A version of the above song had previously been used for "Pocket Rockers" a music-playing toy made by Fisher-Price.
* A version of the legend makes this even scarier by having the massacring goddess being Hathor, the

* A version of the McGregor story told in the "Folklore" section below occurs in an Issue #14. A rather sad-looking guide talks about all the things he helped to build inside a building...and then someone calls out, "Hey! Bill Chimpfucker!"
* A version of the sausage story under Folklore was done as a skit in
* A version of the show's theme song was recorded and released by a group called the Bass Kittens, who labeled it "The Impending Doom Mix".
* A version of this can happen if you're trying to perform a given task on your computer (say, opening a PDF file) and you don't have a program assigned to perform said task by default. If that's the case, you'll have your computer asking you which of your capable programs you want to perform the task every time you want it done.
* A version of this character from the future later appeared in Teen Titans piloting
* A version of this is employed in many sports and games with a competitive scene (especially where there are regular tournaments with cash prizes): the winners' strategy is analyzed and copied. Those who wish to remain winners must continually create new strategies, or perform their strategies better than anyone else can.
* A version of this is used during the first season when Sokka is taken by Hei Bai. But just as Aang is to reach Sokka's hand, Hei Bai takes Sokka with him into the spirit world.
* A version of this is used in Tagalog: A woman only a few years older than you would be called
* A version of this occurs in one of the silly songs: the song is sung along with a slideshow... which eventually stops showing relevant pictures and starts showing vacation pictures instead. The song quickly ends, to the consternation of Archibald, who wonders just what the ending of the song was supposed to be.
* aversion of this. The manager specifically tells Mike that being an employee there doesn't mean he has to take crap from anyone, customer or not.
* Aversion of this trope (and how!) provides the punch line to the short story "The Gun That Shot Too Straight".
* Aversion of this trope is a major plot point in the second half of
* A version of this trope, less dire when it was enacted, happened in the
* A version of this trope that actually favors the protagonists occurs in an episode of
* A version of this was recorded by the band Pentangle, titled "A Maid That's Deep In Love".
* A version of this whose main obvious use seems to be to make solid materials
* aversion. She's not shy about going to war, but she views it merely as a means to an end; if she can achieve her goals by making an alliance with her enemies, rather than fighting them, she'll gladly do so.
* aversion's social media intern Pat insists on upgrading her to an iPhone from the current decade, but not before gazing in awe at Brown's vintage phone (and being disappointed when he realizes it doesn't have Siri).
* Aversions to common things: will anger, frighten, repel or harm the character.
* A version that uses this mentality, i.e. unthinking repetition, involves asking a question over and over again, then asking the opposite, so that the arguer unthinkingly supplies the previous answer, which now has an opposite connotation. For example: "Can I do this?" "No." "Can I do this?" "No." "Really?" "No." However, it tends not to fool them for long.
* Aversion: The head of BBC News banned their reporters from working with their
* aversion to the trope, actually, since Smokey is, in fact, a wise, friendly bear, but woe upon anyone who tries to destroy forests in his presence!
* aversion to this is "pulseless electrical activity", or PEA. That's where the brain is sending the signals to the heart to establish heartbeat, but the heart isn't responding. So the monitor is beeping normally, while the patient looks dead as a doornail. This can happen with extreme physical restrictions to the heart muscle like pneumothorax or tamponade, or an extremely well-placed injury to the heart muscle that affects the nerves that transmit those signals.
* A version was done at an earlier part of the story, though not with technology:

to end a Matoran
* Aversion: With its 95% Rotten Tomatoes score, nobody would ever have (and for that matter,
* Aversion with Lot. Lot (spelling varies) who preaches in the Cities of Sodom and Gomorrah where the citizens are violent, lustful, and where homosexuality is rampant. The last part is the reason you don't find anyone named Lot (spelling varies) in any Abrahamic religions. Doubles with
* aversion won the gold after edging American bronze medalist Rudy Gay. Even Gay didn't look very heartbroken.
* avert also used it for selfish ends herself, such as trying to make Elixir jealous by using her pheromones to seduce Prodigy into kissing her.
* avert better. Not long after he tries to get the Raikage to not try and kill Sasuke for attacking his brother.
* averted— which turns out ironically to make him irresistible to women, who find it extremely attractive that he is just being innocent and not trying to seduce anyone.
* Averted. According to Air Force Lt. Col Robert Patterson, in 1998 he requested President Clinton present the card so it could be replaced which led to a manhunt around the White House before Clinton finally admitted that he couldn't remember the last time he saw it. General Hugh Shelton tells a similar story which occurred in 2000, when Pentagon officials were required to inspect the codes but were deferred by his aides for months with the excuse that the President was busy each time. When the time came to finally change the codes, it became apparent that nobody knew where they were.
* averted; a control group is just going to be pushed off the other side of the tower.
* Averted a couple of episodes earlier featuring the two duelling kaijus, Detton and Sadola. The moment Jack shows up, both kaijus
* Averted after Lucifer's fight with Amenadiel in "#TeamLucifer". They end up smashing every bottle in the bar, so he can't fulfill this trope afterward.
* Averted again in one issue where Promethea receives a lesson in the Major Arcana of the tarot.
* Averted again in the IDW Comic Friends Forever 11 where Dash is extremely relaxed amongst the kids and has to calm down supposed
* Averted again with Skywynne’s daughter, Soupina the Strange. She was betrothed to Persian Waterson, who she actually liked a lot, but he died due to the sickness plaguing Mewni at the time. Soupina was devastated, but eventually found
* Averted: all of the various "mancy" spells are just different ways of using Divination. With the exception of
* Averted also in the third film when the DeLorean is hit by a train after returning to 1985. Rather than explode in a fireball (it didn't even have any gas in it that could have ignited in such an unrealistic fashion), it more or less shattered into pieces without any pyrotechnics.
* Averted. Although either Tristram or Isolde may be gender flipped depending on the arc, their sexualities will always change to match. Also avoided; in at least one arc, Nimue is a guy, but how this affects her/his relationship with Merlin is never addressed.
* averted, although they can open portals on surfaces with cameras or ladder steps attached to sever them.
* Averted...although to be fair, he left Gwen alone once he knew she was interested in someone else and only went after her again once she was unattached.
* averted" ...and a disgruntled boy who's intently pondering it gets a look of sudden realization, and then an evil smile, on his face.
* Averted and eventually inverted by North and South Yemen, who were not part of the same country before their independence, and joined each other in 1990.
* Averted and have found methods to prevent their supply of feeding rays to be cut off again.
* Averted and lampshaded when Carrie angrily storms out of her office and the elevator arrives as soon as she presses the button rather than leaving her standing

around waiting.
* Averted and played straight during the fight with Saber and Berserker, with the former being forced to dodge the latter's strikes and the latter easily blocking and parrying hers with his sword. This is not because their weapons would take damage (Saber has her aforementioned magic sword and Berserker's blade is more like
* Averted and played straight for two different characters in an episode of
* Averted and played straight with Araki, hereditary adviser and Chancellor to the Emperors and Empresses of the Shi'ar, who serves through a succession of clone bodies. He starts out a loyalist to
* averted and played with, in the case of the various AI characters. May looks and acts as though she were mid- to late-twenties, but Momo (who sometimes remarks on her chronological age of about two-and-a-half years) actually looks like a Pre-teen and can be quite naive, although this isn’t consistent and at times she is quite mature. Bubbles is clearly older, although quite how old she actually is, and how much is due to her PTSD-like symptoms from her trauma in service, isn’t clear. Winslow is quite child-like and maintains this in his new chassis. Pintsize is a smart-Alec of indeterminate age, but has clearly been around for quite some time.
* Averted, and she's only stopped because the heroes were just strong enough to stop her despite her newfound powers.
* Averted, and that primates are already so humanlike that they can't be anthropomorphized to the same extent as other species.
* Averted and then played straight in the first and second seasons of
* Averted and then played straight in the Sniz & Fondue cartoon "A Toxic Tail" on
* Averted and then played straight with the bear in the episode "In Your Footsteps", who unlike most characters, looks and acts mostly like an ordinary bear. Despite trying to ineptly copy Finn's voice, clothes, and mannerisms so he can be a hero too, he's shown to be harmless, none too bright, and misunderstood.
* Averted and then played straight with the two Macro-Bots in the same episode. Professor Hackle quit working at Puma-Dyne after they wanted to weaponize two giant space exploration robots he designed. He left the company before the robots could be built, but Puma-Dyne built them anyway, using Hackle's original designs and just adding weaponry to the final product(s). If Hackle didn't want Puma-Dyne to build the Macro-Bots, he shouldn't have left the plans for them with the company. An example of having the plans being a
* Averted, and very much so. Light understands perfectly well what he is to Ryuk, which is why he makes sure to stay interesting in his clever
* Averted and zigzagged with the Black Beauty Sisters. She has red hair and blue eyes and Mimi has blue hair and red eyes.
* Averted: a newspaper crossword-puzzle editor was once briefly arrested for using the words "Overlord," "Utah," "Omaha," "Mulberry" and "Neptune" in a number of puzzles in the weeks leading up to D-Day.
* averted Antimagia is the name of the type of magic the main character uses.
* averted, a prominent real-life psychologist who has written several books about Asperger's Syndrome, so that they can better understand her condition.
* Averted, as all of the major monster trucks from the late '90s are featured and driveable in-game.
* Averted as Bandit and Snowman also were seen to be working out an agile-comms plan (switching from channel to channel) to avoid police monitoring just after the Trans-Am was driven out of Snowman's trailer before they set off towards Texas. "What channel are we on" is asked by Bandit to Frog (Sally Field) before unit-to-unit comms commences. Also note that Sheriff Justice speaks into a different mic when talking other police officers, than when talking to The Bandit.
* Averted, as everyone with a lick of sense designs their technology with at least one prototype and one set of plans-or, in the case of the Evronians, multiple ones.
* Averted, as getting electrocuted makes all your needs drop severely. If they drop low enough, the Sim will die.
* Averted as Gyro used that rocket belt for a while before giving it to Paperinik,

hence he had plenty of time to work out any flaws.
* Averted as he's a public defender-they have no choice in their clients.
* Averted: as it turns out, the only people who ever officially died and came back actually were AI, and therefore never alive to begin with.
* averted; as most of the loopers are both massively powerful and constantly exposed to alternate universes, they've practically created a science of fixing them in as short a time as possible. Given full power, most of them can do it in minutes, if not seconds. Given a universe that limits their power somehow, it takes them...hours. Occasionally days. Every universe matters, no matter how inconsequential.
* Averted, as Mothership and carrier-type vessels have only a few small point defense weapons (though they compensate with the ability to quickly build their own fighters and even warships). That said, a few non-playable factions do in fact use these:
* averted as much as it does in gameplay; in one scene, Cayde-6 tries to cast Golden Gun during a fight, only for a Scorn to tackle him mid-spell and make him miss.
* Averted as of the most recent book: far from being demolished, the Two Rivers is thriving, having emerged from its sleepy isolationism, discovered the military application of being the home of some of the world's best archers, produced some of the most powerful young magic-users (both male and female) in the world, peacefully absorbed one nearby nation-state and built strong ties to two others, and gone from being a forgotten backwater of the queendom of which it was only nominally a part to being officially recognized and elevated above all other member states in what is quickly becoming one of the largest and most powerful empires on the continent.
* Averted as of the revelation of the Kingdom of Marley and the rest of the world, which hovers around the area of WWI, with bolt-action rifles, machine guns, and aircraft (both of the lighter and heavier-than-air variety) being commonplace. Tanks
* Averted as of the third game, which allows the player to set a Sackbot to be waterproof or not.
* Averted, as stated above, because assuming you've been given access to legal counsel, the phone call is at the discretion of the custodians.
* Averted as strongly as possible in one of Paul Chadwick's "100 Horrors" backup features collected with
* Averted as strongly as the Classic series ever really really managed in the aftermath to "
* Averted as the soldiers have little loyalty to Skunk, and more to Mera and Buppa/Bubba (depending on translation) - shown when Skunk orders his soldiers to fight the resisting Tribes who were not destroyed/amalgated into the Skunk Empire after Buppa/Bubba died. They tore their armbands off after receiving that command and moved against Skunk - and all the other Tribes did too. Also, they stopped fighting after hearing Buppa/Bubba died.
* Averted, as the three girls (all blonde) look more like the blond Dave Coulier, who plays the unrelated Joey, than either Danny (their father) or Jesse (their uncle). The girls are said to take after their blonde mother, Pam, who is Jesse's sister.
* Averted at least three times now with Magneto's Asteroid M. Even the mutants who end up riding these things into the ocean tend to survive more often than not.
* Averted at least twice with Yuzuru Hanyu. He suffered a horrific crash into Yan Han during the free skate warmup to the 2014 Cup of China and had to go into surgery for the extensive injuries sustained, as well as the aftereffects. It was thought the crash would be his career-ending injury, but as of 2020, he remains the top-ranked men's singles skater in the world at full health. The repeated injury to his right ankle (the most serious time being in 2017, forcing him to withdraw from competition) was believed to be this as well, but he has recovered from it despite having to accept his 2018 Rostelecom Cup gold on crutches and skating at the 2018 Olympics on painkillers for said ankle.
* Averted at one point when the Blackwatch forces are told that defending a

particular truck is their primary objective, and they immediately cease to attack you,
* Averted at some points, where even the crew doing the commentary have trouble distinguishing what's CGI and what's hand-drawn.
* Averted at the 2006 correspondents' dinner. The organizers didn't mistake Colbert for a right-wing pundit who was going to praise Bush. Colbert was
* Averted at the end, when Ben initially seems to be the only survivor of the party, before Zoey reveals she was Faking the Dead
* Averted: A villain plants a small, camouflaged bug on a chair, although in other points of the fiction it is pointed that bugs are large and flashing. It goes undetected by the hero. The trope never comes into play.
* Averted because the gluten structures will collapse long before the gases reach critical density to cause an explosion. Without the gluten structures to hold the gases in, the gases will simply poof out of the bread. This will result in a product that kinda looks like Swiss cheese. Also, too much yeast growth will end up eating up the dough, which will result in weakening of the gluten structures rather than extreme expansion.
* Averted: Being an early version of an Open World RPG, you don't have to go wherever the story directs you; at least not right away. There are a lot of areas in the world that you're free to explore with their own side quests and rewards. Of course, the further out you go, the more dangerous critters/enemies you run into. If you know what you\'re doing
* Averted between Luna Loud and her girlfriend, Sam Sharp, who both seem to be about equally tomboyish to each other.
* Averted. Brandon at first appears to have taken a critical hit, but it later turns out it only grazed his skin and he passed out from fright.
* Averted, briefly, by the Australian Football League in 2009, who refused to recognize the naming rights to Melbourne's Docklands Stadium after they had been acquired by Etihad Airlines, primarily because the league had rival Qantas as an official sponsor. (The Melbourne venue is now known commercially as Marvel Stadium. Yes,
* averted, but Betty's father was more than willing to drag them off to a wedding chapel before it gets straightened out.
* Averted, but nearly became a reality when a rumored deleted scene revealed the fate of Honest John and Gideon. Shortly before Pinocchio goes off to rescue Geppetto from Monstro the Whale, John and Gideon run into him for a 3rd time and attempt to swindle the boy once more. Realizing the men's true nature, Pinocchio avoids them and they are both apprehended and placed under arrest by the police.
* Averted, but played straight with Chonny's parents...or Chonny's portrayal of his parents.
* Averted), but there's no official pressure on them, and their respective duties make it difficult to see each other.
* Averted by a friendly witch who was splashed at the same time as the wizards in one book. The princess who soaked them figured the witch would be safe (if wet) because she kept a very tidy and clean home, and there's no way someone that good at house-cleaning would have any problems with soap and water.
* Averted by all the adult family members, who have appeared in every episode.
* Averted by Al Madril of Pacific Northwest Wrestling: he was known to lose matches when he attempted to head-butt his opponent and then fell back unconscious.
* Averted by Archie himself in one story where he and the other characters go on strike and talk directly to
* Averted by Barik and Pip. They have forehead goggles at champion select, but put the goggles over their eyes when the action starts. On a similar note, Fernando also puts his helmet's visor down.
* Averted by Basilard. Despite being a top-tier mage and knowing several illusion spells his skill with them is poor because they're not his speciality. This is why he usually forgoes them in favor of straight up combat.
* Averted by Billy Crystal, who commented in a standup routine that he thought it was very amusing the variety of people who would greet him with "You look mah-

velous!" (Apparently, this was better than the greeting he often got during the run of
* Averted by casinos (in the US, at least), which DO NOT hire convicted cheaters to catch cheaters.
* Averted by casters specializing in Creation magic, especially ones that also take the Arcane Warfare metamagic tree branch. Creation magic offers a lot of long-duration buffing spells that include things like increased maximum health, increased resistances (both status and elemental), accelerated regeneration, shielding (so they can use their magic-aiming ability to parry things), and a "you must be this damaging to hurt me" barrier against things not capable of cutting energy, as well as offering direct healing spells. The Arcane Warfare metamagic branch cranks up the shielding aspect in particular, making the shields able to absorb much more damage and have a better effective parrying ability with which to do so. It's not impossible for them to go so far as to be a party's
* Averted by Chris Thomas King's "Bonnie And Clyde in D Minor." The singer repeatedly tells a woman named Bonnie that he is not interested in becoming a gunfighter in order to impress her, all the while stressing that his name is not Clyde. There's also a good chance that her "gun" - which is "long and made of steel" - may be a vibrator.
* Averted by D&D zombies, which are non-contagious corpses animated by spells.
* Averted by default and taken advantage of in police chases — officers are taught that when the car in front of them goes around a turn they'll slow down, and this can be good time to ram the car. Many police cars have reinforced bumpers for this purpose.
* Averted by default in that the whole point of the story is the various alternate Spider-Men and Women trying to stop Morlun from killing people throughout the multiverse. On the other hand, the comic exploits the alternate universe angle to create an
* Averted by Dr. Mills, who notes that his initial gut reaction is to dismiss such a story, but then reminds himself he's talking to a purple unicorn on the topic of magic, and so she might just be telling the truth.
* Averted by eastern gray squirrels, but poorly. When presented with a threat, they run towards the nearest tree or the tree they came down from. They will do this even if it takes them into the path of danger more so than sitting still.
* Averted by "El Padrino", the killer's later Colombian employer. He's fine with parting ways peacefully once the killer's debt is settled, although he later manages to convince him to come work for them again.
* Averted by fellow Canadian TV provider Eastlink, which has a separate "Animated Comedy" category.
* Averted by Finnish and German traffic laws, which base fines on offenders' income in order to make sure they hurt a rich person as much as they would a poor person.
* Averted by football running back Earl Campbell. Though he regularly ran over and through people with enough force to hear the collision over every other sound in the stadium, nothing he did was illegal.
* Averted by Gerard Valkyrie of the Wandenreich whose "The Miracle" ability increases his size, strength and speed accordingly so that it makes him gigantic while making him even faster.
* Averted by Gohan, who is half-Saiyan (and very powerful) but doesn't really enjoy fighting as much as other Saiyans. He doesn't much bother with training unless he anticipates having to fight a villain. Despite being one of the most intelligent characters in the series, he's too
* Averted by Hans. As the snow starts falling and Anna still wears her ballgown that leaves her arms and shoulders bare, he only pulls his jacket tighter around himself.
* Averted by Hull Technician Fireman Apprentice applied for conscientious objector status because the US Navy has this attitude.
* Averted by Ironman Mode (aside from membership), which deliberately prevents Ironman players from using Treasure Hunter and only grants cosmetic rewards from

the Yak Track battlepasses (as part of its emphasis on being the game's DIY mode).
* Averted by Jafar. Aladdin needs to be pulled up, Jafar says "First give me the lamp," takes the lamp and then, instead of pulling Aladdin up, tries to kill him with a dagger, then when Abu bites him, leaves Aladdin in the Cave of Wonders to die.
* Averted by Lindsay in another case where Mac has her fire a crossbow since she's the same size as one of the suspects. In spite of being a country girl from Montana, she's never fired one before and is excited to try. She handles it very well and wants to keep on doing it.
* Averted by Liz Lemon. Liz offers as evidence of her self-sufficiency that she can zip up her own dresses. A
* Averted by Mac and his FDNY buddy, who have a standing bet on the outcome of the matches. Loser buys the winner dinner. In the season 9 opener, Mac tells his friend he's tired of losing...5 in a row at that point.
* Averted by many early great masters of Western art, who did most of their work, now hanging in major museums, for commission. Though even then, they hardly phoned it in. Michelangelo was initially not enthused about the Sistine Chapel commission and if he had done a simple ceiling fresco, he could have gone to his more fulfilling work in sculpture; instead, he decided to go overboard.
* Averted by many legends. Amongst the Navajo, for example, the bear is a symbol of healing, peace, and tranquility and harming one brings
* Averted by many would-be (and some professional) game designers. Though one can beat a game with math, making a game fun purely on the math is generally unsuccessful.
* Averted by Marc Almond. In 2004, he was involved in a motorbike crash which nearly left him dead and might easily have ended his singing career. However, within a few years, he had recovered sufficiently to start singing again.
* Averted by national flags, as the only nations to use purple on theirs are Dominica and the Northern Mariana Islands, both of them tiny nations most people haven't even heard of.
* Averted by necessity with Nowi, at least as far as looks go. She looks like a cute preteen human but is actually a manakete (a
* Averted by non-monstrous predatory animals such as wolves and bears; while they'll attack Link opportunistically if he stumbles upon them, they'll immediately flee upon being wounded or having a member of their group killed. In the case of the pack hunters, they'll also generally run away if Link happens upon any that are alone.
* Averted by numerous real-life animals named after mythical creatures, naturally, most notably the vampire bat and the Komodo dragon, among other things.
* Averted by Odin, who — aside from being the god of war, prophecy, and death — is also the god of poetry. Granted, Norse poetry is basically action movies set in verse.
* Averted by painting the backgrounds on cels, same as the characters. It succeeded most of the time, but there were still tell-tale "Fudd flags" visible at times until the production switched to digital rendering methods.
* Averted by Petra's SITES Spectre submachine gun: while also a rare gun, it's
* Averted by Samuel Campbell, Mary's father. Sure, he dies in "In the Beginning" in Season Four, but then he comes back as a secondary antagonist in Season Six.
* Averted by Sara when she forced herself to smile, thereby suppressing her own gag reflexes at the sight of a boxer's spit bucket. (Saliva is her personal Blow Chunks Button.)
* Averted by Sergeant Colon. The fact that he works at night, and his wife works during the day saved his marriage.
* Averted by Shagrat, who cares about his men and is actually shown to be fairly noble. He even gets a good death. Also Uglúk of Saruman's Uruk-Hai.
* Averted by sheer fact that they dress up their villains and hero in some way.
* Averted by some current US commercials, including one which shows two soldiers spying on an enemy encampment where they say something like: "You arrived with three days' supplies...it's now day seven". (This was a campaign for the U.S. Army

Rangers, and was really meant to showcase how
* Averted by the ancient Celts who came up with something even more terrifying: the bagpipe. Though they probably didn't invent the instrument (it's likely
* averted by the bizarre Helmacrons. To ensure that their leaders never fail, all are killed before being promoted to avoid having to execute them for making a mistake.
* Averted by the Black News van, who only briefly touch on the story, then get the hell out of dodge, since a pretty white woman just died and they're not sticking around to be accused of the crime (or maybe
* Averted by the "Cathouse Brawl" Ohio Championship Wrestling booked between
* Averted by the Charter of the United Nations, which bans States from threatening the use of force against the territorial integrity or the independence of another State.
* Averted by the Croatia national basketball team in the 1992 Olympics; they talked about how happy they were to be winning silver
* Averted by the Dark Angels, who wear plain robes over their armor to denote rank. Higher ranking members will still get some awesome gear, it just won't be as flashy as other chapter's.
* Averted by the Death Guard legion and other Plague Marines, who sold themselves to the service of Nurgle, the god of pestilence and decay, after they were infected with a plague (created by Nurgle himself) so virulent even their enhanced immune systems couldn't cope with it and selling their souls was the only way to survive. Similarly, in the novel
* Averted by the "Destroy" extended ending with low EMS, which can be summed up as a galaxy wide extinction event for all organic life above microbes, whether involved in the war or not. There are barely any survivors and the narrator doesn't express much hope for their future.
* Averted by the end of season six with the conclusion of that story line. Used in small scale with the season six finale episode dealing with getting the wedding. Beckett spends the entire episode tracking down and getting a husband she didn't know she had to sign annulment paperwork, which was complicated by his being kidnapped right in front of her. Interspersed through this are a series of dramas including the wedding venue burning down, a water pipe bursting in her apartment that ruined her dress, trying to relocate and coordinate the shuttling of all the guests within a few days, and
* Averted by the end of the Reverie Arc. The shit they pulled throughout the story led to the abolishment of the Warlord System, with their former 'allies' gladly baying for their blood immediately after.
* Averted by the E.W. Scripps Company-owned ABC station KGTV in San Diego after it was acquired by them, which has to disclaim in health-related reports on its newscasts that it is
* Averted by the Federation, which simply puts its male and female cadets through exactly the same training. If you pass, you can serve, and
* Averted by the German Armbrust and French/Canadian Eryx antitank launchers. The Armbrust exhausts a relatively gentle puff of plastic flakes while the exhaust gases are captured in the tube by sealing pistons. The Eryx has a tiny charge to kick the missile out of the tube, then the main rocket ignites at a safe distance. Both launchers can be used in enclosed spaces with no harm to the crew.
* Averted by the jetpacks used by Space Marines and Sisters of Battle, which are built so that the exhaust flies outward at an angle from the body of the flier. Their legs are nowhere near the danger zone. Being clad in
* Averted by the Lannisters in earlier seasons; Lord Tywin is assisted by his brother Kevan and Kevan's son Lancel is squire to King Robert.
* Averted by the Market-Garden operation. It would've been a bypass if it had succeeded, as it would allow going around the Siegfried line. However, the operation failed. Out of 41000 airborne troops deployed, 17000 died. Oh, and the Nazis punished the Dutch who supported this operation, letting thousands of them starve to death the following winter.
* Averted by the only physically permissible (more-or-less) way of FTL proposed so

far, the
* Averted by the producers, who filmed fake death scenes for the Season 7 premiere (when Negan picks a victim to beat to death with Lucille) and even paid actors who were killed off to show up on set for several months as a way to throw off fans who were staking out the set and taking photos. A "foiler" clip of Negan beating Maggie to death while Glenn screams in anguish was one of these fakes, and leaked online several days before the episode aired (the actual victims were
* Averted by the prosthetic limbs made by Anderson Robotics, even if the owner is a
* Averted by the remake, which takes a different tack. The enigmatic but charismatic Vs suddenly arrive with messages of hope, change, and universal health care.
* Averted by the royal families of Alabasta, Fish-Man Island, Dressrosa, and Wapol's father, who were all highly benevolent to their people.
* Averted by the Seventies episodes, however. While there was a line of DC superhero action figures on sale from Mego at the time, the World's Greatest Super Heroes line had its own branding and also included Marvel characters like Spider-Man and the Hulk.
* Averted by the short-lived supergroup GTR, featuring progressive guitar heroes
* Averted by the Spartan-I program, which did not have the success that the later programs did; if
* averted by the state of her dead body after the tracker-jackers kill her.
* Averted by the store f.y.e's website, which doesn't even separate anime into a separate genre like many other sites do.
* Averted by the Stub Gun, introduced during the Apocalypse War. This weapon is a laser capable of cutting through almost anything.
* Averted by the various background animals from the "Circle of Life" opening of
* Averted by the Vogons, and the Dendrassi who do the in-flight catering; their ships are foul inside because they like them that way.
* Averted by this point. The ages of the Strawhat Pirates alone are: 19, 21, 20, 19, 21, 17, 30, 36, and
* Averted by Tiresias, the blind seer of Greek myth, who was turned into a female, and then several years later was turned back into a man.
* Averted by Twilight, who hasn't really had the opportunity to consider her title of "Magi of Stars".
* Averted by USAgent of the Marvel Universe. He lost an arm and a leg to Nuke, a cybernetically-augmented super soldier, but refuses to get cybernetic replacements, as he doesn't want to look down at his own body and be reminded of Nuke every day.
* Averted by Venus & Serena Williams who subjected the world to several lackluster
* Averted by zombies for a change; they don't eat people at all, just kill them because as mindless undead they hate all living creatures. Ghouls and Ghasts fit Hollywood's conception of cannibalistic undead better, but they just eat flesh in general, and don't seem to have any particular fondness for brains.
* Averted. Caesar's legions are shown forming a testudo (turtle, wall of shields) and rotating their troops in a disciplined way (the rotation keeps the soldier at the front of the line fresh and it provides more incentive for the foremost soldier to fight well, as he knows that if he can hold out for thirty seconds, he will be relieved and sent to safety at the back of the formation). Legionnaire Titus Pullo leaves the formation and is punished for that.
* Averted character Joe Gideon. The scene where everything goes silent as he completely focuses on his first symptoms is brilliant.
* Averted Colonists on a new planet lack genetic diversity and a nutritious diet. They set aside one village to receive neither dietary supplements nor breeding opportunities, effectively turning the population into their control group.
* Averted come season five, which ends with Jake and Amy tying the knot. The sole cliffhanger is whether or not Holt got the Commissioner position.
* Averted completely in the "Badge of Honor" series by W.E.B. Griffin, which has many cases of the main characters interacting with different command staff and

uniformed police on the different shifts. There are several cases where senior people wake up the shift commander (who was taking a nap at 3AM since nothing was going on), the shift commander apologizing for being asleep, and the senior person saying "I've taken a nap or two myself on that cot when I had your job".
* Averted. Corona doesn't want to bring about eternal day, she wants to rule every last detail of her ponies' lives.
* averted cut himself shaving on the morning he and Jesse meet with Adam's lawyer.
* Averted. Cyborg tries to make a call while the guys are in another dimension but gets concerned when the call doesn't go through. Robin is quick to point out that they are certainly outside the coverage area.
* averted. Davy cleans out a bank vault with his teleportation power. Later, somebody theorizes in his hearing that the robbery must've been an inside job since there wasn't any sign of forced entry.
* Averted decays completely, including his bones, which are smashed against the wall when Indy pushes him back.
* averted decided to destroy their homeland and hire trigger-happy mercenaries to murder the natives for greedy purposes.
* Averted. Denmark asks Thailand if he could buy 'the sexy lady' a cocktail, but Thailand admits he's
* Averted, depict the model as the Rebels' main anti-starfighter ship.
* Averted. Despite a number of horrible galactic threats of all colors: hordes of
* Averted. During Nicodemus' flashback, the row below his is marked "CONTROL GROUP." It's difficult to see in the VHS version, however. It's more conspicuously averted in the original book.
* Averted during Season 3. Church is blown back into the past and realizes that he can stop everything from happening. Instead, he just creates an army of Churches as he realizes that everything is set in stone. Because it was all
* Averted during the 50th anniversary. When someone threatened to leak details about the mini-episode "
* Averted during the Chaos Emerald Saga. Robotnik strands Sonic and Tails in the past by destroying Sonic's time travelling shoes. Sonic responds by
* Averted during the mid-air robbery when their inside man Travers decides to rope across to the jet before the money, out of a gut-feeling that Qualen would leave him behind if he sent across the money first.
* Averted during the Russian Civil War. "Bureaucracy" was a serious accusation against any official, as it was deemed that paperwork should not get in the way of revolution. In more egregious cases the bureaucrat could even be court-martialed.
* Averted during the Skypiea arc. Donny asks if Satori is behind him, but all that there is is his mass of trick balls.
* Averted earlier in the film: After learning Bond has escaped from his palace,
* Averted earlier in the game. About midway through the dark story, Eggman explains to Shadow and Rouge his plan to steal the Chaos Emeralds from the military and destroy their command base at Prison Island. The plan hits a few snags due to Rouge slipping up and the arrival of Amy and Tails, but ultimately succeeds, gets the villains three more chaos emeralds, and effectively cripples GUN's ability to interfere with them further.
* Averted elsewhere. Each selectable planet has a description, and none of them has anything approaching an Earth day/year.
* Averted entirely in 8th edition Warhammer. Instead, they simply introduce Mortal Wounds, which cannot be saved against by Armor or Invulnerable saves, but explicitly CAN be saved against by certain effects. (Generally, that the person is so inhumanely resiliant, they ignore it.) No more Chunky Salsa.
* Averted episode "Gemini", where the perp manipulated his schizophrenic brother into murdering people. Goren tends to have a more nuanced perspective on the mentally ill in general, likely in large part because of his mother's schizophrenia. The final interrogation includes this memorable exchange:
* Averted equivalents. This was due to top stars Jack Veneno and Lightning Hernandez.
* Averted equivalents), who are one of the rare few successful live action series

where the characters do fight crime using tights and code names.
* Averted even more later on when he has the power of the Green Goblin's flier to accelerate him faster than gravity would.
* Averted every time a patient with a possible infection has their left side palpated by a doctor, as feeling that the spleen is enlarged can be a useful first indicator of ailments such as mononucleosis. Though you can survive without one, with some medication.
* Averted example in the following season in a match between Syrus and Tyranno Hassleberry. After the former turns the tables with a damage loop that drags the latter's LP below his, Hassleberry prepares to trigger Jurassic Impact, a trap that requires said LP disadvantage as a triggering condition, in order to cause 1000 LP damage to both players, enough to force a draw. Seeing how exhausted Syrus was over his search for Jaden, which was who they were dueling over, Hassleberry decides not to trigger the trap and let Syrus win.
* Averted fiercely with many female characters: some are straight-up
* averted film, which features the destruction of several Tokyo landmarks, but only as part of the general devastation with no undue emphasis.
* Averted for a brief scene in season 2, where Rosetta teaches some children a different form of juggling, where they bounce balls off of the ground and catch them on their way back up.
* Averted (for a couple of days, anyway) by the Boulton Paul Defiant during the Battle of Britain. A German fighter would get on its tail and be blown out of the air by the four guns in the Defiant's rear turret. Then the Germans discovered the Defiant had no forward-firing armament, and was both slower and less maneuverable than conventional fighters and thus could do little to evade them.
* Averted for American audiences; he didn't gain fame in the United States until
* Averted for a short string of episodes where a new Chief of Medicine takes over, observes the Janitor's abusive behavior towards JD, and promptly fired him.
* Averted: For at least Zelos in the above scene if you have chosen him, his own voice remains.
* Averted for Brian during a deleted scene. Peter tries to cheer him up, but Brian only sarcastically remarks that it's sexual harassment.
* Averted for Egypt during the Six Day War. Despite being heavily backed by the USSR, the Egyptians performed poorly in fighting the Israelis in the Sinai desert, and were driven all the way back to the Suez Canal.
* Averted for Guts himself — one would think that losing a hand would end the career of a fighter who specialises in two-handed weapons, but he is stubborn enough to learn to handle the sword using a prosthetic hand. (A magnet in the hand helps him maintain the grip.)
* Averted for Harry's dad, Malcolm Dresden, who was a stage magician with no actual magic. It's specifically noted that he was, in many respects, entirely ordinary.
* Averted for Kaido in the fourth game, keeping up with what was already known about his threat level in the
* Averted for MJ in this, who is a lot calmer than she is in the comics, again as mentioned above.
* Averted for much of its geological history by the Earth itself, which didn't acquire its atmospheric oxygen until about 2.4 billion years ago, and spent 300-400 million years after that event frozen from pole to pole. "Earth-like" is relative.
* Averted for once but they're back on good terms by the end, with grateful citizens applauding him and clapping him on the back.
* Averted for once in Season 5, where the losing team's advert just outright sucked.
* Averted for once with Zim's disguise after Skoodge upgrades it to a hologram like his own, so they actually pass for human.
* Averted for radio in Saudi Arabia; the king assembled a group of religious leaders, then had someone read the Quran over the radio. The assembled leaders agreed that any form of technology which allowed accurate transmission of the Holy Book was permissible.

* Averted for several characters too, most notably Naruto himself, who wants to be Hokage one day and by Hashirama Senju, the First Hokage, whose boundless ambition to change the world created the entire system of hidden ninja villages and drastically reduced the
* Averted for the Graysons. While Grayson has freedom of the press, their conservative culture just wouldn't tolerate that sort of intrusion into someone's private affairs.
* Averted for The Groke and Too-Ticky, who are female but have practically no gender clues. Several Finns have been surprised to find out the characters are female, as Finnish doesn't have gendered pronouns to point this out.
* Averted for the humans, who wear clothing that doesn't differ too much from contemporary fashions, while still looking kind of foreign, particularly with the odd shirt in a sort of mottled-brown printed pattern, military uniforms — proper uniforms with pockets, not pyjamas — or things like suit jackets with the lapels missing or oddly-cut and collarless shirts. Women's fashions in particular trend to the timeless (if occasionally a bit low-cut).
* Averted for the Iron Bull should you romance him, since he tells you straight up when you first meet that he's a spy for the
* Averted for the most part in the spinoffs, as the characters actually
* Averted for the other two games in the series: they and their additional material go out of their way to not establish any canon endings or routes.
* Averted from before the film begins with Ma-Ma, who is played by the very beautiful Lena Headey, but who has very prominent facial scarring.
* Averted from seasons 11-16. All sorts of nastiness from impalements to decapitations, graphic gunshot wounds and even the gruesome aftermaths of dinosaur and killer robot attacks were shown with brutal, gory detail. This did make its still occasional use of this more noticeable:
* Averted from the 2014 anime onwards, as we see more blood in the series, most notably when Lucy's future self sacrifices herself to save her present counterpart from Rogue's assault and when Juvia commits suicide to rescue Gray.
* Averted games with the Jet power. While it doesn't set Kirby on fire, it will toast everything around him.
* averted had to sell off all his gear to afford to repair their ship back to top condition.
* Averted, hand-shaking and all. Of course, the Patient Of The Week was one of the contestants, and his first showing symptom was that he leaped over the table and beat his opponent to a pulp with the clock, but that's neither here nor there.
* Averted has a voiceover role as the narrator, but she was a last-minute addition so her name didn't feature in pre-release promotion.
* Averted has even been known to read fanfics and encourages fans not to attack each other's creations. There were a few hiccups along the way, though:
* Averted has it that he's a Nihilist, but he's still shown to be easy-going and generally a decent person.
* Averted have no effect on Clark Kent, she gets pissed and immediately starts trying to ruin his life. For example, she frames him for arson.
* averted have powers that cannot be replicated by other members of the S-Class to some degree.
* Averted. He's great at sports and quite popular around school, but he's friendly to everyone and a great big brother to his three siblings. He occasionally has a moment of arrogance or chauvinism, but he's set straight pretty quickly and usually learns his lesson.
* averted' home worlds are usually pretty alien, especially Minbar, and the aliens have distinctly alien cultures.
* Averted however as the plot is set off because Aunty Entity WON'T break her own Law.
* Averted, however, be used to help cauterize wounds sustained from a werewolf to prevent excess bleeding.
* Averted, however, by Big Ed's Gas Farm, the local garage and gas station within Twin Peaks itself. Big Ed Hurley is one of the nicest people in town.

* Averted, however, by Freeza, who pays no special attention to Earth until being defeated on an entirely different planet by someone dumb enough to happen to mention in passing where he was from.
* Averted, however, in that Thrall and Varian (both voiced by Metzen himself~) along with a good number of protagonistic chars have pretty deep voices as well. Meanwhile, look at, say, Kael'thas. And no, being a blood elf doesn't justify the lack of trope, as one of the blood elves in MGT has at least a deeper voice by comparison:
* Averted, however, in the anime with the aftermath of said battle. Usagi
* Averted, however, in the Goon's own happy childhood working in a traveling circus.
* Averted. However, such clips are against Lenny's scruples, and he hates "the zap when they die".
* Averted, however, when Light uses his brain as opposed to gizmos to analyze the Death Note and determines what it can or cannot do. Ryuk wasn't even aware of some of these things.
* Averted, however, with her nickname "Dany," since the last person who called her by that name was her abusive older brother Viserys. When Jon Snow calls her by that name, she lightly tells him in no uncertain terms that she is uncomfortable having someone she cares about call her by that name. Later, however, she does let Jon refer to her as Dany, so perhaps she just needed to get used to it.
* Averted, however with modern Russia and the United States, which are more amicable towards each other but hardly friends. Americans still place the same priority on highly advanced technology and view themselves as Elves, while Russian society emphasizes arts, culture, and especially literature are
* Averted, however, with the inclusion of Zatanna as a long-term member without any other character being removed from the team. As for the series' other big team, the Justice League, although there are three female members on the team, which technically means it doesn't count, the full roster is
* Averted - if only offhandedly - in the flashback to Shanks' and Buggy's past, where they're actually arguing over whether the North Pole or the South Pole is colder. This indicates the locations
* Averted if you use any of the masks other than Young Snake with the civilian outfit. The resistance members won't regard Snake as hostile, and if you let any of the PMCs pat you down without weapons equipped, they'll ignore you as well, which makes that part of the level loads easier.
* Averted illegal. It's also illegal to show R18+ films or games in a public place.
* Averted in 2018, when he announced that he would no longer be touring. He stressed that this was not a retirement, he'd still do shows here and there, he just wouldn't be going on a full tour anymore. And considering he's 69 as of 2018, who can blame him?
* Averted in 2018, when the original version of "Your Song" (which had been featured in a previous John Lewis Christmas ad via Ellie Goulding's version) appeared in that year's ad, starring
* Averted in 3.0 and 3.5 Editions, where undead (including zombies) are immune to the bonus damage from
* Averted in 5th edition, where the section on racial traits in the Player's Handbook states that you can play as a character of any age. It suggests that a particularly young or old character might have a lower Strength or Constitution score, and that a particularly old character might have a high Intelligence or Wisdom score, but doesn't require this.
* Averted in a case where it actually would have been useful in "The Defeat of Superman": Instead of breaking down the door to the basement where Lois and Jimmy are being held, Superman unbolts it and walks inside. The villains quickly close and re-seal the door, and while a confused Superman is wondering what they think that will accomplish, they drop a hunk of kryptonite in through a hole, leaving him too weak to stand, let alone break out. Had he smashed through the door in the beginning, such a plan wouldn't have worked.
* Averted in Act III when Guybrush tells Herman Toothrot, "How do I get off this

* Averted in a Domino's commercial where a man carrying one of their pizzas sees the peel before he can step on it and puts it in a garbage can - only to drop the pizza when a skunk pops out and startles him.
* Averted in a few Italian stories about the Beagle Boys, where they use variations of the same scheme on several occasions. Lampshaded at the opening of a story, where Scrooge easily defeats an "ingenious" attack because he is already overly familiar from it from their previous attempts to use it. He chastises them to stop repeating themselves and start being creative, because he is getting bored with them and how predictable they have become. Unfortunately for him, the Beagle Boys take the advise to heart and start using new and more effective methods.
* Averted in a few places, though. Space Marines are about 8 feet tall and almost 8 feet WIDE, with numerous extra organs, and a giant suit of power armor to help take the strain of their larger proportions. Of all the factions to get this right, the
* Averted in a game of "If You Know What I Mean" with a gym theme. It ended in hilarity when Brad mentioned a "200-pound snatch," a genuine weightlifting move rendered completely filthy by the context of the game. Ryan predicted, "I don't think that will make it to air if you know what I mean." Rather impressively, the segment not only made it to air, but the censors apparently agreed enough with Brad's logic for it to remain uncut in the original airing! Subsequent reruns, however, played the trope straight and bleeped the offending bit.
* Averted in Aki's case, in the series proper. But during the second OVA, she gets drunk and offers to let Takeru feel her up. She didn't have to ask twice.
* Averted in a less morally ambiguous fashion with the Lemurians, the inventors of the draught. Their use of the draught doesn't seem to have affected their morality at all. One of them, Piers, even becomes a party member in
* Averted in an advert in Sweden for Swedish clothes manufacturer Blåkläder (pronounced "Bloh-klay-der") featured an American who consistently mispronounced it as "Black-lah-der". After about 30 seconds of this, a Swedish guy approaches him and says "Say after me: Blåkläder!" The guy responds "That's what I said. Black-lah-der!"
* Averted in an early episode had Carter giving CPR to an elderly gentleman while nurses prepared to defibrillate. He then proceeds to break the old man's rib with a loud crack.
* Averted in an early episode when JD himself gets sick. He's diagnosed by the hospital personnel and seems overall intimidated by viewing the hospital from the patient's side. Of course, at this stage, he was just an intern starting out, so his opinion wouldn't be as informed as everyone else's anyway.
* Averted in an early-to-mid 1980s TV commercial for Bubblicious parodying
* Averted in an episode where, in an attempt to lift a fellow inmate's spirits, Earl signs him up for a dating service provided by the prison. Earl signs himself up, too. Sometime later, Earl and Frank receive their matches. Frank is matched up with a
* averted in animation — you might have a lot of cool scenes, but you have so much control over the setting that no one scene is that much more expensive than the other, and you don't have to pay the voice actors too much, even if they're otherwise big-name actors, because they just have to sit in a studio and record their lines.
* Averted in another episode, in which a character is spaced in a small airlock and doesn't even budge.
* Averted in another episode, "Melting Pot." The detectives initially suspect this when it's discovered the victim's husband was seen in such an establishment with a younger woman, but it turns out she's his sister and was staying there whilst visiting for the holidays.
* Averted in another episode where Bull wins his choice of a free toupee and goes with the genuinely stylish (and indestructible) "Shatner Turbo 2000", which instantly turns him into a
* Averted in another episode where the bathtime preparations do lead to a bloody corpse,

* Averted in another trailer, where The Statue of Liberty is shown imposed against
* Averted in an unusually effective manner with another Wilford Brimley film (though Brimley is not present in the scene, his character being locked in the tool shed at the time) in
* Averted in a rather clunky manner in the Coliseum scene of the second
* Averted in a realistic sense by the Widow series, though: it's so overwhelmingly powerful that there's little incentive to go for headshots.
* Averted in a season 10 episode where Niles suffers a "walking heart attack" (very mild with few symptoms), not recognizing it even though he is a fully trained doctor.
* Averted in a section of the podcast Novel "The Crypt". A stealth ship is described as only being able to go a few weeks undetected (which seems like a long time, except they're observing a science vessel and it's escort looking for something in space, which also would take a long time), during which the heat rises to uncomfortable levels and almost all systems (including most of the AI, and even their holographic display) must be shut down to prevent that time from lowering even more. When a
* Averted in a slightly different way in that the Grimm powers can pop up in anyone sharing the bloodline, and the bloodline has been around since the 1400s at minimum. So not only is Nick not the only person around with the anti-Wesen power set, others can and occasionally do show up that aren't necessarily part of his 'family' beyond some unspecified common ancestor centuries ago. They even have their own bestiaries with sometimes-complimentary, sometimes-contradictory information.
* Averted in a Taco Bell commercial with a guy who has been stuck in
* Averted in at least one other Star Trek novel, during which Worf and Data are riding on top of high-speed vehicles. Worf is able to hear Data, who is sitting in front of him, but Worf is unable to reply because of the sound traveling backwards at such high speeds.
* Averted in at least two instances [note: three if you count a non-canon joke comic showing a toilet that can accompany every possible alien anatomy]:
* Averted in Australia. The advertising rules for alcohol expressively forbid showing sexual success due to the consumption of alcohol.
* Averted in a very specific case where the other Boys explain to Hughie that it's almost impossible to literally blow a person's head off with a normal firearm. "Brains out, sure, but anything more is Hollywood bullshit."
* Averted in "Being Human" with a cut to Jake's arm and the blood also later appearing dripping from a hook because it was needed as a plot device.
* Averted in Black Mesa: the scientist constantly performs chest compressions to the guard, but he doesn't recover.
* Averted in "Blink", where the actors actually played off a pre-recorded video clip.
* Averted in "Buster's Directorial Debut" where Sandy Witch feeds Babs a spiked carrot, turning her into a normal rabbit. Buster managed to fight off Sandy and escape with transformed Babs in tow. He decides that restoring Babs' original form can wait until he finishes his film project, leading to an unrelated plot where he deals with Plucky, who was being a prima donna over Buster's film. The episode ends with the typical closing camera iris, then transformed Babs hops in. Buster also comes in and uses Sandy's magic powder to revert her back to normal.
* Averted in "Cartmanland," however. When Cartman gets what he's always wanted his whole life, a theme park all to himself, Kyle figures Cartman will bore of it before long. Kyle turns out to be wrong, however, as Cartman's ecstatic joy never ever slows down, though in part because he knows he succeeded where Kyle did not, and he derives literally endless joy in feeling that way.
* Averted in case of Loyalist Dreadnoughts. Old ones tend to remember the past very well, while they don't have a firm grasp on the present acting somewhat senile.
* Averted in case of rust protection. Because of advancements in rustproofing technology a car that is 15 years old now would probably be less rusty than a 5-

year-old car in the late 50s.
* Averted in character and item rarities, however. While purple is higher than white/grey and blue, it still falls below
* Averted in characteristic fashion in the Soviet Union under Stalin - the idea was that if anyone made themselves indispensable, it was time to dispense of them because they were working against Soviet ideals and trying to take advantage of others and their expertise. But it was more like Stalin wanted to get rid of anyone who could ever hope to be a threat. This caused predictable problems in fields like wartime intelligence.
* Averted in "Charge of This Post," where Flack nearly died from having a huge hole blown in his torso by a bomb. He survived but still had some severe damage. Mac had some as well, though it was only cuts and scrapes.
* Averted in Christian theology (as opposed to the pop culture versions of Satan above): Satan was the ringleader of the rebellion, but all demons were once angels. Though you could view this as a mass version of the trope since the rebels essentially decided that they didn't like the hat of their species and went off to make a new 'planet' with a different hat instead.
* Averted in classical Finnish films ("Suomi-filmi"); skinny dips, nighttime or not, bring no greater harm than perhaps an unwanted admirer.
* Averted in "Court Martial", when the ship's computer's records make it appear as though Kirk murdered another officer. Despite not being able to find any evidence of malfunctioning in the computer, Spock steadfastly maintains his confidence in Kirk's innocence, and is ultimately proven right. Spock knows from extensive personal experience that Kirk is a noble man who is consistently able to keep his cool in life-or-death situations; in his view, believing that Kirk killed someone out of panic or spite is as illogical as expecting a hammer not to fall when dropped.
* Averted in D2, when a shootout is required to separate Team USA and Team Iceland in the final match of the Junior Goodwill Games.
* Averted in Dragon Weather, and its sequels. The titular dragons don't actually breathe flame, they expel a fine mist of combustible fuel, much like a flame thrower.
* Averted in Emilio Salgari's novels (not so much in the movies adapting them). While not a fencer,
* Averted in Episode 72, where Stumpy dies after being electrocuted and has to be brought back to life by a spirit.
* averted (in fact in one of the earlier parts of the game you go through a building that's nearly sideways) and all of the surviving humans and soldiers have taken residence in sections of the city that haven't fallen apart.
* Averted in Game 5 of the 2015 World Series. New York Mets starting pitcher Matt Harvey seemed to be on his way to one of the greatest postseason pitching performances of all time, pitching eight shutout innings against the Kansas City Royals. Harvey argued with manager Terry Collins to be allowed to finish the game, even though he had passed the 100-pitch mark. Upon coming back out for the ninth, Harvey promptly gave up a leadoff walk to Royals outfielder Lorzeno Cain. Harvey was then pulled after giving up a double to infielder Eric Hosmer, which scored Cain. Hosmer scored the tying run, and sent the game in to extra innings. The Royals then put up five runs in the twelfth, and then held on to win the game, and since they had already won three of the previous four games, they won the series.
* Averted in gameplay, planets hit by Biowar missiles are easily quarantined and it takes multiple warheads to wipe out a planetary population. And after first exposure a faction can research a vaccine to that specific virus.
* Averted in general throughout the series for most transforming supernatural creatures, including
* averted in Genesis 9:5, where God says he will have animals who intentionally kill people to account for their actions, as well as humans. Whether or not this refers to the animals dying or going to God to somehow give an answer is unknown.
* Averted in Germany, where the USK rating system is taken so seriously, that younger people who want to play 18+ (or 16+, 14+ and 12+, for that matter) rated

games need to show their identity card if they want to buy a game to show that they are adult, unless they're accompanied by one. Guess that kids didn't want to get through this tedious and annoying process, which explains why in that country, that problem is almost non-existent.
* Averted in Go West's video, "Call Me", where she doesn't eat them, but
* Averted in "Help?". Jof the Cat pricks his finger while doing needlepoint, and goes to the hospital trying to get help. Instead, he's put through hell by a sadistic doctor and his orderlies, until he finally manages to escape. At the end of the short, he's doing another needlepoint, and ends up pricking his finger again,
* Averted in her later songs, however, which Taylor herself has attributed to simply growing up.
* Averted in "Homer's Phobia", which showed reindeer that actually look like reindeer for once.
* Averted in "Innocence" where they hire a Japanese attorney, and in "Standards of Conduct" where it's clear that neither Harm nor Sturgis has any intimate knowledge nor experience with civil cases (but Bud does).
* Averted initially by John Madden himself. He refused to put his name on the game (then a protoype featuring 6-9 players on the field due to technical limitations) until game hardware advanced enough to have the correct number of players on the field per team (11).
* Averted in Kaiba's reaction to the Winged Dragon of Ra. Midway through the series, Kaiba discovers through his computer that Ra has several 'unwritten' powers. Seeing as it's his tournament and he made the rules for it anyway, he could just declare that only the abilities listed in the text count, making Ra much easier to defeat, but he doesn't. Kaiba justifies this by saying doing so would really defeat the point of the tournament in the first place, which is to see who deserves to be called the best. If Kaiba were to
* Averted in Kieran Shea's cyberpunk Koko series (a.k.a EBK book series). Yes, the Koko series has most of the usual dystopian cyberpunk traits such as evil corporations surpassing governments of different countries, pollution so bad most of the world is uninhabitable, mercenaries killing and torturing for corporate or gov't interests or sometimes for their own kinks, pervasive mind-deadening entertainment. What it doesn't have is Japan taking over the world. In the series (which takes place farther in the future than most cyberpunk stories), Japan is a failed state and so devastated by pollution that only Tokyo is livable and it's been depopulated to 9 million people.
* Averted in later seasons after the time jump of about seven years. Car bodies are used as wagons to be hauled by horses, and spears and bows and arrows have replaced guns.
* Averted in later seasons as they would both hug openly with a great exclamation of "HUG ME BROTHER!" if they were happy, no matter the location or crowds around them.
* Averted in "Lisa the Skeptic": when the whole "Day of Judgement" thing is revealed, Ralph Wiggum is too scared to wet his pants.
* Averted in "Loyalty". When Wesley turns up alone at Holtz's hideout, one of his mooks suggests cutting out his tongue as a message to Angel. Wesley punches him in the throat. "Or perhaps you could lie on the floor and gag for a while."
* Averted in many political propaganda films. As it is at times easier to exaggerate the flaws and successes in animation more so than in live-action plenty of politicians use the medium to fulfill their status quo in personal reunions, as evidenced by the amount of animation in stuff such as
* Averted in Massachusetts, where guides widely published before elections detail
* Averted in militaries that don't have the rigid correspondence between rank and position, such as Russian Army in all its instances. There, the officer in command simply stays in his rank and continues to command his unit until the wheels of military bureaucracy turns and he gets actual promotion. During WWII there were Red Army majors that commanded
* Averted in modern Hebrew, as not only are Israelis generally too informal to use

either term of address in most situations, but the equivalent ‘miss’ (
* Averted in "Monument Point" when Thea discovers her supervillain father Malcolm Merlyn is planning to destroy the world.
* Averted in most episodes, as puzzling out the unsubs' motives is usually how the team catches them, in the first place. Thus, there's no need for the culprit to provide further exposition once they're caught.
* Averted in most French works: The south of France is often depicted as being far friendlier and warmer than the north. Played straight in that most clandestine immigration comes from the South (that is, North Africa), so depictions of the area are portrayed roughly the same as Mexican Favelas.
* Averted in most of the work of Quentin Tarrantino, who has an uncanny preference for long dialogues scenes that don't affect the plot (like for example the lengthy foot massage conversation in
* Averted in most points-buy based superhero RPG systems. A power that allows a player to control a vast variety of effects, such as Time Manipulation, Matter Manipulation, and such tend to be MUCH more expensive than those that are more focused, such as Metal Manipulation or (to borrow from the original DC Heroes game) Omni-Arm - the ability to control the shape and structure of one's arms. This means the character with the more 'complex' power, with limited focus, can buy that power at a much higher rank than those with the broad, far-reaching effects.
* Averted in most stories from Appalachia. Despite the region (allegedly) being the haunt of hellhounds, aliens and god knows what else, along with many a
* Averted in MUDs, where one of the standard status effects is a Gender Bender (which really doesn't do anything in-game except change your pronoun), which affects both genders equally and wears off in a few minutes.
* Averted in "Nerve"; when a Peacekeeper base has a reactor meltdown, its commander is the first to head for a Prowler to escape.
* Averted in Nevada, at least, where you have the right to make a "reasonable number of completed telephone calls" and within 3 hours of arrest. And the minimum is actually
* Averted in Norwegian, where the word for a boyfriend or girlfriend is "kjæreste", literally "dearest" or "most beloved", whereas the word for friend is "venn". However, since the word "kjæreste" is considered somewhat old-fashioned, or formal, many use the term "typen min" or "dama mi", ("my guy", or "my lady"), in this context it's still pretty clear what it means. Though the term "to like" is still just as confusing in Norwegian as it is in English. 'Like'-like, or just like? An eternal question of insecure teenagers. The word for loving (å elske) is also generally seen as being very intimate and sounding less elegant than how the English use "love", probably influenced by the large number of love declarations in English-language films, as opposed to this very rarely happening in Scandinavian cinema.
* Averted in one case with an electrified corridor. There's a handy manual breaker just to make sure you can kill the power. However, the fact that a corridor can, without warning, turn into an electrified deathtrap,
* Averted in one episode where a plot-related and heard in-universe song was composed specially for show.
* Averted in one episode, where the male Joes are put out of commission by the Cobra Widget Of The Day and the above trio save the day, backed by a battalion's worth of never before (or since) seen female Joe
* Averted in one noteworthy case: Inferno and Purgatorio clearly features a round Earth (proving that the idea that people once believed, especially during the Middle Ages, that the Earth was flat is completely wrong. The fact that the Earth is round is quite obvious to the senses and easily proven through basic geometry known since Antiquity).
* Averted in one of the G1 animated episodes. The Decepticons have captured the Autobots with the exception of Wheeljack. Wheeljack manages to infiltrate their holding cell, discovers his buddies are tied up, depowered, soaking wet (bad thing for robots), and with their carbine-shaped weapons piled sloppily in the corner. He then proceeds to go

* Averted in "Out of Time". Sara is stranded in Virginia during the Salem Witch Trials and accused of being a witch for "corrupting" the local women ("In my defense, they were happily corrupted"), and is nearly hanged by the locals. Complete with cries of "Hang the Witch!", which while possibly more accurate, is sadly a lot less catchy than "Burn the Witch!"
* Averted in Pathfinder's Second Edition with several of the monsters that used to be this trope.
* Averted in previous centuries, when corn hadn't yet been selectively bred to stand taller than a human. At least one Civil War battle's events
* Averted in "Prime Factors" when an alien gives a measurement based on the distance between the sun and her home planet, and Harry Kim mentally converts it to light years.
* Averted in "Probable Cause". Someone frames Castle for murder. As Castle sits in a holding cell, they take the incredible risk of slipping into the police station to gloat. Except... it was all part of his plan to disappear. The Evil gloating gave Castle and Beckett the leads they needed to catch him, which was a necessary part of his
* Averted in programming, where repeatedly using a number whose significance may not be obvious is known as using "magic numbers" or "magic constants"; this is generally thought to be bad style, making code harder to understand. The alternative is to declare a constant, tying a unique name to the number that can be used in place of it.
* Averted in Real Life, unless it has something to do with the brain. Pacemakers,
* Averted in regards to final point-defense systems for Honorverse warships, where laser point defense clusters are vastly superior to autocannon in engaging any incoming missiles the ECM and countermissiles fail to intercept.
* Averted in "Revenge of Cobra", where the objective was the three components to the Weather Dominator. Both teams sent out three teams to recover them simultaneously.
* Averted in Roman Catholicism; monsignors and bishops wear purple as a sign of their high rank, but the higher-ranked cardinals wear red and
* Averted in Season 2 Episode 2. No matter what you do, Clementine will cuss at least once. Given that she's now spent years surrounded by adults who tend to cuss like sailors around her, this shouldn't be that surprising.
* Averted in Season 2, when divers stumble upon one of his dump sites, leading to an investigation that comes uncomfortably close to exposing him and forces him to improve his method.
* Averted in Season 2 when she tries this with Lauren, who is a star wrestler and a
* Averted in season 3 wear pretty standard military camo. Civilian officials, meanwhile, wear neckties and suits that aren't too different from modern-day business wear.
* Averted in season 3 where she starred in an off Brodway musical and a kitchen utensil video.
* Averted in Season 4. Marshall and Lily decide that the time just isn't right for the two of them to have a baby, and they actually make it stick; Lily doesn't get pregnant. What makes it notable is that
* Averted in season 4 with Troy and Britta. Although there has been a few subtle jokes about their race, the focus has been more on their actual personalities than race.
* Averted in Season 6, Moira accidentally livestreams a conversation with Patrick about David's bedwetting. David is highly sensitive and already humiliated enough, so Moira, Alexis and Patrick agree to keep the livestream a secret from him forever and it soon blows over.
* Averted in Season Three, where Clementine, now more mature and hardened, cusses like a sailor.
* Averted in Series 5. After several episodes of teasing (and one attempted seduction of the Doctor) by Amy Pond, Rory Williams is properly introduced as Amy's fiancee, resulting in an assumed

* Averted in several cases where the Solarians go ahead with their attacks despite the RMN demonstrating that they possesses utterly overwhelming superiority (Imperial ships can hit at several times the effective range of League ones, and the Solarian defenses are utterly useless against Imperial missiles.
* Averted in several episodes, such as the battle between Goku and Ginyu, where it becomes
* Averted in Shifters. Either they're not very good, and they lose their clothes, or they're so good that — like Jimmy T — they fake their own clothes as part of their appearance.
* Averted in ship-to-ship combat. Rail guns are, at best, useful as point-defense and anti-fighter weapons, and Tau'ri ships are seriously outgunned until they got the extremely powerful Asgard plasma beam cannons. The nukes are kept, too, because there's always something that needs to be nuked. The reason railguns seem weak in
* Averted in short story by Lino Aldani. A ship is stranded on Titan, one of Saturn's moons, and can't return to Earth because of sixty-two kilograms overweight. The crew can't leave their cargo (it's
* Averted in "Skytanic" where Cyril and Lana push a bomb off of a blimp...and realise that they just bombed Wales.
* Averted in some codebases, where space instead heats you up. Though since being too hot and too cold both deal burn damage, as long as the heat isn't enough to set you on fire the difference is mostly academic.
* Averted in some later books where the baddies hold slaves, but do not use them on the ships.
* Averted in "Space Seed", where we see fairly clearly from early on the episode that Kirk, Scotty, and (worst of all) Marla McGivers are looking at Khan through various sorts of romanticized shades, reading things into him that were never really there and deceiving themselves about who and what he really is. Spock, on the other hand, clearly recognizes that Khan is, fundamentally, just a mass murderer and a power-hungry egotistical thug who escaped from the catastrophe he helped create and is now potentially dangerous.
* Averted, in that not all planets are Earth-like. Rod watches a diplomatic envoy from a race of chlorine breathers arrive on Earth before taking the test.
* Averted in that race's second appearance, however, because anyone with two functioning brain cells to bang together should have figured out that bringing a dog to a stand of sacred trees was not a good idea no matter what culture they come from.
* Averted in that some PDFs are as good as their Imperial Guard counterparts. Also justified, as the PDFs best soldiers and units are usually taken to fill up the ranks of the Imperial Guard. It's basically
* Averted in that the androids of the party, Wren and Demi, are both hundreds of years old (Wren is actually closer to
* Averted, in that the relationship seems to develop quite normally - Melody also appears to be more experienced sexually than Chris
* Averted in that the school is actually quite a successful business venture, and that he eventually marries the secretary there, and moves on.
* Averted in the 2010 Azerbaijani entry to Eurovision, "Drip-drop" performed by Safura; she wears an LED bodysuit under her dress.
* averted in the 2020 remake, as everyone sleeps with his/her clothes on in the cutscene.
* Averted in the actual Golden Age of Piracy, when superfluous captives who got dropped in the drink would simply be tossed overboard bodily, often with a slit throat.
* Averted in the actual Top Gun school: Pilots are sent to the school to learn dissimilar combat training skills, which they return to their squadrons to teach to the other pilots in their squadron. There is no contest nor a trophy. In essence, Top Gun is a school to teach fighter pilots how to teach. If it were a contest, pilots would go to extremes to win instead of learning techniques to teach their squadron mates.
* Averted in the Amarr Empire, where they still count from Anno Domini (As of

2009, the current in-game year is 23347 AD and 111 YC). Also, it seems reasonable to assume that the other empires have their own calendars. One has been mentioned for the Gallente Federation - The Age of Rouvenor (AR), with Year 0 established when king Doule Dos Rouvenor III rose to power in 21714 AD.
* Averted in the American ad campaign for Hubba Bubba bubble gum that ran from 1979 to 1984. These television ads featured the
* Averted in the America where the American counterparts of their albums featured altered tracklists to feature the hit singles, only for the Beatles to demand Capitol Records to not do this beginning with
* Averted in the Animated game for the DS. If you shoot an enemy with your stingers for a little while they eventually do die.
* Averted in the anime, as Yugi's smart enough to figure out who it is from the deck theme. However, it's played straight a few arcs later when Yugi's grandfather enters the KC Grand Prix and duels Joey... the only one who didn't see through his disguise.
* Averted in the anime, when Nurse Joy resorts to defibrillators when Pikachu's heart rhythm lowers (it had been seriously injured in battle with a Raichu)... and it takes a few tries to get it back on the right pattern, implying that it might not make it after the third attempt.
* Averted in the Baltic Sea. Galleys did see some use until the 19th century in shallow, coastal waters, such as in the Baltic archipelagoes during the wars between Sweden and Russia, but they were
* Averted in the Battle of the Atlantic, where Doenitz micro-managed his U-Boats and made them report their positions on a daily basis, all their contacts and general status. This proved a boon to Allied RDF and their codebreakers, and the combat ships using High Frequency Direction Finding or "Huff Duff" technology to detect the transmissions, trace them to their origin and attack the U-Boats.
* Averted in the "Bird Balance" myth; Kari says that despite what they say about working with animals, the birds were all very cooperative.
* Averted in the case of Alexei Navalny, a Russian politician and anti-corruption activist. During a flight from Tomsk to Moscow, he became ill, and the plane made an emergency landing at Omsk. Quick treatment with atropine saved his life, and two days later he was taken to Berlin for further treatment and investigation. It was found that he was poisoned with the chemical warfare agent Novichok, which he ingested before the flight, possibly at the Tomsk airport cafe. Although blame has never been officially determined, it is considered most likely that he was poisoned at the direction of
* Averted in the case of an advertisement on the Citadel's Zakaera Ward - it gives a date in human time (because the advertisement recognizes Shepard as a human) but in such as way as to make plain that there is a wide variety of galactic time and date systems:
* Averted in the case of anime films in the U.S. When they are shown theatrically, it's mostly art-house cinemas that will show them rather than metroplexes.
* Averted in the case of an Imperial commando who tried to hijack a Tau
* Averted in the case of Carrot Ironfounderson, whose adoptive dwarf parents had intended to give him The Talk at
* Averted in the case of Saladin. When his armies and those of Jerusalem are facing each other outside Kerak, despite having slightly larger numbers, Saladin backs down. Confronted by one of his generals afterward who rages that the results of battles are determined by God, Saladin counters that yes, they are, but also by planning, tactics, lack of disease, and availability of water. Since he came into Kerak half-cocked expecting to face a relatively small garrison instead of the entire Jerusalem army, he decides to fall back and wait for a better opportunity.
* Averted in the case of Seether's "Out Of My Way" — originally recorded to be
* Averted in the case of some birds. The mother bird pushes the chick out of the nest, and the bird's die or fly instincts kick in, often resulting in the bird flying. However, the mother bird swoops down to catch the chick if it doesn't manage to take flight in time. Others are not so lucky, as falling to fly in the

first attempt means to land in shark-infested waters, as happens in some colonies of maritime ones.
* Averted in the case of the Abu Simbel temple complex in Egypt, which was disassembled and relocated in 1968 to prevent it from being submerged following the construction of Aswan High Dam.
* Averted in the case of the button which, when Arthur pushes it, brings up a message that says "please do not push this button again". He doesn't push it again.
* Averted in the case of the Cleveland Browns. In 1996 the original team moved to Baltimore and became the Ravens. The
* Averted in the case of the game's prominent serial killer Quentin. Even though he's exclusively targeting human women
* Averted in the case of the WWF Hardcore Title. For years, many fans believed that the title was the same broken title belt smashed by Mr. Perfect on an episode of "Saturday Night's Main Event". WWE has confirmed that this is not the case.
* Averted in the Christian world. King of Bohemia, John of Luxemburg (1296-1346), was both blind
* Averted in "The City On the Edge of Forever" and "Where No Man Has Gone Before". In the first, Spock's cold, clear-eyed logic reveals to him what the choices before Kirk and himself in the time-trip into the 1930s are, and that Kirk's love for Edith Keeler is beside the point of those choices. He is not unsympathetic, as we see in his quiet words: "He knows, Doctor." after Kirk prevents McCoy from saving Edith. In WNMHGB, Spock analyzes the necessary implications of the changes in Kirk's then-best-friend Gary Mitchell, and the trend of where those changes are taking Mitchell, and knows that there is no way out: either Mitchell dies or catastrophe follows, and subsequent events prove him right — Kirk very nearly does wait too long out of sentiment, even after Mitchell
* Averted in the comics: On one occasion Galvatron tries to speak to Unicron in space but his speech bubbles are blank until the latter suggests "speak with your MIND!" Also, Blaster and Grimlock fail to notice a huge war happening a short distance away because they're on the moon and not looking in that direction. Not one sound effect was used during that sequence. However, due to the comlink thing, Blaster and Grimlock are able to speak.
* Averted in "The Enemy". A Romulan soldier is dying on the Enterprise, and Worf is the only compatible blood donor. However the Romulans and Klingons are hereditary enemies, and Worf refuses to donate his blood. Worf makes it clear to Picard that he would give his blood without question if Picard just ordered him to, but Picard can't bring himself to violate Worf's personal beliefs, even if it's Worf himself giving him the option.
* Averted in the episode "A Good Man Goes to War", where it's revealed the Doctor's newlywed companions conceived a child in the TARDIS on their wedding night. The Doctor's reaction is something to behold.
* Averted in the episode 'Demons' in which Scully finds a naked Mulder trying to warm up in a steaming bathtub, in shock after being drugged and traumatized.
* Averted in the episode "High Anxiety", where Hank allowed Bobby to punish him for accidentally using drugs. Bobby decides to punish Hank by not allowing him to mow the lawn for a week. To almost anyone but Hank this would be an Unishment, but it's a genuine punishment to Hank, who even complains to Bobby that the punishment is too harsh.
* Averted in the episode "Lisa's Wedding": when the Death card comes up, Lisa is terrified, but the gypsy calmly explains that Death just means change and isn't automatically a bad thing. Then she freaks out after drawing The Happy Squirrel. Some modern tarot decks now include a Happy Squirrel card as a bonus Major Arcana.
* Averted in the episode "Mirror, Mirror", where Spock immediately notices that something's wrong with Kirk, McCoy, Scotty, and Uhura (because they're the evil alternate dimension counterparts of the originals), and has them tossed in the brig.
* Averted in the episode "The Face of Evil", where the monster of the story is a computer called Xoanon. It has no voice of its own and instead speaks in the voices of multiple people, sometimes all at once - including the Doctor's own voice.

