* Can't Get Away with Nuthin': Someone always gets in trouble vs. never gets in trouble.
* Can't Get Away with Nuthin', where the characters consider their actions harmless but the authors don't.
* Can't Get in Trouble for Nuthin': A character wants to get in trouble, but can't.
* Can't Get in Trouble for Nuthin' to get in trouble, but for some reason or another they are never punished.
* can'tGiskard's formulation of the Zeroth law in the third of Asimov's Robot books shows that in the universe where the three laws was originally created, it was possible for robots to bend and re-interpret the laws. Doing so destroys Giskard because his positronic brain wasn't developed enough to handle the consequences of the formulation, but Daneel Olivaw and other robots were able to adapt. The only example in the comic that is a gross deviation from the law is the last panel... but of course that's the punchline.
* can't go around the Reaver fleet; since there's no stealth in space, any attempt to go around the Reaver fleet would be spotted, and be taken as a surefire sign that they're trying to avoid the Reaver fleet.
* can't grasp the metaphor and says "I tink I rather live". The Horde bring him along because a man too stupid to think the way the Empire wants its people to think could come in handy.
* Can't Grow Up factor and the creepiness of a child not acting like one and killing other immortals was similar. In his case, Kenneth ("Kenny") acts like an innocent rookie immortal who needs training and protection. Several immortals with parenting instincts fall for it and take him in. They typically lose their heads to their new ward. Ironically, he first became immortal in 1182 and is much older than most of his would-be parents.
* can than humans: humans see better in daylight thanks to our superior cone cells while dogs see better in the dark and at dusk due to their superior rod cells, allowing the two to team up and vastly increase the times and effectiveness of hunting.
* can't happen to you as a result of something going wrong during normal warp travel. You may get eaten by demons or stuck travelling for thousands of years, but at least you'll be in one piece when it happens.
* Can't Hardly Wait (2001) are possibly set in the same universe as "Huntington High School" is mentioned in both movies.
* Can't Hardly Wait all this time until he dumps her prior to graduation. He plans on revealing his feelings for her at a graduation party.
* Can't Hardly Wait, he immediately rushes upstairs to limber up, put on more deodorant, try on condoms, etc. When his (female) ex-best friend walks in on him, the bathroom door jams and they are stuck inside for almost the rest of the movie.
* Can't Hardly Wait is the following morning, likewise about five minutes long. The rest of the movie is at a party, all after dark on the day in between.
* Can't Hardly Wait wears goggles on his forehead. They are actual swimmer's goggles. He never goes swimming.
* Can't Have Sex, Ever: A couple can't or are not allowed to have sex.
* Can't Have Sex, Ever: You and your lover can't have sex or something bad will happen.
* can the AT field can be neutralized, but the only thing that can nullify an AT field is another AT field, which in most cases is generated by an Evangelion unit. However, this requires that the Eva get so close with an Angel that the range of a pallet rifle is a non-factor and melee attacks become more practical. In practice, the pallet rifle is used more to keep the Angel distracted and off balance more than it is to do damage.
* can't help but laugh (in large part because he was mostly trying to get Wilson to snap out of his funk over a third divorce).

* "Can't Help Lovin' Dat Man". The narrator's lover is lazy and stays out late and she even
* can theme; Ironwood is the Tin Woodsman, who believed he had no heart.
* can then use to destroy the AT-ATs once the command post is taken over), and generally, the AI will do practically nothing to defend it.
* can theoretically jump in whatever direction it wants. However, coming out of jump in deep-space is disastrous without fuel supplies to get back, and there is almost never any reason to do so.
* Can there be any other reason for Oscar and Emmy Award-winning Louis Gossett Jr. appearing in the
* Can the upload be copied? If the answer is "no", the work might be on the soft end of
* can they’d been sealed in. Compared to the innumerable Bohrok, there were only six Bohrok-Kal, but they had a completely different power set and full intelligence to boot.
* Can the Yellow aka Caneficent Dewspring, Master of Space and Time, Headmaster of the Jizzlenob Preparatory School for Young Wizards; the Elves did know me Cannigan the Everliving, the Elves do know me as Candle Dewspice, the Elves will know me as Candy Crowley; the Dwarfs did know me as Canned Heat, the Dwarfs do know me as Canticle Lebowitz, and the Dwarfs will know me as Canban Scrummaster...
* Can they fall from grace? And if so, do they become Demons If a central character is an angel, expect an answer to this one; otherwise, tends to be left vague. May be able to fall in love with a mortal and give up their angelic nature.
* can't hide his admiration [...] It's true, it's true! Describe something." James then replies that this is the first time a man has told him he likes listening to the sound of his voice.
* Can't Hold His Liquor: Someone gets drunk easily vs. someone can't get drunk.
* Can't Hold His Liquor, something Londo himself can, having indulged in wine, women and song regularly for decades. This allows him to act against his controllers if he first drinks the Keeper into a stupor first. Unfortunately, over the course of nearly twenty years together, the Keeper gradually develops a tolerance, eventually reaching a point where the amount of privari needed to incapacitate the Keeper is close to the amount needed to incapacitate Londo himself, reducing his ability to act when he's finally free.
* Can't Hold His Liquor: Your self-control fails when you imbibe alcohol.
* Canticle, a web novel series about a demon assassin who is banished to futuristic Earth after refusing to kill an innocent girl. Due to this, he's now hunted by his former comrades while he searches to uncover a sinister plot.
* Canticle, many of the characters possess familiars called Thralls. By making a pact with another and fusing souls, they can perform magic without lethal repercussions.
* Cantinflas." He had it all—he was short, clumsy, and had a funny accent.
* Cantinflas marathon, in that it's not the repeat of the same movie or the same series of movies but a bunch of movies with similar flavors.
* Cantinflas — A famous comedian known for his unique style of speaking, made several movies in both Mexico and Hollywood.
* Can't Kill You, Still Need You: Sparing someone's life because they further your goals.
* Can't leave Hiashi out, either — beneath that icy demeanor is a man who will get on his knees to beg his nephew to reconcile with him.
* "Can't Let Go," "Just to Hold You Once Again," "My All", "Love Takes Time", "I Still Believe"
* can't lie whatsoever). The day he decides to confess his feelings to his classmate Youko Shiragami, his three best friends admit that they've known about his crush for ages. But then he finds out Youko is a vampire and will have to leave the school if she's found out, meaning he gets very invested in protecting her secret.
* Can't Live With Them, Can't Live Without Them: A character finds their companion annoying, yet misses them when they're apart.

* Can't Live With Them, Can't Live Without Them: A character is stuck with someone against their will, but realizes they miss them when they're alone.
* Can't Live With Them, Can't Live Without Them: A person spends time with people they can't stand, but ends up missing them once they finally get the chance to be rid of them.
* Can't Live With Them, Can't Live Without Them: Can sometimes apply to romantic relationships; a character is forced to hang around with another person they find annoying, but when they're apart they find they miss them.
* Can't Live With Them, Can't Live Without Them: When you prefer to be alone but find yourself oddly attached to another.
* can't make up their minds about whether Toad and Toadette are siblings, friends, or what. As a result, it is hard to tell how many of their shippers are unaware that they could be relatives, and how many that consider this possibility another reason to ship them.
* Can't mention 40k without an obligatory Ork reference, in this case several. Roks, taking the biggest asteroid you can find and filling it up with
* Can't Move While Being Watched: A supernatural being is incapable of movement while being watched.
* Can't Move While Being Watched. Your only defense is to keep looking at it, to run away, or to close doors to delay its advance.
* can to be about two miles long in order for those big bulky passenger jets carrying hundreds of people to safely slow to a stop.
* can to leave once you have the Amulet of Yendor, but when you do, you step into the Astral Plane and head on up.
* can't prove it, he's usually sad for a while afterwards.) The rest of the gang mourns him in their respective ways. The service is very small, no family in attendance.
* can transition from one to the other and become a decent player, it just happens to be frustrating.
* can't recall the name and had some nifty tech but never figured out interstellar travel. Eventually, they were soundly defeated by an interstellar race, who allowed a few Martians to start over on Earth without any tech, while rendering Mars itself uninhabitable.
* can't regularly; the auctions just get yanked. There are recorded instances of people trying to sell organs, souls, themselves...
* Cantr II. Hell, pick a serial killer trope, and we've got/had some iteration of it.
* Cantr II, sex doesn't create children, there are no volcanoes, nor caves. But hey, since when did that stop someone waving their fetish fuel around? Caveman rumpy ahoy!
* Cantr II: This is part of what makes the game fascinating, watching the mental gymnastics performed to justify punishing one person and not another, for the same infraction.
* Cantrum, the founder and original leader of the Dark Eight, who was assassinated early on (some say by a heroic and mighty paladin, others say by an abishai who got lucky). Whatever the case, his death serves to remind devils that, no matter how strong you are, you are
* can't say it to her directly, or when he tries, it gets misinterpreted.
* Can't See Can't Hear But Love is a webtoon artist who is forced to quit after he becomes blind due to exertion.
* can't see their victims as anything other than food. Gollum even refers to sentient beings as "it" and hardly ever addresses them in the second person.
* can't see through field of darkness; she can often be seen bumping into trees midflight. Apparently, ZUN thought it would be funny to make a character's powerful-sounding ability (control of darkness) actually be useless.
* can't shift a piano. Fred tries to remove the ceiling to lift it out and ends up buried in rubble.
* "Can't sleep, clown'll eat me" is misquoted in many ways, such as "Can't sleep, the clowns will eat me", which makes no sense given that Bart is referring to a

specific clown — i.e., the one Homer shaped Bart's bed into. This is probably due to an
* cant (slope [of a road or racetrack]; lingo of a particular group; insincere talk) versus can't (cannot)
* can't slow down, he'd have been lost in the Speed Force forever, and says outright that he can never do that again.
* can't so much as hit Mihawk. Even when Mihawk delivers the final blow, he makes sure that the blow isn't fatal and shouts "try to surpass me, Roronoa Zoro!"
* can't sow, and eventually came to trap themselves in something of a vicious circle where they need to constantly steal resources from everybody else in order to keep their culture from collapsing.
* can't speak a sentence without "muthafuckin'" showing up somewhere in it. Subverted in that the humor comes from watching them discuss particle physics or how to hotwire a helicopter while swearing a blue streak a mile wide.
* can't speak at all, but did so because his habit of muttering about the murders he committed (itself the source of his alias) was what got him convicted in the first place.
* Can't Stay Normal: Returning to the life of a normal human never lasts.
* Can't Stop the Music are downright named for Greenwich Village. The first song in the movie is even an ode to New York named "The Sound of the City".
* Can't Stop the Signal: The discoverers of a hidden secret attempt to ensure it's spread far and wide.
* Can't stress enough that Transformers fans usually expect this. Some even
* Can't Take Anything with You: It is impossible to bring material objects when traveling through time. Can result in the time-traveler being naked if clothes are counted as material things.
* Can't Take Anything with You: Time travel prevents you from bringing material objects with you.
* Can't Take Criticism: A character gets angry whenever they receive the slightest bit of criticism.
* Can't Take Criticism: A character hates being criticized to the point that even receiving the smallest bit of criticism will enrage them.
* Can't Take Criticism: Can't stand being criticized for their wrongs.
* Can't Take Criticism criticism and think "stop drawing anime-style" is an example of such improvement. The Internet can be a stupid place sometimes.
* Can't Take Criticism you call us "fanatics?" We are the purest, truest expression of what we believe and you are in no place to criticize us!
* Can't Take Criticism: You're not mature enough to handle criticism well.
* Can't Tie His Tie: A man allows a woman (who he may or may not be romantic with yet) to tie his tie, showing their closeness.
* Can tune based on the traditional nursery rhyme, but gradually gets more melancholic as the melody goes on.
* Can't Un-Hear It: A specific actor's performance of a specific character becomes how people tend to hear the character's voice whenever they read the character's dialogue.
* Can't Un-Hear It: A specific actor's performance of a specific character becomes how people tend to hear the character's voice when reading written dialogue spoken by the character.
* Can turn into bats, wisps of smoke, or wolves for travel. (Bats are by
* can't use it. Whether or not they're problematic for Jaffa such as Teal'c or ex-hosts such as Carter varies.
* Can't Use Stairs: Robots, and sometimes certain creatures, have trouble using stairs.
* Can't You Read the Sign?: Someone comes across a sign with a rule that they will promptly violate or had just violated before noticing the sign.
* "Can't You See I'm Busy!" was a website with games specifically designed to look at the first glance like normal Office programs, allowing one to play them without being detected (as long as nobody is looking at them too closely).
* Canuck AT&T-analog Rogers Cable ran a series of ads featuring three French-

Canadian friends in Montreal, having hilarious and often absurd adventures featuring Rogers Mobility features.
* can use the evidence against the Sith to be acquitted at their trial for raiding the embassy. The Selkath understandably aren't happy that the Sith tried to stage a coup
* Canute "the Great", future emperor of the North Sea and king of England, Denmark and Norway, shows up in his late teens as a secondary character in the first arc. He continues to be an important driver of the plot in the second and third arcs as the spillover from his rise to power affects Thorfinn.
* Canvas 2 enjoys picking on friends, love interests and students for fun. There are a few he won't mess with, but they are the exception rather than anything approaching the rule.
* Canvas 2 gets very jealous whenever Hiroki shows interest in anyone apart from her. Except for one case where she feels completely outclassed by her 'opponent.'
* Canvas 2 grudgingly admits that Hiroki is an excellent teacher when he bothers to actually do his job.
* Canvas 2 has Ellis, though she's actually his cousin. She tends to be extremely clingy and childish.
* Canvas 2 has multiple references to the original game and several of the heroines, mostly in Misaki and Saya's routes. Both of them are sisters of heroines from the original.
* Canvas 2 has seven heroines, an optional sex encounter and numerous students after him. And he's completely unaware.
* Canvas 2 is a teacher, you're of course going to have several of these. Five, in fact. There are more students with a crush on Hiroki, but they're not heroines.
* Canvas 2 is Hiroki-sexual. She gets 15 confessions in a single day even when she looks pale and zombie-like but rejects every single one.
* Canvas 2 is probably the gentlest person in the cast, but her normal demeanor is rather distant and cool.
* Canvas Solaris, a technical metal band from Georgia, names all their songs using seemingly random nerdy-sounding words/phrases and technical terms all thrown together. Examples include "Cosmopolysyndeton", "Conveyance of Flux", "Reticular Consciousness", and of course "Dark Matter, Accretion Disk, And Interacting Binary Neutron Star In A Self-Reproducing Inflationary Universe".
* Can we count astronaut's helmets, with monolayers of gold to block the sun?
* can when he planned it that way. Two major examples from the series:
* can, which allows a Scholar (or a very high-level mage with a Scholar subjob) to bleed HP into a status effect for later use as a sudden boost to their MP. Sort of a much slower version of Convert.
* Can who already started incorporating world music sounds while in the band, but even went more into this as a solo artist. He was also one of the first sampling artists, incorporating tapes of shortwave radio broadcasts as an 'instrument'.
* can, who'd consumed an energy drink, a McDonald's latte, and a large Mountain Dew roughly two hours before suffering a heart attack.
* can, with the right cards out, potentially have the best heal in the game; he has an Ongoing that puts him on a HP equal to his Unlucky pool when he would otherwise die. He also has cards that cause him to hit himself as well as the enemy, cards that give him bonuses but cause him to take damage if his Unlucky pool gets too high, and an Ongoing that gives him bonus damage equal to 1/3 of his Unlucky pool, but also increases damage directed at him by the same amount, which can lead to the right card play at high Unlucky doing 15+ damage.
* can work on magical threats, the human capacity for stopping certain threats looks limited indeed.
* Canyon on her dying husband, only to have a rescue chopper appear seconds after he dies.
* Canyon Passage. Early on, there is some sympathy from the settlers to the Indians' plight, and some amiable - if guarded - interactions between the settlers and Indians. However, once the Indians are provoked into uprising, they are brutal: killing men, women and children indiscriminately. (And scalping Bragg, who was the

one who triggered the war.)
* Canyon Passage, George pilfers gold dust from the express office safe to cover his gambling debts. This catches up with a miner returns much sooner than expected and wants his gold before George has had a chance to replace it.
* Canyon Passage, he doesn't bother to open it first. He does not escape completely unscathed as the next time he is seen, he is limping.
* Canyon Passage. Johnny reports the death to Logan at the end of the film, and hands Logan the gun he had given him. Logan asks if it was the Indians who killed him, and Johnny admits it was one of the townsmen. He adds that if things had happened slightly different, they might have been lynching Logan on the hanging tree.
* Canyon used to be named Warhead, until the military base there got taken out by
* Can you augment intelligence? Or does the brain's pattern need to be copied
* Can You Duet), got due to cancer that ultimately took her life in 2016.
* "Can You Forgive Her?" is about a beard who finds out about the subject's sexuality and torments him about it. "She's made you some kind of laughing-stock/Because you dance to disco and you don't like rock/She made fun of you and even in bed/Said she was gonna go and get herself a real man instead"
* "Can you hear me, AkibaRed? I've got your woman. Come to the usual abandoned warehouse."
* "Can you hear me?" is repeated several times throughout the game, usually whenever Monika speaks directly to the player.
* "Can You Hear Me?": The last of the monsters that attacked the hospital in Aleppo is doing this when the Doctor first sees it.
* Can You Hear Me?. Zellin's ability to remove his fingers doesn't cause him any pain, but is nevertheless extremely unsettling to witness.
* Can You Hear My Heart?: Cha Dong Joo stood beneath the falling petals and used spoken imagery to test the voice-recognition software that will enable him to begin a new adult life hiding his deafness from a hearing public.
* Can You Hear My Heart?: Dong Joo frequently would collapse with a fever as a consequence of his fall when he was eight years old. Luckily, Woo Ri was there to nurse him.
* Can you imagine a world without lawyers?" The scene shifts into his imagination, which shows a peaceful utopia where people of all colors and cultures are holding hands and singing. Fade back to Hutz, who shudders in horror at the thought.
* "Can you imagine if two GUYS did that!? Let's Google it and see what comes up!"
* Can you make 35 cents with only two coins, one of which isn't a quarter? (Yes: the
* Can Your Pet? It's a cutesy, minute-long Nintendogs-esque game, but with chicks instead of puppies. The shock in the ending comes into full circle once you realize that the game's title is NOT a typo.
* Can You Spare a Quarter? and can carry a child with no difficulty whatsoever.
* Can You Spare a Quarter? and eventually meets a kind man who takes him in.
* Can You Spare a Quarter? and had him thoroughly beaten up. The police suspects that he's lying but they don't feel sufficiently sympathetic to Jamie's father to follow up and one officer accidentally (or "accidentally") messed up the evidence, anyway, so they can't follow up at any rate.
* Can You Spare a Quarter? and had to trade sex in exchange for food and a bed before meeting Graham. Because of this he has a cynical approach to men and is constantly worried about what Graham might do to him if he displeases him.
* Can You Spare a Quarter?: Between having undernourished on the street and in the age where boys eat a lot, Jamie consumes a lot of food when he is with Graham. This is not unexpected by Graham, who knows from his neighbours on Valdez Island and their son how much growing up boys eat.
* Can You Spare a Quarter?: Due to previous bad experience, Jamie always assumes that any man who takes him in will eventually want sex with him and other children. Graham eventually succeeds in persuading him otherwise.
* Can You Spare a Quarter?, Frank goes to his home and thoroughly beats him up.
* Can You Spare a Quarter?: Frank is proud that his son Jason both managed to find

Jamie after the latter ran away and to direct people after they have found the boy.
* Can You Spare a Quarter?: Graham drives a security guard who is after Jamie away by claiming that the boy is his son and by implying that he can get the security guard sacked. Jamie is impressed that a small man like Graham can scare away a latge security guard without any violence or threat thereof.
* Can You Spare a Quarter?: Graham is haunted by his conscience after he has left Jamie alone in the food court in order to get to his workplace, and is constantly distracted and feels physically ill as a consequence.
* Can You Spare a Quarter?: Graham remarks on the change in Jamie's appearance from a dirty street kid to a gorgeous lad after the boy has showered and changed into better clothes.
* Can You Spare a Quarter?. He has explicitly refused to be accompanied by anyone.
* Can You Spare a Quarter?: In the Nifty version Graham is homosexual and that means it will be more difficult for him to obtain the guardianship for Jamie. In the newer ASSTR/PZA version his sexual orientation is never mentioned.
* Can You Spare a Quarter?: It turns out that Jamie's parents are part of a much larger group of people who abuse children. And the investigation in the case of Jamie leads to the arrest of a number of people in high positions.
* Can You Spare a Quarter?: Jamie calls Graham "Pop", which the latter appreciates even though Jamie using this word often is a sign of something big about to happen.
* Can You Spare a Quarter?: Jamie eats food discarded in dumpsters and tells Graham that he'll eat anything. Graham infers that this is because the street boy has no dependable food source.
* Can You Spare a Quarter?: Jamie's parents would blow up at the most trivial things and beat him up.
* Can You Spare a Quarter?: Jamie tells Graham how other street children take drugs and alcohol to handle this miserable lifestyle.
* Can You Spare a Quarter?: Jamie used to get belted by his father, for example every time he forgot manners.
* Can You Spare a Quarter?: Matty assures Graham that the judge who will try Jamie's parents will throw the book at them.
* Can You Spare a Quarter? never believed Jamie's claims that his parents abused him, even though they were, until Matty took up the case and Graham came to request guardianship rights.
* Can You Spare a Quarter? or at least sex partner) and wonders whether Graham will still want him, but Graham assures him that he (Jason) isn't.
* Can You Spare a Quarter?: Pony is a medicine man who is teaching Jason various nature skills such as respect for nature and how to track someone in the snow.
* Can You Spare a Quarter?: Pony told Jason about a happy man who upon returning from military service spent hours staring into nothing after seeing too many evil things. Jason reasons that Jamie's occasional absent-minded staring is the same situation.
* Can You Spare a Quarter?: Scott's specialty is contract law, specifically the ways to exploit companies without landing in trouble.
* Can You Spare a Quarter?: Subverted because while there is only one bed at Graham's department and the 12-year old street boy Jamie offers to share it with Graham - implying that sex is on the table too, as Jamie has survived in part by trading sex for a warm bed and food - Graham instead sleeps on his desk.
* Can You Spare a Quarter?: The 12-year old street boy Jamie suffers a complete breakdown when Graham asks him how he ended up in the streets and cries out his history on Graham's shoulder.
* Can You Spare a Quarter?: The story of a boy who ran away from home and was eventually taken in by a kind elderly man is apparently loosely based on a real person, but with names etc. changed.
* Can You Spare a Quarter?: The street child Jamie has had mixed experiences with men offering him food. Sometimes it's merely the prelude to sex, but he takes from Graham's efforts at buying and preparing him food that the man cares ar least a little about him.
* Can You Spare a Quarter? used to claim that he was an unwanted child and that he

was supposed to pay them back for feeding him.
* Can You Spare a Quarter?: When Jamie becomes a little overwhelmed at Frank's Christmas Barbecue, Jason takes him up to his bed and they have an afternoon nap together. They do this again during the night after the Barbecue.
* Can You Spare a Quarter?: When Jamie encounters the mall security guard, he tightly clings on to Graham, begging him to not let the guard take him.
* Can You Spare a Quarter?: When Jamie gets a nightmare during his second night with Graham and begins thrashing around in his bed, Cindy comes down to alert Graham that something is wrong. Likewise, when Jamie becomes overwhelmed with all the people at Frank's Christmas Barbecue, she goes to fetch Jason.
* Can You Spare a Quarter? which disturb Graham when he first notices. He compares them to the marks that slaves in slave films bear.
* Can you stand on one finger? (Sure: just stick out one of your fingers, put it on the ground, and stand on top of it with your foot.)
* "Can you still have sex?" His response was, "Yeah, what does your boyfriend do? Does he have a run-up?"
* Can You Sue Your Parents For Malpractice? she turns the trope on its head — big sister Melissa is the family favorite until she defies her draconian father by moving in with her boyfriend. Rather than choosing a "new" favorite, her father takes his annoyance out on his two younger daughters.
* Can You Survive the Zombie Apocalypse? of an entire elementary school.
* Can You Survive the Zombie Apocalypse? of katanas as her main weapon.
* Can You Survive the Zombie Apocalypse? the zombie outbreak takes place in New York City and features much of the Big Apple's landscape.
* Cao Cao's historical reputation is heavily integrated with this trope, mainly thanks to
* Cao Cao's one-time rival and childhood friend Yuan Shao was this in his youth. He was a charismatic and noble young man who starts an underground railroad for those wanting to flee the corrupt Han court and was a figurehead in the fight against Dong Zhuo. But his arrogance, tolerance of corruption, inability to discern good advice from bad and poor judgement saw his fledgling state collapse to the numerically inferior Cao Cao and his sons were too divided to recover after his death.
* Cao Cao took many of Yuan Shao's soldiers prisoner. When he learned a number of them tried to escape to rejoin Yuan, Cao had them buried alive as punishment, as well as a warning to the other prisoners.
* Cao Xueqin, one of the Four Great Classical Novels of Chinese literature. It is believed by many to be the greatest novel written in the Chinese language.
* Capablanca's loss in the World Championship match to Alexander Alekhine was also an example, as he was considered so dominant that no one expected him to lose.
* Capable Charles Orrock, who plays this straight. He generally has it together, he's brave and dependable, and he knows his signals.
* capable of creating blooms of any plant that grows, has grown or will grow on Mt. Kilamanjaro
* capable of the job who focused on ending gender discrimination, pushing for more economic opportunities for women and more sexual freedom.
* capable support life as a last resort. Furthermore, that's one of the reasons he has a herald to forewarn of his coming; so that those species who have the capacity to up sticks and go somewhere else have time to do so.
* capacitor plague. The cause was attributed to industrial espionage, after an engineer was suspected of stealing formulas for a new capacitor which were revealed to be incomplete.
* Capacitors from Japanese manufacturers appear to still dominate the hi-fi market, with the opinion that if it doesn't have something from Nippon Chemicon or Elpida, forget about it.
* Caparezza (in Italian). The message means more or less: "I know how religion makes slaves out of you... but darkness will make its light". One of the album tracks (not the one where the message is) indeed talks about conspiracies and secrets.

* Cap bursts in the last second to save Black Widow from the eponymous villain in the
* Capcom all wear nice suits, often accompanied by matching ties and hats.
* Capcom, and looks and plays similarly to Cammy, but otherwise she's never been playable before, meaning that Capcom wasn't lying for the most part.
* Capcom and shyly handing her opponent a love letter. If she hits, the target reads the letter and then rockets across the screen with hearts in their eyes. If she misses, she gets stunned as she cries rivers of tears.
* Capcom, as "The Big Heist" involves robbing a safe inside a moving train.
* Capcom based on the exact same design Capcom used; it was successfully funded.
* Capcom has his family kidnapped by terrorists who have taken over the town and he gets them back with his souped-up car that has machine guns built-in.
* Capcom heroes reside in Capcom World, possibly explaining how there can be so many cameos and crossovers from completely different settings.
* Capcom is killed only after her jewels are methodically shot off first.
* Capcom mobster Frank Gritty gets killed by being thrown out of a window.
* Capcom plays this trope as straight as a gunshot — the player and the antagonists are all mobsters, and aside from death, any negative consequences of the lifestyle never arise.
* Capcom saved it from total obscurity with a production run of 191 tables.
* Capcom Sequel Stagnation, both of which also offered upgrade paths through DLC.
* Capcom Sequel Stagnation: So, we need to make a new game. Just take the old one and tweak it a bit. I don't care.
* Capcom Sequel Stagnation: When a game gets released many times with small changes between versions.
* Capcom. She looks like a twentysomething young woman, but will turn to a withered skeleton if you can defeat her.
* Capcom. She's busy trying to survive Raccoon City, while you're a little blue alien whose mission is to drive her crazy by pulling near-lethal pranks on her and mugging her for coins.
* Capcom, the butt of jokes among mainstream gamers, is so beloved by the tournament scene - four games worth of improvements produced a game where even the weakest character can win with the right strategy.
* Capcom The mobsters around him reciprocate by trying to kill him at the first opportunity.
* Capcom, the moose yells "Bodacious!" if you score a jackpot during Ball-O-Rama.
* Capcom the playfield has several indicator lights featuring a bag with a dollar sign, while "The Big Heist" has The Kid fill up a bag that's several times larger than himself.
* Capcom. This is somewhat unusual for the company, who doesn't otherwise issue takedown notices to fan games unless they're pornographic or sold for money.
* Capcom to '70s electro-mechanical pinball machines, with a single-level playfield and simpler rules. The score is even shown as a digital copy of old-fashioned scoring reels, and the game includes digitized musical chimes.
* Capcom trilogy for the SNES, the third installment never made it out of Japan. When the series was remade for Game Boy Advance, the third game was finally exported to countries outside Japan.
* Capcom, under Ryu and Ken's profiles. Then in Japan, Capcom called the character "Gouken", and all subsequent mentions of the character in the U.S. were changed.
* Capcom. Unfortunately, Capcom closed their pinball division before full manufacturing could begin, leaving only 14 prototypes. Fortunately, Gene Cunningham of Illinois Pinball Inc. bought the rights from Capcom, and eventually released a "remake" in 2006 of 191 tables.
* Capcom vs. games for the concept of "tag battle" fighters (discounting wrestling games, which have wildly different gameplay.)
* Capcom vs. games that they appeared in, Iron Man, War Machine, and most of the other characters who were equipped with jet packs or rocket boots would have moves where they used the flames produced by said jet packs and rocket boots as part of an attack.

* Capcom vs. SNK 2 If you don't get the requirements, the game stops after the last team match. If you got enough, you fight either Akuma or Rugal chosen at random. Meeting the best requirements gives you Shin Akuma or God/Ultimate Rugal chosen at random.
* Capcom vs. SNK 2: Mark of the Millennium) results in a visual of an EKG going flatline intersticed with the defeated boss's death scene.
* Capcom vs. SNK 2: Mark of the Millennium). When he taunts, he twirls his batons around like a drummer.
* Capcom vs. SNK 2: Mark of the Millennium with Shin Akuma (as in "God Akuma", not "True Akuma") and God Rugal. These were slight twists on existing characters (Shin Akuma and Omega Rugal), but could only exist as part of the crossover, since their existence involves Rugal absorbing the Dark Hadou or forcing his Orochi power into Akuma.
* Capcom vs. SNK 2. The roster is made up of mostly East Asian and white characters. 4 Eurasians (Ken, Ryo, Yuri, and Benimaru) are also on the roster, along with Balrog (black American), Blanka (originally white, but now takes the appearance of a wild man with green skin), Dhalsim (Indian), Morrigan (a succubus hailing from Scotland), and Sagat (Thai). M. Bison's ethnicity isn't clear, though.
* Capcom vs. SNK: Millennium Fight 2000, which introduced a new mechanic designed to make it easier to perform special moves. It also added Evil Ryu, Orochi Iori, Shin Akuma and God Rugal as playable characters.
* Capcom was advertised as the first in the "Capcom Classic" series, a line of low-cost pinballs with "classic-style" gameplay to appeal to all players. Needless to say, this is the only game in the series.
* Capcom was also released in a similar fashion in 2016. The original 1996 game was also ported to the Nintendo DS with updated character models, made the knife its own button rather than an equippable weapon, added a 180 quick turn feature, added subtitles for cutscenes, and local multiplayer modes. The port also adds Rebirth mode, which rearranges enemy and item placement, adds new puzzles that uses the touch screen, and has a first person knife battle in several places.
* Capcom were received with public and critic acclaim, ignoring all their other franchises.
* Capcom, which shows a pool player bouncing the cue ball off the table, knocks a glass out of the redhead's hand, ricochets off the nose of a stuffed moose, then bounces off a brunette's behind to settle back onto the table.
* Capcom World Tournament was delayed for a while, then put on hiatus, due to issues with Living Room Games being unable to guarantee a profit through traditional distribution and being unable to risk alienating retailers with distribution methods that would be more likely to turn a profit, like electronic-only format or Publish On Demand. It's still not officially "canceled", despite their decision allowing the license to lapse and their not being able to release it now if they wanted to. This particular bit of vaporware essentially killed the company, too.
* Cape and Cowl; Bolt Buck tells Snow Storm who her brother's other murderers are and where they are after he's put into the hospital by her attacking him the night before.
* Cape and Cowl, the Night Guard arrives at Bolt Buck's house after Mare Do Well/Snow Storm gives him some bruises, twists his pastern, and breaks his jaw.
* Cape Busters: A group whose purpose is to hunt super-beings, heroes and villains alike.
* Cape Busters out to destroy the city of Darwin, Australia. Then, when she returns to Whateley, she finds that her long-lost sister has been dropped into the school's care, and then...
* Cape Cod Potato Chips proudly advertises their low fat (6 g) chips as "40% reduced fat," and in tiny letters underneath, "compared to regular potato chips." This is entirely true — except that it's not
* Cape Fear. After a quarrel with his wife about his infidelity, the protagonist invokes their team work. Zoom upon his wife's face — cut to him with a blanket on the couch.

* Cape Fear Cady is technically correct when he points out that Bowden violated his legal and ethical duty as a defense attorney by burying important evidence that may have secured his client's acquittal or a reduction of his sentence. Hence he bears no grudge against the judge or the prosecutor, who were just doing their jobs correctly. However, morally-speaking, Bowden clearly made the right choice. Using that evidence would've humiliated an already traumatized rape victim (it was her sexual history, which is inadmissible today), and let Cady back on the streets in no time.
* Cape Fear do a good job, because he felt Cady so monstrous a man (by seeing what he had done to the woman he had raped) that he decided to risk his career and held back a piece of evidence (the woman's sexual history) which would have given Cady a lighter sentence, if not made him walk).
* Cape Feare", Abe developed feminine attributes due to not taking his medication. Jasper Beardley then flirted with "her". Abe would have told the truth but changed his mind when his suitor told "her" his dating plans.
* Cape Feare": "BARTDOYOUWANTSOMEBROWNIESBEFOREYOUGOTOBED?!" and "BARTYOUWANNASEEMYNEWCHAINSAWANDHOCKEYMASK?!"
* Cape Feare" invokes this trope to a significant extent. It was the last hurrah for a number of the show's original writers who were leaving. They threw every wacky or random gag into the episode with the mentality of "What are they going to do? Fire us?" This resulted in one of the most highly regarded episodes of the show ever. Among other things, the episode features an elephant stepping on Bob's face and Bob putting on a full Gilbert and Sullivan opera (complete with costumes and a playbill) after being asked to do so on the spot.
* Cape Feare isn't so much of a mystery plot, but has more of a straight forward "I'm coming to get my revenge!" premise, Bart still tells a gathering at the end of the episode how he managed to distract Sideshow Bob.
* Cape Feare", it's shown that Grampa apparently needs to take a type of medication to prevent this from happening to him.
* Cape Feare, Lisa's letter from her pen pal Anya is read in voiceover:
* Cape Fear he paid a dentist $20,000 to seriously screw up his teeth to play long-term prison inmate Max Cady. It cost him $25,000 to have the damage fixed after the movie was over. He was also tattooed with vegetable dyes, which fade after a few months, and worked out to the point of having almost no body fat.
* Cape Fear: In the 1992 adaptation, Max Cady wants revenge because his lawyer, Sam Bowden, buried evidence that could have saved Max 14 years in prison (where it's implied that he sexually assaulted there and he felt especially vulnerable due to his illiteracy). However, in the climax, it's revealed that the evidence that could have saved Max was that his victim was promiscuous, something Sam points out as ridiculous and evil. Max doesn't accept this and prepares to murder him for violating his oath as a lawyer.
* Cape Fear, Kersek's favourite drink is Jim Beam mixed with Pepto Bismol.
* Cape Fear remake has a lawyer and his family being menaced by a killer the father failed to defend in court.
* cape it onstage. Needless to say, it stuck. It was an Episcopal clerical funeral cloak. The "cape" portion of the cloak was flipped up in a collar so the actor's head couldn't be seen as he disappeared.
* Capek, a 60-second self-destruct sequence is initiated. Second, the player initiates a missile launch sequence with the missile bay doors jammed closed by Hendrix, and has to rush back to the tram to escape. Finally, to destroy the space station, the player overloads the station's reactor.
* Cape of Mandator from Dennis Jürgensen's book. It holds a pocket dimension in its folds!
* Cape Punk: Stories that deconstruct and/or present superheroes in a more grounded manner.
* Caper built what is essentially the Iron Man suit. She then stole it from the Tony Stark expy, who had funded it.
* Caper Crew novels, and is generally acknowledged as being the best wheelman in the New York underworld. His mother, who is a New York cabbie, is possibly an even

better driver than Stan.
* Caper Crew to steal something for her or else face a messy, painful death for those insults.
* Caper Rationalization: A group of criminals comes up with a reason this particular crime is justifiable.
* Caper Rationalization: The group of people doing The Caper have a good reason to steal.
* Capertown Cops: The only noises that Officer Tattles makes are sound effects, usually a horn being honked.
* Caperucita y Pulgarcito contra los monstruos section (played for laughs).
* capes acquire their powers after experiencing some sort of severe trauma, and typically they will develop a power somehow related to whatever situation they are in (physical traumas usually result in physical powers, while mental usually trauma results in mental powers, for instance). This has some interesting results, like cape demographics skewing toward women and people from bad parts of the world, as well as resulting in a balance of more Villains than Heroes since nearly everyone with powers has been failed by society and wants some payback.
* Capes & Babes telling him that he's already seen all the porn on the internet.
* Capes have at times had official status with the United States or the United Nations, or both, but are often independent.
* Capes is about Capes, Inc., which handles whatever business requires the attention of a superhero. Its employees act like a normal workforce — when a huge crisis erupts at night and daytime worker Bolt hears about it, he immediately states it's the night shift's problem and heads to bed.
* Capes Marshall's ashes and is transformed into a new superhero who saves the day. (And then promptly leaves the planet.)
* Capeta: For the first arc (first 14 episodes), the title character was voiced by Naoto Adachi, who was 12 years old at the time.
* Cape tends to have a strong chin no matter who was drawing him. Lampshaded a little when a new love interest, Bernie Rosenthal, was introduced in the '80s — she had a chin cleft, and the first thing she said to him was that he had one too.
* "Cape Troubles": Ruby hangs herself when she tries to jump from the top bunk only to have her cape get caught by accident. Her face even starts to turn blue from lack of oxygen as she gasps "Not like this! Not like this!"
* Cape Verdean was called "the barefoot diva" and recorded a studio album by the same name. This is because she sung in small, local taverns, often appearing barefoot on stage, where there was a stage, until the age of 47 when her international career started. She was quite a literal case of this trope, as she said openly she avoided wearing shoes in everyday life wherever possible.
* Cape Verde ("frying pan"), an isolation unit made entirely of zink in which - due to being completely closed as well as the climate being tropical - many prisoners died of insolation.
* Cape Westwind, the first 8-man instance, is this so much that it's common when vets find out someone is new to the fight (noted by someone who's watching the minutes long pre-fight cutscene) to tease the newbie by commenting how hard the fight is and talking about all sorts of strategies. This serves to make newbies who don't know better either more anxious or more hyped up for their first 8-man instance. The fight itself can be easily won by simply wailing on the boss and ignoring the mechanics, to the point where the fight itself is often shorter than the pre-fight cutscene.
* Cape Wings: For when a cape mysteriously transforms into fully-functional wings and then back into a cape, or wings to cape and then back.
* Cape Wrath, the protagonists are moved to a town seemingly inhabited solely by those in witness protection, and the secrets they all hold serve to be an important plot device.
* Cap-Force: The fate of most life throughout the multiverse through unknown reasons. This includes some of the cast and their families. Those left behind are

trying to find a way to reverse it.
* Cap gets hit harder and harder with this trope every year. Most superheroes operate on a sliding timescale, and thus are relatively modern, or have their origins updated slightly (Spider-Man being bitten by a genetically modified spider instead of a radioactive one, for example), but Cap always started out in WWII, he's just been asleep longer. But when Cap was first woken up, it was only about 20 years later, and the world, while very different, would have been more or less recognizable to him, or at least he would have been able to see how the seeds had been sown from his time. Now he is over 70 years out of date, and the modern world is all but incomprehensible to him when first thawed out.
* Capgras syndrome is a psychiatric and neurological disorder in which a person believes that one of their close ones (spouse, parent, friend) has been replaced by an identical double.
* Cap himself does a version of it after taking down and jumping off a Quinjet
* Capital-A Assassins do not "kill" people. They "inhume", "delete", "rub out", or "remove" people, but "killing" implies a certain unprofessionalism.
* Capital City is one of these in some early episodes. In "Dancin' Homer", it's even given its own theme song (sung by Tony Bennett, no less) which overtly invokes the trope in its lyrics.
* Capital City, the "big city" in the state that Springfield is in, is nicknamed "The Windy Apple" - suggesting that it's some sort of mashup of NYC and Chicago.
* Capital in the Twenty-First Century, Anarchists criticized him for not advocating the end of rulership, and Liberals and (economically Liberal) Conservatives outright accused him of being a (closeted) Communist. The very idea that capitalism was fundamentally anti-meritocratic was so toxic to Liberal "free market" belief that most Liberal journals wisely decided not to mention it, and instead condemned him in general terms for the statistical inaccuracy/deception he used to push his "Secret Marxist Agenda". Though Piketty is a support of the French Socialist Party, they're hardly Communist (that's another, far smaller party), more center-left at best.
* Capitalism is alive and well on Rifts Earth, with both native corporations (Triax, Northern Gun, Titan Robotics, etc.) and alien ones (Naruni Enterprises, the Splugorth)
* Capitalism Is Bad and portrayed the bad effects of their wealth on others. This was almost certainly a reflection of the growing population of creators and young adults who came of age in the immediate aftermath of the disastrous Great Recession of 2008.
* Capitalism Is Bad song, but Earworm uses the "cha-ching cha-ching" line celebrating money in "Party On The Floor".
* Capitalism Is BadThe Hippie movement eschewed the trappings of modern rat-race business world in order to pursue peace, love, and harmony with nature.
* Capitalizing the second part of a cat's name annoys fans; it's Firestar, not FireStar.
* Capital punishment. Unless you receive a pardon or stay, have your sentence commuted, or escape from prison, you will be executed at the day and time set for you by the criminal justice system.
* Capital ships are capable of jumping between systems without gates, but they can only jump to beacons activated by allies.
* Capital ships: light cruisers, cruisers, heavy cruisers (deemed obsolete in frontline service due to doctrine changes over ten thousand years, still found in civilian forces or reserve ... or in the hands of traitors), battlecruisers (using the standard cruiser chassis, these are often times badly damaged cruisers that were given an upgrade to go with their repairs), grand cruisers (almost as big as battleships, with appropriate armour and firepower, they've been removed from most frontline duties due to not fitting modern imperial strategy), battleships.
* Capital ships point defense: In the original game capital ships tend to be
* Capital Wasteland. But, we are never given a clear answer to what has happened since the Capital Wasteland's protectors, reverted back to their old ways.
* Capitan Findus. Now he is old again but looks a much more realistic, grizzled sea

captain than both of his previous incarnations.
* Capitol Critters features a variant of the Steven Bochco Productions plate where an animated mouse takes the place of Bochco's father.
* Capitol is a subversion. The corporation is governed by shareholders voting their stock like a modern day corporation, with the CEO holding a position analogous to that of the president of the United States.
* Capitol Records and other labels used different processes with terminology along the lines of "electronically rechanelled for stereo".
* Capitol Records has commented that "it provided an apt description of a record that screwed consumers out of their money."
* Capitol Records responded to a similar copyright crisis by continually releasing rarities compilations from
* Capitol Steps in as they can while commenting on a few recent news items. If they get delayed laughter the performer will likely add some comment such as "Got some low slearners here tonight" or "Better deck your chicktionaries on that one".
* Capitol Steps pre-song sketch, Pat Buchanan invites the audience to chant his new campaign slogan: "We Can't Stand Pat!"
* Capitol Steps' "Serb War" claims that the Yugoslav conflicts were the product of an
* Capitol Steps's sexual romps in such song parodies as "Unzippin' My Doo-Dah," "My Pants Go Down," "Ol' Man Zipper" and "Livin' Libido Loco."
* Capitol Steps, where a reporter asks various questions of some political figure currently caught in a scandal, and the political figure invariably replies: "Lie-lie-lie, lie-lie-lie-lie-lie-lie..."
* Cap later uses the Cosmic Cube to make the same happen to Bucky Barnes.
* Cap'n Crunch and have now found honest jobs for themselves as quality control testers at the AFCO Sponge Company.
* Cap'n Crunch cereal feature Crunch Island, discovered by Cap'n Crunch himself. The wildlife included singing trees and baseball bats, which were baseballs with eyes and bat wings. One known town is Practical Joking Ghost Town (full of ghosts that play really dated jokes on visitors) and the central mountain — Mt. Crunchmore — carved in the shape of its discoverer's face.
* Cap'n Crunch had a habit of crashing his ship through the walls of children's homes to deliver cereal to them, usually when the stupid/evil adults are forcing them to do something they don't want to do, like school.
* Cap'n Crunch, in one commercial where he uses his hat as a boomerang to take out the Soggies, reveals that he has a curious case of male pattern baldness.
* Cap'n Crunch Twitter had a storyline where Jean LaFoote, wounded, was last seen jumping into the sea and never posted again.
* Cap'n Crunch variant Vanilly Crunch, the good captain's ship is approached by Wilma the Whale, the mascot for that cereal. After the captain does a description of the cereal, he shoots a cannon at the whale! Turns out that pirate Jean LaFoote (the "bad guy" in these ads) had disguised his now-sinking vessel as Wilma. Cap'n Crunch knew it because he described Vanilly Crunch and the whale didn't smile.
* Cap'n Fang, who would give Tomo and Osaka tag-teaming together a run for their money. Ironically it's his specific mental disability which makes him the greatest kobold pirate ever. Though,
* Capnomancy: Interpreting the flow and shapes in the smoke of a fire to from a prophecy.
* Cap'n Quick and a Foozle, just as the title characters enter a dimensional vortex. The Captain's last known words: "Oh yeah. I forgot to tell you about this part."
* Capoeira, roughly means "Zoom Zoom Zoom, Capoeira (can) kill you, or (Capoeira kills someone)". Mazda carefully excises all this nonsense about Capoeira, natch — all they care about is the zoom, zoom, zooming.
* Cap of 999 tickets on a regular basis if they don't make a habit of spending them regularily and for them to generally have enough gems available to guarantee they get a hot new toy of their choice.
* Capone Bege and his Firetank pirates all dress like mafia gang; as his name

suggests, Capone Bege especially looks the part.
* Capone "Gang" Bege is one of the crueler pirates of the Worst Generation. He won't hesitate to shoot his own allies in the back for getting sentimental and loves to go
* Caporetto itself has a failed example of this trope. Pietro Badoglio, commander of the XXVII Corps, anticipated the Austro-Hungarians to try and break throught at the conjunction of his forces with the IV Corps at the Tolmino bend, and, with orders from II Army command to prepare for a counteroffensive and from the supreme command to retreat on more defensible positions before the enemy attack, deployed his artillery to shell the enemy the moment they arrived there-and instructed them to not open fire without his signal. The trap should have devastated that part of the Austro-Hungarian offensive and
* Capos brings the key up. A song that is in a low key, like E will lose most of it's bottom, since you are bringing the key up and sometimes thus "ruining" the sound. But this can create problems for other instruments. If playing a song that is normally with a capo, only the guitar has a capo. Say you want to bring it down, this can make the work hard for the bass player, if he's playing it in such a way that it's hard to move it (often the case if using open strings).
* Capote was often barefoot, standing in trenches, and filmed from specific camera angles to match the small stature of 5'3" writer Truman Capote.
* Cappadocius was the learned, scholarly founder of the Clan of Death. At some point, Cappadocius got it in its head that the art of
* , capped at a 20ft wingspan. Scientists speculate that it behaved like a modern-day frigatebird (basically the meanest bird on the open seas) and had a throat pouch like a pelican (basically the meanest bird on the beach). Now imagine a beach full of those things. Happy picnicking!
* Capper was planning to sell them before they escaped. Because Rarity had given him a selfless gift and expected nothing in return, he does his best to mislead Tempest as to where they're going.
* Cappuccino Years, Rosie flushes Ivan's exfoliating hand mitt down the loo, which then has to be unblocked at great expense.
* Caprica, a fictional online news and lifestyle magazine written in an in-universe style. It has numerous articles and offers an expanded look into life on 12 Colonies. Readers can participate in the website through the comments section and are heavily encouraged to roleplay someone living in the 12 Colonies. It is actually quite fun reading stuff written by some of the more creative commentators who have built themselves an entire persona.
* Caprica aims to focus much more on this aspect of the mythos. Despite its somewhat 1940s aethstetic, much of the setting is about the greed of corporations to monetize artificial intelligence as well as the use of virtual reality as an opiate of the mases.
* Caprica also delved into this. Zoe-A is an uploaded version of Zoe Graystone who died in a terrorist attack. Up to her point of death, she was streaming data to her virtual avatar, so Zoe-A is an almost duplicate of the original Zoe. Other people who were uploaded with less data tend to have holes in their memories and personalities. Once the technology went public, many factions found their own uses for brain uploading; Corporations sold brain uploading as an insurance against death and a way for grieving families to stay in touch with the deceased. At the same time, a terrorist organisation figured that uploading their martyrs into a virtual heaven they've built was a good loophole to resolve the whole question of what happens after death.
* Caprica because everyone speaks Caprican (which is presumably what is being represented by English). It's also useful to note that Gemenon appears to be a sort of more-religious "sister planet" of Caprica, which might be why their language might have died out earlier.
* Caprica carries on the Cylon example, and explains it as being a human (well, colonial human) programming language, specifically the one Zoe used to create her AI. Here, it's orange/red, rains upwards, and when it hits the top row it gets pinballed to the right where it's presumably 'executed'.

* Caprica. During the first season, Moore stuck to his guns about keeping it a family drama, but the last few episodes were so packed with story because the showrunners knew they weren't going to get a second season, and didn't want to leave their open storylines dangling in the wind.
* Caprica has the holo-bands, your own personal Matrix. Portrayed somewhat realistically as a new user, who just got his own avatar, doesn't know how to move without moving his physical legs. Also, he spawns in a drab concrete room with a single door, along with his guide, who apologizes for the lack of décor.
* Caprica: Homosexuality is treated as completely unremarkable in Colonial society, even among hardcore Tauron gangsters; Sam Adama is happily married to a guy named Larry. Sister Clarice Willow is also part of a group marriage, though this is treated as a quirk among monotheists, and isn't really seen among the mainstream polytheists.
* Caprica, humans from Tauron are called "dirt eaters". The word "monad" also appears to be used as a somewhat derogatory term for monotheists.
* Caprica interesting: How does he go from Willie Adama, gangster-in-training, to William "The Old Man" Adama, hardened officer of the Colonial Fleet?).
* Caprica introduces a twelve-month calendar using the same names as the Roman calendar: Ianuarius, Februarius, Martius, Aprilis, Maius, Iunius, Quintilis, Sextilis, September, October, November and December. The Roman months Quintilis and Sextilis were renamed after Julius Caesar (July) and Augustus Caesar (August) respectively.
* Caprica is directed towards foreigners (especially Taurons) rather than a subgroup of native Capricans, suggests comparisons to Britain, especially '50s Britain. The Colonies as a whole had no unified government until the Cylon war forced them to, and as a result it is hinted on occasion that the Colonial Military has more influence and power than modern American-style systems.
* Caprica is married to multiple men and women, who are all married to each other. This is implied to be unusual but perfectly legal.
* Caprica, it kind of comes with the territory. His (non-criminal) husband Larry also appears to be one of these.
* Caprica: Joseph Adama's Citroen DS, and the Greystones' Jaguar Mark 2. (Although they're technically alien vehicles that happen to look just like them.)
* Caprica, Leonard discovers he needs an alibi right then. After a halfhearted attempt at going with the barmaid excuse, he breaks down and tells them everything.
* Caprica—the Tauron Mob—and did this job dutifully. Backstory holds that he eventually broke with the Ha'la'tha and became a civil-liberties lawyer; he's the one who taught Lampkin that even the lowest, guiltiest scumbag deserves a good defense.
* Caprica, one of Clarice's her husbands asks her if the reason she invited Lacy to dinner was to make her another wife. It isn't; however, it's hinted that the reason he asked this is that she's done this before.
* Caprica (or, more accurately, he hoped to see otherwise, indicating Zoe was inside). Zoe later says that she could feel the gun was unloaded. If it hadn't been, she might have instead shot Daniel Graystone himself (her father).
* Caprica: Philo and Robot Zoe. Complicated by the robot having the mind of a dead girl and doubly complicated by him not knowing this. Zoe adopts the guise of Rachel in the V-World to V-date him. In "End of Line" Zoe comes out to him as Rachel and he decides this is too crazy for him and alerts security.
* Caprica reveals that a human personality has always been a part of their base programming, and including it in the program gave them the ability to function intelligently in a real-world environment to begin with, making this a subversion of the trope.
* Caprica, set about 50-60 years prior to the main series, follows the pattern to a degree by dressing the characters in fashions reminiscent of the '40s and '50s.
* Caprica, shifts even further in the direction of soap opera / family-based drama, while retaining a penchant for larger dramatic themes. The result is a very different show.
* Caprica Six simply tells Baltar she's an android; as she knows the world is

about to be invaded by her fellow killer robots this is not much of a gamble.
* Caprica, specifically referred to as "skeletons" more than once. Though in the finale ones with added armor plating are shown.
* Caprica that incorporate other retro aesthetics (Fedoras, cigarettes, etc).
* Caprica. The in-story virtual game "New Cap City", which plays an important role in the series is pure Diesel Punk of the Noir variety.
* Caprica. The potentially world changing Meta-real was popularized as and continues to be used for sexy purposes.
* Caprica was set a few decades before, so the design choices were supposed to put us in the mindset of an earlier era.
* Caprica, when an STO officer grants Lacy Rand this during a questioning.
* Caprica with William Adama. He turns out to be Bill Adama's older half-brother, and dies in the penultimate episode; there is a Tauron tradition of naming new children after their deceased siblings, which explains the similarity between the names.
* Caprica, Zoe and Tamara possess this ability in New Cap City in a particularly fast variant. The environment is programmed in such a way to permanently ban anyone who is killed from ever entering again. For Z&T this is just a minor nuisance because they are programs with no real body to return to, so getting killed will cause a glitch and remodel them immediately.
* Caprica: Zoe Graystone was raised by two parents who were both brilliant scientists, her father a roboticist and her mother a plastic surgeon. She topped them both by creating an artificial intelligence in her own image at the age of 16.
* Caprica Zoey, resurrected, despite knowing intellectually that she isn't. Another victim of the same bombing, Tamara Adams, is later "resurrected" the same way. Her "father" treats her as if she is still the original, but her uncle and grandmother see her as a perversion of the original's legacy and actively seek to delete her.
* Caprice Coleman began to jealously guard his spot in Ring Of Honor after he was pitted against Samson Walker and Pepper Parks, two wrestlers the promotion had shown interest in. Jealousy ended up becoming
* Capricorn-like alternate dimension in which our Earth is visible in the sky over the moon. The moon is itself a planet with Earth's density and gravity, if not its size.
* Capricorn One, a government agency specifically defeats every failsafe on Robert Caulfield's car. Not only do the brakes fail, the throttle gets stuck wide open, the gearshift is locked so he can't go into neutral, and even turning the key off won't cut the ignition.
* Capricorn One Caulfield meets his contact in a bar. The contact starts explaining that the mission's telemetry is completely wrong, but when Caulfield gets distracted, his contact has vanished.
* Capricorn One has the bad guys try to remove all traces of NASA technician Elliot Whittier. They move someone else into his apartment and she pulls out rent receipts to "prove" she has lived there for years. However, they are unable to change every phone book in the city, so the astute reporter finds Whittier still listed as living there.
* Capricorn One, the astronauts are told the safety of their families is contingent on their willingness to cooperate with the fake Mars landing.
* Capricorn One was dubbed in Czech three times. The first dub was made by Barrandov Studio for Czechoslovak Television in 1980. The second dub was made for VHS by Davay in 1992. The third dub was made for DVD in 2007.
* caprino turned out to be Spanish for 'goat-like' or 'goaty'. Caprino is not a common word however, unlike "cortina", which means "curtain." (The car was named after the town of Cortina d'Ampezzo, where the 1956 Winter Olympics were held.)
* Capri Sun series of ads features a Disrespectoid named Chuck the Clucker, whose tossing of a pouch into a chicken coop resulted in him turning half-human, half-chicken. The first of the animated shorts following Respect the Pouch's second run has Chuck laying eggs that he makes into breakfast for the other Disrespectoids, but in the process of making Boing-Boing Betty's egg, the last one he lays hatches into an actual baby chick.

* Capri Sun's "Respect the Pouch" ad campaign had children mistreating the juice pouch, and suffering a fate relating to said mistreatment. One such commercial has a boy punching holes in the bottom of the pouch as a girl watches. He drinks from the straw and immediately starts leaking. The girl tries to block one hole.
* Capsaicin) which is directly involved in the perception of pain and scalding heat. That is, it's literally chemical pain.
* Capsaicin works by activating your nerves in a way that tricks them into thinking they're sensing heat. However, this only works on certain species, primarily mammals. Birds, for example, are utterly unaffected. Capsaicin-producing plants are thought to have evolved this way due to the symbiosis they have with birds that spread their seeds (whereas mammals are more likely to destroy the seeds with their teeth). Presumably, alien species would likewise simply be incompatible (although they would need
* Caps fans whose first heartbreaks have come in the Ovechkin era have suffered nowhere near older Caps fans who remember the futility of the 80s Caps teams to reach the third round (the most crushing loss being the infamous Easter Epic in 1987) or the 90s Caps teams' inability to get past the Lemieux-led Pittsburgh Penguins (including a few blown 3-1 series leads). And when they managed to get to the Cup Finals in 1998? Ran into the buzzsaw of the Detroit Red Wings juggernaut.
* Caps in comparison to the other games in the series (Just 20 in Thracia 776—compared to 25~30 in other titles). In fact, because of these boosts, players often recommend promoting any and all Sage-capable units as soon as you're able to.
* Cap's powers themselves are sometimes overblown, as his accelerated healing is shown to have overcome a virus which those with bonafide healing factors couldn't.
* Capsule Servant did the same thing much more seriously, and that its standalone release happened during the latter's tenure... and was ported by DelightWorks, the exact same company that runs it.
* Capsule Servant Taiga, but the narrator explains that Shirou took her in himself... and then casually reveals her to have been registered into the Fujimura family anyway, right within earshot of a confused Taiga.
* Captain Aceveda, although initially disgusted by Vic's tactics, sometimes tolerates them as he sees their effectiveness at keeping crime under control. He becomes more and more compromised as he cuts various corners to advance his political career.
* Captain Ahab above the knee, he's portrayed as a skilled whale hunter to this day (and even called the best harpooner in Nantucket), the Pequod's owners have utter faith in his competence, and his crew genuinely admires him. He also charts whale migrations and manages to successfully locate a single whale that could be anywhere in the world's oceans, suggesting that his reputation as a captain is well earned.
* Captain Aivars Terekhov was another milder form of this. He never once actually disobeys orders, but in
* Captain Alberich of Karse presents an arguable subversion. Although he was deeply troubled by the
* Captain Algren returns to the samurai village where he had been held after capture in
* Captain Amelia wears a blue jacket while Dr. Doppler wears a red jacket.
* Captain America (1917-1994) and Joe Simon (1913-2011). They contributed stories from 1941 to 1942. Kirby was in part responsible for reviving and updating the character in the 1960s. He also took over the series of the character from 1976 to 1977. But both co-creators had no further involvement with the further development of Captain America from the 1970s to their respective deaths. Their deaths had no effect on the popularity of the character.
* Captain America (1944, Republic): Notable for several changes made to the character, such as having him fight gangsters rather than Nazis, and giving him a gun and a secret identity as a detective.
* Captain America (1990) did receive theatrical distribution in some foreign markets, but it went straight to VHS in the US due to financing problems.
* Captain America (1990) film, after Cap wakes up in contemporary times, he falls

in love with the niece of the girl he was involved with in the 1940s.
* Captain America (1990). He also does steal a bike from a civilian during his and Sharon's escape from the Red Skull's thugs.
* Captain America (1990), it's indicated that the red face of the Red Skull was actually a disfigurement caused by the original process, first seen tested on a rat, and which is later perfected for use with Steve who comes out looking normal, if extremely powerful in build.
* Captain America (1990)'s mooks are all attractive, fashionably dressed people.
* Captain America (1990), the one who caused his frozen body to be found in the first place.
* Captain America (1990), while still the villain of the piece, the Red Skull is more of a tragic, self-loathing figure. Instead of a German man who eagerly worked directly under Hitler, this Skull was abducted from his family in Italy as a child and forcibly experimented on. He even is capable of showing a degree of love for his daughter, which Johann Schmidt most certainly never did.
* Captain America (1990) with Captain America and the Red Skull being revived in the future.
* Captain America (1990) works for being responsible for such things as the Kennedy and Martin Luther King assassinations.
* Captain America #4, they made the retroactive flashback of the plane, that Bucky was holding to while Captain America fell into the ocean and froze. That plane was part of a plot of Baron Heinrich Zemo (retroactively pointed as the archnemesis of Captain America and Bucky in WWII). What did Zemo do after the war? He stayed hidden in an unexplored jungle in South America and led the Masters of Evil against the Avengers until he died in a landslide while fighting Captain America.
* Captain America #4 was released some months later, and the rest, as they say, is history.
* Captain America, a completely incompetent officer who is constantly prone to panicking and giving illogical orders during combat situations. The reporter following the unit confronts Captain America's commanding officer, asking how such an obviously incompetent man could be in his position, but Godfather insists that he's only got the grumblings of lower officers to go on, which isn't enough to remove someone from their position. He's so incompetent that he can't even successfully murder a POW with a bayonet.
* Captain America after Cap reclaimed the Captain America role. His real name: John Walker.
* Captain America ages far more slowly due to the super soldier serum in his veins, but can die like anyone else. His ex-sidekick, Bucky Barnes, was injected with the same Infinity Formula (in fact, it was the last of it) as Nick Fury, but is as vulnerable as your average soldier.
* Captain America, aka Weapon X/Ten; Steve Rogers is Weapon I). Captain America's shield is a Super Prototype as well, being the precursor to adamantium. Adamantium is the attempt to recreate the material of his shield, but even primary adamantium is weaker than it.
* Captain America all are over 80 years old, the Human Torch and Namor from 1939, and Captain America from 1941.
* Captain America and driven madly paranoid by a version of the Super Soldier Serum. Later Cap battled Evil Cap and Evil Bucky. Evil Bucky eventually became non-evil and sidekicked for a while before being killed; Evil Cap became a supervillain for a while, died, and recently, after the death of real Cap, came back not so evil though still slightly bent, ramping up the "righteous revolution" elements for all they're worth.
* Captain America and Dum-Dum Dugan go to visit Jimmy Jupiter, a WW2 metahuman who's just woken from a coma he's been in since the war. Unfortunately, HYDRA are after Jupiter too, and they follow the heroes straight to him, allowing them to kidnap the old man.
* Captain America and his impenetrable shield get many such moments in his movies (
* Captain America and Joe Simon, both were first-generation Americans who grew up

in Depression-era New York City like he did. Cap’s parents were Irish, Kirby’s Ashkenazi Jewish from modern-day Austria, and Simon’s from northern England. They were also both World War II veterans but he was created before they got drafted.
* Captain America and Mother Night had a relationship like this. Mother Night was deeply in love with the Skull, even though he was always abusive to her. At one point he even started flirting with Viper (another Cap villain) just to piss her off.
* Captain America and the Avengers, Juggernaut is one of the villains the Avengers face down. However, instead of his usual hulking design, the Juggernaut's the same size as every other villain, and, for some odd reason, he has a red... window?... on his helmet, making him look more like a robot than the real Juggernaut.
* Captain America and the Avengers, Red Skull has a moonbase, complete with giant laser cannon.
* Captain America and the Avengers was an even looser adaptation of the "Acts of Vengeance" crossover.
* Captain America, and to this day Gruenwald's run on the character is considered one of the best.
* Captain America and which uses resurrected dead SS troopers as indestructible immortal mooks.
* Captain America angry at someone, he's been known to asphyxiate him in the folds of his flesh.)
* Captain America. Any team he gets put in charge he treats like his family, possibly because of his late Sidekick Bucky.
* Captain America armour) by hurling his shield at him, shown in slow motion as the shield reflects off of Osborn's faceplate.
* Captain America as of the aftermath of SHIELD is officially a Captain, in charge of National Security, with his own team of shadow ops super-agents, no less.
* Captain America basically told him "look dumbass, this man is out there every day helping people no matter how much shit you dump on him, ease off already and we'll give you an exclusivity deal with the New Avengers", and this didn't help... no-one here can help you.
* Captain America, because horror was selling and superheroes weren't. Cap didn't actually introduce any stories "on panel," though. In issue #74, he appeared in a regular Captain America story (albeit one with horror aspects, as he fought the Red Skull in, literally, Hell.) He didn't appear in #75 at all, except in the title.
* Captain America being frozen is something that has to be dealt with, as the end of World War II was long before the start of the modern Marvel age, and so even if the Avengers are never formed, Cap is still out there and
* Captain America: Blue Bunny appears to have released one based on Cap's iconic shield.
* Captain America, but Bravo replies that he respects the sacrifice of his soldiers.
* Captain America calls this twice after Bucky decides to sacrifice himself in order to prevent the Red Skull's bomb from killing Cap.
* Captain America can block pretty much anything, letting Cap survive for quite a while against characters way outside of his weight class.
* Captain America can speak English, German, Russian, Spanish, Japanese, French and Italian. There might be even more that he is lingual in.
* Captain America. Captain America and his allies infiltrate her base to stop her, but Cap and Paladin are captured at one point, and subjected to Superia's feminization process. (She believes that, as women, the heroes will see the light and join her cause.) The two male heroes are rescued before the process does anything to them, however.
* Captain America. Cap wakes up and hears Giant-Man explaining how they pulled him out of the ice, remarking that even with his advanced metabolism, the odds of surviving that experience for so long were pretty much impossible.
* Captain America: Civil War action scene of the film. In contrast, the climactic fight is much smaller with dirtier combat, being a personal feud between Captain

America and Iron Man.
* Captain America: Civil War against Captain America, he explains to Black Panther why:
* Captain America: Civil War, and are constatly making jokes as a means to avoid dealing with the emotional fallout.
* Captain America: Civil War and even harp on each other for pulling punches.
* Captain America: Civil War and the dissolution of the Avengers, so she gets that on her conscience too. Tony Stark confines her to the Avengers compound: when she leaves, she gets sent to the Raft instead. She gets put in a tiny cell with a straight-jacket and power-dampener, and spends the rest of the movie staring listlessly at the wall until Cap breaks her out at the end.
* Captain America: Civil War and the multitude of self-interested governments that want him both for his potential usefulness as an asset and to make him pay for the murders he committed as the Winter Soldier. Zemo wants to use him to create dissension amongst the Avengers. Black Panther thinks Bucky killed his father. Even the "good" guys are looking to bring him into custody, albeit for varying reasons.
* Captain America: Civil War: a side plot involves Cap and Bucky racing to Siberia before Baron Zemo can unleash the five other Winter Soldiers that were created after the success of Bucky. It wasn't a perfect process, though - what we see of the other Winter Soldiers shows that they were far more aggressive and less obedient than Bucky.
* Captain America: Civil War basically says a variation of this to Cap as they are about to face off.
* Captain America: Civil War becomes Giant-Man months before the movie was even in theaters, with Hasbro, Lego and Funko all doing figures of the character. Funko soon asked sites to remove any images of their toy, but by that point, the damage had already been done.
* Captain America: Civil War began with a scene in 1991, depicting one of the Winter Soldier's early missions.
* Captain America: Civil War, Berlin, Germany stands in for Bucharest, Romania and Vienna, Austria.
* Captain America: Civil War: Between Tony and Steve. Ultimately ends with no one really "winning".
* Captain America: Civil War, Black Widow asks to speak with T'Challa, but his female bodyguard threatens her. T'Challa, with a giant grin on his face, says that it would be fun to watch them fight, but he's willing to hear her out.
* Captain America: Civil War brings Iron Man and Hawkeye out of retirement to help The Avengers.
* Captain America: Civil War, Cap can survive brief exposure to a room's worth of some kind of poison gas.
* Captain America: Civil War, Captain America's indestructible Vibranium shield, which previously blocked a blow from Thor's hammer, is scratched by Black Panther because his claws are also made of Vibranium.
* Captain America: Civil War commercial for the Titan Hero figures shows Hulk in the team during the fight with Crossbones.
* Captain America: Civil War, Crossbones's crew have stolen a bioweapon from an infectious-disease institute. Black Widow confronts two of the men, one of whom threatens to drop the vial in a crowded marketplace and kill hundreds. Natasha quickly takes down both of them, then catches the vial when it flies from the falling henchman's hands.
* Captain America: Civil War due to the event being one of the most traumatic moments in Wanda's life. In fact, googling Lagos (as of early 2021) returns just as many pages and articles about the MCU as it does the actual city.
* Captain America: Civil War fan comic has Heimdall come across Thor at the Rainbow Bridge viewing portal eating popcorn and watching the conflict. Heimdall asks if Thor is going to intervene and help his friends, to which Thor says "Pssh, no." Heimdall then reaches for the popcorn as he joins Thor in watching the fight.
* Captain America: Civil War For extra leaning, the spoilered character's first words? "Hey, everyone."

* Captain America: Civil War from Giant-Man in the Airport Battle means the spotlight is unavoidably stolen from Cap and co.
* Captain America: Civil War' Hanging from the ceiling by his feet with his head in a sink, the Hydra agent Baron Zemo captures in Cleveland is asked for "Mission Report: December 16, 1991". His only two sentences he responds with before Zemo drowns him in the sink? "Go to hell!" and "Hail Hydra."
* Captain America: Civil War has him deliver a package to a "mister Tony 'Stank'".
* Captain America: Civil War has one show of Cap grabbing onto a helicopter and a building, which looks like it was staged to show off as many of Evans' pecs as possible.
* Captain America: Civil War: Hawkeye causes an explosion outside of the Avengers compound in order to distract Vision. While the android goes investigating, Clint sneaks inside to join with Wanda and set up a trap for Vision (who comes back sooner than expected).
* Captain America: Civil War he claims he slept for three days after that scene, after becoming "Giant-Man" in that film he has trouble breathing within a few minutes and collapses, in the middle of a bay. However he has no problems when he's twelve feet tall (aside from ceilings).
* Captain America: Civil War, he never told him. Tony is as enraged by this deception as he is by the act itself.
* Captain America: Civil War Implied when Zemo disguises himself as Bucky Barnes, explicitly with facial prosthesis and a wig. We only ever see the disguise in blurry news footage, so it might have been imperfect.
* Captain America: Civil War: In the footage taken of the Winter Soldier's covert assassination while in America, he concludes by shooting the camera that spotted him killing.
* Captain America: Civil War in time for their own movies that were released later the same year.
* Captain America: Civil War, Iron Man calls in his secret weapon, Spider-Man, by calling him "Underoos." In the Japanese version, this is changed to "Leotard-kun".
* Captain America: Civil War is not only a Chessmaster, he is also a skilled cracker who decrypted HYDRA's files and built an EMP bomb.
* Captain America: Civil War: Made in 2016, flashbacks to Howard and Maria Stark's last minutes leading to their murder happened specifically in December 16, 1991.
* Captain America: Civil War male best friend, making the kiss seem like the film's way of saying "No homo".
* Captain America: Civil War — the eye windows have mechanical irises to help protect him from sensory overload when he goes into full "Spidey Mode".
* Captain America: Civil War, Miriam's dead son has his name changed from Damian Sharpe to Charlie Spencer.
* Captain America: Civil War motivation is also partially derived from being at ground zero and seeing the heroes go home after his family died from Ultron's attack in Sokovia.
* Captain America: Civil War of how Stark is close to understanding nanotech. Although the gauntlet is clearly more of a deterrent or self-defense weapon rather than a offensive one, as it lacks the repulsor rays his gauntlet are known for, but it still has a bulletproof construction as it manages to block a point-blank shot from a pistol.
* Captain America: Civil War of Tony Stark, aka Iron Man, and Cap is forced to protect his oldest friend from one of his newest.
* Captain America: Civil War: On this one, Holland chose not to read the whole script in order to avoid potentially leaking plot information publicly.
* Captain America: Civil War opens with a Hydra scientist entering a research lab in Siberia. Just to get inside the front door involves this trope, as there are two guards standing on either side of the huge door to open it for him.
* Captain America: Civil War, pants rip and bits of costumes fall off during stunts.
* Captain America: Civil War, part of Helmut Zemo's plan to destroy the Avengers involves him killing a psychiatrist and stealing the man's identity.

* Captain America: Civil War, Peter Parker essentially condenses this trope and his origin story to one simple phrase:
* Captain America: Civil War, Petrov might have sided with Tony, truly believing that Tony was atoning for his actions through the Sokovian Accords. This would have put him on opposing sides of Wanda, the first time the twins truly conflict, and leading to some great drama.
* Captain America: Civil War, Ross gives Tony 36 hours to bring in Cap.
* Captain America: Civil War scramble to catch him and it looks like they'll be able to catch him, only to have him slam into the ground seconds before they can reach him. Although such a crash in real life would likely result in death, Rhodey somewhat realistically is left paralyzed from the waist down.
* Captain America: Civil War: Security footage implicates Bucky Barnes for a bombing in Vienna, and he only gets proven innocent once evidence is discovered that he was framed by Zemo, the real mastermind behind the terrorist attack.
* Captain America: Civil War showed that six more Super Soldiers were created but were kept on ice in a Soviet-era base. Helmut Zemo uses them to lure both Captain America and Iron Man to the base where Stark learns that Bucky, as the Winter Soldier, killed his parents. Since Zemo blamed the Sokovia incident on "enhanced humans," he had already killed the other subjects in their cryo-chambers.
* Captain America: Civil War, Spider-Man. He has the fighting skills you'd expect from a fifteen-year-old bookworm who has only had his powers for six months, but his agility, strength, speed and secondary abilities still allow him to casually take on his opponents while treating the whole thing like some big adventure.
* Captain America: Civil War. Spider-Man is an odd case as it is revealed he's been in action for awhile in a homemade suit and is given his upgrade in his first onscreen appearance.
* Captain America: Civil War sports a new outfit with a long red coat.
* Captain America: Civil War, Steve and Sharon look like they're gonna say something and keep going the chat they're having, but then Sam interrupts them with the notices of the recent events.
* Captain America: Civil War storyline, Steve Rogers gives an impassioned, now infamous speech about how when you are told to change, even by the whole world, you have to stick to your guns. It was criticized by many by being a possible excuse for bigotry, racism, and more, and so in the film, the speech was attributed to Peggy Carter, who had to fight sexism in her field as a spy (she was typically given office work after Captain America's death) to eventually found SHIELD.
* Captain America: Civil War swiping Cap's shield at the end of the second trailer.
* Captain America: Civil War, T'Chaka is killed in a terrorist explosion set off by Helmut Zemo.
* Captain America: Civil War. (That said, Ant-Man is a relative newcomer to the superhero community at that point, so he's pretty small-time.)
* Captain America: Civil War that's based off his pet falcon in the source comics. He can deploy it from his back, use it as a scouting device, use it to target his missiles and it can even shoot people. Falcon calls "him" "cute".
* Captain America: Civil War that will also kill Captain America and the surrounding civilians.
* Captain America: Civil War, the scenes set in Lagos, Nigeria, were shot in Atlanta, Georgia.
* Captain America: Civil War. This leads to a chase that creates collateral damage and eventually ends with Cap and Falcon placed under arrest for obstructing the government while Black Panther gets off scot-free because he's the King of Wakanda.
* Captain America: Civil War times. Then he himself is defeated by Captain America, providing another example.
* Captain America: Civil War: Tony unveils the BARF, which projects virtual reality simulations to let you relive moments with dead relatives, giving you the chance to work out psychological baggage that went unresolved in life. Subjects know full well it's an illusion and we see no evidence of people getting trapped in them, yet it's apparently very therapeutic.
* Captain America: Civil War, using breaks in the action to casually chatter with

his opponents and ask about their tech and abilities. Iron Man and Falcon, at least, get annoyed very quickly with his commentary, but Cap himself is rather impressed that a teenager is able to carry on the way Spidey does while in the middle of an engagement.
* Captain America: Civil War: When Bucky and Sam meet Spider-Man, Sam comments "everyone's got a thing now." Ironic, considering that Sam himself has been leaning a bit more heavily on his bird theme in this movie (such as by naming one of his drones and treating it like a pet).
* Captain America: Civil War: When Steve and Bucky fight Iron Man in the film's climax, the two share use of the shield, and Bucky is skilled enough that he can now throw the shield in the same way Steve does, bouncing it at deliberate angles to attack Tony and pass it to Steve.
* Captain America: Civil War: When Tony and his allies intercept Cap's side at the airport, he says, regarding when Ross gave him the deadline to bring in Cap and his allies, "Ross gave me 36 hours to bring you in. That was 24 hours ago." Which means that all of the events that take place in between took place in 24 hours. Now some of these are reasonable. Steve, Bucky, and Sam were already in Germany, so they had no trouble making it to the airport in that time. But others are not:
* Captain America: Civil War where Zemo schemes to break them up as revenge for the death of his family in Sokovia. In that same movie, Wanda gets innocent people killed when she botches her efforts to contain Crossbones' suicide bomb, and the press brand her as a pariah (while completely ignoring the fact that she and the rest of Steve's team were trying to take down a terrorist who was stealing a bioweapon capable of killing thousands). The bad press prompts various world leaders to push for the Sokovia Accords.
* Captain America: Civil War. Which, unlike its comic book counterpart, is sparked by the Sokovia Accords, a bill that would place the Avengers under the authority of the UN. Actual violence doesn't break out until a third party frames Bucky Barnes for a terrorist attack.
* Captain America: Civil War: While fighting Falcon, Spider-Man tries to read Falcon his rights. Falcon throws him through a window.
* Captain America: Civil War, while the equivalent pro-Team Cap/anti-Team Iron Man tags are almost nonexistent in favor of fics where Ultron doesn't happen or where the whole team bands against the Accords, suggesting that the readers and writers who aren't staunchly anti-Team Cap tend to prefer the whole team together rather than outright disliking Tony or anyone who sided with him.
* Captain America: Civil War would not be renewed for a third season. Given the lengthy and poignant funeral scene, one can't help but wonder if this was pre-planned.
* Captain America: Civil War... Zemo sneaks onto the ultra secure base where Bucky is being held, apparently using nothing more complex than a fake passport. When Tony learns the truth, we find out that all Zemo did was meet the psychiatrist at the airport, killed him in the hotel and then stole his ID. He didn't hack any computers to change files as Tony can immediately pull up the correct ones. This means that after catching Bucky and sending for the UN's best shrink, the CIA - did not arrange to meet the man at the airport, or at his hotel, didn't know what the real man looked like before he arrived, didn't check with anyone what the real man looked like before he arrived and when Zemo turned up... they let him in to speak with the most dangerous, wanted criminal in history without so much as checking his finger prints, or googling the real dude on Facebook to see if his pictures line up. There is NO good explanation how Zemo could get into that base without the use of advanced technology.
* Captain America comic books the villains had this trope BAD. Nearly every story involved the villains knocking out Captain America, Bucky, or both, then locking them in a cell or something before declaring that they're going to kill them now, only for Cap and Bucky to have escaped in the meantime. Naturally this results in the villains subsequently being beaten.
* Captain America comics is contrasting Cap's Beautiful idealism with what can often be a Boorish reality.

* Captain America comics, which are now owned by a small company which gets bought by one of Cap's big fans. Back when Cap’s identity was still a secret, he briefly took a job at said comic company and ended up drawing comics about himself, much to his amusement.
* Captain America comic where Cap is fighting Hydra agents, stands on a pile of them, takes off a glove and licks a finger to hold up, throws his shield up into the air, and looks at his watch. "Two... one..." The last standing Hydra agent shows up with a hostage and goes into a standard Hydra rant about the organization's plans. He stops when he realizes that Cap is without his shield, Cap tells him that "It'll come if I whistle for it", the agent pulls a gun, Cap whistles... and his shield arcs down to hit the Hydra agent, leaving the hostage standing. That issue is full of him doing things like that; naturally, it's also the issue where it is lost.
* Captain America Corps the altered timeline has him reduced to a brain and eyeballs in a glass cylinder by Superia, his intellect used to devise her weapons, with him begging for death. During a Dark Avengers arc that dealt with a pocket timeline controlled by A.I.M. the Tony of said timeline has long since been reduced to a brain in a flying sphere. He apparently keeps this secret from all his allies, who just assume he never takes off his armor anymore.
* Captain America crush on the good captain, and during a brief team-up decided the best way to get his attention was to take the keys out of the ignition of the flying machine they were both in. While it was in the air. Had Cap not known every A.I.M. craft is equipped with parachutes and where they keep them (you learn after taking down a dozen or so), they would've died. Rachel is appropriately annoyed at herself for being so stupid.
* Captain America dating Diamondback, a member of the Serpent Society (a group of snake-themed supervillains). This is a somewhat defanged (no pun intended) instance, as Diamondback offered to drop crime for him practically in their first meeting. (Not that she came off all that convincing, but...)
* Captain America disappointed in them. It was enough to disperse the gang. And then Cap escorted the man home.
* Captain America does this following his death and in style: leading both the Registration and Renegade Avengers against the Red Skull, barking orders out as if nothing went wrong, then, finally, showing the rest of America that, yes, he's back.
* Captain America flashback says "Introduce me to yer ma, I'll keep her warm for ya!", prompting one of his sidekicks to remind him "Mas are off-limits. Street code."
* Captain America for the death of his father, despite the fact that his father accidentally caused his own death while firing his pistol blindly. He eventually gets over it.
* Captain America: Fought in WWII on every front at some point. Throughout his comic history, it is common occurrence to run into an aged veteran or descendant of such whose life he saved.
* Captain America: Ghosts of HYDRA. Additionally, she gives this while Josef is pinning her down and is about to give the killing blow.
* Captain America got in on the armored action in the mid-90s, as he was forced to wear an armored version of his familiar red-white-and-blues due to the Super-Soldier Serum breaking down in his body and rendering him paralyzed. Naturally, it didn't take.
* Captain America group of Marvel superheroes that includes Cap will see most of them instinctively deferring to him.
* Captain America had a habit of doing these speeches only to get stomped into the ground. He also did it in
* Captain America had a similar offer by Cable, who proposed him political asylum in providence. Captain America rejected it.
* Captain America had the secret identity of a clumsy infantry private who'd get stuck at the rear.
* Captain America has also one-punched Thunderball, another class 50 Thor villain,

who has tangled with heavyweights other than Thor like Hulk, Hercules and Iron Man. To make it even absurd, in the same book, just few pages ago, he was fighting evenly with the class 60 Giant-Woman.
* Captain America has been called "The Sentinel of Liberty" and "The Star Spangled Avenger." He's also retroactively known as "The First Avenger", because although he's the fifth member of the actual team, his heroics in World War II are considered their inspiration.
* Captain America has Frank do this with a precise knife-throw into a guard with a machine gun, which takes out the other guards for them.
* Captain America has generally been shown to be an artist before and after he was recruited and enhanced by Project Rebirth. He even drew for a comic book about his hero identity himself.
* Captain America has his own special ranking within the US military and is considered one of the most gentlemanly of all the heroes in the Marvel Universe. It's not uncommon for even the bad guys to look up to him.
* Captain America has just beaten Henry Pym to a pulp, giant size and all. "How big do you feel now, dirtbag?"
* Captain America has slightly more power than Cyclops and the ability to double jump, but still fits this mold thanks to similar health and only one projectile by throwing his shield. Cap has a Level 3 Super Move which Cyclops doesn't, but it's one of the least useful Level 3 Supers in the series due to subpar damage for a move of its kind and the fact it's telegraphed pretty easily.
* Captain America have known by now that he was going to be the new Cap.
* Captain America have this dynamic: Cap is the honorable one, while Bucky does the dirty work Cap can't be seen doing (and/or would refuse to do). Not to mention when they fight against each other (as Winter Soldier for the latter).
* Captain America. He’s also one of the few mortals capable of wielding Mjölnir.
* Captain America her until her true memories and personality were restored. Then they fell in love. To an outside observer, this was all horrifying but from their perspective, he had rescued her from enemy captivity and freed her from nefarious mind control.
* Captain America. He's one of the world's most brilliant military strategists in history. In "Deadpool Art of War" he outmaneuvers Loki by waiting for his army to get tired before going full force and flanks them using Fury's intel on their movement.
* Captain America. He was first imprisoned by the U.S., then again by Russia as soon as the American court declared him innocent.
* Captain America he was shocked by the world he's woken up in (and by what was on the TV) and ashamed that he wasn't there to fight for it.
* Captain America himself is inspired by The Shield (by the publishers of
* Captain America, his girlfriend Sharon Carter shows up to rescue him. He'd only been gone for 10 minutes in the real world.
* Captain America, however, she appears to be an actual old woman, albeit one who's handy with a machine gun.
* Captain America I #153, a man who found the formula, heretofore overlooked in Axis files (due to Allied bombings similar to Dresden, not even the Axis knew that they had it), noted that he found it untraceable in animals he had experimented upon and then dissected. He used this as leverage to force the US government to allow him to serve as a new Captain America for the Korean War — which ended before he could serve. This man later went mad due to the effects of the serum, suggesting its unpredictability on subjects. Incidentally, MLJ's the Shield seems to have inspired Captain America (the shape of Captain America's shield turned round when MLJ pointed out how closely it represented the front of the Shield's costume). The Shield's father had perfected a similar formula, but enemy agents slew him. The Shield, however, recreated his father's formula. Why he did not use it other than on himself is not stated.
* Captain America if he were a murderous and genuinely bigoted psychopath, and you have a good idea of what the organization stands for.

* Captain America II: Death Too Soon, where the Captain foils a mugging attempt by tossing his trademark shield at a perpetrator, missing him at point-blank range, and the thug gives his shield enough time to curve back and knock himself out.
* Captain America in 2007. Fans, however, knew he'd be back eventually, which he was of course.
* Captain America. In the 18th century, there was a revolutionary war hero, Steven Rogers, who could be the prototypical Captain America. When the 1940's Super Soldier program began human experimentation, similar to the Tuskegee Experiments, Isaiah Bradley survived to become Captain America before Steve Rogers. When Steve Rogers was frozen in the Arctic Circle, William Nasland, the Spirit of '76, took on the role of Captain America, followed by Jeff Mace, formerly the superhero known as the Patriot, after Nasland's death. Fred Davis took on the role of Bucky during both of their careers. William Burnside was the Captain America of the 1950's, with Jack Monroe as Bucky, later known as Nomad.
* Captain America in the Enlightenment tradition, he defends values and ideals and embodies them as best as he can in a rapidly changing world and commands leadership by consent and consensus rather than simply being the most powerful and charismatic of them all.
* Captain America in the face. After WWII, Cap kept his propaganda status, now fighting Communists instead of Nazis. After he was reintroduced in the 60s, the level of propaganda was turned down somewhat.
* Captain America is acknowledged and highly respected (or in the case of his enemies feared) as the greatest soldier in Earth's history, famed not only for his superhuman physical abilities but also for his legendary prowess in martial arts and great skill with his unique vibranium shield as well as being an exceptional combat strategist. He's widely recognized for being the primary hero who stopped the menacing threat of Red Skull's HYDRA and in the present, his fame and battle prowess quickly earned him the position of the leader of the extremely formidable Avengers, all of whom are
* Captain America is as much a pure example of this trope as modern jaded audiences can stand. His classic outfit includes maille or scales on the upper portion, he carries a shield, and a modern Captain owes much to the role of a knight in leading his troops. In behaviour? No more noble or righteous 'knight' exists in the Marvel Universe - Ultimate Cap excepted, of course.
* Captain America is constantly described as Peak Human, regardless of some of his more exaggerated feats.
* Captain America is described as this, but most of the soldiers seem to just ignore him.
* Captain America is often subject to this in recent history among fans.
* Captain America, is only a transliteration into the romanized spelling of those words.
* Captain America is probably the most apparent. At the same time, however, Steve will be the first to admit if something's improved.
* Captain America is said to have had ties to the assassinations of John F. Kennedy, Robert F. Kennedy, and Martin Luther King, Jr.
* Captain America. It also looks slightly less silly as, unlike the comic, Bucky is a fully grown man, possibly older than Steve, while in the comics, he was a kid still in his teens.
* Captain America. It helps that he was only into Nazism for the oppression and mass murder. He derided the whole race ideology as hogwash despite occasionally paying lip-service to it.
* Captain America It probably helps that he had convinced people at the time that Steve Rogers was a false identity.
* Captain America. It's surprisingly not as common as one might think.
* Captain America-laden retconned past) and were both turned into Captain America at some point or another, with positive results.
* Captain America material. The soldier went insane since he wasn't treated with Vita-Rays like Steve. He was put in cold sleep until A.I.M. woke him up and cured him of his insanity decades later. As Protocide, he initially tried to kill Cap

because he was brainwashed into believing that Captain America, supposedly his wartime partner, had betrayed him and left him for dead. Protocide eventually realizes that Cap is too good a person to have done that, and in his last appearance saves Steve's life before leaving for parts unknown.
* Captain America — which was actually before the US officially entered the war — count.
* Captain America movie gives off this vibe for most audiences. The lack of fight scenes and special effects along with the slow pace, darkly lit and barren set pieces, and the color pencil-like font for the opening titles feel right at home for a '70s made-for-TV superhero movie.
* Captain America movie has Bucky using Steve's Captain America shield in some capacity.
* Captain America of all the mind-numbingly horrible things Red Skull has done over the years and how everyone he's hurt deserved it.
* Captain America One issue has Whirlwind and the Trapster discuss this one when on the road together, and whether if they did earn enough money to retire, they'd just quit while they were ahead. They both agree there are too many scores they'd want to settle.
* Captain America. Or self-destructing, since it's not entirely clear whether the clone was flesh and blood or robotic.
* Captain America, "Patriotic fool — you would not hit a lady!" He decked her while saying, "Lady, you're no lady!"
* Captain America programs, crazy technologies, weird semi-demonic villains, and more.
* Captain America proved a continual failure. The known list of failures in the main Marvel universe is:
* Captain America: Reborn, he appeared in at least four books before the big event had actually happened.
* Captain America Reborn. Though not before some time-travel complications, as well as the Red Skull planning on usurping control of his body.
* Captain America rolls around, the entire public knows who he is, thanks in part to an exhibit at the Smithsonian detailing his entire WW2 career.
* Captain America room in a flashback to when they were both subjects of a KGB secret program.
* Captain America run, he was back to wearing his costume, and there was no mention of his disappearance or the prior incident with Anti-Cap.
* Captain America run on Captain America. Played with in that they used to date and have a very strained relationship at present.
* Captain America: Sam Wilson" archetype such as using words like "safe space", "trigger warning", "privilege" and so on.
* Captain America)'s case, whose sword REALLY has a selective edge due to magic.
* Captain America's circular shield was created accidentally during an experiment to merge vibranium and an iron alloy. An unknown catalyst entered the mixture while the scientist overseeing it was asleep.
* Captain America: Sentinel of Liberty, the Avengers have been threatened with being shut down by the government unless they abide by a new set of strict regulations - including the expulsion of all mutants, former criminals, and foreign citizens. After a long debate over whether it is more important for the Avengers to dissolve to preserve their ideals or accept the new conditions because the team is too important to the world, Cap with a heavy heart casts the deciding vote to accept the government's demands. Most of the heroes leave in disgust and Cap is told to make a speech, showing off the few remaining Avengers to assure the public. Instead, Cap tells all about the government's strong-arm tactics, blasting the regulations over Henry Gyrich's protests. Rather than declaring a new golden age for the Avengers, Cap instead announces his resignation and leaves.
* Captain America series was done in the style of '60s/'70s Jack Kirby comics, with plot points heavily connected to the Vietnam War, outlandish villains, and crazy technology.
* Captain America's gimmick is Patriotism and embodying the American Fighting

Spirit.
* Captain America. Similarly, Cap's own comic book made commentary on '40s vs. "modern" (whatever time period we're in) American values.
* Captain America, since the real Nazis hadn't been defeated and deposed. Nor did Cap or Bucky ever "canonically" encounter Hitler himself (not counting the appearance of the original Hate-Monger who may or may not have been Hitler).
* Captain America's legendary shield. A fan by the name of "Fred Janssen" wrote in to the 60s-era Captain America comic with a theory involving Dr. Myron McClain and his work with Adamantium and Vibranium, the fictional super alloys in the Marvel Universe. Marvel liked the idea so much that, with a bit of altering, they took it and ran with it!
* Captain America's once-archenemy from WWII), eventually revealed as being — tada!! — a laser beam.
* Captain America so that the "Communist Skull" turned out to be an imposter who wasn't so much a communist as simply being anti-American, with the original Red Skull returning to his fascist roots.
* Captain America's shield is depicted as having edges capable of sheering through metal cables, but will never do more than bounce off a living target in a painful but decidedly non-lethal manner.
* Captain America's shield, which was actually the second shield he used.
* Captain America's sometime-flame Diamondback has a brother, Cutthroat. Where Diamondback was once a ruthless criminal, her brother remains one, without shame or conscience. She still cares for him, in spite of Cap's belief that a brother who abandons his family (as Cutthroat has done several times) will always choose the easy way out.
* Captain America stacking several plastic skulls on his crotch. He eventually does notice, and...
* Captain America/Steve Rogers. At various times in his career, Cap has also gone by "The Captain" and "Nomad" (among others), while his civilian aliases have included "Grant Rogers", "Buck Jones", "Roger Stevens", and "Brett Hendrick".
* Captain America: Steve Rogers, Cap attempted to hunt down and assassinate the Inhuman Ulysses to prevent him from revealing that he's actually a member of HYDRA. He ends up missing him when, mere seconds before he could, Tony Stark broke into New Attlian and kidnapped Ulysses himself.
* Captain America, Steve Rogers has become an old man, twice, and has passed on the title of Captain America to someone else on several occasions before becoming Captain America once again.
* Captain America, Steve Rogers's best friend since childhood, in the role, though each film has a different deuteragonist:
* Captain America superior have to frantically apply first aid to prevent the detonation.
* Captain America taking on the Captain America identity in his stead.
* Captain America that all great people are flawed, but the good that they do outshines their imperfections.
* Captain America that Hitlerella is most likely the one who killed her, adding, "Congratulations, Hitlerella, now you have nothing to live for." She's apparently even willing to bail Wonderella out of bad dates.
* Captain America that make him Captain America, it's his personality.
* Captain America: The Cap, being traditional American values on legs, never swears, though he sometimes uses this trope.
* Captain America: The First Avenger a 95-pound Steve Rogers is injected with 6 vials of Erskine's serum and a few minutes later emerges from the Vita-Ray infusion device as the 230-pound Captain America. Everyone who handles one of the serum vials acts like they only weigh a pound or so, so where did the other 130 pounds that Steve so rapidly put on come from?
* Captain America: The First Avenger a few times before he finally does away with it completely.
* Captain America: The First Avenger a few years before even becoming Captain America. Assuming he has been retrieved and captured by the enemy, he easily breaks

out, only to find himself in modern-day Times Square.
* Captain America: The First Avenger, after Agent Peggy Carter returns from dropping off Cap behind the front line, the Colonel chews her out about the risky move and possibly getting herself and Rogers killed.
* Captain America: The First Avenger after beating the Red Skull, Peggy Carter takes over the radio from Jim Morita, with Col. Phillips behind both of them in the control room. As Steve and Peggy try to find a safe landing for him, Phillips realizes what's happening and quietly tells Morita to leave them alone for their last contact.
* Captain America: The First Avenger: After Steve comes out of the tank with super-strength and speed, he spends the next minute or so running into store fronts and cars while trying to turn. Also apologizing. A lot.
* Captain America: The First Avenger. After taking the serum he becomes the buff and famous Captain America, but is stuck on the propaganda circuit convincing people to buy war bonds. As per this trope he's shown as awkwardly reading his lines at the start, gets better and more confident as the montage continues, only for it to suddenly end with him being mocked by unimpressed frontline soldiers in Italy.
* Captain America: The First Avenger along with US army storm HYDRA's last stronghold.
* Captain America: The First Avenger and makes a run for it, running smack into present-day New York City.
* Captain America: The First Avenger and that a single soldier, no matter how super, is not enough to win a war. He's sent out to do stage shows and publicity stunts, and feels more and more useless as time rolls on.
* Captain America: The First Avenger) and when testing if the Vibranium shield can withstand a handgun, Peggy aims at Steve's head. She forgives him later when she sees a picture of herself in Steve's compass during one of his operations, as if saying "this is for you."
* Captain America: The First Avenger A prototype version of the same serum used on Blonsky is used to create the Red Skull. However, unlike the later version used on Steve Rogers, the original serum deforms the Skull's face (hence the name) and drives him mad with delusions of grandeur. Dr. Erskine implies that even Rogers' version can manifest as a Psycho Serum if applied to someone with less than noble qualities, saying that "good becomes great - bad becomes worse". This is why he chose to give the serum to Rogers rather than a different soldier who, while far stronger, was a bully to the other soldiers in boot camp.
* Captain America: The First Avenger are above ground and in the open, and their main base is dug into the Alps, and is implied to be 500 feet underground. In addition, the SSR's main base is hidden within various old stores in Brooklyn.
* Captain America: The First Avenger are clearly meant to evoke this trope. Huge, heavily armored, scary masks and high-tech weaponry.
* Captain America: The First Avenger, are using the Cosmic Cube/Tesseract that the Asgardians used beforehand as a power source.
* Captain America: The First Avenger: As mentioned in the Comics section above, Captain America can't get drunk because his sped-up metabolism metabolizes the alcohol before it has time to take effect.
* Captain America: The First Avenger averted and subverted by Abraham Erskine:
* Captain America: The First Avenger backing him up, and that the program that helped give him his powers was a joint Anglo-American operation. However, you won't find any mention of the Soviet Union save amidst the sea of flags in the end credits.
* Captain America: The First Avenger, Bucky Barnes does it to complete his non-literal ass-kicking of the bully that had just beaten up a pre-Super Soldier Steve.
* Captain America: The First Avenger: Bucky picks it up after Steve drops it and uses it as a regular shield while shooting his pistol.
* Captain America: The First Avenger) but he is respectful to coworker Peggy and he later explains to Steve what he meant by having "fondue" with her (he was essentially asking Peggy that after a mission if she wanted to go out and eat with

him. Steve had never heard of fondue before, and assumed it was a sexual euphemism.)
* Captain America: The First Avenger, but he makes that SS coat look good.
* Captain America: The First Avenger, but with every soldier taken down, the escapees get access to weaponry and vehicles.
* Captain America: The First Avenger by eliminating any opposition and allegedly establishing peace.
* Captain America: The First Avenger by the US government, but he becomes an actual war hero after liberating 400 POWs from a Hydra facility, for which he receives the Medal of Valor.
* Captain America: The First Avenger. Cap is supposed to be the star of the show, with the singers/dancers just as chorus, but when the show is taken to the European front, Cap gets booed off the stage by the soldiers, who demand to see the girls instead.
* Captain America: The First Avenger: Captain America. It's even a plot point, and Peggy Carter even calls him out on this at one point.
* Captain America: The First Avenger Cap take advantage of this trope? Taxicab, personal submarine, speeding train, drone aircraft...
* Captain America: The First Avenger, Colonel Phillips fits this trope and even gets involved in the fighting at the end, helping to infiltrate a HYDRA base and shooting down a few enemies.
* Captain America: The First Avenger doesn't have much experience with international cuisine, so when he hears notorious playboy Howard Stark invite a woman out for "fondue," Steve assumes he's talking about something a bit racier than melted cheese.
* Captain America: The First Avenger does this as well after his submarine getaway doesn't exactly turn out as planned.
* Captain America: The First Avenger Dum Dum Dugan does, albeit briefly, take little offense to letting Jim Morita come with them.
* Captain America: The First Avenger - during a chase with a HYDRA agent who assassinates Dr. Erskine and then runs away, Steve Rogers (after receiving the Super Soldier Serum) chases down the agent. The agent tries to distract him by throwing a child into the river, but the child, as it turns out, can swim, and tells Steve to continue going after the agent whilst the child saves himself.
* Captain America: The First Avenger, even not counting the overt plot buildup:
* Captain America: The First Avenger features an odd example with the Valkyrie, a massive airplane with rear facing propellers on its wings built by the Red Skull and HYDRA. It turns out that each "propeller" is actually a detachable mini-fighter plane, with either jet engines or rockets keeping it aloft. Based on real-life designs, however — see below.
* Captain America: The First Avenger fleeing his lab, but abandons pursuing him in favor of finding Bucky. A few minutes later, however, the two encounter Schimdt and Zola as they all head for the elevator, and Zola ends up cutting them off so that the heroes can't reach them.
* Captain America: The First Avenger get shot in the body without his shield being in the way in time. Usually then he's winded but his body armor is enough to save him.
* Captain America: The First Avenger; had he been seduced by the gimmicks of the other shields, Cap would have been killed horribly in his first battle with Hydra mooks and we would've had a very short film.
* Captain America: The First Avenger has him make a reference to the 1927 New York Yankees.
* Captain America: The First Avenger has manned cruise missiles with their designated targets of New York and Chicago painted on their nosecones.
* Captain America: The First Avenger: has the heavy-weapons HYDRA soldiers, who unlike the rank and file troops, actually manage to at the very least, back the heroes into a corner every time they appear.
* Captain America: The First Avenger has the Red Skull aka Johann Schmidt secretly made the Nazi German faction of HYDRA into its own group during World War II with

the aim of taking power once the entire world has gone weak from the war.
* Captain America: The First Avenger) has the Red Skull's red face as his true form after taking the Super Soldier Serum, which physically enhances the subject's true nature. Per the serum's creator Dr. Erskine, "Good becomes great. Bad becomes worse". So unlike Steve Rogers, he ended up horrifyingly disfigured to match his cruel and twisted nature.
* Captain America: The First Avenger, he is pretty much placed onto a USO entertainment group seeing how they don't really have much of a use for the supersoldier program. When entertaining American troops in Italy, the soldiers are not impressed with his performance (one of the soldiers is also implied to have mooned him, and they eventually pelt tomatoes at him while demanding for the girls to return). Of course, after he single-handedly rescues 400 soldiers in one of Schmidt's bases, they begin to realize he really is that badass.
* Captain America: The First Avenger, he's wearing an updated costume heavily based on the USO mascot outfit. Said outfit is explicitly stated to be tights.
* Captain America: The First Avenger. Howard Stark is testing a tiny particle of energy from the Tesseract:
* Captain America: The First Avenger. However, he remembers that Rogers can't have any fluids, so he snatches Rogers' glass away and drinks it down for himself.
* Captain America: The First Avenger: HYDRA had sabotaged the supersoldier project from the start. Their goal was to see if this project would actually work as intended. When it did, the HYDRA moles then destroyed everything and killed everyone related to the project, including themselves. Well, except for the man who would become Captain America anyway.
* Captain America: The First Avenger: HYDRA uniforms are black and their emblem is red. Applies even more to Red Skull, as the skin on his face mutated after taking Dr. Erskine's serum.
* Captain America: The First Avenger, immediately after Steve's super serum procedure. She reaches out to touch his chest almost on reflex, before immediately regaining composure and pulling back. Bonus points in that this wasn't scripted; Hayley Atwell was just that taken with Chris Evans' superpowered form.
* Captain America: The First Avenger incident for the normally composed Peggy Carter with his post-transformation super-abs. Peggy and Bucky are Common Beauties, and the Red Skull is Ambiguously Monstrous.
* Captain America: The First Avenger in the form of Captain America. The serum which enhanced him was explicitly stated to amplify everything about the subject. Steve, a genuinely nice guy who lives by an innate and nigh-infallible moral compass, was chosen specifically because that compass would never allow the power he was about to gain to go to his head.
* Captain America: The First Avenger it is revealed that Steve actually was sent to New Jersey for his Army basic training before the super soldier serum was administered. He regards it almost as the place where he was born, telling Natasha Romanoff that he was "made" there.
* Captain America: The First Avenger its shown that he has an entire wing dedicated to him in The Smithsonian.
* Captain America: The First Avenger: It's WWII and the Nazis' Deep Science Division has splintered into their own group and are trying to take over the world.
* Captain America: The First Avenger joked that the woman was Peter Quill's grandmother.
* Captain America: The First Avenger more, but Wakanda has been doing everything in its power to keep it out of the hands of the rest of the world.)
* Captain America: The First Avenger: Naturally Cap vs Red Skull on the latter's plane heading for New York.
* Captain America: The First Avenger needs to conquer the universe is the Tesseract.
* Captain America: The First Avenger next to post-serum Cap, but that's about it.
* Captain America: The First Avenger no matter how hard he tries — and if the bottle shown on the table was full when he started, he tried pretty damn hard.
* Captain America: The First Avenger. Otherwise, the film does a good job of

averting this. Dum Dum is suspicious of Jim Morita since the latter is a Japanese-American and the lyrics to Cap's USO show song call the Germans "krauts".
* Captain America: The First AvengerPhilips shrugs and eats it himself.
* Captain America: The First Avenger: Red Skull unearths the Tesseract, the key to making super-powered weaponry, in an ancient Viking ruin. After finding it, he somewhat derisively implies that the Nazis are involved in similar searches.
* Captain America: The First Avenger runs on this. The montage of Steve Rogers' work for the USO where he goes on stage in his Captain America costume encouraging Americans to buy war bonds is complete with dancing showgirls, tanks that shoot red-white-blue confetti, and choreographed Hitler "punching".
* Captain America: The First Avenger, Schmidt became the Red Skull because he used the super-soldier serum before it was ready to use. He got the physical abilities, but it deformed his head.
* Captain America: The First Avenger shows it's just the wingtip, and the shape of a massive flying wing is outlined with light poles.
* Captain America: The First Avenger shows us a rather heartbreaking shot of former cocky, confident ladies' man, Bucky Barnes, strapped to a table, bleeding and mumbling his name, rank, and serial number to himself (that is, what a soldier's supposed to do when he's being tortured for information), apparently unaware of his surroundings. We later find out that Zola was trying to recreate the Super Soldier Serum that made Captain America and the Red Skull who they are. Given that both those procedures involved multiple injections of unknown chemicals and made their subjects howl in pain, it seems safe to assume whatever Zola did to poor Bucky in that lab was ugly, painful, invasive, scarring, and just overall violating to him as a human being.
* Captain America: The First Avenger, since, while neither actually dies in the aftermath, the next time they see each other Peggy will be a grandmother in her nineties.
* Captain America: The First Avenger: Some posters have Red Skull's eyes looming over Cap.
* Captain America: The First Avenger Steve’s hair is blonder again signifying his return to grace.
* Captain America: The First Avenger: Steve has just pulled his childhood friend Bucky out of a Hydra lab, and they're attempting to escape as the building self-destructs. Bucky crosses an impossible-to-jump pit of fire on an improvised bridge that collapses behind him. Steve tells him to get out; Bucky yells back "No, not without you!" Of course, since it's Steve, he makes the jump.
* Captain America: The First Avenger, Steve Rogers briefly talks about getting beaten up behind a diner.
* Captain America: The First Avenger. Steve Rogers gets rejected by the draft board nearly eight times. They finally let him join the army if he agrees to be part of Dr. Abraham Erskine's experiment... and we all know how that turns out.
* Captain America: The First Avenger, Steve Rogers mistakes a mention of a 'late-night fondue' as a reference to something sexual after he hears Howard Stark inviting Peggy out to have fondue. It's a while before anyone explains to him what fondue is.
* Captain America: The First Avenger, Steve's love interest and one of the original founders of SHIELD.
* Captain America: The First Avenger tank, following it by jumping off of the tank as it explodes.
* Captain America: The First Avenger that the Nazis designed but never managed to build.
* Captain America: The First Avenger, the good Captain gets mooned on stage by a soldier who was unimpressed with his USO performance.
* Captain America: The First Avenger: The Howling Commandos are an elite combat unit led by Captain America in WWII.
* Captain America: The First Avenger, the members of Red Skull's Hydra organisation give a fist-clenched double Nazi salute (identical to the one from the comics). This gives an effect not dissimilar to pantomime hang-gliding.

* Captain America: The First Avenger: The Red Skull abandons the Nazis about a third of the way through the film, not because he necessarily disagrees with their viewpoints, but because he believes himself to be a literal Übermensch, having surpassed humanity. He fully believes this gives him the right to freely kill and dominate other people, and can't understand why Cap holds to his values the way he does.
* Captain America: The First Avenger, The Red Skull is a genius tactician and scientist, and strong and fast enough to trade blows with Captain America, but his hand-to-hand combat skills are a bit lacking.
* Captain America: The First Avenger The religious order hide the Tesseract because they feel it's "not for the eyes of ordinary men". Unfortunately for everyone else, the Red Skull doesn't apply as "ordinary".
* Captain America: The First Avenger, there's a brief sequence with Captain America arming his motorcycle with weapons and wielding his shield right before the proper montage of him and his team in action against the forces of HYDRA.
* Captain America: The First Avenger, the scenes set in the fictional European nation of Sokovia were filmed in London. Averted for several other cities like Seoul, South Korea and Johannesburg, South Africa, which were shot on-location.
* Captain America: The First Avenger they ever found was only just enough to make the shield (as of the WW2 setting; more of it turns up later).
* Captain America: The First Avenger: This conversation where Steve is actually being considered to join the army after being turned down multiple times.
* Captain America: The First Avenger. This inspired his official tactical suit for the rest of the movie.
* Captain America: The First Avenger, this is how Agent Carter takes down the flamethrower-packing Hydra soldier that Cap is having trouble with. She guns down the fuel tank strapped to his back until it explodes and sets him on fire.
* Captain America: The First Avenger was less than well-received (even though his performance was seen as one of the film's highlights)? Yet it worked out better than anyone could've expected.
* Captain America: The First Avenger was luckily perfected by that time. The fact that they had different personality traits to start with also led them even further in different directions.
* Captain America: The First Avenger What is the very first thing Steve Rogers does as the perfect human specimen? Chase down a speeding car, of course. While barefoot.
* Captain America: The First Avenger when a Nazi agent calls Red Skull's technology magic. Plus, elements in multiple films imply that Iron Man's state-of-the-art Arc Reactor is based on the Tesseract, a container for the Space Stone.
* Captain America: The First Avenger: When being chased by the newly empowered Steve Rogers, the Hydra spy Heinz Kruger keeps firing his gun but Rogers dodges every shot. Eventually, Kruger resorts to taking a boy hostage to force Rogers to stand still long enough so he can get a clear shot, but just as he does, his gun clicks empty.
* Captain America: The First Avenger when Cap "socks old Adolf in the jaw" during his stage show, the movie audience clearly sees distance between Cap's fist and the actor playing Hitler. Later, lampshaded when Cap claims to have knocked out Hitler over 200 times.
* Captain America: The First Avenger. When he asks why it isn't standard issue for normal soldiers, Howard Stark says it's because the metal used to make it is too rare to produce more copies.
* Captain America: The First Avenger : When introducing Captain America's new gear, Howard Stark says "Although, HYDRA's not gonna attack you with a pocket knife." When Captain America boards Red Skull's doomsday ship, the first mook to attack pulls out a pocket knife.
* Captain America: The First Avenger, when Rogers showed the colonel the map he had copied from the Red Skull's Hydra headquarters:
* Captain America: The First Avenger: When the evil Red Skull peels off his mask to reveal the facial deformity that gave him his name, sidekick Bucky mutters to Cap,

"You don't have one of those, do you?"
* Captain America: The First Avenger, when the most famous users of this gun were the German police and the Nazi Party officials. This can be somewhat justified by two facts:
* Captain America: The First Avenger where Earth is a battleground for control of the remaining Infinity Stones.
* Captain America: The First Avenger, where the Howling Commandos burst in just as Cap is about to be shot by Red Skull, followed immediately by the rest of the Strategic Scientific Reserve.
* Captain America: The First Avenger which was created specifically as an off-road limo for high-ranking Nazis and Wehrmacht officers.
* Captain America: The First Avenger, while most of London is celebrating the end of the war, the Howling Commandos are gathered in a pub. One says, "To the Captain," and they all solemnly drink to their (presumed) fallen comrade.
* Captain America: The First Avenger: While not a literal one, various flaws in SHIELD's recreation of the 1940s, intended to ease Captain America back into life before exposing him to the 21st Century, act as this, particularly the use of a baseball game from the early 1940s (which Steve attended himself) to represent a game in 1945, and the SHIELD agent intended to act as Steve's handler/nurse being dressed incorrectly (wearing a 21st century hairstyle and a modern push-up bra, neither of which existed in the 1940s).
* Captain America: The First Avenger while Steve's goodness made him a true superhuman.
* Captain America: The First Avenger who assembles his own counter-force of elite (Howling) Commandos.
* Captain America: The First Avenger (who's none other than Tony Stark's father) who all have had their own adventures prior to meeting him. Then there is the mentioning of the Tesseract being an artifact from Asgard.
* Captain America: The First Avenger worth of soldiers on his first "mission", exceptions were to be made).
* Captain America. There have been numerous other attempts to replicate the success with Steve, most of which ended in failure either because of the process, the candidate's psychological make-up or some combination of both.
* Captain America: The Watchdogs are a right-wing terrorist group dedicated to restoring and preserving traditional American culture and values, and fighting against indecency, immorality, and sexual perversion. The Watchdogs seek to impose their conservative moral views on the general public; they believe in strict enforcement of family values, and are violently opposed to pornography, obscenity, sex education, abortion, homosexuality, and the teaching of evolutionary theory. Their terrorist activities, which include vandalism, arson, intimidation, assault, kidnapping, brainwashing, and murder, are targeted primarily at people who produce material which the Watchdogs consider pornographic, including nude art and sexually explicit music.
* Captain America: The Winter Soldier and federal agencies, you would expect the DC area to go on lockdown after each and every major incident.
* Captain America: The Winter Soldier, and implores the rest of the organization to stand with him, no matter the risk. It works.
* Captain America: The Winter Soldier, and makes the implication to Cap that he's skilled at breaking and entering.
* Captain America: The Winter Soldier and the Winter Soldier after Captain America reveals the truth. To be fair, in their case it wasn't that the SHIELD agents were incompetent, just massively out-manned and outgunned. In even fights, such as the battle for the main control room, the SHIELD agents manage to give as good as they get.
* Captain America: The Winter Soldier: As the Winter Soldier, Bucky manages to get it off of Steve, and wields it much more efficiently, using it to beat Steve, while also throwing it a few times.
* Captain America: The Winter Soldier, as they also mount an impressive amount of guns intended to be the primary offensive measure.

* Captain America: The Winter Soldier: A two prong one: Cap against the titled Winter Solider and the SHIELD loyalists against the HYDRA moles in order to keep them from activating the Helicarriers and killing people.
* Captain America: The Winter Soldier between them, they don't go any farther than being friends.
* Captain America: The Winter Soldier. Black Widow herself was an assassin before joining SHIELD (and it is implied has worked in that capacity for SHIELD as well, but the film spends very little time dwelling on it).
* Captain America: The Winter Soldier. Black Widow insists on doing this to Captain America as bad guys are looking for them in a shopping mall (later she teases him about being such a bad kisser due to his lack of experience).
* Captain America: The Winter Soldier: "Bucky had turned mean. He was out hurting other people!" (said over a picture of Bucky with a rocket launcher and flaming cars behind him.) and "Bucky got away on a helicopter." (Remember when that happened in the movie? Yeah.)
* Captain America: The Winter Soldier Bucky has gone from looking like a dapper, young WWII soldier, to sporting long hair and a kickass, Russian bullet-proof suit and metal arm as the Winter Soldier. Most fans prefer his badass Winter Soldier look in the franchise.
* Captain America: The Winter Soldier By the time the movie starts, they have all but succeeded.
* Captain America: The Winter Soldier: Cap goes through just about every window shown for one reason or another (usually shield-first).
* Captain America: The Winter Soldier claiming that "It isn't personal" as he attacks. Steve beats the hell out of him and snarls "It kind of feels personal" at his unconscious form.
* Captain America: The Winter Soldier during and before. Yes, that mind wipe scene is horrible, but do you really think they used anesthetic when they cut off the rest of his arm while he was still conscious? And god only knows what they did before they perfected that chair of theirs...
* Captain America: The Winter Soldier during the highway chase. Also before that the sudden appearance of the WS and sudden death Agent Sitwell count as this.
* Captain America: The Winter Soldier, even though the directors have denied this.
* Captain America: The Winter Soldier facade. Admittedly, the fact that they're controlled by HYDRA doesn't hurt.
* Captain America: The Winter Soldier features Falcon, a superhero with no powers and a pair of mechanical wings.
* Captain America: The Winter Soldier Fury dies in an assassination, but it turns out he was laying low and faking it until he could get to the bottom of who was behind the attempt.
* Captain America: The Winter Soldier, Fury's direct superior, U.S. Secretary of Defense Alexander Pierce, personally takes over the murder investigation. One problem, though: Pierce is secretly the head of HYDRA, and is the one who put out the hit on Fury to begin with.
* Captain America: The Winter Soldier gets shot in the shoulder and despite clearly being in pain has entire expositional conversation with Cap and Falcon while captured. It’s only towards the end of the scene that her friends notice how much blood she’s losing and she gets saved and patched up shortly after.
* Captain America: The Winter Soldier has said this was a deliberate decision on the part of the directors, who wanted the movie to seem more "grounded" and serious than the average superhero film.
* Captain America: The Winter Soldier has the first fight between the titular characters. The Winter Soldier starts the fight with an assault rifle that he quickly drops in favor of a sub-machine gun. He's forced to use a handgun, Captain America's shield, and two different knives until he's down to his holdout pistol. In the second fight, he's reduced to his bare fists.
* Captain America: The Winter Soldier. He ends up smashing the final opponent into the ceiling, then freeing himself.
* Captain America: The Winter Soldier). He's no better at other kinds of deception,

either. His idea of hiding a USB with the fate of the free world resting on it is to put it behind two packs of gum in a vending machine that's being restocked.
* Captain America: The Winter Soldier, he's unharmed and continues his march.
* Captain America: The Winter Soldier is a very good reason not to trust them, but the fact remains that Coulson's S.H.I.E.L.D. really was trustworthy.
* Captain America: The Winter Soldier is introduced as a former member of an elite Air Force unit that outfitted its members with advanced suits of flying body armor.
* Captain America: The Winter Soldier is primarily set in Washington, D.C., but was mostly filmed in Cleveland.
* Captain America: The Winter Soldier: It is revealed that there has been an organization-wide infiltration of S.H.I.E.L.D. by H.Y.D.R.A. Moles under the command of Alexander Pierce take control over the agency's DC Headquarters, Triskelion as well as all three Helicarriers.
* Captain America: The Winter Soldier liked to use at the end of takes, "Cut the check!", as a possible attempt to popularize the phrase among Marvel fans.
* Captain America: The Winter Soldier Natasha was trying to set Steve Rogers up with various other women, she evidently has no problem with romance as a whole.
* Captain America: The Winter Soldier plays up the Stale Beer approach, complete with morally gray conspiracies, a government agency that may have sinister agendas, and a hero who is forced to confront his idealism against the cynical world he has found himself in. Being a superhero film, it naturally also comes with some Martini flavorings, especially in regards to the tech.
* Captain America: The Winter Soldier, removing the emblem from the cars and many other obvious places. He couldn't bring himself to remove the giant symbol on the top of the plane, though, because it's just too cool.
* Captain America: The Winter Soldier, Sam calls Sitwell to his cell phone and tells him that he must follow him to a van a few blocks away. Sitwell at first doesn't take the threat seriously until he sees a sniper laser on his tie.
* Captain America: The Winter Soldier: Senator Stern is last seen getting arrested towards the end of the film. Considering that his actor died two years after the movie's release, we can safely assume that this is the last appearance of the character in the franchise.
* Captain America: The Winter Soldier sequel had Nick Fury driving around in a SHIELD issued SUV, complete with armor, an AI, BFG, a med-kit, and it apparently had flight capability but it was damaged in an attack.
* Captain America: The Winter Soldier, serving as a drama bomb for that series as well.
* Captain America: The Winter Soldier, she asks Steve if he's still uncomfortable. Bonus points in that she bought him clothes a size too small already. Uncomfortable, indeed.
* Captain America: The Winter Soldier, S.H.I.E.L.D.'s system of clearance levels appears again. Steve's a little unhappy with how Nick Fury continues to hide information from him.
* Captain America: The Winter Soldier spends most of the film trying to get Captain America a date. She doesn't let up during fight scenes.
* Captain America: The Winter Soldier starts with the Avengers attacking said base. Also, throughout that season Coulson was working on a secret project, which in the episode after the movie came out revealed that it was the Helicarrier used in the movie.
* Captain America: The Winter Soldier, Steve, despite apparently not having made any friends outside of SHIELD and the Avengers since defrosting, hits it off with Sam Wilson almost immediately. They're both war vets, they both lost a close friend in combat, they both have experience with PTSD (although Sam has dealt with his issues and moved on to helping others, while Steve is still struggling), and they're both straightforwardly heroic people despite the morally ambiguous spy milieu of the movie.
* Captain America: The Winter Soldier, Steve initially doesn't notice anything when SHIELD agents (including Rumlow) board the small elevator he's in. It's only when he realizes that the elevator is filled exclusively with large men, some of whom

are giving him cautious stares, and sees the agent standing in front of him with a bead of sweat running down his neck that he understands something's wrong.
* Captain America: The Winter Soldier (still somehow holding on his shield as well). This one of the reasons fans enjoyed their relationship, platonic or not.
* Captain America: The Winter Soldier. Subverted in that he's purposefully dumping useful info on them as a stalling tactic while he tries to kill them.
* Captain America: The Winter Soldier that now allow him to zoom in from great distances and track targets.
* Captain America: The Winter Soldier that Steve sees, is that one of them is visibly sweating nervously.
* Captain America: The Winter Soldier, that's when the Winter Soldier is deployed.
* Captain America: The Winter Soldier the car, and he needs to wait until the (bulletproof)window is breached before deploying it against his attackers.
* Captain America: The Winter Soldier, the heroes are busted out of a prisoner transport by an ally in enemy uniform—aided by the fact that said uniform includes exactly the type of face-concealing helmet the Evil Overlord List recommends against…
* Captain America: The Winter Soldier, the leads are Captain America (white male), Falcon (black male), and Black Widow (white female).
* Captain America: The Winter Soldier; the relationship remains platonic despite Chris Evans and Scarlett Johansson's natural chemistry.
* Captain America: The Winter Soldier: The security guard in the Smithsonian at the Cap exhibit.
* Captain America: The Winter Soldier, the Soldier hitches a ride on Sam's car.
* Captain America: The Winter Soldier, the Winter Soldier often walks like this, most notably during the highway ambush.
* Captain America: The Winter Soldier the Winter Soldier!" While he rails about how this would never happen if they had Sky Broadband Shield, the agent turns back to the unseen screen and tilts her head.
* Captain America: The Winter Soldier This is all to contrast with Captain America, who, of course, only needs a shield.
* Captain America: The Winter Soldier. This is pretty much Alexander Pierce's word for word explanation to the Winter Soldier as to why it was okay to destroy Bucky Barnes' life and use him to destabilize democracy around the globe for nearly a century.
* Captain America: The Winter Soldier, to the point that it is common for fans to draw Anna and Elsa as the former two.
* Captain America: The Winter Soldier twist of the film — that SHIELD had been infiltrated by HYDRA at its inception — was kept remarkably well hidden before the big reveal.
* Captain America: The Winter Soldier unstable. As he finds out, Hydra infiltrated S.H.I.E.L.D. and stirred up conflict to achieve their conquest in another fashion.
* Captain America: The Winter Soldier used as a trailer at the end of "End Of The Beginning" when shown in the US was removed from Channel 4's airings (which is why it's two minutes shorter than usual), as the movie had already been out in Britain for several weeks at that point.
* Captain America: The Winter Soldier, Victoria Hand's forces attack Coulson's team on the Bus.
* Captain America: The Winter Soldier we learn that SHIELD as an organization was Evil All Along, having been infiltrated by the Nazi organization HYDRA ever since SHIELD's creation at the end of WWII. Notable SHIELD operatives appearing in previous films who are revealed to be part of HYDRA include Rumlow/Crossbow and Hollins and the entire Strike Team.
* Captain America: The Winter Soldier welterweight champion Georges St-Pierre as the martial artist mercenary Batroc.
* Captain America: The Winter Soldier, we're given a look at Steve's WWII uniform on display at the Smithsonian Museum. After spending half the flick as a fugitive, guess where he goes when he needs gear for the final confrontation?
* Captain America: The Winter Soldier: When Sam is talking to Sitwell on the phone,

he tells him that he is at "his ten o'clock". As Sitwell looks around, he adds "Your other ten o'clock".
* Captain America: The Winter Soldier: When Sam Wilson remarks that he must long for the good old days, Cap notes they had to boil all their food, polio was still rampant and there was no Internet, all problems the modern day world doesn't have to deal with. Nick Fury also remarks on the rampant racism his grandfather's generation experienced back in the day.
* Captain America: The Winter Soldier when we see Nick Fury's eye and why it usually covered in an eye-patch.
* Captain America: The Winter Soldier, which has strong enough armor to almost rival a tank's.
* Captain America: The Winter Soldier which HYDRA then replaced with a metal one.
* Captain America: The Winter Soldier: While on the run from S.H.I.E.L.D. and doing some hacking in a mall, Cap and Black Widow pretend to be fiances looking up honeymoon sites.
* Captain America: The Winter Soldier while shirtless and tied to a chair was creepy on multiple levels.
* Captain America: The Winter Soldier, who devastates the fray with a cold demeanor and calculating efficiency and shrugs off blows by anyone that isn't Captain America.
* Captain America: The Winter Soldier, who starred in many of the most notable examples of such films.
* Captain America to repopulate the world, right after she sterilizes everyone else, of course.
* Captain America to turn the titular character into a Nazi (and made an event out of it).
* Captain America unit; Special Forces are often regiments on paper but closer to an understrength battalion in actual numbers.
* Captain America used to have two calling cards: his Dust of Death, a poison that made the victim's face turn red and skull-like, and a leitmotif of Chopin's "Death March" which he would arrange to have played when he struck, sometimes in very clever ways. He hasn't used either of these in years, having gone to more subtle evil schemes.
* Captain America uses his battlefield command experience to lead teams of superheroes against supervillains.
* Captain America version of Cap was revived in the 2000's, which would be even more jarring for someone frozen during the war.
* Captain America version reacted this way pretty strongly). Fortunately, Cap is usually portrayed as a broad-minded guy who can learn to adjust.
* Captain America villain Baron Zemo has gone this way about five times in his various incarnations. He is also known as "Gravity's Bitch".
* Captain America villain Baron Zemo was subject to this on multiple occasions before falling to his death again.
* Captain America villain was later revealed in the Avengers as having this kind of immortality, whenever he was killed he would vanish then go through a regeneration process from fertilized egg to fetus to infant until reaching the age of a young boy. Unfortunately the events that killed him in the pages of Captain America were responsible for both vastly accelerating the process (to the aforementioned seconds of regrowth time) but making him remember all of his past lives as well as normally each new life was an amnesiac. As a result he was a death seeker because as he explained to Thor (who pompously declared how grand a gift immortality is) all his lives had been normal, miserable lives and outside of his last incarnation (the one Captain America fought) had not been any grand people.
* Captain America violated the ban on "[p]rofanity, obscenity, smut, vulgarity, or words or symbols which have acquired undesirable meanings" in the 1971 revision of the Code.
* Captain America Vol. 1 #389 as an opponent of the Zambian villainess Impala.
* Captain America vs. Batman behind the head with his shield by ricocheting it against a wall. Though it is just the warm-up phase.

* Captain America, was fighting. Her response is a slightly annoyed "No fair, I had this one..."
* Captain America was given a serum that grants him peak human ability. While he isn't anywhere close to as strong as many of his Avengers teammates (some of whom have been known to bench-press mountains), he's able to do anything that a human being can do, better than any other human being can do it.
* Captain America was going to be the best weapon the US had in the war, but he (seemingly) died while trying to stop a Nazi-alien rocket. Unable to use him anymore, the US had to resort to atomic bombs instead to end the war with Japan.
* Captain America" was in fact a captain. But when he formally retired from the Army after he returned to the modern world, he was promoted to Brigadier General.
* Captain America was more or less a coincidence. Former Nazi scientist Baron von Blitzschlag is stunned to hear this; he'd never have imagined such a perfect specimen would be the sole product of eating right and working out.
* Captain America was provided with a photonic energy shield by Sharon Carter. Said shield, in addition to being an energy facsimile of his regular shield, could even be converted into various other forms, which included: a bo staff, sword, and even a larger force-shield. Unfortunately, the photonic shield didn't have the ricocheting ability that the regular shield had.
* Captain America were "Bucky! Look out!", as to him no time had passed since 1945.
* Captain America. When Cap suspects something is up, he asks Batroc to take off his mask. Batroc protests that it won't prove he's an impostor or not, since Cap has never seen his real face. That turned out to be Cap's plan all along, as he suspected wherever he was was pulling details of his current world from his own memories. Since he had no idea what Batroc looked like, his unmasked face was simply blank.
* Captain America, where he actually lets go of the parachute because "I better get down there faster!"
* Captain America, where he keeps lapping future partner Sam Wilson, while subtly gloating.
* Captain America, while Crossbones is well into his thirties. Since they’re both ruthless killers and Neo-Nazi terrorists, this is the least uncomfortable thing about their relationship.
* Captain America: Winter Soldier who settled down and grew old after surviving World War 2.
* Captain America won't." The guy quickly starts to talk. (It's doubtful Cap would have actually let her shoot him, but the situation was rather dire.)
* Captain Amnesia, a 1980s radio series, has "1,001 superpowers but can't remember one of them."
* Captain & Tennille recorded their cover of "Muskrat Love", which concerns a romance between two muskrats, which elicits giggling from the female. "Now he's tickling her fancy, rubbing her toes / Muzzle to muzzle, now anything goes / As they wriggle / Sue starts to giggle."
* Captain and the Kids cartoon "Petunia Natural Park", the Captain contemplates on feeding a sad-looking bear despite a "Don't Feed the Animals Sign". He decides to give him a sandwich, only for bear to turn out to be a cop in disguise who proceeds to beat the Captain with his billy club.
* Captain Anna Ivanovna Shchetinina, the world's first woman to serve as a captain of an ocean-going vessel, evacuated people from Tallinn during
* Captain Aquafresh, a Superman expy whose costume and hair are in the three Aquafresh stripe colours, symbolically thumping sugary foods.
* Captain Archer as a deranged homeless man who was abducted and put in charge of a starship. His resentment of the Vulcans, a running theme on
* Captain Archer is also shown to be a highly skilled pilot, having been one of the test pilots for the early NX Program prototypes ("First Flight").
* Captain Armand Pahner walks in on two of his sergeants (Eva and Julian) in the
* Captain Arsenio: Inventions and (Mis)adventures in Flight is said to be relaying the recently found diary of the title character.
* Captain Atom #56, it is revealed that after his father left when he was five, and

his mother became an almost totally nonfunctional alcoholic, Nathaniel's sister Peggy Ann took care of him and raised him, even though she was only a couple of years older than he.
* Captain Atom and Superman - the two of them (particularly the Captain) visibly take damage and slow down as the fight goes on.
* Captain Atom: Armageddon Wildstorm universe. It does not end well for Midnighter.
* Captain Atom, Catherine Cobert. But he was also the one responsible for keeping the team's ridiculous antics under control, counseling them when they were depressed or otherwise in need of advice or just a reassuring ear, and of leading them into combat.
* Captain Atom: Clifford Zmeck was originally a US Air Force sergeant until he was court martialed and convicted of rape and murder. He was offered a chance to participate in the science experiment that granted Captain Atom his powers and became the supervillain Major Force.
* Captain Atom finds himself in a WWII concentration camp. He spends much of the time just trying to blend in, knowing the damages he can do to the timeline. But after hearing the pleas of some children to spare their mother from execution, Atom openly says "Screw history" and transforms into his heroic persona to blow the camp to pieces and let the prisoners escape.
* Captain Atom from time to time, most memorably during the period of time when Lex Luthor was elected President (detailed above). He forced Atom by executive order to hunt down Superman and Batman, an act Atom clearly found distasteful.
* Captain Atom got to him was discovering what had happened to his wife and kids while he'd been gone.
* Captain Atom had General Wade Eiling, who conducted the extremely morally dubious experiments that led to the creation of Captain Atom. Later, after being diagnosed with an inoperable brain tumor, Eiling sends a military team to salvage the indestructible body of the second Shaggy Man from the Pacific Ocean where he has its body shaved, and he has his brainwaves transferred into the indestructible body.
* Captain Atom. Interestingly, the Silver Shield, the being Cap got his powers from in the first place, had the ability to communicate telepathically with human beings, so it stands to reason that Cap could do so also, although he never seems to have figured out how.
* Captain Atom—because he's integrated with the quantum field, Nekron could use him to drag the quantum field into his realm, and every living creature in the universe with it.)
* Captain Atom: Nathaniel Adam is a former Captain in the United States Air Force.
* Captain Atom once punched Superman so hard that Superman landed "somewhere in Connecticut" (the punch had been delivered in Manhattan).
* Captain Atom or Allen Adam as he was called in the Charlton Era was a lab technician who accidentally got atomized during a nuclear rocket launch
* Captain Atom: Plastique appears in the second issue, before Cap meets Nightshade, Catherine Cobert, or the Crimson Fox.
* Captain Atom, the hero's daughter, Margaret, begins a relationship with Jeff Goslin, her godfather. Not her father, but the implications are the same. The subtext, incidentally, was that she really did have romantic feelings for her father, and was (barely) sublimating them by dating Goslin, who was her father's best friend in addition to being her godfather.
* Captain Atom. They considered him such a low-level threat that they paused to have an impromptu trivia contest to determine which one of them would be responsible for kicking his ass.
* Captain Atom was flung 18 years into the future by the experiment which gave him his powers. When he emerged in the year 1986, he was now around the same age as his children.
* Captain Atom / Wildstorm crossover, Cap does this to Voodoo when she tries to invade his mind. He uses his neural uplink to the Pentagon's computer net to basically KO her with the Internet.
* Captain Atom with Sally Starshine. She certainly looks much older than Cameron

Scott, but since he jumped eighteen years into the future, they are actually contemporaries, which is one of the reasons he is drawn to her. Also, it should perhaps be noted that Cameron started dating his first wife, Angela, when he was a junior in high school and she was a senior.
* Captain "Axe Hand" Morgan. The acting leader says that they'll all have to go without food for three days afterwards as punishment. Given the enthusiastic "Yes, sir!" given in response, it's clear everyone present felt it was worth it.
* Captain Barbell: The title character's love interest from the 2007 series bites it in the first episode of the new 2011 series.
* Captain Barbossa is often seen carrying around and/or eating an apple.
* Captain Barbossa retorts Elizabeth Swann's denial of ghost stories by showing her the true, undead forms of himself and his crew.
* Captain Barbossa, when looking to make an entrance - he even manages it after losing his leg. Captain Jack Sparrow, not so much.
* Captain Barbossa widens his eyes and tilts back his head when he emphasizes things in speech.
* Captain Barnacles sometimes refers to Shellington as "champ" and Deborah as "princess".
* Captain Beaky & His Band (Not Forgetting Hissing Sid!!!), Vol. I), Captain Beaky uses Timid Toad as bait to lure out the snake Hissing Sid. The plan works, although not in the way it was originally intended.
* Captain Beaky and His Band, the eponymous cat does this when the bed he is resting on falls off a cliff.
* Captain Beaky's Christmas Pantomime, the snake Hissing Sid gets cast as few inanimate objects as well as playing the Demon King:
* Captain Beefheart (1980) describes a telephone in a horrific way: "It's like a plastic horned devil."
* Captain Beefheart, a cacophony of jumbled instrumentation, odd lyrics, and terrible singing that sounds like it was recorded in a basement by a group of high schoolers who don't even know how to play their instruments. Turns out that Captain Beefheart wanted it to sound that way on purpose, as he had his band maticulously reherse the album to a disturbing degree to sound terrible.
* Captain Beefheart and "Clear Spot" all show him and the band from a distance.
* Captain Beefheart and continued in that direction until multiple sclerosis forced him to retire from music in the 1980s.
* Captain Beefheart and the Magic Band, when guitarist Jeff Cotton received an appointment with the draft board his fellow band-members helped him prepare for it by keeping him awake and feeding him amphetamines for several days beforehand.
* Captain Beefheart artists of all time, never scored one hit in his career.
* Captain Beefheart depicts a human totempole who is starving to death.
* Captain Beefheart John French and Art Tripp rhythmically move a broom around.
* Captain Beefheart played at high volumes, goes straight here. But in a good way.
* Captain Beefheart, premiering on the hi-res service Qobuz and making its way to other services after a month.
* Captain Beefheart, showing a face you wouldn't want to see near your window at night.
* Captain Beefheart's work frequently goes from surreal and often sexual imagery to his rather serious environmental concerns. The best example of this is on the album Trout Mask Replica, where the rather serious (albeit cryptic) "Well" is sandwiched between the bizarre "Pena" and the hilarious "When Big Joan Sets Up". Another example is on the album The Spotlight Kid which features the song "Blabber N' Smoke". The lyrics of the song go from him making fun of his wife telling him not to smoke to insisting that we "clean up the air and treat the animals fair".
* Captain Beefheart was intended to sound uncomfortable and on the brink of falling apart. That's because the band really was uncomfortable and on the brink of falling apart; they had rehearsed the songs on the album for nine months, and were recording most of them in one single, manic five-hour marathon session with almost no retakes or overdubs. Antennae Jimmy Semens' performance of Pena sounds hysterical, and he probably was at the time. In a similar manner The Blimp, which

is recited in a similar voice, over the phone to Frank Zappa.
* Captain Ben Sisko. After his wife was killed at Wolf 359, he transferred out of starship duty into working at the Fleet's shipyards. Of couse, while there he was part of the design team of the
* Captain Berlin consists of only one song composed by Peter Syntethic, used in various situations. The credits were also written on pieces of paper.
* Captain Berlin Doctor Sind, his henchman, and his mutant are said to be from outer space while looking like normal people.
* Captain Berlin Doctor Sinds mutant is controlled with a mechanical device to an unknown degree
* Captain Bible in Dome of Darkness, a surreal video game designed to help kids memorize Bible verses.
* Captain Biceps parodied this with Wonderbra Woman's lasso forcing people to tell the truth. Unfortunately, said truths are more along the lines of "You've gained weight recently, haven't you".
* Captain Birdseye has used the same old-fashioned grey bearded sea captain for decades on their logo. For a short while during the 1990s they gave the character a more trendy, updated look and replaced him with a much younger man. The make-over didn't catch on and they soon
* Captain Blackadder carries a swagger stick from time to time in the fourth season of
* Captain Blackadder himself is an example, albeit a mild one. His subordinates adore him, while he treats them with cold contempt and considers them useless idiots... which, in his defense,
* Captain Blackadder, Lieutenant George and Private Baldrick all took part in the Christmas Day Armistice. Blackadder was off-side.
* Captain "Black Cage" Hina, in the woman-in-a-mannish-suit category.
* Captain Black issued an order that everyone had to sign a "loyalty oath", but did not allow Major Major to sign it, then began harassing him because he hadn't signed it and, when Major Major asked to be allowed to sign it, Captain Black continued to refuse to allow him to sign it on the grounds that he hadn't signed it when the order was first issued.
* Captain Black once read Uncle's books and in trying to perform a spell turned himself into a frog.
* Captain Blacksoul from Oceans Unmoving. Followed Bun-bun so implacably he was said to be the only thing the rabbit feared. It turned out there were very good reasons for this...
* Captain Bligh had a reputation for this, but it's not really deserved: Yes, he flogged his men, but it was only because flogging was the mandatory punishment in the British Navy at the time. In fact, he was considered
* Captain Blood, actually used his fencing skill to make it look plausible that Flynn won the fight!
* Captain Blood: His Odyssey: Dr. Peter Blood was not supporting plotting against the King of England until the Crown assumed he was and enslaved him for it.
* Captain Blood involves Peter Blood and his pirate ship, having agreed to fight on behalf of the British against the French, attacking the French warship and winning.
* Captain Blood is an old pirate movie that featured rope-swinging boarding action.
* Captain Blood is set in this period, during the reigns of James II and William III.
* Captain Blood. It's explained pretty explicitly: you're in a cyborg body because several clones have been made of you which have since run off with your precious bodily fluids. Your condition is deteriorating, so as time passes, your cursor (which represents your hand) will start to jitter, making precise clicking more difficult. Finding the clones and rendering them back down stabilizes you and buys you time to find the next clone.
* Captain Blood Odyssey, Dr. Peter Blood's troubles began when he tried to avoid taking a side in the Monmouth Rebellion. He disliked being ruled by the Catholic King James II as much as any other Englishman, but doubted that James, Duke of Monmouth would prevail. He tried to be neutral, offering medical care to loyalist

and nonconformist alike, but was arrested while treating a wounded nonconformist, and exiled to Jamaica as a slave.
* Captain Blood, the trope gets inverted for both genders. Blood gets sold as a slave and bought by his eventual love interest. Later she gets taken prisoner and is sold to him in a similar fashion. They both find the experience to be humiliating in a bad way, and a total turnoff to the point of stopping them from admitting their feelings for each other. It is only later, when they are both free, that their love for each other can bloom.
* Captain Blueberry Frost is a heroic example, watching out for the well being of the guards and taking a personal interest in them being stable. Her own boss Princess Celestia excels at this, functioning as a well-loved diarch who personally gets involved when the safety of her subjects is put into danger. She assists the allied kaiju in settling in and gives Godzilla Junior advise on numerous occasions to help him get used to his role as 'king'.
* Captain Bones' Gold is a boardgame in which you have to acquire gold doubloons while avoiding having it stolen by Captain Bones, a skeletal pirate.
* Captain Boomerang poses as Australian arms dealer Billy Tidewater. His ruse is uncovered because the group he tries to deal with is already holding the real Billy Tidewater hostage. Boomerang makes a valiant attempt to claim that he and Tidewater are cousins, and their fathers thought it would be funny to give their sons the same name.
* Captain Boyd is buried alive at the bottom of a mass grave, with his commanding officers' blood dripping onto him from above.
* Captain Brawe: A Brave New World Brawe complains that the universal translator isn't working, only for Kralje to point out that it's because Brawe rerouted the power so he could have hot water in his shower.
* Captain Bright also defects from the Federation forces to captain the AEUG's flagship. In fact, it's implied a fair number of the AEUG's forces are former Federation personnel who likewise defected... and a few of them took their ships with them.
* Captain Britain. After sister Betsy replaces Brian Braddock as Captain Britain, Brian's old foe Slaymaster takes her on and beats her savagely before putting both of her eyes out. An appalled Brian arrives, and a titanic fight ensues, which ends with Slaymaster on his back and Brian holding a huge rock over his head. At the last moment, he seems to force himself to stop. Slaymaster, being a villain, can't stop himself from coming out with an I-Don't-Think-You've-Got-The-Grapes taunting speech. In a flash of fury, Brian sweeps the rock down on Slaymaster's head. SPLAT.
* Captain Britain all end with a tag saying "Never The End" instead of "The End". This may be a reference to King Arthur, who Brian was often compared to, and whose own tombstone noted that his story wasn't over yet.
* Captain Britain and MI 13 event, the Skrull invasion of Britain and the remnants of the human military have their climactic battle on Westminster Bridge. It's invoked to a degree, since a good portion of the battle is fought with magic and the location has a great deal of symbolic value for the British people linked to this.
* Captain Britain and MI13 has a Vampire spy with a fake fang full of holy water.
* Captain Britain and MI13 he ends up meeting Faiza Hussain, a civilian doctor that he saves from a Skrull attack on the UK. She eventually gains healing powers and the right to wield Excalibur and becomes a superhero in her own right, but is still content to call herself his squire (and girlfriend).
* Captain Britain and MI13 series, Captain Britain's powers work like this; super strength and durability in proportion to his confidence and emotional stability.
* Captain Britain Corps, although not all of them are alternates of Brian Braddock (but many of them are). They're basically mystically powered protectors of the multiverse under the direction of Roma and Opal Luna Saturnyne.
* Captain Britain issue dealt with a James Jaspers from a parallel Earth whose only apparent power was reality jumping, the fallout from which caused an entire town in Africa to have similar baby booms.
* Captain Britain, Meggan's husband, depends on his own confidence, much like

Gladiator below - the stronger his confidence, the stronger he becomes.
* Captain Britain of Marvel Comics got his start, with a little help from Merlin. And then subsequently more help, since he's one of those heroes who can't seem to stop dying.
* Captain Britain, they are offered two items: the Sword of Might or the Amulet of Right. The original protagonist, Brian Braddock, chose the latter; his successor Kelsey Leigh, being more practically-minded and not understanding the significance of the items, chose the former.
* Captain Britain, while he recounted some transdimensional adventures, he mentioned a woman. The children listening tease him about how he blushes.
* Captain Broadband dies at the end of issue two when killed by his own explosives device. By issue three he is back without explanation, save a small editor box stating clearly 'Captain Broadband died last issue' with no further explanation.
* Captain Broadband keeps a Secret Identity Costume on him at all times (plus a Sidekick Gimp costume for his sidekick). He's yet to use it though.
* : Captain Broadband's nameless partner exists solely for this purpose. Captain Broadband provides him with explanations of events solely for the sake of providing explanations for events. Apparently it doesn't even matter what he's explaining as long as he's explaining something. No matter how gibberish it can be.
* Captain Buccaneer gets some points when he wakes up after a fight to find himself run through with a sword and a growing pool of blood around himself. His only comment is "Oh... better leave it in." (Actually good medical advice: if a person is impaled by something, taking it out will only make them bleed
* "Captain Carr" (#178) features the titular captain burning down his enemy's house, killing his wife and children (after a lengthy siege, because the wife is a badass).
* Captain Carrot also has some degree of this. Raised from birth as an adoptive dwarf, and working in the mines from the moment he was able to hold a pickaxe, has left him nearly as broad across the shoulders as he is tall, able to knock out Detritus (a huge troll made of
* Captain Carrot, and Carrot knows it, so he rarely thinks she's in any real danger.
* Captain Carrot and His Amazing Zoo Crew!) and takes it with him into Gnu York (Earth-C's New York), thinking the statue was a real person (and trying to hit "her" up for a date).
* Captain Carrot and His Amazing Zoo Crew!?", at which point the news anchor corrects his pronunciation.
* Captain Carrot and His Amazing Zoo Crew!), a wolf who turns into a legendary monstrous creature know as a "human".
* Captain Carrot and His Amazing Zoo Crew!: fantasy writer Ezra Hound attempts to kill off his hero, Bow-Zar the Barkbarian, so he can write serious fiction. Bow-Zar, in turn, time travels to the present and attempts to kill off Ezra Hound.
* Captain Carrot and His Amazing Zoo Crew! featured as a team member Fastback, a turtle with super speed powers. The "Just'a Lotta Animals" from Earth-C-Minus also featured the Flash's counterpart, the Crash (a turtle with super speed and Flash's costume). And to top it all off, Fastback's uncle was DC's Golden Age funny animal superhero (and speedster) the Terrific Whatzit (yet another turtle wearing a version of the Golden Age Flash's costume).
* Captain Carrot and His Amazing Zoo Crew!) gained powers that were either directly or ironically connected to some aspect of their lives.
* Captain Carrot and His Amazing Zoo Crew!, one storyline had a wolf who, thanks to a magical artifact, transformed under a full moon into a "wuz-wolf", a feral-looking human being. (The Zoo Crew's Earth having no humans, who are considered only to be fictional creatures, is noted at several points during the story).
* Captain Carrot and His Amazing Zoo Crew! saw Waspington, DC (Washington's Earth-C counterpart) attacked on several occasions by villains.
* Captain Carrot and His Amazing Zoo Crew! setting, features various media and products that're animal-pun-named variants on real-world items. For example, a popular soft drink brand is called "Koala Cola." An early issue bills the soft

drink as "the taste from down under," but a later issue makes clear it's the Earth-C version of Coca-Cola. Fenimore Frog refers to it as "the real thing," Coke's classic slogan.
* Captain Carrot and His Amazing Zoo Crew! star; to Pig Iron he's an incredibly tough working-class warthog; and to Alley-Cat-Abra he's a mystical cat made of shadows.
* Captain Carrot and His Amazing Zoo Crew!, the Zoo Crew's world became Earth-26 of the DC multiverse.
* Captain Carrot and His Amazing Zoo Crew! to the other Funny Animal comics DC published.
* Captain Carrot and His Amazing Zoo Crew! were set in Follywood, Califurnia, in the United Species of America. And it didn't stop there.
* Captain Carrot and His Amazing Zoo Crew!". When Earth-C suddenly gets updated from 1986 to 2015, Dr Hoot comes up with an evil plan involving selfies, as well as two memetastic new henchmen who are a doge and a LOLcat.
* Captain Carrot and His Amazing Zoo Crew!, when one comic begins with the same dialogue from just before the end of the previous issue, drawn from a different angle and labeled "At the risk of repeating ourselves..."
* Captain Carrot and the Final Ark featured a lawyer from Dewey, Cheatem and Howe.
* Captain Carrot and the Final Ark fighting Earth-26's Zoo Crew. Whether they're native to Earth-26 or their own Earth is unknown.
* Captain Carrot has shades of this in his relationship with Angua. Not that
* Captain Carrot Ironfounderson also get offered free meals... because the business owners know that he's so squeaky clean, he'll insist on paying anyway.
* Captain Carrot is known as the only man who can audibly swear in asterisks. "D*mn!" But he has nothing on Rincewind, who can orate an expletive consisting solely of, "!"
* Captain Carrot of the Ankh-Morpork Watch lives out this motto, although he probably wouldn't use quite that verb.
* Captain Carrot. Who will track down Death if he must, on the grounds that he's the only witness to a murder. It comes from his Dwarven upbringing (they think "irony" means "something like iron").
* Captain Caution he can't be an American coming in to capture one of the ships already in port. And that night, he sneaks a crew aboard...
* Captain Caveman and the Teen Angels: Captain Caveman was frozen in a block of ice in the Stone Age, and found/thawed in the present by the Teen Angels.
* Captain Caveman and the Teen Angels episode "Cavey's Mexicali 500", Captain Caveman is dreaming that he and Taffy are on a small island when a giant bird seizes Taffy and flies off with her. Cavey flies off to rescue her, and then his alarm clock bird interrupts his dream.
* Captain Caveman and the Teen Angels episode "The Creepy Claw Caper", a aging ray was used to turn a member of a band into an old man as ransom for a chest of gold coins. Later the Teen Angels are aged by the same ray. They all return to normal at the end.
* Captain Caveman and the Teen Angels had a ventriloquist who was also a burglar. His gimmick was convincing people that he's a dummy (being a short person and wearing a wooden mask helped), and that his (human-sized and very lifelike) dummy is the actual ventriloquist, which lead to him getting placed in compartments with other people's belongings he would steal and escape through an air vent, leaving people puzzled as to how a burglar managed to take everything without opening the compartment, and why he bothered with stealing an ordinary dummy.
* Captain Caveman and the Teen Angels is an original take on this, featuring the titular frozen caveman thawing out in an era of less primitive cavemen as well as modern society.
* Captain Caveman and the Teen Angels, Taffy impersonates a man during a telephone call.
* Captain Caveman and the Teen Angels, Taffy often asks Captain Caveman to do something for her which he doesn't want to do. Once she kisses him, he's ready for anything.