* Averted in the episode where Castle and Beckett actually travel to Los Angeles to solve a murder and get to spend some time on the set of "Nikki Heat". The cast and crew are friendly and later go out of their way to help Beckett solve the case.
* Averted in the episode "Whose Birthday Is It?", when the cast sings the traditional Happy Birthday song to Swiper. Since Dora sings nursery rhymes, Nickelodeon added for this because the traditional Happy Birthday song IS a nursery rhyme!
* Averted in the expansions. Various civs get more accurate unit models for their military units.
* Averted in the fact that in endgame, everyone will learn everyone else's abilities and (if you're that dedicated to grinding) you'll have a party of perfect stats on everyone, at which point the real deciding factor is Overdrives (which by then you should prioritize ones that simply hit more times).
* Averted in the fall of Constantinople when The Last Emperor Of Rome tore the imperial insignia from his armour and charged forward (at the enemy who outnumbered them by more than 12:1 overall) with his men, making this trope impossible.
* Averted in the fight scene between Tarzan and Sabor. In the prologue, the latter killed not only the former's biological parents, but Kerchak and Kala's biological infant son, whom Tarzan replaced. However, by this point in the movie, Tarzan still believes that he is a gorilla and that Kerchak and Kala are his biological parents.
* Averted in the film's climax, when Lt. Greenwald praises Queeg for his prewar service in a Navy that most Americans simply ignored "...who was standing guard over this fat, dumb, happy country of ours, eh? Not us. Oh, no! ...who did the dirty work for us? Queeg did!" and condemns the ship's officers for failing to give Queeg the support that he should have expected.
* Averted in the first game. JC's mini-crossbow can be loaded with Tranquilizer Darts which take several seconds to subdue the target. And, furthering the aversion, the victim runs around yelling for help before falling unconscious. Though shooting them in the head plays it straight, earning you an instant knock-out.
* Averted in the first season, where Nephrite bleeds quite a bit before he dies, though
* Averted in the first three games, where dwarves and elves are part of the same faction.
* Averted in the following episode when the real Buffy knocks down the demon biker's leader in an apparent
* Averted in the "Gender Swap" storyline, where Helen spends a full week of strips male before Dave is turned into a woman, and they switch back simultaneously.
* Averted. In the general setting. Any creature that doesn't have the capacity to comprehend good and evil (those of animal intelligence, that is) are always neutral (or unaligned in recent editions), no matter how much destruction they cause. This includes the tarrasque, which is capable of mass destruction when it's active.
* Averted in "The Great Continental Overland Cross-Country Race". Rattfink doesn't cheat at all throughout the race, but he didn't have to, because Roland's race car wouldn't even start at the starting line. By the time Roland finally fixed his car, Rattfink is just about to make it to the finish line, only to run out of gas. Then Roland speeds up, having managed to drive through the entire course in only a few seconds, and looked like he was about to win...except he accidentally pushed Rattfink's car through the finish line, making him the winner.
* Averted in "The Infiltration" and "Unhenged," both of which take place in London.
* Averted in the intro opening up until it shows Ellis having a grenade launcher and a rifle attached to his back while holding a shotgun. In the game, you can only carry a main gun (rifle, shotgun, etc.) and a secondary weapon (pistols or melee weapons). Likewise, when Ellis fires the grenade launcher a Tank, it stumbles. In game, Tanks can't be stunned by grenade launcher blasts, but an explosion from a propane or oxygen tank will.
* Averted in their native Australia, where "Thunderstruck" peaked at #4, and the UK, where "Highway to Hell" also peaked at #4.

* Averted in the later editions where one has to want to be resurrected for the spell to work.
* Averted in the live-action movies, where Mika Nakashima and Yuna Ito (Nana and Reira respectively), are actual real-life singers.
* Averted in the manga when Sidoh picks up the Death Note. Mello, who is unable to see Sidoh at the time, wonders why it's flying, and a member of his gang notes that if it can kill people, it wouldn't be a surprise if it were alive.
* Averted in the manga, where Ciel's opinion on what is and isn't possible seems to be "if my demon butler who cannot lie to me tells me outright that X is real/a myth, I'll believe him." The closest he gets to this trope is when he says that "witches" were just innocent women who were accused of magic for various political reasons (like in real life), but he then follows up by admitting that this is just his opinion, and he pays close attention to Sebastian's input on the topic. Throughout the rest of the arc he remains skeptical of the
* Averted in the Muslim version of this story, where Potiphar's wife is more sympathetic and eventually marries Joseph herself.)
* averted in the NES version - there were no other subs. The %@&! kaiboken, on the other hand...
* Averted in the original canon, where Han and Leia's relationship is a major part of the post-Endor era.
* Averted in the original short film, in which the resurrected Sparky, apart from the bolts and stitches in his neck, is the same sweet dog he was before he died.
* Averted in theory, but Millicent's marriage to Mr. Hattersley looks like one in practice in
* Averted in the premiere episode. The heroine doesn't even twitch when a sewer rat runs over her foot.
* Averted in the PSP game, where it's revealed that there IS a method to Homura's time repeating, where the player can actually have Homura do all the right choices, and get a completely straight version of this trope!
* Averted in the Republic of Ireland where many offers are made available to "viewers in the North", despite Northern Ireland legally being a different country, largely for nationalistic reasons. Often a second phone line will be set up to cater for Northern Ireland. This tends to be reciprocated in offers that cater exclusively for Northern Ireland - for example, phone-in competitions held on UTV (the Northern Irish region of ITV) tend to have a second phone line for viewers in the Republic to use.
* Averted in the rest of the movie, especially the final duel between Inigo and Count Rugen. Rugen is a
* Averted in the Road Runner/Wile E. Coyote cartoons. Wily frequently modifies and repeats plans in the same short. Even so, step one of each plan is usually a bowl of "Free Birdseed" in the middle of the road, and this part nearly always works. If the Road Runner didn't stop for
* Averted in the same novel by the Death of Rats, who went through the motions for form's sake, but was
* Averted in the Season 8 comics. By now, Willow has become confident enough to make full use of her powers, even though she still gets the
* Averted in the second half of the third season, Ginnifer Goodwin's pregnancy was introduced with her character, Snow White. However, the season finale features characters going back in time to when Snow and David first met. It's incredibly obvious when they switch from archive footage to new footage - as Snow White has an obvious double chin. The character conveniently was wearing a black cloak at that point in time - which allows them to use a stunt double with the hood up for action scenes.
* Averted in the second season, when the new mayor often turns to Mystery Inc.
* Averted in the second season, where none of the teams are given an official color.
* Averted in the second season with the introduction of "Benny", an odd 15-year old that is a pupil of Lansky. Benny appears for only a couple of episodes and is not until the next season when he shows up more and is also revealed to be a cold-

blooded killer. Even then, his
* Averted in the sequel game, where one mook tells of how he killed his mother with a poisoned birthday cake. Played straight with another conversation in ''Harley Queen's Revenge"" DLC where a mook wanting to make a name for himself is said to have killed a whole family on Thanksgiving only to take their turkey because he promised his mother a new one.
* averted in the sequel, though. Japanese subs didn't even have any sprites.
* Averted in the short, "Bleacher Bummer" from the episode, "The Wacko World of Sports". Said short had a baseball game that didn't come down to the final play... but only because there
* averted in "The Sign of Three" and particularly during Sherlock's best man's speech.
* averted in the Sonic Riders series. While most of the characters that have eyewear don't actually use it, the Babylon Rouges are almost never seen using Extreme Gear without them, presumably to shield their eyes from the wind at high speeds.
* Averted in the "Sorcerer" supplement, which deals in limited (but still extremely useful) "linear magics" available to
* Averted in the Spy's own "Meet the Spy" video. The Soldier's point-blank shotgun blast would have been a perfectly valid tactic in game, resulting only in a BLU spy annoyed at being interrupted mid-monologue. Instead, the Spy's head explodes in a shower of
* Averted in the Tenth Doctor audio story "Dead Air", in which the sound creature impersonating the Doctor's voice is
* Averted in the (unattributed) old West saying: "Beware the man with only one gun — he probably knows how to use it!" Since the most common reason to carry two guns in the West was to have a backup on hand if your other gun ran dry, if someone only
* Averted in the United Kingdom and Australia, where The Smurfs made their first english debut in the late 1970s from an official english version of Vader Abraham's 1977 album
* Averted in the United States by the 1915 Seaman's Act. Prior to then, crimps and sailing masters actually had the law on their side. Besides electing local politicians to support their illegal activity, many crimped sailors simply couldn't jump ship at the nearest dry land; it was a federal crime to leave a ship before its journey's end after signing on. (Many crimps forged their victims' signatures on official paperwork.) The new law changed many hiring and job practices for sailors, including the abolishment of crimping.
* Averted in the UNSC, where females can serve as Marines and Spartans alike. The series takes place in the 26th century, and societal views have clearly changed a great deal from today. Plus the whole business with the species-threatening war against technologically superior genocidal aliens strong enough to physically rip a man apart, necessitating every able body available to buy time and stem the tide of invasion.
* Averted in the US by running the same program twice within three hours on the same channel. Channels like History and Discovery generally tend to air programs this way to avoid a double channel for the West Coast feed. A show airing at 9 pm and 12 am on East Coast time ensures that the 12 am showing will air at the advertised 9 pm on the West Coast.
* Averted in the very first Hot Pursuit, where cops would give out more detail, for example, "Half-mile from Summit Tunnel".
* averted in the Vietnam special: the boys have to earn a license before they can ride their motorbikes, which includes an oral section. This results in Clarkson answering perfectly, to which he says to his stunned co-hosts "Did neither of you bother to learn Vietnamese before coming here?".
* Averted in the wider scale of the setting, as South is home to the Nilfgaardian Empire that is considerably more advanced and united than the Northern Kingdoms, and the nations south of them seem quite civilised, as well. Of course, Nilfgaard is also a genocidal dictatorship, but with Nazi-esque obsession with strict

organization, rather than uncontrolled savagery.
* Averted in World War Hulk: X-men where, after three issues of Hulk pounding on the entire X-family, Mercury, a member of the New X-men junior squad, shows Hulk the graves of all the mutants killed just in the short time Hulk was off planet. In the end, Hulk accepts her plea to leave them alone, concluding that Xavier is in his own, personal hell already.
* Averted in World War I and II, as the Olympics were cancelled for both.
* averted is usually the norm (in the sense that they try to provide the best possible defense for their clients regardless of guilt or innocence, not that they're necessarily corrupt). There are exceptions, though:
* Averted. It is heavily implied that Professor Gast was the father of Aerith Gainsborough. He was murdered by Professor Hojo, and Hojo then subjected Ifalfna and their daughter, Aerith, to seven years' worth of horrific experiments, which ultimately took its toll on Ifalfna when they eventually escaped. However, Aerith never knew that Hojo killed her father, and you only get to find out about this after Aerith is dead.
* averted. It isn't a gender-bender story at all, despite the fact that you don't find that out until 13 or so chapters in. If all you read in those first dozen chapters, however, you'll come away thinking that this is a story about Xander Harris turned into a girl. Except its not. Its about a girl who has a sort of psychotic break and thinks she's Xander Harris.
* Averted (It's fun!), although the last one could potentially be dangerous if dropped.
* averted. It's painfully awkward and none of them want anything to do with that, so they take solace in each others' company when they have it.
* Averted, Jamie was about to kick open a door when Adam picked it. In a previous episode, Grant had failed to open a similar door by shooting the lock. In another episode, they demonstrated that it is quite possible to break through a standard door by force, even against deadbolts. The only reason the hotel chain held fast in the show was that the build team had used a stronger set of screws than the standard; had they used the standard screws, Jamie likely would have broken through the door on the first try.
* Averted: Kyon returns soaking wet from a walk in the rain and Tsuruya cheerfully lends him a handkerchief in passing, but neither of the two thinks anything of it, and the handkerchief is never mentioned again.
* Averted later. Finch did an excellent job of teaching the Machine the value of human lives and free will; the only person it gives direct instructions to is Root, its "analogue interface," and she could still choose to ignore the Machine at any time. It only gives social security numbers of people involved in crimes (both those relevant and irrelevant to national security) so that its agents can choose what to do about the situation themselves.
* Averted later in the same book when Jake (now a tiger) tells Marco (a gorilla) to open a door. Marco prepares to knock the door off its hinges, for Jake to tell him to try the knob first. He does.
* Averted later on though, when his extremely attractive best friend Monica (whose its hinted he's had feeling for, for years) falls in love with him and they're
* averted leave behind bodies. The latter was technically a crime anyway, but for those that know the whole story (like the viewers), it should count.
* averted like hell. It helped a lot the series never was re-run ever again after its first run in Latin America, and the fact the series was broadcasted at late hours, limiting the damage on the voice actors' reputations.
* averted. Lord Jaxom's mother died in childbirth, and his father died in a duel minutes later. Jaxom grows up knowing that his father was a cruel, power-mad tyrant.
* Averted Madame Medusa has a pipe organ in her hideout, but the instrument produces a calliope sound. While she is never seen playing it, her crocodile pets Brutus and Nero must keep playing the organ in order to catch Bernard and Miss Bianca who are taking cover inside an organ pipes. The crocodiles chasing the heroes then eventually destroy it.

* Averted. McClane gets a bad guy's walkie-talkie, and talks to Al the policeman, and it's made clear that the bad guys can hear everything he's saying, hence why he goes by "Roy" instead of using his real name.
* averted — because his news conference was not being aired live outside of the area — by the similar suicide of Budd Dwyer, a Pennsylvania Republican treasurer who was convicted of a lot of fraud charges, including embezzlement.
* Averted—Counselor Troi's job is basically an HR manager, although in true
* Averted — due to an exception, in the second episode the husband testifies against his wife.
* averted) — not that it stopped the eventual winners Spain from offering Paul an official funeral when he died.
* Averted — Robin is so used to this when working with Batman that he forgets that the rest of the team are not familiar with this, which leads to a lot of problems.
* Averted — when Richard finds a tape explaining how the clones are made, it states that some of them are infected with bioengineered viruses in order to restrict their intellectual development while they're still embryos. However, in order to make sure the cloning process works, some are left unaltered as controls. Richard and Lena are part of this control group, which is why their ear tags match.
* Averted: midway through the movie, they pass the maid, Evangeline, off as one of Cedric's daughters to trick Great-Aunt Adelaide. At the end of the movie, when Cedric and Evangeline decide to get married, the confused aunt lets out a shocked cry of "Incest!" before they explain the truth.
* Averted more generally as Superman, Wonder Woman, and The Martian Manhunters were all
* Averted more often than not. If someone transforms, it's usually because they managed to distract their opponent long enough to pull it off, they use that time to transform too, it's too fast to stop in the first place, their enemy let them do it because they want a challenge or don't really care, or the sheer amount of reiatsu they release in the process is enough to stop their enemy from harming them until it's over. Otherwise, characters will go out their way to stop their opponents from powering up by any means necessary.
* Averted, more or less, by Michigan governor Gretchen Whitmer, when making a joke while waiting to deliver a speech at the DNC. Fully aware that she had a hot mic under her nose,
* Averted. Most of the children in the main cast are each evil in their own special ways. Special mentions go to Autumn (
* Averted; much like for Werewolves, a Princess' transformation takes three seconds during which it should technically be possible to attack them, but they can spend 1 Wisp to transform instantly, and don't even have to spend Wisp if they get 5 successes or more on their transformation roll. Most Princesses won't try transforming in front of their opponents if they can help it anyway, as this would cause them to lose the cover offered by their
* Averted multiple times with the Impulse Gundam's combination/docking with its Silhouette Packs in the fanfiction
* Averted naked, which seems to indicate that everyone was wearing something.
* Averted. Not only do the royal Vinsmokes command their armies, but they directly participate in their battles as well.
* Averted of the fact that she transforms into a monster, or at the very least, that she is doing anything wrong, but it's clear she has a thing for Danny.
* Averted. Olga and Chloe are not shown rubbing their wrists after Kyril unlocks their shackles. Then again, they are being held captive for a relatively short time (i.e. 3-4 nights).
* Averted on American military installations in Europe. Due to the high cost of shipping coins overseas, pennies are not imported. Prices are rounded to the nearest nickel at the register.
* Averted on at least two occasions: the 2005 and 2006 seasons co-starred
* Averted once in the third series when the Yamato orients itself with the Z-axis (in comparison to the enemy fleet surrounding it on the X-Y plane), rotating along

the Z-axis to allow the guns which are only on the topside to sweep around in all directions. You'd think after awhile it would have just been easier to put guns on the underside as well.
* Averted once more in the closing volume of Magic Ex Libris, in which the
* averted. Once the Nazis discover the Pillar Men, you'd expect them to try and figure out how to harness their power for their own use, only for it to blow up in their faces. Instead, they realize that the Pillar Men are far beyond their control and start experimenting on them to figure out a way to kill them... only for it to blow up in their faces anyway.
* Averted once the parents are gone, but no, they're actually like that all the time. Daria considers this worse.
* Averted one time when Brie abandoned Nikki to get attacked by Kharma. Nikki forgave Brie, admitting she would have done the exact same thing.
* Averted on Kaladesh. Aetherborn, who have very short lives, often use technology to upgrade themselves in an attempt to extend their lives, but this is actually the morally superior option compared to the other main way aetherborn can extend their lives -
* Averted on many other occasions since both Reese and Finch are very good at offering just the right amount to get someone to cooperate. It helps that Finch is a billionaire and thus can bypass the need to bribe individuals by bribing entire organizations (e.g. donating millions to a hospital so Reese, as his representative, can have unfettered access to the building and the people who work there).
* Averted on more than one occasion in that the "Alien Invader of the Week" was sometimes not evil at all (or had a
* Averted on non-mammalian targets, though. Spiderants and varkids are more susceptible to abdominal shots, threshers are best dealt with by targeting the eyes (which can be in some pretty weird places - on their tentacles, for example), Hyperion Loaders quite literally fall apart when targeted on the joints, and Crystalisks are virtually invulnerable unless you hit them on the visible crystals on their legs (it's hard to tell if they even
* Averted on skydiving, as countering your landing with your hand may easily break your wrist. You are advised either to land on your feet, or make the parachute landing roll.
* Averted on the Mulefa's parallel Earth. Mary spends some time trying to learn their language. Being elephant-like creatures, part of their language involves movements of the trunk along with words, so she has to use her arms to speak as well. They also learn a little English from her.
* Averted on various alternative Earths. In all their travels, they never went to a world where the Nazis won and conquered the world. The closest ones were the world in the episode "California Reich" (where the United States is run by white supremacists and non-Aryan people are turned into slave labor cyborgs), and the Cold War World in the two-hour premiere (where the USSR rules the world).
* Averted onward, as the Shock Rifle now appears to shoot a typical laser beam.
* Averted, or curiously procrastinated, by the archaeologists in charge of the tomb of Qin Shi Huang, the First Emperor of China. The famous Terracotta Army surrounding the tomb-mound was discovered in 1974, thus indicating the long-lost site of the mausoleum itself, which contains magnificent treasures if ancient historians are to be believed — and which still has not been excavated. Ostensibly the archaeologists are simply being cautious about damaging its contents — but perhaps even after 22 centuries, including most recently more than 50 years of purportedly rationalistic, forward-looking, science-minded Communist rule, the Chinese retain some superstitious awe of the First Emperor.
* Averted, or reversed, in a famous love triangle from the earliest days of Plymouth Colony: Captain Miles Standish sent his friend John Alden to court Priscilla Mullins on his behalf. But John was also in love with Priscilla, who, perceiving this, asked, "Why don't you speak for yourself, John?" John and Priscilla married. Narrated in Longfellow's poem,
* Averted (or subverted?) in "Dog Day Afternoon". Wanda and other fairy godmothers

are drinking tea and talking about how their godkids wished to switch places with animals; one of the other fairies takes a sip just as Wanda points out the school is doing dissections the day her goddaughter switched places with a frog, but the spit-take doesn't happen.
* Averted outfit, he does wear some sort of armored outfit implied to be a standard S.T.A.R. Labs security uniform.
* Averted partially in Tyrants Test, specifically the Battle of ILC-905, where missiles are used, and barrages do manage to allow a few to penetrate the flack. Justified over normal tactics due to the enemy ships being very resistant to standard weapons.
* Averted, perhaps, in that this may be a common occurrence at Planet Express.
* Averted permanently for the rest of the series. There's a non-caricatured Japanese detective in
* averted pilot "The Cage", in which data readouts are printed out on paper.
* Averted/played straight (depending on your interpretation) on an episode of
* averted "Prime." There would be some ambiguity back then about whether some defendants were actually guilty. Eventually either the producers or the audience decided they wanted certainty, so after, say, season three the cops always find damning evidence that gets thrown out of court.
* Averted probably more times than not in Real Life. Many an ER attending and trauma surgeon has put away some retirement money from homemade MacGyver devices. The tragedy is that most lay people can scrounge together just enough information, skill, and resources to build something that gets themselves really, really hurt. What professionals have is not only the ability to build devices, but do so safely with a low margin of error. As Adam and Jamie would say, don't try this at home. They're what you call professionals.
* averted. Ralph Drabble is an airport security man, and while he and his coworkers often annoy passengers, they're largely out to amuse themselves.
* Averted remember that they have shuttlecraft which are independently warp-capable, and make plans to evacuate with them. Unfortunately they can only get about 150 crew of over a thousand off that way.
* Averted) sadly does not try to escape while you eat it, but it does happen to be deliciously crunchy.
* averted says that future Craig Bond movies will continue to deal with Bond's aging.
* averted's character is raped in prison and his friend start teasing him about it:
* Averted series of children's books. The genetics-themed entry in the series ends with the death of the villainous Headmaster, with a hint that a clone of him will be regrown. The fact that said clone does not have the original's memories is acknowledged in the following novel (the Internet-themed one).
* Averted short story. Spaceships are forbidden to trade with cultures that don't have anything to offer. A quick scan of the planet convinces most of the crew that humans are just a simple hunter-gatherer society, but the trader's instinct says that they do have something to offer. Played straight in that the traders do help them, giving them the wheel and tools, but the traders gain something by learning to use caricature and sketches from the human's ancient art. Sketches have an advantage of highlighting characteristics that are important, and getting rid of information that is unimportant. The space-faring culture had forgot (or never had) times without photo-realistic holograms.
* averted since the 2008 model year, as the car body had to be shortened in Japan to be in compliance with the size tax, despite maintaining the same design and wheelbase. Completely averted by the current generation, as the two models are completely different, but still keeping an two year gap.
* Averted single-handedly. Rule of thumb is that if a character has a backstory, they're competent.
* Averted slightly in The Addams Family crossover concerning Uncle Fester's Roman Candles because he had modified them.
* Averted so his portrayal would be accurate. It's still an obvious attack, though — Pa realizes what's happening, clutches his wrist (not his heart), and

manages to whisper, "Oh, no" before he falls over.
* averted. So the narrative uses words like "mile" "hour" and so forth. They do specifically say there may not be 60 minutes in an hour.
* Averted territory, even if degrees of punishment is. As for the passages quoted in the above point, you could argue they are not saying "all crimes are equal" but rather "you can't get away with one crime by just not doing another one".
* Averted The ad involved a murder in a gallery (or somewhere), then when the detectives and curator (who did the murder) arrived at the scene, the curator sees blood (or water) on the floor and uses the pad being advertised to soak it up before the detectives could see it. The ad was quickly pulled.
* Averted; the art book points out that CG was used to animate the dishes when Chihiro's parents start nudging them around with their pig snouts.
* Averted the character is. His lawyer argues that taking away his passport is enough to eliminate him as a flight risk. The judge agrees... cue Bale's character calling Shaft from Switzerland to make fun of him. It's made blatantly clear that Bale's character's father is a very influential man, and the judge is making all the wrong calls either because he's in the father's pocket or someone higher up is.
* averted), the Cybernetic Consciousness are utilitarians, and the Cult of Planet are transhuman voluntary extinctionists.
* Averted (the first movie): Connor has to keep changing his name every few years and handing his antiques shop down to his new identity. The police find it suspicious that every owner of that property inherited it from the previous owner for at least a century.:
* Averted: The Knights of the Cross, called by God to hunt evil and defend the innocent, are actually quite reasonable, understanding people who take the stance that redemption is within anyone's reach, human or monster. Eventually, they reveal that
* Averted them, making sure that they are gone. Makes sense, since he grew up in misery, watching all of his loved ones die, and saw his world destroyed by the Androids. He just wants them finished as soon as possible.
* Averted the moment Sora removes the atmosphere in their game against Jibril in
* averted (the one time she fought a foe strong enough to not have the sword hand go numb but wielded a decorative rapier), and has no problems going for the kill whenever pissed or otherwise motivated (see her final duel with the commander of the French Guards: until then she had gone for trying to disarm, but as soon as she was unmasked she eschewed her usual tactics and tried to stab him until she succeeded).
* averted, the only enemies which cannot be defeated in this fashion are, of course, the Story-relevant characters opposed to the hero.
* averted. The only things they lack are the Carriers years-long supply stores and Jump Drives. The combat is also fairly well justified. Jump Drives only work if ships are far enough away from stars & planets not to be affected by gravity. Stations tend to orbit planets. Attacking and defending star systems becomes about crossing those distances and threatening to cut your enemy off from his line of retreat through a jump range.
* Averted. The problem, as noted in the film, is that it's actually incredibly hard to make an A.I. that is truly self-aware.
* Averted. The protagonist is actually writing a paper about the Salem Witch Trials at her new high school. She learns through research and visions that in a former life she was Betty Parris, the delightful little child that set the trials in motion. And all her new classmates? The reincarnated souls of all the innocent women she accused, which were hanged.
* Averted. There are a million other reasons other than Olivia or Fitz's race for other people to frown upon them.
* Averted: the Repainted team actively encourages fans to do their own repaintings and send them in for the team to play.
* Averted. The Rikti invasion included an enormous mother ship that hovered over Paragon City. When it was eventually defeated by a huge gathering of heroes (many of which died in the battle), the ship crashed into a section of the city now known

as the "Rikti Crash Site," which is walled off from the rest of the town and considered extremely dangerous for all but the most powerful and experienced heroes. It's also a quite sizable game map of what one would expect a cityscape to look like after a gigantic alien battleship fell on it.
* Averted: The semifinal technical challenge was a chocolate soufflé, and while there were some issues all the soufflés made it to judging un-collapsed.
* Averted: The trope appears in the mind of the audience, but is not directly used by the story.
* averted, the vampire has a middle-of-the-road straight (which nearly was a straight flush), while Hellboy has a moderate full house. The two hands are pretty distinct, and either could have been beaten by rarer, more valuable hands.
* Averted: the Vault-Tec Vaults, despite their creators claiming they were for ensuring mankind's survival in the coming nuclear war, were secretly part of a grand social experiment by the government, each vault conducting a particular experiment (such as not letting the door close completely, overpopulating the vault, etc.) with the purpose of the resulting data being used by said government in future space colonization. However, exactly 17 vaults (out of 122) worked exactly as advertised, said vaults being the control group.
* Averted, the video Leftist Infighting introduced a character named Post-Left to moderate a debate between Ancom and Commie but by the end of Centricide 3, Ancom has become Post-Left as well.
* Averted. They arrive in a few days, which is about the time you'd expect for a mail-order delivery.
* averted. They're both exceptionally brilliant, and they definitely know it, but they don't feel the need to point it out to everyone around them.
* averted this at first, but his mental instability is really due to anger at first, and then later from the circumstances of having three souls (one of whom was evil) sharing one body. The closest he ever really came to this trope was when Xanatos used a computer program to brainwash him for a while; it messed with his mind, but his "soul" remained fine.
* averted. This is significant in that she loses her quite noticeable bosom, as well as the fact that Dan usually includes them in his morphs, mainly because Tedd is the one designing the TF Gun forms.
* averted this trope, explaining that he has Piccolo's regeneration ability.
* Averted though for some as this very wiki (as a concept and any given article) is often a surprizingly useful tool and aid in creating a common language of fun and creativity. The fact that it's fun is for those people is probably due to the same reason a physicist might enjoy adding something to the other wiki article on physics.
* Averted, though, in that Saladin has no interest in a fight to the death, and he isn't so much intimidated by Balian's
* Averted, though most ship-based weapons use tracer rounds that look like your typical lazer bolt.
* Averted). Though on one occasion we see a Centauri-made time bomb wearing their infamous hairdo...
* Averted though when Hodgins and Wells shoot each other with coy-dog tranquilizer darts in another episode.They were meant for much smaller animals, so neither one passes out and there’s no immediate effect. They basically just act high when seen a couple of scenes after.
* Averted, though, with John's cloak, which spends the book getting smellier and smellier because he's afraid to wash it lest he wash the magic off.
* Averted Thrawn, and might not have the same personality or genius. He'll also be aware of the crushing expectation everyone will have for him to live up to the original.
* Averted to Homer's surprise when reading a wilderness survival story.
* averted tone. Strangely enough, in the third season all the art shifts came back in full force, for reasons that were never explained but that can be associated with a higher budget and better production values.

* Averted, too: For example, Eric mentions he worked on the pyramids—as a slave hauling blocks.
* averted to Richard Dean Anderson), but nobody could remember it right.
* Averted to some degree in "Best Friends", which involves a case from 1932. Despite the age of the case (the oldest case yet at the time, and third-oldest overall), the two critical witnesses are still alive to tell their stories (although some fans believe that the final scene in the episode implies that one of the witnesses dies the same day the case is closed).
* averted) to speak to officials or the public at large shows up. By that point, everyone is fairly certain that there's life on other planets; it's the reason property values in Angel Grove have fallen so much recently.
* Averted to tragic effect in "Old Woman Laura:" Laura attempts to take a blast from a Doombot aiming at Maria Hill. She successfully tanks the hit...only for the blast to go clean through her and fatally wound Hill, anyway.
* Averted, towards the end, several characters possessed the powers of telekinesis and teleportation.
* Averted to waste them in battle. This trope is not even mentioned - it is not as if men even knew that they could get a non-amazon, anyway.
* Averted trilogy. When a wizard travels to a desert environment he teaches some locals how to cast a spell to create mist and fog in order to allow them to help captured love ones escape. He fails to remember his teachers warning never to use the spell in dry conditions and as a result, all the water has to come from somewhere. Specifically from the enemies guarding the prisoners who end up as dehydrated corpses. The wizard is understandably upset to find out he accidentally caused the deaths of a few dozen people who were just doing their jobs.
* Averted Trope: during a routine treatment for injury, Simon covertly injects Jayne with a sedative when he begins to show signs of planning to take command of the ship, but several minutes pass before Jayne gradually loses consciousness (mid-takeover rant, no less).
* Averted Trope has seatbelts (yay!). It used to be a private yacht of a very, very eccentric (and impossibly rich, obviously) man, so he might have been a Troper?
* Averted Trope insists that Mortadelo's clothes were already obsolete in his first appearance — so the effect they have on modern audiences is exactly the intended effect they originally had on 1950s audiences.
* Averted Trope. Most terrorist masterminds tend to take the suggestions of their subordinates into consideration, and step back to reevaluate when their subordinates ask them to look at the bigger picture.
* Averted Trope nicely when he joins SG-1 by having read all the mission reports. In fact, he ends up giving a lot of the background exposition, which is a nice change from Sam and Daniel always having to do it.
* Averted Trope, or if the writer intentionally excludes a trope that he/she could use, it's still simply Averted.
* Averted Trope: The trope is not used in a situation where one would expect it.
* Averted Trope. we get no sculpture of Goliath for reference, but David is certainly larger here than any man could expect to be. There is no attempt here to portray David as an underdog or less physically endowed.
* Averted Trope when a flashback shows Lee and Kara were interested in each other from the moment Zack introduced his fiance to his brother.
* Averted Trope which takes about 6 seconds to complete before control is given back to the player, time around Dante slows down, and when the initial transformation is complete, the energy discharged is strong enough to damage surrounding enemies, sending them flying into the air. Dante is also invulnerable during the entire duration of the transformation.
* averted universe — for all the Lensmen's other psionic talents and all the other cranking up to eleven this universe does, this is one capability they specifically do NOT have. On the other hand, the Arisians — their ultimate benefactors — have it in spades, and it's implied that the eventual goal of the Galactic Patrol (long after the canon events are complete) will be to develop independence of the need for physical weapons.

* Averted. Up until middle school, Izaya was a model student, but despite being looked up to by his peers, he was distant and only wanted to observe people. It's implied that he wanted to view humans equally. However, in high school, his personality changed and he became an outcast.
* Averted very carefully by Vaarsuvius, an elf whose gender remains unspecified (and just to keep the readers guessing, the gender of
* Averted very frequently historically. In fact, more often than not magic and science were "allies", since both were on the side of progress. Alchemy is the most obvious expression of this.
* Averted virtual Youtubers outfitted with rigging and similarly don't use any prefix.
* "Averted" vs. "Inverted": When a trope is "X happens", the Inverted trope is
* Averted wanted to leave after the 5th season, so it was planned that his character (Sully) would die falling down from a cliff. But a massive backlash from the fans made it necessary for everybody to re-think this decision. So in the end, Sully survived. But to make a compromise with actor Joe Lando, he was free to only appear in half of the episodes in the 6th season (which also turned out to be the show's last).
* averted was that Lupin and the gang had to get the treasure in the end.
* Averted. What's worse, from a royal's point of view her reasoning is sound enough that Stella and Aisha flat-out admit they would think the same had they not seen what actually happened...
* Averted when Arya Stark commits her first cold-blooded killing (cutting the throat of a sentry); she sees the blood on her hands and casually notes that the rain will wash it off.
* Averted when a song points out that everybody is a little bit racist.
* Averted when B'Elanna Torres tries this in "Blood Fever" after a similar
* Averted when Bronn drops a bagful of gold when a Dothraki rider is bearing down on him. As a sellsword, he's
* Averted when Captain Tagon's response is to request to be teraported off the
* Averted when Chief O'Brien tells Lieutenant Barclay at the end of "Realm of Fear" about how he overcame his own fear of spiders to work a repair in a spider-infested crawlspace. The episode ended with O'Brien's pet tarantula crawling on Barclay's arm.
* Averted when Daenerys shares a bed with her handmaidens Irri and Jhiqui, after
* averted when Elokhar starts to speak the First Oath of the Knights Radiant... only for Moash to stab him before he can finish it.
* Averted when he actually gave in when everyone demanded that he review
* Averted when Homer goes up in the Space Shuttle by the heroic action of
* Averted when, in the first AMV short, Red fakes it for his own amusement.
* Averted when it came to the Delta Flyer. Tom Paris, making the original Delta Flyer, already had plans for it. Thus, when the shuttle was destroyed as bait for the Borg, they just built a second one and made it even better.
* Averted when it comes to Black Magic; there is no known way to dispel magic that uses "Dark Mana", a residual waste product made from draining
* Averted when it comes to Daenerys: her driving motivation is to seize the throne she believes is rightfully hers, and side-effects of some of her actions in service to this ambition include death and suffering, but
* Averted when it comes to slut-shaming and victim blaming (Rita) or how the LGBT+ community was out of the mainstream or in the closet.
* Averted when it comes to specific quests. Any given quest can occur on the other side of the game world as easily as it can occur in the same area. For example, the very first mission of the main quest in
* Averted when it does hit — rather than just crushing the city like it might do, it catches fire in the low atmosphere and causes a planet-wide flaming shockwave that kills all living creatures. It also fucks up the planet's gravity fairly dramatically.
* Averted when Misato and her troops seized the UN fleet. A soldier shot at her, and when everybody saw the bullet bouncing harmlessly off her

* Averted when Mothra (changeling queen) meets Twilight Sparkle. Despite Twilight initially mistaking her for Chrysalis, Mothra calmly defuses the situation and lets Twilight test her to prove she means her no harm.
* Averted when Mr. Giles and Ms. Calendar have a sweet romantic talk right before class. They're about to kiss, only to be interrupted by the school bell — but they don't let that stop them.
* Averted when Neil Shaw later tells her to strip (because he thinks a tracking device has been planted on her). When she objects, he just shouts her down rather than doing a
* Averted when Peter lost his job at the toy factory due to his boss dying and the factory closing. He was unemployed and seen doing various odd jobs for nearly an entire season before he got a new job at the brewery.
* averted. When Riley's family is at the dinner table and Riley's Anger starts to act out, causing Mr. Anderson to get angry, and his Anger takes it to DEFCON 2, after which another outburst from Riley cues "Putting The Foot Down" (being sent to her room). Further, they don't declare Defcon One when they Put The Foot Down, suggesting his "nuclear option" is more serious.
* Averted when Russian special forces solved a hostage situation by filling the theater they were being held in with gas, neutralizing the terrorists, but killing 130 hostages (other sources give numbers up to 174 out of 916). The causes of deaths were:
* Averted when the 20th-century marine biologist correctly points out that there's at least one thing — humpback whales — which no-one in Kirk's time will be an expert on.
* averted when the BBC announced in March of 2021 that the channel will return in January 2022, with the pre-watershed hours focusing on content for teenagers and up.
* Averted when the Doctor is thinking of adopting the name of a famous doctor. He considers
* Averted when the magician Jack Faust realistically, if improbably, turns up the Ten of Swords, the Tower and the Aeon (a.k.a. Judgment), the three most potentially ominous cards in the deck.
* Averted when the sinner is actually in Hell though, as Satan places sinners in the level of hell that fit their crime. When Scarlet sees a serial killer only going to the 6th level, she is horrified and wonders what she did to justify being sent to the 9th.
* Averted when Titus Pullo becomes a hired killer for Erastes Fulman. An old lady sees him and runs after his shouting, "Murderer!" Pullo goes to stab her but can't go through with it, suffering a
* Averted when Ursula uses a spell to turn herself into the lovely, buxom maiden Vanessa to enchant Prince Eric away from Ariel. The character herself is treated better by the other characters
* Averted when Vince had a set collapse on him in the summer of 2008. Despite being an obvious storyline, as he was being helped from the rubble you clearly hear him say "
* averted. When you initiate Warp, the only star will potentially move by is the one whose system you are currently in.
* Averted where a drunk and passed out partygoer vomits into the mouth of
* Averted, where a news broadcast goes out about two Hepatitis A cases. The hospital is then crushed with people thinking they have it.
* averted, where Harry is listening in on Muggle news reports for any news of Voldemort's return. The only news item mentioned is about a pet bird who learned to water-ski, at which point Harry decides nothing important is going to be on after that if they've resorted to airing a fluff piece.
* averted (where it promptly got attacked by pollution and acid rain... but the conservationists have managed to get to it). Which leads to an alternative interpretation of his quote: Look on his works, ye mighty, and despair... that everything crumbles eventually, and the world turns on without you. Regardless of the scale of your achievements, time and death come for us all.

* Averted, where Nyx proves her loyalty to Zim by presenting him with a datafile relating to one of his earlier plans, which makes him realize that he can modify the plan and make it work this time. What exactly that plan is, however, is currently unknown.
* averted, where one of the various upgrade items is a pair of goggles. The text for it reads something like "Actually does something." You can choose to have Goggles for a head item, an eye item, and a neck piece, leading to three pair of goggles, only one of which is on your eyes but all of which are purely aesthetic.
* Averted, where Ripley awakens over 50 years into a future that isn't much different from the past she'd left behind, though there are still repercussions for her personal life....
* averted, where she is one of the ten representatives for Universe 7, and not only lasts longer than her husband, but takes down several opponents on her own and alongside her brother, 17.
* Averted where Technus tried to repeat his plan of taking control of the Cybertron satellite. As he stated "A good idea is a good idea". Granted, this is one time where it would've succeeded this time as Danny couldn't use the same method he stopped him with the first time.
* Averted where the Azure City Army gives a damn good accounting of itself. Yes, they lose but they take a lot of
* Averted, where the helicopter is the most expensive and most iconic part of the show — and is only on stage for a minute or two.
* averted, where the worlds involved are indeed part of a solar system, but are still close enough to all be visibly the same size when departing for them.
* Averted, which has produced and distributed hundreds of animated short films that advance the medium of animation. Historically, it has helped develop and refine forms of animation such as drawn-on-film animation, pinscreen animation, computer animation, and sand animation. Important directors such as Norman McLaren, Caroline Leaf, and Ryan Larkin have been employed by the Board.
* Averted, which is about a family of criminals who decide to go clean after the father gets a long prison sentence.
* Averted, which used the same voice cast from the live-action series of the same name that had yet to be released.
* Averted, while Kipo's father is of African decent and her mother is Korean, Kipo instead has a unique purple skin tone. About the only hint to her ancestry is the fact that she and her mother look very similar physically.
* Averted, who is in the modern era because he befriended Dr. Chronos on the latter's first time... adventure. When Doc needed an intern, Caveman was his first choice for the job.
* Averted, who issued a blanket pardon to any Civil War deserters who returned to their proper posts within 60 days, famously saying that it was better to "err on the side of mercy" when dealing with such men.
* Averted, who's first band, Juluka, featured both White and Black South African musicians, and Clegg and his various bands aimed to preserve and promote Zulu culture instead of imitating it. Clegg was a controversial performer in his native South Africa as he began his career during the racially segregated Apartheid era, and was arrested several times for violating Apartheid-era laws banning people of different races from congregating together after curfew hours.
* Averted wield weapons in self-defense, she's portrayed as a competent but hardly skilled fighter.
* Averted with 221B Baker Street, which is strewn with so many utterly realistic items — everything from magazines stacked on the floor to grungy coffee cups left on the table to unpaid bills piling up near the phone — that you'd swear blind it was a real interior where people really lived instead of a specially built set on a soundstage. "
* Averted with Adama, who is from a long noble line, but has no noble title mentioned. Also averted with the Lord of Atila, and his noble family.
* Averted with a huge Mecha-Saturn, who are usually peace loving little guys.
* Averted with Aimee Mullins, who plays Terry Ives. Mullins is a double-legged

amputee who has given TED talks about prostheses, while the character is disabled in a completely different way but (presumably) has both of her natural legs.
* Averted with Alastor "Mad Eye" Moody, a professional fighter of Death Eaters and other Dark wizards, who is heavily scarred and disfigured, including missing a chunk of his nose.
* Averted with alicorn royalty who are exclusively female (male royalty don't get the "promotion" and remain unicorns) and Princess Celestia and Twilight Sparkle's proteges, who are always exclusively female unicorns.
* Averted with Altaïr and Ezio's modern-day descendant Desmond Miles, who wears a hoodie but has yet to be seen with the hood up. Although presumably he may later as he now has all of Ezio's skills. It should also be noted that said hoodie is white,
* Averted with amoebae, and other single celled organisms that reproduce by binary fission. When you split in half (as opposed to budding off a daughter cell), you can consider both resulting amoebae to be an extension of the life of the parent. In short, every single amoeba on the planet is the very first amoeba. They're immortal and reproduce like crazy. Good thing they're fairly low on the food chain, so their hypothetical immortality isn't much of a problem.
* Averted with an earlier cargo plane the player infiltrates and brings down, however — it crashes into canisters carrying
* Averted with Armagh's Satanists. They're the victors of a nasty schism on an all-Catholic planet, where they simply decided not to fight being called minions of Satan by a vicious inquisition. Their doctrine holds that God is being held prisoner by the angels, and the rebel armies of Satan will liberate him on judgement day. Other than the bizarre terminology in worshiping His Wickedness, they're good people.
* Averted with Associated Press style, which calls for datelines in well-known cities to stand alone. Readers would a assume that "London" refers to the city in England, and not London, Ontario, Canada. A lot of this depends on the area a paper serves. Readers of the
* Averted with "At Seventeen", Janis Ian's 1975 pop classic about teenage elitism and being shunned, where the narrator is
* Averted with a vengeance. He heavily argues against the common notion that science slays the dragons and kills the magic.
* Averted with Barbara Wright. In that same episode, Sarah Jane mentions that Barbara and Ian are married, still teaching, and haven't aged since
* Averted with Bree, who is rich but has used her wealth for good causes such as helping her friends out with money problems over the course of the series.
* Averted with Cambridge, Massachusetts, or at least their university. Deciding that Cambridge University (or variations thereupon) may get confusing, they called it "Harvard" instead.
* Averted with Candace, who was 14 at the start of the show but turned 15 in "Candace Loses Her Head". In "Comet Kermillian", she says she will bust the boys when she's 88 (
* Averted with Captain T-Bone, who rips apart his officer's cloak to make bandages for his men, and when later facing the Strawhats, his first concern is what happened to the troops they had to have gone through.
* Averted with Castle himself and his mother Martha, both of whom work in the entertainment industry (Castle as a successful bestselling novelist, Martha as a once-fairly successful Broadway diva) and are consistently portrayed as likeable and decent people, even if Castle's a slightly shallow and rather egotistical
* Averted with Celegorm the Fair, the only one of the seven sons of Fëanor to have blond hair, and quite possibly the worst of them.
* Averted with Ceres during the time it was considered a planet, being in between Mars and Jupiter with the rest of the Asteroid belt, until it was demoted
* Averted with certain rare enemies such as Voluptuous Vilma and Almighty Apkallu, which were considered by many to only be rumours but have been found to in fact exist and their spawn conditions really are
* Averted with Chuck's own ex, who was mentioned in the first 5 minutes of the

pilot. Of course, he had no idea at that point that she was
* Averted with CID; by their very nature, Detectives were investigating numerous crimes simultaneously and although Detective Chief Inspector Meadows
* Averted with Commodore Smoker. He is said to be stronger than his Captain rank implies. However, he is stuck at the rank of Captain for a very long time due to his insubordination with his superiors in the Marines. The only reason he is promoted to Commodore at all is part of a conspiracy by the World Government — he just happens to be in the area.
* Averted with contract law in most places. A contract is usually invalid if it's signed "under duress." But then again, that law is
* Averted with Cutter, who makes a point of referring to people by their first names.
* Averted with Daleks, who have a tendency to spin around in circles before they blow up. Then again, that's probably better for everyone else.
* Averted with Damon. Though he is admiral of the Combined Fleet, even after
* Averted with Darla. Her voice is noticeably higher and softer than the other characters, even the female ones.
* Averted with Dave Thomas, founder and CEO of Wendy's, who starred in countless commercials for his fast-food chain. After his death, all commercials featuring him were pulled and there has been no attempt to reuse old footage or his image in new advertising.
* Averted with Delirium and Destruction. The former has pale skin but
* Averted with Drogon. He is a dragon with red and black scales but belongs to one of the protagonists. He is, however, the largest and most aggressive of the three.
* Averted with Earth (and New Earth!) in the Cycle - there's still plenty of various national governments.
* Averted with Ed. He doesn't seem to mind wearing a hot-dog as a costume.
* Averted with Elizabeth Webber's son Cameron, born in 2004. The actor currently playing the role was actually born in 2005.
* Averted with Elphaba, whose switch to her soon-to-be-trademark black hat and robe heralds the budding friendship with Glinda and becoming accepted at the school.
* Averted with Ember itself, which was originally designed to function for 200 years and looks like it's literally about to fall apart. There's evidence suggesting, however, that things were starting to deteriorate even before then.
* Averted with Entrapta. While she has dark red eyes and wears a creepy, red-eyed welding mask, she's
* Averted with everyone Faith has sex with. At one point in Season 3, she takes Xander's virginity. Nothing else comes of it (in fact Xander nearly gets killed by Faith after assuming this trope
* Averted with Eve. While Bond enjoys snarking at her for accidentally shooting him, he is more angry at M for giving the order.
* Averted with faeries. They are immortal and can have children as many times as they want. The Unseelie King has lived for thousands of years, has hundreds of children, and is still a young
* Averted with Faror Hend and Spinnock Durav. They're first cousins, and Faror Hend's attraction to Spinnock is so obvious even her commander has to tell her to restrain herself, while Spinnock is completely clueless.
* Averted with Father Elijah, whom you cannot talk down. The most you can do is convince him to meet you face-to-face via a speech check, which gives you the opportunity to
* Averted with Festivia the Fun. Gold Stone offered to arrange a marriage between his nephew Quartz and Princess Festivia, but her mother refused, not wanting to force her daughter. However, Queen Febe had Quartz accompany young Festivia in hiding in the Silvan Kingdom during the Mud Dweller Rebellion, in the hope that they might fall in love naturally.
* Averted with Finarfin. After finding out that his daughter Galadriel was married — much to his shock — he asked what his son-in-law Celeborn was like.
* Averted with Fire Guy. Despite being a fireball, he has no command over it

whatsoever.
* Averted with Floki, who has a rugged straight scar over his right eye (with the eye fully intact) and is a
* Averted with Franz Hopper, who made plenty of notes that he kept in crypted form in his informatic diary. Decrypting said diary is a major point of season 2. Also, the Lyoko-Warriors are very careful to not let the tech fall into wrong hands, so Hopper's supercalculator would most likely be replicable if taken by the army.
* Averted with Future Trunks' timeline: while most of the characters are dead thanks to the Androids, it's treated as no less important and the Cell Saga even ends with a
* Averted with Gaige's "20% Cooler" skill, though, which does actually modify your skill cooldowns (although there's no value where it changes it by exactly 20%).
* Averted with General Iroh, who is in fact a very decent and honorable man.
* Averted with Genos, who has black sclerae due to being a cyborg but despite this is one of the most virtuous, self-sacrificing and law-abiding characters in the series.
* Averted with George Merkert, Assistant Special Agent in Charge of the Albuquerque DEA office (as in, the head DEA officer) and
* Averted with Gerald's family, as his parents don't show any particular preference for any of their children, it's just Gerald tends to think so since Jamie O is the oldest while Timberly is the baby, leaving him with some mild
* Averted with Goh, as Ash slept through the summer camp where they would have met as young kids. Therefore, when they both hop on the same wild Lugia four years later they are complete strangers to each other.
* Averted with Gol D. Roger, though it's debatable how much of a hero he was.
* Averted with Gretzky's own son Trevor, who has spent several seasons playing minor league baseball.
* Averted with Guile's Sonic Boom. In one licensed strategy guide, techniques such as Ryu and Ken's
* Averted with Harry, who has lived in a cupboard long enough not to be bothered by normal spiders.
* Averted with Hawkeye, who absolutely refuses to wear his Captain's bars on a day to day basis. In fact, he donates them to Father Mulcahy when the chaplain is promoted to Captain.
* Averted with her grandfather who earns the equivalent of the Medal of Honor which normally includes the offer of a commission, but in his case he prefers to remain as an NCO.
* Averted with her uncle, Keifer Porter, who had the same hair colour but was a jerk.
* Averted with Iron Man's first match with Firepower in #230, as Jack Taggert's been training extensively on a simulator, and the real suit's capabilities
* Averted with Jadeite, as he'd usually take over existing businesses and either brainwash or
* Averted with Jam Ojisan's voice actor Hiroshi Masuoka, who retired on August 5, 2019, six months before he passed away of rectal cancer and was replaced by
* Averted with Jem and the Holograms themselves. Jerrica and Kimber's parents were decently well off; however, Jem is shown multiple times to be hard on cash despite being a world-famous pop icon. There's a good reason for this, though - Jem and her bandmates are foster mothers who run a home for orphaned and disadvantaged girls, and the bulk of their income goes toward supporting the kids.
* Averted with Jessica Sanchez (season 12), who was saved immediately after she was about to be eliminated. She ultimately made it to the runner-up spot.
* Averted with Jin. After spending awhile with one-half of the handcuffs still on his wrist, it's started to leave marks. Sun notices and asks him to have
* Averted with Joey who thinks they're great and 'going to last forever'. He's proved right.
* Averted with John's Rocket Pack, which is so large that it extends to the floor, and the exhaust comes out below the feet.
* Averted with Jot, Zot, Sikko, Coach Nurse, Sekoila, and the Yarner twins. They

are all
* Averted with Kakashi, who looks perfectly normal under his ever-present mask.
* Averted with Karl-Heinz Schneider's father Rudi. He was a former player himself and now coaches the team, so there's speculation that he pushed Karl-Heinz into doing it himself. But Karl-Heinz genuinely loves soccer and is happy being
* Averted with Karl Malone and John Stockton: the Utah Jazz were relevant almost single-handedly because of them.
* Averted with Kirk's son in the "Shatnerverse" novels, whose mother is a genetically-engineered Klingon-Romulan-human hybrid. According to Spock, the kid is also Vulcan by virtue of his Romulan blood. The boy turns out to be
* Averted with Lego bricks. The patent for the bricks expired long ago, and Lego has so far been unsuccessful in their efforts to trademark their iconic 2x4 brick, hence why you'll find very similar brands of construction sets like Mega Bloks on the market. Hasn't stopped Lego from trying to take legal action against them time and time again, though. And this despite the fact that they themselves got into hot water due to being similar to Kiddicraft play bricks, which they settled out of court on.
* Averted with less focus on an ongoing plot and no main villain until near the very end.)
* Averted with Lionel Luthor. He's so hated that Lex, learning from his mistakes, determines that love is a more powerful weapon than hate. Before his
* Averted with Madylin, Sullivan, and Sawyer Sweeten, the real-life siblings who play Ray and Debra's kids, a group of blondes to Ray Romano and Patricia Heaton's brunettes, which became a joke to the cast.
* Averted with Maho, Nitori's mom Satomi, Makoto, and Momoko who are all varying degrees of feminine but have bob styles or shorter. Chizuru is a tomboyish girl who likes wearing the boy's uniform to school but has the longest hair in the manga. Popular model and singer Maiko originally has
* Averted with many of the 'Complete Series #' releases, which are the
* Averted with many of the other Arls and aristocrats, however. Arl Eamon is a great guy who will stand and fight with you against the Darkspawn, and most of the other nobles of the Bannorn are genuinely trying to act in the best interests of their people.
* Averted with Marshall, Carter and Dark, an organization antagonistic to the
* Averted with Martha's presence in "The Shakespeare Code": Martha initially worries that being black in 1600s London will cause trouble, but the Doctor laughs it off, assuring her that London has all types of people. In this case, he's right. Elizabethan London had
* Averted with Martyn and Willem Lannister, because they are rather worthless hostages when compared to Sansa.
* Averted with Mega-Girl and Stronghold. When Mega-Girl reveals that she's both
* Averted with members of Hitler's staff who filled the same role as Cherwell. Whenever Hitler met with his generals, he had extensive and detailed files prepared by his staff about the state of German industries, manpower, supply situation, etc. that no general could defeat his arguments. However, the actual situation on the fronts seldom resembled the official figures, as, even if the figures were correct, difficulties in transportation and deployments often meant that the actual troops had no access to the supplies in question. A case in point, in an argument with one of his generals in early 1942, Hitler showed that sufficient winter gear has been assembled and sent off to the front. Unfortunately for the actual German troops, the lack of rail transport (combined with the change in gauge at the Russian border) meant that most of the winter gear was piled up at train stations and warehouses in Poland.
* Averted with Mercury's death. Once Emerald confirms his passing for Cinder, she simply kicks his body into the sewer and leaves.
* Averted with Mercy herself — as a walker, a type of Native American shapeshifter, switching between her coyote form and human is painless and nearly instantaneous. Charles Cornick, a werewolf who inherited some powers from his Native American mother, still feels pain when he shifts, but his transformations

are much faster and smoother than normal.
* Averted with Metropolis, where the portion explored is completely different in the first game, third game, and
* Averted with Moorabi in Gundrak; the transformation is a spell that can be interrupted, and the players get an achievement if they defeat him without him transforming.
* Averted with most other species. The Ferengi pretend to find humans below their standards, but are such deviants that they can't help themselves.
* Averted with Mr. Burns. He never forgave his mother after her affair with President Taft. On the other hand, he does get
* Averted with Obito, who wears goggles properly over his eyes. Likely due to being an Uchiha, he took very good care of his eyes, protecting them from debris with the goggles and using eye drops to moisturize.
* Averted with one historical group: Nazis. After a few missteps (including Heinrich Himmler as a vampire in
* Averted with one refrigerator ad where a woman attempts to defrost her open freezer with a
* Averted with Ork cybernetics. No matter how much metal you nail onto an Ork, that inner core of violent insanity remains clearly visible - it's just now directing a larger and tougher body.
* Averted with orks, who are genetically engineered to be the ultimate warriors- they don't need training, just more fighting (which their fellow orks are happy to provide).
* Averted with other synthetic characters, most notably EDI, who can be playful, humorous, or even caring (though still with a little touch of deadpan), and Harbinger, who is a
* Averted without being informed just what it is they've "volunteered" for. The plot hinges on the fact that the four subjects were given varying doses of the Crazy Juice — and none of them know which one of them received just plain saline, as the control.
* Averted with Pash Cracken, who voluntarily accepts a demotion to join Rogue Squadron in
* Averted with Penny. Nobody in the film seems to consider her particularly attractive, at least not in comparison to the more "preppy" Gwen.
* Averted with philosopher's stones, which as a secondary feature allow the user to transmute things without circles. that's why people using (or "being") a philosopher's stone can transmute without a circle.
* Averted with Piper's own half-Whitelighter children, who are not examples because their parents' relationship was no longer forbidden by the time they were born.
* Averted with Purgatory however, where time passes at the same rate as on Earth.
* Averted with Pylea: Winifred Burkle was trapped there for five years, in both that world and on Earth.
* Averted with Queen Breha Organa, who explicitly refused to disguise her mechanized organ replacements. As a child, her daughter compared them to a bouquet of glowing flowers in her chest.
* Averted with Raoh's army. He wants to conquer humanity, the last thing he needs is wasting time suppressing revolts. His motto to his troops was basically "kill all who oppose my reign, but if you do anything that'll make them live and hate us, I'll personally crush your skull under my horse's hooves" (which he did)
* Averted with regards to Loras Tyrell' perception of Brienne on the show.
* Averted with Reinforce Eins, who isn't averse to using external barriers to stop her opponents' attacks.
* Averted with River Song, who writes in her diary in "The Eternity Clock" how excited she was to use time travel to go and meet the Doctor's previous incarnations, apparently expecting to be in love with all of them, and being eager to see "the face of her beloved in his first incarnation". She discovers to her horror that not only does she not have any sexual chemistry with the First Doctor (an

* Averted with Sara, who has similar regeneration abilities. Getting cut in half meant she was pretty much doomed and needed to eat FAST. Fortunately, some minions are nearby.
* Averted with scorpion venom. Scorpions are immune to the venom of their own species.
* Averted with Shinn and Athrun, and in fact pitted against someone that he couldn't write off as a faceless guy who he could believe to be evil (because Shinn knew Athrun was a good person at heart), Shinn couldn't quite muster up his usual performance.
* Averted with Simba: He barely escapes death by dehydration and exhaustion (after fleeing for days from Pride Rock), and later Scar nearly throws the adult Simba into an enormous fire of dead trees and bushes.
* Averted with Smash Williams' mother Corrina. Smash puts a lot of pressure on himself, wanting to use football as a way to a better future where he can provide for himself and his family. Corrina constantly reminds him that the goal is to have fun and get a good education. The only time she gets really upset with Smash regarding football is when she finds out he's been secretly using steroids to improve his scholarship chances.
* Averted with some fan-made mod races. The Wasp Hives can fly and glide in brief bursts, while the Avali's wings reduce their falling speed enough that they can fall from any height without taking damage.
* Averted with some visible blood. And this sequence was played as the intro of the show, meaning this happened on a regular basis.
* Averted with sorcerer-king Belgarion, as his wife is an equally long lived dryad, and Belgarath whose wife Poledra is also some kind of servant of the gods and similarly long lived.
* Averted with Spoon towards Dave. Even though Dave spilled out his insecurites to Spoon, he has no issues with abusing him.
* Averted with Stannis Baratheon; the first thing he does with the information about Joffrey's true parentage is to tell it to as many people as possible so no one can claim ignorance, and says that Ned only telling him was a mistake on Ned's part. This is a notable change from the books, where he
* Averted with Steve Young and Jerry Rice, although Rice had the longer career and played for three different teams.
* Averted with Telephus. He was given a beautiful woman named Auge by a king as a reward for winning a war. Suddenly, just as he gets ready, a
* Averted with Tennyo, who is bound to an entity created for this purpose, and is revolted by the fact. Fortunately for her sanity, she has yet to be told just [[
* Averted with Texas A&M University. The statue that receives all the attention is Lawrence Sullivan Ross, the man attributed with
* Averted with the 1994 US Women's Figure Skating Championship. After winner Tonya Harding pled guilty to hindering prosecution regarding the attack on her rival Nancy Kerrigan, the USFSA stripped her of the title but opted to leave the spot blank rather than advance everyone who finished behind her.
* Averted with the Amygdala. Despite being even more powerful than its Lesser brethren, it also knows how to use its advantages to the fullest. That makes it a nightmare for Anderson to fight.
* Averted with the Ashen Wolves if you happen to deploy them in the same chapter's mission. They do not have any comments about killing because they had already stained their hands with blood prior.
* Averted with... the bear, who mostly stands around, and usually leads the
* Averted with the blobfish, as they only look nightmarish when their out of the ocean. Otherwise they look like relatively normal fish when in the water.
* Averted with the CFL's 2014 expansion team, the Ottawa Redblacks, who took up the legacy, the history, and even the colors of the two previous teams to play in Ottawa (specifically the Roughriders), but took up the name Redblacks in order for the CFL to keep the
* Averted with the character Dean Winchester, who is a terrible, tone-deaf singer, unlike his actor, Jensen Ackles. The directors have to

* Averted with The Chill Grill, Victor Baxter's restaurant. It's a popular teen hangout, and Raven and Chelsea even get jobs there, but the food is delicious and the uniforms are stylish (though that has something to do with Raven, an aspiring fashion designer, having a hand in making them).
* Averted with the Compé, which was current when the toons that featured it were made.
* Averted with the computer club president who is important enough to have one episode that features him as the main antagonist and one which focuses on his disappearance.
* Averted with the Cracker Launcher. As with real life rocket launchers, the recoil is insignificantly low, and you have to look real closely to see characters twitch with each shot slightly. This allows the use of
* Averted with the cruiser-type escort carriers, which have no weapons beyond their ability to construct and launch 1-3 wings of fighters or bombers.
* averted. With the exception of some heavy cruisers and very fast scouts, virtually everything is a capital ship. There are no 'fighters' or light bombing craft at all. Probably because the series started in the 1930s, when few people realized the potential of carriers.
* Averted with the fifth season, as many people believe the reason that there was a mid-season hiatus was to air an
* Averted with the friendly Insects who are not only cooperating with humans but have petitioned to be accepted into the
* Averted with the goblin massacres, being one of the designated villain races of any
* Averted with the Gyaos. They can reproduce asexually and are soon able to attack in large swarms.
* Averted with the help of any online store that offers to let you set up a wishlist of items you really DO want...
* Averted with the Imperial Guard Infantry Uplifting Primer, which has been published in full detail. The only reason that it got this distinct honor is because much of the rules in there are
* Averted with their individual uniforms, the HECU uses a white-and-grey camouflage with a green vest. While the US Military never used that kind of uniform
* Averted with the Iron Warriors. While they do use a lot of cybernetics, and they are ruthless bastards, the lack of soul is more due to
* Averted with their second kiss on Christmas Eve, where they're just sitting on a park bench after having finally confessed their feelings for one another. There's no Grand Romantic Gesture
* Averted with the Ivory King, whose wholehearted acceptance of his wife Alsanna, also a daughter of
* Averted with the Klingons. Despite being created to serve as a counterpart to the Soviet Union, the Klingons were never shown or established to have their own version of the KGB. In
* Averted with the Kree from Marvel Comics. Despite being a very militaristic society, they are also one of the most technologically advanced races in the Marvel Universe to the point of having an organic super computer, the Supreme Intelligence, as their leader.
* Averted with the Lantern Spider enemies in The Funhouse level from
* Averted with the long-lived caveman who dies in a modern city - when his modern-day son (not aware of his father's secret) starts sorting through his father's possessions, he finds paperwork for multiple alternate identities and funds to take advantage of them, with no explanation available for what kind of double life his father may have been leading.
* Averted with the love interest of Julia, Rikki's counterpart from the 1960s, who told her boyfriend only for him to
* averted with the most prominent female of the series: Karrin Murphy is 152 cm.
* Averted with the Mother's Rosario arc where Asuna is firmly the protagonist and the story focus on her friendship with Yuuki and her relationship with her mother.
* Averted with the Neanderthals, in whom gender roles are so rigidly defined that

they have become part of their genetic make-up. Thus men cannot learn women's skills such as cooking and gathering plants, while women cannot learn men's skills such as hunting. In addition, only men can become leaders or Shamen, but only women can learn the use of healing plants.
* Averted with the (now retired) F-111 "Aardvark" (though it was a light bomber, a carrier based interceptor version reached prototype stage only to be rejected) as its two crew sat side-by-side. Interestingly, there are some planes today that do this including two Russian Sukhoi aircraft, the Su-24 Fencer and the Su-34 Fullback (both spoken of as fighters even though they're light-bombers). Interestingly, the latter has some luxuries considered rare in a fighter including a small galley, a lavatory, and sleeping facilities. Rare for a helicopter, the Ka-52 (the competitor to the Mi-28; ultimately Russia adopted both) also had side by side seating. Even rarer for a combat helicopter, the Ka-50 from which the Ka-52 was derived was a single-seat craft; the Ka-52 added a second seat because it had enhanced sensors to serve a dual role as an attack and reconnaissance chopper and the single pilot couldn't handle all of that by himself.
* Averted with the Orks. Depending on the work in question, they may be speaking
* Averted with the Overlord of Evil, despite his name. He has a few Mooks under his belt and a god complex, but he has no empire to speak of.
* Averted with the PC-FX. NEC was one of the few console companies to actually license adult games in hopes of gaining a foothold (and even certain, if not most, non-porn games featured some level of fanservice, some even involving minors), and the system
* Averted with the Pe'khdar, a species created for the fic. They originally came from a world called Dar Klatus that they destroyed in a nuclear war.
* Averted with the release of her album "Plunge" during which she used 'comparatively' little makeup/masks to hide herself. And even talked about her family in interviews.
* Averted with the Sage of the Six Paths, who spawned the Uchiha, Senju, and Uzumaki clans. In the case of the Uzumaki and Uchiha clans,
* Averted with the Sarimanok of Filipino mythology, a mystical, rainbow-colored rooster that essentially functions as the Philippines' take on
* Averted with the shadowy Section 31. While so secret that even the Federation Council and President are (supposedly) not aware of its existence, free from any official government oversight to
* Averted with the Skrulls' long-time nemeses the Kree, whose originating planet was called Hala.
* Averted with the social minions, whose goal is distracting enemy agents, making them think the island is just a tourist hotspot. The valets are dressed as bellhops (despite performing all hotel functions), while spindoctors, diplomats, and playboys wear suits (albeit with bright-colored jackets).
* Averted with the solitary Gravediggers, of all species. Once they make a series of effective traps, they typically don't need to expend much energy hunting, so they find ways to amuse themselves. One of the most common is using scratch marks and soil derived pigments to create art in trees which can be used as a form of primitive social media.
* Averted with the sonic sunglasses of Series 9, which took the place of the sonic screwdriver that season as the Doctor's
* Averted with the Sons of the Dragons as they are a legitimate resistance movement against Japanese occupation and the drug trade, though the Japanese (and their collaborators) will address the SOD as "insurgents".
* Averted with the Spartan-IVs, who are adult volunteers transferring from other branches who receive more standard (though still rigorous) training. The fact that they
* Averted with the Straw Hats. Luffy is the third shortest; only barely taller than Nami and the shortest, Chopper, can become much larger than Luffy.
* Averted with the Surf and Fly HMs, which are strong moves for their respective types while also being very useful out of battle. With the additional advantage that HMs can be taught over and over again, which wasn't possible with TMs until

Gen V, they are very common moves to see in teams.
* Averted with the tactic of attacking at around 3am, when your opponent is most likely to be deep asleep. For this reason it's a favourite time for police raids, as criminals tend not to post sentries. Less heroically, this is also the time when the
* Averted with the third one — Ellen/Siren — in the first episode.
* Averted with the UK DVD Release, where the episodes are mostly uncut, aside from a few cuts in certain episodes.
* Averted with the Unforgiven, the most powerful revolver in the game, which has recoil just shy of smacking the shooter in the face.
* Averted with the unique els of order and chaos, who wield more conceptual / semantic powers.
* Averted with the very first exosolar (read: not in our Solar System) planets discovered, the class known as pulsar planets. These planets are orbiting pulsars (a type of neutron star that sends out massive amounts of electromagnetic radiation, generally in the X-ray and gamma wave ranges) and are the likely remains of the core of a companion star which had its layers blown off when the fellow star it was orbiting went supernova, or are the fused-over bits that coalesced after a supernova explosion, and even if they weren't blown to pieces or ejected from their star systems, the radiation sent out by pulsars would blow off any atmosphere and sterilize any rocks still in orbit around these star remains.
* Averted with the way he acts towards Lucy. "At least I grabbed some ass" indeed!
* Averted with the werewolves. After a little while, it just becomes a fact.
* Averted with the witches, who rarely use magic — they live just the same life as everyone else, which in the places where witches tend to live is a very hard life with lots of physical work.
* Averted with the youngest Patterson, April. The Strip of Destiny revealed she'd moved away and had hooked up with an unnamed "country boy". Prior to this, however, the strip had teased the idea of her ending up with her childhood friend Gerald.
* Averted with Tom, Star's half-demon on-again-off-again boyfriend. Even after
* Averted with Tucker's son Connor, usually a good mannered but immature kid who goes through a bad boy phase during the first half of the eighth season. Most characters and fans of the show agree that they find the cute and cheerful Connor a lot more charming than bad boy Connor, who they mostly find just annoying and out of control.
* Averted with two of the female Elder Dragons of Tarkir, Dromoka and Atarka, who have men's chests (their female fellow Kolaghan doesn't have a human chest).
* Averted with Voldemort. Tom Riddle was rotten to the core even as a small child.
* Averted with Vorian Atreides. During the Jihad days, he had so many lovers on so many planets, that he frankly lost track of all his descendants. This means that House Atreides in the main series (taking place over ten thousand years later) is far from the only source of Atreides blood. In fact, the founder of the Bene Gesserit school is actually Vorian's granddaughter, but that line does not last beyond 2 more generations.
* Averted with weapons. For example, plasma weapons: in the Imperium they're rare but not uncommon (which is relative - thousands of plasma guns are made each year, while
* Averted with wolves, which is one of the reasons our two species get along fairly well. Granted, the phrase "wolf grin" exists for a reason, their smiles don't always look
* Averted with worship of Asmodeus for the most part. No one really likes him or his worshipers. But even the Good Aligned Gods will admit that Asmodeus at least will work with you without backstabbing you if things get dire enough. And that he does give out good, if suspicious advice. It helps a lot that his worshippers will follow the letter of the law, if not the spirit.
* Averted with Wulfrik the Wanderer, a Chaos character who was given the gift of tongues to be able to insult any opponent in their own language so they couldn't
* Averted with Xander who is a very successful lawyer specializing in a very narrow area of technology law. When Louis, specializing in financial transactions

law, goes against Xander in a technology law case, Xander demolishes Louis in their first court appearance due to his superior knowledge of the subject matter. Louis has to do a ton of research and reading up on case law before he finds a precedent that swings the case back in his favor.
* Averted with Yuto in his first appearance. They protect him from flying debris, but they break. After that, he ditches them.
* Averted with Zaeed's backstory. His business partner double-crossed him and had six of their underlings restrain him while said partner put a gun to Zaeed's head and pulled the trigger.
* Averted with Zen Buu, though. While he freely admits that the fight was impressive, he doesn't appear shocked, or even worried. That's
* Averted with Zero as his reasons for hating Kaname have more to do with him being a pureblood, and having been used/abused by him rather than being jealous.
* Averted with Zoidberg. Over the course of the show, only one woman ever showed attraction to him, and that was only because she didn't have a sense of smell, and so didn't notice his repulsive scent.
* Averted worlds will be flourishing, earthlike "garden"-type worlds. That doesn't necessarily mean that the non-earthlike worlds (or barely earthlike worlds) will be useless, though: a barren world may have more valuable resources in it than an earthlike world.
* Averted would make a comment that would upset Sam, but would always follow up with a nice recovery. Sam once accused him of enjoying that.
* Averted) yet is generally decent to everyone and DJ who is a star quarterback but is considered the nicest contestant on the island.
* Averted, you fight while falling down a waterfall and several encounters worth of enemies keep popping up and sticking with you while you're falling (and fighting)
* Averted. Zeus and Poseidon lusted after the sea-goddess Thetis. After they learned that her future son would be greater than his father, they decided not to have sex with her and arranged her to marry a mortal. No matter how great her son became, he would only be a demigod with a mortal's fate.
* Averted. Zeus is warned that his lover Metis would bear a son great enough to oust him. He swallows the pregnant Metis, whose child is Athena.
* averting monthly, the team at David won't outpace him any time soon.
* Averting the trope is a key skill for jazz musicians. There are certain keys that sound best for certain instruments, and in a five piece jazz band, it's possible that every single instrument would like to play the song in a different key (except the drummer, obviously). Most often, it's the guitarists and pianists who will change to play with the singer or horns, so they have to be able to transpose complex chords on the fly.
* Averting the trope is why the Tau empire is able to make such sweeping progress whenever it conquers an Imperial world: by giving all humans good living conditions and medical care, they instill the kind of loyalty the Imperium needs armed men to ensure. Of course, it's entirely possible the Tau secretly sterilize their human members, but that's
* Averting this trope has led to a uniform convention known commonly as the "Good Conduct security blanket". In day-to-day use, as opposed to more formal occasions, it's generally only required for officers and chief petty officers to wear a single row of ribbons on their service khakis, these usually being the top three they are entitled to. In the Navy, only enlisted personnel are awarded the Good Conduct medal, and so Mustang officers who have occasion to wear ribbons on their uniform will wear as many ribbons as it takes to get to the Good Conduct medal on the order of precedence in order to display his prior enlisted status. Also common is wearing an ESWS (enlisted surface warfare specialist) warfare device along with a SWO (surface warfare officer) pin, or their community-specific equivalents.
* Averting this trope is a big selling point for newer brands of blood-sugar-testing kits, marketed to diabetics who are tired of pricking their fingers.
* Averting this trope is actually how the culprit is caught in case 3 of the fourth game. The defendant turns out to have been the killer's accomplice in smuggling illegal Borginian cocoons. Cocoon smuggling carries the death penalty in

his home country, but not in
* Averting this trope is the whole reason the vampires took over the world in
* Averting this trope is why Catalyst Game Labs released a new introductory box set for
* avert it by launching Snickers chocolate bars with phrases like "You're being petty", "Hater", "Prissy" instead of the name.
* avert. Of course it all depends on who is in charge of the regiment focused on when it comes to the Guard being evil.
* averts this by being completely unlimited in scope and being able to completely break the rules of nature, however there is a cost to each spell. The cost being amplified based on how much you're breaking the natural order.
* avert this when her husband visits home: she has him ride a horse, since the aging will only activate if he actually touches the ground of the mortal world. Naturally he falls out by accident and dies anyway.
* avert Vandal Savage's conquest of the world repeated attempts to stop them.
* A very, ah, steamy incident in "the Black Latios." Pikachu gives Ash "The Talk", who, the innocent boy he is, runs out of his room screaming. Unluckily for him and his good friend Latias, she just got out of the shower, is in her human form, and is only in a towel. One thing after another, and both their faces are as red as Latias's feathers and a cherry.
* A very awkward battle from Estonia: As it happened, the Soviet Union and Nazi Germany were both invaders. While the Soviets forcefully conscripted Estonians in 1939-40 and in 1944-45, the Nazis only took volunteers in 1940-1942 until in 1943 they conscripted every able-bodied male into the SS, leaving the Soviets with just the old men and the kids coming-of-age
* a very bad remark about his mother. It took a very long time for trolls and humans to work all this out.
* , a very bitter Hermione gives Augusta Longbottom, Lucius Malfoy, and Voldemort a succinct presentation on how muggles have changed since the establishment of the Statute of Secrecy, pointing out the idiocy of the Wizarding World's stagnation and the risks they're exposing themselves to by tickling the sleeping dragon:
* A very bizarre version of this with the Italian politician Giacomo Gobbi. With little information about him available online, he would have remained obscure beyond his province. However, more people know about him thanks to his campaign ads appearing in buildings in the
* A Very Blue Beard, when Bluebeard proposes to his first wife and offers her the keys of his castle, his arms stretch out further and further towards her for about twelve seconds. Later, when he proposes to his third wife, he holds his arms upwards (the lady is a winged fairy) and they also stretch for about six seconds.
* A very bouncy live-action woman acts alongside the show's traditional stop motion. The
* Avery Bradley, of the Celtics, needed surgery on his shoulder, and he missed out on the Eastern Conference Finals with Miami.
* A Very Brady Christmas, Jan's husband Richard is asleep at the desk, and she covers him with a blanket. The two have been having marital problems, so when he wakes up and catches her in the act, he's a bit surprised. She points out that she's done it for him many times when he's fallen asleep while working. "Who did you think it was, the Blanket Fairy?"
* A Very Brady Sequel approaches this trope when Greg and Marcia are reminded that they actually aren't at all related. In this case, it's also a reference to the fact that the actors playing Greg and Marcia (in the 70s TV series) were in an on-off relationship during their time on the series.
* A Very Brady Sequel, Jan tries to show off her imaginary boyfriend, George Glass, by carrying a mannequin into the cafe. It falls apart more easily than she expects, resulting in onlookers reacting to the date as a performance arts piece.
* A Very Brady Sequel parodies a corresponding scene from the TV series by having Jan spot a carton of fruit juice and thereby inventing "George Tropicana."
* A Very Brady Sequel, runs after the dog … and then there are sounds of what's implied to be a collision between the boy and a car. Bobby and Cindy, who

witness the crash, simply shrug their shoulders and are unfazed.
* , a very brief comic skit by film pioneer Wallace McCutcheon. A well-dressed man is coshed, robbed, and left unconscious in the street by a mugger. A uniformed cop on foot patrol then appears, finds the man lying on the pavement... then steals the rest of his valuables and walks on.
* A Very British Coup implies this after Britain's socialist Prime Minister defies a plot to blackmail him into resigning.
* a very broad and complex morality spectrum, how "Good" and "Evil" a person, mortal or divine, varies wildly.
* Avery Brooks. However, when Spenser returned in the form of made-for-TV movies, Brooks had to keep the shaved head again, and it was decided that Sisko had already established himself enough as a character in his own right that it's okay if he starts to look more like Hawk.
* Avery Bullock when he attended an all-boys boarding school as a kid. According to Bullock, every boy there did it.
* A very charismatic and wise Nameless One can, instead of recruiting Vhailor, either convince him that his
* A very common accusation from the Soviets during the 1972 Summit series, exacerbated by the frou-frou no contact rules of Russian Hockey, as opposed to the genuine physicality of proper North American Hockey, Soviet players, unprepared for any serious checking, were
* A very common background in most Mecha Anime. In many cases, it reflects on their character's personality and career choices. An example of this would be
* a very common Greek name, which is why the prisoner and later Aesop use it to hide their true identity.
* A very common interpretation is that the damned will be restored to their bodies, but they will still be corpse-like, and it is only for them to now
* A very common one is use of the wrong AK variant. Sometimes you see Soviet/ex-Soviet soldiers in a reasonably modern setting wielding the original AK or the AKM. In reality, they'd been mostly replaced in Soviet service by the AK-74 (which can be identified by a smaller, less-curved, orange-coloured magazine, as well as a large muzzle brake on the end of the barrel).
* A very common phenomenon in online communities, including this one.
* A very common practice among trial attorneys, as legal and factual issues of often bewildering complexity have to be explained from the ground-up to a group of very bored laymen. A usual lawyer's rule of thumb is that if your theory of the case can't be explained in under 5 minutes, you need to go back and come up with a simpler one.
* A very common practice in many military organizations. Expect to see the people in question doing various menial labor such as painting parking space stripes, doing yardwork, etc. Sometimes they will also be used for "make-work" jobs with no real purpose, such as painting rocks.
* A very common quote mine specific to Germany is to use Ernst Reuter's supposed quote (translated): "People of the world, look at this city[...]." and showing some random achievement and shots of Berlin for the propaganda...ahem, documentary purpose of supporting whatever supposedly positive thing the Western powers did after
* A very common trend on American television networks between Christmas and New Year's is the airing of marathons of shows and/or movies aimed at families with children during daytime hours to entertain the kids who are at home with their parents or families that week. This was more common in the era when cable was not as common as it was now, but some cable networks aimed at adults do this in order to get better ratings during this time period.
* A very convincing 'walt', claiming service in an elite unit in Afghanistan, appears in "The Point of Balance". A mistake concerning the nickname of helicopters, and not wearing a decoration he should have been entitled to, arouse the suspicion of a genuine veteran.
* A very creepy basement appeared in "Schizogeny" where Karin (the-monster-of-the-week) used to be locked up when she was small and she in turn locks there another

girl who has to watch her aunt's murder and her body through a small window. Moreover, there is Karin's father’s body covered in tree roots in the cellar.
* A very creepy example turns up in an EC story: For years, maybe two, maybe three, this dude has seen this gal with a fabulous figure and a wonderful personality at a Halloween party (and only at that party). Only thing is, she's always wearing this horrible wrinkly witch mask. Finally, he proposes to her, they go get married right after the party- still in their costumes. They consummate their marriage in a hotel, but the kicker is, she turned out the light before they undressed. He dreams that she's still wearing the mask; pulling it off, she wears the same mask underneath. He wakes up, turns on the light, and yep, there she is, wearing the mask. So he pulls it off and... off comes her skin. It was her real face.
* A very dangerous murder spell works like this. Leez is afflicted with it, and twelve hours after it is first cast, suddenly finds herself waking up after a nap, having gone from a sixteen year old
* A very dark version is Rahm Tak, the arc villain of season 3, a Castithan officer of the Votan Collective who hates humans but loves their pop culture.
* A very deliberately fake-sounding one is used in the "Dickie and Dino" segment of
* a very disturbing pattern of adoption involving two beavers and a platypus...
* A very drunk Sandor Clegane pins Sansa Stark down on her bed and makes her sing him a song. He leaves before going any farther but later admits to her little sister that he had indeed intended to rape Sansa and possibly regrets not doing so. Making things more complex is the fact that Sandor had previously
* A very drunk ("totally zonked!") Elizabeth attempts to get out of the cab at the hotel feet first, showing serious leg.
* A very early episode features Mr. Garrison auditioning to play Mr. Garrison in an America's Most Wanted reenactment of a crime he witnessed. He didn't get the part.
* A very early episode involved Misty and Giselle at each other's throats. Ash wanted to step in and calm them down, but Brock told him no, and that getting in the middle of a cat fight was not a good idea.
* A very early example occurs in Strange Tales #3, published by Marvel's predecessor, Atlas Comics, in which three men who discover the identity of Death are systematically wiped from existence.
* A very early example of fourth-wall elimination is the late-1970s Apple II game,
* A very early example was the simple, 4-bit graphics of the tanks games in
* A very early rejected mask design for Toa Pohatu was later used for another Toa of the Stone element, Toa Onewa.
* A very early strip has a variant where Charlie Brown tries to prevent Snoopy from following him home, until Shermy points out that Snoopy also lives that way. (Yes,
* A very eerie example was the lack of the World Trade Center in the New York skyline. Due to memory limitations, the sections of the skybox including the World Trade Center had to be removed in favor of mirroring the other half of the skyline, and the creators justified it saying that they had been destroyed in a terrorist attack before the game started. Keep in the mind that
* A very effective way to run this kind of scenario is to let the players be the ones who fulfill this trope. Let them take out the vital bridge, knock out the crucial communications array, or stop the evil ritual which keeps reanimating the dead to fight for the
* A Very English Scandal has not the politician (Jeremy Thorpe) on the receiving end of an attempted assassination, but his ex-lover, Norman Josiffe. Though the would-be assassin has Norman staring down the barrel of a gun, it jams at the last second.
* A Very English Scandal, Norman is beaten for trying to file a report on Jeremy Thorpe; the officer interviewing him immediately handles him roughly, warning him against trying to go against the politician.
* A Very English Scandal, politician Jeremy Thorpe allegedly tries to have Norman

Josiffe murdered because he and Norman were once lovers (at a time when such an affair would be even more damning and career-ending) and Norman refuses to be intimidated or bought out.
* A Very English Scandal, the "80% gay" Jeremy Thorpe gets married to a woman, mostly as a cover for his (at the time illegal) homosexuality and also possibly insurance for his past affair with Norman, as well as for a move that would improve his public perception. He even considers giving her a baby quickly and then begging off sex forever. Despite this, he ends up genuinely loving his wife (platonically) and new family, and is genuinely devastated at her death; he eventually remarries and forms a great relationship with his second wife as well.
* A very famous "Ave Maria" is universally attributed to Caccini. How would anyone accept such a style of composition as likely to have been composed by the same Caccini is beyond reason. It's actually from the 1970s and by a Russian composer called Vavilov.
* A very few characters are occasionally called "beyond omega classification." These are among the most powerful and dangerous
* a very grotesque clock. In fact, it's composed of the severed internal organs of a guy, which were then stitched together by some crazy alchemist-like Moor and connected with wires and tubes in order to allow the head of the poor guy to go on living. The only thing he's able to say it's the time. Imagine the reaction of his two friends when they find him. His organs are all working, by the way.
* Avery Haines) fell victim to this while working at CTV Newsnet. While taping the introduction to a news report, she flubbed a line, then made a lighthearted joke about it:
* A Very Harold & Kumar 3D Christmas) Christmas tree after he tells a story of how important Christmas trees are to him. Harold and Kumar spend the rest of the movie frantically trying to find a replacement.
* A Very Harold & Kumar 3D Christmas claymation scene, this happens to an unfortunate hot dog vendor when he gets crushed by a snowball hurled by a giant, rampaging, murderous snowman.
* A Very Harold & Kumar 3D Christmas has Wafflebot, a waffle-making robot with searing-hot maple syrup and a waffle iron that can be swung like a metal fist. Harold lampshades this.
* A Very Harold & Kumar 3D Christmas. Hint: it's not Harold's tongue that gets stuck.
* A Very Harold & Kumar 3D Christmas, Jesus is squiring two topless angels around Heaven.
* A Very Harold & Kumar 3D Christmas, Seth Goldstein (who has recently converted to Christianity) asking Kumar to pay back the 57 cents that he owes is taken as a sign that he is still a Jew at heart.
* A Very Harold & Kumar 3D Christmas turns into claymation after the guys unwittingly drink some eggnog laced with drugs.
* A very hilarious (and much-anticipated) take occurs during lunchtime in
* A very humorous twist on the trope occurred during the first season when
* A very important role in professional cycling. It's very hard to win any race without a good lancer, who would usually play the role of
* A very infamous example is a commercial showing a montage of animals in Africa with their young while Rod Stewart's "Forever Young" plays in the background. At the very end of the commercial, a watermark appears in the bottom of the screen showing that this was an advertisement for Pampers diapers.
* A very interesting case with a certain archangel who was designated to be The Archangel of Lies by
* A very interesting take on this concept forms the crux of the conflict in
* A very interesting twist on Alejandro's character. While he usually
* A very ironic case is swine influenza, or "swine flu". Many people think that they can catch this dangerous disease from infected pigs, and fear of it has led some countries to mass slaughter them. In truth, humans cannot catch this disease via casual contact with pigs (humans who work in that industry who butcher them might), but ironically, pigs

* A Very Kara Christmas accidentally drops his cup of coffee right on co-worker Frank Potts' groin. Aghast, Jimmy takes some blank pages and attempts to wipe Frank's crotch off, but Frank angrily tells him to stay away, adding that "[he's] going to devote the rest of [his] life to wiping [Jimmy's] image from [his] brain".
* A Very Kara Christmas arrived in Earth and was dumped in an orphanage only half year ago before the beginning of the story. She knows hardly anything about Earth customs, and as a result of it, she gets bewildered stares when she lets slip that she does not what Christmas is.
* A Very Kara Christmas decides against going out with Dick Wilson because, until she has not perfected her "normal, innocent human girl" act, he could figure her secret identity out.
* A Very Kara Christmas is a story about a person experiencing Christmas for the first time. The closest thing to a villain are two meddlesome, nosy schoolgirls.
* A Very Kara Christmas: Kara bursts out in tears when she remembers how her parents and friends died, and she buries her head into her cousin's chest while he hugs her comfortingly.
* A Very Kara Christmas: Kate exclaims an angry "You!" when she sees Linda after her encounter with the skunk (which only happened because she was spying on Linda, but please don't point out that to her).
* A Very Kara Christmas's odd accent -which she lost after a couple of weeks-, strange habits and unexplained absences make her roommate Jennifer think Linda may be a Communist plant.
* A very large number of real-life weapon systems or tactics can be considered real-life versions of this, from multiple rocket launchers which can fire a large number of either "dumb" or "smart" munitions, to simply clustering a bunch of weapon launchers together or coordinating a large number of missile launches (works doubly best when paired with previous described weapon) or large bombers like the B-52 whose primary mission is to saturate a target area with missiles (back in the Cold War days,
* A very light version in the episode where Chase kisses a 8-year-old cancer patient. (For context, the girl asks Chase to do so since she knows she's likely to die before she'll ever get a proper first kiss, and he complies with a
* A very literal example appears in the short story "The Carnival" by Michael W. Fedo. The rides are designed to kill passengers at random, crews actively bag bodies of dead guests and deliver them to a mass grave, and the estimated chances for survival of guests to the park is a whopping 1 in 8. Considering the story is set in a
* A very literal example of this came from a commercial for a limited-edition variety of Quaker oatmeal. A small party of archaeologists uncover a chest full of a lost treasure made out of the oatmeal, but a kid walks in and eats it all. The archaeologists lament how fast they lost the treasure.
* A Very Long Engagement, famed throughout the rank and file for pulling various tricks in order to keep the troops supplied with food.
* A Very Long Engagement purposely gets shot in the hand in an attempt to get out of the army, losing two fingers in the process.
* A Very Long Engagement: The main character is a young woman who was born on 1 January 1900.
* A Very Long Engagement, the protagonist makes a number of private bets with herself that, should an upcoming event happen in a certain way, she'll take it as a sign to continue her quest to locate her MIA boyfriend.
* A Very Long Rope to the Top of the Sky: Droids are as "alive" as anyone, in everything except automatic reproductive capability, which they don't have. They describe themselves as being alive regularly.
* A Very Long Rope to the Top of the Sky: Emil writes one to Genevieve, in the form of a poem, and asks Ivy for help with what similes to include. Depending on the player's choices, Genevieve can either accept or reject the letter. This divergence persists even after the time-skip, affecting where you'll find Emil and some of the relevant dialogue.
* A Very Long Rope to the Top of the Sky for a Bandit's Coinpurse is "Shut up, it's

a wallet!"
* A Very Long Rope to the Top of the Sky have wings, but they don't actually do anything; in particular, they don't let Lydians fly (by natural means, that is).
* A Very Long Rope to the Top of the Sky: Ivy and Mint are the children of a couple who was prosecuted for being Somnian and Lunarian.
* A Very Long Rope to the Top of the Sky: Lydians (who have wings) and Somnians (who don't). They are definitely biologically compatible, though, as Ivy's and Mint's existences demonstrate.
* A Very Long Rope to the Top of the Sky or the pig arena for their special equipment.
* A Very Long Rope to the Top of the Sky: Solomon, the last member of the previous Lydian society.
* A Very Long Rope to the Top of the Sky: Soul Tears are objects that Ivy can get from certain people that store a kind of memory that the reflecting pond can display.
* A Very Long Rope to the Top of the Sky: The hammer weapons, like the Giant Hammer, and the Thor's Hammer that can be made from it.
* A Very Long Rope to the Top of the Sky, the properties of saecelium are remarkably well-defined: it exists in the "liminal space between realities", and as such is fixed in spacetime relative to other saecelium; it outputs a fixed amount of power for a stable crystal of a given size; and fallout from unstable saecelium has (for the most part) known effects.
* A Very Long Rope to the Top of the Sky: There are bats in the caves that you fight.
* A Very Long Rope to the Top of the Sky: The Tundra works like this. A specific path must be followed to reach the other side, although, every other important landmark can be reached just by walking to the right spot. The Tundra is infinite, except at the bottom, where walking down enough leads back to where exiting to where the player enters the Tundra.
* A Very Long Rope to the Top of the Sky to Ivy, but didn't realize that Ivy was the nice lady giving him directions!
* A very long version happens in in one of the Peter vs. Ernie the Chicken fights. They pause to wonder what they were fighting about, apologize to each other, and Ernie takes Peter to dinner with his wife. Only when both refuse to let the other pick up the check do they continue to fight.
* "A Very Madden 08 Christmas" just so happened to be the 50th episode.
* A Very Muppet Portal Campaign has a one of these between Gonzo and Camilla that plays pretty much exactly with the formula described above.
* A very notable earlier one, of whom Richthofen was a pupil, was Oswald Boelcke.
* A very odd aversion can be seen with the Six Paths of Pain: it gives the user control of six different bodies with their own special powers, but
* A very odd example with Celestia Ludenburg, as she orchestrated the deaths of two people, with the help of an accomplice, just to win Monokuma's ten million dollars
* A very odd variation occurs between Ranjou and Elena, who both want the special status of
* A very oft-mentioned and popular theory by both characters and viewers of
* a very old trope no fewer than three times after his resurrection, showing himself to the disciples — but somehow they don't realize it's him. (John 20:14, 21:4; Luke 24:16). The conversation with the Samaritan woman in Sychar (John 4:1-26) comes close to it as well, with Jesus revealing at the end of the conversation that He is the Messiah for whom she's waiting.
* A very peculiar version of the werewolf is the Galician-Portuguese lobisome(m). Despite its name literally meaning "wolf-man", the lobisomem
* A very persistant rumour is that Azura and Silas were originally planned to be the game's
* A very popular fan theory states that a small portion of Air Nomads and Airbenders managed to escape the Fire Nation genocide and went into hiding somewhere. This theory was confirmed only by a non-canon card game.

* A very popular interpretation of what the Loch Ness Monster looks like. Sometimes, the head and neck are the
* A very popular subject of Celtic folksongs, the best-known being the traditional
* A very popular trope in libertine poetry of the English Restoration.
* A Very Possible Christmas, the Possible family and Shego rescue Ron Stoppable and Drakken when they were stranded near the North Pole due to Drakken's latest scheme backfiring, Drakken invites the Possibles to join him for Christmas dinner. Not that he's gloating or anything, but just because it's Christmas.
* A Very Potter Musical. According to the actress, Malfoy tries to look cool when he enters a scene but fails miserably and just slides to the ground.
* A Very Potter Musical, and claims to know another way to fix everything:
* A Very Potter Musical and its sequel. Floo Powder consists of running in a circle shouting "Floo Powder Power!", while Portkeys are running in a circle shouting "Portkey!" Disapparating involves shouting "Disapparate!" and running offstage while everyone looks confused about where you went.
* A Very Potter Musical does this at some point, but Snape really takes the cake and throws it away in favor of some delicious scenery.
* A Very Potter Musical does this trope quite well. At one point, Ron complains that he hasn't a snack, and the piano player gets up and hands him a pack of Twizzlers.
* A Very Potter Musical ends with a reprise of the same song. The sequel is actually a prequel, so when they're singing "Gotta Get Back to Hogwarts," it's like putting the two ends right in the middle.
* A Very Potter Musical, Harry clearly wonders this of Cho Chang's relationship with Cedric Diggory.
* A Very Potter Musical, Harry tries to convince Voldemort that he regrets his evil deeds, and sad music starts to play...
* A Very Potter Musical has the Sorting Hat (which is a hat, but voiced by a man) in love with the Scarf of Sexual Preference (again: an object, but voiced as male). Scarfy declares Harry to be metrosexual and Ron to be bi-curious.
* A Very Potter Musical, Hermione gives Harry and Ron a wrapped gift that is quite obviously a book, but they think it might be a puppy.
* A Very Potter Musical: "I'm Snape, the traitor. And I'm about to betray someone... right... now!"
* A Very Potter Musical in both plays involves a character {usually Malfoy} being hit in the face by something and repeating this routine a few times before someone tells him to shut up: putting his hands to his nose, taking them away, looking at them in shock,and turning to someone else while constantly repeating "I'm bleeding! Look at this!" in an incredulous tone.
* A Very Potter Musical includes a love triangle between Ron, Hermione, and Draco.
* A Very Potter Musical, indeed. His outfit is actually far more revealing than Bellatrix's (who dresses modestly except for a pretty high slit in her skirt).
* A Very Potter Musical is a duet I Am Song for Quirrell and Voldemort
* A Very Potter Musical is often depicted going around randomly blurting out the word "Find!" He does this exactly once in the trilogy, and the moment is actually pretty easy to miss. He does say "find" a lot, but he generally uses it in actual sentences.
* A Very Potter Musical, joined the show's troupe for the third installment.
* A Very Potter Musical movies as evidence for their respective sides of the argument.
* A Very Potter Musical. Neville starts to stand up to accept the position before Snape snaps at him to sit back down.
* A Very Potter Musical. Once he's reborn you can understand why he wanted to get his body back so much.
* A Very Potter Musical once. However, in the sequel (or really the "prequel," seeing as it's set in the FIRST year of the students at Hogwarts), when Professor Lupin swears, the children cover their ears and gasp until he replaces it with something less obscene.
* A Very Potter Musical one Harry destroyed. Dumbledore had destroyed all the

others before Harry even learned they existed.
* A Very Potter Musical, only one of those fake deaths is actually explained.
* A Very Potter Musical plays with Dumbledore's trust of Snape in this way. In one scene, he accepts a sandwich that has a pipe bomb poorly concealed in it, then gets annoyed when Hermione destroys it.
* A Very Potter Musical, Quirrel and Voldemort start to do this, first running towards each other, and then turning around to join back-to-back (it makes sense if you've seen it).
* A Very Potter Musical, Snape's reaction to Cedric's reaction to Snape's House roll call:
* A Very Potter Musical subverts this in the sequel when Dumbledore is only attracted to Umbridge because he thinks she's a man in drag.
* A Very Potter Musical summon their Patronus. And Malfoy. But the dialogue the Ghostbusters use is used in AVPM as well, though to dicuss why Harry has to compete in the House Cup tournament rather than beam-crossing.
* A Very Potter Musical, the incantations for most spells are like this. For example, the spell to produce an Indian burn is "Indian Burn Hex!"
* A Very Potter Musical, there's "Granger Danger"—a whole song about Ron and Draco's simultaneous Epiphany about their feelings for Hermione.
* A Very Potter Musical. This song was actually the inspiration for the entire play.
* A Very Potter Musical To say "She may be a pain in the ass, but she's my pain in the ass."
* A Very Potter Musical: Towards the climax, five characters come together in the song "Not Alone" and pledge themselves to fight Voldemort together.
* A Very Potter Musical tries to keep Harry from going to Hogsmeade is even more annoying.
* A Very Potter Musical: Umbridge dates Dumbledore briefly in "Sequel".
* A Very Potter Musical uses this quite a bit, ranging from characters talking about things they did while offstage, to Ron accepting a package of Twizzlers from a member of the band, to Voldemort, during the final battle, yelling at the band to change the tone of the background music.
* A Very Potter Musical, Voldemort is played by a shirtless young man in tights.
* A Very Potter Musical, Voldemort suggests giving all of Quirrel's students a B minus on their test results. Because it would be pure evil.
* A Very Potter Musical, when Harry asks Voldemort if there's anyone he's ever truly loved, a soft piano refrain plays as Voldemort thinks of Quirrell. It's a tender moment of character development, up until Voldemort threatens the piano player.
* A Very Potter Musical will often describe an attractive person as "super-mega-foxy-awesome-hot".
* A Very Potter Musical with CLEARLY College aged Darren Criss stating "I'm just a 12-year-old kid".
* A Very Potter Musical, with perpetrators ranging from Molly Weasley to Voldemort himself.
* A Very Potter Musical: "You think killing people might make them like you, but it doesn't. It just makes people dead."
* A Very Potter Senior Year and Hogwarts. The characters agree that while they loved their time at Hogwarts, they can't spend forever dwelling there and have to look forward to what's next.
* A Very Potter Senior Year. It's made even funnier by the fact that Voldemort mimes the whole thing:
* A Very Potter Senior Year, Tom Riddle refers to his diary as a "journal", because "diaries are for girls".
* A Very Potter Senior Year were published by Gilderoy Lockhart, who got Hermione to write "essays" about Harry's real adventures, did some creative editing, and traveled back in time to publish them before the events took place.
* A Very Potter Sequel another — an impressive feat for a stage play.
* A Very Potter Sequel, Dolores Umbridge is an impossibly strong, buff, 6ft+ woman.

Apparently she used to be a "little booger like Hermione", with no self-confidence, but she became incredibly strong through a diet of "protein shakes, falcon eggs, and ROCKS". Presumably the falcon eggs were raw.
* A Very Potter Sequel. Especially when she's accusing Cho of being perfect and after she fires Lupin and Harry tells her to "do your worst".
* A Very Potter Sequel, Harry and Ron call Hermione everything from 'Hermy-One' to 'Hermononucleosis'.
* A Very Potter Sequel, Hermione hugs Ron for the first time while he's holding a broomstick near his crotch. The broomstick pops up seemingly on its own, and Ron adjusts it back down with embarassment.
* A Very Potter Sequel Hermione wishes Ron good luck by hugging him, causing the broomstick in his hand to rise up. He then tries to get on the broom, only for it to hurt.
* A Very Potter Sequel "In case you were wondering, the D stands for my wiener."
* A Very Potter Sequel is going to be sentenced to the Dementor's Kiss, which kills the victim in Starkid's interpretation. She then happily says "and maybe he can say hi to your parents!"
* A Very Potter Sequel — ""It's your Mama Umbridge's job to keep her baby bears safe!" However, she doesn't actually fulfill this role and just embarrasses the girls.
* A Very Potter Sequel parodies this with Ron's love of Red Vines - complete with smiles directly to camera and zooming close-ups, as well as Harry and Ron's friendship being rooted in a mutual love of the things.
* A Very Potter Sequel poster. Also, Harry and Ron are obsessed with Red Vines.
* A Very Potter Sequel, right before they travel back in time, says something along the lines of, "I hope you're all wearing your diapers." After the time travel, Ron asked, "Why did I just shit my pants?"
* A Very Potter Sequel Ron and Harry share Bertie Bott's Every Flavor Beans. Harry winds up with broken computer while Ron gets defeat.
* A Very Potter Sequel, the Death Eater Yaxley is inexplicably given one.
* A Very Potter Sequel to all of his friends, but singles out the also present Draco Malfoy and expresses his disgust towards him one last time.
* A Very Potter Sequel way that the lightbulbs go off and they all suddenly get it.
* A Very Potter Sequel when Ron pulls out his rat Scabbers, Harry starts screaming, only for Ron to join in.
* A Very Potter Sequel. When they first meet him, they mistake him for a homeless bum, to which he loudly insists the he's not (anymore).
* A Very Potter Sequel, where "Voldemort is Going Down" is one of these.
* A very rare example from a non-Klasky-Csupo Nicktoon was at the end of the
* A very rare instance where the character doesn't wet themselves occurred in the
* A very rare variety is mentioned at one point, implying that the manufacturer is marketing to adult collectors as well as children.
* A very rare villainous example can be found in the Daughters of Aku from
* A very real concern in individual life, a psychological phenomenon known as
* A very regular occurrence, usually where the heel will attack his face opponent before a big match to gain the upper hand.
* A very respectable example both for its age and the circumstances surrounding its discovery: the
* A very rich man dies, and demands that he be buried with his entire fortune (9,450,356 dollars and 39 cents). On the day of the funeral, people are surprised to see the normal-sized coffin, and demand an explanation from the widow. She replies that his last wishes were obeyed: His coffin contains a check for 9,450,356 dollars and 39 cents.
* A Very Scary Solstice, two albums of reworked Christmas carols. This includes such classics as "It's Beginning to Look A Lot Like Fishmen" and "Carol of the Old Ones".
* A Very Senior General in the British Army took the passing-out parade for a squad of newly-minted junior officers, who included his own daughter. Knowing her father's dubious sense of humour, she steeled herself for the ordeal. The general

passed down the ranks, commenting and complimenting, attended by the squad's CO and the
* A very serious — and dangerous — example of this trope happened between Buffy and Angel in the comic book, during Season Eight, at the urging of
* A very short take on it with the Flashback to the rest of the Spider-Gang's arrival: a
* A very significant example in real life would be the sun itself. Amazingly, the incredible pressures and temperatures in the sun's core are barely enough to ignite any hydrogen fusion at all (relatively speaking). Taking the total power output of the sun and dividing it by its total volume gives a ridiculously low specific power output of 0.28 watts per cubic metre. As 99% of the sun's power is produced in the inner 10% that forms the core, the peak power production due to nuclear fusion is just 276 watts per cubic metre which is about the same as...
* A very similar case to the above occurred in 2014 at a shooting range in Las Vegas, when a nine-year-old girl was allowed to fire a Mini-Uzi
* A very similar character appeared in the original version of the series under the name Anne, although she only appears in a handful of episodes.
* A very similar example happened on an earlier episode with Martin and Daphne.
* A very similar incident to the above appears in a second-season episode, wherein the doctor hypnotizes Wilma Deering to escape a force field with the same properties.
* A very similar plot plays out in a later episode. The same two officers managed to lose the contact information for a suspect in a burglary that ended up getting official attention. It's revealed that the witness was actually an
* A very similar question is posed in the title of one of the comics in
* A very simple (and small) dart-like rocket with four large fins appears on the top of the 1949
* A very simple vaudeville attraction works this way: You are in a "rotor", and then you get rotated head-over-heels. No, you aren't, it's your surrounding that is rotated, you are completely motionless. But if you fell for it, by now you are probably desperately clenching into your seat for not falling out, creating exactly the force that you'll expect (actio=reactio).
* A very small bit of this was seemingly featured in the Episode "Training Daze" in
* A very small character, and this is a common way to deal with her until she calms down. (She's actually a martial arts expert, but only fights well when she's calm.)
* a very special edition, as a reference to the meme that it gets released on pretty much every system.
* A Very Special Episode from the thirteenth season about the character Mrs. MacGrady getting cancer was dedicated to Leah Ryan, who had a hand in writing the episode. Additionally, the MacGrady character was referred to as Aunt Leah, even though a previous episode had established her first name as Sarah.
* A very specific variant is that, when being chased by an angry rhinoceros of any species, the best situation is not to try and
* A very straight (if particularly layered) example appears in the final stretch of the part, said by
* A very strange and brief derailment of Jenny occurs in Season 2 when she seems to be on the verge of getting together with Nate. Nate writes a letter to Jenny telling her his feelings but Vanessa steals it before Jenny can read it. Jenny, having worked out the general idea of what Vanessa's up to if not the specifics, is persuaded to get her own back and humiliates Vanessa by tricking her into going to a ball in a see-through dress. Despite knowing full well what Vanessa did, Nate abruptly dismisses Jenny, telling her she's not the girl he thought she was, and...gets together with Vanessa instead. When Jenny immediately defends Vanessa to the mean girls, it's
* A very strange depiction of him appears in the point-and-click adventure game
* A very strange example is the episode "Food Chain", the only one where
* A very strange example of this happened when WOUB's Twitter promoted the
* A very subtle example. The Maitlands glide while wearing sheets and "pretending"

to be ghosts. However, when Lydia begins taking pictures of them, they begin to show more normal signs of movement.
* A very subtle name change occurs with "Cadance", who is renamed "Cad
* A Very Supernatural Christmas" the pagan gods recall how people lined up to sacrifice themselves until some "sandal-wearing hippy from Nazareth" showed up.
* A very tall girl standing 188 cm goes to her doctor for advice. She explains that her boyfriend has dwarfism and is only 122 cm tall. Embarrassed, she explains her concerns to the doctor: "Will we... you know... be able to
* A very touchy example was the glorification of all things Africa by black Americans (mostly in the early to mid-nineties), which was particularly odd as most of whom are
* A very tragic example is featured late in Season 5 with none other than
* A very tragic example would be when Helmut Zemo played a surveillance footage
* A very understated, very British, but nonetheless extremely moving moment from
* A very unusual example involves a fetus showing the digitus impudicus during an ultrasound scan that apparently pissed it off.
* A very unusual Russian example are the Old Believers, who were persecuted by the mainstream Russian Orthodox church since mid-17th century and a fair number of whom still live apart from society. Why?
* A very, very small one: Endorsi wears a round badge on her chest in season one. Okay, why not, it doesn't look too weird. But the original had an implicit explanation for that badge, two of them, actually: they could be detached and enlarged to become flying shields.
* A very weird example with the Doctor and River Song, as the gimmick of their relationship is that they're both time travellers who keep meeting in (roughly) reverse order. Therefore, the reveal that they were married only happened when the Doctor chose to marry her, before which she'd already (from her perspective) been married to him for years.
* A very weird variation of this happened with Gregg Alexander, who was the sole member of
* A very well documented urban legend is that the radio show "Uncle Don" had an episode where the announcer forgot to turn off the microphone and accidentally said to the kids watching, "That oughta hold the little bastards!".
* A very well-known series of adverts for PG Tips Tea in Britain involved a group of trained chimpanzees who acted in the roles of a suburban family, with dubbed voices. Despite their popularity, these were axed in the 1990s over fears of animal cruelty allegations. They have since been replaced with the sock monkey (or
* A very wide variety of examples can be found in Douglas Hofstadter's book
* A very young Elijah Wood sings "You Are My Sunshine" to a girl that he has a crush on in
* A very young Tulip is carefully taught about guns; a powerful handgun sends her slamming back into a deep snowdrift.
* Aves family does keep a secret identity, especially from the Riveras. Manny knows Zoe and Black Cuervo separately, and the one time he suspected they were one and the same, she was able to mislead him and make him and Frida look like idiots at the same time.
* "Aves Raras", the Aracuan Bird gives one more straw for a bird building a rather extravagant nest, only for it to collapse.
* Avesta of Black and White actively invokes this trope by having a Commandment that forbids her from ever dodging or blocking attacks made against her, but gives her near complete immortality in return as long as she doesn't do anything to violate it.
* Avesta of Black and White makes it nigh impossible to deal with her otherwise. And it was working fine, but unfortunatley, the battle maniac of the group, Magsarion, arrived and decided to attack her, shattering her and thus triggering her regeneration and undoing what had been done.
* A vestige of this persists to this day, in the form of chocolate cigars wrapped in
* Aveyond as the bickering one. This can be easily observed from their attraction

events. Ean and Iya's relationship develop by Ean giving gifts to Iya and generally being nice to her. Rye and Emma's develop when one of them lose a bet and must fulfill 5 commands of the winner's choosing, and this generally involve them trying to humiliate the other.
* Aveyond. But if she doesn't have enough attraction points (at least 5) with either one of them, all three will find their love in other places.
* Aveyond. Except once where two feuding witches repeatedly curse each other and one "curses" the other with unending beauty. She's still quite evil, though.
* Aveyond has Rhen return to Veldarah after her epic journey to become a teacher in Shadwood Academy, only to find that no-one was even aware of the perils she just saved the world from, an she spent her early period of her Ahriman-free life as an unpopular assistant teacher whom the students and her superior think very little of.
* Aveyond involves a mystery box challenge, where the box was described as being a "very boxy box. Very, exceedingly, box."
* Aveyond, in which Rhen was pressured to claim the throne of Thais and marry Dameon, but had second thoughts at the last minute and left the country just before her wedding.
* Aveyond priestess who loves "all children of the goddess" (basically everyone), and her "love" counts enough to reverse the curse.
* Aveyond, Rhen ends up with Lars despite initially agreeing to marry Dameon. The story ends with Dameon getting over Rhen and marrying an OC named Serina.
* Aveyond that's just choosing and wooing a bride for male lead Edward. It's also an in-universe Last-Minute Hookup; he has until the end of the day to choose his bride, or his mother will choose one for him. Earlier games in the series tended to play this straight for the main couple and avert it with side couples, who could get married at any point in the quest as long as the conditions were met.
* Avez-Vous Déjà Vu ?...) definitely fall under this trope. An example involves three houses that play a game to see how far they can spit their inhabitants out. One of them launches a guy through the chimney, who then lands right onto the road. The poor dude is run over by a bus, after which the house happily says "Yay, a bus! That's 1000 points!".
* AVGN. i.e.: He curses too much, he doesn't curse enough, the videos are too short now, the videos are too long now, he milks the AVGN persona too much, he keeps making things other than AVGN, there's too many poop jokes, there's not as many poop jokes as there used to be. And 99% percent of them are unable to pin down any specific reason why his videos suck now, often within their own lists of criticism, and begging him to "not suck anymore" for exceptionally vague reasons (if reasons are ever listed).
* AVGN", the Nostalgia Critic tries pulling this on the Nerd. It fails.
* AVGN vs. LJN is a fan-made feature film compiling all of the Nerd's LJN reviews up to November 2014, mixing the old reviews with the Re-Revisited episodes.
* Avialae and helps him keep them a secret from others — and keeps on being just as supportive and understanding of him as a couple even when Gannet starts to fear that his inability to lead a normal life may be holding Bailey back from leading a normal life himself.
* Avialae and helps keep them a secret from his family and schoolmates.
* Avialae. Bailey is his kind, patient neighbor who's never been in a relationship or had sex before and geeks out over everything bird-related. Each of them end up being exactly what the other needs.
* Avialae being too tight. Bailey has to cut them open for him to regain consciousness, and subsequently avoids him for three weeks afterwards out of guilt/sheer awkwardness.
* Avialae is drawn with brown skin in color illustrations, but his ethnicity hasn't been brought up once in 200+ comic pages. His last name, Gilbert, does nothing to narrow down the possible ethnicities for him and the artstyle makes his facial features look very similar to pale-skinned Gannet's in the black-and-white pages.
* Avialae relationship, and Gannet eventually admits that he does love Bailey after several chapters of being unable to get the words out.

* Avialae viewed love and relationships as too messy to deal with due to seeing his parents' and uncle's relationships fall apart and was content to just sleep around as much as possible. Until he met Bailey and realized that he wanted to do the actual work of maintaining a relationship for the first time in his life.
* Avian Flute: The use of flutes and piccolos in imitation of birdsong.
* aviansie and is often aligned with the element of air. The clan citadels are also introduced by having large chuck of rocks falling from the sky.
* Avians were granted advanced technology by unknown aliens, but the full understanding is solely in the hands of the Stargazers (their high priests), as is the only supply of the Avolite crystals said technology depends on, thus ensuring that the priesthood remains in power.
* Aviary Attorney and sends him on his way, saying after he leaves that he'll be lucky to get down the street.
* Aviary Attorney at the end of Act 3, and thus enter Act 4B "Égalité", where the revolution becomes (relatively) peaceful.
* Aviary Attorney but is at least on the amusing side of contemptible.
* Aviary Attorney can get you one really nice gun for a ridiculous amount of money, a large number of mediocre guns for a ridiculous amount of money, or will sell out the rebels depending on him for a ridiculous amount of money.
* Aviary Attorney claims that due to the highly irregular way this was discovered in the courtroom, nothing is admissible and she's free to go. Subverted as the defense attorney immediately knows that's a lie, but the prosecutor is more interested in justice and extenuating circumstances than throwing people in jail.
* Aviary Attorney doesn't wind up very important. Most notable is the literal red herring, labelled "This is a red herring" in the inventory.
* Aviary Attorney instead. In the game, one character tells you the following:
* Aviary Attorney is penguin-headed and, appropriately, small and rather penguin-shaped.
* Aviary Attorney poisonous that a character who eats the wrapping which has traces of chocolate on it is hospitalized.
* Aviary Attorney takes the prosecutor, jury, executioner role with a suspected murderer, though a persuasive and quick-thinking Jayjay Falcon, playing the defense, can get her to consider carefully. The Second Republic she wants to build should be a just place, after all.
* Aviary Attorney to a tragic degree, and doesn't bother hiding his disdain for the more excitable, less-polished Falcon.
* Aviary Attorney version thereof), and includes some of the events of the February Revolution.
* Aviators, especially in larger and more complicated aircraft, have checklists for all manner of things, which can often specify minute details like which setting to leave a specific switch in. This will include fairly obvious things like making sure the engines are on or that the landing gear is in the desired position. Of course, the reason they do this is because planes have crashed in the past due to missing both minor details and major obvious ones, like the status of engines and landing gear. When it comes down to it, flying is a very complicated process, even for experienced pilots.
* Aviators song "Bulletproof" is all about this: "You can shoot me down, but you're never gonna hide the truth / 'Cause words are bulletproof."
* A vicar motions two gravediggers to get out of a grave they're digging. They do so, and then several others get out: 6 more gravediggers, two miners, two men in uniform (possibly escaping prisoners), a police dog and its handler, and a surfboarder. Watch it on
* Avicebron's ultimate golem, Golem Keter Malkuth (also known as "Adam"), projects a Reality Marble called "Paradise" that protects it from all harm so long as its feet remain firmly planted on the ground.
* Avicii considered a two-hit wonder, "Levels" is usually cited as the second hit), but he was a huge name in the electronic scene.
* Avicii had two top 40 hits in America. One, of course, was his signature smash "Wake Me Up!" The other was "Levels", right? Wrong; it was "Hey Brother," which was

forgotten immediately after it fell off the charts and gets far less airplay as a recurrent than "Levels" despite the latter getting relatively little airplay upon its release.
* Avicii is one of the biggest EDM names in the world, but mainstream audiences will be hard-pressed to name a song of his that isn't "Wake Me Up!", with "Levels" being a
* a vicious expression with nowhere to hide" problem by casting Extended Greater Invisibility on her.
* A victim almost always gives complete and accurate information, even though in
* A victim in a later season had cauliflower ear due to having been a wrestler.
* a video, arguing that their attempts to suppress footage of the game, ostensibly for the purpose of avoiding spoilers, had just encouraged fans to leak footage and major spoilers all over the Internet in retaliation.
* a video as a romantic comedy, Tyrion's short-lived marriage to a prostitute is alluded to using this trope.
* A video called What Is Love has the narrator try and identify love as fruit. Then bread. Then fruit AND bread.
* A video clip from Pink for the song "So What" has her dealing with this post-breakup by chainsawing down the tree.
* A video depicts a family making homemade Minion-themed Twinkies. The video refers to the movie as a Disney movie, when it’s really an Illumination film.
* a video for a demo disc at a fancy restaurant. The video ends with the notice that PS2s are not edible and that this shouldn't be tried at home.
* a video game about gardening without hearing "Well I'll show them. I'll SHOW THEM ALL!"
* A video game junkie learns how (dangerously) exciting reading can be in "The Tale of the Bookish Baby-sitter."
* A video hosted shows multiple newcasters saying the same words to promote the holidays' consumerism, "It's okay, you can admit it if you've bought an item or two or ten for yourself".
* a video in late 2017, with the scandal itself being referred to as "Burger King Foot Lettuce".
* A video of a golden eagle attempting to snatch a child from a Montreal park views in a little over 24 hours.
* A video of Sue Sylvester jazzercizing is uploaded to YouTube and becomes so popular that it leads to a duet with Olivia Newton-John.
* A video of the French Peas illegally recording the film for their cousin Josephine, found next to the "Spanish Outtakes" option.
* A video on GSN's "Caroline & Friends" showed a man on a spring teeter-totter lean too far back, fall off, and suffer a
* A video on Zipcar's website starts to explain how a rented car's keyless locks work, then gives up: "it sends a signal... to wizards."
* a video playthrough of the 98% complete beta available to view, enabling you to see the interesting story that the creators constructed.
* A video proposed that a future elimination method might also be driving the rival to murder, and showed as an example Kokona being manipulated by Yandere-chan into kidnapping Musume, then Kokona snapping and taking a baseball bat to Musume's head after Musume had the nerve to laugh at Kokona for having to do
* A Vidiian scientist attempts to do this, but fails spectacularly. Because Vidiians suffer from a
* Aviendha is subject to this type of punishment by the Wise Ones for much of book twelve of
* A Viennese song, "Heidschi Bumm-Beidschi", is often sung as a Christmas carol. Its origins lie in the Turk siege of Vienna, and "Heidschi Bumm-Beidschi" refers to Turk skirmishers who took children as slaves to be raised as soldiers. So it was a creepy nursery tune to begin with.
* A view expressed many times in the show's run by a wide variety of alien races. To the Sontarans, Earth is another front to win in their war against the Rutans. To the Cybermen, Earth is another planet to harvest stock from. To the Daleks, Earth

has just gotta go. The only reason it's still in existence is because the Doctor happens to be fond of it.
* A View from the Bridge, Eddie Carbone's Fatal Flaw is his unrealized love for his niece, Catherine.
* A View From the Bridge. However, Eddie Carbone cannot admit to himself or anyone else that he has romantic feelings towards Catherine, his wife's sister's daughter. Every time someone hints he might have "too much love" for Catherine, he says he isn't that kind of person. Tragedy results.
* A View from the Bridge the main character is in love with his niece, whom he raises as a daughter, but he can't even admit this to himself.
* A View From The Gallery" had Garibaldi and Captain Lochley having a heated plot-specific discussion about the episode's conflict, all while lowly technicians Bo and Mack quietly stand in the elevator and try to stay out from between them.
* "A View from the Gallery" has the crew and inhabitants of the titular station holding up against an alien attack until the cavalry, in the form of the White Star fleet, arrives.
* "A View From The Gallery", which follows two random maintenance personnel
* "A View Through The Window" has a farm surrounded by an impenetrable forcefield materialize in the desert. The military investigates, and finds that the farmers inside cannot see or hear them, while they can only see and not hear them. One soldier, depressed by the loss of his family, observes the farmers and begins to fall in love with a lovely woman among them who seems to be as sad and lonely as he is. The soldier notices that the forcefield goes down for brief periods at a time. Eventually, when the forcefield goes down, the soldier jumps into the farm, deciding there is nothing left for him in his original world and wanting to be with the woman. The inhabitants immediately transform into hideous monsters and tear him to pieces. His horrified comrades try to save him, but the forcefield goes back up before they can. The monsters then start testing the forcefield, waiting for it to go down again so they can escape to the outside world.
* A View to a Kill. A scheme by Max Zorin of systematic doping in thoroughbred horse racing → A scheme by Max Zorin aimed at destroying Silicon Valley (though these two plot points don't directly connect)
* A View to a Kill at one point poses as a Financial Times reporter named "James Stock."
* A View to a Kill, Bond and Tibbett suspect that Max Zorin has their hotel room bugged, thus they put on a tape of them talking. Later, as they're snooping at night, they put another tape of snoring sounds to cover.
* A View to a Kill, commenting how his principles on horse breeding can be also applied to create the "ideal" human. In fact, he did indeed created a generation of extremely intelligent psychopaths, Zorin being one of them. This isn't surprising, as the real Nazis also believed (and attempted) that.
* A View to a Kill: During the final fight at the top of the Golden Gate Bridge, Max Zorin famously grabs a nearby axe and attacks the heroes in a last attempt to kill Bond and Stacy.
* A View to a Kill, except with horse racing instead of canasta and golf, Silicon Valley instead of Fort Knox, and a KGB operative gone rogue instead of an officially-sanctioned Red Chinese plot.
* A View to a Kill for the Nazis during World War II. His thinking regarding selective breeding has shades of Social Darwinism, commenting on how his principles on horse breeding can also be applied to create the "ideal" human. In fact, he did indeed create a generation of extremely intelligent psychopaths, Zorin being one of them. This is not surprising, as the real Nazis also believed (and attempted) that.
* A View to a Kill for the Nazis. The few babies that survived grew to become extraordinarily gifted — but also totally sociopathic.
* A View to a Kill, he had sunglasses that allowed him to see through polarised glass. It's the shades that are polarised — they just cut out reflections and allow him to see what's going on inside.
* A View to a Kill in Zorin's pay, who had recently fired her. Zorin kills the guy and forces the pair into an elevator before setting the building on fire, making it

look like they were responsible but were killed by the flames trying to escape.
* A View to a Kill is one disturbing example of how the steroids have corroded his mind.
* A View to a Kill is to detonate explosives along the Hayward and San Andreas Faults, causing them to flood. The other major bomb was set to destroy a "geological lock" that's in place to prevent the two faults from moving, causing a double earthquake that would destroy Silicon Valley, leaving his microchip company with a monopoly.
* A View to a Kill, James Bond uses Stacey's shotgun to dispatch some mooks, who then get up right after. When Bond asks Stacey what the shotgun was loaded with, she responds with "Rock Salt". Cue Bond saying the trope word for word.
* A View to a Kill knocks the police chief over by opening a valve on the fire engine, blasting him with a high-pressure jet of water; allowing him and Stacy to escape in the confusion.
* A View to a Kill, Max Zorin's genetically modified racehorses have nothing to do with the plot and serve only as an excuse to get Bond involved in Zorin's business.
* A View to a Kill pulls ahead. However, when Bond decides he's had enough and abandons the race, Zorin declares himself the winner.
* A View to a Kill: There's a very good cat scare when Bond is creeping up the broad stairway of Stacey's house.
* A View to a Kill: When Zorin dismisses his relationship with KGB to pursue his own business interests, the officers warn him that no one leaves the KGB, ever.
* A View to a Kill with Bond, but because he's not wearing a hard hat as required.
* A village in Norway is called "Hell" (meaning "luck" or an archaic word for a specific rock formation, pronounciation is the same as in English). Most of Norway being bilingual, the locals have great fun with it. The effect is slightly lessened by a large number of locations in English-speaking countries also named Hell.
* A villain called the Thousand worked out that the radioactive spider that bit Peter Parker was the source of Spidey's powers, and
* A villain from the first season suffered a full-body burn at the hands of Lina Inverse. He never bothers to remove the bandages (which make him look like a
* A villain gains a power that will only work for a hero, or vice versa.
* A villain has a disintegration weapon that's capable of hurting Superman but they aren't positive they can kill him while using it. To ensure Superman is weakened, they make a catastrophe in an underground missile silo so that while using his powers he doesn't have a backup charge. Superman wins when Lois shorts out the silo door controls, opening them so he could recharge.
* A Villain Named Khan, that will surely invoke a fearsome reputation.
* A Villain Named "Z__rg": A sci-fi villain named "Zrg" or a variation.
* A Villain Named "Z__rg": The bad guy's name contains "Zrg" or some variation thereof.
* A villainous attempt to build one is a running plot for much of the second season of
* A villainous counterpart of Captain America, the Iron Cross, also counts for this trope, as he fought for Germany in WWII for precisely these reasons.
* a villainous example, as Baratheon forces are about to overwhelm King's Landing, Cersei is at the point of killing both herself and Tommen to avoid capture, when a joint Lannister-Tyrell army sweep in from behind and rout Stannis' army..
* A villainous example comes in the form of Jark Sentai Goindaver, from
* A villainous example in Undead mission 8, "Under the Burning Sky." As the human survivors of the Scourge attack on Dalaran throw the last of their forces against Arthas and Kel'Thuzad, the latter completes the summoning of Archimonde, who proceeds to lay waste to the human forces and raze their city for good measure.
* A villainous example occurs with Darla Dimple and her manservent Max in
* A villainous example occurs with Odd Todd, who seems to serve as a mastermind leader for the villains in town if episodes like "Undercover Olive" are any indication. In Season 2, the Shapeshifter, who appeared to serve as
* A villainous example: Trickster, the leader of the Travelers, is incredibly devoted to his girlfriend, Noelle,