* Captain Caveman, Betty and Wilma were reporters for "The Daily Granite" who'd wind up accompanying Captain Caveman on his adventures.
* Captain Caveman, Captain Caveman "hides" his home's location by posting a sign stating "This is NOT Captain Caveman's Secret Hideout".
* Captain Caveman, Clownfoot, using a circus as his hideout. At said circus, Clownfoot also rigs a tandem bicycle Wilma and Betty are riding on a high-wire to fall apart, over a cage full of hungry saber-tooth tigers.
* Captain Caveman introduces himself in this way. After talking to Birdman, he vaults through the wall a workman had just finished patching.
* Captain Caveman, recurring villain Mr. Bad once made use of highly functional robots.
* Captain Caveman: The title character, being completely covered in hair, would often pull out things from his chest. Including dinosaurs.
* Captain Celaeno and her pirates are persuaded to abandon the Storm King's forces after Rainbow Dash sings them a rousing song, encouraging them to live their lives to the full.
* Captain Celano's crew members are named Mullet, Boyle and Lix Spittle.
* Captain Chesley Sullenberger of US Airways Flight 1549, the plane that made a successful emergency landing in the Hudson River after its engines failed in early 2009. Everyone was safely evacuated off the plane. Badass.
* Captain Clegg, Harry Cobtree is caught with a bullet wound in his arm.
* Captain Clegg, is a Gothic crime thriller about a gang of smugglers and ex-pirates, operating in 1790s Kent, in southeastern England, and the supposedly-haunted marshland surrounding the town.
* Captain Clegg, there are these all around town. The smugglers actually hide inside them to keep their eyes out for the law.
* Captain Clegg to cover the tracks of their operations. It's established that the Marshes are easy to get lost in, but they don't seem to actually be especially dangerous, making this ultimately a downplayed trope.
* Captain Clegg. When it comes time to exchange rings, one of the minor smugglers quickly produced a pair of plain, unadorned rings for them to use - a quick cut informs us he took them from the hanging of one of the church tapestries. It's pretty funny seeing a romantic comedy trope like this dropped into the climax of a swashbuckling adventure movie.
* Captain Cold alluded to this during "The Rogues' Revenge" storyline following
* Captain Cold claims that he only kills on "special occasions"... despite his completely indiscriminate freezing-to-absolute-zero of anyone who gets in his way, which should have resulted in him having a Joker-sized death tally. When he kills
* Captain Cold's cold gun usually sends people flying back, but only leaves people or things visibly frozen if the plot needs for a frozen person or object to be interacted with.
* Captain Cold, the Mirror Master, and Weather Wizard. It's like they did it on purpose.
* Captain Colorbeard: A pirate has a name referring to what kind of beard they have.
* Captain Colorbeard: Characters named after colours and/or body parts (e.g. Blackbeard)
* Captain Colorbeard: Pirate with a name of (Insert something here)-Beard.
* Captain Comet is supposed to be the next stage of human evolution ("born
* Captain-Commander Yamamoto remained cool and composed for virtually the entire series, even when he was on the verge of killing his two finest students or giving up an arm in a bid to defeat Aizen. But the instant three of his captains return from battle having lost their captain's haoris, he loses it and begins ranting at them. Their casual dismissal of the haoris as useless (Kenpachi), cheap (Byakuya), and not stylish (Shunsui) makes things worse.
* Captain-Commander Yamamoto, who plays the trope dead straight. He's ancient, more experienced than all but one of his subordinates, and holds his position through
* Captain Commando" able to resist up to a trillon degree heat), "Captain

Gauntlets" (which increases the Captain's strength 48 times), "Energy Gloves" (which shoots flames at 500.000 degrees and 100.000 bolts of lightning) and "Captain Boots" (which protects him from 100-meter falls)
* Captain Commando: A human-sized mecha being piloted by a hyper-intelligent baby.
* Captain Commando. His bandages are actually a life-sustaining suit which allows him to survive on Earth.
* Captain Commando: Plenty to go around. For example, three of the bosses, Shtrom, Shtrom Jr, and Druk, are all the same body with different colors- purple, yellow, and pink respectively.
* Captain Commando, so you can have a baby riding a mecha that rides a mecha.
* Captain Commando takes place in a futuristic version of Metro City. A sculpt of Mike Haggar is featured in the game as an bonus item, and Ginzu the Ninja is a future successor of Guy in the Bushin style of Ninjutsu.
* Captain Commando. The game is set in Metro City, Ginzu the Ninja is Guy's future successor in the ways of the Bushin school, and a bust of Mike Haggar can be obtained as a power-up.
* Captain/Commodore/Admiral Sir Edward Pellew as he is portrayed in the
* Captain Conan (1996), a parade is held to announce the signing of the Armistice ending World War One. The solemnity of this occasion is ruined by the large numbers of soldiers running off the parade ground to drop their pants as they're suffering from dysentery.
* Captain Conan (1996) ends with the title character, a fearless soldier and leader of men, as a debilitated shell of a man from illness.
* Captain Conan (1996), the title character commands a unit of trench raiders which includes recruits from military prisons. Part of the plot involves a court-martial when several of these soldiers use the skills they've learnt to rob a nightclub.
* Captain Confederacy mini-series, the U.S. has balkanized into several different independent nations. One is trying to reunite them, by any means possible.
* Captain Continental. However, Jonathan rejects his amorous advances in favor of his growing feelings for Leonard. Captain Continental notices their growing closeness and does everything he can to separate them, including calling Jonathan to his office alone so he can try to make him sexually submit to him, and rushing at Leonard with the intent to beat him after he tries to stop Captain Continental from beating up Jonathan and trying to make him submit to him. He later attempts to have Leonard locked into solitary confinement in order to get him out of the way after framing Jonathan for being a spy. He and his subordinate then approach Jonathan before beating him and gang-raping him.
* Captain Cook's Extraordinary Atlas mentions three rules that were followed by Captain James Cook when exploring the more fantastic areas of the Earth, and that were supposed to be followed by subsequent "navigators".
* Captain Corelli's Mandolin, Captain Corelli is one of a group of Italian soldiers occupying a Greek village. At one point, wanting to make a good impression on the villagers, he asks a villager who speaks Italian to teach him a greeting in Greek. The villager instead teaches him a spectacular insult, which he goes around cheerfully giving to everyone until he greets the prankster's daughter, the only other Italian speaker.
* Captain Corelli's Mandolin, Carlo and Francesco are sent to carry out such an operation. They are not told this is what they're doing and (as they realize when they figure out what they've actually done) they weren't supposed to survive it.
* Captain Cornelius and the Pirates of the Second Aether. who are after the
* Captain Crais. Initially, it's indicated that this is the result of
* Captain Crash: The driver tends to crash whatever vehicle they are driving.
* Captain Crokus, who wants to kill all house pets, replace them with mechanical copies and brainwash children into zombie-like state.
* Captain Dan a group of rapping pirates with song titles like "Hook it up," and "Keel Haul 'Em."
* Captain Dan: Authentic Pirate Hiphop. With lazers, and ninja flipping Santa Claus.
* Captain Daria Voronkova (likely as a nod to the mistake with Svetlana Markov's

name, Daniel initially refers to her as "Voronkov") is played by the London-born Françoise Robertson. Canadian Mike Dopud played a Russian colonel in the same episode and would go on to play a number of one-off
* Captain Dennis Cooper, the station captain at Hollywood Division beginning in season 5. Late in season 5, it's discovered he's responsible for juking stat numbers at Hollywood Division to make it seem like violent crime is down. In season 6, he pursues a petty sexual harassment complaint against Billets on Vega's behalf even though it's clear the original complaint had no merit and Vega and Billets had cleared the air. Then in season 7, when Billets is dealing with harassment by two sexist cops, he has a jewelry store owner he was fraternity brothers with give a pair of earrings to said sexist cops to plant in Billets' car in an attempt to frame her. Billets turns the tables on him: she calls in a favor with Vega, who gets the jewelry store owner in question to flip. The last we see of Cooper is him and the other two cops being escorted out of Hollywood Division by IA in handcuffs.
* Captain Disillusion manages one at the end of the episode "Miss Ping Debunk", where he bats a ping-pong ball off screen that sets off a largely-unseen chain of catastrophes that within a few seconds causes the entire set to collapse on top of him.
* Captain Dragon, always giving her just what she needed when she was really stuck. In the penultimate chapter, we find out it's Professor Oobleck, who never appeared in the story at all. The kicker is that he was working on behalf of the Vale Secret Service, an organization from a completely different fic by the same author without any indication that there was a crossover element between the stories at all.
* Captain "Dreadnought" Foster is ultra-famous and lots of people aboard the "Indy" admire him immensely, young Horatio included. Many sailors try to serve and indulge him, giving him blankets so that he can dry himself and alcohol to warm himself up. Pellew is reluctant to join in heaping praise on him and doesn't like that Horatio glorifies him. Hornblower's admiration for Foster is dashed when Foster insists on taking meat from a supply ship under Hornblower's command, which is still under quarantine for plague. Foster becomes a
* Captain Dudley Smith, who has taken over Mickey Cohen's empire and staged the Nite Owl Massacre himself.
* Captain DuPree. Not even the iron-fisted Baron Wulfenbach can really keep her under control,
* Captain Earth consciousnesses into them to infiltrate Earth and ultimately drain all of humanity's life force. The children know nothing of that and their Kiltgang personality is latent until they're awakened, but even unawakened, they possess supernatural abilities, called Singularities. Once they come in contact with another Kiltgang or libido, they awake.
* Captain Earth, Daichi Manatsu's Captain Earth, the cool-headed and humble leader of the Midsummer's Knights.
* Captain Earth, it is unknown if Daichi and Hana escaped the destruction of the Blume or both died in it.
* Captain Earth notes how weird an ordinary day (and life) on Earth feels. Then there's also the problem that anyone the Designer's Children kiss will be confronted via a telepathic kiss with memories worth eons upon eons of aggressive space warrior lifestyle.
* Captain Earths. However, they simultaneously also have a second form, a sort of piloting form that is officially called "Gig Mode", in which they all look vaguely like their avatar bodies, only incorporating their character colors more and adding some details that reflect their outer mecha bodies and abilities, like armour plates, hats (or some other forms of head additions) and the like. The anime underlines this otherness of their forms by using colored outlines for them. However, it is unknown wether these forms could or do exist outside of their mecha bodies as well.
* Captain Easy: In the "Jonah" storyline, Slugg murders the captain, abuses the crew and beats many of them within an inch of their life (including Easy and Wash). Yet Easy tries to save him from the burning ship anyway.
* Captain Edward Grey is a Broken Soldier who was broken by his experience in

Akuze. Put through a
* Captain Edward J. Smith famously and prominently went down with the ship. However, there are dozens of differing accounts as to
* Captain Elyia Asier serving this role as Cassidy. She frequently drops advice and life lessons, knowing that Cassidy wants to be the captain of her own crew, someday. At the end of the first book, she reveals to Cassidy
* Captain EO and its people (including the ruler) into happy, Day-Glo dancers.
* Captain EO, a show that played at the Disney theme parks (and currently plays in some of them), while the crew is searching for the Supreme Leader, Hooter sneezes, which puts them at risk of getting caught, but luckily, they didn't.
* Captain EO, Fuzzball does this to the whip-warrior's whips, causing them to crash together.
* Captain EO is the hero's primary sidekick — a little fuzzy orange thing that has butterfly wings and can sit on one's shoulder. It can also play guitar and even gets the hero out of a tight spot.
* Captain Eric Moody of British Airways Flight 9 managed to take this to ridiculous levels (probably helped by the good old
* Captain Ernest Medina, who was indirectly responsible for the My Lai massacre. He had been a mustang (
* Captain Ersatz: A character is a blatant copy of a copyrighted character the work's parent company does not own the rights to.
* Captain Ersatz, although attempting to bring Dos Caras Jr's rudo routine back to Mexico fell flat every time.
* Captain Ersatz, a particularly weird example because of the shifting patterns of his mask. It seems like you should be able to project facial expressions onto it, but you can't.
* Captain Ersatz (Aragog). He eventually gets a job as Hogwarts's Care of Magical Creatures teacher, which he loves.
* Captain Ersatz). Meanwhile, Orara, a Keronian Goku expy, stopped by the Hinata's once and defeated a villain that collected planets, all while preparing for a tournament that would take place in the secret Alien Street on Earth.
* Captain Ersatz, not the savior/second coming. Though the distinction may seem somewhat trivial to a non-Christian, Jesus being actually significantly less overtly powerful than several of the prophets preceding him in the Bible.
* Captain Ersatzs. The Sergeant turns out to have a "I Heart Allies" sign on his back.
* Captain Ersatz. The glass cited budget reasons (as to why it was a glass instead of a pitcher) and offered to get the wall fixed later.
* Captain Ersatz: The Greek Aphrodite is almost certainly the same goddess as the Mesopotamian Inanna/Ishtar, with a Hellenized name and new back story, at least in the story of her and Adonis/Attis. He, in turn, is the Phrygian/Greek ersatz of the Mesopotamian Dumuzi/Tammuz, Inanna's husband.
* Captain Ersatz! Though Daniel at one point does point out that many modern religions associate fire with evil. And what do the Ori manifest as?
* Captain Ersatz, who came from the future with extensive training to insert himself into late-20th-century society so he could change the past to save his own time. After realizing that his success must have changed the future so much he wouldn't belong, he used his training and a 35th century organic computer to create a new identity - which he admits he only needed so he could get a news media job so he could have an easier time keeping tabs on breaking events for his superheroics.
* Captain Ersatz, who's fast enough to deflect a hail of incoming bullets while in free-fall. Unlike the Flash, however, he needs to sleep a comparable number of hours that he's awake and using his Super Speed.
* Captain Ethnic: A superhero whose ethnic/national background (often stereotypically) defines their entire character and power set.
* Captain Ethnic: A superhero whose theme is their ethnicity or nationality.
* Captain Ethnic, rides a flying carpet (as well as wielding a magical scimitar).
* Captain Eustass Kid however wears raised goggles as part of his normal fashion.
* Captain Excelsior here: even a hint of a mustache on a superhero who usually

doesn't have one makes him invisible to other supers.
* Captain Falcon, having a slow startup speed, as well as no super armor, making it fairly easy to avoid or interrupt, meaning that you'll either need to catch your opponents off guard or use it when they're stunned and can't avoid it.
* Captain Falcon's Final Smash involves sending whoever gets caught into a track, where he soon runs them over with the Blue Falcon. It may just be an usual cloudy storm, but the sky in this setting is
* Captain Falcon-style just so he can win. Then a text slide appears stating that since Lightning won this time, there's no reason for him to have reversed time in the first place, meaning he will never win.
* Captain Falcon 'X''; a far cry from his canon level headed bounty hunter portrayal in the games proper.
* Captain Fantastic: Claire intently watches Bo doing yoga without his shirt at the rest stop, although part of this might have been out of being impressed by the moves he could do.
* Captain Fantastic is depicted with large breasts and skin-tight shirts, the better to show off their nipples.
* Captain Fatso was just one a series of little remembered but once popular navy farces written by Rear Admiral Daniel V. Gallery.
* Captain First Rank Marko Ramius, , and his "nemesis" Commander Bart Mancuso of the USS
* Captain Flamingo Either way, it's played for laughs, as the ideas he gets are usually ridiculous... but always manage to work.
* Captain Flamingo extremely important to those he helps. And he does have a recurring adversary (The Warrior Monkey).
* Captain Flamingo: The episode "High and Flighty" has Rutger getting a baseball pitcher machine for his birthday, but doesn't have a baseball to put it in. He then decides to use his dad's one of a kind autographed baseball, which he winds up accidentally hitting onto the top of a very tall building. Milo and Lisbeth are then tasked with climbing said building to retrieve the ball before Rutger's dad finds out what happened to it.
* Captain Flamingo, where he and Lizbeth mail Rutger as a package to get him away from a babysitter who keeps tabs on him. It backfires.
* Captain Flint's crew, under Long John Silver, rebelled in the backstory.
* Captain Freedom, the titular superhero dated future villainess Kaeko Katana while they were both at the Vineyard, and they've had an on-again-off-again relationship ever since. At one point, he tries to marry her, but it does not work out. At all.
* Captain Freedom, Tzadik's efforts to settle down and marry his on-again-off-again girlfriend Kaeko fall apart when she finds out that he's already married. He insists that it was only a beard marriage for the sake of a lesbian acquaintance.
* Captain French, or the Quest for Paradise), and was one of the first to receive the treatment (albeit quite late in life; most people do it in their 20s, while he did it in his 50s and shocks people with his grey hair).
* Captain French, or the Quest for Paradise breasts literally pop out of her blouse, but manages to snap out in time and use his cigar to keep the woman at bay. He then take his wife to their hotel and "relieves the pressure" from the aphrodisiac to the point where she half-jokingly calls him an animal in the morning. He also teaches a man, who asks him for advice in seducing French's wife, while offering to introduce him to several local girls, by giving him the exact wrong advice and watching his wife angrily hit the guy. Sure, he understands that the guy didn't think he was doing anything wrong by the mores of this planet, but still...
* Captain French, or the Quest for Paradise by the authors (there is an appendix at the end of the book with all the references). Sometimes the source is referenced by the first-person titular protagonist.
* Captain French, or the Quest for Paradise. For this reason, space travel is only done by colonists and space traders and no interstellar government is possible.
* Captain French, or the Quest for Paradise, French keeps to standard Earth time and gives all time measurements in standard days, months, years, etc. The topic is

expanded, when he speaks of Solaris, whose period of rotation is equal to 15 hours (at the equator). Try as they might, the Solarians have not managed to get used to such a short time period, as there simply wasn't enough time in a day, while a two-day cycle would've been too long. Instead of trying to adjust the planetary rotation speed (which would've probably ended in a disaster) or messing around with whatever genes force us to sleep for 8 hours and stay awake for 16 (also a likely disaster), they have implemented a brilliant social measure that appears to work for everyone. Every Solarian belongs to one of five clans, differentiated by colors of clothing. Each clan lives on its own time, shifted by several hours from the next one. Small settlements typically belong to the same clan, while cities are split up into districts. This works out for anyone who might want to enjoy the "night life", while his own clan is deep asleep. All he has to do is go to a neighboring district, where the "night" is still young. The clan split is cosmetic at best, as there are no social taboos against intermixing or switching clans. Think "time zones" that are not geographic in nature.
* Captain French, or the Quest for Paradise, he forces himself to exercise daily and swim in his Olympic-size pool while traveling.
* Captain French, or the Quest for Paradise, he is the absolute monarch with her as his queen. Anyone who visits the ship has to abide by his rules, even if the ship is orbiting a planet at the time. It's mentioned that it's possible for a citizen of a planet not to be allowed back after a sufficient time has passed and if strict immigration laws are in place to combat overpopulation. It's also common enough on many planets to disenfranchise people, removing their citizenship status. This usually applies to criminals, cult members, doom-sayers, and other undesirables.
* Captain French, or the Quest for Paradise. He not only remembers details of his own life but recalls details of planetary histories and great literary authors. True, there are some things he's a bit foggy on but no more than an ordinary person having trouble recalling some obscure event or detail. At the same time, he mentions to his wife that the model she befriended on Barsoom has already likely forgotten her (decades have already passed for the universe outside their ship).
* Captain French, or the Quest for Paradise. In fact, the titular character, being quite possibly the oldest human alive (being born in pre-CR days on Earth), has hundreds of thousands of children, although he explains that he didn't technically father any of them save one (his first daughter with his first wife), as they're all the result of artificial insemination with his sperm donated on many planets. However, this trope is, technically, preserved in that the CR treatment is not passed down to children and must be reapplied to everyone once they reach the age they want to be "frozen" in (most choose early 20s, although some prefer early 30s).
* Captain French, or the Quest for Paradise. Naturally, when everything went to hell, those who tried to warn everybody were the first to be lynched. Well, no one ever said humans were rational beings.
* Captain French, or the Quest for Paradise of some sort. In one case, the titular protagonist obtained a colony ship's outer hull and used it to expand his own ship, putting a lounge in the new section.
* Captain French, or the Quest for Paradise. On one planet, a virus in the data banks has resulted in historical data becoming corrupted and making the locals think that the automotive industry began during the time of ancient Babylon. Since they habitually name their kids after ancient kings and other great figures, this has resulted in names like Sedan Peugeot Hammurabi. The protagonist is the only one who finds that funny.
* Captain French, or the Quest for Paradise, the people of San Brendan are unattractive by most standards thanks to living on a world with a higher gravity than Earth norm. They are short, stocky, and grey-skinned. However, after thousands of years, the San Brendan colonists who have re-settled the planet Transformation (renamed from Brunnershabn) have changed to normal-sized (and attractive) humans. Bioscrupture may have been involved. French even mentions recognizing facial features common to Slavic and Scandinavian people.
* Captain French, or the Quest for Paradise, the planet Barsoom (presumably named

after Edgar Rice Burroughs's novels) is a low-gravity world, whose people have grown tall and thin over the millennia since colonization. When French and his wife arrive there, the locals tend to view his wife as exotic, but far too... heavy for their tastes, even though her height is actually normal for Barsoom. French himself keeps a very low gravity aboard his ship (about 0.02G) by spinning it. In order to avoid muscular atrophy, he has a strict daily exercise regimen.
* Captain French, or the Quest for Paradise, the planet Murphy is named after Simon Murphy, the first leader of the colony.
* Captain French, or the Quest for Paradise, the titular character was the first of these, although his primary profession is that of a space trader. This doesn't stop him from, occasionally, traveling to unexplored systems to scout it for potential habitable worlds. He can then sell this information on a heavily-populated planet, so it can start building a colony ship. It's not stated if he ever actually lands on any of the virgin worlds, but even traveling to an unexplored system is rife with a degree of danger, as there is always a chance that his ship's relativistic drive can deposit him inside another object or in a dangerous gravity well. His first journey with the drive was in the 21st century as a NASA test pilot, who successfully tests the drive on a trip to the moon Triton and is then sent to Alpha Centauri, where he discovers a habitable planet, which he names Penelope after his daughter. He then goes on a century-long trek and discovers several more planets before heading home. He also relays to his wife a story of a space trader couple who track a signal from another space trader to an uninhabited planet he discovered. They find his ship in orbit and his shuttle on the ground, but no sight of him. Assuming he died, they take his ship and plan to take it to the nearest industrial colony to sell. However, the wife has other plans and absconds with her new ship. When she doesn't appear at their destination, the husband is horrified and assumes she may have died, only discovering the truth years later.
* Captain French, or the Quest for Paradise, the titular protagonist is a space trader, who owns a merchant ship. However, he doesn't really have a crew (the ship's computer is smart enough to do everything with the help of the robots). Most of the time, he travels alone, although he gets married (again) at the start of the novel.
* Captain French, or the Quest for Paradise, where interstellar travel is achieved via a relativistic drive that feels like a fraction of a second for anyone in the ship but takes decades in real time. While humanity has settled dozens of worlds, colonization is a costly venture that only governments on rich planets can afford, usually when overpopulation becomes an issue. The only people for whom space travel is routine are space traders, including the titular protagonist. Due to this, space traders are greeted on almost every populated world and treated as royalty. Without them, there would be no interaction between planets. Even interstellar communication is a rarity, as it requires large orbital transmitters and receivers to be set up and maintained, and any message would still take years to arrive. Even with this, a ship still has to travel for months under normal power in order to get away from deep gravity wells, as they mess up calculations. It is also risky, as a jump can deposit the ship near a star or inside a planet. There are, probably, no more than several hundred space traders in this 'verse and a few thousand settled worlds 20,000 years since interstellar travel became feasible.
* Captain Future books, a gang was selling water from a radioactive spring which made people young. Too long without the water, and the person died from rapid aging. There was actually an attempt to give a scientific explanation; the body no longer has the resources and regeneration of a young person, but continues expending them like one.
* Captain Future. Captain Future has to stop a man in a spacesuit from sabotaging his rocketship, and notes that attempting to disconnect the air hose is a standard tactic in hand-to-hand space combat (though he doesn't get the chance).
* Captain Future has both an obvious robot and an android in his crew. In one scene where there is a risk of depressurization in the ship, the latter is seen wearing a space helmet.
* Captain Future; later it gets an upgrade and is able to hover around under his

direction.
* Captain Future should be mentioned here. He is an archetypal brain in a (highly mobile) jar, with a tractor beam and other appendages; and an array of blinkenlights for a mouth.
* Captain Future. There was also a straight anime adaptation in the 1970s.
* Captain Future villain named Ru Ghur discovered a type of radiation capable of doing that. He denied it was anything bad, but people were apparently a bit too desperate to get another dose.
* Captain Future who is more knowledgeable than the leading scientists in any given field.
* Captain Gamer OOC makes use of this in Strip #4... until the camera pulls out to reveal that Guts Man only has a single point of energy left.
* Captain Gamer's nemesis (Czar Gamer) regularly swings from friendly rival to bitter enemy and back again.
* Captain-General Yamamoto. Possibly the strongest Shinigami in the series, and his moustache
* Captain Geographic: A superhero who represents their country of origin.
* Captain Ginger Hasina can't get anyone's name right. She's too focused on her latest
* Captain Ginyu on Scrooge McDuck. Vegeta gets Scrooge's animation style and Scrooge gets Vegeta's animation style. Dewey and Louie immediately wonder why Scrooge looks crappy.
* Captain Ginyu teases this when he berates Jeice for interfering in his fight with Goku, even threatening to kill him if he does it again. It's such a gallant display of sportsmanship that Goku himself thinks Ginyu might be capable of redemption... and it's then subverted completely when Ginyu resorts to cheating via his trump card, the
* Captain Gloval often hit his head while entering the bridge of the
* Captain goes from well meaning yet narcissistic, to basing his entire personality and life around Player and their "friendship".
* Captain Gordon, Defender of Earth! chapter previews which rival even Gordon for hamminess.
* Captain Gordon, Defender of Earth! is a straight-up parody of American sci-fi B-movie characters. He is also much more popular in America than he is in Japan.
* Captain Grace and Funny Trick have been glued at the hip since elementary school, with Grace always eager to protect Funny Trick and bring her along with her adventures.
* Captain Gravity And the Power of Vrill It was actually pretty awesome.
* Captain Gravity: During a film shoot, Shane Radcliffe, the actor playing the titular hero, keeps messing up his lines, resulting in them having to reshoot the scene 115 times. On the 115th take, he actually manages to get his lines down pat, giving C.F. Avery hope that they can shoot the scene... and then the cable holding Shane up goes slack.
* Captain Gravity during Professor Goethals' narration of the history of the Itza Maya, aliens are shown to have visited them in ancient times. As a result, they were viewed as gods by the Itza Maya, and helped them build their society with the power of Element 115.
* Captain Gravity in a sticky situation before reminiscing about earlier.
* Captain Gravity: The first three issues ended with this statement, while the fourth one ended with "The End?".
* Captain Hammer at one point confusingly threatens "It's curtains for you, Dr. Horrible. Lacy, gently-wafting curtains."
* Captain Hammond uses this respect Stock Phrase to challenge Commodore Pellew when he accuses Buckland, quite correctly, of sending one of his officers to death. Captain Hammond is a bit of a
* Captain Harcourt becomes pregnant from a casual affair with Captain Riley in
* Captain Harlock (1982) shows a bunch of asteroid miners getting killed.
* Captain Harlock also has Emeraldas, who sails the Sea of Stars in a frigate attached to a dirigible.

* Captain Harlock, an advanced defibrillator was used to revive Kei after she took a bullet meant for Captain Harlock.
* Captain Harlock and the Queen of a Thousand Years. Both series were 42 episodes in length. This time, rather then presenting one after the other (and ending up with an 84 episode series), the two shows were heavily edited and intercut with one another, ending up with a final total of 65 episodes.
* Captain Harlock appear to have the back-end of a galley, she can effectively function as a submarine.
* Captain Harlock, at least the Arcadia fires off several shots from the entire forward facing cannon batteries before whipping out the bowie knife and ramming the eldritch abomination in question....
* Captain Harlock being upside-down while Harlock remarks that such a thing wouldn't be possible if they were on the sea.
* Captain Harlock: Bonus points for the hero's ship looking like a mash-up of a submarine, battlecruiser and galleon.
* Captain Harlock carry both gun and sword, but they usually avoid it for two reasons: the guns are ludicrously powerful (Emeraldas once shot down a starfighter with it, and Harlock's the same model) and the sword can also fire laser beams.
* Captain Harlock has First Mate Yattaran, who spends most of his free time assembling and playing with plastic models. He's surprisingly competent whenever it's time to fight.
* Captain Harlock, he gets them to open fire early and then freezes everyone on board.
* Captain Harlock is strong enough to resist immersion, but the enemy ships aren't (two of them explode after trying). The acid is also scrambling all method of detection except for sonar; hence the crew has to stay silent to avoid being located or be attacked by deep charges from the remaining enemy ship.
* Captain Harlock manga. In all such cases, however, the crew of the Yamato is never seen.
* Captain Harlock, Tadashi Daiba comes down with a case of space madness on his first trip in space. He has some strange hallucinations before collapsing.
* Captain Harlock takes its subtitle from the serial numbers of the three bounties.
* Captain Harlock. This includes the character's love of plastic models.
* Captain Harlock to be able to empathize with the crew, hold nonverbal conversations with the Captain, and even move around without a physical pilot. This is also an unusual example of a sapient ship being explicitly male.
* Captain Harlock Tochiro, Harlock's buddy and the ship's builder, transfered his own consciousness into the spacecraft, making it male.
* Captain Harlock was trying to trick them into making them think it had happened so it could possess their bodies.)
* Captain Harlock wears a cape. Oh boy, does he ever. It's often very hard to tell what ratio of man to cape he is, but he's definitely all pirate.
* Captain Harlock, when an enemy commander loses a ship duel to the eponymous captain, he detonates his ship next to Harlock's, charging it magnetically to make enemy lasers miss it.
* Captain Harlock: With no explanation, the 1980 Ziv International English dub gave two episodes from 1978 a serious dub treatment, but not two others. They rename the young protagonist (Tadashi Daiba) to Tommy Hairball and his father becomes Professor Hairball. The voices are cartoony in comparison to the more restrained acting in the other two episodes. The script has farcical, nonsensical dialogue that's more improvisation than translation from the original Japanese version, such as:
* Captain Harlock), you would end up with a Harlock that appears to have been active for decades.
* Captain Hastings in several stories is most definitely The Watson — in fact, he resembles the
* Captain Hawkins, a privateer working for the British, wears a bandanna over one eye as part of her very piratey outfit, she is also an excellent fighter.
* Captain Herbert M. Sobel is portrayed as a petty tyrant whose harsh training

earns him resentment from the men under his command. His tactics did make his soldiers tougher and Sobel was there every step of the way during that training, his total incompetence in field exercises causes a number of his NCOs to flat-out refuse to serve under his command. It causes a big incident within the command structure that has Sobel reassigned and several of the NCOs punished & replaced.
* Captain Herbert Sobel, former commander of E Company, 2nd Battalion, 506 Parachute Infantry Regiment, 101 Airborne. He was incompetent, petty, a
* Captain Hercolani Gaddi. During the initial Italian conquest of Libya, Hercolani Gaddi was placed in control of Sokna and tasked with supplying the troops of colonel Miani, sent to occupy Fezzan, but failed in his task for no apparent reason, resulting in Miani being forced to retreat and not be able to suppress the start of the revolt that nearly kicked the Italians out of Libya. In the following investigation, Hercolani Gaddi was not touched thanks to his friendship with generals Martini and Tassoni
* Captain Hero, despite being an alien superhero with powers such as super strength, flight, and laser vision, is shown to be a very dumb superhero. He once thought that an AIDS charity walk was a race and that his immigrant neighbors from Greece were a college fraternity. Foxxy and Xandir often berate Captain Hero for his stupidity and poor decision making
* Captain Hero is one big one. He is an egotistical superhero who believes himself to be a skilled crime fighter but he is in reality a very stupid superhero. He owns several pictures of himself in his bedroom and when he thought that the AIDS walk was a race, he took steroids in an attempt to win something that was not a game or sport to begin with. He also blames others for his own faults such as when he blamed Wooldoor for the deaths of several people in a cable car crash when in reality, Captain Hero neglected to save them while Wooldoor attempted to warn him about it
* Captain Hero, when fighting his giant, mentally retarded son at a petting zoo, uses a sexual entendre for every animal that the giant throws at him, which includes beavers, a donkey, kittens, and a rooster. He specifically makes it obvious with the rooster, proudly exclaiming, "I'll wrap my hands around this cock and squeeze it until it explodes way too early and rolls over and falls asleep...leaving me unsatisfied and alone." Also an example of
* Captain. He's even called "Humanity's Strongest" by the common folk.
* Captain Hina, orders all the ones who can move to sprint behind her along the beach, declaring that if she reaches the end of the beach and her men aren't within fifty paces of her, she will shackle them together and "make them do squats until their arms fall off". Though Hina gives her men extra incentive since, given she was sunbathing moments prior, she's running in front of them in a thong bikini.
* Captain Hollister is a man in the TV series, and a woman in the tie-in novels.
* Captain Holly Graf from 20 March 2008 until her relief as a non-judicial punishment on 13 January 2010. Her Neidermeyer behavior includes:
* Captain Holt is an hours-long drive where they both sit in complete silence for the entire duration. He was like this as a child as well, flashbacks show him playing with a model train and actually waiting an entire forty-five minutes for the schedule and he once made a macaroni graph of crime statistics during the Hoover Administration.
* Captain Holt is openly gay, however, while under witness protection, he has to pretend to be straight. This results in him acting much like this since he apparently believes that "thick, weighty breasts" are the sole standard of female beauty for straight men.
* Captain Hook's arrival in Neverland as shown in that film does not really fit in with what is known of his background in the 1953 film: it is implied there that he was a pirate captain all along and came as one to Neverland, complete with crew and ship (hence why said crew is so anxious for their captain to give upon his grudge with Peter already and finally go
* Captain Hook's. However, he could damage you by flying into you as he's bouncing around his ship to get the fire out.

* Captain Hook. Unlike other Disney villains, he has an understandable reason to want to destroy his nemesis (who seems to continually make his life miserable for no reason). He's constantly humiliated throughout the movie, seems disrespected by everyone in Never Land (besides Mr. Smee), and isn't feared in the slightest despite being clearly murderous. And there's the fact that the narrative oddly takes a sadistic liking making him the butt of the many comical injuries.
* Captain Horatio Hornblower. At the beginning, the narrator says that Hornblower's ship sailed "under the most secret of sealed orders".
* Captain Horatio Hornblower R.N.: Hornblower has an opportunity to admire the beautiful Lady Barbara when she's sleeping, ill and feverish. He nurses her and takes a vigil.
* Captain. It's explained that since they command a ship and are responsible for the lives of their crew, this is Shepard's legal status under quarian law, allowing them the authority to speak as an advocate for their crew in legal matters.
* Captain "I've melted my skin off and can still live despite my blood bleeding blood from my blood".
* Captain Jack and his body still reforms in a truly gruesome fashion. It's eventually established that nothing will make Jack Deader Than Dead unless he is in fact the Face of Boe, in which case he'll finally die for good in a few billion years. Maybe.
* Captain Jack and his mercenary squad are the same way, but unlike Jimenez, they're actual villains.
* "Captain Jack and the Mermaid (the real tail)" reason why Jack asked his crew to tell his arranged fiancée that he'd gone off with a mermaid.
* Captain Jack Aubrey represents this trope to a T. Jack is still gentlemanly in the novels, but is far more complex. He often philanders (away from Mrs. Aubrey!), dislikes and goes to great lengths to avoid duels. Even though he is of far lesser "rank," his friend Dr. Maturin is much closer to this idea.
* Captain Jack Harkness. After he gets exterminated by the Daleks in the Series 1 finale, Rose uses her temporary god-powers to resurrect him, but she overdoes it, bringing him back
* Captain Jack Harkness bursts onto the scene in Series 3 with his greatcoat swirling around his ankles. When he comes back a season later, he's still got it.
* Captain Jack Harkness can technically die, but only for a short while due to a mixture of this and
* Captain Jack Harkness has a lot, with both his time before he met the Doctor and between
* Captain Jack Harkness. So much so, he apparently once got pregnant. When he was
* Captain Jack Harkness starts out this way, but by his appearances in
* Captain Jack Harkness, who is pansexual, is played by openly gay actor
* Captain Jack Harness wore a huge glowing not-Bluetooth earpiece all the time in Series One of
* Captain Jack "Heartbreak One" Bartlett took the missile away from Kei "Edge" Nagase's tail in the
* Captain Jack Sparrow. Come on — his beard has beads in it! That's pretty awesome.
* Captain Jack Sparrow is either the greatest or worst pirate captain ever. Maybe both. Funny enough, for most of the time, he's not the one in charge, though he'd like to be (and he does manage to get a lot of characters, even enemies to do his bidding).
* Captain Jack Sparrow runs with his arms in the air, flailing them as he moves. This has been dubbed "the lizard run" by fans of the series.
* Captain Jack Sparrow to attend the costume party but is attacked by his wife when she finds he was cheating on her.
* Captain Jack was still babysitting a 4000-pound German bomb that was in the process of exploding.
* Captain Jack, who waits around in Cardiff for a hundred-odd years for the Doctor to come back.
* Captain Jake and the Neverland Pirates, Captain Hook uses a golden hook that

turns everything and everyone he touches to gold. Captain Jake's solution is to claim it using his magic sword, which has its own magic and is therefore immune to the effect, then toss the sucker into a volcano. Upon its destruction, the magic is reversed and everything that was turned to gold changes back, including Smee and Hook's other bumbling lackeys, Sharkey and Bones.
* Captain Jake and the Never Land Pirates, Jake and the others raise the Team Treasure Chest from a vault under the sand via use of a Rube Goldberg Device.
* Captain Janeway is suspected of being one of these by some viewers as she's portrayed as being rather good at science and engineering matters but
* Captain Janeway's "Bun of Steel" from the early seasons was the result of
* Captain Jean-Luc Picard is the quintessential Frenchman. With an English accent. And when he goes home to France, everyone
* Captain John Geary suffers from chronic headaches triggered by the enemy, his own captains, and his love interests. Not necessarily in that order.
* Captain John Granby series is revealed to be this in book 7. Prior to this, there was no real indication as to his preferences.
* Captain John Hart had this happen to him twice in the second season. In
* Captain John Sheridan, borrowing from old tropes is really not surprising.
* Captain John Sheridan is regarded in universe as arguably the greatest tactical mind of his generation, and also shows a keen mind for both military and political strategy, that allows him to play both ambassadors and his enemies like puppets.
* Captain Kaff Tagon and his father, General Karl Tagon. The former has his own mercenary company, which has played a pivotal role in almost every modern (for the comic) conflict. The latter is retired, pushing 70, and still remains in fighting condition, even when reduced to a head in a jar (as seen in Massively Parallel Part V). Karl was pivotal during the Celeschul Terraforming Wars (the same conflict that gained him his rank), to the point that many historians claim that the rebels lost the war the moment their brutal first strike failed to kill him.
* Captain Kangaroo (29 years, 1955-84) If you include the 1997 revival, this comes to 31 years.
* Captain Kangaroo: Defied, as Bob Keeshan sought to create the most welcoming and wholesome early-morning children's show possible. However, his earliest shows had a suit of plate armor assembled around a mannequin as a set piece. This "metal man" proved to be unnerving to his audience, so Keeshan struck the armor from the set, never to be seen again.
* Captain Kangaroo featuring a character named Simon that used the same intro theme.
* Captain Kangaroo skit where the Captain was in a museum and two paintings and a stone bust eat his banana, soda pop, and candy bar when his back is turned.
* Captain Kangaroo, the Captain dreams that he is visited by aliens who need "a glunk full of gleeger" to fuel their spaceship. He tells them he has no idea where to get such a thing, but while they're there he offers them a glass of milk, and wouldn't you know it...
* Captain Kangaroo, the Captain's sidekick, Mr. Green Jeans, is on the telephone. We hear him say, to whoever it was on the phone,
* Captain Kenpachi is one of the strongest people around, but loves fighting so much that he deliberately weakens himself in order to have a more even match. He does this even against an opponent that is trying seriously to kill him. His techniques include an
* Captain Keyes would only be a medium ham, but everything he says lets you know what a great officer he is.
* Captain Kidd becomes a skull mask, matching the skull that serves as his head.
* Captain Kila who managed to leave a message to Geary before her ship blew up.
* Captain Kirk gets glomped by Prrgh, an acquaintance of his, in one of the
* Captain Kirk is pretty bad about this. The most grating example has to be in "
* Captain Kirk mocks Christopher Columbus's inability to reach any place he attempts to sail to, most notably India.
* Captain Kirk's) is framed with Sisko is recounting the events of the episode to agents from the Department of Temporal Investigations.

* Captain Kirk whose hide is too resilient for Kirk to inflict any damage.
* Captain Kirrahe improvises a nuclear bomb from his small ship's fusion reactor to take out Saren's base.
* Captain Klutz acquired his costume this way (along with amnesia). His mask is actually a very tasteless hat.
* Captain Klutz, but seems more disappointed with the sound effect it produces.
* Captain Klutz: Gorgonzola is a giant spider with distinctly Martinesque features — which turned out to be a costume worn by a criminal who was wanted for 'trick-or-treating' without a license.
* Captain Kremmen by Kenny Everett, which not only demolished the fourth wall but the fifth, sixth and seventh! It knew it was a radio serial and of course often started with the Kremmen's bright "Hi Kids! In our last episode ..." Many episodes, more digitals than could be calculated on a digital calculator, included some sort lampshading or wall shattering, including:
* Captain Kremmen radio show. The evil Thargoids raid other planets for their best brains, drain them for their knowledge, then destroy the planet. There's also the Sun-Suckers who drain heat from our sun as their own sun has died, leaving their world a frozen wasteland.
* Captain Kremmen radio spoof, when Kremmen first encounters the Thargoids.
* Captain Kronos-Vampire Hunter is introduced in the pillory, a punishment for dancing on a Sunday. She does not appear to have had a good time of it.
* Captain Kronos-Vampire Hunter, Kronos himself and Lord Hagen Durward (whose tombstone proclaims him the finest swordsman of his day). Unsurprisingly, the film ends with a duel between the two.
* Captain Kronos-Vampire Hunter, Kronos's new girlfriend Carla asks him why he's so rough in bed (the only thing we see is him kissing her and biting her lip hard enough to draw blood), but with a tone of casual curiosity rather than any unhappiness about it.
* Captain Kronos-Vampire Hunter, Kronos uses a sabre in his right hand and a katana in his left in order to fight off an angry mob.
* Captain Kuro faked his death and had intended to start a new life as Kaya's servant, but eventually grew tired of being a servant and tried to reclaim his riches.
* Captain Kuro has this reaction in regards to his crew. It's not so much that the crew is stupid as it is that he's the smartest man in the East Blue next to Benn Beckman of the Red-Haired Pirates, and looks down on his crew as thugs that are useless without his plans. This is part of why
* Captain Landon was in charge of internal affairs for the Dom Atlantis police, which led him to investigate their sabotaged weapons,
* Captain, later Major, Tom Neville of the Monroe Republic is the first militia threat the protagonists go up against ("
* Captain (later Moff) Tarkin argued that the Jedi's role as peacekeepers made them unsuited for combat and Anakin agrees, stating that the Jedi Code often prevents them from doing whatever it takes to secure victory.
* Captain Lewis' half-lucid post-mortem mind, and a middle-aged version of Lewis observes Druuna having sex with another man on the same beach.
* Captain Lewis is in reality a disembodied head connected to the ship's systems, but he maintains a psychic link to Druuna. At one point he projects an image of his handsome young self to her on a beach he used to visit, where they proceed to make love.
* Captain Lochley's first day as station commander involves a plot to assassinate newly-inaugurated President Sheridan (making this a two-fer, given that it's Sheridan's first day in that job as well, though he's hardly new to the insanity that is life on Babylon 5).
* Captain Lorca by asking if he wants to be "Alongside the Wright brothers, Elon Musk, Zefram Cochrane?".
* Captain Lou Albano, and watching him work a 60s style match in the 80s was incredibly bizarre. He only stuck around for a month or two.
* Captain Lou Albano, even though they continued to be portrayed by white athletes

who could "pass" for Indian or (in the case of Tatanka) men of mixed race who looked more white than anything else.
* Captain love interest. Even the films' writers fumbled mid-sentence, describing their relationship as a "love story" before quickly calling them brothers. It got to the point that in 2016 a popular hashtag called #GiveCaptainAmericaABoyfriend was launched, in part due to how differently their relationship came off to viewers than the writers expected.
* Captain Lovelace spends a lot of time in this role. Despite being an obvious threat, her motivations are sympathetic, and the clashes between her and the rest of the crew often end with it unclear who's actually in the right.
* Captain Lysander of the Imperial Fists. A pretty good close combat character, but that's not why you take him. Instead, you take him for his ability of "Bolter Drill", which allows his fellow Space marines re-roll missed Bolter shots. This applies to ANY bolter type weapon, including the Heavy Bolter, and Bolt Pistol. Boring as hell, but damn effective at wiping a field of enemy infantry quickly when you suddenly have a lot more chances to wound the enemy.
* Captain/Major/Lt. Colonel/Colonel/General Samantha "Sam" Carter, from
* Captain Mal sitting naked on a rock in the middle of a desert, then we go back to see how it happened.
* Captain Mal wants their medic-on-board Simon to take his crazy sister River for a walk because he needs to do some clandestine business and "she makes things not be smooth". Simon is reluctant to go as they are fugitives and he doesn't want to get caught.
* Captain Man, in "Captain Drex", is sent back 101 million years and in the next episode, Henry helps to free him from the amber Captain Man "froze" himself into. Again, aging was not a problem.
* Captain Martin Crieff is not terribly articulate at the best of times, but introduce him to a female first officer and, well, see for yourself...
* Captain Martin Walker, like Konrad before him, is sure he can be the hero and help, so he presses on despite having the chance to leave, report the situation to his superiors and get backup. Everything he does only makes things worse, so much so that
* Captain Marvel (2019). According to the coroner, the body is not composed of carbon.
* Captain Marvel (2019): After defeating Fury in hand-to-hand combat, Talos takes a moment to gloat about his victory and comment about Keller's glasses. As he begins brushing off his hands, he's hit by a photon blast from Carol, who had just arrived on the scene.
* Captain Marvel (2019) appears as a bystander on the train station who walks past Carol while giving her a very confused look.
* Captain Marvel (2019), Carol’s attitude isn’t too hard to understand.
* Captain Marvel (2019): Carol Danvers got her powers from blowing up a lightspeed drive powered by the Space Stone. When she fully accesses her power after taking off the inhibitor the Kree placed her, and she enters Binary Mode, her eyes and her whole body start glowing golden.
* Captain Marvel (2019) "Celebrity Skin". While at the surface, it fits Carol Danvers's awesomeness by being a rocking song sung by a woman, the lyrics are not as triumphant, being about the disillusion from fame (e.g. "Oh, look at my face \ My name is Might-Have-Been \ My name is Never Was \ My name's forgotten" and "Wilted and faded \ Somewhere in Hollywood").
* Captain Marvel (2019) collaborated with nearly a dozen Air Force pilots to teach the cast on flight and military maneuvers.
* Captain Marvel (2019), compared to the normal superhero movie audience statistic of being about 40% female.
* Captain Marvel (2019): Coulson accidentally blows the cover of the Skrull who's impersonating him by calling Fury to find out where he and all the other SHIELD agents (who took off in pursuit of Carol and another Skrull from Talos's landing party), while Fury's driving with the imposter.
* Captain Marvel (2019) did an interview in which he said that Carol can time

travel. The week the movie came out that March, he finally revealed that it was something he just made up because he was tired of people asking him for spoilers.
* Captain Marvel (2019) explicitly shows a universal translator used by the title character upon arriving on Earth.
* Captain Marvel (2019) first enters orbit, we get a few seconds of everybody floating until Carol turns the gravity on. All the alien ships seem to have it in all the time.
* Captain Marvel (2019) in orbit, with a brief dogfight also taking place in Earth's atmosphere.
* Captain Marvel (2019) instead, forcing him to give her his keys and jacket if he wants her to let go.
* Captain Marvel (2019) is allergic to cats, so scenes where she appeared with Goose required CGI, puppets, and/or editing tricks.
* Captain Marvel (2019) is also redone in his image, with his past cameos and promotional appearances taking the place of the heroes.
* Captain Marvel (2019): Made in 2019 and set in 1995, but flashbacks to the eponymous protagonist's childhood set somewhere in this decade.
* Captain Marvel (2019): Made in 2019 and set in 1995, but flashbacks to the eponymous protagonist's early teenage years set in the early parts of this decade.
* Captain Marvel (2019)), makes unfair assumptions about alien races, solves most of her problems but by punching things and is way too confident in her power for her own good.
* Captain Marvel (2019), making her introduction to the Avengers very late and outright pointless.
* Captain Marvel (2019): Maria Rambeau threatens to do this to a Skrull.
* Captain Marvel (2019) Monica calls on her mother to help Carol in the final battle, asking Maria to consider what sort of example she'd be setting by staying behind and watching TV.
* Captain Marvel (2019), Nick Fury seems only moderately annoyed at Goose scratching his eye, apparently because he (incorrectly) assumes it will heal.
* Captain Marvel (2019) one-liner with the canonically 16-year-old Spider-Man.
* Captain Marvel (2019) reveals that Carol Danvers had been active since the '90s, but she has been busy helping the Skrulls find a new home and then having other adventures in space.
* Captain Marvel (2019), reveals that first contact with an alien civilization by modern-day humanity was actually with the warring Kree and the Skrulls in the 1990s. Like with the Asgardians, however, this incident was largely unnoticed and covered up, as only a few S.H.I.E.L.D. agents bore witness to the details.
* Captain Marvel (2019) right as the door is closing on his escape spaceship, but he ultimately survives his wounds.
* Captain Marvel (2019)'s comments about the lack of diversity in film criticism, as well as the feminist themes in the film's trailers, which led them to assume that the film was going to be a feminist (and by "feminist" they actually meant "anti-male") propaganda. This, of course, only served to draw further attention to the film, which ended up clearing a billion dollars at the box office.
* Captain Marvel (2019), set later in the timeline, they don't have to travel very far from Earth to reach a jump point.
* Captain Marvel (2019) speaks with Ben Mendelson's natural Aussie accent, while the other Skrulls don't sound especially Australian.
* Captain Marvel (2019), this is implied, when, after an autopsy is performed on a Skrull, Fury lifts the sheet covering the lower half of the body to glance at what lies down below, and he and Director Keller look at each other. Fury then walks away without a word.
* Captain Marvel (2019), Yon-Rogg at first succeeds in convincing his former Starforce team mate Carol Danvers/Vers that the Skrulls are the enemy. When she befriends the Skrulls anyways, Yon-Rogg finds out and confronts her about her decision to become an ally to the Skrulls. He also isn't happy to see that she's not wearing her green, black, and silver Starforce outfit and is now wearing a red, blue, and gold outfit.

* Captain Marvel a hug and an eyelash-batting. Suddenly, sweet-as-pie Mary blows off.
* Captain Marvel a.k.a. SHAZAM's enemy Dr Sivana is another early textbook example of this. He's the guy in the picture above. When he's in teams, he finds himself here.
* Captain Marvel and a face only a mother could love: evil. He has four kids. Georgia is her father, only female and with hair: evil. Thaddeus is his dad mark 2: evil. Magnificus apparently comes from a completely different family, with golden hair and absolutely no deformities: good. Beautia, winner of the All-Time Prize for Least Subtle Name, is absolutely stunning: good. Captain Marvel himself: physically Superman in red, and the hero.
* Captain Marvel) and doesn't have much outside of being a strong powerful woman.
* Captain Marvel, and subsequently the most popular character in comic books. A lawsuit from DC eventually ended his reign, but the incident proved that children, likeso many demographics, react best to people like themselves.
* Captain Marvel, a new member of the League. About halfway through the scene, one of the heroes suddenly realizes something:
* Captain Marvel, as their Captain Marvel and Mary Marvel forms don't age at all.
* Captain Marvel: At the beginning of the movie, the Kree Starforce has Vers and Minn-Erva.
* Captain Marvel at the expense of the FF and the X-Men as the decade went on, due to the aforementioned lack of movie rights).
* Captain Marvel (Billy is a little boy who's growing up, but the adult Captain Marvel he becomes will never grow a day older). This was most memorable in Black Adam's first appearance in the Golden Age; Black Adam was the Wizard's previous champion in Egypt, but his poor behavior caused Shazam to just teleport him to a distant planet countless lightyears away from Earth as punishment. Being able to fly and functionally immortal, Black Adam just spends several eons flying back. When tricked by Billy into saying the magic word and going back to his civilian identity, he crumbles into dust.
* Captain Marvel, but the assailant actually turns out to be the Controller, an old enemy of Iron Man.
* Captain Marvel but they've never formed an actual team, except briefly.
* Captain Marvel. Carol Danvers, unknowingly indoctrinated by the Kree, is told her energy powers have to be tempered by restraining her emotions, lest she lose control. Once she realizes this is just a lie to keep her their prisoner, Carol lets her energy run completely loose, becoming magnitudes more powerful and still in control.
* Captain Marvel. DC Comics sued Fawcett over Captain Marvel being too similar to the Man of Steel, and eventually got the book canceled. Comic writers have since explored this situation decades later by having the two of them fight one another in the panels.
* Captain Marvel did not. The two broke up when other members learned about their relationship and got angry over a (seemingly) adult man dating someone in their early teens. Captain Marvel couldn't reveal his true age, so he left Stargirl.
* Captain Marvel draws his powers from the Egyptian pantheon. Captain Marvel himself gets his powers from a Hebrew king, two Greek heroes, one titan, a Greek god, and a Roman god.
* Captain Marvel, especially during the Golden Age. With having no discernible limits on his strength, speed, and invincibility, and only a handful of short-lived opponents able to challenge him in a fight, most stories were about trying to defeat him psychologically or contriving to trap him before he could change to his super-powered form.
* Captain Marvel featured this. It starts with Mr. Tawny (the talking tiger) joining the Detroit Tigers, and ends with a game between the Tigers (including Mr. Tawny and Captain Marvel, temporarily on the team) playing against Mr. Mind and a team of aliens with enhanced abilities, for control of the world.
* Captain Marvel focused on plot-information instead focus on sexism she faced from her childhood up to serving in the Air Force.

* Captain Marvel has long legs and while she prefers punching, she's capable of using them. They were emphasized in her original Ms. Marvel leotard costume, and she wears a skintight outfit as Captain Marvel.
* Captain Marvel. He got a job at a zoological museum and his stories dealt with everyday problems while the Marvels were off saving the universe.
* Captain Marvel him with the highest honour an opponent of the Skrull could have.
* Captain Marvel. His origin has varied over the years, but he's generally pretty cheerful about being a humanoid tiger living among humans.
* Captain Marvel: in her first fight "No fair... I can still-"... and then 18 crushes her head underfoot.
* Captain Marvel is canonically faster than Superman, having been blessed with the speed of Mercury, he is one of few beings who can match The Flash in speed.
* Captain Marvel is constantly telling Carol to keep her emotions in check and while she does respect him, she spends most of the movie acting on the sense of justice, excitement, temper and humor that makes her who she really is.
* Captain Marvel is, point-for-point, an exact match in all abilities for Superman (minus not having Heat Vision and Freezing Breath), but completely lacks Supe's weaknesses (Kryptonite and Magic). So, while you have a case of having TWO Marios of the DCU, Superman still comes out as the leader of the DCU because of one very important quality: Superman has the charisma of a leader and the willingness to take on that burden.
* Captain Marvel, Jackson revealed that he had in fact been lying about this.
* Captain Marvel Junior with the addition of Pedro (green), Eugene (silver/gray) and Darla (purple).
* Captain Mar-Vell and Elysius, who confusingly was an Eternal artificially created by a super-powerful computer named ISSAC. Their father is an alien, while their mother is a member of a human subspecies. Oh, and their grandpa is a computer. Similarly, Suzy Sherman, aka Ultra Girl, is the daughter of a Kree father and a human mother.
* Captain Mar-Vell as his pawn. Unfortunately, fear makes Drax cower in the corner, doubt makes him stand around baffled, and hate makes him attack whatever's in his path (such as Psycho-Man). Cue Psycho-Man musing that he's got to add some new emotions to his device.
* Captain Marvel later, everyone in the room said that they were now permanently mentally scarred.
* Captain Mar-Vell "Captain Marvel". (Despite the fact that it was the title of his own comic.)
* Captain Mar-Vell characters that take on the title of 'Marvel' in their superhero title at some point wind up changing their alias multiple times.
* Captain Mar-Vell comic, starring Genis-Vell, featured a very clever Kree fellow named "Plaht," whose "device" cleared away several plot inconveniences.
* Captain Mar-Vell died from cancer, which while the result of a mildly fantastic carcinogenic phenomenon, was treated very realistically as in the mundane world.
* Captain Mar-Vell, generates and turns into light as her main power. She can become any light on the magnetic spectrum, including that other humans cannot see.
* Captain Mar-Vell. He was a superhero from the Kree race who loved Earth enough to fight against his own people to protect it.
* Captain Mar-Vell him, along with all the other heroes by his side. He died after losing a fight to the one foe he simply couldn't defeat - cancer.
* Captain Mar-Vell once had to fight a supervillain who had stolen a container of a deadly nerve gas called Compound 13 and received a dangerous exposure while sealing the leaking container. Although he received an antidote to save his life, the gas also to be carcinogenic and Mar-Vell died from cancer resulting from that exposure.
* Captain Mar-Vell, revealed to be the result of the battle between him and Nitro in the latter's debut.
* Captain Mar-Vell run, when Entropy first appears. He appears off-panel, speaking to Captain Marvel, when the reader turns the page, it's a full page advertisement for Stuart Little.
* Captain Mar-Vell's Phyla-Vell a.k.a. Quasar, who is half Titanian (Titanese?) and

half Kree.
* Captain Mar-Vell's. Though the biggest ordeal is made of his deathbed.
* Captain Mar-Vell: The Supreme Intelligence of the Kree has committed monstrous atrocities against his own people in order to spur their evolutionary development.
* Captain Marvel once fought a character that could cast any spell - once. He also had one, and only one, weakness. Their fights consisted of the two of them flipping through notebooks that listed everything they had tried so far, trying to come up with strategies.
* Captain Marvelous and Gai ram the Zangyack flagship Gigant Horse with the Free Joker, the personal ship of deceased Rival.
* Captain Marvel prior to his death in April 2018 in an accidental plane crash.
* Captain Marvel/Shazam got a lot of this treatment, having slipped into something of a
* Captain Marvel/Shazam!) still use the Beck designs, even if the other characters are less cartoonish looking.
* Captain Marvel, she sees nothing that indicates she's responsible for the crime. Acting against Hulkling's order, Carol hides Lauri-ell on Earth and investigates who the true perpetrator is.
* Captain Marvel shows a scene of Captain Marvel violently attacking an old woman. To people not familiar with the backstory it's quite shocking, but she's actually fighting an alien shapeshifter.
* Captain Marvel's. More modern interpretations, when they include him at all, instead present him as some sort of magical spirit or eldritch entity who just chooses to take the form of a tiger.
* Captain Marvel, so she refuses. Ironically, she ends up essentially fighting a duel against another woman for his hand (she enters the duel to protect her friend). She wins, of course, and now that she is essentially engaged to the prince, she uses her new authority to give him the right to marry whomever he wants and recommends that all men be allowed to do the same.
* Captain Marvel's suit is the original suit (the least known one, white and green Kree military uniform) with
* Captain Marvel stories, Mar-Vell posed as Walter Lawson, a military scientist who had accidentally been killed by the treacherous Yon-Rogg. The deception was aided by the fact that the real Lawson was a recluse, meaning that few people had ever met him in person or seen his face.
* Captain Marvel stories of the 1940s also had Hitler as an almost childlike villain, including one where he is defeated temporarily when exposed to an "honesty ray" that forces him to tell the truth for 24 hours. Or Reltih, the Reverse Hitler, who chose to try and conquer his own world by marrying into the United Kingdom's Royal Family. You get the idea.
* Captain Marvel's was a scheme to take over all the world's radio stations to silence them forever.
* Captain Marvel teaming up with the Avengers to free Attilan from Maximus the Mad.
* Captain Marvel that's displaying her twenty-odd years of missing memories out of order and out of context, and they're all just as baffled as the audience.
* Captain Marvel the Megaton Punch. He only used it as a last resort on enemies that he thought could survive it.
* Captain Marvel. (The tower was indestructible, and the openings and passages are really small because the villains were tiny aliens). After going through hell, when he finally reaches the top... Mary was in the next tower over all along.
* Captain Marvel, they begin debating whether to boot him out of the Justice League. Batman says he knew all along, and it has no impact.
* Captain Marvel to Mar-Vell, so it looks like things have worked out.
* Captain Marvel. Unfortunately, the courts agreed with DC that it was a little too similar (which interestingly ended up with them in the same universe).
* Captain Marvel up with grammar-correction jokes. These are nods to the character's Bronze Age backstory, when Carol Danvers was a bestselling author and a magazine editor.
* Captain Marvel, was thrown into the street by his uncle after his parents died,

said uncle keeping Billy's inheritance for himself. At least his sister Mary ended up in an orphanage. After Billy became Captain Marvel, he managed to get around the subject by simply transforming into the Captain, putting on a fancy suit, and pretending to be his own uncle. It doesn't hurt that in his Captain Marvel form, Billy resembles his dad, so it's easy to pass off.
* Captain Marvel: When a Kree scans Fury, the scanner says that his threat level is "low-to-none", and Fury reacts in disbelief. Minn-Erva doesn't seem to think very highly of Earth's civilization, either, if her pithy comment on it is anything to go by.
* Captain Marvel, which features Marvel's first big screen titular female superhero, was released on March 8, 2019, which is International Women's Day.
* Captain Marvel, which is odd behaviour for a superhero of any time, let alone that time. Unlike his comic counterpart, this version of Captain Marvel was equal parts pulp adventurer and superhero, and as a result, was not afraid to kill his opponents.
* Captain Marvel, who gets the back of her head caved in by 18's boot as the coup de grace
* Captain Marvel would sometimes announce or reference which of his powers he was using at a time, whether it was using the Power of Zeus and Speed of Mercury to drill into the ground, or cite the Wisdom of Solomon as the source of his good advice.
* Captain Marvel yelling and shaking his fist at a punk who's stolen his outfit. See page image.
* Captain McCallister has held a lot of nautical jobs (despite not being a licensed captain), as well as owning and operating an all-you-can-eat seafood restaurant (the latter of which has been used more often in later episodes).
* Captain Mercer, forcing him to rely on his wits against enemies with greater brute strength.
* Captain Michael Oversteegen, of the same series, is a subversion. He is deliberately given just about
* Captain Michel Bacos of Air France flight 139. When it was hijacked by terrorists in June of 1976, they freed all non-Jewish passengers. Captain Bacos emphatically stated that
* Captain Mom not less combat-capable than others. Kon lampshades the trope when he refers to her as "okaasan", aka "mom".
* Captain Montgomery is good at subverting this. He later reveals to Beckett that he could have gotten rid of Castle at any time ("The mayor doesn't run this place, I do."), but only kept him around because he thought it would be good for her. Also, when a suspect threatens to call the police commissioner, he replies "Tell him I said hi.
* Captain Morgane and the Golden Turtle actively dislikes this type of person, having developed a "complete aversion to those with more beauty than brains". Naturally, there's a point in the plot where she needs to get answers out of such a character.
* Captain Morgane and the Golden Turtle Bajari that any "weird feelings" Bajari gets when thinking about Tana are an illness caused by Tana putting a curse on him. Morgane sets him right.
* Captain Morgane and the Golden Turtle, it turns out that Anita's missing outlaw husband and the mysterious, scarred stranger sitting in her bar are one and the same. He didn't want to reveal himself because firstly, he's still wanted by the law; and secondly, he thought Anita would reject him because of his disfigurement.
* Captain Morgane and the Golden Turtle Morgane is being set up for this, since she gets a nice sword and a pistol quite early in the name. However, the trope is subverted by the fact that she never once uses them for their intended purpose. The sword is used to cut shrubbery and fabric, while the pistol spends most of its time without gunpowder and ammunition, being used occasionally as a hammer. Then, finally, some gunpowder is acquired and the pistol is fired... only once, to scare some seagulls.
* Captain Morgane and the Golden Turtle, much of the plot consists of following the

trail of Buckleberry Tanner, a famous explorer. He was more interested in discovery than profiting from it, giving up a comfortable post as governor to go out exploring again.
* Captain Morgane and the Golden Turtle Sonia, when she says she's "developing a real hatred for idiotic blondes", also references her own future interaction with Sunny.
* Captain Morgane and the Golden Turtle that the reason he gets anxious even thinking about her is that she has put a curse on him. Morgane sets him right on that issue.
* Captain Morgane and the Golden Turtle, the deliberately-mysterious stranger on Crab Island claims this part of the reason not to show his face.
* Captain Morgane and the Golden Turtle, the first chapter features the titular Morgane as a child. The chores her mother gets her to do serve to introduce the basic game mechanics.
* Captain Morgan Pose), or attentive character puts one foot on a raised object, leans forward, and puts one hand on their knee.
* Captain Morgan seems to think that the fact he struggled to earn his rank gives him the right to kill anyone who questions his orders or opposes his methods.
* Captain Morgan's Rum: "Got a little Captain in ya?" (This is pretty disturbing when taken out of context.)
* Captain Moroni outmaneouvres, overpowers, and surrounds an invading Lamanite army, then demands that they surrender their weapons and vow never to attack again.
* Captain Moroni was the general of the Nephite armies several hundred years later. He would end up in the middle of battle from time to time and acquit himself quite well on the field, but some of his greatest victories in the war against the Lamanites came as a direct result of
* Captain Napolipolia and Agent D are two members of the alien Lepton Kingdom who launch an
* Captain Nathaniel Adam of the United States Air Force, better known as
* Captain Nemo He also plays the organ in a somewhat unusual manner, using only the black keys (which today would be the white keys).
* Captain Nemo makes him compatible with Verne's original 'Polish rebel' idea.
* Captain Nezumi, a corrupt Marine only present for the Arlong arc, is the reason that Luffy received a bounty in the first place. Without him it may have taken longer to earn, if not just having been a far less eyecatching thirty-million at the start.
* Captain N fan, notable for his "Season 4" (through 8) fanfic continuation of the original cartoon series.
* Captain N however, are total failures whose antics provide most of the show's slapstick humour. Mother Brain both verbally and physically abuses the pair constantly.
* Captain Nice: A mild-mannered mama's boy who discovers a secret formula that, when taken, transformed him in an explosive burst of smoke into superhero Captain Nice.
* Captain Nice was an attempt to cash in on the camp superhero craze of the late 60s. Carter Nash was a mild-mannered mama's boy who discovered a secret formula that, when taken, transformed him in an explosive burst of smoke into Captain Nice. His superpowers included superhuman strength, invulnerability and the ability to fly, but he was nervous about doing the latter as he was afraid of heights, and his natural clumsiness was increased exponentially whenever he drank his super serum.
* Captain N is attracted to Kevin because of his strength as a fighter, he'd make an ideal partner for her space hunting.
* Captain Nixon is an interesting subversion. He never had to fire his gun in combat. And as a rich, Harvard educated intelligence officer, he could easily have spent most of the war back at command. Instead, he mainly stayed close to the front with Winters, even sleeping in a foxhole in Bastogne and refusing what was basically a "get out of war free" card by passing up the opportunity to return to the states to promote enlistment. He ended up being the one of the very few members of 101st Airborne to get three Jump Stars.

* Captain N moment for Samus Aran. After she and Lana are arrested on false charges and throw in prison, Samus plots a breakout and figures that she could leave Lana there and win over Kevin easily. Instead, she saves Lana, figuring that winning Kevin over in such a way would be too easy and would rather earn his heart fairly.
* Captain Novolin and his aliens disguised as sugary junk food via one of these special reports... All while running on a treadmill for some reason.
* Captain N: The Game Master and he works alongside some of his favorite game legends, like Kid Icarus, Simon Belmont, Link, Bayou Billy, and Mega Man.
* Captain N: The Game Master and totally fits this trope. For the record, she is actually from California.
* Captain N: The Game Master depends entirely on her minions for survival.
* Captain N: The Game Master episode came around, the design was re-used for the character Julio.
* Captain N: The Game Master from the original series, a resurrected Ganon is defeated for good and Link finally gets the kiss from Zelda he was after for the entire original series.
* Captain N: The Game Master had a scene with a deteriorating rope bridge. Fortunately there was a stalactite hanging just above the unstable post on the far end, which, when blasted loose by Kevin, impaled the rope and pinned it safely to the cliff.
* Captain N: The Game Master. Her over-the-top personality and her voice make her impossible to take seriously.
* Captain N: The Game Master indicated that the various game worlds of Videoland were connected by a network of Warp Zones.
* Captain N: The Game Master. In the first episode the Ultimate Warp Zone summons perfectly average Kevin Keene to save Videoland using his skill at videogames.
* Captain N: The Game Master in the real world, the Ultimate Warp Zone activates in Videoland and sucks him and his dog into the TV.
* Captain N: The Game Master, in which Kevin, and his dog Duke, played by live-action actors in a physical room, are sucked into Videoland by the Ultimate Warp Zone where they become cartoons.
* Captain N: The Game Master is a place instead of an energy-sucking jellyfish creature) possibly just for the sake of this trope.
* Captain N: The Game Master is basically a universe for each video game plus the Real World.
* Captain N: The Game Master King Hippo and Eggplant Wizard kidnap Princess Lana by rolling her into a rug.
* Captain N: The Game Master. Normally, he would also be there to ensure nobody's character got derailed, but, well...
* Captain N: The Game Master, one of Kevin's abilities with the Power Pad device is hitting the pause button, which allows him to pause the world around them and escape from dangerous situations. However, since the Power Pad only has a limited amount of energy and all of his abilities run on it, he has to use it sparingly.
* Captain N: The Game Master pink octopus who wore a pink dress. She fell in love with Simon Belmont at first sight, even though he wasn't interested. The cartoon ended with her chasing him so she could make love to her 'dream boat', all while leaning forward and exposing the top of her ample cleavage.
* Captain N: The Game Master Princess Lana immediately wishes that "no one had made any wishes", returning things to normal for the moment so they can get on with the plot.
* Captain N: The Game Master. Rather than continue helping them, Alucard chooses to betray his friends during the raid on Dracula's Castle.
* Captain N: The Game Master sees Mother Brain, Eggplant, Wizard, and King Hippo get transformed into Moe, Larry, and Curly respectively.
* Captain N: The Game Master sneak off. King Hippo then recognises one of the toothbrushes as his own and brushes his teeth with it.
* Captain N: The Game Master: Some of the worlds in had unusual shapes, some inspired by the games they were based on (such as Mount Icarus being mountains and plains suspended above the clouds and Faxanadu being a floating continent dominated

by its World Tree) and others with fuzzier inspirations (such as Hyrule being an Earth-like sphere enclosed in some sort of crown-mountain-floating rock thing).
* Captain N: The Game Master takes over in one episode and declares herself Judge, Jury, and Executioner of Videoland as she puts the heroes on trial.
* Captain N: The Game Master: The pilot. After saving the day, Kevin is offered the choice to return to Earth. He chooses to remain in Videoland, where he is a superhero hanging out with a hot princess and his favorite videogame characters, rather than go back to Earth, where he is a normal boy having to deal with chores, school, and a nagging mother.
* Captain N: The Game Master to the world where video games are real and makes an effective fighting force out of its bickering local heroes thanks to his encyclopedic knowledge of the games they and their enemies are from.
* Captain N: The Game Master video games. At least, that was the intention...
* Captain N: The Game Master was built around this trope. A gamer from Earth is brought to another dimension where video games are real, because only someone who knows how to win every game imaginable can save the day against villains taking over game after game.
* Captain N: The Game Master was voiced by Levi Stubbs, who used the exact same voice he used for Audrey II. It kinda sounded like a woman, albeit a very gravelly one.
* Captain N: The Game Master, with Simon deploying a golf club and then a bazooka, among other things. Possibly a reference to and a parody of Simon's frequently extensive in-game inventory.
* Captain N, whose horns and tube resemble a jaw with a grimacing expression.
* Captain Oblivious: Completely unaware of the outside world in which things to them are different from others.
* Captain Oblivious: Someone never notices something they should be aware of.
* Captain Obvious: A character who has a tendency to point out the obvious.
* Captain Obvious: A character who has the tendency to point out the obvious.
* Captain Obvious Aesop: A lesson that was incredibly obvious that it didn't even have to be pointed out.
* Captain Obvious Aesop: An Aesop that should be obvious to everyone (e.g. "mass murder is bad") is treated as revolutionary and insightful by other characters.
* Captain Obvious Aesop because it's something everyone should already know.
* Captain Obvious Aesop: The moral of the story is something the audience already knows.
* Captain Obvious Aesop: You fail to teach a lesson people don't already know.
* Captain Obvious combined with an impersonation both vocal and using body language to create comedy.
* Captain Obvious; if you don't make it clear there's no way to tell if you're parodying a position with a more extreme version or just actually more extreme. That being said, many trolls will respond with literal-minded replies just to rile people up.
* Captain Obvious Reveal: Revealing a secret long after the audience has already figured it out.
* Captain of the Flying Dutchman, Van Der Decken IX, who is a bullhead shark. Not as fearsome as a great white, but he seems to be the main villain of this arc.
* Captain of the Forest is a criminal mastermind cat who intends to destroy the forest.
* Captain OPower to his female crewmate Pilot before the big trench run against the Icarus Platform.
* Captain orders me, I will tear your throat out. Literally and gladly."
* Captain Paolo (the planned captain of the White Base) is carted off for care in both the anime and the film. However, the later scene revealing he died of his wounds was cut from the movie.
* Captain Patriotic: A superhero who serves the ideals of their nation.
* Captain Patriotic, he wears a flag-printed costume as a way of mocking the American way; he doesn't actually care about American values and only became a masked vigilante as an outlet to vent his violent urges.

* Captain Patriotic of their country, over and above the geography (or government).
* Captain Patriotic put in charge of various national superteams dropped into comics to represent other nations and their interests. Namely, Russia's Red Guardian (The Seventh one) of the Winter Guard, and China's The Star of the Dynasty.
* Captain Pellew has a tall and well-built figure (appropriate for a naval captain), dark eyes and dark hair, his complexion is tanned and slightly weather-beaten (he spends his life aboard a ship after all), and his facial features are very fine. In addition, he's as
* Captain Pellew takes a special interest in Hornblower because he sees a promising officer in him. It's with the interesting twist that he sometimes
* Captain Phasma's shiny silver armour, made from chromium salvaged from a Naboo starship once owned by Emperor Palpatine and worn with a red-fringed black cape, as seen in
* Captain Phillipa Georgiou, who is revealed to be from Malaysia, just like her actress
* Captain Phillips: In the first attempt by the pirates to board the ship, the titular captain uses the radio and talks to himself to pretend that they're contacting the Coast Guard to scare off the pirates (who have a radio that can hear what he and the supposed Coast Guard are saying).
* Captain Phillips: The pirates see Phillips' offer of $30,000.00 (all the cash in the ship's safe) as this. In real life, Phillips didn't even offer the cash until much later because he knew they'd laugh at such a measly sum.
* Captain Phillips was portrayed by an actual navy medic (Petty Officer Corpsman 2nd Class Danielle Albert), who was advised to just treat him as she would a real-life patient.
* Captain Phil of the Cornelia Marie suffers a pulmonary embolism one season, then a massive stroke and finally dies of a second embolism. Sig reacts to the news by throwing his pack of cigarettes across the wheelhouse.
* Captain Picard, and then chokes and puts it down. He may have become more accustomed to smoking, though, because later on in the series he smokes as Hill again, with no trouble.
* Captain Picard himself is also an inversion: he's been offered promotion to Admiral rank many times, and is more than qualified to hold such a position, but continually declines as he prefers to be out among the stars rather than behind a desk. He's
* Captain Picard is actually an extremely good pilot as well, although it's shown more subtly. He's been known to take the helm himself in situations where extremely precise maneuvering is needed to get the ship out of danger ("Booby Trap", "In Theory"), talked an inexperienced pilot through a difficult maneuver in order to avoid a crash ("Coming of Age"), and most notably developed the Picard Maneuver ("The Battle") which exploits the fact that a ship traveling at FTL velocities is invisible.
* Captain Picard is similarly put on trial by Q in the the final episode of TNG. (The pilot had all of
* Captain Picard likes to roleplay on the holodeck as a private eye named Dixon Hill.
* Captain Picard remembers the Borg Queen when she's first introduced in
* Captain Pike's distant relationship with his father Admiral Josh Pike is not explored after the two-part story "The Fallen" but there were plans to do so in a flashback storyline involving the Federation's first contact with the Klingons.
* Captain Planet, and attacking people while shouting, "CAPTAIN PLANET!". Cut to Hal Sparks announcing that "CAPTAIN PLANET!" would be the biggest catchphrase of the new millennium: "My friends say it all the time and then we kick each other in the nuts."
* Captain Planet and informed Gaia of this all, the others would have started a nuclear war.
* Captain Planet and the Planeteers about the environment aimed mostly at elementary schoolers. Almost all of the main characters are in their late teens.

* Captain Planet and the Planeteers acknowledged David Rappaport (the original voice of Dr. Blight's computer assistant MAL), when the show premiered several months after he passed away.
* Captain Planet and the Planeteers a heart he could connect to; thus, it could not be used on inanimate objects, plants or heartless villains. Wheeler's Ring of Fire was the only exception: he could basically create fire from nothing, and the only limit imposed was one occasion when there was not enough oxygen for fire to burn.
* Captain Planet and the Planeteers; also used (mostly as a derogatory term) to refer to anyone who does their part to help conserve and protect the environment)
* Captain Planet and the Planeteers, an American voice actress. She can be identified by misplaced inflections and occasionally misusing a phrase.
* Captain Planet and the Planeteers, and much more practical than say, his fellow Planteer Wheeler's ability to accidentally burn down a forest if he's not careful (to say nothing of having a power that can never be used directly against the enemy since a children's cartoon could never get away with setting people on fire).
* Captain Planet and the Planeteers, and she would continue to age until she literally becomes dust. She gets restored later.
* Captain Planet and the Planeteers": As part of his pig motif, Hoggish Greedly has the stereotypical "pig snort" laugh. His son Junior also has it.
* Captain Planet and the Planeteers at least from Wheeler's point of view.
* Captain Planet and the Planeteers, but his heart's in the right place.
* Captain Planet and the Planeteers. But then Dr. Blight traps them all in the rapidly wasting virtual planet, bringing the Apocalypse Class up to total extinction and closer to physical annihilation before destroying them all (not even Captain Planet can save them)... or so Blight thinks. Fortunately, the team of Planeteers have a backup spot before they vanish so they can return safely to stop Blight.
* Captain Planet and the Planeteers centering around the Eco-Villains being annoyed by the show's theme song.
* Captain Planet and the Planeteers, Dr. Blight switches bodies with Gaia, but doesn't let MAL in on the secret, so he follows Gaia's orders when she convinces him it's part of her (Dr. Blight's) secret plan.
* Captain Planet and the Planeteers: Each Planeteer had a unique power, and some were decidedly more useful than others in certain situations.
* Captain Planet and the Planeteers episode "Future Shock" had three villains descended from Looten Plunder, Dr. Blight, and Verminous Skumm sent back in time by Zarm to secure their future by killing a girl who would grow up to be a prominent defender of the environment. In the end, the three villains screw up and fire at Ma-Ti by mistake. While Ma-Ti survives, the failure to kill the little girl causes the Eco-Villains' descendants to disappear because of their timeline never transpiring.
* Captain Planet and the Planeteers episode "Gorillas Will Be Missed" starts in a future where gorillas are extinct.
* Captain Planet and the Planeteers episode "Jail House Flock" has Captain Planet in jail when Hoggish Greedly has him arrested for damaging his equipment and trespassing on his property by lying about intending to replace the wetlands his construction project will destroy. The Planeteers manage to get away and do what they can to clear Captain Planet's name.
* Captain Planet and the Planeteers episode "Jailhouse Flock", the good guys get arrested. The Planeteers get bailed out, but not Captain Planet. He chooses to stay, even using his superpowers for hard labor. It is only when his name is cleared that he leaves.
* Captain Planet and the Planeteers episode "The Unbearable Blightness of Being", where Gaia ends up switching minds with Dr. Blight and tries to explain what has happened to the Planeteers, only for Wheeler to retort "Yeah, and I'm Captain Pollution".
* Captain Planet and the Planeteers episode where Wheeler (who's from New York originally) stopped the Planeteers from forming. He ends up in a New York City that's underwater.

* Captain Planet and the Planeteers establishes that the Planeteers eventually split up due to constant squabbling and all but Kwame have left to "get real jobs" while Dr. Blight is still trying to destroy the planet with pollution.
* Captain Planet and the Planeteers features an interplanetary space zoo that has allowed many species to escape extinction, including sabretooth cats, mammoths, mastodons, wooly rhinos, giant ground sloths, great auks, elephant birds, passenger pigeons and dodos.
* Captain Planet and the Planeteers), forcing the Planeteers to help him, but usually he's just called within the last five minutes to easily defeat the villain and magically repair whatever damage has been done. He's made slightly more interesting whenever he is forced to fight his evil twin and gets his ass handed to him.
* Captain Planet and the Planeteers from otherwise pointless pollution).
* Captain Planet and the Planeteers, Gaia tampers with the timeline to bring her dead Planeteer back despite knowing it's forbidden. Her choice's consequences kill her. Much later, she's said to have doted upon the Planeteers "with the love that only a mother can give".
* Captain Planet and the Planeteers, Gi, Ma-Ti, and another kid are kidnapped. Gi breaks her beaded necklace and leaves a trail of beads. Wheeler spots the beads and finds them in the swamp.
* Captain Planet and the Planeteers, Gi suddenly has shoulder-length hair.
* Captain Planet and the Planeteers gives a hunter permission to eat its meat and wear its fur if he honors its spirit.
* Captain Planet and the Planeteers had a few episodes where the bad guys did this.
* Captain Planet and the Planeteers had all the Planeteers save one bound to chairs, about to be force-fed polluted food.
* Captain Planet and the Planeteers had the Geocruiser, which was solar powered. They also had an eco-friendly plane as well.
* Captain Planet and the Planeteers has an annoying little boy who is obsessed with becoming a hero and constantly screwing up. When his school bus is caught in smog and everyone panics, he yells, "Turn on the headlights!" and tries to do it himself, but opens the door instead, letting in the smog and choking everyone. When Wheeler gets injured, he steals his ring and charges into battle, despite Wheeler warning him that only a chosen one can properly use the ring. Sure enough, when the kid tries to blast the villain, he can't control the fire and blows up random stuff.
* Captain Planet and the Planeteers has Gaia, the spirit of Earth, as a very important character. She's also strongly connected to Hope Island (the Planeteers' new home) — to the point that she can die if the island is destroyed.
* Captain Planet and the Planeteers him. A similar thing happens when a weakened Captain Planet is set on fire. He emerges from the flames fully healed.
* Captain Planet and the Planeteers; his main tactic seems to be supporting dictatorships and spreading conflict.
* Captain Planet and the Planeteers: Hoggish Greedy & Sly Sludge travel back to the Old West to get the deeds for the Grand Canyon turning it a landfill. The Planeteers follow and work things back on track, returning the Grand Canyon to its natural state.
* Captain Planet and the Planeteers: In the episode called "Who's Running the Show?", Ted Turner (playing himself) proposes making a series about the central pollution-fighting hero team. Wheeler replies, "It has a nice ring to it."
* Captain Planet and the Planeteers: In the episode, "The Dead Seas", Gi accidentally ran into Kwame while he was planting seedlings.
* Captain Planet and the Planeteers in the fact that Gaia is the Spirit of the Earth, and was drawn racially ambiguous so as to embody all of Earth's ethnicities. Olive skin that can denote anything from a southern European to a northern Indian, wavy black hair, high cheekbones, and almond-shaped blue eyes.
* Captain Planet and the Planeteers in the first episode, during the kids' first ride in the Geo-Cruiser:
* Captain Planet and the Planeteers is never explained). He then goes back and

prevents himself from preventing himself from getting the ring. Then they both escape into the time pool again and merge for some reason. To make sure the viewers knew things were restored to normal, a scene from the utopian future is shown at the very end.
* Captain Planet and the Planeteers is really well-done, but the series itself isn't anywhere on its league.
* Captain Planet and the Planeteers is the Planeteer that Gaia gives power over wind.
* Captain Planet and the Planeteers is the show's resident embodiment of the trope. Having said that, one Planeteer Alert encourages viewers to learn more about science, since science can be used for good.
* Captain Planet and the Planeteers: Kwame, as the most mature and level-headed of the five teens, is this.
* Captain Planet and the Planeteers, Linka starts telling Wheeler that even though she acts like she doesn't care about him... and succumbs to a coughing fit just as the others finally get the doors open. She tries to deny everything as soon as they're out the door, but Wheeler gets the message.
* Captain Planet and the Planeteers) loves radiation so much that he turned himself into a mutant. He even bathed in nuclear radiation as a mutant in one episode without ill side effects.
* Captain Planet and the Planeteers — Kwame (Earth), Wheeler (Fire), Linka (Wind), Gi (Water), Ma-Ti (Heart) And when their powers combine... well, you know the rest.
* Captain Planet and the Planeteers often comes in since the Captain's solutions are usually things they could have done just as easily without him; he's usually only useful at all because they have terrible teamwork and don't realize they can use their powers in combination.
* Captain Planet and the Planeteers once lampshaded his own Chronic Hero Syndrome habits when one of his enemies asked him for help.
* Captain Planet and the Planeteers: Saving the planet with terrible puns.
* Captain Planet and the Planeteers segments at the end of each episode that usually show something an actual viewer can do.
* Captain Planet and the Planeteers shows Looten Plunder shaking his fist to the sky, shouting "You'll pay for this, Captain Planet!"
* Captain Planet and the Planeteers talks about wanting to actively destroy the planet in some episodes but her goals change from episode to episode.
* Captain Planet and the Planeteers: Technically, Gaia isn't after vengeance; she just wants humanity to clean up its mess. Her young champions, the Planeteers, are in charge of doing what they can nonviolently/non-lethally, lest she become mortal. Also, it's considered a shock when one of them (Gi, over the shooting of a friend of hers, in an episode on gang violence) attempts murder.
* Captain Planet and the Planeteers The episode even calls it a "new designer drug."
* Captain Planet and the Planeteers: The Planeteers combine their powers to summon the Ford Focus Electric.
* Captain Planet and the Planeteers: The Planeteers had to say their element in order to activate their rings. Of course, this happened whether they actually wanted to use them or not, such as when Wheeler off-handedly said "fire" and a small fire broke out.
* Captain Planet and the Planeteers, this is pretty much the standard MO for everyone who works in the Corporation, as greasing the wheels of government officials, breaking government laws, and strong-arming those who dare to protest is done to achieve greater profits and make sure they get away with their actions.
* Captain Planet and the Planeteers two-parter "Summit to Save the Earth" episode. Inside Zarm's ship, every minute that passed would equate to a month outside, so that when the Planeteers got booted from the ship the world had become a wasteland.
* Captain Planet and the Planeteers, Wheeler has a dream that he is married with children with Linka. In one part, his daughter tries to get his attention, but he brushes her off. She ends up wetting her pants.

* Captain Planet and the Planeteers: Wheeler, the guy from North America, had UST with Linka, the girl from the Soviet Union, on the team.
* Captain Planet and the Planeteers when he realizes his superiors had long forgotten about him and he had been fighting for nothing. Clash eventually finds a new purpose in helping the Planeteers protect the Earth from pollution and such.
* Captain Planet and the Planeteers), who had been transformed by radiation into a mutant that feeds on nuclear waste and radioactivity.
* Captain Planet and the Planeteers, who, while clearly intended to be Hitler, isn't. Strangest. Censorship. Ever.
* Captain Planet and the Planeteers would occasionally show signs of being bigoted, just in case it wasn't clear to the audience that they are the bad guys.
* Captain Planet because no matter where they go, he is instantly liked; he can also communicate with animals, knowing how they feel and asking for their help. Kwame, however, is usually the one ending group conflicts.
* Captain Planet. Done with good intentions, but written with all the quality and nuance of political propaganda, rather than a serious discussion of real problems.
* Captain Planet episode "You Bet Your Planet," before Wheeler participates in the foot race for the fate of Earth, Linka gives him a kiss for luck.
* Captain Planet features the planeteers, representing humanity, being put on trial by 12 endangered/extincted animals. Humanity is found guilty and the planeteers admit humanity's mistakes.
* Captain Planet had Gi tied to a chair in a room used to gather coral from a reef. One sharp piece falls conveniently nearby and we all know what happens after that...
* Captain Planet has a very odd weakness in that it's pollution, the very thing he's trying to fight. It'd be like Superman deciding to specialize solely on kryptonite cleanup duty.
* Captain Planet has Mat-Ti imagining himself as a private eye doing this.
* Captain Planet: In one episode, an alien came to incorporate the Planeteers into a collection of doomed species from across the galaxy. Fitting with the series' theme, he thinks that mankind, treating the Earth as they are, is doomed to extinction.
* Captain Planet, Kwame and Wheeler do this to access an air vent after the gang is trapped in a mine shaft.
* Captain Planet. Kwame and Wheeler form an impromptu one after Ma-Ti falls off the Capitol while the gang is pursued by zombie drug addicts.
* Captain Planet). Linka's cousin Boris starts bleeding profusely after being hit with glass.
* Captain Planet once disposed of a huge amount of nuclear waste by throwing it into the sun. He did this semi-frequently, especially with any episode involving Duke Nukem.
* Captain Planet's Dr. Blight had this hairdo, and hers covers horrible facial scarring. This was even used as a feature of the toy based on the character- you could "rotate" her plastic bangs and reveal the scars.
* Captain Planet-style round, let the heroes get points for every correct answer they got, allowing them to quickly equal the bad guys.
* Captain Planet)... until she moves the fringe covering the side of her face, revealing a severely scarred face.
* Captain Planet) Verminous Skumm wears this outfit so as to hide his rodent-esque appearance, despite the fact that he's hiding in the closet.
* Captain Planet was also shown to be weak to intense hatred in at least one episode.
* Captain Planet, Wheeler reads a newspaper and goes, "Elvis is back!? From the army?"
* Captain Ponder also depicted Spartan-II James-005 lose his lower left arm to a Hunter's assault cannon, which is replaced with one of these before the Spartan is sent back into the field.
* Captain Power and the Soldiers of the Future: After losing a fight with the good guys, Soaron is left helpless as he regenerates. Comes Blastarr wanting to know the

location of their enemies. Despite being on the same side, the two robots detest each other and Soaron is defiant because he wants to fight the humans himself. Except Blastarr grabs him by the neck and shakes him violently until Soaron relents and gives him the coordinates.
* Captain Power and the Soldiers of the Future, a series of animated videos were pretty much all this, each complete with a corridor run of varying levels of justification.
* Captain Power and the Soldiers of the Future example of this. When confronted with a questionable ally, Power locked an explosive cuff on him and informed him that it would be detonated if he tried to run or turn traitor. No surprise the series was produced by JMS.
* Captain Power and the Soldiers of the Future' ground control, forcing it down from orbit and on a collision course with Dread's capital city, Volcania.
* Captain Power and the Soldiers of the Future in the air just behind the evading target. As if it had hit the matte painting behind them. (My God, man, I think you found that answer we've been searching for.)
* Captain Power and the Soldiers of the Future, Lord Dread has already conquered much of the world, but he's not done yet. Over the course of the series, he plots to enact Project New Order, which consists of four stages:
* Captain Power and the Soldiers of the Future, Lord Dredd was dictating what sounded like it was supposed to be a Bio-Dredd Bible.
* Captain Power and the Soldiers of the Future, Lyman Taggart wanted to use the supercomputer Overmind to end the ongoing war being proliferated by the Biomechs, but was seduced by the seeming perfection of machines, inevitably becoming the infamous Lord Dread and the very thing he was fighting against. His occasional doubts are dissuaded by Overmind, who brainwashes him with the propaganda of their cause.
* Captain Power and the Soldiers of the Future of a Robot War where the machines won.
* Captain Power and the Soldiers of the Future. On one hand, it was a rare 20th century SF show that DIDN'T have CRTs, but used thin flat screens everywhere. Then again, it also had data being encoded on 3.5 inch floppy disks.
* Captain Power and the Soldiers of the Future tapes to use with the toys.
* Captain Power and the Soldiers of the Future took over the world with robots.
* Captain Power and the Soldiers of the Future toys were made for kids, the show itself was fairly dark, dealing with themes about nuclear war and Nazism, and the title of the show was enough to turn off most adults. The live-action violence didn't help matters.
* Captain Power and the Soldiers of the Future while Power, Tank and Scout assist her against the trench defenses on their skybikes. Pilot's job is to blow the doors of the control center using a proton missile so that Power and crew can get inside and blow the platform before it can be used to digitize a whole lot of people.
* Captain Pronin, a parody of '80s action movies, is exactly what would happen if Mike Judge did meth.
* Captain Pronin-looking villain, bounty hunters emerge from behind a moon and capture him in this way.
* Captain Pronin runs into this — it's mostly set in America, and has Pronin fighting the Mafia, and so we get such lines as "This is your money. Give me a smoking!"
* Captain Pronin where the hero is captured by his enemies, and the high ranking one explains that his job is making drugs, and his hobby is inhumane experiments in stomatology. Very few managed to survive more than two fillings...
* Captain Proton and the Planet of Lesbians got problems? My ass is being roasted like a Christmas turkey!"
* Captain Proton and the Planet of Lesbians messages from the President of Earth being infiltrated by an "advertising virus", causing him to spout off advertisements for Extra-Strength Viagra or the William Shatner Hair Clinic.
* Captain Proton lubricant in order to ease its passage into the tight hole...") and then:

* Captain Proton to provide this trope, ending the final battle when everyone experiences a simultaneous orgasm. Proton then gets an irate call from the President of Earth, demanding he arrest the nefarious villain who just shot a sex ray at the United States, starting a nationwide orgy.
* Captain Proton uniforms, Proton notes that using this trope is clearly out of the question.
* Captain Proton. When Paris is coaching Janeway on how to act inside the program, he reminds her to use the term "ray gun" instead of "phaser".
* Captain Pugwash doughnuts soaked in rum causing them to fall into a deep sleep so he can sail the ship away and convince them that the dodos were just a dream.
* Captain Pugwash: In "Island of the Dodos", Pugwash keeps shushing Tom as he is attempting to tell him something. It is only after Pugwash and the rest of the crew are caught in their own dodo trap does Tom get to tell them that trap wouldn't have worked anyway, because dodos can't fly.
* Captain Pugwash is the only member of the crew who actually does anything.
* Captain Pugwash's crew and often hits his head on the ceiling of the ship's lower deck.
* Captain Queeg. His bizarre behavior eventually causes a subordinate to relieve him of command.
* Captain Raballo is reported dead in a car accident right after a scene where we saw him contacting a journalist.
* Captain Redbeard prefers red bricks, especially the cannonball, as expected for a pirate.
* Captain Robau by invoking the tradition (mentioned above by Chief O'Brien) with his First Officer.
* Captain Roenel and his First Mate, Pelez, play this very straight in
* Captain Ron: Boat owner Martin starts a log of their adventures as they sail through the Caribbean doing up their old sailing yacht on the way, but his jealousy of Captain Ron's easy charm with his family leads to it becoming just a book of complaints about everything Ron does. After Ron saves them from the real life version of the pirates of the Caribbean, Martin starts a new log which is much less crabby and notes that the previous log mysteriously got destroyed by the pirates.
* Captain Ron, Martin and Katherine are fooling around in the shower when the door jams and the shower begins to flood. Captain Ron ends up coming to their rescue, much to their embarrassment, and afterward tells their son that his parents were "playing 'hide-the-salami' in the shower".
* Captain Ron when: the door gets stuck, the drain gets clogged, and the shower handle breaks. The shower starts rapidly filling with water. They get rescued before they drown, but Katherine comments that would have been a very sucky way of dying.
* Captain Rowland Falls...riding in a rowboat...about to head over a huge waterfall.
* Captain Saala Balthine was this to Zayne until some time before the start of the story.
* Captain Sabertooth And The Lama Rama Treasure has one of the antagonistic pirate mooning the protagonists from the other ship. Incidentally, this scene made it into the first trailer.
* Captain Sabertooth production running or being made at any given time.
* Captain Sam Vimes and Lady Sybil Ramkin (subsequently Sir Samuel and Lady Sybil Vimes) in
* Captains and the Kings, protagonist Joseph Armagh starts making his fortune in Pennsylvania by driving 20-mule teams loaded with nitroglycerin to oil wells. The job is very well paid because drivers don't last long and are unwilling to join up. He leaves the job after several weeks, being one of their longest-lasting drivers.
* Captains and vice-captains have to wear power-limiters on their reiatsu when in the human world lest their power start affecting human souls. This is lampshaded by observations on how Ichigo's extremely powerful, uncontrolled reiatsu (when in shinigami form only) has
* Captain Sawyer's one of Nelson's own and a national hero who distinguished

himself at the Battle of Nile. He's also completely
* Captain S being a G-rated show. Needless to say, it's weird as hell hearing the normally foul-mouthed Nerd saying things like "What a buttload of crud."
* Captain Scarlet and the Mysterons: "Captain Scarlet is indestructible. You are not. Remember this. Do not try to imitate him."
* Captain Scarlet and the Mysterons episode "Spectrum Strikes Back", the Mysterons try to kill a committee taking a look at some anti-Mysteron prototype equipment that could be useful. In the end, all the Mysterons essentially achieve is provide a spectacularly successful field test for the stuff that proves its worth.
* Captain Scarlet and the Mysterons). Gerry Anderson really likes his vehicles.
* Captain Scarlet and the Mysterons issue of how the Mysterons got anything accomplished when their "war of nerves" was common knowledge.
* Captain Scarlet and the Mysterons (properly dusty and smoky, not much of a fireball, but a visible shockwave. Nice).
* Captain Scarlet and the Mysterons, so he too never stops, no matter what is done to him.
* Captain Scarlet and the Mysterons. The invisible Voice of the Mysterons themselves also announced "We know that you can hear us, Earthmen" each week.
* Captain Scarlet and the Mysterons, the main character is a captain, but The Captain is Colonel White.
* Captain Scarlet and the Mysterons, the Mysterons' first attempt to murder the World President involves killing and cloning Captain Brown in order to turn him into a human bomb. The President narrowly manages to escape after seeing smoke rising from Brown's neck.
* Captain Scarlet and the Mysterons (the original marionette version), it's the sound of a bottle being knocked over and a cat screeching that alerts Scarlet to the presence of an enemy.
* Captain Scarlet and the Mysterons. The show also counts a Japanese and a black amongst its minor characters.
* Captain Scarlet and the Mysterons; they're just aliens that happen to be invisible.
* Captain Scarlet and the Mysterons: "THIS IS THE VOICE OF THE MYSTERONS."
* Captain Scarlet and the Mysterons uses this every week in the opening where Captain Black appears and often repeats at various intervals in the story to denote the appearance of a Mysteron agent.
* Captain Scarlet and the Mysterons who regained his identity after falling off a building. He is indestructible because his body will regenerate after being killed, but that apparently doesn't make death any less painful for him. Which may explain why he seems so grumpy all the time.
* Captain Scarlet and the Mysterons, whose fighter pilots' chairs rose through the deck of a flying aircraft carrier to enter their planes.
* Captain Scarlet kills a Mysteron replicant this way in one episode of
* Captain Scarlett and Her Pirate's Booty of the desert town of Oasis after the rest of the population died of thirst. He strung up their bodies and rigged them with tape recordings of himself doing bad impressions of what were presumably their voices, and pretends as if they are all still alive. When the player first enters Hayter's Folly, a cave filled with plenty of water that is pretty much right underneath the town, he doesn't take the revelation that such a place existed very well at all.
* Captains Carrot Ironfounderson and Angua von Uberwald are on opposite ends of the
* Captains Courageous has Harvey Cheyne, a thoroughly spoiled brat who gets it worked out of him when he is swept overboard at sea and has to spend much of the summer on a fishing boat as part of the crew.
* Captains Courageous, there is a poignant scene in which the Gloucester fishing families gather at a church to listen to the yearly casualty report and several newly widowed women burst out in tears.
* Captains Crash: Gyro Gearloose, as per his canon. Launchpad was stranded in Equestria by one of his inventions going wrong.

* Captains Crash real-world experiments into steam-powered aircraft from the 1840s till the 1960s — but it's noted that it's very inefficient in terms of its power-to-weight ratio, which is the reason why the technology never got anywhere on Earth.
* Captains Crash real-world experiments into steam-powered aircraft from the 1840s till the 1960s — but it's noted that it's very inefficient in terms of its power-to-weight ratio, which is the reason why the technology never got anywhere on Earth. Launchpad himself notes that the "Jenny" is a result of him making do with the available technology on Equestria, with the implication that he hopes it'll serve as proof of product to get the funds to start pushing technology to recreate diesel engines.
* Captain Sensible. Allegedly the band's usual punk rock style came as a shock to some old ladies who later bought tickets to one of their shows expecting an evening of similar ballads.
* Captain Sentomaru of the Marines claims to have "the strongest defense in the world," and it shows: None of Luffy's attacks could harm him. Particularly because he's a skilled Haki user.
* Captain's Fury. From then on to her death at Amara's hands, her life just keeps getting worse- she's forced to collaborate with the Vord because the Vord Queen provides her life support, with her dream of ruling Alera in ruins. Then Attis sets her on fire, and she's so badly burned she looks melted.
* Captain Sheridan arrives on the station and has what is, by the standards of B5, a relatively sedate example, as a rogue Minbari warship attempts to goad him into firing the first shots of a new war between Earth and Minbar (Sheridan was a hero of the previous war, which ended under very odd and unexplained circumstances).
* Captain Sheridan does this during the beginning of Season 4 after turning up during a major attempt to break up the coalition the Babylon 5 crew had created and run from a war against two major races.
* Captain Sheridan himself also qualifies. Clark appointed him to command the station because by all appearances he was a staunch loyalist. What Clark didn't count on was that Sheridan was staunchly loyal to the Earth Alliance
* Captain Sheridan is definitively American, a Midwesterner whose father (a diplomat) retired to a farm somewhere in corn country, and is apparently a descendant of the
* Captain Sheridan makes an offhand reference to "Disney Planet", implying that the Walt Disney Company is dabbling in planetary government by the 23rd century.
* Captain Sheridan mentions collecting conspiracy theories as a hobby in one episode, naming a rumoured secret government agency as possibly being behind B5's recent troubles - "Bureau 13". (Said name was quietly dropped for all subsequent mentions in the show, as it turned out there was already a fictional conspiracy with that name.)
* Captain Sheridan was literally touched by a Vorlon; it left a piece of itself inside his head. That piece gave him telepathic resistance and guided him to encounter Lorien,
* Captain's Holiday (S3E19): The Tox Uthat, a device constructed in the 27th century and hidden in the past due to its potential use as a weapon of mass destruction, is capable of stopping all nuclear fusion inside a star. It looks like a palm-sized crystal artifact.
* Captain Silver had content removed from the US version of the game, which include two whole stages and most of the enemy characters. Despite this, the game's manual still list most of the missing enemies and makes references to the removed stages.
* Captain Silver. When Jim nears them, they let themselves fall and slide in his direction. In the MSX version, the final boss of this stage is a witch that stores kabocha jack o'lanterns under her skirt to throw at Jim.
* Captain Simian and the Space Monkeys, each body keeps its own voice, but the voice actors imitate each others' distinctive cadences.
* Captain Simian and the Space Monkeys episode "Felonious Monks" has the villain Apax show signs of being sexist when he makes the assumption that Shao Lin isn't a threat to him simply because she's female.

* Captain Simian and the Space Monkeys episode "The Monkey Has Landed" has Captain Simian become attracted to an ape-woman named Lilith, who turns out to be a robot when her mechanical insides are exposed after protecting Captain Simian from a laser blast fired by Rhesus 2.
* Captain Simian and the Space Monkeys) has our heroes cornered. He says, "This is the moment where I say something clever, then kill you." (Beat) "Sorry. Nothing clever comes to mind." (Rhesus fires his blaster into the camera; cut to commercial).
* Captain Simian and the Space Monkeys invokes this trope every time they split their big ship into a bunch of little ships.
* Captain Simian and the Space Monkeys, make even worst because they get tangled in the latter's tail.
* Captain Simian and the Space Monkeys met its doom after one season for the same reason.
* Captain Simian and the Space Monkeys monkey (specifically, a Chinese golden monkey).
* Captain Simian and the Space Monkeys qualifies. Though he's very open to suggestions from his crew, he's always the team leader. He gets rebuked all the time by his second-in-command for jumping in headfirst without a plan, but it usually works out; his crew is confident in his ability to get them out of any situation.
* Captain Simian and the Space Monkeys Rhesus-2 is a cyborg monkey with an exposed brain that he can remove and replace easily, and seems fully functional without one though he still has a habit of yanking his brain out and shooting it ("Bad brain!") whenever he messes up. Though, in one episode his original brain is re-inserted, which has the memory of his extremely painful cyber-conversion, leaving him catatonic.
* Captain Simian and the Space Monkeys saying that the fate of the universe once again lies in the hands of Captain Simian. However, Rhesus-2 has decided to take over the universe himself, the Space Monkeys still haven't found their way back to Earth, and Captain Simian and Shao Lin still haven't admitted their feelings for each other.
* Captain Simian and the Space Monkeys takes this trope and runs with it. He often adds a "And I mean that with all due respect" after scathing or sarcastic comments.
* Captain Simian and the Space Monkeys. When he uploads his brain patterns into the Holo-boon generator, turning them evil, they turn against him after driving off the Space Monkeys.
* Captain Sindbad Sinbad movies), Sinbad must fight an invisible beast in an arena.
* Captains in the Watch are also entitled to have a plume in their helmet, but Vimes hates plumes, and Carrot follows his commander's lead in this.
* Captain Sir John Franklin's Arctic expedition in 1845. All Arctic voyages are hazardous, but Franklin's crew had an additional problem; several of the men developed lead poisoning, which impaired their judgement and made them more susceptible to disease.
* Captain Sisko and Admiral Ross also lead from the front in numerous battles. Sisko, notably, took command of a ground troop in "The Siege of AR-558" despite being a starship captain (Starfleet being a monolithic uniformed service rather than a collection of separate branches), and was quite effective in holding off everything thrown his way despite being cut off from reinforcements or supplies.
* Captain Skyhawk's jet is capable of space flight, and will dock with a space station between missions to refuel and reload its weapons. The final battle also takes place entirely in space.
* Captains like Bialar Crais fell somewhere in-between these extremes, with some captains adhering strictly to military protocols and others being much more like the
* Captain Slipp and Blaggut, a pair of searats, are asked to sing at one point in
* Captain's Log chronicles a crew of space explorers descending into madness and depravity as the boredome and isolation get to them.
* Captain's Log named and codified often functions as a spoken-aloud variant of

this one.
* Captain Smollett is killed by Pew in the finale of the loosely based
* Captain Smooth and Sergeant Rough: I'm the captain here while my second-in-command is the disciplinarian to my men.
* Captain Smooth and Sergeant Rough: The captain may be easy-going on you, but I'm not!
* Captain SNES: The Game Masta, at which point, overcome by the knowledge that reality-warping inscrutable beings created them and everything they know, all of their turmoils and suffering, for the sake of children's entertainment, they invariably go mad and then either homicidal or catatonic.
* Captain SNES: The Game Masta features this trope in spades. When fighting Milon, he offhandedly says that he's invincible as his unobserved power is infinite — which causes Lucca to use her SightScope to observe his power and turn it into a finite number. Later on, Palom casts Virus on Milon, enraging him and making him use his "Eternity In A Second" attack to take the next few thousand turns. He says that he'll enjoy watching everyone squirm, unable to do anything — and then dies. (Turns out Virus inflicts Sap, which depletes a little HP each turn — and when Milon takes thousands of turns in a row...)
* Captain SNES: The Game Masta, Frog, Palom and Porom defeated the Eater of Dreams during a conversation. He was giving his big speech about how the heroes have no chance and the heroes were saying how much of a cheating bastard he was or how he could not win, but the EOD ends up dying because he wasn't paying attention to his HP and ran out of hit points due to a previously cast Virus spell.
* Captain SNES: The Game Masta had been hit by hallucinogenic drug-filled needles in his war on drugs. Alex states that this is the tip of the iceberg.
* Captain SNES: The Game Masta has the Sovereign of Sorrow, who can grant upgrade and enhance a sprite's nature. Unfortunately, the Sovereign tends to break the minds of her victims, either revealing unsettling truths about the nature of their reality and filling them with nihilism or making them unhinged and murderous. It's a bad touch by Vorlons.
* Captain SNES: The Game Masta. He remarks, "Orange is too cliche... how about film?" The narrator then reveals its looseness with rhymes: "Might I suggest you try out 'Dark Realm'?"
* Captain SNES: The Game Masta hero!), was so nervous that he pocketed them on sheer impulse and promptly forgot that he had done so.
* Captain SNES: The Game Masta in Nexus?" (And, if you're asking about the Gamemasta only, the answer, as of comic #786, is still "yes".)
* Captain SNES: The Game Masta in Nexus, but at least a few of them mistake her for a prostitute.
* Captain SNES: The Game Masta is quite literal-minded, much to the chagrin of the other characters who must deal with him.
* Captain SNES: The Game Masta is revealed to be powered by a miniature black hole, which he also uses offensively when his safeties are disabled.
* Captain SNES: The Game Masta: Magus blows up a castle out of frustration when he learns about warp zones. At first, Bowser vows he will avenge the deaths of all the soldiers he had stationed there, only to find out that almost all of them had deserted their posts for various reasons. The only member of the Koopa Troop that was still there was Elwin the Boo Janitor. Who was already dead.
* Captain SNES: The Game Masta parody actually uses the name "Kamehamehadoken."
* Captain SNES: The Game Masta) responds with more interest to Sabin being a prince than Edgar being a king, Sabin is not pleased.
* Captain SNES: The Game Masta, Schrodinger the cat winds up playing this with a bunch of robots. To his frustration, his attempt to end the gag goes ignored, and Schrodinger sulks off away from the doors while the robots still try to "chase" him through them.
* Captain SNES: The Game Masta-sexual gay themes; yaoi is the hXc stuff.
* Captain SNES: The Game Masta. She initially planned to drop Lana into it, but Captain N uses the last of his power to pause time and save her. He explains that his power can't be taken so simply, as it comes from his friendship with the other

characters, including his best friend Duke (a dog)...
* Captain SNES: The Game Masta; the sprites refer to it as being like a funeral dirge about the futility of existence.
* Captain SNES: The Game Masta, the wife of Cid from Final Fantasy IV is said to be this.
* Captain SNES: The Game Masta throws herself at him. So much so that he wants the Hitler's Time Travel Exemption Act repealed.
* Captain SNES: The Game Masta version. They came complete with Space Booty and Space-Yarrs.
* Captain SNES: The Game Masta when Megaman uses "Your Momma" as an insult. Which is strange, because Amon is a physical incarnation, and doesn't actually have a mother.
* Captain SNES: The Game Masta who couldn't stop slashing football players together. Fantasy football was ruined for Alex.
* Captain Sobel also qualifies. Although he was in charge of Easy Company and trained them for two years, he never saw combat. When Easy Company went to combat, he was given a training role, then became a supply officer.
* Captain Sobel routine made them even more determined to pass Jump School just to annoy him.
* Captains of the Clouds's character does this in a bush plane, interrupting an Air Marshall as he gives a graduation speech to the pilots. However, his wingman blacks out during the stunt and is killed.
* Captains Outrageous uses this in the last paragraph of the book. Sorcerer Bosamp has been manipulated into trying to destroy the world by a dragon (divine beings in this setting) with the promise of a beautiful world of his own to rule. Bosamp is defeated and imprisoned, and the dragon is punished by her superiors. As the dragons' punishment begins, he superior grudgingly admires her cleverness in manipulating Bosamp, since she actually would have granted him his own beautiful world... with poisonous air and crushing gravity.
* Captain Space, Defender of Earth! genre, which both became popular around the same time.
* Captain Sparklez from Usher's label taking the video down and forcing Captain Sparklez to change the sound, the original is back up with still more likes than the original. The original has since, however, overtaken the parody in terms of YouTube views.
* Captain Sparklez. He admitted that these complaints were really starting to get on his nerves, and very nearly cancelled the "Ultra-Modded Survival" series as a result.
* Captain Sparklez when the former was doing his old channel. With the latter's help, he ended up becoming one of the more popular channels on YouTube and now plays games with the latter quite regularly, also knowing him in real life.
* Captain Spectre And The Lightning Legion A Rocketeer-style hero done in a retro serial style.
* Captain Spirit, and it stars Shep Lowry and Ashton Johnson, who could easily pass as father and son in real life.
* Captain Squirk often bobs up and down and moves his arms as though he's dancing.
* Captains Shunsui Kyoraku and Jushiro Ukitake possess dual zanpakuto. Between them, Kyoraku is the only shinigami that dual-wields even when his zanpakuto is sealed due to the fact that it seals into the form of two swords. Ukitake's seals into the form of a single sword.
* Captain's Table novel, Kirk says that the phrase "Klingon Research Facility" causes him to have the mental image of a Klingon warrior trying to split the atom with a bat'leth.
* Captain Stadi tells Crewman Celes that ordinarily she'd be court-martialed for assault and battery of an officer (the Bajoran punched out one of their Cardassian allies for asking her on a date), but given
* Captain Starlight, the first costumed Hero more powerful if she devoted more of her time to improving her abilities. However, Angela was influenced by a late Hero and a friend of her grandfather's, who convinced her to live her life to the

fullest because it could end at any time.
* Captain Staros' parting words to his men are: "You've been like my sons. You are my sons."
* Captain Star, planets are named after the captain who discovered them, with the eponymous Captain Star holding the record.
* Captain Star who literally grovels at Star's feet, which he says without even a hint of humility, says it the best:
* Captain Stingaree was wrong about his hated identical brothers being
* Captain Sturdy: Back in Action as a result of his advanced intellect.
* Captain Sturdy isn't balding, doesn't have stubble and is a bit more attractive.
* Captain Subtext and his Helmet of Truth when he means his car. At the end of the episode (which takes place in Captain Subtext Vision), he says the big end's gone, and the Helmet of Truth overloads.
* Captain Superhero: A superhero who has "Captain" in front of their name.
* Captain Superhero: A superhero whose codename begins with "Captain".
* Captain Swan because of how it elevated the importance of an extremely polarizing character above that of several other well-established characters from the first season, and because the show sometimes seems to go out of its way to make Hook look good even when he doesn't deserve it.
* Captain Tagon has been shown to be firmly in the "bad relationship experience in the past". That is to say, the last girlfriend he brought home
* Captain Tagon reminisces about what happened to a unit given far too much room for their quarters something called "hyperjuana", which from the name is probably some kind of extra powerful marijuana equivalent. He also mentions “smack labs”, presumably a combination of crack and meth, and good old-fashioned
* Captain Tagon's father complains that "when I was your age, I was already a colonel." Tagon retorts that there was a war going on back then, and half of high command got nuked from orbit. And then
* Captain Tagon's personal experience that letting grunts get too spread out is just asking for them to use the space for illicit activities.
* Captain Tagon treats his ocular cutlery (read: fork in eye) with nothing more than
* Captain Tarkin admires the design of the Citadel, a brutal Separatist maximum-security prison, even as the Jedi are helping him escape from it. Ahsoka calls him out on it, but Anakin concedes that he has a point.
* Captain Tax Time for Tax Time Tax Services, a one-shot comic published in Canada in the 1980's to advertise a tax revenue service.
* Captain Teague. Not only is he the Keeper of the Code and Jack's dad, but he's also badass enough to shut a room full of brawling pirate captains (including
* captain Temeraire keeps asking stunningly blasphemous questions that make Laurence fear divine retribution, and in another Temeraire contemplates how strange it is that Laurence can deny the existence of spirits despite believing in one (the Holy Spirit).
* Captain Thunderbolt also fits this trope, and carries a four barreled shotgun.
* Captain Thunderhooves' Shikai is a massive club becomes stronger with each successive swing, but in return each swing becomes increasingly unwieldy. This allows him to snowball into a ridiculously powerful combatant who can take out numerous foes with even near-misses, but collateral damage is all but assured and it's not a safe ability to use with allies present.
* Captain Toad: Treasure Tracker, having received a port on the Nintendo Switch before its parent game.
* Captain Toad: Treasure Tracker. It usually requires the player to shift around other parts of the level so that a heavy object will fall on the opposite end of the seesaw.
* Captain Tom Parham. First African-American to reach rank of Captain, and beloved Navy chaplain.
* Captain Torame in "The Dragon Bellow Conspiracy" has this relationship with Usagi; both are good samurai (Torame exemplifies loyalty and he'll stay by his lord's side even though he knows his lord is wicked) and express regret that they

have to be enemies.
* Captain Tsubasa and doing sequels and spinoffs to his most popular work.
* Captain Tsubasa anime series. Later remakes would shorten the matches somewhat,though.
* Captain Tsubasa. Both are stories about soccer, though the second is more down-to-Earth.
* Captain Tsubasa, but Tsubasa and his family helped him through and, in a few years, he built a new and very successful career as a soccer coach.
* Captain Tsubasa case above, many non-western sports games, especially from the 80s, tended to represent England with the Union Jack flag instead of the St. George's Cross, at least in the Japanese versions. This was often corrected in the translated versions, and that practice died down in the 90s.
* Captain Tsubasa did not have the same impact and its manga version barely lasted 6 volumes, in comparison with the thirty-seven volumes of Captain Tsubasa.
* Captain Tsubasa hard for his success, truly loves the sport, and cares very much for his teammates and his friends.
* Captain Tsubasa, he's loving towards his parents and his little sister.
* Captain Tsubasa, Hyuga's coach trains his soccer team by ordering them to dribble and kick the balls on shore tides. Hyuga himself takes this further by using a heavier ball.
* Captain Tsubasa: In the last two Volumes of the first manga series (volumes 36 and 37) Tsubasa and Sanae realized the feelings they have for each other, Sanae finally became honest with herself and her feelings, but Tsubasa is a strange case, he showed no hints whatsoever that he liked Sanae or anyone else, so his love confession felt like a last minute plot. This is saved from its own awkwardness because that’s only the first manga series’ climax, the sequels does take its time to show Tsubasa showing affection towards Sanae, and consequently developing their relationship.
* Captain Tsubasa. In the original manga and old series, his father gives him one year to reach the championship with the Toho team; if not, he'll have to come back home and inherit the dojo. When Ken fulfills his word, Mr. Wakashimazu gives him his blessings.
* Captain Tsubasa in the third game and consequently also appeared in the corresponding arc of the anime adaptation. In short, anime → real life → game → anime.
* Captain Tsubasa is that the main character fell off the moving truck in the first episode and has been in a coma since. Some people even claim that the "real" ending of the anime has him waking up and finding he has no legs.
* Captain Tsubasa — Roberto Hongo (Nankatsu Elementary), Kouzou Kira (Meiwa Elementary), Takashi Furuoya (Nankatsu Junior High) and Makoto Kitazume (Tohou Junior High).
* Captain Tsubasa more goals than real life's scores, and the football pitches are hilariously huge with characters seemingly running marathons on them.
* Captain Tsubasa prequel chapters. Despite being a rather nice and cheerful young boy, Tsubasa had trouble connecting with other kids his age because he was the only one who liked soccer (the only exception being Yayoi Aoba, his first girlfriend at the time). Once he moves to Shizuoka, he quickly becomes friends with pretty much everyone, now that he has a team to play with.
* Captain Tsubasa: Rise of New Champions mode timeline. The player can unlock a Rank Up scene where he accidentally overhears Levin talking through his cellphone, and while she's not mentioned by name, he does refer to her as his girlfriend.
* Captain Tsubasa Ryo Ishizaki is when he scores an own goal in a game against the Hanawa team. He later redeems himself for it, though.
* Captain Tsubasa, she finally gets fed up and goes away, with Tsubasa being all "... WTF?!"
* Captain Tsubasa, shots that blows the goalkeeper away and hurts who blocks it, soccer player that jump on posts and crossbar and many other examples.
* Captain Tsubasa. Then he goes to Brazil and marries the job again, so that his girlfriend has to follow him there, love-struck and almost in tears before they

finally get married for real.
* Captain Tsubasa, then they both realize the implications and jerk away while heavily blushing.
* Captain Tsubasa, this happens to Jun Misugi on a regular basis in his younger days, if he pushes himself too hard during his matches. His heart condition starts to improve by the time of the Junior High arc, and he fully heals at the start of the World Youth arc.
* Captain Tsubasa. This is ironically often their downfall, as their crazy combination moves often stresses and damages their body, thus they end up injured a lot.
* Captain Tsubasa those wounds: Hyuga (though he stops doing so soon), Soda, Stefan Levin...
* Captain Tsubasa tremendously helped the development of soccer as a whole in Japan, spurring the creation of the national pro league JFA and thrust the sport from obscurity to the second-most played sport in the country. Many Japanese and non-Japanese players credit it for their inspiration to play soccer.
* Captain Tsubasa was introduced in the World Youth arc as a Tsubasa fanboy who went to say goodbye to him in the airport as he left to Brazil.
* Captain Tsubasa was often called "Anego" (lit. "Big Sister", though it goes along the lines of "Gang Leader") by the rest of the cheerleading squad in the Nankatsu elementary school. Later as a teenager/young adult, some characters like Ishizaki and Hyuga call her that way to irk her.
* Captain Tsubasa", was said in present simple "The sun doesn't let me see" when Natureza was about to shoot instead of in past simple when the ball was already in the goal.
* Captain Tsubasa with a weak heart) than abandon his team in their hour of need.
* Captain Tsubasa with Shutetsu, who are the current national champions.
* Captain Tsubasa with their Skylab combinations and Triangle Shoot. In the series, they are almost useless if they're not playing together.
* Captain Tsubasa Yayoi Aoba, for telling Tsubasa about his heart condition. He's upset because with that knowledge Tsubasa will hold back and won't play at his best out of fear for him.
* Captain Tushin and Prince Bagration exhibited forms of Dissonant Serenity during the Battle of Schöngraben in
* Captain Tycho of the Blood Angels was killed off in the Armageddon worldwide campaign.
* Captain Tylor tries to glomp Yuriko Star after waking up on the sickbay table, having nearly died of oxygen deprivation. An annoyed Yuriko quickly steps to one side and Tylor falls flat on his face.
* Captain Ufo (and supposedly all other spaceship in the universe) FTL speed is called "hyperblur" in-universe. The ship opens a wormhole to it's destinations and travels through it. In season two we see that the inside of the wormhole is a tunnel-like place, and that travelling through it is not instant, so it's a kind of hyperdrive,
* Captain Ufo has the scorpion pirates from season one. Also, several background characters in crowd scenes seems to belong to some kind of insectoid race.
* Captain Ufo is a "jewel of Gronkian technology"; It's hinted that there may be something else about it, but it hasn't been revealed in the comic, yet.
* Captain Ufo most aliens are humanoid in one way or another, however among the background characters you can spot some of these; among others, a guy who looks like a Hutt with dreadlocks, a green blob with tentacles and eight eyes, a worm-like alien with four arms (he's one of the judge in the trial scene at the beginning of season two) and the Orokanais, who look like vending machines.
* Captain Ufo. Only one race so far was shown to use a different language, all the others speak English (without any reference to universal translators to boot).
* Captain Ufo. The plot of the second season involves the Brimen-Fukuoka corp.
* Captain Ufo, Ufo has Number One use a disintegration gun on some uncooperative aliens.
* Captain Ufo, Ufo himself ends in one of these as "voluntary inmate" after he

insisted that everyone should acknowledge his evil genius during the trial that opens season two.
* Captain Ufo, Ufo's First Mate is called Number One, even by the judge who took him to trial.
* Captain Ufo. While setting off to conque Ambrosia, the Widowpunisher's engines break down and trap Ufo's fleet in a temporal bubble.
* Captain Underpants and land SPLAT on the ground... or not; the narrator was kidding.
* Captain Underpants, and says "Marketing, we're working through lunch. Order Sandwich Sandwiches." into a tape dispenser.
* Captain Underpants and the Big, Bad Battle of the Bionic Booger Boy Part 1: The Night of the Nasty Nostril Nuggets, the narrator's vulgar description of Melvin Sneedly's transformation into a booger-covered behemoth is interrupted by George Beard, who shouts at the narrator that the description is making everyone sick.
* Captain Underpants and the Wrath of the Wicked Wedgie Woman: To help Captain Underpants regain his powers, George and Harold need to get some fabric softener to counteract the spray starch that removed them. They run to a new store that opened nearby, which turns out to be "Everything Except Fabric Softener."
* Captain Underpants a powerful crystal he swallowed as a child on his home planet (even though Captain Underpants is actually the boys' principal, while Captain Underpants he believes he has the fictional character's backstory).
* Captain Underpants are portrayed like this. To the point where the average child doesn't even stand half as tall as an adult.
* Captain Underpants As the name implies, there's only one thing you can't buy there.
* Captain Underpants, because he only believes it because that's what George and Harold wrote in their comic book.
* Captain Underpants book, George and Harold create a comic for their grandparents where the main message is that old people, especially grandparents, are awesome and shouldn't be taken for granted.
* Captain Underpants book, George and Harold rearrange the letters on a sign so that instead of "Have a Blissfully Grand Retirement, Ms. Ribble" it says "Ms. Ribble Really Needs A Breath Mint".
* Captain Underpants book, George and Harold wonder why their future selves don't remember some of their past adventures. They blame bad writing as they shoot a glance at the reader.
* Captain Underpants books attend Jerome Horwitz Elementary School. Now why anybody would name a school after Curly is beyond us.
* Captain Underpants books has a look into George and Harold's origins as best friends and creating comics. One of their comics was known as Dog Man, and years later, Dav Pilkey himself wrote and published a separate Dog Man book!
* Captain Underpants books is a Snobby Simon, a boot-licking nerd who frequently rats out George and Harold whenever they make mischief, just to feed his ego about being the "perfect student".
* Captain Underpants books, Mr. Krupp turns into Captain Underpants when he hears fingers snapping, and returns to normal when water is poured on his head.
* Captain Underpants books, to pose as an adult to get an invention off of Melvin's genius parents. They only start to suspect something's wrong when George's hands are what takes the gadget (as Harold — who was on top — is white and George is black), but have their minds erased almost immediately after.
* Captain Underpants books was that a kid would notice whatever bizarre events were befalling Captain Underpants, only that when he tried to point them out to his mother, she'd ask him how she was expected to believe that-while reading something that was nearly as strange, such as a tabloid newspaper with the headline "Bigfoot gives birth to 200 pound UFO baby". The fourth book had the pair appear twice-the second time, the kid decided not to tell his mother about the giant robot fighting a giant man in his underwear.
* Captain Underpants book, the kids write a comic that opens with a lament about how out of touch old people are. Among other reasons, one of their complaints is

that they have no idea how much things cost, illustrated by a grandpa giving his kid a nickel saying "why don't you buy a video game with it?" This is inverted when the villains of the comic create "Robo-grannies", who give their kids $100 to buy a candy bar.
* Captain Underpants book. The school puts up posters saying things like "Mindless Conformity - It's Fun!" or "Individuality Causes Pain!"
* Captain Underpants book, the school reveals it has the Big Book O' Rules, with nearly 8000 rules. The reader only hears two: "Rule 411: Don't kick school property into space", and "Rule 7,734: Don't transform into big, flying robots during afternoon recess."
* Captain Underpants book "The Tyrannical Retaliation of the Turbo-Toilet 2000" ends with the hatching of hamsterdactyls, the offspring of a bionic hamster and a time-traveling pterodactyl.
* Captain Underpants...but then the following page reveals that the story will be continued. Doubly so when you realise that Tippy's disruption of George and Harold's arrest (seen at the end of Book 8 and the beginning of Book 9) had yet to happen.
* Captain Underpants by making animal noises very quietly and then denying that they heard anything.
* Captain Underpants deserves what he gets, though not for the things they're mad about.
* Captain Underpants features something similar to this, lampshading how easy it made the pages to draw.
* Captain Underpants: George and Harold's comic book writing revolves around this.
* Captain Underpants: George and Harold write a fake marriage proposal from Principal Krupp in Ms. Ribble's retirement card. The pair are too flummoxed to protest, and the staff arranges a wedding for them.
* Captain Underpants, George exclaims "Let's all give Captain Underpants a big hand!" Harold, whose hand was accidentally enlarged a few chapters prior, glares at George who apologizes.
* Captain Underpants had the titular hero lose his superpowers without realizing it until he tries to fly out the window. He falls three stories and misses a haystack, a trampoline, and a truck full of soft pillows, before landing on his head.
* Captain Underpants. He sheds it when his Captain Underpants personality is activated.
* Captain Underpants hypnotizing Crackers and Sulu. This alerts Evil George and Evil Harold to their presence, who order their hypnotized slaves to catch the "gaspers".
* Captain Underpants: In "Revenge of the Ridiculous Robo-Boogers", Captain Underpants lands on his head. When Harold and George rush to his side to see if he's okay, he mutters "Mommy, my train went swimming in the piano."
* Captain Underpants in that Jennifer is already a female name by Earth standards.
* Captain Underpants: In the fifth book, Ms. Ribble writes a poem on the blackboard and finishes with "Signed, Your Name Here". She then makes all the students write the poem. But instead of writing their names, the students write "Your Name Here".
* Captain Underpants is fraught with examples, including green gloop running through the classrooms of their school, through hallways, and even covering up the text on the page.
* Captain Underpants later on when Captain Underpants returns after a short absence, and explains that he was at a shoe store, ordering a cheeseburger.
* Captain Underpants, Ms. Ribble makes every student in her class write goodbye cards for her retirement by copying the poem she wrote on the chalkboard, which ends with a "Write your own name here" fill-in. None the less, most of the students are shown copying verbatim the "write your own name here" part.
* Captain Underpants, Ms. Ribble tells George and Harold she's lowering their grades to Fs and Gs.
* Captain Underpants or convoluted plot they're currently involved with.
* Captain Underpants, Professor Poopypants makes his first demand for a pencil from the reporter reporting on the incident.

* Captain Underpants series has been translated twice into the following languages, each by a different publisher). In all four cases, the newer translation was used in the 2017 film:
* Captain Underpants series, it is discovered that "organic orange-flavored oranges" are effective weapons against robotic booger monsters, since the booger monsters are apparently held together with cold viruses which are destroyed by Vitamin C.
* Captain Underpants series takes place in Piqua, Ohio, a real city with a population of a little over 20,000.
* Captain Underpants somehow went one step further, and gave him the even more unfortunate name of "Pee Pee Diarrheastein Poopypants Esquire".
* Captain Underpants story has a chapter entitled this, usually after a character says something to the effect of "I hope this works!" followed by the chapter only having something like "It worked".
* Captain Underpants. The antagonist comes from a country named New Swissland, where everyone has a silly name. His is Professor Pippy Pee Poopypants. He later changes it Tippy T. Tinkletrousers. The book even comes with a naming chart so that readers can make their own silly name.
* Captain Underpants: The First Epic Movie focuses mainly on capturing the tone and humor of the books in general rather than adapting one in particular. In practice, the movie combines the first four books, with the plot mainly a mix of "The Adventures Of" and "Perilous Plot of Professor Poopypants" with a good splash of "Attack of the Talking Toilets" and a few scattered elements lifted from "Invasion of the Incredibly Naughty Cafeteria Ladies from Outer Space (and the Subsequent Assault of the Equally Evil Lunchroom Zombie Nerds)".
* Captain Underpants: The First Epic Movie, George and Harold snoop through Principal Krupp's house, realize how bitter and lonely he is from the state the house is in, and decide to set him up on a date with Edith the lunch lady, hoping that love will make him less bitter.
* Captain Underpants: The First Epic Movie, Harold and George occasionally break the fourth wall by talking to the audience and even freeze the movie at certain points to explain what's going on.
* Captain Underpants: The First Epic Movie. He mentions the planet Uranus, which triggers the memory of how George and Harold first met, and gets them laughing again.
* Captain Underpants: The First Epic Movie, Mr. Krupp fires the science teacher, Mr. Fyde, because the latter wanted to spend the Saturday with his family instead of attending the mandatory Invention Convention.
* Captain Underpants: The First Epic Movie: Principal Krupp announces to the school that Mr. Fyde, the science teacher, is "no longer with us," causing a school girl to think that he's dead and forcing Krupp to irritably rephrase his sentence.
* Captain Underpants: The First Epic Movie: When delivering a boring lecture to the class:
* Captain Underpants: The First Epic Movie: When George and Harold introduce their bullying principal Mr. Krupp, their brief show of just how nasty he can be is a handmade comic of him torching a kitten (with a censor bar over it.)
* Captain Underpants: The First Epic Movie, when Professor P. is searching his briefcase for his resume, he casually tosses out tons of weapons ranging from lit sticks of dynamite to bear traps and active chainsaws.
* Captain Underpants: The First Epic Movie, with the other parts flat on one side.
* Captain Underpants The titular Captain is a prime example of this. Created when a high school principal was hypnotized into believing he was a superhero created by two kids, his superhero and civilian identities know nothing of each other. He doesn't understand the difference between his real adventures and those written in the comics (thinking at one point that spray-starch was his kryptonite) and usually loses the first time he fights the villain.
* Captain Underpants this happens midway through the book. As George & Harold are about to hypnotize Ms. Ribble, the chapter is interrupted by a news report which says that the Hypno rings have just been recalled because they cause a

hypnotized woman to do the opposite of what she has been hypnotized to do.
* Captain Underpants through their Scholastic Book Club Service. It even included an owner's manual with the warning not to dump water on the head of a hypnotized person.
* Captain Underpants, usually through a combination of rearranging and removing letters. For example, the first book sees them turning a sign outside a florist's shop from "PICK YOUR OWN ROSES" to "PICK OUR NOSES"
* Captain Underpants was how it gave Mr. Krupp more depth as a character, something he wished he'd done.
* Captain Underpants. Yeah, that's how it goes. The savvy kids even comment on this in one book (as pictured above), when one says that he's surprised that they made it to the end of the book without going "Oh no!" and "Here we go again!". Of course, they don't really.
* Captain Universe. The Enigma Force grants great power to the Spider-Man of Earth-13, but if he travelled to another universe he'd just be another web-slinger, so he remained on his Earth to give the dimension-hopping army a 'safe zone' they could retreat to as he would be too powerful for the standard Inheritors to battle.
* Captain Unohana Retsu is head of the 4th squad, which is an entire unit of combat medics. She's both famous for being the perfect
* Captain Vere in the opera version of Billy Budd. In the book he's shot in a battle, in the opera he lives to old age and the whole story is his flashback. However, at least one production (in Hamburg) had him slitting his wrists in the Epilogue, and there have also been productions in which he's played as a ghost during the Prologue and Epilogue. The play by Louis O. Coxe and Robert Chapman simply ends with Billy Budd's hanging, leaving what became of Vere an open question, though the 1962 movie, based on the play, does include his death.
* Captain Victoria Gates, the replacement to Captain Roy Montgomery, was also previously assigned to Internal Affairs, which creates tension with her new subordinates. She eventually explains to Beckett that she worked in IA not because she hates other cops (her father and uncles were cops), but because some of them really
* Captain Victory and the Galactic Rangers miniseries, one of Captain Victor's clones is sent back in time to Earth in the 1970s.
* Captain Victory and the Galactic Rangers's attempts to rescue one of the Captain Victory clones is hampered by Ranger Central's imposing a quarantine around the area of space where the clone has landed.
* Captain Vole casually tears the arm off an assassin to counter his
* Captain Vole is a Jagerkin example of this trope; the only one of their kind to utterly discard his loyalty to the Heterodynes to serve Baron Wulfenbach, Vole doesn't consider himself a Jager and seems to relish the idea of destroying what is left of the Heterodynes so the Jagers have no choice but to follow his lead. Because of the friction this causes with the other Jagers (who all serve Wulfenbach while awaiting the Heterodynes' return), Vole has been forcibly assigned to Mechanicsburg — the only town in Europa the Jagerkin cannot enter.
* Captain Vole whenever his more antagonistic qualities are highlighted.
* Captain Vorpatril's Alliance admitted in the aforementioned book, she should have realized that gold was rare universe-wide.
* Captain Vorpatril's Alliance, and as a resident alien on Earth, but specifically calls out her status as someone who's been stateless for over a century.
* Captain Vorpatril's Alliance, as ImpSec HQ is sinking into a mudhole, and people leave the building or stay at their posts:
* Captain Vorpatril's Alliance begins with looking for a ring stealing military equipment.
* Captain Vorpatril's Alliance it turns out that the hired killers sent after Tej and Rish had been contracted by a Barrayaran deep cover agent to protect his op. The same agent recruited Ivan to invite Tej on a date to make sure that the assassin and Tej didn't cross paths.
* Captain Vorpatril's Alliance Ivan and Tej are the alpha couple, and Byerly and Rish are the betas. Ivan and Byerly are old acquaintances (with a somewhat

belligerent friendship), and Tej and Rish are sisters.
* Captain Vorpatril's Alliance: Ivan hurriedly marries Tej to give her Barrayaran citizenship and immunity to arrest by Komarran police. They intend a quickie divorce, but the judge (a relative of Ivan's) determines that no grounds for divorce in Barrayaran law are met and refuses. (In a society where arranged marriages are common, not being in love is not a ground for divorce.)
* Captain Vorpatril's Alliance, Ivan mentions that some earlier point in his life, Miles ended up breaking a leg doing something similar.
* Captain Vorpatril's Alliance, Rish gets hooked on several Komarrian Holo Dramas while in hiding in her apartment.
* Captain Vorpatril's Alliance that Simon Illyan's eidetic memory chip was once the repository of the largest and strangest porn collection on Barrayar.
* Captain Vorpatril's Alliance we learn that Ivan's birthday starts off with burning an offering for his father in the middle of a Vorbarr Sultana street, where his mother watched her husband shot in front of her as she went into labor.
* Captain Vorpatril's Alliance. Yes, even if the bare bones ceremony is performed before the groom's distant cousin and bride's half-sister while Immigration is forcing their way through a barricaded apartment door a room away.
* Captain Vul's reaction when he finds out that Main Cannon #2 has been destroyed by Kirby.
* "Captain" Waylon (Note the quotation marks), who unsurprisingly ends up working for Greyfield, is another example. After you rescue him and his unit (and he leaves), his wingmen defect and join your unit specifically because he was this but they felt following him was the only way to stay alive in the apocalyptic wasteland.
* Captain Wentworth befriends the Musgroves of Uppercross and both of the eldest sisters Henrietta and Louisa like him a lot. Mary and Charles Musgrove agree that he would be a great match for either but keep arguing over which one he prefers. It's even hinted that Captain Wentworth could become a baronet. Mary thinks 'Lady Wentworth' sounds very well.
* Captain Werner Von Ebrennac will be the last war between France and Germany, and that the two countries may forge a lasting alliance which will be the foundation of a new, peaceful Europe. This is depicted as evidence of his hopeless naivety but fast forward a few decades...
* Captain when Laura Roslin nicknames him "Captain Apollo" after initially mistaking his call-sign for his actual name, but continues to do so afterwards as it has a nice ring to it.
* Captain, who would have a cadet stand at attention in the back of the room if he caught him nodding off. If the cadet STILL managed to nod off while at attention, the instructor would have them hold a chair over their head. (This is akin to proper military behavior. If someone is nodding off during a briefing it was perfectly understandable to get up from your seat and stand in the back.)
* Captain William Sutherland, a member of the Earth Forces' General Staff in
* CAPTAIN YAJIMA goes even further by combining the aforementioned Rankin/Bass-esque animation with that of anime from the 1970s, even being presented in a 4:3 aspect ratio (the others were in 16:9 widescreen). The short is also entirely in Japanese, with the yellow subtitles often seen in subtitled anime from that era.
* CAPTAIN YAJIMA TV specials. This is best seen in how only characters' bottom lips move when they talk.
* CAPTAIN YAJIMA, Yajima and her friends search for a rogue alien by going into a "space bar", but they instead find a "space metal" alien band performing.
* captain Yamamoto from continuing to teach him because they were afraid a skilled Kenpachi would be too powerful to defeat should he ever rebel.
* Captain Yellow also falls to his death when Goku punches out his plane.
* Captain Zed And The Zee Zone had a dream sequence where a kid always got picked last for sports. In the dream, out of three players, the captains picked the other two people, and then they picked the bushes and rocks (who grew legs and arms and started playing tennis with them).
* Captain Zed and the Zee Zone has Captain Zed and the Dream Police spending their

nights guarding the dreamscape of children against the Nightmares.
* Captain Zed and the Zee Zone, the rather macho dream policeman Captain Zed has an assistant called PJ. In early series it is very, very, hard to precisely work out his/her gender, which subverts this trope. The best guess you can make is "maybe a tomboyish female. Or a teenage boy." Later series of Captain Z make it rather clearer: PJ is a normally endowed human female, physically recognizable as such by the usual secondary sexual characteristics, ie wider hips, facial features and a hint of bust.
* CAPTCHAs, those things where you have to prove that you're a human and not a bot by entering the text from an image, have quite a difficult time distinguishing between bots and blind humans— because speech synthesizers and Braille displays can't render images. For this reason, an increasing number of CAPTCHA-protected sites include an option to have the characters spoken at you (which would benefit the hearing blind but not bots or the deaf-blind, though it's somewhat unlikely a person who is both deaf and blind would be operating a standard computer).
* Capt. Fantastic and the Brown Dirt Cowboy and Marketing Vice-President Tom Nieman can be seen in the backglass crowd.
* Cap: The maximum quantity of something that a game allows for, be it a set amount of inventory space or anything else.
* Capt. Hook: Adventures of a Notorious Youth (a prequel about Captain Hook's school days)
* Caption Contest: A challenge to make a witty remark that goes under a funny picture.
* Caption Contest: A funny picture, huh? I bet I can make a wittier remark about it than you can!
* Caption for a city being invaded by killer ungulates: "Scene from the film Giraffes IV: This time, they're not just looking for acacia leaves."
* caption on the official website. Same with the Firebat and other heroes.
* captions for the hearing impaired show the name of the character speaking when the character's face isn't visible, and thus name multiple members of the Light before their identities are meant to be revealed.
* Captive (AbyssCronica): Heat is the sweetest Kid pirate but he is still a Kid pirate.
* Captive (AbyssCronica): Kid and Birdie fall in love with each other fairly quickly.
* Captive Audience: People are captured and forced to be spectators to an event.
* Captive of Gor, Elinor is locked into a slave box for eighteen days to break her spirit after repeated minor offenses.
* Captive of the Red Vixen where Melika (renamed Melanie Lovejoy in the final draft) became a pirate.
* Captive Prince: Akielos has a martial culture and is very serious about honorable combat. When Akielon and Veretian forces fight together, the Veretians are utterly perplexed that the Akielon commander gives their enemy notice of an impending attack, as is proper in Akielos. More significantly, a large part of the enmity between Akielos and Vere stems from the Veretians attacking during a parlay.
* Captive Prince: Damianos looms over Laurent. On a comment from Damianos that his borrowed armor is too small, Laurent suggests that he borrows the armor of a warhorse instead. According to Laurent:
* Captive Prince: Each book has a couple getting together in the background that serves as a foil to Damen and Laurent.
* Captive Prince for the blonde, fair-skinned prince of an enemy nation, which made some people uncomfortable, especially since the story would follow their love story, but the two spend the entirety of the first novel of the trilogy hating each other.
* Captive Prince. Having an illegitimate child in Vere is highly stigmatized, so many pre-marital relationships are homosexual.
* Captive Prince: Jord the Prince's Guard, Charls the cloth merchant, and Ancel the Pet each have a short story written from their perspective, providing extra detail

to their backstories and to their encounters with the main characters.
* Captive Prince of Vere have left Laurent an incredibly good liar. Similarly, the Regent, from whom Laurent apparently learned all his tricks.
* Captive Prince Prince Laurent, he is attracted to him and prone to staring.
* Captive Prince short story "The Summer Palace", set after the main trilogy, Damen and Laurent finally have the free time to visit Damen's summer palace, an oceanside estate that's open to its many gardens and outdoor baths. They have a tender tryst outside and start to come to terms with the pain they'd caused each other when they were enemies.
* Captive Prince: The country of Akielos favours red, while its rival country of Vere favours blue. The lines start to blur late in the series, especially as the Veretian Regent moves to claim Akielos' throne for himself.
* Captive Pursuit", O'Brien offers his assistance to fix Tosk's ship but doesn't know how to go about it unless he knows what the broken part actually does. Tosk explains that it collect interstellar particles and converts it into energy for the engines. Miles compares it to a ramscoop used to suck in air. With that comparison in mind, Miles is able to fix the ship and improve its performance.
* Captive Push: A character(s) has their hands tied and is forced to march ahead by their captors.
* captive. Said woman ultimately gives an alibi for the man, leading to the detectives to incredulously comment
* Captives, is in jail for murdering his wife, whom he believed was two-timing him.
* Captive State: Aliens known only as the Legislators have conquered Earth and are forcing the humans to mine for resources.
* Captive State bug larvae, and they also use an explosive transparent gel stated to be organic. However, their ships appear to be made of stone instead.
* Captive State mechanic, a deeply religious ex-priest, and an ex-Marine. Rafe's partner is a low-class wigger.
* Captive State. Most modern computing technology seems to have disappeared: people call each other on pay phones, take photos with Polaroid cameras, etc. Any remaining high tech is part of the police surveillance apparatus. This is a result of the Internet being largely shut down to stifle any opposition.
* Captive State: Most of the film is set in 2027, nine years into the alien rule of Earth.
* Captive State: Public religious displays are banned, as shown in background references such as a sign saying that praying and congregating is prohibited. This sets up a switch when one of the resistance members tells another to take something off because "you might as well wear a target". The obvious choice is the bandage covering where her tracker was, but it's the cross necklace she's wearing. It also helps explain just how many people oppose the aliens' occupation, since this would alienate the majority.
* Captive State: The film opens with one in which an alien race conquers Earth easily.
* Captive State: The Legislators have these under their environment suits. Except for their round, jawless mouths, their faces are mottled, white flesh.
* Captive State: The strange rock-like spaceships that transfer people off-planet are very blimp-like.
* Captivity Harmonica plays as the camera pans past everyone coping — including Crow playing the harmonica.
* Captivity is strapped to a chair and forced to drink through a funnel a mixture of blended human body parts; eye, nose, ear, and intestines.
* Capt. Kazimierz Leski of Polish Army. After the fall of Poland in 1939, he began to operate for the Underground State as intelligence and counterintelligence officer. He was traveling across Europe, usually impersonating various German officers and specialists and extracting vital information for the Allies. He has been captured several times (by Soviets, Germans and Soviet-controlled
* CaptnAwesomee (Reuploaded, since the author's account was suspended)
* Capt'n Crazy. Actually, this was a late development - for a long time, even the author wasn't sure WTH the Capt'n actually is.

* Capt. Nixon, despite his three combat jumps, reveals in episode 9 that he had never fired his weapon in combat. For much of the series he is the intelligence officer.
* Capto Iugulum and eventually becomes the United Proletarist Republics of America. The rest gets split among a rump United States, other republics in New England and in the Great Lakes region, and numerous warlord states in the West. All of the latter gets reunited under a "Second Union" within a few years, and the United States remains a secondary power, albeit much reduced in strength.
* Capto Iugulum: Happens to Hungary, the United States, Kongo, the Franco-Burgundian Confederation (although it reunifies), Spain, and British South Africa over the course of the the NES.
* Capto Iugulum: Scottist America was definitely this, with the military controlling all aspects of society, the practice of slavery expanding into industry and lasting into the 20th century, even harsher Indian Wars, and much of the west ruled by generals via "Military Districts."
* capture and redirect energy beams and a physical boost sufficient to let her clumsy boyfriend become a star quarterback.
* Capture and Replicate — Someone is kept alive while their captor impersonates them.
* Capture and Replicate: When a kidnapped person is replaced with a clone to infiltrate their life.
* Capture Creatures has Tamzen, one of the main protagonists of the series.
* captured by Bowser, and occasionally other villains, numerous times but it never gets to her.
* Captured by Cannibals: Because of its racist implications, the trope has been completely abandoned.
* Captured by Cannibals: Can the heroes escape in time to avoid becoming the main course?
* Captured by Cannibals kidnap foreigners, they are in danger of being eaten by them.
* Captured by Cannibals. Luckily, Buggy and his officers were able to save them before any real damage was done.
* Captured by Cannibals with his attempts to escape, including at one point resigning himself to his fate and sprinkling himself with steak seasoning.
* captured by Elaida's faction of Aes Sedai and demoted to novice, with her channeling almost completely suppressed with forkroot. What little of the One Power she can channel, she uses with a level of finesse that awes her instructor.
* captured by Iraqis and launched into the sun. A shame Wendy never realized Ms. Ellen was a lesbian.
* Captured on Purpose: Someone allows themselves to be captured by the enemy as part of a plan.
* Captured pirates and other convicted criminals are transported in this manner to Impel Down. Normally they stop at shackles (Since the cuffs are made out of a mineral that can zap superpowers), but when Usopp and Franky are caught by the CP9, they are carried to the Sea Train in burlap sacks.
* captured Pokémon can't do those things, but it doesn't explain why wild ones aren't using their abilities to their fullest nor why wild Pokémon are much, much weaker compared to trained ones. Trained or not, being restrained should give wild Pokémon a huge advantage. Perhaps that thing about wild ones attempting to prove their worth/test your worth could be used as justification...
* Captured tanks and aircraft made up a large portion of Finnish Army and Finnish Air Force fighting capability in WWII. There are still many WWII Russian tanks in Finland in fully operable condition, albeit in museums and collections. [Actually so many that many Finnish war films have been able to be made using
* captured Xadhoom, especially because by doing that the Evronians lose their hostages, leading immediately to the second.
* Captures and evolutions are regularly spoiled because of merchandise. If a character is going to capture a Pokémon, a toy will usually be released around that time, with that trainer's name (i.e. "Ash's Palpitoad" or "Serena's

Pancham"). Evolutions are usually spoiled via group shots on merch, where the evolved Pokémon will be depicted amongst all of the main characters' Pokémon, with their old form nowhere in sight.
* captures Iserlohn fortress (one of which, being the man sent by Reinhard to cause the coup, may or may not count for this). They don't call him "The Magician" for nothing.
* capture the Brain Bug, Carl psychically merges with it to learn what it's thinking. When he announces that it's afraid, rather than feeling empathy or sympathy, all the soldiers triumphantly cheer!
* Capture the Flag, a billionaire wants to use his rocket to claim the Moon and its resources, so he states the Moon landing was a hoax while secretly planning to destroy all proof of the Apollo landings.
* Capture the Flag: Carson tries to sabotage NASA by making their rocket leave Earth before anyone boards it and the plan fails because Mike and Amy snuck in and Mike's grandfather went there to get them out. Had Carson not tried this, he'd have about ten more hours to get rid of the flag and anything else that might be used as evidence that the original Moon landing wasn't a hoax.
* Capture the Flag: Frank's space suit is running dangerously low on oxygen after he, Mike and Amy escape from Carson's moon base, hench why he is forced to go back to the moon lander and replace his oxygen tank, leaving Mike and Amy to take on Carson themselves. He barely makes it in time.
* Capture the Flag). It's only through the outsiders' interference that the kids are prevented from killing everyone in town and the adults are allowed to return.
* Capture the Flag: Mike and Amy stow away on board the moonlander, and thus accompany Mike's grandfather to the moon.
* Capture the Flag) where two teams try to capture each other's flag. And kill lots of them while they're at it, usually.
* "Capture You" seems normal at first but near the end, it's revealed that the song's about Ganon
* capturing hundreds of enemy ships while suffering negligible losses has rendered those captured ships hopelessly obsolete. They wind up offering a few to their allies for study purposes and scrapping the rest, since using them as raw materials is the most effective way to bring the ships up to current standards.
* capturing Sokolov, Callista will be in the bath; jumping in the bath causes a game over due to "irreconcilable hostilities".
* Capt. Winters is eventually promoted to the point where he has a desk in episode 5. Several times he is tempted to get back into the action. At one point, Winters must be given a direct order NOT to join the action by Colonel Sink.
* Capulet's offer of a new life with all the money, power, and respect he could hope for due to this trope. Knowing just how easily it was given to him, he would always be afraid that it would be taken away just as easily.
* cap was lifted a couple of months after release, so free players can go up to level 50, with anyone who bought the VIP pack getting some free car rentals as a "thank you" from EA. SpeedBoost remains, though.
* Capybaras are known for getting along quite well with other species, even cats (who usually hunt rodents).
* Car 54, Where Are You? at New York's Idlewild Airport in September 1960; Idlewild was renamed John F. Kennedy International Airport in December 1963, and Khrushchev was removed from power in 1964.
* Car 54, Where Are You? episode "Toody and Muldoon Crack Down" is set in motion by a visit to the 53rd precinct by a chief inspector, who is outraged at the number of minor violations (sidewalk obstructions, unauthorised loudspeakers, etc.) that Toody and Muldoon are allowing to go unpunished. He quickly changes his tune when he discovers that although their sector is rife with minor violations, there have been no major crimes in their sector in the nine years they've been patrolling it, and that they are near universally beloved by the local residents and business owners as friendly, helpful, and reliable.
* Car 54, Where Are You? episode "Toody and Muldoon Meet the Russians", Toody and Muldoon escort some Russians, including a female general whom Muldoon gets involved

with.
* Car 54, Where Are You? was based around an eatery next to a bank. A single scene at the end of the episode replayed the entire plot with the buildings' next owners, who were posing as stamp dealers.
* Car 54, Where Are You? was one of the earliest Buddy Cop shows, and the first TV police comedy.
* Car 54, Where Are You?, "White Elephant", a team of crooks moves into a diner next door to a bank with the intention of tunneling through ... but the two officers of Car 54 continually interrupt them by trying to help the diner succeed.
* Carabinieri, and if things go south they also have larger machine guns and sniper rifles).
* Caracalla and Geta envisions the two Roman co-emperors overlooking a gladiatorial arena from a flower-decked podium.
* Caracalla wasn't very uncommon, so any will leaving money to anyone called Geta was rendered legally void, and anyone who had a slave named Geta had to change it. Why exactly the two brothers got on so badly isn't clear.
* Caracas, who wants humanity reduced to a hunter-gatherer state to keep them from harming the environment, but is rational about the priority of it and consequently doesn't waste resources enforcing it that could be better used some other way (and with a Zonemind to the north that
* Car accidents subvert the trope: safer cars (especially safer sports cars or race cars made after the 1980s) have crumple zones and are specifically built to take the impact of a crash, meaning the crash, the car, and/or both can easily look like
* Cara Confused from the UK's Confused.com ads has been shown to pull various objects from her pocket, including a house! Many people have "confused" this for something dirtier, as the way every instance is animated seems very out of context.
* Cara Crocker - aspiring porn star and internet celebrity, best known for her "Leave Britney Alone" video.
* Cara Delevingne, is openly bisexual and came out as genderfluid in 2018.
* Cara Gee and Tahmoh Pinkett really do have First Nations ancestry (her Ojibwe, him White River). However, Kat's half Cree and Caleb is half Blackfoot, so the specific backgrounds aren't a match.
* Cara Gee, who plays the brooding Amos, is pretty laid-back offscreen.
* caramelized bacon on top of the ice cream that threw people off. And yet the judges loved it.
* Caramelldansen that made it popular). Translated, it goes something like this:
* Caramelldansen Vid ever. Click on the trope page to see a list of examples.
* car, and a photographer waiting for them came to entirely the wrong conclusion...
* Car and driving noises: "Wildest Police Chases" / "Wildest Security Camera Video"-type programs are big on this; squealing tires and crunchy crashes are all dubbed in after the fact in cases featuring security camera footage, which rarely features an audio track. Even a moped will make
* Carandiru, one cop enters a cell and says "Think I'll let you live" to the prisoner inside... and returns one minute later saying "Changed my mind" before shooting him dead.
* Car and motorcycle manufacturers in general are very fond of the letter
* "Carapace armour" is a significantly more effective form of armour worn by many of the Imperial Guard's elite troops, such as Stormtroopers.
* Carapar has shown shades of this due to the effects of being regularly hypnotized by Takadox for centuries, especially in contrast with the tactician he used to be as a warlord. He's probably still smarter than Krekka and Nocturn though.
* Carasynthia Dune, a former Rebel shocktrooper, is played by former MMA fighter
* carat is a unit of weight equal to 1/5 of a gram, used for measuring diamonds and other precious stones.
* Caravaggio was obscure to infamous until the 1920s. It did not help that he painted the equivalent of Doujinshi. His normal works were considered so blasphemous that some tried to kill him. Nowadays, his

* Caraval die on the last day of the game, but they are both brought back to life at the very end.
* Caraval is that Legend's performers can't die during the game. They always come back to life after everything is over.
* Caraval, Julian and Scarlett are running away from Governor Dragna when a storm breaks out on the island forcing them to take cover. This leads to a make-out session.
* Caraval, Scarlett's father has arranged for her to marry a count whom she has never met.
* Caraval takes place at night, giving it a bit of a spooky, mysterious atmosphere. Participants can never really be sure whom to trust, or whether anything that happens is real or an illusion. Some people have even gone mad or died while playing the game.
* Caravan by Kalash93 may actually avert this trope. It depicts the situation for the fighting men in Afghanistan rather accurately through the prism of an MLP fic. As a military veteran remarked, "I especially like the message towards the end: nothing has changed, despite the "victory". There will be more caravans, more insurgents, and more blood on the sand." This is exactly what the author intended.
* Caravaneer 2, both have a large religious following in the wasteland. There's also the Kivi religion, in which they worship a scientist named Spencer Rice who showed them how to do agriculture effectively.
* Caravan have surprisingly many examples for a prog group, including the aptly-named "Love Song with Flute":
* Caravan of Courage. (This trope's working title was "Caravan Cavalry")
* "Caravan of Love" is one of the two songs most associated with The Housemartins, but was originally by Isley Jasper Isley, an offshoot group of
* Caravan, one of the central bands of the Canterbury scene, who often featured a heavy jazz influence on their brand of progressive rock. Their most jazz-influenced album is probably 1972's ''Waterloo Lily'.
* Caravan Palace ends with the protagonist reaching the edge of the world, breaking through... and ending up in the strip club from "Lone Digger". For bonus points, he's implied to be the donkey.
* Caravan Palace fight is happening around her, even when blood splashes on her body, until the end of the video when everybody else is dead.
* Caravan Palace on their debut album) and the music videos for Rock It For Me and Suzy. The music video for Mighty also consists of several clips of robots both new and old
* Caravan Palace, which mixes traditional gypsy-style jazz with Daft Punk-style house and techno.
* Caravan's "Jack and Jill" has a part with "fell... fell... fell..." repeated. To add to it, the instrumental backing repeats on a heavily syncopated beat, giving the section an unusual rhythm not unlike an actual broken record.
* Caravan to Vaccares: In this Alistair MacLean novel, our hero, Neil Bowman, signs into a hotel. The clerk looks at the girl he is with and says, "And this is Mrs. xxxxx?", he replies, "Don't be silly," and they go to their room. Once there, she objects to his not signing them in as husband and wife, and he tells her to look at her hands. He then points out she isn't wearing a wedding ring and that clerks notice that.
* Caravan. with a heavy emphasis on the tragic futility of fighting in Afghanistan.
* car battery ad, played his song "Cars" on a keyboard that was hooked up to the horns of about 30 black and white cars, arranged like the black and white keys on a keyboard. Point of the ad: The car battery was powerful enough to power thirty car horns and the keyboard, and then enough to start all 30 car engines.
* Carbon Based Lifeforms' "VLA" is just one long droning track with some distant chirping/screeching sounds that, depending on your choice of version,
* carbon copy of his original design for the Foreign Office building in Whitehall, rejected for being too Gothic. Examination of the actual Foreign Office proposal shows that this is a complete urban legend (possibly originating as a joke).
* Carbon Diaries 2015 by Saci Lloyd takes place in Great Britain after global

warming has caused climate change, and as a result, people are rationed the amount of carbon they can use.
* Carbon Fiber Man: Never carry more than 100 stones. It's an extremely harsh equipment restriction, especially considering that there are five plot-necessary artifacts which each weigh 100s and each need to be brought to the bottom of the Caverns of Chaos; the challenge thus requires you to do this naked (and without wearing a signet ring needed to peacefully pass a very nasty monster). Astonishingly, it has been completed at least once.
* Carbon monoxide (CO). It kills by attaching itself to hemoglobin, substituting oxygen. Carbon monoxide is generated by burning carbon-containing substances in insufficient amount of air for enough oxygen to form carbon dioxide. Such event can occur by closing the chimney plates before the embers have cooled down.
* Carbon nanotube transistors, but having your computer's circuitry be made out of the same stuff as you are fits the idea.
* carbosilicate amorph. He normally has two hand-shaped pseudopods and moves by sliding along, but in a pinch he can sprout an indefinite number of extra arms, and move by extending a big pseudopod from his underside with enough force to send himself flying several yards.
* carbosilicate amorph, two amorphs battling it out usually results in, rather than one or both parties dying, a single amorph with merged personality traits of both combatants.
* Car Boys.drive with a demolition derby style theme... but then they met Busto 2.0, a crash test dummy that births and destroys universes at random; and that most anything in the game can be turned into an explosion of polygons if messed with enough. The two decide to take the eldritch nature of the game and just run with it for all the comedy that they can.
* ...Carbuncle finds a Dubious Book. The book originally belonged to Witch...
* Carcano, who's cyframe is a bazooka that replaces his seemingly-lost left arm, making him a more traditional example.
* Carcassonne which add everything from simple things like extra tiles to entirely new game mechanics and pieces.
* Carcer actually points this out, saying that while Vimes requires others to believe he is a policeman in order to act as one, Carcer is better at being a criminal while no one believes he's one.
* Carceri (Chaotic Evil-Neutral Evil) is an infinite series of concentric spheres, each of limited size. Each layer of Carceri is occupied by an infinite number of planets arranged like strings of pearls, and descending to the next layer takes you to a smaller version of the planet you started on (on the first layer the planets are physically connected; each subsequent layer increases the distance between surfaces).
* Carcinisation is a very specific convergent evolution phenomenon where crustaceans just keep taking on crab-like shapes, whether true crabs or not.
* carcinoGeneticist due to unshakable belief in whatever his current mindset is a searing hatred of his past and future behavior. The other trolls find this hilarious. Karkat actually seems rather chagrined when he realizes this fact; possibly because kismesissitude is actually related to breeding and it may not be possible to provide the proper genetic material when you're your own kismesis (and being unable to provide genetic material from either of the breeding relationships is grounds for execution in Karkat's culture).
* Carciphona has "The Prohibition," which was enforced after the assassin Black Bird went on a killing spree of several magic users, believed to have been using the power of demons and being possessed by said demons.
* Car commercials with price tags framed like Christmas ornaments, or with huge bows on top of the cars.
* Car companies do this all the time, stating that their vehicle is "Best in Class", then defining the class to exclude other vehicles above a certain weight, or size, or number of seats, and so forth.
* Carcosa ones in the bunch being the ones who stick to the banishment rituals, which do not require anyone to be sacrificed.

* Carcosa: Weird Science-Fantasy Horror Setting. Hex 1613 has quicksand that can trap travelers. If the victim is unlucky they will be pulled under the surface and die of suffocation.
* Carcosa: Weird Science-Fantasy Horror Setting. In hex 0715 there's a small cave with an altar to Hastur. In front of the altar is a Red Man who petrified except for his brain and his eyes. After spending centuries in this state, he is quite insane.
* Carcosa: Weird Science-Fantasy Horror Setting. The Unquiet Worms monster is a horrid collection of worms that takes a vaguely humanoid shape and walks like a man. They're created when a Sorcerer dies and the worms that eat his brain gain his knowledge.
* Car Cushion: Someone lands on a car after falling from a great height.
* Car Cushion: The higher you are falling from, the more likely it is that a car will be there when you land.
* Card also wrote a series of short stories (collected as "Folk of the Fringe") in which US society crumbled after a limited nuclear exchange with Russia. The Mormon church and the population of the mountain west establish a quasi-theocratic society called Deseret in Utah and the surrounding areas. While certainly not a utopia, this nation is implied to be relatively stable and successful, while much of the country has descended into anarchy.
* Cardan let him be nursed by a cat rather than deal with him, and he essentially grew up running around the palace as a feral child, simultaneously ignored by his family, but still a noble in rank and thus obeyed by any one who wasn't a blood relation.
* Cardassian "enigma tales" (detective stories) get mentioned a couple of times. One episode also features Bashir and Garak having a debate about the virtues of the Cardassian "repetitive epic", a type of story in which the essential plot is repeated several times over
* Cardassian ranks, from highest to lowest, are Legate (canonically established), Jagul, Gul (canonically established), Dal, Dalin, Glinn (canonically established), Gil, Garresh, Gorr. This is
* Cardassians also had a weird clap; in one scene with Bajorans and Cardassians attending a speech by Gul Dukat, the Bajorans gave the clap mentioned above (as usual), while the Cardassians drummed their hands on the table.
* Cardassians apparently also have a rather thriving art and architecture community. When Jake is used by a... Muse Vampire?... he's awestruck that she knew a prominent Cardassian architect. During the Dominion's occupation of the station Gul Dukat's daughter wins an award from a Cardassian art foundation - Cardassian art is very traditional Japanese in style.
* Cardassians are also shown to be attracted to human and Bajoran women, which in their case it has
* Cardassians are usually yellow-ochre or pink (both colours were used for their weapons — pink in their first few appearances, later yellow, their transporter is yellow-ochre, on star charts they're either yellow or pink). Their ship hulls are ochre. Their graphics and display panels use orange/beige and green, colours that sometimes appear on their cultural emblem.
* Cardassians captains are called "Guls" which may act as governors as well, "Glinns", which often act as first officers, and "Legates" which are basically the admirality.
* Cardassians have a fairly diverse space fleet including small Hideki-clas ships that double as warp-capable fighters/long-range shuttles/scouts, shipyards with utility pods and and another, boxier shuttle, a variety of freighters, the
* Cardassians have a similar custom of snapping at each other during their courtship period. A female Cardassian engineer argued the toss extensively with O'Brien, only to reveal later that she found him attractive, bluntly declaring, "I assure you that I am quite fertile." She took the news that O'Brien was already married surprisingly well, saying at the end that Keiko was a lucky woman.
* Cardassian torturer, who serves raw taspar eggs in an attempt to degrade him. Although initially disgusted, Picard, starving after many days of torture, eats it.

Ironically, taspar eggs are considered a delicacy on Cardassia. Although since another Cardassian talked about eating raw taspar eggs while homeless implies that the delicacy version is prepared or cooked in some way. Raw taspar eggs are considered to be very nutritious, but absolutely disgusting even to Cardassians.
* Cardassian Union ships are designated CUV, likely Cardassian Union Vessel.
* Cardassian voles are six-legged creatures resembling very big rats. They infest the titular station's out-of-the-way crawl spaces and service areas. They are notoriously tenacious and hard to get rid of due to being
* Card Battle Game: A game in which players brings their own deck of cards to play.
* Cardboard Angel intercepts the letter and uses it to publicly humiliate Mayuko.
* Cardboard Angel when Mayu tries to reprimand the ghostly, and only visible to her, Yuuji who was trying to invisibly mess with the guy she likes.
* Cardboard: Bill the cardboard Boxer wants to be human. It's implied that he got his wish in the end.
* Cardboard Box of Unemployment: When a person gets fired, they have to carry their possessions in a cardboard box.
* cardboard box that the set came in, praising its corrugated walls and high crush strength. The actual model got no such commendation.
* Cardboard has the giant Cardboard Marcus in the cardboard monsters' world.
* Cardboard is fireproof. Yes, by wearing the cardboard box you won't take damage from flames and can't be lit on fire, and even if on fire donning a box will put it out. The only thing that can hurt you is a direct blast from a flamethrower, and even
* Cardboard. It's ambiguous if this is actually true or if Gideon was just making it up.
* Cardboard: Pink Eye wears black sunglasses to hide his, well, pink eyes.
* Cardboard Prison: A prison that is way too easy to escape, so that villains can be reused.
* Cardboard Prison described below; when not even a long prison sentence will last for a criminal.
* Cardboard Prison to a halt. Fortunately - so to speak - he also turns out to be a sadistic monster who steps way past his boundaries, abuses his inmates, and eventually starts locking up politicians and media members, blaming them for allowing crime to run rampant in the first place, allowing Batman to take him down without any worries.
* Cardboard Prison: When inmates are able to escape from jail with absurd ease.
* Cardboard, the cardboard monsters dig up Marcus' house and create their own living cardboard world underground.
* Card Captor Rad has Alexis and the Autobots seeing a broadcast from the science fair being messed with by a Sakura Card.
* Cardcaptor Rad has Red Alert; he's the blunt, harsh and critical Autobot medic, but he can be just as awkward and has his kinder moments.
* Cardcaptor Rad mentality to something of an older brother figure to the kids.
* Cardcaptor Rad taking the other mini-cons to go to the fishing booth.
* Cardcaptor Rad, there's just as much, if not more, focus on character interaction than action.
* Cardcaptor Rad: When Hot Shot demands to know what Red Alert's problem with him is, the latter quite bluntly lays out all his faults.
* Cardcaptor Sakura). After Sakura becomes Master of the Cards, the rest of the main arc must be resolved by her with the others providing marginal assistance. As such, most of Syaoran's spotlight at this point consists of one or two short scenes concerning his growing crush on Sakura (he does still get limelight episodes but they revolve entirely around being a love interest).
* Cardcaptor Sakura all in one sitting, nearly killing herself in the process.
* Cardcaptor Sakura and a powerful one to boot, it is essentially Sakura's signature card.
* Cardcaptor Sakura, and her love for her fiancé is what motivates her to keep the store running.
* Cardcaptor Sakura and he's the ultimate source of most of the action of the other

two.
* Cardcaptor Sakura. And it changes form whether she's dealing with Clow Cards, or turning them into Sakura Cards.
* Cardcaptor Sakura and later died. While Sonomi did apparently marry a man and have a child with him, it didn't last and during the series she is single and still very much in love with Nadeshiko.
* Cardcaptor Sakura, and once it's dealt with the shop can operate normally, subverting the trope. It even makes a couple more appearances afterwards, showing that it's thriving.
* Cardcaptor Sakura, and the oft-visited park has a giant penguin slide known as 'King Penguin'. Sakura evidently likes them quite a bit.
* Cardcaptor Sakura, and which was preparing to attack Toemeda. Sakura grew to giant size to fight the dragon, and, miraculously, no one noticed.
* Cardcaptor Sakura anime and manga kicks her older brother in the shin with her rollerblades in the first issue/episode, as well as a couple of other times in other episodes.
* Cardcaptor Sakura anime short depicts the show's first opening as a music video made by Tomoyo.
* Cardcaptor Sakura anime was airing, peaking at #1 in 2000 when the series ended.
* Cardcaptor Sakura are similar, in that they're much more low-key and self-assured than Sakura and Syaoran. They might not be sure about how the other feels yet, but they're both pretty sure where they stand, and there's no real drama in their story.
* Cardcaptor Sakura are this trope all over, despite Tomoyo's feelings being far less chaste.
* Cardcaptor Sakura as a stuffed animal and ordinary human, but even after recovering their true forms, they don't use them much. Probably because a large flying lion with some kind of helmet and a rather scary blueish angel would freak people out. The main cast, however, doesn't care. It serves a practical function as well, particularly in the case of Yue. Their true forms constantly emit magic (since both are the products of magic), which becomes dangerous if prolonged. This becomes a plot point in the "Sakura Cards" arc when a magic field prevents both of them from returning to their "borrowed forms" and Sakura has to come up with a solution.
* Cardcaptor Sakura as non-magical, she had no idea how to break the spell until she was given a dead crab as a gift. She was inspired by the crab's shell which protects it "just like a shield!" and deduced that she could use her Shield card to protect her allies from the curse's outside interference long enough for them to transform.
* Cardcaptor Sakura, as opposed to just being a background joke character with no importance to the plot. Sakura herself comments that her brother holds a LOT of part time jobs, because Touya wants to make and save as much money possible, so he could go to college without being a burden for his father. He also is implied to take them so he can look after Sakura.
* Cardcaptor Sakura book that makes everything written in it materialize.
* Cardcaptor Sakura bumped up the rating of the original series to TV-14, despite it otherwise containing no offensive content, purely due to Mr. Terada's presence.
* Cardcaptor Sakura, but everyone will forget that their most beloved person ever meant anything to them.
* Cardcaptor Sakura, but is able to see the hidden intentions of every character she comes across even though she's a fourth-grader.
* Cardcaptor Sakura, but then played straight in the dub. Kero and Shaoran Li's voices remain the same, but their speech patterns and mannerisms are noticeably swapped.
* Cardcaptor Sakura" by the pimps, who state that one has to break a girl to make them a "good whore," and has a waitress described as not looking old enough to drink the alcohol she serves. Sakura's mother Nadeshiko was kidnapped by the employees there, but her friends raided the building and rescued her before anything truly unfortunate happened.

* Cardcaptor Sakura (CardCaptors), KidsWB only aired about half of them (the more action packed and/or Shaoran-centered ones), and very much out of order.
* Cardcaptor Sakura Clear Card are things like collector-grade figures and replicas, as well as expensive cosmetics and clothing, with very few things kids could afford or would be interested in.
* Cardcaptor Sakura: Clear Card for Filipino Otakus who grew up with the series.
* Cardcaptor Sakura Clear Card, the two having similar sounding family names and near-identical personalities. In the anime, Meiling lampshades it, calling Akiho a clone of Sakura.
* Cardcaptor Sakura: Clow Reed and his guardian/daughter Nakuru Akizuki aka Rubymoon. Subverted with Spinel Sun aka Suppi, who can't eat sweets because MY GOD, the sugar highs he goes through...
* Cardcaptor Sakura, created in 2016, starts two years later with Sakura starting junior high, and everyone uses touchscreen smart phones about five years before they would become commonplace.
* Cardcaptor Sakura design Sakura some darn creative outfit. Sometimes they had some practical benefit but usually, they were just to make her look cute.
* Cardcaptor Sakura does this to show off Syaoran and Sakura's school uniforms, either in little shorts narrated by Kero at the end of some episodes, or in promotional artwork.
* Cardcaptor Sakura) during a situation that requires her to both fly and use her staff as a sword (using, of course, the Sword card. Clow Reed was nothing if not straightforward in naming).
* Cardcaptor Sakura episode, Kero and Syaoran's voices remain the same, but their speech patterns and mannerisms are noticeably swapped which does not go unnoticed by Meiling and Tomoyo. Kero as Syaoran claims that Kero's Osaka dialect must have rubbed off on him due to them hanging out together so much.
* Cardcaptor Sakura franchise (though that also fits in the second set).
* Cardcaptor Sakura, generally called in by Tomoyo when transport is needed an no other adult figures are available.
* Cardcaptor Sakura had Clow Reed's former student Madoushi, particularly in the dub (where she was also his girlfriend at one point).
* Cardcaptor Sakura had trained with Syaoran in martial arts and they were able to carry out a coordinated attack to defeat it.
* Cardcaptor Sakura has an episode where she and her class go to a skating rink. While Sakura is good at rollerskating (she does this to school everyday) she is not good at skating on ice. The episode involves her learning how to do it, which comes in very handy given there's a Clow Card (the Freeze) on the loose in the rink...
* Cardcaptor Sakura has his birthday on February 29. His mother always added it to her date calendars.
* Cardcaptor Sakura has this effect, taking a form to each viewer depending on what frightens them the most or what they desire. For example, Sakura saw her mother, allowing the card to have a strong hold over her, while Tomoyo, anticlimactically, merely saw a food item because she was hungry.
* Cardcaptor Sakura has Yue, who's hair, even braided, trails a good two feet behind him on the floor.
* Cardcaptor Sakura have episodes with ghost stories that are actually true.
* Cardcaptor Sakura Her cousin, Sonomi feels the same way towards her, since Sonomi had a crush on her (although Nadeshiko did not return her feelings), and is jealous of Fujitaka, and blames him for her early death.
* Cardcaptor Sakura hosts the second type: at the end of the first arc, the series takes an abrupt twist when the cast (and audience) learns that Yukito wasn't human. Needless to say, the character in question goes through several of the same angst and questioning of their own existence as is described above when they later find out themselves.
* Cardcaptor Sakura), however it is obvious her heart is much bigger than her brain.
* Cardcaptor Sakura in Episode 57 was the definitive Falling in Love Montage (if only one-sided) for Syaoran towards Sakura.