* A villainous example with the Fall of Cadia in the new 13th Black Crusade. Abbadon may have FINALLY defeated the defenders of Cadia (including his
* A villainous — and all the more significant for it — example occurs in A_J of
* A villainous one for Anubis showing back up after several thousand years of exile, all semi-ascended, and handing the rest of the System Lords their collective asses.
* A villainous pre-2000s example is the African island nation of Genosah, which has compensated for the barren worthlessness of its actual island by literally enslaving its mutant population to use their powers "
* A villainous twist on the trope in "The Sky Man" sees a group of desperate, sick, and starving farmers trying to rob
* A villain sure is evil, but has a clear goal and does evil acts only to achieve it, but later, becomes much more evil and starts
* A Villain Team-Up of Accords is mentioned as having fought and been defeated by the Discord Continuum offscreen.
* A villain version happens with the introduction of the Trio. "Life Serial" has them ostensibly testing Buffy for weaknesses, when they're actually demonstrating their skills (and personalities) to the audience (Warren's skill is technology, Andrew's is demon summoning, and Jonathan's is magic).
* a villain who goes from being a simple minded man-eating monster to the closest thing to a god at that point at the time and he was also stronger than Goku at the time. In fact, he is this until Gohan kills him.
* A Vine involves a Del Taco with the letters on "Fresh Avocado" being spaced oddly, leading to
* A vine variant also appears with Lovecraft's partner, John Steinbeck, though he tends to use his vines for restraint more than for combat.
* A viral social media post relates a "traditional" Chinese test of values posed to a toddler in the form of trinkets: to choose between wealth (a coin), pleasure (a toy), and knowledge (a picture book). In the described incident, the toddler
* Avirama doesn't wear a shirt, or anything else on his upper body for that matter, save for a pair of detached sleeves.
* a virgin sacrificed." Damascus Steel, in particular, has turned out to follow Clarke's Law surprisingly closely. We have now reproduced a superior version of Damascus Steel with the mystical 'carbon nanotube'.
* A virtually identical case happened with a farmer named Shai Dromi in Israel (killed one burglar, wounded another, but unlike Martin he was acquitted of all charges other than possession of an illegal weapon). The public uproar led to a castle law being passed (i.e. allowing a person to use deadly force in defence of their home).
* A virtual reality adventure gone out of control provides the basis of the plot of Dennis L. McKiernan's novel
* A Virtual Reality game like this was at Segaworld in London's Trocadero c. 1999.
* A virtual version of this is fake event Pokémon, ever since someone figured out how to create their own mons and inject them into the game. Sometimes, these can be spotted by things like an incorrect or missing ribbon, perfect 6ivs, or mistakes in the met location, game, date, etc. Events obtained from a Power Saves or Cyber Saves device are identifiable by always being generated with the same date on the fake wondercard. Others, though, are very good, and can only be spotted by dumping the file and checking the SID (Secret ID) to see if it's correct, incorrect or missing (although some events in earlier generations never had SIDs to begin with).
* A Virus Named TOM has the titular character, a computer virus, dwelling in cyberspace.
* A virus spreads through the world in one sci-fi story that causes women to spontaneously abort with the only cure being the women having to consume a diet containing a rare fruit for the duration they want to get pregnant and have a child. It's not a real cure as they'll promptly reinfect as soon as they stop eating. The kicker? It was created and released by the scientist who 'discovered'

the cure because he didn't want there to be anymore unwanted children in the world.
* A VISA commercial from the 2016 Olympics features athletic married couple Ashton Eaton and Brianne Theisan-Eaton boasting to each other of who wakes up first, who gets their shoes tied first, and who starts crying during a movie first. The commercial ends with her telling him to hang up, but she needs only one, "No, you hang up" from him before she does so first, at which point he grins and says he should've seen that coming.
* A Visa commercial had NBA star Yao Ming attempting to make a purchase at the "Big Apple Souvenir Shop":
* Avi's cousin Doug the Head is a subversion. He works at a jeweler's shop that inspects stolen gemstones, but he's not greedy, more
* A Visit from the Goon Squad, which shifts the perspective of the narration in every chapter, uses this for chapter 10.
* A visiting surgeon named Russell Vaughn in the episode "Our Dear Leaders" is also this. Having traveled the world and done many amazing things, Russell is a skilled surgeon and a cultured individual. He also comes off as a remarkable douche, constantly interjecting with stories of his travels and even condescendingly offering to let Turk, Sacred Hearts' Head of Surgery and a highly competent doctor in his own right, help out with a tricky surgery as 'a feather in [his] cap.'
* A visitor to the Best Brains offices during the production of the last few episodes of
* A visual and unintentional example due to unfortunate sign placement, where
* A visual variant is with ever-suffering Principal Weatherbee and his file cabinets: students' files are all neatly arranged and alphabetized, but there's an entire cabinet dedicated to Archie alone.
* Avitus. Eliphas is alive as well, but it's implied he still died and found a way to come Back from the Dead
* Avitus. One of the reasons for this is another IPOS: Neverending Hail of Destruction. This godly Heavy Bolter can do ungodly amounts of damage to almost everyone (except against Monstrous Creatures or vehicles, for which the punishment is reduced, but your team will have other stuff to counter these problems anyway). If you bring it to the final battle and turn on Focus Fire frequently, Avitus can basically hold a section of the line on his own. You can't use it while wearing Terminator Armor, however.
* Avocados are infamous for not keeping well and thus being hellishly expensive outside of avocado-producing regions. This is primarily the circum-Caribbean region to which avocados are indigenous (particularly Mexico, though the Dominican Republic, Colombia, and Florida put in a good showing) plus neighboring regions (like California) and a few random places that happen to have good climates for it (the most significant for the export market being Peru,
* Avocato. Darkly enough, Invictus exploits Avocato's weak spots for Little Cato to make him go psycho when Invictus possesses him.
* A Voice Among the Strangers, is from Ebony's point of view and begins some time before the first story. As such, it does not attempt to keep the secret.
* A Voice Among the Strangers, Jessica and Ebony start one with Aurora Blossom, which quickly draws in Rainbow Dash, Pinkie Pie, Twilight Sparkle, Spike and Luna. It resumes several times over the course of the fic.
* A Voice Among the Strangers: Jessica's arrival in Equestria coincides with a series of inconsistent rumours of an unfamiliar monster around Fillydelphia. She is promptly captured, caged and put in a monster sideshow as the "Foal-Hunter", and the nickname takes a long to shake off, even after she's escaped and proven that she's sapient and not a threat to them.
* A Voice Among the Strangers: Made Manifest, a Canterlot noble who is on good terms with the Princesses for precisely this reason — he tells Luna that their plan to bring Jessica to the castle in hopes of provoking the Changelings is "a bloody stupid idea," but notes that he would have said the same about Celestia's plan for Nightmare Moon if he'd been aware of it.
* A Voice Among the Strangers. This time it happens off-screen between Spike and

Owlowicious, with Spike only realizing later that he fell into the same trap as always. This one is noteworthy because it happens in a story where the Equestrian language explicitly sounds nothing like English.
* A Voice Among the Strangers' token human is Jessica, a Filipino mix that got sucked into Equestria by a book. She also doesn't understand the language at first.
* A Voice Among the Strangers, when Twilight looks at Jessica's x-ray, she briefly compares it to a diamond dog's before deciding it looks nothing like one.
* A Voice for Vorthos, is dedicated to answering questions about MTG's lore and flavor.
* A Voice in the Wilderness around the battlefield, and proves a very relevant question in the later Iconian War.
* A Voice in the Wilderness, becoming the first Borg Queen, One of One. The present-day Queen happened later, after the surviving Preservers managed to capture and imprison One of One's central processor.
* A Voice in the Wilderness, Eleya wants to blow away an apparently abandoned Borg installation from orbit just to be safe, but Biri convinces her to hold fire so they can send away teams to investigate and possibly learn something useful.
* Avoidance, 28-year-old Jeremy works as assistant director of a boys' summer camp where there is a strong emphasis on men mentoring boys. Jeremy agonises over his sudden attraction to 14-year-old Max, one of his charges. Turns out that Jeremy's own former mentor Ruff and the camp director Charlie both have similar predilections, but unlike Jeremy have used the mentor role to coerce boys into sex. Things are complicated by Jeremy's recollection that when he was 14, he desired the 50-something Ruff. There's a backstory in which, a few years ago, Jeremy had a friendship with a 13-year-old boy to whom he seems to have been subconsciously attracted.
* avoidance technique, in a ship that not only is half as fast as the missile, but marginally less maneuverable to boot.
* Avoidance There's a backstory in which, a few years ago, Jeremy had a friendship with a 13-year-old boy to whom he seems to have been subconsciously attracted.
* avoid attacking him. It can be actively difficult to make Catherine the one to make good on her threat.
* avoid becoming one of these by actively choosing not to steal or murder indiscriminately.
* A Void by Perec, a book written without the letter 'e', the two numbers are 26 and (always referring to the fifth out of all the 26 things being missing) the other is 25. (Meta: referring to the missing 'e'. Which really only works in the original French because there's no 'e' in 'vingt' (twenty in French).)
* avoided as backlash used in the last war fought on Earth. Some of their descendants are still around.
* Avoided at least four times: first when Honor is commanding her squadron of
* Avoided at the end. Except for Tsubame, the girls never gave up on him, and somehow Maeda gathered an even bigger harem with girls all over the world.
* Avoided by retcon for the Klingon homeworld whose spelling was changed from "Kronos" to "Qo'noS" to imply that it just happens to sound similar to the child-eating titan from Earth mythology.
* Avoided entirely with Troi because her empathetic suggestions were universally uselessly vague. (e.g. "Troi, can you tell why they might be shooting laser death missiles at us?" "I sense... Pain. Pain... and anger.")
* Avoided fighter fire in one of the few justifiable examples of the latter trope.
* Avoided in "Inferno" book 3 of the Millennium trilogy. Due to being in a different pocket of time than
* Avoided in the case of Eric Northman's family. Despite being cold-hearted, Eric
* Avoided in the French MP3 saga "Adoprixtoxis". After leaving the planet about to be destroyed on an escape pod, the characters ask the spacecraft computer to search for close worlds to land. The computer retrieve only 1 hit: the planet they just left
* avoided's "As Told By Emoji" web series, which takes various Disney movies and retells them in short videos that use emojis and emoji-style animation in a phone-

related environment. While the concept sounds like an obvious attempt to pander to a smartphone-addicted generation of children and teenagers, the series has been incredibly well-received for being adorable, hilarious and a refreshing take on Disney movies old and new, with many YouTube commenters eager to see more and requesting their favorite movies in the comments.
* avoid form, and while he avoided digesting (!) the occupants (leaving them naked and in shock, but alive), he later mentioned that it took a lot of willpower not to.
* avoid friendly fire on the battlefield, and then being demobilized once seen as unneeded.
* A Void has a lot of long lists, usually just to show off what words can be included that don't have the letter "e".
* Avoiding Dangling Modifiers: Make sense a subject-less phrase used to describe what is going on matches the subject if necessary.
* Avoiding legal disputes. It doesn't matter who came first; two things sharing the same name has the potential to get thorny. If one creator is significantly smaller than the other, renaming their character may be a lot less of a hassle than fighting it out.
* Avoiding one is the main motivation for Alys Boleyn's actions in the early story of
* avoiding saying their given name, Zidane and Tidus respectively, are often pronounced incorrectly. The former is "Zih-DAHN" like the footballer; the latter is "Tee-dus".
* Avoiding this is apparently the reasons certain sects of certain religions insist on their women dressing in a conservative manner.
* Avoiding this is the advertised purpose of jumbo sized remote controls too big to hold in ones hands.
* Avoiding this is the purpose of Granny Weatherwax's "I aten't ded" sign. When she 'borrows' an animal
* Avoiding this with the Saturn V and later the Space Shuttle is why NASA's launch structures have massive water sprayers built into them. The Shuttle saw the addition of more water sprayers to the launch pad to deaden reflected sound waves that could damage the shuttle.
* Avoiding thorny associations with the newer name-user, especially if they are controversial, too adult for your family-friendly character, or (in the case of real people) well-known political figures. If the notoriety is recent, this is a method of
* A Void, its Gallic original) leaves out the letter E, and also has well received translations in most other European languages.
* Avoid the Dreaded G Rating: A movie includes some profanity or another minor instance of mature content simply to keep the movie from being rated G.
* Avoid the Dreaded G Rating, instead embracing it. How many cartoons would teach the kids about drug smuggling?
* Avoid the Dreaded G Rating"). Since this would cut into profits by scaring off parts of the potential audience, it needs to be avoided.
* Avoid the Noid is an advertisement for Domino's Pizza, as such the game is completed in 30 minutes (with a simple game over if you run out of time). In this game, the timer starts when the truck is already there rather than having to drive to the location, but there's various noids that try to destroy the pizza. Also, in the case of the Commodore 64's ending, it's implied that it's a type of job interview as reaching the top means you're good enough to be a delivery person.
* avoid the top 25. At roughly the same juncture that they'd received the #19 ranking the previous year, they were again 12-2 but missed out on the top 25, and then ran into the best team in the conference, followed by suffering an upset loss. They pulled a big upset the following week, but then ran into the top two teams and suffered two more losses, dropping to 13-6...and then started rolling. By the end of the regular season, they were 22-8 and had neatly managed to avoid ever actually reaching the top 25, allowing them to take down the Big East Tournament. This gave them their first top 25 appearance of the season... so, of course, they lost in the

first round of the NCAA Tournament.
* avoid this entirely the character, banking on the idea you were interested in the side characters in the first place and the writers aren't going to waste time on a boring lead.
* avoid this is the news channel 11 Alive (branding of NBC affiliate WXIA), which has revamped its image to only show positive news stories.
* avoid to succeed in his plans, villain vs villain conflicts tend to be "a toss-up", in his words.
* "avoision", though he's not using it right (he uses it as a synonym for "evasion", but it refers to legally ambiguous ways of getting out of paying taxes).
* Avolakias, a type of aberration resembling tentacled wormlike monsters, greatly dislike the taste of either living or dead meat and are instead eager predators of the undead — zombie flesh is their favorite food.
* A Volkswagen ad featuring "Young at Heart" by The Bluebells got that song to No. 1 in 1993.
* A Volkswagen ad shows them returning to the video store, where people are watching it; the woman's voice (in the video) is asking, "We're going to erase this later, aren't we?"
* A Volkswagen ad to the video store. The ad then touts the car's anti-lock brakes.
* A Volkswagen commercial for the New Beetle convertible has a variation: A man wearing a black ski mask walks into a convenience store, takes an armful of snacks, pays for them, leaves, to be told by his friends - also wearing ski masks - in their (top down) New Beetle convertible that he left his mask on. He tells his friends they should probably go.
* A Volkswagen commercial has someone debating about buying a car, only to have his future self (wearing nifty
* A Volkswagen promotion, titled "Sign And Drive" (implying that it's very easy to lease or buy one of their cars) had a guy attempting to fill out the dealer paperwork
* A Voluntary Coincidence, in addition to being a double A-side with "Voices" from said album, was B-sided by "Teargas", which is one of their few songs to not be included on an album or EP.
* A Vonage ad shows a couple complaining about how their phone company's fees are robbing them blind, while a bunch of black-clad and domino-masked thieves carry off their possessions.
* A Vonage commercial showed a couple discussing how their current phone company's fees are robbing them blind, while
* Avon and Vila are accidentally swap-ported into a vaultful of banknotes in the
* Avon Barksdale, the kingpin of the Barksdale drug empire, managed to be a hardcore criminal from at least his early teens into adulthood without ever going to prison, but is finally busted at the end of Season 1. When he gets out in Season 3 he voices his determination to never go back.
* Avon comes forward and "accuses" Tilghman of the crime. Tilghman gets arrested when drugs are found in his car that corroborate Avon's "story", and Avon's first parole hearing is moved up as per the deal proposed by Maurice Levy with the prison officials.
* Avon deal Avon is tempted, but wisely refuses an alliance with someone whose only loyalty is to herself.
* A Voyage to Arcturus: The planet Tormance has two suns. The natives of Tormance can see the unique radiation emitted from the suns that humans can't, in colours like "jale" and "ulfire".
* AVP: Alien vs. Predator, and the antique flintlock from the 1600's, kept as a trophy and given as a gift.
* AVP: Alien vs. Predator, at one point one of the Predators has a chance to kill Charles Bishop Weyland, but instead turns away, due to Charles' terminal illness meaning that he's not a threat and thus not worth killing. Charles gets offended at being ignored (and is desperately trying to stall the creature in an effort to help two others get away) and fires a makeshift flamethrower at the Predator. The Predator then kills him, either having re-evaluated him as a legitimate threat or

simply being pissed off at having been set on fire.
* AVP: Alien vs. Predator, but in the wake of this new film, their canon it difficult to determine.
* AVP: Alien vs. Predator, easily one of the better moments in the film:
* AVP: Alien vs. Predator: Everyone but Alexa Woods are killed, leaving her alone with the last remaining aliens and the last predator; ultimately she is left to fight the Queen alongside the last predator who is slowly dying from his wounds. She's also the rare non-white Final Girl; her actress Sanaa Lathan is African-American.
* AVP: Alien vs. Predator has the pyramid filled with hieroglyphs which include the details on how the ancient civilization ended. One wonders who was around to add those details, since all of the humans were dead and the Predators apparently abandoned it for thousands of years.
* AVP: Alien vs. Predator is probably the most famous film case of development hell. It was finally released in 2004 after more than a decade of different scripts, changes to the cast, false starts, orphaned tie-ins, several series of video games, and even promotions of the believed-to-be-coming-soon movie.
* AVP: Alien vs. Predator movie. They uplifted humans just so they could use us as bait in a planet-sized game preserve. When the aliens overwhelmed them (purely because the predators handicapped themselves to increase the challenge rating) they detonated a nuclear weapon and wiped out a whole human civilization.
* AVP: Alien vs. Predator, one predator, upon being ignited via an improvised flamethrower, kills the human wielding it but does not otherwise react to being on fire.
* AVP: Alien vs. Predator scare early on (before the characters even know "there's something out there").
* AVP: Alien vs. Predator's director's commentary, the director said that originally only one character was to wear goggles on his head. The other cast members thought it looked cool, so they all wore goggles on their head... which meant they had to be fogged up so they wouldn't reflect the cameras.
* AVP: Alien vs. Predator shows the Xenomorphs can work around predator setups just as well as human rigs. When the queen realized she couldn't get out of the shackles, she called back all of her offspring and ordered them to attack her so that her blood would corrode the shackles and free her.
* AVP: Alien vs. Predator (such as the one necessary to build said pyramids).
* AVP: Alien vs. Predator the credits rolled, but I guess we can just assume it happened afterward. Unless, and this is not shown, she quickly uses the vehicle nearby and finds her way to the boat that brought them there which is still afloat with a live crew to drive it.
* AVP: Alien vs. Predator. The last surviving Predator gives the last surviving human an honor mark (apparently) for killing an Alien with a spear. When the other Predators come to pick up the hunt team, they appear to respect the human survivor because of the mark.
* AVP: Alien vs. Predator, the predator carries vials of a blue substance that can dissolve even xenomorph bodies, which it uses to dispose of xenomorph corpses.
* AVP: Alien vs. Predator, the Predator won't ignore him and goes all stabby on the guy.
* AVP: Alien vs. Predator to being responsible for teaching humans how to build, farm and write, all so they could have people to sacrifice as part of their barbaric rites of passage.
* AVP released in 2003, and ended up making more money than any other film in either of the parent franchises.
* Avram Davidson's stories of Dr. Eszterhazy are set in the Empire of Scythia-Pannonia-Transbalkania, the "Fourth largest empire in Europe." It's pre-WWI Austria-Hungary turned up to 11, and a recurring theme in the stories is that any change will likely plunge the whole place into bloody chaos.
* Avram Davidson story presents a (fictional) crime writer who first used the phrase "the butler did it," and subsequently made a great deal of money off of murderous butler stories. When he stumbles into Butler Afterlife, its inhabitants

are inclined to kill him for defaming their profession.
* Avril Lavigne before she decided to give it to someone else instead.
* Avril Lavigne - "Girlfriend" is a song about a woman trying to steal another's boyfriend. According to Avril, it's supposed to be comedic and you're not supposed to agree with the singer.
* Avril Lavigne, is a song about a girl who is in denial about her love for a boy she knows until he's already been claimed by another (and become a superstar musician with his girlfriend while she's become a lonely single mother). Unusually for arcs invoking the trope, she doesn't get him in the end. Here the rival is the song's point-of-view character, possibly the artist herself — more normally we follow the fate of the girl having the epiphany.
* Avril Lavigne material. She expressed regret over that and her next album "The Best Damn Thing" was in her own words "trying to have fun in music again", and it featured a lot more upbeat songs.
* Avril Lavigne of it. On the whole, the video promotes promiscuity while shaming more conservative outlooks while simultaneously flipping between two different stereotypes.
* Avril Lavigne says, "I'm too young to fall asleep." She started writing this song while bedridden with Lyme Disease and thought she was going to die.
* Avril Lavigne's song "Sk8er Boi" is about a young boy who has an crush on a popular girl, but because she does not want to lose her social status she hides her own feelings in return. Many years later, after they have both grown up, he becomes a rock star and the original girl (and her friends) regrets not having formed a relationship when she had a chance, but now he is with somebody else.
* Avril Lavigne. The song opens with the lines, "He was a boy. She was a girl. Can I make it any more obvious?" However, the girl actually rejected the boy because they had nothing in common; still, for not seeing the "obvious," she is treated like an idiot by the narrator.
* AVROTROS). AVRO was the very first broadcaster in the system, with a liberal ideology. TROS was established in 1964, and, unusually for the time, was focused strictly on entertainment programming rather than trying to serve a religion or ideology. Its popularity led some of the other groups to similarly broaden their programming for wider appeal.
* AWA and replaced it with the Hawai'i Championship Wrestling Women's title.
* AWACS, Major Harry Schmidt believed the soldiers on the ground were targeting his flight leader, and bombed them in response. This cost the lives of four soldiers while wounding eight others.
* AWA in 1991, they were immediately rechristened Beau and Blake Beverly.
* Await Further Instructions follows this course as the commands from the television — assumed to be from the government — become more and more sinister. As Nick puts it near the climax — "We've done this to ourselves."
* Await Further Instructions television, which prints teletext instructions for the family to follow, which become increasingly specific and malicious.
* Await Further Instructions who abuse their family), he takes these instructions to heart no matter how sinister they become.
* awaiting the results of George the steamroller's trial, then flashes back to the events that lead up to that point.
* Awake: Clay and his mother joke about this as a solution to having to wait for his turn on the heart transplant list.
* Awake: Detective Michael Britten lives simultaneously in two separate realities; when he goes to sleep in one he wakes up in the other. He does not know which universe is real and which is a dream, but information he learns in one universe has strange connections to cases in the other. He cannot tell his partner or captain how he gets his information for fear he will be kicked off the force for psychological reasons.
* Awake: Has two realities, with the tone of the camera distinguishing them for the audience and a colored wristband distinguishing them for the protagonist.
* Awake in the Night Land all organic lifeforms of the Universe, except the humans, were killed by the time the book starts.

* Awake in the Night Land but also have mystical and spiritual properties.
* Awake in the Night Land mythos. At the end of times The Powers of the Night are finally defeated and prevented from getting into the next Universe.
* Awake in the Night Land, one of the characters talk about his plan to domesticate some feral monsters, then there is a laughter echoing from a distant place called The Country Whence Comes The Great Laughter. The narrator notes that this was more fitting than any answer she could think.
* Awake: Main character Detective Britten suddenly begins switching between two universes every time he falls asleep after a car crash kills his wife in one universe and his son in the other. While his therapists in each universe try to convince him that the other universe is just a trauma-induced dream, he isn't so sure. Across the two lives, he begins to notice suspicious coincidences which he investigates seeking an explanation for what's happening to him which leads him to the heart of a dangerous conspiracy where he needs the time and information from both lives just to stay one step ahead of his enemies.
* Awaken: After Piras passes out upon being rescued by the Athena the reader gets a first person perspective of the med-bay ceiling coming into focus for him before it hops to normal perspective and he starts to ask where he is and is quickly reminded of his situation by the crew.
* awakened beings fight naked, justified because their monstrous forms are too large or inhumanly-shaped for human clothes. Examples of this happening when they are "human" include...
* Awakened Cassandra biting off and eating her left arm: "Oh?" Her facial expression at that moment amounts to what one usually has upon someone calling out to you by name.
* Awakened Garou who effortlessly outpaces the aforementioned Lightspeed Flash in combat.
* Awakened; Jack is killed by Darkness because Neferet needed to give Darkness a soul she could not taint (as payment for trapping Kalona's soul). Later, when Nyx appears to the crowd at Jack's funeral, she tells his boyfriend Damien that he is one of the happiest souls she's known.
* Awakened. Jingoistic Reclaimers, the Awakened Militant Isolationists, will attempt to reconquer the galaxy and vassalize those who submit to their authority.
* Awakened manipulating the two playable characters, Issac Clarke and John Carver, to fight each other, buying time so they can reach their newest snack: humanity.
* Awakening, all but one of the ruling Exarchs are referred to alternately as male or female (the exception being the Father, who embodies the divine patriarch). Given that they sloughed off their physical forms to become Platonic ideals of power and subjugation, whatever gender they identified with as human is likely irrelevant.
* Awakening and bump into Oghren and Anders almost immediately. Other potential companions show up as you complete the main plot quests.
* Awakening and going to war in a titanic galactic clash, sounds like a cool mechanic but more often than not it just results in the two superpowers kicking the lower races into the dirt while largely avoiding each other. Even late-game player empires can become little more than target practice, and the rewards for winning one aren't really worth it.
* Awakening briefly mention how only spells "based on this world's elemental forms" require tomes. Dark Mages can cast curses on their own, essentially replacing tomes with complex rituals. Not that you can replicate this in-game, of course.
* Awakening can be comfortably beaten in about 13 hours, which fans found disappointing considering that Bioware found it worthy of selling on its own disc rather than making it a DLC.
* Awakening, Cynthia's father calls her "Pega-Pony Princess", much to his embarrassment, which she demands he say to prove he's really her father.
* Awakening. Depending on your decisions, the female player character can also exhibit elements of this trope as ruler of Amaranthine.
* Awakening does this in the course of drunkenly thanking the Warden Commander for saving him in combat: "There was that guy, and he was all 'Rrrrr!' and I was

'Hrrr!' and then I got hit by an arrow. Then I fell over, and it was 'meep!' But you were there and you were all 'Roaarr!' Ha! Spectaculous!" To which the PC may choose to respond "That's not even a word!"
* Awakening Dwarves refuses to wallow in angst and is about as upbeat as someone in her position can get.
* Awakening. Emmeryn's kindness as exalt is so well-known to even outsiders like Panne. Lissa is often described as one of the nicest people around and is down-to-earth despite her status as royalty.
* Awakening enjoy the high-headroom reclassing system and Pair-Up mechanic, the shipping-friendly Support system and the way it interacts with the time-travel plot, and the player-built protagonist. Its critics despise it for many of the same reasons.
* Awakening expansion, when a new Darkspawn threat emerges in Amarathine, the Warden (newly promoted to Warden-Commander) is made the new Arl of Amaranthine in order to combat the threat of the Darkspawn and rebuild the Arling in the wake of the Blight.
* Awakening expansion, when you meet Nathaniel's sister, she comments on how she found a husband on her own, rather than marrying 'that stuck up Cousland lad father wanted to set me up with.' The reply options are all variations on 'I'm standing not two feet in front of you with a flaming sword of death, you realize.' You do get an apology from her, though.
* Awakening expansion, you can get a kitten as an inventory item. Click it, and Anders the mage coos "Whooo's a pretty kitty?" and similar bits of cuteness overload.
* Awakening. If he were to lead an army with the same tactics, the loss of morale would quickly have him demoted.
* Awakening, if importing a save with the Human Noble Warden, this adds additional subtext when Nathaniel Howe attempts to murder the Warden to avenge the death of his father and the loss of his family lands to the Grey Wardens. Nicely subverted however, as the Warden can decide to end the blood-feud by recruiting Nathaniel into the Wardens and befriending him. If he survives the ending, Nathaniel saves Fergus Cousland's life, and is given a portion of the old Howe lands that had been seized, further mending the rift between the families.
* Awakening in creation". When he returns in the sequel, he makes good on this.
* Awakening, in that when a male and female reach the 'S' Support level they become committed/married to one another, which gives more stat bonuses when the two are paired up in battle. Depending on the female, they may produce a child who inherits skills, re-classing options, and statistical values from both parents. Although even those that don't have children still can reach 'S' rank.
* Awakening mentions the character consuming small amounts of toxic materials to build up resistance.
* Awakening, Nathaniel Howe has elements of this, attempting to redeem his family's sullied name.
* Awakening nature - it randomly activates with odds equal to your skill stat, and adds half your magic stat to the physical damage you're attacking with, and vice-versa for magic attacks. On any other class, this skill would be useless.
* Awakening noise when he moves, and he tends to assume conversations are over before they really are, which is why several characters experience him "disappearing" on them as they're speaking to him.
* Awakening "Not bad". This is after complaining that the (rather large) cup the mixture was in was too small. And unlike everyone else who drinks it and doesn't die from it he doesn't even pass out or show any kind of discomfort.
* Awakening. On the other hand you can fight several of them in the games as optional bosses, so it's unlikely that they are some kind of Devil.
* Awakening serve as the resident Seneschal for the Warden-Commander and Viscount Dumar.
* Awakenings, the revived catatonics are pleasantly surprised to learn that Prohibition was long ago repealed. They still feel (and act) young despite their advanced ages.

* Awakening: The Skyward kingdom. After an evil sorcerer attacked the humans living in the magical realm, they fled to the sky.
* Awakening the Sleeping Giant: Even neutral forces will fight back if you hurt them.
* Awakening, the Warden can find the corpse of a man who, prior to the events of the game, poisoned himself after his attempt at such a proposal went horribly awry and his would-be fiancee dumped him. He tried to lead her on a scavenger hunt that ended with an engagement ring, but she got offended over the wording of one of her clues, thinking he was playing some dirty joke on her.
* Awakening: The world of the games runs on a combination of magic, energy crystals, and industrial-age technology. The Skyward Kingdom and its fleet of airships runs on a combination of power crystals and technology to keep it afloat in the sky.
* Awakening, though he speaks with a Russian accent and most of his lines aren't quite as silly as others.
* Awakening titles that weren't very popular outside of the home islands.
* Awakening, which pretty quickly eclipsed the former game as the best selling in the series, and solidified the franchise's mainstream appeal to the point of coming away with two nods at The Game Awards 2019 for Best Strategy Game and People's Voice.
* Awakening with emphasis on the "blue collar" bit, such as the Uncrowned Kings (alchemists, both internal and external, who arise from crafters and workers) and the Tamers of Stone (architects and construction workers who use the understanding of their creations to develop an understanding over all space).
* Awakening you have to start conscripting new Wardens after the ones from Orlais are all killed/captured by the Darkspawn, taking your journey full circle from conscriptee to conscripter.
* Awaken Online with his favorite tactic being to load them with armor and weapons to turn into shrapnel and set them off in a crowd of enemies.
* awaken or release knowing what will set it off means the main cast will inevitably blunder into it.
* Awaken: The Empire of Nova are benevolent on the surface and their citizens seem to trust them, but it is implied by Nyl that they killed Piras' father to hide a secret, the outside world is not nearly as bad off as they tell their citizens, the Blue Pest that they always warn about is actually Flux and they used the "Blue Pest" plague as an excuse to round people up.
* Awaken The Sleeping Giant aircraft, and the allies made it quite clear that all the big fleet carriers as well as the vast majority of the smaller ones were sitting just over the horizon in case the Japanese got any ideas.
* Awaken The Stars, An Action/Sci-Fi series with a Gay romance as the central theme (and the plot's driving force) with multiple LGBTQA side characters.
* Awaken The Stars, Rex and Euan eventually develop a mental connection as their relationship strengthens.
* Awake, Rex says this of his father, though in a realistic spin, he's ashamed of it.
* Awake some fans sent red and green rubber bands. The show didn't end up getting anything past the first season, but creator Kyle Killen did once mention the possibility that he'd continue the story in book form at some point.
* Awake suffered truly abysmal ratings, even for NBC, but was endlessly praised by TV critics, and unlike earlier shows with similar ratings in its time slot, aired its entire season.
* Awaki is a Level 4 Teleporter like Kuroko, and was on her way to becoming Level 5, but she had an incident where she miscalculated her teleportation and ended up getting her leg telefragged into a wall, panicked, and ended up tearing a large amount of skin and muscle off. Her leg has since been healed, but the trauma was so terrible that she is paranoid about teleporting herself and takes an extra 3 seconds to recalculate, and anything that reminds her of the incident terrifies her. The stress when she actually does manage to teleport makes her unable to do it consecutively more than 3 or 4 times and makes her vomit. Ironically, she's forced

to relive the experience during the Battle Royale Arc when she teleports while her powers are affected by
* A Walk Among the Tombstones" before getting shot in the head by Liam Neeson.
* A Walk Among the Tombstones. T.J. provides both street-smarts and computer literacy to the private eye protagonist, who doesn't have any computer skills.
* A Walk Among the Tombstones, when a Russian gangster's daughter is kidnapped and held for ransom, he doesn't have the million dollar ransom demanded, so makes up the amount with counterfeit cash. Despite his worries the cash turns out to be convincing enough...until one of the kidnappers is counting it and suddenly notices he has printers ink on his fingers. Violence ensues.
* A Walk In The Clouds, but it was supposed to be dyed blonde. A mistake left it red and she noticed she was getting offered more parts afterwards, so she kept the colour.
* A Walk in the Sun. Depicts the landings at Salerno. The subject matter is dealt with realistically and had the cooperation of the U.S. Army. Notable for having been filmed during the war, just a year or so after the actual battle, and in its unromantic depiction of military action (unusual for the time) - during the landing sequence the platoon leader loses half his face to an enemy shell. Still liked by critics, at the time, and before he gained fame for his own realistic depictions of World War II combat, Samuel Fuller wrote to the producers to tell them how much he despised it.
* A Walk in the Sun. The platoon keeps losing commanders which puts in serious doubt whether the soldiers can fulfill their mission. The lieutenant and platoon sergeant are killed early on and the next senior sergeant is wounded soon after which leaves the shaky Sgt. Porter in command. His inexperience gets some of the men killed and he gets progressively worse with Sgt. Thyne having to step in to compensate for Porter's poor decisions. The pressure finally gets too much and Porter has a nervous breakdown that leaves Thyne in command. By the end it looks like Thyne will also break but he has the good sense to consult with the other NCOs and together they come up with a plan that will hopefully let them complete their mission without getting everyone killed.
* A Walk in the Woods has a black boy and an Asian girl amongst the cast.
* A Walk in the Woods: One of the kids you can play as wears a grey hoodie.
* A Walk in the Woods: The forest the kids are camping in is inhabited by a monster and his inhuman children. The kids need to find each other and get out of the woods before they become more of the monster's children.
* A Walk on the Moon, a vast majority of the film is set in a Borscht Belt bungalow colony during the summer of 1969. There is a brief scene where several of the parents are in a ballroom watching a Borscht Belt comic: "Now I want to invite you all up on the floor to dance, because it's my turn to laugh!"
* A Walk to Remember features a young man who marries his high school sweetheart when she's dying of cancer, leaving her dead at the age of nineteen mere months after their wedding while he lives a normal lifespan.
* A Walk to Remember IS this trope. Landon and Jamie fall in love and get married at age 17 because Jamie's dying of incurable leukemia. Decades and decades later, Landon has not considered anybody else, once, and has not taken off his wedding ring.
* A Walk to Remember: Made in 2002, set mostly in 1998 (except for the epilogue which matches the film's release date).
* A Walk to Remember. She's got terminal illness so guess what happens.
* A wall sign in the old labs invites you to "KNOW YOUR ALLERGENS: Pollen. Animal dander. Plastics.
* A Wall Street executive braking angrily due to a sudden downturn in the stock market is one of the hazards of the road portrayed by All State's Mayhem.
* A Wall Street trader is on the phone to his company relaying some important information about the state of the financial market and is hit on the head by a stray golf ball causing him to say: "The Fed is going to be lowering rates, so take your money out of T-bills and put it all into [blow to the head, suddenly cross-eyed] Waffles! Tasty waffles, with lots of syrup!" Cue a scene of Wall Street

traders shouting "waffles!" and then, oddly, Japanese traders going crazy screaming "Waffur!".
* A wand for Steven, but it is only ever implied. Steven invites Hermione to the Yule Ball were they accidentally fuse. They fuse later during the climactic battle.
* A wand for Steven: Given the Ministry's policies on nonhumans and Minister Fudge's bitterness towards Dumbledore, the Daily Prophet is used to slander Steven, questioning if he should even be allowed in Hogwarts in the first place for his half-human physiology.
* A wand for Steven, Steven is the only character whose friendly demeanor transcends his own house, being happily invited to the other house's tables for lunch.
* AWA Nick Bockwinkel frequently cut promos while wearing a suit, tie, and sunglasses.
* Award-Bait Song: A song that stands out in a movie and is expected to win an award.
* Award Category Fraud: Someone is nominated for (or wins) in what is clearly the wrong category.
* A Warden's dreams will always be filled with the whispers of the Old Gods after the Joining though he/she can eventually suppress them. The return of the dreams is the first sign that the Taint will soon overwhelm a Warden turning him/her into just another ghoul.
* Award for creepiest borg monotone goes to Locutus' line: "Your resistance is hopeless... Number One."
* award or deduct points for any reason, in any quantity, at any time them), providing Gryffindor with just enough to vault over Slytherin and give them the Cup. At least one can say he's making up for Snape's shenanigans.
* Awards ceremonies got more politically charged, beginning with the 2015 Latin Grammys (awarded a few weeks after Trump launched his campaign attacking Mexican immigrants) and accelerated after Trump's election, to the point of presenting works as "political protests"
* awards for valor that good, but she sometimes comes in for grief from officers who followed a more conventional career path.
* Award Snub and "A Man and a Woman") never charting in the Top 40, likely thanks to Anita herself having been vice president of the Nashville chapter of the NARAS in the mid 60s.
* Award Snub: A work doesn't win an award, but people feel that it should have.
* Award Snub was vandalized multiple times by many of Bieber's fans with sayings such as "JUSTIN DESERVED IT GO DIE IN A HOLE".
* Award Snub: You fail to receive an award and/or nomination for your work.
* Awareness of this trope, and a desire to avert it, is the reason beyond a particularly unsavory aspect of
* aware of the potential for power spikes, but previous spikes had always been brought under control and the problem never became a priority to fix. By the time the (unfortunately manually operated) scram button was finally pressed at Chernobyl, partial meltdown had already begun. When all of the graphite rod tips entered the chamber at once, the resulting power spike damaged the reactor vessel. The control rods broke off, leaving the reaction-boosting graphite tips lodged in the chamber and the actual control rods jammed and broken, at which point the reactor exploded. However, many other RBMK-design reactors were successfully operated for many years after the catastrophe, suggesting that the design issues were not as big a factor in the disaster as human error.
* aware, Spike appears to have let his crush go and dedicated himself to being Twilight's adviser and official Friendship Ambassador to the dragon lands, while Rarity is managing a fashion franchise all around Equestria.
* aware that Chloe was having issues, but chose not to say anything about it, mistakenly assuming that things would work themselves out without intervention.
* Aware that Malack will never forgive him or let it slide, Nale kills him first.
* A Warhammer 40,000 fanfic while they were at it) as the first stage of their counterattack against a charging horde of daemons.

* A war in space between humans and another alien species big enough to threaten the "destruction of all known space" is interrupted by an
* "A war is coming, I've seen it in my dreams. Fires sweeping over the earth, bodies in the streets, cities turned to dust. Retaliation...". This being the
* A warlock quest chain involves a gnome trying to summon a mighty demon... but the result is a giant chicken aptly named El Pollo Grande.
* A warlock spying on a Burning Legion invasion site criticizes their layout to the point he says it causes him physical pain to see someone so incompetent.
* a war machine the size of the Statue of Liberty, it bristles with weapons, and its rules are essentially an exercise in excess because it'd be easier to make a Titan costume and stand on the table than actually make a scale miniature. Naturally, pretty much every time an Emperor Battle Titan has shown up, it's gotten destroyed.
* a warrior's drink novels indicate that fruit juices are by far the largest export from the Federation to the Klingon Empire, so apparently he's not alone in his appreciation of it.
* A Warriors rp blog got an ask from anonymous saying "I'd date Ajax if he wasn't such a homophic
* A washboard is perhaps one of the few things in which you are just as likely to have seen as a musical instrument, and maybe even more so, as to have seen it used as a laundry tool.
* "A watched pot never boils," which leads the kid to conclude her gaze can exert enormous pressure on things — and weirdly, she's right.
* AWA], the Destroyer [Dick Beyer], Mighty Igor Vodic [Dick Garza], and Rick Martel [Richard Vigneault].)
* A Watsonian would say she's not used to moving elegantly in a dress and heels. A Doylist would say that EA wouldn't spare the budget for Bioware to create new animations for one short scene in an optional piece of DLC.
* A Wattpad fanfic called "Mega crossover" has an extremely thin plot. It's mostly just "Villain OC keeps sending random cartoon characters into different dimensions, and stuff happens as a result". The heroes spend most of their time trying to either find their way home, or find something that the villain OC took from them.
* AWA, who would write tickets and stick them to his opponents' chests after pinning them.
* Awaydays by Kevin Sampson follows a crew of hooligans called The Pack, who supported Tranmere Rovers in the late '70s.
* away from that site with a strange "watch", which was in reality his team's radar for hunting down Dragon Balls.
* away goals rule, if the aggregate score is tied, then whoever scored the most goals in their match away from home wins.
* away. It's heavily implied that most of the advanced technology (e.g. FTL, antigravity) is impossible with pure science and was the result of magic bleeding in from Arcadia through cracks in the Barrier. Once the Barrier is restored by the new Guardian, it's back to using old tech for the people of Stark. By the same token, pure complex technology is impossible in Arcadia due to laws of nature being in flux. Thus, even Azadi technology is reinforced by magic, although you may be arrested for suggesting that.
* Away on an expedition, Nube is caught in a landslide and ends up trapped underground. After several days, realizing no one is coming to rescue him, and slowly going insane from lack of human contact, he breaks the ultimate taboo: he gathers human remains found in the cave, and enchants them back to life —creating a golem-like girl who likewise latches onto him. It doesn't end well, and is a
* A Way Out, has dialogue/action options that involve violence, be it through weapons or physical means, and/or threatening someone. Justified, as he grew up alone with no parental guidance or education, and ended up turning to crime.
* A Way Out of a Cave-In: The heroes seem trapped underground, but then they notice the telltale sign of a way out.
* A Way To Be Dead, is this to the survivors in this game, as his role in the game

is to kill them along with the zombies.
* a way to combine magic and cybertech... but it sucks. Some people can be so heavily cybered that their Essence drops below zero. This would normally kill them, but through the arts of cybermancy, they can be made to still live... in a way. And by "in a way," we mean they become a walking black hole for magic, need an implant that keeps their memories grounded to keep from experiencing permanent derealization/depersonalization disorder, and can easily develop cancer at any time. There's a reason they're called "cyberzombies."
* A way to square the incident with the bears with Elisha's many acts of compassion and pity is to give him the benefit of the doubt and assume he was dealing with a violent juvie gang (and that this would have been clear to readers of the time).
* Away We Go depicts a sort of road trip across the United States, but was almost wholly filmed in Connecticut — which doubled for Colorado; Madison, Wisconsin; and Montreal.
* A weaker and slower version of Urek Mazino — one of the absolutely most powerful characters in the story — is able to move too fast to be reflected in a magic mirror.
* A weaker condition is somatoparaphrenia, or the delusion that someone's limb is not his own. It results from damage to the somatosensory homunculus, the part of the brain that tracks where each body part is, as discussed in
* A "weaker" wrestler — a jobber or one of the mid- to upper-card faces — will suffer a severe beatdown by one or more heels (often including a monster heel). Just as the face/jobber is about to be finished off for good, the head babyface will run out to the ring and run the bad guys off.
* a weakness for villainesses in the main continuity (where they have a son together) is similar with his relationship.
* a weak President was able to capitalize on the situation by becoming a tyrant
* A weapon cannot be used as an EXP fodder for its duplicate (i.e. Celeste Claws cannot be used as EXP fodders of other Celeste Claws), since the ideal use of a duplicate, especially SSR weapons, is to uncap another copy and not upgrade it.
* A weapon in the setting known as the neural whip exists, but it is less a whip and more a fencing foil from hell—its mere touch is agonizing and immediately demands a saving roll versus being knocked unconscious, and repeated use causes
* A wearable disguise in the Heaven and Hell Party mission for 47 in
* A weasel-like Beanie Baby named Runner has Mustelidae officially listed as its species. The "
* A webcast produced in 2020 as part of the Doctor Who: Lockdown event is set around her funeral, by which time her friends are all well into their careers and Luke has been married for five years, indicating this takes place some time after the series ended.
* a webpage and other stories about where the term is believed to have come from.
* A web roleplaying forum had a story of myths of a terrible army of monsters known as the Zanik, who were supposedly born from a devil equivalent and forced the people of the world to climb on the back of a god equivalent and fly off into the sky to escape them; the myths, however, give no answer for what happened to the Zanik after that: they essentially vanish. An evil witch, discovering that the flying island exists (the myths being the supposed reason why there's a flying island in the shape of a dragon in the world), ultimately provides the reason that the Zanik vanished from the myths; she travels back in time and
* A website called "You Were Left Behind" sells itself as a service for devout born again Christians who are worried about being taken up into heaven during the Rapture, and want to leave messages for friends and loved ones just in case it happens during their lifetime. The site works (or claims to work) by having a small inner circle of administrators who have to log in at least once every three days. If all of these brave Christian soldiers miss two updates in a row at the same time, then the Rapture must have happened and all the clients' messages will be delivered.
* A wedding joke concerns a Bride who discovers her divorced mother and her

younger, prettier step-mother are planning to wear the same dress to the wedding. The Bride warns her mother, who says she will buy a new dress to wear for the event. "But mother, aren't you going to return the dress you bought first? You don't really have anything else to wear it for..." "Yes I do, sweetheart," the mother replies. "I'm wearing it to the rehearsal dinner the night before."
* A wee boy goes into a cake shop and points in the window and says "Is that a cake or a meringue?" "No, you're right" says the baker "It's a cake."
* A weekday strip where Paige runs frantically to her classes because she was constantly late, only to go to P.E. on time, was later recycled as a Sunday strip. The only difference between the two is that the Sunday version had Nicole telling Paige that it's very ironic.
* A Weekend Update segment on a Christmas episode from 1989 had Victoria Jackson in a
* A Week In December, John Veals may qualify, given that he's only out to make as much money as possible and to do it legally - ethics aside.
* A Week In December, R. Tranter thinks he's won the Pizza Palace book award for his biography of an obscure writer, to the point of hearing his own name being read out. His agent has to pull him back to his seat after it turns out that the author of a children's book rather surprisingly won.
* A Week in the Life of.... Also, plants were placed more rapidly on faster systems, and were randomly chosen: slower computers are better.
* A week later, Piper got his revenge by taking his fists (and a bat)
* A Weight Watchers commercial has a woman on a diet seeing various pieces of work equipment (a computer keyboard, a telephone, a water cooler) appearing in the form of food. This also applies to furniture, as a booth seat and table at a restaurant appears in the form of pizza and a living room couch appears in the form of potato chips.
* A Weight Watchers commercial has a woman on a diet seeing various pieces of work equipment (a computer keyboard, a telephone, a water cooler) appearing in the form of food. This also applies to furniture, as a booth seat and table in a restaurant appears in the form of pizza and a living room couch appears in the form of potato chips.
* A Weighty Aesop: Junk food is bad for you, so eat something that's more healthy. Also, get lots of physical exercise!
* A weird aversion exists in the state of Virginia. Following any motor vehicle accident, the police always charge the driver at fault with reckless driving. Having a car accident isn't technically illegal in Virginia, but since Virginia doesn't have a dedicated traffic court, and the only way to get a court appointment is to appear for a criminal hearing, they have to charge you with reckless driving anyway. Also counts as
* A weird aversion happened with two movies based on adult animation in Quebec: there, both
* A weird case for Ulysses Klaue/Klaw. In the comics, his birth name is Ulysses Klaue, before he anglicized it to Ulysses Klaw. However, in the movies he doesn't change his birth name at all.
* A weirder example is the Declan/Holly J/Fiona triangle. Because they moved around a lot Declan and Fiona were very close but after
* A weirder example occurs with Fitz-Simmons: for the first few episodes of Season 1, it seems as though Simmons has an unrequited crush on her long-time best friend, while Fitz is too preoccupied with his crush on their new teammate Skye to pay her much attention.
* A weird example is the one that contains all the Genevieve books. It contains 4 books, but Genevieve is only a very brief cameo in one and only in two of four short stories in another.
* A weird form of damage boosting in training. Since the chance of injury never exceeds 100%, TASers can train to their hearts content without sustaining any injuries or wasting turns resting.
* A weird one: A gambler slowly dying of lead poisoning from the chocolate he consumed every night at the table was accelerated to

* A weird pseudo-following surfaced sometime in the Naruto universe over the
* A weird version of this appears to be going on between Vulcanus/Valvatorez/Fenrich in
* A weird version of this is a commercial for an auto body shop, where the guy at the desk is ringing up a customer's charges. Strangely, the desk guy's lines are pretty much inaudible, the customer apparently heard that it was way more than he expected and lets out a
* A weird version of this trope popped up in at least one case of small-scale African warfare, when fighters armed with assault rifles could be seen wearing brightly-colored inflatable armbands ("floaties"), long blonde wigs, dresses, and
* A weird version with Ozma. Since he is thousands of years old, he absolutely refuses, under any circumstances, to have sexual thoughts for any woman under age twenty-five. The problem is that he's riding around in the head of fifteen year-old Oscar, who would kind of like to at least
* A welding machine maker manufactures a variable frequency machine that can be
* A well-done retreat will very likely include a number of these as a routine-even if someone is really retreating, he wants to slow the pursuit down and discourage it.
* A well-known and cynical-sounding example is attributed to the French General Oscar de Négrier, who is reputed to have said to the Foreign Legion in 1884: "As for you Legionnaires, you are soldiers meant for dying, and I am sending you where one dies!"
* a well-known drama actor just as the show was moved into a twice-weekly soap opera slot (but the actor was very good and the scheduling reversed as soon as possible);
* A well known example being Taxol (paclitaxel), a high effectly chemotherapy drug derived from the bark of Pacific Yew trees (
* A well-known example is "Partners", the statue found in most Disneyland-style
* A well known German joke goes about the anxious announcer on the radio who will present the
* A well-known Japanese manga artist had one built as a study in his home in the hope of increasing his creativity, but admitted he spent most of the time under it drinking sake and looking at the stars.
* A well-known legend about the 3rd-century B.C. mathematician Archimedes says that when he stumbled upon the solution to a problem he was wracking his brain on (how to tell whether or not a crown is pure gold), he got so excited that he leaped out of the bath and ran naked through the streets shouting, "
* A well-known moment during the town hall-style U.S. Presidential debate of 2000: While answering an audience member's question, George W. Bush turned his head and was surprised to see that his opponent Al Gore had
* A well-known old school example is the prominent use of MAC-10s by future (or alien, it isn't clear)
* A well-known Sidney Harris cartoon on a blackboard, with "Then A Miracle Occurs" written between them as the "explanation" of how one is derived from the other.
* A well-known story about Joan of Arc involves the Dauphin attempting to pull the intentional version of this when he meets Joan, having one of the nobles present himself as Dauphin instead, and Joan seeing through the deception.
* A well-known version of the Medusa myth shares a similar theme. Medusa was a beautiful woman who was raped in Athena's temple by the god Poseidon. Athena was so enraged by her temple being violated that she of course curses Medusa, apparently for not being able to fend off a god, turning her into a gorgon. Some versions even have Athena take it one step further and cursing her sisters too.
* A well-popularized example: Back in the late nineties, there was some backlash against
* A Wendigo is a member of Omega Flight, the Black Ops Counterparts of Alpha Flight in Jonathan Hickman's
* A Wendy's ad has a guy going to a restaurant where he meets an attractive lady at the drive-through window. Finally, he asks her out without looking at the window—but she's been replaced by a middle-aged man.

* A Wendy's commercial for the chain's 99¢ Crispy Nuggets had two people deliberately buy cheap seats and proceed to upgrade to increasingly better ones by offering people in front of them the crispy nuggets in a trade.
* A werewolf could alter the adopted one's scent or pheromones to claim them as part of their pack...
* A werewolf couple in the short story "Day Off" use their alternate forms for bestiality, which attracts some kind of magical parasites to them.
* (a werewolf) is very protective of him nonetheless, sensing on an instinctual level when he is injured or in danger.
* a werewolf/witch, a law was passed that would make the tsar the godparent of these children so that they wouldn't be abandoned.
* Awesome Anachronistic Apparel: Important characters wear fashions way out of date in the setting.
* awesome and immediately beelines for the Jewish stereotype on display, who is depicted as greedily clutching a bag of money (see the picture above).
* Awesome and the Impractical theme or tech type, where most mad scientists are restricted to one general field (lasers, biotech, clockwork, candy, etc). She's even duplicated the tech of both the Conquerors and the Puppeteers, two of the most feared alien races in this setting (and mortal enemies). But on the Impractical side, Penny has only limited control over what her power builds, and can't repair or duplicate her work. In short, if Penny asks her power for a weapon, she might get a pneumatic cannon, a nuclear-powered laser, a mind-control cat, a soda knife, or almost anything else, and she has no good way to tell what.
* awesome, and the Technocracy wanted the Etherites to follow the instruction manual.
* awesome at the end of the movie when Newcomer George sees his human partner fall into the ocean, and reaches into the water to grab him. In what other circumstances could you reach into acid and pull forth a (mostly) unharmed friend?
* Awesome AussieAustralians accents typically signal someone being toughened up by the wilderness.
* Awesome Aussie knife (though in-game it's usually used in extreme emergencies only).
* Awesome, but Impractical applies to the band name Einstürzende Neubauten.
* Awesome, but Impractical, as its design robs the wielder of a sword's primary advantage over a weapons with a shorter blade range. Trying to use it like a normal sword results in one of the pointy ends facing your own gut, which can end badly. It's probably good for defense, but not much for attacking an enemy with a normal sword, provided the enemy knows to maintain the range.
* Awesome, but Impractical, at least compared to what future-obsessed nerds think them capable of. The Princeton studies explain why:
* Awesome, but Impractical before even getting into firing range. Its later track record is better, due to hard work from the Automotive Club (who are assigned to pilot it because they're the only ones capable of getting it moving again should it break down in the middle of a match), but it still has a much higher mechanical failure rate that the team's other panzers.
* Awesome, but Impractical by the central government, and the biological parents may never meet at all.
* Awesome, but Impractical changes guns to replenish their ammunition after every battle (explained in-universe by Morgana as the enemies' cognition leading them to expect the player has a fully loaded gun each new encounter), allowing the player to use them more frequently without penalty.
* Awesome, but Impractical: Could be useful, if not for the many disadvantages it has.
* Awesome, but Impractical if you aren't a master at using them. On the other hand, a person's natural ability (Zanpakuto or Schrift) is generally their first resort in battle, and the most effective one in an intense battle where the time to prepare spells doesn't exist.
* Awesome, but Impractical in melee), which uses a mechanism to force stakes into enemies.

* Awesome, but Impractical: It looks cool but has too many drawbacks vs. it looks boring but it's able to do the job effectively
* Awesome, but Impractical: It's impressive enough for some people to use even though a different weapon is actually more effective.
* Awesome, but Impractical, requiring insane amounts of consumables and gargantuan crews to operate.
* Awesome, but Impractical: Several moves look great in the ring, but are banned or restricted due to the danger of inexperienced wrestlers performing them incorrectly and injuring their opponents or themselves.
* Awesome, but Impractical than the entire Roman Empire at it's height.
* Awesome, but Impractical that allows you to use the effect of Polymerization at any time.
* Awesome, but Impractical. The Germans had a massive anti-aircraft shell of their own for the main guns of the battleship Tirpitz, which succeeded in disrupting an incoming wave of Lancaster bombers but was, unsurprisingly, of very little utility in the end.
* Awesome, but Impractical, you can bet that the possibilities of weaponizing it will be duly investigated.
* Awesome, but Impractical: Your technique or equipment seems amazing, but using it is a bad idea.
* Awesome, but Temporary: That super awesome new weapon isn't going to be around for long...
* Awesome Comics in 2013, but was saved in 2016 by their intern hosting it along with three new people.
* Awesome, Dear Boy: An actor agreed to work on a production because they find their role to be cool.
* Awesome, Dear Boy: The actor agreed to play the part because they find their role to be cool.
* awesome defenses and the second highest amount of resistances in the game (second only to Magnezone).
* Awesome Ego: May have a big ego and maybe narcissistic, but have a cool personality at the same time.
* Awesome Ego nonwithstanding, he is able to tear dimensions with his scream, his attacks are summoning explosive ghosts and even turns Super Buu into a ball at one point to be played in a game of catch.
* Awesome Fantasy VII where Cloud and Vincent act hilariously emo, ending with an old man telling his grandson "And that's why it's the best game ever!"
* Awesome Gaiden that it manifests in the real world to trash the player's house.
* awesome, he damn near scores a Hole-in-one, which prompts his Commanding Officer to chime in on the shot.
* awesome. Internally, it is an updated Maverick with a larger cylinder and great ammo capacity, greater range, and much less tendency to break the loading mechanism or misfeed darts.
* Awesome Kong (Amazing Kong elsewhere) (Lexi Lane or Ashley Lane), and Roxxi Laveaux (Nikki Roxx).
* Awesome Kong's demands for a long while, but ended up throwing her off the Impact stage once her antics led to failure one too many times.
* awesome library music, numerous themes tend to get covered up from a fan's perspective.
* Awesome Mc Coolname: A character has a cool name vs. a character has an embarrassing name
* Awesome Moment of Crowning: A person becomes a ruler by doing something awesome to earn their position.
* Awesome Moment of Crowning: A royal assumes their place on the throne, and everyone rejoices.
* Awesome Moment of Crowning: Story ends with character being crowned ruler of the land they just saved.
* Awesome Music are frequently called "Cornered Themes" by the fandom. In reality, the correct term is "Pursuit" themes, only the first one is actually called

"Cornered". The rest all have a different subtitle like "Questioned" or "Overtaken".
* Awesome Music, for example, and the writers of single episodes can get worshipped should their episodes get sufficiently popular.
* Awesome Music of the season 1 finale and in the season 3 premiere, his number also serves to introduce Billie Kent.
* Awesomenauts being a homage to wacky 80s' sci-fi cartoons, revels in this trope, above all when it comes to some of the Nauts' backstories. The silliest example so far is probably Commander Rocket, who somehow survived getting his head blown away and replaced by a head prosthesis. Don't ask...
* Awesomenauts features two as playable characters — Froggy G. and Dizzy.
* Awesomenauts has the DLC of the Wildlife Announcer, a David Attenborough-esque narrator that portrays the fight as a nature documentary.
* Awesomenauts has the Entins, who, despite otherwise being space caterpillars, sport these mouths.
* Awesomenauts is a cute Sadak child with psychokinetic abilities. She is also a psychotic prison escapist with a penchant for starting fires and destroying property.
* Awesomenauts is this. His uncle, Blabl, would rather Derpl didn't inherit the business he founded and turned into an interstellar corporate empire, so guess who's field-testing an experimental walking office desk mech with a secretary AI? Derpl isn't aware of the gambit, but then again, he's so stupid he's probably not even aware a battle's going on to begin with.
* Awesomenauts. Lonestar is a great fan of shooting things, but sometimes bullets just won't cut it. So to make sure it stays down, Lonestar will chuck cigar-lit sticks of dynamite at his foes!
* Awesomenauts, this is how your character enters the battle at the start of a game, or when respawning.
* Awesomenauts, you play a drop-pod minigame when you respawn. Not only does it kill some time that would be spent twiddling, you can recover most of the money you lost on death if you're skilled enough.
* Awesomeness by Analysis character who can find even confidential information on his fellow examinees...and proceeds to be the first one to fail the exam as Tonpa and the Amori Brothers sabotage him through some unseen way.
* Awesomeness by Analysis powers, he can perfectly predict the path of a bullet and even cause them to ricochet.
* Awesomeness-Induced Amnesia: A character does something awesome, but can't remember how they actually did it or what they even did.
* Awesomeness Withdrawal: A work is so awesome that when audiences can't consume it anymore—it was too short, there's a hiatus until more content comes, etc.—they become upset.
* awesome or otherwise, start out this way: The chassis of a light truck or large 4x4 with an armoured body-shell and a roof hatch with a ring mount for a machine gun.
* awesome pauldrons. Though he doesn't wear them in the second season, he puts them on again when he appears in the fourth.
* Awesome Personnel Carriers infantry unit, inculding animals and heroes.
* Awesome Possum... Kicks Dr. Machino's Butt has a trial of various tropical animals demanding you to answer various ecological questions for points.
* Awesome Possum... Kicks Dr. Machino's Butt. The title was kind of a giveaway.
* Awesome Series has all the titles named after the work being parodied, but with one word replaced with "Awesome".
* awesome. The local mobsters make the mistake of trying to extort money from an apartment building where no less than six people are kung fu masters.
* awesome, to be exact. Complete with grammatical errors, name-calling and a nasty sketch.
* Awesome Video Games, Dad obviously prefers Chet over Ace. Whether this has any lasting effects is yet to be seen.
* "Awesome" wolf shirt might seem manly, this is actually a common misconception.

TRUE manliness would be demonstrated by either going shirtless, or wearing the skin of an actual wolf.
* Awesome, yet Impractical is that he spent years honing his prayer technique to the point that he can pray within a fraction of a second, essentially meaning that he can use his powerful abilities at little cost.
* Awesome, yet Impractical when he drowned after the sheath filled with water.
* Awexome Cross '98 game has The Cheat, inside a tire, run over the Videlectrix guy.
* Awful Hospital: After all she's been through, Fern is only too happy to follow Balmer, Methanyll, and Hyde when she finds out they have booze.
* Awful Hospital after death, or in some cases an arbitrary amount of time after being revived. Bog has indicated that anything can slobbify under the right, extremely rare conditions, but Gray Zoners (read: humans) are so incompatible with the Hospital on a basic level that the very concept of humanity begins to break down, causing them to slobbify based on whatever affliction they're suffering from.
* Awful Hospital after seeing fan speculation about it and deciding it made sense with Joe jumping on any excuse to be miserable and hate others for it, and Flair's lust for power.
* Awful Hospital: All the tech of the hospital, which appears to exist inside some unidentified gigantic lifeform.
* Awful Hospital. Almost all of them have it within themselves to bring you to a gruesome end. Given that the titular hospital's located in the Noisy Tenant universe, which you can see in the Web Original folder, it's only natural.
* Awful Hospital and probably the most loud-mouthed, egotistical, and flamboyant embalming machine you'll ever see.
* Awful Hospital, at least once the latter started to take a more active part in getting things done.
* Awful Hospital: Baby Heads Worm. Not only did it try to attack Fern and Celia, but it also succeeded in killing JBE 12837.
* Awful Hospital claims he can sense the 'pulses' of others, and would seem to possess other senses and abilities outside the range of human perception.
* Awful Hospital: Dr. Man's smile never wavers. Same with Burgrr employee BBQ Girll.
* Awful Hospital, even before his slob form dies, to the point where he regularly fights and kills - or is killed by - his own undead corpse.
* Awful Hospital for beings within, even ones as distantly removed as a human and a fungus, to interact; enough of a shock causes the façade to crack.
* Awful Hospital, from objects to locations to even a collective consciousness formed by a gathering of people. One character mentions having once had tea with a crowded theater, which proceeded to 'die' as the showing ended and the crowd dispersed.
* Awful Hospital gets creative with its doors. One door's a fairly mundane slab of impenetrable metal. One's capable of hypnotizing you into doing its bidding. Another wants to be fed sloppy joes.
* Awful Hospital has implications that this may be the case for many major antagonists, each of which believes that the others are in the wrong, at least so far as they can perceive each other:
* Awful Hospital have a host of senses beyond the 5 we're used to. Human perception is repeatedly derided as hilariously limited. When the protagonist is granted a peek through even a handful of these through huffing a certain gas, she's completely overwhelmed.
* Awful Hospital: Head surgeon Circula Tori operates on Fern with a spork and drops her ID card into her chest cavity... but nonetheless repeatedly restores her to life. In an unusually literal example, she once does so after Fern falls into a living meat grinder.
* Awful Hospital, if someone is conventionally cute for any reason other than being a baby, then they are probably evil and definitely dangerous. Ducks are symbols of madness, dolphins are embodiments of sadistic violence, and bunnies are implied to be dangerous too.

* Awful Hospital implies that the staff at the hospital are trying their best to cure their patients; in fact, they're some of the most talented medical professionals inside their native zones. It's just that they deal with patients from ALL zones, and they're unfamiliar with the biology of most of them, making mistakes constantly in their attempts to treat them. Dr. Man likens it to a human neurosurgeon who has to operate on an octopus.
* Awful Hospital is this to the Nose and he can't imagine anything besides the hospital.
* Awful Hospital Meanwhile, all doctors back on the infant's home planet (which was eventually destroyed at one point during the comic) were rendered oblivious to his condition before he and his mother were transferred to an interdimensional hospital where the staff and his mother are trapped in a perilious race against time to curb the infection and find a way to save him before it's too late, but the chances are slim - it's very likely that the Parliament might win and successfully reset the multiverse back to its factory settings.
* Awful Hospital: Ms. Green ends up buying one of these at a store in a village of bacteria. It's chained up.
* Awful Hospital. On a couple of occasions, Fern gets angry enough with the commentators to hijack the narrative and switch to first person for a while.
* Awful Hospital. One new feature is the Plank Maze, which consumes random locations within the Hospital and links them with a nonsensical network of passages.
* Awful Hospital Other, more poorly-defined units of 'time' include 'spiralings' and 'cubeoids' (which probably equate to individual panels and entire story arcs).
* Awful Hospital: Reality outside our observable universe is partitioned into a multitude of practically endless realms known as the Perception Range, each "zone" constituting its own self-contained universe remarkably similar to ours with a unique set of rules and logic, operating differently for every being within them.
* Awful Hospital that can perceive or be perceived can exist in any number of self-aware forms simultaneously, and "reality" is a subjective measure of which elements of the Perception Range you're paying attention to at any given time. Humans, to those beings capable of noticing them at all, are seen as pitiably odd for being constrained to a single, ephemeral, matter-bound form and only existing in one layer of perception at a time.
* Awful Hospital: The alien zones don't always use "time" as we humans understand it, but something called "layers." Chronology can sometimes jump around on its own, via layers, without Fern needing to enter a time machine:
* Awful Hospital. The bacterium folk wear white skull masks that are, more likely than not, made of actual human bone. They are a society of genuinely nice, neighborly people.
* Awful Hospital the characters often use start to become comprehensible.
* Awful Hospital: The creatures the Open Wound calls Siamese cats have "gel cores" and a habit of shedding their biovessels. Although, since it's implied that all concepts, including grey-zone ones, have gel cores and similar technobabble-y things, they may simply be normal cats that tend to die a lot.
* Awful Hospital: the Hospital in question appears to be abandoned at first due to how dirty and disused everything looks, but once Dr. Phage shows up it's clear that the hospital does have a working staff.
* Awful Hospital: The Inert Vessel turns out to be this, especially after Ms. Green teams up with Celia. Seems Ms. Green has gotten used to it, as even when she returns to the hospital she approaches combat this way.
* Awful Hospital: The native lifeforms of Inert Vessels seem instinctively predisposed not to care about dying out from when their world becomes uninhabitable. With the notable exception of Maya Celia.
* Awful Hospital Then played straight as can be with her companions in the Inert Vessel.
* Awful Hospital: The original god of everything, The Old Flesh, was only truly happy when it was the only thing in the entire multiverse. After it developed diseases and began creating the universe against its will, it could only feel

hatred for the things eating its cake-like insides and giving birth to trillions of happy-go-lucky children. Its remnants, the Parliamnent, hate their own existence and seek to destroy and re-merge every concept in the multiverse by growing an omni-devourer that will eat everything in every plane of existence.
* Awful Hospital the term "free-roaming unisystemic vessels:" Thanks to the metaphysics of the setting, an ambulatory stomach can spend its time digesting, even though it's as far removed from any mouth or oesophagus as a human in London might be from the stretch of Amazon rainforest that produced their last lungful of oxygen.
* Awful Hospital which caused it to explode, ejecting all Hospital patients and staff from the cafeteria.
* Awful Hospital who accidentally wandered into the Hospital and was recognized as staff simply by being a doctor by profession, but by his own admission even he isn't entirely sure he's really who he thinks he is. He still makes a passable(-ish) attempt to seem like one.
* Awful Hospital, zone travel consists of branching out and perceiving different aspects of existence, all of which are capable of impacting one another. For example, the Hospital zone is basically the personification of medicine. What humans perceive as hospitals on Earth are basically the Hospital zone's concept leaking into their home zone.
* Awful Lot Of Coffee In Equestria has an unusual example of this trope. Princess Luna once had a plastic desk cactus. That she managed to kill. Somehow.
* awfully cold in-flight altitudes, these rides tend to end up badly. Those who aren't crushed by the retracting landing gear often are either frozen to death or suffocated by the thin air.
* Awfully Lucky those calamities, and so on until he throws it away, having needed half his body rebuilt.
* awful singing, the only time he's ever seen onscreen with women is in "Very Super Famous," and they were decidedly not head-over-heels.
* awful superhero, besides his cowardice and stupidity, was that he was so goddamn clumsy; one time, while going giant, he tripped over a car like a roller skate and landed face first in a subway entrance. Even after he learns how to wrestle, he starts to prefer power moves over techniques, spending most of his fights setting up opponents to be put into one of his heavy finishers. This is eventually called out during his fight against Kinnikuman Super Phoenix during the Scramble For The Throne arc.
* awful. This is even acknowledged in-universe by Speedwagon, believing that a kind man like him didn't deserve what happened to him.
* Awful Truth. Especially when they do this over and over again and Harry always finds out anyway.
* Awful Truth into a wall because he's so angry with Ozpin. Their behaviour towards Ozpin is exacerbated in Volume 7 when they decide to keep the same secret from Ironwood that Ozpin kept from them, leading to Ironwood eventually turning on them the way they turned on Ozpin.
* Awful Truth: Something is true, but the truth is so bad that people keep it secret out of fear that other people will go mad.
* Awful Wedded Life: A marriage where the couple are miserable together.
* Awful Wedded Life characterizes their relationship more along the lines of this trope, where they use evil scheming to bring the "spark" back into their love life.
* Awful Wedded Life lurking around the corner. But for those who can endure the tough parts, you've got a permanent friend, companion, support, confidante, assistant, sex partner, and more. Plus, there's plenty of evidence that married couples tend to be more prosperous economically than two otherwise-equivalent singles.
* Awful Wedded Life: Marriage isn't all it was cracked up to be, is it?
* Awful Wedded Life, Peg informed Marcy that at her wedding, not only had Al's mother had gotten so drunk that she threw up in the dip, but apparently his father whispered in her ear at the reception, "If you like my son, I'm twice as fun".
* Awful Wedded Life, Pete fetches two tumblers, fills them with whisky... and sits

there drinking them both himself.
* A Whack-A-Mole style game where a you have to hit aliens coming out of an astronaut's chest appears at Pizza Planet in
* A Whale of a Bad Time", Donald destroys the steering mechanism of Dr. Bluebottle's killer whale-shaped submarine, causing it to sink to the bottom of the ocean. Scrooge manages to get the sub to float to the surface pulling the lever that ejects his fortune stored there.
* A What If episode shows that if Fry had not been frozen, a universe-destroying
* A "What If?" scenario of the above has the sniper kill Mary Jane, and when Spider-Man tracks him down he has Aunt May as hostage with two corrupt cops keeping her at gunpoint. He comes near to beat him to death... And Spidey
* A What If universe of a communist Fantastic Four had a Reed Richards with the ability to warp space so pieces of his body can appear and operate remotely from each other.
* A wheelchair is a common sight in hospitals or around handicapped people. Lying on the side in the middle of a road or back alley, with not a single person in 1000 meters around it, however, is not a good place for it to be. Doubles as a recurring reference to
* A Whiff of Death), the minor character Dr. Foster seems to be constantly flirting with any female but has never been seen or heard doing anything inappropriate; he's simply very gregarious.
* A while back, Marvel established that Steve Rogers was actually the second
* A while back there was an anti-smoking ad campaign proclaiming "Tobacco smokes you!"
* a" while taking his family on a peeking tour of the neighborhood's houses, but not the one he meant to.
* A whip is dangerous in untrained hands, too. Using it to merely cause superficial pain and
* A Whiskas cat treats commercial has the cat bursting through the wall (which has several already patched holes in it) to get to the bag of treats.
* A Whisper Of Wings by Paul Kidd, although it's more a case of her mother dying in egg-laying (the anthropomorphic butterfly-winged fox race lay eggs) and suffering mostly hate from her older sister and indifference from her father.
* A white DJ pony with purple glasses and a blue/cyan mane who appears for all of
* A white fog-like effect was also sometimes used to cover direct hits to the face.
* A white guy, a black guy, a Japanese guy, and a Mexican guy were standing on the edge of a cliff, contemplating oblivion. The Mexican man shouts "For the honor of my people!" and jumps off the cliff. Japanese man shouts "For the honor of my people!" and commits seppuku. The black man shouts "For the honor of my people!" and pushes the white guy off.
* A white hard hat, an ID that looks appropriate on a lanyard, and a
* A white man may also encounter derision. Black women are seen as less desirable outside of black communities, and he may not be accepted by his peers regardless of what she looks like or her economic status. So a white woman is a more socially acceptable option. In the worse case, he too will be derided for being a "Race traitor".
* "A White Sport Coat (and a Pink Carnation)," made most famous by Marty Robbins. A form of it is the main storyline in this, the ultimate song of teen heartbreak and rejection: A handsome but somewhat awkward man scores a prom-night date with the most desirable girl in school and meticulously plans for the big night (with a tuxedo and a carnation corsage for his date) ... only to learn at the very last second – when he goes to her house to pick her up for the big date – that she had gone to the prom with another boy. It is not explicitly stated whether this is a case of the girl later being asked out by a more desirable date or an intent to humiliate the protagonist; all that is stated is that the result is his heartbrokenness.
* "A White Sport Coat (and a Pink Carnation)," made most famous by Marty Robbins. The ultimate song of teen heartbreak and rejection, the young protagonist bemoans

the fact that he had meticulously planned his prom-night date with the most desirable girl in school, bought a tuxedo and a carnation corsage for his date ... only to learn at the very last second – when he goes to her house to pick her up for the big date – that she had gone to the prom with another boy. She had changed her mind and neglected to tell the protagonist (her original date). "A White Sport Coat ... " (referenced years later in
* A whole body of work has been presented about the Last Detail, the all-female combat unit introduced in
* A whole book could be written on Charlie. He displays dyslexic tendencies and can't read, is a musical savant (he is able to masterfully play a keyboard despite having absolutely no formal training, and claims "Keyboards just make sense"), displays almost superhuman strength at times, displays unhealthy
* A whole book was written to explain the simple not-quite-an-error in "
* A whole bunch of different performers cut the song before Imbruglia - most of the versions (Ednaswap's and Imbruglia's included) were produced by the song's co-writer Phil Thornalley.
* a whole bunch of health and ammo, or a Save Point, at the end of a long corridor. coming!
* A whole bunch of people just coming in to mooch up to celebrities and network shamelessly. But when Herb's beloved friend,
* A whole campaign for Mike's Hard Lemonade revolved around these; one, for instance, had a guy impaled with rebar. It gets used as a bottle opener.
* a whole category of vengeful spirits heavily associated with this trope woman, and you do not pacify her grudge before her demise, then she'll make Hell wait for her spirit until she has exacted her vengeance upon the living.
* A whole chapter on pulpy sci-fi rayguns, from death rays, which make you simply drop dead of your own accord, to life-draining and life-transference rays.
* A whole civil war is going on in the background while you fight for the highest bidder in
* a whole day for Ed to finally flip the package upside-down and realize that there are only two jawbreakers and three of them.
* a whole different magical community, superheroes, and international and interplanetary politics, not to mention all of the assorted monsters.
* a whole different trope in itself). By the time he's done, the Sun is already up.
* A whole episode of the anime is dedicated to actually fixing this, with Nadeshiko's grandfather Masaaki apologizing to Fujitaka for the Amamiya family's shabby treatment of him. And Fujitaka forgives him.
* A whole episode revolves around Momoka enlisting the aid of Natsumi and Koyuki to steal a piece of art from her father's collection before Fuyuki can see it. It's a portrait of her as a baby... naked.
* A whole field of super-human bones is left in the wake of a nuclear explosion at the climax of
* A whole host of groups show up in the later novels, mostly single world movements in the Talbott Cluster violently skeptical of coming under the Manticoran imperial umbrella or looking to overthrow client governments of the Solarian League. They ranged from a group that primarily focused on damaging property (to the point where, by the time they were finally dealt with, they hadn't killed or even seriously injured
* A whole host of "style" feats exist, which range from the mundane, like Monkey Style or Brute Style, to the fantastically inspired, like Dragon Style or Orc Fury Style, to the
* A whole industry of vegetarian products exists to provide replacements for burgers, bacon, and other meat products. Tofu is the best-known meat substitute in the West. There is also turkey bacon and ham for people who
* A whole lot of people seemed to think that Jade's dreamself survived the destruction of Prospit, judging by fans' reactions to said event containing a whole lot of "ifs" in reference to her being dead. This was despite the fact that her dreambot was clearly shown being destroyed, and, you know, having
* a whole mode built on this trope. You start off with the aforementioned M60

machine gun as your primary weapon with the Magnum as your secondary. The clincher is the M60 has infinite ammo and never has to reload. You can literally go through the entire game holding down the trigger button (which incidentally is the best way to earn one of the harder achievements) and even better if you can somehow find a laser sight somewhere along the way.
* A whole post about the subject of Academic debates, but the winner are
* a whole race of these. They are confident that three Seguleh swordsmen are enough to kick the Pannion Seer's army in the butt.
* A whole range of advertisements for SpecSavers opticians in the UK, featuring, amongst others, a shepherd who shears his sheepdog, an elderly couple who get on a rollercoaster thinking it's a park bench, a volleyball player who spikes a seagull instead of a ball, a lifeguard who mistakes a seal for someone who needs rescuing, an overly enthusiastic aerobics instructor who shows up in an elderly bingo and
* A whole room full of women, including his beloved elder sister, died to protect him right before his eyes, and he got stuck under all the dead bodies for days
* a whole slew of games with more realistic platforming elements (as realistic as running on walls and endless wall-jumping can get, anyway) that rely heavily on parkour.
* a whole sub-basement in the hospital, which doesn't really exist and is some sort of pocket dimension instead.
* a whole year before the others. It didn't take her long before becoming Usagi's best friend without even noticing.
* A Who Needs Sudden Death? variation in the 2003 Rugby World Cup final: a winning drop-goal in extra-time from Jonny Wilkinson with 27 seconds to go, replying to a last minute penalty from Elton Flatley of Australia, averted rugby union's first ever sudden-death third extra-time period to win the tournament for England.
* A whopper in the first season: "The Masked Woman" who appeared frequently early on was strongly implied to be
* A wide culvert running right through the bottom of the wall allows the Deeping-stream to pass out. Having this weak point is a pretty enormous oversight, and since the builders of the fortress were clearly capable of great feats of engineering, there should have been more than one way for them to avoid this: one would be for them to divert the stream through underground pipes; another which might have actually enhanced the defensibility of the walls would have been to dig a proper moat for the stream to fill up and let the culvert be underwater with iron bars blocking it. However there is no moat, the culvert is accessible from the surface, and if there are any bars across the opening then the author doesn't mention them, making it sound like it's wide enough for an orc to fit through. While most of the attacking orcs with scaling ladders and grappling hooks are keeping the defenders focused on the top of the wall, some of them creep like rats through the culvert and get inside, requiring the Westfold-men to block up the inside of the culvert with stones under Gimli's direction as soon as they can. Why they didn't take the opportunity to block it up with rubble
* A widely accepted theory for why people have such vivid memories of alien abductions is because of a phenomenon that's basically "dreaming while awake". When you dream, not only do you have very strange and surreal images, but your body actually shuts down most muscles so you can't move and accidentally hurt yourself. Sometimes you can "wake up" — i.e. your eyes open and you're aware of the room you're in. So imagine; you wake up. You can't move your body. You're dreaming of strange lights. It fits all the tropes of alien abduction, further influencing your dream, and you become convinced it actually happened. This is why it's called "sleep paralysis". It can also lead to dreams of ghosts and other paranormal/supernatural beings. A common account was once of a "crushing hag" sitting on the person's chest, crushing them-hence the term "hag-ridden" for one plagued by nightmares. Demons that sucked people's breath away, or abused them sexually (familiar to UFO abduction) were prevalent in Medieval Europe. With multiple people, misidentification of natural phenomenon, hallucinations, and outright fraud are often proven behind many alien abduction stories. Use of hypnosis (as both the Hill and Walton cases featured, above) has also been found to

* A widowed mother, raising her son by herself is seeing him get married, but she never had the time to have The Talk with him as she was so busy working for the family. She pulled her son over after the ceremony and told him "Son, I've never had time to tell you the facts of life in detail, so I'll make this quick. When you go to bed with your wife tonight, take the stiffest part of your body and jam it in the place where she uses the bathroom." The son nods in agreement, hugs mom, and takes off with his wife for their honeymoon. A little after midnight, mother's phone rings. She groggily answers "Hello?" It's her son: "Mom, I jammed my foot in the toilet.
* A Widow For A Year: Inverted when the policeman deliberately gives the press false information about a murdered prostitute, saying she was killed WITH a struggle when there was no struggle. This enabled him to dismiss the two men who confessed as they were covered in bruises and scratches.
* A Widow for One Year by the time he's over 50 and attracted to women in their 70s.
* A "wiener" is a kind of sausage. Once that word became phallic slang, the names "Wiener" and "Weiner" weren't safe either.
* A Wild and Crazy Guy) See, I told you that the—(begins speaking in complete gibberish)"
* A Wild Badfic Appeared! Commentaries" and "the nicest guys in the multiverse", this is pretty justified.
* A Wild Badfic Appeared! Commentaries flirts with him in her debut. He tells her he's married, and she backs off immediately; however, it's merely invoked because the girl in question is only 11 years old.
* A Wild Badfic Appeared! Commentaries off, she takes deadly seriously at face value, causing her to get provoked easily.
* A Wild Badfic Appeared! Commentaries, reinforcing the lighthearted, somewhat condescending tone of the commentary towards the bad fanfiction it covers.
* A Wild Badfic Appeared! Commentaries whenever a party member references a non-party character or their games. Often, said cameos being other Smashers.
* A Wild Last Boss Appeared!: Ruphas can make Golden Apples and distribute them so others grow beyond the constraints of her "script", and eventually made it her mission to be a thorn in her side, making herself the biggest rebel in existence in Alovenus eyes, and thus someone she has to get rid of.
* A Wild Last Boss Appeared!: Ruphas, despite being gorgeous by human standards, is considered horribly ugly by Flügels because they judge beauty by how close wings are to being pure white. When she was growing up the other children constantly threw rocks at her and her father would beat her if she fought back.
* A Wild Rapper Appears!: A rap segment with no plot relevance begins without warning, with rappers often appearing out of the blue to sing.
* A Wild Rapper Appears! as perhaps the oldest and most famous example.
* A wild turn is a system accusing Peter Parker of stealing the work of long-time foe Doctor Otto Octavius, aka Doctor Octopus to get his science degree. What Peter can't tell anyone is that this was when
* "A Wild Winter Solstice" sets itself up for a possible Twisted Winter Solstice, as Empath during his first visit to the Smurf Village is lost and injured somewhere in the Smurf Forest and is being taken care of by Wild Smurf, whom Empath first encounters but keeps his existence a secret for years, while the Smurfs search the forest for days in the hopes of finding him. Again, things work themselves out in the end and the trope is ultimately averted.
* A Will Eternal takes place in a world made from a titanic flower floating in space. There are also pocket worlds contained inside the petrified bodies of powerful experts.
* A Wind in the Door. Meg spends her entire grade school career and a good chunk of Charles Wallace's butting heads with the strict, humorless, and seemingly uncaring Mr. Jenkins; but during the book's adventure, Calvin shares with her an incident in which his family could not afford shoes for him, forcing him to go to school in a pair of too-small women's shoes that he had to cut the heels and toes off of in order to wear. Mr. Jenkins bought a brand new pair of shoes for him and clumsily

scuffed them in a paper-thin effort to pretend that they were cast-offs.
* A Wind in the Door, which are a long way from modern depictions of "cherubs".) Charles Wallace is apparently the only character who doesn't have a minor brain-BSOD upon first seeing him.
* A Wind Named Amnesia deals with the whole world suffering from sudden amnesia and not a pretty type: people were turned down to almost animal behaviour while only the main protagonist was restored to humanity by psionics and training.
* A window in time opens up to the Proteus, which is near a conveniently earth-like planet.
* A Winner Is You: An ending sequence that's little more than a single line (that is usually filled with grammatical/spelling errors) and a pixelly picture.
* A Winner Is You: Beating a video game rewards the player with nothing but a message congratulating them for completing the game.
* A Winner Is You: The video game ends with nothing more than a message congratulating the player for completing the game.
* A Winner Is You: When you beat a video game, your only reward is the game congratulating you for beating it.
* A Winner Is You: You've won the video game. Here's your reward: "Good job."
* A wise woman does a caroc (the Disc version of tarot) reading on Twoflower in
* A Wish for Wings That Work above, only with Opus rubbing his eyes saying "Ooh! Ow!" instead of commenting.
* a wish, not a specific one: it's entirely possible that he just wished to enter the palace.
* A witch body-swaps with a much younger housewife in "Judy, You're Not Yourself Today!", in
* A witch catches Sam and Dean breaking into his hotel room. The witch uses this trope as Sam's punishment. Sam later discovers that he has spontaneously developed gonorrhea,
* a witch did it occasionally deconstructs this by establishing that Tip is still Tip and the Ozma personality is just a mask put on for the sake of the people.
* , a witch doctor tries to cook him in a pot - not to eat him, but to use him as an ingredient in a potion.
* A Witch's Burden. Elke is rarely without a book and, as expected of a teacher, loves history, languages, and philosophy. She also never shies away from a good debate.
* A Witch Shall Be Born, much of how Salome took over is told by Valerius to Ivga while she tends his wounds, though they are unusually severe for this trope.
* A Witch Shall Be Born, one of the luxuries Salome is after is "handsome men and soft women for my paramours and my slaves."
* A Witch Shall Be Born the title witch did not mind when the magician who raised her drove her off:
* A Witch's Love at the End of the World is about two girls who attend a school for witches. Alice Keating, a prodigy and descendent of the school's founder, is assigned to be the tutor of Mari Muguruma, a strange girl who seems more human than witch. The two grow closer and learn about the secrets of the world of witches.
* A Witch's Tale, Aquell is this towards Liddell, as she sees her as competition for Loue.
* A Witch's Tale, Aquell was once human, but Alice needed her power and turned her into a mermaid in exchange for Oceria helping in the war.
* A Witch's Tale, Babayaga helps Liddell out, gives her advice, and sells potions and items.
* A Witch's Tale, Florin is filled with these; there's even a Fetch Quest where you help two souls in different gardens reunite. When you first see a particular sakura tree, the Mad Hatter talks about their connection to death.
* A Witch's Tale, Gretel wears pink while Hansel wears blue. Subverted since both are girls.
* A Witch's Tale has Princess Rapunzel, who was the first princess of Florin.
* A Witch's Tale has the Cheshire Cat. He's the most antagonistic Wonderland character towards Liddell, and he has fun scaring her or teasing her.

* A Witch's Tale, Liddell wanted to find a powerful spellbook to become a great witch. She found the spell, but also unsealed the Eld Witch.
* A Witch's Tale, the Demon's Mouth Inn is alive, and swallows Liddell to restore her health.
* A Witch's Tale, the entire first playthrough is a dream brought on by Queen Alice to test Liddell. The New Game Plus is the real adventure, and contains story elements not seen in the first one.
* A Witch's Tale, the Wonderland characters often provide exposition. Lampshaded by the Dormouse, who asks if it's Exposition Day.
* A Witch's Tale, you draw runes using the stylus to cast powerful spells.
* A Witch's Tale, you get to play a game of Black Jack against all the other characters.
* A witch with a single viewpoint chapter provides a very good opposing view, though. The Snitch keeps the game interesting because it could end at any second — the problem is that Seeker brooms have advanced so much (while the Snitch's speed has remained the same) that it basically just comes out to which team has the most gold to spend on their brooms. The solution is to standardize the brooms, but then you have the arguments between the people who think a few hours average is a good game (with games of a day or two being exciting in moderation), versus the people who think the game isn't worth watching if it doesn't last at least a week.
* a withered two-hundred-year-old human entombed within a life support system, is (or at least was at some point) in a sexual relationship with Jane, one of his Securitrons in the Lucky 38 casino.
* a witness account reveals that the killer was having delusions of crimes being committed. He killed the boyfriend of the witness, who was making out with her, due to the fact that the killer was deluded into thinking that the witness was being raped
* A witness in "Assistance is Futile" saw what he thought was two partygoers having sex in an alley, only for the man to run off and the woman revealed to have died falling off a roof. If it helps, it wasn't the fact that she was dead that got the unsub off, it was the fact that she had so many broken bones (unsubs have some
* A witness to a crime doesn't want to testify because they are in witness protection in an episode of
* A "witness" trying to frame a boy for the theft of a pocket knife claims the boy took the knife with his right hand, and put it in his pocket while running away. He is found innocent because he has a cast on his left hand and the knife was found in his left pants pocket (planted there by the "witness") and (according to the answers section at least) it's impossible to put a pocket knife in your left pants pocket with your right hand while running. Leaving aside that Encyclopedia was assuming an impossibility out of a difficult and highly improbable physical stunt, the mere likelihood of him putting the knife in his left pocket after he'd stopped running never occurred to him.
* A Wizard Abroad series: Wizards from all over Ireland and Europe have converged to fight a major battle against the Lone Power's forces, and Johnny, the European Senior, gives them the "think about your dependents or pre-existing wizardly obligations and be absolutely sure you can do this before crossing" version, given that people being killed would be a certainty.
* A Wizard Did It: An inconsistency is hand-waved as happening because of magic.
* A Wizard Did It, as spells such as Enlarge Person increase the creature's weight by the usual eight times, but only increases their carrying capacity by approximately 2.6 times.
* A Wizard Did It. Constance was alone on a ship, adrift at sea, for years. Why didn't the ship sink? Why didn't she run out of food or fresh water? Conclusion: Jesus did it.
* A Wizard Did It Grey Goo is an actual cloud of high-tech nanomachines. It's assumed to come from Numeria, where an ancient crashed spaceship left a bunch of high technology scattered throughout the landscape.)
* A Wizard Did It: Hastily explaining an inconsistency has happening because of magic.

* A Wizard Did It: Hastily explaining inconsistencies as happening because of magic.
* A Wizard Did It in the forums, but for a funky and surprisingly stable particle with rather specialized interactions with typical matter, its practitioners are still more intent on viewing it as a science than a matter of magic.
* a wizard did it). It doesn't generally mask his face from the reader, but the characters themselves can't see his face unless he shows them.
* A Wizard Did It. Notably with the spells Reduce Person and Enlarge Person, for which there is an equal increase/decrease in Strength and Dexterity, respectively, but only minor ones considered the shift in mass (mainly for balance reasons).
* A Wizard Did It: Things that don't make sense in the plot are handwaved or explained as "magic".
* A Wizard Did It: What, you want me to explain something that doesn't make sense? Fine. The answer is "magic."
* A wizard does this. It's just a throwaway gag, though, and has no effect over the episode's plot.
* A wizard Edwin hits on some female party members (including Mazzy the halfling!) and likes to talk about many concubines he left gasping after his erotic onslaught. In truth... well, it appears that in Athkatla he's had a fling with a barmaid, who finds him very cute.
* A Wizard in Rhyme, and yet there is no language barrier. French actually was a widely-used international language for quite a bit of the middle ages. Several of the people he meets are visibly uncomfortable with it as a second language (especially the Arabs), and he occasionally has to fall back on magical translation.
* A Wizard in Rhyme, a pair of squires end up dueling each other. Except that the only form of fighting they know is swordfighting, and they're using their fists. So they wind up making a lot of painful but ineffective strikes at each other until the one the hero is friends with accidentally knocks his opponent out.
* A Wizard in Rhyme plays with this. Magic is treated as a neutral force that responds to any kind of symbol as a vehicle for the user's intent. Words aren't strictly necessary, but happen to be the most accessible, convenient, and reliable symbols to use, especially when arranged in verse. Thus, the use of verse is so prevalent that most spellcasters never bother with any other method.
* A Wizard in Rhyme, so all she can do is describe a food she that she doesn't even have a name for.
* A Wizard of Earthsea and sides with him — much to the chagrin of her old bosses.
* A Wizard of Earthsea, Ged, in a calamitous attempt to summon a long-dead ghost, summons some never-exactly specified evil creature whose first business is to attack Ged and maul one entire side of his face. These scars never leave his face, and so he is reminded every day of his arrogance and the balance that he disrupted.
* A Wizard of Earthsea that this is an allegory of the Jungian concept of the Shadow.
* A Wizard of Earthsea, the last task the apprentice wizard Sparrowhawk must achieve before he leaves the school on island of Roke as a fully-fledged wizard is to discover the name of the Master Doorkeeper. Since a wizard will always protect the secret of his name, he thinks long and hard about what form of magic he could use to wrest the information from the vastly more powerful Master Doorkeeper. Eventually he goes before the master and admits he must give up, but only after asking one simple question: "What is your name?" The Master Doorkeeper cheerfully gives him the answer: politely requesting his name was in fact the solution to the test.
* A Wizard of Earthsea, the protagonist laments that he is about to die as a child when a band of enemies approaches his village. Fortunately, he figures out in time how to use his limited magical knowledge to drive them off.
* A Wizard of Earthsea: Turns up surprisingly little, given Ged spends an absurd amount of time being generally passed out. This specific trope only occurs once, at Osskil.

* A Wizard of the Crow comes out and says it: the main character, born in Africa, can only get a cab when it's driven by a black guy.
* A wizard slayer Charname can freely recruit only magical companions with no one of them ever complaining.
* "A Wizard's Staff Has A Knob On The End", and the once heard, never forgotten Hedgehog Song. (Fans have worked out full sets of lyrics for both - the Hedgehog Song has, in canon, at least seventeen verses.) The full title of "the hedgehog song" is
* Awkwafina (Chinese-Korean actress and rapper born in America. Korean from mother's side)
* Awkwafina is Nora from Queens has Nora's cousin Edmund, a Silicon Valley whiz kid. Every word that comes out of his mouth is delivered in such a patronizing, haughty tone.
* Awkwafina is Nora from Queens has Nora's grandmother, the foundation of the family and the funniest character in the show according to most fans.
* Awkwafina is Nora from Queens's junk hanging out from a picture he posted on Instagram.
* Awkward.: After Jake catches Jenna kissing Matty, he is unwilling to deal with either of them. So, when their school does their annual "wheel of pep" at lunch and he's in charge, he desperately tries to pick any girl besides Jenna, who is raising her hand. Unfortunately, Lyssa decides to call Jenna up, ruining his effort to keep his distance.
* Awkward., although given how deep in the gutter (and Lester's pants) his mind is, it's hard to say how much is intentional.
* Awkward. as of the start of the series. Rather than being the result of actual attraction or compatibility, Alex's record of rejection leads him to crave it; Lester being both heterosexual and Alex's housemate, he is perfectly positioned to give Alex the rejection he comes to crave on a regular basis.
* Awkward., but not before several girls (and some guys) reveal that Ricky broke their hearts and they hated him.
* Awkward Father-Son Bonding Activity: A father tries to bond with his son, who is quite reluctant to do so.
* Awkward Father-Son Bonding Activity: Father tries to bond with son; son is not feeling it.
* Awkward First Sleepover: A character is nervous because it's their first slumber party.
* Awkward. got his buzzed mohawk look to look authentically douchey. He had to keep it that way for two months.
* Awkward. has a flashback sequence of a series of Alex's ill-fated blind dates, one of whom is a man who stammers "Alex" in shock and quickly checks to confirm that, yep, that's an adam's apple before running for dear life.
* Awkward. has Alex, who will say anything if it gets him a little closer to target-of-his-affections Lester.
* Awkward. has one that's equal parts evil and douchey, in part because he copped it from Ganondorf, but mostly because, well, he's a douchebag.
* Awkward., Kevin fumbles a box and spills fruit and condoms all over the table. Some questions are better left unasked.
* Awkward Kiss, the two of them admit their feelings to each other, and the rest of the fic is spent exploring just how drastically the course of the story is changed by Asuka and Shinji being a loving and mutually supportive couple.
* Awkwardly Placed Bathtub: Someone has a bathtub located in a rather odd part of the house.
* awkwardly promoted on several Disney properties with little to no relevance to sports..
* Awkward., Matty is secretly dating Jenna and comes across a problem when his best friend, Jake, develops a crush on her.
* Awkward.. More specifically, Lester walks in on housemate Alex making time with his hand, some lotion, and a video of Lester on the toilet... in Lester's room. Apparently, he wasn't expecting Lester home so early.

* "Awkward Silence" Entrance: Everyone's eating and drinking and having a good time...until a character (or several) walk in. Then everything goes quiet.
* Awkward Silence. This leads to Toono having to declare his love in turn to convince Tamiya that the relationship is truly wanted.
* Awkward Silence Toono Satoru's boyfriend is the only one who can read his seemingly blank and expressionless face (other than an old childhood friend of his who doesn't show up until later volumes) and understand his emotions.
* awkward, stutters a lot, sometimes shouts her words when she's nervous, and tries to avoid people.
* Awkward., Tamara wets her pants in the episode "My Love Is A Black Heart."
* Awkward.: The departure of Ernie and Henry resulted in new characters turning up to fill their shoes: Henry (the therapist) is replaced with Dexter (the sage), and Ernie (the douche) with Jermaine (the mega-douche).
* Awkward., we have "An Indecent Promposal", in which it's, well, Promposal season at high school. For example, Jake asks Gabby to prom by serenading her with an original song in the library.
* Awkward. while filming his housemate/crush Lester under the pretext of a student film: "Teacher said, uh, make variety with camera angles. Like I wanna make a high shot, y'know, low shot... cumshot..."
* Awkward Zombie. All of the advanced technology and mental powers in the setting are made possible by mass effect technology. How does everyone speak English? A wizard did it.
* Awkward Zombie, but it turned out to be onetime gag and the series went back to using Smash Bros. characters. The author also pulls strip ideas from the forums pretty frequently, and even has a thread for the purpose.
* Awkward Zombie deciding to use your planet's entire food supply as ammunition.
* Awkward Zombie forums is to remix the most recent comic with past comics.
* Awkward Zombie has the section on the site's forum dedicated to the webcomic itself adorned with the tagline "WHY DOES THIS COMIC SUCK". Yep, with no question mark.
* Awkward Zombie; he suffers an existential crisis when he meets Marth's great-great-great-great-great-great-great-great-great-great-great-greDESCENDANT Lucina, wondering how long he was away; he's relegated to hanging out with irrelevant side characters like Roy Koopa, Grey Fox, and Waluigi, and the only person who recognises him and seems happy to see him... is his replacement, Pit.
* Awkward Zombie imagining a chain of deals that proves to collapse in on itself because the last person wants the very thing Link went questing for in the first place.
* Awkward Zombie In the rant, the artist admits that this is usually how she picks who to Ubercharge when playing as Medic.
* Awkward Zombie in which Sora built the Gummi ship entirely out of guns, making it totally unsuitable as a ship.
* Awkward Zombie — her main reason for being excited about Dark Pit joining the roster is that now she can decorate her hat with his black feathers alongside Pit's white and Falco's blue.
* Awkward Zombie or otherwise suggest they're guilty. Phoenix is then seen offering his services to the lone exception, Mr. Inne Nocent.
* Awkward Zombie skill exclusive to a female-only class. Via some complex rules of inheritance and gender-exclusivity, a daughter fathered by Gaius can get that class. The woman Gaius was about to ask out in the first panel always has a son, while Tharja, on the other hand, always has a daughter...
* Awkward Zombie strip depicted Marth and Roy trying to solve a Rubix Cube. Neither of them are able to do it, but then Link gives it a try... and does so in less than ten seconds. Marth, who was previously dismissive of Link's chances, stops Roy from even finishing his speech bubble.
* Awkward Zombie than the games do. The author was rather surprised when confronted with a game highlighting the difference, noting that "Sometimes I forget that I kinda sorta totally made up his characterization for the purposes of this comic."
* Awkward Zombie where the only other person he describes as beautiful... is his

32nd-great-granddaughter from the future who looks almost exactly like him but with longer hair.
* AWL (and AWL: Special Edition) arbitrarily has the bachelorette with the highest affection towards you propose to you, if you aren't already engaged at the cutoff point (If you haven't gone after one girl specifically, you'll mostly likely get Celia). You get a
* Awlo of Ulm. If you think that's bad, but keep reading anyways, you're in for a time...
* Aw, Look! They Really Do Love Each Other: All potential aspects of the relationship as it is ongoing, but are not limited to the just friends type of romance.
* Aw, Look! They Really Do Love Each Other: Although they fight a lot, the couple prove they actually do love each other.
* Aw, Look! They Really Do Love Each Other: Can apply to friends; they fight a lot but ultimately prove they do care about each other.
* Aw, Look! They Really Do Love Each Other: No matter how much they fight, they really do care about each other very much.
* A.W. Merrick, the local newspaper man, is one of the few people in town with a classical education, so he's prone to overly academic language in the frontier boom town. In one notable scene, he writes an announcement that the smallpox vaccine as "
* AWN shop. Appropriately, it's run by retired Freakshow, a villain group who name themselves in l33t.
* Awoken. A Cthulhu who can take on the form of a gorgeous teenage boy, but still an amoral and murderous Cthulhu.
* Awoken novels, it's more a mockery of this trope than anything else.
* Awoken". When asked if it was an audience-alienating premise, they responded with "That's the joke."
* A wolf at a zoo in England snarls and lunges at the bars of his cage when the Count comes near, but calms down when he gets closer. And later escapes and breaks through Lucy's garlic-protected window.
* A wolf does this after being attacked by a ram in "I Got Plenty of Mutton".
* A Wolf in Sheep's Clothing: A character hides their true self by pretending to be nicer or more harmless than they truly are.
* A Wolf in Sheep's Clothing: Someone who's dangerous pretends to be something more harmless.
* A Wolf in the Soul. Almost everyone in the story is at least partially Sephardi, other than the two major supporting characters who are black converts. The author is even careful to differentiate between Ashkenazi and Sephardi pronunciations when transliterating Hebrew.
* A Wolf in the Soul. Dr. Rumu may actually be psychic, and her Indian-mysticism-based advice to help Greg defeat the werewolf turns out to be very accurate, though ultimately insufficient. A very minor example, but its presence in a religious Jewish novel is surprising.
* A Wolf in the Soul, Greg can't summon up the courage to tell anybody about the weirdness happening around him for the entire first two-thirds of the book. He even blames others for not seeing the pain he's working so hard to keep under wraps. At least in the last third of the book he gets better, but he can still barely bring himself to tell the people from whom he's begging for help unless they tell him they already know he's a werewolf.
* A Wolf in the Soul, Greg feels compelled to correct others' grammar, at least in his thoughts. Even while they're shooting at him.
* A Wolf in the Soul, Greg's inability to gargle silver water helps Dr. Belew figure out that he's a werewolf.
* A Wolf in the Soul, Holmes makes several attempts to explain Greg's lycanthropy in the context of Jewish mysticism. Dr. Rumu, with her Indian mysticism, oddly seems to have a more thorough grasp of exactly what is going on, but despite this, she is less able to provide a cure.
* A Wolf in the Soul, lives in the Har Nof neighborhood of Jerusalem, so its

geography is very accurately depicted. Even the jackals that can be heard from the forest at night actually exist.
* A Wolf in the Soul plays it straight with Professor Toledano, who Greg says "couldn't step out of his rational ideology" and therefore "could hardly even feel the pain in another person's heart". Greg wasn't able to bring himself to show his pain to Toledano at all, so this complaint feels hollow. The book subverts it later, though, with Hakham Dawid, who says many of the exact same "overly rational" things Toledano said earlier in the book, but imbues them with more meaning.
* A Wolf in the Soul presents a werewolf story from the point of view of Orthodox Judaism.
* A Wolf in the Soul, several characters' names have hidden meanings when their names are translated.
* A Wolf in the Soul. They were just joking around, not knowing there really was a werewolf out there.
* A Wolf in the Soul, this is played straight with regards to Greg's physical transformation - especially the one that begins to take place in front of his mother - but Greg keeps his human mind at all times except for during his out-of-body experiences.
* A wolfman-like creature appears in a commercial for Chef Boyardee, but it doesn't stay a werewolf until daylight. In fact, it turns back into a human after eating a can of Chef Boyardee.
* A Wolfrider's Reflections, and her filk song based on the movie Ladyhawke!.
* Awolnation's song "Kill Your Heroes" mentions the fact that "don't you worry, but everybody will die."
* A woman and her elderly mother check into a hotel room in a city that is having a large festival. The mother gets very ill, so her daughter summons the hotel doctor. The doctor tells the woman that her mother needs a rare medicine that can only be supplied by a special pharmacy that is way out on the very edge of town. The woman has to take several slow buses to get there and it takes most of the day to complete the errand. When she gets back to the hotel, she finds that the key to her room doesn't work. When she tells the hotel staff, they act like they don't know her at all and claim that the key she has is not one from their hotel. Worried about her mother, the woman insists that they let her into the room. When they do, the room looks completely different from how she remembered it, it's completely clean and empty, and there is no sign of her mother. The woman gets very upset and lashes out at the hotel staff, who call the police on her, implying to them that she is insane. But after getting her to calm down and hearing her story, the police decide to investigate the situation further. They eventually discover an elaborate conspiracy done by the owners of the hotel. It turns out that the woman's mother had a highly contagious disease, and the hotel doctor figured out she was dying from it. So he sent the daughter to the far away pharmacy in order to distract her. The mother died soon after she left, and the hotel got rid of her body and completely cleaned and redecorated the room, and then engaged in gaslighting when the woman got back. This was all done to hide the fact that there was a contagious disease being spread in the city during the festival, which might cause panic and people leaving in droves, which would negatively impact the profits of the businesses in the area.
* A woman and her mother both conspired to kill an old man, because the man had kidnapped her, and several other women, and forced them to be his bride in his own hidden dungeon.
* A woman appears to have murdered a high-class call girl for having an affair with her ex-husband. It turns out the call girl had discovered the woman was running a ponzi scheme and was killed to keep it quiet.
* A woman asks her husband to take some pictures of himself with his new selfie stick as he goes about his daily routine.
* A woman believes herself fluent in French and orders food. What she actually says? "
* A woman bought a female parrot from a pet store but it had an issue. It would always say "I'm a slut, wanna screw?" She spoke to her priest about it and he said

"You're in luck, I happen to have a very holy parrot, and he bows his head in prayer every day. Maybe he can help your parrot." So the priest brought his parrot over, and put it in the cage with the woman's parrot. The female parrot immediately said "I'm a slut, wanna screw?" and the priest's parrot bowed its head and said, "I thank thee, Lord, for answering my prayers..."
* A woman calls in for help with an issue, but gets very evasive when the tech tries to get the details of the problem. After several minutes, the tech tells her that her computer seems to be working now and she can resume normal operations. He admits at the end that he never found out what her issue was.
* A woman came home to find her two teenaged daughters brutally attacked and raped, with the eldest already dead. Years later, after the killer had found religion as he waited on death row and wanted to atone for what he did, he asked to speak to both the mother and surviving sister. When the sister spoke, the one question she could ask was why
* A woman comes home from work to find her husband dangling from a rope tied under his arms.
* A woman complaining about's discrimination keeps mistaking it for Disney when it's really Illumination.
* A woman covers her sons' ears to keep them from hearing Mike and Marcus's inappropriate conversation which was accidentally broadcast around the TV store.
* A woman enters a bakery of them, probably wasting thousands or even millions of dollars in the process, before she gives up (or, less charitably, before she gets enough of a bad rep amongst attorneys that they won't take her case).
* A woman faked her suicide to look like she'd had an affair with the married doctor she blamed for her child's death and that he'd killed her.
* A woman faking her own murder got the plot rolling in the episode "On The Line", loosely based on the Conan Doyle Thor Bridge story. The audience saw her go through with it in the cold open, including a 911 call where she identifies an old enemy of hers as her "assailant". Sherlock figures it out pretty quickly but soon regrets exposing the plot, because
* A woman fell from the 23rd floor of her hotel and landed on a parked taxi below. She survived.
* A woman framed her husband for her murder to send him to prison while protecting her daughter from an
* A woman from Texas, Treva Throneberry (mentioned in the Live-Action TV section), pretended to be a teenager throughout her 20s and early 30s and moved from foster home to foster home. She got a tuition to go to college and was finally arrested for fraud. In fact, the woman who adopted her turned out to
* A woman gave birth to a black boy while her husband was away. She writes him:
* A woman gets a dog as a prize at a free theater event. She decides to name the dog "Free-show" because of this. One day, she's in the bathtub and the dog jumps out the open window and runs down the street. The naked woman runs down the street after the dog, yelling "FREE SHOW! FREE SHOW!"
* A woman goes to a law firm and says "I got fired from my job, and replaced by the CEO's son, a complete idiot who spends the day harassing female employees and making the others do his work. Can you help me?" "Certainly, ma'am. The law firm of
* A woman in episode four is referred to only by the alias "Margaret," presumably to protect her identity.
* A woman in Florida got a cell phone bill for over $200,000 after spending two weeks in Canada. It was later reduced to $2,500.
* A woman insisting she rewrite the note she wanted relayed via telegraph because she didn't want the recipient to suffer her poor handwriting.
* A woman in Sussex, England, was given a parking ticket and a fine for parking in a disabled bay without a valid disabled badge - but she
* A woman in technical or engineering studies or a man in education and personal beauty jobs will often find themselves the only (fe)male in the immediate vicinity. Depending on their views on the topic, and the attitudes of their co-workers, this can be isolating and unpleasant enough to drive them out of the field entirely in search of a more equitable environment, perpetuating the cycle of

underrepresentation.
* A woman is having tea with her blonde friend when she sees her husband coming up the driveway with a huge bouquet. She sighs and says "Flowers again,
* A woman is kidnapped and gets a power sander used on her hands to get her to cooperate.
* A woman is looking at herself in the mirror, sighing about her breasts being too small. Her husband overhears and says he has a solution. "What's that?" "Rub 'em with toilet paper!" "Toilet paper? How will that help?!" "Well, look at what it did to your ass..."
* A woman is lying in bed when her husband enters the room carrying a sheep under his arm.
* A woman is upset when her father, who walked out on the marriage years before, shows up at her wedding with her mom also angry. The father seems surprised at his daughter yelling over never reaching out to them, saying he sent scores of letters and his ex confesses she hid them out of anger over him leaving them.
* A woman is walking down the street wearing a pair of jeans. She is chased up a tree by a vicious dog. The dog yanks at the hem of her jeans until she takes them off. The dog then returns the jeans to his male master, leaving the girl to return home in her underwear. She gives the man in the apartment a dirty look, and he just smirks at her. Heaven only knows why she's wearing his jeans.
* A woman knows the gorgeous, sweet man she's falling for is married because she can see the tan line around where he took off his wedding ring so he could go cruising for women.
* A woman learns that she does not have long to live: she composes a dating profile for the husband she leaves behind.
* A woman lets in a raccoon at the back door thinking it was her cat.
* A Woman Looks at Men's Buns which is a collection of pictures of men's butts, Jenkins calls herself a "connoisseur" of men's butts.
* A woman mistook Karl Malone, a future Hall of Fame basketball player, for a skycap while he was waiting to pick up his brother at the Salt Lake City airport (he played for the Utah Jazz). Malone obligingly carried the woman's bags to her car and revealed himself only when she offered him a tip afterward.
* A woman murders her alternate universe clone and takes her place. Grant reveals evidence of the murder to her family and calls the police, knowing that she can't furnish any realistic defense.
* A woman named Lee Redmond grew her fingernails out for thirty years to a length of two-and-a-half feet each, breaking the record for longest fingernails. In 2009, she was in a terrible car crash. She sustained severe injuries and broke off all of her nails. Upon finding out, she was devastated.
* A woman named Shellie Kepley became concerned because she could not reach her father, Paul Gruber, despite the fact that he continued to send her greeting cards for various holidays and events. However, she had noticed that his signature was different. The next time she called him and left a message, she reminded him of her son's upcoming birthday, as well as the money he had promised. Sure enough, she promptly received a card with a check for $25. However, this only
* A woman named Xaana has been found attractive by aliens on several occasions.
* A woman notices her elderly husband chatting up a young woman at a party. She goes up behind him and says "Dear,
* A Woman of Paris and her poor former boyfriend. The sugar daddy really doesn't care and is perfectly willing to get another girlfriend if she wants to break up.
* A Woman of Paris, who was stretching himself by directing a drama that he didn't star in, appears briefly as a railway porter.
* A Woman Of Substance, Blackie tells Emma to list him as the father of her child on the birth certificate when she refuses to name the real father, so the child will not have the shame of having the father listed as unknown.
* A Woman Of Substance with the heroine and the cad who is after her sheltering a cave after being caught in the rain on a picnic (although it's not love, merely lust). It's certainly in the TV mini-series. I don't know about novel.
* A Woman Of The Iron People (copyright 1991) not only has the Soviet Union

survive, it has communism as the dominant political system of Earth at the time of the First Interstellar Expedition (on which the main characters traveled).
* a woman perform a Mercy Kill and tearfully ask Barnaby if it was the right thing to do. He doesn't have an answer.
* A woman rescued a female genie from an amorous male genie — by throwing a rock at his head and killing him. The grateful female genie offered to help the woman in the future if she needed it.
* A woman returns from work early to see her mother in a chair with her feet in a tub of hot water, her husband standing behind her mother holding a bag of quick-setting cement, and her mother says "Well dear, you husband's nicer than I gave him credit for,
* a woman's brother-in-law and her therapist conspire to make her think she's going insane, seeing her dead husband's ghost.
* a woman's face. So, to Tanukichi and the readers, Oboro still looks like a girl having an orgasm.
* A Woman's Face, Torsten ogles two women dancing with each other during a very drunk get together. Yes, the Code also forbids "[d]ances which emphasize indecent movements"
* A woman starved to death after embarking on a spiritual diet that required her to stop eating or drinking and live off sunlight alone. The Swiss woman in her fifties decided to follow the radical fast in 2010 after viewing an Austrian documentary about an Indian guru who claims to have lived this way for 70 years. The woman died in January 2011 in the town of Wolfhalden in eastern Switzerland. Followers of the cult of Breatharianism believe that the human body can survive on sunlight alone; this was the fourth recorded death related to the cult.
* A woman tells her story: "Yesterday, I was walking on the street, and suddenly saw a hundred dollar bill lying on the ground. "Oh, lucky, I found that!" I thought. I bend down to pick it up... suddenly I feel... "No, I'm working for it".
* A woman told a story on herself, claimed to be true, which she submitted to a magazine article. She and a small group of friends were going to a party where they didn't quite fit in with most of the people and felt socially anxious. To cope, they agreed to tell each other classic children's stories so they could appear to be in conversation. She was telling the story of Goldilocks and the Three Bears. The room went silent on, "Somebody's been sleeping in my bed!"
* A woman traveling alone stops for gas late at night. When she tries to pay for the gas, the attendant tells her that her credit card has been declined and asks her to come into the office. She goes into the office, but the attendant starts acting creepy and locks the door. She escapes and runs back to her car with the attendant in pursuit. She drives away in a panic and doesn't hear the attendant screaming that
* A woman tries to take the murder rap for her son, but it doesn't work because she gets details of the crime wrong.
* A Woman Under the Influence that eventually leads to her being committed to an asylum. She comes home, but her mean, constantly shouting husband Nick winds up provoking a relapse within hours after her return. After an ugly scene that involves Nick hitting Mabel and Mabel cutting her hand, they both calm down. He bandages the cut on her hand and they go to bed. Roll credits.
* A woman walking the other way sees this, waves at the man, and says, "Excuse me, but you have bananas in your ears." I said you have bananas in your ears!The man shakes his head and says, "I'm sorry, I can't hear you! I have bananas in my ears!"
* "A woman walks into a bar holding a duck and orders a drink. The bartender says "What are you doing in here with that pig?"
* A woman was arrested in 2015 for using a counterfeit $5 bill; she claimed she thought
* A woman went to a pet shop and immediately spotted a large, beautiful parrot. There was a sign on the cage that said $50.00, which seemed awfully cheap. Why so little?" she asked the pet storeowner. The owner looked at her seriously and said, "Look, I should tell you first that this bird used to live in a house of Prostitution and sometimes it says some pretty vulgar stuff." The woman thought

about this, but decided she had to have the bird anyway. She took it home and hung the bird's cage up in her living room and waited for it to say something. The bird looked around the room, then at her, and said, "New house, new madam." The woman was a bit shocked at the implication, but then found it kind of amusing. When her two teenage daughters returned from school, the bird saw them enter and said, "New house, new madam, new girls." The girls and the woman were a bit offended but then began to laugh about the situation considering how and where the parrot had been raised. Moments later, the woman's husband came home from work. The bird looked at him and said, "New house, new madam, new girls; same old customers! Hi, Nick!"
* A woman who appeared to have died in a car accident actually died of toxic shock (from a sponge which was left in her after surgery) while driving.
* A woman who attended the final weekend of the New York City staging of
* A woman who decided to commit suicide in Soldier Township, Kansas shot herself in the head, survived, had second thoughts, and called 911. By the time firefighters arrived she had passed out and they assumed she was dead, so they went outside to protect the area as a crime scene. She then regained consciousness and
* A woman who had an accident and lost several years of memory, including that of her husband, was the inspiration for the film
* a woman whose book he criticized, but is unaware of that fact. She makes him a mushroom omelet, and while he is eating she mentions that she is an amateur mushroom hunter, and that she'd picked those herself. He panics, goes to the emergency room, and has his stomach pumped, only to find that they were perfectly ordinary mushrooms, and she has never picked them at all. The kicker: he had criticized her book for its inability to make the story seem real.
* A woman whose boyfriend was holding her and her three children against their will called for help through an order with the Pizza Hut app.
* A woman who was in a car accident and died (from bleeding out due to lacerations on her spleen) in an apartment while feeding a friend's fish
* A woman who was pulled over and arrested by a traffic cop in Palm Beach, Florida accused the cop of raping her.
* a woman who yells "Taxi!", gets in a car, and tells the driver to take her to some location. After the car doesn't go anywhere, the camera pulls back to show she's in a police car.
* A woman with a dog and a man with a cigar are sitting across from each other on a train. The woman complains about the cigar smoke, the man complains about the yapping dog. The woman, in fury, rips the cigar out of the man's mouth and throws it out the window. The man then grabs the woman's dog and throws it out the window. Both sit in silence. Finally the man says "I am so sorry, I lost my temper. I shouldn't have done that." The woman, also sorry, says she was unladylike in the first place. Then they both look agasp out the window, for running along the side of the train was the woman's dog—and guess what it had in its mouth? THE BRICK!
* A woman with an axe to grind against the titular Vampiress (said vampiress had killed her family) got turned in an unusual fashion. After D killed the vampiress, Elena asked D to join her in ruling over the humans and comments that being a vampire is so much better. There's quite a bit of insight given into her psychology, though. Averted with a later human, who resisted/rejected it.
* A woman with a skin cancer that's spread to her brain and caused her hallucinations of a dead love
* a woman with implants was saved from serious injury in a car crash by her augmented breasts, which served as airbags.
* A woman wrote to Dear Abby to complain about a mysterious young woman who was visiting her married neighbor late at night, being admitted by the husband and later let out. The woman was sure that the man was "sneaking this tart in for sex for his poor wife sleeps upstairs". Reader response suggested that the wife might be fully aware that this young woman was coming over. In fact, the young woman might even be there to see the wife herself. The responses ultimately said that the nosy neighbor was jumping to conclusions, and advised her to butt out.
* A woman wrote to Dear Prudence citing her coworkers' concern over the bruises

that she often had on her arms and legs. They were clearly not believing her vague excuses and thinking that her boyfriend was beating her when in truth, they were engaging in
* A wonderful example as Breeze finally realizes that Kelsier didn't in fact bribe Lord Renaux, but instead simply had him killed and replaced with a
* "A Wonderful Flag-less World" is a song about subverting tropes, and whether constantly subverting every trope makes for an interesting story or not.
* A Word For Heathens that rules everything have had devices surgically implanted in their brains that cause them to be in a constant state of religious righteousness; in other words, they constantly feel as if they are the hand of God, doing God's will. Since the story is narrated in the first person perspective, everything that happens is described in religious ways, since the main character is in the thrall of artificially-induced religiosity.
* A word of caution to artillery commanders: Artillery batteries are themselves highly tempting targets for enemy artillery strikes. If you
* A Word of Warning is about a vampire whose only resemblance to the usual is that its a huge bat with human intellegence.
* A word on gasoline engines: One of the (many) myths that gets passed around regarding the inferiority of American tanks mentions that they burned gasoline rather than diesel fuel, making them far more likely to catch fire in combat. While it is true that many American tanks (including the Lees and Shermans) burned gasoline, it is also true that most German and British tanks did as well. For various reasons, including the state of the art of engine design at the time, only the Soviets (and
* A work based in the Titanic disaster would be the last place to expect this trope. However, two animated features made in the wake of
* A work, episode, scene, etc. receives a severe and widespread negative reception on the Internet.
* A worker answering their home or cell phones with their job's standard greeting.
* A work goes over the top in promoting a product, sticking brand labels on everything from street signs to the characters' clothing to the
* A work has a creator who has some highly questionable views that people were originally able to separate from the work, but eventually spur people to examine the work more closely, which reveals a lot of previously undetected
* A work makes a big deal out of how it refuses to indulge in product placement
* a work or character is a rip-off of another due to superficial resemblances.
* A work takes a tongue-in-cheek ad break to shill a product in a way intended to poke fun at real advertising campaigns.
* A work that is satirical in nature is done in an extremely clumsy and ill-conceived manner rife with
* A work that may have been well-received at the time it was released
* A world built around a particular technology that is pervasive and extrapolated to a highly sophisticated level.
* A World Called Solitude between understanding as much and viewing her as a Betrayer Belinda.
* A World Gone Mad, the entire crisis is resolved off-screen, with the solution only being mentioned in a brief newscast as having been "A clever scheme by the Australians involving their local frog population".
* A world government evolved out of cooperation between the US and USSR in the 1990s. When the real 1991 came around, Pournelle retconned the timeline so the CoDominium was founded in 2000. Not to mention also adding a Soviet coup to reestablish the USSR
* A World Half Full: No matter how bad the world gets in an Enlightenment story, there will always be hope for improvement.
* A world history textbook had the line, "But the French had one resource that the rest of the world did not: The Beaver." There is simply no way that was unintentional.
* A World Less Visible, Gabriel regularly gets stared at by both genders.
* A World Less Visible, getting a divorce seems to have greatly improved Ted's

relationship with his ex. She enthusiastically approves of his new boyfriend.
* A World Less Visible: Has a fairly realistic portrayal. The recipient has his ribs broken, it only barely gets his heart going, and they have to get it going a few more times in the ambulance. He doesn't wake up until a few days later.
* A World Less Visible Magda and Stephan technically kidnap Ash instead of turning him over, even going so far as to fake Magda's death in the process. They do it for his protection, as he's now aware that werewolves exist and in a very fragile state of mind.
* A World Less Visible set in the modern world. Witches, werewolves, and other such creatures are real. Published on deviantART. It consists of a group of short stories, but there are multiple crossover episodes.
* A World Less Visible, you can be forgiven for being upset Sima's death isn't horrible enough.
* A World of Bloody Evolution with a Heavy Flamer is not the brightest move.
* A World of Difference has the planet Minerva, placed where Mars would be.
* A World of Difference set on a larger, inhabitable fourth planet (called "Minerva" instead of Mars), the 1st expedition's photographer lugs along an entire photography lab to print out all the pictures taken.
* "A World of His Own" was about a playwright who could bring his characters to life by describing them onto an audio tape. When at the end Serling apologizes on-screen for the silliness of the plot, the playwright pulls out a tape labeled "Rod Serling", and tosses it into a fireplace. Serling fades away.
* A World of Ice and Fire, there's mention of the Hairy Men, a subspecies of shaggy, stout humanoids that were once very widespread in western Essos, dominating the central grasslands and the western hills and islands, but were displaced over time by the advance of the humans, who drove them out of their kingdoms one after the other. It's hinted that the Ibbenese are all that remains of their race.
* A World of Wonder. The maximum penalty in Wonderland is to be "given pause," and forced to live your last hours of freedom over and over until the sentence is up.
* A World Out of Time, Corbell flees the State in a ramship. His "Checker" (effectively, slavemaster) sends his "personality" over and over at the computer in his ship, being unable to enforce his orders any other way. The computer very much wants revenge due to the personality overlay, but it's also programmed at a deeper level to obey Corbell's orders, which sets up an interesting dynamic that profoundly impacts the plot.
* A World Out of Time has an immortality treatment for adults that involves removing impurities from the body.
* A World Out of Time, itself an expansion of the short story "Rammer", has this as a central plot point.
* A World Out of Time protagonist is revived into a world ruled by the State, a totalitarian government that controls all of Earth and its offworld colonies (although the colonies have something to say about that later in the novel).
* A World Out of Time, where the protagonist has a conversation with his State-assigned case worker about the strengths and weaknesses of an empire based on monopolizing vital resources (water being the example).
* A World Without Heroes follows the story of the main character, Jason, who is doing everything in his powers to get home.
* A World Without Rainbows, Twilight find herself sent to another world where the Rainboom never happened. Because Mane 6 never become friends, they weren’t there to stop Nightmare Moon.
* a worm impersonated a chopstick to trick Booker, the worm talked to Booker, who called him "Mr. Chopstick" and only later realized how odd it was for a chopstick to talk.
* A worm tells Booker his mother swam after garbage scows. Booker chases the worm in retaliation but gets stuck in the worm's hole. Then Orson, whom Booker affectionately calls "Mom", shows up in a swimsuit and tells Booker to hurry up, because the garbage scow is coming down the creek. Booker groans in frustration.
* a worthless wooden pawn the consolation prize, and gets Donald to replace him as head of his business empire in the hopes that he'll ruin his profits for the year

while Scrooge goes off on a holiday. Near the deadline he is livid to find out that Donald has actually been acting responsibly and his profits have shot through the roof. Then it's subverted when a stock market crash in the last minute makes Scrooge the biggest loser in the contest in one swoop. Oh, and the reason why he wanted the wooden piece was because it would have completed an invaluable chess set that Scrooge already owned and kept hidden in a vault.
* a would-be assassin whom she has just had shot or politely apologizing to Lagoon Company for any inconvenience they may have experienced during their last mission which ends with some unlucky bastard's apartment exploding.
* A would-be cowboy finds, rather than the Old West, he's put into the "real West" of modern times but is drawn to the young widow and her son at a ranch and decides to give it a try for real.
* A wounded Damar tried to say some last words, but died after only saying "Keep..." in
* a wounded Russian bodyguard who answers a manipulative Russian diplomat's cell phone right after Jack slaughtered the entire detail.
* A Wraith does this with two assault rifles. Somewhat averts most of the problems with the trope. Wraiths are much, much physically stronger than humans. He is completely inaccurate, doesn't fire enough shots for reloading to be an issue, and never fires or even raises both guns at the same time. Basically seems to invoke the trope to avoid the need to reload, which he would have if he only had one gun.
* A wrecked and empty version of the once-bustling Krimson City is a recurring area in the latter parts of
* A wrestler no longer employed by a company continuing to show up "as a fan" is not uncommon, especially when the company's contract leaves room for them appearing on camera for another show, such as
* A Wrinkle in Time (2003)) stated it. It didn't air in the United States until May 2004; it had aired in Canada a year earlier.
* A Wrinkle in Time (2018) also singled out the movie as an example of white male critics criticizing something that "wasn't for them". While the latter did have a point in that female critics did seem to give the film a slightly warmer reception - she found herself getting plenty of criticism for implying males were incapable of enjoying a story about female empowerment, or that females had lower standards for entertainment.
* A Wrinkle in Time (2018) pointed this out when she complained about the lack of female and racially diverse movie critics, mentioning the film by name and saying that it didn't get a fair shake from the mostly white, male movie critics due to the fact that the movie wasn't intended for them, which itself was met with a mix of praise and backlash.
* A Wrinkle in Time (2018) to become black. Even people who didn't like the film praised Storm Reid for her performance.
* A Wrinkle in Time added action sequences as the characters travel across the hostile Camazotz wilderness to confront IT.
* A Wrinkle in Time and its sequels feature numerous plot devices to get the characters to travel in space and time and even into their own bodies, most of which are based on real scientific concepts. This makes reading them as a kid and as an adult two very different experiences.
* A Wrinkle in Time briefly, when Meg's father is giving Calvin some of the backstory about the project. He left successfully, but they never found out what happened to him (and none of the sequels give any indicator, either).
* A Wrinkle in Time comes to resent, almost hate, Daddy. Fortunately, she gets better and realizes that she (not Daddy) must correct what went wrong. The three Ws even view her as highly likely to succeed where nobody else can — for one specific reason.
* A Wrinkle in Time for the entire planet, because even the plants are gray.
* A Wrinkle in Time has helped it break out of the ghetto thanks to its focus on the science of space-travel and the father-daughter relationship. Perhaps partially helped that laypeople have actually heard the word "tesseract" thanks to Marvel, whereas when L'Engle first wrote her book, it was a pretty esoteric idea even by

the standards of hardcore sci-fi fans (since the theory was very new).
* A Wrinkle in Time have nothing to do with this, being a geometric concept related to cubes (basically, a Tesseract is to a cube what a cube is to a square). Wormholes were not topical at the time.
* A Wrinkle in Time is the most famous of L'Engle's Time Quintet partially because of the tidy little Newberry Award on the cover.
* A Wrinkle in Time is this, though only his family knows it. Since he refused to talk until age four, and refuses to talk to those who aren't family, he is labeled as "dumb" by the townsfolk. In reality, he's incredibly bright. His mother reads him medical journals as bedtime reading, and he is also able to decipher people's emotions. As a result, he has a hard time relating to his peers. When he does display his intelligence, he is told he is a liar or to stop showing off. He also has a problem with being bullied. However, he still shows signs of being a child; he is incredibly proud of his intelligence and thinks himself, at times, infallible. He is warned against it by the Ladies, though it eventually leads to his possession by IT.
* A Wrinkle in Time, Meg Murray's brother Charles Wallace has been converted to evil by the being called IT. She frees him by concentrating on and expressing her love for him.
* A Wrinkle in Time most of its sequels, evil entities such as the Black Thing and the Ecthroi have the power to turn the stars dark.
* A Wrinkle In Time movie, she's about the size of a house. She shrinks to human size later on though.
* A Wrinkle in Time. Mrs Which has a difficult time materializing in the first place, so her form is always hazy and her voice has a distinct echo.
* A Wrinkle in Time, Mrs. Which takes on this form, with a pointed hat and a broom. While she's scary, she's a benevolent force, making her guise a pun rather than an indication of her nature.
* A Wrinkle in Time one of the steps on stairs (not stairs on the steps) creaks and Charles Wallace uses that to signal to Meg that he wants a conference.
* A Wrinkle in Time that rules over the world of Camazotz, refers to itself as "The Happiest Sadist".
* A Wrinkle in Time to explain to the children how "tessering" through space works.
* A Wrinkle in Time was rejected at least 26 times before Madeleine L'Engle found a publisher. Reasons for rejection included the fact that it was a sci-fi story with a female protagonist and its frank depiction of evil being inappropriate for children. It went on to become a beloved novel with multiple sequels.
* A Wrinkle in Time we learn that Jesus, da Vinci, Shakespeare, Einstein, Bach, Gandhi, and Euclid were all fighters in the interplanetary battle against the Dark Thing.
* A Wrinkle in Time whether the 2003 film lived up to her expectations. She said "Oh yes. I expected it to be bad, and it was."
* A Wrinkle in Time, who's said to be a popular athlete at Meg's school but has no problems hanging out with geeky, bespectacled Meg and going on a multidimensional space quest with her and her brother Charles Wallace.
* A wrist-mounted device that shapeshifts the wearer into ten (or more) forms with varied superpowers? Having it means meeting alien heroes, beating down bad guys, and being able to do your chores in a hurry? Oh heck yeah.
* A writer dies and St. Peter gives him his choice between heaven and hell. He's shown hell and all the writers are chained to desks and being whipped to write faster. He says no, and asks to see heaven. In heaven all the writers are, again, chained to desks and being whipped to write faster. Frustrated, he asks St. Peter what the difference is. "Oh, in heaven you get published!"
* A writer posted a list of musicians who were in great bands but had terrible solo careers. He invoked this trope to justify including
* A writhing, sentient mass of tentacles which entangles the engine room of Figaro Castle and prevents it from returning to the surface. The tentacles can ensnare individual characters and drain their HP.
* A written rather than auditory version occurs in "Up at Bat", when Gilligan runs

away after believing he's become a vampire. He leaves a note telling the other castaways this. The Skipper finds it and, with semi-affectionate exasperation, asks why Gilligan had to do something stupid like this. Then he finds a post-script saying that running away was the only stupid thing Gilligan could figure to do.
* A WWII Flying Fortress is hit over Europe. The young co-pilot manages to get her home, saving all aboard, thanks to the advice and moral support of his highly experienced but critically wounded captain. As soon as they land the kid runs to drag a medic onboard for his CO. The man examines the apparently unconscious officer and shakes his head. "Sorry, son," he says. "He's gone, must have died instantly."
* "AWWWW (CITY NAME), DON'T YOU DARE BE SOUR! CLAP FOR YOUR TAG TEAM CHAMPS AND FEEL THE POWAAAAHHH!" "It's a New Day, yes it is!
* Awwwwww, Drumheller", Alejandro forges a picture of Cody and Heather sleeping next to each other in the jet's economy class. He hands it over to Sierra to turn her against Heather and is successful for much of the day's challenge until Cody gets his hands on the photo. Cody argues to Sierra that she never leaves him alone, so the photo can only be edited. Sierra sees reason and the two go gunning for Alejandro.
* A+X #13 Natasha finds it so amusing that she feints having left something behind just to go back and flash the guy again.
* AX.25 in particular is a link layer protocol (like Wi-Fi and Ethernet) for linking computers over ham radio.
* Axa: Jon encounters Axa in the wilderness, and claims that he has forsaken the Domed City to be with her. Axa catches Jon radioing his position and discovers too late that she's being captured and taken back to the Domed City.
* Ax always calls the leader of the group Prince Jake. (Ax is an Andalite, and 'Prince' is a military title.) During one issue where only the pair of them were left, Jake tells Ax that there aren't enough people around, so he should be called The Jake Formerly Known As Prince. Later, when the group is back together, the two go through their
* Axa: Matt has a bayonet tied to one end of a staff. He uses it in strip #14 to kill a giant spider poised to devour Axa. He then uses it to cut away the webbing that held Axa in place in strip #15, which gives a decent view of this makeshift weapon.
* Axa, most of the time, Axa ambles about her ravaged world wearing only a bandeau top and a loincloth made from the tatters of her old Domed City uniform. That bandeau top routinely deserts her whenever Axa has to fight for her life or her freedom.
* Ax, an Andalite, looks at Earth's sky with the waning moon and thinks about how his planet has four moons, at least two of which are always visible.
* Axas. What's left of Las Vegas fits this trope, in that while it has lost its neon glare, the gaming continues unabated. In fact, gladiator games were added so that desperate losers could score a sizable jackpot, provided they survive all the other losers.
* Axa, the middle people consider freeway intersections to be temples, and TV sets to be altars.
* Ax at one point is convinced to take the blame for giving humans the morphing technology to spare his brother the shame, but fails to think up a decent lie about it. When an Andalite captain later ask how he met the Animorphs he replies with the truth: They rescued him from his ship at the bottom of the ocean...using technology he supposedly gave them. The captain catches on instantly.
* Ax Craziness in everyone who gets wet; it affects animals as well as humans.
* Ax-Crazy, a career criminal, or in possession of some other romance-derailing personality trait.
* Ax-CrazyAfterwards he blew up the planet where he got the therapy; it was less than successful. Clearly, he is a bot of his word.
* Ax-Crazy Alpha Quintesson has more to him than meets the eye, but he's... complicated. And definitely not part of a G1-style Quintesson race.
* Ax-Crazy, and always a stone throw away from charging into the wrath of the