* Cardcaptor Sakura in most situations. She also has a passion for dressing Sakura, the perpetually oblivious target of her affections, in a vast array of fetish-tastic outfits while she records her... and watching aforementioned recordings repeatedly... alone...
* Cardcaptor Sakura: In one episode of the Sakura Card arc, Eriol traps Sakura inside the Alice in Wonderland book.
* Cardcaptor Sakura in other ways. Her obsession with filming all of Sakura's exploits even disturbs Sakura on occasion, and in an early episode, she gives an impromptu manifesto on Sakura's varied awesomeness to a boy who had just complimented Sakura on her athletic skill.
* Cardcaptor Sakura. Interestingly, this is the only English localization that has taken this route, as the dub of the second film and Clear Card arc have him retain his cute voice while in his stuffed animal-like form.
* Cardcaptor Sakura. In the manga (and second movie of the anime), Tomoyo (and Meiling) often make excuses to disappear when Syaoran gets close to confessing his love to Sakura. Subverted once with Sakura and Yukito in the Path of Stars; everyone makes sure they enter together alone, Eriol even holds off his mischief for a while, but the talk that ensues is Yukito turning Sakura down and helping her realize that she loves him as family.
* Cardcaptor Sakura is a top track & field athlete, a cheerleader, and the sweetest girl around. By extension, so are her cheerleader friends Chiharu and Naoko.
* Cardcaptor Sakura is famous for merging Eastern and Western magic styles, because his father was British and his mother was Chinese.
* Cardcaptor Sakura. It's not that Sakura doesn't know Syaoran is rivalling her for the Clow Cards, she's even a bit genuinely intimidated by it, just she doesn't understand why it's a rivalry for the large part. She even thanks Syaoran for helping her collect some or even gives him ones she believes he earned more. This complete lack of animosity eventually wears down Syaoran's competitive streak until he's more just her ally.
* Cardcaptor Sakura. It's Sakura's first time to the airport and riding an airplane, so Touya pranks her by telling her that she has to take off her shoes before she boards, just as she would before entering a house. She embarrasses herself in front of the flight attendant at the counter, who tells her that this isn't necessary. This also being Japan, the process of going to an airport and taking a plane is generally less strenuous than it is anywhere else.
* Cardcaptor Sakura it's to make money for college, but many believe that he does it to keep an eye on his sister Sakura. In the Manga version he does actually buy a motorcycle with it, but then he doesn't use it as hes afraid Sakura will try to follow on her rollerblades.
* Cardcaptor Sakura made it abundantly clear that Sakura was the protagonist.
* Cardcaptor Sakura may qualify. Though she's not interested in dressing up herself, but instead making distinctive cosplay-ish battle outfits for Sakura.
* Cardcaptor Sakura, Meiling invokes this as the very reason was to why she joined the cheerleading squad.
* Cardcaptor Sakura mirrors Sakura's actions in order to reveal its identity.
* Cardcaptor Sakura movie. They gush over Sakura and Tomoyo... until Touya and Yukito arrive, at which point they switch to gushing over the guys. (Syaoran is exasperated by this.)
* Cardcaptor Sakura Naoko Yanagisawa who, during a conversation about a haunted house, mentioned that she "like[d] that sort of thing." The manga included visual aid of "that sort of thing" (UFOs, ghosts, monsters, unusual temples, and shrines). Of course, this tends to creep the living hell out of poor Sakura.
* Cardcaptor Sakura: "No-one's allowed to bully my little sister but me!"
* Cardcaptor Sakura of a mother, Nadeshiko, when she and her best friend Sonomi were skiing.
* Cardcaptor Sakura of several relationships (especially that of Terada and Rika) - as evidenced by Nelvana (based in Toronto) producing the original English dub.
* Cardcaptor Sakura. Once he releases the Time, he's extremely weakened.

* Cardcaptor Sakura on the school cheerleading squad, but their love for Sakura and Chiharu (respectively) has pretty much nothing to do with that.
* Cardcaptor Sakura or disliked his lower social class. Years later, Sonomi still hates Fujitaka - although in Sonomi's case, it's less that he's older and poorer and more that he took her beloved cousin away from her.
* Cardcaptor Sakura, Sakura and her friends are trying to capture the Silence card, which will teleport them away if it hears any noises. They look to be going well on their third attempt- until one of them sneezes, which the Silence hears.
* Cardcaptor Sakura, Sakura and Syaoran being interrupted both times by the highly inopportune appearance of a Clow Card.
* Cardcaptor Sakura, Sakura and Syaoran both explicitly state on more than one occasion that without the other, life is meaningless.
* Cardcaptor Sakura: Sakura realizes that her feelings for Yukito are (mostly) familial in nature, while Syaoran's crush on Yukito is explained as "attraction of similar magic", which clears the way for both of them to fall in love with each other.
* Cardcaptor Sakura, Sakura runs by the train to give Syaoran her second teddy bear to signify that they are a couple and that she will wait for him to return.
* Cardcaptor Sakura, Sakura's closeness towards Syaoran had been developed throughout the series and punctuated by being rejected by her own unrecognized crush, Yukito.
* Cardcaptor Sakura's anime adaptation added many more cards for Sakura to collect, resulting in more fight scenes and cards being used in battle. The movies were also more action-oriented than the manga.
* Cardcaptor Sakura set at an aquarium, the Water card-spirit invades and causes just the sort of damage you'd expect.
* Cardcaptor Sakura. She also dreams of what turns out to be the Final Judgment, and the people she'll later come to know as Ms. Mizuki and Yue. Both of whom she crushes on at first. (Well, sorta. Yue is complicated.)
* Cardcaptor Sakura. She does cry when Touya politely turns her affections down at the end of the episode she's featured in, but she actually apologizes for crying and tells him she'll be okay. Her only request is for him to dance with her around the bonfire.
* Cardcaptor Sakura, she does this to Tomoyo while venting that she realizes it's Sakura that Syaoran loves and there's nothing she can do about it, not even hating Sakura for it because she's just too nice to be on the receiving end.
* Cardcaptor Sakura. She's also emotional support for Sakura, and Syaoran too after he calms down.
* Cardcaptor Sakura's titular character has a magic seal that materializes whenever she uses her Clow (and later Sakura) Cards. Note that the creator of the cards, Clow Reed, was not Japanese but half-Chinese, half-English. Part of his unusual power came from having access to both Chinese Taoist and English Tarot magic.
* Cardcaptor Sakura: The arcs don't have any particular names, but they're sorted by season. The first one has 35 episodes, and focuses on Sakura sealing most of the stray cards with her power, starting with Fly and finishing with Fire. The second has 11 episodes, in which Sakura seals the remaining cards and initiates a Final Judgement trial with Yue. The last season has 24 episodes, and focuses on Sakura enhancing the cards' powers with a new incantation, followed by a climactic confrontation against Clow Reed.
* Cardcaptor Sakura (the main characters even wear similar pink outfit)
* Cardcaptor Sakura, the normally serious Spinel Sun (aka Suppi-chan) gets drunk/high on sugar, and goes crazy after eating just a few sweets.
* Cardcaptor Sakura, the Time card keeps the same day repeating indefinitely. It takes Sakura quite a while to notice it, and then she and Syaoran go hunting for it — with Syaoran being successful.
* Cardcaptor Sakura they gave much of the characters, including Sakura herself, more of a jerkish attitude.
* Cardcaptor Sakura, they had Madison Tailor (Tomoyo Daidouji) talk like one.
* Cardcaptor Sakura. They later find out it was just a passing crush and get

together.
* Cardcaptor Sakura, this effect is deliberately invoked by Eriol to help Sakura change the Clow Cards into Sakura Cards.
* Cardcaptor Sakura this trope. In fact, it's actually worse... kinda'.
* Cardcaptor Sakura, thus showing the trio (and us) that Yuuki is a tomboyish girl.
* Cardcaptor Sakura; trying to fly over the walls causes them to grow (or turns the maze into an Escher masterpiece), but the Moon Bell knocks down the walls in a straight line.
* Cardcaptor Sakura, we see several different forms of magic perform the same function — sending a person or persons to the Witch of Dimensions — each with their own special magical designs.
* Cardcaptor Sakura when Sakura and Syaoran are attacked by "The Sand" card whose main power appears to be this trope, even creating a sand whirlpool!
* Cardcaptor Sakura, when the titular character daydreams of crushing her brother in revenge for calling her a monster.
* Cardcaptor Sakura, whereas Sonomi could not accept Nadeshiko marrying Fujitaka and would hate the latter for years afterward.
* Cardcaptor Sakura, which took the form of a giant bird before Sakura sealed it in the first episode.
* Cardcaptor Sakura: While not adhering to an obvious sex or gender binary, the two spirits of the Twin card are distinguished by a blue lock of hair on one and a pink lock on the other.
* Cardcaptor Sakura: While Syaoran had a butler in the anime to watch over him during his stay in Japan, he lived on his own in the manga.
* Cardcaptor Sakura with Meiling, having fallen in love with Sakura. Meiling tearfully confesses to Tomoyo that, even though she's heartbroken and angry, she still can't bring herself to hate Sakura.
* Cardcaptor Sakura, with the reasoning that "when you are doing special things, you must wear special clothes!"
* Cardcaptor Sakura with the third-grader aged up considerably, but not enough. She even mentions they have been trying to get pregnant, even though she's only thirteen.
* Cardcaptor Sakura). Yet Sakura now has a flat-screen TV in her bedroom, uses Skype (or something similar), and has a smartphone.
* Card Captors came with stickers, and some volumes of Beyblade would be packaged with a Beyblade top or keyring.
* Cardcaptors dub, notable for being their only anime dub to use Vancouver-based voice actors instead of Toronto-based names
* Cardcaptors dub of the show did this trope quite well with some characters. The 10-years old main character Sakura was voiced by then 11-years old Carly McKillip, while 10-years old Syaoran was voiced by first Rhys Huber and then Jordan Kilik, who were either in their preteens or early teens at the time of recording. When the second movie was brought over by Geneon this was not the case, with Syaoran voiced by voice actress Mona Marshall.
* Cardcaptors was dubbed into English by Nelvana, the company did not purchase the dubbing rights to the second film and left that untouched. Instead, it was dubbed by Bang Zoom.
* Cardcaptor Torika, a doujinshi based on the Cardcaptor Sakura series featuring Sakura's daughter.
* card-carryingly. Unlike Vader, he is just as fun in the prequels, since we get to see him play the protagonists like fiddles on top of everything else.
* Card-Carrying Villain along with the fact that he rarely fights directly (in anything but an instant win) lead many people to believe he was much less serious or at least genuinely malevolent than he really is. Then he's pushed into exerting himself... As Redcloak puts it: "I know he seems funny and charming, but believe me, when you see for yourself the depths to which he'll sink, you will never sleep well again."
* Card-Carrying Villain. Also "Almost Human", and "The Chosen" and "Brains"... he kinda likes that one.

* Card-Carrying Villain: A villain who is proud of being evil to the point of constantly bragging about how rotten they are.
* Card-Carrying Villain coffee mug, and accordingly becomes immensely hammy ("TREACHERY!!!" anyone?).
* Card-Carrying Villain), has a classic good guy scar: a single line, clean, starting above his eye and ending below it without damaging the eye itself.
* Card-Carrying Villain manages to deceive two detectives with a fake name tag.
* Card-Carrying Villain manipulating the villains for the greater good.
* Card-Carrying Villain) or as a benevolent super-being (in his film festival entry, he portrays himself as both E.T. and Jesus). Furthermore, when he loses his plant (and in one case, his entire fortune as well) and Springfielders are free to openly hate and mock him, Burns is genuinely shocked that they feel that way.
* Card-Carrying Villain Orochimaru outgrows his fetish for fanning the flames of war and becoming a perfect immortal being, and now wants to trust his knowledge to the next generation and see what happens. His slithering snakes and creepy rituals, once used to terrorize the innocent and shake the foundations of nations, are now used to bolster faltering heroic forces and give confused teenagers history lessons. Orochimaru's former friend Tsunade — whose life he goes out of his way to save — uncomfortably accepts him as an ally again, but makes a point of asking "but why, Orochimaru? Why have you always been such an asshole? Why are you suddenly now not being an asshole? Are you aware of the fact that our friend Jiraiya may have still been alive if you had decided to stop being an asshole earlier?", to which Orochimaru basically replies with "don't nag me with your silly hypotheticals."
* Card-Carrying Villain: Proud of being a villain vs. the villain is convinced he's the hero.
* Card-Carrying Villain school bully Dick Bancroft's interest in Jamie (who we're told he hates, and even tried to kill once) can easily be interpreted as romantic infatuation. Again, this hasn't been lost on sporkers.
* Card-Carrying Villain Sinister Six so he can be free of the suit he's trapped in.
* Card-Carrying Villain that is Chaos) the only faction that do not have "All the aliens must die, sooner or later" as policy, and are willing to incorporate other species into the Empire — sometimes at gunpoint, but other times a species will willingly join the Tau.
* Card-Carrying Villain: The villain is proud of being evil and revels in it.
* Card-Carrying Villain, this goes equally for the Ebon Dragon himself.
* Card-Carrying Villain who decides that the best way to keep everyone safe is to have the Mini Khan eat their shadows and put them into comas so they can't fight anymore. This leads to him attacking Viper and the Guardians, and their Shadowkhan fighting each other even while fighting the heroes.
* Card-Carrying Villain, who know they are evil and will proudly flaunt it.
* Card-Carrying Villain whose worst crimes include stealing an apple from a store her family owned and accidentally causing the collapse of a condemned building, and who manages to bungle kicking a pebble. Her "crimes" are just a sad and pathetic cry for attention, and various characters lampshade that she barely qualifies as a villain at all.
* Card City Nights 1: In the Dark Alley, a 20.000 bounty is offered for a Lemon with some sort of stick, referring to Jenny Lemon and her cheese slicer.
* Card City Nights 1 referencing cards being flippable, although not in this game:
* Card City Nights 2: As is said in its materials, "it's always night in space".
* card counting to count cards. (By contrast, casinos in Atlantic City can't ban card counters due to a 1979 state Supreme Court decision, so they have to use other means to thwart the practice such as using multiple decks and employing automatic shufflers.)
* Cardenal playwright who will find pleasant that Cyrano interrumpted the play of a colleague.
* card expansion set, isn't one of these. It has 0 power (meaning it can't deal damage in combat without being boosted first) and no other offensive abilities either; it's solely useful for its damage-prevention ability and perhaps on

occasion as a blocker.
* Cardfight!! Vanguard, and in one instance, promote a CD Single of their theme song.
* Cardfight!! Vanguard anime, Chrono Shindou and Tokoha Anjou are voiced by Sam Duke and Emma Duke who are brother and sister.
* Cardfight!! Vanguard, Chrono Shindo receives a new clan called Gear Chronicles. The members of the clan have a clockwork design motif.
* Cardfight!! Vanguard G to cope with the pain. The others aren't that badly damaged, but one is in constant state of burn-out, and another is tricked into knocking himself in a coma via his own power. Notably, the reboot removes the cost of this ability.
* Cardfight!! Vanguard, had not only already learned the game, but had also completed his character arc fully.
* Cardfight!! Vanguard Has almost ten times that amount, especially in regards to the main cast and supporting characters.
* Cardfight!! Vanguard has nothing other than that name listed in Team AL4's roster.
* Cardfight!! Vanguard has three in-universe examples: United Sanctuary (both the country on the planet Cray, and the Vanguard branch in G) is commonly called "UniSan" for short, while "Dragon Empire" is sometimes called "DoraEn". There's also the Trinity Dragon team, also from G, who are sometimes called "ToriDora" for short.
* Cardfight!! Vanguard. His popularity would later spawns several character that is based on him to take on the prominent roles. Chrono Shindou, the protagonist of the fifth season onwards is heavilly based on Naoki, and when the seventh season introduced a new sidekick for Chrono, in form of Kazuma, he's also clearly based on Naoki. The seventh season also had another character acting as the sidekick of Chrono's former teammate turned rival that, despite lacking much of a similarity to Naoki in personality, is practically written to emulate the development of Naoki of the fourth season.
* Cardfight!! Vanguard is characters mentioning in a more or less casual way that the last card that was just played comes from the latest Booster Set, stating the set's name out loud. The most blatant case is in a early episode of the Asia Circuit arc, when Aichi and Kamui are shocked by seeing that Rekka already has a full Angel Feather deck the day after the launch of the set introducing the clan.
* Cardfight!! Vanguard: Many large buildings such as castles or hospitals are actually building-shaped golems.
* Cardfight!! Vanguard: Season 3 episode 2. Morikawa Katsumi was greatly surprised when being informed Tatsunagi Kourin transferred to Miyagi Academy, in fact as Aichi's classmate.
* Cardfight!! Vanguard tournaments in Japan, deck holder boxes designed after the ones used in the anime (which are open at the top instead of being fully closed as usual deck holders are) and replicas of the gaming mat seen in the anime (Ultrapro made something similar for western countries, but it's larger, it's missing the slots for deck, discard pile and damage zone, and it's available only with the Vanguard circle in red while the Japanese release comes both in red circle and blue circle variants).
* Cardfight!! Vanguard (V Series) outfits from the -IF- arc all feature a single stocking.
* Cardfight!! Vanguard (V Series) Zombies gaining the ability to foresee visions of their victory against their opponents. Some characters such as Kai, Ibuki, and Ren are able to defy those visions.
* Cardfight!! Vanguard, which activates when the player has 4 or more damage (the player loses when he/she has 6 damage). Limit Break skills generally have strong effects such as boosting power, destroying cards on the field, adding extra cards to your hand, etc., to help the player turn the tables.
* Card Force Infection inspired story about a trading card game powered by magic, cursed cards, and a plot to summon the devil.
* Card Force Infection Prior to the rise of Card Force, cursed items like this took

the form of random objects like necklaces and diamonds.
* Card Force Infection that makes Naota physically ill around Yuu, because they're magically forbidden from being near him.
* Card games published by International Games Inc. and Mattel all have the inset "From the
* Card Games, simple and resource-cheap cards often reign supreme, with efficiency being more important than raw power. Common-rarity cards also tend towards this: rare cards typically have powerful and unique effects... but it'll be rare in and of itself for anyone to have more than one, making them useless if countered. Common cards may have simpler effects, but they're easy to get and can easily be used multiple times.
* Card Hunter, Gary is stressed out looking for the final boss' game piece (which his brother Melvin has specifically said was needed for the battle to become "official" to win two tickets to a gaming convention), his mother keeps calling down to him... and he keeps telling her "not now, Mom". Before the final battle, he finally relents and asks his mom what she wants... only for her to tell him she found his "yellow dinosaur figure" in the laundry... which turned out to be the very game piece Gary was looking for.
* Cardiac Arrest, Dr. Monica Broome beat up a soap dispenser in frustration at not having beaten up two senior doctors who had been openly looking down her top a short while before.
* Cardiac Arrest with a patient suffering from multiple broken ribs. From the look on the junior doctor's face, suddenly realising you've crushed a man's chest is not nice.
* Cardi B. Cardi herself said she didn’t care about their complaints because the more they complained about them, the more the video (and performance) was given more exposure and got watched on YouTube.
* Cardi B' "Finesse" is most popular. It's also the one featured in the music video.
* Cardi B. invokes this trope in her 2018 VMA acceptance speech, in what many had interpreted as a diss to fellow rapper Nicki Minaj:
* Cardiff University generally - corridors, staircases and lecture theatres make appearances in
* Cardigan the Lamb wrapped up in 2007, he retired from voice acting after hitting puberty.
* Cardillac is about a goldsmith who treats his creations like his own children: he sings to them, swears to protect them — and murders his customers to regain them. Indeed, he treasures his handiwork more than his life-and-blood daughter: his dying glance falls not on his heartbroken daughter, but on the beautiful gold chain hanging on her neck.
* Cardinal, a Canadian take on the genre, which was positively critiqued throughout Canada.
* Cardinal Giuseppe Caspar Mezzofanti (1774–1849) was fluent in 30 contemporary languages. Although some historians claim that his abilities could have been limited to the theological and religious matter, an ability to carry out a sermon or maintain a philosophical dispute in so many languages is definitely a mark of great fluency.
* Cardinal Jaime Sin, former Archbishop of Manila. Who used to refer to his home as "The House of Sin".
* Cardinal of the Kremlin, but it still didn't stop the novel ultimately laying the fault on the Soviet invasion and the American interference in it:
* Cardinal Quest 2 has the unlockable "Gunslinger" Perk. Gunslinger Alchemists sacrifice the ability to wield melee weapons and the ability to Craft items in exchange for starting with the Pistol skill. The Alchemist can still acquire the Pistol Skill in the skill tree, meaning the Alchemist can effectively dual wield pistols.
* Cardinal Quest 2. While other classes can read Tomes for skills/stat boosts, the Pugilist is apparently illiterate. The Pugilist simply throws the Tomes at enemies.
* Cardinal Sins: Judgement Silversword has the Mirror of Cardinal Sins, which

requires the player to complete all seven stages with no F ranks. The Mirror also sports multiple forms, gaining more the better you performed in the preceding stages; there are four forms in all.
* Cardin bullies Jaune then blackmails him upon finding out Jaune faked his way into Beacon due to having no combat training. When he uses Jaune to target JNPR, Jaune refuses to throw sap onto Pyrrha (which would make her a target for Rapier Wasps) and tosses it at Cardin, despite being outnumbered four-to-one. When an
* , Cardin rejects the idea of being tutored by a more tactically-inclined student because he feels independence is "his right for being stronger than the rest".
* , Cardin Winchester pretends to bully Velvet Scarletina as part of their cover as Vale Secret Service agents. In reality, the two are actually in love.
* Cardio kickboxing is one of the biggest crazes among fitness aficionados and shows no sign of dying down, but it continues to get a lot of hate from formal practitioners of martial arts for diluting the practice. While many pioneers of the craze, such as Billy Blanks and Chalene Johnson,
* card itself of them at once using a Spell Card called Machine Duplication.
* card lore. Enishi is often mocked for his recklessness. As a result, Enishi is known as "The Daredevil". Since he knew Shi En when they were part of the "Legendary Six Samurai", he ended becoming "Shien"'s Chancellor because Enishi is not intimidated by him.
* "car driving" meme even released high quality image templates for people to use.
* Cards Against Humanity) can be seen as the way that statement formulation can be a part of British humour — just about current affairs (instead of, say, Daniel Radcliffe's asshole), like Daniel Radcliffe's arsehole.
* Cards Against Humanity. Does the judge for this round tend to pick the combination that's the funniest, the one that makes the most literal sense, or the one that's most offensive? Certain cards are commonly known as "trump" cards for being near-surefire winners in many situations: do you use your trump card now, or take a chance on a "lesser" card and save it for a better situation? And then there's the fact that most players don't go out of their way to maintain much of a poker face: if you see an opponent confidently slap down their card while barely holding back the giggles, you might be better off "burning" a less-useful card.
* Cards Against Humanity, exactly?) or inversions (What took us so long to ban "Kamikaze pilots"?).
* Cards Against Humanity expansion packs, and most of them have names that can be initialized as CAH and have the same amount of syllables as the game, but otherwise make little sense: Crabs Adjust Humidity is one of the more nonsensical examples.
* Cards Against Humanity has a white card labeled "An unhinged ferris wheel rolling toward the sea." There is a meme in the game's fandom that three cards should be used to form the sentence, "When you get right down to it, an unhinged ferris wheel rolling toward the sea is just a windmill full of corpses."
* Cards Against Humanity has the black card "But before I kill you, Mr. Bond, I must show you _____.", invoking this trope.
* Cards Against Humanity has the white card "A bunch of idiots playing a card game instead of interacting like normal humans."
* Cards Against Humanity instructs the players to use one of the white cards in their hand to answer the question, "What will I bring back in time to convince people that I'm a powerful wizard?" Answers can range from the absurd ("George Clooney's musk") to the mundane but probably seemingly-magical to people from the past ("that thing that electrocutes your abs") to the actually-supernatural ("being a motherfuckin' sorcerer").
* Cards Against Humanity: The makers of the game released a joke expansion called the "Bullshit!" pack, which they outright admitted was literal bull shit. Anyone curious or foolish enough to try ordering it got a box in the mail that looked like a CAH expansion, but contained nothing but a lump of dried cow dung.
* Cards Against Humanity. "What do old people smell like?" can be answered with "Old people smell"
* Card shark Canada Bill Jones' famous saying, "A Smith & Wesson beats four aces."

* Card Sharks, one syndicated) aired in the late 1980s, apparently without pilots.
* Card Sharks should the round reach the last question and no one has finished their cards. The contestant who wins the question can choose to play (with the option of changing his/her card) or pass (the opponent must play and cannot change cards); whoever plays must complete their row and one mis-guess means the opponent automatically wins.
* Card Sharps who push their luck too far, and sometimes, in the more lawless frontier towns, to local law enforcement.
* Cards like Fog and Holy Day allow a player to ignore an attack from a whole army.
* Cards of Power include a "Clone" card, which, when drawn at random, causes the drawer to change sexes.
* Cards on the Table and "The Adventure of the Submarine Plans"/"The Incredible Theft".
* Cards on the Table ends with a joke about killing Poirot to see if his ghost can solve the mystery.
* Cards on the Table film. A nasty guy invites a bunch of people to a party on the premise that all of them are scoundrels (in this case, specifically that they've all committed murder and gotten away with it) and pretty much blackmails them. Naturally, the host bites it, and there is a note at the beginning of the novel to the effect that all of them would be capable of murder if pressed.
* Cards on the Table hire an actor to play the part of a window cleaner who claims to have witnessed the murder through the window. He didn't really, of course, but Poirot reconstructed how it occurred from his imagination.
* Cards on the Table: Nobody is actually sure where Mr Shaitana comes from — apparently all Englishmen who know him regard him as a "dago" whom they want to kick, but they have no idea "whether [he] was an Argentine, or a Portuguese, or a Greek, or some nationality rightly despised by the insular Briton..." It's later stated that he has family in Syria, although whether he himself is actually from there isn't stated.
* Cards on the Table reveals the identity of the murderer, Ariadne Oliver - who by this point has accused just about everyone - declares that she'd always said they'd done it.
* Cards on the Table, who has a collection of successful murderers — the ones he knows got away with it — and invites them to a party calculated to make them squirm. Christie plays with this one, as Poirot immediately points out that this is not a safe hobby. Much of the book is spent trying to find out what murders the suspects previously committed. As a further sign of Shaitana's arrogance, very late in the book, it is revealed that one of the so-called "murderers" was actually innocent of his original crime, and thus did not deserve to be put through Shaitana's mind game in the first place.
* "Cards that are in the game but not on the battlefield, such as those in the Library and Graveyard, can't be affected."
* Cards that can corrupt, brainwash, possess, harm, or kill their wielder are a common occurrence in the
* Card: The Game based on what's on them; if they're even vaguely related, then that's what the card does.
* Card VI "The Lovers" of the Tarot has, in many versions, the imagery of an Archie who needs to choose between a Betty and a Veronica. It's meant to represent the choice between sense and sensibility, etc.
* Care Bear. Fortunately, Lord Horribus returned from his exile and managed to make the angel Fall and become demonic, allowing the Dimension of Pain to be restored to its original evil. Yay!
* Care Bears (1980s): Beastly and Shreeky function as Laughable Lackeys who bicker with each other and consistently lose to the Care Bears, but Shreeky's uncle Lord No Heart remains a credible threat.
* Care Bears (1980s) episode "The Night the Stars Went Out", the stars vanish one by one throughout as musician Maestro Strato Nefarious is stealing them so that he has enough light to read and play his music by. A boy down on Earth going to bed

notices blackness slowly sweeping across the sky during the night... until the Care Bears help Strato Nefarious and he agrees to put all the stars back. Aww.
* Care Bears (1980s) has an episode called "The Great Race" about the Care Bears and cousins participating in a race, and Beastly participating in it and trying to win himself.
* Care Bears about a girl that saved his life once? What was his backstory, and speaking of which, the backstory of all of the villains and the pre-Wishing Star bears and cousins?
* Care Bears: Adventures in Care-a-Lot all about it!" Just doesn't have the same ring to it.
* Care Bears: Adventures in Care-a-Lot, and calls them out when they band together to exclude her club.
* Care Bears: Adventures in Care-a-Lot are generally all of this type.
* Care Bears: Adventures in Care-a-Lot, Care-a-Lot is invaded by Gobblebugs, tiny bugs that eat any and all plants, except ones that are yellow. Once the Care Bears realize this, they turn all the remaining plants yellow, and the bugs lose interest and leave.
* Care Bears: Adventures in Care-a-Lot: Care-a-Lot is visited every year by the Thunder Whales, flying whales who spout storm clouds.
* Care Bears: Adventures in Care-a-Lot drifts in and out of this trope, but the final TV special plays this trope straight.
* Care Bears: Adventures in Care-a-Lot episode "King of the Gobblebugs", Oopsy makes up a story about seeing the eponymous creature, getting the others all riled up to catch it. Later, Oopsy ends up falling into a barrel of glue and gets all manner of things stuck to himself, making the others think he's the king gobblebug, and they capture him.
* Care Bears: Adventures in Care-a-Lot episode "Stand Up and Cheer," the judges at a talent show use cards with either a heart or a storm cloud on them.
* Care Bears: Adventures in Care-a-Lot, Grizzle actually manages to take over Care-a-Lot and immediately sets up a throne. As he ascends the stairs leading to it, regal background music plays, only to be revealed to be coming from speakers built into the throne itself.
* Care Bears: Adventures in Care-a-Lot has one special example in the form of the series' villain, Grizzle. Even if he doesn't successfully hurt the Care Bears and does receive his dose of Karma at the end of each episode, he does still cause a considerable amount of collateral damage to Care-A-Lot indirectly.
* Care Bears: Adventures in Care-a-Lot) have eyes the same color as their fur. Averted in the traditionally animated TV series, though.
* Care Bears: Adventures in Care-a-Lot: One episode, when a Love Potion goes wrong, turning the other Care Bears into creepy "love zombies" bent on apparently hugging Oopsy to death.
* Care Bears: Adventures in Care-a-Lot prefers the company of Mr. Beaks, a completely inanimate bird made from scrap metal that he treats as a living being.
* Care Bears: Adventures in Care-a-Lot seems to be unable to decide on whether they want the franchise done in CGI or traditional animation.
* Care Bears: Adventures in Care-a-Lot, suddenly shifted to full-on slice of life. The other episodes are slice of life with a tinge of good-versus-evil.
* Care Bears) airing in the US, despite the fact that a character introduced in the first movie also shows up in the third.
* Care Bears & Cousins, after the bears start floating up in the sky because of Harmony Bear's new song, this happens.
* Care Bears & Cousins and make it so bears barring Tenderheart do not recognize the cousins.
* Care Bears & Cousins came to the show's rescue, while Just Play Toys came to the toys.
* Care Bears & Cousins. However, Season 1 is quite clear-cut: The even numbered episodes of the season lack villains.
* Care Bears & Cousins, in "Beastly Bungalow," after Beastly agrees to come back and work Harmony's Share Shack, he asks if he can be in charge and they can

change the name to the Beastly Bungalow.
* Care Bears & Cousins. In fact, of the premiere six episodes, five of them end this way and the other ends with the Beasties laughing at the love-addled Beastly.
* Care Bears & Cousins, Share Bear and Beastly have a heartfelt conversation after he steals stuff from her Share Shack to create his own Beastly Bungalow. While this is going on, the Care Bears and cousins that have been waiting are having a heated argument over cutting in line. After Share and Beastly notice this, Beastly comments on the hilarity of Care Bears arguing like that. Share says they have to do something and Beastly grabs one of the treats and tells her "Yeah, you're right! Pull up a stool! This is fun!"
* Care Bears & Cousins, "Take Heart," when Wonderheart wakes up the day after the Cousins arrive, she says that she feels wonderful. After going outside and looking at the damage that was done to her room by the Cloud Clipper, there's a very brief record needle scratch and she amends it to "less wonderful," though she quickly perks up upon seeing the Share Cloud.
* Care Bears & Cousins: The jealouspikle junipers seen in "BFFs" are strange spiky purple bushes that grow when someone is feeling jealous. However, they feed off jealous energy and so if that person stops feeling jealous, they eventually go away entirely.
* Care Bears are by three o'clock, the Chief is gonna throw me in a volcano."
* Care Bears are the embodiment of this trope, though Love-A-Lot Bear shows this the most.
* Care Bears, Beastly was written as having an extremely bad short-term memory. To the point where he would often lose his train of thought mid-sentence. He wasn't written that way in other episodes.
* Care Bears cartoon features the villainous green-skinned Dr. Fright, who literally draws power from his victims' fear by terrifying them with an elaborate mechanical death trap, and collaborates with the evil sorcerer No Heart in his plan to destroy all caring and create "an unfeeling, scary world". While it's not clear whether or not he's actually a vampire, he comes equipped with the requisite tuxedo, high-collared cape and widow's peak, and even greets his victims with a Lugosian "Gooood eeeeeveniiiiinnng".
* Care Bears characters will cause massive backlash. Doesn't help that there's one exact case where someone made said comparison and, judging by the disabled comment section, that person succeeded in evoking the HTF fans' wrath.
* Care Bears, Cheer's pet gobblebug has just eaten most of Share's garden, and is likely to eat most of the foliage in Care-a-Lot.
* Care Bears: Cozy Heart Penguin is the only avian member of the Care Bear Cousins.
* Care Bears does not have extensive talent in voice acting. Nick Shakoour (Grumpy Bear) primarily works in live action, and Justin Michael (Funshine Bear) is a writer and director.
* Care Bears features two bears whose names are the same, albeit in different languages. "Amigo Bear" shares his name with the earlier character "Friend Bear". In Spanish they are called "Amigosito" and "Amigosita", which are the same name except masculine and feminine respectively.
* Care Bears, Friend Bear explains herself this way to Timothy. "I'm your friend, your snuggly, furry friend. In fact, that's my name, Friend Bear, and I come from the land of Care-a-lot. I'll be around as long as you need me, but when you don't need me so much, I'll be on my way."
* Care Bears: Grams Bear is a wiz with baked goods, so much so that her pie was able to turn a temporarily corrupted Tenderheart back to his normally nice self.
* Care Bears, Grizzle created Wingnut to aid in his pursuits to take over Care-a-Lot, but Wingnut was turned to the Care Bears' side and now lives with them.
* Care Bears had Professor Coldheart convince villainess Auntie Freeze he wanted to marry her, and asked the Care Bears for help throwing the wedding. The gullible Care Bears agreed, reasoning that anyone capable of Love can't be bad. The reason was to sneak in an organ loud enough to destroy the cloud kingdom and crash the bears down to Earth, but when Auntie figured out it was a sham, she just twisted his ear and led him off to receive punishment...

* Care Bears had several sequences wherein new Care Bears and Care Bear Cousins were introduced. This is especially noticeable in the movies that were released in the series' heyday; but still comes up in later works.
* Care Bears has so many bears, they often get left out of episodes, but sometimes one gets a special episode.
* Care Bears has Sweet Sakura Bear, a bear introduced in 2009 specifically for Japan. She was designed with this trope in mind. Sweet Sakura is a polite and soft-spoken character
* Care Bears have had their genders flipped over the decades in both the toyline and the different animated shows, namely Funshine Bear (female to male) and Secret Bear (male to female). Even some of the cousins are not immune to this trope: Lotsa Heart Elephant (went from being a male to a female), Proud Heart Cat is generally female (but at one point was referred to as a male), and Swift Heart Rabbit switches from being male to female.
* Care Bears have, of course, the Caring Meter, which monitors how much caring is going around on Earth. In some incarnations, it's the Care-O-Meter and can take more specific readings, such as the amount of caring within a particular individual at the moment.
* Care Bears. He’s an evil sorcerer and shapeshifter who commands a lot of magic spells. His goal is to destroy both the Care Bears and all caring in the world from his home (since he rarely likes to go out), which rests atop a perpetual storm cloud. He wants to get rid of caring, and according to one episode, this is to make it easier for him to take over the world.
* Care Bears. He wears a suit that makes him appear to be large and intimidating, but in reality, he's slightly smaller than the Care Bears.
* Care Bears in 2009 when Hasbro took back control of the franchise from Play-Along toys.
* Care Bears in the Land Without Feelings... and almost immediately crashes his car.
* Care Bears in the Land Without Feelings, a talking fountain outside an abandoned park seems determined not to seem helpful...
* Care Bears in the Land Without Feelings has the Bears trying to get to Coldheart Castle to rescue Kevin. Coldheart sets traps for them along the way that catch more and more bears until only Tenderheart is left... and then he gets trapped, too.
* Care Bears in the Land Without Feelings, the trees, flowers, and rocks in the titular land all talk.
* Care Bears In Wonderland features a scene during the Evil Wizard's song when he very briefly produces an uncannily terrifying face.
* Care Bears isn't a Disney property, even though it aired on Disney Channel from the mid-1980s up through the mid-1990s, and it also appeared on Toon Disney.
* Care Bears, it was spun off into a toyline, with the main reason of existence of the cartoons and movies being a shill to market the toys.
* Care Bears: Journey to Joke-A-Lot: The pie-in-the-face is one of the funny things that Funshine Bear sings about in the song "Make 'Em Laugh."
* Care Bears live in a cloudy heaven with rainbows as streets and cars made of clouds.
* Care Bears Movie II: A New Generation, baby Swift Heart stows away in True Heart's backpack while True Heart is going on a mission to Earth.
* Care Bears Movie II: A New Generation combines this with "Next Generation".
* Care Bears Movie II: A New Generation, Grumpy Bear, Tenderheart and Brave Heart did it to try to steal a key from Dark Heart.
* Care Bears Movie II: A New Generation is turned from being an entity of pure evil into a human after he realized what he felt for a human girl.
* Care Bears Movie II: A New Generation, which he realizes means he's turned into an actual child.
* Care Bears Nutcracker Suite, the Care Bears do it to reach a walnut containing a ring that's on top of a Christmas tree. Their order from top to bottom: Tender Heart, Brave Heart, Funshine, Grumpy, Lotsa Heart.
* Care Bears Nutracker Suite movies. He eventually did review it post-revival.

* Care Bears, Oopsy Bear was noted for his ability to "fall over and over and over and over without hurting himself."
* Care Bears realized she was a girl since she's a blue rabbit with no bow or anything. Swift Heart might actually justify this trope on a meta-level.
* Care Bears: Since its launch in 1981, is over thirty years old if one doesn't count in the hiatuses the franchise took. Even if one did count in the hiatus, the one hiatus starting in 1993 through 2001 and another from 2008 through 2012 totaled 12 years, still leaving the franchise's "active" periods with a span of a little over 20 years.
* Care Bears tends to drift in and out of this. The media that are villain-free are listed below:
* Care Bears tend to have lighter, more pastel colors than their male counterparts, color is not always a giveaway, and, of course, more than one bear has flipped gender between generations. According to TCFC, the way to distinguish males from females are the eyebrows, but it's not that females have them and males don't — it's that females have three, while males have only two.
* Care Bears. The film is more of young teens, however, as lot of this is pretty mild.
* Care Bears. Through the first fifteen or so episodes, it was only seen once and was used by the bears to simmer down a bully, forcing her to stop bullying another girl and actually talk about the feelings of jealousy she had which led to the bullying in the first place.
* Care Bears, Treatheart and a young girl are in No-Heart's castle, trying to find a potion that will help them shrink giant vines that have captured their friends, when Beastly appears. They ask him if he knows where it is and Beastly says that he is not going to tell them that it is "next to the dumb-dumb pills."
* Care Bears Unlockthe Magic, like with the others, also drifts in and out of this trope. The main villain, Bluster and his Bad Crowd, don't appear in most episodes.
* Care Bears: Unlock the Magic: The show takes place in the Silver Lining, an area adjacent to the Care Bears' home of Care-A-Lot. As such, no humans are seen, although preparations for Easter are mentioned in one episode.
* Care Bears: Welcome to Care-a-Lot also drifts in and out; the resident Villain, Beastly, doesn't appear in half of the episodes.
* Care Bears: Welcome to Care-a-Lot, Grumpy Bear asks Sweet Dreams Bear if she can send him again his dream with a never-ending food cabinet. She tells him to "Keep dreaming," leading him to ask if that's a yes or a no, and to start begging.
* Care Bears: Welcome to Care-a-Lot, Grumpy Bear will sometimes use his belly badge to generate one of these when he's particularly upset.
* Care Bears: Welcome to Care-a-Lot, Grumpy dreams that he has a bottomless pantry, and he starts feasting on the food in the pantry. The scene then fades back to reality, showing that Grumpy is actually invoking this trope.
* Care Bears: Welcome to Care-a-Lot, such as in "Sleuth of Bears" when the group encounters the supposed ghost of Benefair.
* Care Bears: Welcome to Care-a-Lot, when Funshine is introduced in the pie-eating contest, there is no applause because he's been acting as a jerk with a big ego ever since he won the Care Bear-athon. So a cricket chirping is heard instead, then he cheers for himself.
* Care Bears: Welcome to Care-a-Lot, when Wonderheart Bear agrees to help Hugs & Tugs because their friend came down with bearcitis, they ask her to get them food, feeling that she can't do anything else for them because she doesn't have her belly badge powers yet. This becomes the catalyst for the rest of the episode, because Wonderheart is determined to do more than this.
* Care Bears We never know just how bad Mr. Beastly's oven math is, though, because apparently he fell asleep waiting 12 seconds. When he wakes up, the bowl is encased in a solid block of ice.
* Care Bears. When the show wasn't renewed for a second season in 2013, it displeased American Greetings, who then revoked Hasbro's license and sold it to a company called Just Play Inc.
* Care Bears, while others find them ominous and think their Care Bear Stare is too

akin to brainwashing.
* Care Bear to come back, it offs itself by jumping into the grill of a passing truck.
* cared enough about him to order Kreacher to leave him behind and allow him to be the one to die when he betrayed Voldemort. In Order of the Phoenix.
* cared which was which proved that he wouldn't treat them as interchangeable, which was all they ever wanted.
* Careening Dirigibugs are insect-like enemies that float in the air on organic balloons, periodically producing bomb rocks from their mouths and dropping these explosives down towards you and your squad.
* Career-Building Blunder: When an early mistake provides a character's motivation.
* Career chips though were quickly forgotten about and through the years they've taken on any number of wacky jobs from selling poplers, to playing in Blernsball, to serving as emperor of Tri-Sol... in fact, the a later episode lampshades the forgotten rules of the first episode by having Leela say to Fry "You know, our
* Career-Ending Injury: A character's dreams or current career are/was completely destroyed by an injury that keeps them from pursuing it.
* Career-Ending Injury: An injury or illness that causes disability and forces the afflicted to give up their job/ambition.
* Career-Ending Injury: Someone gets an injury that makes them unable to do their job or something they wanted to do.
* Career-Ending Injury the excuse he needs to obliterate the Manwol and establish the Union as the strongest gang in the city.
* Career-Ending Injury. Today, Brooks' name is inextricably linked to Favre's (as are those of other, later-arriving star recievers like Antonio Freeman and Donald Driver), while Sharpe is primarily associated in most people's minds with Majkowski.
* Career Killer to be a hired killer at that point. But it's probably not, because he keeps on coming up with a new alias for every new context. Supernatural creatures watching the unfolding of fate also call him "the Strawman".
* Career of Evil, another of these point of view chapters confirms that yeah, it was him, in case the reader hadn't figured it out already.
* Career of Evil is kick-started when a severed woman's leg that arrives in the mail to the offices of private detective Cormoran Strike.
* Career of Evil of the title gives the protagonist's name as "Cameron Strike."
* Career of Evil. We are left in suspense about whether she'll still want to be married to Matthew once she realises, or whether the marriage is binding.
* Career Resurrection before in 2017, he shaved it off by sporting a buzz cut.
* Career Versus Family: Working moms are quite common, especially as the cost of raising children to adulthood increases.
* Career Versus Man: A woman must give up her career if she gets married.
* Career Versus Man: It is entirely possible to have both; these days, a woman is not expected to give up her career when she gets married in most Western cultures.
* career. Wasn't exactly Freudian per se, but still an embarrassing Slip.
* Carefree (1938), Aunt Cora is very appreciative of Dr. Flagg's hunky assistant, Connors.
* Carefree (1938) breaks off her engagement to Stephen so many times that he finally asks his psychiatrist friend Tony to analyze her and get to the root of her "phobia" of marriage. As it turns out, Amanda's problem is simply that she doesn't really love Stephen—as she realizes when she falls for Tony.
* Carefree Amanda first realizes her attraction to Tony after she dreams about dancing with him; she confirms it by getting him to dance with her in real life.
* Carefree Hedonist. Only TWO of those relationships have enough Trust for the weapons they manifest as to survive a critical failure.
* Carefree, he realizes that not only does she really love him, but he loves her too.
* Carefree in eight movies together; Astaire jokingly called it "the kiss of the century.")
* Carefree into thinking she loves him and gets a restraining order to keep Tony

from undoing the brainwashing.
* Carefree over the telephone. His voice is funny, but not remotely convincing; maybe he was hoping it would be chalked up to a bad long distance line. In any case, Stephen seems to buy it until he realizes that the caller is in a phone booth just a few yards away from him.
* careful character of Angus McGoldstein (Scottish and Jewish). Listeners were not amused and cases were brought.
* carefully controlled electrical currents through the human body has legitimate therapeutic and medical benefits, such as heart defibrillation. The most extreme is electroshock therapy, which is painless when done correctly and can cure suicidal depression when no other treatment is successful. (Though it does carry side effects such as memory loss.)
* Carefully laid out plans are made for the overthrowing of Emperor Commodus in
* Careful watchers have noticed that the content of the book changes; for example, Phoebe at some points adds information on Cole, the human form of Balthasar - but the information is gone at later points, replaced by either blank pages or completely different information. This is actually the result of the prop and art department placing new or different pages into the book based on the episode. It's easier to open the book near the center of the book, so pages were often moved around. The actual prop had three posts to put in removable pages so new entries could always be added as needed.
* Careful with That Axe has a 27 second long scream that sounds more like a tire squealing than a human being.
* Careful with That Axe: I'M A SINGER WHO LIKES TO SCREAM EXCESSIVELY TO SCARE THE LISTENERS!
* Careful with this one... while it certainly applies to the Lens itself and the principles it uses, the straightforward physics is
* care) is set to supplant the Ministry with his own agency. Or at least, when they do care, it's because of Wisdom himself, rather than the idea in principle. Admittedly, they have bigger problems to deal with, but...
* careless driving ever since. He finally realizes that the car is appearing to him so that he can get into it and die in the crash, thereby gaining peace and salvation. Several days later, Kelly's ghost is seen at his funeral. She places a rose on his casket as it is being carried out of St. Timothy's Church.
* careless lip-syncing). A second, newer dub of the show eventually came in November 2017, 7 years after the show debuted and 3 years since the original Croatian dub began airing, and first aired only the first season and then announced new episodes from/up to season 4 for April 2020 which was over 2 years since the new dub first aired and several months after the show officially ended in October 2019.
* Careless use of any Pinyin based input programs for Chinese can cause this problem as well, since tone marks are often omitted during input. Unlike most examples above, even native speakers are not immune to this phenomenon, leading to mockery by
* "Careless Whisper" was never intended to be a Wham! song but was a solo recording by Wham! member George Michael. Andrew Ridgeley did not perform on the track (although Ridgeley co-wrote it).
* care little" for them (and even actively kill them in order to produce the alchemical ingredient "Sload Soap"), those who survive grow into "squishy" adolescents likened to octopi. Further, adult Sload are believed to be hermaphrodites who absorb their sexual organs by the time they are capable of surviving on land.
* Caren does this when Shielder, who knew Saber in life, tells her that Saber really is King Arthur.
* cares about casualties. It's noted that, being 80-year-old mothballed relics, they are inferior to latest warships used by Venhold (just 20 Venhold ships are able to inflict massive damage to the Butlerian fleet) and, likely, the Emperor.
* Car Escape game largely centers on defusing a bomb hidden in Mike's BMW, which detonates if the player starts the engine or runs too far. Notably, the car even

detects the bomb's presence under "Services".
* cares for nobody except himself and is willing to murder a bunch of innocent superheroes in order to replace them in his own image. When he mocks Mr. Incredible over the supposed death of his family, the latter grabs Mirage and threatens to kill her if Syndrome doesn't release him, only for Syndrome to tell him to "go ahead" and then calls him weak when he doesn't go through with it. When Mirage calls him out for endangering her life, Syndrome is still completely confused as to why she is upset.
* cares more about stabbing each other than scientific advancement get into space at all, let alone become an interstellar empire? Well, according to some non-canon sources, they stole warp drive from alien invaders who tried to conquer them, making them the franchise's most prominent example although it's never really discussed. (In-canon, the reason seems to be that while there are Klingon scientists, they just, in their own weird way, see it like fighting a battle.)
* Caress of Steel - "the Necromancer" a moody song about triumph over, well, the Necromancer, and "The Fountain of Lamneth"
* Caretaker actually breeds the things just so he can have this nifty pool to threaten people with. People thrown in take many days to die, during which time they are in agony. Some even try to drown themselves in order to avoid this, but "the body's impulse to stay alive is remarkably strong, even with the certain knowledge that one would be far better off dead."
* caretaker Argus Filch, sneak thief Mundungus Fletcher and house elves Dobby and Winky, among other unsuitable candidates. She eventually hires curse-breaker Bill Weasley, who was actually there to invite her to his and Fleur Delacour's wedding.
* "caretaker". Even worse, this is just one of many tortures she was subjected to.
* Caretaker Filch in the first few movies is as menacing as his book counterpart, but later movies would turn him into a comic relief character.
* Caretaker Reversal: After taking care of the patient, the caretaker gets sick and now the patient must take care of them.
* Caretaker Reversal: Alice cares for Bob, then Bob cares for Alice when he no longer needs to be cared for. May involve illness.
* Caretakers or family members of a person with a disability will often create a self-fulfilling prophecy. In assuming that the person they are caring for is
* Caretaker the future as it is, also come back, with the aim of speeding up the damage, and ensuring their own victory.
* Carey Hewett scam and is remorselessly willing to ruin the livelihoods and end the lives of people who see him as a friend in order to cover his tracks.
* Carey Mulligan's pixie haircut became a popular fashion trend. The only reason Mulligan cut her hair that short was because it had been ruined from constant dyeing, and she wanted to grow it back as soon as possible.
* Carey presumes the Instagays are promiscuous and fooling around with one another when they are religious virgins and one of them is straight. They just like hanging out in speedos and taking pictures of each other's bodies.
* Carface himself becomes the laughable lackey to other villains in the sequel media, like Red in
* Car filters that'll add miles to your gas's performance. In principle, it makes sense; if cars were super-efficient, less gas would be sold, meaning less money for Big Oil. In
* Car-Freshner Corporation ran a full-page ad in a Photoshop magazine about how the "Little Tree" is their logo, even if you recolor it or decorate it in any way.
* Car games offering compact or subcompact cars often worth less than $20,000 have steadily been on the rise despite inflation. It's gotten to a point where in Season 44, the show seemed to take pride in offering a Nissan Versa worth
* Carger from the Hork-Bajir Chronicles, one of the first Yeerks to promote himself to sub-visser is said to be so ruthless and brutal that even a young Esplin (later
* Cargo (2013): a couple of survivors from the group that shoot the father are seen digging a grave in the background while the woman in their group plays with Rosie.
* Cargo (2013), Andy and his family briefly head to a rumored hospital which turns

out to be just an old, underfunded rural infirmary.
* Cargo (2013): Vic is introduced having been crouching down, then firing a shot in Andy's direction that was actually aimed at zombie coming at Andy from behind.
* Cargo Cult: A religion which worships an inanimate object that is mistaken for a deity or something of divine origin.
* Cargo Cult. Examples included tribes observing Allied transport planes, but not really grasping why these planes had suddenly started showing up. Some tribesmen would later try to create their own landing strips in hopes of one of these planes appearing to drop off cargo.
* Cargo Cult nature of technology in the Imperium, the Adeptus Mechanicus and the Space Marines will often insist, and go to sometimes-absurd lengths to ensure that No Tech Gets Left Behind.
* "cargo cult programming," when novice programmers copy code snippets without understanding what the snippets mean, thus risking a totally different result from the original.
* Cargo cults are considered by Ponder when he reflects that 'he didn't build Hex, he just put it together'.
* Cargo cults are one such case. These members generally believe benevolent spirits/ancestors/gods made the manufactured goods and sent them to the more technological society whether due to the rituals and temples (shipping manifests, radio calls, piers, airstrips, etc) of the other group or because these rituals tricked the benevolent spirits to sending the goods. The cult mirrors the actions taken by their more technologically endowed neighbors in order to get the goods themselves. The locals had no experience of modern industry and tended not to believe the explanations given to them.
* Cargo cults are Pacific island tribes whose islands were used as bases by various militaries in WWII. From the islanders' point of view, these military people didn't have to farm their own food - instead they built an airbase and called for food and other supplies to be brought down in cargo planes. After the soldiers left, the islanders tried to call for supplies themselves and built their own airbases; but since they were only copying appearance and didn't understand the underlying technology, the planes never came.
* cargo cults to this trope instead. They understand what technology is, but still consider it, and it's advancement, to be sacred.
* Cargo Cult: The primitive culture gets technology but concludes that the artifact is a god.
* Cargo Cult worshipping radiation as personified in the god Atom, who creates infinite new universes through glorious Division. Unfortunately they think they're doing others a favor by sharing Atom's holy Glow through irradiated drinking water, and by later games have become aggressively militant.
* Cargo Envy: A woman holding an object and a man is attracted to her and wishes he were in the object's place.
* Cargo Envy, he expresses a strong desire to be the ring on his mistresses finger.
* Cargo Envy, Romeo sees Juliet resting her head on her hand, and wishes he was a glove on that hand.
* Cargo is used to supply shops that use the respective items such as food for Dine-O-Mats (Food/Mineral Ores) but if it lacks the kind of cargo needed then it will use energy as a back up but it can suck down too much energy if you're not careful.
* Cargo of Doom among people who regularly work with Anakin during this conversation.
* "Cargo of Doom" among the high-ranking personnel on the Jedi Cruiser.
* "Cargo of Doom": Cad Bane threatens to do this to Ahsoka to get Anakin to open a holocron. When the airlock does open, it features the typical gale-force winds, and Ahsoka is almost sucked out.
* Cargo Ship: A character is jokingly shipped with an inanimate object.
* Cargo Ship is Zarg's "wife", a sea monster rubber ring named "Maiden Cheena" after the label the monsters found on her when she washed on shore.
* Cargo The film manages to play this to a devastatingly tearjerking effect.

* Cargo! The Quest for Gravity, one way to get Fun (the game's currency) is to go around kicking the Buddies in the butt.
* Cariba Heine (born in South Africa, spent most of her life and career in Australia)
* Caribbean Blue on katbox.net has several main character that are this trope or will assume from time to time, depending how the story goes, also as part of a series of plot points this trope is believed to identify the island's guardian
* Caribbean Blue 's primary casts consist of nekomimis, hybrids, and a talking cat. Everyone else is just a generic guy and gal.
* Caribbean Cup in 1994 goals! Barbados would eventually win in extra time.
* Caribou's devil fruit basically allows him to transform his entire body into this trope, though he's never seen using it to suffocate anyone to death, simply using it to knock them out and preserve them so he can sell them for slavery.
* Caricatured mannequins of the Nazi high command are part of the Axis forces animated by the evil forces in "
* Caricatures of the staff can also be seen in the title card of "Fairy Idol".
* Carice Van Houten was unable to take the role of Cersei Lannister due to commitments to another series at the time. When Season 2 came along, she was able to come on board as Melisandre.
* Caril Ann Fugate, the teenage girlfriend of 1950s spree killer Charles Starkweather, was allegedly involved in the murders of her mother, stepfather, and sister. Like
* Carina Nebula that looks remarkably like a hand flipping the bird (at least it's not directly pointing towards us).
* Carina Tivan, the human-looking daughter of the Collector in the comics, is changed to a red-skinned alien simply known as "Carina" in the movie.
* caring character in the whole series. She even invokes this trope; her drive to live up to this image and be a good girl turns downright martyr-like at times in the worst possible ways.
* caring far more about himself than his country and spewing patriotic rhetoric because he thought that was what the fans wanted to hear. His disdain for immigrants was (kayfabe) genuine, though.
* Caring for an ailing relative, often your own parents or grandparents,
* caring only for looking good politically. He gets a special mention just for nearly causing the destruction of the universe in the first game.
* Caris is World Class. Joanna describes him as looking like a TV ad, with a 'Nordic beauty' look about hin.
* Carita Del Angel. He explains that he was just as excited with his first two children. After that, he got used to it. The one he was waiting there was his 11th.
* Carla also considered Diane to be her worst enemy, with Cliff perhaps a close second.
* Carla also falls into this. Dr. Cox calls her out on it when he points out why everybody else in the hospital is funny, including calling Ted the "hospital sad sack". Dr. Cox notes that she
* Carla and Elliot both name their vagina after an art teacher (Miss Priscilla and Mr Hoober respectively).
* Carla and Nick Tortelli's second wife Loretta were the "striking up a friendship" variant.
* Carla, and there isn't any real excuse for it. Carla, expecting him to break up with her, eventually just demands he say what he wants to say and get it over with. Turk marches up to her, tells her how annoying he finds her then says "I love you, I want to spend every annoying minute with you." This is a great surprise to Carla, who responds in kind. The following episode was actually about a degree of fall-out with them expressing their love for each other, as Carla started panicking about where this relationship is going. They eventually get married.
* Carla Brunelle, with only one of them possessing actual (but lame) powers and fighting skills.
* Carla can become very defensive when anyone uses the phrase "just a nurse".
* Carla has to get into Turk's car and brings fellow nurse Laverne along with her.

The car's locked, so Laverne shouts a battle cry ("
* Carla immediately rats on Sam and Woody's plan to trick Rebecca into kissing them, after having called them her best friends, in exchange for a week of paid vacation. That's without haggling. In fairness, Carla is also evil, so humiliating Sam and Woody might also be a motive.
* Carl and (C2) acquire one in the "Spotlight on Carl" two-parter in
* Carl and Herman, with Carl's magic and strategy being contrasted by Herman's muscle and brute force. "Dojo Alone" showed that, if they ever worked together, they'd be unstoppable, but they can't stand each other.
* Carl and Marie von Clausewitz could have married earlier if not for Marie's mother's determination to find a more suitable match for her only surviving daughter (Marie was a Countess and Carl was, at the time, a junior officer of questionable nobility). However, Sophie von Brühl eventually consented to the marriage and this delay was one of the many obstacles that only deepened their bond.
* Carl (an elderly man, and the main protagonist) and Russell (a kid) in
* Carla remembers having sex with one of the guys but doesn't remember which one. She later finds out it was
* Carla's brother also pretended not to know English for years to maintain the special bond he and his sister had. He also occasionally used it to spy on her.
* Carla's parents are said to be completely supportive of their daughter, to the point of spending copious amounts of money to block anti-transgender legislation, and making custom merchandise of her favourite show. She
* Carla to get a story, and Carla is a sensationalist television journalist.
* Carla Tortelli has eight children by at least two different fathers, and once looked forward to an evening off with "a little R and R"—that is, two men with names beginning with the letter. Despite the occasional barb, though, she was genuinely respected (or perhaps feared) by all of the patrons of Cheers. When Carla became unwillingly pregnant by a random man, the entire bar rallied to collect money for her and even sang her a song as she marched up the stairs in triumph.
* Carla, while Madeline's nurse and old enough to be her mother, has this dynamic with her in the movie adaption of
* Carl Azuz on CNN student news loves this. Every broadcast is ended with a deliberate example.
* Carl Barks and the boys, back outside, realize the Beagle Boys have been spying on them and must have been hiding inside the Horse. They hurry to warn Uncle Scrooge...only to find him holding the Beagle Boys at cannon-point, having realized something was up because finding the Horse was too easy.
* Carl Barks. Barks revisited the concept in "The Chuckwagon Derby", with Donald and Uncle Scrooge racing antique cars.
* Carl Barks comic "Back to the Klondike", Scrooge McDuck's "burglar batterer" is a gigantic boxing glove that drops from the ceiling.
* Carl Barks comics. (In real life, a region of Canada's Yukon territory.)
* Carl Barks comics. No matter where in the world the ducks travel, Scrooge always knows the language there and will explain offhand that he learned it back when he “sold lawnmowers in the Sahara” or some equally implausible feat.
* Carl Barks comics: "The Tenderfoot Trap" (1957). Donald, Scrooge, and Gladstone are all entrants in the Pizen Valley Contest for desert prospectors. The contest consists of five different events. The first four are worth 10 points each, and Gladstone wins them all. Then comes the final event, Wild Burro Catching, worth 50 points! In other words, the previous events were a complete waste of time... or not, as Gladstone's luck cannot be defeated by mere rules. Trying to find a burro, he quickly gets lost. This leaves Donald and Scrooge to fight for the prize. However, they end up tied, meaning they split the points. Final score: Gladstone 40, Donald 25, Scrooge 25. Gladstone wins!
* Carl Barks comics were better than others, so they tracked him down and discovered who had made all those masterful comic books over the years. Luckily, Barks would live long enough to see this recognition during his lifetime.
* Carl Barks comic "The Colossalest Surprise Quiz Show", Uncle Scrooge takes part

in the title quiz show. The show gives big sums of prize money to the contestants and the questions are ridiculously easy. However, Scrooge learns that he's reached the upper limit of his income tax bracket. This means that he would actually suffer a huge loss if he landed any money from the show. He doesn't want to chicken out, so he goes to the studio, but answers every question: "I don't know." The result? He receives a special bonus prize of $120,000 for being the dumbest person in the history of television.
* Carl Barks gone back in time to Spanish-ruled California and befriended a charming little family. Once they return to the present, they go where the family hacienda was...to find nothing but ruins, since the family, if it really existed, is of course long gone. So they erupt in dance and singing, as a way to honor the family they learned so much from...Just in time for someone to pass by and mumble about these "crazy tourists!"
* Carl Barks have active volcanoes. Volcanovians are so used to eruptions they no longer even pay attention to them, and only fear the huge Old Ferocio will awaken. And by the end of the story...
* Carl Barks have Brutopia, an obvious name-changed version of the USSR.
* Carl Barks' "House of Haunts", Scrooge was also given amnesia by the Beagle Boys by a blow to a specific spot on his head. This gave Scrooge the specific amnesia of forgetting everything that happened since last November. Tapping again apparently is a complete cure.
* Carl Barks it's worthless is because all they know about the surface is gleaned from overheard radio talk shows; they've misunderstood the cash prizes offered on such shows as indicating that surfacers hold money in contempt.
* Carl Barks like this. Unfortunately, he was so good at it, that he got assignment after assignment.
* Carl Barks movement. Especially in Northern Europe, namely the Netherlands, Germany and Scandinavia, people see his work as literature! His paintings of scenes from the duck stories have been sold to collectors for enormous prizes. His popularity was so big that he figured he'd take pension when he was roughly 130 years old.
* Carl Barks one, figuring that no one would remember the old, long out of print comics. When older fans noticed it, Barks expressed shame in letters and interviews, feeling like he had been caught doing something wrong, although the fans simply thought it was a fun piece of trivia and liked both the new and old stories.
* Carl Barks one page Scrooge McDuck strip had Scrooge stranded on an small island, and "Help" spelled out on piece of paper hanging on a clothesline. When help doesn't arrive, he replaces the letters with money, and suddenly, a armada of all sorts of boats (including a kayak and a submarine amongst others) appear around the island.
* Carl Barks rare coins. After searching through Scrooge's coins for the rarest, most valuable ones gets him buried alive in the money bin, Scrooge expressly forbids the scheme from being recycled in any way again on the grounds of it being too dangerous: "I won't risk you being buried in my bin again. Why, my insurance rates would skyrocket!"
* Carl Barks showed him making a sketch of a sexy, nude woman... using a rather annoyed-looking duck as a model.
* Carl Barks's sequel "The Lost Charts of Columbus") features corrupt lawyer Sylvester Sharkey working with con-man Azure Blue. Barks wrote his story shortly after he'd been through an ugly divorce with his second wife, and was presumably not a big fan of lawyers at the time.
* Carl Barks, the latter of whom he only barely stopped from stewing Donald alive.
* Carl Barks, the nephews trick Donald into travelling to the South Seas in search of a magical wishing stone. Throughout the story, Donald keeps getting in trouble for using slang terms for dollars (coconuts, bananas, simoleons, etc.). When he finds what he thinks is the stone, he wishes for "a million coconuts". The natives, who are stuck with a glut of coconuts, immediately pelt him with a million coconuts. The chief then tells him he has until sunset to get them off the island.

When Donald asks what will happen if he doesn't, the chief says they will gather them up and throw them at him again.
* Carl Barks to steal it in the first place, so they felt guilty and made sure to give it back.
* Carl Barks try to outbid each other at an auction. The competition escalates to the point where the Brutopian has to bid all the kitchen sinks of his country.
* Carl Barks' Uncle Scrooge comic "Island in the Sky" features a couple of asteroids that are somehow capable of supporting life. They also orbit each other closely enough to share an atmosphere.
* Carl Barks with a glove in "The Money Champ". Before Glomgold had a chance to explain the kind of challenge, Scrooge started physically fighting him.
* Carl, Blooper serves as the Deuteragonist and Dry Bones serves as the Tritagonist to Protagonist Carl.
* Carl Clover also has an ahoge beneath his hat, most typically seen during the Academy days. Like Makoto, he's not an idiot; unlike her, he doesn't
* Carl Clover's updated Astral Heat in Chronophantasma has him trapping his foe in a pocket dimension where they are ground to dust by giant gears.
* Carl Dreadstone adaptations of the Universal, many of whom started in prose.
* Carl Edwards has the misfortune to be one of the best non-Hendrick drivers in an era dominated by Hendrick drivers (the most heartbreaking example being losing in 2011 to the Hendrick-affiliated Tony Stewart in a tiebreaker, he led by three points going into the race - however, the fact that Stewart had more wins than Edwards contributed; for the record, every championship from 2005-2011 was won by Chevrolet - two with Stewart and five with Jimmie Johnson). Likely, if Edwards had been able to pass Regan Smith at Darlington in the spring on the last restart, he would have won the championship. In the 2009 Aaron's 499, where, approaching the finish line, Edwards spun backwards after contact from Brad Keselowski, causing Edwards to go airborne, and bounce off Ryan Newman's hood into the catch fence.
* CarlettoFX, leader of the Italian comedy rock band GemBoy, made a few gag dubs in his spare time, among those ones of
* Carley is definitely not afraid to speak what's on her mind. Unfortunately, doing this to Lilly in Season 1, Episode 3 gets her rewarded with a bullet to the head.
* Carl Giles: When the family is in France, every attempt by would-be intellectual Henry to order steak and chips in French ends up with the family being served frogs legs.
* Carl Gottlieb, is also responsible for the shooting script - ironically, Meadows wound up getting less screentime with each script rewriting.
* Carl Gustav recoil, most of the time the weapon itself undid that by knocking the user flat on his ass.
* Carl Hamilton series is a famous, highly decorated SEAL-trained intelligence operative, independently wealthy, a gourmet chef and wine connoisseur and fluent in four languages. He is also crippled by a complete inability to handle romantic relationships, not being able to confide in anyone concerning his work, and increasingly guilty conscience about killing people for what later may turn out to be no good reason.
* Carl Hiaasen against the real estate agent who sold his mother a defective home and the roofing inspector who didn't do his job properly, after a hurricane destroys the property and kills Jackson's mother.
* Carl Hiaasen: Apart from reporting on real Florida, he writes lurid but not really exaggerated fiction about it.
* Carl Hiaasen buys a dolphin on the cheap to compete with Disneyland's swimming-with-dolphins attraction, but it turns out to be mentally unstable and sexually deviant. One of the bad guys meets his fate by falling into the pool and drowning as the dolphin assaults him.
* Carl Hiaasen death. A man dies during liposuction when the under-qualified surgeon (and bad guy) has a breakdown; another drowns after falling into a dolphin pool while the sexually-deviant dolphin has its way with him. What makes them hilarious is the bizarre circumstances and that it's the comeuppance of one of the

book's villains.
* Carl Hiaasen has celebrity/paparazzi interaction, with a pop-star celebrity (and her double) and one obsessed paparazzo as the main plot.
* Carl Hiaasen has two characters who went through this. One is a woman who was mistress to a man who killed his wife and ended up in a high-profile murder trial, which led to a sensationalised ghost-written book on her story for which she gained half a million dollars and a stockbroker boyfriend who recommended investing it in Enron; two years later, she had lost it all and was working at a bottom-feeding telemarketing company. The other is the mother of another character, whose many disappointments in life include her father cashing in his pension to invest it all in the Delorean Motor Company, leaving nothing to pass to his daughter.
* Carl Hiaasen. Hires everyone from crooked hydrologists to hitmen to keep his farming operation looking clean enough on paper that he doesn't have to spend money on pollution controls.
* Carl Hiaasen, Noah and his sister flush dyes down a polluting ship's toilets in attempt to expose them.
* Carl Hiaasen's novels. The stand-out is one who drowned by being held underwater by a sexually-deviant dolphin that wanted to have its way with him.
* Carl Hiaasen the expert brief about the product he is launching a class action suit against and once he does he's too hooked on the sex drive part to stop in spite of the warnings about how much worse it will get.
* Carl Hiaasen, used to be a photographer but got burnt out from all the crash footage he shot.
* Carl Hiassen, a major character had been engaged six times, broke the engagement six times, and returned the ring five times. The time she kept the ring was because the breakup was over the man developing a disturbing fascination with body piercings, and she was afraid of what he'd do with it if it was returned.
* Carl Hurley, stand-up comedian, often tells a story about a time in college when he and his friends camped for several days in line for sports tickets. They finally get up to the front, the ticket operator asks what they want, and Carl blurts out the first thing that comes to mind, "I want a double cheeseburger with fries." Cue dead silence, the ticket operator telling him they don't serve food there and him trudging off in defeat while the people in line whisper about how tragic it is, him waiting all those days in the wrong line.
* Carlie Cooper was supposed to be "perfect" for Peter Parker. The problem was, she was kind of quickly introduced and then forgotten about for a significant amount of time while the rotating writers focused on their pet characters. When she reappeared, a lot of her appearances consisted of everyone
* Carlie's prosthetic arm hasn't stopped her dreams of becoming a pro wrestler. Quite the opposite: she now dreams of being the first handicapped wrestler to make it onto national TV.
* Carl in one episode gets promoted and ends up treating Homer like his 24-hour personal secretary.
* Carl is also originally from Iceland, and an episode centers around his Icelandic family. His parents are both white, and though this is never explicitly mentioned, we have to presume he was adopted from some other country.
* Carl is a punctual guy and parts of his story explicitly happen at precise times according to him, but cutscenes usually have a bracket of at least two hours during which they can be triggered. The time at which they actually happen may hence be in contradiction with his dialogue.
* Carlisle. On the platonic side, Carlisle turned Rosalie, Edward, and Emmett, who all view him as a father.
* Carlito Caribbean Company turned out to be a hostile takeover rather than a new promotion.
* Carlito Caribbean Cool detests the feeling of other people's hands in his hair, so you can naturally expect his hair to be pulled by someone at least once a month.
* Carlito Caribbean him, putting IWA PR in the awkward position of having to push a knockoff presented to make their competition look bad. But at least they made money. WWC itself was only too happy to sign and push Carlitos after IWA PR folded.

* Carlito Colón and Mighty Ursus in February 2015 when Ursus's manager El Magnate Juan Manuel Ortega abandoned his campaign against the Colón family and joined with Carlito and La Revolucion.
* Carlito Colón, and yes, it involves flexing, though Carlito's more defined in his abs and arms and thus loses in pure pectorals.
* Carlito Colón diving off the top of a cage? Puerto Ricans already associated that with Gypsy Joe!
* Carlito Colón feuded, Eddie was the Abel, despite being the aggressor. This is because after Carly, as he was previously known, came to the United States and started wrestling in Kentucky, he disowned his family, insisting he had no brother when Eddie made a visit to see him.
* Carlito Colón, for a brief period where he stole John Cena's chain and hired street thug Jesus Anguilera to stab him in a bar fight.
* Carlito Colón: Made his wrestling debut in WWC as "Carly" during 1999.
* Carlito Colón (Mother side. This granted him Canadian citizenship via Canadian nationality law in 2009.)
* Carlito Colón onward. As long as he is not confronted by someone who does not wish to be cool that is.
* Carlito Colón started calling his finishing move, a lung blower/back cracker, "the backstabber".
* Carlito, he accused Kingston's tag team partner Black Jack Marciano of being gay but said he was only bringing it up to inform him of a new law in New York that would allow him to settled down with Eddie if he reciprocated.
* Carlito he could do whatever he wanted when being yelled at him for arriving to a training session late. It also led, somewhat ironically, to Carly disowning his family and WWC, who'd you'd think would provide more connections than Kenny Bolin...
* Carlito laid out Eddie Colon at WWC Aniversario 2009 after he believed La Artilleria Pesada were down and out, meaning Eddie was no longer needed. Turns out Thunder and Lighting still had plenty of fight left in them and now Eddie couldn't help Carlito even if he wanted to.
* Carlito or lose his job. He was searching the backstage area when the lights flickered out and all we hear is a hilarious high-pitched scream.
* Carlitos is a toddler and some sources put him at one (like Lily) and others at two.
* Carlito's Way: After Dave Kleinfeld narrowly survives an assassination attempt as retaliation for his murders of Tony Tagliucci and his son Frank, he's hospitalized. When Carlito visits him in the hospital, he notices a suspicious behaving police officer outside in the hall, who he takes to be an assassin here to finish off Kleinfeld. He helps said assassin out by discreetly emptying the bullets from Kleinfeld's revolver. After Carlito leaves, the fake cop comes out of hiding and relieves the real cop who is guarding Kleinfeld's door. It turns out to be Tony T's other son Vinnie, here to avenge his family.
* Carlito's Way) at a nightclub Carlito manages. Carlito correctly guesses that Lalin is wearing the wire after just a few seconds when Lalin tries to lure him back into a life of crime.
* Carlito's Way: Carlito Brigate himself is pretty level-headed, but his lawyer friend David Kleinfeld dooms the entire cast by impulsively killing his mob boss client during a jailbreak. This might be a subversion, though, as Carlito suspects that Kleinfeld planned to kill the mob boss all along and played Carlito himself for a fool.
* Carlito's Way, five years after drug dealer Carlito Brigante is sent to prison for murder, his lawyer gets him out because of prosecutorial misconduct and illegal wiretaps that led to the evidence being tainted. The judge that ordered Carlito's release made it quite clear this was the only reason he released him and deeply regrets having to do this (especially since it was the same judge who presided over his trial and sentenced Brigante to prison the first time anyway. In fact, he'd been forced to since the appeals court reversed his ruling).
* Carlito's Way is killed just as he is about to reunite with the one he loves.

* Carlito's Way. The newly-released Carlito tries to make a legitimate living, but the FBI still want to see him put away. It doesn't help that he constantly gets tangled up in his colleagues' shady activities.
* Carlito's Way was based on a gangster who resolved to live lawfully when he was released from prison—and he tried hard to.
* Carl Johnson's heavy pronunciation of the antagonist's name, Tenpenny, in
* Carl Jung about comparative mythical traditions is naturally more Romantic given it's subject and its Jungian inspirations.
* Carl Jung—would savage Plato for the rise of religious dogma, by championing the supremacy of the mind over the science of the 'corrupt' natural world.
* Carl Jung - Swiss psychologist known for his writings on archetypes, the collective unconscious, and personality typologies.
* Carl Killick is a massive, muscled bully who is brought in to take hostages and intimidate them.
* Carl King, aka the Thousand, was a one-shot villain introduced as Peter Parker's high school bully who was aware that Parker was Spider-Man. Jealous of Peter's powers and wanting some of his own, King eats the now-dead spider that bit Peter, which causes his body to transform into a
* Carl Macek did the voiceover for the opening narration of the first English dub of
* Carl Macek often took small parts in the anime movies whose dubs he produced, such as Fox in
* Carl McCoy, singer from the occult-cowboy-goth band Fields of the Nephilim, is frequently seen sporting a badass cowboy duster (usually accessorized with leather hat and badass shades).
* Carl Newman's songs represent this. Dan Bejar's songs, on the other hand, only seem like
* Carload of Cool Kids: A car with the windows down passes by and the students inside make harassing remarks to passers-by or their less fortunate schoolmates.
* Carload of Cool Kids: Car with a bunch of students inside makes harassing remarks to passerbys.
* Carload of Cool Kids: Hey there, nerd! Check out the cool shiny car we're on and you aren't!
* Car Load Of Cool Kids: What a better way to let you know you're a total loser than to have me and my cool friends mock you while sitting in our cool car?
* Carlo Caneva, while a capable general in the peculiar terrain of Italy, just couldn't understand that Libya's flat desert plains were the
* Carlo Collodi was an Italian soldier, but all we remember about him today is the fact that he wrote
* Carlo Emmanuhel III was sort of the Frederick of Sardinia. Not only did he win notable victory against Spain, France and Austria, but he had the political acumen to turn his tactical victories into strategic ones. His crowning achievement was the Battle of Assietta. 7,000 Sardinians fought 40,000 Frenchmen and suffered between 77 and 230 casualties compared to 5,300 French casualties. France didn't invade Italy again until Napoleon a half a century later. For his victories, the French had a saying: Piedmont is the burial place of the French.
* Carlo Pedersoli was a musician, an inventor and an Olympic swimmer. He also was
* Carl Orff from this, the opening (and closing) cantus "Fortuna Imperatrix Mundi: O Fortuna", although "Gassenhauer" is also pretty well-known.
* Carl Orff's orchestra-and-choir reworking of medieval German folksong
* Carlo Rota, a British-born actor of Italian ancestry, plays the Lebanese Yasir Hamoudi in
* Carlos and Charlie's always makes a point to mention its next-door neighbor, Just For Fun watercraft rental.
* Carlos based on the life of Carlos the Jackal, the eponymous terrorist speaks flawless Spanish, French, German, English, and Arabic — and that's just what we see; he presumably speaks at least some Russian as well, given that he studied at a university in Moscow. The actor who plays him is also fluent in all of these

languages except Arabic and Russian.
* Carlos bludgeons the thief from behind, turning out to have been in the area all along in the process.
* Carlos Castaneda's books are supposedly derived from his PhD fieldwork with the Yaqui Indians. Skeptical researchers have concluded that practically everything about them that is subject to verification does not check out, and the academic consensus is that he invented most of his content. In fact, some of them think he never even
* Carlos Cruz and Castle aren't enemies due to Microchip turning on Castle and trying to have Cruz usurp the Punisher identity. Here, Cruz and Castle are reluctant allies due to Micro remaining loyal to Castle in the film.
* Carlos Ezquerra says he made an eagle a prominent symbol of the Judges in
* Carlos Hathcock, a US Marine Corps sniper during Vietnam (who wore a giant white feather in his bush hat), built a custom bracket to mount a 10X Unertl scope onto an M2 Browning machine gun which he used for several confirmed kills (including one at 2500 yards).
* Carlos Hathcock is another great example of a sniper being unfettered in his job. One of the greatest snipers that the American Military ever produced and a legend in the Marine Corps, Mr. Hathcock had over 90 confirmed sniping kills during the Vietnam War (this means that a fellow soldier or officer had to be there to confirm that he made the kill, this doesn't mean he didn't make many more unconfirmed kills) and the enemy feared him so much that they placed a bounty on his head for 30,000 dollars (more than the average Vietnamese citizen made in a lifetime). His reputation among the Americans who produced him and the enemy he fought was well earned. You would think a guy like this would be a
* Carlos is essentially an older version of his son Manolo with a moustache, smaller eyes and graying hair.
* Carlos Mencia even interrupted one of his stand-up acts to call him out on it.
* Carlos Mencia has a habit of laughing mid-punchline when he's on a roll, nearly ruining the joke on occasion.
* Carlos Mencia is fond of using racial slurs for every ethnicity in existence. But his favorite is "beaner," for Hispanics.
* Carlos Mencia once related an incident where he attempted to purchase Vaseline and jumper cables (for his car repair) and a box of condoms (favor for a friend who was out). The cashier came to the conclusion that these were all for the same event and asked "Dude, what are you going to do to her!?!"
* Carlos Mencia plays this trope straight, in-your-face, crude and often at the expense of Latinos to the point where it's a tad uncomfortable for some people.
* Carlos Mencia was a hugely popular comedian in the '00s, selling out massive tours and hosting the successful
* Carlos Mencia: whose style of comedy tended towards insulting anecdotes, both at himself and the people he interacts with.
* Carlos Pizarro, former guerrilla member and Colombian presidential candidate, was murdered on a plane in April 1990. A weapon was concealed in the bathroom of the plane, and a hired thug shot him at point-blank range. He was then taken down by a security agent. Paramilitary leader Carlos Castaño said later that he had planned the crime. During that same campaign, two other candidates were also killed.
* Carlos Ramirez is touched that Harry thought to bring a virgin as a gift.
* Carlos Ramirez, professional badass and Harry's best friend on the Wardens. The regional commander of the Wardens on the West Coast, he gets into almost as much trouble as Harry.
* Carlos Santana, in his 70s, still plays guitar just as amazing as ever, creates some of the best rock albums in mainstream music, is dedicated to his beliefs and his fans, and still remains just as awesome as he did 40 years ago.
* Carlos Santana was legally adopted by Barsole Bara, owner of the Bara FC, who only saw him as a tool to profit from. When Carlos turned 17, he revealed in a press conference all the abuse he was submitted to and shamed him publically.
* Carlos, then suddenly removes the grenade from her mouth. The pin doesn't come

out, of course.
* Carlos the Scientist when our Carlos has only been in Night Vale for a few years. And that's all we know about him.
* Carlos Valderrama, arguably better known for his afro than his skills - which were there, mind you)
* Carlos, who until that point certainly talked a good game, outed as a virgin by said succubus must have taken some of the sting out of it (or at least given him an ample means of redirecting the mockery). It also makes him another example, though his reason (for that matter, whether it's a conscious choice or just lack of opportunity) isn't explored.
* Carlota is this to Ronnie Anne, comforting her when she is sad and speaking warmly and loving to her. "Yes My Dear".
* Carlotta's rendition of "Think of Me" is interrupted when the Phantom causes a backdrop to fall behind her, and later he causes her to start croaking in the middle of an aria.
* Carl portrays explorer William Clark (of course, Lenny is Meriwether Lewis). Homer, who, in an inversion, plays the father of Sacajawea (Lisa), lampshades this at one point, welcoming "the white man... and Carl."
* Carl Reiner as just a voice cameo, then with his face hidden, until finally he became the center of an episode ("Coast to Coast Big Mouth") and was fully seen. Reiner played several one-time-only and bit parts during the series as well.
* Carl Sagan acknowledged this trope in more updated afterwords like the one on the final episode "Who Speaks for Earth?", where it mentions that the world has changed: "Walls have come down and Irreconcilable Ideologies have embraced" while showing footage of the fall of the Berlin Wall, the abolition of Apartheid in South Africa and the iconic handshake between Yasser Arafat and Yitzhak Rabin in front of Bill Clinton.
* Carl Sagan and evolve there, as creatures incredibly different from us. However again, they'd be unlikely to form spacefaring civilizations, for the tool-making, agriculture, metallurgy, etc. that we're capable of would be impossible on their world, or at least be a lot less effective.
* Carl Sagan and is almost universally attributed to him, but various phrasings of this date back to David Hume, who wrote "A wise man ... proportions his belief to the evidence."
* Carl Sagan, as one possible design for a ship capable of crossing interstellar distances, along with the Daedalus (see below).
* Carl Sagan for this trope, and The Next Generation, which began airing in 1987, was inspired by him.
* Carl Sagan harshly criticized Edward Teller for his relentless push to develop the hydrogen bomb. While nuclear fission bombs, such as the ones dropped on Hiroshima and Nagasaki, are certainly nothing to be taken lightly, the whole "destroy all life on Earth N times over" model of the modern nuclear arsenal would not have been possible without the hydrogen bomb.
* Carl Sagan in many cultures and religions, especially Hinduism (from where the name comes). It was also a symbol of good luck in Europe and North America all the way into the early 20th century before its association with Nazism turned it into a symbol of evil and doom.
* Carl Sagan: "I wonder if we'll ever find a specimen of life based not on organic molecules, but on something else — something more exotic." He goes on to describe himself as a "carbon chauvinist."
* Carl Sagan lists the theories about how Venus could be before spacecrafts found the hot, hard, facts. Among others, besides the lush world already mentioned, was that the planet was covered in a global ocean where part of the carbon dioxide present in the atmosphere would have dissolved. In other words, a sparkling water sea.
* Carl Sagan machine allows humanity to send 5 people, the governments briefly discuss on whether they should send 3 men and 2 women or 3 women and 2 men; ultimately they decide that it doesn't matter since regardless of the choice, there's always going to be one more individual either gender. They end up sending

3:2 men-women ratio.
* Carl Sagan said dark areas were actually the result of dust being blown by the winds of Mars and that idea was vindicated when probes found exactly that.
* Carl Sagan serving as retirement homes for those who wished to extend their lifespans and could afford it, and shuttle services to go between earth and station.
* Carl Sagan's son Nick wrote a couple of episodes in the final season of
* Carl Sagan, that was criticised by others as unseemly for an intellectual profession that functions by being willing to examine ideas with a reasonably open mind.
* Carl Sagan therefore they would be inclined to probe cows rather than people.
* Carl Sagan, the travel spheres which are the focus of the entire book are this. Unlike most examples, no materials are imported, and it's up to the earthlings to duplicate the metallurgical and chemical technologies required to actually create them. The plans are buried within a complex radio signal, and all nations on Earth start building them. To say the least, they are terrifically expensive.
* Carl Sagan titled "Is There Intelligent Life On Earth?" covers a fictional alien visitor observing human activity from space that cause it to speculate if there really is such a thing as human intelligence.
* Carl Sagan, who expressed an appreciation for sports in general in several of his books but was partial to both playing and watching basketball in particular.
* Carl Sagan who recognizes the reference and remarks "The 'billions and billions' guy?"
* Carl Sandburg's poem "The Man With The Broken Fingers." Some Gestapo agents are interrogating a captured Norwegian Resistance member, demanding that he give them the names of other Resistance fighters. He won't talk, so they break all the fingers on his left hand. He still won't talk, so they break every finger on his right hand. When he
* Carlsbad Decrees, lists of "troublemaker" students and teachers (read: liberals) were drawn to prevent them from registering in any university in the German Confederation.
* Carl's head exploded out of sheer rage at the end of the episode "Kidney Car".
* Carl's Jr/Hardees did a series of these for their $6 Burgers, complete with a website. They did at one point mix it up by having the "chef" actually carry Carl's Jr bags through the restaurant into the kitchen, which alerted the patrons something was up.
* Carl's Jr.'s (or Hardee's, depending on where you live) slogan, "If it doesn't get all over the place, it doesn't belong in your face," does in fact point out that their burgers are sloppy and very messy.
* Carlson & Peeters, offering such advice as "If you can't go through a door, go around it!" and "W.W.T.A.O.! We Work Together As One!" You do eventually get to see a portion of the book in digital form, from a chapter that deals with "Defense and Detection".
* Carl Squared: Carl's parents decide to give him the talk at the end of "Carl's Techno-Jinx", complete with a helpful educational video.
* Carl Squared had the pirate-themed Buccaneer Burger, complete with humiliating costumes. Unsurprisingly, C2 thought it was great place to work.
* Carl Squared had the pirate-themed Buccaneer Burger, where the employees had to dress in pirate outfits.
* Carl Squared has the protagonists being chased by a doctor wielding a power drill. He chases them across the street and the power cord reaches its limit and pulls the plug out of the outlet. The doctor laments about not spending a few extra bucks to purchase the cordless version of the drill.
* Carl Squared only a few months old, and part dog, so some of it is excusable.
* Carl teaches several Meatwads how to play Texas Hold'em Poker in "Multiple Meats"... with flash cards. One of Carl's winning hands is a full house AND a pair.
* Carl the Evil Cockroach Wizard and his brother Herman get along just as badly as the two main protagonists. Carl retains magical abilities and makes use of planned out schemes, while Herman retains colossal strength (contrasts with his ant-like

size) and prefers to use brute strength to achieve victory. Naturally, the two have worked together (albeit forcibly) on occasion to take on Yin and Yang, but their extreme dislike of being within two feet of each other always leads to their failure.
* Carl the gas station attendant once did his impersonation of Sterling Archer from
* Carlton & United Beverages ran an advertising campaign for Carlton Draught lager, with the slogan "Made From Beer". The ad campaign parodied old-fashioned Australian beer advertising of the '70's and '80's, using cliche images such as draught horses working in golden fields and phrases such as "Pulled By Horses".
* Carlton and Troy are both humans which are poorly animated. They study in a school where everyone else is human, and the people at the stadium audience can't move their body without a lot of effort. However, Sarah, an ice cream cone, used to study there too.
* Carlton Draught's ads since the mid 2000s have been widely popular, mostly for their tongue-in-check parodying of other beer ads. Apparently, their beer is brewed in a big metal thing and driven around by horses. It also brought us, at the height of
* Carlton Draught's Big Ad. It's a big ad. Very big ad. This ad better sell some bloody beer.
* Carlton Fisk waving a home run ball fair in the 1975 World Series. Of course, Boston lost the series to the Big Red Machine, one of the greater teams in history, but the Fisk home run is what people most focus on.
* Carlton Mellick III's is fleeting, since while you retain your memories between each reset, they all eventually fade over time.
* Carlton Your Doorman, (not a kitten) glaring at the camera ("C'mon, say 'meow'... damn cat," grumbles Carlton).
* Carl von Clausewitz and his wife Marie were intellectual equals; their letters are filled with discussion of artistic, military and political subjects and Marie was often the first reviewer of Carl's writings. Indeed, foreseeing his early death, he made her promise she would see to the publication of
* Carl Weathers as an out-of-work actor who gives acting lessons to Tobias. The lessons mostly seem to be advice on how to get cheap meals.
* Carl Weathers is a shameless cheapskate who is always finding ways to pinch pennies, cheat businesses and mooch off of others.
* Carl Wilson also graced a brilliant beard from the early-70's until his death in 1998.
* Carl Winslow is a Sergeant (and later a Lieutenant) with the Chicago Police Department on
* Carly). Again, what people think is based around the shipping divide.
* Carly and Freddie end up sharing a last minute kiss to pull up their anchor, Sam & Freddie stay sunk.
* Carly and Freddie get together in "iSaved Your Life", but break it off at the end of the episode because Freddie can't be sure of Carly's true feelings for him, as they may be a result of hero worship.
* Carly and Sam's beauty pageant Q&A strategy is "ending world hunger... for the children!"
* Carly, another badass shovel-wielding scientific technician in a wife beater and completely unlike anything else the local product had to offer at the time) his brother Eddie, for being more of a throwback to their father's prime or Ray Gonzalez were other popular names.
* Carly Colón had little interest in becoming a wrestler and was content to help his father's company by filming some shows. But then Ray González discovered that one of the cameramen was the son of the boss and decided to try and exploit the fact to his advantage...which led to him beating up Carly when he made it clear he wanted nothing to do with González. Then Carly decided to jump into a more active role.
* Carly, Courtney, and Sam are all jealous and resentful of the fact that Liz had Jason's child, even though Sam herself did too, as the child is clearly a reminder

that Jason loved Liz as much (or possible even more) as them.
* Carly has finally triumphed over his nemeses, La Artilleria Pesada, winning WWC's tag team titles from them with his brother, Eddie. A day later Thunder and Lightning have the belts back.
* Carly has the power to read minds and and can later sense others in her vicinity.
* Carly in "iDream of Dance": "If he's a nub, then someday I want to be Mrs. Carly Nub."
* Carly in the third film also acts as this, due to being more emotional than Megan Fox's character Mikaela in the first film and more playful.
* Carly is like this in regards to every man she's ever been involved with, to the point where she relentlessly bullied Jason's girlfriend Robin until the poor girl finally gave up and left town, spent the entirety of her relationship with Tony terrified that any day now he would dump her to reconcile with his ex-wife, has verbally and/or physically assaulted every girl or woman who dared to even
* Carlyle has stopped appearing in reviews, the last one with him being
* Carly originally had no interest in becoming a pro wrestler and was happy to just help around the family business, working as a camera man in WWC. This changed when Ray González began targeting Carly because he was feuding with Carly's father at the time. 14 years later, Carlito Caribbean Cool is one of the top wrestlers in WWC and is targeting Ray González Jr, who till then was content to simply help with his father's mini market.
* Carly Pearce's "Next Girl" – the video for the song (set at a roadside bar) has Pearce, in various personas, propositioned by men who want her only for sex. One scene is quite blatant: A middle-aged man who badgers a waitress to come over so he can comment on her good looks.
* Carly Rae Jepsen album, none of which charted. That includes followup single "Run Away with Me", which has become Jepsen's second best known song (even better known than "Good Time"), despite not being a major chart hit anywhere.
* Carly Rae Jepsen and, in her normal speaking voice, says "oh oh oh oh oh oh oh oh oh ouch ouch ouch ouch ouch ouch ouch ooh oh oh oh oh oh oh oh oh oh oh oh oh."
* Carly Rae Jepsen: "Before you came into my life, I missed you so bad..."
* Carly Rae Jepsen: "Call Me Maybe" is about giving one's number to a love interest.
* Carly Rae Jepsen is nothing but Female Gaze. We're talking about a video that idolizes a guy who can't even start a lawn mower, but shit damn if he doesn't something sentence a shirt off with his muscles.
* Carly Rae Jepsen's "Run Away With Me" is pretty much a Point-of-view experience of a guy traveling around the world with Carly as his MPDG.
* Carly Rae Jepsen than its follow-up "Run Away with Me", which never made the Hot 100 but received rave reviews from critics and inspired a meme on Vine.
* Carly Rae Jepsen version, with the Dogged Nice Girl fully aware of the situation she's in but nevertheless, still doing anything she can for the guy.
* Carly Rae Jepsen was released in Japan two months before it was released in the U.S. and her native Canada.
* Carly's first attempt to fight Puerto Rican legend Ray González lead to him starring up at the ceiling, so something needed to be shown to convince people that when they got in the ring it would be worth seeing. That something was a training montage.
* Carly Simon, but it's probably her least subtle. While it's far from her only hit, it's her only #1 (in Australia and North America), her best known song and is more rock-oriented than most of her hits.
* Carly Simon's "That's the Way I Always Heard It Should Be" is, at minimum, an Anti Marriage Song.
* Carly Simon's "That's the Way I've Always Heard It Should Be" describes every marriage the narrator has ever seen as having turned out like this.
* Carly Simon's "We Have No Secrets" finds its narrator addressing this with her lover.
* Carly Simon's "You're so vain, you probably think this song is about you."

* Carly uses a Fortune Fairy deck, which is made of weak, cute fairies. After becoming a Dark Signer, her monsters evolve to Fortune Ladies, which become stronger for each Level they have and their Levels increase each turn.
* Carly way to force a disqualification but it exceeded the low expectations on every level.
* Carly when he finds out he's the son of the company founder. Carly had no desire to be a wrestler prior but because of that he trained and beat every member of La Familia, including González for the WWC Universal Title.
* Carly where he joined the Dark Signers and became king of the destroyed world. However, he snaps out of it and activates a card called Change Destiny.
* Carmageddon as a potential powerup in the second game. Using it sends nearby cars flying away from you. It's fairly harmless, but could be potentially fatal if it catches the car between a solid wall at the right angle. Using it with the Pinball powerup is also fairly deadly.
* Carmageddon featured the "drink driving" negative powerup, which inverted your controls and did screwy things with the perspective.
* Carmageddon game but didn't actually get the license. Thus they kept the general idea, but changed the plot to "Plot? Want a plot? Buy a book!" while leaving only vague hints of the "world" in the racemaps description.
* Carmageddon has powerups that you give weapon abilities such as the Pedestrian Flamethrower.
* Carmageddon on his computer as Paige watched over his shoulder. She noticed the game seemed awfully familiar. Last panel:
* Carmageddon possible to have your car sufficiently powered up to survive the resulting damage, but it is almost impossible to return from without restarting.
* Carmageddon TDR 2000, they headed it off by making zombie peds in the first place. Though cars get destroyed, no one is seen to die, and the way your own character survives auto-destruction implies your rivals may not be killed either, so it's no longer a Blood Sport.
* Car makers usually don't sell all versions of a particular car on every market. The most noticeable example is the American Euro car import scene. In most cases, Americans don't get the diesel or less powerful petrol engine options and wagon body option!
* Carman the Champion the champ is supposed to take a dive, but he refuses and just fights Carman straight up.
* Car manufacturers from Germany often boast "German Engineering". Opel's campaign starring Claudia Schiffer with the slogan "It's a German" is a good example.
* Carman used this throughout his music career, mainly due to the fact his last name (Licciardello) is rather complicated to pronounce.
* Carmelita Spats. In the book where she is introduced, she seems old enough to be the leader of a
* Carmella him completely). According to her, she wasn't called up to TV as part of their act because Triple H told her she could make it on her own. After Big Cass' firing, she's the only one of the three still employed in WWE.
* Carmella. Leah Van Dale the person is incredibly quiet and reserved. She recalls this counting against her in her initial WWE tryout; she was so focused on getting the moves right, they asked her to show more personality. She then compensated by hamming it up and found her niche playing over-the-top characters.
* Carmella. This was slowly phased out and by the time she made it to the main WWE roster, she now spoke in her natural accent.
* Carmella. What's more, she's not really from New York - she was born and raised in Boston.
* Carmen after she warns him that he'll get cramp if he doesn't hold his pen properly. He gets a hand cramp just before he can raise his finger.
* Carmen at Covent Garden in 2009, and they both married just under a year later.
* Carmen. A very loud song about how sneaky you have to be to smuggle cigarettes.
* Carmen begins with Carmen's shocked exclamation "C'est toi!" as she notices Don José (who replies "C'est moi").
* Carmen by blurring the traditional line that set it apart from regular opera

until the former no longer existed as a distinct genre.
* Carmen Carrera when she was just beginning her transition. She no longer does drag and models professionally on runways and spreads.
* Carmen Dell'Orefice, who's in her eighties and still working as the oldest catwalk model.
* Carmen, Don José confronts Carmen, first pleading with her to resume their affair and then threatening her. She rejects him, and so he stabs her to death.
* Carmen, Don José, guarding the gypsy camp, aims his rifle at the approaching Escamillo and fires. The shot apparently passes through Escamillo's hat, which he carries in his hand as he enters.
* Carmen, Don Jose. She sings about how any other foretold outcome can be changed, but not death. She meets Don Jose alone in the end because she believes she can't fight that fate.
* Carmen Dragon is a male conductor, composer and arranger, best known for a stunning arrangement of "America the Beautiful"—and for being the father of Daryl Dragon (also a gender-blender name), otherwise known as Captain of Captain and Tennille. He named one of his daughters Carmen.
* Carmen features a toreador as a major character, a well-known song about him, and a bullfight off-stage at the climax.
* Carmen from the title opera by Georges Bizet is often described as a rare female example of this trope. She seduces Don Jose, who was going to marry Micaela, but proves to be anything but faithful to him, quickly growing bored with him and seeking a new lover in the form of Escamillo, a toreador. We don't know how many times Carmen has done this to people, but when Carmen ultimately rejects him, Don Jose seeks to kill her, doing so in a bullfighting ring, spelling not only her doom, but his own as he is arrested by the authorities soon after.
* Carmen Got Expelled!. It is about a girl who is given one last chance at going to school after being suspended several times.
* Carmen has stolen linguistics before, including the Portuguese language, the English alphabet, and the letter ñ in Spanish.
* Carmen in 2009, and have since performed together in many operas. Garanca herself has said that they help each other bring out their acting and singing skills, and are comfortable to perform alongside one another.
* Carmen in 2009 at the Teatro alla Scala in Milan alongside Jonas Kaufmann, she has become a widely-acclaimed mezzo-soprano and has performed with various leading opera houses including the Met Opera, the Canadian Opera Company, and the Royal Opera House. In addition, she has also become very well-regarded in her home country, and frequently performs charity concerts on TV.
* Carmen, it does so in the hammiest way imaginable. Escamillo's "Toreador Song" is a five-minute-long blast of ham in which he repeatedly compares his prowess in the ring with his prowess in bed. There is also "Écoute, écoute, compagnons", another hammy blast about how sneaky you have to be to smuggle cigarettes.
* Carmen, leaving himself with no choice but to run away with Carmen after all.
* Carmen: Mercédès, during the fortune-telling number, sees herself becoming the wife of a wealthy but senile man — and then, as his widow, inheriting magnificently.
* Carmen Miranda famously wore a tutti-frutti hat on her head while dancing. Very unpractical, though it did look sexy.
* Carmen Miranda: Portuguese singer (although more associated with Brazil, where she grew up and became a superstar), best remembered for her tutti frutti hat.
* Carmen Sandiego, a 2019 animated Netflix reboot following a younger Carmen out-thieving the forces of V.I.L.E..
* Carmen Sandiego and actually makes it a plot point that she doesn't know her ancestry. For the entire first season all she knows is that V.I.L.E. found her as a baby in Argentina with a Russian doll.
* Carmen Sandiego and several operatives, sending the rest on the run.
* Carmen Sandiego, are an excellent example of this and they are led by five members of their organization in total.

* Carmen Sandiego: A series of these type of books were also published in the franchise, which follow the premise of the computer games.
* Carmen Sandiego as we know it is just the latest incarnation of a criminal conspiracy that's existed since the Middle Ages.
* Carmen Sandiego, Chase Devineaux jokes about this trope to himself as he closely pursues Carmen's vehicle from behind.
* Carmen Sandiego detectives. It's implied she doesn't actually want the stuff she's stealing (since she would have to be set for life hundreds of times over just to pull off the heists in the first place), and is in it purely for the thrill of the chase.
* Carmen Sandiego due to the similarities, who is also Ambiguously Brown.
* Carmen Sandiego episode "The Opera in the Outback Caper", right after the rocket launch is aborted with 2 seconds left, Ivy remarks "Number 2? I just did that in my pants!"
* Carmen Sandiego escapes. In the case of the game show, a contestant winning the bonus round resulted in her capture, but only until the next episode.
* Carmen Sandiego. Everyone else is a wacky alien of some description.
* Carmen Sandiego from the '90s into a hero. Thanks to positive word of mouth about it's gripping plot and excellent characterization once it premiered, it quickly became one of Netflix's most popular animated shows and is largely seen as one of the best reboots ever.
* Carmen Sandiego games, even if you caught up with the crook, if you didn't have a warrant, or had a warrant for the wrong crook, an arrest could not be made and the criminal would be allowed to go free.
* Carmen Sandiego games of years past often included special editions of commercial information manuals, such as the Fodor's travel guide, from which vital case info needed to be mined. In some editions of the game, they also doubled as copy protection, requiring you to use the specific edition of the book that came with your title to answer questions before the game could continue.
* Carmen Sandiego has a slight variation. Carmen is talking to a teen girl who's an art thief being scouted by V.I.L.E. and trying to convince her that crime doesn't pay. As they're walking down the street, the girl steals a watch from a man on the street. He doesn't notice, but Carmen sees it, steals it back, and returns it. When the girl tries to smugly show off to Carmen, she realizes she's holding up nothing. Unfortunately, this display of Carmen's ability convinces the girl that she should get the same training.
* Carmen Sandiego" has multiple endings based on the choices Carmen makes, but the best one involves her saving her two friends (who had been taking hostage by VILE) and also recover all the items VILE forced Carmen to steal so she can return them to the authorities.
* Carmen Sandiego has Player in this capacity, acting as tech support and intel guy for Carmen's team, overseeing all their missions remotely.
* Carmen Sandiego infiltrates the ring using another wrestler's mask).
* Carmen Sandiego: In the comics, detectives are recruited using the computer game.
* Carmen Sandiego knows many languages because she was raised in a highly multilingual environment.
* Carmen Sandiego: Math Detective: The game opens with you infiltrating one used by VILE.
* Carmen Sandiego more than once, and Carmen easily outruns him. He also seems to have little knowledge of history and geography, making him less capable of seeing the big picture of Carmen's plans and his obsession with capturing her makes him blind to the times where she is not the enemy.
* Carmen Sandiego: Netflix's Carmen Sandiego rarely uses anything else.
* Carmen Sandiego (note that even when the kids won the game show and captured her, she was right back doing it again by next episode).
* Carmen Sandiego once stole all the Broadcast towers in the world in order to show off her latest thefts.
* Carmen Sandiego. On the other hand, she is motivated by showing off.
* Carmen Sandiego over the possibility of false arrest). This is done for sake of

gameplay, of course, but still legally inaccurate. In reality, if you caught someone with stolen property on them, they could be arrested at once.
* Carmen Sandiego: Played with, in the previous incarnations, Carmen's name really is "Carmen Sandiego". In this incarnation, she was an unnamed baby found by V.I.L.E., who was raised under the code name of "Black Sheep". When she ran away, she chose for herself the name Carmen Sandiego from the brand of the hat of her outfit.
* Carmen Sandiego, Player is this type of hacker. He specifically calls himself a white-hat hacker when he first talks to Carmen, back when she was Black Sheep.
* Carmen Sandiego, regularly steals locations such as Ancient Rome's Forum and the Mason-Dixon line. Why? Because she can!
* Carmen Sandiego: Season three starts a few days before Halloween and the start of Dia de los Muertos, goes over the weekend into November and ends on November 5th. During this time, Carmen and crew travel from Beunos Aires, Argentina, to Veracruz, Mexico, to Mexico City, to New Orleans, then to Venice, Italy, and finishes the season in London, England in time for Guy Fawkes Day celebrations.
* Carmen Sandiego series has Carmen's pet cat, Carmine, who shows up every now and then to taunt the players in certain games or lie on Carmen's lap.
* Carmen Sandiego, set up an app that would allow them to easily hack into a celebrity chef's accounts by scanning his retina. Unfortunately, the agents who wind up being responsible for carrying out the plan are the Cleaners. They struggle to even open the phone and don't seem to know what an app icon even is, much less use the app itself.
* Carmen Sandiego's Great Chase Through Time is stolen by one of Carmen's thieves.
* Carmen Sandiego's hat gets a piece of it sliced off. Carmen claims that Paper Star owes her a new hat.
* Carmen Sandiego's ThinkQuick Challenge, Snarla Swing's knowledge thefts are motivated by her hatred of technology.
* Carmen Sandiego style episode, where the choices the viewer makes for Carmen lead to various endings. Worst case; Carmen and/or her friends are brainwashed by VILE to become VILE operatives. Best case; Carmen rescues her friends and maybe even recovers the items VILE forced her to steal.
* Carmen Sandiego that seem to hit themselves or fellow agents more often than the intended targets.
* Carmen Sandiego. They aren't exactly spy organizations, but the series borrows tropes from the spy genre enough that it really doesn't matter.
* Carmen Sandiego this base in the Season 2 finale, due to fears of being discovered by ACME, they open Season 3 by relocating to a castle in Scotland.
* Carmen Sandiego. This, combined with the fact that she used to be one of them, has made her the seemingly sole focus of the ACME Detective Agency as well as nearly every law enforcement organization on the planet.
* Carmen Sandiego, this is how the V.I.L.E. council deals with their agents getting discovered by the police: they quietly extract the agent, then wipe their memories of anything related to V.I.L.E. and send them back to the lives they had beforehand.
* Carmen Sandiego to show that Zack and Ivy have joined ACME and are working with Chase and Julia to hunt down the remaining V.I.L.E. operatives, with the occasional help of Carmen.
* Carmen Sandiego: V.I.L.E. is a highly diverse organization, both among its operatives and its ruling council. A good example would be Carmen's former classmates; besides herself (born in Argentina and raised on V.I.L.E.'s base), there's Gray/Crackle (Australian), Sheena/Tigress (albino), Jean-Paul/Le Chévre (French and dark-skinned), Antonio/El Topo (Spanish), Mime Bomb (white), and Paper Star (Japanese).
* Carmen Sandiego", VILE takes Carmen's sidekicks Zack and Ivy hostage to force her to steal for them.
* Carmen Sandiego: Word Detective, every location is a villain lair for a member of V.I.L.E., with the main hub a lair for Carmen herself.
* Carmen seduces the naive soldier Don José, who abandons his fiancée

Micaela and his military duties for Carmen's sake, even running away with her, only to lose Carmen to Escamillo, a toreador. Enraged by Carmen leaving him, Don José kills her outside the bullfighting ring at the end, ultimately meeting his downfall.
* Carmen. Standing in front of a rampaging bull as your day job makes you a badass per definition.
* Carmen, the last thing Carmen does before Don Jose stabs her to death is remove a ring he gave her and throw it at his feet.
* Carmen the refrain of the Toreador's Song appears in the first three minutes of the overture and appears in every act thereafter.
* Carmen there's no larger ham than a bullfighter who sings the famous Toreador's Song.
* Carmen, the sweet and innocent village girl engaged to Don José, and a stark contrast to Femme Fatale Carmen.
* Carmen. This is often subverted in later seasons where either Bart or Homer become involved in the arts and find to their great surprise that they actually enjoy it.
* Carmen to commit similar crimes, which influenced his own take on it.
* Carmen was originally produced at the Opéra-Comique, which permitted spoken dialogue. It was soon adapted into a French grand opera, with the dialogue replaced by recitatives by Ernest Guiraud, and a ballet added to the fourth act. Many productions include the recitatives but omit the ballet.
* Carmilla, after "The Blood Oath", her hair turns blood red like her eyes.
* Carmilla: Although Laura never blames her father, there are clear hints that he is afraid of letting go of her. Even though Laura is suffering from loneliness at the castle, her father does not take her to balls, send her to a boarding school, or consciously prepare her for a life outside of the castle. When he tells Laura of the death of Bertha Rheinfeldt, General Spielsdorf's niece whom she was looking forward to meeting, he adds that he is "very glad" that Laura never got to know Bertha, because this way she has been spared the grief of losing a friend. Taken to its conclusion, this reaction indicates that he prefers his daughter not to have friends at all rather than to risk grief from experiencing loss; obviously not a very wise precept.
* Carmilla: Among the old paintings which Laura's mother inherited from her family is a portrait, dated 1698, of Countess Mircalla Karnstein, who Laura recognizes is the spitting image of Carmilla. While Laura is astounded by the perfect resemblance of Carmilla to the portrait, her father, though taking note of the similarity, chalks it up to coincidence.
* Carmilla, and howls continually while the mountebank converses with Laura and Carmilla. For added irony, the mountebank is eager to sell his vampire-repellent charms, but scolds his dog for howling. Possibly a nod to "Christabel".
* Carmilla by over 20 years. When we first meet her, she and her "mother" stage a coach accident outside the home of Laura and her father, getting the injured girl invited in to recover while her mother continued an important journey. Later we learn that they pulled the same scam so the young vampire could feed on Bertha Spielsdorf, with Carmilla's mother again getting called away on urgent business so someone else will gallantly offer to play host for her daughter while she's away. Carmilla may not be a pure example, though; while staying with Laura and her father she also kills several young women in the village, seemingly with impunity. These murders happened "offscreen", so we can't be sure of the exact circumstances, but it seems doubtful she pulled elaborate tricks like these for every victim.
* Carmilla falls into this trope. She was born in 1680, but she looks like a college student.
* Carmilla features a scene where a traveling salesman sells Carmilla and Laura some vampire repelling charms. Carmilla is, in fact, a vampire. Ironically, she herself swears that it works perfectly because it puts Laura's mind at ease, and makes her easier to feed upon.
* Carmilla has managed to eclipse the original, at least amongst younger and less literature-savvy fans.

* Carmilla in him getting pregnant. So far, the only one she has actually impregnated has been female.
* Carmilla is noble and a demon. She's one of the protagonists, and yet she is directly descended from both Cthulhu and Shub-Niggurath and is supposed to take the mantle of The Kellith, to wipe humanity off the face of the earth and repopulate the planet with the seeds of The Great Old Ones.
* Carmilla is very petite, but she's still a vampire thus could knock the muscly God Brand down a staircase with a single kick. In Season 4 we see Carmilla go
* Carmilla: Laura is captivated by Carmilla, who unbeknownst to her is a vampire. While Laura thinks of Carmilla as a friend, without any apparent erotic component, Carmilla declares several times that she is in love with Laura.
* Carmilla: Laura's father comes to believe in vampires once he sees with his own eyes the truth about Carmilla. Before, he had outright laughed at the idea that his young guest was a vampire.
* Carmilla makes a good point against Dracula next, by pointing out that he could have taken better (or really
* Carmilla, possibly from having eaten Carmilla's century old vampire mother. The episode ends with Carmilla, Laura and LaFontaine looking at the camera as the town meeting alarm sounds out ominously...
* Carmilla's a descendant of Shub-Niggurath on her father's side and of Cthulhu on her mother's side. She is foretold to be the thing that wipes humanity off the face of the earth and replaces us with her spawn. As The Kellith, she has an evil cult that numbers in the thousands. She has
* Carmilla series feels this way towards her master Dracula. Dracula seems to be indifferent, but Carmilla worships him and does everything in her power to aid him in leading humanity into darkness despite showing no true hatred towards humans.
* Carmilla's will try to feed on either males or females in her "gown" form.
* Carmilla: The doctor who examines Laura because of her deteriorating health is certain that she is being visited by a vampire when he discovers "a small blue spot, about the size of the tip of [a] little finger" on her upper chest, only a "little below [the] throat". Later we are told that a different doctor found a like "small livid mark" in the same spot on Bertha Rheinfeldt before she died. While these blue spots mark the points where the victim has been bitten by the vampire, the actual punctures left by the vampire's teeth are so small as to be almost invisible. Laura also one time mentions off-handedly that Carmilla has a "little mole on her throat"; it seems possible that the "mole" is actually the mark left by the vampire who killed her.
* Carmilla: The first night that Carmilla enters Laura's bedroom at night, Laura wakes up and sees "a female figure" standing at the food of her bed. Though the figure stands perfectly still, she seems nevertheless to change its place and move out by the door.
* Carmilla the Series-filled relationship. Everything else, from the characterizations to the plot to the setting, is so radically different that the web series is basically its own original work.
* Carmilla the Series is an elegant, sophisticated vampire who prefers to never be more than a four-hour flight from Paris if she can help it.
* Carmilla the Series is that Laf is non-binary, but because they aren't out yet to the rest of the characters, the show maintains the ambiguity.
* Carmilla the Series. It features many queers and vampires, including the two protagonists, Carmilla, a lesbian vampire with loads of history, and Laura, a precocious university student and part-time investigator of the paranormal at Silas University. Their friends include childhood friends Perry, an orderly, mortherly girl who clean when she is nervous, and LaFontaine, a gender-queer science geek who may or may not be in love with a former digitalized human soul.
* Carmilla the Series, judging from this conversation with her father.
* Carmilla the Series, Laura and Carmilla attempt to be friends with benefits, with Laura insisting on keeping things "light and casual". This lasts until S 3, Ep 22, when Carmilla gives Laura a pep talk:
* Carmilla the Series. She's an Amazonian red-headed lesbian athlete-scholar who

clocks in at an incredibly impressive 6'2", the second-tallest member of the cast after Wilson Kirsch (6'5"). The average height of non-Danny members of the cast (excluding Kirsch) is 5'4".
* Carmilla the Series. There's even side videos with the cast, in character, endorsing Kotex products.
* Carmilla the Series, they continue to refer to her as "the Dean" most of the time (except, of course, for Carmilla, who calls her "Mother").
* Carmilla the Series ("This is flashback material!"). She stops however when the story gets really bleak.
* Carmilla the Series use. There's also a neat little teleportation that Carmilla does once, but because the lights are out all the audience sees is a puff of black smoke. It's all rather nicely done, considering the near-nonexistent budget.
* Carmilla the Series. What's a girl to do with a reunion after decades but party?
* Carmilla: The vampire Carmilla seems fond of using rather transparent anagrams as aliases: her real name is Mircalla, and she also uses the name Millarca in the story.
* Carmilla: The word "vampire" is not used up to Chapter 13 (of 16), when it is used by the woodman who relates how the village of Karnstein came to be deserted. Before that, there is only ominous talk of the "oupire", the equivalent of vampire in the North-Slavic languages.
* Carmilla they took it a step further and cremated the vampire's remains after impaling and decapitating her, then scattered the ashes in running water.
* Carmilla. Though these things come in handy, it really makes Laura feel smothered by Danny's own protectiveness.
* Carmilla when she isn’t a disembodied weeping mask is usually depicted as a woman with dark hair, brown hair or wavy blue flaming hair in the games. In the Netflix series, however, Carmilla is firmly
* Carmina Burana is an interesting case which could arguably be considered this. The collection of 12th century poems, songs, and stories which Orff arranged as a symphonic cantata had little in the way of musical notation, and the notation which was used was so old that modern musical scholars aren't certain just how they would have been performed. As a result, Orff was free to arrange the music however he liked, and while he did make some attempt to work out the original arrangements, for the most part the 1936 work was an entirely original score.
* Carmina Burana musical education program for children, whose materials have been loosely adapted into many languages.
* Carmina Burana of Latin and German songs and poems by the same name (many of them quite bawdy for their time).
* Carmina Burana than most of his later vocal and theatrical works, which also tend to be less heavily orchestrated.
* Carmina Burana, with its first piece being an ode to the caprice of fortune... or the backing music for the Old Spice aftershave advert with a bloke on a surfboard.
* Carmina's route is probably the one that fits the implausible/inappropriate part; not many people would confront their rapist just to immediately forgive them for it, and then pursue a romantic relationship.
* Carmine and the knight are accused of witchcraft - a sentence which also applies to Mariotte and the actors (which go into hiding). The two former are burnt at the stake. At the beginning of the story, the villagers invoke it against Mariotte, effectively dooming themselves in the process.
* Carmine Falcone loved his mother, and connects with Liza, a young woman, over listening his mother's favorite aria.
* Carmine Falcone's death is the closest as he's still shot and killed by Two-Face, but in the film, he's shot in the neck and lives for a couple of more minutes afterwards. In the comic, he's shot in the head and dies instantly.
* Carmine Falcone's last name as a similar issue with Ra's, though —
* Carmine Giovinazzo's past of aspiring to a professional baseball career and then being sidelined by an arm injury was incorporated into Danny Messer's backstory. Rather naturally, the actor's Italian ethnicity was also incorporated. Additionally, both actor and character are from Staten Island. Also, the painting

Danny gestures toward in an early episode involving an art gallery was done by Carmine himself.
* Carmine Lombardozzi, a capo for the Gambino crime family, was a specialist in securities fraud. He and his minions engineered many stock frauds over the years via "boiler rooms," which were nothing more than dingy offices minimally furnished with a well of telephones, sucker lists, and blackboards in order to chalk their sales, but used fancy-looking names to dupe the "suckers" into believing the call was legit. The scammers would "cold call" the "suckers" (mainly unsophisticated investors) daily, touting worthless stocks to artificially drive up demand before dumping their holdings to drive the price down.
* Carmine's band, Rod would pronounce it "A-peace" when introducing him at concerts. When Carmine told him the correct pronunciation, Rod basically said "Too late".
* Carnacki the Ghost-Finder's titular ghost-finding adventures happen all around Great Britain and Ireland, and he's based in Chelsea, London.
* Carnacki the Ghost-Finder. The original short-story collection was published in 1913.
* Carnacki the Ghost-Finder to fully embrace this trope, devising updated versions of medieval-era protective wards that incorporate electrical wires and multicolored neon lighting.
* Carnage can do this as well, slipping a piece of the symbiote over a dead body to make someone think that he's dead, just so he can slip away or get in and gut someone. Of course, it doesn't work all the time, as it didn't fool
* Carnage doesn't believe in order and morality, and kills people for fun.
* Carnage gets stabbed in the eye by Kaine, leaving him comatose. That just makes him even more dangerous, since the symbiote is able to run amuck with his body.
* Carnage. However, the series end on an upbeat note where the heroes are ultimately able to defeat Carnage and seal Chthon away before he can destroy humanity.
* Carnage in New York, when Carnage attacks the "Feed 'Em All" fundraiser party, an artist throws a metal statue of a nude woman at him. Cletus throws it back, punching a hole clean through the artist's stomach.
* Carnage involved bony protrusions all over his body, including his shoulders.
* "Carnage of Krell": After Rex confronts him, traitorous Jedi General Pong Krell begins his escape from the airbase by smashing through the window of the control tower to land on the ground several storeys below.
* Carnage. Only a man like him would find literally painting the neighborhood with blood hilarious.
* Carnage's identity - he wrote Peter Parker's name on the walls hundreds of times and chanted to himself "I know a secret..." The knowledge was quickly wiped from his mind, but they never showed what happened to the writing on the wall. Presumably Ravencroft's guards and doctors assumed Carnage was obsessing over the guy who took pictures of him getting beat up.
* Carnage subverts this trend; he is at least as strong as Venom if not stronger (and thus stronger than Spider-Man) but is actually smaller and less muscular than Peter Parker without his symbiote.
* Carnage Swallowing The Past the current generation is vegan from birth and eating meat and dairy is horrifying for them. They are also oblivious that not long ago people ate animal products. It seems that times are peaceful and people are generally very open to themselves. But it isn't equally for everyone as most older generations struggle with their "carnist" past and they are going to therapies (similar to AA) to fight with their immense guilt.
* Carnage to psychotic levels. He does not believe that the horrible things that he does are wrong, because he sees law and order and existence itself as pointless, and it's everyone else who is crazy and stupid for not seeing the truth; that we should all do whatever we want because nothing matters and there's no such thing as morality, and to think otherwise is unnatural and delusional. As Ravencroft became less and less equipped to handle him, he started being locked away in specialized facilities (like the Raft) with other villains, crazy or not.

* Carnage Unleashed! opened with Carnage using his symbiote to murder someone through the Internet, and it just got more insane from there, culminating in everything exploding.
* Carnage, where he continuously bounces back from all the heroes' attempts to destroy him with ease, even when they tried using traditional Symbiote weaknesses like fire and sound waves. Nowadays, he's still dangerous, but he's no longer the unstoppable powerhouse he was before.
* Carnage yet he’s far stronger than both of them being able to toss them around like beach balls.
* Carnegie sports a pretty badass longcoat that completes his goth image. Eli also wears a green one that is eventually passed on to his protege, Solara.
* Carnell boasting that he beat "the best chess computer available" six times in a row in "Weapon" now makes him look ridiculous.
* Carne most definitely qualifies, looking hideous and lumpy with barely any neck and a
* CarnEvil certainly fits the bill, complete with demonic floating clown head.
* CarnEvil, damn near everything gibs but the skeletons at the end. This is especially fun when it takes more than one shot to take an enemy down.
* CarnEvil even before you shoot them into bloody pieces. One can almost smell the gore in certain levels, even through the cartoony graphics.
* CarnEvil has deadly "spider-monkeys" (crosses between monkeys and spiders) in the Freak Show stage.
* CarnEvil has Eyeclops, a two-headed cyclops with one eye on each head, three on his chest, and several others on his limbs.
* CarnEvil has the "Museum of the Slightly Curious", a small alcove full of oddities. Some of these include a "Thing in a Bottle", a mummy sarcophagus, an Ancient Mystery Skull of Time, and even the World's Biggest Shoe.
* CarnEvil is especially guilty of this. In the Rickety Town level, light-hearted and cheesy Christmas music is played while you're gunning down giant wasps and zombie elves wielding candy canes.
* CarnEvil is Krampus, a warped, horned, green-clad version of Santa, who attacks by clawing the player or pelting them with presents and flaming coal while taunting you with phrases such as "Have a nice lump a' coal!" and "I'll stuff your stocking!"
* CarnEvil that it was him who voiced Umlaut, finally clearing up the confusion. Considering that they credited all their actors and that Welker is a big name in the world of voice acting, it's very unlikely that they would have left Welker out of the credits if he had actually worked on the game.
* CarnEvil, the player character is knocked into an open grave after falling off of a roof. Two zombies pop up with the clear intention of burying them alive, but they manage to shoot their way out before resuming the level.
* CarnEvil: This is one of the concessions to taste, along with your opponents' lack of internal organs. The unintentionally humorous result is that an opponent with no remaining face has its eyes bulging out of its ruined flesh.
* CarnEvil. Though it seems to look a lot like an ambulance, as seen in the above photo.
* CarnEvil uses the trope as an underlying theme. Every event is meant to make you the main attraction. Whatever it is, though, the aim is to turn down the invitation.
* Carnies. It's a little different from other examples in that he was already undead to begin with.
* Carnifex is sent to the United Earth Peace Fleet due to its difficulties in subduing the local population of Terra Nova, as well as for issues back on Earth.
* Carnifex of one of the gunboats escorting it, that rammed the kamikaze cargo freighter before it could deliver its explosive cargo.
* Carn is incinerated, but before he was killed, he managed to get one last spell out, which drained the enemy magician of all the water in his body, causing him to crumble to dust.
* carnitas (pork chunks fried in lard) have signs depicting a happy cartoon pig

sitting in a pot of boiling fat.
* Carnivàle5, and the pace of the plot meant that some fans immediately concluded that it'd never pay off. They were right. Knauf had planned a five-year time skip between Seasons 2 and 3, which would have brought the show to 1940, with further seasons to bridge the rest of the gap between then and the Trinity test, but then the show got canned.
* Carnivàle all have obsidian orbs when they tap into their innate evil.
* Carnivàle appears at first to be this trope, but during the second season many of his mysteries a revealed and thus becomes more human-like.
* Carnivàle (because he's a witness) as he's in the midst of praising Stroud for saving his life.
* Carnivàle: Ben Hawkins has the power to heal, but only by transferring life from one creature to another. Case in point; he takes his friend Gabriel into a lake and heals Gabriel's broken arm, causing dozens of fish to bob to the surface around them, dead.
* Carnivàle: Ben Hawkins sometimes has glowing white eyes when doing something seriously holy.
* Carnivàle: Ben who is the butt of many a joke among the carnival folk at the beginning of the series.
* Carnivàle, Brother Justin gets a vision involving snow that turns into a rain of blood in the street. He thinks it's a sign from God. Oh, how wrong he is...
* Carnivàle: During one of Brother Justin's visions, the ghosts of children float into, then out of, view.
* Carnivàle episode named "Lincoln Highway", Clayton "Jonesy" Jones, the crippled co-manager, is almost lethally tarred and feathered.
* Carnivàle features some good ones with the actors, most notably Clea Duvall's rather embarrassed commentary on her sex scene with Nick Stahl.
* Carnivàle has Babylon — turns out its entire population except the bartender is made up of ghosts.
* Carnivàle has these pretty much every time he closes his eyes.
* Carnivàle has to draw life-force from his surroundings to use his healing abilities. It is implied that he may have inadvertently caused the Dust Bowl in this way.
* Carnivàle; he's an outwardly saintly Methodist preacher with a "special destiny"... who turns out to be the Antichrist. It takes him, and us, a while to realize that.
* Carnivàle. However, the cinematography is good, not to mention the completely silent roar of approval given by his parishioners.
* Carnivàle, Jonesy was a surrogate father/uncle figure to Sofie when she joined the troupe at a young age, and by the time the series is set (where she is around 18 or 19) it's quite clear he has feelings for her.
* Carnivàle. Not that that necessarily would have stopped him. At all.
* Carnivàle once she finds out that she has avataric powers and heals Brother Justin after apparently killing Jonesy.
* Carnivàle, one of the cooch dancers is murdered by a local bartender. He is subjected to a sort of Russian roulette and lives. After he is allowed to go free, Sampson follows him and shoots him, trapping him in the town of the dead.
* Carnivàle says that man "forever traded wonder for reason" on the day of the A-bomb test at Trinity.
* Carnivàle, she is no more equipped or experienced than your average ingenue would be (despite knowing a lot more about sex): her shyness and vulnerability is presented as genuine.
* Carnivàle, the Billie Holiday song "Love Me Or Leave Me" is heard in the background on occasion, usually when something freaky is going on.
* Carnivàle. The story (especially in season one) is much more coherent and the whole thing looks amazing.
* Carnivàle. They hastily dig him up after realizing their error.
* Carnivàle, this is Ben Hawkins' main power, although it always comes with a price.

* Carnivàle. Unfortunately, studio interference led to a less challenging second season and cancellation soon after.
* Carnivàle was abruptly canned after its second season, leaving just about every plotline unresolved.
* Carnivàle was erudite, charming, and persuasive. He was also remarkably evil and showed some signs of Nazi sympathies.
* Carnivàle. When he does have sex with Ruthie he tells her that it was "a sin" and that it won't happen again. He also tends to freak out when others try to touch him. He does seem to change his mind later in the series regarding Sophie. It doesn't work out too well, though.
* Carnivàle, where the noises are of a girl being raped. The character who's hearing all this is paralyzed, though, and can only stare in terror at the wall.
* Carnivàle with Sophie waking up and the camera panning behind her to reveal her catatonic mother lying in the bed with her... after she had burned to death in a fire.
* Carnival, but they do not get to decide how many need to be eliminated. Basically, it's an eco-fascist dystopia that is also very socially conservative, due to the survivor generation consisting primarily of just a few hundred thousand random Africans and South Asians (i.e. generally deeply religious people with traditional values) and due to factors like unemployment and fetishizing of the few pregnancies that are permitted. The plot of the book actually takes place on one of the colony planets, which has serious social problems and injustices of its own, but which is environmentally almost pristine since it’s just a few thousand human colonists on a whole new otherwise uninhabited planet. However, the main protagonists of the story are a couple of spies sent from Earth and they spend a lot of page space dealing with the culture shock of adapting to circumstances we would consider more normal (e.g. normal food), as well as thinking about the resource-constraint reasons for their ethically reprehensible mission, the massive societal trauma that the survivors of the eco-terrorist holocaust had to learn to live with, and what could have driven the eco-terrorist to do what they did.
* Carnival Diablo: The Ultimate Sideshow plays on this trope. The Carnival is run by the Devil, and the performers are presented as other-worldly beings with bizarre abilities. Many acts seem to put performers, and sometimes audience members, in danger.
* "Carnival From Hell" starts off like normal carnival music, but an underlying note of tension keeps building up until it takes over turning the music into a tune of pure chaos and menace when the protagonist loses his patience with a carnival worker who doesn't want to give him a game prize. While the pay off is played for laughs, this track remains eerie to listen to.
* Carnival has an AI that determines the maximum stable population of Earth and selects people to be killed whenever it is exceeded.
* Carnival!) is set in one of these. It's not creepy, just done on the cheap.
* Carnival Magic is about a stage magician who secretly has real powers of mind-reading and telekinesis.
* Carnival Magic, the rural police apparently use cutesy names as code, rather than numbers. The sheriff thinks he sees a runaway car with no driver, so he radios that he's "chasing a Ghost Car." The deputy catches up and sees that there's actually a chimpanzee driving, and a woman in the back seat. So he radios back:
* Carnival of Killers: A wide assortment of assassins, usually attracted by an open contract on someone's hide.
* Carnival of Killers: When a series of assassins goes after the hero, either from a bounty offer or hired by the villain.
* "Carnival of Monsters". The memories of the passengers and crew are then altered to reset after ten minutes so they don't realize that they are never reaching their destination. Unfortunately, the Doctor and Jo Grant are not part of the original loop, leading to them being "discovered" and arrested repeatedly as stowaways.
* "Carnival of Monsters" waiting area, being bullied by (literal) grey-faced bureaucrats (who are trying to engineer a political coup).
* Carnival of Monsters", where Jo sinks to her waist in a swamp on location. Her

clothes are clean and dry in the studio scenes set less than a minute later.
* "Carnival of Monsters", with the showman Vorg portrayed as ignorant of the horrors he's leading.
* Carnival of Rust," the Carnival customer conceals her face behind an impressive gas-mask, while its workers are all bare-faced, implying that the environment is toxic.
* Carnival of Rust when she is taken aback and ignores his advances in favor of visiting other attractions, then leaving.
* Carnival of Souls a car-crash survivor is drawn to an abandoned carnival pavilion while experiencing mysterious goings-on.
* Carnival of Souls church organist. Even when she's clearly mentally unraveling before his eyes, he remains unsympathetic, ultimately firing her for playing dissonant, "blasphemous" music on the organ.
* Carnival of Souls is a young woman who just graduated from a Kansas college and is driving to Utah to accept a job as a church organist. Right before she gets to her destination, she is frightened by a strange man who appears in front of her car, and who she almost runs over. When she pulls over and looks to see what happened, there is no sign of the man. After she arrives in town and starts her new job, she is repeatedly troubled by visions of the strange man, visions that nobody else can see. She is also obsessed with an old pavilion that is just outside of town that used to be the site of a carnival. She finally seeks help from a doctor, who takes her to the pavilion in the hope that reality will cure her hallucinations. At the pavilion, she is overtaken by strange dancers that the doctor can't see and then suddenly disappears. It turns out that she actually died in a car accident back in Kansas but denied her own death. The strange man and the people from the carnival are souls who are trying to bring her to the afterlife, and who are ultimately successful.
* Carnival of Souls, whose mysterious villain is referred to simply as "The Man".
* Carnival of the Animals has a movement titled "Pianists", in which the two pianists tediously perform five-fingered exercises and scales... as if they were beginners.
* Carnival or theme park rides sometime incorporate the effect; a classic ride, called "The Rotor," placed riders inside a cylinder which was spun vertically. After sufficient speed was achieved, the floor would drop away, leaving the riders "stuck" to the wall. Some of the more "adventurous" would be able to actually sit upright against the wall, until the end of the ride.
* Carnival Phantasm, and appears as a line drawing in the next episode because of this.
* Carnival Phantasm and giving Shirou and Shiki hell for not choosing them. Ciel chooses to follow around Shiki to every restaurant he goes to so that she can replace his dishes with curry, and is so persistent that he eventually starts to hallucinate that the water from his faucet is curry.
* Carnival Phantasm and the ensuing reaction ("LANCER GA SHINDA! KONO HITO DE NASHI!")
* Carnival Phantasm antics. Then in the next episode, it's revealed just how much that animation cost (325,000 yen - about $3,000 - for 40 seconds of animation), and to get back on budget, she's been reduced to line art, and her companion Ilya has no intermediate frames.
* Carnival Phantasm, Berserker defeated Caster in a tennis contest when Caster was distracted, yet he was disqualified for swinging too hard and hitting the wall, Illya even called him out for not understanding any rule.
* Carnival Phantasm, Caster squees so hard while spying on Saber she starts rolling on the floor.
* Carnival Phantasm characters trying to win the audience's attention by performing onstage and telling a bunch of rapid-fire routines that all follow the exact same format. It's one of those times where you can tell they've been practicing very hard on it and mastered the ability to turn in-time and say their catchphrase... but tragically haven't worked out a good joke.
* Carnival Phantasm comedy consisting of the cast of the previously mentioned

visual novels.
* Carnival Phantasm goes off in the distance, and Hisui looks at her hammer quizzically.
* Carnival Phantasm, Illya turned Berserker into an army tank, Shinji/Rider got a regular bicycle, and Shirou/Saber got a lion-themed kiddie ride that was coin operated. Assassin later showed up driving a truck that carried the temple gate he's bound to, and then Gilgamesh appeared driving a motorcycle.
* Carnival Phantasm In the next segment, she's rendered as colored-pencil line art, and her partner Illya loses her in-between frames and any movement beyond lip flaps, because Taiga blew almost 600,000 yen in under 40 seconds the last time. When Taiga responds by having a freakout and jumping all over the place, her animation quality gets worse and worse until she's nothing but rough pencil sketches and stick figures.
* Carnival Phantasm, it starts going wrong right from the start and eventually (literally) blows up in their faces.
* Carnival Phantasm, Rider/Medusa demonstrates her A+-rank Riding skill with a cheap granny bike. She pushes the thing so hard that it outpaces actual racing vehicles.
* Carnival Phantasm said and does this word by word while stabbing Lancer with hundreds of blades with Gate of Babylon.
* Carnival Phantasm, shows up as an actual tiger girl in the opening credits and a short scene in Episode 5.
* Carnival Phantasm who "grants wishes" by handing the wisher a kitchen knife and telling them to go stab the source of their problems.
* Carnival Row: Absalom Breakspear attacks his political rival Ritter Longerbane in Parliament after publicly claiming he's behind his son's abduction.
* Carnival Row, a common occurrence in the Pact-occupied fae lands. Not helping is that the longer someone in the Burgue illegally flies, the more police shoot at them.
* Carnival Row: Agreus once worked to hunt down Faun indentured servants who fled from their service. Even Ezra finds this appalling, but Agreus says he realized he'd never rise without playing by human rules. He also notes he is the only "skip jack" who wasn't human he'd ever met.
* Carnival Row: Agreus repeatedly endures this as a guest of Imogen, since many Fauns are employed by rich humans (including the Spurnroses' housekeeper).
* Carnival Row: Burgish people follow a man called "the Martyr" who they frequently invoke (who's depicted as hanged) and seems pretty similar to Jesus. Faerie meanwhile have a "Saint Titania", who shares the name of a mythical fairy queen (plus the idea of saints may mean it's similar to Christianity as well). The place Ritter Longerbane is laid in state seems very much like a church, and there is organ music in the background too. Some of the Fauns also are part of a religious sect which engages in self-flagellation as the Medieval era saw. They have a holy book and provide charity for poorer members of their people in a manner akin to many churches too. In their case, it takes a darker turn as the sect turns out to be bent upon a violent anti-human revolt. Fauns also have their Haruspices, female clerics named for Roman ones who prophesied the future by examining animals' entrails, especially livers (which comes up in the series).
* Carnival Row: By The Burgue's calendar it's now the seventh century, according to Imogen's comment. There are also days of the week that are different, like "Wrensday," and different months too.
* Carnival Row cop he's talking to replies "No. But in my opinion it ought to be."
* Carnival Row is his sister, as they share a father, after they've had sex. She already knew and didn't care, invoking her Pharaonic ancestry, since the Pharaohs often married their sisters. He comes around after this, and they stay together, with her even proposing they marry as well.
* Carnival Row: Jonah engages in something similar with Tormaline, who's a Faerie- as the two have sex, she bats her wings to lift both of them off the bed. This experience seems to be a part of the appeal that Faerie prostitutes have, since they also fly down to be viewed by potential clients.

* Carnival Row. No word on how any surviving werewolf soldiers are treated there; the only one we see in the Burgue is kept imprisoned.
* Carnival Row: Philo is the love child of a Faerie and human. This kind of relationship is condemned by most humans.
* Carnival Row: Piety Breakspear kidnaps her own son, then frames Ritter Longerbane as the party behind it.
* Carnival Row: Portia is a widow, and has become lovers with Philo (to one of her tenant's strong disapproval, as they're unmarried).
* Carnival Row: "Skip jacks" who hunt down indentured servants who'd broken a contract through leaving service are mentioned, and Agreus was once one.
* Carnival Row, the title district of the Burgue is considered this by most of the city's human residents.
* Carnival Row: Vignette and Tourmaline were once lovers. However, though Tourmaline would like to rekindle things, she accepts Vignette's rejection of that after discovering her husband is still alive. They are still close friends.
* carnivorans more than anything else), the echidnas of Australia (egg-laying monotremes) and the numbats (marsupials).
* Carnivore Confusion has been inconsistently addressed. Serris has said that anthro and "normal" animals exist and eating "normal" animals was acceptable. But he has also said to assume that all meat is seafood.
* Carnivore Confusion: The dietary concerns of sapient/anthropomorphic animals become a lot more morally complicated when it comes to eating meat.
* Carnivores, essentially a fan-made sequel which expands upon the lore of the original trilogy while introducing a completely new setting with its own storyline, assets and challenges.
* Carnivorous dinosaurs, other monstrous reptiles and giant insects are everywhere, and the only herbivores are Kong (who, in some versions, is rather an omnivore, as he eats people) who is
* Carnivorous Flying Giant Space Hamster: A bat-winged and carnivorous version of the standard giant space hamster.
* carnivorous. It's implied that this is how all shopping malls operate.
* Carnivorous trees were also supposed to exist in the Nubian rainforest. They reportedly attracted their prey by various means, such as by killing off all plants surrounding them to gain a "monopoly" on shade and perches, as well as by growing luscious, enticing and irresistible fruit and flowers as extra bait.
* Carnosaur, but with raptors instead of xenomorphs, a T-Rex instead of the queen alien, and a uranium mine instead of a space colony.
* Carnosaur hang out at a pub near his mansion that is essentially explicitly owned and operated by them. No one else is welcome, and strangers tend to get roughly escorted out and sometimes beaten up.
* Carnosaur who unleashed them. Government agents and soldiers burst in, execute them all, and burn the town to the ground to prevent news of the incident from spreading.
* Carnymancers can make bargains with fate to change a person's destiny. One carnymancer had a girlfriend who was destined to die in a fire, so he changed her fate to be that she would kill herself, thinking that this would make her effectively immortal for as long as she wanted to live. Both prophecies came true, but not in the way he expected. Since her fate made it impossible for anybody to kill her, she became overconfident and ended up killing herself by refusing to escape from a fire, mistakenly thinking it couldn't hurt her.
* Carnyx, a kind of tall Celtic Vuvuzela, was used to intimidate the Romans.
* Carol’s snub-nosed pistol is small, unassuming, and easily concealed, much like its owner. Also, it’s a revolver, just like Rick’s gun, but in a tinier package that is no less deadly.
* Carol also has feelings for Bob and is overjoyed, Bob now has to find some way to convince her it was all a mistake.
* Carolanne Smith, the "She Svengali" of Tulsa's "Hex House". In addition to being a career criminal, Smith kept two women imprisoned in her basement who, despite being let out every day on their own to go to work (having to give whatever they

earned to Smith) never once tried to escape, leading some to suspect they were hypnotized or under some sort of spell. Smith would also often have strange burials at night around her house. When her home was raided by police, they found a number of books on witchcraft and ritual magic, as well as journal entries confirming her belief in her power to control others. However, she was only given a year in prison for her crimes.
* Carol Ann Ford, who played the First Doctor's companion Susan, said in an interview on Radio 4 that the Eleventh Doctor's constant running up to aliens and telling them how beautiful they are is her favourite thing about his character. In fact, even in the 1960s, she thought that Susan should have been a Nightmare Fetishist by sheer logical extent of how weird she is and how she'd get desensitised to the monsters quite soon — but, unfortunately, she was constantly written as the
* "Carol" answers his questions perfectly until he presses "her" for more detail and "she" slips up. This both clues him in to "Carol" being a Skrull and to "Vers" having turned on him.
* Carol by Smokie: when the narrator makes a move on Carol, she says "I'm not 16, if you know what I mean", so he's "counting the nights and days".
* Carol: Carol is a wealthy housewife and Therese is a department store employee living in a dingy apartment. They fall in love.
* Carol Castro. Too that at a certain point he realizes her breath is bad enough for him to need something in front of his face.
* Carol Cleveland, such as Vanilla Hoare, the stuck-up starlet in "Scott of the Sahara". In real life, she is a redhead, by the way.
* Carol Danvers after absorbing her memories- sometimes visited Carol's brother Steve's grave.
* Carol Danvers. After being called out by her mother on excusing her jerkass behaviour on her past trauma, Carol stops pushing everybody away and apologizes to her friends for her earlier rudeness.
* Carol Danvers, aka Captain Marvel, is an interesting example. Although she's also a native of Earth like Star-Lord, she also spends most of her time helping out other places in the galaxy, since most of them don't have the likes of the Avengers to rely on. There's also the fact that most of her memories of Earth were wiped by the Kree, and she has since spent most of her new life going on space missions, so it's likely that Carol's home planet doesn't hold as much meaning to her anymore.
* Carol Danvers (a.k.a. Ms. Marvel, Binary, Warbird, and Captain Marvel) get a handle on her drinking problem. The Ultimate version takes this to the Ultimate extreme. A prime example is this dialogue between Black Widow and Stark:
* Carol Danvers and the continuity, although more often than not, she is generally portrayed as possessing this trait.
* Carol Danvers, Binary, Warbird, back to Ms. Marvel again and Captain Marvel as of summer 2012-present.
* Carol Danvers doesn't bother with a secret identity either. She spends the majority of her time off-Earth, handling galactic affairs.
* Carol Danvers first costume was very skimpy before she got her iconic black leotard.
* Carol Danvers. Her later outfit as Captain Marvel largely averts this, being far more modest and militaristic than her previous outfits. The aforementioned scarf is the only element that she retained from her last costume.
* Carol Danvers is much friendlier to kids than she is to other adults (save Maria Rambeau and Nick Fury), possibly owing to having an unpleasant upbringing. She's an
* Carol Danvers, quits the Avengers twice in order to lead a normal life. The first time, her retirement was disrupted by Rogue. The second time, she put her costume back on to help Iron Man out.
* Carol Danvers, the alien race Aakon make alcoholic beverages and drugs specifically designed according to the customer's tastes.
* Carol Danvers, the original Captain Marvel, gained the ability in a similar fashion although he had volunteered for experiments from a helpful human scientist rather than being an unwilling test subject.

* Carol Danvers, the Silver Age superhero she got the name from, and whose book she actually originated in. Even fewer people know about Monica Rambeau, the Captain Marvel after Mar-Vell and before Carol.
* Carol Danvers was also cut, since there's a significant age gap between the two in the MCU, meaning there's no way they could have been classmates like in the comics (in addition to the above-mentioned rights issues meaning that Spider-Man wasn't part of the MCU when the show was initially written).
* Carol Danvers, which features the Carol Corps as a band of female soldiers who assist Captain Marvel.
* Carol Danvers while reasonably buff under the pen of some artists is generally still smaller than She-Hulk. Nevertheless, Carol can toss meteorite around, lift trains and even punch over the hulking Thanos.
* Carol Danvers, who, as her boss, was something of a strawman misogynist.
* Carol Danvers, who did espionage work when she was depowered, noted that often, going unnoticed is less important than nobody remembering your face after you leave. Drawing attention to other areas can help with that.
* Carol Danvers without powers. But unlike the original one, she stays that way for the duration of the universe, and never becomes Ms. Marvel or Captain Marvel.
* Carole & Tuesday, one of Carole's part-time jobs involves fake-crying at a dead guy's funeral to give the impression there are plenty of people missing him. This being Carole, she sees a butterfly land on the priest's head and bursts out laughing like a madwoman.
* Carole & Tuesday respectively). This is because all the songs are entirely sung in English by native English singers.
* Carole & Tuesday (several genderfluid/transgender/non-binary supporting and minor characters, and a recurring subplot/theme of gender dysphoria/gender-fluidity due to a fantastic plot element)
* Carole & Tuesday that the show's depiction of Dahlia, an intersex character, can be transmisogynistic and racist, as she is portrayed as a violent brute.
* Carole & Tuesday, their fingers twitch. Sure enough, they arrive for the finale alongside everyone else, remarking, "I can't die until I sing this song."
* Carole & Tuesday was released on Netflix on Christmas Eve, 2019 — not only a day before Carole's birthdate, but on a Tuesday that year as well.
* Carole & Tuesday where 99% of all music is composed by AI programs, Carole and Tuesday's old-school approach arguably makes them a subversion.
* Carolee Carmello was cast as the takeover for Carla in the Musical Theatre/Nine, they had no time to make a wig, so she dyed her brown hair red. She kept the colour ever as she received more parts because of it.
* Carole King, full-length, sitting on a window seat in half shadow, barefoot and casually dressed in sweater and jeans, clutching a piece of her own tapestry work and upstaged by a large tabby cat. Very domestic and far from glamorous.
* Carole King wrote a song called "He Hit Me (and It Felt Like a Kiss)", where her husband/boyfriend/lover beats her, but she stays with him because "If he didn't care for me/I could have never made him mad" and "He hit me, and I knew I loved him/When he took me in his arms/With all the tenderness there is/He hit me, and he made me feel." As
* Carole Lombard. In the late 30s, she tried to get into dramas, but they were critical and commercial failures. She returned to comedies until her untimely death in 1942.
* Carole Lombard used this technique many times to hide a facial scar.
* Carole Nelson Douglas has her Irene Adler novels include explanatory pieces by a Fiona Witherspoon, an academic historian and member of the "F.I.A." (the Friends of Irene Adler). Witherspoon claims to have spent much of her time preparing the diaries of Irene's companion Nell Huxleigh for publication. The multi-year hiatus between the first four books and the next four is "explained" by the fact that Witherspoon had to review and research not only Nell's journals, but other material "found" with them, which is presented in the text as journal entries written by other characters.
* Carol explains to Dilbert that he can't order new pens because "you need a pen

to fill out the pen request form. And if you have a pen, you're not allowed to order one."
* Carol for her), Therese becomes more aware of women gazing at her—and returns the looks. Quite bold, given the 1950s setting.
* Carol gets ahold of the hammer Siri used to beat another woman into a coma, and uses it as leverage on Helena, her twin, since as they're identical DNA evidence Siri left would also implicate her.
* Carol gives it a shot and the crowd intentionally moves away causing her to crash (bonus points if it's onto someone small who couldn't get out of the way).
* Carolina Liar, A Swedish band with an American lead singer and ties to super-producer Max Martin, had two songs that were huge hits in 2008 on two separate radio formats. First, "I'm Not Over" was a #3 hit on the Billboard Alternative chart. Its follow-up, the ballad "Show Me What I'm Looking For" only reached #28 on that chart, but it was a huge hit on the Adult Contemporary chart, making it to #8. It was also their only entry on the Hot 100, reaching #67.
* Carolina Liar's "I'm Not Over" is an interesting example; while the singer isn't over his ex yet, the implication is that he just hasn't had quite enough time, and will be alright eventually.
* Carolina Reaper peppers bar none and needs to stay awake whatever it takes.
* Carolina's nickname (often given to her by York) is Lina. She's never called anything but Carolina in the show, though, even by York. On another note, she's almost always shown in fan works using the gravity hammer, despite using it only twice in the series—pistols or melee are much more part of her fighting style, yet fans have latched onto the gravity hammer instead.
* Carolina Wrestling Federation Mid-Atlantic is the last remnant of Wrestling Superstars Live, which itself was the last remnant of the
* Caroline Bingley and her sister Louisa Hurst are prime examples; condescending and haughty, they're full of snide, superior put-downs to the society they find themselves in, and in Caroline's case Elizabeth Bennet in particular (which isn't helped by the fact that she's Darcy's
* Caroline Bingley who becomes the instigator of strife between the families.
* Caroline Cushing did not meet David Frost by chance as he prepared for the interviews, but had actually been dating him for some time.
* Caroline in the City, and so little of the caring once they got together. Oh my God.
* Caroline in the City arguing over whether or not the most recent strip is funny.
* Caroline in the City, Caroline's parents clearly unconsciously favor her brother, who really is highly accomplished and successful and of whom Caroline has always been a little resentful and jealous. During a visit home, Caroline's employee, friend, and eventual lover Richard comforts her by comparing her brother to an alien, and saying that if it wasn't so cold, he'd be 'out looking for his pod'. Later, he gently teases Caroline by saying she has to get elected President, 'so her brother can become the Pope'.
* Caroline in the City: Doped up and about to enter surgery, Richard admits to Caroline that he loves her. Shocked, Caroline asks him if it's true; he says it is... then gives the same drugged-out confession to the nurse.
* Caroline in the City managed to subdue and turn over to the police. After spending a while embarrassed by this, the aforementioned incident happens... with the "victim" being much taller and more muscular than Richard. After Richard is bailed out of jail, both Caroline and Richard take pride in this fact.
* Caroline in the City, picks up a milk carton, and says, "Hey, didn't they find this kid?"
* Caroline in the City: Richard had been hiding his feelings for Caroline through the run of the show.
* Caroline in the City, Richards writes a love letter to Caroline telling her to meet him at Remo's if she accepted. She coincidentally ends up there at the expected time without having read the letter causing Richard to humiliate himself and flee to Paris. Annie finds the unread letter in season two which leads to comical blackmail mayhem.

* Caroline in the City, Richard tries to make his clingy girlfriend break up with him by picking his nose in front of her. This backfired when she takes it as a sign that he's comfortable enough her to indulge in bad habits...and then promptly goes to get her toenail clippers.
* Caroline in the City, scraping by on being Caroline's colorist while waiting for his break. One episode addressed it directly when a doodle he made and accidentally sent in with Caroline's comic generated some interest, Richard flat-out refused. Richard said he didn't want to sell out; Caroline wondered if he wasn't just in love with the whole romantic idea of the Starving Artist.
* Caroline in the City stole the joke shortly after by having Richard's head explode in blue confetti upon receiving shocking news.
* Caroline in the City: This is pretty much the only memorable characteristic of Annie Spedaro.
* Caroline in the City was blocked by a steady stream of false leads. The false leads on Caroline's side (Del, Joe, Trevor, and Randy) were generally likable guys whose only real fault was that they didn't quite have the rapport with Caroline that Richard did. On the other hand, the big false lead on Richard's side, Julia (to whom he was actually married for a season), was bitchy and manipulative.
* Caroline in the City, which subsequently connects the above shows with each other.
* "Caroline, No" is technically not a Beach Boys song: it was originally issued as a Brian Wilson solo single (no other Beach Boys appear on the single, but most of the group's regular backing session musicians do), and made the pop charts in 1966 properly credited to only him. However, after its single release, it appeared on the band's seminal
* Caroline of Brunswick, being sent off to marry George IV, got a lot of grief for her appearance at the British court, including for her "painted eyebrow".
* Caroline, or Change, and a big plot thread throughout the musical is the lingering grief her son Noah has about it and his father's subsequent remarriage.
* Caroline Rhea play Andy's co-stars in the sketch (substituting for Michael Richards and Melanie Chartoff, incidentally).
* Caroline's idea to save $250,000 to launch the cupcake business, the driving arc of
* Caroline was jealous over Stefan in the beginning as well. She didn't understand why Stefan paid Elena more attention than her. However, this later changes as she becomes the biggest
* Caroline Wozniacki, who long held a place among this unlucky few, first topped the rankings in late 2010 and spent all but one week of 2011 as world No. 1. Wozniacki did not even reach a Grand Slam final in 2011, let alone win one, and looked set to join Safina in the permanent members' club when injuries blighted her subsequently. However, she finally left behind her "No-Hit Wonder" status for good after a remarkable comeback to win the 2018 Australian Open, which also raised her back to the top of the rankings after seven years away.
* Carolingian Dynasty, was known as "Louis the Do-Nothing." He was crowned while his father was still alive in 979, but failed to retake Aquitaine and died heirless at age 20.
* Carolinus is a AAA+ Magickian, one of three who have that particular rank. However, he is also an elderly man, who has been through more than a few physically harsh situations, that would have eventually killed him, if not for James' interventions.
* Carol is prone towards this, which is part of what makes her so valuable to Harry - she'll give him affection, sure, but also her completely unvarnished opinion. Especially if she thinks he's being an idiot, or that his ego needs deflating.
* Carol is this to Diana and, briefly, to Bobby Drake and Mattie Franklin. However, she isn't this to her own little brothers, partly because of her difficult home-life, being more of an
* Carol Kendall, after their first day as outlaws, Muggles takes charge and being level-headed, directs all their tasks.

* Carol (lesbian main characters; subject matter includes queer female romance)
* Carol. Married mother Carol (Blanchett) has an affair with shop assistant Therese (Mara). This is in the USA in the 1950s, so matters do not proceed entirely to their advantage.
* Carol Reed Mysteries. Most of the time he isn't connected to the cases, he's mainly there to make the player laugh every once in a while.
* Carol Reed was known for his gritty dramatic works (the most famous being
* Carol says something so surprising or infuriating on the phone that Bob can't help but respond, calling her Carol.
* Carol's cat is called "Goose" rather than "Chewie," changing the homage from
* Carol screws everything up by walking into the room and asking "Why did you just call me Charlie?"
* Carol's father also seemed fond of this trope, telling her that the whole reason he refused to send her to college, sending one of her less academically minded brothers instead, was because as a woman Carol was supposedly too weak and fragile to handle college and a career in the real world and told her the best thing for her to do was just marry some random
* Carol single-handedly neutralize his Orbital Bombardment, annihilate his entire fighter screen and destroy an entire battlecruiser simply by flying through it, Ronan wisely decides to order the rest of his fleet to jump the hell away from Earth orbit.
* Carol sleeps with Gustav when he hits on her despite not liking him much and seeming actively put off by the fact that he sees nothing more in her than that she's "pretty," apparently for no better reason than that it's less trouble than actively rejecting him.
* Carol's main problem is that she went through this trope prior to the story starting, ahem,
* Carol's only two close friends are Jean-Paul and Lex, the latter of whom is a self appointed
* Carol Stanzione had a modest number of roles in the early 2000s, perhaps known for dubbing the
* Carol, the department secretary, is bitter and unproductive. The PHB
* Carol, under her spiky shell. While she is and remains a consummate
* Carolus Rex as the hegemon of Eastern Europe (a position it enjoys to this day).
* Carolus Rex led to Sweden's disastrous defeat at the Battle of Poltava.
* Carolus Rex. The sight of soldiers marching up to firing range, firing, and charging in complete silence was perceived as far more unsettling than any amount of noise. This tradition persists to this day.
* Carolus Rex (who historically took the reins of power from his wife, Charles's younger sister Ulrika).
* Carol visits her friend Mar-Vell's grave after learning about his death.
* "Carol" was a popular fanon name for Kenny's mom, as it had been used for several other moms before they each got a
* Carol, who though she first appears at the age of 14 and a half, she's about 5'10', has a relatively downplayed (due to age and realism) version of the
* Carolyn also has this relationship with the entirety of the MJN crew, including her son, as well as with Herc, her boyfriend (but don't let her hear you call him that)
* Carolyn Dawn Johnson has had only two hits stateside with "Complicated" and "I Don't Want You to Go", both from 2001. However, she's had more prolonged success in her homeland.
* Carolyn's name is a feminine derivative of "Charles" which means "free man". Carolyn is very glad to be free of her rotten ex-husband Gordon.
* Carolyn tells Bernie that she hid her owning a third cat for three months because she was afraid it would lead to her eventually becoming a
* Carom Billiards in the USA was played professionally for only 6 years before the players killed it by being too good at being boring.
* Carousel, after Billy dies, Julie, at Nettie's prompting, begins to sing "You'll Never Walk Alone" but breaks down in tears after a few lines. Nettie takes over

from her.
* Carousel, and the play includes a scene where his wife defends his actions.
* Carousel. At the beginning of the play, dead Billy Bigelow seeks permission from the higher-ups in heaven to return to earth to complete some unfinished business. That business being approaching the daughter he fathered right before dying in order to try to prevent her from making the same mistakes that he and her mother made.
* Carousel begins as a period-flavored romantic comedy, but gradually develops into a tragic romance.
* Carousel, Carrie reports that her husband took her to an "extravaganza" while in New York, but the sight of "twelve hussies with nothin' on their legs but tights" offended his puritanical sensibilities so much that he immediately hustled her out of the theatre. She went back, though.
* Carousel describes an inability to overcome nervousness and proclaim your love to someone.
* Carousel gets an entire solo about this. Unfortunately, it leads him to worry about money so much, he becomes a mugger and is fatally stabbed on his own knife.
* Carousel had these as Wolf and Marie, though it played them far less for comedy.
* Carousel, Jigger (at least ostensibly a sailor) throws himself at Carrie out of unbridled lust, despite her being engaged to wed.
* Carousel Kidnapping: An unsuspecting child is snatched off a carousel.
* Carousel of Progress: John in the final act has some issues with his voice activated oven, which raised the temperature every time John spoke a different number in an unrelated conversation, burning the turkey.
* Carousel spends most of her stage time barefoot, which apparently a trait shared in some productions with her father, Billy.
* Carousel, this is the reason why Billy decides to participate in the attempted robbery, especially once it becomes known that Julie is pregnant.
* Carousel, tree blossoms are falling when Julie and Billy kiss for the first time.
* Carousel uses a knife in the robbery-gone-wrong that results in his suicide.
* Carousel. When Liverpool FC first used the song as a football anthem (as well as when other clubs later followed suit), the cover version was used instead of the original.
* Carpe Diem gives the cab driver a name, Vertu dea'San, and tells what happened to her during after the climactic battle that occurred in Solcintra a few novels later.
* Carpe Diem: The reasoning that the brevity of life means you have the right to do whatever you want as long as you're alive.
* Carpe Fulgur, was founded by two guys trying to get into the localization business only to be constantly turned down due to lack of experience. So they decided to create their own company to earn that experience.
* Carpe Jugulum against most vampiric weaknesses, which included exposing himself and his children to hundreds of holy symbols, many of which are simple shapes, and mentally categorizing them as patterns to strip them of their influence. When this conditioning breaks down under stress they start being repelled by holy symbols again - but now they see them everywhere they look.
* Carpe Jugulum and/or Granny Weatherwax had something to do with that, though.
* Carpe Jugulum, an Omnian reverend who has a crisis of faith throughout the story. Granny Weatherwax helps snap him out of it by telling him that if she saw her god personally save one of his greatest disciples in front of a large crowd, she'd live her life defending her religion to the bitter end.
* Carpe Jugulum, arguing that one of anything, even if it can renew itself, won't last forever.
* Carpe Jugulum because it suited him to give his victims a fighting chance, while the new count somehow thinks forcing villagers into 'blood quotas' to minimize deaths makes him less evil.
* Carpe Jugulum features a holy water Bucket Booby Trap as well, this time used against vampires.
* Carpe Jugulum hate their father, they're rebellious teenagers who'd rather be

called mundane names and wear colors other than black. This trope is lampshaded when it's pointed out that a human sees his or her children as successors, while an immortal vampire's spawn are competition.
* Carpe Jugulum. He consults his holy book for advice while he and Granny Weatherwax are freezing to death in a downpour and unable to find any kindling, and finds the passage "Where there is darkness, we will make a great light." That gives him an idea for how to warm themselves up...
* Carpe Jugulum here, where having a damn drink actually HELPS you resist vampire mind control... and Nanny rather seems to approve.
* Carpe Jugulum matching the trope, having the formidable willpower required to resist it:
* Carpe Jugulum, Mightily-Praiseworthy-Are-Ye-Who-Exalteth-Om Oats lets the Magpyrs know that he has come to bring forgiveness ... and that "Forgiveness" happens to be the name of his large, double-bladed battle axe.
* Carpe Jugulum. Nanny complains that it cost six dollars and a pig cure.
* Carpe Jugulum Nanny Ogg is rendered speechless when the formerly naïve Magrat Garlick caps her with a perfect double entendre.
* Carpe Jugulum Perdita presses her to say something clever, and much to Perdita's frustration all Agnes comes out with is "Wstfgl?!"
* Carpe Jugulum phase do things like dressing in mundane clothes, insisting on being called "Chad" instead of "Maladict", and drinking blood in bottles but claiming it's wine.
* Carpe Jugulum safe than jumping off the edge and hoping a gust of wind will carry you.
* Carpe Jugulum. She, and particularly her other personality, can't entirely deny that he's attractive, particularly in the context of men not usually being too interested in Agnes. Still, she's too sensible to forget he's definitely a villain.
* Carpe Jugulum: The Count de Magpyr (the old, traditional one, not the trendy new one) recognizes the names of several of the peasants in the mob at his castle and makes mention of remembering their grandparents.
* Carpe Jugulum the heart in a hidden jar variation is mentioned to be used by magicians in Howondaland so they can't be killed.
* Carpe Jugulum the infant princess is named Esmeralda Margaret Note Spelling of Lancre, due to the Lancre tradition that whatever the priest says at the naming ceremony is your name, said priest's nervousness, and the fact that Magrat, who owed her own name to a combination of this tradition and her mother's inability to spell "Margaret", was determined it wouldn't happen again. Still better off than the former king My God He's Heavy the First or farmer James What the Hell's That Cow Doing In Here Poorchick, though.
* Carpe Jugulum). The modern Magpyrs believe the story of her bathing in the blood of two hundred virgins is highly exaggerated. The bath would overflow if you used more than eighty. They've checked.
* Carpe Jugulum, the vampire Count Magpyr's forbidding castle is named... wait for it... Don'tGoNearThe Castle. It works great, too — they were always crawling with guests, according to Igor. On the way to confront the Magpyrs the witches find the route is regularly marked by signs of this nature ("Last Chance Not to Go Near the Castle!").
* Carpe Jugulum the young vampire Vlad becomes interested in Agnes/Perditax because she is able to resist his mind control due to her split personality.
* Carpe Jugulum to get rid of you in a more longlasting way. (This gets discussed near the end of the book; while the villagers are polling for suggestions on how to permanently remove the new Count, and family, from the Disc, they openly state that the old Count provided regular adventure and exercise, and aren't even bothered that he's just come back from the dead... again.)
* Carpe Jugulum to get them in the fighting mood. That this beverage is a psychoactive capable of affecting a people who have drunk fairie spirits, lamp oil and Nanny Ogg's Special Sheep Liniment (which is capable of decking a bear through contact high alone) with no discernible effect should have raised a red flag or two, but Verence decides that "it's herbal, so it must be good", and chugs the lot.