Autobots or even his own abused and vengeful minions. As such, Cyclonus spends much of his time desperately trying to appeal a more stable leadership to Galvatron, with a wavering success rate.
* Ax-Crazy and hatred towards all other races (especially surface Elves), rampant sexual depravity, and various practices instituted by Lolth designed solely to humiliate and demean her own people.
* Ax-Crazy and is almost undoubtedly the most ruthless and sadistic raider boss in the whole DLC.
* Ax-Crazy, and most of his jokes involve his love of rape and murder.
* Ax-Crazy and offering his guests wine. It's suggested to be a façade to lull his victims into a false sense of security.
* Ax-Crazy and taking out their issues by shooting at noncombatants when he's in a combat zone. Not because he gives a crap about their lives, but because he wants to know that his backup can be relied upon and stay professional.
* Ax-Crazy: A person who is both mentally unstable and violent; very likely to commit murders.
* Ax-Crazy are a trio of zealous survivalist snipers, a father and two sons.
* Ax-Crazy aren't received well. One particular example that stands out is when he "joked" with the airline stewardess (of an airplane he eventually hijacked):
* Ax-Crazy at any second. At least until he thought he saw her with the maitre d'...
* Ax-Crazy attraction to Jimmy, her dangerous and immoral inventions and experiments, and her love of injury, torture, and destruction. As you might guess, she's quite hilarious.
* Ax-Crazy by the effort of trying to physically tear her way out of a cell that constantly regenerates around her.
* Ax-Crazy Chaos Space Marines, as it took until 5th Edition and its emphasis on the newly created Red Corsairs warband for this scheme to show up in canon.
* Ax-Crazy cop who shared her beliefs on killing criminals. It went very badly.
* Ax-Crazy frequently use akimbo weapons. The most notable of these is when the biggest Tremor brother wields a chainsaw in one hand and a DAO-12 revolving shotgun in the other.
* Ax-Crazy, has since had multiple fan video game adaptations, and has frequently been pitted against Sonic himself in fanfictions and videos.
* Ax-Crazy have made certain parts of the fandom feel that he's completely awesome.
* Ax-Crazy he's telling a joke and if it has a point he never gets to it.
* Ax-Crazy indicates that this was entirely deliberate and that Fain had always been intended as a character whose role in the conclusion was minimal but that readers would be drawn heavily to speculate about.
* Ax-Crazy in season seven, primarily because she was took the potentials out to let off steam and was seen as more reasonable than Buffy.
* Ax-Crazy in the first two lines and then each next tries to top the previous one.
* Ax-Crazy, is capable of vomiting up a fully activated chainsaw. As a symbol of his affection, he uses the chainsaw to make an ice sculpture of...a chainsaw.
* Ax-Crazy is this. He's a boy with an attractive face, and a (seemingly) sweet personality who turns out to be all levels of bat-shit crazy.
* Ax-Crazy Itachi was really screwed up by torn loyalties, Pain corrupted by the futility of constant war, and even the main villains of the entire series were messed up by clan warfare and the casualties of war. The series does not claim that their actions are justified because of that, but the messed-up system of the shinobi world is shown to be responsible for many of the monstrosities.
* Ax-Crazy. It also is worthy of mention that once you get far enough into slaaneshi cultism, everything you do to yourself/other beings is for some kind of high. Removing your own arm then replacing it with someone else's leg, for teh lolz.
* Ax-Crazy. Itoshiki-sensei is killed and she "replaces" him with a small doll to cover up the crime. She quickly becomes paranoid about the rest of the class and they are replaced by dolls as well. While everyone is shown to actually be hiding safely under the school, it makes you wonder when the next scene appears to be

Chiri happily telling her parents about her day- and then you see she is addressing dolls...
* Ax-Crazy killing machine that barely responds at all to Jaime's wishes. Jaime had to flee his hometown to prevent the Scarab from killing everyone around him. This is still a better deal for Jaime, since the Scarab normally should have taken full control of him. Jaime has recently gained much more control, though the Scarab's Plan A is always to kill.
* Ax-Crazy land is punctuated with the steady decay of his body and growing dependence on Dalek-like replacement parts, making him a poster child for this trope.
* Ax-Crazy later and lashes out at the genealogist who uncovered the secret, and the body gets left in the bed of Doc Robbins and his wife, the genealogist's next clients.
* Ax-Crazy laughs once when Eda asks her why they're still after Balalaika even though they killed the guy who hired them.
* Ax-Crazy loon who doesn't feel pain and is not above provoking some of the aforementioned injuries.
* Ax-Crazy love for killing and bloodshed, he's quite sociable and sympathetic to Trinity, even after he realizes that Trinity is an Angel spy.
* Ax-Crazy manga, with the major exception that instead of Adult Ryoma, it was the classic version who did it.
* Ax-Crazy maniac who slaughters all in your path...or a Villain With Good Publicity who uses the respect and gratitude of the people to further your own evil ends.
* Ax-Crazy — the far more reasonable Eldar, Tau, and Imperium of Man are still at war with one another, as well as being riven by internal conflicts. Of course considering the absurd danger most other alien species present, it's not a huge surprise that the Empire or Eldar aren't really willing to sit down and try to work out their differences. The Tau do actually work with other alien species occasionally, but it's possible this means enslaving and or brainwashing them.
* Ax-Crazy mercenary and Frank's arch-nemesis (or as close as it gets), who is a former Green Beret, and didn't even wait to be kicked out to start a drug-smuggling operation in Nicaragua.
* Ax-Crazy: Nothing says "This guy is evil" quite like an unbridled tendency to inflict violence on others unprovoked.
* Ax-Crazy now has either the most awesome or the most terrifying boyfriend in existence.
* Ax-Crazy nymphomaniac who is obsessed with getting Ron back , and doesn't mind manipulating and abusing other characters in order to get her way.
* Ax-Crazy of the Balkans, and thus wouldn't be involved in their antics but wouldn't fit in other comics set in Europe as well.
* Ax-Crazy one incarnation, and rational and contemplative the next. On the other hand, before meeting the heroes she was mind controlled by a villain, whose brief order to love Torg has been thought to have conflicted with later orders, which is thought to be the root of her insanity in the first place...
* Ax-Crazy Patrick Bateman, enters a room in his apartment that has the words "yuppie scum" written all over the walls in an erratic and disturbing manner.
* Ax-Crazy personality makes it that none of Red's Pokémon are able to tolerate its presence, except his Pikachu and Charizard.
* Ax-Crazy: Psychologically unstable and presents a clear danger to others.
* Ax-Crazy she is much more a normal teenage girl, albeit one with several quirks from her upbringing.
* Ax-Crazy, she wants nothing to do with him when she finds out who he really is.
* Ax-Crazy: Some of the best occupants of the Tyson Zone are shining examples of this trope.
* Ax-Crazy. Somewhat subverted in the fact that he really does love her. Which in his world apparently translates to telling her how much he wants to kill her.
* Ax-Crazy stranger who happened to have a grudge against Judges, and the last group was recruited for back-up by Dredd himself to storm a building full of

hostiles and were killed because they lacked training.
* Ax-Crazy tendencies after being corrupted by the Dead Universe. Unlike his comrades he was well aware that this was a problem.
* Ax-Crazy tendencies, trying to keep them alive by managing their limited supplies and training Tucker and Caboose to be more effective soldiers.
* Ax-Crazy: The antagonist is often crazy and prone to random killing. His unpredictability makes him even more dangerous.
* Ax-Crazy, then the victims all have something to do with one another.
* Ax-Crazy to have been completely rebuilt and given things like controls Orks know how to work.
* Ax-Crazy too turned on by the heat of battle in episode 5 and fondles her magic spot out of pleasure behind a tree. Moments later, she masturbates, with the stuff visibly dripping off her hand — er, if anthromorphized assault rifles actually can do that sort of thing.
* Ax-Crazy villain Bellatrix Lestrange. A canonical scene where Bellatrix tortures a captive Hermione has been given erotic twists in fan fiction and fan art.
* Ax-Crazy (who he had threatened to rape earlier in the season), she ends up breaking his drill to little bits.
* Ax-Crazy who is also the well-respected Chairman of an all-girl Vietnamese high school.
* Axe!, a group of gangsters bludgeon a man to death with a child's doll.
* Axe and Cross enforces it on witches, because if they were to be left unchecked, there'd soon be another Witch Queen wannabe out to take over the world.
* Axe Before Entering: Using an axe to cut your way through a shut door.
* Axe Body Spray (that's Lynx to Brits, Irish, New Zealanders, Australians and South Africans) has taken this and run with it, stating that their product is
* Axe Cop And this is just one of the more egregious examples, for the Axe Cop fans.
* Axe Cop, "Ask Axe Cop #83": Dr. Googleman's wife, kids and bodyguards have been kidnapped, so when he rescues them with Axe Cop's help, he gets a group hug from his wife, kids — and bodyguards too.
* Axe Cop at one point features an evil flying book, who turns out to be a robot.
* Axe Cop. Being a bad guy is almost like a medical condition, except that it makes you a free target for good guys to kill rather than excusing your actions. It can even be induced or cured; in "The Dogs", one bad guy who was given a good potion and turned into a good guy noticed that he "no longer wanted to hurt people." Before that he had just wanted to destroy the world for no particular reason.
* Axe Cop both happen to be stories conceived by the vivid imagination of two separate kids, filtered through their professionally-talented older relatives. The main big difference is that one's a webcomic and the other's a video game.
* Axe Cop by a small child. He can be pretty randomly violent for a hero.
* Axe Cop contagious in that they seems to be spread through bodily fluids and various other ways diseases are spread. One character developed dog-related superpowers after being bitten by a dog. It wasn't even a radioactive or genetically engineered dog.
* Axe Cop does it with as crazy a twist as everything else: When asked whether there will be "members of other races" in Axe Cop's team, they introduce a merman team member.
* Axe Cop episode "No More Bad Guys", Axe Cop is bored because he has killed every bad guy on Earth. In the end, he wishes for every alien in the universe to be evil just so he'll have something to fight again.
* Axe Cop. Ethan assured Malachai that since it was his story, they could bring him back, so they planned out a story where Axe Cop wished the mermaid back to life after finding out she was the daughter of the King of the Mermaids.
* Axe Cop features a rabbit gun that shoots rabbits that attack the user. Axe Cop says it was the worst weapon he ever tried.
* Axe Cop. Flute Cop also has a moustache on the rare occasions he's a human.
* Axe Cop has his own badge with a picture of an axe and some handcuffs. The motto is, of course, "I'll chop your head off!"

* Axe Cop He has a whole school of martial arts devoted to its use; it can also be used as a skateboard and an electric guitar, and I think it can sometimes shoot fire, lasers, other axes, etc...the comic was written by a six-year-old, after all.
* Axe Cop! He's a dragon/triceratops/tyrannosaurus rex/ghost! They fight crime.
* Axe Cop. His axe has dozens of functions (normal axe, axe-shooting gun, skateboard, guitar, etc.), and his mustache is a multifunction robot.
* Axe Cop, if you have a name, chances are good that you are either a good guy with superpowers or a bad guy about to be destroyed.
* Axe Cop: In comic #137, Axe Cop and Dinosaur Soldier try to enter the villains' secret lair, which is guarded by a giant evil head. They decide to go undercover as bad guys to get in, but the head demands that they kill a good guy to prove their badness. Luckily for them, Mr. Stocker, the useless superhero with no powers, shows up... and Axe Cop, being written by a young child, isn't one for moral dilemmas. (They can always have Uni-Man bring Mr. Stocker back to life if they need him again.)
* Axe Cop is all over this like an axe on a bad guy's neck. His recurring sidekick (variously Flute Cop, Dinosaur Soldier, Avocado Soldier, Uni-Avocado Soldier, Viking Cop...) is secretly his brother, and I don't think there's been an explanation for Wexter yet, but any time anything bad happens, Axe Cop announces "we need to have more try-outs" and people pour out of the woodwork to join him. Examples: the Moon Ninja Brothers, Sockarang, Uni-Man and his family, Chihuahua Soldier, that cyborg lion, the King of the Mermaids, "a wrestler", Leaf Man, Mr. Wilkins, those various aliens from the Bad Guy Planet Two arc...
* Axe Cop is popular in large part because of the sheer novelty of a comic written by a 5-6 year old boy, albeit with art and interpretation by his 30 year old brother, a talented professional cartoonist.
* Axe Cop. Need an awesome ramp to drive to the moon? Go to the awesome ramp store. Unicorn horn? Can be found at the unicorn horn store.
* Axe Cop. On seeing a mermaid snarl at him, Axe Cop chops his way through the lot of them — only to learn that for mermaids, snarling is an expression of goodness and smiling a sign of evil. Axe Cop is stunned and rather saddened to realize he's just hacked his way through good people.
* Axe Cop powers (obtained by marrying the Queen of England) to create an army of likewise-intelligent poop soldiers. If it sounds like it was written by a prepubescent child, it's probably because it actually was.
* Axe Cop powers. When Axe Cop tries to attack him directly, he sings about how fire and ice make steam and disappears into a cloud of steam.
* Axe Cop prominent examples of this trope, both revealed in "Ask Axe Cop" installments:
* Axe Cop refers to it as "the greatest action movie ever made... written by a five-year-old boy."
* Axe Cop routinely holds "tryouts" for new superheroes to join his team whenever a significant threat presents itself. Then there was the time he joined up with Bat Warthog Man's team.
* Axe Cop: "The evil flying book turned out to be a robot and it exploded."
* Axe Cop. The police are after him, everyone he kills is evil, and he uses lethal force against pretty much everyone "bad". Though he switches back and forth on the killing of public servants (he beheads many FBI agents to protect Uni-Baby, but is unwilling to kill the police officers trying to arrest him).
* Axe Cop told me how God is his friend, and He gave him a copy of all His powers."
* Axe Cop uses a wide variety of sci-fi tropes in creative (and frequently ridiculous) ways.
* Axe Cop villain he comes across with some bizarre method to get it into them.
* Axe Cop, when Uni-Baby gets thrown down to Earth from space, for some reason everyone thinks she's an alien (which is technically true) and that someone should fight her. A group of men in black, possibly the Alien Police, show up pointing guns at her, but Axe Cop happens to be driving by and saves her, chopping all their heads off when they refuse to listen to reason.
* Axe Cop who keeps his intelligence and later builds an invisible lab. He's now

seen with a lab coat instead of a suit and tie.
* Axe Cop whose abilities include the Power of Christmas and a guitar that hurts peoples' ears.
* Axe Cop, Wolver Man's cyborg pet Iron Spider Cannon is driven by a mouse brain wired into its circuits.
* Axe-Crazy planned to attack Asgard. (And he wasn't the only villain working for Osborn who thought so.)
* Axe-Crazy psychopath and wanted criminal, so really Shikamaru was just doing his job while having personal reasons for wanting to see it done.
* Axe-Crazy vampire they captured to test her breaks loose and kidnaps her mom, and when they refuse to help her save Angel after he is poisoned simply for being a vampire, that was the straw that broke the camel's back.
* Axe-Crazy variety. He has pretensions of being a Jingo but doesn't even really understand what the words mean.
* "Axe Hair-Crisis Relief", which seems to portray any guy with spiky hair as a complete failure in society. Some of their personalities are never mentioned; when they are, they seem to be rabid.
* Axe hair product commercial ends with a woman playing with a man's hair at the beach. The man has a very pleased expression on his face and in the background, a wave crashes against a rock and splashes high in the air at the level of his crotch.
* Axe-Hand Morgan, Helmeppo, and all present Marines when Luffy accidentally breaks Morgan's giant statue of himself.
* Axe-Hand Morgan, the former Marine captain, was thought to be killed by Zoro by one fan until Oda
* "Axehounds", while apparently dog-like in behavior, anatomically most closely resemble giant arthropods. A man from another planet lampshades this, noting that while the natives are well aware of what an axe is, they have no real hounds, making it in-universe
* Axel Alonso was accused of this when he insisted in an interview that the
* Axel, a major, but not too big a figure in Chain of Memories, has been stated to have been a favorite among the Kingdom Hearts development team, and even Nomura has admitted to having a fondness for him. This, combined with his
* Axelay one more time. Touching the boss or its projectiles is deadly, but backing into the explosion at the left edge of the screen is not.
* Axelay on the hardest difficulty gives you an additional message after the credits that states "See you again at "Axelay2""(sic) but no such game was ever released and no information about it is available.
* Axel Brass is the 'Mind' of the 20th Century, possibly a personification of science or general use of technology as at the time when he was active, both World Wars had happened, but right after he got damaged and forced to guard a dangerous device in order to not let anybody use it to destroy the world, the Cold War had begun. Elijah Snow is the 'Ghost' of the 20th Century, whatever that's supposed to mean. We don't know what the rest of the Century Babies encountered in Planetary symbolize.
* Axel has his stats ranging from a slightly below-average 4/10 to a slightly above-average 6/10, while his chakrams give him both decent ranged and melee options without specializing in either. This gives him a good amount of flexibility without being dedicated to one style.
* Axel is having an amicable chat with Carol while they're both on watch duty, when he suddenly goes down to a
* Axel is wondering if Roxas has a heart because he seems to genuinely feel emotion. A playthrough of Birth By Sleep will reveal that Roxas inherited the heart of Ventus through Sora because had Ventus' heart as well as his own, and when he became a Heartless, creating Roxas, Ventus' heart became a part of Roxas as well, which is why Roxas looks like him and can wield light despite being a denizen of darkness.
* Axel Pressbutton, "the psychotic cyborg" had both legs, his left arm and most of his torso replaced after three-quarters of him was eaten by a

* Axel/Roxas. Some may like it, but others... Axel is around 25, and Roxas is around 15
* Axel telling Roxas about summer vacation, to which Roxas replies that he couldn't handle more than a week.
* axe made of energon Optimus could turn his hand into. It became somewhat of an iconic weapon for the character (thus why the Prime above carries one), despite the fact that it only appeared in one episode..
* Axeman of New Orleans, an unidentified serial killer present in New Orleans in the late 1910s.
* Axeman of New Orleans stated in a letter where he claimed himself to be a demon from Hell that he would kill again on March 19, 1919 at "12:15 (Earth time)".
* Axeman: The Axeman of Cutter's Creek, who stalks the woods to torture and kill random people. When his victims ask what he's doing, he dismisses the idea that he even has a reason.
* Ax 'Em follows a group of teenagers on a weekend retreat at a remote cabin in the woods who become the targets of a crazed killer.
* Axe Murders Of Villisca. The demon, who claimed to be "Born before your gods", possesses Reverend Kelly to commit the original murders in 1912.
* Axe of Despair, or Daemon's Axe, is an Equip card that boosts ATK by 1000 points and features a horrific, ghoulish head as part of the handle in the original Japanese artwork. Notably, the rules have no provisions against equipping the aforementioned Artifact Labrys with the Axe of Despair, resulting in a situation where a futuristic space axe is wielding a demonic flesh axe.
* Axe of Fools is a more situational card. It also boosts the equipped monster's ATK by 1000, but it also negates their effects and the monster's controller loses 500 Life Points during the Standby Phase. So, power at a steep price for one of your monsters, or cripple one of the opponent's monsters one way while making it stronger in another.
* Axe ran an ad campaign in Germany, featuring a hot bikini model and the phrase "The cleaner you are, the dirtier it will get".
* Axes also frequently show up as special weapons that only some characters (generally with S axe use rank) can handle. The below mentioned Helswath is only one of them: we have the Pugi in
* Axes are, as per standard, the weapons most commonly associated with dwarves. One particularly notable example is the Axe of the Dwarvish Lords, a legendary two-headed throwing axe forged as a symbol of dwarven culture when the dwarves first emerged into the surface world. Besides being a
* Axes are a usable weapon in the series, being also used by some enemies.
* Axes are one of the available weapon options of the warrior heroes in
* Axes are part of the generous selection of weapons on offer. Quite fitting for a game taking place in the homeland of the Nords.
* Axes at School: A student brings a weapon to school and may or may not use it against someone.
* Axes at School had it as the theme of their 2010 hit "Pumped Up Kicks".
* Axes at School: Only in Western Animation aimed at children, due to relatively recent, highly publicized school shootings like Columbine and Sandy Hook making it a taboo subject for children in the eyes of parents.
* axes (occasionally throwing the smaller off-hand axe), in the other fights he "just" wields a double-headed battle axe.
* Axes of all types, from regular to power axes, are popular amongst members of the Space Wolves Chapter of
* Axes of the single handed, two handed, polearm, and throwing variety are available as weapons in
* Axe's ultimate ability, Culling Blade, is an axe strike that usually does rather weak damage. However, if used on an opponent with less than a certain amount of health, the victim is instantly crushed, bypassing any armor or damage reduction bonuses and killing them even if they're affected by a death-preventing spell such as Dazzle's Shallow Grave or Oracle's False Promise. This is accompanied by a satisfying "THUNK!" sound and the opponent

* axe-wielding. Later, Dr. Durea is accidentally decapitated by his own guillotine.
* Ax had this from time to time, mostly because he didn't understand human humor. Towards the end of the series, several of the Animorphs start to suspect that Ax has caught on and is now just doing it to troll the kids. A
* A xill wizard character has the motivation that he's taken his army inside the dungeon in the hopes of freeing a pit fiend, who can use its wish-granting ability to help the xill find the location of a
* Ax in human form. All in such clear black prints that it looked like he'd paused every couple of steps to dip the relevant appendages in tar.
* Axiomancy: Throw an ax into a tree or post and observe where the hatchet points.
* Axiom "built-to-last" mentality, there's a network of robots and automated systems constantly maintaining the ship and even robots to repair other robots.
* Axiom, is a true blue hero in every sense of the word, and very much The Captain.
* Axiom itself the advertising is even more omnipresent, including such gems as telling the red-suited denizens to "try blue, it's the new red" and a brief glimpse into the ship's daycare.
* Axiom's autopilot, who is literally the ship's steering wheel, turns so that the ship tilts and everybody slides across the floor.
* Axiom Verge 2 low, hard-coded memory limits — as such, Indra's communication with Dr. Hammond ends up being two or three sentences per ansible until near the end of the game, at which point one of them receives an upgrade.
* Axiom Verge 2 version of it with the use of her drone. At first, you're limited to entering and exiting the parallel world through portals, but a late-game upgrade allows you to exit from anywhere.
* Axiom Verge calls the world glitching out "the Breach" and uses it as a barrier to progress. Trace can also glitch out enemies (or fix barrier glitches) with a setting on his gun, and each save file has randomized access points to "glitch worlds", extra areas with weird, broken tiles and unique weapons.
* Axiom Verge is removed, as Speedrun mode used a fixed RNG seed, allowing runners to consistently route around "random" events such as which enemies will drop health pickups.
* Axiom Verge, the bosses have just this to say to the protagonist before fighting:
* Axiom Verge The Trace the player controls is actually a genetic copy of Athetos, the original Trace who became a scientific abomination and committed genocide against an alien race. The player Trace makes it his goal to stop Athetos for good.]]
* Ax is also amazed at the variety of human food, since Andalites (who lack a sense of taste) never saw the need for more than just a field of grass.
* Axis & Allies a country whose capital has been captured can't produce new units, though the player can use their remaining units to try and retake it. One of the victory conditions for each side is to capture two enemy capitals.
* Axis & Allies, and because by that point, the USSR and UK have usually been knocked out of the war already by losing their capitals, which is its own win condition.
* Axis & Allies): A turn-based game where players take the role of various nations during World War II.
* Axis & Allies but pretty unlikely (it's usually easier for the Axis to get the two-capitals win condition by taking out Britain and the Soviet Union).
* Axis & Allies has a variant rule for the Soviets called "Russian Winter" that gives them a defense bonus.
* Axis: Bold as Love, which was released first originally. The platform in general has had this plenty of times; a hit song is released, and then an earlier hit from the same band sees its way on the platform later.
* Ax is constantly amazed by human technologies, especially those adapted for mouths (which his people lack — they absorb nutrient through their soles), like a lid over a cup of coffee. Special mention goes to books, which he considers to be a greater achievement than computers. Noteworthy, however, is that the technologies with which he is enamored are frequently things his people have had for centuries, but invented in an entirely different order (with the obvious

exception of anatomically specific technology like clothes and drinking straws).
* AXIS even the combined forces of the Avengers, the Uncanny Avengers and the X-Men - including the now renegade Cyclops, Magneto, Genesis and a teenage Jean Grey transported from the past are completely outmatched against the sheer might of the Red Skull. The same Red Skull, who had recently taken the brain of deceased X-Men founder Charles Xavier, and in addition to gaining his unmatched psychic powers, to make matters worse, recently ascended into the horrifying form of Red Onslaught) and his two colossal ADAMANTIUM Sentinels (constructed by Tony Stark of all people, albeit when he was brainwashed by the Red Skull earlier and didn't know it - which, in addition to their immense size and Nigh Invulnerability, were specially programmed to be able to easily capture each and every one of Earth's Mightiest Heroes. In spite of their bravest and best attempts to take him down, each and every one of the heroes are captured and defeated in short order, leaving only Iron Man standing. Cue Magneto temporarily leaving, only to come back and save the day with an entire roster of Earth's Mightiest Villains - including Young Loki, DOCTOR DOOM, Carnage, Sabretooth, Mystique, Hobgoblin, Absorbing Man, Enchantress, Deadpool and Jack'O Lantern. Apparently, it seems that none of these supervillains (though some like Deadpool, Loki and Magneto himself were technically Anti-Heroes at the time) take kindly to the Red Onslaught's attempts to control the world. Even Carnage of all people, who freely admits to believing that a world ruled by Nazis sounds like 'fun', does NOT enjoy the idea of having to kowtow to Red Onslaught's twisted whims, even claiming it isn't 'country'. While the other villains occupy Red Onslaught and his Hero Killer Sentinels, Deadpool manages to get Iron Man to safety and to a nearby power line in order to recharge his Powered Armor. And as for the villains and anti-heroes facing Red Onslaught and his Sentinels? They rapidly take both Sentinels down (only struggling a bit against the latter one), free Scarlet Witch and Dr. Strange from their grasp (who, together, have the power to bring Xavier's personality to the fore in Red Onslaught through an 'Inversion' spell), and when Doctor Strange is suddenly knocked out once more - it falls upon Doctor Doom to take his place, and alongside Wanda, he manages to revert Red Onslaught to Red Skull once more, rendering him unconscious and defeated - and of course, freeing the other captured heroes and saving the world from Skull's telepathic broadcast of hate.
* AXIS is an event that causes heroes to become bad and villains to become good, known as "Inversion." A number of fans and reviewers have pointed out that most of the inverted heroes are acting in rather generically evil ways, though the characterizations of the inverted villains have been met with praise for the way the baddies are portrayed as retaining their negative traits even when trying to do good.
* AXIS issues the "heroes" (as much as Loki, Verity, and Valeria Richards can be called that) use Doom's science equipment and Gram the Sword of Truth to create a "Truth Wave" to counter it. It works.
* Axis Of Awesome with "Skeleton Man" who is part man, part skeleton. Like everyone.
* Axis of Evil by Suicide Commando is essentially a condemnation of the Neoconservative foreign policy practices of the George W. Bush administration.
* Axis of Resistance, although the alliance became more active in 2012 with the start of the Syrian Civil War and the Iran-Saudi Arabia Cold War.
* Axis of Time, as the corvette is loaded with explosives. The reaction of the "uptimers" indicates that this sort of tactic is common among Islamic radicals in the 21st century. Luckily, they manage to blow up the corvette before it gets close enough.
* Axis of Time past but in an alternate timeline. Their own timeline is fine and can't be affected by their actions. However, since the technology that sent them back was the very cutting edge in their own time and didn't survive the Transition, there's no way back for them.
* Axis of Time, where their revelations about the future course of movies and music leads entrepreneurs to find young Elvis and Marilyn Monroe, among others, and present them with contracts to buy the rights to their future creative output.

* ''Axis theme'', which serves as music for the Axis nations to invade Poland, Greece and China to.
* AXIS, they're aware that this is not the way thing should be and that the effects need to be undone. They mourn the fact that when this is done, they'll go back to being their evil selves.
* AXIS to the last time he was turned into an old man, in a 1995 story line.
* Axl and Ian Rotten, whose pairing as brothers began in the GWF in 1992 and continued until Axl's death in 2016.
* Axl and other New Generation Reploids go all the way with the concept and can completely change into other reploids and mechaniloids. Depending on the game, Axl can only do this in-game with rank-and-file mechaniloids, or can change into slain bosses to perform a single attack.
* Axl is occasionally not seen wearing shades, but Slash on the other hand never takes his off. One interview said he went to see his mother who was dying of cancer in a hospital, and never took off his shades.
* Ax literally steals cable for his home on Earth, and records everything for later reference. His excuse is to screen for Yeerk propaganda (which actually works several times), more often than not, he watches soap operas and 'These Messages' which he finds more amusing than most other shows. (To be fair, he also assumed that people wouldn't hang wires outside unless they were free to take.)
* Axl Low is also very flirty with the ladies of the cast, especially
* Axl Rose. Likely due to his crappy childhood, he tends to go out of his way to treat kids well, even hosting Halloween parties at his home (even if he couldn't resist the urge to troll them by making them think that people are supposed to set up Halloween trees and get presents). A concert in 2017 showed that he won't hesitate to scream at security being too rough with a child, even if he has mellowed out in his age.
* Axl Rose. Offend him in the slightest and you'll end up without a job.
* Axl Rose photographer Boris Minkevich) be removed from circulation on the Internet, as it had inspired the so-called "Fat Axl" meme. Predictably, this news has caused the "Fat Axl" meme (which has existed quietly since at least 2011) to explode. Welcome to the jungle, indeed.
* Axl Rose's that she always wanted a song about her. He tried writing a pretty ballad... but then decided to write a rocker that translated her carefree life (with only a somewhat romantic message in the bridge), "My Michelle". She approved as it was honest.
* Axl Rotten, known for his "This Is Gonna Hurt" painted chair. He would form a tag team with the aforementioned Ian Rotten called Bad Breed.
* Ax Men: At least once an episode for most of the crews. Pretty much once per scene for S&S Aqua Logging.
* Axonn and Brutaka are each worth a team of Toa by themselves, and together they once handled an army of Skadi warriors and only handicapped by the fact they were there to broker an alliance and thus not (intentionally) trying to kill any of them. A Skadi is usually about as physically strong as a Toa, for the record.
* Ax suffers a little of this after being reunited with Andalites but their ship is crashed (due to a traitor), claiming he wishes he had died with them. The guilt comes from the fact that he's still relieved to be alive and ashamed of feeling relieved when so many died.
* ax to grind against anyone non-human to let Keith take him to Basitin.
* Axton the Commando is in love with his Sabre Turret. He calls it "honey" and variously refers to it as his wife or girlfriend. Gaige offers to give it a proper personality at one point, a
* Axwell Λ Ingrosso's music video for "Thinking About You" has a man in one scene with a face on his belly, and a woman with faces on her breasts.
* Aya also makes it pretty clear that he doesn't give a single fat damn about Weiss's mission to make the world a better place if it interferes in any way with his ability to
* Ayaan Hirsi Ali speaks Somali (native language), Arabic, Amharic, English, Swahili, and Dutch.

* AyaBambi, a lesbian Japanese couple consisting of dancers Aya Sato and Bambi Naka.
* Aya, but it's not certain, especially due to some inconsistencies such as in characterization.
* A yachting holiday goes horrifically wrong for a young couple and their best friend in
* Aya found she has nobody to give these to—Sunahara is distant, and she treats the rest of the Detective Team as
* Aya gets put into one before a microchip is supposed to be implanted into her brain, which would make her more compliant to
* Aya Hirano, and Hirano relaunched her career before the dust even settled.
* Aya Hirano at the age of 18, except it went nowhere when it turned out she didn't care about maintaining an idol image.
* Aya Hirano, but her career is strong enough that she can afford not to care.
* Aya Hisakawa (Sakuma temporarily voiced her in the 2017 Christmas special, and Tominaga would later fully take over for future productions following the special).
* A Yahoo! ad has a girl warning her friend that a bully's looking for him, only for the bully to appear shortly afterwards to give the kid a hanging wedgie from his locker.
* Aya is carrying his child, and he cries again. This time, fangirls swoon.
* Ayaka Ichinose, a Japanese gravure model, came out as a lesbian on April 21, 2009. Married to Akane Sugimori.
* Ayaka runs the line between being a Negi fangirl and being a paedophile. Most of the class thinks it's the second.
* Ayaka Sajyou was an ordinary person who had no idea the supernatural existed. When she gets dragged into the Holy Grail War, she is incredibly confused and whenever anyone discusses magecraft, Servants, or the War, she complains that she can't understand what they are saying.
* Ayakashi are greatly strengthened by his celebrity for his artwork, even though the public think he's just a human.
* Ayakashi attached to his gun, and as the influence from the merger spread, it mutated his arm and, near the end, most of his body.
* Ayakashi Ayashi has a scene with a monster that looks like a regular woman from behind, but has a face that looks like an angler fish. An angler fish that's almost as big her the rest of its body.
* Ayakashi Ayashi was revealed to have died a long time ago with Atl causing Yukiatsu to realize that he's been talking to a ghost that only the two of them can actually see.
* Ayakashi Rakider Chinomanako Diend Form is this in Kamen Rider Decade's
* Ayakashi: Romance Reborn features Aoi, a Satori Seer, as one of the love interests. He thinks everyone has darkness in their hearts, and being naïve to the ways of the human society, he is quite terrified of looking into people's hearts. He is quite cynical because of this.
* Ayakashi: Samurai Horror Tales is unoccupied by humans and is decrepit and old in the human perspective.
* Ayakashi: Samurai Horror Tales, rats are a recurring motif. At least one character is killed by an application of this trope.
* Ayakashi Triangle and ending up humanoid. For the inbetween stage known as "iyo", they look like bizarre monsters with random human appendages, most often a face—or several—sometimes in very strange locations.
* Ayakashi Triangle, and leaving several buttons of his dress shirt undone.
* Ayakashi Triangle, but either one person's wasn't enough, or Yayo herself was insufficiently faithful.
* Ayakashi Triangle), but that makes the few feminine traits he displays more noticeable:
* Ayakashi Triangle, constantly trying to fight his attraction by reminding himself that Matsuri is a guy.
* Ayakashi Triangle couple that once lived there. Despite being fully aware they're being controlled, the pair enjoy each other's private company too much to resist.

They're released purely by an outside influence, though they're not upset about it afterward.
* Ayakashi Triangle have Shirogane, a cat ayakashi, giving the reader a frontal view of his testicles.
* Ayakashi Triangle. He actually wears the same pair of shoes to school and for his exorcist ninja outfit, and even the sandals he wears otherwise have the same specific sole design.
* Ayakashi Triangle, he desperately chases after him, begging that they stay friends either way. Whether because of Soga and Reo's actual disinterest in each other, or pointing out Matsuri was being ridiculous in the first place, they're shown talking again afterward.
* Ayakashi Triangle he used on Matsuri was originally met to punish them, though that proves for naught as the place was destroyed to build a dam while Shirogane was away learning it.
* Ayakashi Triangle. However, Matsuri is the only one Reo wants to start dating.
* Ayakashi Triangle in a general sense, as Soga observes and experiences first-hand.
* Ayakashi Triangle into his ninja suit (sword included), hence he wears it even while bathing.
* Ayakashi Triangle: Lucy Tsukioka/"Lu" believes in aliens, but not in magic or spirits.
* Ayakashi Triangle. Matsuri complies without complaining, then imagines suddenly grabbing Suzu's breasts, and decides they still shouldn't be doing this kind of thing.
* Ayakashi Triangle: Matsuri flies up directly in front of Sosuke as he pursues Suzu, catching him by surprise before punching him in the face so hard he bounces along the ground.
* Ayakashi Triangle: Matsuri talks to Suzu's supernaturally-ignorant brother after being injured in battle and hesitantly claims he was a bike accident.
* Ayakashi Triangle Mei. His brief flashback shows them connecting very quickly, but Garaku didn't realize he loved Mei until after she was killed by her village.
* Ayakashi Triangle: Most ayakashi are sapient, but romance with a human is only considered when they have humanoid form:
* Ayakashi Triangle objects to Matsuri sacrificing himself, he reluctantly complies and lets Shirogane live.
* Ayakashi Triangle. On the other hand, Suzu is hesitant to act on an attraction to another girl, while Matsuri seems to assume a same-sex relationship is impossible, even after Soga encouraged him try anyway.
* Ayakashi Triangle pulls a more benign example on Suzu: He shapeshifts into her crush Matsuri’s male form to beg for more food. She fully knows it’s an illusion, but finds it too frustrating to endure.
* Ayakashi Triangle that moved into it, but regardless she considered it her previous home and thinks of the other major character (Ded Moroz) as real, even if she he'd be fictional unless he also became an ayakashi.
* Ayakashi Triangle, they correspond to their native mythology. One chapter sees Snegurocha, the snow maiden of Russian folklore, coming to Japan to claim the title of King of the Ayakashi.
* Ayakashi Triangle under the assumption Matsuri wants to stay female.
* Ayakashi Triangle uniquely managed to maintain a separate consciousness.
* Ayakashi Triangle. When he was born 150 years ago, he already looked like a teenager, and currently looks like an adult.
* Ayakashi Triangle, which Soga rejects because Matsuri still identifies a male—yet for the same reason, Soga is much more talkative to Matsuri than any other female, furthering his infatuation.
* Ayakashi Triangle with all his outfits ever since he decided to become an exorcist ninja. Consequently, changing to a different type of underwear initially negates his superhuman agility, leaving him too clumsy to clear a vault in gym class.
* Ayako Hamada is Mexican, but since she's the daughter of a legendary Japanese

wrestler, the LLF card read Mexico vs Japon when she brought Emi Tojo from Jd' to serve as
* Ayako Hamada retired from pro wrestling in May of 2018 only to return in July of 2019. This case was justified, by the confines of this trope, as her retirement had been enforced after she was arrested in Tokyo for hallucinating while under the affects of snorted kakuseizei and sentenced to three years of probation. Pro Wrestling Mexico were apparently the only ones with the will and knowhow to figure out how to get her back in the ring, though
* Ayako Hamada was once dropped off a balcony by Nanae Takahashi at a
* Ayame doesn't wear a jacket and has an orange bow instead of a ribbon.
* Ayame Ishikawa After that, she felt like she has no choice but to keep going in order to try and leave.
* Ayame Ishikawa, Super High-School Level Football Player and culprit of the second case, is pummeled with soccer balls and then crushed by an enormous soccer ball bigger than she is.
* Ayame is this towards Yoichi, although it's because of her sister Ibuki; the fact that she doesn't seem to spend much time with him; and when she does, she seems hostile. Then she wonders why he doesn't seem to romantically notice her.
* Ayami Kazama had a rather hilarious example detailed in her autobiographical manga
* Ayane-chan High Kick! is scouted by a former kickboxer who tricks her into getting into the sport because of her incredibly-powerful kicks.
* Ayane is required to kill her half-sister Kasumi, as desertion from a ninja clan is punishable by death.
* Ayane's High Kick ends with Kunimitsu grabbing Ayane for another kickboxing match.
* Ayane's High Kick features the eponymous wannabe pro-wrestler's "Golden High Kick." Due to the length of her strong legs, she can land a blow directly to her opponent's temple... which her coach asserts will lead to a certain K.O.
* Ayane's High Kick method of introduction, and for wrapping his arms around his student Ayane's chest when trying to prevent her from leaving the ring.
* Ayane's High Kick, the eponymous protagonist dreams of becoming a professional wrestler and eventually winning the women's world title.
* Ayane's High Kick: When Ayane accepts Kunimitsu's offer for training, he declares that the first step is for her to build the training ring, to help build her physical strength and stamina.
* Ayane's High Kick when the eponymous hero is training for (what she believes to be) her first Pro-wrestling/Kickboxing mixed martial arts match. The montage includes her practicing punches and kicks near the road by car-light, getting in the stomach by her trainer with a medicine ball while doing sit-ups, doing pull-ups while wearing a weight-suit, and of course jogging up stairs. All set to an upbeat rock tune, as one would expect.
* A Yank at Oxford, the variation being that she's not really a widow, just the neglected wife of a much older husband.
* Ayano Fujimoto is seen as the diligent student council vice president of the school but is secretly an olfactophile who wants to sniff Keiki's body odor.
* Ayano, sabotaging their relationships, bullying them to suicide, and more are all on the table for Ayano.
* Ayano's suicide two years ago, and she's shown breaking down into tears just before she goes through with it.
* Aya on the other hand still can't take talk of possession or ghosts seriously.
* Ayaori also tends to wander into the bathroom while Yukari is bathing, but since he's
* a yard tall, and holds roughly two and a half pints of beer. Though it's not uncommon for someone to down more than two pints, yard glasses are typically reserved for drinking games rather than casual drinking (on top of being huge, they're also very fiddly to drink out of without spilling).
* Aya/Sanae is a slut. Coined because of a sudden focus on both girls in the games (the former getting her spin-off games, the latter becoming a temporary main

character alongside Reimu and Marisa), which people explained as them giving the creator of the games, ZUN, sexual favors. Nowadays utterly
* Ayase. She's also wheelchair-bound, but that doesn't keep her from being a highly valuable asset for the protagonists.
* Aya's mother was compelled to fight in her tournament the same way Miko and Natsume compelled Aya, and Aya's father was compelled to acquire and beat Miko's mother under orders from Miko's own grandfather, who was the true head of the company running the tournament at the time.
* Aya's Valentine note to Sunahara is seen to be a "legitimate confession"
* Aya the Anti-Monitor, integrates with his body and takes control of the Manhunters on a quest to rid the universe of emotional beings. She starts out small before deciding that to do this she needs to recreate the universe, going to the center of it and modifying the events of time so that emotional beings are never created and her drones are put in their place. She changes it back at the last moment when she comes to her senses after Razer is mortally wounded.
* Aya the Interceptor. Oh, and it's the fastest thing ever created by sentient beings.
* Aya, the primary protagonist, uses a katana as his weapon of choice even against enemies wielding guns, and pulls off a couple of
* Ayato and Haruka are a heterosexual example, which occurs once during the series and twice in the movie.
* Ayato and Haruka were middle-school sweethearts, but the impenetrable Tokyo Jupiter field went up while she was on vacation, trapping him inside and her out when they're fourteen. Thanks to the field's time-dilation effects, three years pass for him and fifteen for her. Thus, Haruka is twelve years older than him when she manages to rescue him from Tokyo. Furthermore, he has lost all memory of her (and technically isn't even human anymore). She, however, has spent the whole time pining for him. Eventually, he once again falls in love with her, and that love drives him to use his Humongous Mecha
* Aya zigzags this trope to the point that viewers aren't really sure if she's really lacking in social skills. Her
* AYDS Helps You Lose a Lot of Weight - Fast!, its advertising and the product itself vanished completely.
* Aye, and Gomorrah... even maintains that "the story allows readers to reflect on the real world while maintaining an estranging distance".
* A year 2000 advertisement for the Republican party had a bunch of negative terms for the Democratic party, such as "Bureauc
* A year after the band's breakup, Marky Ramone made disparaging response against C.J. in the press, calling him a "bigot," a statement he would reiterate a decade later. C.J. would later respond that he was unsure as to why he would make negative comments against him in the press though he denied that it had anything to do with his marrying Marky's niece. He also denied being a bigot. Many years later, C.J. mentioned that despite being the two surviving members of arguably the band's most commercially successful era, and despite reaching out a few times to join him on stage, he and Marky were no longer in contact
* A year after the CBS example, ABC did the same with a "Viva Las Vegas" in February 1997, with characters from
* a year after the episode had aired, because Wade says his family did something brave every 10 years, and the next time he would do this was in 2004. Said episode aired in 1993.
* A year after the release of the game, Nintendo finally answered on where in the
* A year and a day after a Black Blood charm is put on, it reaches full strength and the wound it inflicts becomes permanent.
* A year and a day is a minimum sentence of incarceration for felonies in many jurisdictions, and is one of the main features distinguishing felonies from misdemeanors. In many jurisdictions prisoners are eligible for parole only if their sentences are longer than a year; by imposing a sentence of a year and a day, judges can offer defendants a chance at parole.
* A Year and a Day to complain that the lover's laments will not let her rest.

* A Year at the Top featured a pair of musicians who made a deal with Satan's son for a single year of rock'n'roll success. They appear to have gotten it, but the series didn't...
* A Year at the Top stars Greg Evigan and Paul Shaffer as struggling musicians Greg and Paul.
* A Year at the Top with him by surrounding himself and her with smoke.
* A year later was slightly better for Orel, in which he found a true father figure in Coach Daniel Stopframe, but he still had to deal with the fact that his father is an abusive jerk and that he'll be limping for the rest of his life because of his father's neglect. (Then again, those facts are true because Orel had a Twisted
* A Year with Frog and Toad elevates them comfortably to life partners at the very least. They invade each others dreams to sing about how much they like each other. Twice. ("That's funny, you've been in all my dreams too...")
* aye-aye a horrible death). Sadly, this has also led to its species being endangered, as people have been known to kill aye-ayes due to this superstition.
* Aye Dark Overlord send your team (you and all the other players) on...
* A Yellow Book commercial has a bride trying on her dress when she realizes for the first time that she has a tattoo reading "Mike" — who's not the guy she's marrying. She naturally finds a good removal place in the eponymous Yellow Book.
* A Yellow Raft in Blue Water by Michael Dorris: The relationship of Christine Taylor and her brother Lee's high school friend Dayton Nickles when she comes back to the Indian reservation when she contracts a terminal illness.
* A Yellow Raft in Blue Water, it's Ellen DeMarco's response to one of the Bearpaw Lake workers faking a drowning so he could get her to do mouth-to-mouth on him.
* A Yellow Raft in Blue Water, it's the treatment Christine feels she got when she was attending the wake for her brother Lee's funeral, because she talked him into joining the army, which during his time of service he was sent to Vietnam and was reported as MIA.
* A Yellow Raft in Blue Water on marrying Christine when she tries to tell him that they don't need to be married for her to have his child.
* A Yellow Raft in Blue Water, was accused of being one in Christine's story when he took a teaching job outside the reservation. This situation was played for drama, as it was one of the things he didn't want anybody else to know.
* A Yellow Raft in Blue Water, who tries to molest her while on a camping trip.
* a yellow Vespa with a white "T!" on a black circle in its front. The episode itself is just as surreal and nonsensical as the series it referenced.
* Aykiz Hatun suffers a chilling death at the hands of the Mongols in this manner at the beginning of season 2.
* Ayla also counts as one in regards to the Clan (Neanderthals), along with the mixed Cro-Magnon/Neanderthal children (including Ayla's own son Durc). This is again pretty justified as the Clan and Others dislike each other to varying degrees, so such couplings are rare (unfortunately, they're often rape).
* Ayla and the Birthday Brawl — he takes over Sizemax's field and uses her like a meteor hammer.
* Ayla and the Networks the principle is lampshaded. In the middle of a Gambit Pile-up, the main star gets a smirk. "Xanatos Gambit?" "Xanatos Gambit."
* Ayla comes from a time before magic. She's a physical beatstick, tank
* Ayla Goodkind (Phase) often comes across this way as well, especially regarding financial matters, with an extra icing of
* Ayla in the party, who can fight without weapons, engaging enemies results in automatically being tossed back in your cell, and even then, only characters that have retrieved their weapons will participate in the battle. This completely ignores the fact that most of your party members can use magic, and could quite easily demolish enemies with balls of fire or bolts of lightning in spite of being completely unarmed.
* 'Ayla' is a Turkish and Scottish feminine name (in the latter case it's a variant on Aila or Isla), which became a lot more popular in Western countries from the 1980s onwards following the success of the

* Ayla is portrayed as holding a club in her artwork and within the FMVs. She uses nothing but her bare hands to fight within the game itself.
* Aylee adopts her forms to defend against specific dangers (such as developing mind-shielding with a telepathic foe around). The current form was taken because she feared what humans would do unless she could fit in among them better. In other words, she (subconsciously) made herself into a Cute Monster Girl to gain acceptance.
* Aylee has her moments, although it tends to vary depending on the qualities of her current form. Once she had Bun-bun tear his way out of her chest and then cut off her arm, both of which are treated as insignificant scratches that will heal and grow back shortly, whereas in a later form she gets stabbed in the neck and takes a few months to heal. That same form still powers through getting stabbed in the chest because it didn't hit her heart.
* Aylee's giant crab form is only vulnerable on her "gummi worm neck," which she's fully capable of retracting to within her
* Aylee the shape-changing alien was used to going around without clothes because
* Aylee, where a plan takes advantage of the gaps in satellite coverage.
* Ayleid, and has the Daedric Prince Meridia's Aurorans in this role.)
* Ayleid during their battle. When he returns, he is noticeably taller than the Aurorans, who themselves were already quite tall.
* Ayleids (Wild Elves) and were eventually completely absorbed into the Bosmer race.
* Ayleids (Wild Elves) religion sect which killed or drove out the remaining Ayleids, leading to their extinction as a unique race.)
* Ayleids (Wild Elves) religious sect came to power within the empire and either killed or drove away the remaining Ayleids.)
* Ayleids (Wild Elves), they sacrificed their slaves to appease their various deities.
* Ayleids (Wild Elves). Those who weren't killed were forced to intermingle with the other races of Mer, effectively leading to their extinction as a unique race.
* Aylesbury Young Offenders Institute (prison for 18-21 year olds) gets work as Generic Prison Gate, with the original Victorian gatehouse, complete with wicket gate in the huge double doors.
* Aylwin (DD-355) had four officers on board when the first Japanese aircraft appeared, all ensigns. Ensign Stanley B. Caplan, the senior one, had been at sea for only eight months and was in command of it for thirty-six hours (ironically enough, as he was obeying orders from the destroyer squadron commander to put out to sea, several men onboard saw their senior officers on a motor launch, but they could not stop to take them onboard until after the attack was over).
* Aylwyn is always off on Paladin business doing important things for the kingdom; her path just tends to cross with Paul's from time to time.
* Ayn Rand: a jury is selected from the audience, and at the end of the play, they determine whether the defendant is guilty or not.
* Ayn Rand, and had significant say in the creative process. Among other things, she absolutely insisted that Howard Roark's climactic monologue at the end of the film be reproduced from the novel in its entirety; it ended up being one of the longest monologues in cinematic history.
* Ayn Rand), and their main characters have numerous paragraphs of monologue that extol the potential of man, usually focusing the most on things like our genius and indomitable will.
* Ayn Rand as one of the denizens of Galt's Gulch, a fishwife who's also one of the best authors there. She notably also pines for John's affection.
* Ayn Rand characters is desperate to play in a "cheap, vulgar commercial" comedy the part of a conniving social climber who drinks, swears and sleeps around. She declares she's done enough saccharine simpering, her producer be damned.
* Ayn Rand climaxes with a courtroom speech claiming that this is the oldest trope of all. Paraphrasing — "Thousands of years ago the first man showed his brothers how to make fire. He was probably burnt on the pyre he had taught them to light, for he had dabbled in dangerous forces. Then the first man showed his

brothers how to make a wheel. He was probably torn on the rack he had taught them to build. Etc."
* Ayn Rand considered "fire at your fingertips" a positive symbol. In a real life Aesop, she developed lung cancer.
* Ayn Rand, even though the screenplay was written by her and barely altered. She refused to let any of her other novels be filmed unless they let her pick the director and edit the film herself.
* Ayn Rand" has an inventor who wants to exploit his invention as he sees fit, while his financial backer wants to give it away to the public essentially for free. The backer is later murdered, and the prime suspect is the inventor.
* Ayn Rand. He also gets ranting about how the book's hero Howard Roark is going to get beaten up and mistreated in prison. However, Toohey is not able to address this gloating directly to Roark himself, who considers Toohey beneath contempt and refuses to pay any attention to him. Rather, he has to make his gloating to a weaker character, Peter Keating, whom Toohey already very thoroughly destroyed. In the end, Roark manages to get the jury to find him not guilty, so he does not go to prison and Toohey is denied seeing him suffer - though by the end of the book, Toohey remains at large and concentrating as ever on his wider aim of taking over the world.
* Ayn Rand (He keeps most of the profits, too.) Nevertheless, he is presented as a charming hero, at least partly because it's implied by the narrator that those relief goods never would have reached the starving children anyway, and that the aid was propping up the corrupt governments who were responsible for the famine to begin with.
* Ayn Rand is a wealthy philanthropist who uses his power to keep people dependent on him, so he can run their lives. When he's murdered, nearly everyone is happy about it.
* Ayn Rand is using two handguns in the manner mentioned above, in which he uses each one to shoot at different people in a mob attacking the mill.
* Ayn Rand. It's written with two different endings for both verdicts; they both express a value judgement of the jury.
* Ayn Rand'" Notwithstanding critics' dislike of the book, it still continues to sell tens of thousands of copies every year, unusual since the book was first published in 1957, and has been continuously in print ever since.
* Ayn Rand, perhaps as a result of early trauma, and part of it could have been that she was a native Russian-speaker operating in an English-speaking environment; plays on words and things like that may have just sailed right past her. She was prone to quips however and sometimes demonstrated a biting sardonic wit. For instance, whilst being pestered by a fly on a talk show, she commented "Perhaps it's protesting."
* Ayn Rand. Rand liked strong, take-charge men and bodice-ripping, ravishment-type sex.
* Ayn Rand's novels are often described as having sharp angular features.
* Ayn Rand's objectivist philosophy find objectionable, for obvious and not-so-obvious reasons.
* Ayn Rand subtext between Howard Roark and Gail Wynand, with Wynand's feeling for Roark being an example of this trope.
* Ayn Rand was born in Russia, where her father's business was confiscated by the Bolsheviks, leading to a hatred of communism and a near-worship of American capitalism. When she moved to America, she cried tears of joy at the sight of the Manhattan skyline, and later called the US "the greatest, the noblest and, in its original founding principles, the only moral country in the history of the world".
* Ayn Rand world in the future, then there was indeed some sort of holocaust.
* Aynsley Norris is played by the 5'10"/178 cm Natalie Lisinska and is the tallest woman in the series. Aynsley's height is really noticeable during her
* A yoghurt commercial in the UK featured the song 'I Got Life' from the musical
* A "You know Jesus was _____ because..." joke has been made for pretty much any race or nationality, such as the Indian one listed above under
* A young and lonely Jun formed a close friendship with Kazami's younger sister