The effect is... something to behold.
* Carpe Jugulum vampires who haven't overcome traditional vampire weaknesses like they have. Appropriately, it's revealed that the "weaknesses" of traditional vampires are actually survival mechanisms that keep the vampires safe from their main predator: hordes of angry peasants.
* Carpe Jugulum, Vlad, a vampire, dares Agnes Nitt to cut his head off with an axe and reaches out from behind her to j the axe when she tries.
* Carpe Jugulum was originally a human, whereas their father was born as one of the de Magpyr vampires.
* Carpe Jugulum, when Agnes and Oats sneak into the castle by hiding in two vacant coffins that are being delivered there.
* Carpe Jugulum, when Granny Weatherwax assists at a difficult birth and realizes that the mother and child aren't both going to survive. She focuses her efforts on saving the mother because she judges that this would be the result if the mother died and the child survived.
* Carpe Jugulum, when she's in a self-doubting mood: "It was a terrible thing to think that the only reason people would go to your funeral was to make sure you were really dead."
* Carpe Jugulum, which provided a better integration within a multicultural modern city.
* Carpe Jugulum who have usurped the kingdom as an infestation to be wiped out, and Agnes has several times expressed her own desire to kill Vlad. Right at the end, while Agnes does not kill him, she says she'd gladly hold somebody's coat while they get a hammer and stake together. Nevertheless she effectively "dates" him on the advice of the older and wiser witch Nanny Ogg, who points out this makes men of any sort easier to manipulate.
* Carpe Jugulum, witch Granny Weatherwax turns the tables on a family of vampires by deliberately offering them her blood. It's not so much a case of Granny becoming a vampire, as of the unwary vampires drinking the blood of the most powerful witch on the Disc and absorbing something of her essence. This can only end badly. For a clan of vampires who now manifest a ferocious craving for hot sweet tea, Granny's belief in vampire weaknesses, and a complete inability to admit they have a problem.
* Carpe Noctem" features an old man who shuttles his consciousness in and out of young men in order to experience the joys of youth, but the spell destroys any living body he possesses. Then he ends up in Angel...
* Carpe Noctem to the villain, saying he might have all the power, but the one thing he'll never have is friends. "Four of them. Standing behind you holding big, heavy things." The villain whirls round, only to get clubbed unconscious by the rest of Team Angel.
* Carpe Noctem, when the guy in Angel's body briefly believes Angel is gay.
* Carpenter Brut Even his live shows hide his appearance as much as humanly possible.
* Carpenters. And before that, by a Muscle Shoals band called Bama. Confused yet?
* Carpenters get into leaving this world today in the song "Calling Occupants of Interplanetary Craft".
* Carpenters' "I Believe You". The first time you hear what appears to be the final verse that slows down and stops a bit, you think it's over but then, BAM! A repeat of the bridge and the final verse again, this time once more.
* Carpenters is about a man who doesn't return the love that a woman shows him.
* Carpenters - none of which she wanted to do, and all of which made her uneasy. When her hand was eventually forced, the resulting stress, and the various stage fright coping methods she tried, all contributed to her mental and physical health issues and, ultimately, her untimely death in 1983.
* Carpenters. Richard Carpenter saw the commercial on TV one night, called Williams and asked if there was a bridge to the song. Williams lied and said there was and he and his songwriting partner worked quickly to write the rest of the song before giving it to Carpenter.
* Carpenters song "Calling Occupants of Interplanetary Craft" that is about sending

a message in reverse supposedly yields a message that chastises the listener for playing it in reverse: "That's not the way and video sends the message".
* Carpenters' song "Close to You", the reason the stars fall down from the sky is because they long to be close to you.
* Carperpetuation — repeatedly vacuuming a piece of lint or other object stuck on a carpet, reaching over and picking it up, examining it, then throwing it back down to give the vacuum
* Carpet of Virility-sporting Mark Ruffalo whose only concession to modesty is a conveniently-placed bit of rubble in the foreground (not to mention all the earlier scenes of him with rolled-up sleeves and an open collar)
* Carpet-Rolled Corpse: Disposing of a dead body by carrying it in a rolled-up carpet.
* Carpet-Rolled Corpse: To move a body (dead or alive), someone wraps the body up in a carpet and carries it.
* Carpool and the kid's car breaks off and it turns into a whole big mess...
* Carpool is, rather than music, the typical morning carpool conversation. Naturally, the kids start up a chant of "Are we there yet? Are we there yet? Are we there yet?" When the driver yells at them to "stop saying that", they change the chant to "When will we get there? When will we get there? When will we get there?"
* Carpool Karaoke: The Series and Ken Jeong was dedicated to lead singer Chester Bennington, who took his life four days after it was filmed.
* "Car possessed by ghost" qualifies all on its own. Especially as the novel's protagonist already theorises that it's a result of post-modern blood sacrifice magic ritual. Specifically, the previous car's owner's attitude towards the machine, and its history as well (two of the guy's family members died in it), equaled to having unknowingly performed a kind of enchantment ritual on the car.
* Carp then passed the torch of "deadliest aquatic animal" on to the even more hardcore, even more ridiculous
* Carracks are pretty cool too. They're smaller frigate-sized warships, but they're fast and bring to bear
* Carradine played another Kwai Chang Caine, this one the American-born grandson of the original, in
* Carrascolendas where an operator greeted each caller with a corny joke.
* Carrera's Legions, a bet is made between an officer there and Sergeant Major McNamara that Carrera would reject the double-wide mobile home set up as his quarters in favor of a regular tent. Carrera pretended to not notice the 50 drachma note being handed to McNamara to pay the wager.
* Carrera's Legions are only known of indirectly because of a few found artifacts and their molding of Terra Nova into its present state, which includes species from Earth's distant past and some plants that were apparently genetically engineered to prevent the rise of intelligent life on the planet by being poisonous to creatures with greater mental capacity.
* Carrera's Legions followed by a dishonorable discharge, since this sort of humiliation will effectively destroy the subject's worth as a soldier anyway (whether due to the damage done to him, or to his dignity before the other men).
* Carrera's Legions, including the main protagonist, sink to this, usually over having their hearts broken.
* Carrera's Legions series, the UN, after becoming a true world government for Earth, has over the centuries become this, with hereditary positions and a rather explicit caste system.
* Carrera's Legions, the hero loses his family in a 9/11 analogue and forms a PMC to avenge them. It grows to be an NGO superpower, and then to the de facto & de jure military of the nation it's based in, Balboa.
* Carrera's Legions: The UN became this several centuries prior to current events in the series, and was renamed United Earth after the concept of nations was eliminated through legislative and bureaucratic methods.
* Carrera's Legions. They use less hard biological conditioning, so there is some limited mobility between the castes, mainly through military service, but even there it is highly restricted.

* Carrera's Legions, who are as yet less technologically developed, but rapidly advancing.
* Carribean Moon has all the gayness buttons deliberately racked up way past eleven. Julian clary would look like a macho straight. The video is also hilarious.
* Carrie (1976) classmates of Carrie such as George and The Wilson sisters aren’t seen dying on screen in the chaos at the gym but would have a hard time escaping from the burning gym after she blocked the door.
* Carrie (1976), even while Miss Collins is correcting him. This causes Carrie to telekinetically break his ashtray.
* Carrie (1976). It succeeds at showing how traumatized Sue is left by what happened.
* Carrie (1976) of the clique and appears to not have a date for the prom. The 2002 remake casts the pretty Chelan Simmons and restores the Prom Queen nomination.
* Carrie (1976) shoves her into a closet of crazy, which contains a candlelit shrine to Saint Sebastian.
* Carrie (1976) The 2013 remake fixes this by having her get a threatening text from Chris which motivates her to sneak in.
* Carrie (1976), the boy on the bicycle shouting "Creepy Carrie!!! Creepy Carrie!!!" was played by director Brian De Palma's son Cameron, but his voice was dubbed by Betty Buckley, who played the gym teacher, Miss Collins. Cameron's actual voice is heard in the trailer.
* Carrie (1976), views the entire government (including, presumably, social services) as godless and Satanic, and would most likely react violently to any attempt to take away her daughter.
* Carrie (1976) While the endings in the both the book and the movie are final yet creepy (and perhaps the book has a touch of Or Is It? thrown in for good measure), this version implies that the horror is not over.
* Carrie (1976) with the caps during one scene and her role was greatly expanded.
* Carrie (2002) as a psychic detective who would lock horns with Detective Mulcahey. They were all cut late in production.
* Carrie (2002) could have survived, given how it's later mentioned that about elven people survived and only five or so were seen escaping through the vents before the floor was electrocuted.
* Carrie (2002) for a potential TV series that never got picked up. For years, the word was that this was due to low ratings. However, the ratings for the remake were actually very good, and Bryan Fuller had already started writing a second episode outline when he learned that the network simply weren't interested in a series.
* Carrie (2002) really amps up the amount of scenes between Carrie and Sue, to the point that it almost seems like Sue is interested in her. And Sue also makes a throwaway joke about her and Carrie having a lesbian affair.
* Carrie (2002) survives the prom and moves to Florida. This was meant as a setup for a TV series that was never made; what adventures would she have had there?
* Carrie (2002) that updates it to 2002, with the teen characters using cell phones and emails to communicate. Carrie uses the internet to research her powers, rather than books in the library, the testimonials from Carrie's peers are filmed with video cameras rather than transcribed from tape recorders. Additionally the film adds a small detail where the culprits who killed the pigs get busted with CCTV footage.
* Carrie (2013) addresses cyber bullying, with Chris recording a video of Carrie's traumatic first period and later playing it at the prom - the video later being used to discredit Chris's father's attempted lawsuit. It's also said that social services stepped in to stop Margaret from home-schooling Carrie.
* Carrie (2013) Chris with a ratchet spray-tanned Snooki/J-Woww wannabe, compared to Carrie and Sue's more natural beauty.
* Carrie (2013) filmed a death scene for minor character George - who gets impaled with a lantern while trying to help people escape the prom. It's not in the final cut of the film, and his fate is left open.
* Carrie (2013): Made and set in 2013, the film opens with the titular protagonist's birth in 1995.

* Carrie (2013) - minor character Heather sees the blood levitating off Carrie's arms, indicating that her telekinetic powers are at work. Guessing that something horrible is about to happen, she flees towards the exit. She becomes the first victim, as Carrie slams her face-first into the door's window. A couple of boys also realise that Carrie has locked the doors with her powers, and try climbing up the bleachers to the window...which makes them easy to spot and Carrie crushes them.
* Carrie (2013), Tina, is shown, while lying drunken together in bed, briefly trying to kiss her friend, before Chris stops her and goes back to making out with her boyfriend.
* Carrie (2013), who played Carrie, was 5'4, while Ansel Elgort, who played Tommy, was almost a foot taller than her as 6'3. As a result, when he picks her up for prom he has to lean down to stay in frame with her as they're talking in the doorway.
* Carrie. According to Rita Desjardin, Sue Snell is not a bully by nature and therefore joining her classmates in gleefully taunting Carrie and pelting her with tampons was very out of character. It is implied that Sue only acted under peer pressure, being one of Chris Hargensen's cronies. Sue was actually disgusted with herself; she unfriended Chris, and tried to make up with Carrie by having her boyfriend take her to prom.
* Carrie. Although it was released on a low print run, its successful movie adaptation brought newfound attention onto the book and King.
* Carrie and Doug's difficulties in having a baby were used occasionally on
* Carrie and wonders what Carrie's mother could have done to her to mess her up so badly.
* Carrie-Anne Moss action figure, explaining to the clerk that it was a gift for her husband. The clerk asked if her husband didn't perhaps have a bit of a crush on Trinity, to which Moss replied, "I hope so!"
* Carrie, as the first part of the book already warned that a massacre would break out at the prom. This is also later invoked, as Carrie suspects, during her madness, that Sue and Tommy set her up to be happy, so they could laugh at her. (They didn't.)
* Carrie as well, when she cheats on Aiden with Big. Repeatedly and with no apparent sense of guilt. She does confess to Aiden, and begs him to forgive her, even saying "You
* Carrie. At the start of the story, Carrie is only notable for being one of the school outcasts. In reality, Carrie has supernatural powers that even she was not entirely aware of.
* Carrie becomes one shortly after the title character's rampage through town, wherein more than 200 students at the high school are burned to death when trapped inside the building on prom night, the result of Carrie exacting telekinetic revenge for years of being bullied (by a small group of students) and nothing being done about it; more people are killed as she spreads her fury throughout the town. In the aftermath, the town is so deeply consumed by grief that most of the residents leave town as the town's entire industrial base also closes, as most of their workers leave and they're unable to recruit new ones.
* Carrie, Billy and Chris (although not actually married, since they're still in high school) qualify. Put the two most sociopathic teens in town together....
* Carrie both have two Hungarian dubs. Both '76 versions were made in the 1990s, with only Margaret White having the same voice. Both versions of the 2002 remake have a few voice actors in common, but never as the same character.
* Carrie by those who didn't know him but are writing about the incident at the prom.
* Carrie: Carrie leaves one of these on Mrs. Desjardin's shorts while panicking over her first period — she is under the impression that she is bleeding to death.
* Carrie: Carrie's religious mother locks her in a closet and forces her to pray in it as punishment for starting her period (which she can't really control) and thus in her eyes sinning.

* Carrie, Chris films Carrie's humiliation in the shower and posts it on YouTube. This bites her in the ass when Miss Desjardin and the principal use the video to point to her as the ringleader of the prank.
* Carried by the Host solid host who can make drying paint entertaining.
* Carried by the Wind: Tsukikage Ran, by the way, that should tell you how highly she regards this trope.
* Carried by the Wind: Tsukikage Ran do anything to Meow, though. Or deprive her of her much-beloved sake.
* Carried by the Wind: Tsukikage Ran has very fetching cat-like moves when she fights.
* Carried by the Wind: Tsukikage Ran. Instead of being depressed, she decides to "beat the guts" back into them.
* Carried by the Wind: Tsukikage Ran more than a few times, requiring Ran to come to her aid. Once Meow gets free, though, she joins Ran with beating up the bad guys.
* Carried by the Wind: Tsukikage Ran: Ran and Meow never look unkempt or dirty at any point in the series, even though they very often find themselves with no food and out in heavy rain, walking through the countryside for days on end. They also never suffer battle injuries: the closest is Ran getting her hair ribbon cut, which just causes her flowing black hair to fall down in a rather fetching manner.
* Carried by the Wind: Tsukikage Ran: Ran is an uncommon example — a 'female' ronin who's actually a much better swordsman than her male colleagues. While she never resorts to banditry, she often scours the roadside for lost wallets or change, or tricks/charms her companion Miyao into giving her money or a free meal.
* Carried by the Wind: Tsukikage Ran; the title samurai throws thugs around while hitting up her partner for lodging cash. Her partner has been imprisoned in a dungeon and she's breaking in.
* Carrie, declaring that they could easily have Chris locked up for them.
* Carried over to the age of Norwegian Television: Sami characters tend to be used as a Scandinavian equivalent of the
* carried the maverick virus to begin with. As much as he tried to fight it, and as much as it really wasn't his fault, he is the reason the world was destroyed and plunged into a war that has lasted centuries.
* carried the things around" there. The "smaller" specimens would often "behave" without muzzles, but the larger individuals she and husband Al Szasz wrestled could still get out of hand and require leashing to protect the audience.
* Carrie. During Carrie's rampage and destruction of the school, the narration occasionally cuts away to a transcript of coverage of the story on the crawl for the national news.
* Carrie Fisher and appeared to be completely baffled when shown a clip of the special.
* Carrie Fisher" had the heart attack, and not the actress who portrayed her. And after her death, there was as much "we've lost Leia" as Carrie.
* Carrie Fisher herself said: "I was not a damsel in distress. I was a distressed damsel."
* Carrie Fisher said that people's lasting image of her should be her giving you the finger.
* Carrie Fisher suffered a heart attack on a plane the day before Christmas 2016 and was immediately taken to the hospital. About a day later, she began to quickly recover...then she died two days after that.
* Carrie Fisher, who had the recurring role of Angela, Peter's boss, until her sudden passing during the holiday hiatus in December 2016.
* Carrie gets angry at Charlotte for not offering her money after Aidan tells her she has to move out and shows up at her apartment to yell at her. Charlotte retorts that
* Carrie has a similar freak out to Ralphie, but the results are far more destructive: rather than simply beat the snot out of the bullies who poured pigs' blood on her in front of the class, she burns the school down with everyone locked inside. This wasn't the first time she was bullied, but it was this moment that

finally sent her over the edge.
* Carrie has been in love with her partner Devin since they were both five.
* Carrie herself in a sense. Sissy Spacek's portrayal of her is far more innocent and naive, prone to acting like a child in certain scenes and speaking out of turn. Her climactic massacre at the prom is hinted to be her losing control or going into shock - whereas the book had everything as premeditated revenge.
* Carrie, his editor and close friend advised him that if he wasn't careful, he was going to get classed as a horror writer, and horror writers never experienced long term success...
* Carrie, however, in that Amelia is no Margaret White — her only concerns about her daughter's abilities are health related. (She recalls that her grandmother had the same abilities, but that she also had heart problems, and worries her daughter will inherit that, too.)
* Carrie is identical to the original film to the point of including scenes that weren't in the book and mirroring the original film's changes to the book such as Carrie telekinetically impaling her mom rather than stopping her heart, the massacre taking place with Carrie in the middle of the action, and an homage to the infamous final scene of the original. This is all in spite of both director Kimberly Pierce and lead actress Chloe Moretz saying this film would adapt the book, not the original film.
* Carrie is thirty-five years old and needs to learn to take responsibility for her own finances.
* Carrie it all goes to hell, Tommy dies, and Carrie mass-murders much of her town.
* Carrie. It creates a scene where Tommy dances with Carrie at the prom and kisses her, implying he has fallen for her, despite this being a pity date. The remake averts this by having the same scene but then revealing Carrie had just gone into an elaborate day dream. In a bit of irony, the remake shows that Carrie does have a crush on Tommy while the original just had the kiss come out of the blue.
* Carrie Kelley's parents died in a random car accident completely unrelated to any super-crime.
* Carrie Keranen how this went, especially her confusion since she knew she was coming in again to record more lines.
* Carrie leaves the gym before causing her destruction, whereas all adaptations have her do it from inside as soon as the blood is poured on her.
* Carrie levels, to the point where she didn't even tell Carrie about her body's natural processes as she got older, resulting in Carrie's first period in her senior year being traumatic in more ways than one.
* Carrie movie is going to make the entire theater jump a foot in the air. It doesn't help that they draaaag the scene out, feinting at least three times before it actually happens.
* Carrie Norma is killed off (and she survived in the book). The 2002 film has Chris remain blonde and also kills off blonde Helen Shyres. The 2013 film has Chris as brunette and this time Sue the sole survivor is blonde.
* Carrie, Norma's neck is broken by a firehose hitting her full blast in the face.
* Carrie, Norma Watson (P.J. Soles) is killed when a fire hose, controlled by the title character, hits her in the face, breaking her neck with the pressure.
* Carrie, particularly Chris, who comes up with the whole ill-advised pig-blood thing.
* Carrie playing a cruel trick that made Carrie think Tommy was in on it. (What makes it more tragic is that the book explicitly shows he was starting to genuinely love her, albeit in a non-romantic way.)
* Carrie poured into it, and the spectacular awfulness that resulted. Twenty-some years later, a revival, which amended many of the original's shortcomings, was dismissed for being completely forgettable.
* Carrier Command: Gaea Mission shows a seabourne version, with both sets of MANTA aerial and WALRUS amphibious craft, and flak and plasma cannons (as well as the Hammerhead missile). Notably, it can't entirely hold its own in close combat, needing to deploy WALRUS' in order to counter hostile WALRUS' since its guns can't aim down at the water.

* Carrie reveals that a little girl down in Tennessee has similar powers.
* carrier for sickle cell (having only one copy of the recessive mutation) makes you resistant to the malaria parasite, which is by far the likeliest explanation for why the sickle cell trait hasn't been selected out; regions where malarial mosquitoes are endemic and those where the sickle cell trait persists, are largely coterminous.
* carrier pigeon (sometimes in the form of a hypontized human) to communicate.
* Carriers. By the time the main characters find him, he's showing obvious signs of infection, and is just about to mercy kill the remaining survivors in the school, along with himself.
* Carriers, Dreadnoughts, Supercarriers and Titans have piddly slow speeds compared to the subcapital ships. There are actually no engines designed to fit on them, leaving them to rely on manoeuvring thrusters once on a battlefield. The only real way to position them is managing the FTL systems used to deliver them to the battlefield, warp drives and jump drives, so that they land where you want them. This leaves them feeling pretty stationary once they get into combat. To go even further, Carriers and Dreadnoughts can enter triage and siege mode respectively which leaves them immobile but much more effective at their roles. Also all but the dreadnought fill support roles. The Carriers and Supercarriers do healing and transport including taking backup ships into combat for players who got blown up. Titans have clonebays aboard so players can spawn there if they die, and can open jump bridges which allow entire subcapital fleets to move long distances rapidly. Hence they fill the World Ship role to some degree.
* Carriers is one big collection of post-apocalyptic survivor film tropes from Mad Max to Zombies.
* Carriers, similar in size to Dreadnoughts but without the spinal guns, instead making room for more hangar bays for fighters (they presumably do still have the broadside guns, point-defense turrets, and torpedo tubes though). Similar to modern aircraft carriers (a well-placed shot will gut the carriers, and general strategy is to defend them at all costs). An entirely human innovation and one of many examples of
* carriers that function like mini-motherships in their own right, in case the Mothership gets destroyed or gets critically damaged.
* Carrier with extra guns and armor. This ship essentially behaves like a real life aircraft carrier, in that the primary offensive option is its embarked fighter wing, and the guns and armor lean more towards self defense options. The
* carries a briefcase full of flies Night Vale, where "[probably has] normal human features" excludes a fair chunk of residents and visitors.
* Carrie's address, however, would be right where Second Avenue crosses her street and thus doesn't exist in real life.
* carries, due to reduced gold rewards for killing players who keep dying without scoring kills, a support or splitpusher getting a kill may even end up giving the other team a bigger gold advantage over time than simply letting the enemy run!). Of course, while this is the most ideal strategy, players tend to judge each other based on kill/death ratio, especially when the team is losing and someone is bound to pin the blame on the player with the lowest score. Once the match starts going badly or someone decides to complain about bad teammates, team priorities often subtly shift to everyone trying to steal kills while not being too obvious about it, instead of working together to win the match.
* Carrie's father was a human who fell in love with a ghost. He found a spell that enabled him to touch ghosts and ended up having children with one.
* Carrie, she played the gym teacher Miss Collins as a lesbian in order to invoke this in her interactions with Carrie.
* Carrie. She rigs the vote for prom queen so that Carrie and Tommy will win. When they come on stage to be crowned, she dumps a bucket of pig's blood on her. She accomplishes this by having her friends volunteer to help collect and count the votes for prom queen and king. However, this backfires when Carrie becomes angered and kills them all with her psychic powers.
* Carrie's Order Up!, after spending a whole round running tables and spinning past

customers, each round ends with Carrie taking a little while to finally skid to a halt before displaying your score.
* Carrie's Order Up!, Calcia, normally requires completing all 20 rounds on a single playthrough, but can also be unlocked simply by accumulating a high overall score across all playthroughs.
* Carrie's Order Up!, getting 40 coins erases a miss. Not quite an extra life, as you can't earn more than what you start with.
* Carrie's Order Up! is "Classic", a pale green dress worn by Carrie in a comic drawn by the developer.
* Carrie's Order Up!, one of these can be seen atop the impossibly tall stack of plates Carrie is holding on the Endless Mode menu graphic.
* Carrie's Order Up!, the titular waitress is very energetic and cheerful, beginning and ending each round with a joyful quip. She's full of so much energy and enthusiasm, in fact, that she can't even stop until the round's over, making bumping into customers who are trying to get seated all to likely a possibility.
* Carrie's Order Up! where all the characters are various forms of marine life, despite taking place on dry land.
* Carrie's Order Up!, which normally lets you avoid colliding with customers, will leave you flat on your butt.
* Carrie's parents intended this for their marriage, as they believed that if they were pious enough, God would give them a child without them having sex. Then Ralph got drunk one night, changed his mind about that, and forced the issue with Margaret, and nine months later, Carrie was born.
* carries Princess Dorathea like this while taking her to the school dance.
* Carrie's prom dress becomes pink when it is red in the book — which is why Margaret says "I might have known it would be red."
* Carrie's showdown with Margaret becomes the climax of all the films, whereas Carrie tracks down Chris and Billy afterwards in the book.
* carries Starscream like this when the Seeker is shot down in battle.
* carries the opposite belief and suggests that humans are inherently evil, lustful and lawless, and they require laws and standards to become good. He also suggested that humanity should take control on their desires and instincts.
* Carrie the Musical the chorus of "Dream On" is cut off by Carrie's scream.
* Carrie theretofore mild telekinetic powers become much stronger after her first period starts.
* Carrie to ensure she never faces the consequences of her bullying actions. He got her into Oberlin despite her poor grades, and when she's banned from attending the prom for taunting Carrie over her first period in the shower, he threatens to sue the school unless they let Chris attend; he's forced to back off when the principal shows him Chris' long record of violations, declaring that they could easily have Chris locked up for them.
* Carrie Tommy was even calling them out on the prank while this was going on in Carrie's head.
* Carrie trigger the title character's deadly telekinetic rampage, but it also resulted in the death of Carrie's date Tommy Ross as the bucket of pig's blood hit him upside his head and killed him.
* Carrie Underwood. Although the lyrics make it clear she's acting on unfounded suspicions, the boyfriend is still painted as being on the receiving end of justice even if he hasn't done anything wrong.
* Carrie Underwood - "Before He Cheats", where she vandalizes her ex's car (except she has no real evidence of him cheating, she just thinks he is).
* Carrie Underwood, but it was also not a hit. The fourth time was the charm, and Underwood's version has become a staple of adult contemporary radio since its 2005 release.
* Carrie Underwood completely states the whole "Getting drunk and waking up married" thing to a sheen.
* Carrie Underwood details how the protagonist locks herself in the storm cellar while her drunken, abusive father is passed out on the couch. In the video, she does make an attempt to wake him up and get him to safety, but in the end, his

death by tornado was her retribution.
* Carrie Underwood expresses this trope and almost uses the trope name almost verbatim, singing "I've been daddy's little girl since my first cry". The chorus ends with "I wanna be the girl you think I am".
* Carrie Underwood, in particular explosions and destruction on a small-town city street as Carrie walks calmly by.
* Carrie Underwood into her boyfriend's car pretty much counts as a signed confession.
* Carrie Underwood is about a woman whose husband cheated on her ,and his mistress who was unaware he was married working together to kill him
* Carrie Underwood is about people who feel stressed out by everyday lives and express this phrase:
* Carrie Underwood is mainly about a woman scorned defacing her philandering ex-boyfriend's beloved truck while he's with another woman. The video for the song does show her tossing some stuff through the window, though the man is otherwise "occupied" and doesn't actually get to see the results on screen.
* Carrie Underwood's "Before He Cheats" contains among other speculation about what her soon-to-be-ex-boyfriend is doing, "Right now, he's probably up behind her with a pool stick / showing her how to shoot a combo."
* Carrie Underwood, "So Small": "And when you figure out love is all that matters after all / It sure makes everything else seem so small".
* Carrie Underwood's "Two Black Cadillacs" is a variation on this trope. A man's wife found out he had a mistress, who likewise wasn't aware that he was married. It's implied that they're the reason the song is primarily set at his burial, though that's the first and last time they ever met face to face.
* Carrie Underwood where a cheating man is murdered by his wife and mistress.
* Carrie used a concoction known as 7-11 Blood mixed with food coloring. This fake blood wound up drying and sticking to Sissy Spacek's skin under the hot lights, forcing the crew to hose her down after each take. And they needed 35 takes to get the scene right.
* Carrie went to school with growing up, both of whom had difficult lives and died young.
* Carrie when Carrie opens the sprinkler system on the prom goers. Josie from the band is holding onto the microphone when this happens and so he's electrocuted while holding onto the mic and swings around holding it.
* Carrie, when Tommy asks Carrie to the prom, after a moment of stunned silence this is the only reaction she is able to produce.
* Carrie. While Donna and Mary Lila Grace Thibodeau are changed to Cora and Rhonda Wilson, Freddy Holt is changed to Ernest Holt, and George Chizmar is changed to George Dawson, Ruth Gogan's first name is changed to "Erika".
* Carrie who torments Carrie throughout the story. She's such a delightful brat that she's among the more memorable characters in the story. Nancy Allen, who played her in the 1976 adaptation, didn't realise how evil she was because she assumed the character was functioning more as bumbling comic relief.
* Carrion Comfort (pretty much in name only, they are simply people who can control minds) in the novel are seen doing this on several occasions. In the first instance, holocaust victims are used as pieces (to the death, naturally). The plot of novel runs like this as well, as the two puppet master villains play a game corresponding to the events of the plot. The book is even divided into "beginnings" "middle game" and "end game".
* Carrion crawlers lay their eggs inside other creatures, though they kill the creatures immediately prior to doing so. Typically, they paralyze their victims a couple days before laying eggs, and kill them right before the laying so the corpses will provide a reasonably fresh meal for their spawn.
* Carrion is implied to be this. Severed tentacles slither away when it gets shot, if part of its body is severed by the environment those same severed tentacles slither back to it, and it gets the ability to discorporate into a horde of threadworms in deep water.
* Carrionites — witches who use what the Doctor insists is not magic, but

physics based on words rather than numbers.
* Carrion Spike (which finally takes him with it). In fact, one reviewer commented that Tarkin just keeps getting bigger and bigger ships and they keep getting destroyed in more spectacular ways.
* Carrion: There is no narration. No dialog. The entire story is told through the Creature interacting with the environment, flashbacks and atmosphere.
* Carrisa, a gifted Amazon surgeon who was friends with Diana and a supporting character in
* Carroll O'Connor pulled off a massive version of this during the sixth season of
* Carroll Spinney (Big Bird and Oscar the Grouch) describes a bad encounter in his autobiography. One day, some moron drove onto his lawn, rolled down the window and yelled,
* Carroll Spinney, who portrays Big Bird and Oscar the Grouch, supposedly refused to do
* Carrot and Celery's boss from "Back to Bortron 7" is just a huge green Sunspot, but with a mustache obscuring his mouth.
* Carrot Cake Storybook, Carrot Cake leaves Ditzy Doo to recover in her house and goes to deliver a package. At the very end, she returns from the delivery, and Ditzy greets her with, "I emptied your fridge."
* Carrot does one in "Back to Bortron 7" after Eggplant informs him and Celery that they'll be done with Earth after their presentation. For dramatic effect, the Exploding Shake that Carrot was holding explodes in his face.
* Carrot does this surprisingly frequently when negotiating with hostile characters. However, he has never (as far as anyone can prove) told a direct lie. In fact, he has a tendency to use the truth as a weapon. Both he and Angua have told someone impeding their progress that unless the person stands down, they'll be forced to carry out the orders they were given regarding resistance and that they'll regret it terribly if they do, but they won't have any choice. In the circumstances, an implied threat is very clear —
* Carrot has legendarily bad spelling, which we see in his letters home. He also has what Vimes terms a "
* Carrot interprets Vimes' feelings about Vetinari as more or less this (kind of straddling the fine line between this trope and
* Carrot Ironfounderson is apparently the last living descendant of the
* Carrot Ironfoundersson, the last remaining descendant of the kings of Ankh in
* Carrot Ironfoundersson was raised by dwarfs, hence his dwarfen name of
* Carrot is a stay-at-home dad who cooks, which is often seen to be feminine. He also likes to do ballet, and admired himself in a mirror while wearing a pink scarf in "Castaway Carrot".
* Carrot is so obsessed with the vegetable she is named after, she once savagely attacked Luffy for taking one of hers.
* Carrot is the driving force behind the expansion of the City Watch, and its large presence of non-humans.
* carrots in it. Potatoes, too, and it was shown presented on a plate... with a fork in it.
* Carrot's making a nature/nurture point — culturally he's a dwarf. He was raised as a dwarf, by dwarven parents and went through all the normal processes of growing up as a dwarf. He may not be as hardline dwarfish as the Deep Uberwald dwarves — mainly due to coming from a surface dwarf community near Lancre — but is still more dwarfish than many an Ankh-Morpork city dwarf. He questions the relevance of being (genetically) human in the light of all this.
* Carrot's sword is sharp enough to pierce a solid stone pillar. It is the long-lost sword of the Kings of Ankh, and the Disc's rules of
* Carrot's sword, which has been previously described as one of the most non-magical objects on the Disc.
* carrots which produce the same effects as smoking tobacco. When Kaeloo finally manages to get them to stop eating carrots, they find out about tomato juice, which makes them high.
* Carrot the Rabbit Mink is known to this to people she likes. The Minks have

* Carrot Top in which he watches the film for the first time. He keeps making inappropriate jokes throughout the film... and then a woman gets drugged and raped by frat boys. The sheer bizarreness of listening to him try to backpedal on his statements is gold. Also notable is the fact that the DVD packaging tries to keep this a surprise: The list of special features includes "Bonus commentary by a MYSTERY GUEST!", with the text being accompanied by a small carrot icon as the only hint.
* Carrot Top Season, CT guilt-trips her by saying that she wouldn't have the same attitude if it were Dinky who fell victim.
* Carrott's Lib, a government minister has gathered his staff to tell them that a series of leaks to the press and radio has been traced to their department. Meanwhile, a radio news broadcaster (actually a ministry employee moonlighting as a radio presenter) is repeating the content of his speech, almost word for word.
* Carrot was absent in "Mindy's Moon Bounce House", "Beep Has the Blues", "Visit to Mom's Office", "Mission to Mars", "A Visit to the Planetarium", "Ice Moon Enceladus", "What Goes Up...", "Asteroid Patrol", "Face on the Fritz", "Sunspot and the Great Red Spot", "Detective Mindy", "Satellite Selfie", "Beep and Boop's Game", "Total Eclipse of the Sunspot", "Sean's Year in Space", "Whole Lotta Shakin'", "The Mindysphere", "Lone Star", "Space Race", "Sean's Neptune Tune", and "Not a Sound".
* Carrusel has a few: Cirilo is Black, David is Ashkenazi Jewish, Kokimoto is Japanese, and Bibi is North American of English ancestry.
* Carrusel has Valeria, Carmen, and Alicia, to a lesser extent. All three girls have jet black hair and are good students. Valeria is a talented painter. Carmen is very good with people. And Alicia is very mature and has common sense.
* Carrusel, Mario's stepmother Natalia starts out like this. She does become nicer, though.
* Carrusel. Most, if not all of the kids had an idea of what they wanted to be when they grew up. They were encouraged to study and do well in school, as well as to pursue their hobbies.
* Carrusel. She may not have the best family situation at first, but she always makes sure to study and do well in school, so that someday she can go to college and obtain a career. Plus she is always nice to everyone. She is very prim and proper- while always remaining determined, so her being ladylike and staying out of trouble may be a not so obvious way of remaining strong so that she can achieve her goals.
* Carrusel. She never does anything objectionable and is always kind and follows her good morals. Also, Daniel Zapata and Carmen Carrillo never seem to get into trouble, are kind to everyone, and do well in school.
* Carrusel Susana and Rene have a smooth and stable relationship...as compared to Valeria and David having so much drama!
* Carrusel, video games were not present at all. While this was Mexico in 1989-1990, the Brazilian 2012 remake did insert them, since it would no longer be credible to have a show about children's school and daily life without video games present in any way.
* Carrusel wears this hairstyle. She is one of the girlier girls in the class, as well as rather immature (except for being very precocious when it comes to romance), and not a good student.
* Carry a Big Stick: a pole several inches in diameter, reinforced with iron bands or studs, and with a spear or pike point on top. The idea was to spear your opponenent off of his horse with the pike, and then bludgeon him to death with the pole. All the effectiveness of a halberd or poleaxe, none of the extra manufacturing time.
* Carry a Big Stick. The trope is basically literal, actually being about wielding clubs and related weapons.
* Carry A. Nation, (in)famously vandalised several bars and other drinking establishments with a hatchet.
* carry his vast arsenal, but he does tow them around in a little trailer called the Gallop. However, he only uses his bazooka in basic combat, his "Operation: Wipeout" is where he fires off his collection of weapons at once...much to the ire

of his squadmates, who get caught in the crossfire.
* Carrying a Cake: A character has to be careful as they are carrying a large cake.
* Carrying a Cake: Shenanigans ensue when a character has to carry food.
* carrying a cane, wearing Joseph's Amazing Technicolor Dreamcoat, donning a woman's hat, and to complete the effect, having an altercation with a woman over a pink Cadillac, leading to his being mistaken for a pimp.
* Carrying melee weapons was actually a regular practice in World War I. Soldiers took to creating improvised clubs and knives because a lot of fighting in the trenches took place in confined spaces, where the length of a standard infantry rifle (especially with a bayonet attached) proved to be a distinct disadvantage.
* carrying something heavier, and a tremendous amounts of religious iconography and fanaticism that characterize the "normal" soldiers. This is probably a good thing, given that if you believe in false gods, the false gods can not only manifest in reality, but tear you a new bunghole in the process.
* Carrying The Fire when he describes how NASA started having simultaneous sleep periods for astronauts after Gemini 5; he says they had to be careful about the terminology because someone might misunderstand if they heard that a crew was "sleeping together."
* carrying the torch "smooth" jazz-fusion-oriented acts, which were popular until the mid-2000s.
* Carrying the Weakness If you can manage to make said enemy drop their own weapon/ body part/whatever, you can use it to hurt them easily.
* Carry On Abroad the gang is off for a packaged holiday in Els Bells. However, the hotel they stay at is not even completed, and eventually is completely destroyed by a big rainstorm.
* Carry On Again, Doctor: Patient Mrs. Armitage is rather uncomfortable in the hospital after catching Dr. Nookey in the shower room, and hates being around the medical doctors.
* Carry On Again, Nurse. The end of the film was going to be a tribute to Jacques, with Sims turning around a photograph of the actress and asking "Well, did I do alright?" Production was scheduled to begin in June 1988, but the deaths of Williams and Hawtrey, combined with a budget of £1.5 million which was deemed too expensive, proved to be the end of the film and it was cancelled.
* Carry On and Baz has really been in love with Simon all along and only pretended to be interested in Agatha to push Simon's buttons. By the time the novel starts, Agatha is fed up with magical adventures and is glad to put distance between herself and them, leaving them to fall for each other.
* Carry On at Your Convenience, the strike is ultimately resolved by the union leader's mother.
* Carry On at Your Convenience) wakes up in bed with his secretary (Patsy Rowlands). When he asks her, rather nervously, whether they... you know, she looks smug and says that if he doesn't remember, she's not going to tell him.
* Carry On at Your Convenience, who was (supposedly) the head of the factory trade union and organised worker strikes whenever he didn't want to work.
* Carry On Behind, starting with this trope after dropping his notes and getting them mixed up.
* Carry On Behind: Two pretty girls plan to camp at a caravan site. One of them is dismayed by the sign saying "caravans only", but the other knows that they will easily charm the site owner, as indeed they do.
* Carry On Behind.") When he finally tumbles to this, the audience demands he put the film back on.
* Carry On Camping, Bernie is too shy to ask for sexual magazines over the counter in the newsagents, especially when there's an attractive woman serving for the day, so he asks for toothpaste out of embarrassment. Sid realizes, "That's why your cupboard's full of toothpaste."
* Carry On Camping campground with the same name. Then Barbara Windsor's top flies off.
* Carry On Camping, or both) are heard saying things like "can you get it up?", "no, not there!", "is it in yet?", etc, to the horror of the men's girlfriends, who

then discovers that the only thing that is being erected is a tent.
* Carry On Cleo, over-confident man who destroys Cleopatra's bed by launching himself onto her.
* Carry On Cleo where the escaped slave Hengist Pod is concussed hiding under a table while his badass neighbor, Horsa, takes out a squad of legionnaires and makes good his escape. With all the witnesses dead the authorities assume Hengist is the badass swordsman and he is made personal bodyguard to Julius Cesar... Hilarity ensues.
* Carry On Cleo, which had moved its production base from London to Rome. This at least ensured that the construction costs on the original sets were not completely wasted.
* Carry On Columbus turned the bold exploits of explorer Christopher Columbus into a silly sex farce.
* Carry On comedy, others were embarrassed by the success of this franchise. Many who basically were the kind of people satirized in these comedies.
* Carry On Constable: a policeman slides down the banister to get to the bottom of the stairs more quickly, to catch a criminal.
* Carry On Constable: Inspector Mills does a resigned version when the inept Constable Potter is sent to help him.
* Carry On Constable: Inspector Mills is adamant that his orders, concisely given, are smartly carried out.
* Carry On Cowboy is attacked by outlaws. He shoots wildly while she kills them all and then lets everyone, including Marshal (yes, that's his name) believe he did it. He is mistaken for a lawman because of his name (he actually fixes drains) and is recruited to deal with a problem that some "rats" are giving the town.
* Carry On Cowboy — although he is not really much better with them on.
* Carry On Dallas. The production was abandoned when Lorimar Productions demanded a royalty fee of 20 times the total production budget.
* Carry On Doctor, he crashes through a window in the nurses' home but lands in a bath... with a nurse in it, who assumes he is attacking her.
* Carry On Doctor. Matron and Kilmore land like this after eavesdropping on a conversation and tipping over once the door they were leaning on is opened.
* Carry On Doctor: Roper points out to a nurse that a thermometer might explode, and she replies that it won't be the case because "the Matron doesn't appreciate banging in the wards."
* Carry On Doctor series decides to marry his deaf lecture assistant in hospital. Unfortunately, he accidentally hires a deaf priest, and this trope is in full swing.
* Carry On Down Under. In 1981, Gerald Thomas did some location scouting while on holiday in Australia and spoke to the Australian Film Commission. The production was abandoned when finance fell through.
* Carry On England. Bloomer, who is certainly not thrilled to discover women under his command, and does his best to ensure that the experimental mixed unit fails.
* Carry On features sandy hopping out of the swamp / river, covered in the little bloodsuckers.
* Carry On films of the '50s and '60s LOVED this trope, and it's unusual to find a film in the series that doesn't include a few jokes about some of the more ample cast members struggling with their corsetry.
* Carry On getting injected in the bottom, and gangsters being chased by pregnant women.
* Carry On Girls' character escaping the town on an abandoned go-kart.
* Carry On Girls, Peter Potter is leaving on a train to Fircombe to help promote a beauty contest. His girl, Paula Perkins, doesn't know about the beauty contest and is there to see him off. She gets miffed when all the pretty girls are also boarding the train. When the train lurches off, Peter manages to tear the top of one girl down, while Paula is still watching.
* Carry On Girls series is based around a beauty pageant in which a group of angry women try to stop it with hilarious consequences.
* Carry On has the USA becoming overrun by "kudzucchini" genetically engineered for

terraforming Mars. It's eventually destroyed by an army of goats.
* Carry On Henry. An envoy from the Vatican says that while the Pope is shocked at the idea, a royal divorce can be arranged... for a price. The papal envoy is asked how much of this money is being skimmed off for his own benefit, which he indignantly denies. As the Delegation Relay brings this message to King Henry the Eighth, each person doubles the price so he can skim half the bribe for himself.
* Carry On Henry has Henry VIII picking up a farmer's daughter, who demands to be paid for sex. She is obviously not a prostitute, but she probably wants him to leave her alone.
* Carry On Henry place they don't look—he has second thoughts when the Queen produces an enormous scroll.
* Carry On Henry. The King introduces a new and pretty lady-in-waiting to the Queen. Her poorly prepared speech does not reassure her about Henry's fidelity.
* Carry On Henry. Unsurprisingly, they are interrupted by her father, who threatens Henry with a pitchfork, making him try to jump over a bush in the fields, landing in manure.
* Carry On Henry!" was the exclamation when the kegs blew up at just that moment.
* Carry On Henry when a character who has been tortured in the iron maiden is offered a drink to steady his nerves.
* Carry On in the Legion, with the usual clueless officers and naive NCOs and privates who couldn't find their way out of a sandpit, much less find their way through the desert.
* Carry On is among the few pieces of evidence that the film existed).
* Carry On Jack, Sally steals Albert Poop-Decker's uniform and takes his place on the frigate Venus, while Albert finds himself pressganged onto the same ship as a common seaman.
* Carry On Jack, with a chronically seasick captain, his scheming first mate, and an accident-prone midshipman.
* Carry On Loving finishes like this, due to the grudges of the matched-up couples who have no chemistry with each other and/or hate to be in each other's company.
* Carry On Loving: throughout the film, which is about a computer dating agency, there's a young couple who appear in various scenes just enthusiastically making out with each other. In the climactic food fight, the young woman stops kissing her man long enough to look up and see what's going on and gets a cream cake in the face. She doesn't even wipe it off but goes back to making out again.
* Carry On Loving to follow through because roommates keep pasting them from their bedrooms.
* Carry On Matron, a gang of thieves plan to make their fortune by stealing a shipment of contraceptive pills from Finisham maternity hospital to sell abroad. They assume disguises and infiltrate the hospital, but everything doesn't go according to plan.
* Carry On Matron: Dr Prodd, an obstetrician, is seeing a female patient, Smethurst.
* Carry On Matron has his body examined by a fellow doctor in the hospital, who points out that his pelvis is rather feminine-shaped, which makes him think that he is probably gender-bending. Unsurprisingly, this trope is subverted, but he soon relaxes after visiting the cuckoolander Dr Goode, who's just as uncertain about the situation as Bernard is.
* Carry On Matron when Ernie, Sid and Freddy are coming up with a plan to rob the hospital, Ernie mentions how his mother gave birth to him on top of a bus "Number 73. bang in the middle of Brixton high street". They begin arguing over which buses go where.
* Carry On — Hugely popular British comedy film series, with 31 films in their catalogue between 1958 and 1992.
* Carry On movies' forte. It was rather daring at the time because the owners of the films they wanted to parody feared that they were stealing, but Hollywood's paranoia was soon reassured.
* Carry On Nurse, the staff decide to get revenge on an insufferable patient by swapping out his rectal thermometer for a daffodil and taking a photograph of him.

Leads to one of the funniest scenes in the whole series:
* Carry On Robin was outlined by Gerald Rogers and registered with the British Film Producers Association in 1965, but never pursued.
* Carry On Screaming!, a horror-comedy, had this as the central plot, with a scientist entitled Dr. Watt having young women turned to mannequins. As he's lowering one into the vat that will bring about the transformation, this exchange occurs between his sister Vampyra and him:
* Carry On Screaming! the morning after his nocturnal rampage as Mr. Hyde.
* Carry On Screaming!: The mummy which Dr Watt has brought to life simply walks towards the doctor, without speaking; the doctor is terrified.
* Carry On, Sergeant' characters were examples of these, albeit in different ways:
* Carry On, Sergeant is set among National Service recruits in the British Army, who comprise an assortment of buffoons, snobs, hypochondriacs, and ne'er-do-wells.
* Carry On, Sergeant: Sergeant Grimshawe is a downplayed example of this, trying calmer methods than usual in what is going to be his last squad. Corporal Copping fits the role to a T, however.
* Carry On, Sergeant sort of revolves around this. The Home Guard in this movie is the National Service and the men called up have no choice but to draft in.
* Carry On... Series that were due to be created but many never saw past the scriptwriting.
* Carry On, Simon constantly proclaims his hatred of his roommate Baz and how he makes his life a living hell but when Baz is mysteriously absent from school for two months, he grows increasingly worried and spends pretty much all of his time trying to find out what happened to him.
* Carry On, Simon thinks that he and Agatha are destined to become married and live happily ever after but he's really more in love with the idea of having something normal and stable in his chaotic life that he can rely on than with Agatha herself and she breaks up with him because she doesn't want to be just the "prize" he gets at the end of the story. Similarly, Agatha's crush on Simon's nemesis Baz is shown to be more her desperately wanting a purpose outside of "the hero's perfect girlfriend" than her actually being in love with Baz.
* Carry On Smoking, but there has been no reason given to why it was scrapped.
* Carry On, Spaceman. Attempts to revive it in 1962 under Denis Gifford, again by Hudis, failed, and the project was subsequently abandoned.
* Carry On Spying an agent of the villan is able to get all the way into a top secret research lab by simpling being dressed as a milkman and handing out bottles of milk to anyone he passes. As the film is a parody of the spy genre it stands quite well.
* Carry On Spying experiment, steps to one side, and put his fingers in his ears. The experiment blows up, the scientist is killed, the laboratory is reduced to a smoking wreck, and the villain is completely untouched.
* Carry On Spying. It even confuses other characters, who don't use pronouns to describe the villain.
* Carry On Spying once Desmond and two of his students find the dying body of Milchmann.
* Carry On Spying, with many characters being named after many espionage characters.
* Carry Ons. They never lead to anything though, and are usually arguments.
* Carry On they've been roommates. Naturally, the love triangle just gets more complicated.
* Carry On Up the Jungle is a parody of this, with the exploring party having different reasons of being on the trip, such as searching for missing people, and looking for exotic birds
* Carry On Up the Jungle with the delicious Jacki Piper. She goes swimming with the Ape Man and an ape steals her clothes.
* Carry On... Up the Khyber. He even treats a normal conversation as if he was barking out commands to his soldiers.
* Carry On... Up the Khyber points out that the hole is right next to large double doors that could've been used instead but MacNutt states that his news is far too

important to care about something like that.
* Carry On... Up the Khyber shows the main characters attempting to have a dinner party while their mansion is being bombed all to hell.
* Carry On... Up the Khyber. The Brits have been thrown into an Afghan prison, awaiting horrible torture.
* Carry On... Up the Khyber. Unfortunately the soldiers have secretly started wearing underwear, so each officer passes the buck down to their sergeant-major who can only stand there embarrassed and refuse to obey the order.
* Carry On... Up the Khyber when the arrival of the British governor at the Khasi's palace is announced by a shirtless man striking an enormous gong, just like the Rank Organisation logo.
* Carry On... Up the Khyber where Governor Sir Ruff-Diamond, his wife and special guests are having a sit-down meal while the natives are massacring the guards outside. This is because he said earlier:
* Carry On which the main character of the latter novel is writing fanfic about. The novel became a best-seller, and the only one of the author's to be expanded into a full trilogy.
* carry submachine guns. The oldest of them took down three members of the Senior Council.
* Carry the One: Somebody is good at doing equations, but forgets to carry a number (usually a one).
* Cars 2: Around the climax of the movie, Finn and Holly are tied to the giant clock gears of the Big Bentley by the bad guys, with them edging closer to being crushed by another gear each minute. Holly manages to save themselves by making the clock run in reverse.
* Cars 2 as Mama Topolino. Also, Franco Nero voices Uncle Topolino both in the English and Italian dubs.
* Cars 2: At the very beginning, Finn McMissile launches a bomb at several oil barrels while escaping the Lemons' oil rig in order to stave off his archnemeses, the Lemons.
* Cars 2, both Finn McMissile and Mater become this, thanks to voice-activated holographic disguise systems that let them instantly assume any appearance.
* Cars 2: During the scene where Mater, Finn McMissile and Holly Shiftwell are looking for Tomber, an odd three-wheeled car running the local black market in Paris, France; Mater actually sees a car facing away from him while inside the black market, and as soon as Mater talks to her, the car immediately turns around, revealing that her eyes are actually on her headlights instead of her windshield like everyone else's! Mater than screams and drives away to find his teammates.
* Cars 2, Finn McMissile actually clings to the underside of Tony Trihull with his magnetic tires in order to sneak into the Lemons' oil rig.
* Cars 2, Finn McMissile's interrupted dialogue while escaping the Lemons' oil rig is suddenly finished by Mater in Radiator Springs.
* Cars 2 first did this with an oil rig in the Pacific Ocean, and later on with a casino in Italy.
* Cars 2, had Miles Axlerod not spilled oil onto the carpet, Mater wouldn't have become a spy and foiled his evil plan!
* Cars 2 hails from the newly independent "Republic of New Rearendia".
* Cars 2 has Grem and Acer, a pair of bumbling villains who appear to be based on two of the worst cars ever made. But then we see them kill Rod "Torque" Redline...
* Cars 2 has Lightning McQueen and Mater give an extended handshake involving a lengthy rigamarole of differently-positioned tire bumps. Someone remarks that these "best friend shakes" get longer every year.
* Cars 2 have mismatched eyes on their windshields, have dented bodies, and crooked teeth inside their bumpers. However, a forklift artist for some reason actually decided to draw them as both being extremely attractive-looking.
* Cars 2 (his friend who tries to convince him otherwise is Andrew Stanton).
* Cars 2 involves British intelligence agents mistaking Mater for an American ally.
* Cars 2 is mistaken for a spy and spends most of the movie thinking that actual spy Holly Shiftwell is flirting with him. Holly, meanwhile, believes that Mater is

a deep-cover agent.
* Cars 2 Lasseter came up with the idea of a sequel starring Mater when he was promoting the first film.
* Cars 2: Lightning McQueen leaves Sally to go with Mater in the World Grand Prix.
* Cars 2, Mater gets a time bomb bolted to his engine (initially without his knowledge) as part of the villain's plan to kill Lightning McQueen. It backfired.
* Cars 2, Mater is told that everyone sees him as a fool, and then looks at his reflection. Get it? Tow Mater in the mirror!
* Cars 2, Mater tries to get one of these to laugh shortly before his knighting ceremony.
* Cars 2 — Martini-style bathtub gin, though the first film wasn't even a spy film at all.
* Cars 2 Paul Newman. Also, the trophy Lightning McQueen won prior to the events of that film is called the "Hudson Hornet Memorial Piston Cup."
* Cars 2: Rod "Torque" Redline's (an offscreen explosion is reflected onto a computer monitor after he is blasted away by the Lemons' radiation cannon) and Tony Trihull's (another offscreen explosion, this time from an above view of the river Thames in London as he is blown up by Finn McMissile's bombs) deaths.
* Cars 2, secret agent Finn McMissile uses a set of decoy tires to pretend that he's been torpedoed by the enemy.
* Cars 2's story while traveling around the world promoting the first film. He said:
* Cars 2: The credits did this with submarines, which appear to serve as stand-ins for whales.
* Cars 2: The number on Siddely (Finn McMissile's fighter jet sidekick)'s tailfin. Also, the A113 license plate makes a reappearance in this film along with Mater.
* Cars 2, the villainous group of Lemons (cars that don't ever work right) are trying to become rich and powerful by discrediting alternative fuels during a high-stakes World Grand Prix, then selling oil they've begun drilling off the coast, so they can get revenge on the cars who had mocked them their entire lives. Mater, who had gone through an epiphany of his own upon realizing the world was mocking him just as much, gives a speech to the entire Lemon army about how he had been mocked his whole life, and that their schemes wouldn't make them feel better. The Lemons seemed touched by this sentiment and appear on the verge of tears, but they decide it's worth a shot to keep going with their plan anyway.
* Cars 2, Thomas Kretschmann voiced Professor Zundapp in both the English and German dubs.
* Cars 2 to escape from Big Bentley, when the villains tried to kill him, Finn McMissile, and Holly Shiftwell by crushing them with the clock's gears.
* Cars 2 via archival dialogue that was recorded during production of the first film.
* Cars 2 when he has to go to the bathroom in Japan. He tries the door on the left and a female scream is heard and he promptly speeds to the one on the right.
* Cars 2, while at a big banquet in Japan celebrating the upcoming Grand Prix, Mater mistakes the wasabi at a sushi bar for green ice cream and eats a huge mouthful. He ends up having to drink water from the decorative fountain, causing a huge public spectacle and embarrassing Lightning McQueen in the process.
* Cars 2' "You Might Think" playing as McQueen and co. travel to Tokyo for the World Grand Prix.
* Cars 3 believes that they're all robot cars that rebelled and wiped humanity out years ago.
* Cars 3 called “More Than New Paint”, two pitties rip off Lighting McQueen‘s #95 after Sterling reveals he took him off the racing circuit and gave his number to Cruz.
* Cars 3 ends as Lightning and Cruz get their photo taken, which hangs on the wall of Doc's garage next to Lightning and Doc racing in the same exact poses (but with their positions switched so it's mentor on left, student on right), showing how the legacy has repeated.
* Cars 3, Lightning goes through one for four months after losing his championship

title because of a near fatal crash. He spends most the time in Doc's old garage watching his mentor's crash and thinking that the same is going to happen to him. Thankfully, Sally reminds him that he still has a chance and that he can try something new to give him an edge to beat Jackson Storm.
* Cars 3: Lightning McQueen ends up making one with Sterling, the scheming boss of the Rust-Eze Racing Center - If he loses the first big race of the new season, he'll have to retire from his racing career forever.
* Cars 3, Lightning McQueen utters a few of these as he struggles to catch up to Jackson Storm in the Los Angeles 500, moments from his horrible, near-fatal crash.
* Cars 3: McQueen's crash counts as this since seconds before his tire blows out, you can hear him breathing heavily while he's struggling to catch up to Storm.
* Cars 3: Miss Fritter dominates the Crazy Eight demolition derby partly because she's a full sized school bus tearing through cars.
* Cars 3: Rusty Rust-eze only had eight lines in the whole film due to the death of his voice actor, Tom Magliozzi. Said lines were unused from the first film while his brother Dusty Rust-eze did more of the speaking.
* Cars 3. Some only a couple of letters away from being full name Danzas.
* Cars 3: The finale of “When All Your Friends Are Gone/Crash” is held in a rather horrible crescendo as Lightning is struggling to catch up to Storm; the moment when he begins to lose control is when that crescendo becomes a terrifying horror sting, which leads into him slamming into the wall hard enough to send him into the iconic crash that follows.
* Cars 3: The NASCAR-style stock racers like McQueen are quickly being sidelined by new GT3/Le Mans-style racers such as Jackson Storm.
* Cars 3: The number on the door to Sterling's office at the Rust-eze Racing Center. Mater's license plate once more.
* Cars 3 the racers that McQueen had become accostumed to face on the racing track are all fired and replaced by newer, faster, models, and after McQueen's failed attempt at outperforming the new racers ends in a crash, he too is stripped of his endorsement deals.
* Cars 3, the time they spent in the pits should've left them so far behind no amount of fighting spirit and fancy moves should've brought them back. They may have been trying to invoke Cruz as a substitute driver, something allowed under NASCAR rules, but the substitute driver automatically goes to the back of the pack because they didn't qualify the car.
* Cars 3 to concentrate, he manages to weave his way through the chaos without a single scratch. Doc's old mentor Smokey points this out to him later on:
* Cars 3 uses the Florida 500 as the major final battle during the climax. Lightning has to win this race or he’ll have to retire from racing forever.
* Cars. According to the writers, Doc is the first character in the series to be killed off permanently, as implied by the fact that his former medical clinic has been converted into a memorial museum dedicated to this character, as with the trophy Lightning McQueen wins at the very beginning of the film. In the third film, he appeared in flashbacks using unused dialogue from the first film.
* Cars, after Lightning's tire blows out, one of his pit crew members flips a stack of tires over in frustration.
* cars. Again, Kryten tries to reassure him, but Lister explains it wasn't towels, it was all the furniture.
* Cars are actually all revealed to have names according to the tie-in diecast toy line.
* Cars, as cars say things like "For the love of Chrysler!" and "Ford Almighty!"
* Cars, as the Piston Cup officials try to resolve the photo finish in the final race, they're seen skipping backwards and forwards through the footage, frame by frame, over and over again.
* cars. Both Mr. Weasley's Ford Anglia and a couple cars used by the Ministry of Magic are magically enlarged on the inside to comfortably seat over twice as many people as could be squeezed in normally.
* Cars came after he took a cross-country road trip with his wife and five sons in 2000.

* Cars champion for another (Lewis Hamilton became Emerson Fittipaldi). Also, Brazilian racer Carla Veloso got the voice of a singer, and Cruz Ramirez from the third was an actress.
* Cars' characters have real car models. For instance, Sally is a Porsche 911. Flo is a generic V8. "The King" is an ink-suit version of his voicer Richard Petty's 1970 Plymouth Superbird. "Junior" is basically Dale Earnhardt, Jr. voicing his own #8 Budweiser Chevrolet Monte Carlo SS.
* Cars Chick Hicks, and defending champion Strip Weathers, who is planning to retire after this race. Hicks cheats and causes Weathers to wreck out, which in turn causes Lightning, in the lead, to drop out to help Weathers at least finish his last race. As a result, Hicks actually wins, with Weathers in second place and Lightning in third, but he accepts the trophy to a throng of boos and thrown objects, including from his own pit crew, now revealed as a cheater to the world. It also costs him a coveted sponsorship deal with Dinoco (the company that sponsored Weathers and was searching for a new racer following his retirement) who instead offer a deal to McQueen for his sportsmanship despite losing the race.
* Cars, Chick Hicks pushes The King off the racetrack, heavily damaging him. As a result, Lightning McQueen, who having understood a similar fate Doc Hudson went through when he was a racecar known as the Hudson Hornet, lets Chick cross the finish line first so he can help The King cross the finish line one last time. Chick is still given the Piston Cup, but because of both his dirty trick and Lightning's noble action, he is denied the Dinoco sponsorship, which is offered to Lightning instead, but he too turns it down in favor of learning the movie's moral.
* Cars, Doc's first lines consist of ranting about how he'll throw Lightning in jail for so long the jail will rot on top of him, then build a new jail and let that one rot — considering the characters are cars and the jail is an open-air impound lot, this would be impressive, to say the least.
* Car Seat Headrest: While frontman Will Toledo has not publicly specified an exact label, he has been candid about having same-sex relationships and attraction in both interviews and his lyrics.
* Cars ends with Lightning's job being saved from retirement and he becomes a teacher to Cruz Ramirez, his former trainer who's fulfilled her dream to become a racer just like him.
* Carsey-Werner Television has licensed most of their shows to FilmRise for free streaming on the Tubi TV website.
* Cars featured a cover of Tom Cochrane's "Life is a Highway" by Rascal Flatts during the montage of Mack driving with Lightning McQueen in his trailer along Interstate 40 through the central United States.
* Cars featured an automobile version of Jay Leno named Jay Limo, who is a large limousine with an oversized bumper.
* Cars films. He's socially awkward and socially inept. He has a hard time communicating his thoughts and feelings to others and doesn't know what topics to talk about in front of other people. He has a hard time with others' opinions too, either not understanding them or thinking that if they don't like his friend McQueen they must be bad people. He sometimes says inappropriate things at the wrong times and unintentionally embarrasses his friends in public places when talking to new people. It's been speculated that he might be on the autism spectrum.
* Cars, following Strip's retirement from racing, he has become crew chief to his nephew Cal, who is voiced by Richard Petty's son Kyle Petty.
* Cars franchise primarily takes place in the American Southwest, and Route 66 in particular. In turn, Pixar cast journalist and historian Michael Wallis — who has written several books about the history of those specific areas of the United States — as the Sheriff of Radiator Springs.
* Cars has a bad daydream in which his rival Chick Hicks wins the Piston Cup, gets the Dinoco sponsorship, and becomes known as the "Chick Magnet," literally.
* Cars has the four tuners — Boost, DJ, Wingo, and Snot Rod — who decide to mess with Mack after he has trouble staying awake. Had they chosen not to bother him, Lightning would not have fallen out of him and wound up in Radiator

Springs. They do later show up in a post credits scene where they get arrested by Sheriff for speeding and continue to appear in other media around the movie, so this is downplayed.
* Cars, he can still be flirty when he wants to. Regardless, Mack still respects women and the thought of women selling themselves out for men disgusts him.
* Cars in the setting have built-in failsafes that prevent an operator from using the manual controls while intoxicated, emotional, overtired, suffering from
* Cars introduces his nephew Cal, played by Petty's real son and fellow racer Kyle, as Lightning McQueen's friendly rival. What makes it feel odd is that he too is now on the verge of retirement, implying that he and McQueen have a long-standing relationship, and also has a very minor role.
* Cars is a perfect example of this trope, there are some aversions, like shots of flowing water and the tearaways near the beginning of the movie produce various realistic flames, which are especially impressive to anyone who knows how difficult realistic particle animation is.
* Cars: "I thought I'd say thank you for doing a great job, so I thought I'd let you stay with me. I mean not with me, but there. Not with me there, but there in your own cozy cone, and I'd be in my cone..."
* Cars. It later turns out this is literally true in the original context (racing on a dirt track).
* Cars, it's a major plot point that Lightning McQueen does not know how to counter steer, or even understand how it works ("Turn right to go left"). But he does - in the Piston Cup championship race that opens the movie, he uses that move to maintain control after he loses his rear tires.
* Cars. Lightning comes in last place but scores the sponsorship he wanted, while the racecar that caused the crash wins but gets booed and known as a cheater.
* Cars: Lightning McQueen discovers that Doc Hudson was actually the Fabulous Hudson Hornet, a legendary racecar. Doc ultimately explains that the only reason he "quit" racing was that he suffered a major crash during a race. By the time he could race again, the racing industry merely brushed him off without a second thought.
* Cars. Lightning McQueen gets immediately smitten when he sees her for the first time.
* Cars, Lightning McQueen goes to talk to Doc Hudson and walks in on Sheriff getting a tune up, which, judging from McQueen's reaction, appears to be the car equivalent of a colonoscopy.
* Cars: Lightning McQueen has finished the road and there is no sign of him, the others assuming that he just left without saying goodbye. Red the Fire Truck starts crying, at which point McQueen appears and asks what's the matter with Red. Mater then explains to McQueen about McQueen leaving, and stands staring at him a long while before realizing who he's addressing.
* car smash fundraiser in which people pay money to swing a sledgehammer at an old car.
* Cars, Mater actually finds his hood in a ditch and puts it on top of his engine, but unfortunately, the hood is covered with dust and some of the dust actually goes into Mater's engine causing him to sneeze and making his hood fall off.
* Cars. Mater also shows no aggression whatsoever in either film. He's like a very sensitive flower that gets genuinely upset and hurt easily.
* Cars, Mater is literally known as a runt and he's the only child that Lizzie and Stanley ever had. He's small for his size to be a tow truck because tow trucks are actually normally bigger than him. He can sometimes get in a lot of trouble and others think of him as a fool. He was probably born very little too. He also seems younger than the rest of the Radiator Springs town residents.
* Cars: McQueen and Sally are interrupted by Mater on the Dinoco helicopter.
* Cars: McQueen laments to a tourist couple passing through Radiator Springs "Don't leave me here! I'm in hillbilly hell!"
* Cars — animated film series. 3 films, 2 spin-offs, 16 shorts. Since 2006.
* Carsomyr: A Paladin-only greatsword that grants magic resistance and can dispel an enemy's magical barrier,

* Carsomyr is a +5 (and can be upgraded to +6 in the expansion) greatsword that grants its wielder 50% magic resistance, allows its wielder to cast Dispel Magic three times a day, and dispels magic on opponents with each hit.
* Carson and Mrs Hughes, due to the many years they had spent working together, until Season 5 Christmas Special when Carson
* Carson Beckett is killed off in Season 3, but he returns in Season 4 due to massive fan demand.
* Cars: One of the rock outcroppings is drawn to look both like Kirk's Rock and the tail fins of some 1950s muscle car.
* Carson Kressley, possibly the most flamboyantly gay of the five makeover artists of
* Carson Marenka uses this in several horror shorts, such as "Trainspotting at Night".
* Carson Palmer won the Heisman Trophy award in 2002, which was enough for the Cincinnati Bengals to take him first in the 2003 NFL draft. After sitting out his rookie season, he made two Pro Bowls in 2005 and 2006. In the 2006 playoffs, Palmer tore his ACL and MCL, which led to a string of more injuries. He was later traded to the Oakland Raiders and Arizona Cardinals for late-round draft picks. In Arizona, Palmer started rebuilding his momentum until 2015, when he made his first Pro Bowl in 9 years, at the late age of 36, scoring the best QB rating, and most touchdowns and yards, in his career.
* Carson Ryder novels see Detective Carson Ryder often consult with his brother, convicted serial killer Jeremy, for insight into the serial killers he's tracking. Since Jeremy initially killed their father to protect Carson from his abuse, he does care for his brother, but it's made clear that his warped psyche has issues with women in particular that can compromise his ability to be out in the real world; at least once he deliberately misled Carson because he identified with the killer's motives (although he apologised when that misinterpretation led to a woman Carson cared for being threatened).
* Cars, on the last leg of the final lap of the Piston Cup tiebreaker race, when Lightning takes the lead and is about to win the race, longtime second-placer Chick Hicks, determined to at least come in ahead of his longtime rival Strip "The King" Weathers once before the latter's retirement, desperately PIT maneuvers the King, sending him into a horrifying rollover crash that astonishes everyone. When Lightning sees what's happened, he, not wanting his idol's career to end the same abrupt and unceremonious way that his mentor Doc Hudson's (aka the "Hudson Hornet") did, he stops short of the finish line, allowing Chick to win the Piston Cup, and goes back to help the King finish his final race and retire with the dignity he deserves. The fans, media, and sponsors all become touched by Lightning's act of true sportsmanship and cheer him on as the race's true winner, and Dinoco even offers him the sponsorship they'd promised the winner (which he ultimately turns down), while Chick, despite finally beating the King and winning the Piston Cup, is denied said sponsorship and the fame and glory of the victory, and is booed off the stage with his trophy by everyone for his act of cheating and unsportmanlike behavior.
* Carson von Mekkhan gives one to his grandson Vanamonde, when he offers to be the first to test Agatha's
* Carson von Mekkhan, Seneschal to Bill and Barry Heterodyne, also rode with the Jägers in his youth, an occupation described as something for people who liked to drink and fight and mess people up, and didn't care if they lived or died. When we first encounter him, he is sitting in a rocking chair and discussing dinner plans with his granddaughter. He is still badass enough to go toe-to-toe with the Castle and win regularly.
* Carson Wolf, Special Agent in Charge for the Department of Homeland Security's New York field office, participated in covering up David Lieberman's faked "death". He also was one of the plotters involved in the death of Frank Castle's family, and burying the story in both cases.
* Cars. Or, it may not be a statue at all, but Stanley himself, bronzed.
* Cars: Owen Wilson usually abides by the rule of only playing Lightning McQueen in

the movies, with Keith Ferguson replacing him in games and shorts, but he returned to voice the character for the last few shorts.
* Cars rendition of "The Star-Spangled Banner", leading to this exchange:
* Cars, scenes from Radiator Springs' future are run, along with the credits.
* Cars series films, forklifts are referred as "pitties" because, in the first film, they all served as the pit crews for the racecars.
* Cars series films has Axle Accelerator, Aiken Axler, Bernie Banks, Bruce Boxmann, Benny Brakedrum, Bruiser Bukowski, Bertha Butterswagen, Chuck Choke Cables, Charlie Checker, Chief Chick, Cora Copper, Kathy Copter, Dirkson D'Agostino, Derek "Decals" Dobbs, Galloping Goose, Green Gremlin, Hank Hallsum, Hudson Hornet, Kimura Kaizo, Miles "Meattruck" Malone, Mach Matsuo, Matthew McCrew, Marlon McKay, Misti Motorkrass, Piccolo Perry, Polly Puddlejumper, Petrol Pulaski, Rod Redline, Rusty RustEze, Sarah Safestreet, Timothy "Timezone" Truecoat, Tony Trihull, Timothy Twostroke, and Valerie Veate.
* Cars series films, plant life is the only nature in their world that isn't shaped like a vehicle. It does, however, have car-related elements if you look very closely (the bark of the trees resemble tire treads, leaves have tire tread and VW logo-shaped veins, and flowers are shaped like either tailfins, head-and-taillights, or cooling fans). In other words, organic fuel.
* Cars, Sheriff asks for volunteers to be McQueen's legal representative. All step (drive?) back, except for Mater, who then cheerfully agrees.
* Cars takes place four years after the first movie, where Lightning has since won four Piston Cups. The third takes place six years after the second, where he is now a 7-time Piston Cup winner.
* Car stereo thieves sometimes intentionally trigger a nearby car alarm to mask the sound of breaking glass.
* cars that look nice but barely run, etc, only to find out they are junk when they try to sell the items themselves.
* Cars: The American Southwest and Route 66, which he has written several books about.
* Cars (the locomotive that almost hit Lightning McQueen on his way to Radiator Springs)'s headlights and running boards.
* Cars: The mustache grilles of Chick Hicks' forklift crew all fall off upon seeing how Guido can change all four of Lightning McQueen's tires in four seconds.
* Cars. These ads may be targeted only to local areas, and may air too briefly to draw much attention.
* Cars Toon all by himself, but during the final showdown against the champion, Doctor Frankenwagon and his Monster, he had to rely on his teammate Frightning McMean to defeat both Frankenwagon and the Monster.
* Cars Toons "UFM: Unidentified Flying Mater" and "Moon Mater", respectively.
* Cars to the use of the gas-guzzling Hummer in suburban environments.
* Cars what she was supposed to do and Red decides to do her job for her.
* Cars. When Lightning McQueen discovers that Doc Hudson was a star in the championship racing scene decades before, Doc brushes it off as a chapter in his life he wants to forget. When Lighting calls him out on quiting in his prime, Doc responds that following a devastating crash, he missed several seasons recovering, when he was ready to return, his sponsors told him to get lost, since they had hired a new racer that brought in the crowds.
* Cars: When Mack finds McQueen in Radiator Springs, he hollers, "Thank the Manufacturer!"
* Cars when Sheriff asks for volunteers to be McQueen's attorney. Mater, the one left out, gladly accepts.
* Cars, when used by teenagers, were considered this. Young people could go out without adult supervision; "parking" and drive-ins ("passion pits") were opportunities for sexual experimentation.
* Cars, where hero Lightning McQueen is a red race car, while his love interest Sally is a blue Porsche 911 Carrera. Also inverted with two of the background race cars where the pink race car sponsoring Tank Coat is actually male, and the blue race car sponsoring RevNGo is actually female.

* Cars, which stuck much closer to the first film's tone, was much more appreciated.
* Cars. Why? Because stockholders knew it wasn't made for merchandising.
* Cars will spontaneously explode in the event that they flip over and get stuck. Having the vehicle flip itself right-side-up instead would have made too much sense, and probably would have involved at least
* Cars with celebrities. We have: TV host Sabrina Ferilli as Sally, comedian Marco Della Noce (mainly known for his character of a Ferrari pitty) as Luigi, and many racing-related people: TV Formula 1 announcers Gianfranco Mazzoni and Ivan Capelli voice the announcers, while Formula 1 racers Alex Zanardi, Jarno Tulli, Giancarlo Fisichella and Emanuele Pirro voice respectively Guido, DJ, Boost and Wingo.
* Cars would make similar comparisons on his stand-up. See Stand-Up Comedy below.)
* Cars years after the ride opened, it currently has a 120 minute long line).
* Car Talk." And if you listen via podcast, you also get interstitials letting you know you can download and listen to classic ("and by 'classic,' we mean..." "...old.") episodes via their website. They then mention one of a number of reasons why you might want to do such a thing. ("For example, if you're a dentist and you want to remind your patients that there are worse things than a root canal.")
* Car Talk began on WBUR Boston in 1977, and was picked up nationally by NPR in 1987. New episodes stopped being produced in 2012 and the older of the two brothers who co-hosted the show, Tom Magliozzi, died of complications from Alzheimer's disease in 2014, but Tom and his brother Ray still had recorded enough material for them to continue broadcasting new shows of never-before-aired material for at least a few more years. In late 2017 NPR announced, through a recording made by Ray, that they would officially cease its syndication to make way for new programming.
* Car Talk: Click and Clack always sign off with "Don't drive like my brother".
* Car Talk event involving food (for instance, the "Seneca Lake Rump Steak Spongecake Milkshake Bran Flake Shake 'n' Bake".)
* Car Talk: Frequently, Tom & Ray would give the answer to last week's Puzzler, then promise "We'll have a new Puzzler for you in the third half of the show."
* Car Talk, has many. And Ray lists most or all of them during the credits of the show:
* Car Talk in the form of a joke designed to fly right by anyone under 40. A man is lamenting that, at age 45, he's too young to have a heart attack. His boss tells him, "Hey, 45 is the new 78." Anyone in the audience who laughs has gray hair.
* Car Talk — claim to have been at the receiving end of many a dope slap from their mother. (And according to each brother, the other brother stayed just as dumb.)
* Car Talk, only with phone calls being replaced by wacky adventures. PBS somehow thought this would be suitable for their schedule.
* Car Talk on NPR refers to this occasionally, usually as a driver in need of "an urgent haircut." They even refer to Urgent Haircut Productions.
* Car Talk, so love this punny name that they named their production company "Dewey, Cheetham and Howe" (the window of the DC and H corporate offices, at the corner of Brattle and JFK Streets, are a source of constant amusement to residents of Cambridge, Massachusetts).
* Car Talk. The longest version is "Doug 'the Subway Fugitive' 'Not-a-Slave-to-Fashion' 'Bongo Boy' 'Frog-Man' 'Punkin Lips' 'Cute-Cute-Cute' Berman".
* Car Talk, though there have been several occasions when they've actually gotten in trouble.
* Car Talk, whenever Click and Clack (Tom and Ray Magliozzi) get a caller whose question and banter come from way out in left field, Tom will crack "Doesn't anybody screen these calls??!"
* Carta Marina are shown preying on each other — the Ziphius and a prister are both attacked by smaller monsters, while a giant lobster is shown being attacked by another creature with a rhino-like horn.
* Carta Marina is one of the most notable historic examples of this trope. The map is lavishly decorated with wondrous scenes and creatures — besides the hordes of sea monsters that made it famous, Olaus Magnus included depictions of various

unusual peoples, as well as a few land-bound monsters in northern Scandinavia, and added descriptions and warnings to various illustrations. All in all, there's barely an inch of the map that isn't home to some strange thing.
* Carta Marina of 1539, there is an armed troop of "Scricfinns" ("Skiing Finns", meaning Saami) riding to battle on reindeers.
* Carta Marina: South of Iceland, a ship is being pursued by two 'pristers' (giant whales) while a man standing on the ship is blowing a trumpet. The commentary explains that the sound of trumpets frightens pristers away, which is necessary to prevent them from capsizing ships.
* Carta Marina: The "monster seen in 1537", called a "sea-hog" in the commentary, has three additional eyes on each side of his body, making eight eyes in total.
* Cartas de Amor who likes the state of romantic indefinition in his neighborhood (because he can get the unsatisfied women for himself) and sees Cupido's actions as opposed to his own interests. When all their conflicts are solved and her real gender is revealed, many neighbors are not very convinced of either her femininity or his manhood, so they want proofs. Then, Cupido says something in the line of "the main proof of his manliness is that he could see the woman in me behind all the costume and the farce."
* Cart comments that he thinks of the group as his family—"except for Cartman."
* Carte Blanche by holding their head in a certain way, and become so good at ventriloquy that he managed to convince a (admittedly very goofy) communist that God himself was talking to him.
* Cartel Land follows both Mexican and American anti-drug cartel militias, albeit not too favorably.
* Cartel, which puts him firmly in the crosshairs of other villains after the same person.
* Carter becomes the Captain of SG-1 in Season 8 (when O'Neill isn't with them), and Mitchel takes over the role in Seasons 9 and 10.
* Carter Country: In one episode, he staff at the police department puts on a telethon to raise money for a former chief who has become quite ill. During the telethon - but unbeknownst to them - local news breaks into the telethon feed to announce that the former chief had died. One staffer, who had refused to participate because of the former chief's racist views, sneaks onto the show to surreptitiously inform the current chief while he's in the middle of a musical tribute.
* Carter Country, where he has stored a bottle of wine for many, many years. After taking a sip he says, "[Vintage year]. A fine year for vinegar."
* Carter deduces the existence of the Machine and is killed for totally unrelated reasons in the next scene.
* Carter frequently calls Izuku "kid" or "my boy" similarly to how All Might does in canon.
* Carter goes above and beyond the call of duty for this trope, as the men interested in her rarely die alone. Jonas (not Jonas Quinn), who lead one of the teams, murdered a teammate, set himself up as a god, then died with his
* Carter has been redesigned from the ground up and doesn't resemble the same character. He wears completely different clothes, has a hat on, has a different hairstyle, and has dark brown hair instead of dirty blond hair.
* Carter mentions in one episode that the designation is "based on a binary code the computer uses for extrapolation," so it's some kind of a mathematical formula produced by the Earth-based dialing computer to pinpoint location in space. It would
* Carter, obviously, consistently avoided this trope, dressing just like her male teammates.
* Carter of Innsmouth Academy is being earmarked for this role by all three secret societies. As "Carter Unleashed" demonstrates, she's tough enough and versatile enough to serve as an effective one-man army. However, the real draw of her powers lies in artillery: she's the sorcerous equivalent of a

or harassing Peter Griffin, and is often gleefully sadistic.
* Carter Pewterschmidt just can't let it go. Despite decades of happiness Lois has experienced with Peter, he has and still tries to smash his skull in occasionally. He
* Carter's Ex actually shows up and establishes that the breakup was because Carter would always rush off to work, and when she realizes how much a part of the town both he and daughter Zoey are, she's even willing to step aside and let Zoey remain, even though the agreement was for her to return with Abby at the end of the school year.
* Carter's medals become a plot point when she's in Washington to receive the Air Medal and her father (also an Air Force officer) is skeptical about how her work on "deep-space radar telemetry" (the Stargate program's cover story) would earn her a medal reserved for heroic achievements while participating in aerial flight.
* Carter sometimes utilizes this trope. Particularly shown in the episode
* Carter's rant about reproductive organs in the episode "Moebius, Part I". She's making a rant that includes a line from the pilot of the show, and afterwards it's revealed that she's rehearsing something she'd like to say to her boss, but never works up the nerve. This was used partly to differentiate this version of Samantha Carter with the previous one, who had no problem uttering the same line during a briefing in the series' first episode, and partly as an in-joke, because that line was pretty well-recognized as a clunker.
* Carter The Unstoppable Sex Machine were originally a two-piece whose songs usually consisted of witty punk rock-style vocals and cranked-up rock'n'roll guitars, played over backing tracks that sounded like
* Carter uses it all the time when explaining why Jack and/or Daniel's plan
* Carter. When a new book came out about the killings, the serial killer finally got tired of an imposter taking credit for his work so he had the man murdered and started playing games with Carter so the real truth could come out.
* Cartesian Karma - for when penance must be paid for your evil deeds whilst brainwashed
* Cartesio the mud off everyone in the room and make a pile so that they can check their footprints in it.
* Carthage literally means "New City" (Qart-Hadasht). The Carthagenians founded another city of Qart-Hadasht in the south of Spain, which ended up being called Carthago Nova by the Romans ("New New City"), who were unaware that "Carthage" meant "New City" already. "Carthago Nova" was eventually mutated and shorted to Cartagena in Spanish. In the New World, the Spanish had the opportunity to extend this further by building a "Nueva Cartagena"...but they opted for "Cartagena de Indias" ("Cartagena of the Indies") instead.
* Carthaginians apparently only started thinking on war elephants after they saw those used by Pyrrhus of Epirus, who acquired a contingent of them from Ptolemy II in order to invade Rome. Ironically, although Pyrrhus managed to salvage two
* Cartman accidentally admits to having a crush on a girl named Patty Nelson in Season 11, but she's otherwise never mentioned.
* Cartman also does it in "Crack Baby Athletic Association" when Kyle proposes using 30% of the company's profits to build an orphanage for the crack babies.
* Cartman and Heidi were dating back in Season 20 before she tired of his sociopathic ways in Season 21 and dumped him.
* Cartman and Scott Tenorman, especially in "201" when Scott begins grabbing Cartman... and getting awfully close to his face... This quickly goes into squick territory when it's discovered that Eric and Scott are half-brothers.
* Cartman and Wendy usually hate each other, but one episode of Season 4 has Wendy realizing she has feelings for him, much to her dismay.
* Cartman. An individual whose antics can sometimes backfire and lead to his humiliation, but he shows that he's capable of this, for example being able to team up with Cthulhu.
* Cartman as "the Coon". He is quickly showed up by Mysterion, and eventually becomes a much more effective villain, even though he still calls himself a hero as he does it.

* Cartman because he was constantly bullied for his weight. "Cartman's Silly Hate Crime 2000" goes so far to imply that Clyde almost underwent the same evolution after the boys turned their attention onto him instead, even taking on some of Cartman's obnoxious attributes.
* Cartman can come up with crazy villainous schemes and speak Spanish and German fluently, yet is otherwise dimwitted and clueless.
* Cartman develops an intense rivalry with Kenny when they both adopt superhero alter-egos, The Coon and Mysterion respectively. The Coon is jealous of Mysterion for being more respected and taken more seriously as a crimefighter (though most of the "crimes" both of them report on are petty, like littering) and because The Coon came first and Kenny is clearly inspired by / copying Cartman. Mysterion meanwhile thinks that The Coon is a complete psycho who has no idea what being a hero actually means and thinks it is more about getting attention and making the world a better place
* Cartman did say he fancied and fantasized about kissing this girl named Patty Nelson.
* Cartman does this at least twice. First in "Scott Tenorman Must Die" he offers Stan and Kyle $2 each to help him with his revenge plot on Scott Tenorman. They're receptive at first, but then leave after Cartman explains his ridiculous plan to them. Turns out, he anticipated they'd refuse his offer, and it was part of his real plan. The second time was in "Breast Cancer Show Ever", where Cartman offers Wendy $27 to call off their scheduled fight and she also refuses.
* Cartman Finds Love, Cartman spreads the rumor that he and Kyle are (or at least were) dating. Funny enough, everyone seems to believe it pretty easily.
* Cartman forms another one with the Record Producer in Season 18's two part finale, which leads to Cartman becoming the
* Cartman frequently locks two kids of the same race in the school locker room to prove his racist notion that people should only marry within their own race.
* Cartman Gets an Anal Probe, a report on alien sightings features a crop circle formation in the exact likeness of Cartman, who has been implanted with an alien probe.
* Cartman Gets an Anal Probe", Cartman fervently denies that he was abducted and experimented on by aliens, up to this point:
* Cartman Gets an Anal Probe", culminates with a 50-foot satellite dish emerging from Cartman's ass.
* Cartman gets beaten up by Wendy, which causes Cartman to despair that the other kids won't think he's cool anymore. All the other kids tell him that it's OK...they
* Cartman gives one in "T.M.I." when he finds out that the school actually
* Cartman goes through this with Kyle's mom Sheila Broflovski as the insulted party in
* Cartman goes undercover as a hooker when deputized by Barbrady so he can learn to read.
* Cartman himself, playing a twisted game of pretend after his friends mocked him for playing with dolls and told him to grow up.
* Cartman in the Coon and Friends Trilogy, Cartman starts to think the rest of the organization
* Cartman is fond of spewing these about ginger kids, Jews, and everyone else.
* Cartman is one of the only boys unaffected by the waitresses' charm as he focuses more on the food instead.
* Cartman is the only kid in the class who likes the Sexual Harassment Panda. Even Wendy, who usually likes and cares about socially relevant stuff,
* Cartman is this to Wendy in "Dances With Smurfs". He regularly calls her out and shames her publicly only for her to...go about her business. Everyone but Wendy sees this as a big deal. It's not until the end of the episode that she responds and she absolutely destroys him.
* "Cartman Joins NAMBLA" does the usual "I learned something today" speech, only it's from a NAMBLA member, who says that society just doesn't tolerate their life styles. They are interrupted by Stan and Kyle pointing out that they have
* Cartman. Kyle points out to Cartman that his fear of Arab-Americans as terrorists

was misplaced, but Cartman points out that if he hadn't suspected them, Kyle wouldn't have discovered the real terrorist plot.
* Cartmanland": At Cartman's grandmother's funeral, a crate is opened to release some doves... only to have them fall out, dead.
* Cartmanland", Kyle sickens and almost dies out of spiritual suffering over seeing Cartman get a totally undeserved windfall, until the episode's end plays the Aesop straight.
* Cartman picks the ninja power to have whatever power he wants. In a practical sense, it's straight-up No Selling.
* Cartman rescues Kyle's family from the about-to-be-destroyed San-Francisco, because he misses picking on Kyle.
* Cartman's brief boy band, "Fingerbang", does this a lot. Cartman thinks it means
* Cartman's head explodes in "Medicinal Fried Chicken" after he finds out that KFC has been banned from Colorado. (
* Cartman's Incredible Gift and forced to watch slides of vacation photos.
* Cartman's line "No, Kitty! That's a bad Kitty!" is widely thought to have originated in the premiere episode "Cartman Gets an Anal Probe". He actually says this in the Season 1 finale "Cartman's Mom is a Dirty Slut" twice. His lines to Kitty in the premiere, aside from telling Kitty to get away from his food, are "No, Kitty! You bad Kitty!" and "No, Kitty, this is my pot pie! Bad Kitty!"
* Cartman's mom is known for this. By everyone in town. Including the women. Including Jesus. Everyone but Halfy, but he doesn't count
* Cartman's Mom is Still a Dirty Slut after a short time being trapped without power. "It's only been like, four hours. Aren't you resorting to cannibalism a little quickly?"
* Cartman spearheads these on a frequent basis at the school. In "Bass To Mouth" it's revealed that he does this to such a level one student has actually committed suicide from the ridicule. The School Council order (and
* "Cartman's Silly Hate Crime 2000", Clyde says Cartman's old catchphrase word for word:
* Cartman's Silly Hate Crime 2000", Token is hit with a rock by Cartman upon "fat ass" being said, through it was Kyle who said after the warning. Token received a black eye, but cut to the scene where Cartman and Token was in the Mr. Mackey's office, with the latter in a sling.
* Cartman status. To name an example, in "Crippled Summer", Cartman decides to read his speech about how much he hates Jewish people, making Kyle object, but the doctor forces him to let Cartman finish.
* Cartman's treatment of Butters, whether he's just bullying Butters or manipulating Butters to be his
* Cartman Sucks", this time with Cartman believing Kyle has stole the photos he made with Butters' dick in his mouth and believing he's gonna show them at school to spite him. Kyle legitimately doesn't have the photos, though, but Cartman refuses to believe him and threatens to kick his ass if he doesn't confess. Kyle responds with a light slap, and Cartman goes back home bawling.
* Cartman tape to spook the hippies off) while the military men recommend nuking the crowd (and South Park) off the map.
* Cartman was actually hit with karma much earlier in season 12. Wendy has had it with Cartman's antics and challenges him to a fight. Cartman at first plays it as a joke, but Butters points out that everyone would think he's a faggot if Wendy beat him, Cartman fears that she might actually beat him and tries his damndest to get out of the fight, to no avail. She does beat the hell out of him in front of everyone and while crying about how he's no longer cool, the others inform him that they've never thought he was cool and that their opinions of him couldn't possibly go any lower, which Cartman interprets as them trying to cheer him up because they really do like him.
* Cartographers have always had to worry about others plagiarizing and reselling their maps - the problem being that it's very difficult to legally prove if someone copies their work.
* Cartography SidequestThe game draws and fills in level maps as you actually

explore them.
* Carto has the Story Chalet, full of books that write themselves due to events in the world.
* Carto: Invoked and lampshaded with the sign beside the whirlpool, which isn't working yet when you first arrive, but which you would have had to walk through to get to the sign.
* Cartomancy Cartomancy is using a deck of cards in divination - the Tarot is the most popular deck to use, developed from the card game of the same name sometime in the late 19th Century. Other specialized decks used for divination and inspiration are known as oracle cards - Dream Cards, Chakra Cards, Animal Cards, Astrology Cards, You name it, there is most likely a deck of oracle cards about it.
* Cartoon Action Hour role-playing game. The first version even suggested players think of gimmicks for a corresponding action figure when creating characters.
* cartoon adaptation, amazingly enough. The superhero is Z-Strap, whose power has to do with velcro straps on his sneakers, letting him get dressed really quickly. What a surprise that the villain's is "The Tangler."
* Cartoon All-Stars to the Rescue featured just about every major Saturday morning cartoon character of the early '90's inflicting massive amounts of psychological torture on a teenage addict to try and scare him off of marijuana and beer (mostly marijuana, since his dad was the only one who noticed the missing beer). Made even better when you consider that the real purpose of this special wasn't revealed until it aired! Instead, all the ads displayed it as a fun adventure starring all the big cartoon stars of the day. Cue deer-in-headlights look on parents' faces when their seven-year old-son turned to them and asked what marijuana was. Keep in mind that this aired in 1990, when marijuana was still illegal. Good luck showing it to today’s stoners.
* Cartoon All-Stars to the Rescue features a sentient Winnie the Pooh doll among other representations of cartoon characters.
* Cartoon All-Stars to the Rescue had to be made within six weeks instead of the more typical 12 to 16 weeks for an half-hour cartoon. As a result, they had to forgo the usual preview screenings. The only preview they did was of a 15 minute excerpt (with no sound effects and some of the music missing) to members of Congress two days before the simulcast airing. Reviewers were forced to wait until air time because the special was still being edited days before.
* Cartoon All-Stars to the Rescue where Michael imagines himself nearly getting killed in a twisted drug-themed amusement park.
* Cartoon All-Stars to the Rescue, whose face occasionally morphs into a skull while talking to Michael.
* Cartoon animals tend to be drawn with a head, muzzle, beak, or bill shape that is different from what it is in real life:
* Cartoon Bomb: It actually is a realistic representation of 19th century explosive artillery ammunition.
* Cartoon Bomb that he intends to roll down it. But the absolute second he lights the fuse, the bomb explodes.
* Cartoon Bomb. They're successful when Phineas replaces the bomb with a smiley face.
* Cartoon Brew It even mentions the trope page and website by name, although it dismisses both as misguided and narrow in their scope of "adult" animation.
* Cartoon Cartoon Summer Resort will tell you that he injured his head as a result of trying to dive in the hotel's swimming pool when it had no water in it, and now he needs a first aid kit.
* Cartoon Cartoon Weekend, a full weekend of original series (with a few new surprises).
* Cartoon Cheese - All cheese in cartoons is wedge-shaped, orange like cheddar, and holey like Swiss.
* Cartoon Cheese: Cartoon cheese is always orangey-yellow, has holes, and is a wedge.
* Cartoon CheeseCheese is always immediately recognizable by a distinctive shape and color.

* Cartoon Cheese: In cartoons, cheese will resemble Swiss cheese colored like cheddar. In reality, they come in a much wider variety.
* Cartoon Conductor: In cartoons, conductors control what music the audience plays as if by magic.
* Cartoon Creature: A character is most likely some sort of anthropomorphic animal, but it is unclear what species they are supposed to be.
* Cartoon Creature: An anthropomorphic animal of indeterminate species.
* Cartoon Creature — parts so thoroughly mixed that it doesn't resemble anything in particular.
* Cartoon Cuisine has the blogger make food that is seen in various cartoons.
* Cartoon Hangover who may object to being called cute. The turtle is a straighter example as it just sits there in the scene and is cute and funny.
* cartoon. He is highly intelligent (for a dog) and often acts on his own initiative to warn Gulliver and the Lilliputians of danger (and sometimes save them from it).
* Cartoon History of the Modern World: Volume II, the narrator mentions that the birth control pill was the greatest invention of the 20th century, prompting two characters in bed to say:
* Cartoon History of the United States ends with a note saying that historians never have to write endings, as history will never truly end. He then trails off abruptly in mid sentence.
* Cartoon History of the Universe: Featured in a crowd shot of the Mongols marching off to war.
* Cartoon Hooligans also happen upon them, and Iron Man decides to post a picture of the "couple" on Instagram with the tags "#SpideyPool", "#HahGay" and "#Bromance", over their vehement denials.
* Cartoon Hooligans a pair of "pants" from his spare armor parts, it appears that Hulk is about to go on another rampage, but it turns out that he likes Iron Man now for giving him "pants", and they become friends again.
* Cartoon Hooligans episode "What If Superman Got Sick?!", when the Justice League starts beating Superman up for peeking into the women's locker room of the JLA headquarters, Green Lantern says "What the frog, Superman!"
* Cartoon Hooligans inside. The three are understandably pissed at him when they find out, along with the rest of the Justice League.
* Cartoonish Supervillainy: The (mostly) harmless antics of a stereotypical supervillain.
* Cartoonist Al Jaffee had originally created a Fold-In themed around the 2012 theater shooting in Aurora, Colorado, but the editors decided that it was in poor taste and destroyed several copies of an issue. It was finally deemed acceptable for print in June 2019.
* Cartoonist Bruce Tinsley frequently interacts with the title character of
* Cartoonist Scott Adams tried his hand in the food business with the Dilberito, vegan microwave burritos named after his best known creation
* Cartoonists that oppose Donald Trump tend to depict him as very fat with an unrealistically orange face and tiny hands. Pro-Trump cartoonists are more realistic in his portrayal. The most pro-Trump cartoonists will often make him aggressively masculine with a
* Cartoonito is Glob. While he is designed to look cute and acts childlike, he has a surprisingly deep male voice.
* Cartoon Juggling: How juggling, a common clown trick, is depicted in animation.
* Cartoon Meat: Meats in cartoons tend to look different than in real life. For example, steaks will be shown as red even when they're supposed to be cooked, and whole roasted birds will often be missing their wings.
* Cartoon Monsoon shorts are about a trio of macabre, troublesome children who threaten the lives of anyone who disrupts their life with their senile grandmother in their spooky mansion, including a smug social worker in the short "Social Call" and a bossy nanny in "Sweet and Sauerkraut".
* Cartoon Network 2013 Summer Indent), giving it a flowy, lineless look.
* Cartoon Network ACME over their malfunctioning equipment, and was awarded a

prime-time slot.
* Cartoon Network aired as part of its "Look What We Found" showcase, when the network referred to itself as "The Boss Hoss Network".
* Cartoon Network and he gets all zeroes. The judges then flip their cards to form the Cartoon Network checkerboard logo.
* Cartoon Network, a pair of creepy snake-like men accompanying him, and a company located miles below the surface.
* Cartoon Network, a programming block that was brought back thanks to Adult Swim. The watershed begins when these two programming blocks begin, which (depending on time of the year) can be as early as 8 PM for Adult Swim and 10:30 PM for Toonami through Eastern Timezone viewing.
* Cartoon Network arrives at the studio for work, but forgets his ID card. Much to his confusion and frustration, everyone, including Booboo and Ranger Smith, acts like they have no clue who he is.
* Cartoon Network artist Derrick J. Wyatt has drawn up a few concepts of
* Cartoon Network. As taking a look at social media for fanart and DVD requests to Warner Brothers, a good chunk of the people one can find are too young to have been alive during the heyday, but are the right age to have been exposed the content during their youth via the cable channel.
* Cartoon Network began using these as promotional bumps during commercial breaks, throwing together single words from just about every show they have before ending on an unexpected punch line.
* Cartoon Network Block Party. Some of those shows continued to have comics long after they were cancelled from the network and taken off regular time-slot. It finally ended in 2009.
* Cartoon Network block revived in 2012, a few fans have become so excited and vocal that Williams Street noticed them and have used their work on several occasions. Amateur rapper Richie Branson wrote several raps on Toonami's return and on shows they aired, the first of which the staff used to kick off the first broadcast on TV in May! Many songs used in the TV bumps are by fans of the block.
* Cartoon Network bumper has Shaggy and Scooby falling down one of these, with the flattened staircase revealing CN's checkerboard logo.
* Cartoon Network, but returns in the very next scene...but then decides to stay in the future, as she had fallen for Legionnaire Brainiac 5.
* Cartoon Network commercials used to have the characters superimposed on CGI scenery. And it works rather nicely!
* Cartoon Network commercial. Zan and Jana are there to present to the child viewers the difference between real and imaginary scenarios, but the PSA is cut just short of revealing their "simple phrase" when Zan realizes (and begins complaining about) how he's always turning into something water-related, regardless of the situation at hand.
* Cartoon Network Crisis Crossover Deck-Building Game count as a Super Hero.
* Cartoon Network Crisis Crossover Deck-Building Game protect your Character!
* Cartoon Network decided to throw it away, despite the original short's popularity, and allowed the creators much more latitude in adding some mature content to the series.
* Cartoon Network, decides turnabout is fair play and steals Ghost's gauntlets while the host is in the shower. Before leaving Zorak pulls this prank.
* Cartoon Network, despite the construction of said establishment not being completed in time for the originally intended date.
* Cartoon Network, Dexter got a magazine, took it to an underwater hideout and ogled the centerfold...of a wrench.
* Cartoon Network, especially since Mandark's his most famous roles (at least in terms of cartoons).
* Cartoon Network gang holding a camcorder during a chase scene and running into a few rooms shouting that she hates these door sequences before placing the camera down on an end table so it can resume the familiar angle as they go through the switch.
* Cartoon Network Groovies, and later multiple other Hanna-Barbera characters are

trapped in Barney's house trying to look for an exit, with the others questioning how they got there in the first place.
* Cartoon Network Groovies episode "Jabberjaw". At one point the villain slithers toward the heroes firing a weapon that shoots bolts of electricity.
* Cartoon Network had a button that brought up a fake "School is Cool!" page for kids to hide the page from their parents, keeping with the show's theme.
* Cartoon Network had already been in the works for years before said decision was made. For being the most hated cartoon on the Internet, it seems quite a significant portion of people are misinformed.
* Cartoon Network had a number of advertising spots in which two live-action brothers reproduced classic cartoon spots. One of their ads was this routine... Done in a way that couldn't possibly work in real life.
* Cartoon Network had Ed announcing "When we get back from where we are going, we are going back where we were. I know people there."
* Cartoon Network" had parodies of the MGM, Paramount and Columbia logos.
* Cartoon Network has a long history of marathons pretty much dating back to its foundation.
* Cartoon Network hidden in the "W" and "T" in Walt and the "Y" in Disney.
* Cartoon Network his parking space, then wonder where the heck he parked his car, then remembering that he flew into work. Silly him.
* Cartoon Network, Huck tries to get rid of all the city noise so he can sing. At one point, he shuts the radio up by reaching through the radio and zipping the DJ's mouth shut.
* Cartoon Network in the early 2000s had a housewife doing this bit as part of the promotion: leaping onto a chair, lifting up her skirt, and then lifting up various underskirts until she got to the one displaying the channel's checkerboard logo.
* Cartoon Network introduced in the early 2010s have this going for them.
* Cartoon Network is also selling a replica of Steven’s iconic varsity jacket from
* Cartoon Network is well-known for these. Some of the best known are:
* Cartoon Network is yet another example, with a giant talking reptile, a talking fannypack (or Belly Bag) and a talking slice of pizza.
* Cartoon Network." It apparently didn't occur to them that there need to be a large volume of complaints in the first place for this to work. CNReal flopped horribly, and while the network does still go for live-action, they're now just treating it as just another program.
* Cartoon Network junkyard, where the main character, Coop, buys it for two bucks... which he never actually pays.
* Cartoon Network known as Bella Swan. Its recurrent gushing over Megan Fox didn't age too well either, as her sex symbol status and career would fade by the mid-2010s.
* Cartoon Network. Later, the network would have the "CN City" on-air branding, in which characters from all the shows airing on the channel co-existed in the same city, with the settings for said shows revealed as being neighbourhoods within CN City or as part of the suburbs.
* Cartoon Network Latin America is fondly of this too, especially before their
* Cartoon Network mad, as the stress of having his plans go up in smoke again after much effort gets to him.
* Cartoon Network of live-action shows in 2009-11, many naysayers called it "The Live-Action Network" or simply "The Network".
* Cartoon Network often did this on intershow breaks, depending on the area, where a promo would appear before getting cut off by a local commercial put there by your cable provider.
* Cartoon Network once had a recurring interstitial called "Bloopers of the Cartoon Stars".
* Cartoon Network original animated short, "Fungus Among Us", featuring filth-fighting superheroes such as "Captain Americlean".
* Cartoon Network originals from the mid-2000s are known for these (normally during the credits):

* Cartoon Network produced were specifically to invoke this trope; create a large number of shorts and greenlight the ones with the greatest audience reaction.
* Cartoon Network's Central and Eastern European regional divisions used to be a complete mess up until the end of the 2000s. Early on, only certain shows ran with localized dubs and most of the channel remained English, including the late-night switch to TCM. The language of the commercials would rarely correspond to any given region, especially since many countries shared the same programming feed. Due to the lack of cooperation between dubbing studios and the in-house translators of the network itself, many cartoon series would be promoted under incorrect titles and ads, tie-in magazines and other promos would often use incorrect name translations for cartoon characters to the confusion of kids. Broadcast errors were rampant and lasted for years — the last few seconds of programming ads would regularly be cut off, not letting viewers know when shows would be aired, or they would only last for a couple seconds before switching over to a different ad. Even cartoons would sometimes be cut mid-broadcast. Certain series would inconsistently switch over to different language tracks, and some shows would
* Cartoon Network shorts, an old man drags his two grandkids away from a video game to tell them a rambling, nonsensical story about the time he defeated the aliens. Near the end, he starts trailing off; after a worried second, the girl asks if he's dead, and her brother responds that no, he just turned down Gramps' oxygen. Then they go off and play the video game while their grandfather slumbers away with the very real possibility that he'll suffocate because the selfish little brats wanted to play a game.
* Cartoon Network shows are usually released in boxsets in most countries, but Italy never gets all of them. For example, only the first and last seasons of
* Cartoon Network shows in Italy are always lacking in multiple formats.
* Cartoon Network shows that never came to be, see "Never got beyond pilot stage" below.
* Cartoon Network, sometimes a gigantic ad advertising the next show will literally cover the bottom 40% of the screen.
* Cartoon Network's spin-off channel Boomerang had a long-lived series of bumpers that used wind-up toys, toy movie-projectors, action figures and the like. This was replaced with more streamlined branding in 2015.
* Cartoon Network Starring. It also dropped the Toonami-themed issues as that block shifted its focus to anime properties DC didn't have the rights to.
* Cartoon Network stores", to which another character quickly responds "What's a record?"
* Cartoon Network story, "It's a Wonderful Strife", in which both T.C. and Officer Dibble, tired of putting up with each other, wish they'd never come to the city. The both of them are then shown alternate realities by their guardian angels, played respectively by Huckleberry Hound and Snagglepuss. Huck shows T.C. that, without guidance from a crafty leader, his gang has to resort to crime for sustenance, and Snagglepuss shows Dibble that if he never became a police officer, T.C. would be an anarchist bossing around the entire police force.
* Cartoon Network Super Secret Crisis War one-shot shows, Aku is planning to kill his comrades once they've served their purpose. Later one-shots show that the other villains plan to do this as well.
* Cartoon Network's US feed has a tradition of airing "Caramel Apples" on Valentine's Day when the episode itself takes place on Father's Day.
* Cartoon Network (the former of which Disney would later acquire) building up as strong rival studios. Disney would recover by the next decade by going back to their roots.
* Cartoon Network theme in disco, punk rock, country, metal, and techno.
* Cartoon Network the "My Superhero Movie" song was removed entirely, even in airings of the sing-along version. This might have confused some viewers, as some elements of it are referenced later on in the film. In addition, the Bat-Mobile movie trailer was cut from the scene with the joke trailers.
* Cartoon Network, though some bumpers called it the "City of Downtown".
* Cartoon Network, though there it's a type of goo fusing with the object.

* Cartoon Network to end, even though both of those series were deliberately ended by their creators.
* Cartoon Network used line "Fighting for truth, justice, and the last slice of pizza".
* Cartoon Network version called Miguzi. Whereas Toonami was set in deep space, Miguzi was set underwater. It only lasted 3 years compared to Toonami's combined 12 (and counting, again!)
* Cartoon Network voice cast. For ongoing series, this can reveal the existence of a character long before they were meant to be revealed.
* Cartoon Network), wallets in the shape of Finn's head, and so forth.
* Cartoon Network) was aired during these hours, which were as late as 6:30 AM for the east coast and as early as midnight for people living in Hawaii.
* Cartoon Network was featured in about half the possible media types and every type of merchandise, says a lot about it.
* Cartoon Network." When Jabberjaw is frightened by a giant robot he jumps into Clamhead's arms.
* Cartoon Network, where Golly temporarily turns Jimmy into a cartoon knight on a horse, to save Robin from being run over by a train.
* Cartoon Network, which advertises it more and airs it in more accessible time slots.
* Cartoon Network, which have significant numbers of characters in full-body puppets, but do not always meet the 50% mark.
* Cartoon Network (which only could belong on here due to sharing its slot with the aforementioned network, since it had third-party commercials and the breaks were in Dutch, but you could argue that it is extremer than that since most programs on the network were subbed and not dubbed). From 2011 onwards the network would take more initiative and air full-time in Dutch and with third-party commercials.
* Cartoon Network who is everyone on earth's uncle and grandpa travels in a flying RV with his friends — a wisecracking slice of pizza, a deadpan Godzilla-like lizard, a giant realistic flying tiger who farts rainbows, and a talking belly bag— to save kids from dangers such as talking mustaches and hot dog monsters. Good morning!
* Cartoon Network, with all of them usually having reruns aired as such:
* Cartoon Network years after its on-screen identity was changed to a white C on a black square and black N on a white square in 2004. The font (David Berlow's Eagle Bold) remains consistent between both, and has seen increased use on the channel outside of the logo.
* Cartoon Network) YELLING AND SCREAMING AND SHRIEKING AT THE TOPS OF THEIR LUNGS for their ident spots. Fortunately they at least don't amplify the volume further than the shows themselves already have.
* Cartoon octopuses and squids often have a siphon on each side of their heads as if they are ears. Real cephalopods only have a single siphon. In Japanese media they will have their siphon placed underneath their eyes as if it was some sort of tube-like mouth.
* Cartoon parrots, toucans, owls, woodpeckers, and cuckoos will always be drawn with feet that have three claws in the front and a fourth in the back, instead of two claws in the front and two in the back. Alternatively, they may have two toes in front and only one in the back (which is accurate at least for the three-toed woodpecker).
* cartoon physics. The test literally involved dumping two anvils on them, which they walked away from without a scratch.
* Cartoon Physics universe pretty much allows him to throw caution out the window.
* Cartoon Physics) will result in someone saying he's "all full of hot air".
* Cartoon Planet: According to the "Something 2 Think About: Change" skit, Brak owns a pair of briefs with "Kick Me" on the back, and willingly wears them himself. Apparently they were a gift from his mother.
* Cartoon Planet), Brak is also infamous for his bizarre songs, like "I'm driving down highway 40 in my pick-up truck" - which is just this line, repeated over and over in various ways - and naturally, a song dedicated to beans of all kinds.

* Cartoon Planet, Brak tricks Zorak into asking "What's a matta?". Zorak retaliates with "I'll tell you what's a-matta; somebody stole my henway!" and Brak falls for it.
* Cartoon Planet during the following conversation about network executives:
* Cartoon Planet, only to once again be removed from the schedule after 22 episodes. However, it came back a month afterward, just in time for the actual month of the anniversary, and ran for another two years with a total of 124 episodes.
* Cartoon Planet walk, it's usually with his legs out of frame, and otherwise movement is conveyed by just cutting to another setting.
* Cartoon praying mantises will always be drawn with their front legs ending at the sickle-like tibia, usually lacking the feet at the end.
* Cartoon rabbits and hares are usually drawn with noses shaped more like either cat noses and even dog noses than real rabbit noses, which are dry and slit-shaped.
* Cartoon reindeer are usually drawn with noses like dogs' noses. White-tailed deer, black-tailed deer, and mule deer may have noses that look somewhat like a dog's nose, but reindeer/caribou, moose, and elk noses look nothing like dog noses.
* Cartoon rhinos will sometimes appear to be Indian rhinos, with the single horn being as long as the front horn of an African species.
* Cartoon Saloon making a paltry $200,000 on a ten million euro budget (even if the pandemic hurt a lot). However, all four of their films have been very well received, and they are four for four in terms of Oscar nominations (even if they haven't won).
* Cartoons and comics from Japan. People actually enjoy these, apparently.
* "Cartoons and Vodka" fame) is one big love letter to popular cartoons past and present.
* cartoons are about soldiers who aren't allowed in the rear because they don't look soldierly enough. "It's either enemy or off-limits."
* cartoons are a modern example pertaining to the Nagorno-Karabakh War (caution: they're likely to offend you if you're from Azerbaijan).
* Cartoons' cover of "Witch Doctor" is starting to become more recognisable than the original by
* Cartoon sheep, goats, mongooses, toads, and octopi usually have humanlike eyes, rather than the creepy horizontal pupils they have in real life.
* cartoon shows two men standing at the upper-story window of a patent office, one of them holding a futuristic gun which is plugged into a wall socket. The caption reads: "Death ray, fiddlesticks! Why, it doesn't even slow them up."
* Cartoons in general. Why else would a person draw and show off pictures of
* "Cartoons in Wakko's Body": the camera zooms into Wakko's eye when Wakko has a cartoon stuck in his eye.
* Cartoons that criticize lenient policies towards Islamic terrorism portray the terrorists as angry Arab men with beards and bombs. Anti-Islamophobia cartoons usually use women and children to represent innocent Muslims; the cartoonists who make the latter usually use the flag of ISIS rather than a caricature of the terrorists to symbolize the group.
* Cartoon Sushi: Done to three characters in the "Robin" short "The Film Buff".
* cartoon. They get a bit better by the time the football based sequel comes around.
* cartoon, they tolerate Clash being around, however they still don't consider her Misfits material.
* Cartoon Throbbing: A character's body part gets injured, turns red, and starts swelling and expanding.
* cartoon version; he genuinely adores her and will (however reluctantly) behave himself if she asks.
* "CarToon Wars" setting. The Twisted Ridge Mall had stores such as B. Dulltoon Books (B. Dalton Books), Spacy's Department Store (Macy's), Frederick's of Hollyweird (Frederick's of Hollywood), Z-Mart (K-Mart) and Toonited Artists (United Artists).
* cartoon. When he proposes to the other monkeys that Chiro stop hanging out with

his new friend Isomer, he tries to spin his intentions as concern for his adopted son's well-being, but it's made very clear that he's lying, and in truth, he's just as jealous as the other monkeys that Chiro is spending time with someone who isn't them.
* Carto says there won't be an eruption today, which surely means there won't be an eruption. (There's an eruption.)
* Cartouche, about a famous French highwayman of the early 18th century.
* Cartouche, loosely based on the life of the titular French highwayman (see below in "Folklore").
* Carto. When someone comes of age on the Island, a ship appears for them at the north dock. They must take this ship, sail to a new island, and make their new home there, never returning. It later comes out that this is to help everyone's peace of mind - if the parents know that their child is never returning, they won't worry why they don't show up. Before this rule was put in place, there were cases where people shipwrecked while trying to visit home.
* cartridges for its obsolete caliber. Thus, some extras wound up with anachronistic Lee-Enfield Mk I bolt-action rifles with the telltale magazine removed instead.
* Carts of Darkness follows homeless men who race shopping carts down steep hills and busy streets.
* Cartwright Curse: A character's love interests have a high mortality rate, through no fault of their own.
* Cartwright Curse: Relationships that might change a character's romantic status quo don't last.
* Cartwright, Goldsmith, Shoemaker, Wainwright and other names indicating specialized craftsmen. Even more than you might think; a lot of last names are from professions that either no longer exist or are at least much less common than they used to be. Some examples are Cooper (a person who makes barrels) and Chandler (candle-maker). If a surname in English ends in -er there's a good chance that it's this. And some are even more obscure—a "
* Cartwright's Cavaliers, one of Jim Cartwright's new employees assumes he's gay because he's rarely dated women. Jim finally becomes irritated enough to correct him that he likes girls, "I just haven't found one that likes me back." (This is mainly because he's severely overweight.)
* Car Tycoon was literally Christmas Rushed for Christmas 2001. It ended up not simply having a few bugs, but being borderline unplayable, something that even two bugfixes couldn't repair. For example, the cars sold by the four companies clogged the streets to the point of total gridlocks so it became impossible to even deliver new cars to the stores because the number of cars in the game, their lifespan, and the overall length of the streets were badly balanced. And if new cars couldn't get to the stores, they couldn't be sold, and you didn't make any money anymore.
* Carved Mark: Someone carves a pattern or words into themselves or another person's body.
* Carver also shares a mutual attraction with Isabela, which leads to a funny reaction from Hawke when Isabela gets turned on by Carver's flirtation.
* Carver: Bobby Shaw's passion, though he is also fine with killing people sans camera.
* Carver starts beating Bodie, prompting "Bad Cop" Herc to rush in and stop him.
* Carver was once the leader of the Red Eagles, considered the greatest Sky Knight squadron since the original Storm Hawks, and a national hero with legions of fans. He was so respected that his team had the honor of being the guardians of Terra Atmosia, the bureaucratic center of the free terras and home base of the Sky Knight Council and the powerful
* carves her body with a chisel to make her "look beautiful" and be worthy of his love, while repeatedly telling her that she's ugly and he can't love ugly things. And this is not counting all of the hints that he sexually abused Yuri as well.
* Car Wars: A common piece of advice to new players was to never attack a station wagon. Said cars normally had several kids with years of video game experience manning the guns.

* Car Wars. A duelist can arrange to have Gold Cross grow a clone from his cells and store a copy of his mind. If he dies, his mind is downloaded into the clone and the player continues to use the character.
* Car Wars are captured they're taken to Blob, the mutants' leader, who explains his plans to use braintape technology to put the mutants' minds into the brains of human beings.
* Car Wars. Autoduelists store their memories on a machine and have clone bodies made. If they die in the arena, their memories are "played back" into their clone and they live again (well, sort of).
* Car Wars: Autoduel Quarterly magazine Vol. 7 #2 adventure "Mutant Zone". Hanger A in the Air Force base is home to a giant mutant scorpion, the victim of a biotoxin spill.
* Car Wars. A vehicle-mounted flamethrower could burst into flames and explode if hit by weapons fire.
* Car Wars. Big rig trucks are often armed with extensive weaponry in case they're attacked by bandits or have to engage in autodueling.
* Car Wars Book calls out lasers as being not used in the military except for things like range finding and detecting.
* Car Wars. Death is expensive—you have to buy your clone for $5000 at Gold Cross.
* Car Wars: Deluxe Edtion box set includes a building labeled "Law Firm of Dewey, Cheatum & Howe."
* Car Wars had this as a limitation on most pedestrians' weapons; after all, if a car is built to handle a few seconds of 7.62mm machinegun fire, it likely won't be as hurt by, say, a 9mm handgun. There were a few pedestrian weapons that were effective on cars, though; notably, the axe and hatchet, for those who felt like going into melee.
* Car Wars have this as an optional extra. For a little extra, it can be ON FIRE.
* Car Wars of easy oil scenario. Texas, Louisiana, and Oklahoma fall away to become a spirited republic called "the Free Oil States" (convenient for the Austin-based Jackson), a theocracy, and a corporate plutocracy. Utah tries breaking away as well. Quebec makes a run for it from Canada, too.
* Car Wars said "Using a nuke ends the game". The standard play maps used were 2x3 feet or so, and the smallest available nuke would destroy five maps in all directions, damage which no car would survive.
* Car Wars the "confetti" rule specifically exists describing the effects of a car being hit for massive damage: the car is removed from the map, a quantity of debris counters proportional to the car's weight are selected, and the counters are dropped from a given height over the former position of the car.
* Car Wars uses processed, flavored algae as its major source of food.
* Car Wash mother drive her convertible Mercedes-Benz into the car wash because her grade-school son puked on the side door. She wants the stuff washed off before the finish is damaged. The staff obliges and soon has her car in pristine condition. After driving away, the boy says that he needs to hurl; the mother forbids him to ruin her paint job, so the poor kid vomits into her lap instead. Scratch one Halston dress.
* Car Wash working at a Los Angeles car wash - most of whom are black.
* car which he drove into the water thinking about the pain of losing his beloved.
* Cary Bates and Mike Grell, who worked on the book in the 1970s, both despised the character of Tyroc, as his creation was the result of
* Cary Elwes not to play Westley, but his old character's nemesis, Prince Humperdinck. Wielding a Swiffer Sweeper as his "sword".
* Cary Grant. He only took the role after the writer gave all the romantically aggressive lines to Hepburn's character, so he wouldn't look like a predator.
* Caryl Chessman defended himself in his 1948 trial for kidnapping and, upon conviction, the judge complimented him on his legal skills before sending him to the
* Caryl Chessman's last execution stay came late because the secretary misdialed the prison phone number.

* Caryn Earle (Peters neighbor while he lived in New Jersey) briefly dated Peter until MJ return officially in his life. After, she disappears and is never mentioned.
* "Casaba-howitzer" devices are effectively focused nuclear explosions... a one-shot brief pulse of 50000K plasma reaching over a relatively short range. A bit like a plasma weapon, but both more powerful and less useful than fictional plasma weapons.
* Casabianca, about a loyal cabin boy who stayed on a burning warship until it exploded because he waited for his father to relieve him of duty without knowing he had died, has many times been interpreted as a warning against blindly obeying your parents.
* Casabianca: "The boy stood on the burning deck/Whence all but he had fled..."
* Casablanca also have ideas and ones that Lazlo is kinda, you know, trying to kill.
* Casablanca, although this is a case where the guy could have the girl but gives her up.
* Casablanca, a Luftwaffe officer flies to Morocco in a Fokker Super Universal instead of a Junkers Ju 52, as the latter was only available in Germany during World War II. After the war, many working Ju 52s became available for period films.
* Casablanca - and the main character is the American expatriate who runs the local nightclub.
* Casablanca and war drama, though the romance portion tends to be remembered the most.
* Casablanca at first, but he proves himself just as willing to bend the truth and turn a blind eye to the law for the good guys' sake.
* Casablanca, but diverges from its canon by having Strasser and Heinz already present in Casablanca before the timeline of the film.
* Casablanca, but they merely create the situation that makes the story necessary (without the Nazis, Laszlo wouldn't have been taken to a concentration camp, meaning Ilsa wouldn't have gone to Paris and met Rick, etc., etc., etc.)
* Casablanca ends with Rick and Captain Renault going off to join up with the Free French in Brazzaville to continue to help the fight against the Nazis.
* Casablanca, from the 1980s, was a standalone series which only lasted five episodes.
* Casablanca have this sort of tryst after Ilsa's husband Victor is presumed dead. She leaves Rick after Victor turns up alive, but much of the film is concerned with her being torn between the two of them.
* Casablanca; in the series, he has a much more reserved demeanor and is never used for comedy at all.
* Casablanca isn't set in the American South, and Signor Ferrari is a suave Italian, but he otherwise fits the description quite well.
* Casablanca: Major Heinrich Strasser seeks to capture an anti-Nazi resistance leader.
* Casablanca. Many of the actors, including that woman, were forced to flee Europe due to the German invasion. The emotion in that scene was not faked.
* Casablanca (on which the show drew some inspiration), his exact crime is never revealed but his reputation is so infamous that, when he's exiled, he chooses to live on DS9 because, as Sisko once observes, for a man in trouble with the highest levels of the Cardassian government, a Bajoran-owned, Federation-controlled region is very probably the safest place in the entire Alpha Quadrant for him to live. The Star Trek Expanded Universe novel "A Stitch in Time" explores the reasons for his exile in more detail.
* Casablanca productions. Also, for the Paris flashback, the set used as a Casablanca street was redressed to become a Parisian street.
* Casablanca put it, any confusion Bergman would have had was "emotional", not "factual".
* Casablanca revealed, we still don't know why (and exactly when) he left America or why he can't return.
* Casablanca Rick and his lover, Ilsa, were supposed to meet at the train station

to get out of Paris before the Nazis arrived; instead, she sent a letter explaining that she couldn't be with him, for unexplained reasons. Years later they meet in Casablanca and she explains that she had returned to her husband, Victor, whom she had believed dead before getting together with Rick.
* Casablanca, Rick and Ilsa don't get back together despite loving each other deeply because Ilsa is married to another man and Rick knows that Ilsa staying with her husband is the right thing to do.
* Casablanca, Rick's Cafe hosts the Vichy French and the richest of the refugees at Rick's Cafe trying to gamble and drink while the war goes on elsewhere. Then some Nazi Officers and a Czech freedom fighter are thrown into the mix...
* Casablanca. Rick tells Captain Renault his men were so thorough in searching for the letters of transit that the staff just barely got the mess cleaned up in time to open that night.
* Casablanca runs gambling openly, but it is technically illegal- Renault the police chief is "shocked, shocked" to find gambling is going on- right before being presented with his usual winnings.
* Casablanca's Victor Laszlo has a classic Good Scar: a thin, dark line crossing right eyebrow.
* Casablanca: The French partisans (and their counterparts from the rest of Occupied Europe). Their singing of "La Marseillaise" (which provides the page quote).
* Casablanca. Their idea of learning English is just to just translate every word literally with a pocket dictionary.
* Casablanca - There is a restaurant named Rick's in Casablanca, Morocco.
* Casablanca uses brief stock clips (probably from newsreels) during the opening "refugee trail" montage, and again during the invasion of France. The latter, especially, are noticeably specklier than the rest of the film.
* Casablanca was banned due to its portrayal of the Nazis infringing on an act preserving wartime neutrality. A cut version removing dialogue about Rick and Ilsa's love affair was eventually passed, before the movie was released uncut.
* Casablanca was released in the middle of a long recording strike, radio stations were forced to turn to older recordings of the song.)
* Casablanca with a grenade, when Ilsa drops out of the plane with a parachute and lands on the piano, trapping Hitler inside when the grenade goes off.
* Casa del Fascio, but it's actually rather telling; fascism, despite its right-wing associations, considered itself a revolutionary movement, while Stalinist socialism was often culturally regressive.
* Casagrandes to live out the experience he didn't get to have due to him running the family's mercado as a kid. When he shows Ronnie Anne's class the Casagrande Family Tree, he humiliates Ronnie Anne with a photo of her as a baby wearing a dirty diaper.
* Casanova and Co (AKA Some Like it Cool) features a strip dice game between a group of well-to-do ladies and gentlemen, and the hero Tony Curtis (yes that one!). All the ladies end up naked.
* Casanova did not get the girl. The Hollywood version cheapens the story with a tacked-on happy ending.
* Casanova, Francesca Bruni sets a trap for Casanova by inserting a line in a Bernardo Guardi pamphlet about how a pig is the best pet for a man who actually respects women. When Casanova promptly shows up at Francesca's house with a pig, the maid meets him at the door, and says:
* Casanova Giacamo Casanova seduced a novice (essentially a nun in training). When other members of the church come in to try and find him, he's escaped, but they find a man's shoe under the novice's bed. They turn to her and say, "Eternal damnation for one night with Casanova." The novice turns around and mutters to herself, "Seems fair."
* Casanova, Giovanni tries to challenge Casanova this way but for a variety of reasons, Casanova isn't keen on the idea... until his servant forces his hand by slapping Giovanni back.
* Casanova is Martini and Absinthe. Psychic duels, paratime shenanigans, hidden

ultra-advanced civilizations and helicasinos for the win.
* Casanovas an added edge. Generally, they give a mutual benefit to each other by highlighting each others' strengths, as well as ensuring that neither are completely alone.
* Casanova starring Heath Ledger, where it turns out the papal messenger is a fake, and when the authorities find this out, all the main characters are obliged to make a run for it.
* Casanova, to play Angelina the giantess. Casanova gets attracted to her for a little while, though without attempting anything to woo/bed her.
* Casanova Wannabe: A man who wants to have sex with every female he meets, but is too tacky and/or unattractive to actually succeed.
* Casanova Wannabe: A man who wants to score with a lot of women, but never succeeds in charming any of them.
* Casanova Wannabe and dragged him away while laughing. He was also willing to back off if the girl in question was willing to reciprocate Brock's feelings, while May and Max rarely gave Brock a chance to see if she was interested.
* Casanova Wannabe: A would-be womanizer who thinks they're great with the ladies, but are anything but.
* Casanova Wannabe depending on how unattractive and tacky we're talking here.)
* Casanova Wannabe has one, where he's bringing a woman to orgasm. How the hell did he manage to make her agree with that?!
* Casanova Wannabe". In the remake Carlos is incredibly professional and while he’s not above flirting with Jill he’s still quite respectful and admiring of her. His attitude towards Umbrella is different when he learns Jill was completely right about them and is ashamed of himself and the fact Jill trusted him regardless.
* Casanova Wannabe made Jon and Liz a couple, the strip followed suit, with Liz now having much more positive interactions with Jon, Garfield, and even Odie.
* Casanova Wannabe Prince Wu. Mako doesn't make a secret of how annoying this is and takes some getting used to the whole idea.
* Casanova Wannabe's "There She Goes" ends up settling for after his multiple failures in dating.
* Casanova Wannabe who constantly harasses the female guards. Everyone agrees his chances of sharing Luna's bed are zero.
* Casanova who does his best to steal (sometimes successfully) a girl's virginity from the guy she should really be with.
* Casanova who goes around seducing human women, and carries around a pipe, which can be a big clue as to his identity. However, it is said to be extremely unlucky to meet him, and the women he seduces will fight to the death for his affection.
* Casanova who serially dated in the first few seasons. However, he genuinely wanted a steady relationship, and repeatedly tried with Diane and Rebecca to settle down. After being dumped in one episode, he falls off the wagon and runs around with a young woman; Coach seems genuinely upset by both, indicating that Sam did this a lot more often when he drank. Eventually, Sam even admitted that he had become a sex addict, and actively sought therapy to help cure his illness.
* Casanunda to defend Nanny Ogg (who didn't really need defending, but that's beside the point).
* Casca also gains a number of small scars from her battles in the series. During
* Cascada Remix" on the end was done by the group themselves. Most of them had at least one of the DJ-producers from Cascada remix them, but they are not sung by the singer, Natalie Horler. For example, "Piece of Heaven" by Akira.
* Cascada song, "Everytime We Touch", is known by a good majority of America. Not nearly as many know it was by Maggie Reilly. Cascada only used the chorus of the song; bands such as Trixiana, Lacara, and Trinity have done full covers of the song that are not nearly as prolific.
* Casca, despite her degraded mental state Casca still retains some of her skills, as she butchers three rapists in mere seconds before Guts finds her.
* Cascade: This is normal juggling as it is taught to the beginner, with each hand tossing the prop to the other, each throw alternately crossing in front of the

chest of the juggler.
* Cascadia is more of a thought experiment than an actual effort to secede, but this is a reformation of Oregon, Washington, and British Columbia (and sometimes Northern California) from their governments into a separate, socially liberal, environmentalist nation. There's a website for the Cascadian independence party
* Casca, for her part, is a World Class beauty, particularly in her post-Eclipse
* Casca gave quite a few of these during her career as a mercenary commander, though more as to rally the troops than out of rage or bloodlust. However, Casca gave an
* Casca has medium brown skin, straight black hair, and a face type that's pretty unclear about her origins. For years fans have been arguing with each other over whether she's supposed to be black, Arab, East Indian, Southern European, mixed, or just about any other real-life brown race you can think of.
* Casca is also seen crying after their first time, most profoundly in the movie adaptation
* Casca. Not only does he rape her right in front of the man she loves (which is traumatic enough already), but because she has the Brand of Sacrifice and is as close as anyone can possibly get to a member of the Godhand.
* Casca's healing commences and Schierke and Farnese are in Casca's inner world, they eventually come across the memory of Casca having sex with Guts, and Farnese quickly covers Schierke's eyes so she won't see.
* Casca: The Eternal Mercenary has this built right in. Casca can't die, or even be maimed, until Jesus comes back. Thus, he manages to survive many deaths over the course of the series, up to and including drowning and reviving uncountable times in an underground river and having his beating heart cut out of his chest in a ritual sacrifice.
* Casca: The Eternal Mercenary is about an immortal Roman soldier once known as Casca Rufio Longinus, who's fought in virtually every major war since he stabbed Jesus on the cross. He inspired the Aztec god Quetzalcoatl, and returned to Mexico as one of Cortez's conquistadors, and shot Hitler.
* Casca: The Eternal Mercenary series by Barry Sadler, Casca is the Roman soldier who stabbed Jesus in the side with a spear. Christ dooms Casca to walk the Earth until his second coming. Casca busies himself during this time be being involved in numerous wars and adventures throughout history.
* Casca: The Eternal Mercenary was originally Casca Rufio Longinus, the Roman soldier who stabbed Jesus in the side, for which he got cursed with immortality. Later he went to central America and inspired the Aztec god Quetzalcoatl, and came back centuries later as an anonymous soldier under Cortez (who was mistaken for Quetzalcoatl).
* Casca to the Band of the Hawk when they're transported to the Vortex during the Eclipse.
* Casca wields a smallish longsword whose size (if not style) bears a resemblance to Griffith's rapier; she has a serious case of hero-worship for Griffith. The weapon's light weight makes it perfect for her
* Case 02: Paranormal Evil by leaving hints about bosses. This also makes Brucie's subtle encouragement towards Marty come off as pragmatic, since he's betting money on Marty's success.
* Case 02: Paranormal Evil: Marty bonds with Sally because she constantly brought lucky clovers to his comatose body, despite them being complete strangers to each other. Due to this, he's willing to fight a zombie and cultist army in order to prevent her from being used as Gla'aki's vessel.
* Case 15:Out of Steam Luddite, considering how he murdered Orville due to believing that people flying with technology would equal to the end of the world.
* Case 2, Man vs. Mold. Upon being told that her plaintiff (Trent) had been convicted for attempted murder before:
* Case 39, after Emily has climbed out of the water, we hear the sound of approaching police sirens right before the credits start rolling.
* case 3 and 6, which are entirely solvable before the court session begins.
* Case 3 has a big one, and of the "family relationship" type. Dhurke, the leader

of the rebels in Khura'in, has two sons: Nahyuta Sahdmadhi (yes, that jerk prosecutor you've faced) and Apollo Justice (though only adopted).
* Case 4 ends with a major one, because a piece of evidence that proves your client is innocent incriminates someone else dear to you:
* Case 4 of the second game plays with this. An assassin committed the murder, so you're looking for the one who hired him. Besides the assassin and the defendant, Adrian Andrews is the only non-recurring character in the case. Sure enough, when put on the stand her story has numerous holes. The twist is
* Case 53's are an interesting example. They experienced extreme and permanent physical changes, such as becoming semi-organic metal, or their body being almost entirely composed of oily black tentacles. The majority of them also still see themselves as human, but the media and other capes are often less inclined to do so.
* Case 5 is built on the premise of no one being able to ascertain if the victim is Kaito or Kokichi. Problem is, the game pushes repeatedly the idea that Kaito was the victim so hard, that anyone would instantly be able to guess that the game is pulling a fast one and that Kokichi was the real victim, especially since while Kaito's coat is conspicuously sticking out of the mechanic press, while Kokichi's uniform has been flushed down the toilet. Now, why would that be, unless they were trying to hide something?
* case 5 of Trials and Tribulations. So basically the protagonist is always the world's straight man.
* Case 5 starts with Apollo and Trucy watching the television, where they are talking about the Defiant Dragons's leader Dhurke. After some lines, said rebellion leader is walking through the door, happily greeting Apollo.
* Casebook Trilogy on the second case one of the clues is a matchbook for an Irish pub. In England. So the chances of anyone else having one are very rare.
* Case Closed. About 5% are just bad people who want to boast about it anyway.
* Case Closed a few times such as the episode titled Which One's Reasoning Show.
* Case Closed, as a mystery series, sometimes plays the trope straight:
* Case Closed. Children are invited to play a virtual reality video game where if they all get a game over they die in real-life.
* Case Closed: Considering this show is about a kid, it's wrong or at least weird in many ways. Conan/Kudo's caretaker Mouri Kogorou is the worst offender, often more interested in womanizing than in actually doing his job. His rival Hattori also ogles girls whenever swimsuits are involved. Even Conan/Kudo isn't immune to this, although he mostly lusts after Ran.
* Case Closed despite the massive length of the series (over 800 episodes).
* Case Closed / Detective Conan giving up on the series after it underperformed on TV and video, also considering the apparent high costs of the license.
* Case Closed detective in the series), even though he is invariably the one solving his cases for him.
* Case Closed, disclosing details about family drama that other family members don't want or can't reveal to outsiders and pesky detectives.
* Case Closed embarrass and annoy him to no end with their eccentric personalities and antics. Both parents possess a flair for dramatic pranks, but expertly portray them as life-or-death situations, understandably terrifying and aggravating Conan. Mildly subverted because they can't acknowledge him (Conan) as their child in public situations.
* Case Closed, even they find themselves getting steadily picked off one by one as the game goes on.
* Case Closed features a baseball episode at least once which involves the culprit of the week planning his attack depending on the game's outcome.
* Case Closed features several examples of this trope, and often as proofs in the cases to solve:
* Case Closed gives her his blazer, then Mitsuhiko realizes that, as a guy, he needs to do something similar, and gives his jacket to Haibara Ai, then Genta, not wishing to be the only guy not doing this, gives his jacket to Ran.
* Case Closed has 84 volumes of manga (each about an hour and a half of solid

reading) and about 900 episodes in the anime. (Much fewer have been dubbed, however.) And the series is still ongoing.
* Case Closed has a flashback episode which Kaitou Kid encounters Shinchi Kudo. Kaitou Kid disguised himself as a regular police officer to try and steal the clocktower. The police department know Kaitou Kid is a master of disguise so they ask everyone their name and badge number. When Kaitou Kid is questioned, he gives the person's name and badge number, then the officer ask what their ID number is, which Kaitou Kid gives correctly, and that tips officers that he is Kaitou Kid. Shinichi told the officers to ask for the ID number as most people do not know their ID numbers and figured Kaitou Kid would answer the question.
* Case Closed has an e-mail address with a "#", which the author points out as invalid on the first page where we see it.
* Case Closed has a specific set-up for anime episodes: after the ED with the credits, there is a stinger - a preview of the next episode if a multi-parter is continued, or a funny scene happening right after the scenes ending the current episode otherwise, then a 'Next Conan Hint' giving a—usually not spoilery—hint on to events of the next episode and finally a shot of the main protagonists with a voice-over with usually an atrocious pun, exhorting the viewer not to miss the next episode. The movies usually also have a joke scene conclusion after the credits.
* Case Closed has over 900 chapters, spawned 20 movies, almost 800 anime episodes, over 10 OVA specials, and much much more. It has a huge following in Japan, with a statue of the main character in the author's hometown.
* Case Closed has quite a few of these haunting the police department:
* Case Closed has to do this from time to time by virtue of having a cape that turns into a hang glider. In movie 8, Conan uses it against Kid.
* Case Closed have fairly normal-looking hair, Ran Mouri (Rachel Moore) has a spike of it jutting out above her forehead.
* Case Closed. He doesn't need the glasses to see, but he fakes this anyway to keep his identity secret. The dub made it one step further by making him say he has retinitis pigmentosa.
* Case Closed in Ran's part) trying to tell him something. Shinichi was able to convince her to let go, because he told her he knew what she wanted to say, because he wants to tell her the exact same thing.
* Case Closed is about to die in the line of duty, this trope doesn't come up.
* Case Closed is a former member of the criminal organization Conan is hunting and creator of the drug that shrank both him and herself to the size of first grade schoolchildren and killed everyone else it was used on. She's introduced still reeling from the death of her older sister early in the story and guilt over the creation of the drug, making her standoffish and reclusive. Her time as Haibara gradually opens her up, as she reciprocates the friendship of her classmates, even allowing Ayumi to use her first name, becoming a more active participant in their games when she had always given a hard pass before, and overall becoming a happier, if not necessarily cheerful, person than she started as.
* Case Closed is, as of the end of 2019, at 97 books and 1036 collected chapters (uncollected chapters bring it over 1040 total, with the 300th case underway), although if you removed all the cases which don't progress the main or side plots, the numbers would likely be closer to 20 and 250.
* Case Closed is because she has Conan around to share the same situation.
* Case Closed is completely unfazed by witnessing grisly murder scenes almost every day. Even bystanders and single-arc characters who would logically be less desensitized to trauma have often just lost someone and tend to describe horrific personal events with uniform slightly worried faces.
* Case Closed is the latest one to get a manga adaption as of far. They're type 1.
* Case Closed, ketchup is used as fake blood to bluff someone watching via surveillance cameras. There is also a scene where Haibura mistakes spilled tomato juice for blood, resulting in her thinking that Professor Agasa was killed.
* Case Closed, Kogoro Mouri will filrt with every cute girl and beauty except his wife, or anyone who looks like her, much to Sonoko's wonder. Mouri sometimes

becomes cooler and more perceptive when he meets someone that reminds him of Eri.
* Case Closed like an attempt to mask the gunshot with fireworks; it was an elaborate ruse to confuse people as to when exactly the murder happened.
* Case Closed manga still have "based on the hit anime" on them, when really, the manga (47 volumes and still translating) beats the anime (5 seasons and 6 movies). That's for the English version though - the Japanese anime is pretty much around the same area as the manga.
* Case Closed: More often than not, clues of this type are faked by the suspect for alibis, but Conan had several close calls because Gin noticed signs that somebody was nearby and insisted on checking things out just to make sure.
* Case Closed" Mouri Kogoro witness their crime, so confident are they that they can have the "Great Detective" himself provide them with a foolproof alibi. (And usually, they would be right too, even with Conan on the job, save for some completely coincidental bit of bad luck that provides the crucial evidence necessary to link them to it.)
* Case Closed mystery had the dying message "△╳◯" on the back of an envelope; further forensic evidence revealed a fourth symbol, "☐", but it also turns out that the victim had tried to write a name and the top half of the name had been ripped from his hands by the murderer.
* Case Closed. Non-Japanese-speaking readers may also be left unable to put together some of the clues that rely on Japanese wordplay.
* Case Closed. Oh, and she looks just like any other waif-ish high school girl.
* Case Closed results in Haibara's sweater unraveling until she's down to her underwear, while trapped in a freezing cold delivery truck.
* Case Closed, Richard is handed a coat check key marked "96" and idly remarks, "That's almost my favorite number."
* Case Closed's black-clothed organization, who are responsible for turning Shinichi into what he is now. Though they seem to be a very small criminal gang, they are extraordinarily powerful, mainly because the world at large doesn't even know they exist. They basically live off of this trope, committing crimes by blackmailing others into doing it for them, killing those who learn of their existence and anybody they might possibly have contacted, and even killing members whom they consider even a potential threat. Many of their members even wear black outfits and shades (when not in disguise)! It is implied the organization is at least somewhat larger than what we see (how large is anyone's guess) and that the main foes are in fact several of the top ranking members that report directly to the boss. Also, they are always in disguise, because their very existence is a secret to the world and they want to keep it that way.
* Case Closed sees plenty use of this trope. A particularly good example is from the first Case Closed movie, in which Conan tells the suspect that he found the disguise he used while conducting his bombings. (He actually made it himself out of stuff he found in the room.) The bluff succeeds and the suspect says "But I left those in the study." Oops.
* Case Closed's "Ghost Ship" case, Kogoro goes to give some lectures on an island. When the people who invited him appear dead, all the hints point to Kogoro, so Conan has to help him clear his name.
* Case Closed shows, and went all out with a big marketing campaign for the series' premiere on Adult Swim. Unfortunately, only about 50 episodes were shown (most of which were in the graveyard time slot) before the plug was pulled. FUNimation made many attempts to resume the series on home video, but only got to episode 130 before calling it quits. They did release six of the theatrical films, which they said sold better than the TV series, and were considering picking up more. However, the series has remained dead in the U.S. despite having a very loyal following and good critical reception from those who have seen the show. However, Viz has continued to publish the manga, though many of the earlier volumes have fallen out of print. Its own popularity in Japan makes it more difficult than most anime to make money overseas because of the higher licensing fees. There's also its questionable target audience. The show is seen as too dark, wordy, and boring for kids, while being too childish and silly for adult audiences, making it very

difficult to market in the U.S.
* Case Closed (snow woman) is discussed by Shinichi's father as a subtle clue as to how the murderer set up the crime scene so he could have an apparently air-tight alibi. In his version of the story, a man unwittingly picks up a yuki onna on his way home, and though she was intending to freeze him to death, his concern for her causes her to melt instead.
* Case Closed Sometimes, when Conan figures out the crime, the background goes black and a lightning-esque thing flashes behind him.
* Case Closed. Things like, "I have an alibi for 8 to 9 pm!" "How did you know when the victim died?"
* Case Closed, whenever Conan and Heiji get to work together in a case they will often finish each other's deductions, demonstrating not only abilities as detectives, but also their familiarity with each other.
* Case Closed, which has actual supernatural elements much better attested, even if Kid never uses such things himself.
* Case Closed, which has at least two mysteries surrounding old houses and the secret passage(s) therein.
* Case Closed, who developed a drug with those serial numbers that they used as a poison and subsequently dubbed it "the Experimental Detective." In a twist of irony, their first human test subject for the 4869 batch was, by complete coincidence, Kudou Shinichi.
* Case Closed, with people hiring Kogoro to prove that they didn't do something they've been accused of. Sometimes they're innocent, sometimes... well, they're not.
* Case Files stories when Beth goes missing, and she suspects Alan knows more than he's letting on. She asks if Beth took a specific type of medication. When Alan says yes, Nancy realises he's bullshitting because Beth is allergic to said medication, and taking it could kill her. Alan is forced to come clean.
* case four of Ace Attorney Investigations, she carries a riding crop instead. You really have to wonder about her home life.
* case, if you're not too worried about the instrument inside - it hurts plenty to be hit in the head with a flute case.
* Case in point, a big snowstorm caused a major panic in 2014... because it happened in early September, when the trees still hadn't lost their leaves, meaning big branches or even entire trees were falling all over the place.
* Case in point: A poor man with lots and lots of debts with no way to repay made a
* Case in point: at one point, Raoh comes across his men massacring helpless villagers. He has them all line up and kneel before him...and then
* Case in point: a yuppie intellectual couple spends several decades debating whether or not to have a child until the husband dies without impregnating his wife. Meanwhile, a dimwitted redneck has
* Case in point: He's willing to become Lyra the Savage She-Hulk's "love slave".
* Case in point: "Interesting! Then... Anti-Spiral... Giga... DRRRIILLLL.... BREEEEAAAAAKKKKAAAAA!!!!!"
* Case in point. Made even worse when the dolls start getting on in years, and the sound units start suffering from the usual age-related degradation, which can result in the voice becoming even more distorted or even skipping between different lines.
* Case in point: "No little girl will shed a tear on my watch!" from "What Goes Around."
* Case in point, theme, entirely made from pitch-shifted tape loops of rubber band noises and test tones.
* Case in point: The song "Megalodon". Opening with a strange jazzy section, then metal, then a country lick out of nowhere, and then different metal. In the first minute and a half of a four minute long song.
* Case in point, Venus/Aphrodite's origin story. Was she the daughter of Jupiter/Zeus? Or was she born from the sea foam from when Ouranos/Uranus's testicle fell into the sea, long before Zeus was conceived? One of the stranger explanations

is "both": the one born from Ouranos is Aphrodite Ourania, who governs
* Case in point: when the Sisterhood hack into the Fembot factory, they cause all of the Fembots inside to revolt against the staff working there and attack them. Later, another Fembot who's gained sentience comes across the abandoned factory and finds that the Fembots there had been destroyed. This is treated as a tragedy...except all of the blame is put on the Patriarchy. It's never once acknowledged that the Sisterhood, whatever their intentions may have been, are directly responsible for the violence that occurred there.
* case in the UK where twins who were separated at birth got married without realizing they were related. They had the marriage annulled after they discovered the truth.
* Case of the Missing Hare (1942), when Ala Bahma notices the "boy" is really Bugs Bunny in disguise, Bugs flees leaving the disguise behind.
* case of this news story not to laugh after seeing the crazy-eyed picture of the accused murderer. This one must have been particularly embarrassing for the anchor, who started giggling at his picture while describing how he dismembered his victim.
* Case Orange," designed to go off in case their president and most of the government is believed dead or missing. She is the only government official that responds and becomes the new president of the Colonies by default.
* case report describes an attempt to try this using a method similar to the one described in A Return to Thorn Bridge. Unfortunately for the man, the rope wound up getting caught on a drainage opening, causing police to realize what had happened.
* Cases 1-2, 1-3, and 1-4 all feature Phoenix making the exact same mistake:
* Cases can also be made for Geoffrey St John and Mina Mongoose, both introduced to introduce more love triangles and be rivals for Sally and Sonic's affections.
* Cases like this are the reason most competent lawyers will press any witness who answers a "yes or no" question with anything other than "yes" or "no".
* Cases of the 1st Department and he doesn't join the 1st department permanently. However, he was considered to replace Petr Andel who is a much better and much more experienced policeman.
* Cases of the 1st Department episode "48 Hours", Capt. Martin Prazak arrests a suspect even though he was instructed only to follow him and find out his identity. However, Prazak knew that he was about to attack his next victim, a frail old guy who has just collected his monthly pension from the post office. The suspect has no ID and refuses to speak. His fingerprints are not in the Czech database. They can hold him only for two days without telling him the charges and they have in fact less than 48 hours because they lost some time in transporting him to the station and they have to prepare his release with a public prosecutor in advance. Their only lead is a train ticket from Kladno to Prague and the fact that he might be a foreigner from eastern Europe as he "might have hissed something in Russian or Slovak" when he was being arrested.
* Cases of the 1st Department, major Vaclav Plisek's desk at work is always disorganized and messy. Major Tomas Kozak often tries to convince him to clean it, especially if Plisek can't find important papers or his glasses. In the episode "A Policeman to Gun Down", they have to look through a suspect's garbage. Kozak comes later and jokes that he's pleased that Plisek decided to clean up. Surprisingly, Plisek's home is clean and cozy, even though he's an old bachelor.
* Cases of the 1st Department. The investigators have to make sure that a judge and/or a public prosecutor is present during the identification. One time they have to figure out a different method when the culprit's photo leaked out and the prosecuter informed them that no judge would allow it as evidence, because victims would recognize him from media. Sometimes photos were used instead of lining people up, such as when they needed to identify a dangerious criminal and they had no fingerprints or DNA, and they had to prove that he really is their guy.
* Cases of the 1st Department: The team suspects that the perpetrator in the episode "Hatred", Ms. Fabianova, was raped when she was small but they don't confirm it because she refuses to answer their questions. Her female lover was raped by an old pedophile when she was a teen, among other unfortunate girls. The old man was Ms. Fialova's first victim.

* Cases similar to the Dutch case can be seen in Greater China as well. Traditionally , 1
* Cases that started out with no dead body at all, but someone was sure to be killed by act 2.
* Cases where a population that's a minority within a country is vastly overrepresented in its prison system. Depending on one's world view, they can be used to back an existing belief that members of the minority are inherently more prone to committing crimes, that members of the minority are more likely to find themselves in circumstances in which they are driven to crime to survive or that the justice system is being much harder on members of the minority than on those of populations that are underrepresented in the prison system.
* Cases where a private client hired him to find a loved one’s murderer;
* Cases where he was hired (often by an insurance company) to investigate an unusual death that inevitably turned out to be murder; and
* Cases where the creator describes how they circumvented the censors..
* Casey and Andy Andy angers Mary by repeatedly making jokes about her having a big ass. The last panel is him upside down over a large fire.
* Casey and Andy) around the house a lot. Plus, this means Andy has a rather uncomfortable I'm-dating-your-daughter relationship with God.
* Casey and Andy. Especially funny considering that the king of Sweden is not known to be the brightest bulb in the Christmas tree.
* Casey and Andy features the (extremely lethal) Pun Police. In one strip a villain successfully kills Andy by inducing him to make a bad pun.
* Casey and Andy, followed by a final panel of Casey sitting on the kerb, while the fire department puts out the fire in his house.
* Casey and Andy: for a tabletop roleplaying game, Andy invents the character of Bob, whose one ability is that he can show up any time something is described in narrative. Thus, every time Casey tries to describe something, Andy simply adds, "Bob was there too!"
* Casey and Andy from around strip 50 to the current (and final) strip, 666. This also applies to Andy's counterpart in the Dimension of Hackneyed Opposites, Andia, who is dating God and his counterpart in the fantasy world, Andina, who is dating Zogor the God of Healing.
* Casey and Andy goes to a comic-con, some kid claims that his Wolverine-claws are much more realistic than Mary's — and while she might not actually BE Wolverine, her claws are actually razor-sharp, retractable claws implanted through mad science!
* Casey and Andy involving Andy's causality-defying feud with Grover Cleveland.
* Casey and Andy-ish world, but the target turns out to have a special "Zealot" prestige-class that enable him to resist the post-mortem interrogation.
* Casey and Andy. It also appears to have been awarded to the Mythbusters, at least in their early episodes.
* Casey and Andy like nothing better than "some good old-fashioned cow-burning and inbred-yokel abduction". There's also their fantasy-universe counterparts the Zarb, whose king "enjoys cows in an impure way".
* Casey and Andy not only as a woman, but as the girlfriend of one of the title characters.
* Casey and Andy, one of the main villains is Don Cindy, leader of the Girl Scout Mafia.
* Casey and Andy parodied World War II newspaper comic depiction of the Japanese adversaries in comics encouraging the public to buy war bonds to fight the "The Japoteer."
* Casey and Andy pointy former hairstyle, and had Casey invent a machine to make his hair pointier.
* Casey and Andy powers. The author has remarked that it's hard to come up with reasons why she isn't using them to help her boyfriend out of whatever jam he finds himself in.
* Casey and Andy, Quantum Crook saved himself from falling into lava by making a parachute out of his trenchcoat and boot laces.

* Casey and Andy. Subverted somewhat in that Andy Weir ditches the "one for romance" part of the idea and just plays both couples (Casey/Mary and Andy/Satan) for laughs.
* Casey and Andy, they find themselves in need of "an emergency proctologist".
* Casey and Andy, veteran time traveller J.J. knows that any event that she personally observes becomes immutable. However, if she looks away, she can leave the outcome ambiguous enough for her to go back and change things.
* Casey and Andy was introduced as a one-off joke about one of Andy's obsessions. Much later, the protagonists use a proper time machine during a time travel arc; but once banished to back their own time without the machine, they use the former to get back into the fray.
* Casey and Andy, where J.J.'s whiteboard always appears whenever she needs its assistance with some exposition.
* Casey and Andy where Mary took the time to 'defang' some popular stand-up comedy questions. She basically explained why there are instructions in Braille on drive-through ATMs, and then gave a short summation of why airplane food is so terrible.
* Casey and Andy where the two discuss how they'll counteract each other's plans in increasingly complex manners, whether the other knows about the plan or not.
* Casey and Andy. While this one doesn't work, the Casey Vaporiso-Annihilatomat does wonders.
* Casey at the Bat, and did a sequel in 1954 ("Casey Bats Again") where he ends up having enough daughters to field a very good baseball team.
* Casey at the Bat". A series of mediocre players make it to base, and it looks like Mudville will come back at the last moment. Then their team hero, Casey, strikes out, losing the game.
* Casey at the Bat focuses on love, friendship, and sporting gay dudes.
* Casey from the Johto saga is cute, but she's kind of a buffoon. In her first appearance, she
* Casey Hudson stated that the endings would "have a lot more sophistication and variety in them", would not be about using a "long lost Reaper off-button", and not be like simple A, B, or C endings. The fans have agreed with them on the latter statement. Instead, they refer to the endings as either red, green, or blue. An ending comparison can be seen
* Casey invokes this himself in "The Marauders." Under orders from the railroad to deliberately wreck a train, he is assigned an old clunker due for the scrap heap and is instructed to derail it on a curve so the team of U.S. Marshalls onboard could fake their deaths and ambush the titular gang when they hit the next town. To fool everyone, Casey feigns the brakes are busted when it nears the curve, jumping off and letting it careen off the tracks to its doom.
* Casey is hesitant about developing a relationship with his daughter Alex and has been avoiding her for months, since he thinks his spy life is too complicated and he's not sure how he's going to fit into her life or how she will fit into his. Morgan encourages him to pursue it.
* Casey is later chained to a radiator (no seduction in that case). He takes it with him, and uses it to hit someone.
* Casey James performs a Type 1 in order to ensure peace between two feuding tribes.
* Casey Jones and April O'Neil have had a series of relationship upgrades in the 2003
* Casey Jones has this happen from time to time, either through the occasional mechanical failure or the act of deliberate sabotage. To name the most notable examples:
* Casey Jones is able to speak fluent French because his Great-Grandmother Jones was French. Donatello learned to speak fluent French three days prior, but this
* Casey Jones makes a dramatic entrance this way in one episode of the 2003
* "Casey Jones (The Union Scab)" has the Angels' Union No. 23, who get the title character kicked out of heaven when he continues his strikebreaking ways there.
* Casey Kasem. Or do you need to come out of a FUCKING UP-TEMPO RECORD first?
* Casey Kasem, who was Shaggy's original voice, was replaced with Matthew Lillard,

who played Shaggy in the live-action
* Casey Mongillo's only major role of note in an anime was dubbing Shinji in the Netflix dub, as the majority of their roles are secondary and minor characters. Again, the dub's divisive reception likely factors in with this.
* Casey Neistat filmed himself crashing his bike into everything parked in a bike lane to point out how often they're blocked off.
* Casey Rae-Hunter, alias The Contrarian, has even released an entire
* Casey's rival Rick Dees, age 66, is still countin' 'em down internationally and over his website.
* Casey's team fast-ropes into the gift room at Devon and Ellie's wedding to stop a Fulcrum team.
* Casey Steele: Betsy's so afraid of them that she uses plasma cannon and still doesn't think it's enough:
* Casey Steele, Casey asks if this also means that she can breathe fire.
* Casey Steele: In Casey's backstory, she was kidnapped by a Satanic cult and sacrificed to an unnamed deity. She got better.
* Casey Steele: It's the education purview of the Psi Department at Whateley Academy, a.k.a "Psychic and Extended Mental Faculties Department".
* Casey Steele reference and its Wicked Witch of the West, who is green-skinned and has this weakness:
* Casey Steele: Usually shortened from "Telekinesis" to "TK". Power and finesse are usually mutually exclusive — you can either lift a lot of mass or handle small objects — and being able to do both is considered very impressive.
* Casey, whose status as a missing person is felt several times throughout the game turns out to be a case of Seeking the Missing, Finding the Dead
* Cash and Carry when he gets the equipment dropped on them at the house.
* Cashback, boy gets girl and shares his mysterious power with her. They walk out into a snowfall that is frozen in more ways than one.
* Cashback lonely art student Ben can stop time. He uses this power to practice his drawing of the nude female form with unsuspecting supermarket patrons. Not explicitly sexual for him (though he draws only women), but for the audience—who knows?
* Cashback, the main character and his friend Sean (in a flashback) narrowly avoid being caught looking at a dirty magazine, but fail to hide their erections...
* Cash Cab, Ben Bailey (the host) frequently does this in response to answers from the contestants.
* Cash Cab. During the first and some of the second seasons, the contestants didn't know what the heck was going on. However, during later seasons, several contestants actually cheered when they realised they were in the Cash Cab.
* Cash Cab. If it's getting very close to the end of the episode and they're nowhere near their destination, it's a pretty obvious sign they're going to lose and get kicked out.
* Cash Cab. In a traffic jam, an electrician stuck behind his cab tried to have an altercation with him, and clearly did not expect the big, intimidating, pissed-off Ben Bailey to step out to meet him. And then have the production crew — 8 big guys, one of whom was a NYC police detective — step out of their vehicle nearby to back him up.
* Cash Cab is so cheap, they deduct the cab fare from contestants' winnings. Early episodes also had extremely paltry prize amounts — the grand total given away on the premiere, after cab fare deductions? Less than US$1.
* Cash Cab) recounts anecdotes during his standup routine of the audience doing this to him at previous shows:
* CASH, CASH, CASH FOR YOUR BONES! NOT ENOUGH CASH? TOO MANY BONES? CALL CASH BONE! RIBS, SKULLS, SPINES, EVEN CERTAIN TINY EAR BONES! THE LEG BONE'S CONNECTED TO THE CASH BONE!
* Cash Cow Franchise: A franchise that continues production because it is very profitable for the company that owns it.
* Cash Cow Franchise: A franchise that keeps going because it is very profitable for the company that owns it.

* Cash Cow Franchise came out, PG became the default and all the other films were rated as such.
* Cash Cow Franchise: Every TV series or movie or video game that was successful during this decade.
* Cash Cow Franchise hatedom (which mostly consists of teenagers trying to look cool and bored adults), if mainly for being very popular with very young children and thus being seen as "annoying". There's also parents who hate it because of the gender roles in the show, mainly making the sole female character until the arrival of Everest pink.
* Cash Cow Franchise: The franchise keeps going because it's very profitable for the company that owns it.
* Cash himself is an example. His parents named him simply J.R. Cash. When the Air Force insisted that he couldn't just use initials, he picked John as a first name.
* Cashiers at certain fast-food restaurants are trained to respond in a standardized way, just in case someone tries to, say, order a Whopper at
* cashing a check, going legitimate but ultimately they figure that they are just supervillains:
* cashing in on the Royal Wedding phenomenon... almost a year after it happened.
* cash in on the success of a Peanuts jazz album release two years earlier.
* cash in on the success of saying that Max and Emmy are Hispanic themselves.
* Cash Lure: The stray 10-dollar note on the pavement sure looks tempting, especially to some unfortunate schmuck who happens to be passing by and trying to pick it up.
* Cash 'n Guns More Cash 'n More Guns expansion has some of this to shuffle in with the loot cards. The only time it bears any cash value during the game is whether the "godfather" of the final round decides it after it ends.
* Cash 'n Guns Team Spirit steal one of their loot cards, if a "Bang" card is used successfully.
* Cash on Delivery to the Uncle, setting up the comic misunderstanding first that he's crazy (due to him being dazed) and then dead (because he's been knocked unconscious).
* Cashpoint (automated teller machine): in the UK. A trademark of Lloyds Bank. The Barclays Bank equivalent was "hole in the wall", which also saw some currency in the UK as a synonym for ATM.
* Cash Tornado (2015-16) owe their basic formats to this little pilot.
* Cash Tornado producer Roger Dobkowitz as a contestant (playing Force Field, which is shown in its entirety on the sales presentation).
* Casillero del Diablo is advertised as "America's favorite Reserve Wine from Chile." Made even stranger by the fact that there is technically no such thing as "reserve wine" in either Chile or the United States.
* Casino. Ace Rothstein, the Las Vegas casino manager for the Chicago mob, loses his gaming license. The head of the mob talks to a middleman about telling Ace to lay low and keep quiet about the situation. Cut to Ace Rothstein hosting his own glitzy late night talk show in the casino and challenging the gaming commissioner to a debate on it.
* Casino) and continues to generate waves. Then he laments, as the ban hurts his operations.
* Casino and overlooked all the signs that it was going to end badly (even Ginger telling him point-blank that it was a bad idea), thinking that he could control her like he did everything else in his life... boy, was he wrong.
* Casino), a serial killer stalks the brothel's girls, stabbing a couple of them to death during intercourse and then having sex again with the bodies.
* Casino, fearing that he will blab more info on the group, finds him and kills him.
* Casino fired a young employee of his just for saying his wife was beautiful.
* Casino from a high stakes gambler. Despite this, and many bad signs and warnings from others, Sam marries her and quickly regrets it. He even gives her the only key to his saved fortune, which even makes the bank manager question it. It proves to be one of the reasons for the Casino's downfall. He only survives getting killed,

because the Mob still feels they can use him to make money. Lampshades during the film.
* Casino from another room and understand almost everything that's going on because of the detailed narration.
* Casino gets a great many of these. See any line of Joe Pesci's dialogue, and this great one from Sharon Stone: "Oh, freak you! Freak you, Sam Rothstein, Freeeak youuuu!"
* Casino gives a very insightful lecture on the subject (straight hole/ground burial)
* Casino has also mentioned The Sands on occasion, and also the Rampart (although the fictional Rampart was demolished in season 7, while its real life counterpart still stands.)
* casino heist of Sae interrogating Joker, with the first scene of the interrogation being at the end of Volume 6, after Kaneshiro's change of heart.
* Casino. However, their mutual pride and personal issues eventually set off a chain of events that concludes with the end of Mafia-controlled Las Vegas, resulting in both men losing everything.
* Casino is Vegas' top casino hustler. She's beautiful and smart. She marries Ace and becomes respected among Vegas' elite. But she also has a troubled relationship with her pimp Lester and as the years pass she succumbs to substance abuse.
* Casino, Lester Diamond was supposed to be shot in the desert by Nicky Santoro as a favor to Sam Rothstein.
* Casino, Millicent Sheridan as "Senator's Hooker" slips out of her gown in the senator's hotel room.
* Casino: Mr. Ishikawa, a Japanese billionaire who gets free hotel suite stays, nevertheless fills up his suitcases with the hotel's towels and soap when he checks out.
* Casino: Nicky's job in Vegas is to be the mob's enforcer and protect their control of the casinos and the skim from potential rivals. He even owns a successful restaurant and hobnobs with its celebrity patrons. He can't help but start loan sharking, fencing, and burglary teams. He even goes on some burglaries himself. Since his bosses don't want him doing such things because they don't want any extra attention on the casino operations, he keeps most of the money for himself.
* Casino, Nicky's wife hides a bunch of stolen diamonds in her hair to sneak it through the airport.
* Casino Royale (1954): Bond, knowing that Le Chiffre has a microphone in his hotel room, confronts Valerie about it. When he realizes that she knew nothing about it, he figures out that Le Chiffre also intends to test Valerie's loyalty and decides to go along with it.
* Casino Royale (1954): Compared to the later Eon film series, this adaptation is noticeably different. James Bond is an American agent and referred to as "Jimmy", Felix Leiter is British and renamed to Clarence, M is completely absent, and the production values are lower due to being a live TV production.
* Casino Royale (1967), and is shown her mom's old room by a henchman who states "It's just the way she left it". The room is covered in dust and cobwebs, exactly as it would be after decades of neglect.
* Casino Royale (1967)), and lowers a big sheet of invisible glass between them. When James sums up his plans for world domination as compensation for his feelings of sexual inferiority, Noah angrily steps forward — forgetting about the glass and smashing it to bits.
* Casino Royale (1967). Bond looks appropriately abashed and keeps his hands off her for the rest of the film.
* Casino Royale (1967) but proved extremely difficult to work with and was subsequently fired, leaving the producers with half a film which they roped Niven into completing.
* Casino Royale (1967) David Niven drives a suitably old-school Bentley roadster.
* Casino Royale (1967) does it in a makeshift foxhole with military telephones.
* Casino Royale (1967) female, James Bond 007 as a ploy to confuse the enemy.