Nagisa and eventually Kazami herself, although this had a more tragic outcome.
* A young Arthur desperately fell in love with a Roman woman but was unable to marry her. He remains faithful to her by not having sex with his wife Guenievre (which causes its own problems because everyone's waiting on him to produce an heir), although he does have plenty of sex due to keeping four official mistresses around.
* A young boy called Toby is a big Aki fanboy, to the point that he joined the Arcadia Movement due to his admiration of her.
* A young boy decides to make his own lunch for school and makes a meal of little purple grapes. Whenever someone asks what he has, he tells them "little purple grapes" and gets some severe backlash for it. By the end of the story, he's been beaten up, expelled, disowned, and finally arrested. He relates his story to his cellmate who promises to tell him why the phrase "little purple grapes" has caused him so much misfortune if he sneaks out and steals him some cigarettes. The boy does so but gets hit by a car and killed before he returns.
* A young boy is on trial for rape. Naturally, his mother is adamant
* "A young boy learns to fly with the world beneath his wings." —
* A young boy stumbled across the perfect phrase to extort adults — "
* A young couple go on a light-hearted date, and the young man drives off with a photograph and a wave. Once he's out of sight, the young woman unmasks to
* A younger Brother Humphrey then took control after his death. Later, the Pope, who was annoyed by the Norman power in Italy, sent the Papal Army and the Imperial army of the Holy Roman Empire south to destroy them. Humphrey defeated them and took the Pope captive for a year.
* A younger version of Cyclops, as one of the mutants targeted by Stryker. His power is copied and put into Weapon X. Ironically, it also ends up destroying most of Three Mile Island as well.
* a young girl being married off to a grown man in an anti-child bride advertisement.
* A young girl called Emma Roydes has passed selection exams to the Assassins' Guild School with flying colours. The Guild believes at the age of ten years and nine months, she has already had ample cause to display commendable fighting skills and an admirable aptitude for applied aggression. Seen as a new first year student, she has a best friend who affectionately nicknames her "Piles". And gets away with it.
* A Young Girl's Delinquency Record, Tanya uses the dangerously unstable Elenium Type 95 as a nuclear hand grenade, and levels the city of Brest with it.
* a young girl with psychic powers. When talking with Bruce about this, Terry manages to see the girl (although no one else can, since she is using her powers). However, Ace becomes alert and defensive, being able to detect the girl's psychic presence (even though she's not really there and only Terry can see her). She is not evil at all, though.
* A young Harry once interacted with an Outsider for all of fifteen minutes. His description of encountering it
* A young, hip Democrat was elected into office following the unpopularity of a president named George Bush. Despite winning re-election, he was continuously obstructed by a gradual Republican takeover of Congress. One member of his Oval Office tries to succeed him by running for president, but is narrowly defeated by an inexperienced Republican opponent despite winning the popular vote (See Bill Clinton). For added irony, the Obama cabinet member who attempted to succeed him was none other than Bill's wife, Hillary.
* A young, inexperienced, drunk, or just plain careless kitsune may accidentally reveal its fox ears or tail(s); this seems to show up especially often in anime.
* a young in the "8" year of the decade fueled by anger at the political establishment.
* A young man is going at it hot and heavy with a young lady. He finishes, rolls off her, then says "Gee, sis, you're even better in bed than Mom!" She says, "Thanks, I know, Daddy said the same thing!"
* A young man is walking through a small village one day and decides to stop by a

bar and have a beer. He walks into a bar, and sees a grizzled old man, crying into his beer. Curious, the young man sits down and says, "Hey old timer, why the long face?" The old man looks at him and points out the window, "See that dock out there? I built that dock with my own two hands, plank by plank, nail by nail, but do they call me McGregor the dockbuilder? No, no." The old man continued, "And see that ship out there? I've been fishing these waters for my village for 35 years! But do they call me McGregor the fisherman? No, no." The old man continued, "And see all the crops in the farms out there? I planted and have been farming those crops for my village for nearly 45 years! But do they call me McGregor the farmer? No, no." The old man starts to cry again, "
* A young man notices an elderly gentleman crying on a park bench, and goes to ask him what's wrong.
* ''A Young Man's Fancy'') has a mother give this advice to her daughter Judy who is trying to win the heart of the ergonomics-obsessed Alexander Phipps. Judy's response is, "Oh, mother that's corny!" In the end the power of food and an electric kitchen win the day.
* A young man walks up to the pharmacist and asks for a pack of condoms normally. He then tells the pharmacist that he'll be visiting his girlfriend at her house later that night for dinner, and how he's planning to have sex with her for the first time, but he's not sure how she'll behave in bed - she might as well be a slut for all he knows. He gets the pack, pays, and leaves without hassle. Later, at the girlfriend's house, he stays quiet and composed the whole dinner, only opening his mouth to pray before the meal. Once the dinner is over, the girlfriend comes up to him and says: "Gee, honey, I didn't know you were so shy and pious..." "Yeah," he whispers nervously, "and I didn't know your dad was a pharmacist."
* A Young Man Without Magic, uses this trope in a fantasy setting. Children found to have magical talent are automatically elevated to the nobility, and it's a capital crime for anyone else to practice magic. The non-magician emperor is more or less a figurehead. The government is mostly functional but corrupt; sorcerers have so much power that they can get away with openly using spells powered by human sacrifice.
* A young member of a bomber crew wets himself while flying a mission in
* A young Naruto is taken by Jiraiya on his mission to Sunagakure, and once there he's left with the Sand Siblings with Yashamaru taking care of them. A confused Naruto asks why that "woman" has a male name and why "she" is taking care of them when he heard their uncle would do so. Yashamaru politely explains that
* A young shepherd in Israel was throwing stones into caves when one of them hit what sounded like a clay jar. Investigations into the caves led to the discovery of the Dead Sea Scrolls.
* A young, teenaged cancer patient develops a bit of a crush with Dr. Lewis.
* A young upstart senator became the first president from his generation and the first from a large ethnic group, who is notable for his lofty rhetoric, boundless optimism and ability to inspire. He also selects a long-serving senator from the older generation as his running mate who would later become president himself albeit thankfully
* A young version of En Sabah Nur, aka Apocalypse, appears in The Stinger
* a young woman died in-ring due to unknown causes, but she'd mentioned to her opponent prior to going to the ring that she had a terrible headache. Her death actually got 3 people arrested for manslaughter until authorities realized she had no injuries from the match.
* a young woman's decomposing body was found in the rooftop water tank of Los Angeles's Cecil Hotel.
* A Young Woman's Political Record has melted so many computation orbs in testing, she knows the exact code for the form she needs to fill to claim it was destroyed in non-combat testing and how to fill it by heart.
* A Young Woman's Political Record has the Battle of Duisbusch, which Tanya says was won by angry Germanian civilians who somehow got their hands on military equipment and overwhelmed the occupying Francois forces. There is no one that believes that story and it is widely known that it was Tanya and 203rd that did the

deed.
* A Young Woman's Political Record, Millicent Caldwall is merely a fan of Tanya, largely for her being the most successful woman in history, in some of the omakes, she goes to incredible extremese such as thinking the mere act of Tanya sitting on a barstool and leaning against the bar would be award worthy in a movie.
* A Young Woman's Political Record submarine using this engine design before deciding to shelve the technology for use in naval vessels and only use it to power rockets and torpedoes. Also, Dr. Schugel and his entire line of research can produce absurdly advanced technology... which has to go through a lengthy period of refitting and additional testing so the safety features Schugel himself never contemplated can be properly implemented.
* A Young Woman's Political Record Tanya fights in the war personally, though only for a single day. One of the bomber crew members grumbles about how they deserve a raise for all the work they're doing, only to see Tanya flying alongside their plane and admits he can't exactly complain about his workload if the Chancellor is picking up a rifle to fight the communists.
* A Young Woman's Political Record, Tanya von Degurechaff is agreed upon by both Germanian and foreign mage officers to be the absolute gold standard of aerial mage combat.
* A Young Woman's Political Record. Tanya von Degurechaff tends to fail upwards, fail at failing or her actions have unexpected consequences that work entirely to her benefit. So far:
* A Young Woman's Political Record: The Francois army occupying Rhine makes a habit of raping and murdering the civilians living there.
* A young woman walked up to a man who was sitting in a rocking chair on his porch.
* A young Yukariko has a pair in the eleventh special, and her hair greatly resembles Mikoto's.
* A Youth Hostel in Scotland has a not-so-secret passage (there's a sign marking its location) underneath an elaborate staircase triggered by rotating a marble statue a few meters away. This was enormously shocking because old Scottish castles aren't exactly the typical location for budget accommodation!
* a youth-restored Shiba and is getting his ass handed to him. Haru tries to motivate himself by thinking about how the world will be doomed if he loses, but it doesn't work. Then he thinks about how if he loses, Elie will cry, then defeats his opponent in a single blow.
* A YouTube commercial in November 2016 promotes both the 2017 Ford Fusion and the Viz dub of
* A Youtuber called jawsunleashed (real name Hariff Djamil) made an "
* A Youtuber named PopularMMOs has a series called The Crafting Dead. In the third season, he puts Dr. Trayaurus, of TheDiamondMinecart fame into the series. Before him, he puts Captain Cookie, from Epic Proportions, another series by the youtuber, became part of the story.
* a YouTube short commenting on the male obsession with the 'Manic Pixie Dream Girl' caricature and the female response to it. A middle-aged married man in a suit meets an exasperated prostitute in a hotel room. Instead of sex, he asks her to role play: "I want you to turn my life upside down with your whimsical joie de vivre," — an act she finds "demeaning."
* a Youtube video which involves a kitten doing this, approaching while the person filming looks away and being unmoving when the camera comes back.
* Ayoy Dr Jekyll And Mr Hyde has one, full of technicolor chemistry and stuff. Though the potato doesn't really do anything.
* Ayra's nephew Shannan is used to coerce her to fight Sigurd's army.
* Ayreon, after the end of the world, this happens to the last living human through a machine called the Dream Sequencer in "The Universal Migrator".
* Ayreon albums have names; most go by descriptions like "Best Friend" or "the Knight."
* Ayreon as of now (post-Transitus), and plenty of guest instrumentalitst. The in-universe storyline has even more characters - many of the guests vocalists appear

on multiple albums but there are almost no recurring characters so the average guest vocalist plays ~3 different characters.
* Ayreon. Every album tells a different part of the same overarching story, although since the hiatus, the story has changed.)
* Ayreon in the first album alone. It only got more ambitious from there.
* Ayreon, it is revealed that a technologically advanced race of fish aliens seeded a passing asteroid with their DNA, which then collided with earth—exterminating the dinosaurs already present there and allowing humans to flourish. They then directly tamper with human evolution and technological progress.
* Ayreon Mr. L in 01011001 has dreams about the end of the world sent to him by cyborg fish aliens; unfortunately, he's in an insane asylum.
* Ayreon's "01011001," given the lines like "Washed away by deadly gamma waves" and "All the world's a blazing funeral pyre." And, well, that everyone on Earth is dead afterward.
* Ayreon's albums are concept albums with several different singers, and they all tell different parts of the same weird sci-fi/fantasy story.
* Ayreon's "Day 16: Loser" off "The Human Equation". Here we have the abusive, alcoholic, jerkass of a father berating and calling out his own son while in the hospital. He goes on about how weak, helpless and pathetic his son is before leaving. The closest we get to a response is when the son's rage persona freaks out and screams at the father.
* Ayreon's DVDs about the albums' creations sometimes includes these: "Fuck it, I'm a fish! Yeah!"
* Ayreon, the main character — named "Me" — goes through a metal opera interacting with different aspects of his personality: Pride, Reason, etc.
* Ayreon: "We vanquished the dinosaurs with the trajectory of a child's lost meteorite."
* Ayria's "Hunger" quotes the children's rhyme "Star Light, Star Bright":
* Ayria's song "Selling Rebellion" is pretty much all about this trope.
* Ayrs tries to blackmail Frobisher into remaining his assistant and supplying him with music to steal.
* Ayrton Senna crashing into Alain Prost at the start of the 1990 Japanese Grand Prix, and winning the title as a result. Similar title-deciding crashes in 1989
* Ayu believes herself partly at fault for her bullies' deaths because she knew the branches they were using to make chopsticks out of were poisonous, but said nothing. She only explained when one of them accuses her of intentionally poisoning the food.
* Ayuda Mundial (roughly translated as World-Wide Help), a Latin American Halo machinima gives us this gem:
* Ayumi appears to love this exact idea as even in other adaptations. In the modern game's canon, she and Naomi screw around with the Book of Shadow, resulting in the second and third games. In the
* Ayumi Hamasaki TV anime movie. When the movie was later released on DVD, all of her lines were redubbed by Kaori Horie, Yuri's voice actress from the actual games.
* Ayumi left, getting their asses kicked in the same episode they're introduced.
* Ayumi, Mitsuhiko, and Genta are three first grade children who latch themselves onto teenager-turned-child Conan Edogawa early in the story. As a result, they've been present for more than a few of the murders that occur whenever Conan is around. Despite this, they are still shown to retain their innocent and cheerful demeanors even as they try, with mixed success, to help Conan crack a case.
* Ayumu confesses, twice, the first time she's rejected, though it doesn't deter her affection.
* Ayumu crashes into Hayate while riding an out-of-control bike after she'd woken up to dreaming about their first encounter when he'd saved her from going over a cliff in a similar situation, which was admittedly a year ago.
* Ayumu eventually confesses a second time, actually at Hinagiku's insistence. Though initially she gives Hayate 'obligation' chocolate as part of Valentines' Day, Hinagiku insists she talk to Hayate again and give him the chocolate she made

for him, telling him that he doesn't need to respond yet. Though he hasn't rejected her again, he has made it clear that he has some affection for her, making this the closest thing to an actual confession and acceptance.
* Ayumu used his chainsaw to kill a downed Kyouko repeatedly while she was incapacitated, complete with constant screams of pain afterward.
* Ayuri: Aside from being made of plastic, Kay seems like an ordinary human woman.
* Ayuri has dobeks, a domesticated species of non-sapient humanoid. Like most pets, they wear a collar at most, making some humans uncomfortable.
* A Zabini auditor thinks perfectly normal and justified to burn a rapist alive while Squalo — who is a professional assassin for
* Azada 4: Elementa referred to it as "an image I can't remove from my brain with bleach and a scrub brush."
* Aza'gorod the Nightbringer, Mag'ladroth the Void Dragon, Llandu'gor the Flayer, and so on.
* Azama from the same game may be an even bigger example. He screws with just about
* Azami); they pull through but at the cost of over half of the members losing along the way.
* Azanians and Texan patriots, respectively) are implied to be extremely brutal, yet occur almost entirely offscreen and don't upset the protagonists too much, them having their own wars to fight closer to home.
* Azariah Kyras, he has a few choice insults for whichever faction you're playing as. Except the Tyranids, who don't really get insults, so he makes do with "You will choke on me, Great Devourer!" Amusingly, his death in this case involves getting a gigantic Tyranid capillary rammed into his throat until it decapitates him.
* Azathanai don't have a fixed physical form, so they can change their appearance at will. Skillen Droe in
* Azathanai, Some still have some connection to whatever race they created, but some simply don't care anymore or think their creations deserve what they get.
* Azathanai, where K'rul and Skillen Droe meet several of their Azathanai brethren on their journey. Of special note is the meeting with Mael, who refuses to part the sea for their passage, because Skillen once polluted his seas to make a flying mountain without asking first.
* Azathoth, seeing as he is the creator of the universe (not that he noticed it...)
* "Azati Prime" has Captain Archer being taken through time and brought on board the USS
* Azazel Ameri's introduction came surrounded by romance cliches like
* Azazel; if you don't see it, you aren't paying attention. Mostly confirmed in the flashback of how he first met the Winchester family.
* Azazel, in practice she's closer to this trope. She has a high Magic Attack stat, but her skills are often low in power. She is, however, highly versatile, and able to adapt to any situation.
* Azcharit", makes the Nagmachon an incredibly effective urban combat vehicle.
* Azealia Banks, openly bisexual rapper known for hits such as "212" and "Anna Wintour".
* Azealia Banks' "Yung Rapunxel" features her eyes replaced by mouths, with each mouth working independently to lip-sync the lyrics of the song.
* Azel von dem Bussche, which both prevented this attempt and kept him out of Stauffenberg and co.'s own plot on Hitler's life. Therefore he survived undetected when they were rounded up and shot. After the war he studied law and later became a diplomat, living until 1993.
* Azer, a race of dwarves that are infused with fire, are almost always depicted barefoot.
* Azerbaijan country that seceded from Azerbaijan with the fall of the Soviet Union, but that Azerbaijan still claims as theirs.
* Azeri: Garry Kasparov (though ethnic Armenian through his mother and Russian Jewish through his father; he did retain Russian citizenship after the fall of the

USSR, though, and presently is active in the Russian opposition to
* A "zero-day" vulnerability is a computer security hole that is not yet generally known, named for the fact that nobody has had time to develop defenses "zero days" after someone discovers and exploits the vulnerability. Once a zero-day exploit is used and noticed, cybersecurity experts will study it and develop countermeasures to be distributed in future security patches.
* Azeroth never actually had an Earth Shattering Kaboom. The planet is still in one piece. It just had 2 very close calls.
* Azeroth used to have two moons, but the smaller one disappeared in a patch that introduced weather effects. It's still mentioned in the background, tho.
* Azhdarchid pterosaurs) necks, as well as equally long beaks. These were ideal for snatching small animals off the ground.
* Azim promises to have his fellow Anvillers make proper arrangements for Vivienne and recalls the councillors' attention to other pressing matters.
* Azincourt, Hooke and Lord John have this conversation (paraphrased).
* Azincourt who takes advantage of being the local lord's brother to get away with whatever he wants. Martin routinely violates women and begins the novel by raping a 'heretical' girl named Sarah and having her throat slit after. Later in the book, he attempts to rape the hero's lover after catching her outside of the titular fields.
* Aziraphale accidently possesses a televangelist who is, at the moment, talking about the Rapture, and inadvertently reveals that Heaven has no plans whatsoever to teleport the faithful to safety before the End Times - it's all collateral damage as far as the angels care.
* Aziraphale actively works against Heaven's plan to bring about armageddon just as resolutely as Crowley works against Hell's. The story implies that the actual differences between the two afterlives aren't as big as advertised and that God isn't actually actively on either side.
* Aziraphale and Crowley's New Year's Resolutions for 2006 on his Tumblr, so he looked in the 'Aziraphale' tag to see if he could find a nice piece of fanart to go with it. He may have got more than he bargained for.
* Aziraphale's relationship with Crowley's latest reincarnation in the 21st century is also chock-full of this trope. They move in together, get married, and have a peaceful, loving life together for ten years, but any happiness that Aziraphale feels with Crowley is tainted by the specter of
* Azita Ghanizada (American actress who was born in Afghanistan but her family fled when she was a baby)
* Aziz Ansari: "Could you imagine blowing a guy (for a half hour!) for sold-out concert tickets and then finding out they're selling them at the door? That'd be like blowing a guy for a half hour for sold-out concert tickets and then finding out they're selling them at the door. There's no other way to complete that analogy 'cause that's the shittiest thing that could ever happen to you."
* Aziz Ansari has a bit where he claims that he was sitting in a restaurant when he overheard 50 Cent asking for grapefruit juice, receiving grapefruit juice, and repeatedly not understanding why the grapefruit juice wasn't purple.
* Aziz Ansari pointed out that, when given a tip of over $1, the employees of Cold Stone Creamery must all do a short song and dance. "Five people are singing and dancing
* Aziz Ansari, talking about how a immigrant doctor friend of his was able to bypass the greencard process by going to Alabama, which is an "underserved" state.
* Aziz Ansari this trope. The episode "Indians On TV" revolves around Dev accidentally finding out that the creator of the TV series he and his friend Ravi both tried out for doesn't want two Indian actors on the show, as he feels that it would alienate white viewers. Dev later says that America is only just now getting to a place where two black actors can star on the same show without it being labelled a "black show" by people.
* Azkaban. Lupin's actor David Thewlis likely did this on purpose, as he was convinced his character was gay and expressed disappointment when Lupin married a woman.

* Azlan saying "... And that was the last time I took Neni to <Place>" is a
* Azlant was once a mighty empire whose magic and technology far outstripped their neighbors. The secret to their power was the aboleths running the nation from behind the scenes, whose advancements were even greater than their puppet nation. When their shadow empire was discovered, they called down meteors to obliterate the entire continent rather than allow their subjects to disobey them.
* Azmaria has similar powers, but she sings instead of using glowing hands.
* Azmodan retains disintegration beam (affectionately referred to as "All Shall Burn") ability from Diablo 3.
* Azog towers over the other orcs at the Battle of Azanulbizar. Azog's son Bolg, who is subservient to him but still commands his own army, actually rivals him in height. All of Azog's lieutenants are noticeably taller than regular orcs.
* A zombie company is a company deep in debt that only generates enough profit to cover running costs and to pay the interest on their loans, but not the debt itself. They generally depend on creditors to continue their existence, putting them in a endless life support. The next level is a zombie bank, a financial institution with a net worth of less than zero that keeps on living because the government is paying to keep them hooked on the life support machine.
* a zombie-creating virus, and for the rest of the game the only people you find in that specific part of the city are zombies.
* A zoo has the MGM lion and the Paramount mountain logo as a rabbit warren
* Azrael. Batman himself also serves as one, as despite having top billing in the original miniseries and having most of the focus for the first half, he is captured halfway into the story by LeHah and the remainder of it focuses on Azrael joining forces with Alfred to rescue him.
* Azrael, but Azrael leaves him going "Two out of three ... no, three out of five ... no..."
* Azrael is a subversion of the trope. At first glance, he seems to fit the mold, with his fighting style consisting of wild hook punches, haymakers, and an occasional kick. Kagura even notes that he mainly just throws his power around. But he is actually more skilled than he lets on as one of his Distortion Drives, Scud Punishment, has him doing what looks to be targeting an enemy's pressure point. He also serves in one of the tutorials and teaches the player how to confuse opponents with mind games. In
* Azrael, on the other hand, has "Death's Dark Knight", "the Dark Knight of God", "God's Sword of Justice", and "the Angel in the Dark".
* Azrael's Tear, clearly the plans for betrayal are all there at the same time. I can't find a trope that seems to fit, which seems crazy, given how common this sort of situation is in fiction.
* Azrael's Tear, which was much anticipated, had fantastic graphics performance, and was quite addictive.
* Azrael threats; it wasn't until Batman intervened and appointed the latest Azrael his successor that things started getting messy.
* Azrael. While he's not a real angel, his appearance, for whatever unfathomable reason, immediately just shouts "angel" in the minds of any DCU citizens he comes across.
* Azruverdas, giant beetles with human faces, can control vermin within their line of sight, although the creatures' low intelligence means that the commands need to be relatively direct — "go there", "come here", "attack that creature" and so on. The amount of vermin they can control at once is represented as equaling twice the azruverda's hit dice; in practice, this means they can control entire hordes of low-level pests or limited numbers of powerful monsters — such as, for instance, two purple worms at once. They also possess a number of magical abilities to aid them in doing this, such as the ability to summon swarms of wasps and spiders or to turn normal vermin gigantic.
* AZ's theme, which makes sense when you see his backstory, which is considered by the fandom to be one of the most depressing backstories in a Pokémon game.
* A-Z (street atlas): strictly speaking refers only to the range produced by The Geographers' A-Z Map Company, but commonly used in the UK to refer to any map or

atlas with a street index.
* Azteca part of their name refer to the Aztecs, they got lots of these, based in some Mexican native tribe:
* Azteca Underground: formed from the remains of Promociones Dorado in 2021.
* Aztec, Aztec warriors and jaguars. But the most memorable and toughest to kill monster was the "Eggplant". This was a carnivorous plant that looked like a giant clam with tentacles coming out of it. The player had to chop it section by section with his machete or blow it up with dynamite. The pistol was only effective at shooting out the clam-shaped mouth.
* Aztec deity of a crocodile while he and Quetzalcoatl were creating the world. It didn't slow him down in the slightest.
* Aztec god Tezcatlipoca lost a foot fighting a gigantic earth monster; depending on which version of the story you hear, he either replaced it with a snake or a smoking mirror with magical properties.
* Aztechnology is rumored to be working on biocomputers - computers based on human brains floating in a vat of electrolytes.
* Aztec Jaguar vs. Zande Warrior: Both parties wield traditional blades as ceremonial execution tools.
* Aztec Mythology appeared as a member of the court and got him drunk, prompting him to sleep with his daughter Quetzalpetatl (in some versions, she is his sister and he had made a Celibacy Oath. Pre-Hispanic myths vary a lot). A weirder and more complex example, as Quetzalpetatl wasn't a goddess in most stories, just merely a human related by blood to the incarnation of the god. Quetzalcoatl was so ashamed he exiled himself either way.
* Aztec Mythology could fit here. They’re entities associated to the underworld, they live in the forests, lakes, rivers and jungles. Their main activities are watching the mountains, springs, trees and wild animals. They tend to pass their time playing mischiefs to mortals like throwing stones, breaking things, shaking hammocks, pulling dogs’ tails, frightening farm animals, stealing stuff and like that. They’re also related to health and the lack of it, especially illness related to the loss of soul, but they can also reward mankind with wealth and good fortune. In some zones of Veracruz, they’re divided in two kinds: good and bad. The first type appear in zones where mankind lives. The latter prefer secluded places, undisturbed by human civilization. There are different descriptions of their physical appearance: 1) they’re people about 1 or 1.2 meters height, their feet are the other way around, malformed body, they have tails and they don’t have the left ear; 2) they’re short people, with big heads and chocolate-like skin color; 3) they’re dwarves with childlike faces, and/or 4) they look like small children. Their boss is Chane, god of soil and water, who cares for humans, but punishes sinners, especially adulterers, using two magic animals: lupu’ti the donkey and shunu’ti the cat. Chaneques also put spells on children to take them away from home, keeping them as servants. Mothers, to avoid this, give amulets to their children like the deer’s eye (actually a brown seed), crosses made of palms and put their clothes on the other way around. In fact, they can also make travelers lose their way, so to avoid this, they must wear their clothes the other way around. They can also make humans lose their tonalli (a spirit associated to a person's birthday), which can only be undone with a special ritual. In Chiapas and Tabasco they can be worse, because they attract boys for harmful intentions, but amulets made of nuts and river stones can keep them away.
* Aztec Mythology has Xochiquetzal for erotic love, Chalchiuhtlicue for chaste love, and Xochipilli for same-sex love.
* Aztec Mythology: Huehuecoyotl was just as likely to help humanity or cause genocide depending on which he thought was funnier.
* Aztec Mythology that resulted in them fighting at his side and returning home victorious. The King had to name him as a war hero.
* Aztec Mythology: The ahuizotl eats human flesh, but was said to be especially fond of teeth, eyes, toenails, and fingernails.
* Aztec Mythology, the ahuizotl's name literally translates as "spiny aquatic

thing."
* Aztec Mythology. The latter got to enter the Aztec's paradise afterlife.
* Aztec Mythology. There's Titlacauan, Necoc Yaotl, Yohualli Ehecatl, Ome Acatl, Tepeyellotl...and those are just some of the more well-known ones.
* Aztec Mythology', the world they lived in is the 5th world, the four before destroyed in a variety of ways from floods to a giant jaguar eating it. The 5th world will be destroyed by an earthquake unless the universe keeps getting power. What powers the world you may ask: blood. Hence the Aztec fondness for human sacrifices.
* Aztec one of the masons in the limestone pit gets this when a large cube of limestone falls on him. His lower half is resting a little ways away, and his upper half is sealed flat by the rock. He lives long enough to make his deathbed concession, then when they try to carry him out of the quarry, everything falls out.
* Aztec rain god Tlaloc specifically demanded sacrifices of young children. To bring the much-needed rain for the crops, the tears of the young needed to be poured, so the priests tore the nails of children as young as 4 to make them cry before sacrificing them to the god.
* Aztec stairs: Ship modelling term for crudely moulded plastic kit stairs more closely resembling the side of a stepped pyramid than anything that might conceivably be fitted to a ship.
* Aztecs thought their sun god needed to be fed with blood to continue across that sky. Cue
* Aztec, the travelers all take their snakebite prevention medicine, which involves being injected with venom from a tooth of each kind of poisonous snake. The doctor who performs the procedure advises Mixtli that his bite will now be venomous; when he finds out it's not, he assumes he is not immune to snakebite.
* Aztec Wars has war bears as one of the Russian units. They're fast and utterly devastating against infantry, but useless against buildings and vehicles.
* Aztec Wars: The Chinese use these; they have cannons mounted on their backs.
* Aztec Wars. They do wonders against infrantry, but are rather useless against buildings and vehicles.
* Aztec, who appears first as a flame, and then a beautiful naked woman who dances a ways off, but the unwary traveller can't see her face. When she's lured him to quicksand, she reveals her face to him, and it's a grinning skull. When Mixtli follows the flame, he finds some sort of muck that smells like rotten eggs, and comments that no matter how beautiful, no one would want the Xtabai if she reeks like that. It turns out to be useful, though, as the muck is a sort of tar that is good fuel for his fire.
* Aztek Curtis Falconer, who is forced to commit a robbery to save his daughter and is killed in an explosion at the end of the first issue, but not before tasking Aztek with protecting his daughter.
* Aztek introduced two background characters, a married superhero couple, neither of whom knew the other's secret identity. Think about it.
* Aztek. It was implied that the town founders were all mad and used principles of sacred geometry to make the city utterly bent.
* Aztek: The Ultimate Man and had Aztek join the team. When his solo series was cancelled, Morrison wrapped up his storyline in the pages of JLA.
* Aztek was named by a newspaper. Drawing on the South American motif in his costume, a reporter dubbed him Aztek "with a 'K' — because of all the neat high-tech stuff he's got on his uniform."
* Aztek, while waiting for Curt Falconer for their date, nurse Joy Page gets bothered by a guy thinking she's "hustling".
* Aztek who created him through a memory lock on all his co-workers. He can literally walk up and tell them he's Aztek and they'll forget a few seconds later.
* Aztlan prejudice. We're talking "nuke the block to get the guy who stole our secrets"-guarded.
* Az'uar's best claws, the Sacred Claws, can be obtained by unlocking Saphira's door in Fyradin. Again, this requires the player to beat the

* Azula comes out of the gate using all her fancy firebending, using flips, spin kicks, propelling herself around like a miniature rocket. Zuko... Stands still, controls his breathing, and uses the same moves he used against Commander Zhao in the third episode
* Azula decides that a great bonding exercise for the team after the events of "
* Azula does it during "The Beach," when she dismisses everyone else's problems as mere "performances".
* : Azula does this to Aang, complete with mocking dialogue, after Ozai escapes prison and begins to gather supporters.
* Azula has shot Aang in the back with lightning,, they're back up and ready to go a second later.
* Azula has some seriously creepy subtext towards almost everyone, especially towards her brother Zuko, who most of the time she tries to kill. The scene where he questions her about one of her latest schemes in the middle of the night has her acting as close to
* Azula herself is subject to a non-fatal but still exceptionally cruel one of these in the finale, by her own father no less. He rewards her for all her loyalty by naming her his successor as Fire Lord, and then immediately crowns himself
* Azula invites Zuko and Iroh to the Earth King's palace under the pretense of serving the Earth King tea, but when she reveals her ploy to them, they attempt to escape.
* Azula, in which she uses a tank-like vehicle to keep up with the Gaang while they had to stop to sleep.
* Azula is a detached, borderline sociopathic princess who always seems perfectly in control of her emotions. In
* Azula is a mastermind among her group, Suki and Iroh both come across as a levelheaded leader in their respective teams.
* Azula is cool enough can provide: making you groan on sight yet strangely liking it.
* Azula is ruthlessly unfettered. Even at a young age, Azula mirrored her father. Taking every opportunity to destroy the competition, leaving the weak and soft-hearted to squander. It's fitting as well, since both end up in prison for their crimes.
* Azula left Doom, complete with a "Dear John" letter. Apparently the good Doctor has rebounded and is going out with Squirrel Girl, but rumors of Azula returning are flying around.
* Azula looks like she is going to get one when she is knocked off her airship, complete with helpless rag doll flailing involved. So naturally, the Gaang is upset when she rockets to the nearby cliff by way of firebending, in a
* Azula makes such an offer to Zuko — a chance to help her capture Ba Sing Se and kick ass together as siblings, even though the latter was a Fire Nation fugitive at the time and was just starting a new, normal life within the city.
* Azula of the Gaang. Of course, all but one character in the show are or were dark-haired.
* Azula pulls this in the first episode of season 2. She waits for Zuko and Iroh by sitting in the shadows of the house they are staying in, and waits several seconds before interrupting their conversation. Given where she was sitting,
* Azula seems to fall under this as well. She's usually too quick for Team Avatar, but on the few occasions they manage to land a blow, she gets knocked back pretty hard.
* Azula shoots Aang in the back with lightning. He would have died if not for Katara and the healing water she had with her, and it still leaves a permanent scar where he was hit (as well as on the exit spot).
* Azula shoots lightning at Katara, and Zuko intercepts it with a Diving Save
* Azula's interactions with Ty Lee and vice versa come off as romantic, to the point where even Azula's voice actress thinks Azula loved Ty Lee, but this was unintentional. Azula was manipulating Ty Lee for her own gain and Ty Lee was afraid of disobeying her. It's just that Ty Lee's default personality is to be upbeat and friendly to everyone and Azula's default

* Azula tries to invoke this with Chan, a guy she meets at a party in the
* Azula Trilogy, General Azun, is the leader of a portion of the Fire Nation's military that refuses to accept the end of the war and Zuko's ascension as Fire Lord, and intend to "rescue" Azula so that she can lead them in retaking control of the Nation.
* Azula Trilogy in the third part, itching for revenge after being beaten by a teenage girl. Fittingly, he just gets his ass kicked by Katara this time.
* Azula Trilogy. Ironically, they were designed to be this role to Azula, who as noted below in Western Animation, is herself one of these.
* Azula Trilogy to track down Azula. He kills one of his henchmen trying to attack Azula, and kills the other two because they pointed out how much he enjoyed torturing her.
* Azula Trilogy, who abandons him at the end of the story, and moves on to use other pawns for the rest of the trilogy.
* Azulians have male and female sexes, but engineered the rodent-like "adaptator" solely to facilitate procreation with humans of the opposite sex. The adaptator merges with the father before the act and adjusts his DNA for compatibility with the mother. Thus resulting offspring are of the mother's species, not hybrids.
* Azumanga Daioh and everyone's back to school, quote Tomo: "this is the first day of vacation" repeating it like a mantra, following a Butthead-like laughter.
* Azumanga Daioh and had many people monitoring her, so teaching her was kind of the point. (She improves as the series progresses; by the time they go to Okinawa, she's been SCUBA diving.)
* Azumanga Daioh, and it basically shows that she's gone through a very traumatic experience. She goes white again the first time the "Yukari-mobile" gets mentioned after the aforementioned trip. Then, in the third year, Kaorin takes the ride and ends up similarly.
* Azumanga Daioh anime. Fellow teacher, best friend, and pain in the rear Yukari shrugs the idea off and says to just do whatever she wants.
* Azumanga Daioh, a picture of an octopus offers takoyaki for 100 yen a plate. Don't know what takoyaki is? Read the trope again…
* Azumanga Daioh apparently finds certain words in the Okinawan dialect hilarious, like "osenmikocha" and "saataa andaagii".
* Azumanga Daioh: a scene featuring Tomo, Ayumu, and Kagura begging Yomi for help on a test ends. Yomi then walks across the screen (not scene; the shot ends, I think, with an overhead of all four), and uses her as the boundary.
* Azumanga Daioh as everyone thinks she is. The soap leaps away, and a handkerchief she was holding in her mouth falls into the sink.
* Azumanga Daioh), as well as it being, well, a manga. A translation would basically go something like "Azuma's great comic for Daioh Magazine." The anime version calls it "Azumanga Daioh: The Animation", even though it's only accurate for the print version. It also sounds like "Azumanga da yo", which would translate to "It's Azuma's manga!". They play with this interpretation at the very beginning of the anime (they cut the phrase off, resulting in 'Azumanga da!').
* Azumanga Daioh Chiyo) highlights this best, but another example is her getting into the same school Yomi did.
* Azumanga Daioh, Chiyo, she's easily the smartest member of the group (with the possible exception of Sakaki).
* Azumanga Daioh, construction noise drives Yukari to Minamo's house. Once there, she immediately commandeers the bed and discovers an oddly-shaped fancy pillow. Upon learning that it cost 10000 yen:
* Azumanga Daioh. Despite that, Kagura doesn't take their rivalry personally and is nice to Sakaki even before they get to know each other. Kagura eventually moves on to establish a genuine rivalry with Tomo, as both have similar levels of energy.
* Azumanga Daioh does this in at least several points of the series. Worth mentioning is Mr. Kimura, who, in the last episode, spouts a literal waterfall of tears that traces down the contours of his suit.
* Azumanga Daioh does this while riding with Nyamo to Chiyo-chan's summer home.
* Azumanga Daioh: Done by Yukari in the final episode, where she shares a few

parting words with her students, following their graduation ceremony. The girls express their heartfelt gratitude and bow as their former homeroom teacher takes her leave.
* Azumanga Daioh ends with a very plain picture of the girls walking happily together when they all graduate.
* Azumanga Daioh: English teacher Yukari Tanizaki attempts teaching math. She grabs a textbook, and from space can be seen the planet Earth, so is the sheer overwhelmingness of math.
* Azumanga Daioh falls into this. Both Osaka and Sakaki dream of her father being a "cat creature" which is also encountered in the waking world as a stuffed animal. When scenes are shown of Chiyo interacting with her family, her parents are neither seen nor heard (Chiyo's lines to them are typically the sort of declarative statement that would not require a response, and the scenes end before they would have time to speak). Thus, while one possibility is that she has parents like the other girls who just never appear on-camera, there are also the distinct possibilities that her parents are imaginary or that her father is, in fact, the cat-creature.
* Azumanga Daioh falls into this category, though it's in a Japanese high school and those usually don't have lockers in the hallway.
* Azumanga Daioh features Tomo trying to get some milk tea from a vending machine, only for it to pour the drink but fail to dispense the cup. She's suitably outraged when the next person to step up (Yomi) gets two cups.
* Azumanga Daioh, foil a bank robbery. For some reason she imagines the crooks as her classmates. (Then again, Kaori also dreams of her classmates—some, anyway—as a street gang. Chiyo is a bad influence!)
* Azumanga Daioh, for instance, makes equal sense before and after seeing/reading the work in full.
* Azumanga Daioh had one of these. Complete with Chiyo-Dad as Santa; courtesy of Sakaki's imagination.
* Azumanga Daioh has confirmed that it's not that Kamineko hates people, it's just that Sakaki's cold, tough demeanor makes cats think she's going to hurt them. Wild cats, however, are obviously not scared that easily.
* Azumanga Daioh has several scenes of this, Yomi and Tomo hit each other, Chiyo and Osaka get bonked a lot, and even Sakaki is always bitten on the hand by cats. Of course, this is all girl-on-girl (or animal-on-girl) slapstick. Yukari-sensei is also placed on the receiving end of some physical comedy courtesy of Tomo. As punishment, Yukari spends the next several minutes slapping Tomo around with a lunch tray in each hand.
* Azumanga Daioh has Tomo trying to outdo Chiyo-chan in academics and Sakaki-san in athletics. She fails miserably.
* Azumanga Daioh have some difficulty with the concept of moving to her right. "It's the hand you hold your chopsticks in!" helped, although this meant she had to mime eating. Instead of doing her actual job of holding Tomo up off the ground...
* Azumanga Daioh high school comedy genre to the point where there's an expy in nearly every entry to the genre since, typically Osaka or Tomo.
* Azumanga Daioh in reference to fictional commercial for hemorrhoid treatment.
* Azumanga Daioh, in the episode where Kagura is introduced (ep. 10), she & Tomo start doing this, and soon degenerate into face-pulling and grappling.
* Azumanga Daioh involves "flower watching," and showing how three sets of friends (Yukari and Nyamo, Tomo and Yomi, and Kagura and Chiyo) enjoy the spectacle of the cherry trees in bloom in their own ways.
* Azumanga Daioh is 10 when she starts high school. While she consistently gets better grades than everyone, being 5 years younger than everyone means she has problems during P.E. and Sex Ed talks.
* Azumanga Daioh is almost always the one to act out and make a scene in class.
* Azumanga Daioh is devoid of romance and romance is mentioned very little, focusing instead on gags and friendship. The only character in a relationship is Mr. Kimura, who has a wife and daughter.
* Azumanga Daioh is enough to give Chiyo the chills (her cheerful expression frozen

in place). It also teleports her into the other car (seatbelt attached) in seconds.
* Azumanga Daioh is looked up to by fellow classmates due to her looking "cool" and "mysterious". In actuality, she's just very shy.
* Azumanga Daioh is only known by that name, to the extent that, in the first episode, when everybody is introduced by their full name (including Osaka), she's simply introduced as "Sakaki-san, a.k.a. Sakaki-san". Kagura, Kaorin/Kaori, and Chihiro are only called by those names as well. In all cases, it's unclear which are given names or surnames.
* Azumanga Daioh is shown moving to intercept Yukari, as the latter charges upfield with the ball. Then Sakaki casually steals the ball from Yukari as she literally walks past her!
* Azumanga Daioh is so small, she can comfortably ride Mr. Tadakichi, a Great Pyrenees, to Sakaki's envy.
* Azumanga Daioh, it had nowhere near as large an impact on the collective consciousness.
* Azumanga Daioh. It's all played up for comedy, of course, and at the end of the day Chiyo is happy with her lot in life.
* Azumanga Daioh. It's later revealed he has an incredibly hot and incredibly nice wife.
* Azumanga Daioh: Kagura, one of the protagonists, is a member of the swimming team.
* Azumanga Daioh Movie": Big-budget animation for a six minutes project that previewed the anime series.
* Azumanga Daioh: Mr. Kimura's obsession with high school girls. In particular his obsession with Kaorin.
* Azumanga DaiohNaturally, the way Tomo's disbelief in reindeer came up is that the girls had just been discussing Santa. Kagura then asks if reindeer are real, and Tomo proceeds to laugh at her and say they don't exist.
* Azumanga Daioh never showed a banana, much less a peel, Osaka mentions slipping on a banana peel as something she wants to try.
* Azumanga Daioh, not even Sakaki can identify exactly what her knitted dolls are supposed to be.
* Azumanga Daioh offers a very sedate example. The girls' time at high-school is over... they're going to various colleges... the youngest, Chiyo, is moving to America... and it looks like the little world we've come to love over the last 26 episodes is disappearing, as the older girls walk off and Chiyo watches them go.... before they call to her to come on, so they can spend the day together, and Chiyo realizes that while this part of their lives might be over, they'll always be together.
* Azumanga Daioh once found a button that would kill Chiyo when pressed. She pressed it anyway. It was only in a dream, though (not that it alleviated Chiyo's anxieties about Tomo, anyway).
* Azumanga Daioh one), making it feel like he was serious in ripping Osaka's tongue.
* Azumanga Daioh, Osaka doesn't just Wiki-walk, she Wiki-pole-vaults. In one beach episode she has a one-sided conversation with Sakaki about dolphins, sea lions, and hemorrhoids.
* Azumanga Daioh, Osaka goes to Yukari to ask a question, which Yukari initially assumes will be about exams, but it turns out to be about what would happen if all the members of an American family stepped in dog poop and got all the way home without realizing it, since there's no universal American protocol regarding wearing shoes inside one's own home. That'll teach Yukari to tell Osaka, "Ask me anything!"
* Azumanga Daioh, Osaka imagines one of these happening at Chiyo's summer home:
* Azumanga Daioh, Osaka-san just won't stop saying "saataa andagii!" after she discovers that pastry in Okinawa. Naturally, she gets this reaction.
* Azumanga Daioh: Osaka shines a flashlight under her face, and tells a scary story.
* Azumanga Daioh remarks that it looks kinda like someone she used to know back in

Osaka.
* Azumanga Daioh reprints, as well as the next 5 new volumes, were handled by one of ADV's former translators (volumes 11 and onward were not because that translator passed away during the hiatus between volumes).
* Azumanga Daioh, Sakaki does one of these when she hears about a kitten. She practically teleports in.
* Azumanga Daioh: Self-described "wildcat high school girl" Tomo (pictured above). We know she's a Genki Girl because "Genki!" is the first thing she says.
* Azumanga Daioh, she also manages to be a class rep and hold down a part-time job, and is generally just as mature and capable as her teenaged friends. She's ten years old.
* Azumanga Daioh. She starts out as a rival in another class, but joins the group in the second year, as part of a plan by Yukari to win the Athletics Festival. Kaorin to an extent, too.
* Azumanga Daioh sometimes, most memorably when she tricked Osaka into eating spicy food that ended up giving her hiccups.
* Azumanga Daioh's Osaka isn't the sharpest knife in the drawer, but don't challenge her to games involving marine biology or obscure kanji.
* Azumanga Daioh standing on a chair trying to wind the clock backwards.
* Azumanga Daioh's Yukari-sensei, after Tomo accidentally hits her in the face with a tray.
* Azumanga Daioh, teachers Yukari and Nyamo wager 10,000 yen (~$100 USD) each year on whose class will place higher at the athletic festival. Yukari wins the first year, but Nyamo instantly reclaims the money as payment for an old debt. In the second year, they add a dinner if either one places first overall. Yukari wins again but is still a sore loser when her class beats the teachers' team with her on it in the relay race. And in the third year, Yukari runs for her class and comes in dead last because she tackled Nyamo to keep her from winning.
* Azumanga Daioh tendencies, grabs Osaka's sleeve to stop her doing anything.
* Azumanga Daioh ("That herped me a rot, thanks."), and the only response Kagura can think of is to give him the thumbs-up and shout "Yay!"
* Azumanga Daioh (the anime), Tomo makes a pun, though what that pun is depends on whether it's the dub, the sub (both based on "freedom"), or the original (based on "yoyuu"). The other girls groan and Chiyo says it was bad, while Tomo is flabbergasted at their response.
* Azumanga Daioh). The phrase was picked up by fans of the series to describe their own fictional crushes. Eventually shortened to just "waifu" (and expanded to "husbando"), it's become a staple of anime culture to the point that even people unfamiliar with the series are aware of the term.
* Azumanga Daioh, though a Child Prodigy who starts 10th grade at the age of 10, technically becomes a Teen Genius when she graduates from high school (as valedictorian!) at 13.
* Azumanga Daioh? Though it's worth noting here that Kimura in all other ways is an extremely nice guy himself. He picks up litter to recycle, he gives donations generously both religiously and to charity, and actually does seem to be a competent teacher and a good father to their little girl. It's just... the whole high school girl thing...
* Azumanga Daioh, though, since the film was made before the series premiered, serving as something of a preview, never mind the fact it takes place during second year, as revealed by the hairstyle Tomo was wearing at the time, yet mashed together plots from all around the series), but is the length of a single segment in a regular episode, making it a shade under six minutes long.
* Azumanga Daioh, thus playing this same trope straight. This is likely justified, however, as recent news articles commonly show up high on a search list, especially for sensitive topics like endangered species (such as the aforementioned cat).
* Azumanga Daioh Tomo and Chiyo-chan dress up as a policewoman and a criminal doing the perp walk with a coat over their head for a costume contest.
* Azumanga Daioh, Tomo and Osaka comment that Bruce Lee's name sounds like "Blue Three," causing them to imagine him beating up Blue One and Blue Two.

* Azumanga Daioh, Tomo had a scene where she rampaged across the classroom trying to obliterate a cockroach that had flown in. Desks were overturned, students were catapulted into the sky, and much chaos ensued.
* Azumanga Daioh to Sakaki, she fell to pieces in increasingly amusing and neurotic ways.
* Azumanga Daioh to their wacky best friends, Tomo and Yukari, respectively, and such are not as quirky or comedic.
* Azumanga Daioh under her belt. But she's also very shy and affectionate. Other students are scared to talk to her either because they think she's too awesome or because she's intimidating. She wind ups often wishing she'd get invited into club activities, since she's too timid to reach out for them herself. She got her wish when she fell in with Chiyo and her friends.
* Azumanga Daioh. Upon seeing a foreign tourist struggling with his luggage, she decides to go help him. He's quite shocked to see this girl suddenly yell "Help! Help me!" at the top of her lungs when trying to talk to him. She eventually does get her intended message across, but when the foreigner thanks her, all she can come up with in response is "Yay!" accompanied by a thumbs up.
* Azumanga Daioh uses Maya the cat to tease Mr. Tadakichi, Maya bites her, and Yomi and Kagura respond by laughing at her and telling her she had it coming.
* Azumanga Daioh volume in the series additionally came with a booklet (featuring character design art and translation/pop culture notes), a reversible cover for the DVD case, and one or more decorative pins, featuring everything from various characters to the cute animal mascots.
* Azumanga Daioh was the source. (She had just talked about how "pervy" relationships can get.)
* Azumanga Daioh were rated MA15+ while the rest of the series were rated G or PG. The reason is because of Kimura's joke about drinking the pool water and more specifically because child prodigy Chiyo-chan was present. The rest of the series generally makes it clear that Chiyo-chan is not one of Kimura's targets, hence the lower ratings... though let's face it, a pedophile teacher being acceptable in an otherwise family friendly show is one of those things that only Japan can get away with.
* Azumanga Daioh, when a guy asks another whom he likes better, Yukari or Nyamo. This guy, seeing Yukari around and overhearing, answers "Yukari, of course", and the other replies "You have a warped taste in women", and gets promptly whacked by Yukari.
* Azumanga Daioh when Kagura misreads 'Iriomote' as 'Nichijou' and is called out on it.
* Azumanga Daioh, when Yukari finds a stray cat and tries to get the girls to take care of it, Sakaki starts thinking of what she would name it if she could take it home. This quickly leads her to dream up an elaborate and tragic backstory for the kitten, until she finally reduces herself to tears, much to Kagura's confusion.
* Azumanga Daioh who openly admits he only became a teacher so he could look at high school girls, and he'll even skip his own class if it means he can look at the girls during swim lessons. Despite the girls and other teachers being aware of this, and even with him making some strong advances on Kaorin, nobody seems to actually do anything serious about it, mostly just telling him to buzz off.
* Azumanga Daioh, with his perpetually gaunt and slack-jawed expression.
* Azumanga Daioh, yet she is kind and well-intentioned and deeply caring for her friends.
* Azumanga Daioh, Yukari calls her friend and fellow teacher Minamo Kurosawa "Nyamo". Some of the students adopt it as well, to Nyamo's initial dismay.
* Azumanga Daioh, Yukari has the class separate into two teams for a game of dodge-ball. Naturally, she's the leader of one of the teams, named "Team Yukari".
* Azumanga Daioh. Yukari is announcing the highest scoring person in the class and, despite being the second-lowest scoring person in the class with no chance whatsoever, Tomo stands up just before the announcement. Similarly, earlier, when Chiyo is about to be called forward during the grad ceremony to be recognized for having the highest grades in the school, Yomi has to, repeatedly and with her usual

growing irritation, tell Tomo "It's not you!"
* Azumanga Daioh, Yukari-sensei sets up a dodgeball game with her, Tomo, and Yomi on one team, and Osaka, Chiyo and Kaorin on the other. Yukari enthusiastically introduces her team as "Team Yukari", prompting an insincere "Yay" from Tomo and Yomi. Osaka, meanwhile, introduces her team with equal enthusiasm as "Team Sea Slug", over the protests of her team-mates, who also end up pulling off this trope.
* Azumanga Royale, where Chiyo did make a point of counting how many rounds she fired from her six-shooter. Too bad she didn't check how many it contained in the first place when it was issued to her...
* Azumanga und Panzer mid-battle, and in stroke of luck, ends up in an optimal position to attack the enemy flag tank and win the match.
* Azumanga und Panzer: There's Yukari Akiyama and Yukari Tanizaki. Additionally, Nonna's real name is Noriko, the same as Noriko Isobe from Duck Team.
* Azumi film, Azumi shows off her killing skills by hurling a rock into a pool. Several dead fishes float up to the surface a few seconds later.
* Azumi Hayakawa and Taro Misaki, as their relationship mirrored that of Tsubasa and Sanae but
* Azumi - set during the last years of the Sengoku period and the beginning of the Edo period
* Azumi, the titular character of the 1990s feudal Japanese manga, is a kunoichi who wields a dual-bladed katana with such skill that she can easily decimate dozens of soldiers by herself.
* Azumi was so naive as a young teen she didn't even know what the differences between boys and girls were, having been raised in complete isolation from the outside world amidst a group of boys. She later grows out of her naivety, but every man she falls in love with is killed, usually right in front of her.
* Azura also has this with one of Corrin's retainers, Jakob, due to both being
* Azura has long and voloumous light-blue hair that practically reaches her ankles.
* AzuraJae. the affectionate fanon nickname Hawkdaddy, or Papapillon in French. Additionally, Jae loves to draw fan art and write fanfiction and uploads to them to tumblr.
* Azurda is a subversion, he was definitely present, but by his own admission found human/Blade conflicts beneath his interest at the time.
* Azure-2 qualifies as well. While he's described as human in the story, there's something about him that's just... off.
* Azure Bonds Dragonbait was overwhelmed by a crowd so that even detecting thugs seeking to murder him among the relaxing and drinking folk was hard.
* Azure Bonds instead of the paladin's traditional "detect evil" ability.
* Azure City after he captures it, but ordinary casters must teleport to several miles away from the barrier and then walk in.
* Azure Crush considers a sports bra and short shorts to be a combat uniform, due to a combination of
* Azure Moon or Verdant Wind), before leaving to join Byleth five years later. He does admit to feeling slightly guilty, but believes it was worth it.
* Azure Striker Gunvolt 2: Ghauri's backstory is based on Cinderella, though its basic beats are given an ironic twist. A former victim of prejudice, Ghauri is "adopted" by the Eden organization, where he is provided with the respect he couldn't get anywhere else. His stage consists of him running away from the protagonist, referencing how Cinderella had to flee from the prince's ball. Finally, the prelude to his boss battle is a parody of the story's climax: Copen comes face-to-face with Ghauri, who has reverted to his civilian form. The villain then confirms that he is the one who was being chased, by summoning a battle armour whose most prominent feature is a pair of crystal high heels.
* Azure Striker Gunvolt and make a world only for Adepts. Their strongest members wield incredible, potentially highly destructive powers. In the story, they get to terrorize different places and Gunvolt has to stop them.
* Azure Striker Gunvolt called the Muse, but when he learns that the Muse is merely an adolescent girl named Joule held prisoner her whole life, GV goes against his

superior's orders and instead decides to free her. The two have started living together ever since, and Joule has been nursing a not-so-subtle crush on him.
* Azure Striker Gunvolt. Gunvolt, while technically weaker than either of them, was the only one who successfully bonded with the Septima and could control his powers.
* Azure Striker Gunvolt has a habit of dropping hashtags in his dialogue.
* Azure Striker Gunvolt included, a new song for Lumen, balance tweaks and implementing the Kudos difficulty system into the first game, and multiple language support.
* Azure Striker Gunvolt. It also has their own army, with robots as footsoldiers and certain powerful Adepts as officers.
* Azure Striker Gunvolt) make in practically impossible to die. Of course, these complaints no longer apply when you're trying to get a high rank, as Prevasion reduces your Kudos to zero when it activates and the Anthem massively hurts your rank.
* Azure Striker Gunvolt — Though the OVA has an English dub utilizing American voice actors residing in Japan.
* Azure Striker Gunvolt, not only is harmless, but allow him to recharge and break free.
* Azure Striker Gunvolt. Our hero — an Adept himself — disagrees with the idea.
* Azure Striker Gunvolt uses them as a way to keep a G rating as well as to add some spice, including "horsejitt" (bullshit).
* azuritereaction, a popular Let's Player, often lacks an indoor voice and loves to shout and rage in his videos.
* azuritereaction enjoys going on huge, exaggerated rages in his videos when he's losing a video game.
* Azur Lane, and Sardegna (Italy)), the correct prefix is used, but many WWII combatants didn't actually use ship prefixes, so prefixes are made up.
* Azur Lane are portrayed in anime anyway, despite her hesitance to assimilate into Slavic culture.
* Azur Lane: Cutscenes from the Siren perspective imply there is some foe out there even they can't beat with all their power, which is why they deliberately leaked Wisdom Cube technology to mankind, allowing for the KANSEN to be invented, so as to force humanity to uptech and have something to test and improve themselves against.
* Azur Lane enemy ships are just plain ships, but bosses tend to be other shipgirls who nonetheless carry boss-tier guns no matter what category (from destroyer to battleship) they actually are.
* Azur Lane machine with Richelieu's barrage standing by to mop up whatever survives.
* Azur Lane once had the same problem, as its developers have teased Shinano's inclusion in the game, thanks to data mining done by fans; they have also made her an important, albeit off-screen, character in the Swirling Cherry Blossom event. That all changed on the game's celebration of its Japanese Servers' 3rd Anniversary, when they finally introduced her as the game's very first Ultra-Rare outside of blueprint ships and retrofits of existing ships (Warspite and San Diego.)
* Azur Lane Slow Ahead's anime adaptation is twelve episodes long, though they're each only eight minutes.
* Azur Lane Taihou demands that you touch her more often (and never touch anybody else)... or else.
* Azur Lane: The Sirens are apparently fighting an even bigger threat offscreen, one that they are throwing their best at and still losing to, which is why they are using humanity as a petri dish instead of just steamrolling us. As is the case with this trope, this alleged greater enemy is never depicted onscreen, never mind openly confronted by the player's forces.
* Azur Lane, with the main story recounting the battles of the pacific theater, and events focussing on various battles that happened during the war.
* Azusa Kudo, of FMW, was able to shrug off any and all groin shots due to his gimmick being a post-op transsexual.

* Azusa Will Help is a robot maid bought on the cheap to be a baseball player.
* Az Yet, which only peaked at number 77 and it remains their last Hot 100 entry.
* Azys Lla, which is aesthetically inspired by the one from Final Fantasy VI, and even includes Proto Ultima (ultima but colored like Ultima Weapon in FFVI) flying around, as well as statues and boss fights with the Warring Triad. All three are from the first expansion, Heavensward.
* B-17 Bomber, as it was the reason people bought the console's voice module.
* B1 Centauro is sometimes described as a tank in spite of being a wheeled vehicle. Adding to the confusion, it's often called a "wheeled tank" due its high firepower and armour on par to a light tank. Terms like "wheeled tank" and "tracked armored car" have been used quite often, even in official references. For example, light armored vehicles called AMR (Automitrailleuse de Reconnaissance) were officially classed as armored cars by the French, despite being light tanks in all but designation.
* B-1RD (pronounced "Bee-One-Romeo-Delta") or C-GU11 ("Charlie-Golf-Uniform-One-One")
* B-29s, including the bombers that dropped the A-bombs, were the first mass produced pressurized aircraft. This allowed them to fly much higher than competing designs, so high in fact that they could simply fly over Japan's air defenses and the air defenses couldn't attack back.
* B2: Keep on the Borderlands. The minotaur has a cave complex inside the Caves of Chaos. Its caves have a spell on them that causes intruders to lose all sense of direction.
* Bōken Jidai Katsugeki Goemon and was meant to be released stateside in 2002. It remained on the studio's release list until its closing in 2005. Rumours say that Sony stonewalled the release due to subpar graphics.
* Bōsōzoku clothing exposing their penises. One wonders why the hell they agreed to take that photo in the first place, at 15 years old.
* B-36 Peacemaker, to the engines and fix them in flight. Perhaps thankfully, this was never tested
* B3n_de_Chamber, that was closed in 1966 as it was too close to other two of the same line. During some decades, as trains slowed down when crossing it, it was possible to see from them 60's vintage stuff (advertising, posters, turnstiles, etc). It was re-opened in 2008 as a museum.
* B3n_Federal_de_Seguridad">Dirección Federal de Seguridad for reporting on their ties with the DEA, CIA, and high-ranking corrupt officials.
* B3nimo_de_Aguilar">Gerónimo de Aguilar. Aguilar instead joined Hernán Cortés' expedition to Mexico and was the one to write their story.
* B3n,_Venezuela">It's pronounced different, with emphasis on the second "o".
* B3: Palace of the Silver Princess of Arik's power which the gem emits is enough to petrify a royal court, trap its best defenders in a dimensional prison, and attract monsters and fanatical dark priests from hundreds of miles around.
* B4nio_Villas_Boas">The Antonio Villas Boas case is one of the strangest known alien abduction incidents (and which apparently involved sex with an attractive humanoid), and it occurred in a rural area of Minas Gerais, a province in southern Brazil.
* B5. After gaining control of the system's defense computers, the Garibaldi hologram suggested to the minister, "My recommendation for you would be to stick your head between your legs and kiss your aspirations goodbye."
* B5 also had one of the most insane cases of this with a very important and critical role to the plotline.
* B5 also presents a struggle for a better, more rational future, and emphasizes the importance both of backward-looking rootedness (in the Minbari) and of forward-looking independence (in the humans). In the other words, a happy marriage of Romanticism and Enlightenment, embodied in the similarly happy marriage of John Sheridan and Delenn.
* B6rg_Jenatsch">Jörg Jenatsch was killed by a man wearing a bear costume.
* B9%80 of South Korea was reported with an IQ of 210 in the mid-1960s. He was a

guest student in physics at Hangyang University at three (both his parents were professors there) and appeared on Japan's "World Surprise Show" at four composing poetry, speaking four languages and solving integral calculus problems. NASA paid for him to attend Colorado State University and then hired him at age 11. He worked there until he was about 17, later saying it was monumentally boring and he missed his mother. He went home and changed fields entirely. Today he is a professor of civil engineering at a college near his hometown.
* Baśń O Ludziach Stąd has a gag with a bunch of those for the beggars to pick out of.
* Baśń O Ludziach Stąd to hide, but invisibility turns out to have disadvantages.
* Baśń O Ludziach Stąd with a boy who aimed for adorkable and overshot by a couple hundred metres.
* Baa Baa Black Sheep. Many scenes of the planes flying, landing or taking off are reused (they had only five Corsairs to represent a squadron of a dozen), and about all of the dogfights, bombing and ship operations were reels from WWII.
* Baa Baa Black Sheep) opened with a faux newsreel. The images were authentic but the voiceover was modern, settting up the action for the episode.
* Baa Baa Black Sheep), the episode "The Fastest Gun" has Major "Pappy" Boyington facing off against long time rival Tomio Harachi. After they manage to shoot each others' planes down and both bail out, they meet on the shore of the island they both land on and share cigarettes and chocolate while they await rescue.
* Baahubali 2, an entire army uses trees to fling themselves into enemy territory. Six men per tree, forming an impromptu cannonball using their shields in midair.
* Baaj Temple is underwater, so only the party of Tidus, Wakka and Rikku can get inside. Yet when you go to the fayth chamber, all party members are in the scene.
* Baal also counts in that every game has some form of immunity for Baal. In Disgaea D2, Baal is entirely immune to special attacks you've already used, which is a serious detriment to any mages you have as they cannot reliably use their basic attacks for damage. In Disgaea 5, each Baal on the field is immune to one element as long as it is alive, and the appropriate Baal Bit is entirely immune to a single element and powers up if struck with an attack from that element.
* Baal and don't even dare to object proposals made by a main character.
* Baal, and growls monstrously when frustrated or angry, which shows that he’s just as inhuman and unnatural as the rest of his colleagues
* Ba'al becomes this for an episode when it's revealed that he's secretly on Earth and has become a CEO of a major corporation.
* Ba'al, by far the greatest bastard of the series, wasn't satisfied with something so menial. While holding Jack O'Neil captive he tortured him to death dozens of times using everything from daggers to acid. And then, when Jack dies, he has him popped in a Sarcophagus so he can be revived to go through it all over again. The combination of torture and the mental decay from repeated resurrections drove him to demand death before he could give in.
* Ba'al. He ends up on Earth, as a freaking CEO of a huge high-tech company, and no-one seems to know where he came from, or how he got to be in charge. Of course, one must remember that Ba'al has control of the Trust, a shadow organization that has roots in most major government agencies. No doubt they could manage to forge the relevant documents.
* Baalibastus: goddess of "love, beauty, fire, passion, animals, children"
* Baal is even worse than Diablo: His attacks aren't all that strong, and the worst he can do is use a pair of curses that give mana burn and half physical resist & speed, respectively. Even worse, the last 2 Super Unique monsters you fight in Baal's throne room before you face him are much stronger.
* Baalmon carries around the Red Book of Appin, which holds within all of Baalmon's knowledge. Baalmon will grant anyone a page from the book, provided they're willing to hand over their soul in return.
* Ba'al. Of course, the good guys rarely try to pretend they're locals while space-travelling, and Vala-with-amnesia did alright on her own for a while.
* Ba'al, the final System Lord left alive by season 9 and 10, grows rather fond of

human culture
* Baal Veer, the eponymous character is a boy with the power of the fairies from Fairy Lok. He lives undercover as Ballu, the adopted son of the Daglis.
* Ba'alzamon, who was close to three and a half thousand years old at the time of his death. After his death, his body is described as decaying at a tremendously accelerated rate.
* Baantjer, a Eureka moment when the protagonists were in their usual bar, when the barman makes an offhand remark. The Eureka moment always looks and sounds the same too. Eventually Lampshaded, when the barman asks if he doesn't deserve be put on the police payroll.
* Baator (Lawful Evil) is shaped like Dante's Inferno — concentric ledges, each of infinite size.
* Baba Deep Singh is a hallowed Sikh martyr and a ferocious swordsman who, at the age of 75, is said to have personally led a defense of the Golden Temple. Both versions of the legend have him continuing to fight after being mortally wounded in the head. In one version of the tale, he fought with his
* Baba Deep Singh. The legend says that his head was cut completely or almost completely off and still was able to fight.
* Baba Ghanoush — a parody of Boba Fett — who appears in several episodes of
* Baba Is You has a level where you are given nine "Not" keywords. The point is to use them to make a sentence across an impassable obstacle.
* Baba Is You, whenever you lose control over all in-game objects (either by breaking "X is You" rules or creating situations where the rules no longer apply), the music cuts out in favor of a deep, windy howl.
* Baba Is You: While the core gameplay is still present, the Space Zone introduces the keyword "Fall", which makes objects fall to the bottom of the screen. Hence, there's something of a platforming aspect in certain levels where you have to push objects towards a certain area without letting them fall too early.
* Baba Is You will often require solutions that look or sound like exploits. Common examples include item duplication, shoving two words onto a single space, and using items to shove other items through walls. Knowing the exact physics of each and every one of these is required reading.
* Babakiueria (Barbeque Area) is an Australian film that does this with imperial Aborigines taking over and oppressing white Australians.
* B.A. Baracus is terrified of flying, so they have to drug him every time they go on a flight. One time, they put it in his burger. Another time, he realized that they needed to drug him, so he took Murdock's burger. And promptly passed out afterwards. Finally, at one point he was switching everyone's burgers, trying to figure out which one was drugged, and ultimately decides that the one burger they wouldn't have put it in is the one they gave him first... only for it to be revealed that this time, they'd drugged his milk.
* Babar, after the kids and Uncle Arthur survive a plane crash, Flora and Pom run over to him and ask him if he is okay. Arthur then mutters that he thinks he'll open his presents now before thudding flat on his fat (or chubby) grey back.
* Babar albeit divisive among fans of the original, it does succeed into making the character popular among newer generations.
* Babar and the Adventures of Badou, after the situation with the pirates is resolved, Babar tells Badou "You're going to make a fine king one day, Badou. I am very, very proud of you."
* Babar and the Adventures of Badou, Badou ventures into the lair of the Spider Queen to return her precious horn to her pile of treasure. He places it on top and she comes running up shouting about thieves. He explains that he's just returning her horn. She holds said horn up to her ear and he explains it again.
* Babar and the Adventures of Badou is a show more aim toward young kids and focus on the younger kid characters like Badou (Babar's grandson) and Zephir's daughter. Much more action-oriented than the original show. Even the contrast of the openings (the original had classic music and the new has a rap) shows this tendency.
* Babar as his best friend), with a deep rivalry against elephants but still

committed to peace and with some heroic moments once in a while.
* Babar designs a bycicle-impulsed flying machine, two robots and a submarine, among other things.
* Babar had his family absent from Object D'Arthur and What's Mine is Mine.
* Babar has Alexander telling a story to his baby sister Isabelle. Apart from the scenarios that became like child drawings, all other characters are imagined as characters from the show, though in very unusual (and even humilliating) roles.
* Babar has countries or "lands" of animated inanimated objects like the Land of Toys, the Land of Games and the Land of Ice.
* Babar has Madame, Babar's mentor and friend from the human world, moving into Celesteville and becoming a permanent resident and only recurrent character.
* Babar has the Jungle Federation which is basically the United Nations of animal kingdoms.
* Babar has two giants; a King Kong expy giant gorilla in "Conga the Terrible" and a furry bear-like giant in "Adventures on Big Island".
* Babar has Zephyr the monkey as Babar's best friend. It occasionally features other monkeys and apes as well.
* Babar most of the time. Only in the movies is Rataxes is truly evil.
* Babar movie, Babar, Celeste and Zephir try to get past some rhinos by piling up on top of each other and wrapping up in a cloak, while Zephir puts a banana in his mouth. They would've succeeded, too, if Zephir hadn't gotten too enthusiastic.
* Babar's episode during the 2000s reboot series "Land of Toys" the cast visits a country made of living sentient toys.
* Babar series, but given that most of his subjects actually like Babar, this is one case where it's generally not meant meanly.
* Babar style with the aid of a cape and a banana doesn't work out, Zephir quickly finds another use for the latter:
* Babar The Hunter continues his effort to hunt animals even though it seems to be common knowledge that large animals are sentient and getting civilized.
* Babar (which starred Babar's grandson and had several voice actors from the original show reprise their characters)
* Baba Yaga displays many qualities of Fair Folk in Russian storytelling, though is often referred to as the "Witch of the Iron Forest".
* Baba Yaga, is an example from the culture itself, though it must be said that she isn't always depicted as a bad character.
* Baba Yaga's most famous and most feared witch. She flies around using a giant mortar and pestle, is known for kidnapping and eating small children, and lives in a forest hut, which stands on chicken legs. In some tales, though, she is helpful to people who treat her respectfully and do not put their noses into her business.
* Baba Yaga. Sometimes an enemy, sometimes a guide—but always, always dangerous.
* Baba Yaga took over Russia with an army of Trolls, Frost Giants, icy Fairies and Giant Wolves, then left her daughters in charge.
* Bab Ballads), the sole survivor of the Nancy Bell's crew describes what happened to the others.
* Babe a puppy says to Babe sleeping in the same place as them, "But Mom, [Babe will] wet the bed!"
* "Babe", "broad", "doll", "dame", "muffin" or "kitten" - just some of the many ways to call a woman
* "babe-dar" then the player likely noticed how feminine the target was in the cut scene before the battle even commenced.
* Babe, despite being a family film, doesn't show Christmas in a positive light. We see Farmer Hoggett take Ferdinand's girlfriend Rosanna to the chopping block to be their meal, half of the sheep be stolen by rustlers, and the bratty granddaughter reject a homemade dollhouse.
* Babe happy, but agree to let Babe compete based on the letter of the rules not covering this—though clearly they think the situation will resolve itself via Hoggett making a fool of himself in public. For their part, the commentators covering the trials wonder aloud if Hoggett is trying to make some sort of

political protest.
* Babe, including images of a dog being drowned in a lake, and a clown having a heart attack and dying. To some, it's a terrible film that simply doesn't do the original justice because of how dark it is and because it takes Babe off the familiar farm setting. To others, it's a brilliant follow up to an already great film, and some people (including both Siskel & Ebert) thought it was even better than the original.
* Babe: It takes some help from the other animals on the farm, but Babe eventually figures out that humans eat the animals who don't have another job.
* Babel-17, a novel that's all about language, a privateer, called Butcher, never uses the words "I" or "you". Which is strange to start with, but when Wong, the language expert, is intrigued, and decides to try and help him with this problem, the results are, at first, truly strange, as Butcher struggles to figure out how to use these words properly.
* Babel-17 are barely a step away from being full-blown pirates. They're generally on the Alliance side, but there are suggestions that they're not above a little opportunist looting of both sides in a pinch. Fortunately, when they rescue Wong's ship, the captain turns out to be a big fan of Wong's poetry, and therefore welcomes her and her crew.
* Babel-17, exotic, alien-looking "cosmetisurgery" is popular with spacecraft crews. Tails and feathers are common, but variety is the key, and some of the changes are quite disturbing. Those who aren't part of the Transport culture find it very distasteful.
* Babel-17. It has a side effect of improving mental capabilities of people using the language. But despite its oddities it isn't truly alien; it was probably created by humans. The alien languages are mentioned in passing and described as very hard to comprehend. For example: an alien saw a power plant, liked the idea (they never had anything like them) and described it to another alien in 5 words. The other alien built a working power plant. On the other hand, they need tens of words to translate the English word "home" (temperature is mentioned several times). And that is the easiest to understand species.
* Babel-17, the customs officer who is helping Wong put together a crew for her ship is uncomfortable visiting the building where dead-and-uploaded personalities are housed, so he stays outside. While waiting, he is approached by a "succubus"—an uploaded personality who has learned to charm and seduce the living. When Wong returns, the officer is in a happy daze, until Wong points out that his wallet has been emptied.
* Babel-17: The protagonist is a woman in an extended marriage with all men.
* Babel-17, the protagonist, Rydra Wong, is an actual linguist, a poet, and generally a master of languages. She is able to recognize that Babel-17 is actually a language, and not just a code, after seeing just a few poorly transcribed examples.
* Babel Finch instead, a large seabird who is incredibly rude and says whatever it wants under the guise of translating for her.
* Babel Fish". The man who proves this goes on to prove that black is white. In the TV version, it is explained that combining all colors together in the form of paint equals black while combining all colors in the form of light (from colored bulbs) equals white. Fittingly, the man gets himself killed on the next zebra crossing/crosswalk.
* Babelfish. Type anything reasonable and cycle it through five or so languages, being sure to include at least one Asian language. (Or automate the process
* Babel II was built under the guidance of Babel I, an alien who fell on Earth and who wanted to use the tower to send an amplified message of help to be rescued. When that project failed, he remained on Earth, mating with humans and leaving his technology in the ruins of the tower for the first of his descendants who proved to be worthy enough.
* Babel II: Yomi's evil organization does everything to secretly control the world behind the scenes.
* Babe). Naturally, there is a scheming cat, although the story gives a

suspiciously noticeable disclaimer that there are many perfectly nice cats in the world.
* Babe: Pig in the City features this as a core challenge for the pig Babe and the farmer's wife who are routinely barred from admission to hotels because of having not just a pet, but an unorthodox one. Later played with as they do find a place for pets even though they find out that the hotel doesn't operate on an official capacity.
* Babe: Pig in the City has Snoop the airport sniffer dog. He only appears briefly, but in his limited screen time when demonstrating how he does his job at the airport, he unintentionally misinforms the airport security that Esme and Babe are carrying illegal substances and gets them temporarily arrested. This causes them to miss their connecting flight and the whole plot of the movie kicks off from here.
* Babe: Pig in the City includes the Hollywood sign, the Golden Gate Bridge, the Sydney Opera House, the Statue of Liberty, the Eiffel Tower, Big Ben, the Rio de Janiero statue of Christ, the World Trade Center, the Empire State Building, the Chrysler Building, what appears to be a Moscow cathedral, and possibly other famous landmarks. Signage in the film indicates the city Babe visits is called "Metropolis", which has a Metropolis Gun Club and Metropolis Institute of Medicine.
* Babe: Pig in the City, Mrs. Hoggett gets dragged around in pretty undignified fashion.
* Babe prompts Mr. Hogget to leave his dinner and try to split the dogs up.
* Babe Ruth is shown doing this in game three of of the 1932 World Series in a newsreel clip near the beginning of
* Babe Ruth is still the most iconic and revered baseball player of all time, untouched in excellence and admiration and one of American's biggest sport heroes.
* Babe Ruth: Man-Tank Gladiator amateur team are always named "Wildcats".
* Babe Ruth: Man-Tank Gladiator) as outdated superstitions, but he believes his religion is absolute truth.
* Babe Ruth: Man-Tank Gladiator: In-universe, Throckle No'Goor maintains that the story he's telling is completely accurate.
* Babe Ruth: Man-Tank Gladiator is narrated by a priest, 2000 years after the events supposedly took place.
* Babe Ruth: Man-Tank Gladiator is the largest, strongest, and slowest style.
* Babe Ruth: Man-Tank Gladiator, the world's greatest man-tank gladiator, as told by a priest in the year 4025.
* Babe Ruth: Man-Tank Gladiator Throckle No'Goor insists that he's an expert on the 21st century.
* Babe Ruth pointed to the center field bleachers at Wrigley Field in Chicago in the fifth inning of Game Three of the 1932 World Series. On the next pitch, he hit a home run over the center field bleachers. Newsreels of the game do show Ruth pointing right before he hit the home run, but it's not clear where exactly he pointed.
* Babe Ruth said that he would give a year of his life to hit the first home run in Yankee Stadium. Sure enough, he hit the home run. One has to wonder...
* Babe Ruth's career as a pitcher. While baseball fans know this very well, it is not as well known outside of baseball fandom.
* Babe Ruth showed Ruth angrily thrusting his index finger several times to his left, at the Cubs bench. Ruth, naturally, had no problem feeding the story he'd called the home run, though some accounts say he didn't point to centerfield, just yelled that he was hitting the pitch out.
* Babe Ruth's story: As a pretty good Boston pitcher at the time, he was converted to the outfield when his propensity for good hitting and gargantuan home runs revealed itself. He would still pitch, but not nearly as often, until he was traded to the Yankees and became a pure outfielder.
* Babe Ruth (to the point that his only child was an illegitimate daughter), but there's no doubt that he sincerely loved children. Many suspect these had a common cause — Ruth never really properly grew up himself, as he had a hard childhood and then was flung into fame and glory at a young age.
* Babe's Farmer Hoggett. "The man who in his life had uttered fewer words than any

of them knew exactly what to say. "That'll do, pig. That'll do."
* Babes In Arms is about a singer who can only sing one particular note, but does so very loud and very long.
* Babes In Arms. Note that, although it shares this trope with the Judy Garland and Mickey Rooney movie it inspired, it's got a completely different score, plot and set of characters.
* Babes in Arms song. It doesn't help that the well-known movie version didn't include the song. Also, the licensed version of the show changed one line in the song to say, "For Frank Sinatra I holler and stamp."
* Babes In Arms, though the licensed version is a considerably altered adaptation of the original.
* Babes in Arms where Rooney's characters from his films suggested they put on a show.
* Babes in the Wood arranges for his orphaned niece and nephew to be murdered, only for the killers to lose heart and abandon them in the wild woods instead. The pantomime then tells of their rescue, usually by the fairy folk, or by friends of Robin Hood. In the ballad, they have a more likely fate: they die of exposure and hunger after a few days.
* Babes in Toyland (1934), with about 5 minutes cut. It's this version that's aired for decades in TV syndication and what most people are familiar with.
* Babes in Toyland has Toyland, where everything is supposed to appeal to children.
* Babes in Toyland into an open toybox, from which he never emerges. The only reason this is debated is because publicity stills show him being forced into a birdcage and imprisoned in it, however, this happens in place of the stabbing in this version so it is an alternate ending. In the animated film, Barnaby Crookedman is last seen being chased by goblins as revenge for insulting their king shortly after his death.
* Babes in Toyland originally opened its third act with a novelty instrumental titled "In the Toymaker's Workshop," including parts for eight different noise-making toys: rooster, cuckoo, dog, cow, duck, rattle, baby and whistle.
* Babes in Toyland, the elaborately staged prologue was dropped when the original production spawned a smaller touring company; most revivals after Herbert's death continued to omit the prologue.
* Babes in Toyland, the hero and the villain are both shrunk down to toy size and then begin to engage in a sword fight while the normal-sized heroine watches them, very concerned. She could have easily flicked the villain away or stomped on him, or simply picked him up and put him in a jar or something.
* Babes in Toyland, the villain konks Stan over the head... Stan looks confused, turns to Ollie, and says "Did he hit me?" Ollie nods, and Stan collapses.
* Babes in Toyland, when Barnaby and his cohorts walk through the town to get everybody's attention, an extra accidentally closes her dress in the door and it's visible.
* Babes in Toyland, when Barnaby announces to Mother Goose Village his intention to get married to Mary Contrary, he says...
* Babes in Toyland: When Barnaby frames Tom-Tom from Pig-Napping Little Elmer.
* Babe the Blue Ox land on his head and gets mistaken for a minotaur while chasing Perry the Platypus.
* Babe). Upon realizing that Babe's too small to eat, she passes off her actions by playfully tickling Babe's stomach.
* Babe, who, upon seeing the beautifully made dollhouse that her grandfather spent so much time making, begins crying, screaming that it isn't the one she had seen on television.
* Babidi, Evil Buu (of who can be considered an example of Dark Romanticism in a sense), who then absorbs the former becoming Super Buu. This Buu is someone who is fully well aware of good and evil and takes sadistic pleasure, in killing, torturing, and, in the case of some of his victims, eating whoever comes in his way. However, when Super Buu is defused from Fat Buu he then turns into a being of pure animalistic instinct known as Kid Buu who is not acting under any sort of civilized notion of morality at all.