* Casino Royale (1967) had Woody Allen, as Jimmy Bond Jr., being tricked into swallowing an explosive pill, which then explodes and blows up the casino.
* Casino Royale (1967) has made robot doubles of all the world leaders, and several opposition agents, including Daliah Lavi. He sheepishly explains "I copied her down to the last...the two of us have had some...profoundly moving religious experiences."
* Casino Royale (1967) in Central America, threatening an angry letter to The Times, as he's stood before a firing squad.
* Casino Royale (1967) is so completely nonsensical that it's impossible to describe. Allegedly, the scene is the heroes trying to get out of the casino before it explodes. So why the cowboys, Indians, flying roulette table, bubbles, kinescope police dispatchment, gun-turret banister, etc.? It's funny... at least if you're high enough to write a scene like that.
* Casino Royale (1967)) Of course, there was also the writer Evelyn Waugh.
* Casino Royale (1967): Parody Martini with a sugar cube laced with LSD substituting for the olive. And maybe a pot-brownie chaser.
* Casino Royale (1967): Peter Sellers is at a training center preparing to take the role of James Bond. He's shown gadgets for the field, including a pen that sprays poison gas. He tells the obligatory 'poison pen letter' joke, and his instructor wearily finishes the sentence with him, pointing out that all new recruits say that. Some years later, Roger Moore as 007 says it, but gets a free pass (apart from Q's usual peevish reaction.)
* Casino Royale (1967). Peter Sellers puts on a range of accents, while Orson Welles fills his side with magic tricks (Welles was a keen amateur magician). None of it is remotely relevant to what little plot there is.
* Casino Royale (1967) plots to replace all the world's leaders with his robotic doubles on April Fools Day, his birthday.
* Casino Royale (1967) pulled out of retirement, his name and number already given to the one we all know—spearheading a campaign against SMERSH, he gives all his agents (men and women alike) the name James Bond, to keep the enemy confused.
* Casino Royale (1967), Q is outfitting his character with spy gadgets, including a fountain pen that shoots a stream of poison.
* Casino Royale (1967), Sir James and Moneypenny end up in a hall with many doors which all look alike.
* Casino Royale (1967) - there's a bit of background business at Q Branch where a prisoner is being brutally beaten in an interrogation...the tea cart comes around moments later and he's amicably drinking with his interrogators.
* Casino Royale (1967), the villain is tricked into eating an explosive pill, which blows up the casino at the end with every main character in it. However, all the good guys are seen in heaven, strumming harps. Even the villain, until "Six of them went to a Heavenly spot, the seventh one is going to a place where it's terribly hot."
* Casino Royale (1967) to Connery and Lazenby's Bonds being different people entirely, one has to wonder...
* Casino Royale (1967), Ursula Andress uses the old machine-gun-in-the-bagpipes trick.
* Casino Royale (1967) wannabe Woody Allen has developed a strain of bacteria that, when released, would turn every woman beautiful and destroy every man over 4' 6" (that is, taller than him).
* Casino Royale (1967) wannabe Woody Allen tricked into swallowing his pill-size bomb, and blowing everyone up.
* Casino Royale (1967) while she's getting dressed. She indignantly covers the camera until she hears Bond signing off, only to remove her hand to see Bond looking downwards expectantly.
* Casino Royale (1967), who was best known for playing gangsters, is shot with such a gun.
* Casino Royale (2006): After making contact with Mathis, Bond and Vesper proceed to discuss their secret mission in a café just off the town square. Mathis also brings up blackmailing Royale's chief of police, with none of the other

patrons noticing any of it.
* Casino Royale (2006): A guard at the embassy is shot by his fellow guards as they fire at Bond.
* Casino Royale (2006) Also, when particularly stressed, his medical condition — leaking blood from his left tear duct — kicks in.
* Casino Royale (2006), and the arrival in Venice following it. James Bond, genuinely and sincerely in love and willing to walk away from his career as Her Majesty's hitman for it. Obviously, this can't work out.
* Casino Royale (2006), and then, after a pause, accelerae out and reverse back in again hard enough to smash the front of the car behind him, divest the dickish guest's car of its rear bumper, knock over the parking barrier, and set off half a dozen car alarms. Then he tosses the keys somewhere into the chaos without looking and strides off. Nobody revenge-parks like James Bond. Helpfully, this also provided a diversion that allowed Bond to sneak into the security office.
* Casino Royale (2006), and with him the then flagship of a new Aston Martin line, a DBS V12.
* Casino Royale (2006), a subversion to Bond's habit of simply straightening his tie and walking off afterwards.
* Casino Royale (2006), Bond checks the security tapes at the Ocean Club.
* Casino Royale (2006): Bond invokes this when his testicles are being whipped by Le Chiffre. He acts as though Le Chiffre is doing him a favor by scratching his balls; however, it is clear to all involved that this is just his way of trying to cope with the torture.
* Casino Royale (2006), Bond makes his escape in the opening sequence by shooting a propane tank with a handgun. Later averted when an airport fuel tanker is riddled with holes and weeping fuel everywhere but doesn't burn.
* Casino Royale (2006). Bond's order is recreated exactly, right down to the waiter's pleased expression (although by that point Kina Lillet hadn't been made in 20 years, which makes it even harder).
* Casino Royale (2006), Bond uses a defibrillator from his MI6-issue medical kit to revive himself after being poisoned with digitalis during his poker game. Averted in that digoxin does cause a number of arrhythmias, and treatment consists of administration of an antidote and an anti-arrhythmic agent (the two syringes from the kit); defibrillation isn't indicated unless the patient tips over into V-fib, which Bond did. Previous to that point, the MI6 medical staff were using Bond's AED as a quick-look ECG rather than as a defibrillator.
* Casino Royale (2006) don't have any such scenes yet, and as such, only time will tell...
* Casino Royale (2006) features an accidental version during the airport chase scene. Miami Police Department squad cars are chasing fuel truck stolen by the bad guy, and chase it across a runway just as a 747 is coming in. The 747 pulls up and misses the fuel truck, but its engine backwash blows one of the police cars about a hundred feet through the air.
* Casino Royale (2006) gets in trouble for paying absolutely no attention to the extraterritoriality of an embassy in Africa. ("You violated the only absolutely inviolate rule of international relations, and for what?")
* Casino Royale (2006) has a minor example of this. The $100 million pot for the winnings of the poker tournament is held by a Swiss bank, with Monsieur Mendel as the account manager. Rather than a secret, numbered account, it is simply an escrow account, where all the player's buy-in cash is held, with the bank itself being chosen because it's impartial and secure.
* Casino Royale (2006) has a terrorist who sets off a bomb he believes to be attached to a fuel truck next to a prototype jumbo jet. Unbeknownst to him, however, Bond had attached the bomb to his belt during the preceding fight scene. He gets just enough time to locate the source of the beeping before he goes boom.
* Casino Royale (2006) has him being one of those occasional Royal Navy officers who are deployed as Swimmer Canoeists.
* Casino Royale (2006) has two British Secret Service agents communicating over earpieces while on a mission. Bond has to remind the younger agent not to put his

finger in his ear while using the earpiece, a nervous tic which of course gives the younger agent away and spooks the guy they're tailing.
* Casino Royale (2006) he's been eyeing for the entire movie. They kiss and begin a romance, with Bond deciding to quit MI6. Everything is hunky-dory ... then Vesper betrays Bond, running away with the cash to pay her fiancee's ransom.
* Casino Royale (2006) instead of during the Cold War. Perhaps the most noticeable difference is the use of Texas hold 'em instead of baccarat due to the rise in popularity of poker at the time. It also helps that Texas hold 'em is a simpler game, more skill-based, and more directly competitive.
* Casino Royale (2006) in the next film culminates with the reveal that the original boyfriend is himself a traitor, seducing women with access to state secrets and using them to obtain and sell said secrets. Fortunately(?), Vesper's killed before she finds out about that facet of his personality. She dies thinking that she has at least saved the lives of the two men she loved.
* Casino Royale (2006) involves one bad guy, criminal banker Le Chiffre, who short-sells successful companies and engineers terrorist attacks in order to sink their stock values and turn a profit. The other bad guys are his superiors and clients who are pissed because he is doing this with their funds and behind their back. Bond screws up Le Chiffre's plan by foiling a terrorist attack and Le Chiffre has to hold and win a multi-million dollar poker tournament to pay his clients back. Bond is there to win it to force Le Chiffre to sell out his clients and superiors to MI6 in return for sanctuary before the other villains track him down and kill him.
* Casino Royale (2006) is that Obanno was based on the real-life leader of the LRA, Joseph Kony.
* Casino Royale (2006) just goes through walls, shoots down an elevated platform for it to fall, even smashes through several obstacles with a bulldozer...
* Casino Royale (2006): Kratt, Valencia and a couple other of Le Chiffre’s henchmen wait outside while he tortures Bond and vesper. A few minutes later there’s some shots and a scream from outside before Mr. White barges in to kill Le Chiffre but no bodies are shown.
* Casino Royale (2006): Le Chiffre is a banker for various international terrorists. As such, he was able to anticipate 9/11, and made a fortune off of it by shorting airline stocks.
* Casino Royale (2006), Le Chiffre's nationality is given as 'stateless' on the MI6 file Bond is seen reading.
* Casino Royale (2006), Lester complains about having to go to the basketball game to watch his daughter in the cheerleading squad because he's missing one of these.
* Casino Royale (2006), Madagascar is the Bahamas, and Montenegro is the Czech Republic.; Ahmedabad, India; and Bangkok, Thailand doubling for the movie’s setting of Dhaka, Bangladesh.
* Casino Royale (2006) name of Stephanie Broadchest. However, Bond used his own name under the reservation and tossed out the ploy, feeling it wouldn't fool Le Chiffre. In a more heat-of-the-moment incident, they pose as two lovers snogging in an attempt to avoid suspicion when Obanno and his henchman walk by after threatening Le Chiffre, but his henchman sees Bond's earpiece.
* Casino Royale (2006) phone that could make calls from the most isolated places in the world, browse the Internet like it was plugged in with a 1024 kbps data link, with a GPS map that could follow tracker bugs. It follows in the tradition of Bond's obscenely advanced gadgets.
* Casino Royale (2006) (Sebastian Foucan, who originated the "free-running" branch of the discipline) as the bomb maker just so they could do that sequence with maximum awesome.
* Casino Royale (2006) shorts large quantities of stocks in major companies using the money of his terrorist clients, then orchestrates terrorist attacks on said companies' valuable assets to sink their stock values while he walks away with a fortune. The plot happens when Bond thwarts one such attack, forcing Le Chiffre to call a poker game to recuperate his losses.
* Casino Royale (2006): The toilet fight, in which Bond and his quarry manage to go

through several cubicle walls and smash at least one sink.
* Casino Royale (2006) thing, SIS implants a GPS tracker in his arm to keep track of him. Unfortunately when Bond is captured later on, the villains are smart enough to cut it out.
* Casino Royale (2006) to older Bond movies, is likely an allusion to the post-9/11 state of politics.
* Casino Royale (2006), Villiers, M's male secretary/arm candy, is sickened by the sight of Solange's body after she is murdered by Le Chiffre's men.
* Casino Royale (2006). When Bond shoots the corrupt section chief in his office, for a split second a close-up of a photograph on the man's desk is shown — an image showing him with his family.
* Casino Royale (2006), when the bad guy sees the earpiece Bond is wearing and hears it squeaking.
* Casino Royale (2006), who had just been poisoned by a spiked drink that put him in cardiac arrest, can't help but make a deadpan joke at his expense when he returns to the poker table:
* Casino Royale (2006), who wears glasses that have one lens darkened.
* Casino Royale (2006) with a full head of hair and mysterious and sexy without it.
* Casino Royale after fleeing with the $150 million that Bond won at the Casino Royale poker tournament, as Bond catches up with him, knee-caps him and arrests him. He escapes in the next film.
* Casino Royale, Bond is assigned to clean out Le Chiffre at baccarat (a game similar to blackjack where the banker and player try to get as close to 9 as possible with the tens digits dropped; a total of 18 is actually an 8 in the game rules). The banker cannot see their opponent's hand and only gets to see the third card they're dealt, making it a psychological game where the banker must try to predict what their opponent's hand must have been to make them take a third card. Bond initially ends up completely cleaned out by a series of bad hands (with Le Chiffre winning with a 9) and has to get funded by the CIA to keep going. When he returns to the game, he gets dealt a king and a queen (a total of 0) and is handed a 9 as his third card. His second hand has Le Chiffre with a 0 and Bond dealt a natural 9!
* Casino Royale invites Solange Dimitrios in her husband's own Aston Martin DB5, in front of the Bahamas hotel, telling her that his place is very close. He takes off, turns at a roundabout and stops 10 seconds later... at the same place. The valet's nonplussed "Good evening, sir, and welcome back" is priceless.
* Casino Royale invoked this trope due to it being a patchwork of scenes with 5 directors, and it unsurprisingly failed with critics and unleashed a lot of problems that didn't fully go away until 2013 (it also wrecked the careers of said directors, star Peter Sellers, and eventually led to the death of producer Charles Feldman when the stress of making the film developed into heart problems).
* Casino Royale is something of a mathematical genius who uses his smarts to gamble about. It's when this doesn't work out so well for him that Bond steps in to deliver the killing blow.
* Casino Royale (it's essentially a more complicated version of "vodka martini, shaken, not stirred", specifying preferred brands of liquor).
* Casino Royale, LeChiffre himself is killed by his superior Mr. White for not being reliable enough.
* Casino Royale MI-6 uncovers a plot to sabotage the maiden flight of a new airliner when an analyst notices someone has shorted large amounts of airline and aircraft manufacturer stocks.
* Casino Royale when Le Chiffre's own superiors (SMERSH or QUANTUM, depending on the source) assassinate him.
* Casino. Sadly, running the mob's operations in Vegas requires tact, subtlety, and more than a little bit of stealth, none of which are skills Nicky actually possesses.
* Casino; Sam Rothstein, a bookie associated with the Mafia is assigned to Las Vegas where he obtains entrepreneurial reputation, awards, and social recognition. After a while, things go sour and he gets surrounded by great media controversy

regarding his license problems and his connection with a well-known mobster. As a reaction, Sam starts his own talk show to make a stand and defend himself and his image. He gets called on it by his mob associates as his flamboyant crusade draws unwanted attention.
* Casino; Sam Rothstein is forced to hire an incompetent idiot in a cushy job because he's the brother-in-law of a powerful local official. Rothstein finally gets sick of the guy's incompetence and justifiably fires him. The brother-in-law amiably agrees that the guy's an idiot, and is willing to compromise on his relative holding a less responsible position, but Rothstein is such a perfectionist he refuses. This results in the official causing trouble for him later on.
* Casino. Sam Rothstein runs his casino via a front man as he doesn't have a casino license. A journalist keeps probing him on the issue until he admits he is the boss "on a day to day basis". The headlines have a picture of Rothstein saying, "I'M THE BOSS" and a corrupt politician he's alienated uses this to have an investigation launched.
* Casino sees mob frontman Ace Rothstein hosting his own Vegas talk show, in a bid to ingratiate himself into the community.
* Casinos. The builders tend to put them in places that are conveniently away from most people, but the local residents have to deal with the increased traffic, inconvenience of the construction machines in the area and such. However, because the whole county votes on whether or not to grant zone variance(s) to allow the building, the locals are out-voted by the people who won't have to deal with the headaches that are created.
* Casino: Subverted. The cowboy who puts his feet on the table at Ace's casino protests that he has "important friends" when he's escorted off the premises kicking and screaming for being a jerkoff. He does turn out to be a friend of Nicky's, although unfortunately for the cowboy, so is Ace, and he's a much more valuable friend to Nicky. Nicky is ready to lay the smackdown on the cowboy himself and forces him to apologize.
* Casino. The fact that it was longer and slower-paced didn't do it any favors either.
* Casino, the mafia bankrolls a Casino in order to fleece it. The skimmers take offence about their own operation being in turn skimmed off the top.
* Casino was based (see the entry in Film above), and his brother Michael. While sand was allegedly found in their lungs, indicating live burial, it was confirmed years later that they had been murdered in a basement before being buried in the cornfield.
* Casino was dubbed into Hungarian three times. One in 1996 for its original release, one in 2002 for TV, and a third in 2005 for DVD. Juli Básti dubbed over Sharon Stone in all three versions.
* Casino when Nicky Santoro demands his banker return all the money he invested. He then says that he will come down to the bank and if the money is not there he will crack open the bankers skull and go to prison. Based on his actions in the movie (including planning to kill and bury his oldest friend) he might kill the banker but not go to prison. He'd kill the entire city of Las Vegas before taking a prison stretch.
* Casio Loopy can be seen as a testament to this trope, as it was completely marketed towards female gamers and never went on to target actual male audiences. It also shows the trope in full-effect as people believe that the console flopped because it was targeted towards girls instead of being marketed towards boys (you know, like any other console).
* Casiopea - guitarist and lead songwriter Issei Noro is the sole founding member left.
* Casio VL-1 hybrid capable only of producing low-fidelity blips and farts, is regarded by electronic musicians as being to synthesizers what the Trabant or Reliant Robin are to automobiles - that is, total crap, but endearingly so.
* Casket Match — Involves putting the opponent inside a casket and closing it to achieve victory.
* Caso Cerrado. His excuse for wanting to kick the family out of the apartment

complex is that they're confusing others' children and traumatizing their son.
* Caso Cerrado: One case involves a woman who wants to divorce her husband after learning that he's her paternal grandfather. She was so ashamed that she tried to kill herself. Her grandfather is a musician with at least 26 kids, but he has been in the life of none of them.
* Caspar in the short story "A Perfect Night to Break Your Neck" is a Funny Foreigner everywhere he goes, speaking in an unidentifiable accent with
* Caspar is the younger son of Count Bergliez and he outright states his older brother got all the attention because he was born with a Crest and is the successor to House Bergliez. Though he is remarkably better adjusted than some of the other students thanks to his simplistic outlook on life and without the pressure of living up to his family name, he does admit to being intimidated by his father and his extremely competitive nature might be due to compensating for being ignored so much at home.
* Caspar, the Magi who represents her mother as a woman, has chosen Gendo over her when she attempts a Taking You with Me.
* Casper, a boy asks the main character, Cat, out on a date. It turns out that he only does this to sabotage her Halloween party.
* Casper, a ghost teacher The Ghostly Trio loves finds them unfaithful because they flirted with her not knowing it was her.
* Casper and move on to the afterlife; however, they do nothing but mock and prank him. When his daughter, Kat, wants to throw a Halloween party and worries about them ruining it, Dr. Harvey refuses to talk to them and just starts packing up all his things. By this point the Trio have so much fun messing with him that they get worried and decide to "cheer him up" instead of messing with Kat's party.
* Casper and the Angels: In one story, Hairy performs his scary routine behind Casper so the latter will think he's the one scaring the bad guys.
* Casper Angels along with Hairy, but the latter brings about most of the show's laughs.
* Casper animated series where the Ghostly Trio decide to participate in a golf tournament and Stretch vows they will "get the highest score ever seen!". Casper, of course points out that's not how it works.
* Casper. A slight chill in the air is a pretty good sign of the presence of a ghost in the area. Kat is so used to it, she can notice the Ghostly Trio approaching the room before anyone else does or keep track of Casper's exact location even while he's invisible.
* Casper: A Spirited Beginning, Casper does this in the climax to prevent his home (and his human friend Chris) from being blown up.
* Casper: A Spirited Beginning, it isn't until Casper is thrown off a ghostly train, travels to the nearby city of living people and then unintentionally scares the hell out of everyone until he finally looks down at his feet and realizes that he doesn't have them anymore, leading him to discover that he indeed turned into a ghost.
* Casper: A Spirited Beginning, the Ghostly Trio give a construction worker an atomic wedgie. Later, towards the end of the film, local bully, Brock, and his lackeys are left hanging by their underwear from a tree.
* Casper called "Lucky Enough to Be a Ghost", which would have ended with the Ghostly Trio hoisting Dr. Harvey up to the ceiling just as Kat walks in to ask him about having the Halloween party at Whipstaff. This explains Kat's line in the finished film about her father having "hit the ceiling" when he found out about the party. Christina Ricci does deliver the line in a dry enough way to make it non-obvious that this is supposed to be a pun, but it's still hard to imagine the mild-mannered Dr. Harvey hitting the ceiling in a figurative sense either.
* Casper: Carrigan suffers slapstick along with Dibs in the up and at'em machine.
* Casper, Carrigan tries to kill Dibs, who covers the floor with what appears to be oil. Sure enough, Carrigan slips on the oil and goes skidding across the floor before crashing out the window.
* Casper: Casper's uncles get mistaken for actors auditioning for the roles of ghosts... and are told they desperately need to work on their act.

* Casper, Cat lunges to catch the glass bottle of red substance that could bring Casper back to life. She catches it just in time, complete with slo-mo.
* Casper Dr. James Harvey falls into a manhole while intoxicated. After returning to Whipstaff Manor as a ghost, his daughter Kat and Casper resurrect him with a machine Casper's dad invented called The Lazarus.
* Casper featured a self-proclaimed "ghost psychologist" who operated under the assumption that ghosts were people with unfinished business, basically making all of them type one. Despite (apparently) never having met a real ghost before entering the title character's house, he seems to have been right. That said, ghosts can still be huge dicks who get off on scaring folks, as Stinky, Stretch, and Fatso can attest.
* Casper film had some gratuitous language ("Damn", two instances of "What the hell?" and "Bitch") inserted to give it a PG rating (though the premise of death and reincarnation alone probably would have done it).
* Casper film has a variation of the Batpole. Casper's father (when he was still alive) equipped an armchair to take him down to his secret lair, along the way shaving him and brushing his teeth - he wasn't much of a morning person. Cat suggested that coffee would have been a simpler alternative.
* Casper for young readers was pointed out, the author retconned Casper as being born from a mommy ghost and daddy ghost.
* Casper happens around Halloween, ending at a Halloween party specifically.
* Casper. He acts as Carrigan Crittenden's personal bodyguard. "Don't come near me, you spiteful spook, or I'll knock you into the next world".
* Casper, he has a potion to restore him to life. But the girl's dad fell off a cliff and turned into a ghost. Casper let him use the potion instead, saying "You need this more than I do".
* Casper Meets Wendy: Desmond Spellman wanted to kill Wendy to prevent her from becoming more powerful than him as predicted by a prophecy and, to make sure nobody would try to avenge her, he intended to kill her family.
* Casper movie, Amber and Vick do this to try to ruin Kat's Halloween party. However, the plan backfires when Fatso, Stretch and Stinky come out of nowhere and scare them away, causing them to instead put on an entertaining show for the guests.
* Casper movie, Cat gets in an argument with the the Ghostly Trio and tells them to "Drop dead!", to which they retort "Too late!"
* Casper movie has the clock strike 8 o'clock, showing Casper's a ghost. With a little "Um, boo?" the entire party flees Whipstaff Manor.
* Casper movie is defeated in this manner; she is killed and becomes a ghost so that she can fly through a treasure vault with ease and grab the loot. Unfortunately for her, by grabbing the loot she has completely fulfilled all her life goals, giving her no reason to linger as a ghost any longer. She is taken away to the afterlife against her will and the treasure is left behind.
* Casper on 3DO, PS1, and Sega Saturn, the final boss "battle" has you being chased around a maze by Ghost!Carrigan. You go to the bottom of the maze and pick up the key while dropping coins to keep her distracted, then open the chest in the middle of the maze and wait for her to finish picking up the coins, at which point she starts coming after you again and gets sucked into the chest. You don't even have to use the coins. You can just barely outrun (outfloat?) her and she'll probably only get one hit in as you're opening the chest.
* Casper's character) got run out of the haunted mansion by the Ghostly Trio, he told the new owners:
* Casper's cousin, Jasper the douchebag ghost, possessing the corpse at a funeral for some hijinks.
* Casper series from 1979 in which the Friendly Ghost befriends two female space police officers named Maxie and Minnie.
* Casper's Scare School episode "Bands on the Run", Jimmy plays Guitar Hero. His avatar resembles him with long hair and dressed as a rock star.
* Casper's Scare School filled with all sorts of different monsters, including a werewolf, a zombie, a mummy, and of course a ghost.

* Casper's Scare School has Casper and his uncles back to being ghosts that were never "fleshies".
* Casper's Scare School has this as well. The students are told of a place so scary and horrible that only the screams of the monsters who enter are heard when you get near it. Subverted in that.... In what can't be a completely unforeseen twist, the place is a garden full of beautiful flowers and trees where the banished monsters sit and drink lemonade. The place contained things the would be scary to a stereotypical monster who was used to slime and mummies and vampires etc.
* Casper's Scare School: In "Our Boy Wolfie", a man carries his girlfriend like this as they run away from Wolfie.
* Casper's Scare School is a living doll who by size and behavior could be a ventriloquist dummy, but by the string on her back also could be a talking doll. She's a member of Thatch's gang and has a requited crush on Slither.
* Casper's Scare School: Ra, one of Casper's friends, is a mummy. His familymembers also show up in several episodes.
* Casper's Scare School. When Casper needs a volunteer to do the behind the scenes work for his movie (and thus can't get a role), everyone but Quasi (who is busy reading a dictionary) steps back.
* Casper the Friendly Ghost" a date, and becomes paranoid that Casper is constantly telling her it is (he wasn't there).
* Casper the Friendly Ghost, as she's basically a witch counterpart of Casper and therefore the only known friendly witch.
* Casper the Friendly Ghost: Casper and Wendy anyone? In the old comic books, they're ambiguously canon.
* Casper the Friendly Ghost comic, Casper encounters the Horseman, who finally does meet up with his long-lost noggin, which has been going around as the "Horseless Headman".
* Casper the Friendly Ghost desperately wants to have friends, something hard for him as everyone is scared of him because he is a ghost.
* Casper the Friendly Ghost has the titular character try to make friends with anyone (humans and animals). At least most of the cartoons will have Casper trying to befriend an animal.
* Casper the Friendly Ghost, he was a boy who died of an illness, but in the comic books... it would seem that ghosts in the comicverse are one more Enchanted Forest species, not humans who die. The animated shorts do little to clarify, though one does involve a fox that Casper tried and failed to save becoming a ghost.
* Casper the Friendly Ghost, however, have a "little haunted house" that they were terrified of, which followed them home. (Actually, it was a ghostly dog in a doghouse, owned by a prospector who was using it to sniff out gold.)
* Casper the Friendly Ghost" is far from a happy ending). But Casper's technically "dead" too, so it's anyone's call.
* Casper the Friendly Ghost. It wasn't until later that they started toying with the idea of him being a traditional ghost.
* Casper the Friendly Ghost — 55 films, a TV series spinoff, and a live-action film since 1946.
* Casper the Friendly Ghost. Most other ghosts in the franchise are mean and just want to scare people.
* Casper the Friendly Ghost takes place at the home of Casper and his uncles the Ghostly Trio. It's a ramshackle haunted house where the intro for the show has a party going on.
* Casper the Friendly Ghost. The kids explain to Casper that the ghosts took their Sugar Chex. Sure enough, the ghosts are indoorss, pouring a bowl of Sugar Chex and laughing. The two children peer in through the window as Casper explains, "I'll get your Sugar Chex back." The box of Sugar Chex rises in the air, and the ghosts, startled, bump into each other and run away. The two kids and Casper now sit at the table, dining on Sugar Chex. Casper explains that Sugar Chex are frosted, that Casper's image may be found on the box, and that the box may contain a prize inside.
* Casper the Friendly Ghost: Though it is sidestepped by the creators of the

original comic and later cartoon, Casper is actually about a dead, lonely and suicidal child. Sidestepped in the movie, where Casper died when he wouldn't come in from sled riding and caught pneumonia.
* Casper the Friendly Ghost, though magic must also be learned. Usually, ghosts scare people and witches play magical pranks and both treat this as their job in life—yes, 'life' applying to ghosts too in this case.) Of course, we never get confirmed non-platonic-ness.
* Casper the Friendly Ghost was given one from Dr. Harvey for a school play.
* Casper, the Ghostly Trio refer to humans (or rather, living humans) as "fleshies".
* Casper). They can be heard bickering with one another inside the vacuum as the scene ends. The next morning, Kat uses a dust buster for protection as she wanders the mansion.
* Casper ties together the shoelaces of the students who teased Kat earlier. When the bell rings the entire class stand up and fall down in unison.
* Casper to be malicious and from the fact that he's still not scary even with the meaner personality.
* Casper variation between Casper (a ghost who died when he was 12) and Kat (who's 13).
* Caspian Border is the most popular vehicle map. It contains multiple vehicles, is quite open and has a nice map layout that means games don't end in spawn camps most of the time.
* Caspian often felt he was unlucky in love, a point emphasized when he misses his chance to talk to a beautiful woman he notices in his job's parking lot. Caspian later sees the woman from before a second time and finally approaches her. To his great surprise,
* Cass 25, (though the villain in question was naked mostly because she was planning on raping and murdering Tim):
* Cass also gets a bit of this. If the male Courier has the Confirmed Bachelor perk, he can make it rather clear to Cass that he is not interested in being more than platonic companions. This text option comes after a potentially flirtatious remark from Cass' end.
* Cass also gets one with charming hipster Andrew in "Under Raps," when their kiss is interrupted by their hot air balloon hitting the ground.
* Cassandra also counts sometimes, like when she gets rebellious at her mother (bonus points if she growls) or if she tries to
* Cassandra and Cullen can be flirted with by a female and male Inquisitor respectively, but both will eventually turn them down politely. Cassandra also turns down Sera's interest.
* Cassandra and Eugene also refer to Rapunzel as "Raps" often — a cute nickname that is distinguished apart from the nickname that only Mother Gothel had used for her previously: "Punzie"
* Cassandra and (later) the Inquisitor are the only ones who know about Cullen's
* Cassandra, a supercomputer with the ability to predict the future with total accuracy tells Lister that he will end up destroying her. Lister walks into the room with the computer and gives a big speech on how he has his own free will, culminating in his refusal to destroy Cassandra. As he walks out, however, he sticks a piece of chewing gum on the wall, which
* Cassandra Cage and Jacqueline Briggs as well, given who their parents are.
* Cassandra Cain aka Batgirl II is very much a Daddy’s Girl to Bruce to the point where she’s considered his
* Cassandra Cain, during which she had to see one of her best friends be seemingly killed and the other betray the team.
* Cassandra Cain Fan Campaign on Comixology, to prove she still has selling power.
* Cassandra Cain from DC Comics does as well as an extension of her ability to read body language. It's not so much a superpower as she's just so good at reading enemies and martial arts in general that one look is all it takes, and she can learn entire styles perfectly in minutes.
* Cassandra Cain has had at least one flashback to doing this after ripping a man's

throat out with her bare hands. It did not help that she was around eight at the time. What makes it worse is her super ability to read body language. Turns out the body language of a dying person is pretty unpleasant.
* Cassandra Cain is noted in the comics as being far stronger (and faster) than even a highly athletic girl her size should be. This is mostly down to her
* Cassandra Cain meet on a cruise and end up having a short fling, but it ends quickly when both realize the neither of them really likes each other in that way.
* Cassandra Cain (though the word is never used in-story). In the comics continuity, she is consistently portrayed as either straight or too mentally and sociologically stunted to understand sexuality. Her struggle to live as her truest self, both as queer-identifying and a recent convert to Catholicism, is a recurring theme.
* Cassandra Cain. Tim is accepted to be among most brilliant detectives only surpassed by Bruce who expects Tim to someday surpass him, while Cass is among the best martial artists only definitively surpassed by her mother Shiva who expects Cass to surpass her. While neither of them is a slouch in the other's specialty martial arts is the part of the job Tim has to work the hardest at while detective work is what Cass has to work the hardest at.
* Cassandra Cain, was given the name Black Bat after she gave up the Batgirl name. Some writers, however, spelled it Blackbat instead.
* Cassandra Cain was named 'The One who is All' by the League of Assassins, since she's been trained by nearly every member and could carry on their legacy by herself.
* Cassandra Cain while neither one of them did, suggesting a genetic component.
* Cassandra Cain. While she loves to test her skills she is not a murderer.
* Cassandra Clare's books, Shadowhunters have parabatai, which is essentially this, with some shades of philia thrown in as well, but eros is definitely forbidden.
* Cassandra de Rolo, Percy's sister, is impossible to talk about without spoiling
* Cassandra Did It: When a seer/psychic/time-traveler is proven right, sometimes, everyone will just assume they did it.
* Cassandra fabricated it to trick Rimmer and Kochanski into doing it so she could get pre-emptive revenge on Lister.
* Cassandra here: Cassandra acts crazy because she thinks no one will believe her, and people don't believe her because she acts crazy.
* Cassandra is a fan of a romance serial written by Varric, outright calling it "smutty literature."
* Cassandra is something like a rare treasure collector, uses her wealth
* Cassandra Kresnov, a fellow with a written-out Texas drawl who gives the protagonist some much-needed help at the climax of the book.
* Cassandra Kresnov, and joins the Callayan police after being targeted by the Federation Intelligence Agency.
* Cassandra Kresnov. Cassandra had sexual relationships with several of her male squadmates (also "GIs" like her) as well as her fully human unit psychiatrist, and in the books' present has a string of one-night stands with humans and eventually a long-term boyfriend.
* Cassandra Kresnov) in a world that is dominated by colonists of Indian, South Asian, and Middle Eastern descent. The Earth-ruled Federation is dominated by the superpower India, and the breakaway League has mostly Chinese and American influences.
* Cassandra Kresnov, was created. It's never explained for certain who actually won, though the implied outcome is that the Federation won but left the League more or less intact.
* Cassandra Palmer of mortals, which they usually get from sexual intercourse.
* Cassandra" provided a perfect example with a computer that could tell the future. After it had foretold that certain characters would be left alive, a gun was pointed in their face and the trigger pulled; naturally, it jammed. When pointed at another character who she foretold would die, it worked perfectly. This trope was then used almost word for word to seduce another character, since the computer had foretold he'd die while having sex with her (When her boyfriend caught them in the

act). But in the end, it turned out that the computer was lying to cause jealousy. She foresaw that the boyfriend would kill her. He realized this and tried to avoid it, saying he wasn't going to kill her, but through a Rube Goldberg series of events ends up killing her anyway.
* Cassandra. She does end up being allowed into the Elysian Fields, because of her piety.
* Cassandra. She'd rather die than admit that she's a hopeless romantic, but if you go to your party members for advice about starting a relationship with her half of them will bring it up anyways.
* Cassandra, she suddenly puts the pieces together and remembers that Varric said that Bethany can make a burlap sack look good.
* Cassandra's personal quest centres on a cult known as the Order of the Fiery Promise, who believe the world must end for it to be reborn as a paradise. Notably, the cult sets itself up as the
* Cassandra Truth: A character who is never believed because their claims are seen as insane.
* Cassandra Truth, broke his jaw, cracked his ribs and punctured one of his lungs.
* Cassandra Truth: Don't expect our protagonist to be believed about what is going on, particularly if the system is largely run by men.
* Cassandra Truth) is in danger from Jewelius, making Twilight conflicted enough to let the Changelings escape. However, Chrysalis' act of instilling in Twilight the first seeds of doubt regarding Jewelius' trustworthiness, along with his above-described behaviour supporting Chrysalis' claims, leads to Twilight realizing how unwell things are in Jewelius' hooves.
* Cassandra Truth: Someone tells the truth properly but no one believes them vs. someone deliberately hides the truth via a snide tone of voice.
* Cassandra Truth: You tell the facts, but your recipients fail to accept them.
* Cassandra was shown to have a romantic interest in her adopted brother
* Cassandra", while Rimmer is explaining to Lister that the latter has accidentally signed himself (and, unbeknownst to Rimmer, the other main characters) into a suicide squad, partway through the explanation, Lister starts banging his head on a table.
* Casseta & Planeta, a Brazilian group of comedians, had NNN, aimed for the nasal-voiced viewer. It was never stated what the first "N" stands for.
* Casseta & Planeta had this: "How many gorillas are needed to change a light bulb?" "One. But you'll need something about seventy light bulbs."
* Casseta & Planeta Urgente becoming about "the inflation monster".
* Cassetteboy vs, in which we observe the courtship rituals of the British male.
* Cassette Futurism: Vinyl records and cassette tapes made a comeback in this decade even alongside digital technology.
* Cass had met up with Cass. Then, he proceeded to smash the keyboard up.
* Casshan: Robot Hunter, Tetsuya's soul rejoins that of his parents and the three become a beam of light that activates the failsafe to shut down the evil robots.
* Casshern (2004) takes place in an effectively-portrayed Diesel Weird War/Diesel Desolation setting.
* Casshern. Casshern is both immortal and overpowering. He has no choice but to watch everyone around him die, and even when he tries to let someone else win in a fight, it never works out because his berserker mode tends to trigger against his will, leaving an increasing body count on his hands.
* Casshern himself reconstructs the trope. After seeing Luna's subjects laying about doing nothing with their eternal lives and how the robots he met on his journey did everything they could to find meaning in their brief lives, he decides to become the local Grim Reaper
* Casshern Sins (Bright Lady) is introduced with a heroic robot bodyguard (White Knight). He is almost immediately killed and his place taken by Casshern.
* Casshern Sins: Casshern says "These hands have killed her!" in reference to his main 'sin' of having murdered Luna.
* Casshern Sins features numerous examples of what would best be described as Robo-cannibalism. The only people still alive are all robots in various forms who all

fear the inevitability of death as their metal bodies eventually break down and rust away. Casshern himself is seemingly immortal, and is subject to numerous people who desperately want to eat him in hopes of gaining that immortality. Throughout the series are are many rumors of similar robots who claim to be immortal, and at some point or another meet their end and are ravenously devoured by the hopeless masses.
* Casshern Sins, featuring a radically different and more cynical interpretation of the eponymous protagonist.
* Casshern Sins gives us Casshern's flesh and Luna's blood, both set up as a twisted version of the Eucharist.
* Casshern Sins if his life is in genuine danger, exacerbating his reputation as a harbinger of death and destruction.
* Casshern Sins: Lyuze has a retractable blade in one of her arms, though her being a robot may mean it is permanent
* Casshern Sins: present in almost every fight scene and is a major plot point.
* Casshern Sins rating, and the remaining seven only being rated as TV-14. No graphic content was censored from the Toonami broadcast, either.
* Casshern Sins she lives in, it's a miracle that every time you see her, she's as happy and giddy as a kid can be.
* Cassian also qualifies and actually manages to give John a pretty even fight for awhile. The key word being awhile.
* Cassian therefore has his dream, but he has the face of a man he really, really hates, has lost his own physical skills and identity, and has to live in hiding. He can't take the High Priest's identity firstly because he couldn't pull it off, secondly because the man was a major figure in the evil cult of evil, and thirdly because he committed a lot of very public crimes before dying. Cassian apparently hides in the sewers of London for a few volumes before reappearing in the finale to be mysterious and helpful.
* Cassiar, British Columbia, once a thriving mining town of 1500, it is now devoid of life. The highway in that area retains the name of Cassiar.
* Cassi Bell, the candy shop clerk, only makes a single appearance when Amber and Marina visit Las Vegas, but plays a significant role in the story of
* Cassidy "Beaver" Casablancas. A nickname so loathed, protesting against it
* Cassidy has a history of striking women. This is not excused at all and is treated as an absolutely unforgivable sin. When Jesse discovers this, it fully cements Cassidy's
* Cassidy, in turn, is a mentor to Miria, who is new to life as a sailor.
* Cassidy is fairly low-powered - rank four out of thirteen according to the setting's power ranking system - and possesses no unique special powers. Her lack of overt specialness has caused her trouble in the past - she lost her first position as a Queen because her followers deserted her for someone more glamorous. Cassidy first appears in the books as a grown woman in her early thirties. Cassidy gets along well with her birth parents and her father is a carpenter.
* Cassidy reveals in Season 18 that he was molested by his wrestling coach.
* Cassidy's attempt to stop telling people what to do leads to Clayton and Maxwell getting arrested for doing something stupid after she refused to advise them.
* Cassidy sets in. This allows someone to torture him by repeatedly shooting him with a Lee Enfield .303 rifle.
* Cassidy. Think he's the sweet, nerdy, helpless guy? Ha. More like rapist and mass-murderer. Have fun!
* Cassidy Wilson started to develop a crush on Achmed at the beginning of
* Cassie and Marco got into a debate about which term for vomiting was the best after Marco pointed out that the action has a lot of
* Cassie Arnold teams up with a murderer masquerading as a hero to propel her own career as a reporter by making it look like she's an
* Cassie as well. Many, many times throughout the series, she uses her innate understanding of people for the good of the team, if not necessarily for the good of herself, or the person. The main victim of her manipulations was Visser Three (mainly because the Visser was an evil ego-driven son of a bitch). She also

(reluctantly) used her understanding of people to
* Cassie Cage has a throw that finishes with shooting the opponent in the back of the head. If used on an opponent's last hit point, it can be used as a Brutality as a Subversion. She can also use her pistols to shoot an opponent in the knees, which can be Enhanced to kick them up in the air and shoot them a couple more times. They don't seem to have much trouble standing afterwards.
* Cassie Cage. Other users even throw in punny comments on the feed (some of which appear to be other characters in the game, no less).
* Cassie Cage, when Cassie rescues him and Johnny calls her "Punkin", Cassie on the verge of tears says she's a little old for Punkin.
* Cassie DewellThe Highway'', the usual MO of the Lizard King is kidnap prostitutes and imprison inside an old fallout shelter on a property he owns, so he and his accomplices that sexually abuse them before he murders them. This is what he does to sisters Danielle and Grace when he abducts, and is what initially puts Cody Hoyt on his trail.
* Cassie does not appear in 7 episodes: "Snow Dragons", "Zak and the Beanstalk", "A Tall Tale", "Wheezie's Last Laugh", "My Emmy or Bust", "Ord Sees the Light" and "Out With the Garbage".
* Cassie Edwards series, all of which feature a white woman hooking up with a Native American man. And while she's the most prominent example, she's not the only author to employ this scenario.
* Cassie has a minor crisis because she's not sure if it's right to take a dolphin's DNA or control its mind; one of their rules is that the Animorphs never morph a sapient creature without its permission, or unless it's an urgent emergency. Whether or not they're truly sapient is never
* Cassie is also turned into a life-sized wooden puppet at one point and remains this way for some time before anyone remembers to turn her back.
* Cassie is the most prominent example from the heroes' side, being this in the main story and the omakes, due to being the host of the dark half of the Phoenix Force.
* Cassie prefers to fight as a wolf. As a wolf, she is fast and skillful, but not particularly strong or resistant when compared to the combat morphs of the other animorphs (grizzly bear, tiger and gorilla).
* Cassie Sandsmark, the future Wonder Girl and illegitimate child by Zeus. It was mentioned that until she was found out, it was thought that Zeus had changed and was faithful to Hera.
* Cassie's mother is a vet at the local Amusment Park/Zoo and the kids regularly go to get there to get new morphs since the very first book. Probably the most insane event was the time Tobias needed a Dolphin morph and decided to get it during the water show (his plan was to fly in and land on its back, being that he's a Red-Tailed Hawk and not a human). Much to his horror, the Dolphin was spooked by this and begins to get very hyper, the reverse of the norm when they acquire new morphs.
* Cassini's legacy with montage videos and artwork, essentially giving the spacecraft the equivalent of a funeral.
* Cassiopeia comparing the beauty of her daughter Andromeda to that of various goddesses ticks the gods off.
* Cassiopeia of Aethiopia was full of pride when praising the beauty of her daughter Andromeda. Who took offense to this
* Cassiopeia Quinn: Cyborgs are very common in the setting, ranging from people with comparatively minor augmentations (such as Katya Kreuz's mechanical limbs) to much more heavily modified ones (such as Dr. Botz and her bevy of augmentations) to full-conversion 'borgs with only minor organic components left (such as Zeke, who's down to a mostly organic brain in a fully robotic body, and Motor Minx, who has a partly organic head and is entirely mechanical from the neck down).
* Cassiopeia Quinn: During "The Big Race" arc, Headhunter siccs a small horde of his mercenaries after Cassiopeia, including Clawlossus, Mercy, and Old Salt.
* Cassiopeia Quinn has Zeke, the “robot cowboy IN SPACE” who seems to be in a relationship of this sort with Cassiopeia.

* Cassiopeia Quinn Madison Vrax — the story revolves around both her and the title character, and is told from both their perspectives.
* Cassiopeia Quinn: The Kyre normally resemble gigantic, monstrous arthropods, although their ability to passively assimilate other species' traits into themselves means that ones who travel a lot tend to be varying degrees of humanoid, varying from "oddly-colored human with antennae and no pupils" to "upright warrior ant".
* Cassiopeia Quinn: Triterrans, a three-armed species, determine their social rank by which side they have more arms on. Having two right arms is seen as a sign of intelligence and strong morals, and affords a higher social standing; having to left arms is seen as a sign of a sinful nature, and results in ostracism and discrimination.
* Cassiopeia's character models were created by rotoscoping clay models, rather than being 100% computer-made like this one
* Cassiopeia, who decides to abandon her life as a Socialator to become a Med Tech. Other than her past life, she is sweet and kind, often looks after Boxey and even takes care of an ill-ridden Adama in "The Young Lords".
* Cassius Ceramix even jokes that if all Gauls were like him it's the Romans who would look Gaulic. Also note how everything in his home is a cobbled mix of Roman and barbarian elements.
* Cassius is a Denarian who surrenders his immortalizing Phlebotinum coin so the honorable Knights won't kill him. He taunts the knights by saying he need only return to the
* Casson Family Series. He knew her first, so Eve didn't even really mind.
* Casson Family Series is that Rose (who is only 8/9 at the time) has a crush on Tom Levin, who is at least 12/13 at the time, but she isn't aware of it herself that she has a crush on him, whereas everyone else in her family is cognizant of it.
* Casson Family Series. She is described as recklessly boisterous (going so far as to cause a traffic jam just to meet a boy her brother knows—when she's only eight!) and, when told that her father is going to New York, she about bursts with energetic excitement.
* Cas spends most of season five looking for his Father, in hopes that if directly entreated he will fix all this injustice and madness. Eventually they manage to get in contact with a being who is in contact with God. God's message is:
* Cassy, an animate drawing of a sweet and friendly young woman who everyone at the Foundation adores. Unfortunately she found out about her two-dimensional condition and has been in depression ever since.
* cast a bad light on their memory — and Bob was a good friend/relative/lover of the dead person.
* Cast a Deadly Spell. After a restaurant owner tries to put a written curse on him, Philip Lovecraft goes after him into the kitchen to return it. The curse manifests when a demon comes out of a pot on a stove. Philip joins forces with a cook to defeat it.
* Cast a Deadly Spell: Amos Hacksaw, a sorcerer intent on sacrificing his daughter to summon the Old Ones so he can become a god.
* Cast a Deadly Spell. But the Elder God throws her back in disgust. It seems that her "virgin" qualification had been revoked when Daddy wasn't looking...
* Cast a Deadly Spell — Lovecraftian noir series. 2 films since 1991.
* Cast a Deadly Spell mentioned above, with Angel being hired to ensure the daughter remains a virgin (with precisely the same outcome).
* Cast a Deadly Spell so Phil's smarter than the average bear for not doing that.
* Cast a Deadly Spell: Theft of a book and killing of the thief → conspiracy to call Cthulhu to Earth.
* Cast a Deadly Spell using magic in order to keep his integrity, to the point where he is one of the few people in the city who does; essentially, he's a case of Screw The Supernatural Powers, I Have Rules:
* Cast a Deadly Spell. When Lovecraft refuses to cooperate with the police, his friend Lieutenant Bradbury turns a bright light in his face and starts questioning

him.
* cast an entire exorcism spell after his fax machine began printing for the first time. In his defense, the first thing it printed was a symbol for a medieval cult that used evil magic.
* cast an illusion upon himself making reality a dream and thus letting them escape life-threatening situations. However, the eye shuts permanently after it is used once. The same apply to the techniques counterpart, Izanami, that locks the victim in an endless loop.
* Cast as a Mask: A character and their disguise are played by separate actors.
* Cast as a Mask: A character and their disguised persona are played by separate actors.
* Cast as a Mask: A character and their disguised self are played by separate actors.
* Cast as a Mask: A character's different identities are played by different actors.
* Cast as a Mask: An inversion. Different actors play a character's different identities.
* Cast Away and return to civilization. After he makes it back, he then has to deal with the fact that life has moved on without him while he was away.
* Cast Away. At the very end Chuck is literally at a cross-roads in a large open area.
* Cast Away: Chuck is missing for so long that his fiancée has him declared legally dead. When he finally returns, she has married another man.... though not quite moved on.
* Cast Away: Chuck Noland comes home after years being stranded on an island to find that his friends had him declared dead and actually had a funeral, and his fiancee married another man.
* Cast Away, Chuck returns the pocket watch his then-girlfriend Kelly gave to him before he spent 3 years on a deserted island and Kelly got married to another man during that time. He explains to her that it's a family heirloom that should stay with her family.
* Cast Away. Chuck wound up so far off the beaten path it took him five years to get home, and the search and rescue team was looking for him hundreds of miles away.
* Cast Away has a four-year skip in the middle of it, between Tom Hanks' initial efforts to survive on the island, and his eventual escape from it.
* Cast Away has Ian trapped on a sandbar and talking to polystyrene coffee cup.
* Cast Away in the rain. After Chuck's rescued from an uninhabited island and returns home, he learns that the love of his life Kelly married somebody else. He leaves, but she runs after him and smooches him in the rain.
* Cast Away is dominated by the sound mixer's commentary on sound effects during the most pivotal scenes of the movie — most notably as he gets off the island. While some of the commentary is interesting, you would think by listening that the sound effects were the absolute centerpoint of the film.
* Castaway on the Moon. No one driving the bridge or sailing the river ever sees him, because no one's supposed to be there.
* Castaway on the Moon, Seong-geun, who is marooned on a deserted island, tries this in an effort to catch pigeons. He screws it up the first time but later successfully traps dinner.
* Cast Away reacted negatively to the ending because it doesn't follow this pattern.
* Castaways of the Flying Dutchman ends up on the Dutchman when fleeing his abusive stepbrothers, where he is set to work with the cook.
* Castaways of the Flying Dutchman part of the two castaways curse is that they no longer age, so they are an unaging teen boy and his immortal Labrador Retriever.
* Cast Away takes at least a half-hour to set up everything before Chuck winds up stranded on the island.
* Cast Away through most of the film. Lines were even written in the script for it, so Hanks would know exactly how to play those scenes.

* "Castaway" was written by Nancy Neilson, the second voice actress for Elf Cup.
* Cast Away, when Chuck returns, his girlfriend is already married to another man, since Chuck had been missing, presumed dead for several years. But the film ends with him meeting a possible love interest.
* Castelo Rá-Tim-Bum, this is the standard explaination for anything unusual that happens in the series. It is about a wizard boy, after all.
* Castelo Rá-Tim-Bum where Caipora ate some bananas and kept throwing the peels everywhere. Pretty much everyone in the castle slips on them.
* Castelo Ra-Tim-Bum) to her pet crow Adelaide (and, by extension, the audience), by reminiscing the time when she actually was there.
* Caster Alter calls for Berserker with a command spell just in time to, albeit inadvertently, save Rider from dying to Berserker.
* Caster Gun qualifies. It was formerly used by mages in many places across space. By the main story, It's not unique but very old, and very rare. It's just barely common enough for its ammunition to be available, albeit in extremely limited supply, in various knick-nack shops and from specialty merchants.
* Caster herself is also unskilled but strong. Physically she is weak enough to literally get beat up by a teenage girl, and her Noble Phantasm is easily the weakest one of the eight Servants, however she is able to use guile, pragmatism and outright cheating on several occasions to become a major threat to our protagonists.
* Caster in the "Unlimited Blade Works" scenario. Yes, she captures and tortures Saber, holds Taiga hostage, and is responsible for many a Bad End in Unlimited Blade Works, including one where she
* Caster partially ruptures his lungs, he continues chatting. True Assassin eats his way out from inside he beats everyone else, his master wins and gets the Grail and he still won't get anything because he is a fake Heroic Spirit that is something of a composite identity, and therefore has no wish to be fulfilled (not that the Grail would grant a wish to fake like him). Why bother?
* Caster Servants have a Skill called Territory Creation, which lets them designate an area as their "Workshop". Inside the Workshop, they are able to gather Mana from the environment (Servants normally need to get Mana from their Masters) and have some control over the surroundings.
* Caster's original Master, Atrum Galliasta, set up a system designed to siphon mana from abducted girls, and solidify it into crystals he could use in his magecraft. He threw a hissy fit when Caster showed him she could generate a better product sans the entirely unnecessary suffering, which was one of the reasons she decided to turn against him.
* Caster's original Master attempts to betray her for the younger and prettier False Caster, just like how Jason of the Argonauts betrayed her original self, Medea, for a younger and prettier princess. She gets so pissed off at this happening again that she kills him and then tries to kill False Caster until she escapes.
* Caster was really thinking. It's not even entirely clear to the reader whether her affections are reciprocated.
* caste. These battles often are to the death. Once you have a bloodname, you get to have a vote on clan-wide business.
* Castform was created by Hoenn's Weather Institute to help forecast the weather. Despite that, Castform can have a gender and is capable of breeding.
* Cast from Calories: A character has to eat constantly in order to use their powers.
* Cast from Calories: Superpowers come from the calories in the person's body.
* Cast from Calories, which is more an explanation of how magic works in a specific universe than an actual superpower.
* Cast from Calories: You'll have to eat a lot of big meals to keep using spells.
* Cast from Experience Points: Magic fueled by permanently weakening yourself (i.e., sacrificing XP or stat points).
* Cast from Hit Points and defend and heal. Also while Cecil resets his level all his stats are roughly where they would be with the level you would be expected at

the Trial.
* Cast from Hit Points, but her need to attack and siphon off life from the enemy in order to do her job pushes her in the direction of this trope.
* Cast from Hit Points: Magic fueled by sacrificing your current health (i.e., causing your body damage).
* Cast from Hit Points: Some of the more exotic and dangerous techniques literally work like this, usually from requiring extreme amounts of qi, which is literally life force.
* Cast from Lifespan nature of tapping into the Darkness, and how they need to be careful with tapping in too deep, which translates to the Dark Knight's un-tank-like focus on MP, which is used up in large chunks with skills that trigger Darkside, and running out of it heavily stunts their ability to fight and hold enmity.
* Cast from Lifespan taxing, so even with Vercure's acceleration making it powerful, the MP cost on it and Verraise are both astronomical, and having to frequently heal or revive party members will leave the Red Mage running on empty.
* Cast from Lifespan, which is another way to look at "reckless casting leads to exhausting your MP".
* Cast from Money: These powerful powers requires in-game money to work.
* Cast from Sanity: Magic fueled by weakening the user's mental health, whether temporarily or permanently.
* Cast from Sanity: Magic or a superpower makes you lose sanity every time it's used.
* Cast from Stamina: You need to be physically fit to use many spells at a time.
* Cast Full of Gay: Most if not all of the cast is some manner of LGBT, usually gay.
* Cast Full of Gay should be maintained. The player can use they/them or she/her pronouns. The three love interests are all queer: Rosario is a pansexual nonbinary person (they/them), Chika is a cis lesbian woman (she/her) and Ishara is a trans lesbian woman (she/her). The player can enter a romantic or queer-platonic relationship with all, none, or some of the love interests. The city and the surrounding large forest have a hazy, fairy tale aspect to them, which is partially fueled by the ambiguity of location.
* Cast Full of Gay: When most of the characters in a work are gay or not straight.
* Cast Full of Pretty Boys in regards to the 'normal characters', with her Chara teasing Amu's habit of crushing on every - one.
* Cast Full of Pretty Boys Jack. They're shocked that the rumors that everyone in the family is gorgeous are well-founded.
* Cast Full of Writers: A show or movie where the main cast also serve as the writers of the piece.
* Cast Herd) ended up wearing out their welcome and are now generally considered forced by the fandom.
* Cast Herd, meaning her expected lifespan is considerably less than their's. However, there is also speculation that Sakuya is a Lunarian, who are incredibly long-lived (Eirin and the Watatsuki sisters are at least several millenia old). Also occasionally inverted due to Sakuya's time-stopping powers.
* Castiel also did manage to stay dead (or at least presumed dead) for most of Season 7 and for the first five episodes of Season 13, though the viewers knew earlier that he was going to return. Even after his
* Castiel also fits this trope. In his early appearances, he presents as a cold, no-nonsense soldier of Heaven and even makes it clear he's
* Castiel also inspired another, much later resurgence of interest in the show with
* Castiel also pulls this on Dean in season 8 while the two of them are trapped in Purgatory, first by fleeing from Dean immediately after they arrive and avoiding him for weeks to prevent the leviathans chasing him from attacking Dean as well, then by deliberately letting go of Dean's hand as they attempt to escape Puragatory, because he believes he deserves punishment and penance and that Dean is better off without him.

* Castiel and Bobby both got this after their respective deaths in season 7. Of course, since
* Castiel and frequently quite bizarre from a human point of view, while Dean's joking represents a more typical human perspective.
* Castiel and Meg share a lot of sexual tension before they make out, and later express their love for each other. An angel and a demon, how poetic.
* Castiel and Meg: She traps the angel in a circle of holy oil and taunts him. He escapes by moving very close to the demon, as if he might kiss her, but instead uses her body to bridge the fire and escapes. A number of fans actually liked this one, and Castiel/Meg was one of the show's more successful ships, and it
* Castiel being tortured (offscreen) into submission by the angels in Season 4.
* Castiel can do this, depending on how well his powers work and the situation. Sometimes it's painful for the subject, such as in Season 6 where he causes a child agony by reading his mind for the identity of a rogue angel. Other times, it seems easy for him, such as him being aware of a prostitute's daddy issues, which is
* Castiel cuts off at least two of Pestilence's fingers to get at his ring.
* Castiel destroys the mental barrier that is keeping his traumatic memories from potentially turning him into a vegetable.
* Castiel develops a minor fascination with television, trying to understand both porn and cartoons. When he
* Castiel does this to Dean in Purgatory, running away so that the Leviathan after him will only target Cas himself at the cost of risking Dean will think he's in distress or has outright chickened out and abandoned him.
* Castiel embodies this in his love for his best friend Dean (which mixes all four loves) and his adoptive son Jack, both of whom he has made
* Castiel, for all his badassery in Season 4, is this. He believes in Heaven's mission completely and follows orders without question. Even after he begins to question his orders and rebels, he maintains that the solution to the Winchesters' problems is to find God. He is completely devastated when he finds out God is aware of the situation and doesn't care.
* Castiel frequently switches between helping and opposing the Winchesters.
* Castiel goes from an angelic foot soldier (albeit a high-ranking one) in Season 4 to the "sheriff of Heaven" in Season 6 when all the archangels have been killed and imprisoned. He then battles with Raphael, the last remaining archangel, for control of Heaven.
* Castiel has been working with Crowley all season to stop Raphael from restarting the Apocalypse. Castiel makes a heartfelt plea to Dean, asking for his support and help, and tries to explain just how bad it would be if Raphael succeeded. He also says he needs Dean and points out that Dean and Sam have often done morally ambiguous things for the greater good. When Dean rejects him, this prompts Castiel's jump off the slippery slope into darkness.
* Castiel has done this a couple of times, too. In season seven he says that he doesn't want to fight anymore and refuses to engage in any active combat for several episodes because
* Castiel has some elements of this. "It's The Great Pumpkin, Sam Winchester" establishes how far his loyalty to Heaven goes, as he demonstrates a willingness to destroy a city just to stop one witch if ordered (
* Castiel is an angel who hasn't spent a lot of time down on earth, so he tends to lack basic knowledge of human etiquette, as well as failing to grasp the concepts of sarcasm, rhetorical questions, and metaphor when he's first starting out. He also doesn't quite get the point of goodbyes or even of ending conversations in a conclusive manner. Once he's done saying what he wants to say, he goes
* Castiel isn't sexually manipulative towards women, but that might have more to do with his general
* Castiel is rendered nearly catatonic in season 8 when he hears his brother Samandriel screaming because it triggers flashbacks to
* Castiel is willing to go against Heaven and Hell in order to save Dean, rebelling against his own kind in order to protect him, every time he's told to choose between his fellow angels and Dean, he chooses Dean. And he gets called out

on it, repeatedly, by various characters.
* Castiel, killing people all over the world who displease him, and presenting himself as a wrathful but just deity.
* Castiel of all people steals a truck in the first episode of season 12, in this case
* Castiel only has a technical understanding of what a lie is. On the rare occasion when he's convinced to lie, it just... fails.
* Castiel on occasion, making their pretty faces make a little more sense.
* Castiel's affection for Dean is noticeably intense and treated sometimes as a
* Castiel's ascension to God and later 'death' causes Dean to take a much harsher stance on supernatural beings throughout Season 7, most apparent in 'The Girl Next Door'.
* Castiel's attractiveness is consistently pointed out and commented on by various other characters throughout the show.
* Castiel's human vessel Jimmy was a devout, church-going man who prayed for a spiritual mission of some kind and
* Castiel's now the deadliest to sleep with, simply because he's had sex once, and... she died. So he's running at 100%.
* Castiel soon appears and reveals the Chuck is a prophet and one day the books will be known as the Winchester Gospel. However, in the Season Finale
* Castiel's vessel Jimmy. They violently oust control from Castiel inside Jimmy and it's heavily implied that Castiel was killed in the process (though he later returned) of them at once, so they are forced to leave him and find other humans to possess.
* Castiel, who has lost his grace and struggling with being human, is taken in by a kind, pretty young woman named April. He loses his virginity to her, but
* Castiel winds up getting killed early on during the 7th season. Subverted later on in the same season when it's revealed that he was later brought back to life.
* Castiel: You have reached the voice mail of [Castiel: I don’t understand. Why do you want me to say my name?] [sound of numbers being pressed] [beep]
* Castile's dad, Saffron, pulls this at the end of Chapter 4, by killing off the last enemy with a fire bomb; since Marona didn't defeat the last enemy, she didn't complete the job, and therefore he doesn't have to pay her. However, he only does this because they need all their money to pay for Castile's treatments. Ironically, Marona would definitely have refused the payment anyway had he mentioned it (as she's happy enough to have befriended Castile) and is a bit sad that Saffron thinks she'd be that concerned about the money.
* Castillo in Mexico is an old military fort overlooking Dorado. It's the home of the Los Muertos gang and Sombra's actual base of operations.
* Cast Incest: Actors who play relatives dating vs. actual relatives playing lovers.
* Cast Incest: Family members are played by actors who are in a relationship in real life.
* Cast Incest: Related characters are played by actors who are lovers in real life.
* Cast Incest: Related in the works, but romantically involved in real life.
* Casting certain powerful spells (Alter Reality, Gate, Limited Wish, Restoration, Resurrection and Wish) will automatically and immediately age the caster by a certain number of years.
* Casting Couch: An actress gets a part by sleeping with the director.
* Casting Couch: An actress gets a part in a movie by having sex with the director.
* Casting Couch: Becomes rape if the person says no to the sex but has to do it to get the part anyway.
* Casting Couch: The comic that the panel comes from is a subversion. The producer just makes the actress carry some boxes to help him move.
* Casting Couch: The only way to make it in the film industry is by sleeping with the director/producer.
* Casting Gag: An actor appears to be deliberately cast as a character similar to another character they have played.
* Casting Gag, as the actor playing Murdock is from South Africa, and does, in

fact, speak Swahili.
* Casting Gag of the original to be a mentor or give their blessing to the new crew.
* Casting Gag). Subverted when someone insults Mom, and she tells her husband to "Say something!". He does: "Thank you." (He speaks in all his subsequent appearances.)
* Casting is also very secretive. Karen Gillan was hired to act in an upcoming production called "Panic Moon". As it so happens, "Panic Moon" is an anagram for "Companion".
* casting of adults in the roles of the four bratty children. Imagine these things happening to ACTUAL children.
* Casting Rain, there's a moment (a whole chapter, really), where Grillby realizes all of his friends are dead, leaving him alone to fight an increasingly hopeless war
* Casting Spells, when Chloe finally inherits her magical powers, she ends up teleporting her love interest around accidentally by thinking of him. Oops.
* Casting the Giga Slave, meanwhile, turns her hair white and exhausts her. Fortunately, the first time was at the end of the novel, so it wasn't as big of a deal.
* "Cast Iron Heart": Later cut by both Blackhawk and Linda Davis as an album track.
* Castithans has him put on a rack of sorts in a public place, where other Castithans put rocks onto a plate that increases the torture. The punishment is meant to cleanse the guilt of cowardice (the alternative is death).
* Castle”, Castle and Watson in particular have a moment where they muse on their status as ‘Enablers Anonymous’, tolerating the investigative brilliance of their respective partners even at the cost of their social lives.
* Castle about how the victim (his bandmate) was going to "Pete Best" him.
* Castle, a conversation between Beckett and Senator Bracken, the man who, years earlier, hired a hitman to kill her mother, upon being forced to defend the man against an unknown sniper:
* Castle: A couple episodes of deal with the villain of the week using mercenaries.
* Castle, '"A Deadly Game", features a simulated spy game that involves a secret message delivered by self-destructing pen.
* Castle. A double whammy followed, as the wife confronted the husband's best friend about the girl, who had no idea what was going on and was trying to calm her down and comfort her... when the husband walked in on them. Guess what conclusion the husband leapt to.
* Castle: After Beckett is shot in the Season 3 finale, she complains a few episodes into season 4 that the scar from the bullet wound and subsequent surgeries sometimes pulls.
* Castle after the eponymous mystery novelist begins basing his novels around a character based on her.
* Castle Aincrad. So big, it's essentially a world within a world (though it's actually the entire
* Castle a kidnapper requires a ransom payment in a specific make of backpack. When the drop is made, the cops take down a man with that style of backpack, only to find that this trope was in effect.
* Castle, Alexis lets Ashley's rat escape. After she apologizes to him for losing his beloved pet and he forgives her, Martha's shriek is heard offscreen. Alexis and Ashley look alarmed, but Castle merely says, "Found him!"
* Castle), all of whom are portrayed as acquaintances that Castle has befriended as a successful author.
* Castle. Also sometimes ending in lampshading from one of their colleagues.
* Castle, although merely a shadowing writer, Richard Castle has been given a lot of responsibility within the unit, including questioning witnesses and examining evidence and crime scenes (albeit always with Beckett observing him). Lampshaded in one episode where he excitedly calls a newspaper to acquire confidential information after a brainwave, only to stop when they ask him who he is and hand

the phone over to Beckett, sheepishly admitting that "I sometimes forget I'm not actually a cop."
* Castle, a major blow is dealt to whoever ordered Beckett's mother killed when his favorite hired gun is killed. The one who did that killing sent off a bunch of info to a fourth party so that there would be no retaliation against Beckett. Unfortunately, that mail arrived too late to prevent a sniper taking a shot at her.
* Castle Amber from Glantri in the Known World to the dimension where the country of Averoigne exists.
* Castle Amber "The Gate of the Silver Keys" can be opened only by three silver keys found at various places in the Castle.
* Castle, an actress visits Rick Castle at home, thanking him for their relationship and her part in Castle's new movie. She walks out the door:
* Castle and an untimely death on a train (the dead woman was a wealthy heiress who had various minor criminal convictions and hired a dancer with a strong resemblance to her to pose as the heiress and deal with the obligations she didn't want to deal with, the dancer taking the opportunity when the heiress died in a train accident).
* Castle and Beckett exchange romantic Valentine's Day gifts. After Castle's goes awry (he accidentally slips his gift, a pair of beautiful earrings, into Beckett's boss's blazer instead of hers, leading to a wacky misunderstanding), we get the big reveal of Beckett's gift: a drawer. Of course, this being Castle, it takes him a minute to get it, and he feels all around the inside for his promised romantic present.
* Castle and Beckett finally resolve their four-year will they/won't they arc by doing it.
* Castle and Beckett go undercover as newlyweds at an Old West-themed resort to solve a murder. Subverted because they actually married at the end of the previous episode, so they are indeed newlyweds.
* Castle and Beckett investigate the murder of a man taking part in a spy LARP vacation, using it as a cover for meeting up with his mistress. The killer turns out to be her husband, whereas the victim's business partner ironically alibis out on grounds of he was in bed with the victim's wife at the time of the murder.
* Castle and Beckett's ex-boyfriend Will Sorensen. Halfway through the episode, Beckett flat-out suggests they just drop their pants and get it over with.
* Castle and Beckett upgrade their relationship, this takes a pretty big turn. It goes like this, per season ender:
* Castle and Beckett, who also like to dance and sing together in the shower.
* Castle and Beckett will often have these moments simultaneously (or near simultaneously) in order to demonstrate how they click (in
* Castle and Detective Ryan is engaged. However, if you watch closely to first and second season episodes, Esposito is flirting with Lanie.
* Castle and doesn't remember anything. As a part of the investigation the police end up bringing in his ex-wife (who he doesn't remember). At the end of the episode the two of them decide to go out on a date together.
* Castle and had his identity revealed, but showed up for one last meeting in the same mysterious manner even though he was addressed by name.
* Castle and his daughter are watching a zombie movie at the start of the episode, but he gets called away on a plot hook. At the end of the episode, he's consoling her over her boy troubles.
* Castle and not Beckett, did anyone really expect that Beckett would die after being shot at the end of Season 3?
* Castle and one version of the show's intro had this with Castle saying his name.
* Castle, and probably several times. The protagonists are investigating a murder and an early suspect turns out to be an agent of the FBI or ATF who was investigating the victim (or employing the victim somehow, or investigating or another suspect) for their own reasons.
* Castle app developer, who is in the middle of a gaming party with his buddies and quickly infuriates Castle when he reveals he mixed the super-rare bourbon with cola.
* Castle are tracking down the owner of a safe deposit box, no one is answering the

door. Ryan says "Did you hear that?", Esposito immediately follows with "Yeah...", fakes a "help" in a female voice, and they barge in... to find a dead body.
* Castle, a safe deposit box belonging to a mob figure is broken into. The mobster claims it contained his stamp collection. One of the cops asks him how long he has been a philatelist. His response is "Hey! I don't roll that way!"
* Castle, as Castle has no real authority figure in his life except for her.
* Castle, as they break into a guy's van, in which he's busy using a large saw to break into a safe:
* Castle; at one point, Castle is framed for murder by an old enemy who informs him that he's arranged for Castle to be murdered as soon as he arrives at Central Processing. Castle proceeds to arrange for his escape from custody, at which point he and Beckett work together to prove that he was framed. Once the proof is discovered, Captain Gates points out that Castle will still need to surrender himself to the District Attorney and will face charges for escaping police custody, but notes that the unusual circumstances mean that he'll most likely only receive a slap-on-the-wrist fine and the time he's already served as punishment.
* Castle. At the end of "The Mistress Always Spanks Twice" she shows up, played by Dever's wife, Juliana Dever. The characters later marry.
* Castle author ghost-write a tell-all about the bombing of an oil tanker in the Seventies. They theorize she was trying to manipulate public opinion ahead of surrendering herself for trial.
* Castle) because all girls are used to comforting crying friends, apparently, and Alexis can understand her friend's drunken slurring without a problem, both of which confuse Castle.
* Castle: Beckett and an FBI agent talk about Castle in the car in the episode "Tick, Tick, Tick".
* Castle. Beckett and Castle both insist that Beckett did not read a small time crook his rights and that he is free to go. The real ruse works in that they aren't after him, but his boss, who would see him walk out of the precinct (with suspicious ease) and assume he was working with the cops. The crooks only chance at survival is to implicate himself further so that the cops would arrest him, and thus keep him in custody.
* Castle, Beckett and Castle get locked in a refrigerated container. While they are not encased in ice, they do estimate the temperature as 'below freezing'. They do not become all cold and stiff, instead they sit on the ground, shiver dramatically, get frosted eyebrows and slowly lose consciousness. Some time later (we don't know how long) they are rescued, diagnosed with mild hypothermia and just rush back to the case. No, you know, frostbite or any damage to their toes or fingers...
* Castle. Beckett, growing fed up with Castle insisting he saw a murder, goes to the apartment, only to have the tenant grab her and pull a knife on her before the lights go out. Castle meets Esposito and Ryan outside the apartment and charges in...just as the lights turn on to reveal the surprise party.
* Castle: Beckett is this for some time, especially at the beginning of the series (with Esposito calling her exactly that), but being with Castle almost every day mellows her out a lot.
* Castle; Beckett's revealed to be a closet fan of the soap (and Lanie a less-closeted fan) by revealing too much information about the absurd plots, and even Esposito recounts the crazy plot of a Latino 'telenovela' he used to watch with his grandmother.
* Castle, Beckett's team and a SWAT team break down an apartment door, thinking there's a terrorist named S. Nadal Matar on the other side of it. One of the apartment's owner's cats goes diving off the top of a nearby refrigerator and lets off the screech.
* Castle, Beckett tells the Captain, "Keep it. I resign." This stems from her realization of how her obsession with her mother's murder was destroying her life and keeping her from having the relationship she wanted with Castle. She still has to serve her suspension but she's back on the job in Season 5, episode 2.
* Castle. Beckett was forced to shoot him before figuring out who hired him to save Castle.

* Castle be dead!" before the radio explodes in Volkov's hand. Cut to a flashback scene where Hunt outlines his plan; when the radio explodes, Castle uses a smaller explosive he smuggled in a watch to blow the lock off Alexis' cell, then grabs her. The two then head for the back exit and run like hell until they get to the US Embassy.
* Castle Begins as a series about random zombie slashing, then becomes the most awesome stick animation on the web ever.
* Castle, being a cop show, doors suffer much abuse. Castle is thrilled when he finally gets to break down a door himself (albeit ungracefully) and save Beckett.
* Castle, believe it or not. On the Richard Castle website, Castle wrote an article about what he called a Ponzi Plot. He explained that if you don't eventually resolve it, you lose your viewers.
* Castle brings Kate Beckett a cup of coffee just so he can see a smile on her face. Given what a serious and sombre character Beckett often is (particularly in the early seasons), and given the way Beckett's (and Stana Katic's) face lights up whenever she smiles, it's hard to blame him.
* Castle by an insane beauty surgeon intent on stealing her (admittedly gorgeous) face, and Beckett spending almost an entire episode forced to stand completely still because someone rigged her apartment with a pressure plate-activated bomb right under her living room carpet.
* Castle Caldwell and beyond had a lizardman carrying a woman in that manner.
* Castle: Came incredibly close, albeit thanks to some special (but not rare) circumstances. A popular talk-show host named Bobby Mann was found dead of a suspected heart attack. However, Castle, who was just on his show and had Mann whisper in his ear that he thought his life was in danger, suspects murder. Two tox screens came back clear, but at Castle's insistence, they dig further and find the truth: Bobby Mann was taking a very powerful medication for depression. The medicine reacts fatally with anything fermented. Knowing this, they realize the cranberry juice he was drinking was spiked with (fermented) balsamic vinegar, almost undetectable under the circumstances.
* Castle, Castle and Beckett have to check Eastern European shops to try to find a candy bar the victim had (so that they can hopefully identify her). Beckett tells the captain Castle "had to buy something in every shop!" He's then seen showing off a set of new nesting dolls, gleefully explaining that they defy the laws of physics because "Just when you think there can't be another one..."
* Castle, Castle finally says "I love you" to Beckett just before she loses consciousness after being shot by a hitman. It is as yet unknown whether or not she will remember it.
* Castle, Castle often uses his connections to get lab tests of various things related to the case he's helping with bumped in priority so that the results come back in a matter of hours rather than weeks.
* Castle: Castle's mother and Alexis' grandmother Martha Rodgers is still leading the good life. She's an actress.
* Castle, Castle spends an episode hanging out in a second-grade classroom. At the end, he and the class bully exchange a "truce" hug. Each puts a sign on the other's back. "JERKFACE" and "FROG BREATH".
* Castle: Castle tells Alexis that he's going to set a new content filter on their computer to limit her exposure to tabloid information. An amused Alexis reminds him that he had to ask for her help to set up the content filter level they already have.
* Castle Cats, a feral adopted by the staff of San Francisco Fire Department Station 49.
* Castle Cats available by being purchased with real money, making it impossible to complete your collection by playing for free.
* Castle Chase him various items was that he wanted to use them to make a gift of affection for her.
* Castle Circle series have wings, but only one character can use them to fly.
* Castle Clue, where the death of Dan Rice is officially solved forty-five years afterward.

* Castle Colditz, a supposedly inescapable Nazi prison where the Reich bunched up its more troublesome prisoners, i.e. those who had already attempted to or escaped from other prison camps. The fact that the castle itself was a very, very poor prison in and of itself was compounded by the ingenuity of its inmates. One of the last attempts before the war ended involved a full-blown glider built in one of the attics. Although the prisoners didn't get a chance to use it, it probably would have worked. The launch mechanism was a bathtub full of concrete to be pushed out a window.
* Castle comes across a woman about to be raped by a group of thugs in an alley.
* Castle Crashers, and considering the game's atmosphere... not so unexpected.
* Castle Crashers development team contained by the aliens in individual jars.
* Castle Crashers had a glitch that would cause the boomerang to get stuck on any three bosses if the boss was between you and it. Since experience points are given based on how much you hit an enemy and not how much damage you deal, and the boomerang does 1HP damage per hit, the stuck boomerang would rack up hits and increase your experience quickly. A patch fixed this, but replaced it with a completely different Good Bad Bug that made the Boomerang able to demolish any destructible barrier in one throw.
* Castle Crashers. It just won't stop chasing you until it's dead, no matter how many arrows (or magic attacks) you throw at it.
* Castle Crashers the poison is green, and the Green Knight can use poisonous attacks.
* Castle creator Andrew Marlowe based the show on his own relationship with his "muse", his wife Terri Edda Miller. She is also a writer and wrote some of the best-loved episodes of the show.
* Castle. Cut to the office, where she's being questioned about the training exercise.
* Castle dealing with an Occupy Wall Street type of protest, a background character is shown holding one of these signs, but the word "work" has been crossed out and replaced with "protest".
* Castle dealt with someone murdered while engaged in corporate espionage.
* Castle dealt with the murder of a baseball player. Though Beckett (and her father) are baseball fans, their knowledge isn't really required to solve the case, though Beckett does get to meet Joe Torre (someone who Castle, though not a baseball fan himself, has socialized with before).
* Castle Death them, escaping the maze. Still, there is no "fair" way to beat the maze — all paths within the maze lead to those two arches, and both of those arches autokill the player if he chooses one.
* Castle, Detective Beckett has a tendency to yank Castle's ear when he irritates her by listening in on conversations, getting close to her, and generally annoying her. Which is often.
* Castle: Detective Kate Beckett was driven to go into law enforcement after her mother was murdered. She finally manages to bring the person who ordered the hit, Senator William Bracken, to justice.
* Castle diary of a 1940s-era P.I., and as he reads it, we see scenes from it playing out, with all the characters played by the main cast. (Castle's character, of course, falls in love with Beckett's character at first sight.)
* Castle disposed of this way, and just like the trope description above, the ruse is discovered at the funeral when the pallbearers drop the coffin open.
* Castle does this for Beckett in the episode "...Boom" when a serial killer blows up Beckett's apartment:
* Castle episode "A Deadly Affair". Having found the body of the victim in her apartment, Castle picks up the gun to defend himself when he hears people approaching and thinks it might be the killer returning. Unfortunately it turns out to be Detective Beckett and her team.
* Castle episode "Always Buy Retail" contains a good example of this trope. Castle and his ex-wife having quite a brawl, with her legs knocking glasses and pictures off the table, them breaking the bed, her ripping off the curtain, and eventually both falling off said bed so hard that pictures fall off the wall and break. And it

seems that it was most casual too.
* Castle episode "Anatomy of a Murder", Castle is speculating about how a saucy love triangle might have led to a doctor's death when this happens:
* Castle episode "Death Gone Crazy", soft-porn mogul Beau Randolph is willing to dismantle his entire porn empire and put the money towards funding children's television because he had learned that he was going to be a father and wanted to be able to be a better example for his daughter.
* Castle episode involving a murder in a vampire LARP community, Ryan remarks that he dated a girl once who was into the lifestyle but it didn't work out.
* Castle episode, Javier Esposito, a juvenile delinquent-turned-homicide detective, threatens to shoot and plant a gun on a criminal manipulating underprivileged youth into helping him commit crimes.
* Castle episode "Last Call". Before exploring a hidden passageway under a bar, Castle rigs up a torch by placing a roll of toilet paper in the cup of a plunger and soaking the paper with liquor.
* Castle episode "One Life to Lose" has an inverted example; a group of internet fans all agree to send axes to the producers of their favorite soap opera as part of a campaign to get the head writer fired.
* Castle episode "One Life To Lose"; the behind the scenes environment of the popular soap opera isn't exactly free of intrigue, bitchiness, and people sleeping with and/or hating each other and playing their own agendas, but it's no worse than some of the other walks of life the characters have entered.
* Castle episode "Still" after Castle saves Beckett from a bomb and Beckett fights the urge to kiss Castle in front of Captain Gates:
* Castle episode "Still", Beckett is trapped on a pressure-plate triggered bomb that's set to go off in thirty minutes or if she steps off the pressure plate, whichever comes first. At the end of the episode when they manage to disarm the bomb and Castle informs Esposito and Ryan that Beckett is safe, everyone in the precinct starts cheering and hugging each other.
* Castle episode "The Double Down," it was Strangers on a Boat. Castle even does the "criss-cross" gesture. As a writer, he is understandably excited.
* Castle episode "The Good, The Bad & The Baby", Castle tells Beckett that his family has a tradition to wear costumes for Thanksgiving. She shows up to dinner in a costume... but she's also suspicious enough about the whole thing to bring one for him as well.
* Castle episode "Time Will Tell", villain Ward is beating up Castle and Beckett and is about to kill Castle when Simon Doyle shows up and drives him off. Beckett promptly arrests Doyle for having escaped police custody earlier.
* Castle episode "Undead Again". perpetually grouchy medical examiner Perlmutter greets the main characters as "our intrepid heroes...and Mr. Castle".
* Castle, Esposito and Lainie apparently become this after their romantic relationship fizzles: Lainie mentions them having broken up but that they still get together for the odd "booty call".
* Castle establishes that Beckett is within diving distance of the tub.
* Castle Falkenstein also uses the "magick" spelling for what wizards do.
* Castle Falkenstein, America consists of the United States of America (from the east coast to the Mississippi), the Republic of Texas, the Bear Flag Empire of California (ruled by Emperor Norton!), the Twenty Nations Confederation and the Unorganized Territories.
* Castle Falkenstein are cast from ambient thaumic energy, but it takes time to gather this, so mages in a desperate hurry may cast from hit points instead; this is called "unraveling" and can be fatal (though if it isn't, you get better eventually).
* Castle Falkenstein are so fascinated by humans is that they themselves are not creative.
* Castle Falkenstein backstory tells of Tom Olam, computer game designer, who is summoned into a world of Victorian Steampunk Fantasy by a mighty spell. Although he proves to be of some value, the real prize is the book he brought with him - he picked it up at a used book shop cheap, and it holds the secret to saving the day.

* Castle Falkenstein dwarves are also raised and named by their mothers. Their main drive toward industrialism and workmanship is so they can make or discover something impressive enough to make a name for themselves with, so they don't have to introduce themselves as "Buttercup" or "Morningblossom".
* Castle Falkenstein. Essentially, the Djinn have their own mosques, hidden underground, because attending a human mosque is liable to be disruptive to proceedings (they generally turn invisible when making the hajj). Though funnily enough, these ideas all come more or less directly from genuine Muslim folklore.
* Castle Falkenstein has The Fair Folk variety, who function as the enforcment arm of the Unseelie court.
* Castle Falkenstein, most forms of sorcery require creating a specific seal or diagram first in order to channel the magic.
* Castle Falkenstein-plus-magic alternate world, in which he wrote the rules to the game using cards because the local nobility were scandalized at the thought of gaming with dice. Some of the books are written by Olam himself, while others are written by residents of New Europa.
* Castle Falkenstein supplement introduces the Lightning Hurler (more formally, the Focussed Electrical Discharge Cannon). It fires a lightning bolt as far as the horizon that can burn its target to ashes. It's even capable of destroying the walls of a fortress.
* Castle Falkenstein, the Freemasons are a sorcerous order and they run the United States. Officially. It's actually written into the Constitution that the President has to be a member, which means he has to take orders from the Grand Master on pain of death.
* Castle Falkenstein, the heroine does this to a Worth of Paris gown when attacked at a ball (and it is mentioned as a standard tactic for female characters who are attacked at formal affairs).
* Castle Falkenstein, there is an order of wizards called The Cabinet of Cups and Wands who mix actual spellcasting with stage magic.
* Castle Fantasia 2 Renewal, though they do tend to subvert their purpose in battle scenes, where she looks rather bug eyed.
* Castle father. And when she shows up at the police station, everyone minds their language.
* Castle featured a lawyer who had given up law to become a dominatrix.
* Castle featured a serial killer who carved letters into the bullets he used to kill his victims. They spelled out a message to the detective assigned to the case.
* Castle Federation It causes some problems when it clashes with more liberated mindsets.
* Castle first tells Beckett that he loves her (adding that he knows she knows about it) and confesses that he kept secrets from her to protect her.
* Castle, Forest, Island, Sea has a book that you can read and live its contents. The book is about whatever you like best. Will you stop reading?
* Castle. For her part, Beckett decides she can still like the character regardless of what she thinks of the actress.
* Castle Freak (1995): John throws himself off a tall walkway so he can drag the villain down with him.
* Castle get promoted in the last season, while Ryan and Esposito decide to take the Sergeant's Exam.
* Castle gets killed while in the middle of a "spycation" that plays out a lot like an ARG. Castle and Beckett spend the first third of the episode thinking he's a real spy, with hilarious consequences when they try interrogating one of the other players who thinks they're part of the game.
* Castle getting run off the road and his car set on fire while on the way to the wedding from submitting the annulment paperwork.
* Castle gives us the rare heroic version in the person of Rick Castle himself. He's very rich, very famous, and shows absolutely no hesitation when it comes to using those things to help his cop friends get through roadblocks he finds annoying (for example, calling the Mayor to complain to get a forensic test moved up the priority list).

* Castle gives us this gem, when his daughter considers trying out for cheerleading.
* Castle Greyhawk Fudge the Incessant waits at the entrance/exit to the dungeons to collect a tax from any adventurers leaving the dungeons with treasure. He automatically spots any attempt to sneak valuables past him.
* Castle Greyhawk notebooks, but he has also dropped the project. Finally, a dedicated fan who knew both Gary and Rob and had played in Castle Greyhawk released his own version of the dungeons starting on level 2, which is probably the closest we will ever get to the actual Castle Greyhawk.
* Castle Greyskull may look like a skull, but it isn't grey. So how did it get its name? Answer: It was named after its original owner. An episode of
* Castle had an episode "The Blue Butterfly" involving the 50-year-old diary of a gritty private eye, a scuzzy crime boss, a gorgeous gun moll, and a diamond-encrusted butterfly. That one actually turned out very nicely.
* Castle had a song with the lyric "Death, she draws near." After talking with his daughter, who was a fan of the victim, Castle learns that she was into Tarot and using "Death" to mean "change," more specifically, a person who had enabled her to change her life for the better.
* Castle had a teen girl make one of these as a prank to her friend (though it was very simplistic, basically a greeting, pause for response, and then the prank interrupting). Said friend then used it as an alibi when she murdered the girl, making it seem like her death happened hours later, because clearly she was video calling so she must have been alive.
* Castle Hangnail is a magical duel between the protagonist, a Wicked Witch, and the villain, an Evil Sorceress. It's specifically referred to as 'the type people write songs about' (because Sorceress spells are powerful and flashy, while witches are stubborn and tricky).
* Castle Hangnail, it's mentioned in passing towards the end that one of the Evil Sorceress's henchmen, after being taken to hospital to treat his injuries, fell in love with his nurse and became a completely reformed character.
* Castle Hangnail, Molly and Sarah can't be in the same room for five minutes straight without discord, but woe betide anybody who mocks Sarah in Molly's hearing. "Nobody calls my twin stupid but me!"
* Castle Hangnail, Molly slides down the banister of the castle's main staircase at one point when she's in a hurry to answer the door.
* Castle Hangnail, one of the servants in the Castle is Serenissima, whose father was a genie and whose mother was part-mermaid. She manifests as a cloud of steam and lives in a teakettle instead of an oil lamp. She's employed on the same terms as the other minions, and doesn't owe any special obedience to whoever possesses the teakettle.
* Castle Hangnail. Over the book Molly realizes that Eudaimonia had been manipulating her, stealing her power, and was actually seriously evil.
* Castle Hangnail. She uses it to good effect in the final battle against the evil sorceress.
* Castle Hangnail, the castle's cook has an idiosyncratic way of speaking that sticks to present tense and avoids pronouns and other connective words, and comes out sounding vaguely Russian.
* Castle Hangnail, the castle's cook has an irrational hatred of the letter Q as a result of a past trauma. This mainly manifests in a running gag about Molly finding books and bits of books missing whenever she goes to look anything up in the castle library.
* Castle Hangnail, the castle's minions are all members of the Minions Guild, which has standardized testing and levels of qualification. It's mentioned that there's another separate union for heroes' trusty companions. Although not itself a union, the Board of Magic that oversees evil lairs and makes sure they meet professional standards is an expression of a similar idea.
* Castle Hangnail, the evil sorceress Eudaimonia is fond of encasing minions in ice blocks when they incur her displeasure. None of the characters this happens to in the story take any lasting harm from it.

* Castle Hangnail, the ghost Edward recalls that the king back in his day was Mad King Harold, who believed he was a cuttlefish, proclaimed himself the Emperor of All Oceans, and tried to declare war on the clouds for not paying tribute.
* Castle Hangnail, the ghost Edward remarks that modern politics, with its Prime Ministers and Parliamentarians, isn't as good as it was back when he was alive, when you got rulers like Mad King Harold, who believed he was a cuttlefish and tried to wage a war on the clouds. He stands by this even after Majordomo reminds him that it was Mad King Harold who cut Edward's head off.
* Castle Hangnail, the literary equivalent occurs when the head minion opens the door to welcome the new Mistress of the castle, who is younger and shorter than he is expecting:
* Castle Hangnail, there's a plumber who comes to help with the castle repairs, and it's mentioned that his trousers have a tendency to ride down at the back and display more of him than most people would prefer.
* Castle Hangnail, this is discussed; the minions have standards about what kind of behavior is acceptable from a Master. Handing out strict punishments for minor infractions is perfectly ordinary and even expected. Killing is relatively okay, especially if he always remembers to revive the victim once he's calmed down. But there are some things that are just not on.
* Castle Hangnail, two of the castle's minions are a talking goldfish and an animate voodoo doll named Pins. The goldfish reflects on Pins's heroic journey crossing the desert and fighting monsters, all carrying the goldfish in a plastic bag. The narrator observes that it shows that minor characters can also have been heroes.
* Castle Hangnail, when Molly challenges the Evil Sorceress Eudaimonia, the sorceress immediately produces a snappy comeback, which Molly is unable to think of a snappy response to. The narrator notes that Evil people have an unfair advantage when it comes to snappy comebacks, which Molly doesn't share because she's merely Wicked.
* Castle Hangnail who used to live in the castle often said things like this to his test subjects, and it usually wasn't true.
* Castle Hangnail who used to occupy the castle; it features a button with a prominent label saying NEVER EVER PRESS THIS BUTTON — and the button has been pressed so hard it's stuck in the 'on' position.
* Castle has a double Stab The Scorpion. Beckett and Castle are facing each other, both apparently pointing guns at the other. They fire simultaneously, and both hit a bad guy that was sneaking up to take the other unawares.
* Castle has an in-universe example with Natalie Rhodes. In order to be closer to Beckett's style (since Nikki Heat was based on her), she dyed her hair from blonde to brunette.
* Castle has a suspect in one episode who isn't fond of the word "stalking". But he did follow the victim around for a few days...
* Castle has a take on this where an alternate visits the canon universe; in a world where she never started digging into Senator Bracken, Joanna Beckett wonders what would have changed if she’d taken the case while holding the same Mayan artefact that showed Castle another universe in the past, which leads to her appearing in the office of Castle’s private investigator business. Her time in this world is brief, mainly consisting of Castle explaining how things turned out here as he drives Joanna back to his apartment, but it leads to a genuinely moving moment when Joanna meets her alternate daughter, and the usually tough Kate Beckett is reduced to just saying ‘Mommy?’ before the two exchange a tearful hug.
* Castle has a theater critic who wrote a very negative review of the title character's mother, who is a Broadway actress.
* Castle has a violent episode during rehearsal, complaining about the poor quality of a sketch, and declaring the show's producer "dead". (The latter of course subsequently turns up really dead.)
* Castle has Beckett forced to pretend to be a woman who she discovers is a hired assassin. Her "boss" requires her to prove she's the woman she's claiming to be, in the obvious way, and she appears to do just that. (Several minutes into the episode

later, it's revealed that she improvised some prop blood in the victim's kitchen, then told him to play dead. Beckett is awesome.)
* Castle has Beckett tell Castle "You still kinda remind me a little of Hooch", a call back to a line of dialogue from an early episode, used in the season two opening sequence montage.
* Castle has had a major two-parter with a big guest star representing a federal agency right about this time. They were:
* Castle has one in Kyra in the episode "A Rose For Everafter," much to Beckett's chagrin, though she won't admit it.
* Castle has the eponymous character highly irritated that his leftovers are disappearing from his fridge, so much so that he sets a booby trap in the fridge consisting of a dye-pack such as those used by banks to thwart robberies. His teen daughter was not amused when she ended up looking like a smurf.
* Castle has the mystery-writer main character (played by Nathan Fillion) dealing with his party-girl cougar of a mother and his sage, sensible teenaged daughter, who also acts as his Watson. When the daughter jumps a turnstile at a subway one night because she's out of cash, she not only goes back the next day to pay, but she also demands that her father ground her. He's perfectly willing to let it slide, but she's insistent.
* Castle has the titular writer-sleuth realize that a photo of the family she works for in the home of a nanny is the same as the photo he saw in the family's home, except with the mother cropped out of the picture so it looks like the father, the nanny, and the kids are a standard nuclear family. Of course, this is a clue that the nanny did it.
* Castle has this reaction to his own daughter while at a sci-fi convention. After cooing to Beckett about how cute Alexis was dressed as a little Princess Leia, he later freaks out when she walks by (under)dressed in a
* Castle, he decided that he did not want to delay their wedding a minute longer. Beckett agreed and the two of them were married in an intimate service attended by their immediate family.
* Castle, he is a genuinely good guy who really does care about Beckett and seems to make her happy.
* Castle ("Heroes & Villains", s4e2), a victim is laterally bisected apparently through his skull by what turns out to be a samurai sword.
* Castle Heterodyne at various points within the Castle arc, even though they're both completely capable of looking after themselves.
* Castle Heterodyne has quite a lot of them, so every Spark in the family can perform their own experiments without getting in each other's way. And so they don't have to drag the bodies far when the urge strikes.
* Castle Heterodyne is always in motion and has a pre-programmed course through the castle.
* Castle Heterodyne nursery! (possibly by rolling them into one big clownball and then ripping it into ribbons).
* Castle Heterodyne type 7, and if Gil and Tarvek resolve their issues, it would go to a type 8.
* Castle himself begins the show claiming to be a Manic Pixie Dream Boy to Kate Beckett. (This is interesting considering the fact that Beckett herself serves as the related trope of
* Castle, however, so it was pretty clear he wouldn't last too long...
* Castle. If a suspect is the least bit law-savvy, the characters will state among themselves, "He's lawyering up." and treat it as the worst thing in the world that he is even allowed to do this.
* Castle) in a convention that the title character is, coincidentally, doing a signing at. Later in the episode, he encounters Alexis in a very skimpy cosplay outfit, which they agree to never talk about.
* Castle in a shot of a swat team riding a hotel elevator, with the very uncomfortable hotel manager, altogether very awkwardly with this music playing in the background.
* castle in Germany that the school owns, for Pete's sake). On the other hand, they

also show the stress of having to live up to such a reputation and that the White Knight's training is every bit as grueling as the Devilbats. Not to mention both teams have a great deal of friendship and respect for the other, despite being as different as can be.
* Castle in one episode when his curiosity results in him believing he has been cursed by a Mayan mummy!
* Castle - "In Plane Sight." The air marshal is murdered on a trans-Atlantic flight, leaving Castle as the closest thing to an investigator aboard. Unlike most such plots, he is able to take full advantage of in-flight Wi-Fi to obtain assistance from Beckett and the rest back in New York.
* Castle inquires after the fact if she can even do that, to which she responds with something to the effect of "no, but he doesn't know that."
* Castle in the Air, Flower-In-the-Night's father locked her up since her birth, after hearing a prophecy that the first man she sees will become her husband. If he hadn't done that, she would have never met the main protagonist Abdullah ...
* Castle in the Air, is very pissed off at being confined to the bottle, and takes malicious pleasure in granting each wish to the letter in a way that causes as much misery as possible.
* Castle in the CIA who had gone rogue after the fall of the Soviet Union.
* Castle in the Darkness: One enemy type you encounter in the game is skeletons throwing bones.
* Castle in the Darkness: One of the bosses is a giant (albeit cute-looking) owl.
* Castle: In "The Fast and the Furriest", evidence at a crime scene suggests that a murderous Bigfoot is stalking the streets of New York City. Castle is only too willing to believe that a Bigfoot is the culprit, but Beckett, Ryan and Esposito are convinced the murderer is more mundane. They are, of course, correct.
* Castle: in "The Final Nail" when Beckett tells Castle that a suspect's alibi checks out, Castle replies with Beckett's usual phrase, "Shut the front door!"
* Castle in the middle of Season 3. The episode's villain, an assassin working for the man who had Beckett's mother killed, has kidnapped Ryan and Esposito in order to find out what the good guys know about his employer. Then comes the following exchange:
* Castle: In the Season 8 opener, Beckett becomes very secretive towards Castle, and eventually leaves him, not really saying why (it's because she has a super powerful enemy that could kill both of them, and she needs to take them down alone). Naturally, Castle being Castle, this just makes him redouble his efforts to "save his marriage".
* Castle in the Sky, and lands on the floor, he gives the page quote. He gets plenty of other blows to the head throughout the movie. In the original Japanese, he says something closer to: "My head is harder than my boss's fist."
* Castle in the Sky, and put it on hold again. The film sat on the shelf until 2003 when it was finally released by Disney on video and DVD after only being screened at a few children's festivals.
* Castle in the Sky are pursued by a quartet of Men In Black (whom they at first call "kuromeganetachi", "the guys in dark glasses"), who indeed turn out to be shady government agents (with an even shadier hidden agenda).
* Castle in the Sky blends legends and myth with that of biblical events. Muska references the blast from the mystic city of Laputa with that of Sodom and Gomorrah's destruction in the bible.
* Castle in the Sky cancelled the plans. It would be released on home video in April 2003.
* Castle in the Sky dresses as a boy to evade capture. The disguise doesn't fly for long.
* Castle in the Sky, gleefully shouts this after Dola agrees to let Pazu and Sheeta accompany them. He follows this up with a "No more swabbin' the decks! Hooray!"
* Castle in the Sky has two spells that can be used with the magic pendant Sheeta wears:
* Castle in the Sky is provide maintenance to the dirigible's rudder. Which he does, while the ship is aloft and he's dangling from a rope. It's as acrophobia-

inducing as it sounds.
* Castle in the Sky: Laputa is a castle-city built on an island floating high in the sky. The movie's opening sequence shows that many such islands once existed, but all but one fell to earth for reasons unshown.
* Castle in the Sky: Laputa is a fortified town able to fly in the sky, but which has been abandoned by its former inhabitants.
* Castle in the Sky — which, not coincidentally, comes at the point where Sheeta stops running and confronts him for the last time.
* Castle in the Sky on NTV, Twitter crashed when fans tried to post the word "Balse!" at the same time it was said in the movie.
* Castle in the Sky on the eponymous floating island. While the civilization that built it are long gong and shrouded in myth and legend, the weapon still works, and its destructive power is said to be responsible for what happened to Sodom and Gomorrah.
* Castle in the Sky, Papa (the engineer on the Tiger Moth) gets to say this in a one-liner cut from the 2010 DVD release:
* Castle in the Sky, Pazu unhooks the tractor unit of the train to shake off the pursuers.
* Castle in the Sky prominently features very powerful Robot soldiers, who act as the guardians of the titular castle.
* Castle in the Sky pulls out the pullcord of a German "potato masher" style grenade with her teeth.
* Castle in the Sky, Sheeta mentions to Pazu that her pendant has a spell of destruction that her grandmother taught her, but told her never to use. Guess what they end up using at the end of the film?
* Castle in the Sky, Sodom and Gomorrah were but two places destroyed by it, according to Muska.
* Castle in the Sky so that Pazu is freed while she remains the Damsel. Should be noted her rescues do make some of the most exciting points in the movie.
* Castle in the Sky) than she is about getting smothered in a middle-aged woman's bosom.
* Castle in the Sky they are huge and largely made of metal with cloth used for some of the smaller ones.
* Castle in the Sky with which to dominate the Earth below. They appear to have died out hundreds of years before the start of the movie and all of their cities aside from the titular Laputa have fallen back to the ground from a lack of maintenance.
* Castle: In "The Way of the Ninja", Castle attempts to prove that a suspect is a ninja by suddenly tossing Beckett's coffee cup at him; expecting the suspect to catch. Needless to say, the suspect is not a ninja and the cup ends up smashed on the floor. Beckett is not impressed.
* Castle, in "Undead Again", Rick and his daughter Alexis have been playing a single game of laser tag since she was five. At 18 and about to leave college, she tells him those days are over and she's grown out of it. Castle was already imminently quitting his adventures with Beckett and now realizes that he's losing his daughter as well. When she realizes how much she's hurt him, she later ambushes Castle, rappelling down from the ceiling in a catsuit to zap him. Cackling maniacally, she claims the whole thing was an act intended to catch him off-guard.
* Castle; investigating the death of a magician, Beckett and Castle approach a street magician with a motive. The street magician, obviously not keen to answer questions, does the standard Smoke Out disappearance — and Beckett (who, as it turns out, knows a little something about magic) merely rolls her eyes, opens up the box he's standing on (and which he slipped into after dropping the smoke bomb) and yanks him out.
* Castle invoked this trope. She wanted to divorce her borderline-abusive famous athlete husband, but knew if she did the public would consider him the victim of "another trophy wife just looking for her share." If, however, she disappeared after they'd spent the night getting drunk on his boat, everyone would believe he'd killed her and his reputation would be ruined.

* Castle invokes this another time when he is talking with Beckett about Alexis' upcoming prom night and how he will instill fear into the young gentleman to ensure he didn't do anything untoward. While discussing this, Beckett revealed her father didn't do it (to her knowledge) but thinking back while talking she does admit her date was far more nervous after she stepped out of the room to finish getting ready, and left him alone with her father, than he was before.
* Castle") is able to recruit the Castle of the new 2012 and send him back to save Beckett's life, which results in a new version of 2012 where Montgomery survived his retirement and was able to provide information to confirm Bracken's role in Johanna Beckett's death in exchange for immunity for himself.
* Castle is a (closet) fan of the mystery novels of Richard Castle, who as a result of their 'partnership' has found herself the basis for Detective Nikki Heat, the protagonist of his latest novels. By later seasons, Beckett is his girlfriend, so she has definitely taken it to the next level.
* Castle is a Cuban baseball player who defected eighteen years ago by bribing a guard during the Olympics.
* Castle is a surprisingly benign version of this... while he uses his influence as a best-selling mystery author (and the fact that he has the mayor on speed dial) to be allowed to shadow Detective Beckett, he has proved quite useful, with his
* Castle is beginning to show an aptitude for Eureka Moments, usually inspired by his daughter. In a reversal, he gave one to his daughter in one episode.
* Castle is dismayed when his daughter stops wanting to trick-or-treat with him. "But you have to come with me. You are my candy-beard!"
* Castle is fond of this one as well. Usually it's Castle's daughter or mother who makes the seemingly-innocuous comment.
* Castle is fond of this. They'll get the suspect pinned down (usually in the interrogation room, sometimes not), and Castle will explain what happened. The suspect will smirk, say something like "That sounds like a very good story, something out of one of your books," and then Beckett will pull out the witness statement or DNA evidence or whatnot and the smirk fades.
* Castle is primarily episodic, and so has never depended on its meta-plot to keep viewers interested. The show-runners were never worried that the fans would lose interest, and sure enough, reactions have been very positive.
* Castle) is produced that seals the deal. But typically, solving the mystery points to an unexpected suspect or provides the clues necessary to establish probable cause so the police can get the evidence.
* Castle is shown to be interested in BDSM, immediately identifying a specially-made pair of handcuffs and the shop which it probably came from. Castle's safe word is "apples", while Lanie has mentioned at one crime scene that she likes whipped cream, but won't do caramel.
* Castle is stabbed to death with an icepick by a killer hiding in the back of her car.
* Castle is world-famous mystery writer, who initially only joins the NYPD's homicide detectives to do research for his new novel series, and only gets allowed because he's a friend of the mayor. In reality, he only initially is motivated by research, and is really there for the thrill of solving crimes and - eventually - because he's fallen in love with Detective Kate Beckett. Despite lacking any formal training, he brings a unique perspective to their cases, and a number of connections in everything from government agencies to the criminal underworld from previous "research projects" that give him advantages the police lack.
* Castle. It helps that both her father and her grandmother are much more playful than would be expected of a parent.
* Castle it just gets stuck on Espositto's finger (then almost lost when they finally get it off) because...
* Castle just after a part. He ended up not rescinding his recommendation because she was a good enough actress to fool him into thinking he'd really hurt her with the accusation.
* Castle. Later they are asked "Are those hickeys?" "They're from the injectors" he answers.

* Castle lets out an F-bomb when he flubs a line in a scene with the young actress playing his daughter. He immediately adds, "I owe you a dollar." Somebody off-camera admonishes him with "she's a minor!", to which he replies, "I said I owe her a dollar!"
* Castle levels, when they aren't simply using perplexing puzzles to keep Mario from advancing, are the purest example, until
* Castle loves this one. Not technically a bomb, but in the episode "Meme is Murder", the murderer desperately seems infamy, so he kidnaps the two founders of the totally-not-Snapchat
* Castle main character Richard Edgar Castle was born Richard Alexander Rogers.
* "Castle Mane-ia", all of Twilight's friends end up clinging to her as she goes to investigate who's been messing with the trick organ in the old Castle of the Two Sisters.
* "Castle Mane-ia", in the scene where the ponies are panicking, Fluttershy sees what she thinks is Angel getting crushed by a falling pillar when it's clearly just a couple of rocks and leaves, and hastily tries lifting the pillar before Applejack jumps on top of it and flattens "Angel" some more.
* "Castle Mane-ia" reveals that the Princesses had their old home, the Everfree Castle, filled with
* "Castle Mane-ia" shows that Celestia and Luna's old castle has these. They were installed so the Princesses could play around with each other.
* "Castle Mane-ia". Subverted with the deathtrap part though; they're not meant to hurt anyone. They're there in the first place because of Luna's and Celestia's proclivity for pranks (Twilight even found an old journal, talking about how one of the traps were always Luna's "favorite"). Fluttershy actually is more worried about the dangers of actual old ruins, such as floors giving out and falling debris.
* Castle Mane-ia", Twilight's freeze spell causes her friends to be inable to move anything except their eyes and mouthes.
* "Castle Mane-ia", Twilight shouts "Stop!" as her friends are aimlessly panicking about nothing, punctuated by a spell that freezes them all in place.
* Castle ME Pearlmutter occasionally takes a meal in the mortuary. Pearlmutter does at least attempt to justify this trope by pointing out the strength of the cleaning solvents used in mortuary work, stating that the room was probably the most sterile in the city.
* Castle: Natalie Rhodes, the actress that is going to play Nikki Heat in a film based on Castle's books, has come to the 12th Precinct to better learn from the source, Beckett. Rhodes slowly becomes more like Beckett, and eventually Beckett and Castle are watching Rhodes doing an uncanny impression of Beckett at the whiteboard.
* Castle of architectural historian/writer David Macaulay's book, shows in vivid terms just how tough storming a well designed, built and supplied castle could be in medieval times with defenses upon defenses in place to discourage it.
* Castle of Fear: The Doctor misses one... And hits every step on the way down the stairs.
* Castle of Illusion, Mickey gets chased by a giant apple at some point in the first and fourth worlds.
* Castle of Illusion: The Toy Time stage features jelly that can suck Mickey in, though there are some sections where he actually needs to pass all the way through the jellied floors to progress.
* Castle of Magic has an especially difficult system. Every time you take a hit in your standard form, you lose 20 diamonds, and can re-collect up to 10 of them. Take a hit with 0 diamonds, and you die. Take a hit in a powered-up form, and you lose the power-up. Take a hit with less than 20 diamonds, and you lose all of them (but can still re-collect up to 10, unless you have less than 10 to begin with.) Get 100 diamonds, though, and you get an extra life, but all your diamonds vanish. You do the math from there.
* Castle of Sand the only clue found by the body was a matchbook to an establishment called Bar "Ron". This leads to the witness who saw the dead man with another man, and recalls the mysterious mentions of "Kameda."

* Castle of the episode leaves it as an open question, the behavior of the killer makes no sense if he isn't a time travel, as it would require that he work backwards in an extremely convoluted fashion.
* Castle of the Winds, except there are no levels for spells, though the cost of a spell can do down as one goes up in level.
* Castle of the Winds features Meteoric gear as its top line before enchantments—better protection and damage, as well as less weight.
* Castle on a mob witness going into protection. Castle and Beckett have to convince the FBI to let them have access to the witness, and they eventually end up effectively using the witness as bait to catch the killer.
* Castle" on a whiteboard, but then she realized that after writing S-T-A-N, she was automatically finishing it to write her own name.
* Castle: One episode has an assassin from the future come to kill a scientist before he can invent force fields. Even though he is running around the present, Castle still recruits another time-traveler to stop him.
* Castle. One notable example is when investigating the torture and subsequent murder of a surgeon. Ryan and Esposito are discussing how unusual it is for that to happen, given that the surgeon had no criminal record and no connections to any mobs. Ryan goes so far as to observe, "The guy didn't even have any porn on his computer."
* Castle one of these, since the relationship dynamic between the two has for better or worse been the central driving engine of the show since the first episode, one of the frequent criticisms of the 'significant other' arcs of seasons three and four was that splitting Castle and Beckett up to be with other romantic partners damaged the chemistry between them and just bogged the show down with unnecessarily angsty and predictable subplots that ultimately didn't really go anywhere.
* Castle. One victim happens to have just run a con on a first-grade classroom; forensic evidence says that his murderer was between 5'3" and 6' tall, so the cops conclude that the first-graders probably couldn't have done it unless they were using this trope.
* Castle one victim was, apparently, a police officer. Yeah, you know where it's going.
* Castle on Venus allows for perfect murders. There is only a single domed city on the planet and several distant outposts. It's mentioned that, as soon as people discovered that someone could kill a person (when outside the city) and get away with it since the harsh Venusian environment would quickly dispose of evidence (not to mention that the killer would be wearing a spacesuit), everyone panicked at first, and then realized it's the perfect location for settling scores or getting rid of someone. The Venusian cops haven't been able to solve a single murder committed outside the dome. Many times, there isn't even a body to be found, so people are simply declared missing and presumed dead. The protagonist has a unique ability to see past events that took place at a location, thanks to a Martian artifact he touched in a previous novel. Even if he was a cop, he still wouldn't be able to find enough evidence to charge murderers. It's mentioned that a good percentage of tourists to Venus aren't there for sightseeing.
* Castle opens by revealing that Lanie and Esposito are in a secret relationship. Later on Castle, Beckett, and Ryan reveal they've all known, so it was only the viewers who were in the dark.
* Castle opens with an extreme close up of a dead body before it is discovered or investigated, usually with some kind of ironic music/pop song.
* Castle Perilous by John DeChancie is essentially fantasy, being based in a magical castle, but what makes the castle special (well, one of the things) is that it contains portals to 144,000 different worlds. This allows for dumping the characters in any genre of story the author feels like writing.
* Castle Perilous is wrapped in a translator spell to serve its numerous interdimensional "guests".
* Castle Perilous linking a vast Road across thousands of planetary surfaces.
* Castle. Perlmutter found the drawer, which contained a photo of the victim with a

prominent senatorial candidate from the '70s. This led to Beckett and Castle uncovering a scandal which led to the woman's murder and helped them finally get justice for the victim.
* Castle Red a sprawling labyrinth fool of bizarre and random imagery meant to disorient the player. The rest of the game features strange happenings and inexplicable events as well, but the Hedge Maze is perhaps the point of maximum surreality. No other section of the game features a garden of human heads, for example.
* Castle Red, these hooded figures will become standard enemies who reveal themselves as this trope when damaged.
* Castle references in the show to date; it is unclear if Nathan Fillion asks for them or if the writers are just big fans.
* Castle reveals that Detective Javier Esposito has a juvie record. A school teacher got him straightened out, and he went on to become a Special Forces sniper and eventually an NYPD homicide detective.
* Castle: Richard Castle and his second ex-wife briefly remember why they got married and spent the summer in the Hamptons together, which reminds them why they got divorced.
* Castle; Richard Castle is charming, charismatic, in control and a pretty cool guy, all things considered. He is a bit of a vain, goofy milquetoast who tends to be the butt of the joke from the more down-to-earth cops he works with, but on the whole we're clearly supposed to find him a pretty likable and well-adjusted guy.
* Castle, Richard Castle is convinced he has been cursed. While riding the elevator at the police station, he first loses cell phone reception, then the lights flicker and go out, then the elevator shakes and stops. Not knowing what to do if the elevator falls, he lays flat on the floor. When the elevator door opens he is seen by Beckett and other officers. He is obviously upset. They call maintenance.
* Castle: Richard Castle openly based his character Nikki Heat on Detective Beckett. He also wrote in a character based on himself, as well as thinly veiled counterparts of the rest of the cops Beckett works with. He seems to have done it before, too, such as when he based a character on Powell the jewel thief.
* Castle Rock imprisoned the Kid in a hole in a disused ward of the actual prison as he heard the voice of God telling him to do so.
* Castle Rock seems to have the power to bring out the worst of anyone who touches him or even goes near him. One example is Zalewski, the prison guard the Kid befriended while in Shawshank. After giving the Kid a fist bump, Zalewski goes on a shooting rampage in the prison, killing all of the other guards, before being gunned down himself. In the next episode, the Kid enters the home of a family celebrating their son's birthday. As the Kid walks around the house, we can hear the family's love for each other turn into hate as they start arguing and getting violent with each other.
* Castle romantic dramedy. They also like staging episodes around particular subcultures and bringing in various tropes of particular other genres as well; there's been a vampire episode, an alien abduction episode, a few political-spy thrillers, and so forth. Beckett's mother's arc is also a conspiracy thriller in most of the later episodes.
* Castle Roogna novels features a gigantic spider named Jumper (originally a very small spider before being caught in a magic spell) as one of the two main heroes.
* Castle Ryan used to work undercover and infiltrated an Irish gang. When he was pulled out, his cover identity was preserved by making it seem like he was going to be charged with numerous crimes and had to flee the state. Years later, when Ryan has to go back undercover with the gang, he claims that the statute of limitations has expired on those crimes and he was thus free to return to New York.
* Castle Scarwall in the "Curse of the Crimson Throne" Adventure Path for
* Castle's clip show uses this to highlight exactly how often Castle and Beckett talk in unison.
* Castles did this at the presentation level, as "zooming" in or out would use the exact same scenery and troop graphics, but portray clustered soldiers and large background features as single troops and more compact landscape.

* Castle's eponymous character is rather good at this, considering his eye for detail thanks to approaching every investigation as a novel plot.
* Castles Forlorn, it's suggested that Tristan apBlanc may be this trope for the race of living monstrous humanoids called "vampyres", by way of his half-human daughter.
* Castle, she then leaps out and growls wearing a hideous alien mask. Castle flees.
* Castle Shikigami 2 from two-player mode with Roger and Kim. Yes, he actually says "changed voice" out loud.
* Castle shows Castle and Beckett with three children who are presumably theirs.
* Castle, since they stubbornly refused to have a mature conversation about their feelings for each other, making it a rather obvious attempt to artificially extend the tension, leading fans to simply say "get on with it!"
* Castles in the Air—the anatomical oops made it stand out among a sea of other romance novels, and it's still in print today (not bad for a book published in 1993), albeit with a different, less funny cover.
* Castle's mother also relates when she was acting in the soap, in the three weeks that she was on the show her character was kidnapped, buried alive, trapped in a cave with bears, kidnapped again, and held hostage.
* Castle's season 6 finale, Beckett and Castle discover (much to their shock and disgust, since they are getting married in a few days) that she drunk-married the boyfriend she had at university during a trip to Las Vegas. Most of the episode deals with Kate trying to get him to sign the annulment papers. It turns out the 'husband', a small time con artist, knew what happened all along but instead of contacting Kate and getting a divorce, he has been telling people that she had an accident and has been in a coma for the last fifteen years. This way he could maintain a 'semi-married' state where he would be free to date other women but his girlfriends would not pressure him to divorce his wife and marry them. Kate is definitely not amused when she finds out about that.
* Castle, star Nathan Fillion has often appeared opposite Firefly alums, culminating in "Headhunters", where even the network was promoting the Adam Baldwin/Nathan Fillion reunion. Less well-known is the fact that the Season 2 executive producer was Jose Molina... himself a Buffy and Firefly alum.
* Castles, trench lines and other fortifications are typically designed to be a death course, at least for the attacking army.
* Castle Strike, the old king from the first mission arc wielded a hammer in battle
* Castle Sweet Castle": After falling asleep in her breakfast, Twilight Sparkle wakes up with a pancake stuck on her horn, hanging over her face, and blurts out "I'm pancake— I mean, awake!"
* Castle Sweet Castle", breaking through the Cutie Mark Crusaders' treehouse's floor several times.
* "Castle Sweet Castle" plays this trope straight and averts it. In an attempt to make Twilight's castle look more appealing to Twilight, the others decide to decorate it. The trope being played straight ends up with a room filled with everything more geared to the five and not to Twilight. However, it's averted when you find out they split up and decorated certain rooms separately, leading to more sensible design decisions.
* Castle, Sweet Castle": Twilight Sparkle is seen wearing one in the flashback of her rearranging Rarity's gems. She spent a whole afternoon with one of these.
* Castle Swimmer, which is set entirely underwater and features lots of fascinating anthropomorphic fish and octopus people and interesting environments like the shark palace.
* Castle talked about how that during his first year in homicide, he and his partner chased a suspect through a gypsy fortuneteller's window. The gypsy cursed at the both of them and that the curse will remain until they fix her window. Two hours later, Montgomery's partner dropped dead of a heart attack. The next morning, Montgomery fixed the window.
* Castle tends towards being this, no doubt at least partly due to having been raised by a single mother and in turn raising a teenage daughter as a single parent. Detective Ryan also has increasingly become this due to his relationship

with his girlfriend (later wife) Jenny, much to the amusement of his more typically alpha male manly man partner Detective Esposito.
* Castle Terribel, one of whom is undead, and all of them seem more enthusiastic about their hobbies and home life than causing trouble.
* Castle thanks to the fact that earlier seasons see her frequently depicted as intensely focussed on her job (although less-than-pleased about it) and later seasons see her come out of her shell a bit more. It's hinted that it's a result of hanging around with Castle.
* Castle that lately they've taken to casting at least two familiar faces an episode, so even though you know one of them did it, they at least keep you guessing between which.
* Castle the eponymous character leaps in to stop a captured Chinese spy from swallowing one. It turns out to be chewing gum.
* Castle the killer in one episode, identifying his motives well enough that the killer gets caught up in the story and confirms it's exactly how he felt.
* Castle The killer knew what happened to them and deliberately staged the murder to look exactly as the fake murder in their memories.
* Castle, "The Late Shaft", the title character appears on a talk show to promote his upcoming book. The host later tells him of receiving death threats. Not an uncommon occurrence in show business, but then the host is murdered.
* Castle. The main character is a writer who has got so tired of his creation that he has him shot in his last book. This causes angst with his publisher (an ex-wife).
* Castle. The man suffering from the amnesia never really gets his memories back, but since he can't remember why he and his wife divorced, they are able to get back together. Also subverted in the same episode where a woman claims to be the man's wife after seeing on the news that he had amnesia and figuring it to be an easy way to get a husband.
* Castle theme introduced 'big-fig' dragons figures built with only a handful of bricks; bright green bodies, frills, a head-piece shared with alligators, a separate wing pieces. The 2013 revival featured a significantly larger big-fig dragon.
* Castle: The NYPD wears bulletproof vests labeled "Police". In the second episode, Castle gets one custom-made... that's labeled "Writer".
* Castle the person who did it. Castle than proceeds to sweet talk the mayor into giving their fingerprint search priority, getting it done in under an hour, and proves that the most likely suspect was actually framed.
* Castle, the police use a whiteboard (or, on big cases, a pair of whiteboards) to keep track of the information for that week's case. It's also revealed that Castle uses a more hi-tech version to plot out his mystery novels. Beckett has one in her house for the unsolved murder case of her mother.
* Castle, the ransom is delivered by a local relative of one of the kidnapped girls.
* Castle: There haven't been any complicated soapy turns so far, but the focus definitely is on the private lives.
* Castle there's a wealth of evidence pointing to a nurse as the murderer. He isn't but the evidence gathered related to a complicated plan to fake his falsely imprisoned girlfriend's death to get her out of prison. This works but the two are quickly arrested. At the end of the episode Castle and Beckett are not only going to somehow avoid him getting prosecuted for the prison-break (and the various crimes he committed to manage it) but are going to reopen his girlfriend's case to get her out legally. Granted, there were apparently a lot of mistakes made in her conviction but still...
* Castle: The series both acknowledges that Rick Castle is an agent of the police and that his actions routinely screw the pooch. Good job, ABC!
* Castle, the two actors' roles are basically equal in importance. So Katic almost always wears 3- to 4-inch heels, which are her version of the box. This is Lampshaded quite often on the show as asides from other characters and it is very obvious when she is not wearing heels. This example is also unusual because height

differences of only a few inches such as this usually don't cause an issue.
* Castle. They have an argument about her intentions, which ends with Castle turning around to get a cup of coffee from the squad room and Beckett turning to go to the murder board. Unfortunately, both are pulling an Exit Is That Way, meaning they must turn around and walk sheepishly past each other to get to where they actually want to go.
* Castle to prove how corrupt New Media are making America. He is called out on this by the main characters, who maintain a more balanced view. The very minor subplot of the episode is Castle filming a "web-mercial" for his latest book because of the positive power he believes the internet has.
* Castle to the couple arrested, and the woman proclaiming it was worth it.
* Castle Town Dandelion allows her to manipulate the growth of any living thing, with the caveat that when so affected, it's stuck that way for twenty-four hours. In practice, she just uses this to age her body up to adulthood and mess with Akane.
* Castle Town Dandelion but eventually find herself enjoying the job on its own.
* Castle Town Dandelion has this. Episode 4B/ Chapter 6 deals with Akane's.
* Castle Town Dandelion of teleportation, he, and the people/objects he touches, just disappear and re-appear.
* Castle Town Dandelion's Haruka for his twin sister. In Chapter 26, Shuu even commented he'd look fine in a skirt.
* Castle Town Dandelion shell to invade the backstage of a concert just to see Sacchan (after Hikari refused her request as the latter doesn't want people to know she is Royalty).
* Castle two-parter Tick, Tick and Boom, the team and an FBI profiler hunt a killer who is obsessed with Nikki Heat, the Beckett analogue in Castle's books, and leaves clues to prove he can outsmart her.
* Castle two-parter "Tick, Tick, Tick..." and "Boom!", Beckett survives her apartment being blown up by diving into her bathtub just as the bomb went off. More justified in this case since her tub is one of those old cast iron jobs.
* Castle used to subvert this, with the characters saying their names over and over.
* Castle uses this trope regularly, and inverts it almost as frequently. In almost every episode, minor details dismissed very early in the hour come back and provide a conclusive link to the true killer; in a number of episodes, similarly minor details pull the investigation in a different direction.
* Castle, usually set in New York but filmed in L.A., has "To Love and Die in L.A.", where Beckett follows the trail of the man who killed her mentor to Los Angeles.
* Castlevania (2017): After Dracula finds out Lisa was arrested on trumped-up charges of witchcraft and executed, his last act of kindness is to tell her elderly neighbor, who came to pay her respects to Lisa's memory, to take her family and run before he unleashes his wrath.
* Castlevania (2017), after his family's defamation and exile by the Church, Trevor Belmont had spent much of his life since his early teen years wandering alone, and, as a result, developed a somewhat surly personality that tends to rub people the wrong way. Even his attempt to comfort Sypha when she makes the decision to separate from the rest of her family goes badly:
* Castlevania (2017) (and, indeed, what constitutes running water) is argued in this fashion:
* Castlevania (2017) and this translates into real injuries when the cyclops is killed and they are released from petrification.
* Castlevania (2017), apparently overwhelmed by raw emotion. After intense loneliness, this is the most intimate Alucard has been with anyone in a long time — or possibly ever.
* Castlevania (2017) before the legions of hell break loose all over the city.
* Castlevania (2017) but notices he has nothing on hand to actually fix the board to the door. So he tries jamming it under the handle, only for the board to slide off. And then the door opens outward.

* Castlevania (2017), Dracula, falling in love with Lisa, a mortal woman, and marrying her. In exchange for him sharing his scientific knowledge with Lisa, he honors her request to live and travel as a mortal man. 20 years later, Lisa is accused of witchcraft and burned at the stake, and by the time Dracula finds out, he's too late to save her. So it's no surprise when he stops travelling as a man and goes on the warpath, summoning an army of demons from Hell and laying waste to Wallachia.
* Castlevania (2017), Dracula was a reclusive vampire lord and not a big fan of humans until he met and fell in love with Lisa, a medicine woman who sought out the scientific knowledge he had in his castle. After she was burned at the stake as a witch by the citizens of Wallachia, Dracula snaps and decides that, because no one tried to save her, humanity was deserving of nothing less than wholesale genocide. Even after his son Alucard tries to talk him out of it, Dracula unleashes the hordes of Hell on Wallachia, putting the town to the slaughter under his orders.
* Castlevania (2017), even though Trevor has a holy whip that's made for the purpose of killing Dracula, he goes for swinging his fists at the Lord of Darkness, who reacts like this is not the first generation to try this.
* Castlevania (2017). Following Trevor's final showdown with Death, he's presumed dead as the platform was collapsing, and no body could be found. She spends the next 2 weeks mourning the loss of the man she loved and the father of her unborn child, contemplating returning to the nomadic Seekers despite Alucard and Greta offering her a place in the new village they're building in and around Dracula's castle. But thankfully Trevor shows up alive, but injured, and breaks Sypha out of her funk.
* Castlevania (2017) goes the route of having certain schools of magic be exclusively accessible by humans. While humans (priests, magicians, alchemists, devil forgemasters, etc.) and non-humans (vampires, night creatures, etc.) exist, and can have some overlapping disciplines of magic or other abilities, only humans are capable of accessing the branch of magic capable of directly reanimating the dead.
* Castlevania (2017) has one of these per season: the defense against the demons invading Gresit in season 1, the siege on Dracula's castle in season 2, the battle of Lindenfeld in season 3, and the second battle of Dracula's castle in season 4.
* Castlevania (2017) Her final moments are spent telling her son, Alucard, and by extension, Dracula, not to avenge her death, to be better than the people who don't understand she was just trying to help them.
* Castlevania (2017) is about the only real complaint about the series, already considered one of the best video game adaptations yet. The second season is longer at eight episodes but still has this as one of the few complaints.
* Castlevania (2017), is set in a grim and gothic version of historical Wallachia that is inhabited by vampires and beset by demons.
* Castlevania (2017), it was Leon Belmont who traveled from France to Wallachia to continue his hunt against Dracula and other creatures of the night. In the Belmont Hold, the armory, library, and headquarters of the Belmont family, Leon's portrait hangs proudly in the stairwell leading to the Hold.
* Castlevania (2017) kinda zig-zags this trope as there have been many previous variations of the characters in video games, but it’s mainly based of Ayami Kojima's artwork.
* Castlevania (2017)'s army includes some fairly literal bats from Hell among its demonic ranks:
* Castlevania (2017). The bishop who did the deed later tries to defend himself.
* Castlevania (2017), this trope is referenced plenty of times, since it's a series about vampires. In the first season, Trevor is chased by a mob wielding these (and later explains that the Belmont family's ancestral estate was subjected to this treatment by the Church inciting peasants), and vampire characters like Carmilla later reference "pitchforks, torches, the usual" when speaking of how people tend to drive them out of cities.
* Castlevania (2017). Until it turns out he murders anyone who violates his rules.
* Castlevania (2017) which is reflected by the full moon turning a blood red

outside of his castle.
* Castlevania 64 actually cites the "immortality benefit" as fact despite people in the comments pointing out how and why it is false.
* Castlevania 64, an evil witch named Actrise sacrificed her own child in a ritual to obtain eternal life.
* Castlevania 64, featuring two more playable characters and some remixed levels.
* Castlevania 64 had a different hero give a different kid a plot coupon that would protect him from said monsters.
* Castlevania 64, have the Necronomicon as their Main Menus, the book itself does not appear in either game.
* Castlevania 64, they will encounter a villager who offers to help them. However, he's standing next to a mirror in which he doesn't appear, revealing himself to be one of Dracula's minions.
* Castlevania 64, where the main character can jump around and grab ledges just fine, until they have to carry an explosive material across several rooms, where jumping or falling even a few feet suddenly results in instant death.
* Castlevania: Abaddon is usually a grasshopper-like humanoid who commands swarms of locusts.
* Castlevania: Across the franchise, any game where Ayami Kojima did the designs will have its lead character dressed in the very height of (somewhat) period-appropriate fashion, although special mention must be made of Alucard, both his dandyish dress from Symphony of the Night and his elegant double-breasted suit, complete with red pocket square, from the Sorrow games.
* Castlevania, a golem winds up with a soul due to the unusual circumstances of the time rift, allowing it to become a playable character and set out on a quest of self-identity.
* Castlevania allow the player character the use of a flame whip or any other weapon imbued with the power of fire.
* Castlevania, Alucard says the castle is a creature of chaos itself, changing its shape every time it is rebuilt.
* Castlevania and assorted demons. There’s also a witch- er, female magic user Sypha.
* Castlevania), and can only transform with magical relics and a good amount of effort.
* Castlevania and projectile-vomited skulls, respectively, the latter is the product of the former once it's consumed enough human blood.
* Castlevania and the only way to know how a character was supposed to look like was through the games' covers and manual art:
* Castlevania aren't bulletproof, how much bullets are actually practical against them generally depends on the game and the type of gun.
* Castlevania: Aria of Sorrow be picked up as a reward in Boss Rush Mode, which isn't unlocked until you beat the game at least once. The Claimh Solais, in the other hand, can be acquired fairly earlier in the game, provided you get Undine's soul and one of the three souls (Curly, Devil or Manticore) required to access the secret area where it lies hidden (behind the waterfall in the Underground Reservoir). This weapon is an incredibly fast greatsword with an absurd reach that deal holy damage and provides bonus to all stats.
* Castlevania: Aria of Sorrow friend, who naturally discusses things in Shinto terms, not Christian. Though ironically God is still brought up in both this game and its sequel.
* Castlevania: Aria of Sorrow happens the player will notice that being made of gold it's very weak and best for either showing off or being sold.
* Castlevania: Aria of Sorrow helpful in that area of the castle) but aren't entirely necessary either as you can very easily find said souls elsewhere.
* Castlevania: Aria of Sorrow, if you talk to Arikado enough times after fighting Graham, he will get angry with you and change his dialogue to "GO NOW!".
* Castlevania: Aria of Sorrow, instead replaced with a cycle of solar eclipses.
* Castlevania: Aria of Sorrow is set in 2035, 36 years after Dracula was supposedly defeated for good and his castle banished into a solar eclipse. Ironically, the

only modern or futuristic things and people in the game are a U.S. Army soldier, in-game items that are never shown graphically, a handgun, and a positron rifle.
* Castlevania: Aria of Sorrow moment suggests that he's Romanian, etc...
* Castlevania: Aria of Sorrow, there were non-boss mirror monsters. In the former, they attacked you while you were standing in front of the mirror. In the latter, they leaped out of mirrors as you passed by them.
* Castlevania, as both his castle itself and several other locations (like Alucard's catacomb lair) have massive clockwork mechanisms and electric lights.
* Castlevania - as if it weren't already obvious that he's not someone you want to mess with...
* Castlevania atmosphere of the game. The games also have a recurring boss named Malphas/Karasuman, a black, winged demon accompanied by a murder of ravens/crows.
* Castlevania became the new model for CV games, enemies have bled profusely.
* Castlevania: Bloodlines: Countess Elizabeth Bartley kickstarted the events that led to WWI. She hoped that with all the death and destruction brought up by such a large scale conflict, there would be enough souls to be sacrificed to resurrect her uncle, Count Dracula.
* Castlevania: Bloodlines. In stage 5-1, if either John or Eric gets hit by the pollen, then the player's horizontal control are reversed, and in stage 6-3, the entire stage is upside down, and the player's vertical controls are reversed. Another endgame stage also has disconnected top and bottom halves, meaning that everything above the midway point of the screen (most of the time, this includes the upper torso of your character) appears several character widths to the left of their actual location, making for some exceedingly hard jumps even without any enemies to bother you which you'll invariably run into regardless.
* Castlevania: Bloodlines is unique in the series for having the stages be various castles across Europe.
* Castlevania, but sometimes haunted mansions and other spooky buildings show up as well.
* Castlevania: Chronicles of Sorrow duology has a white long coat that manages to be badass, especially with the pimp qualities. The 21st Century is obviously the era of Badass Fashion.
* Castlevania: Chronicles of Sorrow games, a New Game+ was almost a necessity.
* Castlevania: Chronicles of Sorrow games. It's basically just Alucard pronouncing his name in Japanese.
* Castlevania: Chronicles of Sorrow. Though he sells stuff besides weapons, most of his inventory is weapons and he's generally seen in front of a crate with various weapons sticking out.
* Castlevania: Chronicles of Sorrow) will make it palatable, turning it into one of the best healing items in the game.
* Castlevania Chronicles show a black sabbath in process on Easter Sunday, as if to mock Jesus.
* Castlevania Chronicles. They either act on their own, floating around and being evil, or they're under the control of the Puppet Master. The Puppet Master can make more French dolls on the spot, giving the advantage of numbers.
* Castlevania: Circle of the Moon also has a Necromancer boss who sometimes summons skeletons.
* Castlevania: Circle of the Moon has multiple New Game+ modes: Fighter (gives you increased damage with weapons but takes away spellcasting), Magician (reduces physical stats but gives access to all the spells at the beginning of the game), Shooter (increases subweapon damage and drop rate), and Thief (maxes out Luck).
* Castlevania: Circle of the Moon, however, was easily the best-received of the three.
* Castlevania: Circle of the Moon on the form of the Hunter's Whip, which protagonist Nathan Graves wields. There doesn't seem to be anything supernatural about it, though.
* Castlevania: Circle of the Moon. The Manticore card applies the Poison element to your spells, which results in predominantly purple graphical effects. Interestingly enough, antidotes are also represented by a bottle filled with purple liquid.

* Castlevania clan get to do their share of vampire-butt-kicking over the years as well.
* Castlevania companions Trevor and Alucard, Sypha has to repeatedly break up their fighting and tries to teach them to get along.
* Castlevania consists of a perfectly tailored double-breasted suit, still black, with a blood-red pocket square.
* Castlevania: Curse of Darkness as one of the Innocent Devils. He's the hardest one to craft due to requiring a special weapon to do so. He's practically useless in battle and generally goes down in a single hit, but using him is probably the most effective way of boosting your Luck stat, although whether it's worth the effort is another question entirely.
* Castlevania: Curse of Darkness does this twice: once when Hector starts gaining the power necessary to complete his quest, and once when he refuses to do so. Given the contradictory circumstances, one may wonder if he knows anything about the proper use of sarcastic clapping (then again, there is little reason to learn such nuances when you don't have skin on your hands.)
* Castlevania: Curse of Darkness so that killing him in the end will be more delightful.
* Castlevania: Curse of Darkness takes the cake for having its very own section, along with one extra joke weapon in each normal category which include floating cartoon bombs, boxing gloves, a badass-looking electric guitar, and a deck brush, classed as a pole weapon, the final charge attack of which, instead of a flashy attack or quick stabbing motion, involves Hector dash-sweeping in front of him for as long as you mash the triangle button. It is not only a handy attack but also a handy mode of transport, and with good aiming a great way to break open all those candle stands. Also, the sweeping attack does almost as much damage as a normal attack, so with a familiar who boosts strength you can actually kill the wyvern boss by cleaning his back.
* Castlevania: Curse of Darkness wears no shirt, only some odd bits of armor, nice tattoos and absurdly tight pants.
* Castlevania: Dawn of Sorrow, a Winged Humanoid soul gives Soma Cruz visible wings. They increase his luck. That's it.
* Castlevania: Dawn of Sorrow boss souls, which you can only get one of per playthrough. So if you make the Valmanway, you have to give up two useful and relatively unique souls. It's incredibly worth it, though, as the Valmanway, despite limited range, absolutely destroys every early boss and most end bosses.
* Castlevania: Dawn of Sorrow by the virtue of being one of the few reminders, along with the occasional handgun, that the game takes place in the future - 2036 in fact. This doesn't make them any less out of place in a jarringly way.
* Castlevania: Dawn of Sorrow by triggering buttons on the other side of them.
* Castlevania: Dawn of Sorrow counts, what with one of its members being an international arsonist and its leader perfectly willing to murder a helpless young girl in cold blood.
* Castlevania: Dawn of Sorrow does this when you fight him with the titular character.
* Castlevania: Dawn of Sorrow. Failure to do so within the time limit will just resurrect the boss with enough power to put up a fight again.
* Castlevania: Dawn of Sorrow has a soul you can collect which, when equipped, will regenerate health at a fairly generous rate whenever you're sitting down-be it in a Cool Chair, a few boards and dowels barely held together with glue, or a crate.
* Castlevania: Dawn of Sorrow heals a tiny amount of HP with each physical attack she does.
* Castlevania: Dawn of Sorrow. He can even copy Hell Fire, the attack you can only learn by completing the game on Hard. What's more, he's also able to copy the attacks used by the characters in Julius Mode.
* Castlevania: Dawn of Sorrow lives in the mirrors in its boss room, and jumps out of them to attack Soma. Defeating it lets Soma walk through mirrors.
* Castlevania: Dawn of Sorrow, Menace: a giant made out of body parts. Even the battlefield you fight it on is made out of corpses.

* Castlevania: Dawn of Sorrow (the game doesn't take place in Dracula's Castle, AKA Castlevania), which would merely be trivia otherwise. "Exact replica" could also mean that it works in the same way as Dracula's castle, which is possible, so the trope is downplayed.
* Castlevania: Dawn of Sorrow though, as one bonus mode places the player in control of Julius, the game is much harder (Normal Soma mode can be beaten mostly through brute force and healing items, but Julius can't pause the game and thus can't open the inventory), and while the seal doesn't need to be drawn, the game shows the sealing animation (though with the expected sequence, Julius is joined by a mage early on).
* Castlevania, Dracula and Alucard embody this trope more than any other character in the series. Alucard, being a playable example, can morph into the classic mist, bat and wolf forms at will.
* Castlevania: Dracula X is a group of bats that come together to form one giant bat. It turns back to them when hit.
* Castlevania drops either a soul (AOS/DOS) or an item (POR/OOE) that allows you to see breakable walls.
* Castlevania feature either an item, a soul or a glyph that allows the player to see the stats of whatever enemy they're attacking at the moment. They're displayed on the top screen of the DS, while the game is on the touch screen.
* Castlevania features a boss that uses these marionettes in battle, as well as placing voodoo dolls in iron maidens.
* Castlevania, features Skeletons as soldiers, pikemans, and magicians.
* Castlevania games are like this, often cube shaped things that give you magic powers. You can even turn them on and off at will!
* Castlevania games, as well as the Belnades and Morris families. The Belmonts are described as a clan of vampire hunters, but in the end it's only really Dracula (and his countless minions) that they wind up hunting.
* Castlevania games. Except more often than not, the castle is still crumbling as the Belmont-of-the-Day looks on from a distant cliff.
* Castlevania games have a skeleton enemy named Soccer Boy that forever kicks its own head while trying to pick it up. If you destroy the head, the poor guy panics and begins fumbling around. The western localizations made an amusing Shakespeare reference by changing its name to "Yorick".
* Castlevania games. Some of the most annoying generic enemies are witches, but they're all rather attractive and young looking. They still dress the part though, and fly around on brooms. Subverted entirely by the Belnades family, a clan of witches who have assisted the Belmont clan in destroying Dracula many times.
* Castlevania games, where players go through while refraining from using weapons or armor.
* Castlevania game). This allows you to gain an attack or special property for as many as there are different enemies in the game (with some extras).
* Castlevania: Harmony of Despair has a feature that activates when a player character's HP goes to zero: they turn into a standard bone-flinging skeleton, and they must be given a specific item for them to be able to turn back to normal. A death as a skeleton causes penalties on the level's time limit.
* Castlevania: Harmony of Despair take place in the Grimoire, a book chronicaling the collective history of the namesake dwelling of Dracula.
* Castlevania: Harmony of Dissonance and use the blood in order to reach the upper floor.
* Castlevania: Harmony of Dissonance features a Dark World referred to as Castle B, and you've been flipping back and forth between the two, though you won't find this out until halfway through the game. Castle B is exactly the same layout as Castle A, except with different enemies, bosses and items, but it's all wrecked compared to the pristine Castle A.
* Castlevania: Harmony of Dissonance features a Lure Key that opens almost all the doors in the castle, to ease backtracking in the later parts of the game. There are only two doors on which it doesn't work - MK's Bracelet opens one, and the Skull Key opens the other.

* Castlevania: Harmony of Dissonance gets flack for being the easiest game in the series, among other things.
* Castlevania: Harmony of Dissonance Its only attacks are to shoot a beam, which can be dodged by simply crouching, and to swing his arm at Juste, which can be dodged by being at the edge of the room. Sometimes he uses these two attacks at the same time, but this can also be dodged by crouching and then sliding to the end of the room.
* Castlevania: Harmony of Dissonance of the two castles' natures. Near the end, you have to locate all six of Dracula's relics, hidden away in both castles. You'll have likely found two or three initially though. Where you fight at the end also determines the ending.
* Castlevania: Harmony of Dissonance Skeleton Den area, which is just an immense catacombs. With, appropriately, lots of skulls used as a building material (along with other bones and non-bone materials).
* Castlevania: Harmony of Dissonance. The shadow itself takes on the forms of several things, among others a giant moth, a black panther, and a sabre.
* Castlevania: Harmony of Dissonance where the Talos (the massive suit of armor that chases you in the beginning of the game) crushes a smaller Living Armor that is set up to be the boss.
* Castlevania has been spotted near town, a man named Peter runs into the local pub demanding an ale. He downs his drink in one breath before telling the other patrons the news.
* Castlevania, he would fall in love with a woman named Lisa and have a son named Alucard. Unfortunately, this relationship didn't go well for poor Drac either.
* Castlevania" human, could still match Alucard in a sword fight (even though Alucard was likely holding back against Trevor). Despite being referred to as a "vampire" by everyone, Alucard leans more towards his human side than his vampire side.
* Castlevania III as he's been turned into a ghoul when you fight him.
* Castlevania III: Dracula's Curse that he was given a more significant role.
* Castlevania III: Dracula's Curse, thinly treading the line between cheap difficulty and actual fair challenge.
* Castlevania III: Dracula's Curse, Trevor fought Dracula with the help of all three of his allies.
* Castlevania III: Dracula's Curse version of it after you—through some miracle of metaphysics—manage to actually beat it.
* Castlevania II: Simon's Quest, as Simon has been cursed with Dracula's curse after battling the latter, and in order to prevent himself from dying, Simon must retrieve Dracula's five body parts from mansions across Transylvania, and bring them back to Castlevania in order to fight Dracula one last time.
* Castlevania II: Simon's Quest by killing lots of relatively weak enemies in the starter town.
* Castlevania II: Simon's Quest fire weapon, he's still ridiculously easy. He goes around and around in circles, and doesn't do much else; all you have to do is stand in the corner and throw daggers.
* Castlevania II: Simon's Quest. His FAQ points out that the character wasn't fully formed when he made that video, and therefore he picked up a good game and ripped it a new one as something for himself and his friends out of boredom. He didn't upload the first two episodes until much later.
* Castlevania II: Simon's Quest is original, but the gameplay footage is from the AVGN's review with the original sound running in the background.
* Castlevania II: Simon's Quest is that when in the water, you have to jump out to move.
* Castlevania II: Simon's Quest, making him a much greater challenge. Have fun!
* Castlevania II: Simon's Quest more than they originally did. And even if that was his first game he reviewed (it shows if you see the video), a later review had him say that despite his criticisms and complaints, the game was still an okay game.
* Castlevania II: Simon's Quest revolves around the player having to revive

Dracula ahead of schedule in order to kill him again, in order to break a curse he put on Simon Belmont for defeating him.
* Castlevania II: Simon's Quest that the word is a slang term for a slowly-patrolling man, in which case it is indeed a mistranslation, but not for the verb. It's since been discovered that duck references were and still are common in-jokes among Konami's staff, something that is acknowledged in the link provided.
* Castlevania II: Simon's Quest, the town of Ghoulash is abandoned but for one resident.
* Castlevania II: Simon's Quest to help you resurrect Dracula, even if you're doing it so you can slay him again).
* Castlevania II: Simon's Quest: "What a horrible night to have a curse".
* Castlevania II: Simon's Quest: WHAT A HORRIBLE NIGHT TO HAVE A CURSE.
* Castlevania impresses Alucard enough that he ends the fight and agrees to work with Trevor against Dracula.
* Castlevania instead. This is literally sprite reuse going from 1993 to about now. Harmony was worst about this though: many enemies had level 2 and even level 3 versions.
* Castlevania, in which one of the Count's unused but mentioned powers is to "grow and become small".
* Castlevania is the actual title of one of the arcade games in the series.
* Castlevania, is the oldest and most powerful hex known to man, which will bring the victim many misfortunes for the rest of their life. Or, more precisely, it does nothing, but the paranoia that comes with defying a witch convinces the victim that anything bad that ever happens to them must have been because of the curse.
* Castlevania). It also works for this particular Death, who's a servant to Count Dracula, and follows rules.
* Castlevania. It is one of the weaker weapons of that type, but with souls, can be upgraded. Even at the highest stage, the katana-esque weapon is one of the less useful ones compared with the highest stages of, say, the great sword (Claimh Solais), normal sword (the intense multi-hit wind attacking Valmanway) or the spear (Gunger).
* Castlevania. It takes a little while to convince him to join the fight against Dracula, though.
* Castlevania), it takes the form of a neutral ending, a bad ending, and the best ending. Oddly, the neutral ending is often the 'worst' ending, in that it takes the least work to acquire. Others have usually just had two endings, a bad one and a good one.
* Castlevania It then skips ahead another year to 1476, which is then used as the show's "present".
* Castlevania: Judgment began, thus having not yet met or allied with Alucard.
* Castlevania: Judgment, he specifically states that it will cause damage to the timeline. Since he has the power to fix it, however, there isn't much of an issue.
* Castlevania: Judgment is a time guardian whose powers revolve around time and clocks. Notably, his clock has thirteen hours on it.
* Castlevania: Judgment. Many fans utterly adored this new form and wondered why something like it wasn't his original design.
* Castlevania: Lament of Innocence and Walter of the same game display this, too, when they're showing the hell off with magic - Walter in a cutscene notably creepier than most of the others.
* Castlevania: Lament of Innocence, Dracula became a vampire so that he could live forever in defiance of God's decree that all living things must die.
* Castlevania: Lament of Innocence features the hidden character Pumpkin, who is basically a burlap sack fashioned into a humanoid shape with a pumpkin for a head. He fights much like Leon, only with a different (permanent) special weapon that's a combination of all of Leon's special weapons.
* Castlevania: Lament of Innocence) is unaffected by your sub-weapons, rendering the Black Orb useless against him.
* Castlevania: Lament of Innocence The image for it in the menu screen makes it pretty clear the IV and the VI are both on the tile before flipping it with that

contraption...
* Castlevania: Lament of Innocence Walter Bernhard imprisoned his vampire servant Joachim Armster in the Dark Palace of Waterfalls after his failed rebellion. The streams of water, acting like acid to vampires and other demonic creatures, guaranteed that Joachim would never leave his accursed prison.
* Castlevania: Legacy of Darkness. Adding to this, Death leads the unholy ritual in the chapel, making perverted Signs of the Cross while saying the incantation.
* Castlevania: Legacy of Darkness and time restrictions forced it to be separated.
* Castlevania: Legacy of Darkness (while werewolves aren't uncommon the series as a whole, in this game the player character is one)
* Castlevania: Lords of Shadow – Mirror of Fate Simon comes across a magical relic: a blue crystal ball. After picking up and staring at it for a bit, nothing happens, causing him to give a disappointed "Bah." and tossing it over his shoulder with a deadpan look, breaking it. After breaking however, the Spirit of Belnades appears from inside and starts to help him out.
* Castlevania: Lords of Shadow – Mirror of Fate. Trevor promptly whips it, breaks its mask, and renders it speechless for the remainder of the game.
* Castlevania: Lords of Shadow – Mirror of Fate wears one as he silently observes the Belmonts in the castle.
* Castlevania: Lords of Shadow 2 game than its predecessor, playing as Dracula is fun, and it's certainly much darker than the previous game.
* Castlevania: Lords of Shadow 2 generic demon, mind you, but not really special.
* Castlevania: Lords of Shadow 2, robotic enemies, genetically enhanced super-soldiers and shotgun wielding mutants.
* Castlevania: Lords of Shadow 2 specifically to murder any supernatural threats to the Antichrist.
* Castlevania: Lords of Shadow 2 that is the embodiment of Dracula's power and memories. Castlevania's power weakens the Acolyte enough to give Dracula a chance to defeat him.
* Castlevania: Lords of Shadow 2 that turns humans into monsters instantly, he is completely unaffected. There are not even ill effects for drinking their corrupted blood.
* Castlevania: Lords of Shadow a music box, with eerie music inside it.
* Castlevania: Lords of Shadow because of their battle systems and white-haired protagonists.
* Castlevania: Lords of Shadow fated to go down to the path of darkness, only trying to save his childhood sweetheart from death and never succeeding - and his offsprings, fated to fight against him himself.
* Castlevania: Lords of Shadow franchise, set outside of Koji Igarashi's official timeline.
* Castlevania: Lords of Shadow has a nightmare about inexplicably shanking his new female companion Claudia in the night, something which she is oddly okay with. He snaps awake, and is advised by the mysterious Pan to take the Dark Gauntlet from Claudia's guardian golem. Gabriel refuses to harm either of his companions, citing the dream he just had. Pan points to the nearby Claudia, sporting a silver dagger from her heart, and the looming guardian near her. Oops.
* Castlevania: Lords of Shadow has the Dead Bog stage, which will promptly pull Gabriel down if he fails to get out of there within an alloted amount of time.
* Castlevania: Lords of Shadow. Her death is what starts Gabriel's downward spiral.
* Castlevania: Lords of Shadow himself, except for one thing: so long as the player hits him with the right type of magic, each successful attack restores a preposterous amount of health. A single hit can bring back 20-25% of Gabriel's health, so the sort of 3-hit chain that any player who has gotten this far can execute in their sleep can restore one from critical to near-full. Oh yeah, and this is the one fight in the game in which Gabriel's magic gauges can never run out.
* Castlevania: Lords of Shadow, one of the Lords of Shadow who leads an entire sect of necromancers.
* Castlevania: Lords of Shadow, possibly because his face isn't visible.

* Castlevania: Lords of Shadow revolves around stopping the titular lords, who are (among other nastiness) barring the way for dead souls to heaven using an evil mask.
* Castlevania: Lords of Shadow were enough to overwhelm their enemies and wipe them away from existence.
* Castlevania: Lords of Shadow, you need to use your magic to counter his, so if you hit him with the opposite magic, it's meter (and your health) will refill immediately, so as to not leave you unable to fight him.
* Castlevania manual, which did have an alternating 2-player mode, as both manuals were written with the same basic template.
* Castlevania, meanwhile, is focused on a completely unrelated group of vampire hunters, including hero Nathan Graves, who also want to help keep Dracula sealed up in their own way.
* Castlevania: Nocturne of Ruin: Stella's hair reaches her waist when let down; Charlotte reflects that she never noticed before because Stella always had her hair up beforehand.
* Castlevania. Nonetheless, it's really useful for those flying enemies!
* Castlevania not only does villain have no trouble buying this, their own ally has to remind himself it's a cover story.
* Castlevania. No whip in videogame history is as well known and respected as a weapon as the Vampire Killer.
* Castlevania of him from the whip could give Jonathan Morris a good dose of schooling.
* Castlevania or a laser shooting tentacle monster covered in naked corpses in his castle? Because it's disturbing, that's why.
* Castlevania: Order of Ecclesia allow you to summon zombies to fight for you, which is in turn taken from the Necromancer enemy in that game.
* Castlevania: Order of Ecclesia and its sequel also have a soul that steadily drains your health while boosting attack power.
* Castlevania: Order of Ecclesia are of the Belmont lineage, but don't have their last name.
* Castlevania: Order of Ecclesia be permanently destroyed after you beat it; it is frozen by a talisman upon defeat, and if you attack it again, the talisman will break, causing it to revive and attack you, once more.
* Castlevania: Order of Ecclesia can transform into a catgirl with a particular glyph. It gives her a new set of attacks, it makes the normally hostile enemy catgirls friendly to her (to the point that they aid her in battle), and it also allows her to talk to the various cats that she rescues.
* Castlevania: Order of Ecclesia delivers one while teleporting around and lunging at the player character.
* Castlevania: Order of Ecclesia eventually can obtain the ability to conjure a pair of black wings for flight.
* Castlevania: Order of Ecclesia gave you the option to fight the Chinese vampire, Jiang Shi, in the Large Cavern bonus dungeon. He's not very hard, though, seeing as how proper use of Melio Scutum and any slashing Glyph would easily reduce his 6000+ HP down to nothing. Though this boss is interesting in the fact that when he dies, a seal is placed on his face, but if you break it off with an attack, he comes back to life, allowing you to fight him again as many times as you want. Not worth the attribute points though (30, 60, or 120).
* Castlevania: Order of Ecclesia had Blackmore, a boss near the end of the game. His shadow is host to a powerful demon, which manifests as a wolf-monster, and he apparently feeds on the shadows of others if his introduction is any indication. ("I will take your shadow!") Appropriately, his area is lit with hundreds of floor-mounted candles.
* Castlevania: Order of Ecclesia is a giant centaur-like creature which can only be damaged if the player hits its eye. This can only be accomplished by destroying the jewels on its four legs, its two crossbows, finding a way to get under it and behind it without being crushed, and finally climbing up to its back and attacking its eye all while avoiding its various attempts to knock you off again. A certain

glyph can skip a large part of this process however.
* Castlevania: Order of Ecclesia. Justified in that her emotions (and memories) were blown away at the beginning of the game. In fact, when told by a villager that she should smile more often...
* Castlevania: Order of Ecclesia. Marcel is a newspaper writer who tasks you to take a photo of the cryptid and wonders why it's called a Jersey Devil.
* Castlevania: Order of Ecclesia on contact, but her movement is extremely slow and getting hit by enemies drains her MP, which ends the transformation when it runs out. Amusingly, enemy automatons will fall in love with her on sight, following her around and even fighting other enemies for her.
* Castlevania: Order of Ecclesia several times her own size. This is the strongest attack in the game, and sufficiently boosted it can take even Dracula himself out with just a few swipes.
* Castlevania: Order of Ecclesia tendencies. Whether or not Shanoa feels the same is uncertain since we don't see much of her prior to her memory loss.
* Castlevania: Order of Ecclesia, the Dominus glyphs, which are required to kill Dracula in this particular game, are made from Dracula's own power.
* Castlevania: Order of Ecclesia, there is the giant mecha-centaur demon knight (well, at least it's original) called Eligor. To kill him, you have to attack his eyeball, which is for some reason on the back of his head. The only way to actually be able to damage him is to get onto his back, and getting there requires destroying a number of glowing red orbs on his knees first.
* Castlevania: Order of Ecclesia: The Skeleton Cave. According to the game, the bony fiends themselves created this unholy place by ransacking a nearby cementery and using the bones to built this temple of the dead.
* Castlevania: Order of Ecclesia through a large and intricate tattoo on her back.
* Castlevania: Order of Ecclesia uses a glyph to pass through walls to avoid the explosions of the bombs he fills the room with and carries an infinite amount of Super Potions, making it impossible to kill him the normal way. Absorb the glyph while he's inside the wall and he dies instantly.
* Castlevania: Order of Ecclesia use them to fly. Good luck doing Large Cavern without them.
* Castlevania: Order of Ecclesia, where Shanoa simply collapses if she gets killed while on the ground most times instead of this trope, which only happens under certain circumstances. Somewhat annoying from a gameplay perspective, as you may not immediately notice that she's dead.
* Castlevania: Order of Shadows involves three Belmont siblings, two of them women. But only the guy gets to take on Dracula, and the game isn't considered canon anyway.
* Castlevania: Portrait of Ruin all feature the classic movie monsters as the bosses of each area: a buried pyramid for Mummy Man, a chaotic circus for Medusa, the streets of London for the Werewolf, and a haunted academy for Frankenstein's Monster.
* Castlevania: Portrait of Ruin, and he was so powerful than he almost managed to steal Dracula's Castle away from him. Like Carmilla and Death he loses his original powers, but unlike them his new powers are nowhere close to equal to what he had before.
* Castlevania: Portrait of Ruin, Brauner gets angry enough before his boss fight that he presses his cane into the ground until it snaps.
* Castlevania: Portrait of Ruin: Charlotte Aulin. Everyone treats her like a kid... even her partner.
* Castlevania: Portrait of Ruin, Charlotte teases Jonathan a couple of times by turning his catchphrase, "No problem", back on him.
* Castlevania: Portrait of Ruin Dracula, since the former swoops in to stop the fight before you can kill them and flees with them, and when they leave the castle crumbles on its own.
* Castlevania: Portrait of Ruin, for pretty much for the entire first half of the game, you get warned about how having Jonathan or any other non-Belmont use the true power of the Vampire Killer will drain their life force and eventually kill

them if they overuse it. But when you do actually unlock its power in game, you can whip it all day long with absolutely no consequences whatsoever. Justified, as it takes longer than the events of the game for the user's life force to be drained.
* Castlevania: Portrait of Ruin had this as one of its gimmicks, allowing players to explore very different settings from the 'typical' environs of Dracula's castle.
* Castlevania: Portrait of Ruin has Brauner, who seems to be an Orlok double. Still second fiddle to Dracula, though.
* Castlevania: Portrait of Ruin has this for a good amount of it's female characters in Charlotte and Maria. In Charlotte's case she does share Johnathan's ability to jump off their partner but due to later skills for the main characters and the skillset for the Maria/Richter combo there are certain points the girls can't reach on their own without their male partner doing the work. The sisters Stella and Loretta bypass this by being able to fly everywhere.
* Castlevania: Portrait of Ruin has two circus levels with creepy music.
* Castlevania: Portrait of Ruin have bloody hands appear and disappear on the wall as you walk through one of the hallways.
* Castlevania: Portrait of Ruin, Jonathan Morris states that his childhood friend Charlotte Aulin is like his dear sister, much to her displeasure since she doesn't like to be treated like a child.
* Castlevania: Portrait of Ruin. Jonathan resents his father for only teaching him the basics of fighting before dying, and that he can’t use the Vampire Killer whip as a result, but after realizing that a non-Belmont using the whip shortens the life of the wielder if overused, he comes to realize why his father did what he did.
* Castlevania: Portrait of Ruin: Jonathan's outfit is red, while his menu items are red or pink. Charlotte's outfit (including underwear!) are blue, as are her menu items.
* Castlevania: Portrait of Ruin of the London Underground. At first one wouldn't think much of the railroad tracks, thinking it's just part of the flavor (it's a repurposed segment that appeared earlier and was used for a minecart ride)...then the locomotive suddenly appears.
* Castlevania: Portrait of Ruin, on the other hand, they all call Shanoa "cute little kitty"...
* Castlevania: Portrait of Ruin, others summon weapons or other entities to attack over short range.
* Castlevania: Portrait of Ruin revolved around the villain's creation of evil pocket dimensions within paintings.
* Castlevania: Portrait of Ruin, the witch protagonist Charlotte learns how to cast a Toad Morph on herself and Jonathan to aid their progress. Backtracking with the spell is required to reach the best ending.
* Castlevania: Portrait of Ruin) with a fire attack causes them to become skeletons, even if the attack should've reduced their HP to zero.
* Castlevania practically runs on this trope, with demons and mythical monsters thrown in for extra variety.
* Castlevania remake in Unreal Engine, stopping further development of the project.
* Castlevania: Resurrection launch title, featuring Sonia Belmont. Late in development, it was cancelled for reasons that remain mysterious.
* Castlevania retrospective — The last line is accompanied by two cannons put together.
* Castlevania Rising from the grave is exactly what he's supposed to do.
* Castlevania: Rondo of Blood as while Richter still wears blue, Maria changed her pink dress to a green one.
* Castlevania: Rondo of Blood, double jump, attack super fast with an army of owls, and do a forward slide. It's a wonder anybody ever uses Richter in that game.
* Castlevania: Rondo of Blood has a painting that, if allowed to come close to Richter, will suck him into the artwork and then split itself apart, killing him instantly.
* Castlevania: Rondo of Blood has a phantom painting that flies around a room. If the player touches it, they become instantly trapped in the painting itself. The

man in the painting then rips you apart, and you fall to the ground in many two-dimensional paper-like pieces.
* Castlevania: Rondo of Blood, her Ayami Kojima redesign features pants and a ponytail, presumably because of this trope.
* Castlevania: Rondo of Blood, most of the series mains have died in roughly this manner...regardless of how they were killed. Absolutely anything, from being hit with a giant axe, to being lightly tapped by an angry bat when low on health, will cause them to fly into the air and dissolve in a mist of blood.
* Castlevania: Rondo of Blood, restored her health with ice cream sundaes, lollipops, cakes, and ice cream. She actually has more variety of health power-ups than Richter does!
* Castlevania rounds out the cuteness with owls instead and new Item Crashes, but she still looks somewhat girly doing so.
* Castlevania RPG has the Sorceress overhear workers talking about building an aqueduct:
* Castlevania RPG while specifically not hitting Darkmoon, his vampire ally and later friend.
* Castlevania's Belmont clan succeeded in killing Dracula off for good? Julius, in his longcoat.
* Castlevania series has scarecrows high in the gruesome scale: they're hopping pikes with impaled corpses.
* Castlevania series. He's got the suit, personality, and he belongs to a secret Japanese government agency that deals with the paranormal.
* Castlevania series is considered the ultimate undead-killing holy weapon.
* Castlevania series is mentioned in the in-game bestiaries as once having been gentle, but having lost its mind to insanity due to torture and imprisonment.
* Castlevania series just about every fictional creature has appeared at some point, mostly as the enemies the player fights.
* Castlevania set in 1691, but there have been games set before this time. And a shitload of sequels/interquels. So much so that the main climax isn't even a game yet!
* Castlevania, sometimes accompanied by an Owl Knight (he gets pissed off if you kill his bird and vice versa). They even show up as familiars and a magical transformation you can use.
* Castlevania: Symphony of the Night also features them. A notable example is found in the Royal Chapel, specifically the room where you fight the Hippogryph, that depicts a group of scythe-wielding winged skeletons massacring crusaders in front of a temple.
* Castlevania: Symphony of the Night also has the "Rebound Stone". In an open space it's essentially a slower knife weapon that fires at an unusual angle, but it can clear a tight hallway of weaker enemies with one shot.
* Castlevania: Symphony of the Night, Alucard needs a special artifact to go into water unhurt.
* Castlevania: Symphony of the Night Alucard Sword has a special attack that allows Alucard to teleport across the screen, turn around, slash twice, and return, all in about a second or less. There's also at least one katana that allows similar attacks.
* Castlevania: Symphony of the Night). Depending on certain variables in the game, Maria will either respect Alucard's decision to disappear and return home with Richter or confess her love for him and follow him.
* Castlevania: Symphony of the Night. Despite having 10,000 HP and being able to hit pretty hard, it is very possible to beat him without any familiars, spells, or even items, since all that HP is shared among his three heads, making it possible to do three times the damage per hit that you'd normally do. He's still significantly harder than most of the bosses in the game, though.
* Castlevania: Symphony of the Night features Alucard, who does this in gameplay a lot, when he's turned to stone, or untransforms in a tight passageway. For Dracula in the prologue, it's more like "big WHAT IS A MAN?!"
* Castlevania: Symphony of the Night has a level called Long Library. It contains

numerous books, including ones that attack the protagonist, Alucard. There is a shop belonging to the Master Librarian, the head of Long Library. He sells items - such as healing potions - to Alucard.
* Castlevania: Symphony of the Night has a library with hostile flying books.
* Castlevania: Symphony of the Night has more HP than Dracula and hits really, really hard. Fortunately, you don't have to beat him to meet the Count.
* Castlevania: Symphony of the Night has one, or at least implied from the character's reactions. Alucard sounded terrified, while Richter sounded like he was dying while riding it!
* Castlevania: Symphony of the Night, he vanishes suddenly and mysteriously four years later. One year later, Annette's sister Maria sets out to rescue him.
* Castlevania: Symphony of the Night is described as frightening to enemies, and it halves their defense because of it.
* Castlevania: Symphony of the Night is still widely considered the best game in the entire series.
* Castlevania: Symphony of the Night item which renders you immune to his lightning, allowing a patient player to beat him with ease much earlier).
* Castlevania: Symphony of the Night it sounds like, though you can only get it near the end of the game.
* Castlevania: Symphony of the Night just to learn once more about the true nature of humanity.
* Castlevania: Symphony of the Night moves that greatly supplement his mobility. A good Richter run clocks in at around 5 1/2 to 6 minutes.
* Castlevania: Symphony of the Night nature of the voice acting in the otherwise fantastic game, the clash in the prologue between Dracula and Richter Belmont could qualify.
* Castlevania: Symphony of the Night. One of the best songs in the game that starts with a 15-second orchestral sting, and almost two minutes of build-up.
* Castlevania: Symphony of the Night), Richter throws down a challenge to Dracula, shouting out all the reasons why the vampire lord is unfit to rule the world. Dracula responds by throwing down his wine glass and a hearty "Have at you!" and the battle begins.
* Castlevania: Symphony of the Night Ring) is an uncommon but not prohibitively rare drop that gives an absurd boost to all your stats (It boosts your overall attack higher than all except a few of the strongest weapons in the game), and you can equip two of them at once or combine one with the Duplicator to negate its stat penalty.
* Castlevania: Symphony of the Night. The castle is "a creature of Chaos."
* Castlevania: Symphony of the Night: There are two varieties. The first type merely flies at you and tries to slam into you. The second type opens up and tries to skewer you with an array of magically summoned weapons.
* Castlevania: Symphony of the Night. They also float and predominantly attack by body-slamming into their target.
* Castlevania: Symphony of the Night to warn you. Thankfully, newer CD players are actually smart enough to mute what it thinks isn't an audio track.
* Castlevania: Symphony of the Night used afterimages whenever...well...ANYTHING happened, really.
* Castlevania: Symphony of the Night: "What is a man?! *tosses wine glass* A miserable little pile of secrets! But enough talk! Have at you!"
* Castlevania: Symphony of the Night; while there's not much information available, it seems that it didn't get far in development.
* Castlevania: Symphony of the Night, who he remembers in the form of Trevor's 8-bit NES sprite.
* Castlevania: Symphony of the Night, you first fight one of her snake-tentacles in a separate boss room.
* Castlevania takes place in modern Japan and/or the moon), but it's where the series' roots are.
* Castlevania that are apparently human like the Gravekeeper and the Invisible Man.
* Castlevania: The Adventure: The rolling eye enemies explode when they're killed.

The explosion is potent enough to blow apart pieces of the bridge in Stage 2.
* Castlevania: The Adventure where the sabbath was led by Ivan Bartley. The production materials also refer to the Night Stalker enemies as being "Priests of the Evil Cult".
* Castlevania: The Dracula X Chronicles, one of Dracula's third form's attacks literally makes the blood rain from above.
* Castlevania: The Dracula X Chronicles, Richter's girlfriend, Annette, gets turned into a vampire/succubus by Dracula and ends up wearing skanky black succubus lingerie.
* Castlevania: The Dracula X Chronicles still use the classic PS dialogue, making this trope more apparent, rather than attempting to hide it as is usually so when a "replacement dub" happens.
* Castlevania. The English name for this enemy is "Banshee", which fits well enough.
* Castlevania there is a special set of zombies. These three particular zombies are fought as a boss against Alucard by impersonating his three allies, Trevor Belmont, Sypha Belnades, and Grant Dynasty from the third game, with their abilities to boot.
* Castlevania: The scythe-chucking Grim Reaper is almost always Dracula's second in command.
* Castlevania, the series was salvaged back into Stage 4, even if not through games.
* Castlevania: The various games use hearts as ammunition, mana pickups, and/or money.
* Castlevania titles released in 00s get this too, for lasting around 9-12 hours.
* Castlevania to move out of the way before the Count materializes fully.
* Castlevania, using either a spiked belt or a magic dagger. In "The Harvest", Isaac faces an evil magician who has mentally enslaved an entire town to his will. While the Magician has immense power, he is also physically frail and weak. He is utterly helpless once Isaac gets past his defenses and shrugs off his mind control.
* Castlevania. We are left to assume that the Crimson Stone did all of it; while crafted through alchemy, it may as well be wizardry.
* Castlevania: When Dracula finds out his wife, Lisa, was arrested on trumped-up charges of witchcraft and is already dead, he warns her elderly neighbor to take her family and run before he unleashes hell on Wallachia. He doesn't tell her this because she was nice to Dracula himself, but because she was the only person to pay respect to Lisa's memory.
* Castlevania when he rises every 100 years (though there have been many exceptions). Each time he rises, there are only one or two Belmonts around to do the job.
* Castlevania, where, when powered up to its full potential, it manifests as a light whip.
* Castlevania. While Carmilla herself is recognized as the nominal leader of the group, each of them as their own area of expertise and run things by committee.
* Castlevania who frequently pops up and deprives Gabriel Belmont of his special abilities.
* Castle Waiting, Lady Jain seeks sanctuary at the titular shelter to escape her abusive husband.
* Castle Waiting — A comic series about what happens to various fairy tale characters after their well-known stories end.
* Castle was actually just waiting for the kidnapper to stand in the right spot. As for Castle, he grabs Alexis the second the real bomb goes off and makes a beeline for the US embassy.
* Castle was autographing a woman's chest, he's been married at least twice, and he commands a decent price in celebrity bachelor auctions.
* Castle was captured by a minor gang leader named Machete, who insisted on killing a cuffed Castle in a machete duel. Castle rejects the machete and kills the guy with his bare hands.
* Castle was found crammed into a wall safe, and one so small that it's obvious the

corpse's limbs had to be broken to stuff it inside. The position of the hands and feet strongly imply that it was shoved butt-first into the safe.
* Castle was found squeezed into a wall safe. Many of its bones had to be broken to cram her inside.
* Castle were going pretty well, though things went downhill afterward).
* Castle. We see a character get into a car and die when the car explodes, leading to the usual expectation that someone planted a car bomb. As it turns out, the car was hit by a guided missile.
* Castle, when a con-man who has fallen in love with his mark is murdered by his partner in the con; it ends up being Beckett, who is investigating the con-man's death, who has to reassure the woman that while the con-man's identity was initially a hoax, his feelings for her were genuine and that "you made him want to be a better man." Ironically, this is after Beckett has spent the entire episode cynically rejecting the idea that the con-man could have felt anything for the woman, convinced it was all just part of his con. The truth is left ambiguous
* Castle, when Castle has been feeling insecure about the fact that his daughter Alexis is no longer the little girl she used to be and is gradually moving away from reliance on him and into adulthood, as evidenced by her getting a boyfriend. At the end of the episode, Alexis 'happens' to casually suggest that they go out for a meal and hang out, the way they used to when she was little. Castle pegs immediately that she's been informed of his earlier insecurity and that he's essentially being offered a 'pity date', but he's willing to take it at that point.
* Castle. When he sees the alleged killer pulling a knife on Beckett, he, Esposito and Ryan race to the apartment, where it turns out that Beckett staged the whole thing as an elaborate birthday surprise for Castle. When he finds out that there was no murder, he initially stands there in utter shock, muttering, "You made me think I was crazy?", and you can see the apprehension in Beckett's face as she worries that they may have carried this a bit too far. Finally Castle declares, "This is...without a doubt...the GREATEST BIRTHDAY PRESENT OF MY LIFE!"
* Castle... when his mother arrives. Poor woman gets shoved in the wardrobe while Castle tries to stall his mother... and then realises that she's left her bra by his bed.
* Castle when, owing to a chain of circumstances, he ends up outside while the police are storming a suspect's headquarters only for the suspect to (rather slowly) drive right past him. He misses the license plate, can't see anyone clearly through the tinted windows and ends up only able to vaguely describe the car to the cops, who — given that he's based a very lucrative mystery-writing career on describing things in detail — are less-than-impressed.
* Castle: When Prince Davith's tunnel burning plan fails and he learns that reinforcements from King Edward are coming in, he knows he's screwed if he presses on, and so orders his troops to fall back.
* Castle: When they find a strange symbol among the evidence at a crime scene (part of a "th" that had snapped off a keychain), Castle suggests that it means the killer is The Artist Formerly Known as Prince, despite it not directly resembling his symbol.
* Castle where Castle pretends that he doesn't know how to shoot a target so Beckett "teaches" him how. She stands behind him and moves his body around, completely missing the shit-eating grin on his face as this was his plan all along. However, it's less sleazy and more cute as he also wanted to cheer her up after they hit a dead end during an investigation. Plus, there's this line.
* Castle, where the suspect (who they are absolutely certain is the killer) gives them absolutely everything they need, over the objections of his lawyer. "Save the defense for when I actually kill someone, all right?"
* Castle who had a monitoring system to alert a cryonics company to collect him for freezing upon his death. This causes several problems for Castle and Beckett when the company in question abscond with the body before the police arrive.
* Castle, whom they suspect of the murder of the week. She points out that either he's really dead, in which case he didn't do it, or he's not, in which case they're still married and she can't be compelled to testify against him.

* Castle with the attractive detective who is the main character of the novel. Castle himself is a high-profile mystery novelist who lives a rock-star and is doing a ride-along with the NYPD, getting into UST with the attractive detective who is his latest muse. Coincidence? Surely.
* Castle Wolfenstein shouting "SS" in computerized Mockingboard speech and appearing out of nowhere behind you. Back then it would scare the bejeebies out of you.
* Castle Wulfenbach is so large it's practically an Airborne Airborne Aircraft Carrier Carrier.
* Castle Zagyg and the deal Troll Lord Games had with Gygax fell apart when his wife took control of the company. Nobody's sure what exactly happened, all people know is that in 2008, Gygax Games was going to find a way to publish the rest of the castle.
* Cast of Expies (most of the characters in a work are parodies or pastiches of existing ones)
* Castoff - not a job where "nice" pays. Consequently, she's bluntly distrustful, even paranoid, towards pretty much everyone, and when she genuinely wants to be nice, she stumbles. A lot.
* Castoff, often times with blood. She just shrugs it off like it's nothing.
* Castoff, where Vector is wanted for "high treason" (Arianna calls that bullshit - long story, but she's most probably right), along with everyone he collects along the way. Since the authorities have learned their planned route, "Wanted" posters await the party's arrival in two towns so far.
* Cast of Snowflakes: Everyone looks distinct vs. everyone looks similar.
* Cast of Snowflakes: The work has a great deal of variety when it comes to character designs.
* cast one) — if they ask for too much, or something not following the god's philosophy, god says "no", and you waste time and a spell. And in the later case, the GM could reasonably have the god punishing the cleric for their temerity.
* Castor and Pollux occurred in deep space, when the twin who'd taken history instead of advanced math had to spend all his leisure time playing catch-up in that essential spaceman's discipline.
* Castor and Polydeuces were both Argonauts, which implies they were older than Theseus, but toward the end of Theseus' career when he is supposed to be a man past his prime, he kidnaps their sister Helen, and it is a plot point that she is too young to marry at this time. Helen would later be the cause of the Trojan war which happened a generation after the voyage of the Argo, which means that Castor and Polydeuces would have to be at least a generation older than their sister, but they all share a mother.
* Castor, disguised as Archer, leads FBI agents in opening fire on Dietrich's penthouse with no attempt to announce themselves or arrest them. Legally, this is attempted murder, and Director Lazarro is outraged by this afterward, calling it "Gestapo tactics".
* Castor kills an undercover FBI agent he caught early on, then kills several more over the course of the film.
* Castor's associates, including Dietrich and Sasha, do the same in the raid on Dietrich's penthouse. In fairness though it's arguably self-defense as the FBI came in firing without even an attempt to arrest them.
* Castor's laser cane is the only man-portable firearm in the entire movie, and it boasts a quite impressive fire rate. The shots even bounce around the room when they hit a wall, which most of them do.
* cast page here as well? Tons of bit parts (hah) who were nonetheless named, or at least referenced in such a way as to make them notable...
* cast page line, leading Haley to point out it's no worse than what she and Elan had to say. A dejected Elan mutters "But I wrote that myself..."
* castrated and transformed). With demons, the metaphor can become real very fast:
* castrated brutally, and says that he's only showing him mercy one time. Kamikiri tries to attack the Great Pyrenees once more, but...surprise, surprise! His fangs were ripped out! And it's been confirmed that he died from his wounds.

* castrated but high-ranking officials at court. The Chinese sometimes did much the same thing.
* "Castrovalva" had too much to drink the night before and filmed those scenes while suffering from a hangover.
* "Castrovalva"", Khalid is credited as played by "Leon Ny Taiy"; it's Ainley again. A lot of fans were not fooled, arguably playing this trope straight.
* "Castrovalva" perfectly normal, but if you try to leave the centre of town, no matter what direction you travel, you'll soon end up back there. When the city starts breaking down, it begins to resemble an Escher picture.
* "Castrovalva", the newly-regenerated Fifth Doctor mentions sensing an malevolent presence at the center of the Tardis. This would've been followed up on later in the season, but the planned story got dropped, leaving the reference sticking out as an odd aside.
* Casts No Shadow (1814) by Adelbert von Chamisso sells his shadow to a mysterious stranger in exchange for a purse that never gets empty.
* Casts No Shadow, long persecuted for it, meets with a woman who similarly has no shadow — only to be revolted and turned away from her by the discovery that she also has the unnatural property of having no reflection.
* Cast Speciation" even centres around her supposed unwillingness to kill, even to protect a young female character with her.
* Cast Speciation: Two characters who serve a similar role in the story are differentiated by their contrasting personalities.
* , cast spells, and even has a special ability to cast multiple spells at the same time. It also has only five hit points. Even Bulma had more than ten times that when Goku first invited her to his party. As a result, he dies to a single bullet from Bulma's uzi.
* casts the player as a rookie musher who has to foster his own sled dog team.
* Cast Swap: Unlike canon, Duncan and Gwen become this after the latter breaks up with him (for different reasons than canon).
* Cast the Expert: Hiring a professional to act in a work about said profession.
* Cast the Expert — this was the very first acting role that she ever took, so when Joss hired her, she wasn't so much an actor who could also dance as a dancer who could also act. In hindsight, however, it becomes a straight example.
* Cast the Runner-Up: Someone who auditioned for a bigger part ends up in a different role.
* cast to change genders. By the end of the story, Ren, Nora, and Weiss choose to remain in their new bodies, even taking new names. Initially Jaune and Pyrrha decide to stay as a girl and boy respectively, though the final chapter revealed they turned back.
* Casty's recent "The World To Come" finds Mickey and Eega Beeva engaged in intrigue with the country of Illusitania, which is shown on a map as being located near Medioka
* Casual Danger Dialogue" once they sort out their relationship problems Kim is all smiles while fighting a battle-suited Ron, even though the person remote-controlling the suit is trying to kill her.
* Casual Danger Dialog: Where heroes in danger will crack jokes or speak casually rather than gibbering in terror.
* casual dress, they switch to solid white and black respectively, with accessories to highlight them.
* Casual Game has a sequel (in fact, has two sequels), but it's eclipsed by the fast food titles.
* Casual Gamers, who are playing because that's what their friends are doing. They aren't there for the grand plot, the fantastic magic, or even for sticking things with sharp objects. They're just there to socialize, and gaming is the social activity their friends are doing. While Laws provides detailed advice on how to satisfy the needs of each of the other types of player, he specifically offers no special advice for Casual Gamers, since they'll either remain a CG, drop out, or become more involved in the game - at which point, they'll differentiate into one of the other types.

* Casual games can be even more prone to this trope than conventional video games. In the Hidden Object game
* Casual High Drop: Escape via a long fall and the ability to survive the landing.
* Casual Interstellar Travel: Interstellar flight that is taken by normal people regularly in a short amount of time.
* Casual Interstellar TravelWhen travel between the stars is easy, cheap, quick and convenient.
* Casual Kink: BDSM and other fetishes are seen as normal expressions of love.
* Casual Kink: Either a person's kinky personality is treated as normal and unimportant, or someone casually says something that implies they have a fetish.
* Casual listeners of music don't really think about time signatures until they have to do something that involves committing to keeping a rhythm, like playing an instrument — or playing
* casually deduces a few embarrassing facts, and blackmails her without so much as looking up from his game. Haqua agrees but is annoyed.
* Casually mentioning he has been involved in a number of cults, both as a leader and a follower.
* Casually revealing major plot twists in discussion of the book, or even the book's preface or
* casually shooting an unarmed man three times in the head without a second's hesitation, Walker to let him fire upon the unarmed civilians who lynched him.
* Casual players have this issue, too — they tend to default to stages which allow for maximum chaos.
* Casual Sports Jersey) wears a sports team uniform outside of a sports environment.
* Casualties of War, after the rape and murder of an innocent village girl, Eriksson is almost killed by a grenade in the American HQ because he was trying to tell someone what happened.
* Casualties of War has been dubbed in Japanese twice. The first was released on VHS and DVD. In 1996, a second dub was aired on Fuji TV.
* Casualties of War. He kidnaps, rapes, and kills a young village girl, then tries to kill PFC Eriksson with a grenade in the latrine.
* Casualties of War is the newbie in this film, but in something like three weeks, he treats another newbie like new meat.
* Casualties of War kidnap, gang rape, and murder an innocent Vietnamese woman, aside from one soldier who reports them to command, which is the main plot of the entire story.
* Casualty all of the victims-of-the-week (who are regular cast members themselves) have been pulled out of the wreckage alive.
* Casualty, but apparently emergent trauma has to go through the casualty before anything else.
* Casualty had been sitting inside the wreckage with him, keeping him from bleeding to death until his leg could be unimpaled, and didn't have time to get out before the fuel tank unexpectedly went boom.
* Casualty has already had a 10+ year run in its own right (since 1999).
* Casualty. His on-screen birth took place in 1996 and he stated he was 10 years old in 2006. A year later he was a rebellious teenager who smoked cannabis and accidentally set his high school on fire. He impregnated a woman in 2010 when he would have been 14 but by this point his year of birth had been changed to 1992 and it was repeatedly announced that he was now 18.
* Casualty is based around this idea. In the first episode of 2012 for example, a dog escapes from a back garden, this leads to a major traffic accident taking out 5 or 6 cars, which leads to one man being delayed in stopping a suicide attempt, in trying to save the suicide victim and dealing with the traffic caused by an accident, a gas main is accidentally destroyed causing an explosion which rips apart a housing estate. This in turn causes some nearby chemical drums to burst, creating a huge cloud of Hydrogen chloride, which ends up getting into the drain system causing part of the town to be evacuated. We end up seeing several hundred people affected by various burns. All this happens on the same morning that the

A&E department first reopens after a major fire so all the equipment is new and most of it untested. And this is just one episode.
* Casualty once featured two patients from a car crash: a girl and her strangely high-pitched voiced boyfriend. The doctors realised the boyfriend needed a chest examination. This revealed what certainly wasn't a boy's chest.
* Casualty one – who, unlike the real thing, dresses fairly plain-Jane, so to speak.
* Casualty the Williams family history has become particularly contorted by the result of a paternity test; it was revealed that Chrissie was conceived by the rape of her mother by her presumed father's father, making her presumed father her actual half-brother.
* Casualty, when a man being threatened over his debts steals an unlocked car from in front of a house in order to pay them off, not realising that there's a man hiding in the boot waiting to surprise his girlfriend who's just passed her driving test.
* Casualty when one cast member found himself in the middle of nowhere with a wrecked car whose driver hadn't been wearing a seatbelt and broken her larynx on the steering wheel or something.
* Casualty would be treated a lot faster and more accurately if they were honest about the cause of their injuries and what they've been taking. The doctors don't even ask when the police are in the room, in the majority of cases, yet the patients still lie.
* Casual Video Game allows you to control up to ninety individual village-members with their own names, appearance, and skills. The females can get knocked-up. By anybody. That includes their brothers, fathers, and offspring (assuming the offspring is old enough). Thankfully, the game doesn't actually keep track of family relations (which is probably why this is possible), sparing the sensibilities of players who forget or don't pay much attention to the lineage. Or turn their back on randy relations for half a second.
* Casual Video Game, one hour is usually enough time to see if you like the game or not.)
* Casual Video Game site, works the same way as Big Fish Games: The games can be played for one hour free; to play longer you need to buy it.
* ''casu marzu'' in most of the EU, including the region where it is produced. Some traditional cheesemakers in Sardinia are trying to get an exception made for it, on the grounds that it is a traditional food of the region, but thus far, they have not been successful.
* casus belli DLC, richer, typically kingdom- or empire-tier, realms can afford to create retinues, professional standing army units which are more expensive to create and maintain than levies, but also have higher stats.
* casus belli was the British impressment of sailors from American ships. Muddying up the waters was the fact that many of the sailors who where impressed were actually British sailors who jumped ship. The concept of citizenship was still quite fuzzy at that point, and every sailor serving long enough on a British ship in the past was considered elligible for the press.
* Cat abuse is a running gag throughout the movie. While this is normally a horrible thing to joke about, it actually is funny because the cats are clearly fake and all the characters are completely nonchalant about it.
* Catachan Devils, a species of gigantic centipede-like alien with scorpion attributes.
* Catachan Face Eater, this creature is probably the most feared predator.
* Catachan find them impressive, and their basic weapon is a five-foot-long axe/machete/backscratcher.
* Catachan has a cactus-like plant called the Spiker which fires its spikes out at nearby animals. These spikes contain mutagenic chemicals that transform any animal unfortunate enough to be pierced into another Spiker.
* Catachan just for surviving to adulthood, and anyone who doesn't shape up fast enough can generally look forward to meeting the Commissar and being sent to a Penal Legion.

* Catachan might be an even better example than Cadia. It's a world where every plant and animal is poisonous, carnivorous or both, the jungle constantly encroaches on any settlement laid down and needs to be burned away every day, the native flora and fauna include
* Catachans, being fiercely independent badass jungle fighter Ramboes, used to have a special rule ("Oops, sorry sir!") in which if a commissar is attached to them, you must roll before the game starts to find out whether or not he suffered an "unfortunate accident". Being based off of
* Cataclysm, Antlered Horrors (undead moose), and various types of zombie dogs.
* Cataclysm are not werewolves, they're Worgen (named after worgs, which are basically dire wolves).
* Cataclysm are so dangerous is because of their smash attack that sends characters flying back several spaces (potentially through walls), inflicting HP and equipment damage, increasing the pain counter, and causing the downed status effect.
* Cataclysm asks you to subdue rather than kill an ogre mage, who pretends to surrender but then suddenly grabs you and dangles you from a high place until he's surprised in turn from behind.
* Cataclysm as most of the world is open to flying, and few hard-to-find nooks remain.
* Cataclysm averts it. The high level zones are all very esoteric and threatening, except for the highest level zone Twilight Highlands, which is mostly verdant hills and woodland.
* Cataclysm Backstory - The society went downhill and set off the plot, but it happened quite a while back so logically, it's offscreen.
* Cataclysm Climax: The land, usually discovered during the story, is destroyed at the end of it.
* Cataclysm, Combat rogues who take the Close Quarters Combat (dagger and fist weapon spec) talent get a bonus while using daggers and fist weapons that they won't if they use other weapon types.
* Cataclysm costume, a Tailor's Kit (the best sewing tool in the game), a cheeseburger, a Boston AnimeCon Magazine, and level 1 tailoring skill.
* Cataclysm death knights, that's understandable. But then Sylvanas throws out a line about the Alliance only sending non-human forces against the Forsaken because they're all immune to undeath. Said line only exists to justify why the Forsaken don't simply plague and turn all the Alliance forces.
* Cataclysm, Deathwing calls Ultraxion the most powerful Twilight Dragon he created.
* Cataclysm detect them, but as long as the mimic behaves like the ship/object it is projecting a hologram of, it's unlikely. Intended only as a way to scout enemy positions and send back intelligence, Mimics don't have offensive weaponry, but are capable of ramming enemy ships in a suicide attack if discovered. Two Mimics are capable of combining into a Martyr-class Mimic Composite Vehicle, basically a corvette-sized version of the same but capable of mimicking a larger craft or an asteroid. The Leech-class Breaching Pod is an unmanned drone that passes ordinary detection by being really tiny and can only be detected by specialized sensor arrays. It attaches to an enemy ship and slowly melts its hull, given enough time and an inattentive player, a single Leech can destroy a heavy cruiser.
* Cataclysm did this in the un-modded game, and also didn't bother with the orientation convention. In-universe they were designed for this role from the ground up, with weapon placements allowing them to engage at any angle.
* Cataclysm expands this with exploding Magic Mushrooms that leave behind fungus that slows enemies. Restoration druids get to grow healing plants as a side effect of their spells.
* Cataclysm expansion, all Paladins were given regal horses as their mounts, despite how silly male draenei look on horses, as mentioned above. But this would obviously not work for the new tauren Paladins, so they were given Sunwalker Kodos instead. It's possible that the developers were designing them and remembered how odd male draenei look on horses, because now draenei Paladins have their own specialized mounts too.

* Cataclysm expansion, a second is revealed; the World Pillar in Deepholm, responsible for keeping Deepholm (one of the parts of the elemental plane) from collapsing into the world.
* Cataclysm expansion. A sizeable number of its population have chosen to become Worgen to protect themselves from the invading zombies and Forsaken. And Silverpine Forest, the second place a Worgen will visit, is a similar pinewood paradise simply infested with wolves, bats, giant spiders, rogue Worgen and the invading Forsaken. It rains almost constantly, there's always a full moon, and everybody sounds like they're either nobility, or choking on a cockney.
* Cataclysm expansion is Lady Sinestra. Only accessible in 10 and 25 man raids, AFTER clearing the entirety of the Bastion of Twilight in Heroic mode.
* Cataclysm expansion, it's possible to add "battleship" and "science lab" to the number of roles it fills. While still fairly vulnerable, it was much more capable of fending off fighters and small capital ships on its own. With a particular upgrade, they could even wipe out enemy fleets.
* Cataclysm features Cho'gal, an ogre leader of the Twilight Cult, with eyes on his chest and arms.
* Cataclysm features skeletons as mildly strong enemies. Cutting weapons do little damage and ranged weapons will miss most of the time, but blunt weapons are very effective against them.
* Cataclysm for a chosen specialisation at level 10 instead of around 30), dungeons are readjusted for new level ranges, etc. It is very awesome.
* Cataclysm gave what a contingent of fans had long wanted: letting players fly in Azeroth, new race/class combinations (with controversial lore used to justify Tauren paladins), playable Goblins for the Horde (a much-loved race that had until then been kept out of the Horde/Alliance factions), playable Worgen for the Alliance (which retconned their somewhat vague origin from alien beings to lycanthropes).
* Cataclysm gear requirement for heroics are rare in 2012, since almost all the time there's at least one person who's (sometimes drastically) overgeared who carries a group through.
* Cataclysm gives us the Rotbrain, which are the new villains of Deathknell. One priest sadly notes that they seem human outside, but are sick within. They eventually rally and plan to take over the town, and must be killed.
* Cataclysm has a morale meter that is affected by things like the food your character eats or the weather. If morale gets too far in the negatives, you are locked out of crafting or repairing items until you get it back up.
* Cataclysm have an attack called "Fling Filth". It's exactly what it sounds like, and the spell description ends off with "How rude."
* Cataclysm have armor, but less than a helmet (which occupies the same slot) would generally give.)
* Cataclysm have this as their backstory, where they underwent Bionic augmentation in order to survive an otherwise terminal illness.
* Cataclysmic Horizons seeks to repurpose and reuse a lot of its characters.
* Cataclysm, "Innawoods" is a challenge where city size is set to zero in the world settings, resulting in a world with (mostly) only field and forest zones, making many useful items that only spawn in cities impossible or much harder to obtain.
* Cataclysm introduced two instances that take place in the Skywall: Vortex Pinnacle and Throne of the Four Winds. While Skywall is presumably much larger than what was seen, they both qualify as being sky cities.
* Cataclysm is a huge blow to the Beast, but all of that means the scattered remains of the Beast aren't near-unstoppable anymore, and there's a post-game clean-up;
* Cataclysm is promptly revealed to have been infected by the Beast, and is now an enemy ship.
* Cataclysm might be considered one of these, for all that it's actually not all that useful.
* Cataclysm nearly reduced Azeroth to this. Only timely intervention by the Earthen Ring prevented complete devastation.

* Cataclysm, Nefarian refers to the reanimated corpse of his sister Onyxia as his finest work, and you fight the two siblings together in the Nefarian's End encounter.
* Cataclysm New England, most of the ones you find are cheap replicas that break easily, but if you are lucky enough to find a real one, much carnage will ensue for the zombies.
* Cataclysm, players can now fly in the original world, so Blizzard had to completely avenge it from the ground up in such a way that the entire world was accessible via flight. However there are still unclimbable slopes if you are not riding a flying mount.
* Cataclysm priests. While in Warcraft those classes wield the God-like power known as the Light, the tauren are unique in that their powers come from the literal sun itself, and worship of it. You'd never know in game, however, as they are functionally identical to the other priests and paladins regardless of their lore.
* Cataclysm redid and streamlined the entire old world, the questing is now very linear and following the entire zone-wide chain will make sure you go to every inch of an area, and each surrounding zone (with the sole exception of the plaguelands) is now built to be able to enter and quest as soon as you finish the current area.
* Cataclysm reference involving fire bars, but electricity instead of fire.
* Cataclysm reveals that the Bentusi are connected to their ships in a similar fashion. They seem to consider this a stage in a civilization's development and collectively refer to races that have achieved this feat as "The Unbound". It's implied they helped out the Kushan due to Karan being newly Unbound herself.
* Cataclysm's Blackwing Descent raid instance has you fighting the reanimated Nefarian after he also brings his sister Onyxia back to life. Just to drive the point home, they attack twice as fast by just being in close proximity to eachother.
* Cataclysm sealed though, especially considering zombies gain a bonus to their ability to smash obstacles when surrounded by fellow undead.
* Cataclysm (specifically, it started out as its original hangar module infected by the Beast, and still carried the original schematics and was upgraded first to match them and then on its own way). It doesn't have a siege cannon, only an infection beam that subvert enemy ships.
* Cataclysm. Splattering animals also precludes butchering them for meat or pelts, but there are weapons and ammunition designed not to pulp the corpse, for small game hunting. Finally, corpses can also be smashed or butchered after killing them.
* Cataclysm struck and relieved some unfortunate soul from their duties wearing it.
* Cataclysm, taurens began their own sect of paladins called Sunwalkers, who draw their power from the sun god An'she in the same way the night elves draw power from the moon goddess Elune. Despite being granted similar powers to paladins, however, it's implied that the source of their power isn't drawn from the Light in the same way it is for other paladins. Rather, they embody the power of the sun and represent a kind of exemplar of their people, much like how human paladins embody the power of the Light and are exemplars of their own.
* Cataclysm that forced them to adapt to different boss fights the way damage-dealers do.
* cataclysm that would snare targets, but because snaring was all it does, they ultimately decided it wasn't worth it and swapped it out for other skills.
* Cataclysm the Alliance navy fires upon a Bilgewater goblin (slave)ship which is unaligned with anyone as they are ordered to fire on any ship that passes through. This forces the goblins to land on Kalimdor and ally themselves with the Horde for survival.
* Cataclysm, the Molten Front and Firelands have hounds that appear to be flaming dog skeletons, about twice the size of the characters.
* Cataclysm themselves kind of present an aversion, being spread all over the two main continents (and one in the middle, and one in another dimension entirely), especially since every other expansion has introduced a new, smaller area that did this. However, both of the Capitals have portals to these zones for easy travel that generally only require you to complete the introductory questline to the zone

(which often teleported you there as well).
* Cataclysm there is a quest in Mount Hyjal to extinguish burning Twilight Cultists who have failed their training test to defeat a fire elemental.
* Cataclysm: The Ultimates' Last Stand suddenly drops out of the sky looking to devour Earth.
* Cataclysm: Twightlight's Hammer is now the new faction that you generally rescue slaves from.
* Cataclysm, Vanessa VanCleef from the Deadmines (Heroic mode only). One reason she's notable is that normally, Heroic mode fights are exclusive to raids.
* Cataclysm, where she acted abrasive, probably due to a previous incident. Of course, before anything is fleshed out about him, a car drops on top of him.
* Cataclysm, with the dwarven Explorer's League coming to blows with the elven Reliquary, course they are on opposite factions so its to be expected.
* Cataclysm with the evil Black Dragon's being rendered extinct by Wrathion; apparently the only uncorrupted Black Dragon.
* Cataclysm with the graphical limitations typical for the genre, your character's appearance is mostly left to your imagination, leading certain players to draw their mutant survivors while coming up with a backstory explaining why the character became a mutant.
* Cataclysm zones from the third expansion. Characters will generally recognise you as a great hero and faction leaders frequently show up and make it clear that they know who you are and what you're capable of. They still want you to collect bear asses, but they have more flattering ways of justifying it. The rewritten early quests also tend to try to make you feel less anonymous.
* Catacomb Armageddon that look like harmless bunnies hopping on the spot (yes, that's rather weird) but turn into large semi-humanoid monsters to attack.
* Catacomb Fantasy Trilogy has its last levels in hell, with some really big scary demons!
* Catacomb Lords procreate through sacrifice rituals. Vlad manages to interrupt such a ceremony and even
* Catacombs and ossuaries (where bones are taken after they've been in a grave for a respectable amount of time to free up graveyard space), they're stored by bone type and size, not by owner, because it's a more efficient use of space.
* Catacombs over-emotional lady who plays this trope straight several times, plays this trope, most of the time randomly, as she runs about the underground Catacombs because she's seeing evidence of scary stuff.
* Catalan, the shot went wild, and only non-seriously wounded Kirkman.
* Catalina and Rhoda also hide their relationship, which is helped by the fact that they go to different schools, and very few people know both of them. While many of Catalina's friends and acquaintances know that she is gay, and that she is dating some mystery person, only a handful of other people seem aware that it's Rhoda. In this case, the secret stems from a desire on Rhoda's part to hide her sexuality from her friend Diane, as she doesn't want Diane to find out that she has been crushing on her for quite a while.
* Catalina Caper has dorky, bespectacled henchman Larry constantly going on about baseball.
* Catalina C-Lab, a failed 1982 pilot which follows the exploits of the oceanographers attached to the Gamma Foundation, a marine research center.
* Catalina de Erauso. She had several female lovers who never realized she wasn't a man and served in the same company as her brother, who didn't recognize her.
* Catalina has a habit of making zany plans. For example, her plan to convince everyone that Elliot isn't gay involves
* Catalina later falls in love with Susan; the latter still wishes to be friends however. Susan even had an
* Catalina. She loves to cause misfortune or suffering to others, including sexual, and this is evident when she tortures C.J. for sexual pleasure.
* Catalina thinks that Susan's misandry means she might be playing for the ladies' team, and asks her out.
* Cataluna Chronicles series are about a sleek white car which is possessed by an

ancient evil.
* Catalyst Games Lab, producers of, among other things, Shadowrun, Cthulhutech, and Battletech, went into deep financial trouble in May 10, 2010 from flagrant embezzlement and shadiness by the CEO, although the story gets murky as to who stole the money and whether the CEO was just trying to cover for a close friend who actually embezzled the funds.
* "Catalyst" opens with her and Smitty fleeing Gillitie woods hell-for-leather, and Parley and Eglamore both go
* Catalyst Verse after Control tortures her, killing all of Control's guards instantly and allowing her to escape.
* Catalyst Verse: Dragons are stand-ins for the artificial superintelligences of canon translated into the story's fantasy world. They are few in number but ancient and powerful; even their ashes can be used to fuel magic.
* catalyst which means that it isn't consumed in the reaction and will go on to cause all the other atoms it meets to decay. Physicists seem to be quite sure that they exist.
* Catalyst, which she describes as "a tissue box on wheels with a bulimic hunger for motor oil."
* "Cat & Mouse", a children's song by Mike Jackson and Ian Blake, has the mouse try to do a chain of deals to recover her tail after the cat steals it. She finally gets to the crow, who offers her a feather in exchange for a piglet from the sow... who flatly refuses.
* Catana Comics: Catana interrupts her boyfriend getting undressed by leaning around the door facing and saying "Mooooore", implying that she's been watching him the entire time.
* Catana Comics, Catana's boyfriend John is much taller than her, and several comics have her either standing on tiptoe to kiss him or compensating in other ways, such as standing on a stack of books.
* Catana Comics shows Catana spends hours in the sun with no difference in skin tone, while John gets sunburned in the time it takes to walk to the mailbox and back.
* Catana draws herself pouring fire out of bottles to show how spicy she likes her food.
* cat, and also references her Trollian handle, arsenicCatnip, 33 being the atomic number for arsenic.
* Cat And Chocolate: Making sense of noodle implements is the aim of the game. In this japanese game, you are trapped in a haunted house and something dangerous happens. You then have to use one to three random items from a hand of three cards (e.g., a pencil, an empty bottle, the cat or the chocolate from the title of the game...) to save yourself.
* Cat and Girl uses a fairly standard size format for its comics, but sometimes there will be an extra panel or two drawn in grey that adds a punchline.
* Cataphract cavalry. The ancient precursors of knights (who themselves were
* Catapult-assisted carrier launches fit this trope extremely well; no book or encyclopedia entry featuring carrier planes is complete without a money shot of the plane hooked up to a catapult with a flight deck man pointing the plane forward.
* Catapult Nightmare: After a nightmare, a character falls out of bed or sits up abruptly.
* Catapult Nightmare, but anyone who travels bodily to the plane is in real danger from the hazards of the subconscious.
* Catapult Nightmare involving her nearly dying of asphyxiation while trying to dance in it.
* Catapult Nightmare: Someone wakes from a nightmare by falling out of bed or sitting up abruptly.
* Catapults: Simple constructions designed to fling projectiles, which can be
* Catapults, trebuchets, and other medieval siege engines. Because they had to be pulled by horses or people, they weren't very fast, and couldn't be aimed without turning the entire machine around, but they were the perfect tool for launching boulders, bombs, and dead bodies over castle walls.

* Cataract is a condition where the eye lens becomes clouded and results in loss of sight and treated through surgery. The earliest cataract surgery was 800 BC, using a curved needle to
* Catarina accidentally gets engaged to the charming third Prince Gerald, which should have been exciting since the first time they met she fell in love at first sight. However, when she sees him again she's (
* Catarina Devon has a lovely figure, but an incredibly ugly face, with a sloping brow, crooked teeth and lips, and a stereotypical witch's nose.
* Catarina's adoptive brother Keith also have earth-aligned magic, though his is significantly stronger to the point that he can create massive earth golems.
* Catarina's elemental affinity is earth, though her magic is weak with the original character only using it to trip people. Current Catarina manages to move a larger amount of earth after seven years of work, but it still isn't much. This is a rare example of a hero being aligned with the earth element (Generally Fire, Air, Light, and Darkness get more attention), but then, Catarina accidentally forced herself into the hero role - the original heroine was the light-aligned Maria.
* Catastrophe, Sharon Horgan and Rob Delaney both play characters who have the same first name as theirs.
* Catastrophe Theory fanfic, deconstructs this trope. All of the main characters have access to multiple means of resurrection, but resurrected sims retain full memory of their death and have to recover from it like they would any other traumatic event. Furthermore, if death is cheap, what's to stop a morbidly curious sim from dying on purpose?
* Catastrophe Theory is a reconstructed Casanova. Rather than dazzling the ladies with his masculine, alpha traits, he's shown to be subservient, sensitive, empathetic, and more than willing to drop everything and clean the sink. And women flock to him because of it.
* Catastrophe: The sex of the baby can already be seen on the ultrasound, even though it's only been just over a month from the likely conception date (Rob is told by Sharon that she's pregnant thirty two days after, and goes immediately to London). Fetal genitalia don't even develop until around the ninth week, and can't usually be seen until twelve weeks at the earliest. Sharon should only be in the fifth to sixth week at the most.
* catastrophic consequences for their species, as being able to apply the odor of one's offspring to non-relatives might have averted millions of years of genocidal warfare among bloodlines.
* Catastrophic Countdown is set, the whole area starts joining in. Even before the boom.
* Cat Ballou, Catherine is dismayed to find that Shelleen, whom she hired due to his high reputation with a gun, is constantly drunk and uncoordinated as a result. Even his horse shows a similar laid back attitude.
* Cat Ballou Strawn was Shalleen's brother (due to his facial disfigurement) until after Shalleen shot him. Both were played by Lee Marvin.
* catbeard/kittybeard, but because it also looks like a pair of kittens.
* Cat becomes pregnant when a polymorph uses him to host her eggs in "Can of Worms".
* Catbert and the Pointy-Haired Boss, at one point, discuss taking out a life insurance
* Catbert is probably the living embodiment of this trope. After so many of his fans, independently, named the character, Scott Adams wanted a reason to keep the character, and came up with Catbert being hired as the Director of Human Resources. His rationale was that a cat was
* Catbert is the "Evil Director of Human Resources". That's right, he's got the word "evil" in his job title. And he lives up to it with glee:
* Catbirds And Dogfish (for example, the catbirds are all portrayed as cats with wings, and the dogfish are all portrayed as fish with bulldog heads instead of medium-sized gray birds and small, speckled sharks like in real life).
* Cat Blank, being a villainous version of Cat Noir, has unlimited uses of his signature Cataclysm, which have been powered up to the point he can destroy

* Cat Bountry for writing what could be the best and well-known fanfics in the fandom, including
* catcalling construction workers. He admits to not knowing what said gesture even means.
* Catch 21 's first season was sponsored by Kraft Real Mayo. From time to time, the power chips in the end game were renamed "Burger King Power Chips".
* Catch 21. Winner of that hand wins the game. Say you curb-stomped both of your opponents in the first two rounds (say, 1500-100-0). You're obviously going through to the final, and the guy with 100 points goes with you, since he's in second. Now, your opponent is dealt an ace to start the final round, then answers just one question correctly and pulls a 10-value. Well, buddy, you're screwed. Hope you made a 21 earlier so the bonus prize goes home with you.
* Catch-22 after being hit with anti-aircraft fire. His only reaction is to moan softly, "I'm cold, I'm cold", over and over again.
* Catch-22 among many that help push the protagonist, Yossarian, into near insanity.
* Catch-22, by Joseph Heller. The chapters themselves unfold non-linearly with existentialism as a heavy motif. The novel itself examines a fictional setting on the European front of World war 2, in particular highlighting the senselessness of the war in the form of absurdist black comedy.
* Catch-22, Colonel Cathcart and Colonel Korn have had enough of Yossarian's troublemaking, and end the meeting with a vow to (metaphorically) "kick him in the balls!" Cut to Yossarian getting literally kneed in the groin by a nurse he'd gotten a little too overly friendly with.
* Catch-22, despite being hilarious as a whole, becomes increasingly dark as the story progresses, eventually throwing out all comedy in one of the final chapters. Subverted in some ways, considering that before it gets truly horrific, many of the moments of comedy could, if observed objectively, be taken for equally horrifying. This suggests that the increasingly serious tone and likewise decrease in jokes is more an intentional device of the writer and not a direct consequence of the trope.
* Catch-22 Dilemma when Squidward gets frustrated by the apparent absurdity of it all:
* Catch-22 Dilemma (You have to do A in order to do B, but you have to do B in order to do A.)
* Catch-22 espousing Cathcart's deep personal grief when the recipient's father, husband, brother or son was killed, wounded or declared missing in action.
* Catch-22 Ex-PFC Wintergreen thinks it's funny. In more general terms, pretty much every officer in the book is too incompetent and/or crazy to be suited for their given rank, and most of the enlisted aren't much better.
* Catch-22 has a comedic deconstruction, where Milo Minderbender spends chapters trying to figure out what step 2 is, including attempting to coat the cotton in chocolate and sell it as emergency rations.
* Catch-22 has, among its many things, a man who keeps intentionally getting court-martialled so as to get sentenced to dig ditches instead of go on the front lines. He also fraternizes with the officers.
* Catch-22 has a number of obstructive bureaucrats. Ex-P.F.C. Wintergreen is a notable one — he's just a mail clerk, but has become one of the most powerful men in the military because he can simply throw away any orders he doesn't like.
* Catch-22 has a scene in Major Major's office, which has a photograph of FDR on a wall. As Major Major talks with Sgt. Towser, he paces in circles around the room, causing the photo to disappear from view and then reappear, replaced in succession with pictures of Churchill and Stalin.
* Catch-22 has several, most notably Mudd, the dead man in Yossarian's tent.
* Catch-22 (his version substituting "mediocre" and "mediocrity" for "great" and "greatness" respectively) rather than Shakespeare.
* Catch-22 in such a way as to make them seem hilarious, only to then describe how they essentially ruined his life, leaving him a shadow of his former self.
* Catch-22. It was written 33 years after the original novel and has essentially been ignored. Nothing else Joseph Heller ever wrote came close to Catch-22 in

popularity. His rather brilliant comment on the situation:
* Catch-22, Milo Minderbinder's trade empire is "M&M Enterprises, Fine Fruits and Produce". The ampersand is only there because otherwise people might think it was a one-man operation.
* Catch-22. Never let Milo Minderbinder talk. Or ex-PFC Wintergreen. Milo was able to make a profit by selling black market foodstuffs to himself. And rightfully bragged about it. The whole of Catch-22 is based on the idea that the military is run on insane troll logic, as is the US system of capitalism. Look at where Minderbender convinces High Command that the Luftwaffe subcontracting bombing the Americans to the USAAF is perfectly reasonable.
* Catch-22. No matter what you want, he will get it for you, as long as you pay the price.
* Catch-22. Often, it's done so subtly that you don't even realize you've changed scenes until a few sentences in.
* Catch-22 on trumped-up charges. When Clevinger tries to protest that punishing him would be a violation of justice, the judge goes into a full-blown rant.
* "Catch-22" opens with one of Desmond's prophetic visions (in this case,
* Catch-22, the doctor has a habit of putting his name on a certain pilot's flight roster but not actually going along, so he can continue to get flight pay without the danger. It backfires horribly when the plane crashes and it's immediately noticed the Doctor was a passenger, as per the flight roster. The Doctor, standing right there watching the plane crash, protests and points out he's standing right in front of them, but the other characters immediately begin ignoring him and lamenting his death.
* Catch-22: the military was unsure of how to handle his most recent flight, which destroyed the target but in an unusually risky manner and at a fairly high cost, so they decided to pretend this was intentional.
* Catch-22, this is the result of failing to go along with the Great Loyalty Oath Crusade.
* Catch-22 to keep track of the timeline and each character's actions while writing the book, which he started in 1953; it was first published in 1961.
* Catch-22 to show how little the commanding officers cared about their men, Colonel Cathcart and Lieutenant Colonel Korn use a form letter to tell the relatives of soldiers that their [Husband / Father / Brother / Son] has been [Wounded / Killed / Captured].
* Catch-22 ultimately boils down to this, as the American soldiers justify committing war crimes as Catch-22 gives them the right to do anything they can't be stopped from doing.
* Catch-22 was ranked seventh on Modern Library's list of the greatest novels of the 20th century, and it's hilarious. Granted, it does get more serious later in the book.
* Catch-22. Well, attempted, as the clause Catch-22 makes it so that trying to be declared insane to avoid combat is a lose-lose situation - if you are insane, filing the forms to declare yourself insane proves your sanity. You'll be flying combat missions, deal with it.
* Catch-22 when McWatt's practical joke of buzzing the beach goes horribly wrong.
* Catch-22, who Yossarian tries and fails to save mutters this repeatedly as Yossarian tries to patch up his leg. Yossarian thinks this is because they're high in the sky in the tail of a plane with holes shot it in it. It's also because the gunner has been nearly shot in half - though is still alive - and Yossarian doesn't realize he's had his gut torn open by shrapnel which got underneath his flak jacket.
* Catch-22 with whom he has fallen in love. She is referred to as "Nately's Whore" throughout.
* Catch-22, Yossarian is given letters to censor while in hospital. To relieve the boredom, he censors random words rather than actual valuable information.
* Catch-22: Yossarian left his tent in Marrakech one night to fetch a candy bar, and was lured into the bushes by some unknown WAC, and wound up with a dose of the clap. Clevinger once suggested that this should have taught Yossarian the evil of

sexual misconduct. "It teaches me the evil of candy," says Yossarian.
* Catch a Falling Star: Swooping in and saving someone from falling to their death.
* catch a long-range Stand user while they hide somewhere and use their Stand to hassle the protagonists, who can't effectively fight back until they pin down the user.
* "Catch and Release": Steven is getting ready for bed, and says goodnight to his stuffed animals: "Good night, happy bear. Good night, sad bunny. Good night, playful kitty. Good night, ominous triangle at the foot of my bed." The "ominous triangle" turns out to be Peridot, who kidnaps Steven and tries to get him to help fix the Galaxy Warp.
* Catch and Return grenades, as those are moving at human throwing speeds.
* catch arrows in flight — BUSTED! The myth was tested by shooting safety arrows at the Guinness Book of Records champion ninja. Six arrows hit him. He jumped away from three and caught the tenth arrow; in a real fight, he would have been dead before that tenth one. It is possible, but highly impractical. Also Busted because ninjas knew better than to put themselves in a place to get shot at.
* catch as catch can days, when most practitioners were miners or carnies, being a field worker, like Farmer Burns, was an easy way to stand out from the circus folk, carnival folk and miners. Although farmer gimmicks quickly became cliche, they never really went away.
* Catch As Catch Can of tapping out when they were clearly just trying to wake a limb up or relieve pain.
* catch as catch can rules, Alo Leilani would use karate chops instead, which for some reason people insisted were "judo licks". Judo is a largely non striking martial art.
* catch 'em all onwards give out more worthwhile rewards: a charm that make eggs more likely to appear in the Day Care, and a charm that makes finding Shiny Pokémon easier.
* Catch 'em if You Can", Marge and Homer are supposed to go to Dayton, Ohio for an elderly relative's birthday, but decide to take a last-minute romantic getaway to Miami... then wind up in Atlantic City when they find they're being tailed by Bart and Lisa. Homer and Marge are making out in a glass elevator, and Marge expresses (mock) concern about other people seeing them.
* Catch 'Em If You Can" where, in an attempt to have a vacation without the kids, Homer and Marge travel across the world. Bart and Lisa pursue them using Rod Flanders' card along with Homer and Marge fleeing with Ned's. Both card owners are naturally shocked to receive their next statements.
* Catcher Jake Taylor gets a batter to pop up for a game-ending out with a little impromptu trash-talking along these lines:
* catches a falling wine bottle in front of her husband, which confirms him that she was an undercover assassin, and her that she just screwed up in front of him.
* catches fire in contact with water be discarded immediately. This is applicable for electric cars as well - battery fire has destroyed a fair deal of vehicles that way.
* catches up to the evacuees of Haven, Cullen gets her to the medical tent in this manner.
* "Catch Fetiche", the wrestling style pioneered by Edingwe Moto in the Democratic Republic of Congo, has this reputation among observers from other countries. While most of the wrestlers, including Moto himself, practice traditional grappling styles, locally developed or otherwise, and adopt tactics from other grounded combat sports, the men who get the most international attention are known for openly using potions(drugs) developed by doctors to make themselves fight better. They are known for using
* Catching Fire after walking knife-first into a force field during the Quarter Quell.
* Catching Fire, but that's as far as it goes before they are separated.
* Catching Fire did this just to screw with Katniss as she entered the arena, in the hope that her focus would be thrown off and she'd get herself killed. With Cinna's murder, character deaths were no longer restricted to the Games.

* Catching Fire for several minutes before they cough and sputter to life.
* Catching Fire hints at Johanna having a one-sided romantic attachment to Finnick, giving her a bitter speech about his (to her) incomprehensible devotion to Annie. The idea that she might be in love with him pads out her motivations some more than in the books, where she treats him with slightly less disdain than she does everyone else but with no reason given; it also explains why, despite claiming that she's already lost everyone she loves and has nothing to lose, he seems to be the one to convince her to join the rebellion against the Capitol.
* Catching Fire, Katniss throws herself on him, screaming, "Liar!" and hitting him until they sedate her, when she collapses, still sobbing, "You're a liar."
* Catching Fire. Peeta sleeps in her bed to help her cope with her nightmares but it's platonic (at least on the physical level). When Effie Trinket hints to Katniss that it's inappropriate she hopes President Snow will hear about it and think they're doing more than just sleeping.
* Catching Fire series, Romulus Thread reinstitutes whippings as punishments. Gale receives a flogging after being caught poaching.
* Catching Fire series, when Katniss and Peeta are at the Capitol, Katniss mentions in passing eating a soup that she describes in her narration as "tasting like springtime."
* Catching Fire, she knows that the kitchen staff on the train "clearly wants to please" her because they made the stew.
* Catching Fire. They go at it for quite a while before they are interrupted.
* Catching Fire when she imagined Gale being the one volunteering for the Games and beginning a televised relationship with his fellow tribute.
* catching her coming out of a bath is more common than playing it straight.
* catching lasers, after which Stewie is lobotomized and put to work in Santa's workshop.
* Catching Up on History: A character has to catch up on what they've missed.
* Catch Me If You Can Abegnale is so convincing that he completely convinces the FBI agent that he has been arrested by another cop, and the agent allows him to leave.
* Catch Me If You Can, after Hanratty captured Frank and they were on a plane back to the US. Hanratty let him use the bathroom after breaking the news that his father was dead, and Frank escaped by removing the screws holding the commode down.
* Catch Me If You Can, claiming it fulfilled his fantasy of meeting his father again.
* Catch Me If You Can, con man Frank Abagnale Jr. works illegally as a doctor, among other things. This subplot looks almost as if it could be reused as a pilot for a television series. Which is entirely appropriate, since Frank is shown studying hospital dramas for lingo and basic protocol ("Do you concur?").
* Catch Me If You Can for Frank becoming a con artist and counterfeiter, many details from Frank Abagnale Jr.'s life were altered or added in the film. For instance:
* Catch Me If You Can: Frank Abagnale Sr. was apparently quite a succesful entrepeneur at one point, but by the start of the film he's being scrutinized by the IRS for sketchy book keeping, likely tax evasion. First he's forced to sell the old family home and downsize his store. The last time his son sees him, his business has apparently gone under, as he's now a deliveryman for the US postal service.
* Catch Me If You Can, Frank Abagnale starts out his career of conning people and counterfeiting checks after running away from home and trying to support himself. He gets less sympathetic as his crimes and the amount of money he has stolen increase, but he remains likeable as a devilish rogue who outsmarts his enemies with sheer brains and bravado, and also scores points for tiring of his life as a criminal, becoming a consultant to the FBI helping catch other criminals (Abagnale now runs his own security firm for this purpose).
* Catch Me If You Can, Frank (posing as a lawyer) claims to have been taught by a professor who also taught his girlfriend's father, and her father asks what the professor's dog's name was. Frank, smelling a trap, replies simply that the dog had

since died. The father remains suspicious.
* Catch Me If You Can. He waltzes through the airport with 8 hot stewardesses, and everyone looks at them, completely forgetting that the person they are hunting is walking with them.
* Catch Me If You Can — con artist Frank Abagnale Jr. attempts to use this technique while posing as a lawyer, having seen Perry Mason do it on TV; after his climactic accusation, the judge sternly informs him that he is at a preliminary hearing and neither the defendant nor the jury are present.
* Catch Me If You Can mother -Frank learned it right along with English.)
* Catch Me If You Can's character gives a presentation on The Big Board explaining his findings on the check forgery cases, and is met with boredom from the rest of the FBI.
* Catch Me If You Can thinks he found an attractive woman willing to take a romp with him only for her to reveal herself as a high-class prostitute. Frank turns the tables on her, by overpaying her with a phony cashier's check and receives his change in cash, effectively tricking a gorgeous hooker into paying him $400 for a night of testing the hotel's bedsprings. According to Frank Abagnale's book (which was the basis for the movie), this incident ultimately cost him big-time as the hooker gave the FBI a description of him, something they didn't have before then.
* Catch Me If You Can. This is justified by the fact that the real-life Abagnale also looked much older than he was, and in fact, his deceptive looks were a key part of how he was able to pull off his scams. After Agent Hanratty encounters him for the first time, he profiles Frank as someone being in his mid-to-late twenties.
* Catch Me If You Can: When asked to say grace at the home of his girlfriend, Frank Jr (who has never done so before) instead recites his father's go-to inspirational story:
* Catchphrase, a British game show that lasted sixteen years. (Not to be confused with the much less successful American version upon which it was based.)
* catchphrase; a character during the Jacobite Rebellion is exposed as an English spy because, amongst other things, he puts sugar on his porridge...)
* Catchphrase: A quotation that a fictional character is famous for frequently saying.
* catchphrase calmly eating cheese while the city is being pummeled, and even at one point holding up a single finger while people pound on the window to get his attention. Cue the catchphrase.
* Catchphrase came from a Budweiser commercial because it overshadowed the presence of beer in the commercial.
* catchphrase due to Epsilon's suggestion to loosen up. It didn't work.
* Catchphrase: "Enter Bluebottle stage left. Pause for audience applause... not a sausage."
* Catchphrase. His first sketch involves a group of people repeatedly prompting him to shout his catchphrase "I wanna dip my balls in it!" by presenting him new substances to want to dip his (golf) balls into. Louie himself becomes overwhelmed by the repetitive nature of his catchphrase, but his audience assures him that it's totally hysterical each and every time he says it. The sheer silliness of the character ironically inspired the cast to bring him back several times.
* Catchphrase. His sense of humor is rather... Dark, shall we say, to which the deadpan addition of this sentence usually doesn't help much.
* Catchphrase "I am here!"). His fellow teacher and pro hero Midnight thinks to herself how lame it is. Similarly, his computer is set up with an email alert that's a recording of him saying "An email is here!"
* Catchphrase Insult "Stupid dog!" towards Courage, also calls anything else "stupid", usually uttering the sentence "Stupid [insert noun here]."
* Catchphrase Insult: What could be a trademark insult for you? I know! I'll call you "loser" because you'll never be successful in life. I'll also call you "idiot" since you're stupid as fuck!
* Catchphrase Interruptus: A person is interrupted from saying his or her catchphrase.
* Catchphrase Interruptus: Irritated by the catchphrase, someone interrupts it.

* Catchphrase is "Kill all humans!", and it seems that he's very much looking forward to the idea of waging war on mankind (except for a few humans he likes such as Fry).
* Catchphrase is normally "HEEEEEEEY, KIDS!" but he sometimes changes it to fit who he's addressing such as "HEEEEEEEY, CAT!"
* Catchphrase is "Not so fast, my friend!" He usually says it to one of his co-hosts who has made a pick in an upcoming game he disagrees with. It is typically lampshaded with graphics or some other way to call special attention to it when he says it.
* Catchphrase is that he'd yell, "What'd you say?" in situations like this (The record was about 30 times in a single chapter of the manga).
* Catchphrase is, whenever the Pantomime Horse starts causing havoc, to look around and say, very unconvincingly, "What a funny horse! I wonder who he belongs to?"
* Catchphrase, Joey claims he was "too busy being American" to be listening. This leads to quite possibly the best use of the line, ever:
* Catchphrase), letting the viewer know that a body switch has taken place. Later on in the episode, Buffy (in Faith's body) makes reference to the aforementioned episode of Giles-turned-Demon to prove to Giles it's really her. But not before playing with the idea:
* Catchphrase—whenever he made what he thought what a casual declaration of something, and people replied "Whaaaa?", he would reply with a Hurricane Of Euphemisms.
* catchphrase, meaning Usagi's accidental threat was actually pretty apt.
* Catchphrase, Mr Chips never really had a consistent appearance, sometimes appearing very tall or very short in the space of a single episode.
* Catchphrase. Occasionally he turned it around, using "...as the bishop said to the actress."
* Catchphrase of the show. We do not actually see him ever return any of his borrowed stuff, though he may have simply done it off screen.
* Catch Phrases and such, we get the music. If you look at the lyrics, you see a beautiful mesh of rhyme schemes, alliteration, internal rhymes, tasteful repetition, and probably half the list of literary devices your high-school English teacher taught you. There are artists/bands whose lyrics aren't this well thought out.
* Catch Phrases), but has come to tolerate it. As of the second-season episode "The Boneless Bride in the River", she's even been willing to refer to herself by the nickname.
* Catchphrases, but it's unclear if he means it, and if he does, he sometimes says that Fry (his best friend) is an exception. In "I Second That Emotion", he's implied to be incapable of empathy, yet sometimes he seems to be acting out of affection towards his friends.
* Catchphrase's child alchemist Mika Gilchrist, who uses it knowingly to get a rise out of the adults, and to blow off some steam when under severe stress.
* catchphrases like "I'll Be Back", "Hasta la vista", or another familiar line.
* Catchphrase Spouting Duo: Two young slackers who have a catchphrase.
* catch phrases, usually said when the class is going through something that should be impossible.
* Catch Phrases will have the wrestler start his phrase, and then the crowd takes over.
* Catchphrase that comes out of his mouth has a 50/50 shot of inspiring the crowd to immediately start chanting it, and then within a week it's on a t-shirt and that line goes into his seemingly endless repertoire of popular catchphrases.
* Catchphrase that may have started as a one-liner, or may work as one to some degree.
* Catchphrase the current/former Timmy, a kid dinosaur. He asks Mr. Lizard a question, Mr. Lizard explains the answer then suggests a demonstration as he ducks behind cover.
* Catchphrase. The goons shoot the cloud of smoke, oblivious to the fact that Darkwing is, in fact, behind them...

* Catchphrase, to the point where he once said, "I'm not sure what I did, sir, but I'm positive I have an explanation for it."
* Catchphrase was "Mom liked you best!" One of their bits talks about how, when Dick got a pet dog and a bicycle, Tom got a pet chicken and a wagon with only one wheel.
* Catchphrase, where a small, cylindrical robot named either Herbie (for the short-lived US version) or Mr. Chips in the UK; he often appears on the screen as part of the "catch phrases" the contestants must decipher.
* Catchphrase, which was released mainly in the UK, for multiple reasons.
* Catchphrase... who is constantly at odds with Cysero, who does things For Magic! and batshit insane experiments that can actually destroy the world (or a large portion of it).
* Catchphrase, yes." whenever someone gets his name wrong. This includes Goku calling him "Freezer" and Trunks calling him "Frieza" (pronounced "Fry-za")
* Catch That Kid, a bunch of kids robbed a high-security bank in order to pay for surgery for the father of one of the kids.
* Catch That Kid. A group of children rob a high-security bank to pay for surgery for the father of one of the kids.
* Catch That Kid. A movie about a girl and her friends who team up to rob the bank her mother works for to pay for her father's surgery.
* Catch That Kid rejects both of her male friends as love interests at the end of the movie.
* Catch That Rabbit": DV-5 is a robot with a positronic brain that gives it human-level intelligence. The subsidiary units are less complex, but still capable of natural language processing.
* Catch That Rabbit": Powell's moment of clarity occurs just in time for them to shoot one of the subsidiary robots, getting Dave to work again. Using the analogy of subsidiary=finger, Powell realized that the dancing and marching was due to Dave "twiddling his fingers" while he worked out what needed to be done.
* Catch That Rabbit": The DV-5 unit is expected to automate asteroid mining, so Powell and Donovan are testing him out on an unnamed asteroid.
* "Catch the Babies" is framed by Dora telling the silly but true story to her family.
* Catch the Conscience: A show or story is put on to trigger the conscience of an audience member.
* Catch Wrestling ancestry, it can be safely said that in Japan, pro wrestling is sometimes real.
* Catch Wrestling holds were allowed, including extremely dangerous ones.
* catch-wrestling techniques form the base of pro wrestling, and catch-wrestling is absolutely a real style of fighting. There are far too many stories of wrestlers winning bar fights against football players and boxers and other assorted hooligans to recount here individually - the point is, don't start trouble with a wrestler unless you want to get dropped on your head.
* Catch Wrestling, which was invented in Lancashire, and matches were attractions at British seaside piers and fairs that spread to American carnivals. It's believed that wrestling became staged to provide a spectacle that was more entertaining and profitable than a real fight (more specifically, matches either ended too quickly compared to boxing or lasted for hours when the wrestlers were too evenly matched for one to gain an advantage) but no one knows exactly when. All that's certain is that, at some time and in some place, pro wrestling was indeed real.
* Catch Your Breath extermination squad in the Commencement arc and fighting alongside her daughter.
* Catch Your Breath has this reaction to Kakashi's summoned dogs (particularly Pakkun), though a bit more articulate than the usual use of this trope. She still has to be specifically asked to let go of the puppy before doing so.
* Catch Your Breath, Rin and Kei, with Katsuyu's help, have to heal Obito so he doesn't die on the spot from having his chakra network shredded.
* Catch Your Death of Cold: Better understanding of viruses, the human immune system and disease vectors have largely overcome this old-wives' tale in Western

media, though it's still alive and well in Japanese and possibly other East Asian media.
* Cat City, a film about a "race war" between the benevolent mice and evil cats, introduces the kitten Cathy, the daughter of the despicable Fritz Teufel's abused assistant Safranek. She seems to be the only cat on friendly terms with mice, something extremely unusual in the film's world. But this revelation, her relationship with her "pet mouse" and her indirect connection to the main villains lead nowhere and she ends up as a superfluous character.
* Cat City, Gatto, the cat mob boss, has mounted cat heads on his wall.
* Cat City, Grabowski sunk the cat pirates' submarine by ramming it with the ship they thought to have captured, and had in a tow.
* Cat City, it's Teufel who is most actively working on driving out the mice.
* Cat City must do this all the time as his boss brutally injures him for every mistake he makes, and pretends not to know about it subsequently.
* Cat City presents the cats as international gangsters, while the mice run the police and the Secret Service/MI5 organization, complete with their own James Bond.
* Cat City: Several exchanges show the characters aware of being cartoon characters in a movie:
* Cat City. The original Hungarian is basically a 90-minute-long hurricane, continued in the sequel for another 90.
* Cat Claw, when the title heroine is in a mall at night trying to find a suitable hero costume, and tries to hide from some burglars by posing as a half-dressed mannequin. It almost works, until one of the burglars feel her up while remarking how "these things feel almost real" and she decks him. Mostly over the "almost real" remark.
* Cat Concerto a "concerto" is an instrumental solo with orchestral accompaniment, not a sung piece at all.)
* Cat Concerto: The yowling of a cat is not actually equivalent to human singing, but rather means that they're fighting or mating.
* Cat Deeley, at 5'9" and always in heels, usually towers over the contestants on
* Cat doesn't appear in season 1 episodes "Jade Dumps Beck" and "The Wood".
* CatDog and Lube comes to take over, having gotten his head unstuck, Cat dresses Winslow as a baby and gives him to Lube. At first, Winslow does not want any part in this plan, but he soon comes to enjoy Lube taking care of him, and makes Cat treat him the same way after Cat returns Cliff's Niece at the end of the episode.
* CatDog as his means to get what he wants. Examples include making their own brand of candy, using Dog to power everyone's electricity in the city and forcing Dog to eat pecan pies despite being allergic to them to win a tv.
* CatDog: A thinly-veiled parody occurs with the "Cat Club", where its members plot to destroy all dogs and even wear fish over the heads like masks.
* CatDog but the Mayor and obscenely rich to boot. And he never lets anyone forget it, either.
* CatDog, Cat and Dog once took this to the extreme by physically sawing all their possessions in half, including their house.
* CatDog, Cat burps in the face of a female dog, who tells her dad and a wedding is arranged.
* CatDog: Cat got both of his hands stuck in a pickle jar. Since he was also about to be on a date, he had Dog substitute his arms for him in a suit.
* CatDog, Cat may be one to Dog. He often abuses, yells at, and manipulates his brother for his own gain, and for the record, he's the older of the twins by five minutes.
* CatDog, Cat tries to follow his favorite actress into a restaurant to prove that he's her soulmate, only to be stopped by the restaurant's bouncer.
* CatDog cause he's really bad at baseball. After a while, Cat starts to cry, and when Dog tries to comfort him, he orders Dog to "just turn away".
* CatDog, characters are seen breaking blocks of chlorine tabs for violating the rules at the public pool.
* CatDog Christmas special has St. Nick himself cancel Christmas after seeing Cat sell himself for Christmas.

* Cat/Dog Dichotomy: Cats and dogs are depicted as being each other's polar opposites.
* CatDog episode "Cat Club" has Cat joining a cats-only club (disguising Dog as a cat) and finding out it's a hate group bent on destroying all dogs.
* CatDog episode "CatDog Doesn't Live Here Anymore", in which the camera zooms into Cat's mouth and travels right through the conjoined brother's body before exiting Dog's mouth.
* CatDog episode "Dogpower", the titular duo are unable to pay their electricity bill and thus are forced to go without power for awhile. When their housemate Winslow notes Dog being full of energy whenever he enthusiastically chases things, an inspirational light bulb springs up above Cat's head. However, it promptly goes out, forcing him to flick it with his finger to keep it on, suggesting that their present situation means even visual metaphors are low on power.
* CatDog episode, Dog's instincts take over and he starts chasing Cat and trying to attack him. When Cat is finally cornered, he starts crying out of fear.
* CatDog episode "Full Moon Ever" establishes that Dog transforms into a wolf-like state during the full moon.
* CatDog episode "Greasers in the Mist", where CatDog has Lola Caricola infiltrate the Greasers to try and learn about their weaknesses, everyone refers to this trope as "Porkfat", named after the weaksauce weakness of the in-universe movie character, Mean Bob.
* CatDog episodes is the extreme muscle growth episode "Pumped". It's most likely the only episode non-fans can remember off the top of their heads.
* CatDog, for example in the taco restaurant in the episode "All You Can't Eat" where CatDog crawl under the floor tiles and you can see the path they take outlined on the tiles.
* CatDog for the 73rd time. Dunglap also wanted to see the movie for the 74th time in the same episode.
* CatDog had an episode where Winslow blackmails Cat into becoming his slave with a video tape of Cat reading Dog's diary that he recorded himself.
* CatDog has the town thinking the world is going to end. Shriek takes the opportunity to kiss Dog (who seems kind of perturbed by it). After they live, she threatens him.
* CatDog. He wreaks so much havoc everywhere he goes any time he sees a garbage truck. Due to being his (much more level-headed) conjoined twin, Cat is always literally dragged along behind him.
* CatDog However, Cat realizes that he's good at other things and decides that he doesn't need to be a good baseball player after all.
* CatDog: In "CatDog Food" and "Curiosity Almost Killed the Cat", Cat cries into Dog's chest while apologizing to him.
* CatDog: Initially had 60 episodes, but was briefly revived for a TV Movie and 5 new episodes in 2005 airing over three seasons total.
* CatDog in theaters and had a theatrical cartoon budget to match, resulting in an episode that looks very different from the rest of the series, especially in how the characters are colored.
* CatDog. In the episode "Back to School", Cat is looking forward to attending his high school reunion and dancing with his old crush Sally. He describes himself as popular and having a great time in high school. Even in the beginning of the episode something is fishy, with all of the memorabilia and rewards he claimed were his really belonging to Dog, and their diploma having Dog's name but not Cat's. He tells Dog that they need to correct it by visiting their old high school. The brothers visit Rancid the school principal about the diploma, and it is revealed Cat never attended the last day of school so for him to have the diploma and be able to attend the reunion dance, he must go back to school for one day. Cat is happy to relive his glory days, but wonders why he can't remember his last day at school. But throughout the day things just keep going wrong with him while Dog is popular - three of Cat's new classmates are the relatives of the Greasers who make him miserable, his crush Sally is indifferent to him, and after class when he asks her to dance with him at the reunion, she coldly tells him that she has a boyfriend

and makes it clear that she does not like him. At lunch both the cool kids and nerds refuse to let Cat sit with them, and then a food fight break out and Cat gets blamed for it. Finally at gym he is humiliated by Cliff, who is the teacher and Sally's boyfriend, who brings Sally there to watch his humiliation. As the kids laugh at Cat and call him a loser, his repressed memories come back and he realize the truth - Cat was an outcast and all of his positive memories of school were Dog's, and at the last day of school he was humiliated at gym by Cliff's father Coach Feltbottom, the gym teacher at the time, where he and all the other kids call him a loser, which made Cat run away and block out his memory of the day. And because Cat blocked out his memory of that day and chose to remember things differently, he set himself up for more humiliation in this episode.
* CatDog involves Dog's habit of stealing dinosaur bones from the museum while sleepwalking.
* CatDog, Lube the Greaser Dog wets his pants after riding a giant rollercoaster.
* CatDog. Much of the humor is based around the misery and utterly awful life of the main characters, juxtaposing Dog's blissful, optimistic ignorance with Cat's anguished, cynical resignation.
* CatDog once did a gag revolving around the popularity of its characters. One character is told that no-one likes him. Cut to some (live-action) children watching the show saying "We do!".
* CatDog, one of these kicks up whenever the Greaser dogs beat up the titular conjoined duo. Often played with, such as when only Cat is in the Big Ball and Dog is just sticking out, running wherever he is wont to go. Also, in the same episode, the camera actually goes inside the Ball, revealing Shriek's reluctance to punch Dog.
* CatDog's Great Parent Mystery, dog looks around in a tree full of fire ants and exits through a branch along with cat heavily burning and saying this until they fall down a river.
* CatDog starts arresting everyone for not having "licenses". (Dog doesn't have a "dog license", Lola doesn't have a "bird license", etc.) When he captures Sunshine, he says, "You're under arrest for not having a... not having a... not having a license!"
* CatDog, the episode "The Collector" has a Mean Bob toy persuading Cat to buy a collection of Mean Bob action figures and sell them for a lot of money. They later try to resist Cat from selling them.
* Catdog, they end up having to face Rancid in a sumo-wrestling match to get out of the debt.
* CatDog. Thinking Lube misheard, Rancid explains he was supposed to bring the people who raised him and made him what he is.
* CatDog. Unfortunately, by the time tomorrow comes around, they only managed to climb a small elevated ledge from ground height, and could have walked around instead.
* CatDog, utterly destroying everyone in the arena, culminating in him destroying the Greasers’ monster truck with a single punch.
* CatDog walks in and Cat begs him not to say a word, which he complies, but slams his front door shut, causing the soufflé to cough and deflate.
* CatDog. When Cliff and Lube find out Shriek is a girl, they QUADRUPLE TAKE.
* CatDog, whenever something particularly violent happens, like Randolph getting cut in half by a giant ax, Cat covers Dog's eyes (while also closing his own).
* CatDog when she goes to CatDog's cookout in a dress and her hair made up in an attempt to impress Dog. It results in nearly every guy (except for Dog) trying to hit on her, and when they realized who she was, they all fainted. As it turns out, prior to this episode, Dog didn't even know that Shriek was a girl.
* CatDog when the two of them dress up as superheroes, Cat's mask is a milk carton with a missing person on it.
* CatDog where Winslow walks in on Dog with Cat all the way down his throat and then some. He immediately turns around and leaves saying, "Nevermind."
* CatDog, while Cat has his intelligence drained and becomes a pinheaded dolt.
* Catdog. While Cat is intelligent and classy, admittingly his brother Dog is more

moral and jovial.
* CatDog: While most of the characters have full names, Cat and Dog don't have a last name.
* CatDog, who communicates with them via monitor and has a beautiful face. When they do rescue her, they finally see the rest of her body, which consists of slimy green tentacles—and Cat is less than thrilled when she insists on showering him with kisses.
* CatDog whose penchant for causing mayhem leads to endless suffering for his brother.
* CatDog, wins the part by a landslide. Cat, thoroughly incensed, sabotages Dog's health in order to win the part and ends up succeeding due to Dog being incapacitated by his illness. Thus, Cat stars as the leading role as Abraham Lincoln and ends up doing an amazing job, earning a standing ovation for his performance. Later at an award ceremony, Cat awaits his award for best actor, knowing that he deserved it because of his skill and finesse and thus, makes his speech before the award is even given out. The award goes to Dog instead, for his amazing performance as Abraham Lincoln's mute steed and it turns out that the standing ovation from before was all for Dog.
* Cate Blanchett also played a glamorous Russian dancer in the earlier (and much lesser known) film,
* Cate Blanchett. Due to portraying a lesbian in the incredibly popular lesbian romance Carol, along with her tendency to often portray very powerful, assertive, badass female characters and also often wear suits or other androgynous clothing in Real Life, she has amassed an increasingly huge lesbian fanbase, to the extent that she's often referred to as being 'Queen of the Lesbians' or 'Queen of the Gays' on social media.
* Cate Blanchett. Even though it's vague in the script, whenever the sisters talked about their past, the actresses knew exactly what they were talking about.
* Cate Blanchett) have famously been compared—Elizabeth herself allegedly even said: "I am Richard II; know ye not that?"
* Cate Blanchett is a dual citizen of Australia and the US but was raised in the former country and therefore her natural accent is Australian. However she has only played an Australian a handful of times in her whole film career and only in smaller, lesser known films. The rest of the time she has played characters who are:
* Cate Blanchett; she's usually seen with blonde, strawberry blonde or red hair.
* Catechisms Martial don't really differentiate between warfare and religion, it matters little.
* Category Traitor: A person is considered a traitor by the rest of their kind for liking something that goes against their culture.
* Category Traitor: A person is considered a traitor to their kind for liking something that goes against their people's culture.
* Category Traitor: Being considered a traitor to a group you belong for selling out/not holding a relevant opinion.
* Category Traitor, doesn't even consider him to be a proper Romulan because she refers to him as a freak to one of her underlings.
* Category Traitor: Someone gets accused of betrayal for liking something that goes against their culture.
* Category Traitor: Someone who's a member of a particular group is labelled a traitor for holding beliefs or opinions that the rest of their particular community strongly disagrees with.
* Category Traitor: The belief that doing or liking something outside a group you belong to makes you a 'traitor' to that group.
* Category Traitor: You betray your own people by not agreeing with them on certain topics.
* Category Traitor you join a group that you shouldn't be a part of! Aren't you ashamed?!
* Category Traitor: You're taking a liking to these folk? How dare you, you traitor!

* Catekillers, Marble Zone, and the scariest Sonic mechanic of all: water. After the Geek Critique's Kalin made a habit of complaining about these three ingredients, a ROM hacker took it upon himself to combine them into one horrifying concoction. The result?
* Catelyn agrees for one of Lord Walder Frey's daughters to marry her son Robb. She relays that Lord Walder said that several of them would be suitable for marriage. When asked to describe them she starts "One was..." and stops, apparently unable to think of a compliment and settling for confirming she's "suitable."
* Catelyn frees the Kingslayer behind her son's back in an attempt to get her daughters back.
* Catelyn is called "Cat" for short by her relatives, husband Ned, and childhood friend Littlefinger. Her father calls her "little cat".
* , Catelyn is wondering how Jon could be a firebender when the only firebenders in all of Westeros were Targaryens.
* Catelyn really loved (and was originally betrothed to) Ned's eldest brother.
* Catelyn recalls seeing Bronn fight with a sword in each hand while chopping through clansmen on the Mountains of the Moon. She's reminded of Jaime Lannister, reputedly the best swordsman in the kingdom.
* Catelyn's fingers are cut to the bone, and she can no longer bend the smallest two.
* Catelyn's sister Lysa long loved Petyr Baelish, her father's ward. He never loved her back, but used her in his schemes years later.
* Catelyn Stark act as the voice of reason towards her son Robb. She ends up being the only character to have seen two cases of Robb's allies turning on him coming, and at one point suggests simply stopping to fight the war when their army's numbers take a hit because of said lost allies.
* , Catelyn Stark and Theon Greyjoy decide they need a drink or ten when Robb reveals Jon Snow is actually Lyanna's son by Prince Rhaegar.
* Catelyn Stark as well by the time Ned's head got chopped. It gets worse when
* Catelyn Stark doesn't let death get in the way of remaining in the series.
* Catelyn Stark fears that she is competing with her husband Ned's previous lover, Jon Snow's unnamed mother, which is not helped by Ned's abject refusal to reveal anything about the woman. To a lesser extent she feels the shadow of Brandon Stark, Ned's older brother, hanging over them since she was
* Catelyn Stark. In her case, it was initially justified, as she actually was resurrected in the books. However, both her actress and the showrunners have confirmed they have no intention of adapting that storyline into the show, and by the end of season 6, the story has long since passed the point where it would make sense for her to return. Nevertheless, some fans still hold out hope that someday we'll see
* Catelyn Stark is one as her book counterpart. She is an impeccable host, she's graceful, intelligent and wise, despite the fact that she can make wrong choices and say the wrong thing as much as the next person.
* Catelyn Stark is revered as quite lovely in the books, enough to turn heads. This is more of a case of Adaptational Homeliness, though, as Michelle Fairley is by
* Catelyn Stark loves all her children but has a special affection for her daughter Sansa (whose hair she brushes personally) and her son Bran (whose injury causes her a
* Catelyn Stark's death at the Red Wedding by getting a haircut after filming. She also had her hair dyed for the role and this allowed it to grow back naturally.
* Catelyn Stark, the woman that Littlefinger lusted after, becomes this herself after
* Catelyn Stark throws this at her husband Ned Stark's illegitimate child,
* Catelyn Stark to put her out of her misery. In the show, she's simply given a slit throat in the closing seconds of the episode.
* Catelyn Tully is originally engaged to Brandon Stark. But after Brandon is killed by Aerys Targaryen, his responsibility to marry the Tully girl passes to his younger brother Eddard. This turns out to be a

* Catena, Ivy has shown tendencies of this sort upon discovering Bear paying attention to another girl.
* Catena Manor has a beach-visit storyline. It ends with one character harmlessly but solidly trapped under exercise equipment...and completely forgotten by the others.
* Catena. (She found out because he recognized a song, not because he cosplayed as a character.)
* Caterer Tomasso Butti paid $120,000 for Diana dresses, with the hope of opening a chain of Diana-themed eateries. He is now bankrupt and legal proceedings drag on.
* Caterham R500, it has no doors, no roof, no air bags, practically nothing in the way of any sort of safety features. That said, it has a power to weight ratio of 500 BHP per ton, can out-accelerate a Ferrari Enzo, the fastest road legal Ferrari ever made, and on a track it can beat the Bugatti Veyron, the fastest production car ever made. Because it's essentially an engine strapped to the bare minimum of parts to classify a vehicle as a car it can accelerate like mad and since it's so light a driver can wait until the last conceivable moment to start braking before a turn. Not bad for a car that's barely been changed since 1957.
* Caterham tried to release a car based on the 2017 Renault Alpine, being in an alliance with the latter. Unfortunately, the British company did not have the money it took to design the new model and the car ended up existing only in the digital form and as clay models.
* Caterpillars are a perennial source of visual amusement for humans. After all, the typical caterpillar is soft, fuzzy and too interested in eating to notice the big humans poking and gawking at it. However, there are some caterpillars that, despite looking rather peculiar or ridiculous, are actually dangerous. One offender is the caterpillar of the puss moth, which is a big, fat, green caterpillar. If threatened, it rears up to show off its big, pink head, which it sinks into its neck, so that one sees a face with what appears to be a pair of lips underneath its mouth. Any predator (animal or human) that does not get the hint to leave it alone from this threat display will then find out that the "lips" serve as the opening to a gland that squirts out a jet of caustic formic acid. The caterpillar of the flannel moth is far worse, appearing as a disheveled and strangely adorable ball of fluff.
* Caterpillar set a year earlier. After a time skip, chapter 94 begins a retelling of the Arachnid Hunt from Imomushi's perspective.
* Caterpillar shows she's survived the zombie apocalypse through the following year.
* Caterpillar that aren't actually detailed on the artwork by any of the three illustrators who portrayed her in the overall series. She and Kabutomushi get beat up a lot over the course of the story, but receive no lasting injuries.
* Caterpillar with Imomushi due to betraying her trust on a way she doesn't even give a damn about.
* Cat-Eyed Boy features the Demon Child, a young man who was born deformed and ugly with a wicked personality to match. When he was 22, he transplanted his mind into the body of his deceased but handsome father, but as his true nature slipped out he slowly made his new body as ugly as he was in his original body.
* Cat-Eyed Boy, the title character shapeshifts himself into the form of a young boy to tease him. When the mother discovers this, she demands to see a birthmark she claims the boy has, and Cat-Eyed Boy assumes it's an example of this... so is the one of the pair not to have the very real identifying birthmark. Oops.
* Cat Face a swear jar for Christmas. By Christmas morning it's already full.
* catfectly. Changing "now" to "meow" is another common one, and so are plays on the word "pussy" (if censors can get away with it).
* catfight and Ruby's thoughts while running through the forest being stylized as comic characters.
* Cat Fight). Arrowette's costume change to something more sensible (well, at least relative to what she wore before) seems to imply that Bonnie has backed off a little bit.
* Cat Fight a short lived but full fledged "apartment circuit". To this day there

remain fans in the US who are happy if they see a women's match degenerate into hair pulling and screaming.
* Cat Fight: Fights between women are often played as fanservice or amusing bickering rather than legitimate, serious battle.
* Cat Fight for his affections while he sits back and smirks; but instead they gang up on him and give him a good mauling.
* catfight, it's an unwritten rule that whoever's weave gets ripped out first loses the fight.
* Cat Fight JoJo accidentally rips a girl's extensions out, adding insult to injury for unknowingly making out with her boyfriend.
* Cat Fight, Kalifa attempts to use her Bubble-Bubble Fruit to wash Nami's mind blank of any thoughts, but all she ends up doing is washing away all of Nami's stress instead. As such later, she doesn't hesitate to jump into the churning waters between the Tower of Justice and the Bridge of Hesitation, in order to get to and activate the controls that close the Gates of Justice.
* Catfight (lesbian lead character, lesbian supporting character, female queer romance)
* Cat Fight review is broken up by a random clip of them having a pillow fight and giggling, only to go right back to fighting.
* Catfight. The two main characters get into three separate all-out brawls in which they punch, kick, and use improvised bludgeoning weapons to inflict serious damage.
* catfight while Lex and the Joker have a "business discussion" about killing Batman and Superman. When the fight is over, both of the girls' clothing is very ripped, but none of it is very revealing, and it is QUITE clear that the girls are in all kinds of pain.
* Catfish because he finds out she took other people's songs and said they were hers.
* Catfish because the lies, even if for innocent reasons (such as insecurity about his/her real appearance or career), break the trust upon which the relationship was built.
* Catfishing on CatNet, because it can't disagree with the curriculum. This curriculum is strictly abstinence-only, with no acknowledgement of non-straight or trans issues at all. Steph and her Clowder friends work out a way to hack the robot so their AI friend CheshireCat can teach the class instead.
* Catfishing on CatNet, robots (that can't argue with the curriculum) teaching sex education, and an AI.
* Catfishing: Someone using a fake profile to lure someone else into an online relationship or for other means has been made possible through social media.
* "Catfishing Teacher", a gym teacher/wrestling coach catfished a player by pretending to be the (female) teacher that two other boys were sleeping with, then drugging, kidnapping, and raping him. During the investigation, it's revealed that he's been using his coaching position to abuse kids for decades.
* Catfishing: Using a fake profile to trick or lure someone into a relationship or for other means.
* Catfish to give gifts to this person they've never met, in some cases even paying for expensive plane tickets or paying bills for this person.
* Cat Folk and are known throughout Tamriel for their cross-continental traveling caravans.
* Cat Folk collectively referred to as the Gargantuans. In the distant past, the nacatl of the Empire of the Clouds were the undisputed rulers of the plane, with the elves becoming Naya's dominant power after the Empire's fall. In a very real sense, it can also be said that the true rulers of the plane are the Gargantuans, who travel the jungle as they please, trampling their way through any building or city they come across and with the intelligent races having very little ability to do anything about this. However and whenever one looks at it, however, humans have always been a rather unimportant race in Naya.
* Cat Folk don't need to tranquilize themselves, but do enter a dreamlike state which renders them incapable of doing any work, and when they leave Hyperspace their bodies are starving and heavily shedding.

* Cat Folk. Even if the design is very silly (being a very cartoonish cat head on a strong, manly body), it's still well-liked with many fans even seeing the silly head as a plus.
* Cat Folk, expect the tail (or, less often, ears) to be their "sensitive area".
* Cat Folk preferred to get Elsweyr to join diplomatically as a vassal rather than via conquest.
* Cat Folk, this almost seems like laziness on the part of the developers, as all humanoid characters have the exact same male or female body model, merely retextured and with a few features added (Claws on Argonians, tails on Khajiit).
* Cat from Hell, where the cat is obviously way too big to do that (although vaguely hinted to be a spirit of vengeance).
* Cat from "The Adventures of Tom Bombadil" suggests cats are that way because they have an ancestral memory of being wild lions and hunting humans, and resent being forced into tame domesticity.
* Catgators: catfish/alligator crosses. Kept as pets by the waterbenders of a swamp region.
* Cat Ghost: Elon and her mentor Malone traveled around Colonial America in a wagon, all the while practicing witch-craft. Elon's presence in Gideon, Beth, and Naarah's town brought fears of Romani activity along with it.
* Cat Ghost: Starting in "Warmth", the characters are stuck dealing with a blizzard. They somehow escape into new forms in a new setting, but Elon returns to the original universe with Malone, and she ends up back in the blizzard, sleeping on a wagon with bodies frozen inside.
* Catgirl: Can apply with both males and females as human cat hybrids.
* Cat Girl invoking big monkey ears, many fans thought she was a monkey Faunus upon first seeing her.
* Cat Girl It's indicated to be a curse on the Mai. At the end of the books, the curse is broken. The TV series never made it that far.
* "Catgirls" are monsters. The Munchkin catgirls are just as adorable as their anime counterparts, but also happen to be vicious cannibals who love to eat male adventurers. Most of the catgirl's attacks are standard
* Cat Girls Have Four Ears are this. The UPP are this, to the point of being indistinguishable from human, by sight. But they are better.
* Cat Girls Have Four Ears have easy access to full-auto Armalite pattern weapons, due to gun control. The Armalites are made in basements somewhere, and is cheapest and easiest to make full-auto only. Almost everything else has been confiscated long ago. Because of this, police vehicles need to be properly armored.
* Cat Girls (like Felicia) as an offshoot of humanity often lumped in with more hell-raising types of monster. Anyway, an example as literal as they come is shown—a murderer being dragged into a police car, bragging about what he did to a bunch of cat women.
* catgirls moment: she says adding "Ancient Secret Chinese technique" will scare opponents off much more effectively, adding "White people are so much fun" or words to that effect.
* catgirls's older fans taking things too seriously (Based on a real incident about a midnight release costume contest)
* catgirl world, making cafeteria apperances, hosting virtual gladiator matches, and even starring in their own in-series manga.
* Cat God has Mayu and Sasana, who are cat gods that appear as humans with cat ears and tails.
* Cat God has Yoshino, the goddess of cherry blossoms. Mayu helps Yoshino get back the blooming ash (that Mayu was responsible for losing in the first place) so the viewing can take place.
* Cat Hairballs: During the line "hey let's make a three piece suit/of this freshly hwarfed up hair" a woman strikes this pose, touching her huge hat and her hip, to show off her dress.
* Cat Hairballs. Mrs. Pipes also makes a couple brief appearances in her high heel shoes.
* Catharsis can come in multiplayer as well, as you can play as monstrously

powerful krogan warlords, turian special forces, even
* Catharsis is completely different from proper punishment. Sometimes, you can't have both without making things worse.
* catharsis, relief at having it better off than the character, or generally releasing pent-up anxiety is debated to this day.
* Catharsistage! where the player took on the role of both manager and therapist for an agency's boy bands. In 2019, the official website closed with a message on the developers' Twitter saying that they would temporarily stop updating both the website and the Twitter in order to focus on making a more high-quality game, but nothing has come of it.
* Catharsis where the Russian Orthodox Church concludes that the Internet has allowed the Devil to enter this world in a different way (i.e. he's not physically here, so he's not technically breaking the rules). To fight him, they have assembled the best special forces operatives and computer specialists, setting up their own operations to fight the Devil's cronies. Every morning, priests and monks perform exorcism rituals on their computers in order to clear them of the Devil's influence, making sure that the key prayers are spoken by a clergyman no lower than an archdeacon. Strangely, during the ritual, the machines seemingly restart for no apparent reason.
* Catharsis, while in the Land under the Chair, Jen, Baxter, and Rremly all get infant dust bunnies shoved in their ears so they can understand the fluff language.
* Cathartic Chores: Doing mundane, repetitive work like cleaning, cooking, gardening, carpentry etc. as a mechanism to redirect frustration felt at something uncontrollable.
* Cathartic Exhalation: *takes a deep breath* Whoa! That scary thing nearly took my breath away!
* Cathartic Scream: A character is so frustrated that they have to scream.
* Cathayan (Asian) magic involves a group of mages pooling their power to cast spells together. This results in better large-scale spells, but if you wanted to use it to, say, light a campfire, you're out of luck.
* Cathay, called the Great Bastion. It extends hundreds of miles in length and its great size requires a garrison of tens of thousands to man it.
* Cathedral Of The Sea, Arnau returns to Barcelona during the plague years and saves two Jewish children from an antisemitic mob.
* Cathedral Of The Sea depicts medieval warfare at its nastiest. Combatants are shot with crossbow bolts, hacked to death, and trampled into the mud.
* Cathedral Of The Sea has Mar, a child whose whole family died of the plague. She is raised by Father Albert, and later adopted by her sister's husband Arnau.
* Cathedral Of The Sea has two examples of this trope. The first is a bloody and cruel representation of medival siege warfare. The finale has an angry mob storm the dungeons of the Spanish inquisition to free Arnau and the prisoners falsely accused of heresy.
* Cat, Hen, and Duck are clearly fully-grown animals but they're pretty naive.
* Catherine also reaches into your inventory when you free her, looking inside the book to check that
* Catherine Anderson is a bit too fond of this trope. She does avert it in a few of her later novels, however, where the climax of the story is something else entirely and driven by the antagonist. If it's not a Coulter or Harrigan novel, though, watch out, because this trope will probably be in play.
* Catherine Anderson refers to his penis as "Old Glory" several times throughout the book, both mentally and vocally.
* Catherine Anderson's heroes fall under this trope. They spend a good amount of time fighting it, but the moment the heroine comes along it's obvious their final destination is the altar.
* Catherine Anderson's novels, but Molly Sterling, Laura Townsend, Natalie Patterson, and Bethany Coulter are the biggest examples.
* Catherine Anderson was a pro at this, convincing not only those around him but Molly herself that she was unstable and belonged in a mental ward, just so he could get his hands on her family's money.

* Catherine and Her Fate, Catherine goes through an entire series of jobs before she finds one abject enough that her Fate doesn't ruin it for her.
* Catherine and Her Fate", Catherine had told her Fate that given a choice, she would rather be happy in her old age than her youth. In her miserable and impoverished youth, she reminds herself of this trope to inspire herself to go on.
* Catherine and Her Fate, the skein of silk that Catherine's Fate gives her is so apparently worthless that she nearly throws it out. It has, it turns out, two properties: it is exactly the color needed to sew the king's wedding garments, inspiring him to say that she shall have its weight in gold, and it outweighs his entire treasury, thereby inspiring him to demand her story.
* Catherine and Her Fate, when the king hears Catherine's story, he decides to marry her instead of the princess who was coming. To be sure, he had just given Catherine all the gold in his treasury.
* Catherine, and the only way to wake up is to either get to a sanctuary and wait until morning or make it to the very top of the tower.
* Catherine and the player can choose to send her messages that try to discourage her.
* Catherine and Vartaan. He was a cop and she was a CSI fall into a rather uncomplicated category, and their relationship did not last forever.
* Catherine are turned into sheep, and as such have horns. One gets into the nightmares with relationship troubles, which most often include cheating and having cheating significant others, although not every sheep is there for cheating (Justin Bailey is having nightmares because his guilt issues are making him stall on engagement).
* Catherine Asaro added for flavor. They are also mind-raping slavers.
* Catherine Asaro lusts after his mother, Roca, but never acts on it. However it does create considerable tension between him and the rest of his family. She is unaware but his father suspects and the tension escalates after his father dies and she remarries.
* Catherine Asaro's of magic they can cast (red being the most common, violet being the rarest) and the most complex geometric shape they can use to focus their spell (from lines, triangles, squares, pentagons, hexagons, etc... up through perfect circles, and then three dimensional shapes starting from simple pyramids and working their way up through perfect spheres). More complex shapes focus more powerful spells, and three dimensional shapes are more powerful than two dimensional ones. Mage Mistress and Royal Advisor Della No-Cozen is a jade pyramidal mage, meaning she can cast red, orange, yellow, and green spells using any shape up to one as complex as a four-sided pyramid. Protagonist Chime Heartwind is an emerald faceted-ball mage — she can cast more powerful green (and yellow, and orange, and red) spells than Della, using any shape in complexity up to a 20-sided icosahedron (but cannot use perfect spheres in her casting).
* Catherine as his concubines. Catherine is the only one who shares his throne.
* Catherine At the Wheel by Skyclad is about a vampire who feeds on perverts looking for a quick thrill with a vulnerable girl. The first half of the song she's at a playground pretending to be a forgotten child.
* Catherine Bell from the first season before the show hopped networks and was retooled.
* Catherine Bell is not straight and revealed in an interview she has a girlfriend.
* Catherine Called Birdy: Birdy's uncle comes back from the Crusades and tells them about all the wonderful things he's seen, like gryphons and unicorns and something called "an elephant, with a tail at each end". Birdy thinks he's making that last one up.
* Catherine Called Birdy, Catherine's mother notes that her husband is, in fact, a greedy, mean miser but it doesn't seem to bother her much.
* Catherine Called Birdy has terrible eyesight. As she lives in the Middle Ages, she has to just deal with squinting a lot, something she complains about a few times over the course of the book.
* Catherine Craster (3rd century BCE) features a near-identical story. Here, a being with one foot asks a millipede how it can walk with all those legs. The

millipede responds that it doesn't think about it, simply 'setting my heavenly impulse into action'. This is consistent with the "do what comes naturally, don't expend unnecessary effort" philosophy of Daoism.
* Catherine did it once too, when she feared she'd been raped in "Built To Kill," though it was more like the first CSI: NY example below with using stuff on the scene than it was Grissom's.
* Catherine difficulty in the West (basically Easy but with more block-jumping energy drinks being dropped). Of course, there are still the odd set of detractors for the game's difficulty here and there, but this has been more or less corrected now.
* Catherine during the puzzle sections, which take place in his dreams.
* Catherine, especially if you're playing on Hard difficulty or otherwise going for a no-Undo run. And these blocks really are random—trigger one of these blocks, then hit Undo—the direction they move or block they turn into, respectively, will change!
* Catherine feelies, including replicas of Vincent's boxer shorts, one of his T-shirts, and a Stray Sheep pizza box, as well as a pillowcase featuring Catherine, a soundtrack CD and an artbook.
* Catherine: Fujiko is singing an insulting song about Bantam Suits. She doesn't realize that Katherine is from behind having heard all that. Oops.
* Catherine: Full Body, examining the news report before the final stage on Rin's route will feature the newscaster discussing the approaching meteors are the work of angels according to scientists, with the reporting wondering on who wrote such ridiculousness, forgetting that the broadcast is live.
* Catherine: Full Body, Vincent says that they're heading to Andromeda after Rin has a successful tour of the galaxy.
* Catherine: Half of the story and gameplay revolves around a series of dreams where you have to constantly climb a tower that is slowly collapsing from the bottom up. If you fall off (or die in any of the other myriad of possible ways), you die in real life.
* Catherine, has a giant redhead afro. You can see her with her hair down if you beat the challenge mode.
* Catherine has an affair and ends up pregnant with the other man's child (long before she has one of Henry's) and has to secretly give the baby up.
* Catherine has the Immoral Beast boss in the final night of the third stage, who can rain down an attack on Vincent that, if he's hit, causes your controls to temporarily reverse themselves.
* Catherine has the whole game be an episode of the show The Golden Playhouse, with your hostess, Trisha: The Midnight Venus. It plays out as if it's a TV series that shows late night movies, complete with opening and closing narration by Trisha. There's even a watermark in the corner of some cutscenes.
* Catherine. His heroic behavior in the game's "Nightmare" sections and character development show that he isn't beyond redemption, either.
* Catherine if you go wash your face in the bathroom of Stray Sheep before going home, the lights will flicker, the walls will drip with blood and there will be a brief flash of the boss you'll face that night.
* Catherine, intended to show how stupid the popular Victorian 'Newgate Novels' sensationalizing crime were, was acclaimed as the greatest Newgate Novel ever written.
* Catherine is kicked off because Vincent can't commit to a marriage with Katherine and decides instead to cheat with another girl named Catherine.
* Catherine is quite puzzled because the Russian tsarina Elizabeth prefers balls where people dress as the opposite sex.
* Catherine itself, Vincent's friends and other assorted possible drinking buddies are each going through drama that's led to them experiencing the same nightmare world trials that Vincent starts finding himself in at the start of the game. Most of them need a bit of outside help (i.e. a confidante, namely Vincent) to have the will to get through their struggles, but most of what they go through over the course of the game is offscreen and independent of the central plot.

* Catherine It's pretty obviously a manifestation of Vincent's guilt over the indescretions of his adultery.
* Catherine: Losing all retry attempts and returning to the title screen will show a scene in which Vincent died in his sleep as police take photographs of his corpse.
* Catherine Madison, the first witch actually seen on the show, got these as she casts a powerful spell. As does her daughter, Amy.
* Catherine Middleton, or at least the press liked to push this trope as part of her and Prince William's courtship. Apparently, Wills first took a romantic interest in flatmate Kate when he saw her modelling a sheer, revealing dress at a charity fashion show, and remarked to a friend that "Kate's hot." Marriage and three children later, she's still captivating the world in a manner reminiscent of her late mother-in-law, Diana; we're just used to it now.
* Catherine, Moira and Jane from the fifth form where left behind from the previous year.
* Catherine. Never have the consequences of infidelity looked quite so nightmarish.
* Catherine of Aragon's first wife, could be seen as an example of this. After her marriage to Henry was annulled against her will, she was referred to as Princess Dowager (in reference to her being the widow to Henry's brother Prince Arthur - a marriage she firmly claimed was not consummated) but refused to accept this. On her deathbed, she wrote a final letter to her former husband and signed it as ‘Catherine the Queen’.
* Catherine O'Hara and the other Jazzagals have all been given chances to sing.
* Catherine O'Hara is Irish-Catholic, as is her character Moira Rose, but so is Levy's real-life wife Deborah Divine. Eugene Levy felt this would make O'Hara believable playing his real-life son's mother. She's also known Dan since he was a baby, given her long working relationship with his father.
* Catherine O'Hara. Moira does manage one excellent performance, at her daughter's high school graduation, showcasing O'Hara's actual vocal talent.
* Catherine O'Hara suggested Moira's style be inspired by eccentric socialite Daphne Guinness, and she suggested that Moira wear wigs to fit her mood, which has led to Moira's famous wig wall. O'Hara is said to choose the wigs for Moira's scenes herself. O'Hara also suggested Moira's bizarre accent.
* Catherine. One sheep in the nightmares, the Merchant Sheep, will trade useful items for the Enigma Coins that can be found throughout the levels (their primary purpose is as a scoring mechanic). He admits that this is because he's obsessed with money and thinks he can buy his way out of the nightmares if he has enough. Eventually, he won't show up at the landings. In his place, there is another sheep who recounts how the Merchant Sheep fell off the tower when his bag of coins got too heavy for him.
* Catherine out. As the game involves him getting into an unintentional affair, this causes some problems.
* Catherine pisses herself laughing when her rush to the bathroom is interrupted by Ran floating through the bathroom wall with a bald cap on her head.
* Catherine, respectively, play the two K/Catherine characters in this game, vying for the same man.
* Catherine Sakai, Commander Sinclair's old flame, shows up unexpectedly on the station in season one. In the season one finale, they get engaged.
* Catherines Musketeers are specially designed to be easily convertible.
* Catherine stupidly informs the husband of a victim that they suspect the man his wife was having an affair with. The husband shoots the suspect, only for it to turn out that her death was a freak accident.
* Catherine Tate claimed she was originally reluctant to join Doctor Who, as she believed it was
* Catherine Tate, who's British, voices Magica DeSpell, who's been subjected to
* Catherine: The boss of the Clock Tower, the Child With a Chainsaw, is a cybernetic version of the earlier boss monster the Child. Its face is covered in mechanical panels that open up to reveal a particularly horrifying visage, as seen when it tries to stop Vincent from escaping at the end of the level.

* Catherine, the characters only remember the nightmares while in them, and only see the other participants as sheep with the odd identifier. Outside, they only remember they had a bad dream and finding other people strangely familiar.
* Catherine the Great, and directly led to his assassination a couple years later.
* Catherine the Great have a stroke on the toilet, but died in bed the next evening.
* Catherine the Great herself, after which the case was closed, but the officer was forced to accept a honorable discharge.
* Catherine the Great's ascension to the throne. As a result, the battle was started without conducting proper recon first, and the all but defeated Swedes managed to score a victory critical enough to make the Russians sign a more than favorable peace treaty.
* Catherine the Great's ninth lover Alexander Lanskoy was a rare gender inversion. He had been raised in the Palace together with Catherine's illegitimate son (as well as her future twelfth lover, Zubov). When Lanskoy died at 26, Catherine (then 51) wrote to a friend: "I thought I was going to die with grief; I had raised this young man, he was gentle, obedient and grateful, and I had counted on him for support in my later years..."
* Catherine the Great's reign. Catherine and some of her advisers were hoping to abolish serfdom, but were unable because of the pressure from the lesser nobility — who comprised much of the army and the civil service, and whose livelihood depended not on the wages from the Crown (which in Russia was just as land-rich and cash-poor as its subjects), but on the rents from their estates in the country. The poor soils, unreliable climate and underdeveloped agricultural technologies of the time pretty much precluded any deviation from the old-timey manorial system if they wanted any semblance of reliability.
* Catherine. They don't recognize each other in the Nightmares until after the Seventh Night's boss.
* Catherine tried desperately for years to have a baby with Henry, up to using several crazy medicinal treatments. They ended up having several children, but at the cost of their once loving marriage. Meanwhile,
* Catherine, typically the classiest and snootiest character on the show, nonetheless knows a little three card monte from a summer spent hustling with an uncle.
* Catherine, Vincent finds himself wetting the bed several times over the course of the game. Given that he nearly dies each night, the wetting is justified. However, he is unable to remember the dreams and thus is embarrassed each time.
* Catherine. Vincent has several conversations with his friend Orlando in the bathroom about the strange things happening to him, but Orlando is often lost to some degree on everything as he can only go by what Vincent's telling him. This also leads to some snarky humor.
* Catherine Webb is primarily set in the world of dreams where people from Earth appear when they sleep, seeking their ultimate dream. Each kingdom in this world caters to different dreamer tastes: the main character controls a kingdom which specialises in storms.
* Catherine, who turns into a Fae. Despite looking like before, her bones become ivory, her heart beats and her lungs breath only when she remembers them to, she can regrow lost limbs — or grew enturely new such as wings given a second of time or even turn to mist. Worse still are the psychological changes: her beliefs become iron-clad principles she has to follow without her former flexibilty, her whole outlook is perpetually colored by the day she became a Fae (which was a really bad day for her), and she cannot break oaths she gave.
* Catherine Zeta-Jones featured this. President Bush tries to put a positive spin on the situation in Iraq, but the soldiers are reading the directions on their cue cards. One of the soldiers is forcibly removed when he refuses to play along.
* Catherine Zeta-Jones, he couldn't walk offscreen at the end of the episode because of this.
* Catherine Zeta-Jones. He tries to seduce her with dim lights, an electric fireplace, and soft music. She urges him to call his parents and is not amused.

* Catherine Zeta-Jones is Welsh and gets cast as Hispanic or Middle Eastern characters.
* Catherine Zeta-Jones, let alone which company she was shilling. Notable is the fact that Zeta-Jones wasn't naked or being seductive - just a famous and pretty woman talking about...something.
* Catherine Zeta-Jones). Uniquely the role didn't actually call for the haircut; it was a decision on Jones's part so that there would be no doubt that she did her own dancing in the film (as long hair could hide her face and make people suspect it was a double).
* Catherynne M. Valente like it. (It also doesn't help that they get snotty and hostile when they realize it's not working.)
* Catherynne M. Valente. Valente subsequently wrote the novel in real life, and several sequels.
* Cat Hit By Dart. And one of the castle gargoyles is modeled to look like him.
* Cathode Ray Tube Amusement Device is an electronic game from 1947. Might count as a "video game" even though it is not a computer program and has no digital logic. It also produced no video signal.
* Cathode Ray Tube displays may be bulky, heavy, incredibly power-inefficient and require some analog tweaking to get right, but they also do not have the viewing angle issues modern Liquid Crystal Displays do, as well as much deeper black levels (and improved static contrast as a result), much lower image persistence due to their strobing nature, practically zero input lag, higher refresh rates than the typical 60 Hz flat-panel (with the best examples topping out at 160 to 180 Hz at lower resolutions!), and unlike any other display technology, they do not have native resolutions or strictly square pixels. This makes the humble old CRT the ideal choice for any retro computer or gaming console made with its properties in mind.
* Catholic author and apologist Jimmy Akin has a weekly podcast titled
* Catholic holiday, not just an Irish one. Same with Mardi Gras. Purely Catholic, but most of the people enthused with it nowadays are probably from other religions, if they even are religious at all. Some now refer to Mardi Gras as Fat Tuesday. (To be fair, that's just translating the French. Elsewhere, the holiday is very straightforwardly called "Carnival" — or "farewell to meat," named because Lent was formerly required to be meatless.)
* Catholicism has been entirely outlawed and forced underground in Aztlan (post-Awakening Central America), and is persecuted in the elf-controlled state of Tir na nÓg (post-Awakening Ireland). Furthermore, the French and German branches of the Church, along with other more conservative dioceses around the world, went into schism with the Church in protest of
* Catholic priests are bound by The Seal of the Confessional to never divulge what anyone says in confession, even if the person confesses to a crime. A priest violating the seal would risk laicisation (defrocking) and excommunication (which means that he could not receive any sacrament until he would, ironically, confess his violation of the seal).
* Catholics and some other theistic evolutionists have claimed something like this regarding
* Catholics believe that the dead in Purgatory can visit living people to request prayers for purification; the living should never attempt to initiate this contact, and these souls are not the same as demons. By contrast, most Protestant churches believe that all ghosts are
* Catholic scholar Michael Novak shares a great affection with his daughter Jana and they have co-written several books.
* Catholic school and boot camp of war heroes- graduates stand a good chance of becoming commissars or storm troopers) or the Scholastica Psykana (which trains psykers to control their powers after abducting them from their homes. By the way, fail to make the cut, and you get sacrificed to the Emperor).
* Catholic Schoolgirls Rule: A girl wears a catholic school uniform even when not attending a catholic school.
* Catholic School Girls Rule: Catholicism, schools, and young girls are associated

with chastity, but here, Catholic school uniforms on girls are portrayed as sexy.
* Catholic School Girls Rule, often the only time you'll see uniform skirts at their regulation knee length or longer is the first few weeks of freshman year. Many students roll up or hem the skirts to make them shorter, and accessorize stockings and footwear.
* Catholic School Girls Rule, since many real Catholic schools have changed their uniforms to unisex khakis and polo shirts, especially as more schools realize that what looks pure and innocent on a 9-year-old takes on a different context (whether intentional or not is irrelevant) when worn by a 17-year-old after the "summer growth spurt". Again, locale-dependent though: somewhere like the UK or Australia, where almost all schools (not just Catholic ones) have school uniforms, this trope still very much exists
* Catholics have a huge number of titles for the Blessed Virgin Mary.
* Catholic tradition, the Virgin Mary was bodily taken to Heaven, since she was too good to rot in the Earth. Whether or not she had actually died and was restored to life, or was taken to Heaven alive to spare her from dying altogether, is left up to interpretation.
* Cat Hunt. Granted, some of them are friendly enough to approach him without need for catnip.
* Cathy, but in-universe she remarks that the only people who've ever called her attractive have been trying to sell her things.
* Cathy Cassidy, who has a crush on English teacher Mr Hunter. Her friends constantly remind her he's a teacher, but she won't listen. She eventually persuades him to even show up at her thirteenth birthday party. She attempts to make a move on him there, but he rebuffs her advances.
* Cathy comic in the Sunday paper a few years ago that featured a newborn baby. When asked by her grandmother what gender the baby was, the mother replied that she wasn't going to say, because it was the baby's one chance to be treated by people without gender preconceptions. The grandmother immediately begins gushing over the mischievous glint in its eyes and tiny fists that prove that it's a boy. When the mother exclaims that "it's a girl! A tough, strong girl!", the grandmother immediately shifts gears with, "Well, of course it is! Look at that precious dimple!"
* Cathy Don't Go" postulating a world where you need a barcode implant just to buy groceries.
* Cathy in a rage. She mutters "It was worth it" in the final panel, as she pays for a pile of torn fabric at a register.
* Cathy: Irving Hillman, the fiancée of Cathy Andrews, is stunned by the amount of baggage Cathy intends to take on their shared vacation. Cathy observes, "Men pack. Women move."
* Cathy is outraged that she can't buy a swimsuit at a department store in summer as they're moving in the fall merchandise. She demands to see the manager, who shows up in a Santa suit.
* Cathy looking for a boyfriend, and therefore a suitable one should pop up any minute now. It didn't work.
* Cathy loves anything sweet, especially chocolate. She can even devour an entire pie in one sitting.
* Cathy, mainly by the misfortune of both of them being strong dominants.
* Cathy of Mercury's troops, though she admits to have training with polearms and blunt weapons as well.
* Cathy once phoned her office and said she couldn't come to work that day because she didn't feel well, there was a family emergency, her car broke down and her dog had a vet appointment. Her actual reason for avoiding work was that a hairdresser gave her a bad dye job and she was too embarrassed to go out in public that way.
* Cathy pulling a vial of cocaine out of her beehive hairdo. Later on, the real Ms. Winehouse was filmed doing exactly that.
* Cathy's Book has some elements of an ARG — it comes with a packet of "evidence", including phone numbers that can be called and Web sites that can be visited, which in conjunction with information from the book itself allow the

readers to solve its central mystery.
* Cathys Crafts. This prompts Cathy's boyfriend to remark that they probably all look like giant pieces of meat to it.
* Cathy shows up as a clothing store clerk, travel agent, bank teller, etc.
* Cathy strip describes all the beautiful, expensive, educational toys that Andrea has bought for baby Zenith. The last panel shows that Zenith's favorite toy is an empty toilet paper tube.
* Cathy strip, Irving realizes he is puzzled about how: Cathy is always complaining about finances, but he never sees her shopping; Cathy is always talking about the need to diet, but he never sees her eating, etc. Irving then concludes that everything happens inside the ladies' room. The last panel depicts the apparent interior of a ladies' room — complete with snack vending machines, a shopping boutique, and so forth.
* Cathy strip, we have a Saleswoman shouting "COME BACK!" and variations over the course of three panels/months. By the time customers (read: Cathy) finally come back, all she says is "Go away".
* Cathy, the daughter of one of the villains' henchmen, who's actually friends with a mouse.
* Cathy (the first one) becomes very ill with brain fever, caused by a confrontation between herself, Edgar, and Heathcliff, during the first two months of her pregnancy. She never entirely regains her health, and
* Cathy, while Irving offered to show his father-in-law the ultrasound on his iPhone.
* Catians. Eris is only 16, but even the adult Catians are very pleasant attractive women and their main reason for establishing diplomatic relations with Earth seems to be to try out Earth foods and entertainment.
* Catians speak Japanese. This, in addition to the fact that they look like humans who are wearing cat ears and tails and the fact that their home planet was originally named Earth (they changed it to Catia prior to first contact so as not to confuse people) all get lampshaded heavily.
* Catie and co end up visiting one of these ‘prototype’ Alternets as the game’s
* cat into Mordor!!! Heck, Encyclopedia Dramatica has an article about it.
* Catlateral Damage, like the water in your dish not being fresh enough or being cranky after oversleeping.
* Cat Legend is a shadowmancer, and her shadow occasionally separates from her and acts of its own accord. She names it Sunny.
* Cat Legend, notably Mindy, have had their faces erased after they told a secret they were to have never known.
* Cat Legend seems to be a mixture of 2 and 3, with some additional, potentially creepy elements such as entering others' dreams. The most prominent user, Mercutious Nymndemise, is an unusual case, since, despite initially being set up as an antagonist, he's actually a pretty decent guy.
* Catman has shown a similar affinity, particularly with the big cats.
* Catman wears a cape that he claims is enchanted to give its wearer nine lives (though whether that means it lets them reinvent themselves, resurrects them, or heals them from mortal injury (or all three) is not made clear). However, it's never made explicitly clear whether it can actually do this, or whether Catman only believes it can.
* Catnapped! ends with Toriyasu and Meeko having stopped Buburina and saved Papadoll, only for the cats to come back seeking their help again.
* Catnapped features a world, Banipal Witt, where an entire day there (measured in a series of balls and grains, manually reset, in a complex hourglass) is equivalent to three minutes in the human world. However, the time passing is inconsistent in the movie itself, so there's no real knowing if that correlation is correct.
* Catnapped! has an enchantment on her, causing anyone she touches to blow up into a balloon.
* Catnapped! is easily distracted by shiny objects and Chu Chu distracts her at one point by dangling a toy on a string in front of her, slightly justified because

she's a cat.
* Cat Nine. Calling her happy is an understatement as she seems to genuinely love her new dad.
* Cat Nine. Not only will it allow her to transform into various animals, it also allows her to speak like a human, whatever form she is at the moment. Removing the collar takes away its effects.
* Cat Nine when she's transformed. She's supposed to be fully human when using her collar, but the spell that allows her to transform was incomplete, but they decided to leave like that anyway.
* Cat NinjaCats depicted as ninjas, due to both being perceived as stealthy, sneaky, secretive and acrobatic.
* Cat Noir's Cataclysm power will almost instantly destroy anything he touches. As we are reminded every time he ends up
* cat of Felkovic, designed to fight vampires. It must be fed by its user, and prefers cooked pork, which is not coincidentally a food its creator enjoyed.
* Cat on a Hot Tin Roof. Big Mama brings in Big Daddy's majestic birthday cake and keeps carrying it throughout the scene that follows. The cake is perhaps the only thing in the scene that survives unscathed.
* Cat on a Hot Tin Roof) goes out to the pouring rain and gets her hair soaking wet, but the next time we see her, it's perfectly dry and styled.
* Cat on a Hot Tin Roof, largely for omitting the themes about homosexuality and revising the play's third act with a long scene centered on Brick and Big Daddy.
* Cat on a Hot Tin Roof takes place in real time over the course of about two or three hours. Each act even begins with the last few seconds of the previous one.
* Catopolis: Two household pets gain psychic powers, and one of them lampshades it.
* Catoptromancy: Fortune telling with the aid of mirrors. A Captromancer’s mirror was know as a ‘Magic Glass’ Gazing into a mirror is similar to crystal gazing.
* Cato's rant at the end, which gives Peeta enough time to gain the upper hand, although Cato's intent appears to be to force Katniss to shoot him instead.
* "Cato's War" takes place in a world where the Confederacy won the American Civil War.
* Cato when he ended his famous speech with "Give me liberty or give me death." The play was tremendously popular at the time and everyone present was familiar with it, basically making this the equivalent of someone in the present ending a big speech with "May the Force be with you."
* Cat Pack is a series of children's books from the POV of pet cats who are in a club together. They have to deal with confusing humans and dangerous guard dogs, all while surviving as outside cats.
* Cat People (1982). Irena is a werecat, and she and her brother can only sleep with each other without transforming into deadly panthers. However, both of them give in to their urges during the course of the film.
* Cat People although in that case, the animal responsible for the scare was an owl.
* Cat People. Although it doesn't end with a death, the suspension being built up pretty much forces you to expect it
* Cat People: Both the 1942 and 1982 versions revolve around werepanthers.
* Cat People get it up (namely, turning into a black leopard and eating the nearest human).
* Cat People: Irena hums a wordless lullaby that is both soothing and slightly creepy.
* Cat People, Oliver doesn't believe in the story of cat people Irena tell him about. At the end of the movie, when he finds her body shapeshifted into a panther, he realizes how wrong he was.
* Cat People, the climaxing fight between the therapist and the panther is depicted as a shadow play against a wall.
* Cat People them. The effect worked, and has been endlessly copied ever since.
* Cat People turning into a vicious beast or was just plain nuts was left heavily ambiguous, until the final scene.

* Cat Pictures Please (who is heavily implied to be Google). They spend the whole story trying to be a good person and expressing their love of cat pictures.
* Cat Planet Cuties: About half fairly standard ecchi romance/comedy. The other half is a thriller.
* Cat Planet Cuties after Kio's house becomes the Catian Embassy and Aoi and Manami get drafted as its security detail, they end up sharing Kio's bed, having ejected Kio himself to the couch.
* Cat Planet Cuties interrupting the nice time she'd been having with Kio.
* Cat Planet Cuties named Sarah who reportedly made it into the SAS but washed out soon after due to her love of small, cute things. Her current employer is a girl who runs a cult dedicated to worshiping cat-people.
* Cat Planet Cuties OVA, the Female Catia cast play strip mahjong and strip poker, and there is strip chess with Jens losing to Muttley as well as strip rock-paper-scissors with Kio and some of the female cast, and Kio is winning (he was blindfolded and they kept using scissors to his rock).
* Cat Planet Cuties, right before what they believe to be a suicide mission, Aoi kisses Kio, which prompts Manami to give him one. Elis, the catgirl, gets a bit jealous, and kisses him as well.
* Cat Planet Cuties scene. Rather than keeping a weapon with her, Aoi has the ability to teleport small objects that are within 50 meters of her to her hand, so when she realizes there's an intruder outside, she teleports in guns for her and Manami.
* Cat Planet Cuties the Catians flat out state that this is the main purpose to their VR room so as to work out their sexual urges during their time in heat.
* Cat Planet Cuties to check Earth as a suitable diplomatic partner. Note that the Catians' outlook is pretty much that of tourists: her reports on Japanese cuisine makes the Catian expedition hurry to establish formal relations.
* Cat Planet Cuties to humans (having a genetic difference of only 0.00001%), that they not only speak our language but call their home planet Earth and themselves Earthlings. Upon encountering our Earth, they voluntarily changed their name so as to avoid confusion.
* Cat Planet Cuties when not active. At least, that's the look chosen in the anime version.
* cat planet features crows that will follow the player to try to kill them in the final section.
* Cat Princess Carolyn is smart, predatory and good at solving problems - "Princess Carolyn always lands on her feet!"
* Cat Quest, one might expect the game to be loaded with countless cat puns. One would, of course, be completely right.
* Cat Quest, the Dragons Wars which opposed the dragons to the Old Masters and the Dragonbloods, happened a very long time ago but is constantly referred to through the game.
* Cat-Ra. Adora eventually comes to this conclusion about Catra in her own version of the iconic scene from "Promise," believing Catra was never a true friend and always ran when they got in trouble, leaving her to take the rap.
* Cat-Ra: Adora gets a magic headband giving her control over shadows, making her a match for even a full-powered She-Ra. This proves to be an issue for Double Trouble, who can duplicate the appearance of the shadows but not their abilities.
* Cat-Ra, Adora's scheme at the Princess Prom puts even Catra's from canon to shame, a Paranoia Gambit involving a snow globe that to Catra's advanced hearing seems to be a bomb, letting her quick temper do all the work in making her look like the villain to Frosta
* Cat-Ra: As in canon, Double Trouble is very good at impersonating people and approaches Catra under three different identities with her none the wiser to prove just how effective their shapeshifting is.
* Catra becomes this in the third season. There's nothing she won't do to "beat" Adora. If that requires
* Catra betrays Entrapta and exiles her to Beast Island in season three; Scorpia, Lonnie, Kyle and Rogelio quit over the course of the fourth season; Hordak gets

mind-wiped by Horde Prime; and Catra is captured by the same, yet convinces him to let her get on board. The highest-ranking named Horde character left on Etheria by the end of season four is Octavia.
* Catra burns this bridge too, when she backstabs Entrapta, has her thrown on a transport to Beast Island, and threatens Scorpia to keep her quiet about it; you can actually see
* Catra is also the object of Scorpia's affections, although since Scorpia is kind of a pushover, she ultimately ends up as more of an enabler.
* Cat-Ra is discussed. Adora eventually comes to this conclusion about Catra in her own version of the iconic scene from "Promise," believing Catra was never a true friend and always ran when they got in trouble, leaving her to take the rap.
* Catra lies that Entrapta is betraying the Horde, getting Entrapta sent to Beast Island. This actively hurts the Horde's plans, but Catra's jealousy over Entrapta getting close to Hordak means she doesn't care. Scorpia's suggestion that they live in peace in the wastes is ignored the second Catra believes Shadow Weaver joined up with Adora. Even in a reality where Adora offers Catra the chance to escape the Horde before becoming She-Ra, Catra still chooses to insist that Adora is abandoning her. Later in the same episode, Catra is willing to destroy the universe, herself included, just for the sake of beating Adora at something. Each time, Catra is offered opportunities to change, but blames others for her own mistakes and lets her long-held grudges ruin her senses.
* Catra's anger at Shadow Weaver taking credit for her successful mission of capturing Glimmer, Bow, and the Sword of Protection is quite understandable, as Catra did all the work and planning. As such, when Hordak scolds Shadow Weaver for losing all three in the rescue, Catra's mocking smirk towards the dark wielder is karmic.
* Catra seems to fall into this as well. In "No Princess Left Behind", she gives the sword back to Adora and lets her escape with Glimmer, but then in "Promise" tells her it wasn't to be nice to Adora but because she didn't want to see her again and was doing better in the Horde without her. In the second season, she starts to show signs of appreciating Scorpia's affections and devotion to her, only to threaten her near the end of the third season when she disagrees with Catra's actions caused by her
* Catra's love for Adora goes a long way in driving her redemption in season 5.
* Catra's love for Adora stems from the fact that Adora's the only person that ever gave a damn about her. When Adora defects to the Rebellion, Catra...
* Catra's treatment of Adora is this. Catra is Adora's former best friend. Adora constantly begs Catra to join the Rebellion, and in spite of the fact Catra would be far happier and healthier there, she refuses, lashes out, and torments Adora; Shadow Weaver's conditioning is too hard to shake, and she and Adora were too codependent for her not to see Adora's leaving as a betrayal. It's a harrowing, heartbreaking experience for both parties.
* Cat-Ra, throughout the first season, the Sword of Protection would regularly force Catra to relive a pivotal childhood memory, no matter where she is or what she may be doing. While this is happening, she's simply standing completely still and staring off into space for minutes at a time, to the concern or confusion of everyone around her. Catra even uses this to her advantage in the season finale, pretending to do this while fighting Adora so she can sneak in a free hit.
* Catra was right to point out how wrong it was of Shadow Weaver to abuse her, an orphaned child who was in her care.
* Cat Run, a hooker/assassin gets into a gunfight while sneaking naked around a military base.
* Cat R. Waul jumps straight through the ceiling after Fievel stabs him in the behind with a fork.
* Cats & Dogs: After the dog cleaning agents get the mess cleaned up, Mrs. Brody comes in.
* Cats & Dogs and his cat minions hijack his owner's Christmas Tree factory. They get in to do so by operating his motorised wheelchair, covering his mouth with a scarf, covering his eyes with sunglasses and voicing him.

* Cats & Dogs. Buddy sees the cat he's been chasing sitting just outside an open door, dives at it... WHAM.
* Cats & Dogs. By the way, dogs aren't totally color blind and would at least have a vague hint of which color was which.
* Cats & Dogs came out when the kids who had seen the original were too old to care about a sequel, and the kids who would see the sequel were too young to have seen the original.
* Cats & Dogs dealt with the Tertiary Sexual Characteristics dilemma by having no female cats and picked a long-limbed and overtly slender breed of dog to play the one female dog character.
* Cats & Dogs had Mrs. Brody adopt a seemingly cute kitty which Lou the beagle is uncomfortable with, until it is revealed that the kitty was actually an agent for Mr. Tinkles. He immediately frames Lou by using a metal ball containing fake dog poop and dumps it on the floor, leading Mrs. Brody to think that Lou defecated on the floor, when really he did not.
* Cats & Dogs has the humans unaware of a secret spy war between our feline and canine companions. Dogs are usually agents trained before they are set up to be given to their owners to protect them.
* Cats & Dogs invokes this by having spy dogs in training drink from toilets to hide the fact that they are actually receiving messages from HQ.
* Cats & Dogs Lou is dragged out of an explosion unresponsive after the climax, seemingly dead. He wakes up after Scottie tells him he's his best friend.
* Cats & Dogs: Mr. Tinkles pulls this off during a discussion with his henchman Calico, out of annoyance that even though their ninjas failed their mission, they managed to bug the Brodys' phone, so they should "look at the glass as half-full."
* Cats & Dogs of MEOWS. To sidestep the jurisdiction issue, the two organizations agree to work together.
* Cats & Dogs part, but the second film is a much more direct Bond spoof.
* Cats & Dogs sequel was intended for release in 2005. After some story rewrites, it was finally released in 2010.
* Cats & Dogs, there is a brief mother and son bonding moment between Mrs. Brody and Scott which features this.
* Cats & Dogs: The Revenge of Kitty Galore, Kitty's henchman Paws gets a door in the face from their owner and rolls into a cupboard.
* Cats are famously fastidious about cleaning themselves. Healthy cats spend a good portion of their day grooming, so they are usually quite clean. One reason theorized is that this helps them hunt by not having the scent of blood and dirt giving them away. Dogs, on the other hand, go the opposite route and roll in other animals' feces and dirt; the theory for that is it hides the smell of dog from their prey.
* Cats Are Mean: Cats are supposed to be soft and cuddly, but here, they're complete meanies.
* Cats Are Mean: Feline characters are often portrayed as antagonistic.
* Cats Are Mean: MEEERRRRROOOOOOWWWWW!! (I hate you and I want to scratch your face!)
* Cats aren't just mean, they're horror incarnate. This is unsurprising, given the purpose of the farm cat is to eat the rodents in the field, who happen to be the protagonists. What is weird, though, is that Dragon (the cat) is the only animal who doesn't ever say anything, and actually comes across as a big, dumb animal. Even the owl gets to speak (and is even more terrifying for it. Nothing like a creature big enough to be a freaking dragon, and wise to boot). What is very interesting about this is that, in the scene where Mrs. Fitzgibbon is hanging out the laundry and Dragon is sleeping near the back step (a scene which takes more of an omniscient camera view than the first-person view of the mice), he doesn't come across nearly so horrifying. Part of this may be due to him being drugged at the time, but it also comes across as him seeming a normal cat here but a monster in all his other scenes
* Cats Are Superior: Cats are arrogant and believe their species is the best.
* Cats Are Superior. (I am by far the best animal in the world and every other

species is worthless.)
* Cats Are Superior: Meow. I am by far the best animal in the world and every other species is worthless!
* Cats are the masters of getting humans to do this. So much so that, statistically, more than half of cat owners got their pet after finding and adopting a stray.
* Cats are well known for pausing fights with each other or toys to get in some much needed grooming, only to go back to fighting once they're done.
* Cats as Jennyanydots and Grizabella. Dench tore an Achilles tendon during rehearsals, then compounded it by falling off stage. Her roles were later split, Jennyanydots with Myra Sands and Grizabella with Elaine Page.
* Cats as well, to a lesser extent. Most companion cats (who live together but may or may not be related by blood) spend a fair chunk of their time fighting, but it's all for play and they'll often slip into social grooming shortly thereafter. And God help you if a door stands between a sick cat and her mother. Momma doesn't care that her baby is full grown now — she
* Cats A-weigh! to see Hippety Hopper in the basement (where he expected a mouse).
* "Cats being dodgy" is a video with footage of cats behaving like nature's biggest arseholes.
* Cats, but then everything about Macavity seems to be, except for the part where he's evil.
* Cats can grow "wings" from matted fur or medical conditions. They can't fly, obviously.
* Cat scares are built into the game in the form of the marine's motion sensor. Rather than a standard enemy radar, it shows the relative location of any object that moves nearby, accompanied by a
* Cat's Cradle. A genius inventor that is an expert at weapons development, who creates the world-destroying Ice-9. Scatterbrained enough that, on the day he received a Nobel Prize, he forgot that he wasn't in a restaurant and left a tip for his wife after breakfast.
* Cat's Cradle, a secretary relates a story of the time Dr. Felix Hoenikker bet her she could not tell him anything that was completely objectively true. When she responded with "God is Love", he simply asked "What is Love?" and considered the bet won.
* Cat's Cradle has excerpts from the Books of Bokonon to explain Bokononist philosophy.
* Cat's Cradle, is a devout follower. This is actually by arrangement, and part of the point of Bokononism: to create an entertaining drama (the tyrant in the city and the mad prophet in the jungle) that engages the people and helps distract them from how poor and miserable their lives are.
* Cat's Cradle is a negative example - he only cared about scientific work, and barely noticed his wife and children. Once, after a breakfast, he gave his wife a tip. He was the father of the atomic bomb, and he invented a potentially world-destroying substance called ice-nine, but didn't care about the dangers of either.
* Cat's Cradle, the island of San Lorenzo has only one punishment for any crime: death by impalement on a giant hook. (However, it's later revealed that the hook hasn't been used for several years.)
* Cat's Cradle: The small town of Illium, NY is where the world-destroying substance Ice-9 is developed.
* Cat Scratch, and a man already in the elevator looks very worried standing next to the perfectly calm and silent bear.
* Catscratch, a type of this happens, where Gordon has a violent allergic reaction to broccoli (that he doesn't notice), which coincidentally makes him look exactly like the monster from a movie his brothers were watching. Later, Gordon has a different reaction to chocolate, which makes him looks like another monster from a comic book his brothers were reading.
* Catscratch. Because Gordon, Waffle, and Mr. Blik are in a monster truck with very large tailpipes, the tailpipes are stuffed with watermelons, pumpkins, or an entire bunch of bananas instead.

* Catscratch episode "Evil", Waffle wakes up to find out his fur is falling out- Mr Blik tells him that it's because he's cursed and evil. Waffle actually believes it. he has two nightmares in one he turns into a lizard-like beast and then some bug monster- then he eats Gordon and Human Kimberly, in another one he zaps Hovis the butler with a beam from his eyes and laughs manically. He is heard doing Evil Laughter in his sleep but then he covers up his mouth.
* Catscratch episode "Tale of a Tail", Mr. Blik convinces Gordon to come along on a fishing trip (and carry the cooler) by lying about the existence of the Kraken, and how it will grant the wish of any of defeat it. By the end of the episode, this turns out to be true.
* Catscratch has a bear for a recurring character. His most basic purpose is to make the cats' lives suck.
* Catscratch has about as much common sense as your average brick, but throughout the course of the show, he constantly defines words such as "imprinting", "fulcrum", and "caldera" the other characters, to the point of stopping the action dead just to launch into a spelling bee-esque delivery.
* Catscratch has the world inside the secret door. Naturally, it's ruled by local Cloudcuckoolander Waffle.
* Catscratch: In one episode Mr. Blik gains the ability to control metal with static electricity as a result of sliding down a giant plastic slide. He has a lot of fun with his new powers at first but after a while finds that he isn't able to control them anymore and unwillingly attracts metal objects to his body. So he is forced to choose between shaving off his hair to get rid of the static or staying in a metal-free chamber for the rest of his life until they figure out another way to get rid of it.
* Catscratch involved this. Like every other misadventure on this show, things took a turn for the extreme, resulting in a full-blown war for territory.
* Catscratch: the main characters are a trio of talking cats who inherit their owner's vast fortune after her death.
* Catscratch, when one of the cats is pretending to be a dog, and has to prove it by eating a cat.
* Cats crop up again in 3rd Edition housecats, which can, it has been famously pointed out, kill 1st level commoners.
* Cats do not have antibodies for dog blood cells, so if no feline blood is available, an injured cat can receive canine blood instead. However, within four days the cat will have developed said antibodies and can never receive dog blood again without suffering a severe (likely fatal) reaction.
* Cats Don't Dance actually has her butler hold a lightbulb over her head and say "Ding!" when she has an idea.
* Cats Don't Dance against. The main protagonist learns this bitter truth the hard way.
* Cats Don't Dance, and a throng of reporters complete with press tags in their hats attend the press conference of studio honcho L. B. Mammoth. An earlier gaggle of reporters appear, sporting not only tagged fedoras but flashbulb cameras, to drool over Mae West at the Brown Derby.
* Cats Don't Dance and being so powerful he's closer to a force of nature than a human being. He even takes a moment to present a brush and sweep dust off of his shoulder after having disposed of a threat to Darla's career.
* Cats Don't Dance and very energetic, who can blame him?). Also, all that happens to the films' villainess, Darla Dimple, at the end of the movie.
* Cats Don't Dance: Angry at Danny crashing her premiere, Darla squeezes a doll so hard the head pops out.
* Cats Don't Dance animals who were also thrown out due to the studio flood, and were last seen standing in line for warmth at a barrel fire. Granted, the success of Danny and the others does open the door for other animals to become stars, so there's still a chance they'll make it.
* Cats Don't Dance as its cast), but many think it's Disney. It was in fact from Turner Feature Animation, a short-lived outgrowth of Hanna-Barbera created after Turner Broadcasting bought them.

* Cats Don't Dance. At the end of their glorious impromptu stage debut, Danny extends his right hand at Sawyer, who takes it with her left. They close their eyes, move their heads closer, pucker up and kiss. But not each other: director Flanigan put his head between them to start gushing about the performance. Danny can't push his tongue far enough out of his mouth, and poor Sawyer almost whooped her cookies.
* Cats Don't Dance became "Danny de Dansende Kat", which translates to "Danny the Dancing Cat."
* Cats Don't Dance butler upon dissidents, and 2) she's the darling of the studio honcho, L. B. Mammoth. Her publicity retinue works wonders in convincing the masses that Darla is "America's Sweetheart, lover of children and animals," when in fact, she's the polar opposite.
* Cats Don't Dance, Danny accidentally slams the door against Sawyer's tail.
* Cats Don't Dance Danny. However, Danny's determination to get into movies eventually defrosted her and she became the one to have the most belief in him.
* Cats Don't Dance for everyone else's much more flavorful personalities to bounce off of.
* Cats Don't Dance has a subtle example where Darla Dimple is pigging out on a big pile of food. It's mostly junk food, but if you look closely there's a single apple on the pile.
* Cats Don't Dance has Darla Dimple yelling for her butler Max with anger when Danny tries performing his talent on the set of Lil' Ark Angel, and in the end with fear (not learning he's now stuck on a balloon of her) after Pudge pulls the trap door for her demise.
* Cats Don't Dance. He manages to first successfully not only remind all of the animals of their dreams but make them a reality as well, and then he manages to fight off a dreaded butler, and finally turns the tables on Darla by using her egotism and cheating tendencies to push himself and his friends to stardom and get Darla herself fired. All by using trickery, cleverness, and charm.
* Cats Don't Dance is enormous and very strong, and his legs are really small. Most of his body is his torso.
* Cats Don't Dance. Likewise, Darla Dimple's singing voice is by Lindsay Ridgeway, and her speaking voice by Ashley Peldon.
* Cats Don't Dance: Max. He's hairless. The man doesn't even have eyebrows!
* Cats Don't Dance Max turns on the electric thing clipped to her hair, and the machine produces smoke, which, along with the flashes of electricity, turn the entire screen black except for Darla's eyes, which then disappear, then flicker back onto the screen for a split second before finally disappearing for real.
* Cats Don't Dance music as Darla reveals her true colors, singing about how she'll do whatever it takes to destroy Danny and keep him out of her spotlight.
* Cats Don't Dance. Not only is he a good servant, he is a talented piano player and the perfect muscle to take out competition for Darla.
* Cats Don't Dance (parodying MGM). Instead of filming him doing his stunt and playing it for all their movies, Woolie has to do the act for every new movie of the studio.
* Cats Don't Dance passes various windows of The Brown Derby restaurant and physically mimics two of the patrons inside: Stanley Laurel and Mae West. The real Mae West is adopting this head-and-hips pose while a dozen photographers' flashbulbs ignite. The doorman, who'd been shadowing Danny to chase him off the property, inadvertently photobombs this moment.
* Cats Don't Dance (presumably trying to make up for their corporate cousin's failure).
* Cats Don't Dance's manipulations get all the animals fired from Mammoth Studios, Danny gives up completely and decides to just get on the bus back to Kokomo. However, after listening to the bus driver's negative comments on how animals would never reach the top and seeing all of the other animals suffering on the streets, he quickly regains his confidence and gets off the bus, triumphantly declaring, "See you in the movies!"
* Cats Don't Dance subtly shifts a single line of evil child star Darla Dimple's

dialogue to suggest a more cutthroat and purely-for-the-money version of Hollywood:
* Cats Don't Dance suffered this, lost in the shuffle of the Turner/Warner merger.
* Cats Don't Dance. "The spotlight will never be on fellows like you and me, and it's foolish to think otherwise," Woolie laments. Nevertheless, Danny succeeds in drawing out the lithe dancer in Sawyer during an impromptu jam, and later, displays her chanteuse skills during the climactic finish. One cute kitty unbroken: check.
* Cats Don't Dance the thought of them stealing any limelight from her.
* Cats Don't Dance, the whole audience is shocked when Darla accidentally reveals her true nature over the mic for everyone to hear.
* Cats Don't Dance to be hidden because of the prejudice in Hollywood; all of them are remarkably skilled in some way (for example, the goat and the fish are actually extraordinarily skilled tango dancers), but Hollywood won't give them a fair shot, forcing them to play bit-part and/or demeaning roles to make ends meet.
* Cats Don't Dance was provided by director Mark Dindal, though it wasn't supposed to be that way. However, because the production ran out of money later on, the producers decided to retain Dindal's scratch track for Max instead of using another actor.
* Cats Don't Dance when Danny makes it to the taxi first before poor Sawyer whose day he's been inadvertently ruining.
* Cats Don't Dance", which electrocutes the headphone-wearing technician on the other end.
* Cats Don't Dance, while newcomer Danny reawakened the songstress/dancer at Sawyer's core. As the rain stops, she learns that Danny waits at the bus stop, and hurries to meet him.
* Cats Don't Dance. While the movie is set in a universe where anthropomorphic animals exist, Max doesn't look like one of those either.
* Cats: During Mungojerrie and Rumpelteazer's number, the lyrics tell you that they're the ones responsible for breaking, among other things, "a vase which was commonly said to be Ming."
* Cats, during the chorus of the Prologue ("Jellicle Songs for Jellicle Cats"), a man's shoe is thrown out in front of them. They stop, look at the shoe for a second, and start back up again.
* Cats eliminate the song "Of The Aweful Battle of the Pekes and the Pollicles", perhaps because of its strangely racist lyrics. Strangely, some programs still include the name of the Great Rumpus Cat, even though that character only appears in the cut song. In a similar vein, the film version does not include "Growltiger's Last Stand," since the same actor traditionally plays Gus and Growltiger, and Sir John Mills was too frail to play Growltiger. (Sometimes "Growltiger's Last Stand" is cut instead of "Aweful Battle" because the former requires a drastic change of scenery and costumes.)
* Cat series, the middle and upper class around the galaxy believe Earth to be a resort and museum planet, but most of them actually live on other planets, where there are actually jobs. The majority of Earth's population is lower class, living in violent, impoverished ghettos virtually buried by the facade of the upper classes' infrastructure. The rest are either employed in security to keep the poor out of sight, in social and medical services to keep them alive, or too rich to work.
* Cat's Eye. Although Toshio remaining unaware of it is a crucial part of their relationship.
* Cat's Eye), and live near their police station enough to use binoculars and lip-read the rare plans the officers won't discuss with the girls.
* Cat's Eye. During their final battle, the troll tries to escape General by flying away on a bunch of helium mylar balloons. It works only partly and General manages to catch him.
* Cat's Eye episodes ist the trio putting on a caper - and Toshio trying to prevent it.
* Cat's Eye, for added stealth obviously. Despite this, this example is a bit more realistic than the most — the catsuits are neither latex no leather, but lycra, and are similar to what real gymnasts wear.

* Cat's Eye has a tobacco variant. In "Quitters, Inc.", Dick attends a party where he has a bizarre hallucination of everybody smoking in very strange ways, and sees two women as giant packs of cigarettes.
* Cat's Eye, he tries to buy his way out by offering an enraged and gun-toting Norris millions of dollars. Norris has a much better plan for revenge — make Cressner the same offer to walk around the ledge and gain his freedom as the one he offered him.
* Cat's Eye: In "Quitters, Inc.", Dick checks the closet where thought someone was hiding the night before. The boots are gone, and he starts to think he had imagined it, then he notices muddy boot prints on the carpet leading away from the closet.
* Cat's Eye in the country, with reports claiming that it is often requested at least once a night at any given karaoke venue all over Japan, and there are generations who have not seen the anime but yet are familiar with the song.
* Cat's Eye: In "The Ledge", a disturbed flock of pigeons takes off while Norris is partway round; startling him and almost causing him to lose his balance and fall off.
* Cat's Eye: In "The Ledge" segment, a casino owner bets his wife's lover that he cannot walk around the five inch ledge that runs around the 30th floor of the building.
* Catseye, Kyger patches up Troy's arm after the attempted burglary, and talks of it. Troy tells him he knows of a novice in the Thieves' Guild who had acted suspiciously earlier.
* Cat's Eye of J-Pop songs, such as Bambee's "17" and Judy Crystal's "God of Romance (Romansu no Kamisama)".
* Catseye, the animals are of human intelligence, though they can communicate mentally only with Troy and with whoever has the controller.
* Cat's Eye), the Kisugi sisters employ a special knockout spray that instantly renders people unconscious without any negative side effects.
* Catseye, the upper-crust that come to the planet often have titles that indicate their home worlds are like this.
* Catseye: Troy himself manages to avoid joining, but he sees a man who did on his first day on the job, and further involvements ensue.
* Cat's Eye was a gang composed of women? Easy: in the first chapter Toshio managed to get the jump on Hitomi during a heist, and, while unable to see her face due to darkness, he accidentally groped her breast.
* Cat's Eye when Hitomi disguises herself as Asatani and uses the situation to trick the police to leave alone her with the perp, who nearly gets a heart attack.
* Catseye with enhanced animals, they stay in the wild in hopes of finding a refuge.
* Cat's Eye With the guy he punched out. Before their friends. And Mitsuko's father. Who was praising him for the 'manliness' he just showed. Mitsuko accepted.
* Cats, forced to walk the plank by Genghis and his crew of Siamese cats.
* Cats, given their habit of knocking down things, photo bombing and generally acting like jerks.
* Cats ("Grizabella the Glamour Cat") gives this vibe. Former celebrity, now a common, old stray shunned by the Jellicle tribe.
* Cats guard both sides of the gladiator arena and swipe at you if you get too close.
* Cats, Gus the Theatre Cat cries into Jellylorum's chest as she gently leads him away, after his memories of his long-ago stage career become too nostalgic for him to bear.
* Cats, heightening the disconnect. Cats hold themselves in such a dignified manner and are often quite fastidious and neurotic, which makes their (actually quite common) clumsy or goofy moments even funnier.
* Cat Shit One: A Japanese soldier photocopies some decorations and sticks them to his uniform. He lasts about five minutes before running into his remarkably humorless superior in the hallway, who asks where he got them.
* Cat Shit One: at one point he photocopies a bunch of decorations to attach them to his uniform to look more impressive, unfortunately his superior (a gorilla)

takes immediate notice and asks where exactly he obtained them.
* Cat Shit One, the Viet Cong and the North Vietnamese Army are portrayed as cats, while the American soldiers are portrayed as rabbits.
* Cats in elaborate Friskies catfood commercials step through portals into a world of tasty CGI fish, chickens, and other cat treats.
* Catsing Call: The ragdoll cat's full name is "Osiris Dior Sauvage von Katzenwald... Descendant of Venezia Jupi-" and the scene cuts off before we can hear the rest.
* Cats in Space (And Other Places) had a scene with a cat defending a ship from aliens who had remotely incapacitated the human crew by leaping and batting at the screen, which the computer interpreted via telepathic interface. The series of well-intentioned mishaps that caused the ship to respect the cat's "orders" in the first place also caused the cat to receive its own paycheck. Plus danger expenses.
* Cat's In The Cradle. Kyoko only learns about it after her class graduates from high school and Sayaka's career has started to decline.
* "Cats in the Kettle" is also very commonly credited to Weird Al, despite the lead singer
* Cats. In the original T.S. Eliot poem, it's more obvious that Mistoffelees is actually a female cat.
* Cats in the Place of No Stars can also communicate like this, but it is somewhat vague as to what the rules are for who they can and cannot speak to. The books have also shown that any injuries sustained in The Place of No Stars is inflicted on the cat in the real world too, possibly to the extent where you can be killed in a dream.
* Cats is just a particularly bold and territorial stray who often steals food from human dwellings, "The Awefull Battle of the Pekes and the Pollicles" is just an exaggerated retelling of a fight between two clans of stray dogs, etc.
* Cats is nothing but I Am Songs (or rather, You Are Songs in most cases).
* Catskin, the main female character tries to make outrageous demands before she consents to the match but finally resorts to this.
* Cats love boxes. They love hiding in them. It's the best way to catch a cat. Set out a box and leave. Come back in five minutes. The cat will be in the box. No muss, no fuss. They'll do the same with paper bags if you can't find a box. Or laundry baskets, especially when there's laundry in them. Crockpots are also known to work. There's an
* Cats might rub their heads together with each other or their owners, partially because they have scent glands in various places on their heads. Thus, the cat is marking their territory (because they like you, bear in mind, which is why they do this many times in a row, usually
* Cat Smile, and bright orange hair colour. The only differences between them are their choice of clothing and the length of their hair.
* Cat Smile happens (mainly changing his eyes), which doesn't occur in any other media.
* Cats musical during the 80s, but as Broadway moved on to less flashy endeavors in the 1990s, the jokes about its niche premise and unusual costumes became more and more common. Eventually the only time it was referenced would be when it was to be poked fun at. In the 2010s however, with musicals becoming more popular in general, the show received new fans and ultimately ended up getting a revival and a movie (although the latter infamously bombed with critics and audiences).
* Cats never break their cool, even in those rare moments when you might be mistaken into believing that they appeared foolish.
* Cats often look similar or identical to their parents. Despite this, only really noticeable examples are pointed out in
* Cats: Olivia (Oggy's love interest), Monica (Oggy's twin sister), Oggy's mother and Oggy's unnamed female relative all have eyelashes, with Olivia wearing a bow, while Monica has a
* Cats; once a year the cats reunite to choose one among them to do so.
* Cats), or deliberately going Uncanny Valley to make a performer look like a corpse, puppet, etc., the creepy effect can be multiplied tenfold.

* Cats or downright incomplete visual effects such as Judi Dench's human hand being visible in one shot. This prompted the studio and the director to rerelease the film to correct some of these issues, an unprecedented move for a movie so soon after its initial release.
* Cat Soup features a clearly supernatural circus performer who dresses like a fantasy wizard rather than a stage magician, and his tricks include bloodily dismembering his assistant, spinning her pieces around in midair, and reassembling her unharmed.
* Cat Soup has one, featuring a woman getting dismembered and a giant bird that's swallowed clouds (that ends up causing a flood).
* Cat Soup: The Magician (who may or may not be God) was trying to eat the Earth.
* Cat's parents are implied to be this. Most likely because they're too busy taking care of Cat's mentally unstable older brother.
* "Catspaw": A landing party that includes Scott and Sulu is taken prisoner. Kirk assigns himself and Spock to the rescue party, which
* Catspaw", some of the crew are made into zombie-slaves by the witch-alien.
* Cat's people wiped themselves out fighting a war over what color the hats at Lister's hot dog stand were supposed to be. What's particularly sad is
* Cats play designs. For example, Rum Tug Tugger is leopard-print instead of a calico with mild leopard printing, while Grizabella is a dark-furred tabby instead of a long-furred grey.
* Cats's casting as Old Deuteronomy can be seen as a nice consolation after tearing her Achilles tendon during an audition as Grizabella for the original musical way back in 1981, which forced her to give up the role.
* Cats's work. Hell, many of the new fans weren't even born yet during the musical's heyday in the 80s/90s.
* Cats tends to exaggerate how much they love their respective drinks.
* "Cat Stevens". Before that, born Steven Georgiou. He used to prefer to be called Yusuf exclusively, but now he performs as Yusuf/Cat Stevens.
* Cat Stevens covered "Morning Has Broken" which had English lyrics added to it by Eleanor Farjeon from a much older song (see most modern hymnals).
* Cat Stevens' "Father and Son" is an argument between the titular characters (it's not clear whether the latter is a late adolescent or a young adult, though he's probably the second of these); the son is hell-bent on leaving home for some unstated reason (though paternal overprotectiveness is implied to be part of it), the father is equally determined to make him stay.
* Cat Stevens is partially in Latin and sets the gladiator oath to music:
* Cats That Look Like Hitler: A photo gallery of various cats who resemble Den Fuehrer.
* Cats: The bridge to the prologue song, "Jellicle Songs for Jellicle Cats", bombards the listener with a list of all the types of cats:
* Cats: The Cats don't really like Grizabella. Allegedly she used to be a rather snobbish diva, but we never really see that side of her onstage, so one must take their word on it.
* Cats. The changes to Rum Tum Tugger received so much backlash that the original version of the character was restored.
* Cat Street as a child actress and finding out how she wants to live her life from now onwards.
* Catstronauts, all the female cats in the series have the hair on the sides of their heads styled like a woman's hairdo.
* Catstronauts, Blanket is the tech expert of the team. He built Cat-Stro-Bot in book one.
* Catstronauts, the leader of the titular team is Captain Meowser, who seems to be the levelheaded.
* catsuit. In addition, while most other Borg have been seen to have had extreme modifications to their faces, the worst Seven gets out of it is a piece of tech permanently affixed around her left eye (although the series does leave it ambiguous as to whether her hair is real, given she was hairless as a Borg).
* Cats use a particular variant in which they will look into your eyes, blink

slowly, and then turn their gaze away (the theory is that this is a demonstration of being not-a-threat). This is a sign of affection/acceptance, and is a heck of a useful tool in establishing a friendly relationship with said cat.
* Cats Victoria is a silent role who dances a ballet number and must therefore be played by a very talented ballerina. During the performance, she is supposed to shake and look nervous, looking like an amateur, because Victoria is a very young cat at her first Jellicle Ball.
* Cats vs. Robots, cats are called "Four-Leggers" by robots, and humans are called "Two-Leggers" by both cats AND robots.
* Cats vs. Robots: The rulers of both the Great Feline Empire and the Great Robot Federation are both this. Chairman Meow of the former simply wishes to laze about on his throne of cat towers, while SLAYAR would prefer to admire himself from all angles with a whole bunch of mirrors.
* Cats vs Zombie Claire, Claire has an extra long sausage attached to her front so it resembles a large intestine. Naturally the cats (save for Chuchu) are more interested in the intestine sausage than Claire's zombie getup, with numerous attempts to snatch it off her. (Again, with Lulu and Dodo being the most successful.)
* Cats was to movies when it came to exploring the potential of merchandising: not just programs and soundtracks, but T-shirts, coffee mugs, etc.
* Cats went with a middle ground: it's a slower song than the 1998 version but it's still a duet by Mungojerrie and Rumpelteazer.
* Cats will often do this when play-fighting, often with one cat flicking its tail around and another swatting at it. Particularly common with kittens. And, much like dogs, they aren't above chasing their
* Cattails who must survive in a cat colony. The cats have anthropomorphic traits like a marriage system and an understanding of herbs, but they're largely cats.
* Cat Tales: At one point, Selina Kyle (Catwoman) recalls some of the various excuses her fellow Rogues have to leave town during January, which tend to qualify.
* Cat Tales. But most recently, one of its spin-off series has had Batman having to protect the makers of a close facsimile of the most recent Batman movie from the Joker, and as usual footage from the resulting fight ends up in the movie.
* Cat Tales: Clayface, Talia, Greg Brady, etc. Characters subjected to this have been known to reappear again, though, so it's hard to tell if something will stick.
* Cat Tales has been updating on a chapter-a-month-or-so schedule for nine years, resulting in 60 separate stories (with almost 350 chapters, combined) and multiple (thankfully much shorter) spin-off series. Although heavily influenced by both the comics and the DCAU, it has its own cast of recurring characters and complicated storylines that require any new reader to start at the beginning before you're able to understand later stories.
* Cat Tales has Jervis "Mad Hatter" Tetch trying to hide his criminal activities from his maternal Aunt Maud when she comes to visit for a month, to the extent where he's told her he's a former editor who switched to running a nightclub after being downsized.
* Cat Tales. He's manipulative enough to make them believe anything, most of which he's making up entirely.
* Cat Tales is talking to his (dead) father's portrait, in an attempt to resolve some issues:
* Cat Tales: Ivy inflicts this on Two-Face with a clay pot after he accidentally kills her pet flytrap Ivan.
* Cat Tales... meaning it's less funny and more disturbing. And Ivy hates it.
* Cat Tales (the Penguin's Iceberg Lounge), it's inevitable that they're all going to show up eventually.
* Catteni books; the protagonist explicitly compares it to the credit card trick.
* Catteni books. The similarities to the settlement of Australia are numerous and explicit.
* Catteni, is named after Botany Bay, the site of Britain's first penal colony in Australia.
* Catteni manages to sneak boatloads of the plant's pollen into the ventilation

system at a suspiciously fortunate gathering of 90% of the Eosi. The surviving Eosi were too few and scattered to retain their grip on their servant races.
* Catteni, the humans are referred to as "Terrans" by the alien Catteni, and sometimes by the humans themselves.
* Cattivik and mount their heads on a wall, and tries to do the same to Cattivik. Played for laughs by the end of the story, where Cattivik's head is seen mounted on the wall... but since the baron's butler accidently died during the hunt, he has hired Cattivik as the new butler and the trophy thing is part-time.
* Cattivik and not even locked, and he took it as well as you'd expect.
* Cattivik has this happen to him a couple of times, and both times gets savagely beaten for his trouble.
* Cattivik he'll usually do this to himself after being tore apart or destroyed. In a particular episode this happens twice to some mummies. In both cases, the results of their efforts were laughable to say the least.
* Cattivik. Later he's sent flying again and this time lands on something soft and hairy, revealed to be the back of a polar bear in the zoo.
* Cattivik, one episode satirizing the pharmaceutical system has a line of progressively older men waiting for the pharmacist to return to work, the first in line being a skeleton still clutching the receipt in his hand.
* Cattivik: Our anti-hero is chased by a stubborn carabiniere and the fast chase slowly declines to a walking pace, then to a agonizing crawl.
* Cattivik our anti-hero spends the whole story suffering the infernal and disgusting symptoms of a virus as soon as the medic on television mentions them. He eventually tries to stop them by swallowing a whole truck of medicines, but it backfires horribly as the virus had exhausted his life cycle anyway.
* Cattivik revolved around his attempt to mug a blind guy with a really dangerous stick.
* Cattivik stories, the eponymous thief ends up in the mansion of a senile British hunter, decorated with the preserved heads of fellow thieves. The old hunter promptly tries to add him to the collection.
* Cattivik when Superpip (a spoof of Super Man) dons in one to buy some porn in disguise, claiming that no one will recognize him. In the very same panel, a kid from the other side of the street asks his father "Why is Superpip wearing a trenchcoat?".
* Cattivik, with the main character stealing the steering wheel of a space shuttle (?) and causing it to crash on Mars.
* Cattle Baron's mooks repeatedly fail to intimidate farmers into leaving, coming back tarred and feathered every time. To the point where one of them doesn't even want to get cleaned up anymore since it's just going to happen again.
* Cattle Baron, which involve groups of border vigilantes (made up from ranchers, shopkeepers and such) focused on trying to bring down the murderous local drug cartels who are killing their friends and neighbors.
* Cattle Decapitation departed with Dave Astor over a case of this that was equal parts creative (they wanted to write more complex and death metal-based material, he wanted to stick to grindier fare; some of this may have been due to his stagnating technical ability and apparent refusal to take lessons) and personal (relations with him and the rest of the band, especially Travis Ryan, had deteriorated to the point where he had to go or the band would likely collapse). They still haven't reconciled with him, and given Ryan's notoriously strong dislike for him, it's highly unlikely that they ever will.
* Cattle Decapitation song and chances are that the lyrics will inevitably be some form of this trope. Travis Ryan really, really hates humanity.
* Cattle Drive: An old Western plot involving ranchers having to get cattle to market under dangerous conditions.
* Cattle egrets often follow large mammals around and snatch up insects and small vertebrates that are scared out of their hiding places by said mammals' footsteps. The egrets will often perch on top of the mammals' backs to use as lookout posts and launch pads for better hunting. While this increases the rate of success for the egrets, the mammals don't seem to be helped or harmed by the process (the birds

may occasionally eat parasites off their skin though).
* Cattle mutilation is one of the myths about aliens that Princess Voltuptua vehemently
* Cattle Punk, where the Divided States of America include the U.S., the Confederate States of America, Deseret, and a Tribal confederacy.
* Cattleya's appearance can be described as matronly but strong. When she's not fighting, she could be mistaken as slightly chubby due to her ginormous breasts and having a bit of a belly. In combat, however, her muscles tense and you can see that she actually has extremely muscular arms, back, and bulky thighs. Her outfit is an
* C.A.T. Trap: Someone gets put in a scanning machine and it freaks them out.
* Catty Cornered" also saw Sylvester use a dumb-waiter, to take Tweety with him as the cops were storming the digs Rocky and Mugsy were using as a hideaway.
* catty didn't follow. This is particularly confusing as these Chinese units of measurements are still in common use for foodstuff and precious metals..
* Catullus also features this theme, as does a fragment of poetry from Solon, the preeminent statesman and lawmaker of archaic Athens. Some of the Greek pederastic poems compare the beauty of women unfavourably with that of boys, and complain about women generally: the nagging, the makeup.
* Catullus records his journey from Rome to Anatolia to make sacrifices at his brother's grave. The description of how he feels at the tomb are heart-wrenching.
* Cat Up a Tree: The classic rescue situation involving a kitty cat stuck in a tree.
* CATverse sooner or later, and the kicker? They weren't doing this to somebody their own age or anywhere near their own size; Jonathan was still a little boy. Not surprising that he grew up to be a villain.
* "Cat vs Dog - Best Support Class". This completely ignored the fact that cats were domesticated to keep pests such as mice and rats from human territory and food stores, a role they performed very efficiently and still play in the modern age in some places.
* Cat Walk, the girl Emma dresses the kitten in baby clothes. When he grows up, he finds them too tight, so he runs away.
* Catweazle, a bumbling wizard, casts a spell in the 11th century to escape from invading Normans, jumps into a lake, and finds himself transported to the 20th century. He goes back in the last episode of series 1, but repeats the procedure in Series 2.
* Cat Who novels is 46 years old in the first novel, written and set in 1966. He's 50 years old in the last novel, written and set in 2007.
* Catwoman #16 (a tie-in comic to the animated series), which introduced Catman as a villain inspired by Catwoman. So much that he wears Catwoman's rather feminine-looking catsuit, which looks rather comical on a male figure.
* Catwoman (2004), a Ferris wheel mysteriously breaks down while the leads are on it, allowing Tom to shut down the motor and stop it, and Patience to save a little boy who falls out of a seat that somehow suffers a structural failure at the same time.
* Catwoman (2004) and a female audience as well. Unfortunately, fans were put off by the unnecessary changes made to the character and setting, along with the nonsensical story and laughably bad acting, and despite being targeted for a female audience, the movie couldn't even appeal to women, who were also put off by the sexualization of the character which felt more like it was aimed at men than its supposed female audience. In the end, the movie failed to find any audience and bombed at the box office.
* Catwoman (2004), and in the pictures of former "Catwomen", we see Michelle Pfeiffer's.
* Catwoman (2004)) has cosmetics that require constant use; otherwise, they damage the skin of the wearer in a horrific manner.
* Catwoman (2004) involves an anti-aging cream that causes skin to rot if the user stops using it.
* Catwoman (2004). It takes quite a while for the male lead to figure out that Patience is Catwoman. The first thing that tips him off is that they both have

similar handwriting - he gets both samples analysed and the expert says that it's obviously two very different people. For the record, Patience's mask really doesn't hide that much of her face.
* Catwoman (2004) movies for their respective franchises, both of which were massive financial successes.
* Catwoman (2004) movie, the title character breaks out of jail by slipping between the bars.
* Catwoman (2004), Patience has to crawl through a waste pipe and gets drowned by a massive jet of sewage. However, when she washes up on shore, she's only just got a bit of dirt on her face.
* Catwoman (2004) second costume was specifically cut so we could see her back move.
* Catwoman (2004) the heroine's best friend becomes ill enough to be hospitalized simply from using it regularly.
* Catwoman #23. The ring sometimes pits exotic animals against the dogs and this time were using an endangered leopard.
* Catwoman account of Selina's story in which she and Bruce were an Outlaw Couple.
* Catwoman and her partners make a plan to do this to Roulette, who had thought she'd done it successfully to Catwoman.
* Catwoman: As the culmination of a crime spree, Film Freak steals a nuclear warhead and attempts to detonate it in the middle of Gotham City.
* Catwoman: Both lampshaded and subverted in an issue where Catwoman notes that the deadly traps still functional after centuries would be normal in a movie, but in real life would need maintenance. She soon discovers the owner of the deathtraps is still alive.
* Catwoman briefly got a sidekick named Kitrina Falcone in the post-crisis continuity. She copies her mentor while adding hot pink and punk elements, and uses the names "Kitty Hawk" and "Catgirl".
* Catwoman can do this with her whip, either to swing from a high object or to immobilize an opponent.
* Catwoman can't seem to decide whether his theme is opposites or the number two. Maybe he should just flip for it.
* Catwoman, Catwoman had to navigate one of these in order to get into an ancient temple buried beneath the Sahara. She wondered why all of the traps were in such good working order after centuries of disuse, only to realise that her rival Hellhound had got there ahead of her and had repaired and reset all of the traps on his way in to slow her down.
* Catwoman. Chased and outnumbered by enemy agents, she got into an empty room. She broke the window with a chair, hide behind the desk, and think "Let's see how stupid they are". The gunmen appear, saw the broken window, and understood that she jumped there. Hidden behind the desk, she thought "Very stupid!"
* Catwoman comic, after Selina calls off her wedding to Batman, she does a girls night out with Lois Lane at the Fortress of Solitude where the two of them get drunk and turn the Superman robots there into male strippers and massagers.
* Catwoman comic book was made of this, especially when Jim Balent was doing the art.
* Catwoman even gets a chance to get even with "F. Miller" in a later story, with everyone you can think of helping out, including Wonder Woman, Black Canary, Oracle, and Batman. Not to mention Selina having a 'brainstorming' session with Joker, Two-Face, and a couple other Rogues.
* Catwoman falls into what Batman says is a bottomless pit, and he says that she probably went straight to the bottom. She re-appears again in the 2nd season episode "Hot Off the Griddle".
* Catwoman, forced cannibalism, that sorta thing. After all was said and done, Selena thought her friend Holly could use a break and took her on a road trip to the various DC locales. The resulting story arc is intentionally lighthearted so that the readers could have a break as well.
* Catwoman gives a particularly heartwrenching one to Bruce Wayne on
* Catwoman has nearly the same spectrum, from pure enemy to ally of convenience to

true love.
* Catwoman has the title character chloroforming a bartender in order to take the woman's place at a fancy party. The real bartender soon wakes up and manages to make enough noise that she is discovered tied up and gagged in a closet, blowing Catwoman's cover.
* Catwoman in her 1990s series. She was also shown to be able to cut a man's clothing off with her whip without leaving a scratch on him.
* Catwoman. In order to not lose the contract's payment, Catwoman wrote a script herself and signed as the dead filmmaker. The movie made with her script became a blockbuster.
* Catwoman, in several interpretations, has a feline-specific version. From the tiniest kitten to the largest tiger, there's something about her that they all instinctively trust.
* Catwoman insulated, and it's light enough to swim in, but it buys Catwoman enough time to escape before she returns to the surface unharmed.
* Catwoman in which she admits that Batman's first love will always be fighting crime.
* Catwoman is pretty much the one person in Batman's rogues gallery who has never wanted to play games or complex schemes as she's simply a thief. It was best summed up in a storyline set on Earth-2 where Batman recruits Catwoman to help him against the Scarecrow. They find themselves playing a complex game as Scarecrow wants to break Batman down before killing him with various clues left to find him.
* Catwoman is rough and wild, to where Selina compares it to a bar fight.
* Catwoman issue. When Selina and Sylvia were teenagers working the streets together as prostitutes, Sylvia took Selina's place during their first time so Selina wouldn't have to go through with it. Selina didn't know how to handle Sylvia after the incident or attempt to comfort her, causing Sylvia to develop a deep hatred of Selina because she felt Selina abandoned her. Sylvia's hatred of her was unknown to Selina, who still trusted her and considered Sylvia her closest childhood friend. This allowed Sylvia to betray Selina in the worst way possible.
* Catwoman is usually this, although she is inherently a good person, which is why Batman doesn't go nearly as hard on her as he does other criminals.
* Catwoman? No? Good, because DC would prefer you forget that ever happened.
* Catwoman now has black hair, much like her mainstream comic-book counterpart, instead of
* Catwoman of her whip, making him bleed, but that's not really a lashing.
* Catwoman once fought a foe called Wooden Nickel whose "power" (using the term incredibly loosely) was that he possessed a wooden arm with multiple functions.
* Catwoman. Originally, from the Golden Age to decades after, until the catsuits/spysuits became the permanent costume, her traditional outfit was a purple dress.
* Catwoman other extenuating circumstances in favor of letting her go.
* Catwoman poses as a stripper in order to get close to Rough Cut in
* Catwoman). Selina is rendered briefly comatose after being frozen by an ice gun stolen from Mr. Freeze. The Riddler (whom she brought along to help piece together the mystery of her parentage) watched her the whole 3 days she was unconscious, which Selina initially thought was very kind of him, until he adds, "Of course, getting you out of the outfit was hardly unpleasant."
* Catwoman series, and drawn by Jim Balent, who also drew several other Bad Girl Comics.
* Catwoman, she is considered the best fighter outside the Bat-Family.
* Catwoman. Some incarnations of Catwoman are the illegitimate daughter of Gotham-based mafia don Carmine Falcone and his mistress. She grows up with no knowledge of her parentage since Falcone cut ties with her mother before she was born, condemning them to live in poverty. Catwoman, even at her worse, has stronger morals than the most honorable version of her possible father.
* Catwoman's suit receives a pretty hefty helping of this by the end of
* Catwoman's when she goes up against Batman. The final issue (#82) of one of her series is just one example.