* Babidi has this reaction when Vegeta allows himself to be possessed and openly defies any command that doesn't have to do with fighting Goku; according to Babidi, this is the first time
* Babidi's base can simulate various environments and his henchmen use it to their advantage (although it fails spectacularly when a
* Babidi theatrically declares the beginning of his genocidal rampage through a global telepathic broadcast. Keeps giving updates to the increasingly-terrified populace as he makes progress, only to have his last broadcast show everyone Goku's Super Saiyan 3 transformation followed by Buu and Goku's first fight, and then his own death at the hands of Buu.
* Babidi uses his own scale to measure power, in "kilis". According to him, 300 kilis is necessary to
* Babidi wants revenge on Piccolo, Trunks, and Goten and has Majin Buu start destroying cities until they show themselves. Since Babidi doesn't know who they are, he gives a general description to the citizens while demanding they give them up. A World Martial Arts Tournament staff member named Marvin recognizes the description and reveals the three heroes' names. Babidi calls him a fool and says he doesn't care what their names are before killing the guy on the spot.
* Babies. A lot of baby clothing can be gender-neutral, and depending on age and how the parents dress them/cut their hair, it can be difficult to know if a baby or toddler is male or female.
* babies also participate in this: hatching sooner after being laid than their unwitting foster-parents' real eggs, then shoving their foster-siblings-to-be out.
* Babies are, surprisingly, known for their adult-like belches and farts.
* Babies are what his shoes are made of. They tend to rot, however, so he has to get new ones "Fresh daily."
* Babies can wear blue or pink if they are confident, depending on their gender. During their birth when their gender is revealed, the "boy/girl" text is color coded to blue or red, respectively.
* Babies Ever After: A couple is shown to have started a family at the end of the story.
* Babies Ever After: Having babies as the happily ever after for the characters.
* Babies Ever After: There's a reason people born for the 20 years after the end of the war were called "Baby Boomers".
* Babies Ever After: The story ends with the couple having a child or children.
* Babies' lack of object permanence is also why they often cry when you leave the room. They aren't just worried that you won't come back — they don't understand that you still
* Babies Make Everything Better: Having a baby can help better a couple's relationship.
* Babies Make Everything Better: Having a baby is the only way to solve every couples' problems, and if anyone doesn't have one, then woe unto them.
* Babies Make Everything Better — Life with babies is so much better than life without babies.
* Babies, period. Given that babies of nearly all vertebrates, from mammals and birds to even snakes and sharks share a number of similar features compared to adults, like oversized heads and eyes, scientists speculated that we're as a species genetically hardwired to find such features cute.
* Babies tend to make this expression a lot, since they're constantly encountering things that make no sense to them yet. People with severe Alzheimer's Disease show a lot of Dull Surprise for the same reason.
* Babies (which was rated PG for "cultural/maternal nudity") got a NC-16 rating, then a M18 rating on home video, compared to a G-rating everywhere else.
* Baboons are referred to as having "claws". In reality, baboons have nails like humans.
* Baboons have a system made up of four main ranks ranging from Deeproot to Highleaf. Inter-class romance is strictly forbidden. This is due to Sunrise Crownleaf (
* Baboons have the ability to create rudimentary tools. Chimpanzees have shown

this ability, but not baboons.
* Baboons, while trying to avoid a fight, will hide among infants, as most Baboons won't fight in front of them.
* Babs also posed as one running the speech class of a fake charm school to outwit Dizzy Devil in one episode. Turns out the Valley Girl equivalent of the "Rain in Spain" verse is "The Walls in the Mall are
* Babs, and they continue to do so for several seconds after being unfrozen before they notice the sudden change in scenery.
* Babs' Big Break for the Game Boy, each playable character has their own unique food to throw. Buster tosses carrots in an arc, Plucky tosses pineapples that bounce off the floors and/or walls, and Hamton bowls using watermelons.
* Babs Bunny from Tiny Toon Adventures will frequently spin to change into a costume. In the episode, "Two-Tone Town", she tries to demonstrate this technique to older cartoon character, Goopy Geer, but he can't quite get it right (the first time he tries, he ends up naked), until the very end.
* Bab Seed, Applebloom's cousin from Manehatten, was introduced and made a member of the Cute Mark Crusaders in season three and made a second appearance a few episodes later, seemingly setting her up as a regular supporting character. But afterwards, Babs was relegated to only appearing in EU material do to her VA leaving, while in the show itself, she only got one more mention in season five.
* Babs Seed in general. Not only is she an Apple relative, she's also got a nice bit of background set up. She leaves at the end of
* Babur, the first Mughal emperor of a good chunk of India and the important bits of Afghanistan, became an independent ruler and military leader at 12, fighting adult enemies who more often than not had vastly more money and soldiers than he (including the freaking Khan of the Uzbeks). He made a career out of beating larger armies, and crowned it in his adult life by eating the Delhi Sultanate.
* Babushka Lady, a woman wearing a headscarf who is holding a camera. Like Umbrella Man, Babushka Lady has become an iconic character in her own right and appears in several conspiracy theories.
* Baby 5 is a gender-inverted example that takes the trope to the point of an
* Baby Aaron survives a helicopter crash, despite it flipping over and being submerged in the ocean. Kate comments on how miraculous this is.
* Baby Alive Learns To Potty, the hot Christmas toy of 2008, would ask you to take her to the bathroom after feeding her food or water. With each success, she would ask multiple times (for example, she would ask two times after her second success, three times after her third success, and so on). The toy was remade in 2018 as Potty Dance Baby, but with three differences: it only can drink water, it can only pee in its' potty and it can move its' legs to do a
* Baby Alive: The most recent incarnation has been producing toys non-stop since 2006.
* Baby Bear's favorite food is porridge. Much to his initial chagrin, his younger sister Curly Bear doesn't like it.
* Baby Be Mine: A character kidnaps a baby due to being unable to have one of their own or feeling too attached.
* Baby Blue gets on her case, it's so noticeable, and she wants to feel better about herself.
* Baby Blues, a domestic family strip which has always had at least one baby in it, is supposedly popular among loads of baby-less fans... even teenage girls.
* Baby Blues and says that if this continues, the staff will know them by name. Darryl dismisses this, but the next panel (focusing on the staff) shows she was right.
* Baby Blues. At the end, Darryll finds out the bad boy who competed with him is now working as a janitor, and stops thinking this way.
* Baby Blues based on the strip's early days (No Hammie, no Wren, Zoe's an infant).
* Baby Blues book is titled this, and the cover shows an exhausted and embarrassed Darryl and Wanda sitting at a table that their kids have made a complete mess of.
* Baby Blues: Bunny named her identical twin boys Wendell John and Wendell Jon, and dresses them identically. She claims she has a system for telling them apart: one

twin is always placed on her left and the other on her right. However, Zoe tells Wanda that she switched them when Bunny wasn't looking and Bunny never noticed.
* Baby Blues comic, Darryl is shaken when Zoe calls him "Dad" instead of "Daddy". He rants that he's too young to be "Dad". Wanda responds that she's been "demoted" to "Ma".
* Baby Blues. Darryl and Zoe put an order for an item in the mailbox. After staring at it for a second, Zoe asks "What's taking so long?" As Zoe is a toddler at the time, we can guess that her concept of mail delivery came from cartoons.
* Baby Blues, Darryl loves both his daughters Zoe and Wren, but from the beginning, it's clear that Zoe especially has always had her daddy wrapped around her little finger.
* Baby Blues: Darryl MacPherson once did a spit-take when he learned that Zoe, after paying the coffee vendor the money, allowed the same vendor to keep the change as a tip.
* Baby Blues. Despite this, there have been a couple occasions where their kids (especially Zoe when she was a toddler) have repeated something off-color they've said (swear words or something else embarrassing) in public.
* Baby Blues, even though Hammie was named after his great-grandfather, he is a play on "ham", which was mentioned around the time he was finally given a name. Wren's name is a play on "wren" (the actual bird), although Wanda's reasoning of how she came up with the name is a different story.
* Baby Blues events, the research about babies is inaccurate, possibly because the comic was created before computers.
* Baby Blues) explains male seahorse anatomy, Wanda simplifies it by telling Zoe that the male seahorse has the baby. Wanda then offhandedly asks if male seahorses do household chores as well.
* Baby Blues featured dad Darryl dodging, weaving, and ducking the first three panels, before finally saying the page quote to his wife Wanda as he holds his son.
* Baby Blues features a Sunday strip where little brother Hammie has a garden hose trained on unaware older sister Zoe. Their dad is standing right behind Hammie and warns him that if he does what he's thinking he's in for some major time-out. Hammie contemplates this then declares "Totally worth it."
* Baby Blues features Hammie and Wren having one of these. Wren wins and almost blows her brother away when she rips a big one.
* BabyBlues: Frequently used as a running gag and is commonly used on Wren. Another running gag has Wren constantly eat prunes and the after-math always has her pooping herself. In one comic, Wren gets diarrhea after eating a whole bag of prunes and stinks up the van, leaving Darryl with a empty diaper bag and a trip the store to get pull-ups.
* Baby Blues had thought of a joke in which dad Daryl asks for milk in his coffee and mom Wanda provides it (offscreen) by squirting her breast milk directly into the cup, accompanied with a shout of "Bullseye!", prompting Daryl to remark he was really going to miss it when she stopped breastfeeding. The comic's creators knew this wouldn't be allowed, but sent it to their editor anyway to give her a laugh. What they didn't realize until it was too late was that their editor wasn't in the office that week and her substitute merely waved the strip on through. Rather predictably, it's one of the most popular strips from the comic.
* Baby Blues has a babysitter hired by Daryl and Wanda who packed her babysitting gear: games, cards, snacks, art supplies, and a taser.
* Baby Blues has a slowly sliding timeline: Zoe started out as an infant and grew into a toddler as the need for new material arose. Since then, she has been given siblings as necessary to keep the strip's title accurate. Zoe is around 10 years old now (born in the January 7, 1990 strip), Hammie is around 7-8 (born in the April 29, 1995 strip), and Wren is 1 year old (born in the October 26, 2002 strip). Wanda's pregnancies have both taken place in real time, however, without any noticeable aging from the other siblings occurring in the meantime. Kirkman and Scott state that they age around a "Three to one Ratio". It was two to one during Zoe's infancy; apparently having two siblings means simply a lot more storylines to deal with. They've also stated on record that "your children are always your

babies" and the title has nothing to do with Wren's slow development.
* Baby Blues has a swearing problem (particularly when irritated or after injuring himself, with him once somehow managing to write a swear word on a note identifying a coffee table that was intended to help one of the kids identify furniture after stubbing his leg on it).
* Baby Blues has Daryl throw out his back while packing the van for a trip to visit Wanda's parents. He is briefly delighted by his new immobility, thinking it will get him out of visiting the in-laws. Wanda has other ideas.
* Baby Blues has nicknames for every person in her class, based on their personal habits.
* Baby Blues has this, with Darryl having to put money into the swear jar numerous times. He eventually comments that he has more money in the swear jar than he has in his retirement fund.
* Baby Blues in common and spent their entire time squabbling, their three kids being basically the only reason they were still married at all. They eventually moved out after a few years, much to the MacPhersons' relief. Then in 2020, Bunny moved into the neighborhood again.
* Baby Blues: In one Sunday strip, Zoe goes to take a shower and warns Hammie not to try and scare her. In fact, just to make sure, she announces that she intends to lock the door. Hammie says, "Good," which convinces Zoe he must have rigged the doorknob somehow. She announces she won't touch it to prevent his trick from working, but then realizes that means he can come in and scare her like always.
* Baby Blues. It then cuts to an uncomfortable Darryl sleeping on the couch.
* Baby Blues like Darryl, while Hammie has black hair like Wanda. Going further, Darryl's dad Mac looks like an old version of his son, while Wanda and her sister Rhonda resemble their mother, Maggie.
* Baby Blues: More than once this trope was the final panel, after Hammie got himself into trouble, and back out of it with the help of Wanda or Darryl. One strip had him falling off of the backrest of a chair he was trying to reach the candy at the top of the fridge from, and after Wanda caught him he cheerfully cried, "Again!"
* Baby Blues!" (note the emphasis on the bold words), along with a caption that reads "What goes around comes around...usually a little too quickly."
* Baby Blues occasionally does this. For example, the joke with the false weight on Wanda's driver's license was used three times.
* Baby Blues: One comic strip ends with Zoe giving Hammie an atomic wedgie for annoying her. His dad, Darryl, does the same to him in another.
* Baby Blues. One strip had Darryl, Zoe, and Hammie wondering what some noise was, and trace it to the bathroom before discovering that the noise was actually Wanda singing in the shower, when Darryl removed the shower curtain, while also feeling insulted at the implication that she was a bad singer.
* Baby Blues's recall card description says "Full-color dental postcard features little Zoe explaining certain grown-up facial expressions to her baby brother, Wren.". 12 years later, Wren would later receive a redesign which now features a full set of hair instead of three, making her appearance look more like a young girl.
* Baby Blues strip, Darryl and Wanda are hosting a party, complete with rock music.
* Baby Blues strip has Hammie giving his dad a Fathers' Day roast in lieu of a card.
* Baby Blues strip has Zoe use the taunt on Hammie, whose underwear is showing. Hammie walks off and returns with his underwear on his head, so Zoe can see it more.
* Baby Blues strip, Wanda thinks she should wean Hammie off of the pacifier because she read a magazine article that says babies could become too attached to it. In a later strip, Zoe learns that Hammie still sucks his pacifier in secret, at six years old.
* Baby Blues. Thanks to uncleared song licensing rights, it's the reason why that show wasn't released on home media until 2020, when HBO Max made it available on their service.

* Baby Blues: Usually happens in the comic where instead of the parents leaving, it's Darryl that leaves. Wanda ends up chasing or saving Zoe, Hammie, and Wren and gets hurt in the process.
* Baby Blues. We're talking about a guy who changed a diaper in the men's room at the mall.
* Baby Blues, where Darryl bought deadbolt locks to Wanda specifically because he knew she would love it (it's for their bathroom door, thus giving Wanda some privacy from the kids whenever she takes a shower).
* Baby Blues: Wren MacPherson is a very cute, little toddler and is always like this. And when her brother teases her, she always hits him with a ball they were playing off-panel.
* Baby Blues, Zoe asked her mom, Wanda, to help her confront a bully in her grade. The bully said, "Good morning, stupid." When Wanda told her not to talk to Zoe that way, she replied, "I wasn't."
* Baby Blues, Zoë and Hammie are absurdly small for preschoolers.
* Baby Boom: Diane Keaton never misses a party where her plumber's band is playing...
* Baby Boomer Comics story was reused only one year after its first telling.
* Baby Boom, J.C. takes the baby's temperature rectally, and she seems to be as stressed out by it as the baby is.
* Baby Boom) of traumatized teens is just going to cause more problems. On the other hand, Kagami was impregnated by a boy who had been visiting from Japan, and while Japan is of course aware of the whole "literally the entire city of Paris got pregnant" thing, they haven't internalized it in the same way. Her mother strongly encourages her to marry the boy when she's old enough and has returned to Japan. Kagami sees it as inevitable.
* Baby Bottleneck's leg trying to get him to sit on an egg. It stretches out like taffy, and Daffy tries to gather it before he's chased by Porky, leading him to walk lopsided. He finally pulls the leg back to normal by pulling on a hair on his head.
* Baby Bottle Pop mind you, looks like it's straight out of 1988. Made even worse by the fact that the commercial ran into the early 2000s.
* Baby Buggy Bunny, Bugs discovers the sack-o-hell infant foundling he's been caring for is really bank robber Baby Face Finster, and disciplines him with a good spanking, each slap dislodging a pistol, a blackjack, a grenade, a machine gun...
* "Baby Buggy Bunny" is about a dwarf gangster named "Babyface" Finster who, after a clever bank robbery, loses his ill-gotten gains down
* Baby Burlesks was supposed to ride in an ostrich-drawn cart, but the bird bolted and Temple was almost crushed.
* Baby Cakes": After the Cake twins are born, Rarity warns the parents that baby unicorns are prone to strange, unpredictable bursts of magical energy, and the unicorn foal indeed spends most of the episode manifesting random magical effects.
* Babycakes by Armistead Maupin, Brian desperately wants to have a child with Mary Ann. Mary Ann has secretly stopped taking her birth control because she wants to surprise him with a pregnancy, but months go by with nothing happening. After (somehow) having Brian's sperm tested and finding that he's basically infertile, Mary Ann conspires to spend a night with a friend of theirs, a British naval officer who looks remarkably similar to Brian. However, even this fails because the friend has had a vasectomy. At the end of the book, Mary Ann's friend Connie dies in childbirth and entrusts the baby to Mary Ann and Brian's care.
* Baby Cakes comment by Twilight Sparkle kick starts Pinkie Pie's pride and forces her to step up to the responsibilities of caring for the foals she's babysitting.
* Baby Cakes". Mr. Cake introduces his twin foals to the Mane Six while sporting a faceful of stubble, an undone bow tie, and his mane and cap in disarray.
* Baby Cakes", Pinkie Pie's usual response to Cuteness Proximity is an urge to burst into song — even in the neonatal wing of the Ponyville hospital.
* "Baby Cakes" reverses the traditional ending: Mr. and Mrs. Cake are very pleased with the job Pinkie did... And ask if she can babysit for them on a regular basis.
* Baby Cakes to celebrate the twins becoming one month old, making it — in

essence — explode.
* "Baby Commercial", Phil and Lil's toy car bumps into the pyramid of diaper boxes, causing it to collapse, to the director's horror and fury.
* Baby crocodilians, in contrast to the more fearsome adults, count as this. While sharing many of the "cute" characteristics with other animals (bright, cartoony eyes, and a tiny snout that would make them look not out of place in
* Baby Daddy, Bonnie is on a date with another child's grandfather and brings the wrong stroller home after things don't go well (she was flustered and both strollers had blankets over them so the children could sleep).
* Baby Daddy, but backstory reveals that he's been in love with Riley since high school, even when she was still "Fat Pants".
* Baby Daddy", Riley takes an interest in volunteering and accepts a job as a Candy Striper at the hospital. The episode premiered in 2013.
* Baby dinosaurs. Many fossils of young dinosaurs have been found and they're thought to be as cute as buttons when they were alive. In fact, its been theorized that baby tyrannosaurs were covered in down.
* Babydoll and Rocket converse while peeling potatoes in one scene of
* Baby Doll, Baby Doll and Silva end up chasing each other through the upper floor of Fox Tail Mansion, and the sequence is set up this way.
* Baby Doll winds up falling for Killer Croc because she sees much of herself in him — but his only interest with her is how much money they can make for crimes she plans and he executes.
* "Baby, Don't Get Hooked On Me" by Mac Davis, as a warning not to get too attached to the singer, with the metaphor extended to the line "'cause I'll just use you, then I'll set you free".
* Baby Driver, all set to the tune of "Bellbottoms" by the Jon Spencer Blues Explosion.
* Baby Driver. And he does it all while barely hearing, given he uses headphones to cover his tinnitus.
* Baby Driver approved the use of his likeness because he liked the joke.
* Baby Driver). As he puts it, while his fellow crooks rob to support a drug habit, "he does drugs to support a robbery habit."
* Baby Driver, Griff gets into the getaway car and points forward as a signal to Baby to start driving. He can't quite believe it when they start speeding backwards (in preparation for a reverse J-turn).
* Baby Driver has Bo's Diner, where Deborah works and eventually meets Baby.
* Baby Driver has Buddy and Darling, a married couple who commit robberies to support their cocaine habit.
* Baby Driver involves heisting an armoured car that is delivering cash to a bank. It does not go as smoothly as the first robbery.
* Baby Driver seems to have sparked a renewed interest in iPod classics, with sales going up by 929% on eBay.
* Baby Driver that he has talked to her more in a day then he has to anyone else all year. It makes a certain amount of sense considering he spends all his time listening to music and has been raised by a deaf foster father for most of his life, whom he mainly communicates with through sign language.
* Baby Einstein direct-to-DVD series ran for 14 years, from 1997 to 2011.
* Baby Face" Nelson, who was cornered by a couple of FBI agents wielding a shotgun and a Tommy gun. Instead of retreating, Nelson advanced on them across an open field, emptying his bolt-action rifle into them as he went, and being hit nine times. The G-men died at the scene. Nelson got back into his car and drove off, dying several hours later.
* Baby falls under the "surrogate got attached" category. Mary Beth Whitehead agreed to become a surrogate for William and Elizabeth Stern. Whitehead was inseminated by William Stern under the condition that she would relinquish all parental rights when the baby was born. Days after the birth, Whitehead and her husband abducted the baby. The ensuing legal battle resulted in the Sterns gaining legal custody of the baby.
* Baby Geniuses 2 (though not quite as much as the original), he still begrudgingly

admitted that the twist was pretty good, in that he didn't see it coming and it made perfect sense in hindsight.
* Baby Geniuses, while staggering shell-shocked through a convention, before fishing out a silver flask....
* Babygirl). All three had been foundlings, given this "placeholder" name on birth certificates.
* Baby Got Back" being a prominent example). In Mauritania, girls are even sent to so-called "fat camps" to gain weight and be seen as desirable.
* "Baby Has A Nuclear Arsenal". The system that controls a planet's satellites (communications and orbital weapons) spontaneously becomes an
* Baby Herman's mother does this in the in-universe Roger Rabbit shorts of
* Baby Huey due to Baby Huey's size. Of course, Huey is usually completely unaware of this.
* Baby Huey ends with the fox leaping into a water trough after getting lassoed onto a branding iron, the original episode even had him stand up to reveal the words "The End" on his rear.
* Baby Huey, Huey's father is taken hostage by anthropomorphic, malevolent eggs and is forced to be a damsel in distress and is tied to a play train track as the eggs ride the train to run him over. He is dressed with a blond wig, dress and lipstick, although he does not seem to be embarrassed or content with the drag, and is more frightened by the fact he may be run over by a train.
* Baby Huey is a gigantic, naive duckling cartoon and comic book character who was briefly a star in Paramount Pictures shorts from the 1950s and continued to appear in Harvey Comics. A big and well-meaning but clumsy fellow, he was often the target of predators such as foxes but proved virtually indestructible.
* Baby Hueys Great Easter Adventure, ain't no rule that says a dog can't play baseball!
* "Baby" - If you're a guy, this is what you call your girlfriend. Be sure to add the word "hey" before it whenever you address her, or start with "hello", but the second syllable should be of much lower tone. If you're The Big Bopper you can elongate both words. This is a great way to cover up if you can't remember her name (after all, all girls back then seemed to have names like Peggy Sue or Mary Lou, so it's easy to get them mixed up). If that doesn't work, call her the name of a candy, confection or anything else that tastes sweet. Fifties girls like to think that they remind you of what causes cavities.
* "Baby, It's Cold Outside" generates controversy today that would have baffled its original 1940s audience. Modern listeners often think the lyrics portray date rape, with the man refusing to accept the woman's constant barrage of refusals until he finally breaks her down enough to do something against her will. The line in which she remarks, "What's in this drink?" is also seen as sounding like she's being drugged, However, when the song was written (by a man specifically to perform with his wife at cocktail parties) societal pressures were very different.
* Baby Jane can be heard sing-songing "a-five six, seven eight, a-five six, seven eight, seven eight..."
* Baby Jane? character that comes alive and haunts Blanche at the end of the film.
* Baby Jane, featured a creepy Baby Jane doll that would inexplicably animate itself in various scenes, culminating in the final scene where she comes to life and repeats a line said by Baby Jane earlier in the film.
* Baby Jane touch for a decaying plantation house. Charlotte becomes convinced that the house is haunted by her murdered lover Drew.
* "Baby Jessica". Jessica survived the experience relatively unscathed (one of her toes was amputated due to gangrene and she also got a scar on her forehead), and at age 25 she received full control of the trust fund to which thousands of people sent donations after viewing the story. Other than that, she's led a more or less normal life.
* Baby Jo: If your baby loses all her health in a fire, she launches screaming to the sky with her diaper on fire.
* Baby Kermit (as "Indiana Frog") is seen doing this in the opening credits of
* Baby kiwi birds hatch from eggs that are nearly a fifth the size of their

parents. The baby kiwi is, as a result, pretty much fully grown and ready to leave the nest the minute it hatches. The parents will often follow it around for the first year of its life, presumably to give it some beginning pointers, but afterward, it's pretty much on its own.
* Baby Lamb & Friends, was dedicated to Fred Rogers, Wayne Allwine, & Russi Taylor.
* Babylon 5 about a minor character, the nerdy bridge officer Lt. Corwin, being secretly in love with Commander Ivanova, who is the second-in-command of the whole station, and later again with her replacement Captain Lochsley. The humor is all based around how out of his league his superiors are in terms of attractiveness, with the chain-of-command issues never hinted at.
* Babylon 5: A call To Arms has Dureena Nafeel show the entire Thieves guild that she already loosened the bonds by simply dropping them, then knocking out the person who was taunting her about being restrained.
* Babylon 5: A crime lord in the early seasons is basically a sapient praying mantis. There are also the Shadows, which basically look like human-sized, black, spiky spider people, and the Gaim (who underneath their environmental suits look like giant ants).
* Babylon 5 actually had fully Newtonian physics, and you had to thrust in the opposite direction to slow down. You could roll you ship by assigning thrust points to "roll thrusters" on one side of the ship and canceling the roll with thrusts on the other side. With certain firing modes it was possible to damage all the roll thrusters on a given side of a ship and the main engines, meaning it was possible to have ships wildly spinning as the drove off the board.
* Babylon 5 a cultural misunderstanding was the cause of the Earth-Minbari War. To the Minbari, opening the weapons hatches on your ship is a polite greeting; to Earthlings, it's a sign of aggression, not helped any by the selection of a hotheaded captain all too ready to resort to shooting, in spite of Sheridan's warnings that he was the wrong man for the task.
* Babylon 5 admitted he put in the cat noise because cats are hilarious like that.
* Babylon 5, after a Centauri warship attacked the station and was destroyed, Sheridan is shown giving a speech that starts out as an apology before veering into a rant about how he's glad he blew the ship to hell because they were firing on civilians, including their own people. The reveal, of course, shows that he's only practicing. Due to circumstances in the next scene, he's unable to actually deliver the speech to the intended audience.
* Babylon 5. After calling down a nuclear bomb on his own position and jumping down a huge hole, Captain Sheridan really is dead. However, he's frozen at the moment of death by Lorien, the first living being ever to come into existence, who tells him he can "breathe on the remaining embers" of Sheridan's life. This means he gets to live for the remaining two years of the series, but Lorien's action only bought him twenty more years, so that he'll die at age 66.
* Babylon 5. After Delenn announces the formation of the Interstellar Alliance, the Rangers fly their White Stars in formation over Earth Dome, pounding the point home.
* Babylon 5. After interviewing a member of station security regarding his gambling habits, Garibaldi states that he's lying. Sinclair responds that everybody lies. The guilty lie because they have no other choice, and the innocent lie because they don't want to be blamed for something they didn't do.
* Babylon 5, after learning the secret of the "tentacles" Londo was using to cheat at cards, Lennier decides to swear an oath of silence on the matter.
* Babylon 5 a large part of Sheridan's strategy is to arrange this for the Shadows and Vorlons. Likewise, this trope was essentially the Shadow's philosophy: to get the younger races to fight amongst each other, so that the survivors would be stronger.
* Babylon 5: All of the Ranger characters wore long dusters, usually black or at least dark in color. Chiefly seen worn by the character Marcus Cole.
* Babylon 5 all shave their heads, for easier access to the brain and spinal column. Their evilness varies from person to person.

* Babylon 5. All the cooler and more advanced spaceships (Minbary, Shadows, Vorlon, White Stars) have artificial gravity and don't need to spin, unlike Terran ships and the eponymous station.
* Babylon 5", all the Markab in quarantine on the station have fallen to the plague. Delenn and Lennier, having stayed with them the whole time, have had to sit helplessly and watch them all die. By the time Sheridan and Franklin arrive, it is too late. Lennier is trying to hide his tears, but Delenn breaks down as Sheridan comforts her.
* Babylon 5, all the races are flawed. Discovering how truly flawed even the "superior" races are is a major element of the myth arc.
* Babylon 5. Almost none of the foot soldiers of prominent races wear any kind of face-covering gear. Then on an occasion, an alien invasion force assaults Babylon 5 and their soldiers are all Faceless Mooks. Coincidentally this race is regarded solely as arbitrary conquerors and is never mentioned again after their attack is repelled.
* Babylon 5 also has female telepaths frequently take their mothers' last names, as the telepathic gene is stated to be passed down from the mother.
* Babylon 5 always began with a SFX pan over the planet with several Centauri ships flying by. Other planets in the series had their own establishing shots — Earthdome for Earth, a beautiful crystal city for Minbar, and so on.
* Babylon 5" (and a rarely-taken one at that) to become a citizen of an alien government?
* Babylon 5 and Delenn drops a snowglobe to shatter in extreme slow-motion against the floor.
* Babylon 5, and Garibaldi uncovers a conspiracy by an anti-mutant group to infect all human telepaths with a deadly virus so that they would either have to take daily injections of medication (also manufactured by the same corporation) and be easily controllable that way, or die in agony, Bester's paranoia can be seen as simple pre-emptive self-defense.
* Babylon 5 and instead say "this Minbari actually existed in the future and played Delenn".
* Babylon 5, and Ivanova is explicitly, if not observantly, Russian Jewish.)
* Babylon 5, and later confirmed in the more-or-less canon short story "Space, Time, and the Incurable Romantic", where Marcus is revived several hundred years later and lives happily ever after with a cloned Ivanova.
* Babylon 5, and "Legend of the Rangers" (even giving it an episode title: "To Live and Die in Starlight") which led to nothing.
* Babylon 5 and Melissa Gilbert playing husband and wife. As well, a photo from their real wedding is used in the show as one from the characters' wedding. On the show, they don't work out.
* Babylon 5 and requests answers to a series of complex scientific problems, claiming it will reward correct answers with many technological boons. Everyone eagerly starts looking for the answers, but Sheridan is suspicious. Eventually, he realizes that the probe is a weapon meant to wipe out potential galactic rivals. Anyone who is able to answer these questions is deemed a threat by the probe, causing it to explode violently. They let the probe go, but then have a remote drone relay the correct answers in order to have the probe blow up harmlessly.
* Babylon 5, and something of a final test: The female watches her prospective husband while he sleeps, to see what he is like when at his most peaceful and vulnerable. If she doesn't like what she sees, she can end the relationship right there. Naturally, the way we learned about this was when Delenn explained it to Sheridan. She liked what she saw.
* Babylon 5, and the Centauri selling entire ships even to their potential enemies as part of plans to slowly subjugate them economically. Both backfired with Earth Alliance, as the humans disassembled and studied the Centauri technologies and got a huge technological boost from it (even if the Centauri weapons remained far better) and were able to outright copy the Narn weapons (themselves based on Centauri technology).
* Babylon 5, and the first time war looms between any of the Alliance members, the

Rangers prove too thinly stretched to be able to stop both sides from shooting.
* Babylon 5 And things have never been calmer. Sheridan replies, "Yeah, but it's the peace of the gun". Sheridan then proceeds to use his own guns quite effectively.
* Babylon 5, and track him down and murder him after their psychological abuse of the man brings back memories of his criminal past.
* Babylon 5 and was inspired to covertly smuggle Narn citizens out of hostile territory. The humans roll with it and embellish records of Lincolni to continue the ruse.
* Babylon 5 approach where the monster was always in shadow, but the director chose to show the monster in too much light.
* Babylon 5. A probe sent out by an advanced species containing mathematical riddles appears to be this at first... until it's found out the thing's actually a way for the isolationist species to figure out which other races are a threat and destroy them. Fortunately, the probe's fairly stupid.
* Babylon 5, a race called the Markab dies off and others start using the local jumpgate to strip their home planet bare until Sheridan blows it up.
* Babylon 5. A race of living recorders designed to preserve the memories and knowledge of their creators, the Vindrizi seek out voluntary hosts who have nothing of their own left to live for.
* Babylon 5 are an inversion. They are described as "people who use technology to imitate the effects of magic".
* Babylon 5 are even more advanced, but by the time of the series the gap has been greatly reduced.
* Babylon 5 are full of these. Huge three way battle between the Shadows, Vorlons and Everybody Else; Huge assault on Earth with Earth Defense satellites acting as the giant killing machines that's going to kill everybody and everything.
* Babylon 5 are generally more effective at catching people unawares. However, the weapon does have some practical use in that it can do a lot of damage to organic targets and can be set to cut through reinforced doors, but its standard setting won't risk punching through the hull, unlike conventional bullets. Bullets are stated to be still be in use, but it's mainly private citizens and the occasional security force that live and operate planetside.
* Babylon 5 are nutritious enough, but very much inferior in taste to "insta-heats" (which are like microwave meals that heat themselves when opened).
* Babylon 5) are obsessed with tradition, so this is in keeping with their on-screen portrayal. They are also a deceptive people who "never tell anyone the whole truth," so the fact that a lot of their technology is "hidden" from plain sight like this makes sense.
* Babylon 5 are on Centauri Prime, speaking with a Centauri minister (with G'Kar present ostensibly as Londo's bodyguard). For the unfamiliar, while Londo is also a Centauri, G'Kar is a Narn, and there has historically been bad blood between the two races.
* Babylon 5 a reporter - and not specifying that he would be stripped naked first. After all, one shouldn't waste perfectly good clothing in the middle of a rebellion.
* Babylon 5 are really more several individuals than anything else (well, at least the major races), meaning that this trope isn't really that applicable.
* Babylon 5 are regularly shown being guarded by gold tunic & helmeted Imperial Palace Guards. Later episodes imply them to be more than merely glorified bodyguards but very capable soldiers and even perform covert ops and assassinations.
* Babylon 5, a researcher who touched the surface of a Shadow vessel was described as having died instantly as if the life had just been sucked out of him.
* Babylon 5 are very much wormhole-like on their ends, though the big expanse of hyperspace in between bears little resemblance to the theory. Additionally, nothing prevents a ship from going off-course, although this usually results in the ship getting lost in the constant gravitational eddies of hyperspace, and getting lost in hyperspace is usually a death sentence.

* Babylon 5. A semi-subversion: he's a good guy. Still a bit creepy, though...
* Babylon 5. As for stims, which aren't actually illegal, a major plot arc is Doctor Franklin's addiction and recovery. The trope is also averted in that coffee is still in use, albeit hard to get for logistics reasons, and several characters are alcoholics. One early plot also involves a dispute over a plant that the Narn use as religious incense but the Centauri use as a recreational drug.
* Babylon 5 as functional artwork, artistry, or artistic intent. The trappings are an attempt to reconnect themselves and others with the inherent wonders of the universe and of manipulating these through applied will. Even more interesting is that other people actually buy into it as well. For example, after a Technomage basically infects Londo's computer with a virus, Londo himself refers to it as being "possessed by a holo-demon".
* Babylon 5, a sketchy businessman runs a holo-brothel in Down Below, using holograms and special suits to simulate touch. It is never stated how often the suits are cleaned, but they are glitchy enough to occasionally electrocute the wearer.
* Babylon 5, as opposed to a very annoyed Earth Alliance officer who would like them to go and have their war somewhere else.
* Babylon 5 as Rebo and Zooty, an even more irritating comedy duo of the future.
* Babylon 5, as the costume designers extrapolated from some 90s fashions that were kind of odd, like printed formal shirts for men; women's fashions, on the other hand, looked a lot more timeless.)
* Babylon 5, a team of researchers are sent to the planet below the station to investigate a mysterious energy source. When the lead scientist is asked whether he is afraid to go down to the planet, he says:
* Babylon 5, a telepath says that having sex with another telepath invokes this trope, comparing it to mirrors endlessly reflecting one another.
* Babylon 5: At first, G'kar is mostly intrigued by Earth women, but later he gains an appreciation for human ideas and integrates them into his own Narn beliefs—which then become part of a new religion.
* Babylon 5 at images of the enemy to shoot them. When the ship was in a firing frenzy, she rather looked like she was having a seizure.
* Babylon 5 at the same time, which adds an extra layer of funny — honeymoon suite and all.
* Babylon 5. A very hot female political officer. Who can go from fully clothed to stark naked in the time it takes someone to turn around (neat trick).
* Babylon 5 avoid being inducted into Psi Corps did so only by becoming a citizen of a foreign government (in this case, the Minbari Federation).
* Babylon 5 because Delenn is just as starry-eyed over Sheridan as Sheridan is over her.
* Babylon 5 because he thinks of himself as a failure. Then he overhears a crisis, figures out where the bad guys have stashed Ivanova, brazens his way into the room, and proceeds to kick ass. Yup, he's back.
* Babylon 5) because the Vree's great-grandfather abducted the man's great-grandfather and conducted experiments on him. The judge laments under his breath that he always seems to get these sort of cases.
* Babylon 5 becoming part Minbari apparently leads to Minbari souls being born into human bodies. A thousand years later, Delenn becoming part human somehow (according to Delenn) closes that door, rather than opening it wider.
* Babylon 5 believe that groups of souls can be bound together to relive great relationships or repair bad ones.
* Babylon 5 between the Vorlons and the Shadows escalated and both brought out their versions of planet-killer ships to destroy worlds of younger races "touched" by the influence of the other.
* Babylon 5: "Bonehead" for Minbari among humans, and "Snakehead" as a generic term for non-humans. Interestingly, this seems to be a human thing, as none of the often equally racist aliens bother to come up with these kinds of slurs for humans, or each other.
* Babylon 5: Both Captain Sheridan and Mars Resistance leader Tessa Holloran.

* Babylon 5: Both Commander Sinclair and Captain Sheridan are decorated veterans of the Earth-Minbari War, earning the Silver Star of Valor. Sheridan even scored Earth's only victory.
* Babylon 5, both Londo and G'Kar had a tendency to tug on their lapels when giving speeches or when generally being pompous. Possibly a coincidence, but it also served as a subliminal reminder that the characters are more alike than they'd like to admit.
* Babylon 5 both went this route. It's implied to be in some ways the ultimate form of technology, with ships which can heal themselves and think for themselves.
* Babylon 5. Boxleitner's use of the nickname in the commentary track for 'Thirdspace' makes the nickname all but official.
* Babylon 5 built up over several seasons, with many scenes of epic space battles and drama, and then we come to the season 4 episode "Intersections in Real Time"; Sheridan is in prison, the only other person there for the majority of the episode the the man interrogating him, it's comprised almost entirely of dialogue, and all takes place in a featureless black room.
* Babylon 5, but certainly a very "dark grey" race, treasure poison needles the way humans treasure swords or Minbari treasure their fighting staffs.
* Babylon 5, but space travel is still expensive and the eponymous space station is too far from Earth to ship much food out. They've got a positively huge hydroponic farm, but it only grows "essential foods" and is geared towards providing a nutritionally complete diet, rather than a tasty and varied one... though said diet seems to include oranges and nectarines, and Takashima managed to sneak in a few coffee plants under the radar (later taken over by Ivanova).
* Babylon 5), but then splinter and argue over the clothing bin—leading the early-90s Zeerust to expand to the military side.
* Babylon 5 by altering the past to what it is. Which gets really confusing if you try to ask, "What happened the first time?" There are a few hints via dreams and a broadcast. It's said the Shadows' army would have been three times larger and more prone to act directly earlier.
* Babylon 5, Captain Sheridan and Delenn have an almost kiss moment — before being interrupted by a message from Ivanova, showing her usual bad timing.
* Babylon 5: Captain Sheridan pounding the heck out of a Nightwatch member:
* Babylon 5, Captain Sheridan was hiding his light cruiser in an asteroid field. He then had the nuclear warheads on board modified into mines, while the battleship kept searching for them. The human ship then send out a distress call, which immediately gave away their position and had the Minbari chase right after them, into the mines. (In a blackly amusing twist, both sides think the other's action was dishonourable - the Minbari find being baited into a trap unfair, the humans point out they were only coming so they could finish off the wounded.)
* Babylon 5 characters John Sheridan and Elizabeth Locksley realize they have made a horrible mistake and that this trope definitely applies to their relationship. Despite years of separation and being on opposite sides in the war they still have implicit trust in each other and an excellent working relationship. They prefer not to tell people they are exes though, they may draw the wrong conclusions.
* Babylon 5-class heavy cruisers (named after the titan of the sun) and the Aurora-class starfuries.
* Babylon 5-class ships. One of the buttons on the latter was programmed, at the battle of Corianna VII, to detonate 500 Megaton thermonuclear mines. Can you get any cooler?
* Babylon 5 comic is fully "in continuity", covering early events only mentioned in passing in the TV show.
* Babylon 5", Commander Sinclair wakes and finds himself the only person left on the station. It proves to be a virtual reality simulation.
* Babylon 5 commercial depicting the organization as friendly helpful people... hardly the sort to engage in some of the unpleasant business they've gotten up to in many other episodes.
* Babylon 5"), containing a race of telepathic aliens capable of influencing the minds of anyone nearby.

* Babylon 5 conversed with the severed heads of his enemies. This was only one of many signs that he was batshit insane. It was not remotely the worst.
* Babylon 5, cybernetic implants ended up causing too many complications to be a viable technology. The only example of an advanced cyborg was Abel Horn, who was essentially turned into a half-mechanical zombie with little remaining of his original personality. There's also the curious and ambiguous case of an alien called Abbut, whose brain has been heavily cyberised to act as a living, telepathic recording device. On the surface he seems to have a cheerful, easy-going personality, but as far as telepathic mind reading can tell, he has no thoughts whatsoever — whether this is because the cybernetics disrupt the scan or because his "personality" is actually a some kind of recording is never explained.
* Babylon 5 Daniel Dae Kim! There was also Dr. Sarah Chambers. Everyone else was white, though, except for Dureena Nafeel, who was an alien.
* Babylon 5 dart around the comparatively lumbering Earthforce Omega Destroyers which, having no gravity-based technology, maneuver far, far more like spacecraft we have today.
* Babylon 5. "Death of Personality" is a mindwipe carried out by the Earth Alliance as a "more humane" form of capital punishment for the worst crimes, but it's still controversial.
* Babylon 5", Delenn and Neroon are in private conference onboard a ship discussing how to resolve the Minbari Civil War. Delenn says that neither the Warrior Caste nor the Religious Caste should be allowed to win the war because it would unbalance society—but a Religious Caste member walks by the room and hears only the part that the Religious caste should not win the war. He thus concludes that Delenn is betraying her caste and surrendering the war to Neroon's Warrior Caste, which leads to the Religious Caste members (who crew the ship they are travelling on) to plot to sabotage the ship's life support so that it doesn't reach Minbar.
* Babylon 5. Delenn tells Sheridan about a Minbari custom, and what precisely a woman can do to a man who tries to abuse the custom:
* Babylon 5 demands for the series that he turned down was that the show's "thief" character Dureena be turned into a "sexual explorer" whose official job would be this.
* Babylon 5 depicted what appeared to be an actual Christian demon (it was implied that the entity's actual nature was more complex than that, but it was still strongly suggested to be genuinely supernatural).
* Babylon 5 described them once as a Space "British Empire" with a love/hate relationship with most of its former colonies.
* Babylon 5 did at least two distant endings. One involved glimpses of humanity's future up to a million years ahead, then a more conventional version many episodes later, featuring the fate of the principal characters.
* Babylon 5 did this a few times to play up the idea that "life goes on" even in space.
* Babylon 5 did this in the episode "And Now For A Word". They used it to subtly establish the nature and biases of the in-universe mainstream media, before they became plot-important.
* Babylon 5, did this to himself, but he was remarkably sanguine about it.
* Babylon 5: Doctor Franklin has a reputation for taking his oath of confidentiality very seriously, so when he arrives with an offer to set up a meeting between Captain Sheridan and the man in charge of smuggling fugitive telepaths through the station, nobody is surprised. You already know who the meeting turns out to be with.
* Babylon 5 does have paper, but is also more frequently shows characters holding transparencies of the type used on overhead projectors that need to be placed on a lighted table to read. Paper currency is never seen, but the Centauri Ducat consists at least of coins, and is thus preferred for shady transactions. Paper newspapers are occasionally seen, which one episode showing that a kiosks prints off newspapers tailored to the readers' interests on-demand, and the previous day's newspaper is fed into the same machine for recycling.
* Babylon 5 doesn't have a whole episode, but there are a few scenes where Sheridan

and Garibaldi are discussing station issues while facing a pitching machine with a digital umpire.
* Babylon 5 does this a fair amount. Most areas on the station are crowded, but nice enough; the command staff quarters are nice, if sometimes a bit Spartan; the ambassadorial wing is VERY shiny (or its equivalent; it's implied that for Narns, at least, "shiny" still involves furniture of rough-hewn stone); and Downbelow is just a hell-hole.
* Babylon 5 does this every episode as a setup for the plot of that episode.
* Babylon 5" Dr. Franklin's father General Richard "Old Firestorm" Franklin hits the dirt with his men in the EarthForce assault on the fortress of Matok. He comes out without a scratch.
* Babylon 5 drifting away, past Sinclair's front view in his Starfury.
* Babylon 5", Dr. Jacobs uses stims to keep himself awake while he runs from the law. Granted, the second example isn't a sign of an addiction to the drugs, but doctors seem to reach for them whenever they're in a tight spot.
* Babylon 5: Dr. Stephen Franklin recounts an event in his childhood wherein a kid was spaced accidentally. Although, to the show's credit, the body was frozen after having spent hours outside.
* Babylon 5 due the Centauri having formerly controlled the space around Earth. Both sides know the Centauri lied at first contact, but as the "explanation" is believable they feign believing it to not ruin the good relationship that was established in the meantime.
* Babylon 5, due to its nature, is threatened in one way or another almost every episode. However, there are at lest three examples of large-scale invasions by boarding parties.
* Babylon 5 during a daring rescue. Perhaps too well, as even the thief was distracted to the point of head-tilt!
* Babylon 5 DVD collections contain bloopers and outtakes from the season you're currently watching. All one has to do is find the hidden "5" symbol in the extras menu on the 6th disc of each season.
* Babylon 5 each other, but they did exchange a few lines), during the Earth-Minbari War, ten years before Delenn met Lennier.
* Babylon 5 early in its run, which together with the show's crew being notoriously vague about why it happened fueled all kinds of rumors. After his death in 2012, it was finally revealed that he had suffered from schizophrenia. Although he sought treatment, the delusions and paranoia caused by the disease made it too difficult for him to work and he eventually spent his final ten years hardly ever leaving his house.
* Babylon 5: Earth Alliance is the only known democracy in the Galaxy, and even it becames an authoritarian police state for a while. The others are:
* Babylon 5: Earth Force ships are E.A.S. for Earth Alliance Starship. None of the non-human races seem to bother with the whole thing.
* Babylon 5, Earth was on the losing end of a genocidal war against the Minbari. However, Londo recalls years later, humanity refused to roll over and made the Minbari fight hard for every little gain, even though they knew the bloody end was inevitable.
* Babylon 5, Emperor Cartagia comments that while he is infallible, he has to put up with everyone else making mistakes.
* Babylon 5 ended up with this due to the gimmick of each season covering exactly one calendar year in show chronology, and its desire for big end-of-season cliffhangers.
* Babylon 5 ends the major conflict that drove the show (the Shadow war) just six episodes into Season 4. The remainder of Season 4 was mostly about resolving the secondary conflict of the show (President Clark's regime on Earth), and the entirety of Season 5 consisted mainly of tying up loose ends.
* Babylon 5 End. The error was pointed out in a usenet post and corrected for the subsequent broadcast, in spite of misgivings by the writer given that the original scene had the camera was right on Sheridan's face for the whole scene. Watch his mouth, and it's very obvious he says "West" when the audio says "East".

* Babylon 5 engineer one of these against the Vorlon and Shadow fleets.
* Babylon 5 episode (5x4): "A View from the Gallery", a workman having listened to G'Kar and Londo bickering wonders aloud, "So, how long do you figure they’ve been married?"
* Babylon 5 episode, "Ceremonies of Light and Dark", the crew hold a rebirth ceremony that partly involves confessing something they have never told anyone before:
* Babylon 5 episode "Comes the Inquisitor", the Vorlons send a human named Sebastian to act as their Inquisitor. He acts, sounds, and dresses like a late 19th century upper-class Englishman, and claims he was taken by the Vorlons to do their bidding and is kept in suspended animation when he is not needed. He explains at the end that he is indeed a 19th-century Englishman, and that he thought he was chosen for a special destiny, but was wrong. And history was not kind:
* Babylon 5 episode "Convictions", Londo and G'Kar are trapped in an elevator. They exchange a final volley of insults as a rescue crew approaches (much to G'Kar's annoyance, as he'd seen the incident as a chance to watch Londo die under circumstances that would not trigger reprisals against his people).
* Babylon 5 episode "Deathwalker" requires the death of some in order to make others immortal. Deathwalker hopes to cause the various races to degenerate into civil war as revenge for the destruction of her own people.
* Babylon 5 episode "Dust to Dust", Psi Cop Alfred Bester shows up on the station to track down a drug supply which gives mundanes telepathic abilities. Given that he is himself a powerful telepath whose history with the station crew, has, ahem, created certain trust issues, he is forced to take "sleeper" drugs which completely inhibit his ability to read minds. He then uses the Psi Corp's reputation to trick a suspect into confessing by merely being present at the interrogation and blurting out "he's lying" at some point (he figured the guy had to be lying about something).
* Babylon 5 episode "Grey 17 is Missing" featured a bizarre cult that had taken over one of the decks of Babylon 5, hidden it on the blueprints and computer schematics, isolated it so no one else could enter... and then locked up themselves on that level with a ravenous alien monster which would periodically eat one of the cult members and thus make them one with the universe via a perfect death.
* Babylon 5 episode "Grey 17 is Missing," Garibaldi makes use of a steam line and some bullets he had in his pocket to make an impromptu gun to kill a monster running loose on the level in the title.
* Babylon 5 episode "Intersections in Real Time" plays out in real-time, but only between commercials. During commercial breaks (the "intersections"), it is assumed that much time passes.
* Babylon 5 episode "Knives", a disgraced noble challenges Londo Mollari to a duel by stabbing a kutari (a Centauri shortsword) into a table and announcing his intentions in no uncertain terms. Mollari (who is familiar with this type of challenge) accepts by pulling the sword out.
* Babylon 5 episode "Objects in Motion", as star-crossed lovers Stephen Franklin and Tessa Holloran (Number One) realize they have about an hour before he departs the station permanently, Stephen dashes off to prepare a rendezvous while Tessa throatily calls out, "Check! Check please!"
* Babylon 5 episode "Severed Dreams", an ISN reporter interrupts the news broadcast to announce that several Earth colonies have seceded in protest of President Clark's bombing of Mars and that armed troops have invaded ISN headquarters. An explosion is heard, then the broadcast goes off the air and is replaced by a network logo (without an explicit "Technical Difficulties" message, but with the same implications).
* Babylon 5 episodes mixed in and becoming more common as the show continued. By the third season, such episodes became very rare as the plot began to reach critical mass.
* Babylon 5 episode "The Coming Of Shadows", in which G'Kar was about to assassinate the Centauri Emperor at a reception, but was interrupted when the Emperor keeled over from illness. He later complains about this to his contact back

home, and hopes that the Emperor will recover so that he'll have an opportunity to try again later.
* Babylon 5 episode "The Deconstruction of Falling Stars" illustrates the far-reaching consequences of the Interstellar Alliance's actions.
* Babylon 5 episode "The Quality of Mercy", Mollari goes to a bar with Lennier (mostly so he can rip him off, making him pay everything). Lennier then proceeds to bore him with his entire life story. Mollari, looking pained, says: "Really? That's really interesting." Then he whispers to the female bar tender: "Kill me?"
* Babylon 5 episode "TKO", boxer Walker Smith has a defied version of this in his backstory—he refused to take a dive in his upcoming bout against the champion, so the people in charge tampered with his drug test results, ruining his boxing career.
* Babylon 5 episode "TKO" starts off as a gritty pugilistic battle and eventually devolves into a clumsy back-and-forth punch trade at the end as the fighters both approach their limits.
* Babylon 5 episode "TKO", the boxer Walker Smith says that he was driven out of the sport because he refused to lose a fight when told to.
* Babylon 5 especially when one considers that chefs double as priests and medics in Vilani society. Like the Minbari the Vilani were engaged in constant turf wars between castes and clans.
* Babylon 5 established in 2261 after the Liberation of Earth from President Clark may fit this trope as it unites the absolute majority of species and polities shown in the series under a loose affinitation.
* Babylon 5. Even Lorien, the oldest and most powerful being in the galaxy, refers to the universe itself as the creator of life.
* Babylon 5 example: Delenn and a small force of Whitestars are trying to escape from a Drakh mothership and its large force of parasite fighters. Delenn asks Lennier if he has ever seen the Warrior Caste training demonstration flights, specifically their trick of "skin dancing". Lennier nervously admits that he has, and when she asks if he can do it, he replies, "Not without several years of training...but I can program the parameters into the ship's autopilot." Delenn asks him what he needs to do then. "Push this button, and pray...very, very fast."
* Babylon 5 example — during the civil war between Sheridan's forces and Earth Force ships loyal to President Clark, Sheridan convinces one of the enemy ship captains that Clark's orders are illegal and that he should therefore disobey them. That decision is briefly reversed when the other ship's first officer takes over, and then re-reversed when the ship's crew takes the first officer into custody.
* Babylon 5" explores the long-term impact that the events of the series will have on the galaxy in 2362, 2762, 3262 and 1002262.
* Babylon 5 fans have been saddened and spooked by the disproportionate number of the regular cast who have died at a relatively early age:
* Babylon 5 faster than multiple EarthForce warships would be able to in other occasions, but once you manage to hit them they go down quickly.
* Babylon 5 featured a news report which did this, along with a whole bunch of other ghastly "journalistic" tricks, to cast the titular station in a very bad light (this happened after the newly authoritarian Earth government took over the news channel in question and turned it into an overt propaganda outlet).
* Babylon 5 featured a "Vicker", as in "VCR", in one episode. This is someone whose brain has been re-purposed as a recording device, which can preserve information without contaminating it with personal opinions. If scanned by a telepath, they have no detectable thoughts of their own.
* Babylon 5 featured scenes from far in the series' future, one of which showed a clip of Garibaldi being held hostage and apparently being shot. Almost the entire first half of season five was devoted to showing what happened to cause that scene.
* Babylon 5 featured the Narn-Centauri war, the Shadow war, and the Earth Civil War.
* Babylon 5 features an alien artifact that transfers life energy. It can be used to heal illnesses, wounds, etc., but does not visibly alter the age of either the

donor or the recipient.
* Babylon 5 First One — the very first sentient being ever born in the galaxy. His entire species was originally ageless, though they could be killed by injury or disease. But somewhere along the line, "the universe decided" that living things would need to grow old and die if there was to be any true progress, and future generations aged as normal.
* Babylon 5 flight simulator game honestly tried to make it a high quality game that faithfully depicted how a StarFury would handle. They took so long trying to get it right that they were still working on it after the series was over, resulting in the project being cancelled.
* Babylon 5 follow-up "The Lost Tales" introduces a demon into what had until then been a fairly hard sci-fi universe. The fans were not pleased.
* Babylon 5 food chain, and they helped win the Dilgar War by tipping the balance in an alliance with several other races, not because they were as powerful as the Dilgar. Also note that the Narns are near or at parity with the EA despite being around a century newer to the galactic scene. The Earth Alliance is a subversion—a race that on first impression seems exceptionally powerful, but is militarily a paper tiger that uses bold impressions, clever diplomacy, and extensive trade networks to build clout rather than force of arms.
* Babylon 5 for millions of years. The Shadows ask everyone, "What do you want?", but don't know the answer to the question themselves any more. The Vorlons ask, "Who are you?", but likewise have forgotten their answer. When their respective noses are rubbed in this fact, they rather shamefacedly agree to leave the galaxy forever and let the younger races decide their own course.
* Babylon 5 for this. Almost every large room was a redress of the council chamber, and of course all of the corridors on different levels were the same few corridors with different coloring. There's a particular type of grille partition that's seen on both B5 itself and several Minbari ships (presumably justified in-story by assuming the Minbari supplied some of the station's interior decor).
* Babylon 5 from eight days in the future, sending out a mayday about how the station is under attack by the Shadows. The message ends right as the future station explodes, and the rest of the two-part episode is spent trying to keep that future from happening.
* Babylon 5 from the minds of others. Since the ending implies it was developed by the Psi Corps, who were themselves influenced by the Shadows, its psychotic effect was probably deliberate and not just a side effect.
* Babylon 5: From time to time, the perspective would switch to one of the station's security cameras or exterior maintenance bots. Typically there would be an indicator identifying which camera they were viewing.
* Babylon 5 galore are used to technically claim that they weren't actually killing one another during their civil war.
* Babylon 5, Garabaldi sings "Show Me The Way To Go Home" on one occasion when drunk.
* Babylon 5 Garibaldi comes across a vendor selling what is either an aphrodisiac or a furniture polish, the translator can't tell. He comments that it had better not leave a waxy residue. On anything.
* Babylon 5, Garibaldi, Franklin, and Lyta are all travelling through tunnels under the surface of Mars and stop for a break. Garibaldi takes a drink from a canteen and passes it on. While he talks in the foreground, you can see Lyta drinking from the canteen, and Franklin taking a big swig. When Garibaldi gets the canteen back, he notices how light it is and asks which of them gulped, when they were all supposed to sip. He even uses his skills as an investigator to correctly guess it was Franklin.
* Babylon 5, Garibaldi is searching Ambassador G'Kar's quarters and finds a pair of pink panties.
* Babylon 5", Garibaldi learns, but can't prove, that the board of Edgars Industries is trying to have him assassinated. As part of his response, he arranges to put large bounties on all their heads if anything happens to him or Lise.
* Babylon 5: Garibaldi says nothing, but mind-reader Bester replies with

"Anatomically impossible, Mr. Garibaldi, but you're welcome to try."
* Babylon 5, Garibaldi (with the help of Commander Sinclair) pranks Lt. Commander Ivanova into thinking she slept through breakfast, at which point she hurriedly leaves, placing a call to the station's command-and-control center. As Sinclair moves to another part of the mess hall, Garibaldi counts down...
* Babylon 5 gave each of its alien ambassadors noticeable accents, the other members of their respective races didn't share them — which implies a great deal of regional differences on those planets, similar to Earth culture.
* Babylon 5 genetically engineered the Younger Races to perceive them as angels.