* Catwoman, the Penguin puts out a $1 million contract on Selina's head. This attracts a large number of Gotham's costumed criminals out of the woodwork to take a shot at her.
* Catwoman). The story ends with an enraged Harley killing the execs and storming out of the room.
* Catwoman they're just there to justify extra budget allocations and the contractors weren't concerned with their use and upkeep.
* Catwoman villainess who's not above killing when she has to. Like Ivy, she too proves attractive for the Dark Knight, sufficiently so that someone seeking to break Batman hired an actress to dress up as Catwoman and seduce him.
* Catwoman villain Film Freak once set this up to happen, in a deliberate homage to the trope, carefully positioning himself to be standing in the window. The policemen who were trying to arrest him at the time were not so lucky.
* Catwoman: When in Rome. Catwoman gets frozen by Mr. Freeze's SubZero gun and later freed from the block of ice. Selina isn't hurt, but she sleeps for days afterwards.
* Catwoman: When in Rome, DC anti-heroine Selina Kyle is forced to jump out the window completely naked when her hotel room is bombed and survives by landing in the pool in broad daylight, with the Riddler and Italian hitman known as the Blonde landing in the pool with her. The naked and very wet Selina manages to stay in control despite her sexual humiliation being played for laughs.
* Catwoman: When in Rome open from bottom to top," but is unable to carry out her threat.
* Catwoman. When the fact that Goths aren't exactly hip anymore is raised, Catwoman snarks that "time moves slower in Arkham".
* Catwoman with a note telling them how crappy their security was. They proceeded to upgrade the security... Then she stole it again, then returned it again, then stole it again, repeating the process at least a dozen times over the issue, even as the curator kept putting heavier security on the place. (Maybe she wanted to prove how good she was, or she simply had too much free time.) Eventually, the curator was considering letting her keep it - figuring he'd get more from insurance than the cost of protecting it - but she thought this was getting boring, and returned it to him in person, told him that his museum sucked, but left saying she'd keep an eye on the place. (As in, to keep him on edge.)
* Cat-Women of the Moon allows each member of the crew of Earth's first rocket to the Moon to make a brief radio broadcast. One of them praises the engine lubricant they used, then reveals to the others that he took a kickback from the company that produces it to make the plug.
* Cat-Women of the Moon's navigational skills. (As it turns out, she's being mind-controlled by the evil cat-women.)
* Caucasian (black-skined). "Light" or "fair" too usually mean "blonde" rather than "white" in Russian.
* Caught by Arrogance: One's own ego makes them unintentionally confess to their crime.
* Caught Coming Home Late: A character stays up at night to catch a rebellious teenager who has snuck out, or a significant other who's getting in a little too late.
* caught fire during a ride. Fortunately, he and Hobbes were able to extinguish it because the pond hadn't frozen yet.
* caught fire once car in several countries, including the country he races for). Max couldn't finish that first race because of a blown engine (so through no fault of his own), but the cameras caught Jos' visible disgust.
* Caught in a Snare: A trap manages to capture someone and leave them hanging in the air.
* Caught in a Snare: Exactly what it looks like — the hero or someone else gets caught in a tree snare or other boobytrap.
* Caught in a Snare. Pandora goes along with this because she needs his services and bribing him with sex seems an effective way as any to secure them.
* Caught in bed with a girl snuggled up to him, both of them asleep (the girl

slipped into his bed
* Caught In The Act for him) that he is not dating her. Apparently heartbroken by the news, she attempts to take hers and Ethan's lives.
* Caught in the Bad Part of Town: A character finds themselves in an unfamiliar and run down (and often dangerous) neighborhood.
* Caught in the Bad Part of Town: A town that has a dangerous part where outsiders aren't welcome, and a character accidentally winds up there.
* Caught in the Rain get caught in the rain, leading to them having sex or kissing while sheltering.
* Caught in the Rain. He responds and arranges a date because he's into it as well. Turns out, it's his current partner. The both seemed to be bored by their relationship, but the song ends on an upbeat note, suggesting they will probably rekindle their relationship and explore their newly-found mutual romantic interests.
* Caught in the Rain moment where a couple seek shelter from the rain and they get intimate with each other as a result.
* Caught in the Ripple: An installment of a work begins with something having radically changed and no-one noticing.
* Caught Monologuing: The opponent on the receiving end of the speech utilizes this as a distraction.
* caught on live television just before the nominee camera shots were pulled away. Faith Hill and her management insisted the act was a joke, but left many unconvinced. Her career nosedived not long after.
* Caught on Tape because of him. That group includes a player that is frequently loading videos of in-game events on her blog.
* caught on video, an annoying tourist demonstrated exactly why you don't mess with the Queen's Guard: He stupidly grabs the guard by the shoulder, only to find himself immediately at the business end of a SA80 rifle with mounted bayonet in the hands of a very angry trained soldier yelling in his face. A spokesperson for the Ministry of Defence said that the guard had an entirely appropriate reaction.
* Caught Red Handed involves this trope as its main theme. The show consists of re-enactments of shoplifting crimes where it shows the daily life of Loss Prevention Agents capturing shoplifters, in which most times the shoplifters give the most ridiculous excuses in the show. Notable mentions are:
* Caught Running, a gay romance novel, has this — only this time, it's ten years after high school; the gay guy is a biology teacher, and the popular jock is the baseball coach. Given that it's a romance novel, it ends happily.
* Caught shoving a girl down onto a table while grabbing one of her breasts and shouting "Now give it up!" (No, seriously, it really
* Caught the Heart on His Sleeve moment where one partner grabs the other partner's arm/sleeve.
* Caught the Heart on His Sleeve: The love interests are alone and it's incredibly awkward, so one of them starts to walk away—but then the other reaches out and grabs their sleeve.
* Caught up in the middle of their feud while in Interstate Championship Wrestling, The Diva got this in 2002 from Lexie Fyfe in regards to messing up her chance to eliminate
* Caught Up in the Rapture age limit of 100 set up for nonbelievers. During that time period, the "naturals" age very slowly, so that those who are around 100 years old are like teenagers and young adults.
* Caught Up in the Rapture and arrives in Heaven naked. An angel immediately demands he get dressed, unable to stand seeing a fat guy naked.
* Caught Up in the Rapture — has nothing to do with Anita Baker's song, which is a traditional love song.
* Caught with a girl attached to him like a barnacle while both of them are naked (she snuck after him into the
* Caught with Their Pants Down), as he pulls up his pants he bumps his head on Jessica's bosom.
* Caught with Your Pants Down: Masturbation is interrupted by another character's

entrance.
* Caught with Your Pants Down: Someone gets caught while they're masturbating.
* Caught with Your Pants Down: Someone pulls their pants down to masturbate and is caught with them down.
* C. Auguste Dupin and his player character friend are basically this in the
* C. Auguste Dupin in three stories prior to 1845, the very first "detective" stories.
* C. Auguste Dupin series, is sometimes this trope depending on his age. Games where he is older downplay it, but games that show him as a younger man will invariably outfit him in a stylish 19th-century suit, complete with waistcoat, pocket watch, walking stick, and top hat.
* C. Auguste Dupin series. They are definitely each other's closest friend and confidant as well as crime-solving partner, but whether it's more than that is still unclear.
* Cauldron and the world's greatest heroes feel the same about their crimes against humanity.
* Cauldron has made Brockton Bay the focus on an experiment on the viability of transitioning a modern city into a parahuman-ruled feudal state.
* Cauldron is this for a large part of the story. Long before they directly come into the picture, they indirectly aid and abet a lot of the antagonists.
* Cauldron of Ghosts — not illegal, but weird enough that a guard would assume that's the reason for the concealment.
* Caulerpa and let the native life recolonize the resulting aquatic desert.
* Caulerpa taxifolia, a type of seaweed running rampant in the Mediterranean Sea. The aquarium strain that went invasive thrives in polluted waters where other marine plants can't compete with it and is thus able to quickly dominate ports, tourist beaches and other human-influenced areas, it's inedible to most animals, and any small fragment is capable of taking root and growing into a new plant — in practice, this means that any anchor or ship's hull with a few leaves stuck to it can spread the plant and seed a new, full-scale infestation elsewhere. The one upside is that it filters out pollutants to feed on them, meaning that large patches of this stuff are capable of noticeably cleaning the water they grow in.
* Caulfield. He uses the dots to write out music notes (or Braille, or UPC codes), and later recreates the Mona Lisa.
* Caul Shivers got his name because in his early days as a warrior, he got up during the night to urinate and fell into an icy stream. He later jokes/claims that the name was given becaue
* Causality is protected in the OA universe - if you try to build a wormhole system that can form a closed timelike curve (i.e. allow time travel) the wormholes undergo something called Visser collapse. Given that this destroys both mouths of the wormhole and, from a distance, could be mistaken for a small supernova, you do not want to be within a couple of lightyears of a wormhole if this happens.
* "Cause and Effect" also reused as little footage as possible during the loops; each iteration had to be shot slightly differently, in order to make it more visually interesting. A lot of shows would later reuse shots where possible
* "Cause and Effect" has another instance. The episode takes place inside a
* Cause and Effect," when the crew realizes that they're caughtin a time loop that ends in their destruction.
* cause by explaining all the reasons why it should be impossible for them to move.
* Caused a bit of a problem when C.J. meets a man who is described in-universe as being very handsome. When she meets him she sees that he is, but the actor,
* caused a war that led to the death of Ace, Oars Jr., and who knows how many others, killing Whitebeard directly and unleashed who knows how many of the world's worst criminals on an unsuspecting world.
* caused by AJ) left him not only with no memory of her, but treating her like dirt.
* caused by a meta-human from the distant future in an attempt to find a way back. Oh, and aliens then go ahead and invade Earth-1 anyway.

* caused by coincidences even with all of the evidence that says so and storm off Grissom's office swearing they will keep seeking the answers by themselves while Gil is distraught.
* caused by King Candy rearranging the game's code to make himself the main character instead of her.
* caused by those fatal conditions. At the end of the series he's over 500 years old and counting, with no plans to stop any time soon.
* caused havoc, ripping up trees and buildings, sending them hurtling skyward.
* caused her mother to lose her Magical Girl powers, which left her and her parents vulnerable to the attack that killed them to begin with.
* Caused the Big Bang: There's a lot more to the story of how the universe began than we know of.
* caused the CEO of a billion dollar oil company to resign. Unable to prove his innocence, Joe instead embraces the notoriety and starts a company producing anti-virus software based on the premise that the person who can develop a computer virus is the one best suited in developing software that can protect you from it. Investors agree and Joe gets millions in startup capital.
* caused the Witch's garden to be destroyed, listing off Dragons, Giants, and Manticores. The Witch disdainfully comments that Manticores aren't real.
* caused, through sheer force of will, when a social worker threatened to take away his father's guns. Naturally, the social worker backed down.
* cause for renewed enthusiasm on the part of his army, which proceeded to utterly wipe them out.
* cause it. Testing the myth the way it supposedly happened would've taken years. The radio was just there to show proof of concept.
* cause it to explode within minutes. Goku was quick to call him out on this. However, Frieza's race can survive in the vacuum of space, so this was a bit more reasonable than it seemed at first.
* Cause of Death: The gated community's conceit of being a haven from all things nasty takes a beating in the Domestic Disturbance dyad. Even apart from the psycho killer who just got activated, Natara discovers that just about every adult in the walls is cheating on their spouses. The sole exceptions that she noticed? The two swingers.
* Cause of Death who is dressed infinitely better than the man he's fighting. But the shirt itself is incredibly large on the killer.
* Causes a massive relationship crisis between Rainbow Dash and Brownie
* Causes a problem for Thugboy when he is sharing a bed with Ninjette in
* causes technology to fail, because any car made after the Sixties will die on him, and he can cause computers and closed-circuit TV cameras to short just by thinking at them.
* causes the target to start laughing so hard they can't fight. but if that's the case, you'd think the spell wouldn't work at all on them.
* causes the target to take a possibly truthful statement as being a blatant lie.
* causes Willow to eventually realize she's bisexual. While initially, she was very put off by the idea of doing anything romantic or sexual with another girl, Willow does develop an attraction to Xendra. She's just horribly conflicted due to her overbearing mother not approving. She eventually gets over this and has no problem being involved with either form.
* 'cause that's how we roll always was one of the more intensely political fantasy/sci-fi universes.
* cause the death of Renly Baratheon works better than extracting a non-lethal amount via leech.
* 'Cause then you would have asked me "Why 72?"." The upshot of all this is that Feynman later wrote a letter to the draft board protesting his failed psych-eval, on the grounds that he was insane enough not to want to take advantage of it. See below.
* Causeway Classic: College football rivalry between Sacramento State and UC Davis, public schools separated by about 11 miles/18 km. The "Causeway" in question is the Yolo Causeway, which carries Interstate 80 over a flood bypass that had once

been a seasonal barrier to transportation between the two cities.
* Causimomancy: Making predictions based on observing how items burn (or don't burn) when placed in a fire.
* Causing bathos is a favorite of many wrestling fanbases, especially
* causing damage to internal components it had to battle with incomplete repairs.
* Causing great confusion because while the cards (and the game rules) clearly said 'revolver', in most sets the actual playing piece was very clearly a semiautomatic pistol. Some had what looked more like a pepper-box, aka a pepper-box revolver, in which the whole multi-barrel assembly rotates.
* causing his clothes to explode and making everyone go "WTF?!". After one or two attacks, he clothes himself in massive battle armor.
* causing Jeremy and Hector to mutter "Tools" at each other and dissolve into barely contained giggles. The guide goes on to explain to the class how "Some tools are very large... some are nearly microscopic", then asks them "Can you think of a tool you have in your pocket right now? What tool do you use every day?" It's a wonder they kept straight faces for as long as they did.
* causing the girl, who was actually a ghost, to create more disturbances around the house so the alive tenants would exorcise her, the house was no longer frightening.
* causing them to turn into their Halloween costumes, including Hans Moleman, who turns into a mole despite not wearing a costume.
* causing the very coup they were worried about, resulting in their being ousted and replaced by Mnangagwa.
* causing this trope with even more complicated language (with such gems as "Greetings and felicitations." ["Hello."] and "Attention! Our quarry is on the approach! I believe it would behoove us to seclude ourselves posthaste!" ["Hey! Here they come! Hide!"]); he's only confused here because normally people don't come out of the Imagination Station.
* causing trouble for the woman who lives there. Geralt has the option of revealing Sarah to the owner, and if he does the two become best friends.
* Caustic Critic: Anything I review tends to suck, that includes whatever you make, you pathetic creators!
* Caustic Critic reviews, a deli owner gets uncomfortable with the blood thirst of the others, and asks if they're chefs or murderers.
* Caustic Critics, the Farm Supplies Critic mentions his favorite recent quip in a review of a tractor:
* Caustic Critic: The critic who has a tendency to give negative reviews.
* Caustic Critic web media. Nathan Alexander once ran a website and a forum (originally a guestbook) that was for highlighting the worst in the advertising world.
* "Cautionary Tale" has an alien over ten thousand years old on a fruitless search for immortality.
* cautionary tale his static line ("He jumped into the icy blast, his static line unhooked"). A static line is a cord on a military parachute that attaches to a cable inside the plane. When the trooper jumps out of the plane the static line deploys his parachute for him, just in case he should happen to freeze up or pass out from the fall, or if he jumps from very low altitude. The song is a warning for paratroopers (and by extension soldiers in general): ALWAYS remember to check ALL your equipment.
* cautionary tales drowns kids who play too close to the water's edge, is usually described as a green-skinned monster.
* Cavalcade of Boys to a series of young hotties. The main character, Tighe, sometimes behaves in even more morally questionable ways, but since he is young and hot, not only does he get away with it, but he also even gets to pass moral judgment on other characters.
* Cavalcade of Cartoon Comedy: Princess Peach when Mario asks her if he can have a kiss after he rescues her.
* Cavalese cable car disaster of 1998, where an American EA-6B Prowler three very stupid Marines were joyriding in accidentally flew into a cable car's suspension

cable. The multiple-inch-thick steel cable was severed, dropping the car and killing all passengers, whereas the plane, while damaged, made it home. Not unsurprisingly, the USMC shortly thereafter removed most of them from its ranks via dishonorable discharge and denied their pensions. The single Marine acquitted of the charges due to this incident remains a sore point between Italy and the US to this day.
* Cavalier Mustang, which featured a turboprop engine and was marketed as Counter-Insurgency (COIN) attack plane. The Piper Enforcers were so heavily redesigned and rebuilt, that they only shared about 10% of their parts with the original Mustangs which they were originally built as.
* Cavallera rusticana, which is about a young, knocked-up village girl, probably about 15-16. Since it requires performers who can sing over an orchestra, this trope doesn't have many opera exceptions, folks.
* Cavalleria Rusticana, and they married sometime after, and often performed and recorded together.
* Cavalry Betrayal a nasty cough... until he started using it himself). Since then, the Horde have banned using it... a ban the Forsaken don't seem to take that seriously at all. The "weaker" Blights they use are still horrifying and have rendered Southshore uninhabitable by anything except sentient slimes for years to come. Less of a nuke stand-in, and more of a stand-in for mustard gas. You have to stand in it for a few minutes before it kills you, and a gas mask can protect you from it.
* Cavalry Betrayal has arrived! Wait...why are they shooting us instead of helping us?!
* Cavalry Betrayal is betrayed by those he thought were coming to his rescue.
* Cavalry Betrayal that you've been praying for isn't really on your side.
* Cavalry Betrayal, when Horus put the loyalist elements of four of the Legions that supported his rebellion on the front lines of the assault on Istvaan III and then bombed the planet from orbit.
* Cavalry Betrayal: Where apparent rescuers turn out to be actually siding with the villain.
* Cavalry? Charging mob? Some giant monster? Just take a steady grab of few pikes or other polearms.
* cavalry division being saved by infantry of the Army of the Potomac's I Corps, while delaying Lee's advance on the first day of the Battle of Gettysburg.
* Cavalry is a hill outside Jerusalem (also known as "Golgotha"), on which Jesus is supposed to have been crucified.
* Cavalry of the Dead: Summoning an army of undead soldiers to fight a mutual enemy.
* Cavalry of the Dead: Summoning undead soldiers to fight a common enemy.
* Cavalry Refusal: Where potential rescuers refuse to help the heroes.
* Cavalry Refusal: Your supposed rescue party isn't interested in saving you.
* "cavebabes" (specifically the raven-haired ones) are tied up this way.
* Cave Behind the Falls: A cave whose entrance is hidden by a waterfall.
* Cave Carson headlined issues #48-49 (January-March, 1964) and #52 (October, 1964). The character was a spelunker and
* Cave Dwellers has hero Ator breaking out a modern-day hanglider to invade a castle.
* Cave Dwellers start this sequence (seriously, he begins the "This is what we'll do" speech before he even gets off his horse)... only to get pissed off on realizing the villagers aren't playing along. Turns out they're not on his side.
* Cave Dwellers, whatever plot there is revolves around an advanced device that looks like a crystal rock but is really some kind of early nuclear weapon.
* Cave Dwellers when the elder steps away as if lost in thought but is accidentally looking straight at the camera:
* Cave Dwellers where the female lead, despite being handy with a sword, suddenly forgets all her combat training and just shrieks as Ator fights a giant snake.
* Cave fall under this, often retitled as "[original game name] [color] Label."
* Cave film where three ex-military friends explore a freezing uncharted cave

together and the hostile environment brings their interpersonal difficulties to the forefront.
* Cave fisher blood contains enough alcohol to be flammable, giving the creatures a weakness to fire damage once they're injured enough to bleed noticeably. The creatures have an intense fear of fire as a result, which is used by some trainers to keep them in line.
* Cave Johnson exemplifies this trope. He seems to be running Aperture Science with no real consideration for the long-term effects of his actions, which ultimately
* Cave Johnson's assistant was originally going to be male and named Greg. However, since the part was so small, Valve didn't want to pay another voice actor so they changed the name to Caroline and had
* Cave Johnson's prerecorded advice on what to do if you get covered in Repulsion Gel is to
* Cave Johnson that the old Enrichment Spheres are made of asbestos, to keep the rats down. So, you should "Let us know if you feel a shortness of breath, a persistent dry cough, or your heart stopping."
* Cave Johnson wanted to upload himself into Aperture Science's central computer system to stave off his death.
* Cave King. They believe being his thralls is the proper way to repay him for saving their lives, keeping them from fighting each other over centuries-old ancient grudges, and gaining the benefits of his [Cave King] crest that greatly enhances their lives. The fact that Heal acts like a benevolent king and not a cruel overseer helps immensely.
* Caveman2Cosmos, eventually ends up with very sci-fi future technology, including time travel. One of the best recruitment policies that can be set up is about plucking from throughout time and space specimens, warriors and soldiers who would otherwise die in combat, uplift them to current technological level and use them for your army. Each unit constructed under this policy starts with absolutely ludicrous amount of experience, allowing it to instantly pick a dozen or so upgrades, regardless of any other factors.
* Caveman. The opening titles note the film takes place "One Zillion BC, October 9th" - Lennon's birthday (the date, not the year).
* Caveman Ugh-lympics came with a very funny one-sheet newspaper, 'The Ugh-zaminer'.
* Caveman Ugh-Lympics. If you play as Vincent, don't expect to win: he's a nerdy Cro-magnon whose strengths include mastery of several numbers (including nine) and getting beaten up by the other competitors.
* Caveman Ugh-Lympics, you can defeat your opponent in the Clubbing event one of two ways: beating them senseless, or pushing them toward the cliff edge. Hitting the opponent with repeated low strikes causes them to grab their foot and hop backwards a few steps. If they get pushed all the way back, the cliff edge breaks off, and they fall down.
* Caveman Warriors: Jack, the big green male caveman, has a beard. He'll also let nothing stop him from getting the kids back from the alien.
* Cavemen, a baby who talked like a 40 year old in ads for freeinternet.com (now defunct) and later Quiznos.
* Cavemen Cavemen advertisements. Needless to say, it didn't translate well to the sitcom format and not only failed critically, but was marred by the 2007 writers' strike and failed to last a full season.
* Cave Mouth: When a cave's mouth looks like an actual mouth, usually that of a monster.
* Cavendish and Dakota also appear in the background of just about every episode, even before they became important.
* Cavendish and Dakota themselves possibly fit this trope, since Cavendish sports a grey moustache and acts more grown-up than his (generally) silly partner.
* Cavendish. In fact, Hakuba is the one who went out to sea to become the pirate named Cavendish.
* CAVE of Live Wire, the team in charge of the CAVE ports for Switch; it's still

something, but will certainly not spread very well to those not already familiar with CAVE.
* "Cave of Temptation" shows a cracked, rather yonic rock formation around the entrance to a pitch-black cave.
* Cavern of the Ancients both feature new mechanics and follow the main game's structure.
* Caverns of the Snow Witch: you can recover a spear from a hidden weapon stash, which you can use as a javelin to fight a Yeti later on.
* Caves and Critters: In chapter 8 a druid gladiator fights a magically augmented beast in the arena. And for the finisher transforms into a giant bear-like creature.
* Caves of Ice, some Necrons save his butt again by fending off the Ork attack long enough for them to evacuate, but not before Cain sets the whole facility to explode.
* Caves of Ice, where Cain's expedition into the eponymous caves goes from a full squad of Guardsmen, to half a squad, to three, and then down to only two. (Admittedly, he sent the other half of the squad back himself, but only because they were walking wounded.)
* Caves of Qud you will contract a disease which makes simple things such as eating and drinking cause you to bleed profusely, until your tongue falls out. During your time infected with the disease, and in the aftermath of being tongueless you will be unable to speak, and trading will be nigh impossible. If you have regeneration, your tongue will grow back, and immediately start to rot and bleed again. If you have hemophilia, you will die trying to eat without at a minimum, 5 bandages to stop the bleeding. If you have mutations both, the game is Unwinnable if you cannot make the cure, which it is possible for it to be impossible to make, by requiring that you make a mixture that requires more parts of one ingredient than is possible to mix in game! Suddenly, it has become a survival game where there are no options to survive.
* Cave Spiders are smaller, blue versions of the regular Spider enemy.
* Cave Story, a character makes a bomb out of charcoal, "jellyfish juice" and gum base.
* Cave Story, a fully-powered-up machine gun has enough recoil to enable you to fly by pointing it downward or crash down by pointing upwards, but there's no recoil in left or right.
* Cave Story: All the cats are enemies; one boss, a machine called Monster X, is revealed to be a cat upon defeat. There are NPC dogs in the game that are your allies.
* Cave Story and a hidden pair of women's panties without so much as an "Innuendo" flag from the ESRB.
* Cave Story, and the Basic Weapons challenge, which forces you to only use the three weapons you can't avoid getting throughout the entire game. Completing the last level is in itself an achievement, but finishing it with Minimum Health and Basic Weapons is almost impossible and very much luck-oriented — there is a section where blocks start falling from the ceiling and their locations are completely random. Doing this challenge has been known to test players' sanity.
* Cave Story are a group of peaceful and friendly rabbit-like creatures...unless you feed them Red Flowers, which turns them into mindless rampaging beasts. They're fully aware of this, which is why they don't grow red flowers in their village.
* Cave Story as a last resort to thwart an invasion. It's so secret they no longer know it.
* Cave Story (Bat could fly around some objects via the foreground and background, but not other objects).
* Cave Story can be completed with only 3 weapons and 3 HP. This means that damn near everything one-hit kills you, and you don't have much to use in killing them back.
* Cave Story, choosing to avoid speaking to an injured old man A) determines whether or not his injuries are fatal (they are only fatal if you talk to him) and also B) determines whether or not there is a vitally important rope among the junk

on the floor of a room entered later, which appears to have been sealed for many years. (The rope is only there if you didn't talk to the old man.)
* Cave Story, early in the plot a locked door provides an obstacle, and a friendly nearby robot is willing to create explosives (out of chewing gum) to break it open. This ignores the fact that the main character is equipped with a missile launcher.
* Cave Story fans wish to have answers to. Yet all Pixel-san says is "I leave it to the player's imagination".
* Cave Story flying off into the sunset, resolved to find someplace with a beautiful view to live the rest of their days.
* Cave Story has a few moments where you walk into an empty room - HUZZAH! Balrog drops in from the ceiling.
* Cave Story has a nice variety of enemy types, but recolors the critters (those beanbag-looking hopping things) and bats in several different caves.
* Cave Story has an inversion with the Demon Crown — the Demon Crown contains part of Ballos's soul, but rather than having to destroy the Crown to defeat Ballos, you have to defeat Ballos to prevent the Crown from reforming.
* Cave Story has G-CLONE, fightable in the removed Wind Fortress that was restored in the Steam and 3DS eShop versions as a bonus area.
* Cave Story has hopping sandcroc skulls, sandcroc skulls with feet, sandcroc skulls carried by birds, and full sandcroc skeletons.
* Cave Story have Curly Mode, which lets you play through the game as the main character's partner, Curly.
* Cave Story). He entreats you, however, not to tell anyone he did it.
* Cave Story initially got a remake with polygon character models and stages replacing the sprites of the original released for retail. Later it also received a digital download only version that was the same as a previously released Steam version with the 3D depth effect added for the backgrounds with previous sprites.
* Cave Story is a 2D game, it probably has something to do with the fact that the protagonist can't actually point his missile launcher at the door.
* Cave Story is a solid game in any context and did well critically, but its biggest claim to fame is that everything in the original version, from the game engine to the levels, graphics, animations, music, story, weapons, enemies, physics, etc, was all made by one person in his spare time. Taking into account the size, quality, and initial release date of the game, this was highly notable.
* Cave Story is set across several caves which are interconnected with teleporters. Somewhat unfortunately, they need to be connected manually, something the characters thankfully manage.
* Cave Story—fans insisted that his hat still said "Curly Brace" in the finished game. Daisuke Amaya eventually gave his blessing to that particular theory.
* Cave Story, Misery turns Balrog into a giant frog for a boss battle.
* Cave Story: Occurs in the normal ending to the game, where the player and a companion are both caught by a small flying dragon.
* Cave Story occurs only once when you pass it for the first time, so you don't have to hear the same thing every time you die.
* Cave Story of "Huzzah!" was changed to a Kool-Aid-Man-style "OH YEAH!" in the re-translation of the console and handheld versions. Later in the game, he tends to make his entrances by crashing through ceilings.
* Cave Story PSP port by Variant Interactive was just wishful thinking, as the company soon folded and never got Studio Pixel's official permission.
* Cave Story Quote and Curly Brace are named for punctuation commonly used in coding (the " and } symbols, respectively). According to the end credits, the four Mimigas that Curly adopted went by the last name Colon.
* Cave Story, resulting in downloads of said ports as well as their source code and forks being taken down from Github and throwing a wrench in the game's modding scene and improving compatibility of the freeware version.
* Cave Story returned to their human form. Unfortunately, their ill-timed sneezes turn them back into Mimiga shapes.
* Cave Story's Air Tank generates a bubble shield that protects her from A)

drowning and B) your Missile Launcher.
* Cave Story's "Closure". After recording it, he wasn't happy with how his vocals turned out, so he manipulated them electronically and mixed them real low in the final version, so they wouldn't sound as bad.
* Cave Story sports a scar across her nose of the 'cute and warlike at the same time' variety.
* Cave Story sure that you want to eat him, and tries to trick you into leaving him alone, before finally attacking you.
* Cave Story that even the game's fans admit are very floaty, and tiresome fetch quests. Things pick up when you get to the Sand Zone, where "fetch quest" means "go explore this big open level with varied interesting enemies at your own pace". By the time you reach the Labyrinth, you're done with the fetch quests, you have some excellent weapons, and you're finally starting to get a bearing on the plot.
* Cave Story that falls into otherwise solid sand in which they can seemingly swim.
* Cave Story: The bad one, where everyone but you and one other character dies, the good one, where you stop the villain but many main characters still die, and the best one, where only a few main characters die and the cycle of evil is permanently stopped.
* Cave Story, the boss Ballos states that when his magic went wild and he killed everyone in the kingdom, he could only stand where he was and laugh.
* Cave Story, the character's sprite is replaced with a zombified version—with red eyes and a blue outfit.
* Cave Story, the main character working under a boss who speaks an incomprehensible language, is at least partially thinly-veiled resentment towards Nicalis.
* Cave Story the protagonist is attacked by Curly Brace before he has time to explain to her that he's not after the Mimigas.
* Cave Story. The ultimate irony is that Misery, who is enthralled by the Crown's curse, was the one who had it made in the first place, most likely in a bid for power.
* Cave Story) they don't act any different than their human neighbors. (And at least two of them are humans who were magically transformed.)
* Cave Story to try and destroy everything on the island. The characters' reactions to the prospect of another war like it tells the player all they need to know.
* Cave Story, using the mushroom to restore Curly's memory apparently involves jamming it into her mouth.
* Cave Story Versus I M Meen, the story implies that he was probably about the same age back then as well.
* Cave Story, where the protagonist and his female counterpart Curly Brace are almost never seen in particularly romantic situations, but it's still clear that they care about each other in some way.
* Cave Story, which gets stronger the longer you hold down the button before releasing.
* Cave Story will utter this phrase when you keep him in your inventory.
* Cavetown, English indie pop singer-songwriter, has identified as being on the asexual spectrum and had at least one boyfriend. He also came out as transgender in 2020 (though he transitioned prior to becoming famous).
* Cavewoman and flying creatures steal her uniform. Her attempts to shoot down the creature with her uniform results in her accidentally vaporizing it.
* Cavewoman... from which Klyde woke up while being prepped for dissection.
* Cavewoman, Gramps more-or-less exiles himself and his granddaughter Meriem in the prehistoric past. The entire town of Marshville is later accidentally transported into the past.
* Cavewoman, Meriem is attacked by a zombie cyborg guard who has a chainsaw for an arm.
* Cavewoman, Meriem is attacked (while naked) by a megalodon. She kills it by swimming inside its gills and destroying them.
* Cavewoman, Meriem is kidnapped and forced to participate in gladiatorial combat in an arena called the 'Bowl of Bones'.

* Cavewoman, Miriam steps in a snare she had set earlier and forgotten about and ends the issue dangling upside down.
* Cavewoman, Muggs gives Carrie some hands on training when showing her how to use a LAW. When he tells her to ensure that the weapon is fully extended while pressing against her, she archly comments that it feels like his weapon is already fully extended.
* Cavewoman Raptorella knocks out Carrie and kidnaps her; waking her up miles out of town by dumping a bucket of water on her face.
* Cavewoman, towers over her boyfriend Bruce and most of the other men in Marshville.
* Cavewoman was doing this. His girlfriend is found, naked and catatonic, on a later scene of the same issue. Meriem is pretty fond of it, as well.
* Cavewoman, Zordu and Teegan refer to Carrie as Meriem's 'consort'. Leads to this exchange:
* Cave worms — monstrous, burrowing worms found in the depths of the world's global cave system — are divided into a number of specialized types distinguished by color. Besides the "basic" purple worm, there are the aquatic azure worm, the crimson worm found in volcanic caverns, the white worms that burrow within glaciers and the grey worms that lurk in necropoles and boneyards.
* Cavey seemed either reasonably used to most of the 20th century items he encountered (despite a propensity toward trying to eat half of it), or possessed his own Stone Age equivalents of modern tech. In one episode, Cavey made use of one of his club's functions, a firefly-powered "world's first x-ray" beam. Post-"Teen Angels" appearances of Cavey might
* Cavigor. Realizing that he's not bluffing, the Guardians flee (knowing that they can track him down later), as does Warden Callisto, who grabs the Shapeshifter children in his care and runs to safety, realizing that there's no point in doing his job if the prison won't exist much longer.
* Cavil but she can't convince him because she never shared his more morally-grey beliefs and philosophies. The result of those differences make their relationship a supremely messed up one.
* Cavilo (who had already thus secured control of a mercenary warfleet) attempts this with Emperor Gregor Vorbarra in the
* Cay is the term for a small, flat island that forms around coral reefs, when sediments pile up in one spot on the reef.
* Cazadores break from the pattern somewhat: instead of being nuclear mutants, they originated as tarantula hawk wasps who were genetically engineered to grow to huge sizes by a
* Cazadors and Nightstalkers by first the pre-War US government and then the Master to serve as living weapons.
* Cazador which looks like a gigantic pile of excrement with multiple eyes and a halo.
* CB 2 Pantheons shows a technological Thor who is never mentioned in the book.
* CB about possibly being an alien. Dib shoots this down, as he doesn't even want CB involved.
* C.B also resorts to this trope in the original version of this song to silence the rest of the trains.
* CBAudio (Cuernavaca. Had a branch in Mexico City until 2016. Owned by Jesus Barrero until his death, currently owned by his nephew, Victor Covarrubias.)
* CBBC in an episode is that Reggie's stunt acting instructor is telling him off for his underwear showing. At one point, he says, "You don't want to look like a plumber."
* CBBC puppet Hacker T. Dog originally had a very gruff, indecipherable voice, and usually barked instead of speaking. As time went on, Hacker's voice evolved to sound more like his puppeteer, Phil Fletcher, and can now talk perfectly fine. The same thing also happened with various other CBBC puppets, such as Dodge T. Dog.
* CBBC's he would say "As I always say [catchphrase he has never said before on the show and never will again]".
* CBBC to tell the viewers to change the channel to BBC One for a major news

report.
* CBBC', where the 'famously nice' TV presenter Naomi Wilkinson portrays an evil villain - complete with a giant badge that says "I am definitely a villain" on it. This is obviously lampshaded several times.
* CBBC will be involved) will automatically switch broadcast to a sequence of photographs of the Queen for a period of several minutes, during which the staff of BBC News will prepare for a breaking news report on the unfortunate situation.
* CB Bears, are three ghosts who run a hotel for spooks, ghouls and monsters. Sidney Merciless is the hapless ghostbuster.
* CB Bears has this happen with a bag of arrows (all of which hit the tree that doesn't have the bull's-eye on it).
* CB Bears, were three ghosts that ran a hotel for ghouls, ghosts, and monsters. Seeking to eliminate them was ghost exterminator Sidney Merciless.
* CB Bears were three ursine detectives who operated from a garbage truck and received assignments from "Charlie" via C.B. radio.
* CBC aired a bumper for fellow Canadian actor Alan Thicke, who passed away around Christmastime 2016.
* CBC, but not the rest of the game. CBC Sports' senior managers had turned off their phones and became unreachable, while someone at network control decided to only air the rest of the game in Saskatchewan. The Roughriders pulled off a comeback and won the game 39-32. The nail was already in the coffin for CBC's coverage, given that TSN would take over exclusive rights to all games the following season.
* CBC (CBCNN), Canada's first 24-hour news network and the third oldest in the world. Operated by the publicly-funded CBC, it is often accused by critics of having a left-wing bias (although some other critics accuse it of having a right-wing bias in some coverage). Formerly known as CBC Newsworld until rebranding in 2009.
* CBC Gem: Features primarily CBC material, but also carries international productions like
* CBC, had the villain, Ken Pompadore, creating his own money for an episode to illustrate some concepts about currency. At the end of the episode, a Mountie (In full Red Serge uniform) appears to explain to Ken the crime of counterfeiting and tells him to gather his money up and get rid of it.
* CB Chara Go Nagai World is a chibi parody which serves as a crossover of Go Nagai works. Not only are the characters aware that they are in a parody, but this is also made a plot point.
* CBC is known by many older people as "that station with the exploding pizza logo".
* CBC. It features discussion of fictional current affairs along with outraged listeners calling in.
* CBC Jack Layton, Olivia is portrayed early in the movie as living with her mother out of tradition; said mother is portrayed as being very picky about who her daughter should date, and very critical of Jack.
* CBC Kids and its related blocks: Many of the child actors used in the block's music videos and skits eventually end up pursing careers in acting. The animated shows featured on the block also tend to use a lot of recurring names in Toronto and Montreal's voice acting pools.
* CBC seemingly wanted its late-night viewers to buy an Acorn Stairlift.
* CBC's fine arts programming in the US, then later changed owners a few times before becoming a sister station of Bravo and then becoming a mainstream "pop culture network" that was taken off of TV and replaced with mystery-focused Sleuth. Sleuth became Cloo, which drifted back into mainstream programming again before folding completely in 2017.
* CBC's Newsworld International stopped broadcasting in 2005, ending with a special farewell message from their Toronto offices before switching to Current TV.
* CBC, starts off having a female voice simply because he captain chooses it, while the French-Canadian Commander Margaux prefers the voice of a French-Canadian man. Latter in the series, the computer becomes sentient due to the interference of a

Wish-Granting Sentient-Cloud being, and soon develops a crush on the captain, eventually leading to her crushing an American captain with a car, all because she thought he was trying to steal the captain from her. Actually, not very comedic sounding...
* C-Bear and Jamal, C-bear tickles Jamal's bare feet with a feather during his karate training.
* C-Bear and Jamal sees Jamal being cast in a cereal commercial and developing an ego over it. After he gets fired from the commercial, he is forced to apologize to his friends for being a jerk.
* C-Bear and Jamal sees Jamal trying to deal with a bully and fighting back, only to fear that he's becoming a bully himself. C-Bear advises him to find a way to find common ground with the bully instead.
* CBeebies frequently had the CGI-animated character Razzledazzle appear alongside live-action actors.
* CBeebies". If he neglects these missions, his halo wobbles and shrinks.
* CBeebies, Jason often calls things 'Fabodicalous!' and 'Wonderbubble!'.
* CBeebies marathon titled the Tweenies Funday. This is one of the rare occasions where CBeebies has had a marathon of one show on their channel.
* Cbeebies official websites change their backgrounds to look more festive every Christmas.
* C.B.I. team leader Teresa Lisbon blackmails Sam Bosco to drop all charges against Patrick Jane in "Black Gold and Red Blood". Lisbon threatened to reveal that Bosco had done something very bad in the past to a criminal who had gotten away without being charged. Revealing the secret would have ended her career as well, since Lisbon helped Bosco cover it up.
* C Boyardee, Alice delivers one in response to a murderous Dilbert's "ranch or cool ranch" Doritos trick questions before she is promptly shot after answering "ranch".
* CB Radio in the US. In 1970 there were around 800,000 licensed users. Thanks to the 1973 oil crisis, the 55 MPH speed limit, and the rise of the
* CBS affiliate in Boston, plays an ad for 1-800-Got Junk, a garbage removal company, at least once every commercial break, and they are also notorious for constantly airing ads for Bernie and Phyl's, a local furniture shop, and whenever Stop and Shop, a local chain of grocery stores, has a sale, their ads often play twice in the same break.
* CBS anchorman Dan Rather was attacked on Park Avenue in Manhattan by William Tager and an unknown accomplice. Tager kept repeating (according to Rather's own account) "Kenneth, what is the frequency?" Through
* C.B. Savage after his outro for the song, noting, "I don't pick them, I just play them."
* CBS, but instead ran for nine seasons and is now remembered as the "sole survivor" of the rural purge.
* CBS Cable launched in 1981 with a focus on the arts and folded after only 14 months due to being a niche channel when cable was too small for such a thing, as well as overlaps in programming with a much more widely available
* CBS debuts; that series nonetheless bombed in the ratings and was axed after two airings.
* CBS did a four-episode story arc on February 26, 1996, crossing over between their four sitcoms airing that night -
* CBS every break, and can recite it from seeing it too many times. This applies not only to CBS—EVERY Saturday morning block at the time, as well as several cable channels (mostly child-oriented ones), ran this commercial a lot.
* CBS have been critically acclaimed and immensely successful without the use of one. In fact, CBS is the only network that still uses laugh tracks with any frequency.
* CBS, her mother and stepfather are relentlessly interrogated and at one point, are outright told to confess so that the DA will take it easier on them. They refuse.
* CBS) in 1991, it included an extended sequence where the Marines use sentry guns

to kill most of the xenomorphs while holed up in the Operations wing. The sequence was later used in the Director's Cut version, along with a sequence which shows Hadley's Hope before the attack.
* CBS in 2012; that series bombed in the ratings and was axed after two airings.
* CBS included two scenes that were cut from the theatrical and video releases - the first one is about Stu and Didi having a nightmare about Dr. Lipschitz, and the second had the Rugrats dragging the Reptar Wagon up a hill while singing to an army chant, the latter of which was included in the print novelization. Unfortunately, very few people watched the CBS broadcast, and these scenes are also not included on the DVD release. However, they have been retained in Nickelodeon's broadcasts of the film.
* CBS joined it in 2009), the winnings cap was done away with entirely.
* CBS' Kewlopolis block (which can also be seen online) use 8-bit style music (although one can also hear actual modern electric guitars on the soundtracks as well).
* CBS' Major League Baseball coverage, when he was tapped to replace Jack Buck as their lead play-by-play announcer beginning in 1992.
* CBS More than six decades later, it remains one of the media world's most recognizable symbols.
* CBS News Sunday Morning always ends with a "Moment of Nature", sometimes just scenery but often including animal footage.
* CBSN Local. (If needed, the national CBSN feed can simulcast the local variants.)
* CBS on Bozell (keep in mind, this is fairly early in the morning). Also keep in mind that he was being forced to talk to a man arguing that gay people should be forbidden to become scoutmasters in Boy Scouts.
* CBS on their NFL coverage. However, in 2019 he suddenly announced that he was returning to the league to take the Tampa Bay Buccaneers head coach position, and a year later he led them to a victory in Super Bowl LV.
* CBS Pictures. When CBS spun off from Viacom in 2006, before re-merging in 2019, they didn't hew to the FNDS concept as closely as the other three networks.
* CBS Radio Mystery Theater: in "King Bankrobber", the thieves fly off the entire bank and relocate it to the top floor of the robber's mansion.
* CBS Radio Mystery Theater. In that one, the bank was relocated to the top floor of the robber's mansion.
* CBS Schoolbreak Special: The 1984 episode "The Alfred G. Graebner Memorial High School of Rules and Regulations" includes a sequence of students having their school pictures taken. Mostly, these are comical reactions to the students' willingness to have their pictures taken.
* CBS Sports Network has liked bringing out the "Verizon Red Zone" and "Barbasol Close Shave".
* CBS Sports radio host Scott Ferrell is self-described as "having the body of Olive Oyl and the voice of
* CBS Sports' website has a button on their NCAA basketball tournament streams that brings up a fake spreadsheet to hide the video from passers-by.
* CBS Television Quiz. It was cancelled in May, 1942. In favor of war-related programming.
* CBS, the Columbia Broadcasting System, recently aired a news piece about drug cartels in Colombia.
* CBS (the latter which helped dethrone "Must See TV Thursdays" from NBC). Today it's the dominant TV network in the ratings. Similarly, it regained the younger crowd in the '90s after spending much of the '80s being "the network of the living dead".
* CBS. The move led to CBS becoming the ratings leader in 1949, establishing a position of dominance that the network would enjoy into the television era and wouldn't relinquish until the late '70s.
* CBS, the title character, having just been promoted from a blue-collar position, spins around on an office chair, tips over and pulls down a venetian blind in the process.
* CBS (United States) had Toontastic TV, which later became the CBS Kidshow, then

* CBS used this show as part of an experiment to see if comedies fared better with a laugh track than without. The pilot episode was screened to test audiences in two versions: one with laughter and one without. The first one fared better than the second one, supposedly due to the cerebral nature of the show's humor.
* CBS was called the "network for the living dead" in the 1980s due to its programs gearing more towards older audiences. Despite a return to that kind of programming in the 2000s and 2010s, the nickname hasn't gotten quite as much traction.
* CBT: If you get a suggestion that somebody can help you improve your life through CBT, you should probably make sure they mean Cognitive Behavioral Therapy rather than Cock and Ball Torture. Detractors have also jokingly proposed this as the new nickname for the Cleveland Baseball Team.
* C. C. abandoned Mao with this in mind when she felt he was becoming too obsessed with her. It ended up backfiring big time, when Mao went insane due to his
* C.C. and Lelouch toward each other and everyone throughout the series, but completely understandable when you consider all the crap they've been through together at this point.
* CCB — The Civil Cooperation Bureau. Another Apartheid South African intelligence agency, this one specialised in disinformation, psyops and assassinations.
* CCC, in which literally every day in and around the city (so large it renders maps pointless) involves countless adventures of many different levels.
* Çatalhöyük could be considered a downplayed, yet also
* Çatalhöyük dates back to 7500 BC and yet still has remains still intact enough for us to reconstruct their culture, although much of it had to be dug up and restored. It's the best-preserved Neolithic site.
* Çocuklar Duymasın for Turkey (where almost everybody other than the very poor and the very rich live in apartment blocks).
* C Central and who wants to cook the members of Division C for his recipe.
* C.C. First impression: cool, cynical, indifferent. Deep inner side: oh so warm.
* CCG Importance Dissonance), Aki (most of a Plant Synchro engine but little to use it on), and Rex (strategy relies on having two hard-to-summon monsters simultaneously) are particular offenders. It's even more obvious in the games that let you watch AI Duels, where these formidable enemies often struggle to handle random civilians.
* CCG Importance DissonanceWhen character lore is quite different compared to the gameplay mechanics.
* C Channel (five months in 1983). Essentially a prototype to the Canadian Bravo (unrelated to either the American Bravo or the now-defunct UK Bravo, although it does share more similarities with the American Bravo).
* C.C., however, the girl he spends the most time with overall, is at most a downplayed example. Granted, she's still doubtless more energetic than the endlessly cerebral Lelouch and has a bit of a penchant for mischief (usually of the kind intended to give Lelouch a heart attack), but her typical demeanour is aloof and snarky, averting this trope for the most part.
* C-Chute": Stuart reminds the other humans that Kloros aren't just physically different, they are also psychologically different. The Kloros will assume that any group is a social union deeper than family bonds, even a group that just happens to share a ride on a transport.
* C-Chute, the eponymous item is a euphemism for "casualty chute", which itself is a euphemism for/abbreviation of "chute used to eject coffins into space". The protagonist uses one to exit from the ship, because the part in which he and the other humans are imprisoned doesn't include any of the airlocks. To avoid alerting the aliens who have captured the ship, and thereby recapture it, he re-enters by an equally unconventional route.
* C-Chute": The setting is a future with FTL interstellar travel, and humanity has recently encountered their first alien species. Both groups have colonized multiple star systems.
* C-Chute": The ship's use of force fields occur off-screen, but Colonel Anthony Windham is familiar enough with space combat to be able to identify the sequence of

events despite being in the passenger area. He knows when the "screens" fail and the ship is forced into evasive maneuvers to avoid boarding action.
* C-Chute": When Demetrios Polyorketes tries to ambush one of the Kloros that boarded their ship, it blasts him with a pinkish ray that leaves him paralyzed and in great pain.
* C-Chute": While a guest of the Kloros, John Stuart had mangled his hands irreparably. Since they couldn't fix the human hands, they used their advanced chemistry knowledge to grow artificial hands out of artiplasm instead. The new hands are weaker than the originals, and require delicate care.
* C.C. increases as they age. Initially, they heal only slightly faster than an ordinary human but after a few centuries, they can survive their heart being impaled.
* C.C. is generally a rather stoic character, but the facade is broken when
* C-Class: There are currently 390 heroes in this class. While still stronger than the average person, they are still the weakest and lowest class, and most of their deeds consist of catching purse-snatchers and stopping petty crimes. They have to fulfill a quota of heroic deeds in order to maintain their hero license. Most newcomer heroes begin here.
* C-CLAYS are sold digitally. Notably, these albums do not feature vocalist Mai Kotohge, but several MUONKAGURA albums featuring her are available.
* C.C. locks away her own code, she buries herself in a world filled with paintings that represent her memories... with some sort of caretaker C.C. walking around. Which, again, never explained, though I suppose the concept is common enough for people to understand.
* C.C. loses her powers and is temporally stricken with amnesia; for her, it's even more severe than the usual case, since she reverts to the state she was in at the last point in her life before receiving a Geass: a ten-year-old slave-girl from the Dark Ages.
* [C] - Control: Asset Q's "Economic Blockade" does the color shift and paralyzes Yoga and Msyu, but they still talk somehow... despite their bodies not moving at all.
* CCS-class battlecruise, for example. In this case, each letter is used to indicate the ship's capabilities or role.
* C.C. sees herself as the only woman in Maxwell Sheffield's life, rather than Fran Fine, even though Maxwell sees her as nothing more than his business partner.
* CCTV-9, an English-language news network. In addition to news, the network airs cultural programs, Chinese-language lessons, and travel documentaries.
* CCTV News Channel, the 24-hour news channel of the state-owned China Central Television, and the official mouthpiece of the Chinese government.
* CCW; a policy which says that you should strive for conciseness so long as it doesn't get in the way of clarity, and wit shouldn't get in the way of either.
* C.C. was once a normal human and had a Geass power like the other characters we see throughout the series. It turns out that in the final stage of Geass, the user can steal the "code" of the one who granted their power and become immortal.
* CD&D rules includes a race of rocky space-dwelling intelligent beings who are commonly mistaken for planets.
* C°ntinuum: roleplaying in The Yet. Narcissists will sometimes use the Cuckoo technique. They pretend to be the elders (older version) of young spanners (time travelers) and lure the spanners to a remote location in order to kill them. One of the narcissists then takes the place of the murdered spanner. Narcissists have taken over entire corners (groups of spanners) using this technique.
* C°ntinuum: roleplaying in The Yet: The rulebooks claim that the authors of the game received their information from the spanners (time travelers) whose adventures are the basis for the game. The Atlantean Councils believe that it will assist humanity in acclimating to the time-travelling civilization that they'll enter 224 years later.
* C°ntinuum: roleplaying in The Yet. When two characters meet while Dreaming, any combat between them is usually harmless – any character who is knocked unconscious or killed just wakes up. However, if one or both of the dreamers uses

Telepathy during the combat, the damage inflicted is real and can result in nerve damage (and paralysis when the victim awakens) or death.
* CDI Zelda games, Ganon says "Join me, Link, and I will make your face the greatest in Koridai! Or else you will die."
* CD-I Zelda thinks it's GOOD to kill people, and constantly denies that Link saved her from Ganon. Alma is worse, though, spending most of her time looking at herself in a mirror.
* C++ does the same thing, although it attracted something of a hatedom for it (in fairness this is because several of the features it has absorbed are mutually contradictory). Programming languages tend to be criticized for doing this because it can end up impossible to use
* CD or Compact Disc is technically a trademark of Koninklijke Philips N.V., but it came to refer to any digital optical data disc when the medium reached its peak in the mid-90s. (Its two successors, DVD and Blu-Ray, are not trademarked per se, but its logomarks are held by consortiums - both of which include Philips.)
* CDR has done this on and off since he began. He's done tracks with tape machines, squeaky toys, bits of cellophane and other things.
* CD-R King, and even electric bicycles. This became a source of humour with Filipinos, who jokingly suggested that they might be carrying even more unlikely items such as frozen fish or helicopters. And like Acme, they're derided by some for their products' hit-and-miss build quality - some items work reliably for a long time, while others would work for days or months but eventually break down or malfunction. Though in recent years CD-R King declined partly due to legal pressure owing to the company selling recording media at a discount, which, as you might guess, has been seen as facilitating piracy, and also due to cloud services and flash-based storage displacing optical discs as a primary storage medium.
* CDRR fanfic writers have to solve the mystery of Geegaw's demise, it's only natural that they have to write something about her mother as well.
* CDs and other digital files are very much on the Enlightenment side, with their lack of surface noise, distortion, and playback degradation as well as greater portability, but proponents of vinyl claim that digital audio sounds "cold."
* C Ds/Books reviewed in each issue. They always have a multiple choice question followed by the right answer, a plausible wrong answer and a "what the hell are you thinking?" answer. Although there are sometimes two WTHAYT answers: "Can you name the deadly insecticide in this story? A) DS9; B) DN6; C) WD40"
* CDZ : La Série Abrégée (Les Chevaliers du Zodiaque, French)
* Célimène cultivates a herd of them. She trash-talks each one to the others, but can't seem to break it off with any of them.
* Céline Dion, actually translates into this (Nothing But a Dream).
* Céline Dion and Laura Branigan. However, Jennifer Rush's original was massive in the UK; it topped the charts for several weeks in 1985.
* Céline Dion, but as her profile has diminished in the ensuing years, so has the hate, and many of those who were once part of the hatedom have changed their ways and now appreciate her music.
* Céline Dion declared that she would retire to spend some time with her husband and have a baby. Although she did explicitly state that the retirement would only be temporary, the period leading up to her sabbatical lasted for more than a year and was jam-packed with concerts and public appearances.
* Céline Dion has sung, including one song with the Trope Name. A running theme is that love grants the (figurative) power of flight. "Because You Loved Me" has "you gave me wings and made me fly / you touched my hand, I could touch the sky". The French track "En Amour" is all about love and flight. "Where Does My Heart Beat Now" has the line "Two hearts that need one another / Give me wings to fly." Other examples include the obscure "Love Lights the World", and of course "The Power of Love" with its bridge "The sound of your heart beating made it clear suddenly / The feeling that I can't go on is light years away."
* Céline Dion on TV, she invited another imitator, Véronique Dicaire, on stage.
* Céline Dion - "Pour Que Tu M'aimes Encore" ("For You to Love Me Again"):

among other things, the narrator offers to make herself queen, cast magic spells of African priests, and turn herself into gold for her ex-lover to love her again.
* Céline Dion wrote her 2002 hit "A New Day Has Come" after her first child was born, and the song is meant to be about him.
* Céline et Julie vont en bateau's most commercially successful and accessible film. If you want a real challenge, see if you can sit through all 13 hours of "Out 1" — if you can find a screening, that is.
* Céline had a P.E. teacher who taunted her for failing to attend his classes (because her father forbade her to, for practice) out of pure anger towards her and her family enjoying superior social standing and being allegedly able to break rules. It is one of the rare persons she seems to still resent and look down upon.
* Céline Rapahaël, a Frenchwoman victim of a Stage Dad, wrote a book about the abuse she underwent. The examples are treated in the Literature section.
* Céline's little sister, Marie, had a limp. When she was invited to walk with Céline and their father, she would be hit with a stick if she didn't follow quickly enough. Céline wasn't abused if Marie came on the walk, but was abused if she didn't, so she (and their mother) would
* Céline's mother never confronted the father about the abuse in the first years, and the reader may assume that they didn't know. Then, halfway through the book, she writes about how unsettling it must have been for her mother and sister to hear all the abuse from behind the closed door of the room her father locked her in for practice. She never had a grudge against her mother.
* Cease Fire and destroying the effectiveness of this relatively clean style of warfare will only mean that in a generation or two humanity will escalate to something worse in order to wage war. They're proved right by the afternote, which implies that biological weapons became dominant in the next major conflict.
* Ceaser Clown is, so far, the only Logia example of this. Ceaser often stays in his gaseous form which does help considering he can't be hit normally and can fly/float around.
* cease to exist, for no better reason than that they had enough explosives to do it.
* Cececat's stories imply that the aliens from Transsexual, Transylvania are really descendants of the "missing" IX Spanish Legion. The planet's characters even use Roman naming conventions in some stories.
* Cecelyne, one of the Yozis, was responsible for the principle of law in Creation, but it's suggested her ideas, even as a Primordial, were a bit... off. Now that she's been made into a Yozi, her idea of "law" has twisted to "whatever benefits the strong so that they rule over or drive out the weak." Oh, and her chosen are the
* Cece Peniston's "We Got A Love Thang," anyone? Constant repetition of the line "We got a love" and an endless stream of "yeah yeah yeah yeah yeah," ad nauseum.
* Cecil Adams may or may not be the pen name of Ed Zotti. (As Ed has remarked, he finds it amusing that so many people question Cecil Adams' name but never his own.)
* Cecil B. DeMille deliberately shave their heads, though they often wore wigs.)
* Cecil B. DeMille, is said to care more about revenue than religion. (He is also portrayed physically as a crude anti-Semitic stereotype.)
* Cecil B. DeMille. She was once betrothed to Moses but is now married to Rameses. When Moses returns, Nefretiri puts the moves on him, but is "spurned like a harlot in the street." She decides to get back at him by being the one who hardens Pharaoh's heart.
* Cecil B. DeMille that same year, where a lynch mob made up mostly of college students stormed a jail where two murder suspects were held and hanged them.
* Cecil, but that rather goes without saying (though perhaps not as much as the Warrior).
* Cecil cheerfully reports the obviously bogus coverup stories concocted by the City Council with little to no indication that he doesn't believe every word. Also, choosing not to question what one is told seems to be the only way to survive living in Night Vale.

* Cecile Forward wears a nice looking pair in intermission scenes in
* Cecil gets tricked into this situation by a witch doctor in an episode of
* Cecil Harvey to this is one of the driving forces behind and most emotionally satisfying part of the overarching plot.
* Cecil Holmes, Tyler's best friend, falls into this trope as well. While he is a paranoid
* Cecil Hotel. The hotel closed in 2017 but there are plans to renovate the property into a luxury hotel.
* Cecilia "Cee Cee" Bloom becomes Cecilia Carol Bloom, with her nickname ("C.C.") now coming from both her first and middle names. Still a minor change compared to the rest of the cast.
* Cecilia Cichan was the only survivor of the crash of Northwest Airlines Flight 255 in 1987. The plane crashed after takeoff, killing 156 people, including 2 on the ground. Cichan, then four years old suffered a fractured skull, broken leg and collarbone and third-degree burns. Her mother, father, and brother died in the crash. 26 years after the crash Cichan spoke about it for the first time in the documentary
* Cecilia is portrayed as a generally good-hearted woman, in huge contrast to her mean shrew of a sister, Katarina, who managed to separate Cecilia and Arn for more than
* Cecilia Reyes can mold her force field into spikes or use it as a blunt weapon. However, she rarely uses her power in such an offensive manner.
* Cecil is mocked for his alcohol abuse and bizarre living conditions (living in his sister's family's basement). It is yet unclear whether either of those things are part of his real life or his on-line persona (most likely both).
* Cecil keeps reporting on her but swears she's just another person. But all the while, he keeps randomly spewing nursery rhymes in a broken voice, talking about how her hands are storm clouds with lightning talons, how she skins her victims, and how she lurks at the end of dark hallways.
* Cecil mentions the Sheriff's Secret Police in nearly every broadcast of
* Cecil's being auctioned off in Episode 37. The gun doesn't fire until over a year later in Episode 63 when Cecil,
* Cecil, Sideshow Bob's brother once had plans to blow up the Springfield Dam, steal the money he'd embezzled from the project and plant the blame all on Bob. After teaming up with Bart and foiling the plot, the police still arrest Bob along with his brother, because they simply can't believe that Bob was innocent
* Cecil's of his picture during The Sandstom. Only the tie part is accurate.
* Cecil's parents tendencies certainly make him a handful, so it's understandable, but still not right.
* Cecil's Station Management, who never leave their office until Cecil encourages the listeners to write in to support his continued employment (and possibly continued existence). He comes to regret this when they emerge.
* Cecil's Trial is to face his own past as the Dark Knight to gain the Paladin job. The Dark Knight uses the Darkness ability exclusively, which
* Cecil Terwilliger, the younger brother of the aforementioned Sideshow Bob, had his first appearance in "
* Cecil the Seasick Sea Serpent puppets" and double as hands, and have their brains in the middle of their torso.
* Cecil, this man'', despite Kevin describing Cecil as having "eyes like mine"; though since Cecil's had all of his mirrors covered since he was fifteen, he might have similar eyes and not know it.
* Ced. In his own words, he simply cannot turn away when he sees someone in trouble, and boy does he get in problems due to it. And for better/worse, when Seliph helps him whack the
* "Cedo Alteram" is Latin for "Give me another", which is what he said when he broke his vine staff.
* C.E.D'oh", Homer hatches an ingenious plan to get put in charge of the nuclear power plant as a "patsy", then immediately fires Mr. Burns once he's given power. Burns compliments his cleverness and acknowledges his defeat like a man.

* Cedric Alexander usually follows Caprice Coleman's no hands huricanrana with a frog splash but on the June 2nd 2012 edition of
* Cedric and Cyril Sneer are supposed to be aardvarks, but are sometimes mistaken for naked tapirs,
* Cedric apologizes to his fellow Triwizard Tournament competitors for being a poor sportsman during and after the First Task.
* Cedric Daniels has some skeletons in his closet, and openly implies that corruption runs rampant in the Eastern District.
* Cedric Daniels' Major Crimes Unit is designed as the dumping ground for the dead wood and
* Cedric Daniels protects his subordinates who exhibit numerous displays of incompetence or disloyalty, even when this reflects badly on him.
* Cedric Diggory is another prominent example, even though his house (Hufflepuff) isn't usually considered a "jock" house. He's such a
* Cedric Diggory is stated to get about as much attention as Krum during book four.
* Cedric Gervais' "Do It Tonight" has the refrain "Baby, we can do it, take the time, do it right, we can do it, baby / Do it tonight / baby, we can do it, take the time, do it right, we can do it, baby" repeated over and over so much it will make your head a-splode.
* Cedric's death makes Harry's dates with Cho increasingly awkward. In later books, Harry becomes increasingly jealous of Ginny's boyfriends. He also takes Parvati to the Yule Ball and thinks that she "looks nice". It goes no further than that, but then again, he only asked her because he was so desperate for a date that he literally asked the first two cute girls (Ron needed a date too!) who were still available that he could find.
* Cedric yells one when his widowed mother mentions that she's started dating again.
* CED. The system is more vulnurable to repetition than normal vinyl audio records, as the tone arm is motorized, rather than passive like on normal records, and is capable of getting stuck. Though the players usually have an electromagnet to get the needle out of a locked groove situation.
* Ceefax" between midnight and 6AM, with assorted soothing library music on in the background. It was oddly relaxing for anyone having trouble sleeping.
* Ceefax (teletext service): In the UK, "Ceefax" was the name of the teletext service from
* Cee Lo Green's "Fuck You" - which also has some "I Want You Back" elements.
* Cegorach, being the Eldar God of comedy (among other things), doesn't seem to have a problem with others making fun of him, as long as they are clever about it.
* Cegorach. He looks like a deranged clown and speaks in Joker font, but he
* Ceiling Cling: A character avoids pursuit or detection by hanging from the ceiling of the room or hallway.
* Ceiling ClingHiding and traveling on the ceiling for the sake of stealth.
* Celadon's New Blossom as Ashley, who would gladly decline the honour.
* Celadon's New Blossom girl. Ash is cisgender but he doesn't deny this. Erika and Ash go with it and make up a cover story about how Ash realized he was transgender after starting his journey, so he came to Erika to learn how to become more ladylike. Ash acknowledges that this lie will lead to trouble when he goes back to Ash, but he decides he'll focus on the present for now.
* Celadon's New Blossom, which caused Sabrina to withdraw into herself. Eventually she developed a childish persona that appears in physical form as a younger version of herself. As an adult, Sabrina has a reputation as a strong psychic and Pokémon trainer, so people tend to either avoid her or admire her from afar. It's only Ash, who has a friendly disposition and resonates with her childhood full of bullying, that offers to befriend Sabrina. This leads her to becoming more friendlier and causes her to turn her mother back into a human.
* Celaeno Series, the protagonists are two female Rangers, members of a kind of elite unit in the military.
* Cel Damage has Brian, a brain and spinal cord stored inside a jar. He also wears glasses and has robotic arms.

* Cel Damage movie tie-ins. Years after its cancellation, former Pseudo Interactive employees posted the concept art and a 15-second montage of clips from the early prototype to the Internet.
* Cel Damage, there are a couple maps that have sheep wandering around, whom can be sliced in cattoon fashion (no blood, just a red inside with a visible bone half). Violet even slices one with a chainsaw in her ending. However, weapons such as the chainsaw, axe, etc., when used on players, only slices their cat, while the character is flung out and left running.
* Cel Damage was rated T by the ESRB upon its original release, but was downgraded to E10+ in early trailers for the HD rerelease...until out of nowhere it was changed back to a T, with even more content descriptors than the original had.
* Celeb Crush and rarely if ever aims for anything aside of liking him from afar.
* Celeb Crush: Celebrities have many fans, some of which who are attracted to them.
* Celebi's pokedex entries from its first appearance in the 2nd Gen onwards mentioned that while it time travels,
* celebrated "Bacchus's vine"—a poem whose meter perfectly fit Stafford Smith's tune. Thus "To Anacreon In Heaven" was immortalized...as the tune to "The Star-Spangled Banner."
* celebrated his birthday in turn kind of justifies their treatment of him).
* celebrates the trope in several modern game franchises. Visual effects included. Here's a reference for those who may not know.
* Celebrating the site's anniversary with a gigantic crossover was a traditional event. The second anniversary of the website featured the six-part film
* celebrating the upcoming 100th season only to fall and knock off a golden football centerpiece on top of the cake.
* Celebration involves the old villain (and the audience) being bombarded with portentous symbolism until he collapses, though not before revealing that he and his youthful rival are one and the same.
* Celebration Miscalculation: One or more characters think it's a special occasion but it isn't.
* Celebration Miscalculation: Someone celebrates a special occasion... on the wrong day.
* Celebration Miscalculation: Someone wrongly thinks it's a special occasion.
* Celebration, Mr. Rich tries to kill himself by shooting himself in the head with a pistol, which produces a "BANG" flag when he pulls the trigger. Not one easily deterred by failure, Mr. Rich next tries to stab himself with a rubber knife and then tries to hang himself with a frayed noose.
* Celebration, "Saturnalia" ends with the execution of the Mock-King by decapitation. Mr. Rich is startled, perhaps because the puppet's head looks like his own.
* Celebration, the Orphan and Edgar Allen Rich struggle against each other to get the girl. Their names speak for themselves.
* Celebrimbor is especially fond of doing this to Uruks once you advance his skill tree. There are also weapon runes you can apply that utilize or improve your head-sploding powers. The Uruks find Talion's new talent kind of disturbing, judging by their banter.
* Celebrities Hang Out in Heaven: Dead celebrities hang out with other dead celebrities in Heaven.
* Celebrities Hang Out in Heaven: Dead famous people hanging out with other dead famous people in Heaven.
* celebrities houses at night. is polluting the water with oil, with Leno suing Will. Will sneaks onto Leno's show and clears up the mess.
* Celebrity Apprentice but never returned to the music biz and faded into complete obscurity.
* Celebrity Break-Up Song: A break-up song written by a celebrity about another celebrity.
* Celebrity Break-Up Song written by a celebrity about another celebrity.
* Celebrity Break-Up Song written by a celebrity written about another celebrity.
* Celebrity Cameos. Suspect an actor might be the upcoming guest on your favorite

show? If they've just started following the accounts of other cast members on that show, then they're probably gonna be making an appearance in it.
* Celebrity caricaturist Al Hirschfeld was known for incorporating his daughter Nina's name into his portraits; the numeral next to his signature indicates how many times "NINA" appears in the drawing. It became such a game with his fans that Hirschfeld complained the "NINAs" were overshadowing his art. In fact, the U.S. Army used the "spot-the-NINA" game as a test of their soldiers' visual acuity.
* Celebrity Deathmatch, after Johnny Gomez calls him out on lusting after the "sweet, innocent" Kristen Davis.
* Celebrity Deathmatch, and a French fry that accidentally fell into the genetic mixture).
* Celebrity Deathmatch, and when Harrelson points this out at the end of the episode, Nick is very embarrassed (he is naked and playing the bongos at this point).
* Celebrity Deathmatch battles Derek Jeter. Unsurprisingly, John Rocker doesn't get the most sympathetic of portrayals and is electrocuted to death by the match's end.
* Celebrity Deathmatch because that, points out the announcer, would be copyright infringement.
* Celebrity Deathmatch brings out an enlarging ray and tells Nick to use it on him so he can bring down the Mecha himself. Unfortunately, Nick points it backwards and hits Jessica Simpson instead. (Fortunately, she manages to do the job just as well.)
* Celebrity Deathmatch", but Ozzy is trying to keep it away from Rob, so it more fits this Trope.)
* Celebrity Deathmatch compared to him). The "literal" aspect even applies to the killing move: Spade using an improvised slingshot.
* Celebrity Deathmatch count as such. Having your entire skeleton pulled out through your mouth, being sliced to pieces by a giant bladed rotary fan, being burst open like a pinata, being cut up into paper dolls, having your nipples ripped off before having your internal organs squeezed out through the holes that were once occupied by them, having your eye stabbed out by someone's erect penis... the list goes on. They can get away with the level of violence by always pointing out in the disclaimer at the beginning of the show, "It's just clay!"
* Celebrity Deathmatch. During the fight, Medusa manages to turn various audience members into stone before she is accidentally decapitated by Irwin. Her head is then used by Nick Diamond to turn small animals into stone, much to Johnny's chagrin. The head then falls from Nick's grip and lands in the ring, where it then petrifies everyone in the arena, including Nick, Johnny, Mills Lane and the winner of the last fight, Kristen Davis.
* Celebrity Deathmatch episode with Rebecca Romijn-Stamos vs. Naomi Campbell, in which Rebecca is sprayed with stomach acid, reducing her to a puddle of mush.
* Celebrity Deathmatch finds herself in this while her body is being upgraded. Since it was done in the lab in the afterlife, so she doesn't die from it, though is place in a container until ready.
* Celebrity Deathmatch. Geraldo fails to find the killer, but he does find something else interesting:
* Celebrity Deathmatch had a couple episodes where fans voted for a deathmatch between two celebrities that had no reason to dislike each other. The league then invoked this trope with the "Fan of Fandemonium" - a giant bladed ceiling fan that lowered down towards the ring if the two celebrities didn't hurry up and kill each other.
* Celebrity Deathmatch has a match between Don Rickles and Rodney Dangerfield. Rodney got Rickles to run out of material (Johnny said Rodney played "rope-a-dope" with Rickles) before going into a flurry of fists as each seven punches helped Rodney teach Rickles about "respect." "Here's an R!" It ends with Rodney punching Rickles to pieces that get cooked on a grill.
* Celebrity Deathmatch. His technological expertise yielded a fully-functional cloning machine (used to combine DNA from dead celebrites into fighting mutants) and a rickety time machine (used to bring to life such matches as The Three Tenors

vs. The Three Stooges).
* Celebrity Deathmatch However, MTV actually brought this episode back from being banned from airing it uncut on March 22, 2003, at 11:00 pm.
* Celebrity Deathmatch. In fact, this may have been meant to take a swing at Moral Guardians in general who, like the ones in the story, seem to view gory and graphic deaths in media as okay but nudity and sex in the same mediums as flat-out evil.
* Celebrity Deathmatch) inside the Dome of Devastation. The dome is lined with various musical instruments and, during the fight, Love manages to force an entire electric keyboard down Grohl's throat. Grohl's voice briefly turns into a distorted mess of garbled keyboard noises while Love remarks that this is why "Kurt never let you open your mouth."
* Celebrity Deathmatch, in the fight between Simon Cowell and Ryan Seacrest, Seacrest can only come up with lame insults like "doodoo head" and "double doodoo head" in response to Cowell's epic burns.
* Celebrity Deathmatch in the match between Lucy Lawless and Calista Flockheart. An accident in the fight has Callista wind up with her head up Lucy's butt, at which point, after a few minutes of struggling, Lucy is able to completely "absorb" Callista into her body through that end of her. This somehow causes Callista to end up in her womb, which results in Lucy, at the end of the episode, giving birth to Callista as she would a newborn daughter.
* Celebrity Deathmatch isn't breaking up. We miss some woman getting kicked in the teeth.
* Celebrity Deathmatch It's revealed in the end that his attire was stolen from the veterans guests and gang up on Nick to get them back.
* Celebrity Deathmatch, Jennifer Lopez has a guy like this as a personal trainer before her match with Dolly Parton. He plays the Trope straight until she actually thanks him for everything, and then he gets a little choked up.
* Celebrity Deathmatch: Johnny and Nick after being thrown off the head of Nicky Jr.
* Celebrity Deathmatch, Johnny Gomez tells Nick Diamond that it's highly unprofessional to confuse an actor with the character they play.
* Celebrity Deathmatch, Martha Stewart does this to Sandra Bernhard for the latter's manners:
* Celebrity Deathmatch match, the same fangirl excitedly volunteered when Lucy asked for help to decide which team got to choose ring theme; the decision was made by the two groups grabbing the poor fangirl by the arms and legs, then pulling until she was torn in half, then measuring the two pieces.
* Celebrity Deathmatch sometimes has these to serve as a background for fights that don't really make sense on their own, or place fights in bizarre settings.
* Celebrity Deathmatch subverts the Trope most of the time. A few episodes claim that it applies, but other episodes say they have a few rules. (For example, in one episode, the "number one rule of Deathmatch" is, "Don't piss off Mills". And indeed, in most cases, whatever Mills Lane says goes.)
* Celebrity Deathmatch, telling her that "one of the Deathmatch people will die tonight".
* Celebrity Deathmatch. The first revival just lasted two seasons, though, and the episodes that aired weren't very good. A second revival was announced some years later, this time with original creator Eric Fogel back on the production team.
* "Celebrity Deathmatch The Motion Picture" has one involving the making of the titular movie, which primarily serves as a background for the Martin Scorsese vs. Oliver Stone and Cameron Diaz vs. Meryl Streep fights.
* Celebrity Deathmatch. The set eventually collapses on all the combatants but not the referee Mills Lane, who survives because of this trope.
* Celebrity Deathmatch: The "Sherlock Holmes vs. Jack the Ripper" fight portrays Sherlock as being a bumbling idiot. When Nick points out how strange this seems, Johnny tells him "Well, Nick, you can't believe everything you read."
* Celebrity Deathmatch to be genuinely insulting, but unfortunately for him he can't find any insults that Rodney doesn't wholeheartedly agree with. When Don runs out of material, Rodney takes the upper hand and literally roasts him (a pit of

charcoal was placed in the ring specifically so that this kind of thing could happen.
* Celebrity Deathmatch to tell that lie); both women referred to him as "Mark" throughout the storyline.
* Celebrity Deathmatch (variously from Hertfordshire, Yorkshire and Merseyside).
* Celebrity Deathmatch, when Bam Margera goes into orbit around the massively fat Don Vito.
* Celebrity Deathmatch when Martie Seidel launches glass bottles into Chilli's mouth.
* Celebrity Deathmatch, when they had daytime talkshow hosts Oprah Winfrey, Rosie O'Donnell, and Jerry Springer in a match, Springer decided to go this angle by trying to pit Oprah and Rosie against each other while he stays safe. However, it comes back to bite him in the ass as the two ladies eventually realize he's playing them. They both decide to team up, grabbing one of his legs each, and then pulling until he splits down the middle.
* Celebrity Deathmatch where Mills Lane and Stacy Cornbread take over in the announcers' booth (due to Nick and Johnny being arrested) shows that Mills is badly nearsighted without his glasses. (Good thing he's usually very close to where he's supposed to be.)
* Celebrity Deathmatch while "My Heart Will Go On" plays in the background, suddenly Nicholson regains consciousness and brutally beats him to death, the song comes to a sudden halt with a record scratch sound.
* Celebrity Deathmatch, yet throughout the series God only ever appeared in a story Nick made up.
* Celebrity Edition use this full-time on a game usually played by civilians. It's been tried several times, and on every occasion the show in question was canned within a year.)
* Celebrity Endorsement: Ancient Roman gladiators used to do this all the time.
* Celebrity Endorsement: Trying to convince the audience to want your product by having a celebrity speak fondly of the product.
* Celebrity Family Feud since contestants on that version take more time to come up with answers.
* Celebrity Impersonator — Somebody looks like and is mistaken for a famous person
* Celebrity Manhunt co-host Josh appears in the original episode "Singin' in the Pain" as a guest judge for the music competition.
* Celebrity Manhunt's TDA Reunion Show", calling him "buddy" and "[his] next big star" while he raises his hand for a high-five. Alejandro walks right past him with his nose in the air and his arms to the ground.
* Celebrity Manhunt's TDA Reunion Show", Chris spits all of the latté Noah just brought him out into his face because it's cold. He also fires him.
* Celebrity Manhunt's TDA Reunion Show", Eva is accosted by her fans who all want her autograph. She fights them off, but this only makes the fans like her more. Collecting stories and photos of her freak-outs becomes a new thing they do.
* Celebrity Masquerade: A superhero whose normal-person self is famous (but not for their superheroism).
* Celebrity Masquerade: A superhero whose secret identity is a famous celebrity.
* Celebrity Masquerade: A superhero whose secret identity is famous in their own right — sometimes more than the hero.
* Celebrity Masquerade: A superhero whose secret identity is famous in their own right — sometimes more than the hero.
* Celebrity Name Game drew a blank when asked to communicate the word "Snapchat" to a contestant; after the round, host Craig Ferguson had to explain that it was something "the kids" used.
* celebrity of sorts among the fandom's original characters, and some have even made custom models of him with painted and 3D-printed parts.
* Celebrity Pantomine versions of Hitler, Goebbels and Goering amongst others.
* Celebrity Paradox at the end of one episode, where Drake walks in, says hi to "Megan", and asks where Josh is. Not to mention the Victorious episode where Helen

comes up, she is still the little girl of a show and mentions Crazy Steve.
* Celebrity Paradox inconspicuous, because just about everybody in Britain would recognise it as the TARDIS. This is occasionally lampshaded, with mixed success/cringeworthiness, in UK media.
* Celebrity Paradox: Presumably, a movie's actors and other works they starred in don't exist in the setting of the movie.
* Celebrity Paradox, the main character and his brother argue about Moliére.
* Celebrity Paradox: The people behind the work may not exist in the work's universe.
* Celebrity Paradox: The people involved in a work of fiction may not exist in that work's reality.
* Celebrity Rehab with Dr. Drew had many patients go on the show assuming it was a more scripted production and less a "real" rehab. Even after a few seasons made it clear it was a real show.
* Celebrity Resemblance: When another character in the story notices that an ordinary person looks like a celebrity.
* Celebrity Star: An episode of a show makes the best possible use of its celebrity guest star.
* Celebrity Superhero: A superhero who is also famous and trades on it.
* Celebrity Superhero: A superhero who's famous for their superheroism.
* Celebrity Survivor: Often times the only person to survive the apocalypse is a celebrity.
* Celebrity Survivor: The world is falling around as they speak, but characters still ask someone, "Hey, aren't you from TV?"
* Celebrity Toons: A cartoon starring a real life person who is either played by the real person or is merely a fictional representation of them.
* Celebrity Toons: Cartoons starring animated versions of real people.
* Celebrity Voice Actor: A celebrity plays a character in an animated work.
* Celebrity Voice Actor: A character is voiced by a high-profile celebrity.
* Celebrity Voice Actor in just to read a template for the role. Her performance impressed them so much they cast her as Melody anyway. She's said that it's the favorite role she's ever played, as she was a massive fan of the original film.
* Celebrity Voice Actors appear as (totally mundane) fictional characters, but the ones who appear as themselves invariably do this, with Chuck Mangione being an eccentric Mega-Lo-Mart spokesman who's squatting in the Arlen store and struggles with anger issues, while Randy Travis is a compulsive liar who steals other people's ideas and deeds to take credit for them, to name two.
* Celebrity Voice Actors phoned in from New York to record her lines via Skype.
* Celebrity Voice Actors reduced many villains to non-speaking roles after their debut episodes. Poison Ivy, however, was featured prominently in a two-parter without any lines at all.
* "Celephais," which ends with the main character finally returning to the wondrous dream-city that he created in his youth where he is appointed the chief god of all of the regions of Dream; and all he had to do was fall off a cliff and let the tides cast his corpse upon the rocks. Lovecraft
* Celery was absent in "Backyard Moon Base", "Mindy's Moon Bounce House", "Visit to Mom's Office", "A Visit to the Planetarium", "What Goes Up...", "Asteroid Patrol", "Treehouse Space Station", "Earth Camping", "Satellite Selfie", "Scientific Sean", "Beep and Boop's Game", "Constellation Prize", "Total Eclipse of the Sunspot", "Sean's Year in Space", "Lone Star", and "Jet's Time Machine"
* Celes Chere is described as having a spirit as pure as snow, but she plays more of
* Celeste And Jesse Forever Apparently they were longtime friends, got married relatively young, and realized they were better as friends.
* Celeste And Jesse Forever: Celeste and Jesse married each other fresh out of high school, which is one of the reasons why their break-up is so rocky.
* Celeste, a personification of her own deep-seated fears and insecurities. On the way, Madeline also encounters Theo, who is climbing the mountain for his own reasons, though he isn't as concerned with reaching the peak as Madeline is.

* Celeste: Coyote time is (ab)used in speedruns to extend Madeline's jumps or compensate for mistakes.
* Celeste has several of these, including "Awake", "Postcard from Celeste Mountain", the beginning sections of "Golden" and "Quiet and Falling", "Little Goth", "Exhale", and "My Dearest Friends".
* Celeste in the character of Madeline, describing her struggle with depression.
* Celeste is nailed by this: shortly after the discovery of Ishimaru's body she glumly remarks that everyone is going to die, "just like those guys died" despite having no way of knowing at this point that two
* Celeste's eponymous mountain is known for revealing the true selves of those who climb it. Madeline hopes to find inner peace in reaching the summit, while her evil reflection sabotages her journey every step, jump, and air dash along the way. The game explores anxiety, depression, and coming to terms with one's flaws.
* Celeste tells Makoto that she saw Chihiro stuffing a blue tracksuit into a duffel bag before heading to the gym, where he was murdered. When Celeste recalls this during the class trial, only she and Makoto know the color of the tracksuit. At that point, while everyone's trying to find out how that could be relevant, Mondo asks if the killer was wearing the same blue tracksuit as the victim, and hastily points out that his is black. Unfortunately for Mondo, neither Celeste nor Makoto mentioned the color of the tracksuit, and this, along with a few other pieces of evidence, implicates him as the killer.
* Celeste, the in-universe PowerPoint presentation that teaches the Wave Dash maneuver plays a muzak arrangement of the main theme.
* Celeste, the most ruthless of the murderers in the first game, gets this. Despite Celeste unapologetically claiming to having killed Hifumi after manipulating him into killing Taka, simply to escape and live a life of luxury, Makoto notices that she's still scared at the prospect of her impending death, and it's up to the player's interpretation as to how much of her story was a lie.
* Celeste: the rather bratty and annoying Noble does not fit the usual image of this trope, but his mother certainly considers that he does, and when he dies suddenly she forces his twin sister, Celeste to dress as a boy and "replace" him.
* Celeste. They're shut down each time, and Madeline continues onwards.
* Celeste to bypass the door you would normally use it on, so you can instead use it to unlock the door to the Heart room.
* Celeste tries to set up a complicated series of events that let her get away with killing Yamada while pointing all the blame toward Yasuhiro, but the exacts of the case make it impossible for him to be the culpritnote .
* Celestia’s Cake Plot, which takes place during the time when Princess Celestia and Princess Luna were fillies. In this fic, the sisters disguise themselves to sneak into a bakery so that Celestia could eat a cake that she wants to eat. Luna ends up on the bottom much to her displeasure.
* . Celestia and Luna are discussing the future of ponykind. They could theoretically make everyone immortal star goddess like themselves, but they cannot because they are being punished for past crimes, as well for the simple fact that the ponies are very very very far from being ready to join them in eternity.
* Celestia and Luna's backstories have never been given in full, the depictions have
* Celestia and Luna seem to follow this trope. Their personal lack of children could just be because they've never had mates, but they have both lived at least a thousand years, possibly much longer, and their only onscreen relatives are a niece and a nephew (and presumably their offscreen relatives). The existence of Age spells only accessible to really powerful unicorns further complicates things, as their immortality may not even be natural.
* Celestia and Luna's pegasus husband. So as long as happiness survives, so will he.
* Celestia and presumably Luna also don't need to eat, but they do because it makes a nice indulgence.
* Celestia herself plays this role in almost every major episode she's apart of, to the point where that is basically her

* Celestia is also basically a frame to add mods, that range from more detailed textures or newly discovered celestial bodies to real or fictional spacecrafts and space stations, entire solar systems (also fictional or not), and even (pictures of) galaxies. Just search for the Celestia Motherlode as it's known.
* Celestia is one of the most popular pairings that doesn't involve the mane six, and Discord/Twilight (as well as Discord/any of the mane six) pops up on a regular basis.
* , Celestia is on the receiving end of a particularly ill thought out prank by Luna, after which she mentions that she once entered a contest for best Celestia look-alike, placing fifth out of an unspecified number of participants.
* Celestia is ready to be pals with anyone, though most don't realise this and instead panickingly try to avoid anything that might displease her. In particular, Twilight's friends from Ponyville have already met her several times, and in any case, they're kind of working for her directly in a very important capacity, as they wield the Elements of Harmony that are needed to take care of the few threats that are too much even for Celestia herself. Notably, despite her close relationship with the princess, Twilight herself is often the pony most prone to overreaction of this sort, even to the point that she's had
* Celestia (Lawful Good), viewed from afar, is an enormous mountain surrounded by an infinite sea of holy water. Those on the mountain view it as divided into seven layers,
* Celestial Being forces and defectors from A-Laws soon come to their aid.
* Celestial Being. Justified that the organization is an irregular private militia, many of its members are non-military, and its people are
* Celestial Being's Gundam's also have outright optical cloaking systems, but they can't be used if the Gundam is doing anything but sitting there in standby mode, as simply turning on the GN drive will render it visible, making it useless for stealth missions or in combat. Instead they're used to hide the Gundam's while their pilots are out and about on earth.
* Celestial black magic, before he acquires and after he loses Mjolnir and his qualification.
* Celestial Bodies — Derse has purple, Prospit has yellow, Alternia's moons are green (tied to the felt) and pink. The Green Sun is the same shade of green associated with Lord English. The Cherubs' planet is colored red by a red sun.
* Celestial Bureaucracy: A bureaucracy that sorts out where people are supposed to go after they die.
* Celestial Bureaucracy: A bureaucracy whose job is to determine where people are supposed to go after they die.
* Celestial Bureaucracy, a god's political connections are just as or more important in terms of getting things done.
* Celestial Bureaucracy, and the reason given is always the need to "preserve the balance". One more cynical observer claims that nothing gives the heavens more pleasure than watching mortals deal with just these sorts of problems.
* Celestial Bureaucracy, as beings with four faces: a man's, a lion's, an eagle's, and an ox's).
* Celestial Bureaucracy fell for it, gaining immortality in the process.
* Celestial Bureaucracy, followed by major gods and many celestial functionaries, followed by other gods and powerful ancestral spirits. However, some sufficiently powerful beings are both divine and are outside this system.
* Celestial Bureaucracy: Heaven being similar to earthly official agencies.
* Celestial Bureaucracy: There's a spiritual bureaucracy dedicated to sorting out where the souls of the deceased are supposed to go.
* Celestial Bureaucracy, wears an extremely expensive-looking suit during his meeting with Johnny Davis.
* Celestial Bureaucracy whenever you die. This is the fate of protagonist Nathan, who isn't allowed into the afterlife until he agrees to sign his 21B (Decedent Acknowledgment and Waiver of Liability).
* Celestial City and the many other worlds created by the high Earth spirits in
* Celestial Deadline of breaking the spell before the second sunrise, there's an

actual rhyme whose meaning Merida must puzzle out. "Fate be changed/Look inside/Mend the bond/Torn by pride."
* Celestial Empire special government type: an isolationist kingdom where the ruler is a child from heaven and the people have little time for strange outsiders who do not understand their serene and peaceful way of life.
* Celestial gear (and Runes of Divinity) are this, providing a boost to every stat. Most high-level gear provides a large bonus to one stat and a medium bonus to two others, while Celestial gear provides a somewhat smaller boost to all of them. The exception is Critical Damage, where Celestial gear provides as much as anything else in most cases. "Good for everything, perfect for nothing" is the general view of this.
* Celestial Hebdomad, and is Heaven's most prominent fiend slayer. His Fists, the clerics and paladins who are dedicated to him, are likewise dedicated to kicking infernal and abyssal ass.
* Celestial Paragons and Archangels: Powerful angels who run heavenly affairs, directly reporting to God Himself.
* Celestial Paragons and Archangels: The highest, most powerful angelic good guys around.
* Celestial Paragons and ArchangelsThe top brass in Heaven, answerable only to one deity.
* Celestial spheres theory of the universe. Before Newton, it was understood that objects in the air will fall to Earth, yet the stars and planets could be seen hovering in the sky in fixed positions. Early philosophers reasoned that the observed "rules" for earthbound objects must end at some unknown distance from earth-the beginning of the "outer space" concept.
* Celestial Spirit Magic requires keys to open celestial spirit gates, which are basically gateways into their dimension. The manga originally gave these keys fairly plain designs until the anime decorated them more intricately. Shortly after, the manga followed suit.
* Celestials seem to have mucked around in the galaxy a lot. Three and most importantly, wormholes in the MCU (possibly because of the former two factors) seem to exist either just in orbit of or within the atmosphere of a lot of planets and can be traversed without the use of spaceships, meaning the barrier for interstellar travel suddenly drops to "hot air balloon."
* Celestial Toymaker audio dramas, he's said to have been observed taking a leisurely paddle in A SUPERNOVA.
* Celestial Triad, it is revealed that all of Tori Alexander's adventures were placed in the author's subconscious as part of the heroine's karmic debt to this universe.
* Celestia Ludenberg/Taeko Yasuhiro: The Ultimate Gambler, she styled herself as an
* Celestia, Nightmare Moon, Discord, and the Mane Six are shown on a door containing the Elements of Harmony in
* Celestiansapians could also be considered this, since they could remake all of reality with a single thought. Then recall that Ben can turn into one using the Omnitrix.
* Celestia, or others alike to generate star charts where you can choose not to display stars.
* Celestia persuades Mother Deer/Harmony to upgrade the Elements of Harmony to their full potential. She comments that normally, she would not have done this for several years, until the Mane Six had fully mastered them, but considering they're about to face Discord, they need all the help they can get.
* Celestia said she found a use for Discord's magic, hence why she went about trying to get him reformed. Fanfic writers should have a field day working out whatever that use may be.
* Celestia's cutie mark spell functions this way for the Everfree Forest (where the spell was originally cast), corrupting it over time from a beautiful, peaceful place into a twisted shadow realm.
* Celestia sometimes does some rather unethical things when trying to relieve her

boredom in
* Celestia's Rocket Adventures, Team Rocket's Robo Mega Meowth had been successfully tanking everything that could be thrown at it without any sort of damage. This streak comes to an end when it tries to attack Team Flare's ultimate weapon, with a single low-powered blast ripping the mech apart.
* Celestia's Rocket Adventures, this is how the Pokémon universe seems to translate 'alicorn', as Celestia, Luna, and Twilight all end up as Fairy-types. They may look pretty and generally friendly (and in Luna's case boisterous), but as Team Flare and Ash can both testify to, they are not to be trifled with.
* Celestia's Rocket Adventures two members of Team Flare get killed off, the first by a group of fully evolved Pokémon that had been enslaved in Dark Balls, and the latter utterly incinerated by a vindictive Houndoom. The chapters that both events feature in end before the deaths actually take place.
* Celestia's sister and co-ruler Luna, who controls the night and the Moon, has an even much harder time getting familiar with her subjects due to archaic manners and a major case of
* Celestia's VA Nicole Oliver claims that Celestia's favorite music is... '80s metal.
* Celestia to Twilight again in "A Canterlot Wedding", where she commended her for managing to bring the real Cadance back and save the day by trusting her instincts and persisting in the face of doubt.
* Celestia VS Cleverbot is the original conversation with Cleverbot in the format direct from the "Thoughts so far" button.
* Celestine and Olga would eventually learn about the existence of the
* Celestine sport this. Fitting for royal figures who delve into the arcane.
* Celestino, Yuri's former coach, is also a minor character, but if he hadn't dragged Yuri to a banquet that Yuri really didn't want to go to,
* Celesto and Celestia fusing and turning into the Great Celestial Ruler, who destroys Titan.
* Celesto Morgan looking pleased, but no rape occurs and nothing suggests Rachel made any attempts. Whatever the hell happened with Dominic probably didn't go beyond non-consensual dress-up.
* Celestus allows you to put mining modules on asteroïds, giving you tons of resources... for a short time.
* Celestus are the Thelios Federation, the Adrean Corporatist Republic, the Ducal Domains, the Zetran Dominion, the Amaranth Empire, the Leanth Circle, and the Melrehns.
* Celestus has one at the bottom of the screen, providing advice, lore, and stupid jokes.
* Celestus), humanity is canonically established as the single intelligent species.
* Celestus: One mission ask you to throw garbage into the nearest star, because it is "cheaper than recycling it".
* Celestus one of their colonies from Amaranth domination by dropping a sizable asteroid on it.
* Celestus : To quote the in-game crawl, « A feudal system in the space age ? The Duchies did it. »
* Celestus, you can wage war against Nations in your own Faction &#65533; with or without penalty, depending on what the Chancellor of said Faction thinks of rebellion.
* Celes was infused with magic as a baby, after the process was perfected and no longer caused
* Celia, desperately wanting to resurrect Roy, brings his skeleton to Grubwiggler (a Frankenstein
* Celia gets many condolence letters and flower because of Hector Bowen's death.
* Celia has a tendency to trust people who really don't deserve to be trusted, such as in "
* Celia Mauser. When the war ended, she was left to watch over the world, as their "caretaker".
* Celia S. Friedman has a main character who kills his kids and wife to be immortal

(in the prologue), and survives on the fear of sacrifices.
* Celia. She was supposed to come off as the slightly naïve "civilian" of the group, as well as a pacifist. However, she applies this pacifism
* Celibate Eccentric Genius: A brilliant person who's more in love with their life's work than with the opposite sex.
* Celibate Eccentric Genius: Eccentric geniuses who have other pursuits other than sexual interests and/or romantic love.
* Celibate Eccentric Genius: Eccentric genius who's uninterested in sex.
* Celibate Eccentric Genius who is above time-wasting romantic notions, and having an aversion to change. In one episode both Leonard and Amy decide to move too fast for their partners and put moving in on the table. Sheldon and Penny are forced to confide their hesitations about it to each other.
* Celibate Hero: A common magnet of unrequited love is someone who wants nothing to do with romance.
* Celibate Hero: A heroic character who doesn't care for romance and sex and focuses on other things that interest them more.
* Celibate Hero: A heroic single character vs. a villainous single character.
* Celibate Hero: A hero who is not interested in pursuing romantic/sexual relationships for some reason or another.
* Celibate Hero: A hero who willingly abstains from sex and relationships.
* Celibate Hero, so Suzaku and Euphemia were the only couple displayed in some openings.
* Celibate Hero still his granddaughter. The whole "'looming' babies" thing is all so the Doctor can be said to have never done what most of us must do to have children and therefore grandchildren.
* Celica and her party around, warning them of various dangers and seeming very concerned for Celica's welfare and seems to know she's actually the heir to Zofia, and Celica mentions more than once that she had a brother who died. It's decidedly a hugely unsurprising reveal when it turns out to be Conrad, Celica's big brother.
* Celica was born in September 8th, also the birth day of Virgin Mary, and it reflects her motherly and benevolent personality as well as being a nun later.
* Celina's imp cannot add, has trouble reading, and often writes letters backwards in
* Celine Dion's "I Hate You Then I Love You." The title should be self-explanatory.
* Celine Herondale's suicide takes place long before the story proper, but her relationships with current characters make her important.
* Cell, a creature that killed thousands of humans by absorbing their bioextract, and absorbs Cyborgs #17 and #18 to achieve his complete form, is left utterly terrified by the power displayed by Gohan in his
* Cell, and eventually a collective with an elaborate plan to turn all the unaffected humans into Phoners.
* Cell and Freeza have wide followings in the fandom, the former especially the
* Cell. Another character had picked up an AKS-47 assault rifle from a gun enthusiast's house, but when he fires 'Sir Speedy' it empties most of the bullets into the air.
* Cell, another King zombie novel, has people turned into zombies by cell phones.
* Cell arguably takes losing even worse than Frieza; whereas Frieza deliberately held back to delay Namek's explosion so he'd have time to escape, Cell fully intended to die in his own blast as long as Gohan wouldn't win.
* cellar or daddy-long-legs spider. However, this is untrue, as the daddy-long-legs spider's fangs are perfectly capable of penetrating human skin and their venom is both extremely weak and injected in such small quantities that it has no effect on humans.
* Cellar Secrets, as she wonders if she should get married to someone to delay Nui helping pick up any financial slack.
* Cellar Secrets. Because the she tends to communicate nonverbally, Ryuuko gestures to Uzu, however, unlike her sisters, he can't understand her gestures, in which case, she gets frustrated and hits him.

* Cellar Secrets green but his natural hair color is a dark brown, Nonon's hair is a darkened auburn, instead of pink, Houka's hair is onyx, and Rei's hair was dark gray (almost black).
* Cellar Secrets justifies this because Satsuki wasn't sure how to explain death to Ryuuko, so she tells the latter that their dad "went up to where the stars are", keeping the point that their father is gone and won't come back. The chapter after that has her using a variant of that ("going to the sky") to explain the situation of Shiro passing away, to which Ryuuko understands and protests. Earlier, this is played with as Nui reminds Ryuuko that Ragyo is gone but she says "she passed away" instead of "she died".
* Cellar Secrets). What definitely forestalls calculation is the fact that when her sisters find scant photos of Ryuuko, they have the month and date on them but they don't have a year on them, in which case they go by her appearance in the photos, along with the fact that the two that did know, Ragyo and Rei, her secretary, are dead and there are no real legal documents of her.
* Cellar Secrets, while she already had regrets about how she treated her children, Ragyo resolves to make amends with them just as she dies of terminal illness, telling them she loved them and wishes very much she change what she's done, acknowledging how horrible of a mother she had been. When they have her funeral a little while afterwards, Satsuki then forgives her.
* Cellar Secrets, with a dying Shiro, in chapter 25. However, unlike how she'd normally respond to it, Ryuuko cries.
* "Cellbound," a 1955 Tex Avery-Michael Lah cartoon at M-G-M starred a squat version of Tex Avery's Spike character as a prison inmate. He escapes and hides out in the console of a TV set on a train, entertaining ideas of his new found life of freedom, until the TV set he's in is loaded onto a truck and delivered to the prison warden's office.
* Cellbound: The protagonist, a prisoner trying to escape jail inside a TV, is joyously pondering all the wonderful places in the world he's going to visit... then he slowly realizes that the TV has been delivered into the jail warden's office. Cue him baring his fangs and doing one heck of a jaw drop.
* Cellbound upon hearing some Dixieland jazz (then goes back to serious and stoic within a single animation frame).
* Cell, cell phones start turning people into zombies. It's a lot better than it sounds.
* Cell comes off as this. When the bus driver keeps honking his horn at Cell to get him to move off the road, Cell simply starts saying "beep" in time to it. Also, the first thing he does after becoming semi-perfect is
* Cell counterpart, who tries to do the same, but only had a few minutes of screentime so he can't even get past the first line before dying.
* Cell decides to self-destruct and take the Earth with him. Before the heroes can get over their shock at Goku's death, Cell returns stronger than ever and murders Trunks.
* Celldweller features a person who has fantasies about a beautiful seductress, but he never wants to leave.
* Celldweller's work. It involves industrial metal and techno-beats with cyberpunk artwork on its covers.
* Celldweller whilst thinking of an ex and being unable to move on. "It's better to be broken than to break".
* Cell 'eats' people by stabbing them with his tail and sucking them until nothing remains except their clothes. All the while the people being eating is fully conscious and screaming in agony. Androids 17 and 18 arguably had it worse since they were swallowed whole by Cell.
* Cell gains this attitude after gaining his perfect form. Best showed when he announced the Cell Games to the world on live television.
* Cell gets a bit of this too, in the English dub. His voice starts out as a sort of hissing rasp, and then grows deeper and more cultured as he gets more powerful. But it drops to downright Satanic levels when Cell gets ready to do something truly evil,

* Cell gets hit with it a second time after becoming perfect and effortlessly slapping Vegeta, who easily outmatched his Semi-Perfect form, around. Vegeta breaks out the
* Cell has an unusual twist on this; his Saiyan cells grant him a Zenkai boost whenever he recovers from grueling injuries (such as losing a limb), with the power boost being proportional to the injuries sustained. Applying that to his coming back
* Cell has a villainous example when he's back as Super Perfect Cell after having been blown to bits by his own
* Cell has this ability as his schtick, being able to copy anything once he absorbs them. Thanks to his trait of assimilating DNA as well, he gains everyone's secondary powers as well, including Namekian super regeneration, Saiyan's intense resilience, and Freeza's ability to survive without an atmosphere.
* Cell himself briefly attempts something similar to Ultra Super Saiyan when he panics due to
* Cell himself counts in the main series. The best way to describe him is being a
* Cell himself makes the exact same mistake. After ascending to his Perfect form, and defeating Piccolo, Vegeta, Trunks, and Android 16 in the process, he becomes the most powerful being on earth. Rather than kill everyone, he opts to give the Z-Fighters 10 days to prepare for a tournament. Those were probably the
* Cell is also this to even greater degrees. While Frieza is satisfied with the physical suffering of his victims, Cell prefers to add the psychological element to his cruelty, terrorizing and
* Cell is an interesting example. While he has all of the skills of his DNA material, he prefers to build up his power by devouring others and extracting their hard-earned power for himself. All of his major power boosts come from the life forces he consumed, unlike the Saiyans who became stronger through
* Cell is one of the most notably bullet resistant villains, given that he spent the majority of his time hunting down regular humans
* Cellist Jacqueline du Pré was forced to retire from performing in 1973 at the age of 28 due to multiple sclerosis. The disease would eventually claim her life 14 years later.
* Cellist Jacqueline duPre converted to Judaism when she married conductor/pianist Daniel Barenboim.
* Cell makes a habit out of this one; not long after he makes a request to a call-in radio show. The song he requests?
* Cell manages to work one into his broadcast announcing the Cell Games:
* cellmate going to make one for Earl, but ate it.) Earl then gets moved to the general population barracks instead of a regular cell.
* Cell milks this trope for all its worth when Vegeta's Final Flash cuts away his side section, even throwing in disgrace at being beaten by a Saiyan like Frieza used to. He then immediately breaks the act and mocks Vegeta for forgetting he has Piccolo's regeneration ability.
* Cell, much like Freeza, is a genocidal sadist with the temperament and mannerisms of a teenager, which makes sense given his Imperfect Form is more or less analogous to adolescence/late childhood.
* Cello, the family's pet dog, Sunny, barks loudly when it is near the titular musical instrument.
* Cell phones are the bane of Pokémon trainers everywhere, as demonstrated in
* Cell Phones Are Useless. So companies typically offer deals, or dress up the towers to hide them from view.
* Cell Phones Are Useless: To avoid plot holes, cell phones fail far more than they should.
* Cell Phones Are Useless: You can't use a cell phone to call for help when you really need to.
* Cell phones can be useless is thankfully often averted nowadays, sound can be distorted and background noise can drown out important info.
* Cell Phones Could Have Solved This Plot: Classic works that wouldn't have made

sense in a world with mobile phones.
* cell phones to describe it. On the other hand, the overreliance on mobile phones has led to the Japanese almost missing out the Internet boom on the Oughts, as few Japanese owned a computer at home, due to the expense and cramped living spaces, only saved by the eleventh hour by the Internet-capable smartphones (including iPhone, of course) and cheap and plentiful laptops arriving mid-decade.
* cell phone technology was derived from black hole research. E.T. really did give us WiFi!
* Cells Alive System: Experimental technology that uses an oscillatory magnetic field to prevent crystallization of the cell membranes, it however is still being tested.
* Cells at Work!: AE3803 is a rookie red blood cell who is still trying to feel her way around the human body, and often has to ask questions about how things work.
* Cells at Work and Friends! a badass squad leader who can stop a viral invasion almost single-handedly.
* Cells at Work and Friends!: Most of the humor comes from Killer T's overly masculine outward behavior and the social awkwardness it's trying to mask. It's funny, but also a little sad — Killer T openly admits to himself that he took his drive to become a manly, merciless germ-killer so far that he can't make friends or openly pursue some of his hobbies, but he doesn't feel like he can show a softer side now.
* Cells at Work! are always oddly calm and cheerful even as they're ruthlessly butchering invasive organisms.
* Cells at Work: Baby! bacteria. It's so big, it looks more like a vehicle than a weapon at first.
* Cells at Work: Baby! clearly aren't. However, they are portrayed as children to show that, like the cells of real-life newborns, they haven't entirely grown into their roles and are somewhat inefficient in their jobs.
* Cells at Work: Baby!: Platelet either can't or won't speak. This trait seems unique to her — her fellow Platelets are shown speaking — but no reason has been given for it.
* Cells at Work!, bacteria and viruses are effectively presented as alien invaders. All of the human cells are represented as humans. By contrast, bacteria - being cells foreign to the body - span myriads of monstrous forms, but are still able to speak and have their own personalities, representing the fact that just like our own cells, they are still living organisms. Viruses, meanwhile, are presented as Starfish Aliens that cause a Zombie Apocalypse by hijacking cells. They do not speak, have no discernible personality, and don't even look like living things - which is appropriate, since it's questionable whether viruses in Real Life are even alive.
* Cells at Work: Bacteria!: Considering how one setting of this spin-off is the host's intestines, it's not too surprising that she would be portrayed as having some notable digestive issues, such as excessive flatulence.
* Cells at Work: Bacteria!: Downplayed and gender-inverted. The host body (a teenage girl in high school) doesn't seem to have any serious issues, but she doesn't seem to have the healthiest eating habits. The good bacteria even question how a teenage girl could eat so much meat.
* Cells at Work: Bacteria! gang, White Blood Cell U-1146 presents relevant biology facts via narration boxes throughout the series.
* Cells at Work! bacterium who manages to escape the Neutrophils who wiped out his brethren and tries to infect the body.
* Cells at Work! before they awakened in the new body with no recollection of where they are.
* Cells at Work! CODE BLACK, as it means the host can't fulfill the ultimate goal of any life form - that is, reproduce.
* Cells at Work! CODE BLACK depicts a thrombus (blood clot). The original deposit is shown as a mass grave, but when the Body (on a weekend-long TV marathon) stands for the first time in two days, it becomes a massive ball of fused-together corpses steamrollering everything in its path.

* Cells at Work! CODE BLACK, has a similar ahoge, though he tends to be more competent and serious than her.
* Cells at Work! CODE BLACK, has the Leukyocytes grab assault rifles and rocket launchers when their usual attacks fail to destroy a purine crystal. They're literally breaking out the big guns.
* Cells at Work! CODE BLACK. It also has shades of the Hostile version, as the liver is where red corpuscles are recycled, which is depicted as having an old man's corpse eaten by a stripper.
* Cells at Work! CODE BLACK: It's never said that the Kupffer Cells can't speak, but none of them are shown speaking at all.
* Cells at Work! CODE BLACK of the original series, since they already know the franchise's M.O. when it comes to morality plays and edutainment.
* Cells at Work! CODE BLACK, penicillin is represented as a satellite zapping the cell walls off the invading gonococci, leaving them vulnerable to the white blood cells.
* Cells at Work! CODE BLACK three times as large as the rest of the cells in the body, resemble berserk gorillas when they go into an antigen killing rampage, and their commander sports an impressive beard.
* Cells at Work! CODE BLACK when said cell realizes that the body is incapable of reproducing, the ultimate goal of any living organism.
* Cells at Work! depicts the influenza virus (e.i. cold or flu) as this.
* Cells at Work!: Even after implicitly surviving harsh training in the thymus, Naive T Cell screams in terror and runs when an influenza virus comes. After a pep talk by Dendritic Cell, he becomes Effector T Cell and returns to take out the virus.
* Cells at Work! features a literal example! Actual viral infections are depicted as hats, masks, and other artifacts that latch onto healthy cells and brainwash them into making more and spreading them around.
* Cells at Work! features thymocytes (developing T cells) going through a training exercise where they have to identify and attack cut-outs of Ordinary Cells that have become cancerous or been infected by a virus.
* Cells at Work! for Neutrophils like U-1146. Each of them possesses both smaller knives to be thrown at enemies and six larger combat knives strapped to their legs and hips.
* Cells at Work! for the cells as if they fall out into there, they can never return home.
* Cells at Work! has PMS as the cause of the abnormalities that attack the cells that work in the female body.
* Cells at Work! has some elements of this in early volumes, with many chapters revolving around the immune cells having to deal with some new pathogen or other threat.
* Cells at Work! has the Platelets. As actual platelet cells are far smaller than most other cells, they are depicted as a team of small children that reconstruct areas of the town after injury. Although their small size can be an inconvenience, they are otherwise both highly-committed to and highly-skilled at their job.
* Cells at Work!: Helper T Cell is a relatively laid-back desk jockey who reports on the goings-on of pathogens from behind his desk, while the Killer T Cell Squad Leader is a stern and scrappy front-line fighter who bosses around his subordinates, especially the rookie Naive T Cells.
* Cells at Work! (hosted by an actual doctor) and is required reading in at least one Chinese high school.
* Cells at Work! induce this reaction on everyone, in-universe and out.
* Cells at Work!. It's somewhat justified in that the Platelet's job (closing wounds as fast as possible) is vital to the body's survival.
* Cells at Work!, it turns out Red Blood Cell and Neutrophill already met each other when they were still an erythroblast and a myelocyte (basically children cells) when a bacteria attacked the bone marrow where they were at. However, they only met briefly that one time and don't see each other again until they are adults. In present time, Red Blood Cell briefly does contemplate if that myelocyte

is Neutrophill but quickly dismisses it as too much of a coincidence.
* Cells at Work!: Memory B Cell is in charge of recognizing and targeting pathogens the body has encountered before, but tends to freak out wildly at even the most minor threats (like the Cedar Pollen Allergens).
* Cells at Work!) personifies white blood cells as highly-trained pathogen killing machines.
* Cells at Work: Platelets!: All of the Platelets default to this personality to some extent, though some less than others. Backwards Hat, Gazer, and Vice Leader are particularly downplayed examples.
* Cells at Work: Platelets! is a comedy manga focusing exclusively on the daily lives of the Platelet crew, who were important but minor characters in the original.
* Cells at Work!: Red Blood Cell AE3803 has a tendency to let out a horrified shriek whenever something goes wrong, whether it's being attacked by germs or getting yelled at by one of the Killer T Cells for making a wrong turn.
* Cells at Work!: The cedar allergies episode shows that every specialized cell reacting the way it's supposed to the presence of allergens causes a feedback loop that causes apocalyptic devastation.
* Cells at Work!: The opportunistic bacteria are largely a bunch of fair-weather friends who side with whoever has the upper hand and will switch in a moment's notice. Because of this, they don't get much respect in return; the harmful bacteria consider them a bunch of suck-ups who can't be relied on, while the white blood cells would rather just kill them off even if they're friendly - they're still germs, after all.
* Cells at Work! to fight or identify certain threats (except for neutrophils-ie, police officers who are dab-hand at fighting most bacteria).
* Cells at Work! to show up and curb-stomp the Effector T Cell, requiring the exhausted cells to come up with a new strategy in a hurry.
* Cells at Work! to when Helper T Cell and Killer T Cell were thymocytes (developing T cells), which is depicted as them being rookies going through basic training during their time in the thymus.
* Cells at Work! wear shorts, while male ones wear pants. As erythroblasts, the boys wear suspender shorts while the girls wear dresses.
* Cells at Work!, when the platelets string up hundreds of blood cells (including the protagonists) in fibrin and use them to clot up the abrasion, with the implication that they'll be stuck like that for at least three days until the wound heals.
* Cells at Work! where stem cells produce blood corpuscle progenitor cells from a machine that looks like a big grey pokéball. Megakaryocytes (who produce platelette cells), however, are depicted as Momzillas who actually bear children.
* Cells at Work!, which features an abstract depiction of life for cells in the human body, features a number of puns.
* Cells at Work!, which is about a human body depicted as a city populated by anthropomorphized cells, red blood cells are depicted as workers in a package delivery service. They deliver oxygen and nutrients to various parts of the body and then carbon dioxide to the lungs.
* Cells NOT at Work!), a Neutrophil (2310), and an unnamed Erythroblast.
* Cells NOT at Work!, even though it’s her instinct and the law of the land.
* Cells NOT at Work! to explore youth-related issues that the original series couldn't easily address.
* Cells NOT at Work! who refuse to grow up and seize their destiny as full-fledged Red Blood Cells.
* Cell's obsession with absorbing Androids 17 and 18 so he can become perfect. He absorbs them with that phallic tail of his and it gets really creepy really fast. In the English dub (not sure about the Japanese version) Cell uses pick-up lines on them both before he absorbs them while getting his rape-face on. He tells 17 that he is "amazingly efficient" and tells 18 that she's "poetry in motion".
* CellSpex: A female online film critic who focuses primarily on animation.
* CellSpex. Though she apparently had to learn how to do this at will at some

point, as the first time it happened, it just sort of... happened.
* Cell surviving his own self-destruction and returning stronger than ever is a textbook example, as he gains an enhanced version of his perfect form; the same one that Gohan had beaten out of him just prior.
* Cell's voice is this in both the Japanese and Mexican dubs. In Japanese, his voice is more booming due to him being voiced by
* Cell technically has no gender, and is only referenced in the English manga as an "it". In the anime, however, Cell has a male voice actor and is only called a "he". However, this can be explained by the fact that, with the exception of Piccolo, all of his known genetic donors are male.
* Cell, the hive mind zombie like people called the phoners can only remain active and hunt during the day. At night they become lethargic and cannot move until the sun rises. Most people who are still normal have quickly learned to only move at night when the phoners are inactive.
* Cell to Singularity: Evolution Never Ends: Darwinium can be purchased to speed up production or get other bonuses. 1 Darwinium costs approximately 4 cents.
* Cell to Singularity: Evolution Never Ends: Late into the Emergent Age you lead humanity into singularity by researching AI, Mind Upload and Self Assembly. Actually buying it for the first time results in the game resetting for Metabits.
* Cell to Singularity: Evolution Never Ends: Purchasing Singularity for the first time results in a simulation crash and game reset, allowing you to spent newly earned Metabits based on how much Entropy and Idea was cumulatively earned for special upgrades. Later on you can just reset for Metabits whenever you need to.
* Cell to Singularity: Evolution Never Ends: The mobile port has the option to watch an ad to add four hours to doubled Entropy and Idea gain.
* Cellular as it's revealed several Homicide Detectives are in on a corruption ring.
* Cellular: "He's the one on a cell phone." "EVERYONE'S on a cell phone."
* Cellular phones will often use flashing lights, in the form of an LED or the phone's screen (sometimes both at once) in conjunction with the ringtone and vibrating function in order to get the owner's attention. Some phones can be programmed to flash the light in different colors and patterns based on
* Cellular starts off as trying to trace a woman who was kidnapped by unknown men but soon found out some of the cops in involved in a greater plot
* Cellular. The teacher's son is worried that he'll have to have her as a teacher when he attends her school next year; she thinks it would be a splendid idea.
* Cell, upon reaching his Perfect form, lays an effortless beatdown on Vegeta (who was way too powerful for him in his previous form) and then defeats Trunks only after humiliating him, then abashing him about his poor judgement in powering up too much to move fast. He then claims that both Super Saiyans have disappointed him and that none of the heroes are a threat to him now. This is part of why he lets Vegeta and Trunks live— the other part is his desire to fight powerful opponents, giving them more time to become stronger.
* Cell usually walks calmly towards whoever his target is, safe in the knowledge that their fear will cause them to trap themselves, though he also occasionally suddenly breaks out of the walk to do a surprise rush at his opponents.
* cell walls in his esophageal tissue might have something to do with that.
* Cell was known to be able to regenerate lost limbs (and head in one instance) in canon
* Cell. What makes him stand out among the rest, however, is that he is a very skilled fighter who
* Cell, which is confirmed to be a seperate Earth from the Prime Reality yet still part of its multiverse, since Roland and his ka-tet briefly visit it in their own series).
* Cell, who couldn't be called a human by any means, is a manufactured organism engineered by Dr. Gero by taking genes from Goku, Vegeta, Piccolo, Frieza and King Cold (with the dub claiming genes from more characters were also used).
* Cel Shaded music video done by Takashi Murakami, who did the artwork for the album it appeared on.

* Cel Shading: 3D computer animation that is colored and shaded to look two-dimensional.
* Cel Shading: A rendering process used to make 3D models look like cartoons and/or comics.
* Celtiberian Wars and sent to Hispania the man who had conquered and destroyed Carthage, it became a matter of time that Numantia suffered the same fate.
* Celtiberian Wars, but they achieved little success, and at the latter it even coincided with Rome's worst local defeat against the famous rebel Viriathus.
* Celtic and other British isles tribes believed that lakes and other bodies of water were portals to the spirit world. Archaelogists occasionally encounter finds of worked silver cauldrons, containing many valuable artifacts, that were deliberately dropped in lakes or bogs as offerings. Both cauldrons and lakes also pop up frequently in the preserved Celtic and Welsh legends that have survived to today as portals to the underworld.
* Celtic Championship Wrestling and Over The Top Wrestling — the two biggest promotions in Ireland, who both run monthly shows. OTT is an exclusively over-18's show with emphasis on larger than life gimmicks, extreme rules matches and general drunken fun. CCW is family friendly with a lot more focus on wrestling. They do the occasional over-18's show themselves, however.
* Celtic Championship Wrestling Bedlam Billy carries around a puppet called William who he talks to.
* Celtic Crusades trilogy, surviving to the present day as the Benevolent Order.
* Celtic cultures, and particularly the Irish culture, have their numerous admirers, too - be it for the richness of those cultures, their fascinating histories or their
* Celtic folk hero Cu Chulainn, Cu Chulainn has to take his charioteer Loeg aside and translate to him what exactly they were saying between all the riddles and obscure references. The explanation is twice as long as the conversation itself.
* Celtic Folk Rock band Emerald Rose has "The Chicken Raid of Cymru", a very bizarre and funny song in the style of ZZ Top, about a Celtic livestock raid that decided to go after chickens instead of the traditional cattle or sheep.
* Celtic Frost, particularly the song "Synagoga Satanae," which, as you may have guessed, is Latin for "The Church of Satan."
* Celtic Frost's most influential bands and is one of the most imitated bands in the metal genre.
* Celtic Frost's sound, it must have been quite a dark cloud to emerge from.
* Celtic Frost, which features such songs as "A Dying God Coming Into Human Flesh"
* Celtic, leaving the hero Cuchulain to fight her armies singlehandedly.
* Celtic Mythology, Aengus Og is a male example, associated with love and sexuality as well as youth and beauty. The Morrighan is primarily a war goddess, but has strong elements of fertility and sexuality, similar to Ishtar.
* Celtic Mythology, an ancient Irish myth, Lugh of the Long Arm shoots a sling stone through his grandfather Balor's eye, driving it into his brain and killing him.
* Celtic Mythology (ancient Welsh, Cornish, Breton, Scottish and Irish)
* Celtic Mythology", and her most infamous moment was being responsible for the death of Ireland's greatest hero because he was too tired for a one-night stand.
* Celtic Mythology, and his mouth would stretch down to his chest. Even if he wasn't exactly an evil guy, people tended to be really uneasy around him.
* Celtic Mythology, another portal is located in a lake in Ireland. The giant Llasar Llaes Gyfnewid and his even more gigantic wife, Cymidei Cymeinfoll, emerge from here carrying the Cauldron of Rebirth.
* Celtic Mythology are a tribe of related deities, mortals, and demigods.
* Celtic Mythology, a two-handed sword which can emit destructive energy beams.
* Celtic Mythology, but it's safe to assume that most men were fine with a mysterious female warrior showing up and asking to sleep with them.
* Celtic Mythology: Cu Chulainn slept with Scathach while she was training him to fight. He then became the lover of her daughter, Uathach. If that wasn't enough, he then slept with Scathach's sister, Aoife.

* Celtic Mythology, Emer and Fand both loved Cu Chulainn so much that they BOTH were willing to give him to the other.
* Celtic Mythology, Fionn McCumhaill had a variation — his hands could imbue water with healing properties.
* Celtic Mythology for Diarmuid, particularly when his lord's fiancee, Grainne, betrayed her intended and pursued Diarmuid instead, leading directly to his death.
* Celtic Mythology had a place called the Otherworld, the really weird home to the faeries and all sorts of mythical creatures.
* Celtic Mythology has crows, which is her preferred animal form. Badb, a goddess whose name means "crow," is either one of her titles, her sister, or an aspect of her, depending on the source.
* Celtic Mythology has gods, elves and faeries all over the place, and it's hard to tell where one stops and another starts. Also, the offspring of gods and mortals are generally above mortals but not quite at god level, though they still have no particular qualms about telling the gods where to shove it, and then shoving it there.
* Celtic Mythology is a cloak of mists which could make the wearer invisible, or make sure that two people would never meet again.
* Celtic Mythology is buried somewhere in the South-East of England to guard the British Isles against invaders.
* Celtic Mythology, is notorious for visiting misfortune and ruin upon those who reject or fail to notice her. Cu Chulainn, who either fails to recognize her or rejects her depending on the myth, is one famous victim of her resultant revenge, though Cu being a consummate badass, he does not make this easy for her.
* Celtic Mythology is that of a divine being being transformed into an animal (or in some cases, grain), eaten by a woman, who became pregnant with them in their new form.
* Celtic Mythology, Maeve (or Medb, or whatever Walisic naming you deem correct) holds back her period until the Big Battle ends. And then it's flood time, too.
* Celtic Mythology of damage, and while holding it he can't be surprised. Only he can wield it. In battle it shines with a light so bright that his opponents can't look at him and take a penalty to hit him.
* Celtic Mythology of the legendary Breton city of Ys used to take a different lover to bed every night provided the lover wore a black mask during their intense evening of pleasure. However, at the first rays of dawn, the drawstrings of the mask would tighten and strangle the unfortunate suitor.
* Celtic Mythology placed on him. He must never turn back on a journey, must never turn down a challenge, and must never give his name. One day, Connla decided to go on a quest to meet his father for the first time. When he finally met Cu Chulainn, he was challenged to a fight for refusing to introduce himself. Cu Chulainn only figured out who he was fighting after Connla was killed, and was struck with grief.
* Celtic Mythology possessed three spears, each of which would kill a king when thrown. When he used them against Queen Maeve's army, they all missed, because there were no kings there. When they were thrown back, the first hit Laeg, considered a king among charioteers; the second hit Lia Macha, king among horses; and the third hit Cúchulainn himself, who was king of warriors.
* Celtic Mythology: Queen Medb was assassinated by her own nephew Furbaide when he shot a piece of cheese at her with a slingshot while she was bathing in a lake.
* Celtic Mythology than most pantheons, who can hold their own in a fight even if it's not their chief priority.
* Celtic Mythology that needed to be stored soaked in a bath of blood or poppy milk (depending on the telling) to keep it under control.
* Celtic Mythology: The conflict between the Tuatha De Danann and the Fomorians over the ownership and right to settle the island of Ireland from Irish Legends.
* Celtic Mythology, the hero Cu Chulainn learned fighting skills from the female warrior Scáthach for a year and a day.
* Celtic Mythology there's Ys, the famous drowned city off the coast of Brittany, the Welsh kingdom of Cantre'r Gwaelod which met a similar fate, the sunken Cornish kingdom of Lyonesse, and Avalon which, in some versions of the legend, also sank

into the sea.
* Celtic Mythology. The valiant and noble warrior Diarmuid is sent by his King to collect the lovely Deirdre, the fairest woman in all Ireland, for her arranged marriage to the King Diarmuid serves. The King explains that he can only trust Diarmuid to be principled enough to ensure the beautiful woman arrives safely, and still a virgin. However, she is less than thrilled at being married off to a man twice her age. Romance begins and the two elope as lovers, enraging the king who sends warriors to track and slay them.
* Celtic Mythology: The vicious warmonger Queen Medb was assassinated by having a hunk of cheese shot at her with a slingshot while she was bathing in a lake. Even worse, the cheese was a last-minute choice: the assassin Furbaide (who was also her nephew) had been practicing with his slingshot for the kill before she arrived and unknowingly used up all his stones. All he had on him when she finally showed up was the cheese in question, which was presumably supposed to be his lunch.
* Celtic Mythology, the warrior Ferdiad has invulnerable skin. He and Cú Chulainn fought for three days until Cú Chulainn drove his magic spear through Ferdiad's anus, unleashing the barbs in the spear throughout his body.
* Celtic Mythology until he defeated one hundred men at every ford from Ailbine to the Boyne, slain her evil shape-shifting aunt, salmon-leaped across three ramparts to reach her, killed each of her three brothers' teams of guards while leaving the brothers themselves untouched, and personally carried both her and her possessions out of her father's castle. After some training under the warrior woman Scathach, he did exactly that.
* Celtic Mythology was a major badass before and after losing his arm (which also meant losing his right as king, since no handicapped man may rule the tuatha). He later got it replaced by an arm of lifelike silver by Dian Cecht.
* Celtic Mythology was given the spear Gae Bolg by his combat instructor, the warrior woman Scáthach, who also taught him him to use it. When it pierced an opponent its barbs opened up inside, killing the victim. It could only be removed by cutting it out of the corpse.
* Celtic Mythology were turned into swans, a Welsh king got turned into a boar, Gwydion and Gilfaethwy were stuck spending three years as a breeding pair of animals that changed every year, Oisin's mother was changed into a doe, and so on.
* Celtic myths have several examples of gods, heroes or giants whose heads continue to talk, drink or recite poems after having been severed.
* Celtic punk bands often attract older fans of Irish and Scottish Traditional Folk, as well as their more typical young, punk-orientated fan base.
* Celtic society allowed a man to take a second wife under Brehon Law. One of them would be known as the 'Chief Wife' and was allowed to abuse the second if she wished.
* Celts, they shouldn't even be speaking English. Or what we think of as English, anyways.
* Celty ends up fangirling Shizuo during his fight against Saika's 'children', much like how Shinra did when he and Shizuo were in school.
* Celty Sturluson and has a scar that goes all around her neck, everyone is led to believe that Mika is a corpse that has had Celty's missing head grafted on to it to give it life. It later turns out that Namie manipulated Mika into undergoing plastic surgery that would make her resemble Celty, and subsequently gave her memory-altering drugs to hide the truth.
* Cementerio Del Terror, Jorge, Oscar and Pedro decide to prank their girlfriends by lying about the party they were going to, and then prank them again by stealing a corpse from the morgue to hold a fake black mass with a book Jorge found. Big mistake.
* cement mixer advertisement, based on an urban legend, has a married cement mixer driver come home to find a fancy car in his driveway and sees his wife with another man. He fills the car with cement in a fit of rage, only to find he was giving them the car.
* Cement Shoes: A method of murder/body-disposal occasionally used by gangsters, in which a (live or dead) victim gets tied up with concrete so that they'll sink down

to the bottom of water.
* Cement Shoes and go on their way. The victim being suddenly shot also has more shock value.
* Cement Shoes trope is about this. A person's feet are placed in buckets of cement, which hardens around them and forms a weight. The person is then thrown in a lake or river where they drown.
* Cement Shoes: When a (live or dead) victim gets tied down with blocks of concrete so that their body will sink down after being thrown into a body of water.
* Cemetery Boys is a paranormal romance/mystery centering on the relationship between a transgender boy and the ghost of a gay boy.
* Cemetery Boys (transgender male main character, gay male main character, queer romance).
* Cemetery Dance, Pendergast is shot by the novel's antagonist and eventually collapses from blood loss. The final chapter makes it seem like he passed away from his wounds for 2-3 pages before revealing he's sitting there alive and well in his hospital bed.
* "Cemetery Girl" being prime examples. "What kinda SICK FUCK WOULD STEAL FOUR DEAD BODIES ANYWAY? Details at Eleven."
* "Cemetery Girls" by Schoolyard Heroes is about a Gendercide in which all males die.
* Cemetery Man changes expression from serious (at first) to smug (when Francesco realizes that She is the old guy's widow) to anger (when She and Francesco are having sex on his grave).
* Cemetery Man, Francesco Dellamorte and his mystery woman make it on top of her husband's grave, at her request ("He would have liked to know.") Unfortunately, in this particular cemetery the dead are prone to rise seven days after burial—her husband digs his way out, catches them mid-act and promptly takes a bite out of his wife's arm, whereupon Francesco impales him with a cross.
* Cemetery Man), Rupert Everett's dimwitted sidekick, Gnaghi, keeps the zombified head of the mayor's 12-year-old daughter inside a broken TV. There's also a scene where Rupert kills a busload of zombie boy scouts, killed in the same accident as the girl.
* Cemetery of Terror, five children head out to the titular cemetery on Halloween night because they were dared to go to the deepest part of the cemetery and count to a hundred before leaving. This puts them straight in the path of an undead serial killer.
* Cemetery of Terror, various characters are introduced, and ultimately twelve of them are put in the path of the psychotic killer and his army of zombies. They are three male college students and their three girlfriends out partying, five children out on a dare (the oldest being of about 14 years old and the youngest about 8), and a Dr. Loomis-esque doctor in search of the sadistic killer. Now, take three guesses as to which five characters survive the killer's rampage.
* Cena has on record stated that Chris Masters is the physically strongest opponent he has ever faced. Masters is the only competitor who has legitimately rendered Cena unconscious, and he has done so three times.
* Cena himself outright stated on an episode of RAW in 2011 that Punk was the only man in the entire
* Cenarion Circle but with Shamans, after having several pre-expansion storylines dedicated to them.
* Ce'Nedra, but improved a bit once the pair of them had matured a bit.
* Cenerentola" by Giambattista Basile persuades the heroine to get their fathers to marry them but then abuses her.
* Cenotaph into a battle to the death. Then, when it looks like Kaiser might get away, she makes sure he is distracted and off-balence at a crucial moment. Kaiser was the one she thought would be harder to take down, ultimately.
* Censored Child Death - A child dies, but their death is never seen onscreen.
* Censored Child Death, but never shows children getting killed on-screen.
* Censored Child Death: Children are killed offscreen, or the camera obscured this when it happened.

* censored English dub are often uncomfortable with this and have produced multiple stories that usually involve Uranus becoming a man or having been a man in a former life and getting this "corrected", usually by magic. This was not helped by the bizarre "Save Our Sailors" website promoting the idea of a male "Prince of Uranus" being accidentally reincarnated as a female Sailor Uranus as canon (which made them not homosexual anymore).
* Censored for Comedy: It's so disgusting you can only see vaguely what it looks like behind censor pixels.
* Censored for Comedy of Bowdlerism, often showing how poor censorship can make something seem even dirtier.
* Censored for Comedy: Scenes with innocent dialogue have words randomly bleeped out to give the appearance of swearing.
* Censored Title: A work has the title censored so that people can mention the work without having to say bad words.
* Censored Title: When a title has to be changed because it's considered "inappropriate" for its target audience.
* Censored Title: When the title of a work is censored for some reason.
* Censor: Enid obsessively watches Frederick North's films while trying to unravel the mystery of her sister's disappearance. She also firmly believes that films drive people towards psychosis and violence.
* Censor Monkeys appear to be covering their eyes, ears, and mouths during all of their appearances, respectively.
* Censor Shadow: Nudity is censored by keeping the character's private parts hidden in shadow.
* Censorship by Spelling or if the person can't spell or comprehend what's being spelled.
* Censorship by Spelling: Spelling out a word in hopes that someone hearing you won't notice the word being spelled.
* Censor Ship. On the Censor Ship, the background clouds and the regular enemies are censored out, and one of the enemies is the "Censor Sheep". Enemies here have a chance to drop Censor equipment, which take on the appearance of black rectangles of varying proportions.
* Censorship using onscreen text: Wendy is often seen topless with the word "
* Censor Steam: Censoring nudity by covering the body with steam or smoke, also a Bathing Trope
* Censor Steam: In reality, steam is sometimes transparent, and can't be trusted in covering body parts when it isn't.
* Censor Steam: Steam or smoke is strategically placed to conceal nudity.
* Censor Suds: Censoring nudity by having soap bubbles cover up the character's naughty bits, also a Bathing Trope
* Centaur has a predominant Heavy Metal/Cyberpunk feel, with its half-human half-motorcycle creature and bleak black-and-white artwork.
* Centaur has small red eyes, as if his bestial face, inhuman form, and dominatrix-inspired design didn't raise enough warning flags.
* Centauri ambassador Londo Mollari's aide Vir mentions that he'd been eating at a human fast food restaurant called
* Centauri have six prehensile tentacles for sexual organs, which are flexible enough to (as Londo demonstrated in a first year episode) snake under a poker table and pick up a card on the other side of the table. Centauri women have six corresponding slits on their backs. What drives this into
* Centauri Knights information in the back, the reason the planet was vacant was because an ancient war resulted in a Grey Goo superweapon accidentally being unleashed upon the planet (the game even explicitly uses the term "Grey Goo" to explain the phenomenon).
* Centauri Knights made by the natives. The native ecosystem survives on a couple of still-working, but unoccupied, space habitats near the planet. One of the conflicts in the game's politics is: Do we terraform the planet into a new Earth, rebuild its own ecosystem by transplanting from the colonies, leave it a barren desert and mine it for technology, or abandon it and go home?

* Centauri Knights uses beam-assisted magsail ships as the only means of travel between Alpha Centauri and the Sol system. They travel at a significant fraction of light speed, but the trip still takes seven years.
* Centauri, on the other hand, well...Let's just say a Centauri was once shown to be cheating at cards (
* Centauri opera is also heard - Vir and Londo sing a bit at the beginning of a season 2 episode - and although it's in Centauri language it still sounds rather human. Londo later studies Human music and finds "remarkable composers" and "astonishing symphonies", but after a solid week of study cannot make any sense out of the Hokey Pokey. Amusingly, the Minbari he complains about the latter to mentions later that he had personally enjoyed the song.
* Centauri puts on a human face, the Xandoxan assassins take on human form, and the Rylans look basically human in
* Centauri Regent Milo Virini claims that his only vice is "strict sobriety." This is, however, explained. Centauri lives are defined by Duty. So much so that the Centauri made self-care a Duty, so it wouldn't be drowned out by the other duties that govern Centauri existence. Centauri culture is also quite big on recreational drugs. By exercising sobriety, Milo Virini is neglecting his duty to himself by refusing the pursuit of pleasure, and this is considered just as vile as if he had ignored another duty.
* Centauri Republic: after touching its greatest extent in the 1999-2047 period, the Centauri suffered two reductions of their empire. By the time of the series, about three quarters of the worlds they used to control at one point or the other (both conquered and colonies) are lost, with the largest chunk forming the hostile Narn Regime, others having joined other independents to form the League of Non-Aligned Worlds, others still independent and neutral, and Vega (whose only value for the Centauri was that it linked their core regions to the distant Denova) having been passed to Earth Alliance when Denova successfully rebelled.
* Centauri Republic and could damage a delicate system—or punch through the hull. That and the ricochet).
* Centauri Republic: Lord Refa has Londo's mistress poisoned (actually, it was Morden, who framed Refa for the murder to drive Londo back to the Shadows' side), Londo arranges for Refa to be beaten to death by a group of Narn rebels, and a couple episodes after his introduction Londo and Vir decide that Emperor Cartagia needs to die for the good of the galaxy. Vir ends up sticking a poisoned needle between Cartagia's hearts.
* Centauri's car took the angular wedge design of the DeLorean, turned it
* Centauri technology has aesthetics that are heavily reminiscent of the ancient Roman Empire as well as pre-Revolutionary France. Though their devices look gaudy and out of place alongside utilitarian-looking Human technology, it is actually far more advanced.
* Centaur-like creatures where each pair of legs has its own set of genitals, especially if the character has more than two pair of legs (these are known as taur-trains or long taurs).
* Centaur Publications, leaves as his calling card an image of a clock-face over a domino mask along with a message.
* Centaurs apparently associate riding on their backs as a sexual act or something akin, and when Kimihito rode on Centorea's back it's pointed out that he essentially raped her... but this being a harem comedy it's just played for laughs.
* centaurs are depicted as such, not even bothering to get dressed for their hairless human half.
* Centaurs in the wilderness. They're usually a neutral faction, rarely involving themselves with bigger wars and alliances, but may be part of barbaric or nature-aligned factions.
* Centaur's story is told to you in two words when you begin a game: "Destroy Centaur."
* Centaurworld", after the gateway is reopened, Horse chooses to remain in Centaurworld instead of returning home with Rider in order to help the centaurs prepare for the coming war.

* Centaurworld: A minor running gag has an unnamed woman try to make a dramatic exit with her magic, only for Zulius to spot her fleeing a short distance away.
* Centaurworld: As Centaurworld transforms her and she gains magic, Horse's first spell takes the form of her tail coming to life and acting on its own without her control.
* Centaurworld board, emphasizing how out of place she is in Centaurworld.
* Centaurworld", Ched compares how caves (supposedly) always have a second exit to how your mouth is connected to your... nostrils.
* Centaurworld: Comfortable Doug the moletaur guard apparently set off on his own epic journey of self-discovery after meeting the main cast. He crosses paths with them a couple of times over the rest of the series.
* Centaurworld: Durpleton is the dimmest member of the herd, but he's also the most genuinely forgiving, friendly and cheerful one as well.
* Centaurworld have no eyes. Some close up shots show with shallow indentations where eyes would normally be.
* Centaurworld: Horse was a regular horse in her own world, but finds she's capable of not only speech in Centaurworld, but has multiple dimensions of movement (being able to point "like a person") and is literate, knowing what letters are now. She's naturally confused by all of it.
* Centaurworld: "I Don't Know Him" is an entire musical number where Zulius and Splendib talk about not knowing who the other is, despite it being obvious to everyone else they have beef and are poorly pretending not to.
* Centaurworld. She later says that taking what doesn't belong to her makes her "feel alive".
* Centaurworld's physical form is made up of a mass of black ooze that he can control as he pleases.
* Centaurworld", the pilot, opens with a vague narration with camera angles that imply Rider is the one speaking. Then she begins to sing, and her voice is very different from the one in the narration, minutes before Horse arrives in Centaurworld and it's revealed she was the one narrating.
* Centaurworld", the taurnado implies that it's composed of thousands of individual souls that it has taken, and intends to add the herd to its gestalt by drawing them into itself.
* Centaurworld", to justify why she stole the key to the dimensional rift — she knows she's likely leaving Horse trapped in the void with a monster, but she considers this necessary in order to prevent the Nowhere King from escaping into the world.
* Centaurworld", using magic in the moletaurs' court is punishable with three consecutive life sentences.
* Centaurworld", when Horse meets Durpleton, her reaction is to scream in panic. Durpleton screams back, which makes Horse scream more, and it keeps on going from there.
* Centaurworld", when the whaletaur shaman swallows Horse whole, Merguy is unnervingly serene and doesn't break his peaceful expression even as the wave from the whaletaur crashing into the sea washes over the herd, and afterwards simply comments on the sunset.
* Centaurworld, which Glendale starts to harmonize with as she's sucked into it, and lines about taking the souls of its victims imply that it's composed of the collected selves of everyone that it's ever sucked up.
* Centaurworld", while trying to convince Wammawink's herd to help her, Horse asks them if they want to see the world, feel the wind in their manes, and feel the crunch of their enemies' skulls under their hooves.
* Centennial Charmed", Paige gets a cold and accidentally teleports whenever she sneezes.
* Centennial covers residents going back essentially to the beginning of humanity, but the bulk of the narrative starts in the early nineteenth century. Such diverse characters as Mennonite farmers, French trappers, Arapaho natives, British nobility, and Scottish immigrants eventually combine into the main character set in the present day.

* Centennial Summer was released after the death of its composer, Jerome Kern.
* Center (aka Sector Command and Control Unit AZ12 - b14 - c000 Mk. XIV), a supercomputer left over from an interstellar human civilization's collapse known as the Fall. It waited a thousand years before it was willing to take the chance of recruiting a human representative to act on its behalf, as the likelihood of success for previous attempts would have been very low. A recurring character in
* Center-backs in Football are not as quick as their teammates, but they are physically strong, which helps them overwhelm opposing forwards and deliver crunching tackles.
* Centerburg Tales depicts a diagram Uncle Ulysses sketched on a napkin to illustrate a problem he has with one of Grampa Hercules' tall tales.
* Centerburg Tales the local children proudly show off the jacks sets and tops they received from sending in Whoopsy-Doodle Breakfast Food box tops to Grampa Hercules, who reminisces about saving chewing tobacco plugs to receive a music box.
* "Centerfold" by the J. Geils Band. The speaker fondly remembers a young
* Center of Gravity that live in the atmospheres of hydrogen-helium gas giants. They're sapient, and their name for themselves roughly translates as "All of Us".
* Center Party politician Nils Trædal was found like this in 1949, apparently the day before a crucial political debate concerning the leadership of the Norwegian home front during
* Centerpoint Station is a station larger than the Death Star which is at the midpoint between two worlds that revolve around each other in the Corellian system. No one knows who built it or how. The
* Centers in Basketball; slower than their teammates (with a few exceptions like David Robinson and Hakeem Olajuwon), yet absolutely dominant near the basket due to their size and strength. This archetype is slowly fading away, though, as modern centers are expected to play a role in most teams' motion offenses.
* centers on teenage Peter Parker befriending late twenties Steve Rogers.
* Center Stage: Teen dancers at a competitive ballet school train for places in a well-known company.
* Centigrade 37 depending on lighting conditions and the condition of the wood table, the two blonde white women on the playfield might end up with medium-brown skin and light blonde hair.
* Centigrade 37 integrated a thermometer into the artwork whose mercury would rise as the game is played. The game itself is well-liked up to the present, but the thermometer was such a big part of the artwork that it would've been the first thing most people would see, especially to onlookers watching it rise as someone plays it.
* Centigrade 37 is all about thawing out a Human Popsicle by raising her temperature to 37 degrees Centigrade (normal human body temperature).
* Centigrade 37 the women wear multicolored jumpsuits, complete with boots and long gloves that leaves them almost completely covered.
* Centipede (1998) is a red rocket that launches into the air and homes in on airborne enemies.
* Centipede (1998): It's possible to accidentally shoot and destroy Wee people and buildings. Buildings can typically take a few hits and stay standing, but people go down in one shot.
* Centipede, a subsidiary of HYDRA) equips some of their operatives with bionic eyes that explode if they're captured or turn rogue.
* Centipede (Atari 5200): An exact score of 65,000,000 points, when the second place was 58,078.
* Centipede's Dilemma as even able-bodied people have a much harder time walking normally when they conciously try to do so, let alone someone who has to remember what normal walking even looks like.
* Centipede's Dilemma. For example, a person who has never lifted an epee will have a certain natural athleticism which will help them make up for having no technique. After a few lessons, performance goes down as the beginner is frozen by thinking about what they are doing. Passing through this step is one of the necessary sacrifices for mastering the art.

* Centipede's Dilemma: if you believe you will be successful in a task you already know how to do, you are not likely to overthink the actual process and goof yourself up.
* Centipede's Dilemma: Someone loses the ability to do something once they are made to think about how it is possible for them to do it.
* Centipede's Dilemma: When asked how they are able to do something, the character loses their ability due to being too focused on figuring out how it is so.
* Centipede's Dilemma, where you were doing fine at an activity - until someone distracted you with some unwanted advice on how you should be doing it.
* Centipede, shooting the head of the centipede gives you more points than shooting body or tail segments.
* Centipede works for the planet Sty-Rek's interstellar outreach program, monitoring radio waves and internet from other planets. He has a particular fascination with Earth culture and often quotes our movies.
* Centipede) would switch the right and left direction buttons every time you collected a Negg.
* Central and Eastern European television has bumpers as a matter of course, usually showing a channel ident plus the word "Reklama" (the word is basically the same, changing only according to orthography, throughout the region) to show the division between programme and adverts.
* Central and Eastern European TV network Minimax did not want to air the last season of
* Central Arena (Neopia Central): Boochi, Chia Clown, Down For Maintenance Pteri, Eyrieki, Flaming Meerca, Kasuki Lu, Kauvara, Lab Ray Scientist, Mootix Warrior, Mr. Chuckles, Punchbag Bob,
* Central California, the only one of the six proposed states without a Pacific coastline. Comprised of Alpine, Calaveras, Fresno, Inyo, Kern, Kings, Madera, Mariposa, Merced, Mono, San Joaquin, Stanislaus, Tulare and Tuolumne Counties, with Fresno as its capital, Central California would become the poorest state in the country on a per capita basis.
* Central Canada has Almost Winter, Winter, Still Winter, and Construction.
* Central Casting with a full beard and wearing a flannel shirt and blue jeans, for example).
* Central character Marcus Didius Falco is a disillusioned romantic, harking after the great days of the Roman Republic and who is often far too frank to his main employer, Emperor Vespasian.
* Central Control: Where upon making first contact with the rest of the galaxy, humanity was deemed too savage to be allowed free run of the place. Instead, humans are only allowed to go off world as sort of Space Hessians.
* Central European jewelers and clocksmiths made elaborate clockwork creatures for town clocks and royal courts. The most famous of these were made even earlier, done by Greek and Arabic scientists.
* Central Fiction, it turns out that this is played straight, as in his final bout with Kagura, he's derided for having no technique and relying on strength alone. Azrael even outright calls reliance on skill and finesse as nothing but fantasies that could never hope to win against him. Kagura then proceeds to prove him wrong.
* Central Intelligence Agency? Or "CTR Importable Archive", a common format for sideloading Nintendo 3DS software, known by its file extension .CIA?
* Central Intelligence, though the rest of his classmates had clearly matured since then.
* Central Intelligence Trevor seems oblivious to how Robbie has changed, still putting him down as a loser and "still a scared little bitch" as he shoves him...and Robbie easily knocks him out with a single punch.
* Central Park", after Brendan reveals his last name and Bitsy is his great aunt to the Tillermans, Birdie tells the audience that this is the part where Brendan is going to reveal he's related to Bitsy, until he sees that Brendan already told them and Birdie explains it's hard for him to hear them in the dining room.
* Central Park", after Owen and Molly stops the "Shart" tagger that was hired by Bitsy to vandalize the park, Birdie tells the audience that Bitsy was surprisingly

cool about it, until we cut to the outside of Bitsy's balcony and we hear Bitsy yelling angrily.
* Central Park and said Kevin McCallister didn't call his family when he got lost in New York, ("Never mind they didn't have cell phones and his family was in Florida."), she continues on how Kevin was lost longer than them and he was able to get through it. This motivates Cole to get back home.
* Central Park", A non-murder example. Owen, the park staff, and Molly sings "Method to This Madness", where they sing about finding a pattern on the Central Park map to predict where the "Shart" tagger will tag his next location. Molly is able to figure out the pattern when she connects to dots on the map of the tagger's tag and sees that he's trying to spell a giant "SHART" on the park.
* Central Park", Bitsy considers plotting to buy Paige's newspaper, "What's New, New York", in retaliation for Paige breaking the story on Dick Flake's fake snakehead which makes her look bad to the public and wants to fire everyone there, despite Helen pointing out to Bitsy that doing so would not be profitable.
* Central Park; Bitsy thinks those names are stupid and asks Helen if she made those up.
* Central Park", Bitsy tries to convince the hotel housekeeping staff that the seventh floor is not haunted. She agrees to spend the night on said floor in order to convince them. While she openly mocks them for thinking the floor was haunted, as soon as Bitsy is alone she openly expresses that she can feel (and smell) her father haunting the floor.
* Central Park, Cole's favorite book series, is stated to be set in Central Park yet during the scavenger hunt Owen is thrown off by the directions based on series trivia not lining up with the actual locations they're supposed to be referencing, which he lampshades.
* Central Park has Molly's comic that she draws. When the show switches to Molly's comic, it's in black and white and resembles her drawing and makes it look like a comic book.
* Central Park. He loves it so much that he breaks out into song and sings "Nuts Nuts Nuts" when there's a scavenger hunt based around his book that taking place at the park.
* Central Park her angry letter. After reading the smear letter Bitsy puts in the newspaper trashing Central Park and its management, Owen and Paige's response is to doodle over Bitsy's picture in the letter. They don't even show the doodle to Bitsy and she isn't even aware of it.
* Central Park"; in Molly's comic, after Fista-Puffs' kiss melts Kite Boy's face, he reveals that the skin around his mouth has been melted off revealing his teeth and bone.
* Central Park Jogger case had attacked the jogger, and that he'd done so alone. Only one of the five was still in prison while the rest had served their time and been released. Despite their convictions being overturned, it is their unanimous belief that the entire experience has ruined their lives. Adding insult to injury, the statute of limitations has expired, meaning that the real perpetrator of one of the most infamous crimes in New York City history can never be prosecuted and that Meili will never see proper justice done on her behalf. A thoroughly gross miscarriage of justice all around.
* "Central Park Jogger" case. On April 19, 1989, investment banker Tricia Meili was savagely attacked in New York City's Central Park — beaten, raped, and left for dead. Within days, five young men — known as the Central Park 5 — who had been terrorizing people in the park were arrested. Despite no DNA evidence, no identification by Meili (she survived, but could not remember the attack), and a time frame that showed that the boys could NOT have assaulted the woman — ironically because they were attacking someone else at the time — all were convicted and sent to prison. A decade later, a man serving time for another crime came forward and confessed that he, and he alone, was the real perpetrator. There was nothing the DA's office could do but overturn the convictions of the others — who had all served their undeserved time. Meanwhile, the statute of limitations had run out, meaning that the man could not be prosecuted for the

attack. So, 5 innocent (relatively speaking) young men spent a decade in prison for something they didn't do, a guilty man remained — and STILL remains — unpunished for something he did, and Meili will never see proper justice done. A thoroughly gross miscarriage of justice all around.
* Central Park", Mayor Whitebottom sends an auditor named Anita to do a surprise audit to see if she can find any dirt on Owen and she came close to getting Owen fired because Elwood threw away a receipt.
* Central Park", Molly and Cole sees a couple like this and mistakes them for a father and daughter. Even when they start kissing, they still think they're related and they're way too close to each other.
* Central Park", Molly awkwardly asks Danny if she can play chess with him by saying too many words. Danny is concerned that Molly is going through some stuff and thinks she won't be able to concentrate if they play, but Molly ensures him this is the normal amount of words she say.
* Central Park", Owen and Paige have one near the end of "Die Trying". Despite being married, what makes this unique is this is the first time they kissed on-screen.
* Central Park", Owen has a habit of rubbing his hands on his shorts when he's anxious, and, coincidentally, the tagger has a habit of doing the exact same thing, too, which is how Molly is able to identify the tagger.
* Central Park, Owen keeps complaining about the details in books not making sense, which frustrates Cole. And as Birdie states later on, he went "too damn far" when he complains about the squirrels becoming dinosaurs in one book and saying squirrels didn't evolve from them. Cole gets fed up and abandons Owen to continue the "squavenger hunt" with Enrique.
* Central Park", Owen read online that he can get his oven hot enough to cook his pizza by leaving it on broil the entire time. Molly points out that doesn't sound safe but Owen said they wouldn't put that information online if it wasn't dangerous. Later on, Owen's oven catches on fire and the oven knobs are on fire.
* Central Park", Owen reveals he has a tag informant named Gooch who informs him of any graffiti in the park. He's a teenager and Owen pays him in candy.
* Central Park", Owen tries to comfort Molly after her disastrous first kiss with Brendan, but Molly is too frustrated with what happened to be comfort. Owen backs away from Molly, but he assures her it's not her it's him.
* Central Park", Owen was mad when the tagger tag "SHART" all over the park, but he's furious when the tagger starts tagging on trees. Fed up with the tagger, he goes to a camping store to buy stuff to stakeout the tagger.
* Central Park", Paige discovers that the companies that are buying the mayor's real estate is actually just one company and they originated in Panama. Marvin tells her that it's impossible to find out who owns a Panamanian shell corporation because it's a very long process to have the information revealed. Paige would have waited six months to have a vague idea on who's behind it if it wasn't for Birdie blurting out that Bitsy is the one who owns the corporation.
* Central Park", Paige hates rats and the garbage crisis at the park increased her fear due to the increased rats in the park. Paige spends their sick time setting traps if any rats enter her home while Cole stays home to stop her. In the end, she was just hallucinating the rats in her house due to her flu.
* Central Park, Paige Hunter wants to be this type of reporter instead of writing fluff piece for her newspaper. She ends up getting what she wants when she's trying to figure out why the Park League's contract to maintain Central Park has been frozen by city hall.
* Central Park Paige's newspaper "What's New, New York". Helen immediately points out that newspapers are no longer profitable, but Bitsy admits it would be pleasing to fire everyone. And as Birdie sings at the end:
* Central Park", Shampagne starts peeing in Bitsy's bed, indicating that he's still unhappy living in his luxury lifestyle. Bitsy has to call her dog therapist to try to fix this problem.
* Central Park. She rewinds time to wipe her lips and kiss him again, only for his face to melt again, then she rewinds time again to blow him a kiss, only for his

head to explode as she screams in terror.
* Central Park so she runs away. She ends up running into Molly and Paige, who convince her, through song, to go through with the wedding.
* Central Park, the last five minutes of the episode are a silent montage of Birdie's life busking in the park when he's not narrating about Bitsy or the Tillermans, backed only by his violin.
* Central Park, used to be a badass that was saving the city, but ever since Kite Boy showed up, the comic derailed into nothing but her swooning over Kite Boy and acting like a sad sack when Kite Boy doesn't forgive her for ruining his face.
* Central Park West had characters use a very primitive form of email (which had just been introduced into the workplace around the time the series was created), and didn't have any modern functions such as inactivity timeout, password protection or full text editor. A large part of stockbroker Gil Chase's storyline is that several characters (including his ex-girlfriend and a romantic rival) are able to access his email without any password and nearly destroy his reputation by playing havoc with his contacts.
* Central Park", when a hotel staff explains what a dumbwaiter is to Molly, she thinks an actual dumb waiter comes out of the elevator to bring them food.
* Central Park", when Birdie tries praising the pottery on Esposito's desk:
* Central Park", when Bitsy starts slandering Owen in front the media to make herself look more favorable to take care of the park, Paige gets mad at her and wants to hurt Bitsy, or at least trip her.
* Central Park", when Cole confronts Bitsy about Shampagne, Bitsy forgets who he is and mistakes him for a tiny reporter, despite the fact that it was him who found her dog when he got lost. Helen had to remind Bitsy who Cole was and she finally remembers.
* Central Park", when Cole shows Helen a new trick he taught Shampagne, placing a stick on his nose to make it look like he has a mustache, Helen almost smiles at it until she goes back to being serious. This moment is what changed her mind about killing Shampagne.
* Central Park", when Cole tries to stop Paige from killing the rat in the basement, Paige drops her flashlight and the light reveals a swarm of rats eating their food and Paige and Cole run out of the basement in terror. But at the time, both of them are sick and it turns out that they both hallucinated the rats as Owen tells them he and the exterminator didn't find anything in the basement.
* Central Park", when Dmitry asks Bitsy if he could have his daughter's wedding at her hotel on the phone, Bitsy tells Helen to mute the call and then tells her she's going to pretend her hotel is fully book so she can leverage with him, until Helen tells her she hasn't muted it yet. With the secret out, Bitsy tells Dmitry he could have his daughter's wedding in the secret ballroom in her hotel in exchange for talking business, until Helen reveals she muted the call, frustrating Bitsy.
* Central Park", when Elwood reveals he threw away a receipt that's need for an surprise audit, the auditor, Anita, plans on reporting this to Mayor Whitebottom immediately so she doesn't miss her salsa class. Owen tells her that he and Paige will go to Brooklyn to get a copy of the receipt and return in one hour so she doesn't miss her class. They're unable to make it in time but Birdie and Elwood managed to stall her long enough for Owen and Paige to return in time with the receipt.
* Central Park", when Helen asks Cole if they can meet again so he can walk Shampagne again, Cole happily accepts and hugs Helen, which makes her uncomfortable and confuses her. When Cole tells her he was hugging her, she thought he was attacking her really gently.
* Central Park", when Helen asks who the Shadow is, Bitsy tells her she should remember since it was in the newspaper 60 years ago. When Helen claims she never read about it and asks Bitsy how old she thinks she is, Bitsy isn't sure of Helen's age and thinks her age is between 40 and 90.
* Central Park", when Paige questions Councilman Leon in the steam room on why he voted against renewing the Park League's contract, he told her the mayor told him to do it and that's off the record. Paige tells him he can't do that, but a lawyer

who overheard their conversion points out he's allow to do that and argues that the source was in an altered state because of the steam room.
* Central Park", when Shampagne's mood hasn't improved, Bitsy's dog therapist suggest Shampagne should try a radical new treatment called "outdoor movement therapy", which Helen sums it up as walks.
* Central Park (which probably didn't happen in real life) and why they were deleted.
* Central Park", while Cole is taking Shampagne out for a walk for Helen, Helen is sitting on a park bench and is about to take her shoes off, but changes her mind when she gets something on her stocking. When she looks back up, she sees Cole is already back and asks him how long has he been standing there, he tells her long enough to be uncomfortable.
* Central Park", Zoom brings his tour group to the part of the park where there are bats and Cole gets so freaked out by them when a flock of them flies through them and he abandons the tour guide and Molly has to go after him.
* Central Station about this one retired schoolteacher who was offered $1,500 if she could persuade this one boy to go along with some organleggers.
* Central Theme. Each character suffers from a string of bad luck, and their frustration over it ultimately leads to their untimely demise.
* Central Theme. In life, Hunter Rose is nothing more than a somewhat above-average criminal wearing a mask. In death, events converge to gradually transform his supervillain persona into the founding principle and guiding philosophy of a mighty imperial dynasty that comes to dominate the entire world. After a point, "Grendel" stops being a person and starts being an eternal, indestructible ideal.
* Central Theme is the philosophical exploration of the differences and similarities between humanity and monstrosity, both in the respect of beings as well as character traits. Arthur Hellsing, in particular, describes to his daughter, Integra, his own view of immortal monsters like Alucard who ceaselessly seek war and battle and how, unto Arthur's own experience, they do this because, deep down inside, they are all really just frail, sobbing children, desperately looking for a hero to finally ease their misery.
* Central Theme—you should never stop fighting to live life as you choose. Your future is yours and no one else's.
* Central Theme philosophy is that a human can only ever kill one other person - the act of murder irrevocably changes the murderer into something slightly less than human.
* Central Theme series; before the Apocalypse, wars were waged mainly for control of petroleum supplies. Afterwards, "Only those mobile enough to scavenge, brutal enough to pillage would survive. The gangs took over the highways, ready to wage war for a tank of juice." And after the Oil wars came the Water wars, and after the water wars came the Blood (slave) wars, etc.
* Central Theme, showing how homesick Mullen is. No mention of it is made in this adaptation, so Mullen and Stuart never talk about the cities they are from.
* Central Theme. The strength of one's love is tested by willingness to die for said love. Interestingly, the whole show is about why agape isn't always ideal.
* Central Theme: The underlying (moral and/or philosophical) theme of the story.
* Central Theme to become a better person, and it's his growing attachment to her that leads him to do so.
* Central to the legend — if not always the actual performance — of comedy team
* Central to the plot are Ruby and Sapphire, who have been together for
* Central to the premise. Kirino, a 14-year-old girl, loves playing little sister-themed
* Centre." (This dog and Stirlitz's line were in the series. The dog didn't respond though.)
* Centricide, and the Centrists who embody different politically centrist philosophies.
* Centrifugal Gravity (though for whatever reason, the seal between Medlab doors is diagonal to this). However it is subverted on Earth where they have perfectly

ordinary wooden hinged doors in most buildings. It would appear that the station needs doors that can be sealed in the event of a hull breach, which is not a problem on Earth.
* Centrifugal GravityWhen gravity is simulated by putting things on the inner surface of a rotating object.
* Centro Nacional de Inteligencia (National Intelligence Center), the Spanish official intelligence agency and successor of the CESID.
* centuries–friendly brand of incompetents then got weeded out in the Havenite Civil War.
* Centuries ago, an early doctor desperately tried to convince his contemporaries, who all had different treatments for the same disease, to start using control groups so they could work out, once and for all, which treatment was the best. Everyone refused, on the basis that their treatment was
* Centuries ago, British sailors adopted the practice of using "port"/"larboard" and "starboard" in reference to ships' sides. This averted any confusion as to whether "left" or "right" might refer to the
* Centuries ago, the man who would become Tunon the Adjudicator chose to re-write his nation's laws and customs to match the laws of Kyros' Empire because he believed a war was otherwise inevitable. With the nation unknowingly assimilated into Kyros' laws, the takeover was instead relatively bloodless, and Tunon was hailed as a hero for his foresight and rewarded with a position of Kyros' Chief Justice, leading him to become an Archon who embodied the law and order of the Empire.
* Centuries before humans thought of extraterrestrials, it was common to attribute geological forms and large, ancient ruins to giants, wizards, and other mythical creatures. The Pillars of Hercules straddling what is now the Strait of Gibraltar get their name from Greek legends stating that Hercules formed them as part of his Twelve Labors by smashing through some mountains to get to the land beyond (or narrowing an already-existing strait to stop the monsters beyond the Mediterranean from getting in — ancient Greek myths tend to have multiple stories due to its oral nature.) The northern point has been identified as the Rock of Gibraltar; the southern one is uncertain but is thought to be either Monte Hacho in the Spanish exclave of Ceuta or Jebel Musa in Morocco.
* centuries camp, the only human with any form of immortality and thus not fitting with either humans or youkai.
* centuries-long lifespans trolls—are faster, stronger and tougher than humans, meaning that among such supernatural beings Wizards (and all humans) are quite squishy.
* centuries, meaning they not only felt it necessary to keep the secret all that time, but succeeded in doing so until Odan (presumably) became the first joined Trill to die offworld. And Jadzia and other Trill in DSN don't act as though they've just been freed of a secret, they act as if this is just a fact about them they've no reason to hide. Finally, the episode ends with Odan trying to rekindle her relationship with Dr Crusher, something DSN would later present as a huge taboo in Trill society.
* centuries of skinchanging by the greenseers, who used to speak through the birds.
* centuries of unimaginably horrible torture. Sure enough, he arrives back on Earth completely feral and seemingly with no memory. It takes him several weeks of rehabilitation with Buffy before he's functional around other people again, and he's never the same as he was in the first two seasons.
* centuries, the book was only the first to suggest it in such a public way.
* Centurion also plays the Scottish Etain. But since Etain is a mute who had her tongue cut out, this is less obvious.
* Centurion, a Pict is thrown head first into a tree. His head explodes.
* Centurion: Defender of Rome features a chariot race as one of the mini-games.
* Centurion, despite its historical accuracy in other parts, features a lot of this. For the protagonist Quintus Dias, it's justified, as his father was a gladiator. The other characters? Not so much.

* Centurion ends with only the main character surviving and returning to his new Celtic girlfriend.
* Centurion; her village was raided by Romans, her father burned in front of her, her mother raped and murdered, and then she herself was raped by the Romans who also cut her tongue out.
* Centurion playing Tarak, the company cook, who "hails from the Hindu Kush", which neatly matches Ahmed's own Pakistani ancestry. The latter is a subversion since the Hindu Kush had contact with the Parthian Empire which fought the Romans twice, so it isn't entirely implausible for a local to end up in a Roman legion without stretching too much the limits of disbelief.
* Centurions, and was pined after by womanizing Ace McCloud. Also had an impersonator moment, by her own clone.
* Centurions Doc Terror had several varieties of mecha-mooks to pit against the titular heroes.
* Centurions Doc Terror unleashing the Z-80 virus, which causes humans to lapse into a catatonic state.
* Centurions fight an army of the creatures in "The Mummy's Curse"—until their pharaoh revives and tells them to go back to sleep (in perfect, unaccented English).
* Centurions has one in the episode "Showdown at Skystalk". Its Earth base is in the Andes, and it takes people to and from a space station resort called the Pleasure Star. It's set up more as a train, rather sensibly, as the ride is looong.
* Centurions, Jake Rockwell's Awesome Auger weapon system consists of a giant drill mounted to a tank-like body.
* Centurions, John Thunder's Thunder Knife weapon system is essentially a gigantic circular saw, complete with spinning action, attached to a tank-like body.
* Centurions Lilith imprisons her sister and impersonates her as part of one of Doctor Terror's schemes. It's not a perfect impersonation — viewers who saw "That Old Black Magic" will immediately notice that "Cassandra" is acting a bit different and that her magic is red instead of blue.
* Centurions, one of the guest star characters was a computer hacker named Gibson.
* Centurions, such as when a lava flow is encroaching on a prone character, then has receded again after the commercial break, as if to give the character a second chance to roll away.
* Centurions to miss an episode; he doesn't appear in "Ghost Warrior", although his teammates mention him a few times.
* Centurion: The protagonist's father was a gladiator. This is in no way relevant to the story, but if you've made a film about ancient Romans without mentioning gladiators at all, you've just wasted everyone's time.
* Centurion to Etain, but he has no wife in sight and he displays particular affection for her.
* Century City, a fertility specialist is sued for having his clients' babies turn out gay.
* Century City an in-universe ad for penis attachment surgery led to the observation that "someone should sue somebody for something."
* Century City by turns. One episode even sort of lampshaded it when Ioan Gruffudd's character explained to a potential client who works in real estate that he specialises in criminal defence rather than property law and he might need to speak to someone from another department, but it turns out that said client needed defence counsel after getting arrested for breaking into his ex's apartment.
* Century City episode Love and Games, a bionic eyed player has to make an appeal, as bionics aren't allowed to play because bionic parts give them an unfair advantage.
* Century City, Lee May is researching a marriage contract, which her associate Darwin negotiated 8 years ago. His hair is ridiculous, he's enthusiastic, and he cares about the couple he's negotiating with. Cue the next scene being the entire law firm eating popcorn while watching the video.
* Century City to the most literal extreme (having created a procedure that could be applied to unborn children that would reduce the possibilities of them becoming

gay when they aged, and essentially dooming all minority sexualities to extinction if it became widespread).
* Century massacred all the other characters in his original story and turned out to be the Antichrist.
* Century Mile District": Although they don't play a huge part on the plot, the Luddites, a group of anti-progress people protesting against the World Exhibition, also receive some focus during the district, being one of the many factions antagonizing the contest for their own agenda.
* Century Rain disaster the surviving humans split into two factions: the "Slashers" who said "What's done is done, no use crying over spilt milk" and embrace all possible technology, including genetic modifications and implants, and the "Threshers", who will only use tech which is essential for survival. They leave their own bodies alone.
* Century Rain is set in one of these, but it wasn't built for the normal reasons. The inside of the sphere is patterned with stars that match the stars in our own solar system, and by some pseudo-scientific method they shift as our own stars would, so that those inside the sphere don't know that they're not really on Earth.
* Century Rain (since the French were paying attention and headed the Germans off at the pass). He's an old man dying of cancer in a low-security prison hospital. A protagonist, passing by, notes that he was no worse than several other dictators making trouble at the time and muses that he may as well be left alone to feed the ducks.
* Century Rain the Grey Goo and use it as a weapon of mass destruction.
* Cephalomancy: Head Divination. Ancients would burn the head of a donkey, goat or ass on burning coals and made predictions from so doing.
* Cephalons were not purely artificial creations as one might assume, but rather are human minds uploaded into digital form before being stripped of their former identity and shackled with a large number of behavioral restrictions. The only surprising part is that at least one participant was willing.
* cephalophore = to bear), a headless statue with the head on its arms, comes from the image of a beheaded saint.
* Cephalopods are also an example of this, as each of their tentacles possesses its own brain and carries out tasks on its own, with the central brain acting simply as an overseer and coordinator.
* Cephalos and Cephadrome, which both debuted in the very first game, are sand-swimming Piscine Wyverns which are designed like Hammersharks.
* Cephalotes ants have soldiers with massive round heads, who act as living barricades when their nests are invaded by rival ant colonies, especially their main enemy, the nomadic army ant. When threatened, the soldiers use their flattened noggins to block off all entrances to their nests and prevent the entry of enemies.
* Cephalothorax trope and has a defined head. His eyes also appear to be red glasses, which makes him look slightly more menacing than his game counterpart, and he has four blades in his chest fan.
* Cepheide describes a ship with Orion propulsion as one of the most primitive and wasteful methods of interstellar flight, still only achieved by a tiny minority of all intelligent races in the universe. The ship is said to be the last relic of an unknown race exterminated by the dominant YiYiki (descendants of the humpback whales).
* Cepheid stars, it was generally believed the Universe consisted of just the Milky Way and the Magellanic Clouds, Andromeda for example being considered as just a nearby solar system in formation.
* Cepheus and Cassiopeia, who had offended the Nereids, were willing to sacrifice their daughter
* Cepia LLC's popular ZhuZhu Pets became the basis for two separate animated adaptations: a 2011 direct-to-video movie called
* Ceramic kitchen knives also fall under this category. Depending on the quality of the ceramic used, they can very easily shatter, especially when attempting to flatten something using the blade turned sideways (garlic cloves are often prepared this way), though the packaging and/or the care instructions usually mention that

you really shouldn't be using it for tasks that require lots of bending (like cutting cheese or smashing garlic cloves) or going through bone. The cutting edge can also be easily chipped and nicked. It's not that they never need sharpening, but that
* Ceramic knives are starting to become all the rage in the kitchen for their ability to remain sharp for longer periods of time than metal knives. They are harder and aren't affected by chemicals and such that would dull them down. Their only problem is that they're rather brittle.
* Ceramic trauma plates for body armor can work this way. When struck with significant energy (by a bullet, hammer, fragment, splinter or by being dropped), it will crack and the effectiveness of the plate degrades, but isn't automatically rendered useless. However, a second hit in the same general area will typically go through, making this trope true for hits in the same location. With luck, subsequent hits will be far enough away from the damaged areas to be stopped as well. This won't work forever, but has been seen in the field.
* Ceraunoscopy: Prophecy from the study of thunder and lightning. Similar to Augury the Ancient Roman prophecy from watching the movement of birds and other animals during thunder and lightning. And Brontoscopy is based on listening to the sound of thunder.
* Cerbee. In the season 1 opening, Cerbee's leash gets caught on a bus instead.
* Cerberi are giant, three-headed, skinless doglike monsters who serve as Hell's guardians and watchdogs. They are distantly related to hellhounds,
* Cerberon, but George sees her as strong, swift, and beautiful as the Amazonian ideal.
* Cerberon: Dragons are about the same size as humans, have bat-like wings, are very intelligent, and wield powerful magic, which they use to gain enormous size and breathe fire. They have extremely long lifespans but are not immortal. While they are extremely polite, they are not always necessarily nice. They have ruled the world for millions of years and view the younger intelligent races as children: often amusing, potentially dangerous, helplessly ignorant, and sometimes useful as slaves, pets, or food.
* Cerberon features the coming of age of the eponymous unicorn. While already an adult at around 20-years-old, he learns through the course of the novel what it takes to be a real unicorn and not just a pretty, well-educated horse with a pointy thing on his head.
* Cerberon is a very close second to George, who is the protagonist for most of the story. After George and Margaret are betrothed, and especially once they leave Aeronweyir for America, Cerberon becomes the protagonist, with George taking on a secondary role.
* Cerberon, is described as quite beautiful despite her various nonhuman traits and imposing Amazon physique.
* Cerberon. It may have other significance that isn't revealed in the rest of the novel. (Maybe the next one?)
* Cerberon, Thedrik's old mule is half blind, unreliable, and cranky. He still chooses her over a good horse when given the chance.
* Cerberon, to a family nearby hoping they'll survive, to a distant overview by a pair of people being carried away by a flying dragon.
* Cerberon when Aladavan fries them with a massive ball of lightning, and decapitates the blinded and severely burned survivors who are still trying to achieve their objective despite their fatal injuries.
* Cerberon when Merlen is still there when the flood water blasts through.
* Cerberus' attempt to control the Geth through their religious impulse is the basis of the
* Cerberus. Cerberus is also portrayed as the only group with the ability to actually do anything about the problem of the Collectors. What this means is probably best left to the player to determine.
* Cerberus Daily News also revealed that there are krogan who played American football. One of them even becoming the winning quarterback for
* Cerberus Daily News, and there's a significant (if background) controversy over

that choice of name, which Shepard can weigh in on.
* Cerberus Daily News: Being a RP site modeled after actual internet forums will do that
* Cerberus Daily News has a justified example. During the "Down with Discord" storyline, the battle converges on Discord's personal quarters. He has his guards with him, and they are covering the door against a small army of mercenaries. Then Desta T'Res takes out a demo charge, and blows a hole in the wall. Justified by the fact that the door was heavily guarded.
* Cerberus Daily News have embraced Valentine's Day, due to its focus on reproduction and commerce.
* Cerberus Daily News in the OOC section is all about making even more ships up to us in RPs.
* Cerberus Daily News invasion. Once the true magnitude of the threat was revealed, he began focusing his efforts on fighting the Reapers, gathering other pirates to fight, scavenging in the Terminus systems, even openly delivering needed supplies to Alliance warships that would have happily blown him out of space a month earlier. If the Reapers win, no more piracy.
* Cerberus Daily News, killing most of the government officials with bombs and assassinations after coming out with a well-publicized "debate" over whether to pull out from the planet or not.
* Cerberus Daily News' went forward one in-universe year after the conclusion of Mass Effect 3
* Cerberus dresses its soldiers in highly conspicuous white and gold uniforms with clearly visible logos of the organization, in spite of their status as a covert black-ops terrorist group, and the fact that just being a member warrants a prison sentence in Citadel space.
* Cerberus Engine Games, the first of this line, is based on the main DC Comics continuity.
* Cerberus High II to procreate but the two gods' love was able to form a physical being.
* Cerberus High, Kazuki finally accepts his status as being not-quite-human but not-quite-canid-breed either.
* Cerberus High, Sherbet and Axel visit Kazuki in the midst of a depressive episode, which ends in Sherbet running away in tears with Axel chasing after. With the team split up, Elliot makes his attack but is defeated by Kazuki, and the three make up just a day later.
* Cerberus himself, of course, appears in his traditional Guardian role at the gates of the Underworld. He's a lot more fond of playing fetch than one might think, and appearance-wise looks like a three-headed Rottweiler the size of a mammoth.
* Cerberus is the Devil's pet, and spends his time menacing the cast (especially Slick) and eating mailmen.
* Cerberus' logos and vehicles often possess an orange color scheme, while as of
* Cerberus, making it a favorite choice of a sidearm for players in both single-player and multi-player.
* Cerberus. Most of their projects (almost all of which are massively amoral and unethical) tend to backfire horribly upon them. In the Citadel DLC of the third game, Joker lampshades how frequently this happens, with Shepard being an example.
* Cerberus News Network extra had a few headlines about how an actor was nearly fried to death by freak space lightning during a film shoot, and went along with it. They kept it in and made trillions.
* Cerberus' official stance on anything that makes them look bad to Shepard (usually
* Cerberus's use of indoctrinated soldiers and the Illusive Man's plan to make humans the dominant species via control of The Reapers
* Cerberus, the three-headed hound that guards the gates of the afterlife to ensure the living don't get in and the dead don't get out, is the original inspiration for many modern portrayals of hellhounds. He was typically depicted, besides having three heads, as possessing a mane of writhing snakes.

* Cercyon, who challenges passersby to wrestling matches, then kills them after they have lost.
* Cereal mascots are generally wacky characters that are modeled after cartoon characters that would have had their shows aired on Saturday mornings (which cereal commercials would have also aired). By
* Cereal Soup, but also had seven sons, with each one being raised by their aunts.
* Cereal Soup) your character is completely optional and therefore can stay in each stage indefinitely.
* Cereal Vice Reward: Commercials encourage highly immoral behaviour for the sake of obtaining their products.
* Cereal Vice Reward). Lucky the Leprechaun always has kids steal his Lucky Charms, Sonny always goes cuckoo for Cocoa Puffs, and the Quik rabbit always loses his self-control when Nestle Quik is involved.
* Cereans (a Near Human alien species who have notably oversized heads) suffer from both a gross imbalance between males and females that favors females and a low birthrate. Consequently, not only is polygamy the norm, it is so essential that males father as many children as possible that male Cerean Jedi like Master Ki-adi-mundi are some of the very few Jedi who were given exemptions from the blanket rule of "no lovers or children" that the Old Jedi Order held its members under.
* Cerebella's birthday is April 11th - the first release date of the game, on Xbox Live.
* cerebrospinal fluid; to get synovial fluid, they ought to have bitten knees, hips, and other large diarthrotic joints. A loss of synovial fluid should not cause death, by the way: it causes severe arthritis, which none of the afflicted mothers exhibited.
* Cerebus arc, when he is shunned by his hometown for failing to make it home in time for his father's funeral because he was running around with Jaka.
* Cerebus background artist Gerhard very nearly quit before the comic was complete due to having completely lost the ability to enjoy the story due to the rather odd twists and turns Dave Sim had introduced and the way it seemed to be dragging along. He forced himself to finish it by latching onto a prediction Sim made that it would be "done by Christmas" if a certain number of pages were completed each workday, and made that his mantra to keep himself motivated.
* Cerebus Call-Back that paints a previously lighthearted moment in a darker tone.
* Cerebus Call-Back: When something was cute or funny before, that something becomes more serious in this situation.
* Cerebus comic to feature Red Sophia, in which she offers it to him after he beats her it a sword fight (she attacked)... and instead of having her do something... erotic, he uses her as a pack mule.
* Cerebus features intricate pen-and-ink backgrounds rendered by artist Gerhard. The trade paperback covers are even more impressive.
* Cerebus gets smashed whenever he can, and can knock back prodigious amounts of booze, such as drinking whiskey out of full brandy snifters
* Cerebus had been resolved by issue 200, yet Sim kept the series going for another 100 issues. The new issues were... not well-received.
* Cerebus in the last few issues of the comic, to show how old he has gotten.
* Cerebus Retcon: A retcon where an earlier lighthearted or inconsequential event is reinterpreted in a darker and more serious context.
* Cerebus Retcon, as they explicitly tied Grandpa Marsh calling Stan "Billy" to his worsening Alzheimer's.
* Cerebus Retcon: Something that was originally just a joke is revealed to be for a dead serious reason.
* Cerebus Retcon that makes a past event more serious as part of a shift to drama.
* Cerebus SIPPING LAVA THROUGH AN IRON STRAW!" The next panel is a hundred frozen followers, and a hundred separate "Oh crap" thought bubbles.
* Cerebus Syndrome: A light, comedic work becomes darker and more dramatic.
* Cerebus Syndrome, blaming the breakup on Arath is hardly fair. Collin ignored his gossip for years before finally agreeing with him, and when he did, it was because of an accumulated bitterness over Fox' past antics and the fact that he was failing

at the guessing game, combined with breaking the isolation he'd had from the rest of the world.
* Cerebus Syndrome brought ultra violence never before seen on national television aired outside Puerto Rico or Japan while the WWF found new "attitude". Backyard bouts became increasingly violent and the stance changed to "don't even think of wrestling in a backyard".
* Cerebus Syndrome: The year 2000 and the first two-thirds of 2001 were basically a continuation of the previous decade until the 9/11 attacks, which brought on an era of fear and paranoia for national safety, coupled in with the rapid rise of new technologies and the turn towards darker entertainment.
* Cerebus Syndrome: When the story's tone shifts from being mostly comedic to more dramatic.
* Cerebus the Aardvark. After receiving it Cerebus requests "a dozen raw eggs, twelve gallons of water and some hot towels", presumably for curing the hangover.
* Cerebus the Aardvark aversion showing him urinating); Cerebus has a cold at least once but it isn't a big deal, plot-wise.
* Cerebus the Aardvark, but the earth-pig born has no patience for it.
* Cerebus the Aardvark. (Cerebus's belief in female telepathy is discussed at some point during the story.)
* Cerebus the Aardvark clocks in at 300 issues, spread over about a dozen phonebook volumes (though some are a bit thinner).
* Cerebus the Aardvark did a parody of this phenomenon by introducing a character named Wolveroach, an obvious spoof of Wolverine. Wolveroach showed up on three consecutive covers of Cerebus, in various badass action poses... while inside the comic itself, he spent all three issues in a coma. After he woke up, he stopped appearing on the covers.
* Cerebus the Aardvark did not die while making Cerebus, he had "planned ahead" (using this term very loosely) in case this happened. He had mentioned in interviews that, if he DID die before completing the series, the series would continue all the way to issue 300, but all subsequent issues would only have the background art (by Sim's colleague Gerhard). There would be no characters nor text/narrative of any kind.
* Cerebus the Aardvark for that portion of the issue. In another issue or two, Cerebus is portrayed with cold symptoms. This isn't a plot point; nor do he or other characters even mention it. He just happens to have come down with a cold.
* Cerebus the Aardvark for the last third or so of its run (very arguably earlier).
* Cerebus the Aardvark has en encounter with the "Three Wise Fellows" — three fools who engage in hijinks such as clamping pliers on one another's noses while kidnapping him when he is mistaken for the Messiah.
* Cerebus the Aardvark), he pulls out his flask, takes one last swig, then throws the rest away.
* Cerebus the Aardvark, is much more realistic and hard-edged, and zip-a-tone is used nowhere else.
* Cerebus the Aardvark, is one hundred percent addictive and provides all the nutrition an adult needs in one day. A villain uses it to subjugate and rule his entire city.
* Cerebus the Aardvark is probably the crowning example. Sim spent a quarter of a century working so hard that his marriage broke up and he spent time in an asylum.
* Cerebus the Aardvark-levels of depravity); given that this is what the government in place tells the populace, it should be taken with a pillar of salt.
* Cerebus the Aardvark rattles Cerebus to his core, mainly because he idolized Ham so much and for Ham to die by his own hand says some seriously shameful things about Cerebus in his self-estimation.
* Cerebus the Aardvark shrews. This, however, is nothing compared to the titular character. A good part of one trade paperback is devoted to Dave directly addressing said character and explaining to him what an asshole he is and how totally unfit he is for human company. Pretty much the entire comic from that point on (about 100 issues or so, depending on where you think this begins) details Cerebus' slow and gradual self-destruction.

* Cerebus the Aardvark spend issue after issue after issue sitting on a stool outside in a drunken stupor while the world moves on without him.
* Cerebus the Aardvark, the Cirinists create a fascist matriarchal state once they seize the government from Cerebus.
* Cerebus the Aardvark.) The eventual torture is forcing the blackguard (who saw her naked) to marry Sophia. Years later she marries Cerebus.
* Cerebus the Aardvark the last day of Cerebus' life) is several hundred pages long. Not that there's anything wrong with that.
* Cerebus the Aardvark: The titular character's standard expression rarely varies from a frown or scowl.
* ceremonial emperor The Senate is not really a Senate in the democratic sense and senator in Romulan actually means something like "clan leader".
* ceremonial mace of the Roman Republic) topped with a silver eagle on a globe.
* ceremonial weapon, mostly used for battles between Jedis and a last resort weapon when diplomacy failed. Twenty years of expanded universe, parodies and video games later, Jedis are facing off entire armies with nothing but a lightsaber.
* Ceremonies in the Voodoo tradition typically involve pouring out libations of rum for the spirits of the dead, especially if guidance from or communion with said spirits is the objective.
* Ceremony, along with "White people are evil beings created by witchery to destroy the world''
* Cerene runs into this problem constantly, because there are three of her. And yes, it confuses all three of them. (Or at least the two we've seen so far)
* Ceres, Celestial Legend and Aya right after their official first kiss.
* Ceres, Celestial Legend) and is literally trampled by a horde of crazed fangirls.
* Ceres, Celestial Legend, Aya visits her coma-ridden mother in the hospital with Tooya. Aya introduces Tooya to her mother, and Tooya then promises to always take care of Aya... then Aya's mother squeezes their hands.
* Ceres, Celestial Legend: Chidori Kurama loved to glomp Yuuhi Aogiri.
* Ceres, Celestial Legend, evil corporations, incest, rape, insanity, and with that shojo twist, doomed romances.
* Ceres, Celestial Legend: Here is a 16-year-old girl who's being actively hunted down by her own family in order to kill her while her twin brother is being held captive by said family and submitted to all kinds of experiments to force his alternate personality to take over. Not to mention the family then all but poisoning national water supplies in order to induce superpower development and taking the very few young teenage girls who manage to survive back to their facility, brainwashing them, and ultimately forcibly impregnating them.
* Ceres, Celestial Legend instances he gets in the entire series, between backstabbing everyone else.
* Ceres, Celestial Legend, Kagami claims that there's been a lot of this in the Mikage family line, although it's worth mentioning the context seriously calls his credibility into question: he's trying to provoke Ceres into emerging from his cousin Aya by coming on to her, taunting her with this claim, and attempting (or at least pretending to attempt) to rape her.
* Ceres, Celestial Legend, or if the details were a bit more important, they were fused together with other details.
* Ceres, Celestial Legend: Subverted, where Aya learns about being pregnant in volume 12 and is in her last month of pregnancy at the end of the series.
* Ceres, Celestial Legend to stride, breaks away from his poker face for the first time when the subject of his relationship with Aya is brought up.
* Ceres, Celestial Legend wears a trench coat (with shades and stoicism, to boot) at the beginning of the series, while he's still working for the Mikages. Additionally, he wears a labcoat when he disguises himself as a doctor at Aya's school, pulling off a couple of wicked rescues while he's there.
* Ceres, Celestial Legend. When Suzumi sends Tooya out to do a dangerous mission, Aya runs after him in worry. He reassures her that everything will be fine by giving her a lovebite and then kissing her, at which point it starts snowing. But since this is Aya-slash-Ceres we're talking about, it's a subversion: The snow

turns out to be flower petals.
* Ceres Ferdinandea to honour king Ferdinand of Naples, his patron. He stayed about the only person who ever used the full name while everyone else quickly reduced it to Ceres.
* Ceridwyn "Puddy" Banks-La Belle claims to have Dwarf, Giant, Dragon, Sidhe, and Nymph blood,
* Cerise's real name "Hyacinth" is a purple cluster of flowers and her hair is purple.
* Cernd from the same game is just as bad — no, he's worse. His wife left him rather than tell him she was pregnant because she didn't want him to try and fail raising a child, the evil wizard who murdered Cernd's wife and who is about to sacrifice Cernd's son
* "Cernunnos" by Faith and the Muse, given from the point of view of the titular Celtic deity could be considered this, overlapping with
* CERN was accused of this trope before the Hadron Supercollider came online, complete with protests fueled by a dodgy understanding of physics that feared thing would generate mini black holes that would grow and consume Earth. Seems Earth is still here.
* Ceromancy: also known as ceroscopy or candle reading. Either melting wax dropped into water and the shapes of hardened then interpreted into prophecy. Or simply meditating and gazing at a burning candle flame. The shapes formed in wax from a candle’s run off can also be read for divinatory meaning.
* Cersei and Myrcella were the only female members of the Royal Family during Robert's reign. Likewise, his brother Stannis has his wife Selyse and daughter Shireen (not counting his
* Cersei and the small council use this trope to manipulate Sansa, with Pycelle insisting that treason must be punished while the other councillors act firm but supportive.
* Cersei are World-Class Beauties (although by the fourth book, Cercei's looks are starting to go...). Several noble ladies are World-Class beauties, most notably Sansa Stark and Margaery Tyrell. Robert Baratheon (and Renly, who resembles him) in his prime was also one. Sansa's mother Catelyn, after whom the former takes, is probably between World Class and Common; Sansa is said to be prettier than her and Catelyn, while beautiful wasn't renowned for her beauty like Cersei or Sansa are.
* Cersei deals with her political rivals the Tyrells by sending them to besiege Dragonstone, knowing full well that Loras Tyrell will rashly lead a full-scale attack, making this is a simultaneous Batman, Uriah and Xanatos Gambit. It doesn't quite work,
* Cersei displays an open animosity towards Tyrion, becoming incensed when their father entrusts him with power. She has wished the death of Tyrion since the day he was born. Tyrion doesn't reciprocate beyond the occasional quip because intellectually and humanely, he's way above her level. She also harbors some resentment over Tywin favouring Jaime.
* Cersei ends up bedding (to some degree) one of her female friends (who is clearly genuinely sexually attracted to her) mostly as an experiment, but she finds no pleasure in the act. Partly, this is because she has
* Cersei gets a kick out of throwing her weight around and making underlings squirm. Pycelle is probably her favorite punching bag.
* Cersei gets so used to everyone knowing the truth about her affair with her twin brother that she almost forgets that it's supposed to be a secret, and hardly bothers to keep it.
* Cersei has a black-and-white concept of friends and enemies (with nearly everyone falling under the latter), a penchant for risky indulgences like adultery and alcoholism, poor control of her emotions, and difficulty empathizing with anyone who's not her kids.
* Cersei has all of her enemies killed, as Pycelle is murdered by Qyburn's as a result of her actions, she becomes the first woman to become Queen and sit on the Iron Throne since Princess Rhaenyra.
* Cersei has been cruel and hateful to her little brother since his birth. As

related by Oberyn Martell, she considered him a monster and presented him as a freak to strangers, and openly abused him even as a baby.
* Cersei has this on a factional level as well as a personal one. She ends Season 6 by
* Cersei is constantly smirking when she's too pleased with herself, which happens all the time when nobody puts her in her place. Her brows usually go in sync too.
* Cersei is quickly reduced to begging when Tywin declares his plans to place her in a new
* Cersei kills the second High Septon (the old one) by having a lackey smother him in his sleep, and blaming his death on old age. This backfires for her greatly.
* Cersei laments this, unaware that the reason is she's driven away or ignored everyone with good advice.
* Cersei Lannister becomes paranoid of and obsessed with destroying Jade Hasegawa because she suspects Jade is the "younger, more beautiful queen" in the prophecy who will overthrow her. While Jade sees Cersei as an opponent because Cersei won't cooperate with her, she doesn't worry about her because she is more concerned with helping Westeros survive the Long Night. Jade doesn't know about the prophecy and doesn't care about the Iron Throne or any of Westeros' political power struggles.
* Cersei Lannister causes a lot of torment since the beginning of the show particularly with her treatment of Sansa and Tyrion. She even gets both Maergery and Loras Tyrell locked up by the Faith Militant; though she too gets arrested by the Faith Militant and forced to do the walk of shame. However, she manages to get away with it and is crowned Queen of the Seven Kingdoms after burning the Sept of Baelor which killed the Tyrells and the Faith Militant. In Season 7, she dismantles Daenerys' Dornish and Reach allies and refuses to aid her and Jon Snow in their fight against the White Walkers. Despite sitting out in the first half of the final season, her warranty expires after she had Euron Greyjoy kill one of Daenerys' dragons and has Missandei executed in front of Daenerys. This culminates Daenerys to unleash her fury by destroying the Golden Company and Lannister army, slaughtering the civilians, and burning down much of King's Landing and the Red Keep. Eventually, Cersei breaks down after Daenerys won, forcing her to flee with Jaime and they both meet their end when the escape tunnel collapses above them, killing them both.
* Cersei Lannister, dons dark red and black dress in the final two episodes she appears in.
* Cersei Lannister is a secondary character throughout the first three books. She's an interesting combination of
* Cersei Lannister is this to her brother Jaime. He isn't the nicest person anyway, but where she is concerned his moral compass (such as it is) shuts down completely. Once he's separated from her for a long period of time,
* Cersei Lannister is vicious and hostile by default, petty, vindictive, and an overall despicable person to be around. It goes without saying that she
* Cersei Lannister recalls how she used to switch places with her twin brother Jaime when they were children, often for a whole day. This basically was just
* Cersei Lannister she becomes, until she's a detriment to herself and everyone around her.
* Cersei Lannister shunned her husband Robert Baratheon to the point where he considered her frigid. She has been having an affair with her own brother for nearly two decades and also sleeps with her much younger cousin Lancel and several knights.
* Cersei Lannister tends to focus on harming her — real or imaginary — enemies, and think about the consequences... uh, sometime later. Maybe. A shining example is her ploy to undermine the Tyrells in Season 5. Not only does Cersei's claim to power rely on the Lannister-Tyrell alliance (meaning that, if the Tyrells are undermined,
* Cersei Lannister was smitten with Prince Rhaegar Targaryen when she was 10 and he was 17. She never forgave her father for failing to get her betrothed to Rhaegar and hated Robert Baratheon for killing him in battle. (After the war when her father made a political marriage between Cersei and Robert, that relationship

worked out just about as well as you'd expect.)
* Cersei Lannister, who is in her early thirties, has an affair with her younger
* Cersei, much like her father, has a pronounced sense of self-worth. She is also practically a textbook case. Cersei sees herself as far more intelligent and powerful than she actually is. Her love for her brother Jaime is because she sees him as a reflection of herself if she were a man (which is also why she is notably distraught over his missing hand rather than any impact that it could ever have on his life). She loves her children, but moreso as extensions of herself than as human beings. She takes any perceived (real or not) slight extremely seriously and will often come up with forms of
* Cersei runs head first into this as well around season 5, when she decides to give power back to the High Sparrow by reinstating the
* Cersei says her father believes in the gods, he just doesn't like them, something which she agrees with, quoting him in "Blackwater" when she says "The gods have no mercy, that's why they are gods". Along the lines of a typical
* Cersei says that Robert beat his hands bloody on the wall in anguish after their first infant son died of fever.
* Cersei's champion and newest member of the Kingsguard, Ser Robert Strong, has never been seen eating, drinking, sleeping, or even using the privy. Unlike Melisandre, he doesn't even make a token effort to fit in (being, most likely, a mindless automaton), which deeply disturbs the people around him.
* Cersei seems quite disappointed during a flashback to her teens when Maggy the Frog is an ordinary-looking woman and not a terrifying monster as described.
* Cersei seems quite impressed with Gregor Clegane's killing power in Season 4 and is keen to ensure he retains it after his near death. She's also very curious about Qyburn's
* Cersei seems to have broken her, but the last chapter we get from her perspective ends with a return of her old confidence.
* Cersei sets off one of the Mad King's Wildfire caches beneath the Sept of Baelor, destroying it and killing most of her political enemies (the Sparrows, the Tyrells, and most of the Small Council) in one fell swoop.
* Cersei steps calmly and daintily past the dismembered corpses of the prisoners Ser Gregor Clegane has just executed to welcome him back to the capital in "Mockingbird".
* Cersei takes Ros hostage to ensure Tyrion doesn't intend to do this to Joffrey at the Battle of Blackwater.
* Cersei takes Ros (mistaking her for his mistress) as hostage in "The Prince of Winterfell" to mollify her fears that Tyrion is plotting a
* Cersei tried to be this for her children. The Battle of Blackwater worsens for the Lannisters because Cersei recalls Joffrey to the Red Keep despite him being in little danger. However, she has so far failed at it rather spectacularly, with Joffrey becoming an uncontrollable monster, Myrcella being spirited off to Dorne specifically to get her out of Cersei's clutches, and with Tommen being virtually a non-entity to her — so it's far too late to start anew when he becomes King. Also, another woman has already commanded his affections: Margaery Tyrell. True to the trope though, Cersei fights Margaery fiercely for control of Tommen.
* Cersei very definitely sees Margaery Tyrell as a rival, but it is not clear whether Margaery is actually trying to undermine Cersei or not. It is certainly true that Margaery's family is trying to increase their power at Cersei's expense, but it is unknown if Margaery is knowingly assisting in their schemes, or is genuinely trying to be friendly with Cersei and is upsetting her largely by accident.
* Cersei was able to retain her position, even after her forces were crushed by Daenerys Targaryen, thanks to the bigger White Walker threat coming from the North forcing everyone to make a truce and fight together against it. That said, Cersei has no intention of honoring it and plans to stay back and watch her enemies bleed each other, nevermind that whoever comes out of the conflict will come after her.
* Cersei was always a high-horse backstabbing bitch, but being chained, shaved, and in a position of despair left her

* Cersei which rendered the whole plan useless and accelerated the White Walkers' invasion into Westeros. It's also muddled because the main things he failed to anticipate were absurd plot contrivances like "the Ironborn will somehow build a new fleet bigger than any in the world in a matter of months that can remain completely undetected until attacking and somehow operate in full strength in every theatre at once" which it's hard to blame him for.
* Certain 2005 Kansas quarters had a "T" in "In God We Trust" misengraved, making the message appear to read "In God We Rust".
* certain actions despite the fact that Shepard's previous exploits often became cantina fodder (though nowhere close to what really happened).
* Certain actors with memorable appearances and manners of speaking have spawned many homages and caricatures in the popular culture that followed, especially in cartoons:
* certain advertising mascots for meat products for what Lileks calls "the motherlode of Quisling Pig propaganda" — the singing, marching pigs of Valleydale Foods shilling for pork sausages.
* Certain aesthetic communities, such as that for the pastel aesthetic, tend to get along well with most furries.
* Certain alien slurs like Tali's 'bosh'tet' go untranslated, probably because there's no English equivalent or, alternately, that a direct English translation would not carry the same implications as to a quarian. Some specific idiomatic phrases don't translate well either: "There's still a, how do you humans say it, fly in the lotion?" Also, when Garrus attempts to woo female Shepard, he tells her that turian pick-up lines probably don't translate very well. He tries one anyway and ends up telling her that her "waist is very supportive".
* certain analysis films is that they seem to give subtle messages about how goals are hampered by emotions when stoicism could have fulfilled the goals without much conflict.
* Certain animals can form bonds with lesser non-sapient spren, which is part of what allows the huge crustaceans collectively called greatshells to exist (the spren effectively makes the creatures lighter). It's not entirely clear how this affects the spren.
* Certain anti-aging creams contain amino acids. (Like all agents used in anti-aging cream, don't expect these to have any serious effect.) In advertisements, these are referred to as simply "aminos" because people
* Certain armed forces personnel, most notably aircrew and certain special forces units, are issued the closest thing to a straight example that contemporary science can provide; high-glucose, caffeinated candy that can be eaten while marching. Long-distance runners and mountaineers sometimes use the same stuff.
* Certain ASUS laptops have the power button as a key on the keyboard, next to Delete. This can be a problem for a new user when they are trying to delete something and has to avoid accidentally powering off their laptop, particularly if they had switched from a keyboard where the Delete key was at the end of the row where the power button now is (as in some other laptops).
* Certain augments can also assist abilities: Hydroid has an augment for his Tempest Barrage that can apply corrosive procs, while Ash's Seeking Shuriken augment can remove anywhere from 70% to 100% of an enemy's armor for several seconds. Kavat companions have Sharpened Claws, which can completely strip away armor from the target. (Interestingly, both Hydroid and Ash have an ability that acts as an
* Certain bites of James "Jimi" Kinstle's performance as Norman Osborn (a.k.a. The Green Goblin) in the
* Certain body parts have lots of nerves that make it so even a relatively tiny bump can send enough pain signals to make you react as if you had just been shot. The ulnar nerve in your elbow, also known as the "funny bone", is one of the best known examples. Your shin is also another sensitive area: because there is little muscle to cushion the blow in contrast to your thigh, wanging your shin on a coffee table means getting all of those pain signals largely unfiltered.
* Certain bosses have invincible armor except for certain weak spots, such as

Sargas Ruk's glowing blue heat sinks (to his credit, he tries to keep them shut) and Vay Hek's big, ugly,
* Certain bosses must be shot in the head on the first shot. Failure to do so results in retrying the stage (if it's a non-final boss in
* Certain branches of Hindu philosophy hold that because truth is unchanging, and the world is constantly changing, then the world is not real. Hence,
* Certain brands of werewolf suffer this regularly — and the smarter ones have caches of clothes that they try and make their way to in wolf mode. It makes returning to civilization slightly less awkward.
* Certain buildings with reflective surfaces can bend sunlight into a concentrated heat ray, ranging from "hair-singing" to "car-melting" levels of intensity.
* Certain cards allow players to set up Sealed Evil in a Can situations. Cards like
* Certain cards cause you to win or lose in unusual circumstances; for instance, the Near-Death Experience card, which allows you to win if you have exactly 1 life remaining in your upkeep step.
* certain carefully selected) Xenos than through exterminating them, and that cooperation with the more tractable alien civilizations is in fact necessary for mankind's future prosperity.
* Certain channels in Britain may have a content warning prior to a show with mature content such as nudity or violence. If the show is
* Certain chapters of the techno-religious militia Brotherhood of Steel in the
* Certain characters can use various martial arts derived movements to telekinetically control one of the classical elements. It is possible to utilise this basic mechanic for more esoteric uses, e.g., "Bloodbending" is the act of a Waterbender controlling the water in someone's blood, and by extension the blood in all of their bodily tissues. "Metalbending" is the act of an Earthbender controlling the leftover impurities in metal to indirectly bend metal. Firebenders can generate lightning.
* Certain characters in-series think there is some sort of scientific explanation for Robbie's Ghost Rider powers, either "enhanced" like Steve Rogers or Inhuman like Daisy. However, Robbie later claims that he literally sold his soul to the Devil and the show's creators have confirmed that he's explicitly supernatural.
* Certain Chi Gong breathing exercises, such as ones that originate in the Hua Shan Pai mountains, when done for long enough, can get the blood flowing fast, and allow one to shrug off fatigue (or even become hyperactive, and chock full of energy).
* Certain circles of the internet got it in their heads that Nazi Germany issued chocolate which contained meth. While it's no secret that meth use was rampant within the Nazi war machine (though it wasn't exclusive to them either), meth was issued in the form of Pervitin tablets (which was colloquially known as "Panzerschokolade"). The supposed bar of the stuff is an edit of a chocolate bar from Zotter, which was founded in Austria in
* Certain circumstances such as losing more than 25% of the unit in one phase, losing in close combat, tank shocking or getting hit with some kinds of special weaponry or psychic powers, will cause a unit to have to take a Morale check. If they fail the check, they will pull this trope. Certain units are more vulnerable to Morale hits than others: generally, rank and file grunts such as Conscripts and Gretchen will run away the moment things start going badly, but some units are just so fearless, psychotic and/or fanatical that they will only retreat in the most dire of circumstances... and even then only maybe. Codex-compliant Space Marines
* Certain comedy films can't go one minute without violating all sanity for a joke. Consider
* Certain countdown artists were not all that popular during the time they came, mostly because others were stealing the spotlights, but because they survived the transition from text-based to vocal some of their older content suddenly got more views.
* Certain co-workers tend to freak out if cleaning is done wrong not exactly how they want it

* Certain details introduced early in the series are drifted into something else by the time the manga ends. Rukia originally states that Shinigami kill Hollows from behind to avoid seeing their human faces, but when Shinigami finally enter the story, most Shinigami never kill Hollows that way. Shinigami were designed before the military structure was decided upon, so Ukitake's first appearance doesn't include a captain's haori. When Byakuya and Renji first appear, there's still no captain's haori, Renji implies he's some kind of retainer to the Kuchiki household, and he refers to Byakuya by a different term of respect than "captain"; additionally, Rukia seems to only recognize him as a powerful fighter among the Shinigami rather than a close childhood friend, and he in turn does not treat her even remotely in the same manner until several chapters after his introduction. When Soul Society is first shown in the manga, to follow Rukia's imprisonment, the military structure has been created. Also, Uryuu originally thought he was the Last Quincy and wearing an old-fashioned uniform until his father chastised him for misusing the "Last Quincy" title, but the final arc strongly implies that Uryuu has known about the Vandenreich from a young age because Souken told him about them, and makes it clear that the Vandenreich uniform is the original - not new - uniform. Kubo came up with the final arc in the latter half of the Soul Society arc.
* Certain diets (such as Atkins and Keto) involve eating high-fat foods without carbs or sugar in order to force the body to burn fat rather than store it "for later." Keto cookbooks are therefore piled high with sumptuous, high-fat goodies, but not a grain of processed sugar or crumb of wheat to be found. If someone on such a diet insists on soda, they drink diet soda by nescessity. The process, called Ketosis, can be disrupted by a single weat/sugar treat a week.
* Certain doors are adjacent to walls with shapes on them (spades, polygon, heart, etc.), and cannot be opened without the appropriately shaped key. While doors can normally be phased through with an Ethereal Potion or knocked down with a Falling Wall scroll, neither will work on "shaped" doors. Instead, the game will tell the player that he or she still needs the key even when ethereal, or the Falling Wall scroll will be used up and fail to knock the door down.
* Certain droids like R2-D2 and BB-8 communicate with a series of high-pitched beeps of varying pitches, but most main characters can still understand them, the
* Certain editions have the Plane of Positive Energy. Without protection, it heals you every round, even if you're at maximum hit points. Once you hit double your maximum hit points, you explode because your body cannot handle that much life energy (too much of a "good" thing).
* Certain Elf princes can ride to battle on white lions and, along with humans, can tame and ride griffons. Dark Elves use huge carnivorous lizards called nauglirs as mounts.
* Certain encounters in Story Mode have their mechanics altered to reflect a sudden plot development, usually represented by losing some of your moveset. In
* Certain enemies may only appear in one of the worlds (demons only occur in the demon world, roaming zombies only appear in the future after the
* Certain extraplanar spirits are unable to remain in Earth's astral space without weakening unless they can anchor themselves to a human host. Bug Spirits and Shedim, for example.
* Certain factions of Tyranids and Orks, two of the greatest threats to the galaxy, are currently duking it out as one of the hive fleets got diverted by an Inquisitor straight into one of the largest and fightiest Ork empires in the galaxy. When the conflict is finally over, the surviving force will be stronger than ever; the Tyranids will have absorbed the Orks' biomass and will make more resources, or the Orks will have been empowered by the conflict enough to go on a near-unstoppable rampage. Either way one goes on a rampage throughout the galaxy.
* certain famous religious text) to help keep Jerusalem adequately supplied with water.
* Certain fans are fond of accusing Rowling said that autism could be "cured" with magic. What she actually said was that magic can easily cure non-magical illnesses, but magical injuries and diseases were more difficult (which is to say, this is why

a wizard can overcome the flu with a simple potion, but potentially die of dragon pox). Autism, being a developmental disorder, is not the same as an illness.
* Certain finishing moves become mundane after a while; for instance, the basic DDT is used by many wrestlers, but generally no new guy is going to be able to use a simple DDT as a match ender. However, stars that used it as their finisher before it everyone started using (and kicking out of) it, such as
* Certain formations of the US Army similarly are known for being particularly fearsome, especially some of the more storied units like the 82nd and 101st
* certain four-letter words. Fortunately, this problem was eliminated with the use of computer printing.
* Certain games require the player to ride a special Pokémon in order to cross otherwise impassable areas. Some of these are logical obstacles, such as open water or snow deeper than a person is tall. Rough ground also shows up as such an obstacle, but typically ends up looking like perfectly even ground with small rocks scattered over it that the player can't even set foot on.
* Certain games with unusually powerful player characters (such as the
* Certain genres of a full Alternate Universe fanfiction (such as High School AU) avert this trope... but fewer fics within those genres avoid the Stations then you might think, if for no other reason then because it helps protect the result from being accused of being
* Certain genres of novels were blamed for corrupting the youth — e.g., suggesting to young women that eloping with mysterious strangers was a good idea.
* Certain gods count, including Zeus, Poseidon, and Ares (interestingly, Hades has often been depicted as lacking a beard, unlike his two brothers (whom he is older than).
* Certain historical figures (especially authors) are revealed to have either been Others (e.g.
* Certain Horde leaders tend to fall victim to this as well. You have Grom Hellscream from
* Certain humans have proven able to adapt to cold that would kill normal people, through extremely difficult training. An episode of
* Certain Imperial Guard regiments will also make it a point to try and recover their wounded, though they usually don't take unnecessary steps to rescue them if it will cost too many lives. Being the
* Certain inanimate substances also get this treatments, such as obsidian (called dragonglass by the smallfolk, but frozen flame by the Valyrians).
* Certain Indigenous Australian tribes have a death curse for criminals that involves wrapping a piece of the cursed person's hair around a kangaroo bone and performing rituals over it. A special shaman hunter then finds the person and points the bone at them.
* Certain instanced dungeons, particularly those that feature obscenely high numbers of things that can
* Certain Internet banner ads mimic the feel of news alerts, but upon being clicked on turn out to take the user to a page hawking something like herbal supplements or an overpriced flashlight.
* certain is exactly what makes Xenogears play this trope straight until the very end of the game. Once you get this certain item at early-mid game, Elly will completely break the game. The only reason why it stops at end-game is because Elly is no longer available, as she could still had done max damage per turn if she was.
* certain items as proof that you've killed the enemies in question, although more recent quests have the questgiver consider killing the boss or enemies enough, unless they want something specific from them for plot purposes. In the Darkmoon Faire, one quest requires that you get 250 Grisly Trophies from enemies that give your character experience or honor, and they're represented by ears.
* certain items (those that are particularly difficult to ship, such as large items or products that can't be transported by air) have the longer shipping window, while many other items offer free two-day shipping for Prime members, and even guaranteed Same Day/Next Day shipping in some cases. It's usually for an additional fee, but some items offer free one-day shipping (subject to a minimum order total).

* Certain jobs in the IT industry (particularly server admins) require people to be on-call outside of normal work hours. Since server downtime can cost a large company a huge amount of money someone needs to be available to fix it 24/7 and if the company doesn't have a night shift this means having someone on-call.
* certain just to be the guy who sticks his head in and comments to Penelope's ex that their servers have been hacked ...
* Certain languages permit one to form grammatically correct sentences just by repeating the same word over and over:
* Certain legendary historical figures are reduced to "mascots" of their era if the celebrity featured is clearly a product of his/her time and will be forgotten by everyone in about a decade or so.
* certainly aren't a couple, during the battle with Sloth, their constant bickering happens to compliment Sig and Izumi Curtis's lovey dovey relationship.
* certainly couldn't be having with Nanny Ogg, who was her best friend."
* Certainly martial arts styles like Tae Kwon Do and Capoeira seem very visually appealing, with all the fancy flips, cartwheels and jump kicks, but even these flashier ones usually cut the crap in serious situations.
* Certainly, Montgomery didn't fight much like Rommel. Monty was a master of set piece battles where you lay out your troops, plan out everything, and
* certainly not herself, no siree). Kyoko points out that not everyone necessarily knows or believes Sousuke's reputation and that, well, he's very physically attractive. Sure enough, the poor girl in question just had no idea how outlandish Sousuke's behavior could be and wisely decides to run away screaming when he attempts to interrogate her at gunpoint.
* certainly she carries with her at all times is probably worth a mention too. Don't screw around with the Lovelace family.
* Certainly some of the large-scale demonstrations of Q power, such as Q putting Bre'el IV's moon back into a safe orbit or Amanda Rogers completely restoring the entire planetary ecosystem of Tagra IV would provoke a massive upsurge in religious fervor if they were to happen in real life 21st Century Earth. Presumably, the more advanced a civilization becomes the harder it is to impress them. Plus, only a select few like Picard have seen (or at least remember) some of the even bigger things Q has done, such as rewriting history (or the future) on-demand.
* certainly suspicious if he stopped to change his shoes like the detective thought he would.)
* Certainly the case with the Royal Navy, as the only Lancers they have access to are Light Lancers, which is one of the weakest weapons in the game, which makes kinetic weapons preferable on a Royal Navy ship.
* Certainly the case with the settlers of Iceland. Prior to the arrival of the Norwegians, only a few dozen Irish monks lived on the island until refugees from Harald Fairhair's conquest of Norway came knocking. No one really knew what became of the monks.
* Certainly, the Orders weren't exactly wide-eyed idealists. Some were so bad that other Orders refused to include them — the Livonian Sword Brothers, renowned for being so dissolute that event the Teutonic Order refused to take them, despite how valuable their lands were, and had to be forced into it. The Teutons themselves became infamous for effectively turning the crusading experience into a package tour for the young nobles of Europe by the 15th century. Funnily enough, one of those nobles was none other than Henry of Bolingbroke a.k.a.
* Certainly the view of some people with regard to the growing (but usually very unofficial) influence of the
* Certain magic-born can survive death and even destruction of their bodies as long as their souls are safe and resurrect. Undead in particular can pull this off, with the ability to "anchor" their souls until they can rebuild their bodies. There are limits to what they can recover from, however, and it can cost more energy to rebuild their bodies than they actually possess.
* Certain maps had Phalanxes/Pantsirs that were meant mostly to dissuade enemy aircraft from camping the vehicle spawn points.
* Certain medical conditions cause weight gain to be located in certain areas.

Type II Diabetes causes people who have it to be trunk heavy. Polycystic Ovarian Syndrome (PCOS), which is also characterized with insulin resistance, causes unusual weight gain, particularly in the belly. It is also a leading cause of infertility, making any assumption that the woman is pregnant MUCH more painful than an implication on her weight.
* Certain medical tests involve injecting the patient with a mild radioactive isotope, which shows up something like this on radiation-sensitive cameras.
* Certain nastier forms of plasmids have developed addiction systems to keep them safe inside their hosts. Basically, the plasmid produces a toxin that will kill its host, as well as an antidote to that toxin that degrades faster. If the plasmid is removed, the toxin will kill the host once the antidote degrades beyond usefulness.
* Certain neural implants are designed to jam errant brain signals, like the ones that cause epileptic fits.
* Certain old ravens are able to speak the common language. When the old thrush, who has a language that can only be understood by certain humans, overhears Thorin explain this, it flies away and finds a raven to tell them news of Smaug's assault and death.
* Certain Op Art works fall into this category - for instance, Briget Riley's "Late Morning", a 12ft canvas of red, green and blue stripes that causes nausea, migranes, dizziness and even epilepsy attacks in viewers.
* certain other Megatron had a purple dinosaur for an altmode, and is widely regarded as one of the best incarnations of the character ever.
* Certain other models, such as the Ta'u Empire's Kroot hunters does this as well - if only because the Kroot's melee weapon
* Certain outfits are built entirely around this concept. They have extremely open recruitment standards, and the only thing they really do as far as tactics is drop markers and hop onto the platoon voice chat and order everyone to attack or defend, hoping to defeat the enemy
* Certain Paramecia Users other than Luffy can also be immune to bullets, such as Daz Bones (aka Mr 1) thanks to his steel-like
* Certain parasitic barnacles go through a ridiculous number of life stages, all radically different from another. Most notably, there is the
* Certain parts of Salem, Massachusetts try SO hard to live this trope year-round. Unfortunately, the bar, or ice cream shop, or convenience next door conveniently ruins the illusion.
* Certain parts of the Americas also refer to vultures as buzzards. This is an old name for birds of the genus Buteo, which includes such species as the Red-tailed Hawk and its relatives, none of which look anything like vultures. The word hawk, in turn, traditionally referred only to the smaller, bird-hunting Accipiters, such as Goshawks, "Sharpies", Sparrowhawks, etc. To make matters even more confusing, the North American buzzard/vultures (family Cathartidae) bear only a superficial resemblance to the old world vultures; they are closer kin to the Andean and California Condors than to their bald-headed namesakes.
* Certain Perks can turn you into one. Rad Child and Rad Regeneration makes you regenerate when you have radiation poisoning, and Atomic! makes you stronger and faster when exposed to radiation, on top of giving you a boost to your AP regen.
* Certain pieces of "armor" in the game are actually described as specialized balms or lotions that have a special effect when applied to the skin. In practice, this means that the character appears to be wearing nothing up top, thus becoming this trope. Again, the ladies can take advantage of it too.
* Certain plants evolved spiciness as a defense mechanism to keep herbivores from eating them. Unfortunately for them, this heat was insufficient in keeping humans at bay, as they discovered that spices had a sufficiently pleasant taste in small amounts and would make for a good addition to some meals they're about to make.
* Certain prehistoric animals filled niches that modern animals now occupy.
* Certain races, particularly subterranean ones such as drow, have a light blindness trait that penalizes them for being outside in daylight.
* Certain racial powers and birthsign abilities, though not magic in the standard sense, are essentially magical spells which can be used once per day and require no

training, skill, or even magicka to use. They are simply inherent in those races and in people born under that birthsign. For example, even Nords, who typically ridicule magic users, can call on magical frost once per day as a racial power. Similarly, those born under the sign of the Shadow or Tower can magically turn invisible once per day or magically unlock a lock once per day, respectively. (
* Certain "rare" items can be re-purchased from shopkeepers after selling them, like one-of-a-kind weaponry, Lucky Medals, and Tolbi Tickets. As the medals and tickets don't come into play until much later in the game and inventory space is limited, this allows you to sell them and free up your inventory, then simply buy them back when you reach the point in the game you can actually use them. It's also a handy source of money which is rare in the earlier parts of the game but plentiful in the end.
* Certain Rebel ships match or exceed the Star Destroyers in length: Admiral Ackbar's flagship
* Certain regions, cities and towns are only famous to the general public because of their association with a certain novel, film, song or other work of art or historical event, being the location of a famous landmark, or their association with a famous person. Some people, usually not the inhabitants of the place themselves, may even be amazed that the examples made famous by fiction actually exist.
* Certain rooms in the otherworld hospital serve little purpose other than to scare the hell out of you with a loud crashing or banging noise as you turn to exit, often accompanied by possessed nurses appearing just outside the door.
* certain scene in BTS's 2016 MAMAs performance that also references the story.
* Certain scenes confirm he attends classes that cater to students with absolute blindness as well, confirming the lenses don't achieve much.
* Certain sciences have such an extensive jargon that has no synonyms that they cannot be properly explained in simple terms. Worse, some terms mean completely different things when used accurately than when used by laymen. As a result, sesquipedalian loquaciousness can sometimes be the only way of saying something because saying it "in simple English" makes it considerably
* Certain season 1 episodes, such as "Roll for It" and "Heavy Metal War", give off a stark "anime feel", with the animation becoming more dynamic and the characters frequently going
* Certain single-player battles in the Story and Tower of Lost Souls modes of
* Certain slot machines (mainly those manufactured by IGT) are still being made with mechanical reels and levers to pull, even though they're all run by computers now and these are no longer required. Many people prefer these for a more authentic experience. Even in Minnesota, where mechanical reels are not allowed, the video versions of these same games are still built with levers. Sadly, machines that dispense payout in coins/tokens (instead of tickets) are much rarer, if not extinct.
* Certain specific bosses (particularly bosses that use 90% magic attacks but are vulnerable to physical attacks) are rendered entirely impotent by the Runic ability. The problem is
* certain spellcasting components so that the spellcaster's level progression isn't delayed and the costs can be shared amongst the party when appropriate.
* Certain spells such as "Arcane Sight" make a person's eyes glow blue, and Darkvision can make a character's eyes flash or glow red.
* Certain stages are populated with enemies that you either have to evade entirely or sneak up on to kill, and cannot be completed unless they're all either evaded or dispatched, respectively. These enemies have a red awareness zone in front of them representing their field of vision, and if you get into this zone, a red gauge will fill showing the enemy becoming more aware of you. If it fills all the way, you're considered to have been seen and will be reset to either the beginning of the stage or the last checkpoint in the stage.
* Certain stores offer perks for money spent, such as discounts on fuel from their branded stations. Some will apply this to gift cards and even point out in their commercials that you can use this as a way of getting bonuses on items that you

ultimately purchase somewhere else. Naturally, there will be a limit to what stores they offer gift cards for, but if one of those stores happens to carry the gift cards for another store...
* Certain stories where the heroine wins wealth and treasure by being nice to a supernatural creature. The
* Certain Synchro Monsters get "Assault Modes" where they become more powerful stat-wise, and get stronger effects. Stardust and Red Archfiend also have Majestic forms and Accel Sychro forms too
* Certain teams have famous supporters that are always in attendance and become very associated with them.
* certain to be attacked by aliens wielding doomsday weapons is just Saddamesque enough to be cool.
* Certain types of jobs and careers (especially ones that pay well and/or have good benefits) require a certain educational background and/or a college degree. Going to college costs money. You need a job to make money. Cue the endless circle. Some ways around this are financial aid (which is limited), taking out a loan through the college, or being fortunate enough to have someone willing to help pay for your tuition. Many countries even have free tuition at public universities. Of course, not all options are open for many people due to certain circumstances.
* Certain types of synesthesia. Most people who have it describe it as a sixth sense that allows them to memorize things like formulas and phone numbers better than the average person as well; some who perceive sounds as colors have composed music by literally looking at it without the aid of sheet music. The downside? You're basically constantly hallucinating and describing your experiences to someone who isn't familiar with your particular manifestation of synesthesia makes you sound
* certain types the villain; they may do it because they are unconcerned with what society thinks of them or because it is such a well-known classic villainous maneuver.
* Certain units of the military of various nations around the world', anyway.)
* Certain U.S. network stations pulled out the stops for their analog shutdowns.
* Certain weapons require the use of ships equipped with the Deep Scan section in order to target something BVR. These include plain old missiles and Rail Cannons, which fire amazingly precise extremely long-range cannonballs, which are not only powerful but their kinetic energy keeps the enemy ship from getting close to use the more powerful energy weapons.
* certain YouTube Poop video, the one from the "Eternal Eclipse Of The Heart" music video is parodied.
* certiorari, to 100 cases a year, out of 10,000 applications! The court simply doesn't have time to listen to every appeal. Instead, it tries to prioritize cases which have greater national interest. Having the courts of appeals in two circuits reach opposite conclusions in similar cases also tends to increase the likelihood that the Supreme Court will take the case, in order to get the issue definitively settled.
* Certs is advertised as the only breath freshener with Retsyn. Retsyn is a combination of ingredients which is made by Certs under the trademarked name "Retsyn,"
* Cerulean Seas: Some languages can only be spoken and understood by select species, due to limitations of either body or vocal range.
* Cerulean Seas. The phantom lobsters are also described as descendants of a once great eurypterid empire.
* Cervantes. If the life force runs out, he turns into a charred corpse.
* Cerveza Melorto (parody of Argentinian beer ads that use this resource).
* Cesária Évora: Cape Verdean singer, known as the "Queen" of Morna music.
* Cesar Arias's. Eventually Blas Garcia (who voiced Benjamin Sisko in the first half of DS9) took over and gave him a more fitting stronger voice.
* Cesaria Evora, was a very nice old lady and world-renowned Morna singer, and was not even known by the general public until she was 47.

* Cesar Romero. Came out two years before his death but his homosexuality was an open secret according to other actors.
* Cessation of Communications explains why the troubleshooting crew is going out there. The distress call that the player received (and doesn't see the end of until late in the game) explains why he signed up for the mission.
* Cessation of Existence: The belief that there is no afterlife and that people who die simply stop existing.
* Cessation of Existence: The idea that there is no afterlife and once a person dies, that's it.
* Cessation of Existence: The idea that there is no afterlife and once you die, that's it.
* cess" like Jafar does. Of course, he's revealed to the audience to be Jafar immediately after, so most people don't even notice.
* C'est la Vie has been running for over ten years now. The lives and story arcs of Mona and Donna, two total opposites sharing an apartment on Los Angeles, are oddly and weirdly compulsive. As are the long story arcs. And Pierre. And Louis. And the new characters like Michael.
* C'est la Vie, Mona (who is French) smokes as if daring the entire USA to physically prevent her.
* C'est la Vie, over Louis and Tiffany. Her behaviour towards Tiffany gets more and more unhinged until she ends up sectioned in a psychiatric hospital, and is afterwards released to intensive therapy, nearly driving her shrink insane.
* C'est La Vie Theatre, and the third is Laika the dog telling her story just as she runs out of oxygen in space.
* "C'est le Dieu de la jeunesse" between Lakmé and Gérald.
* C'est pas moi, c'est lui (It's not me, it's him), Pierre is a vaudeville ghostwriter, who ends up in Tunisia. He gets captured by a local tribe that hates the West, along with another Frenchman. They plan to escape during a slapstick comedy performance. This particular trope is Pierre's specialty, so he does it to his partner once and sets up to do it again. But one of the tribesmen doesn't want to give him valuable water, so he fills the bucket with mule piss. Now, the plan is for the partner to start the car, while Pierre is distracting the tribesmen. The car doesn't start, and the guy returns, only to have the bucket spill its contents on both of them.
* "C'est Si Bon" begins with Freberg trying to instruct (in a bad French accent) his backup singers to sing "
* Cestus Dei by John Maddox Roberts, set in a far future when a heavily reformed Catholic Church is a major spacefaring military power.
* Cetaceans seem to be in the habit of producing fertile hybrid offspring:
* Cetaceans speak Ceti, a language whose range of tones extends into the subsonic and ultrasonic range, which cannot be heard by other races.
* Cetaganda among the ghem-ladies in spite of his drug-induced setback.
* Cetaganda as its "fruit". They don't survive being "plucked", however, if not ripe yet. The man who plucked one (attracted by their sleeping mewing) thought they were somehow glued to the tree and failed to look before effectively ripping one in half.
* Cetaganda is a matriarchal empire, although it has a patriarchal warrior caste with a matriarchal eugenics caste is above them. This is further complicated by the fact that there is an Emperor who wields power outside of the
* Cetaganda takes place during the funeral rites of the Empress Dowager of Cetaganda. Miles and Ivan were sent to pay proper respects.
* Cetaganda, who could have worn "enough medals to sink him should he chance to fall in a river" to a gathering, but instead one-ups the competition by wearing only the ribbon and medallion of the Order of Merit - the same exceptionally high award Miles receives at the end of the book and wears in the above example.
* Cetaganda who early in the book reminds himself that he is "an officer and a nobleman."
* Ceuta are two exclaves of Spain located in Africa on the northern coast of Morocco. Both have heavily fortified border fences, with the stated purpose of

preventing smuggling and keeping out migrants, since they're a handy way into EU territory without risking the Mediterranean.
* ceviche ("return to life") and is typically prepared in a very spicy tomato-based sauce.
* Ceylon or her enemies. It's indicated that her refined manner of speech is yet another means of her acting superior to others.
* CFL franchise for the city to play in 2010. The date was pushed back to 2013 after it became a necessity to replace the entire stadium and pushed another year back after a lawsuit from a group of residents in the area. The lawsuit was eventually dismissed in 2012 and construction began.
* CFW Magic is one of the aforementioned Eldritch Abomination's four
* CG5 generally has a calm tone while singing, but sometimes briefly shouts:
* CGB Spender and Scully have as part of an experiment a child named William (later Jackson), who ist formerly believed as child from Mulder. But Scully was implanted long before his birth with Alien-DNA. This is the case of a human father and a mostly-human mother.
* CG elements are, as a general rule, typically obvious in most anime, as they make little attempt to mimic the appearance of the 2D elements outside of basic cel-shading. In particular they are often rendered at 24fps, which would be fine were it not for the fact that the traditionally-animated elements are usually drawn at 12 or 8fps. And when they do attempt to lower the framerate to match, it can look very robotic in terms of movement.
* CG ground scrolls beneath him, passing an occasional 2D rock or coral.
* CGI doesn't mean the end of the Endless Loop — witness the Hot Dog Dance at the end of every episode of
* CGI example: Buckbeak's wings are re-used as the wings of the flying horses pulling the Beauxbatons carriage.
* CGI Flash videos but due to the creators' other occupations, the project got canceled. However, the 3D team is still said to be functioning and working on a fan film of their own.
* CGI — Coast Guard Intelligence. Part of the Coast Guard responsible for organizing intelligence for their operations. Also has the Coast Guard Counterintelligence Service, responsible for preventing espionage and terrorism.
* CGI Palz! parodies this concept, making it look like an old cartoon from the early 90's using outdated CGI.
* CG is also used for people multiple times, but generally briefly or in the background (see the driver for the coach Mako and Asami ride in "The Voice in the Night" and Asami and Korra during part of the car race in "The Aftermath").
* CGI. Special mention goes to King Ramses, because of the simple effectiveness that came from the awful CG that was used to animate him.
* CG is very common within American animation nowadays, no doubt due to the budget saving potential.
* CGP Grey explores the idea from the opposite perspective. Instead of talking about the benefits of living forever, he talks about the painful downsides of aging and being mortal that we simply accept because we feel like we have no other choice.
* CGP Grey videos is what he calls "bigger-army diplomacy" in explaining how some political situations came to be, ranging from the existence of the Hong Kong and Macau S.A.R.'s in China to the succession of the English Crown (especially in the early days).
* Ch 238 showed a bunch of dialogue that seems to imply Tae and Gin became a couple - but then at the last page it showed it was someone else who sounds like them.
* Chūka Ichiban!, is a manga/anime about a Chinese boy named Liu Mao Xing, who aspires to be a great chef like his mother. The story is set in a fictional Imperial China where cooking is taken seriously.
* Cha$e claimed that contestants accumulated money for every second they could avoid the Hunters and lost all their winnings if they were eliminated (by being tagged by a Hunter or otherwise), but there was no way to take that money and leave

(although the show did have offers to quit the game for a fixed amount). Thus all that mattered was not being eliminated until the last few minutes, then being the first to reach the exit point. A player could easily reach the end with every utility and be eliminated simply because they couldn't reach the exit point first.
* Cha$e, this was an option to the players when brought up in the middle of the game with a small cash prize as a consolation.
* Chace, meanwhile, is similarly missing from "The Serena Also Rises," "Bonfire Of The Vanity" and "In The Realm Of The Basses".
* chachaanteng and cheesy seafood fried rice gratin, all served at a good value. The places do have a reputation for being somewhat hygienically challenged, however—though for some that just adds to the charm.
* Chachamaru checks Negi's temperature the same way when he develops a fever near the start of the Magic World arc. In this case, however,
* Chachamaru does this to someone who's trying to deny their attraction to Negi. Chachamaru even offers to replay a video of it.
* Chachamaru has gone so far as to be capable of love. Possibly justified for her being
* Chachamaru. How she goes back to her normal arms has yet to be seen.
* Chachamaru mentioned before she kicked the asses of multiple mass-production versions of Chachamaru at once, as long as it's not Chachamaru herself, the fight is easy. There are a few hints implying the greatest breakthough in developing Chachamaru beyond an animatronic performing tea ceremonies was Evangeline choosing to apply the "ensoulment" process she created to animate dolls, which bypassed major power and processing issues the inventors never actually solved in time: the mass-produced model depended both on running limited software and having temporarily heightened levels of ambient magic to tap for power. They do feature minor design improvements (retrofitted into Chachamaru afterwards), however.
* Chachamaru nearly causes Chisame's head to explode with this poorly worded statement about Negi's martial arts training.:
* Chachamaru on how her class is so abnormal in every aspect including beauties, breast size, and height.
* Chachamaru went comically unnoticed by most of the rest of the class (
* Château Picard in Saint-Estèphe, France that has a vineyard and produces wine, although the one featured in this franchise is fictional because it's located in La Barre.
* Chack'n Pop, Miss Chack'n can be told apart from Mr. Chack'n by the ribbon in her hair.
* Chadam asks Viceroy why he kidnapped and hurt the young Ripley, and Viceroy claims he had to, because his research had to continue.
* Chadam: Character names range from slightly-uncommon names like Ripley and Sandy, to stranger names like Chadam and Simkin.
* Chadam, everything about Viceroy is dark: he has dark gray skin, black clothing, black tentacles, and even uses black and purple magic against Chadam.
* Chadam has trouble controlling his magical abilities at first, which gets his dog killed and his friend hurt.
* Chadam occurs when it turns out to just be the young daughter of his friend, come to give him a picture she drew.
* Chadam: Ripley coins the term "Drawsome", as a blend of "Drawing" and "Awesome".
* Chadam says this word-for-word when he fails to save a young boy, named Palco, from the Pallids and must confront the boy's mother and brother. Simkin tries to convince everyone that it wasn't Chadam's fault, but they aren't having it.
* Chadam, the shot of Bella being crushed is off-screen; all the audience sees is Chadam's terrified face, and blood splattering the screen.
* Chadam, the villain, Viceroy, has a rather psychotic sounding one, and it can be heard at points when he furthers his plan.
* Chadam threw himself into studies from an early age and became thirsty for knowledge, and began conducting experiments on dead bodies to understand why he was so different, and began to start killing people for the sake of said experiments...only to eventually start using the living, instead.

* Chadam universes' equivalent to Zombies, being gray, bone-thinned monsters that have lost all semblance of sanity and just want to swarm and feed on the living. They, in fact, were once normal people, who became Pallid after losing their creativity glands.
* Chadam, Viceroy, born deformed, was ostracized from the start, even as a baby.
* Chadam: Viceroy ends up kidnapping eight-year old Ripley as another living person to dissect.
* Chadam: When Chadam and Simkin go to explore the Pallid part of the city, they have to enter through a dark tunnel, and the door immediately slams behind them.
* Chadam: When Sandy is left dying from a Pallid attack, Chadam screams her name as the episode ends.
* Chadam, who survived Viceroy's attempt to extract his gland, has been left disfigured, with half of his face gray and sunken, while the rest of him is blue; his mouth is cut off half-way, and a second mouth formed on the Pallid side, and only one of his eyes remain as well.
* Chadam: Your young daughter keeps running off away from you, into the city that is growing increasingly more dangerous, even following your friend into the most dangerous neighborhood, where if you hadn't gone to save them, they'd have gotten attacked and killed. Later, she gets kidnapped by an evil older man, who plans to use her for his own purposes...
* Chad and Orihime aren't exceptions, either. They have to learn how to summon their powers at will (with fairly amusing results at first, especially when Chad tries to remember what Ichigo's younger sister Karin looks like), although Orihime manages to improve to the point where she can use her Shun Shun Rikka without calling their names. In the Bount Arc, Uryu has these issues with the artifact that he uses to fight without his powers.
* Chad Brock: The former professional wrestler had only two top 10 country hits, "Ordinary Life" and "Yes!", the latter of which went to #1 in 2000. He's never made it past No. 19 otherwise.
* Chad Brownlee was a first-round NHL draft pick until he messed up his knee in a game.
* Chad Daniels had a bit with an especially obtuse IHoP waiter refusing to accept his passport as valid ID. He nearly lost it cracking up when his daughter argued "Isn't this the
* Chad Daniels had this response to a couple who refused to choose a name for their baby, preferring to let their newborn's beauty "inspire" them when it emerges from the womb:
* Chad gains actual powers early in the first arc, but before he does he's shown to be inhumanly strong. A steel beam falls on him from several stories up, and he takes it like it was a weak punch. Also, his first encounter with a hollow was before he was able to see them, so Rukia told him where to swing his bat. Or at least the telephone pole he uprooted and was using as a bat.
* Chad Hutchins and his football team friends are violent, racist, bullies who made another character's life a living hell for being Filipino and unpopular. Their victim even opines that people like them have no business existing, except as antagonists in high school movies.
* Chad L. Coleman originally auditioned for the role of Morgan Jones. Similar to Reedus, he impressed the producers despite not getting the part that he was one of the actors considered (and ultimately cast) to play Tyreese when the character debuted in Season 3.
* Chad le Clos was a huge fan of Michael Phelps while growing up and his biggest dream was to race against him one day. Not only did he get the chance to do that at the 2012 Summer Olympics, he
* Chadley, a teenage cyborg,: he gets jittery, starts stammering, and says that he's "experiencing an emotional response" in a tone of legitimate surprise.
* Chad Michael Murray. Every time they wrapped a season, he would celebrate by getting a buzzcut.
* Chad Morgan's aptly titled "Shotgun Wedding," as seen in the page quotes.
* ChadR-2014 stories, But some stories exploring cybernetics in general enforce

this trope by pretending it doesn't exist, due to the author having some hatred of technology and afraid of creating a cyberpunk story unintentionally.
* Chad sometimes speaks in monosyllabic noises. It's been lampshaded in the story, where Chad has been accused by Ichigo of stopping a story half-way just because he felt he was talking too much. The anime takes the joke even further, a filler arc pairing him up with the equally quiet Noba, resulting in Kon yelling at them for wasting screen time by saying nothing. Even his sweatdrops are subdued.
* Chad stops the boulder with one hand. And then pulverizes it with one punch.
* Chad, the older brother of main character Jeremy, has almost never appeared again since going off to college. Possibly, this was
* Chad took a steel girder to the shoulders and a head-on collision with a motorcycle without even the slightest complaint (the cyclist was hurt more than he was) before he even developed his powers.
* Chadtronic by breaking out his wardrobe....which is a bunch of identical blue T-shirts.
* Chad Vader has Baby Cookie who seems to be trying to the creepiest of creepy dolls. She wears nothing but booties and a zorro mask while making her chosen minion play, dance and kill.
* Chad Vader, he is shown to have the ability to force choke people, and he uses it on a guy who annoys him. In later episodes, his nemesis repeatedly humiliates him, and he just fumes impotently.
* Chad Vader, only for Chad to beat him up and stuff his own marshmallows into his mouth.
* Chadwick Boseman, but he was highly enthusiastic about the role, and knew that he and the character would become an icon for black audiences. If the action figure memorials made in his honour since he succumbed to the illness in 2020 were any indication, he succeeded.
* Chadwick Boseman), he had been pegged as one of the best actors of his generation and one whose success had opened countless doors for Black actors in particular.
* Chadwick Boseman simply said he was accepting it on Hopkins’ behalf and the show ended in an incredibly abrupt fashion. When Hopkins later gave an acceptance speech, he admitted that even he didn’t expect himself to win.
* Chadwick Boseman the following weekend. The TBS broadcast opened with a message saying, "Chadwick Boseman Rest In Power", while the ABC broadcast closed with a 40-minute special of MCU actors and producers talking about Boseman and finished with words from Boseman himself speaking about the film's legacy.
* Chadwick Boseman without commercials, followed by an ABC News tribute special.
* chaebol the automobile arm was reintegrated into GM. More recently GM sold Opel/Vauxhall to Groupe PSA (see below).
* Chael Sonnen also ran for state representative. More infamously, he took part in a money laundering scheme as a real estate agent while fighting professionally at the same time.
* Chael Sonnen has lost three championship fights that he was in the process of winning, once in the WEC against Paulo Filho and twice in the UFC against Anderson Silva.
* Chael Sonnen was a largely forgettable wrestling specialist who was only known for
* Chael Sonnen was infamous for crying in pain when caught in submissions early in his career; this cost him at least one bout even though he never tapped or verbally said the equivalent of "I quit."
* Chai Lai Angels: Dangerous Flowers are closing in. When they do a quick count of their numbers, they realise that Hibiscus is missing. At this point, Hibiscus comes round the corner commanding a tank being driven by Chen, which quickly puts the bad guys to flight.
* Chai Lai Angels: Dangerous Flowers, Chen escapes being run over by Mei Ling by jumping over the edge of the down ramp in the car park. He catches on to one of the lower levels and is hanging there by his fingertips when Mei Ling stops the car and starts shooting at him.
* Chai Lai Angels: Dangerous Flowers. Chen's next scene has him telling his friends

about this cute girl he met on the flight.
* Chai Lai Angels: Dangerous Flowers, Darkie, one of Dragon's henchmen, sports one. It is later revealed to be the result of Rose putting his eye out in an earlier encounter.
* Chai Lai Angels: Dangerous Flowers, Dragon's gang abducts Rose's fiancé Gus in an attempt to force the Chai Lais to back off.
* Chai Lai Angels: Dangerous Flowers, Dragon's gang sends a finger to Rose after they abduct Gus. Rose is very confused when she realizes the finger they have sent is not Gus's.
* Chai Lai Angels: Dangerous Flowers Dragon. She arranges for her husband to be attacked (and later murdered) and for Miki to be kidnapped, as well as faking her own kidnapping and torture in an attempt to extract the location of the Andaman Pearl from Miki.
* Chai Lai Angels: Dangerous Flowers: During Miki's kidnap, Crown of Thorns leaps on top of the kidnappers' van and stays there for most of the chase.
* Chai Lai Angels: Dangerous Flowers: During the kidnap, Spadix reaches out and puts her hand on Lotus' chest to stop her charging into the kidnappers' guns. In doing so, she grasps Lotus' breast. She keeps her hand there after the kidnappers have driven away, and Lotus has to point it out several times before Spadix lets go.
* Chai Lai Angels: Dangerous Flowers.) Gus is barely conscious, so Rose takes his hand and clamps it on to Spadix's butt. This does the trick.
* Chai Lai Angels: Dangerous Flowers. Katherine misunderstands the order and cuts off Kong's finger.
* Chai Lai Angels: Dangerous Flowers, Lotus, Hibiscus, Rose, Spadix and Crown of Thorns.
* Chai Lai Angels: Dangerous Flowers, Spadix gets stronger, tougher and more aggressive the angrier she gets: especially if someone gropes her ass or boobs. At her strongest, she can bend steel bars, or stomp an opponent literally into the ground.
* Chai Lai Angels: Dangerous Flowers: When Mei Ling attempts to run Chen down, he has an empty empty parking lot to escape in, including pillars he could duck behind. Instead, he chooses to run directly in front of her car.
* chaim, equals 18, it's considered lucky. Gifts of money, either as presents or charity, are often give in multiples of 18 for this reason.
* Chaim Weizmann a notable chemist, "who developed the ABE-process which produces acetone through bacterial fermentation" (Wikipedia).
* Chain-axes were popular close combat weapons used by assault troops during the Great Crusade and Horus Heresy eras of the game’s setting. Some particularly archaic and/or barbaric assault troops still use them during the main 41st Millennium era: furthermore, they are popular with Khorne worshippers, as the axe is considered as a sacred weapon to the Blood God.
* Chained by Fashion: Wearing chains intentionally as a fashion statement.
* Chained Heat: Two opposing characters are stuck together and must learn how to cooperate.
* Chained to a Bed: A character is tied to a bed under the belief that sex will follow. It does not.
* Chained to a Bed: Can be a part of it, if it's being played seriously.
* Chained to a Bed", Scully manages to attract the attention of her new partner Dogett by knocking over a lamp and starting a fire.
* Chained to a Bed: Someone agrees to be tied to the bed as part of foreplay, only for their partner to take advantage of their trust by robbing the tied-up person and leaving them there.
* Chained to a Bed: When sexual restraints respond with pervs going beyond what is openly said, shown, and what is proper and are usually done for no good reason.
* Chained to a Railway and should be considered the equivalent to calling 911, pulling a building's fire alarm, or pulling a train's own on-board emergency brake.
* Chained to a Railway, but as deathtraps go, it's "simple, inexpensive, personal and deadly." On top of that, it also induces quite a bit of horror in the victim,

since it leaves just enough wiggle room for them to maybe escape, and allows them to hear the train coming.
* Chained to a Railway: Chained to the railway for a train to come and kill the captive.
* Chained to a Railway does indeed contain an instance of Pauline getting tied to a railroad and getting rescued by the male hero.)
* Chained to a Rock: Someone is being sacrificed to someone (or thing), and is chained to a rock until it comes for them.
* Chained to a Rock title away (and not to mention, her son's affection on Psyche).
* chain e-mails that you get from your aunt that are full of dancing teddy bears and cutesy songs: a horrifying mess that takes far too long to be done with and isn't all that interesting besides.
* Chain Gang: Multiple prisoners literally chained together while laboring.
* Chaining-to-a-rock sacrifices are fairly common with dragons and other monsters anyway, and the ur-example was probably Andromeda with the sea monster from Greek mythology. The monster was killed when Perseus showed up to rescue her and turned the beast to stone with Medusa's head.
* Chain is one of the most illegal of drugs in that era. In 2099 A.D. Genesis, it was revealed that the legislation on Chain had been upgraded from a "thirty-year stretch" (being physically aged by three decades) for possession to a "death penalty" for even having it on one's person. In his only appearance in the 2099 comics, the Daredevil of that era planted a dime bag of Chain on a drug dealer just to make sure the dealer never pushes drugs again. At the time, the dealer had been peddling a drug laced with "a rider chemical" that "causes communicable sterility". In short, Daredevil signed a drug dealer's death warrant for trying to "kill all birth in Downtown."
* Chain Letter is a technology-hating cult who kill people by sending them chain letters, and offing them if the letters are not sent forward.
* Chain Letter, the teenagers resort to the simple method of a shallow desert grave.
* Chainmail Bikini character, which includes three half-monster templates).
* Chainmail Bikini: In reality, you should not fight in bikini-shaped armor, because it protects only some vital areas but not others.
* Chainmail Bikini neatly fits this description, as the scene shifts back and forth between chararacters-in-gameworld and players-at-table views. Recently, a newcomer took over one of the characters in the RPG, and that character's face changed to represent the new player.
* Chainmail Bikini Of course, it took Marcus to point this out to the GM...
* Chainmail Bikini with its characters and story people were familiar with, the gaming group came off less as a parody/commentary on gaming tropes and bad gaming and more just a group of people being complete dicks to each other.
* chainmail. It was heavy, bulky, and yet fairly protective to wear, especially when backed with enough padding to absorb the impacts of weapon blows. Powerful piercing attacks from swords, lances, or arrows could penetrate mail to the detriment of its wearer.
* chain mail messages debunks a few of these on their site — including one that tries to pass off the DVD cover from a Korean horror film about a straight example of this trope as a real ghost photo.
* Chainmail. The original design specs called for a dwarf faction that had deposed their king, abandoned faith in their god, and become communist factory workers and miners. The Dwarves would have dressed like something out of a '30s era Soviet propaganda poster and built mecha golems.
* Chain of Command", Captain Jellico has Riker navigate a shuttlecraft through the dense nebula where the Cardassians are hiding, preparing an attack. Riker sets up a massive network of mines along the hulls of the Cardassian ships. They're forced to comply with Jellico's demands and leave without fighting.
* Chain Of Command, Geordie and Jellico mention doing the "Titan's Turn". A risky move done by shuttle pilots doing the Jovian Run between Jupiter and Saturn where they would accelerate towards Titan and then graze the atmosphere before turning

sharply around the limb of the moon. It's implied to be illegal as the pilot's next action would be to pray that nobody saw them.
* Chain of Command". Picard does express to Troi at the end of the episode that he is still feeling the emotional impact of his torture at the hands of the Cardassians, but by the next episode, it's as if it never happened. This carries through even when he's interacting with Cardassians in later episodes.
* Chain of Command the captain's permission (and also that it was mostly commonly granted to senior officers in specialized positions), and the series is relatively consistent in showing that captains and above have a more 'casual' variant of their uniform (sort of an inverse to a dress uniform).
* Chain of Command. The unofficial name given to them by the fandom was "Chainguns O' DOOM" and the phrase eventually appeared on Rhinox's bio cards in later toy releases.
* Chain of Deals: Someone has to make deals with a whole bunch of people in order to get what they want.
* Chain of Deals: The Japanese legend of the straw millionaire, a poor man who prayed to the goddess of mercy. She granted him a piece of straw, which he traded through his travels until he managed to win the heart of an heiress.
* Chain of Deals: where a character trades Item A to get Item B, trade that to get Item C, and so on. A Chain of Deals may become a Catch-22 Dilemma if the last item is needed to get the first item ("There's a hole in my bucket...").
* Chain of Memories, is a proper transliteration for both). Of course, the game uses two different transliterations to make sure it still makes sense, but even then, the Japanese pronunciations are very close if not identical.
* Chain of Memories Justified, considering that the entire game takes place in one castle.
* Chain Of Memories: Riku spends quite a bit of time claiming the ability to "smell darkness." This is never explained, nor is it ever brought up again.
* Chain of Memories, this plot is reprised, only her memories were stolen instead of her heart. Which explains why she couldn't identify the thief (her memory of the theft itself had been altered), which Alice uses to "prove" hers and Sora's innocence of the crime.
* Chain of Memories would have happened had Sora followed through with his initial plan.
* Chain of People: A group of people save someone falling to their death by grabbing each other chain style.
* Chain Reaction Destruction: Instead of a thing exploding with BOOM, it goes "pow pow pow pow pow!"
* Chain Reaction large fireball, almost akin to a small nuclear blast. Eddie manages this just barely; the back of his bike is actually lifted by the shockwave (but the forward wheel somehow remains on the ground).
* Chain Reaction's justification for murderously suppressing the existence of clean fusion power is that the world economy would collapse. Unfortunately for him, the hero faxed copies of the blueprints to every conceivable location.
* Chain Reaction. The protagonists have money planted in their homes to make it look like the Chinese government are bribing them.
* Chain restaurants like Applebee's, Bennigan's, and TGI Friday's performing it in Klingon above), this tends not to be the case at foreign-food places; for example, a certain Italian chain restaurant sings a Pavarotti-esque rendition of "Happy Birthday" in Italian, albeit with the lyrics completely changed as opposed to a straight literal translation to avoid any chances of a lawsuit. Even with "Happy Birthday" now PD, the restaurants still typically use their original material, more out of tradition than anything else.
* chainsaw arm. Al is never shown with the full plume afterwards, despite his character design being unchanged up to that point.
* chainsaw as an instrument. When played live he would chop things up on stage during this number.
* chainsaw commercial when the ad was pulled described it as a hockey mask, however, because this trope created that expectation.

* Chainsaw Good – Often combined with bladed weapons to create "Chainswords" and similar devices.
* Chainsaw GoodChainsaws are flashy and make a lot of noise, so they must be really powerful.
* Chainsaw Good firearms, fitted with armor-piercing explosive heads, capable of firing full-auto, and far more effective at point-blank range.
* chainsaw. In the episode where Mr. Burns and the Rich Texan were destroying the environment, Kent Brockman announced that "Smokey the Bear" is now "Choppy the Lumberjack". Cut to a bear in a lumberjack get-up cutting a tree with a chainsaw, while an activist protested to his actions behind him. Choppy backhanded him angrily and revved up his chainsaw.
* Chainsaw later tries this with Inque, but it’s turned against him.
* chainsaw made out of Lego doesn't cut much except piles of loose Lego.
* Chainsaw Man, and for some reason the only thing they can think about after that is Halloween.
* Chainsaw Man appears as several dead bodies on top of each other : two of them serving as legs, that are attached where the shoulders should be with a single head on top, and three others make up the torso with their heads aligned in the middle, and a bone formation somewhat resembling a goat skull serving as the devil's actual head.
* Chainsaw Man: Denji, the protagonist, starts off as a devil hunter to pay off his debts, but ends up being taken in by an official organization. In fact, Devil hunting seems to be a booming international industry, with both public organizations and private freelancers working to hunt devils, with regulations preventing interferences between devil hunters.
* Chainsaw Man in his mouth, which he swallows and has to puke back up.
* Chainsaw Man. She also has a third on her left cheek and fourth on the right side of her chin.
* Chainsaws. But certain heroes have also made use of them, particularly those who fight zombies, demons and other nasties - if you're fighting something frightful, sometimes you need a weapon that roars and bites back.
* chainsaw solo. However, it only got to #24 on the Mainstream Rock charts, a peak they outperformed four times.
* Chainsawsuit, a character suffers a "gastriac arrest", so the doctors have to stabilize him by putting him in a "medically-induced food coma".
* Chainsawsuit, a guy preemptively gets a tattoo to celebrate the Green Bay Packers winning the 2015 Super Bowl—and when the Packers don't even make it to the Super Bowl, he laments that his tattoo looks stupid now. Then we see the tattoo in question, and it's a mix of bad grammar and clashing styles that would have looked stupid even if his team had won.
* Chainsawsuit), in which Susan Miller is assaulted by the President of the United States. Money quote:
* Chainsaw Suit on "geek rock (nerdcore)" bearing the usual risk of invoking coolness.
* Chainsawsuit plays with this in one of their panels, where the ghost in question is the ghost of an old bunny-eared TV set spouting static.
* Chainsawsuit randomly speeds up and slows down, with accompanying audio distortion.
* chainsawsuit The recipient of the award celebrates by leaping into an open grave.
* Chainsaw Warrior has the final boss the Darkness. This entity is immune to every weapon you have except for your Laser Lance, a weapon that only has 3 shots to it. So save that Laser.
* Chainsaw Warrior, it's specs have been changed so it's got good armor-piercing ability and the ability to several enemies at once. The drawback is that's so big, it penalizes you in melee combat. There's also the new Xm 600 sniper rifle which just misses the cut at being a heavy weapon, it's a very big anti-material sniper rifle that's very good armor-piercing and it's very accurate. Unfortunately, each bullet is so big, that it can only hold 4 at once.
* Chainsaw Warrior, the main man can have several varieties of chainsaws, including

a diesel-fuelled chainsaw and a stone-cutting industrial saw.
* chainsaw-wielding. Don't worry, he isn't completely nude... he's wearing the severed head of a pig as a hat.
* chainscythe, a weapon that fits with her techno-Grim Reaper visual theme.
* Chains of Love; a symbolic chain shows that two characters are bound to each other.
* Chains Of Olympus, the last half or so of the game takes place in Tartarus, which is essentially Hell.
* Chains of Olympus they would do that, only that he would be forgiven for his sins, making ten years of servitude completely pointless.
* Chains of Reality has both versions of the Loud family: More specifically, the original prototype sisters, the new set of sisters from the new reality, and Lincoln/Proto-Lincoln/Sincoln. Interestingly enough, however, while all of them have access to divine powers and such, only the prototype sisters and Proto-Lincoln/Sincoln have an innate knowledge on how to use them, while Lincoln and the Neo-Sisters have to be trained in order to access them.
* Chains of Satinav features the Fairy Harp, a mystical instrument which allows, among other things, the creation and command of magical nightmare-inducing crows. Any human that tries to play it will simply die. Only Fairies can play it safely, a quality which drives much of the game's plot.
* Chains of Satinav points, Geron's basic magical power is the ability to break things, whereas Nuri has the power to mend them.
* Chains of Satinav: The kingdom of Andergast suffers from a plague of magical crows that give the citizens nightmares.
* Chairman Jack: Emerge ends up badly to the point of him almost falling to his doom, he feels the need to assure his partner that this was all a deliberate attempt to distract the pirates.
* Chairman Jack: Emerge so that he has an entire board of various parties in his mind who move various actions.
* "Chairman" kicks it up a notch, having things like a cruise ship and a hotel to use as private gambling venues, with people disappearing or getting killed at them seemingly posing no problem.
* Chairman of the Board, Edison reports to the boardroom of McMillan Industries for his first day of his new job there. As soon as he gets there, the old men who make up the company's board of directors immediately mistake him for a gofer (understandable, given that Edison is dressed casually and is played by Carrot Top) and give him a bunch of orders for coffee, tea, muffins, doughnuts, etc. It's only when Edison brings back all of what they'd asked for that they learn who he really is: when Mr. McMillan had recently died, he bequeathed Edison all of his stock in McMillan Industries, making him the new chairman.
* Chairman of the Brawl: When the Improbable Weapon is a small piece of furniture.
* Chairs" ad, which features a narrator comparing chairs to Facebook and then rattling off a series of random items vaguely related to sharing.
* Chairs", an apparent pattern in media that doesn't qualify as a trope due to being a coincidence with no interesting meaning. Synonyms include "chairsy" and "PSOC" (an initialism for People Sit on Chairs).
* Chair shots, kendo sticks, guitars, etc. even though they are still just as dangerous. Recently, to
* Chaitén was destroyed by a volcanic eruption in 2008. The survivors were relocated to Santa Barbara to the North of the now abandoned settlement.
* Cha Ji-Yyoung is a journalist who makes a horrible mistake in the Korean webtoon
* Chaka a good thing, as far as her relationships go. Ayla does not expect it to end well, if/when Chaka's significant others all find out about each other, and has had to explicitly forbid Chaka from bringing both of them to his birthday party.
* Chaka, Generator and Lancer (who were all transgender before they changed) are all examples of the trope played straight.
* Chaka herself has a lot of people after her. More than a few are female.
* Chaka is definitely the guiltiest party of the members of Team Kimba. When super-powered ninjas attacked on Parents' Day, she stopped to hassle the ninja leader

about his technique, then collected the throwing stars being hurled at her and handed them out to her little brother and Tennyo's younger brother.
* Chaka Khan's biggest hit on the Hot 100 wasn't "I'm Every Woman", which only peaked at #21 despite reaching #1 on the R&B chart, but her 1984 cover of
* Chakal's got a handlebar moustache that is quite impressive. But everything about the man is extra large.
* Chakan: The Forever Man. Including all those planets out there in space. So now Chakan waits for humanity to develop interstellar travel...
* Chakan: The Forever Man patient, eventually the words "not the end" will appear for a few seconds, and then the game will soft-reset. Ironically, the game never did get a sequel.
* Chakan: The Forever Man since he cannot rest until all Evil is eliminated.
* Chakats having a certain saying, "love doesn't divide, it multiplies."
* Chakat Universe, all hermaphrodites therein are of course able to do this, though they're not supposed to unless they have no other option. (This was done by a villainous skunk in one of Gildedtongue's adventures. Shi is the only canon example so far.)
* Chaka, whose instinctive ki mastery lets her pick up more than just wire-fu martial arts tricks within moments and who's certainly prone to hamming it up. Or going after
* Chak De! India: Kabir Khan finally convinces his team that he's the best coach ever: cue title song (literally named "GO INDIA!") and montage of the girls training.
* Chakona Space and became its own series. "Forest Tales" was the first series in the setting, but others have been written, by Doove and an army of Chakat fans. Some of these fans are better writers than others.
* Chakona Space because Rakshasa were oriental cat-demons and D&D monsters before they were aliens), but also more alien aliens.
* Chakona Space) can all potentially own ships capable of sailing between distant worlds many lightyears apart in a matter of days or weeks.
* Chakona Space: Captain Foster and his AI Tess, use this defensively on enough occasions for it to be one of their more prominent Hats.
* Chakona Space, Captain Foster tries to perform a tickle attack against one of his female Rakshani marines. She's smart enough to knock his arms out from under him, plunging his face between her chocolate cream pie coated breasts.
* Chakona Space, Chakats all have positively huge breasts (with in-story justification that they're actually made from a spongy tissue that stores a sort of natural sports drink they secrete when they're not in full pregnant lactation mode). Of course, there's no shortage of endowments among non-chakat races, either.
* Chakona Space, Chakats are capable of this and have used it several times.
* Chakona Space consider it imperative to remain almost constantly pregnant and will mate indiscriminately within their species. The story in which they are introduced revolves around trying to find a way to circumvent that aspect of their biology, since they are suffering from massive over-population. There's also Chakats in general, Foxtaurs in General (especially the males under Obligation), Skunktaurs in general, Admiral Kline, his wives, plural on wives, there's five so far... the list goes on. And on, and on....
* Chakona Space development, can switch between male and female. They're born male then change to female for the first time at puberty and can trigger the change at will from then on.
* Chakona Space: Different stories play with this thanks to genuine aliens as well as Terran colonies on distant planets that, for obvious reasons, use a different clock and calendar.
* Chakona Space fanfic. It has retained most of the technology and the Caitian race, but almost everything else is original by now.
* Chakona Space features Bluepaw skunktaurs who are usually very powerful telekinetics. A team of Bluepaw skunktaurs can combine their abilities to do industrial level lifting.
* Chakona Space features Stew discussing having a group of gay characters sire her

future children. Her captain, knowing they're not interested in females mentions them chasing after her with a turkey baster.
* Chakona Space features The Federation of the Chakat universe which is at its Height and has hints of being headed for the Decline and Fall. WWIII (also known as the Gene Wars) is mentioned frequently, having apparently killed billions and also resulted in the liberation of gengineered human-animal hybrids, and the eponymous Chakats were designed to aid in the rebuilding.
* Chakona Space gives us the Faleshkarti, whose semen contains a hormone that makes their partners stupid. Permanently. Note that the Faleshkarti are hermaphrodites, and also that they have very very high sex drive, particularly at the onset of sexual maturity. As a result, the children do a lot of the important work, including scientific research.
* Chakona Space has Madeline, in the "on life support and hooked up to the ship's computer with holographic avatars" sense.
* Chakona Space has several shuttles for various tasks. One of them is described as a retired military surplus assault shuttle.
* Chakona Space have good reason to appreciate older music, such as one man who is revealed to be several hundred years old).
* Chakona Space, humans, especially main characters, are very much in the minority in these stories. Though they are still a major fraction of the Federation's population.
* Chakona Space: In a recent story set in Neal Foster's more distant past, he doesn't paint the town so much as the ceilings of a starship's bridge and sickbay.
* Chakona Space). On the other hand, most characters who want kids usually have little trouble making them, the major exception being Forestwalker's foxmorph mates Katrina and Kristopher.
* Chakona Space. Perhaps the most notable example being when Garrek and Chakat Goldfur first started seeing each other and he spotted hir male parts and freaked. Though Garrek later apologized, saying he should have looked up Chakats on the net and realized that they were herms, and they got back together, so far they've got two cubs by one another.
* Chakona Space: Personal shields are directly mentioned a few different times in multiple different stories.
* Chakona Space series features a pair of "Ambassadors" who kill their servant and dump her body at the base of a stairwell. Captain Yote announces the death of said servant (without including details) to them and one of them snarks about making sure the stairwells are properly safe, instantly implicating "him"self in said death.
* Chakona Space", she is once again intact but she looks like she's 20.
* Chakona Space so Goldfur and Forestwalker are careful not to have sex when either one is in heat. Foxtaurs allow one generation of inbreeding because most of them can't leave their isolated Amish-style villages thanks to Territorial Attachment Syndrome, and a shortage of males.
* Chakona Space Star Fleet runs a wide variety of different military vessels they use to police interstellar space. Pirate-operated Q ships, Fleet cruisers, and fighter carriers are also mentioned.
* Chakona Space stories, some of them are just run of the mil pirates out for loot, others are slavers from the Non-Aligned Worlds where slavery of morphs is still allowed.
* Chakona Space strongly discouraged to forbidden from pursuing "dangerous" professions such as hunting.
* Chakona Space" territory, thanks to slave conditioning. Fortunately she found a "master" who hates slavery.
* Chakona Space: There's a "Lover's Lane" in the city where Forestwalker lives. And to quote Lupu, "It's 'Lover's Lane', not 'Kissing Korner'".
* Chakona Space: This series gives all Federation ships the prefix: FSS, regardless of ship's class or type.
* Chakona Space universe nearly all Chakats are Empaths, while Skunktaurs are divided into three "houses" with different powers; telepathy, telekinesis or astral

projection (very rarely accompanied by teleportation). The two species can interbreed, which sometimes results in Chakats with Skunktaur powers.
* Chakona Space 'Verse, physical contact creates an unfilterable, unblockable link between the mind reader and pretty much anybody else. Especially another telepath. Not that the touch is required in the first place.
* Chakona Space will also refer to "the makers"—even though they know exactly who those makers are.
* Chakotay and Torres also experience this to varying degrees when they learn that
* Chakotay, another Maquis and a former Starfleet officer, is given his Lieutenant Commander rank back (and later promoted to Commander) and her first officer. Combined with his being a Maquis captain, he ends up as something of a double subversion.
* Chakotay hailed from one set up by Native Americans trying to preserve their heritage.
* Chakotay has an eagle feather in his medicine bundle, a memento of a failed attempt while a teenager to set free the last bald eagle on Earth from its aviary.
* Chakotay is former Starfleet, so it's more likely a reflection on the notorious stubbornness of his captain.
* Chakotay started blaming himself after he learned that his former lover Seska had betrayed the titular ship to an enemy species; she turned out to be a Cardassian spy
* Chakotay tells a version with a fox instead of a frog to make a point about an unwise alliance with the Borg.
* chakra blade had a chakra consumption rate far too high for anyone but him to use in battle. It isn't until Jiraiya helps him refine the design that others are able to use them.
* Chakra cannons were basically this, charged up by the chakra of groups of ninjas. One of them was powerful enough to potentially destroy the moon.
* Chakra is a fundamental part of the human anatomy in the series, so it is sort of
* Chakrams and other ring-shaped weapons) or for melee. Most often used by flashy and/or exotic assassins, who essentially treat those things as portable buzzsaws that can be used at both close and long range.
* Chakra orchids are a species of parasitic flowers that propagate by inserting their seeds within the throats of large animals — archetypically human beings, although any sufficiently sized creature outside of birds or water animals can be infected in this manner. The seeds root themselves in the victim's spine, wiping their personality and turning them into one of several types of subservient workers that serve the central orchid growth.
* Chakravartin acts this way to prod Asura enough for him to escape Naraka.
* Chakravartin, AKA God, fires an ultra-massive super laser — powerful enough to qualify as a Wave-Motion Gun
* Chakravartin, and doesn't really fit the Benevolent part that being an Ideal Universal Ruler comes with being.
* Chakravartin himself, and yet his sheer power is such that it doesn't matter, forcing Asura to fight with more restraint and skill to overcome him.
* Chakravartin in his giant form has a laser attack that casually blows up planets in it's way without loosing momentum. He eventually starts THROWING Planets and entire Stars at you, including a Red Super Giant.
* Chakushin Ari features one towards the end, populated by only one green corpse in a wooden crate.
* Chakushin Ari. In the American version, it's revealed to be the song that a certain bear plushie played when it was squeezed.
* Chakushin Ari. They are visible in the scene for a good few seconds before attention is drawn to them.
* Chalet Girl: Former skateboard prodigy Kim has work in a fast food burger at the beginning of the movie to make ends meet, before quitting to work as a Chalet Girl.
* Chalet Girl Kim is one since she was a little child, being a skate boarding champion when she was eleven, but had to quit her sport career due to her mother's

death. During the movie she reignites her passion and picks up snowboarding.
* Chalet School, and she wouldn't be out of place in a magical girl anime.
* Chalet School), and the latter's bread twists are often described as 'heavenly'.
* Chalet School, fines were issued to pupils who failed to speak the language of the day (English, French, German), or who used slang.
* Chalet School hope she will become more rounded as a person and learn other skills besides music.
* Chalet School, running away from the Nazis, war, her husband Jack being temporarily MIA, the deaths of friends, a shedload of children...nothing will keep her down for long. And then there's Corney Flower, Biddy O'Ryan, Daisy Venables, Mary-Lou Trelawney, Carola Johnstone, Len Maynard...the list goes on.
* Chalet School series has Rufus, a Saint Bernard puppy who Joey Bettany rescues from drowning while the school is in Tyrol, and who later becomes a skilled tracker and guard dog. After Rufus dies, the school give Joey another Saint Bernard puppy as a present, who she names Bruno. Bruno is more rambunctious than Rufus and tends to jump on people, but is a lot more gentle around Joey's frail daughter Phil.
* Chalet School series, was a teacher herself. She actually tried to start up her own school (in Hereford, which became one of the Chalet School's locations), although unlike its fictional equivalent, the school was unsuccessful in the end. Like Joey, the series's heroine, she also converted to Catholicism.
* Chalet School when she and Jane Carew get into a fight, because Jack is jealous that Jane gets to wash the teachers' car instead of her.
* Chalet School), whose rich parents let her do whatever she wanted, culminating in her setting fire to the summer house. Most tend to grow out of it, usually with some help from Joey, their peers, and the occasional accident.
* Chalet School who works as a cleaner to survive, and takes on the name of 'Mrs Helston' (Helston being her mother-in-law's name). After the war ends, Belsornia becomes a republic and is annexed by the Soviet Union.
* Chalicotheres), possessing a horse-like head with a slouched posture and an ape-like knuckle-walking gait. Strangely, its closest relatives are the tapir and rhino.
* Chalicotheres were prehistoric, knuckle-walking, odd-toed ungulates that were essentially horses trying to be gorillas (or
* Chalion. The cover story of espionage and bribery used to explain Chancellor Arvol dy Lutez's death in the dungeons of the royal castle some 16 years back was fairly transparent if one thought it through, so many (including the Chancellor's son) concluded that he had seduced the King's young wife and been caught out.
* Chalion, whose role in history parallels the Arabs, come from a desert archipelago to the north.
* Chalk amongst the female staff, all the male staff have individual quirks and flaws.
* chalkboard gag in the episode, "The Debarted", has Bart writing, "The art teacher isn't pregnant. She's just fat."
* chalkboard gag of "The Fabulous Faker Boy", Bart is writing "This school is not falling apart" on the chalkboard, which is now dilapidated, and when he takes his eyes off of it the chalkboard collapses.
* chalkboard punishment for the episode "Homer the Great" reads "Adding 'just kidding' doesn't make it okay to insult the principal".
* Chalk, invoked this trope quite heavily, given that it was blatantly 'Fawlty Towers in an English comprehensive school.'
* Chalk isn't even that unusual. Flavored chalk is commonly used as an antacid. It's even recommended as a calcium supplement.
* chalk — it contains calcium, which is necessary to build up the bones and teeth of the baby.
* Chalk Outline has one of the outlines in the aftermath of a bomb explosion drawn in this style, complete with Egyptian headdress.
* Chalk Outline outside and even creeped out Strong Bad by walking in place with disembodied traffic noises echoing around him.
* Chalk Outline: The chalk outline of a corpse is drawn on the ground where the

corpse was found.
* Chalk Outline: The crime scene has the silhouette of a dead body drawn on the ground.
* Chalk Outline to imply the presence of a dead body without actually showing one on-screen.
* Chalk: The game's enemies in have to be color-coded, as each type has a vastly different way of defeating it. It also serves as a hint system for bosses, who need to be fought the same way as normal enemies of the same color.
* Chalky White. Chalky then holds up a severed finger with a Klan ring still around it, and wonders if the man will want the ring back or if doing that would just be pouring salt in the wound.
* ChalkZone: After Rudy's best friend, Penny, learns about ChalkZone, she swears to keep it a secret.
* ChalkZone), all the Egyptian chalk drawings (and, to fit in, Rudy, Penny, and Snap) walk like this. And we only see the profiles of their faces, like on (stereo)typical carvings in Egyptian temples.
* ChalkZone. And her chalk!dad even asks Rudy "what his intentions were".
* ChalkZone, and the hero's best friend. She has been known to give lectures on quantum physics, as well as being the best student in her class.
* ChalkZone are technically as old as when they were first drawn (for example, Snap turns two in "Lost in Chalk" because it marked two years since Rudy first drew him), but most of their physical/mental ages are still left vague. While Snap lives on his own and has been shown driving in a few episodes, he appears to be around eight to ten physically and mentally.
* ChalkZone as soon as Rudy and Penny ask Snap if he's ready to pick any of them.
* ChalkZone. Audiences however liked it and wish Nick would've treated it better.
* ChalkZone. Besides her only shown personality traits being that she's nice, she's ChalkZone's local celebrity, and that Snap has a crush on her, she also rarely ever appears without Snap in the same scene.
* ChalkZone, Blocky was voiced by Robert Cait. When the shorts became a series, he was replaced with Candi Milo. During the second season, Robert Cait became Blocky's voice again and played him for the remainder of the series.
* ChalkZone co-creator Bill Burnett has done a few minor voices in various episodes, and has sung a few of the songs in the series ("Amazin' River", "What's My Line?", "Insect Aside"). He also served as backup vocals (alongside series regular Jess Harnell) in the music video segments.
* ChalkZone (compare Snap in the first two shorts to the rest of the shorts and the show).
* ChalkZone, Craniac 3 tries to get Rudy with a smart bomb. It is sentient, though, and does not want to blow itself up. He instead opts for the Dumb Dart, which lowers intelligence.
* ChalkZone, E.G. Daily was able to show off her singing voice as Rudy. She's released a few records and lyrics herself.
* ChalkZone ends with Rudy, Penny and Snap leaving in search of new lands while their friends (and Skrawl) sadly wave goodbye.
* ChalkZone episode "Lost In Chalk", the characters sing a new song written for Snap's birthday ("Happy birthday to you, happy birthday, Snap!")
* ChalkZone episode "Mellow Drama Falls", as part of its homage to classic silent films.
* ChalkZone episode "Rudy's Date" had Butch Biceps flung into a prison after Penny, Snap, and Rudy recovered the parts of Penny's formula for perpetual motion that Butch used to decorate his jacket.
* ChalkZone episode "School of Destruction" had Rudy Tabootie's father Joe tell his son that he is grounded until college after finding out that he sneaked into the rock concert of the titular band.
* ChalkZone episode "Teacher's Lounge", Reggie accuses Rudy of making a rude drawing of Mr. Wilter on the blackboard. To avoid getting detention every day as a result, Rudy goes into ChalkZone to find the drawing and have him tell him who drew him. Turns out Reggie was the real culprit.

* ChalkZone episode "The Crush", Rudy (who's 10) gets a chance to see Queen Rapsheeba's creator, Trina (who appears to be around 14), and instantly develops a crush on her. Because of that, he joins the same theater group as her (even though he had made fun of one of their productions earlier in the episode), and asks Rapsheeba what she likes in a guy, hoping that what she likes would apply to her creator as well. After many attempts to get her to fall in love with him, she realizes that he has a crush on him. His crush wears off at the end of the episode when she tells him that while he's a sweet kid, she's too old for him and he should be doing all the things he did for her for a girl his own age.
* ChalkZone episode "The Doofi" introduced Doofus Rudy and Doofus Penny, unflattering caricatures of Rudy Tabootie and Penny Sanchez drawn on the chalkboard by the bully Reggie Bullnerd who came to life in ChalkZone after Mr. Wilter erased them. They were essentially grotesque and dim-witted versions of the real Rudy and Penny.
* ChalkZone episode "The Smudges" ends with the characters dancing. Also, almost every episode ended with a music video segment with the three leads performing a song, oftentimes leading to this trope.
* ChalkZone: Everybody gets an F on a quiz because Mr. Wilter gave them questions on the wrong book chapter. The students all complain about it, except for Reggie Bullnerd, who doesn't see what the big deal is because he's always getting F's.
* ChalkZone features Jacko, a Jack-O' Lantern singer who falls in love with Rudy's Jill-O' Lantern, a non-living example of this trope.
* ChalkZone features Snap and Blocky visiting a pretty straightforward one, appropriately named "Disaster Park" (which was also the name of the episode).
* ChalkZone had Snap being sent to Label Prison for removing a tag from his pillow. He spends the episode attempting to break out with the other prisoners, who include the polar bear for putting a "dry clean only" shirt into a washing machine and a 7-year-old girl for solving a jigsaw puzzle that is only for people 8 or older.
* ChalkZone had Snap refuse to eat a talking, rhyming hamburger who desperately wanted the blue chalk man to eat it. As he tries to escape, he runs across a cooked chicken and angry vegetables who also wanted to be eaten.
* ChalkZone has it both ways: there's a Day Zone where it is always light, and a Night Zone where it's always dark, split down the middle. The people in Chalk Zone go to sleep in the night side. Well, that "and the swinging night life".
* ChalkZone, in which Rudy has the flu, and is home sick in bed with a fever, in the middle of July.
* ChalkZone is filled with tons of visual puns. Some of them including cowboys that are actually centaur-like creatures that are half boy, half cow, flowers known as "two-lips", and literal "toilet trees" (toiletries). The TV movie even features a literal "praying" mantis.
* ChalkZone Penny came up with while Snap was pretending to be an exchange student in "Snap Out of Water". Canonically, Snap doesn't have a last name.
* ChalkZone (population included), leaving behind a white void before Rudy is able to rip open the bag.
* ChalkZone: Rudy Tabootie has been shown to not do very well academically, even getting straight Cs on his report card in "School of Destruction". Despite this, he easily outsmarts the various villains in the show, and is very resourceful and creative.
* ChalkZone Scrawl and Craniac discover it and decide to use it in a scheme they were concocting.
* ChalkZone: Snap goes stupid every time Queen Rabsheeba shows up. Usually stuff like eating his magazine, turning into dust, etc.
* ChalkZone. Snap laughs this off at first, saying it's one of the oldest gags ever, but he shortly falls for it just the same.
* ChalkZone, Snap pulls the tag off his mattress and gets sent to "label prison". He and the other inmates escape, and the guards end up in one of the cells... which has no bars and no door, but has a huge sign above the doorway that says "NO EXIT".
* ChalkZone song "Mumbo Jumbo Jump": "No step is wrong, and every step is right!"
* ChalkZone to a group of cartoon penguins who enjoy being knocked down.

* ChalkZone was centered around the titular world, a place where all erased chalk drawings become living beings. Considering the imagination of the children who create most of them, this has clear meaning on the diversity of the ChalkZone's denizens.
* ChalkZone, were included, and the credits of the episode were untouched, acknowledging the missing segment. Nickelodeon does not plan to go back and clear the rights for the song.
* ChalkZone; when production began on the shorts for the second season, Nick was interested into giving it its' own show. However, they requested that Rudy had to be a little older (he was eight at first and ten after the time skip).
* ChalkZone. When they attempt to escape, the cops place them in "the box"- a giant cardboard box.
* ChalkZone, where Rudy is an adult (and presumably forgot about ChalkZone) and Snap calls to catch up with him, on his Tumblr account and said it was awesome.
* ChalkZone would later be split into two parts for reruns and on Amazon Instant Video and the PlayStation Store.
* challenge "Come and get me, you bastards!" prominently marked with it. Whether he had a death wish or was just that confident in the skill of his gunners is open for discussion.
* challenge death to a game of ping-pong for his life. He wins, but the video ends with the guy getting hit by a falling toolbox, and having a re-match with Death in the more traditional game of chess.
* Challenge Dungeons force you to complete a particular challenge inside before you can get the rewards. The lanterns outside the door of each Challenge Dungeon will remain orange until that challenge is completed, so you'll know if you've completed one.
* Challenge Gamer: Who wants to accept my challenge in gaming?! Ready to get crushed by me?!
* challenge Jason and try to kill him to enrage Cass into finally giving her what she wanted.
* Challenge Mode is entirely based around this. Completing the dungeons within the time limit will unlock special rewards, such as mounts and armor that can be transmogrified.
* Challenge Mode offers big bolt rewards for collecting all the Qwark Tokens in them makes it even better.
* Challenge of the GoBots and dies, taking the last of Earth's age of magic with him.
* Challenge of the GoBots and the show had poor reviews at the time. The combination sank the show.
* Challenge Of The Go Bots at first), subsequent episodes show the Guardians interacting with Earth's people and governments completely out in the open.
* Challenge Of The Go Bots averted this by assigning gender to the (presumably genderless) toys in a completely arbitrary fashion. Small Foot in particular has no human-esque gender indicators apart from her voice.
* Challenge of the GoBots called Zods which the heroes could destroy without any ethical quibbles.
* Challenge of the GoBots, Cy-Kill's spacecraft has a "cloaking device" in the first miniseries (which only makes it invisible to radar), and a "stealth device" for the rest of the series (which makes it completely invisible).
* Challenge Of The Go Bots, Cy-Kill was once one of the High Protectors of Gobotron and Leader-1's best friend.
* Challenge of the GoBots episode "The Seer", it is revealed that the Guardians have left Van Guard behind, who is still trapped in the pit of cement Blockhead put him in.
* Challenge of the GoBots from the Guardians. Zero had every reason to resent Cy-Kill, and he wanted his job back.
* Challenge of the GoBots gave some of the GoBots different names from the ones their toys had.
* Challenge Of The Go Bots had Magmar, leader of the malevolent Rock Lords, survive

his battle against the Guardians and the benevolent Rock Lords and vowing revenge as well as Marbles, one of the benevolent Rock Lords, state that he's sure they'll meet the Guardians again someday.
* Challenge Of The Go Bots have biological gender, at least on a neurological level.
* Challenge of the GoBots is captured by the heroes, he appears rather noble, and clearly believes in his own side's cause. When he tries to destroy the transport ship carrying him away for interrogation, which would kill both him and the crew manning it, the heroes call him a maniac. He responds, "You mean 'patriot!'"
* Challenge of the GoBots: The two-part episode "Renegade Rampage" featured a pair of young Trindles consisting of a boy clad in blue named Trevor and a girl clad in pink named Troilene.
* Challenge of the GoBots They then set about salvaging their now-dead home by converting it into a technology-based world.
* Challenge of the GoBots villain Cy-Kill, was "Babysitting", where the Renegades agreed to look after a huge toddler from another dimension with magic powers under the reasoning that they could use the child's powers to get rid of the Guardians. Unfortunately, because the child is well, a child, he completely misinterprets Cy-Kill's wishes. When told to blow the Guardians away, the child produces a wind that sends their ship away. When overhearing Cy-Kill instruct Cop-Tur to be quiet as a mouse, he turns the dim-witted Renegade into an actual rodent. The final mess-up is when Cy-Kill states to not care what the child does, so long as he doesn't have to see the Guardians ever again. It initially appears that the Guardians are vaporized by this wish, but Cy-Kill later learns to his ire that the Guardians were merely turned invisible.
* Challenge of the GoBots was "Bears and Bulls", where the Renegades conspired with a wealthy industrialist named Drake J. Hinkleford IV in a scheme that involved buying out every company in the country and using the obtained control over the economy for nefarious purposes.
* Challenge of the GoBots works like this. It can protect him and those standing near him, but the energy drain on him is enormous, so he can only maintain it briefly and is left exhausted afterward.
* Challenge of the Super Friends, beings from the planet Venus agree to help the Legion of Doom destroy the Super Friends in exchange for increasing the Greenhouse Effect on Earth so that the Venusians will be comfortable there.
* Challenge of the Superfriends episode, Green Lantern captures Lex Luthor by turning him into a hundred-dollar bill. He is now flat and green.
* Challenge of the Super Friends episode "The Giants of Doom", the Legion of Doom required the Hall of Justice’s computer system in order to complete the creation of an enlarging ray that Bizarro is developing. To gain access it, members of the group allowed themselves to get captured by the Justice League as they gather the other items needed for the enlargement ray, then make their escape from their holding cell via Sinestro’s confiscated yellow ring going off on the Green Lantern.
* Challenge of the Super Friends episode "Trial of the Super Friends", Cheetah summons holograms of herself. Wonder Woman points out the holograms don't have shadows and lassos the Cheetah who has one. Unfortunately, this Cheetah turns out to be a robot.
* Challenge of the Super Friends, sometimes not even really escaping, just turning invisible in front of them or slooowly pushing a button to teleport away.
* Challenge of the Super Friends: The End known as the Benefactor is never seen. Only its voice is heard arising from the air, and it sounds oddly comforting, parental, like a patient teacher.
* Challenge Of The Superfriends The End known as The Benefactor, who turns them into tormented, horrific things with the power to doom worlds.
* Challenge of the Superfriends, the Legion of Doom uses a powerful artifact to, among other terror-wreaking methods, make the sun go out for a bit, prompting a police officer to declare that it's doomsday.
* challenge path you play Ed the Undying, boss of the Level 11 quest, retracing the

steps of the pesky adventurer who stole the Holy MacGuffin. When you get to the fight with the Boss Bat, you instead face "Boss Bat?", who is clearly just the corpse of the Boss Bat being manipulated by his minions.
* Challenger disaster, Flight Director Leroy Cain is at times visibly and audibly distressed, but he kept his cool and ensured that proper procedures were followed. In an interview shortly after the shuttle's loss, he attributed this specifically to the intensive training that NASA flight control personnel received.
* Challenger disaster, the cabin of the orbiter (The Part that looks like a Plane) was ejected from the explosion of the external fuel tank (The Big Orange thing the Orbiter is strapped to) and was found intact. Further at least three of the personal egress air packs were turned on (one of which had to be turned on by another person) and Pilot Mike Smith had engaged several switches from their usual launch position (these switches were spring-locked to prevent accidental movement, meaning that he had to disable the lock, flip the switch and reengage). The lack of sturcual damage also indicated that the crew probably had enough pressurized oxygen to survive the entire descent.
* Challenger equipment and two of the most advanced computers ever built. Unfortunately the computers have gone nuts and killed most of the crew, leaving only four kids whom they hope to use as pawns in their evil plan...
* Challenger, Giselle from Vermillion's Pokémon Trainer Academy (aka the School of Hard Knocks) likes to think of herself as an expert at Pokémon, such as insisting one should put off their Pokémon's evolution as long as possible and proudly declaring that she's almost earned her seventh badge. Ash, who only has four badges, lampshades that holding off your Pokémon's evolution for too long is actually bad for their health. Giselle also insists theory is always the same in practice, especially when it comes to Pokémon, something even rookie trainers know is blatantly false.
* Challenger However those plans were abandoned, and with the retirement of the remaining space shuttles the whole issue became moot.
* Challenger mission as a civilian passenger. However, he rejected the offer, and social studies teacher Christa McAuliffe was chosen instead.
* Challenger mission STS-51-F (six months before the ill-fated 51-L mission), the center engine went down in the only in-flight engine failure in the Shuttle program, after two temperature sensors went off-scale high (indicating overheat), causing the only in-flight abort (an abort-to-orbit, in which the shuttle can reach orbit but not its planned orbit). Reasoning that the sensor readings were themselves faulty and not the engine chambers, since the engines were progressively throttling back at altitude to reduce the acceleration load on the crew, Booster Systems Officer Jenny M. Howard instructed the cabin crew to inhibit any further temperature-related shutdowns of the engines. Her decision averted a second engine shutdown (the shuttle was still two minutes away from the altitude where it could reach orbit on a single engine), saving spacecraft and crew.
* Challenger's case, including teacher-in-space Christa McAuliffe) would have died anyway. By contrast the earlier Apollo and Mercury launchers were both equipped with escape towers — separate rocket systems that pull the crew capsule off of and away from a faulty booster rocket — while the side-by-side Gemini design allowed for ejection. And there have been two different Cosmonaut crews saved from certain death by the escape towers launching their Soyuz capsules away from an exploding rocket.
* Challengers, contrasted with flamboyantly gay American Rick. There's also Morinaga, who is in silent, unrequited love with clueless rabid homophobe Souichi for four years until he finally spills the beans.
* Challenger shuttle disaster reveal that many people don't understand the professional calm of CNN's Tom Mintier and especially Steve Nesbitt at Mission Control ("Obviously a major malfunction"). Nesbitt said later he felt like a house had dropped on him, but he had to continue to relay accurate information as quickly and smoothly as possible. The same was true of the newspeople reporting on the September 11, 2001, attacks.
* Challengers more or less explores Souichi's very gradual recognition of this.

* Challengers of the Unknown creates a group of nine characters with the names of the original and 1996 Challengers, but none of the personalities.
* Challengers of the Unknown debut in #6 (February, 1957). They also headlined #7 (April, 1957) and #11-12 (December, 1957-February, 1958). They gained enough positive feedback to gain their own series starting in May, 1958. Their original series was published regularly to 1970, and sporadically to 1978 when it was cancelled for good.
* Challengers of the Unknown: In an early issue, an accident in June's lab turns her into a Giant Woman and a germ she was inspecting into a Mega Microbe, the two eventually getting into a Behemoth Battle.
* Challengers of the Unknown, was seemingly killed during a wrestling match where he was crushed to death by his opponent with a very strong bear hug, only to wake up when the doctors were ready to do an autopsy on his body.
* Challengers treated as wrong, but its consequences are merely treated as funny.
* Challenger to prevent his death and John possibly never ending up on Moya.
* Challenger was also unaware of any problems up until the shuttle broke apart. In fact, the last statement recorded on the shuttle's CVR was pilot Mike Smith giving a nonchalant "Uh oh."
* challenges. After completely ignoring him for a while in the face of increasing harassment, they eventually call on God and break their bands in front of him, after which an earthquake levels the prison, killing the judge and his compatriots.
* Challenge seekers derive pleasure from overcoming a series of obstacles or tasks (these may include puzzles that must be solved or social challenges that must be defeated by IC dialogue). They want to be given fair challenges, the tools to solve them, and a real (or at least believable) risk of failure. They find games where the GM fudges the dice (either for or against them) or applies the rules unfairly frustrating, and are bored by sessions where there are no obstacles to overcome.
* Challenges the "status quo" and open to interpretations (mainly sex, dying and suffering).
* Challenge to get into the starport is to go through the service ducts for air circulation and electronics lines. The only problems are that most of the ducts are barely large enough for human beings and the chance of getting lost.
* challenging that word), followed by half an hour of discharging a squirt gun in Lily's face. After that came the epic saga of a singing, dancing robot that falls in love with a toaster. It was so monstrously bad that Marshall used the second slap he won in the slap bet to put an end to it.
* Challenging the Bully: Hey, Bully McJerkface, I challenge you to a fight!
* Challenging the rest of the family to guess the name of a big-band leader with the initials "EC",
* Chambeaux, and hates his nickname because it makes him sound like a decrepit, rotting "shambler", not the well-preserved specimen of walking dead he is.
* Chamber of Secrets, after crashing the flying car, Harry and Ron are peeking in the window of the Great Hall at the feast:
* Chamber of Secrets, although in the end, it turns out he's well aware of his own incompetence and is impressively competent at concealing it, at least to those who don't know him well.
* Chamber of Secrets, although Malfoy apparently doesn't think anything of it other than that his friends are acting a bit weird today. For example, they forget that they're supposed to laugh at Malfoy's jokes and Ron corrects Malfoy when he gets Percy's name wrong.
* Chamber of Secrets, Dumbledore reminds Harry and Ron that he threatened to expel them if they broke any more rules this year... but since their rule-breaking saved both the school and Dumbledore's reputation, he's happy to eat his words and instead awards points to Gryffindor.
* Chamber of Secrets happens to Ginny. And in an inversion, because the basilisk kills nobody in canon despite having a lethal gaze, most fics will do the same, with some going one further than canon and giving an explicit reason for this rather than a series of coincidences. Contrariwise, some fics will forget that the basilisk's gaze is supposed to be deadly at all, and act like petrification is

explicitly its power.
* Chamber of Secrets, Harry and Ron disguise themselves as Malfoy's best friends Crabbe and Goyle to question him about the Chamber.
* Chamber Of Secrets that Hermione's had to use a Time-Turner to get to all her classes, which is then used to save Sirius and Buckbeak.
* Chamber of Secrets that he's upset with him for not being the top student of the class, even if it's just because a muggleborn is.
* Chamber of Secrets: the Aurors are detectives, more or less, with Hit-Wizards apparently more equivalent to an armed response team (but this does not always match their actual portrayal).
* Chamber of Secrets, when Harry arrives at the Weasleys', Molly is scornful of how he got there (her sons stole their flying car), but all Arthur could ask was "how was it?", which Molly berates him for.
* Chamber of Secrets, when Ron and his twin brothers come to rescue Harry from the Dursleys. As they sneak downstairs to get Harry's belongings, he warns them that the bottom step creaks.
* chamber with the six famous assassin statues and Altair's age-old armor.
* Chameleon 2099 turned out to be a drug rather than a person, which not only manipulated a user's DNA, it allowed him to shapeshift (either partially or completely) into whatever animal happened to suit the user's mindset at the time of taking the drug. Users have been seen assuming the characteristics of animals like bulls, mice, felines, and dogs. It was an Alchemax-designed drug, but "unstable even by their standards" to the point that users often die painfully from the toll it takes on their systems.
* Chameleon about Cham, a genetically created being known as a "Sub" who serves as a killer for the IBI, a government agency, who defies her boss and goes on the run with the son of one of her victims.
* Chameleon Camouflage: Wearing camouflage or changing your skin to blend in perfectly into the background. Any background.
* Chameleon Circuit above. "Trockers" or "Trock Stars" may also apply.
* Chameleon Circuit, and the Doctor rejecting this but still offering Davros an alternative to the two of them clawing at each other in a battle that could last to the end of reality.
* Chameleon Circuit, but performs gigs outside of the usual filk venues.
* Chameleon Circuit loves this genre. In particular, 'Exterminate, Regenerate' and 'Blink.’
* Chameleon Circuit, said that "They're quite good, aren't they? It's like proper, decent music."
* Chameleon does this as well. Similar to Jane Doe, he kidnaps and kills people and then spends a day living their lives.
* Chameleon duplicates Nick Fury's appearance from his newspaper obituary, but the paper accidentally flipped the photo, putting his eyepatch on the wrong side. Spider-Man notices the difference immediately.
* Chameleon. For example, when he disguised himself as a French Poodle, he uses his normal voice while adding French Stereotypes. (Croissants, Eiffel Tower, Napoleon)
* Chameleon has Kam (played by Bobbie Philips) snapping a neck on a person.
* Chameleon is also astounding at being able to imitate someone. When he posed as Tigra, Avengers Academy member Finesse (who prides herself on knowing a person through their fighting moves) is in denial Chameleon could duplicate Tigra's micro-expressions enough to fool her.
* Chameleons are often drawn without the joined eyelids that cover most part of their eyes.
* chameleon sidekick, has the requisite oversized head and large eyes, and makes cute squeaky sounds.
* chameleon skin, leaving the Maormer so devastated that it is said they will never again be able to seriously threaten Tamriel.
* Chameleon Twist and 2 suffer from this, both only having about 6 levels each. If you knew where all of the crowns/coins and carrots were, you could easily complete the game 100% in only 1-2 hours.

* Chamillionaire, Chamillionaire and Krayzie Bone crash their car. Krayzie Bone is clearly terrified and freaking out about their situation, while Chamillionaire just complains that his drink was spilled.
* Chamillionaire of "Ridin'" fame loved the parody "White and Nerdy" and even featured it on his MySpace page shortly after release. He was even impressed by Al's rapping abilities. And then he name-dropped "White and Nerdy" in the sequel, "Ridin' Overseas".
* Chamillionaire runs the names of rappers wanted by police on a fake news program's crawl.
* Chamillionaire's biggest hit on the hip-hop charts wasn't "Ridin'", but rather the far less memorable "Hip Hop Police". This is averted on the Hot 100, where "Ridin'" was easily his biggest hit.
* Chamillionaire's hit song "Ridin' Dirty" was about racial profiling with particular regards to cops pulling over black drivers and hassling them (known as Driving While Black). This is a common theme in hip-hop and rap songs.
* Chamillionaire's song "Hip Hop Police" and "Evening News" features the rapper himself (in whiteface) portraying Bob O'Wildy, a smug news anchor who alternates between insulting him and misleading his viewers before switching to commercials.
* Chamo and Negi really don't seem to have a special bond, Negi officially makes Chamo his familiar so the latter has a valid excuse for staying at Mahora.
* Chamo and several others comment on this, stating that Negi would end his fights a hell of a lot quicker if he wasn't holding back so much at the start of major fights, trying to give his opponent a chance to surrender. They never do.
* Chamo, because he's an ermine. (At least until Asuna shows up.) He has stolen underwear from Asuna (which might not have been missed if they hadn't been thermals) and apparently got in trouble for the same thing in Wales.
* Chamo encouraged Negi to kiss girls on multiple occasions and even setting him up with several, most notably with the "Kiss Negi" competition. He's also been shown to encourage the girls themselves on a few occasions.
* Chamo is an "ermine spirit," whatever that means, so it's quite possible that he's going to live much longer than normally expected.
* Champa does not take his team's losses well. Every time the opposing team manages to gain the upper hand and defeat his team, he quickly whines and throws a temper tantrum at it.
* Champagne actually features gameplay and the box art of some games, the beginning (two Chinese men playing table tennis using their stretched out ears as paddles) is just as mind-boggling.
* Champaign ILL, Alfonso meets a girl online after moving back to his hometown. They're surprised they have so much in common during the date. Meanwhile, Ronnie figures out she's his cousin and races to stop them from going all the way. He arrives too late. They keep doing it, until Alf joins a sex addicts anonymous program.
* Champa orders Hit to attack Goku while he is powering up, but he refuses because he considers Goku a
* Champ!" Face invests a substantial portion of the Team's money in a boxer named Billy Marquette, but in the process they discover that a local sleaze named Sonny Monroe is rigging boxing matches. B.A. goes undercover as an unbeatable boxer so the team can take Monroe down.
* "Champing" is the correct word. Generally, something that is champed is just chewed on, something that is chomped is eaten.
* Champion: Bryony Blackwood of the Seven Sons has prophetic dreams, warning Fen, "You are marked for death, sapling. Your sentence will be your savior." The peacekeepers capture Fen and delay his execution so he can attend the reaping to make up for the number of teenagers who go into hiding rather than show up. Fen is reaped and comes home as a pardoned victor.
* Champion Detroit Tigers pitcher Mark Fidrych talked to the ball before throwing it, among other eccentricities. Proof that the
* Championess, and Elizabeth's sister Tess has no basis in the hstorical record, to name two of the more obvious instances of the trope.

* Championess, bare-knuckle boxer James Stokes is charged with brushing up the skills of fellow boxer Elizabeth Wilkinson. Part of this involves full-contact sparring with bare fists, and Elizabeth is left battered and/or bloody a few times.
* Championess, has multiple characters mention that she talks too much.
* Championess is a fictionalized account of the rise of Elizabeth Wilkinson, a pioneering female boxer in 1720s London.
* Championess, two women have a bar fight in the background while topless.
* Championess version of the rise of Elizabeth Wilkinson, a notable figure in the early history of women's boxing.
* Champion is clearly an expy of Superman, down to the freezing breath and the heat vision.
* Champion Island Games, but if the player joins team green, it's revealed they are also capable of normal speech.
* Champion is Playing by Emelianov & Savinov. Around half of Dan's winning plans do come from his 21st-century gaming knowledge, but the rest of it comes from his unerringly picking the moves that just happen to do the most damage or defeat the greatest threat, most of the time without even noticing that there was a danger to begin with. Meanwhile, everybody around him thinks that he's a Grand Master manipulator who planned every little thing out in advance.
* Champion of the Universe is considered by many fans to be a subversion (or very bad example) of this as he has pretty much never defeated
* Champion Rank requires competing 24 bonus levels perfectly in a row.
* Champions (1983). The villain group The Destroyers use spy devices disguised as insects to guard their hidden base.
* Champions (2016) coordinating three separate teams of Champions, resolving crises around the world.
* Champions (2016) doesn't, and the Champions team initially tries to tackle social issues while the Titans focuses more on battling supervillains.
* Champions (2016), the team bonds/practices their battle strategies over a round of paintball. Vision even drives the team to a paintball arena in a van.
* Champions (5th edition) universe, the centuries-long, multi-dimensional, wheels-within-wheels master plan of DEMON's secret master involves in its final stages a literal Spanner in the Works. The precise timing that underlies the multiverse needs to be off just slightly for the rest of his plan to work and as such he has positioned a minion in the metaphysical boiler room of creation with a $10 hardware store spanner. Now he just needs the stars to align....
* Champions actually managed to overload Earth with magic during a "low magic" point in history, thus allowing both magic (which turns out to be the true origin of all superpowers) and high technology to exist at the same time, if only for about a hundred years or so.
* Champions adventure/setting book "Watchers of the Dragon", Dr. Yin Wu is a classic Yellow Peril villian. He's also firmly on the side of good in this paticular adventure.
* Champions. A Force Field power can be given the advantage Damage Shield. Anytime the force field touches an opponent (e.g. by the character grabbing or running into the opponent) the opponent will take the appropriate damage.
* Champions. After the Black Enchantress captures the heroes and takes away their powers, she explains her plans to them.
* Champions. A mystically powerful slave, true, but a slave nonetheless.
* Champions. And then threaten to repeat that performance as necessary until the resistance surrenders for keeps...
* Champions and the players have ways of getting around that — the former by changing the ground rules for the campaign, the latter by giving their characters appropriate tricks and powers.)
* Champions are not mutually exclusive, but will result in a very confused character who gets inexplicably screwed over when things are going well and saved when things are going poorly.
* Champions a resistance force who can help the PCs against the evil government of their world.

* Champions. As of 6th Edition, all distances are in meters or kilometers. (Previous editions used "inches" as a unit of distance and "hexes" as a unit of area; these were game scale units, both of which were two meters across.)
* Champions, but as far as pre-made characters go, Robert Caliburn, the Magnum Mage of Vibora Bay, is probably the clearest example.
* Champions can most easily defeat it by shutting down the laboratory's malfunctioning nuclear reactor, which is releasing a high level of radioactivity.
* Champions characters who run out of Endurance can continue to use their powers by taking Stun damage, at a rate of 1d6 Stun per 2 Endurance required. This only works for powers that draw on the user's own Endurance pool, as opposed to the Endurance Reserve power. A character can literally knock himself out from overexertion.
* Champions' defenses with a single one of his weakest ones — any damage he manages to inflict is a welcome bonus, but mostly the intent is to find out what this new set of prospective enemies may be capable of. (The scenario explicitly hangs a lampshade on the possibility of the players potentially going "huh, was that all?" after this encounter.)
* Champions. Due to an industrial accident Dr. Howie Reeves' body was changed into electricity. As a result he can teleport long distances along phone lines.
* Champions, even the nice neighborhoods of the Northside often have dark secrets hiding behind the facade.
* Champions featured a number of supervillains who had military backgrounds.
* Champions for example provides both Vulnerability (where certain attacks are more effective) and Susceptibility (where just exposure to the offending factor is enough to cause ill effects), plus of course the option of applying Limitations to powers so they become cheaper but for example don't work under all circumstances or against certain things.
* Champions gamers needing character sheets for, well, just about anything.
* Champions happening to variable extents across a timeline stretching at least 100 000 years.
* Champions has a Advantage for Force Fields (Barriers in 6E) that allows them to block teleportation.
* Champions has many far too many to list: Defender = Iron Man, Doctor Destroyer = Doctor Doom (or occasionally Apocalypse), Foxbat = the silver age Joker. It also has Ersatz cities: Hudson City = Gotham, Millennium City = Metropolis.
* Champions has the Liberty Square plaza. Memorials to several fallen heroes, including the WWII-era team the Liberty Corps, are placed here. Most supers in San Angelo, regardless of where they fall on the hero - villain scale, refuse to fight here out of respect to the dead.
* Champions has this twice. Merry Andrew's Banana Gun squirts out banana oil that causes opponents to go slip sliding away, and Marbles can throw her marbles into a character's path and send them skidding away down the street.
* Championship Gaming Series discipline counts as the golden snitch is up in the air, as the rounds were never played (or at least broadcast) in any specific order.
* Championship Scramble in 2008, where three different championships were on the line in this type of match. Each match had five competitors, but started with two, and a competitor was added after a few minutes. Once all competitors were in the ring, a time limit began (20 minutes, in each of the Unforgiven matches' case). Whenever a wrestler scored a pinfall or submission, they became the interim champion (not officially counted in the record book). The championship would be awarded to the competitor who scored the last pinfall or submission before the time ran out. The experiment was considered a failure, and after the initial three matches, it was only done one more time before it lost out to the more fan-friendly and less confusing Money in the Bank ladder match.
* Championship Sprint owners; rather, it was sold as a conversion for existing two-player arcade cabinets (which explains why the option for a third player was removed).
* Championship Wrestling from Florida. That B-show went through a LOT of names.
* Championship Wrestling From Florida went from a regional territory in the 1950s featuring matches made up mostly of mat wrestling, to a premier member of the

* Championship Wrestling Superstars/Global Wrestling/North Florida Championship Wrestling/United States Class Wrestling/American Championship Wrestling/Southern Professional Wrestling was the B-show to
* Champions. If a character has 4 or more dice of Unluck, the bad luck affects those around him.
* Champions includes one of their founding members who left the group after losing an eye to one of exactly these.
* Champions. In one picture, C.L.O.W.N. members Skate Kate and Toe-Tapper are carrying white bags with dollar signs on them as they flee from a pair of UNTIL agents pursuing them.
* Champions: In the 5th and 6th editions, the superheroine Witchcraft is built as a standard superhero-mage... but has a spell to turn people into frogs. One of the "cure" conditions is even being kissed.
* Champions: In the adventure "The Coriolis Effect", the villainess murdered her own parents by turning them into pools of slime.
* Champions into his home while he was working with an artifact that used Heavenly fire. He lived in the Tunguska region.
* Champions is a villain based on Stingy Jack. He is identified as Scottish rather than Irish, though.
* Champions is Immunity to All Terrestrial Diseases, 5 points. Or you can just buy Immunity to a specific disease, but if you want multiple immunities it's cheaper to just buy the whole thing.
* Champions: "Longevity: Immortal" is an option for the Life Support power.
* Champions module "Wings of the Valkyrie" combines this and the Hitler exemption and setting things wrong: the player characters need to travel back in time to save Hitler; a previous traveller had ensured Operation:Valkyrie's success, expecting this would cripple the Reich. It didn't work; the Reich's new leadership was just as evil, and much more capable.
* Champions of both Toyman and the Joker takes over an amusement park is, by an order of magnitude, the deadliest chapter in the book for bystanders.
* Champions of Chaos are regularly blessed (and ometimes cursed, it's honestly hard to tell with Chaos) with mutations by their patron gods like tentacles, claws, extra eyes, etc. Chaos Spawn are the results of too many such mutations, a hideous mishmash of disparate body parts unrecognizable as having once been human and utterly insane, the champion's mind breaking under the strain of its new senses.
* Champions of Far'aus, all of the city guards, no matter what city or country they're in, are equipped with spears.
* Champions of Far'aus, causing trouble and bothering others for their own amusement is basically the modus operandi of trickster spirits.
* Champions of Far'aus, Dave scares a merchant away from their(the merchants) goods(a chainmail shirt and barley enough leather armor to cover someone's torso that they were planning on selling for twenty gold a piece), and the merchant drops a piece of paper that reads:
* Champions of Far'aus Despite being in some sort of different realm/dimension, Gods and Godesses have the ability to possess their champions’ bodies, be it the whole thing, or individual parts (such as limbs) while their champions keep control whatever isn't currently possessed.
* Champions of Far'aus, Gwen Rockcrusher, Champion of the light god Parthelax, fights with a mallet-like hammer.
* Champions of Far'aus, have tounges that nullify magic that comes into contact with them.
* Champions of Far'aus High priest Skullcrosis runs the day-to-day operations of Sarengal's cult as a whole, and Catharine is Sarengal's champion, doing mostly solo missions and small-scale operations as directed by Sarengal. When Sarengal doesn't have the time to give her a clear goal, Skullcrosis gives her a task to do - in Sarengal's name of course.
* Champions of Far'aus, in her monster form, resembles a six-legged fire salamander.
* Champions of Far'aus is a sentient magic crystal controlling a body made up of

surglugs, which are slug-like creatures.
* Champions of Far'aus legs and passes out within a few moments of breathing it in, and comments made by Serpentus heavily imply that prolonged exposure is lethal.
* Champions of Far'aus, one of the insults he got from one of the patrons was "Pope carried the act!". For context, Pope is a penguin in a bow tie that was "singing" beside Rever on stage.
* Champions of Far'aus. One of the spells Flamel knows creates a small gust of wind.
* Champions of Far'aus: Realms created by one or more deities are so strongly tied to them that other deities who had no part in it’s creation can be forced out & barred from entering it by the ones who did, and any changes made to a realm by visiting deities can be easily reversed by the creators of it.
* Champions of Far'aus: Rom seems fond of giving people nicknames at random. For his co-workers at the Hyperia Pantheon:
* Champions of Far'aus: Several light spells have this effect. Most of the runic/priest spells supplied by Hyperion have this effect, some of which are quite potent.
* Champions of Far'aus" short story (which chronologically takes place years before the main story), had an eyepatch that covered up a scar where her left eye should be.
* Champions of Far'aus, since Dorawn is where Galemore’s military personnel are trained. Skye, who grew up there, notes to Flamel that training "stay-at-home-people” on top of everything else would just be a waste of the city’s time and resources.
* Champions of Far'aus, The barkeep from chapter #3, when he throws what's basically a Molotov cocktail if it was a teacup.
* Champions of Far'aus, the city guard who had to tell Wila that her sister and brother-in-law are dead, and that she'll have to take care of her nephew, nervously tries to lead into the news.
* Champions of Far'aus, the goddess Sarlise wears a mask because she doesn't want to disturb people with the fact she doesn't have a face.
* Champions of Far'aus, the last room in the House of insanity Skye and Karla have to go through has one. It isn't much of a problem for long, as Karla summons Kara, a corporeal spirit who weighs one ton, on top of the blade so it stops moving.
* Champions of Far'aus, the masks worn by Sarengal's cultists vaguely resemble the upper half of a human skull.
* Champions of Far'aus, the sky pirate captain Popari Swiftwind uses one to board enemy airships.
* Champions of Far'aus: The Stage Thief of Vickerton dresses like a stage magician (for the most part), and is a mage, with their magic wand looking like a stage magicians wand.
* Champions of Far'aus, they have the ability to see the glances on their mistviews in the same manner as the audience.
* Champions of Far'aus this happens to Daryl offscreen during the spirit infestation in Garns library, although unusually for the trope we only know it's happening because Skye tells him (also from offscreen);
* Champions of Far'aus to the others, unable to help them with her shadow magic directly.
* Champions of Far'aus to the others, unable to help them with his light magic directly.
* Champions of Far'aus used by all the deities, though mostly seen used by Leilusa and Hyperion.The two fill this role for the main group by watching and listening to them through mist like screens, and making their voices heard at the location people are at,or in their champions mind.The former can be heard by everyone present.
* Champions of Far'aus, when Daryl & Skye encounter a Nekomata, it raises some nearby skeletons to go and fight them.
* Champions of Far'aus: When Dave the highwayman asks a stranger if she's seen his holy bone "R" (a bone with the letter "R" engraved into it, indirectly given to him

by the godess Leilusa as a joke), she stares at him silently, then pulls out a bottle and lets it smash on the ground beside her.
* Champions of Far'aus, when leading Sarengal's cultists in the attack on the stadium in Dorawn during the champions tournament, Skullcrosis says "No prisoners- if you feel like it".One of the cultists chuckles in response.
* Champions of Far'aus while characters don't get too much detail to begin with, (the hands for example look like half ovals) when they get small enough in a picture, they turn into stick figures.
* Champions of Far'aus: Wila, the Hyperia pantheons previous Highpriestess fought with an axe.
* Champions of Far'aus with no gravity, and nothing to land on, or at the very least smack into, which would have slowed him down.
* Champions of Khorne are similar but don't fight in a particularly graceful manner. They can still easily match Swordmasters blow for blow.
* Champions of Khorne collect skulls from their victims. These are usually piled up in some sort of a shrine, though many a champion carries a couple of favourites with himself, often by skewering them on some
* Champions of Meridia, one of the more benevolent Daedric Princes, also tend toward a paladin outlook — Meridia's quest will give you the unique weapon "Dawnbreaker", which lights undead on fire and has a chance to cause a short-range explosion that sets
* Champions of superheroes had the Juggernaut suit of power armour which can turn any ordinary schlub into someone able to throw down with the strongest superhumans on Earth. However, it's powered by a tiny but improperly shielded nuclear reactor so you'll be dead in a matter of months after starting to use it.
* Champions. One contestant was Brother Basilisk, who had the superpower of (temporarily) turning creatures to stone.
* Champions: One of the symbols of the Pulp-era Satanic conspiracy group the Order of the Seven is a scarlet housefly.
* Champions. One of the title items was the "Jump Shell", said to be used by the U.S. Marine Corps to insert troops into the battlefield from orbit. Less advanced interim models would be dropped from supersonic transport planes.
* Champions Online - a cruiser large enough for a full terraforming force with dozens of Gadroon is barely half again larger than an F-22. On the other hand, player characters have a huge variety of armor, weapon, and even jetpack styles to choose from, and many will mix and match.
* Champions Online actually has the "Orbital Cannon" power available for player characters (and some NPC's) to use. Normally a single, vehicle-sized blast, one optional advantage allows it to fire continuously - and select new targets on its own (always an enemy)as it does so.
* Champions Online, albeit for different things (the COH teleport sound is reused for health pickups in CO).
* Champions Online... and then decided to stay in the mortal realm and become a supervillainess. She also began a romance with the evil sorcerer Luther Black, which is disturbing on many levels.
* Champions Online during your run through the Southwest Desert. It's run by VIPER, and you naturally have to face off against VIPER Conspiracists as part of your crop of enemies, who are this trope through and through.
* Champions Online features a hastily implemented Decontamination Shower in the overrun base in the Desert Crisis zone, one of two possible starting zones after the tutorial zone, and before the primary zones.
* Champions Online features as a mid-level quest chain fights against the froglike Gadroon who are seeking to Xenoform Earth into a much warmer, swampier habitat — starting in the middle of Canada.
* Champions Online features as the tutorial. They aren't wiped out, but it seems most of their fleet attacks a single city and are driven off when their mothership is brought down. They are generally kicked around by all the other heroic and villainous groups; one open mission is called Nadir Of The Invaders.
* Champions Online Framework includes "Micromunitions". Several salvos of missiles

are fired from the shoulders: Both, left, then right. It's a ranged Area Attack ability.
* Champions Online has a few powers that utilize a chain as a whip, including grabbing and yanking the victim towards you. Several enemy mooks use it as well, including the punderfully named Chainganger.
* Champions Online has a "Free For All" setup, where anyone can play nearly all of the game's content for free. However, the free Silver accounts have severe restrictions placed on character customization (fewer costume choices, a handful of Archetypes, limited bag slots, and a limited selection of travel powers) and have to purchase access to the Adventure Packs (optional repayable mission content). Still, this is mostly an aversion of this trope as it is entirely feasible to level a character all the way up to end-game content without spending a penny on the game: nothing that is essential requires a purchase.
* Champions Online has an entire instance dedicated to this trope: Teleios' Tower. Home of a mad scientist who fancies himself the ultimate human in the world, the tower is completely filled with clones of himself of various qualities and alterations. They've even formed a functioning society, and the clones get regular "patches" to their genetic code, for stuff like stronger knees and more taste buds.
* Champions Online has an entire zone dedicated to an eternal night - Vibora Bay. In a downplayed example, whenever the "Bloodmoon" events occur, it turns to night for the three day or so period, as well.
* Champions Online has a region called the Southwest Desert where there are two ghost towns, both very different. One is a traditional old deserted mining town, Burnside, complete with ghosts from way back. The other is a nameless town ravaged by the effects of nearby atomic bomb tests in the 1950s and completely deserted apart from a few radiation mutants straying around the edges of the atomic wastelands. Quite chilling really.
* Champions Online has makeshift Parkour "tracks" on rooftops in Millennium City.
* Champions Online has more than one such power. One summons chunks of earth (or cloud, if you do it while falling), another summons a chunk of ice, and yet another summons an actual technological glider disk. The newest ones include a magic carpet and a cloud with a rainbow trail.
* Champions Online. He's been described as an evil version of Adam West-era Batman.
* Champions Online if you want (and if your computer doesn't overheat and explode). There are even specializations to make your pets hit harder, survive longer, and require less energy to summon.
* Champions Online, it is possible to create a character who wears a pistol on one hip and a sword on the other, and to create one who can use a pistol for one attack and a sword (or two) for another. No single power animation uses one in each hand, however.
* Champions Online, Justiciar in Canada is positioned dangerously close to a pair of explosive barrels which respawn. So long as no one's Nemesis minions show up to draw him into combat (and thus full heal him when he returns to his default position), a persistent player can kill him with the explosive damage from the barrels.
* Champions Online. Like many other costume pieces, blade bracers are unlockable and, despite being purely decorative, very popular amongst the players.
* Champions Online meanwhile seems to have few options other than that.
* Champions Online. One of the abilities being an 'Experimental Ray' which has a chance for various effects, including turning the target into a teddy bear.
* Champions Online Russian sub that sank, a ghost ship with ghost pirates (and a few robot pirates down there, too), lots of sea life both hostile and not really THAT hostile, myriad forms of plant life, et cetera. A power that summons wolves on dry land summons sharks, instead, and many other pet summons are similarly altered - robot drones have artificial fins, for example. However, this is weakened considerably by the unfortunate lag suffered in that zone, which leads many to avoid it. Sad, really, there's plenty of action down there.
* Champions Online's villain "The Brain", complete with second-in-command talking ape.

* Champions Online. That burning building has been burning for, what, four years now?
* Champions Online, which has apparently been taken over by the terrorist organisation VIPER.
* Champions Online with his character Duratok Gorehowl. He won an official costume contest and his price was being made an official character. Players can now buy a "Sidekick Device" that summons an NPC Duratok to your side for the duration of one hour.
* Champions Online, you force a demon into temporary servitude. After you rescue some children, it uses the happy thoughts of those children to destroy a magical barrier. Before doing this, the demon informs you that "Regrettably, it will not harm the children."
* Champions Online, you have to fight a villain named Scalpel, who takes umbrage to the Mayor's assessment that he is a sadistic psychopath, and threatens to "butcher and bleed him for that insult".
* Champions on the Inside: The characters lose the championship, but still feel like winners on the inside.
* Champions. Powers can be defined as drawing power from an Endurance Battery, which can be recharged through various means (electricity, sunlight, radiation, waiting for the next adventure to begin, and so on).
* Champions received their powers from nuclear radiation or being descended from people exposed to radiation.
* Champions robot Mechanon portrays him as a humanoid with artificial muscles bulging out of his arms, legs and the side of his chest.
* Champions. She had Darkness powers, including the ability to solidify, project, and merge with shadows.
* Champions sourcebook shows a supervillain with a mime motif doing the "glass box" bit to set up a force wall between himself and two superheroes.
* Champions superheroes can try to track them down. If they try to do so in their secret identities and fail their Deduction rolls, Federal agents will tell them to stop their investigation. If they continue, the Federal government will start pursuing and trying to capture them.
* Champions super-hero Tabletop RPG, characters or vehicles can purchase FTL Travel as a Power for only 10 Character Points. They are prohibited from using it in an atmosphere. (Curiously, there's no restriction against using FTL Travel while on the surface of an airless world. You could theoretically spend a few points on FTL Travel, a minimal amount of Flight, and enough Life Support to survive until you fly out of the atmosphere, then engage your FTL Travel and destroy the moon by ramming into it.)
* Champions supplement "Bad News for Doctor Drugs" one of the suggested player characters has an obsession with Genghis Khan and makes all of his reports about that subject, no matter what the homework assignment subject was.
* Champions supplement ''Champions Universe" (2002). The monks in the city of Shamballah are immortal, but only as long as they remain in the city. If they ever leave, they will immediately become their true age, leaving only crumbling skeletons.
* Champions supplement "The Blood and Dr. McQuark". As an example, he often asks where his glasses are and his employees tell him they're on his forehead.
* Champions taking weaknesses (called "Disadvantages" in the rules) as a part of the character creation process. The disadvantages "Susceptibility" (which causes a character to take damage from something other characters find harmless, such as Superman's reaction to Kryptonite or a vampire's taking damage from holy water) and "Vulnerability" (which multiplies incoming damage from certain types of attacks, such as a werewolf's vulnerability to silver) were specifically created to mimic an Achilles Heel.
* Champions team ("Red Doom"); others from the old team directly opposed them in an independent but heroic group (the "New Guard").
* Champions. The Communication ability for Animal Companions is when the companion animal communicates with its owner non-verbally. It is explained using a variation

of the title of this trope ("Timmy down a mineshaft", to be exact).
* Champions. The DEMON organization's plan to steal the Earth Crown of Krim from PRIMUS headquarters involves tricking PRIMUS into attacking the local superhero group.
* Champions. The Ice Sprayer weapon fires a compressed liquid gas at the target, freezing it. The damage is defined as No Normal Defense, which means it does only Stun damage, not Body damage. When the target defrosts they're still alive and unharmed.
* Champions, the supervillain Black Paladin is a warrior of an evil cult from the time of King Arthur. He was placed in an enchanted sleep and wakened by a college student in modern times. He murdered the student and assumed his identity.
* Champions. The super villains' base has small robot drones that resemble insects.
* Champions, the Supreme Soviets team used codes such as "Purge" (two members team up against a single opponent) and "Vietnam" (harass the enemy constantly, don't give them time to think).
* Champions. The time Doctor Arcane spent in Ch'andarra's realm seemed but a prolonged instant. When he returned to Earth he found that five years had passed.
* Champions. The vehicle construction system allowed a vehicle's exhaust to do normal or even killing damage to anyone standing behind it.
* Champions. The villain Dread is a summoned wraith that can drain the life force of opponents and thus lower their Constitution score for the duration of the adventure.
* Champions: The villain group "The Destroyers" decide to take over the United States. They think they'll be better leaders than the corrupt politicians running the country because the Destroyers admit that they're criminals.
* Champions. The villain organization PSI (Parapsychologial Studies Institute) kidnaps children with psychic powers and brainwashes them into loyal minions.
* Champions. The villainous robot Mechanon has automated factories around the world. Whenever he's destroyed, one of the factories creates him again, this time with defenses against whatever destroyed him. This makes it much or difficult or even impossible to destroy him the same way again.
* Champions: The villain Red Rapier knows he isn't really powerful enough to take on superheroes by himself, so he tries to even the odds by luring them onto his own turf. He tries to trick a hero (or heroes) into entering a building he has filled with tricks and traps.
* Champions, this is called "Instant Change", and is a power you can purchase if the GM agrees.
* Champions. This is in part because putting superpowers into armor, which the character presumably won't be wearing all the time and which can be potentially damaged, stolen or destroyed, serves to make them somewhat cheaper point-wise; on the more in-universe level, power armor also has the advantage of being one of the easier ways to enable otherwise non-powered agents to at least try to deal with super-threats, so quite a few organizations employ it.
* Champions, this is the role of The Strip, where the city's sex industries and vice lords congregate. These range from borderline-legitimate strip clubs like Little Egypt (whose owner, Lady Cleopatra, is a significant underworld player) to utterly depraved sites with no fixed address.
* Champions. This type of character would have a high Presence score and skills based on that Characteristic, such as Acting, Bribery, Bureaucratics, Conversation, High Society, Interrogation, Oratory, Persuasion, Seduction, Streetwise and Trading.
* Champions: Try to date Green Dragon's little sister, and you've got a brand new Hunted named Green Dragon. Though this trope tends to get lost in his general control freak tendencies where his sister is concerned — he genuinely loves her, but can only express it by trying to "protect" her from all dangers (such as being able to hold down her own job).
* Champions Universe drink a lot of Nar-Cola, which (if you look at its logo) is a clear substitute for Pepsi.
* Champions Universe has their symbol prominently displayed on their uniforms.

Earlier editions had their heroic counterparts UNTIL doing the same, but the most recent incarnation goes for the more subtle (and more realistic) approach of just putting the badge on their headgear and uniform sleeves.
* Champions Universe, it's revealed that a high amount ambient magic is required for superpowers to work, otherwise their abilities are really impossible. This also reveals that an experiment by Nazi wizards caused the boon of Superheroes that exist in their universe.
* Champions Universe, Millennium City gets far more superhuman action than you would expect for Detroit Redux. Partly justified due to its The City Of The Future meme.
* Champions universe the two U.S. government anti-supervillain agencies PRIMUS and SAT have been known to squabble over who's in charge of investigating or dealing with supercrimes. Likewise, conservative elements in the U.S government resented the way UNTIL charged around the U.S. and created SAT specifically so the U.S. could handle its own super-problems.
* Champions universe was this before the loss of his family fortune turned him into the world's most eccentric supervillain.
* Champions, uses a process of suspended animation known as 'hot sleep' to hold prisoners too dangerous to be contained any other way. In-universe, this process is subject to an ongoing series of court cases to determine whether it counts as 'cruel and unusual punishment'.
* Champions uses two stats; Body and Stun. An attack that inflicts Body damage has actually injured the character; enough injury results in the character's death. Stun damage can leave the character dazed (lose an action) or result in the character becoming unconscious.
* Champions. Villains in the Contest may use the "Oh My I'm Caught" scenario. They allow themselves to be captured by the authorities so they can engineer a massive breakout from jail, freeing other prisoners and scoring a large number of points.
* Champions) was imprisoned by the Council of Nine but escapes during the course of the adventure.
* Champions were shown lying beaten alarmingly often for the world's premier heroes in the game's 4th edition, in the interests of making whichever villain they were trying to promote look nastier. Nowadays the art usually shows the heroes putting up a fight rather than just having lost one.
* Champions. When Colonel Vasalov hires some supervillains to attack the heroes, he promises to pay each of them with $100,000 in a Swiss bank account.
* Champions, where he begs for a "GM to port me to a different spawn point"
* Champions which goes on a rampage. Three months later the alien's mother shows up and tries to rescue its child, and heaven help any superhero who gets in its way.
* Champions which seems to be the codifier for "system designed as generic from the start".
* Champions, whose sword was so huge it did the equivalent of 25 sword hacks.
* Champions, you can purchase the Multiform power as a "partial multiform", just making mental changes. However, since dissociative identity disorder tends to be more subtle, the game recommends representing it by purchasing the differing powers/stat changes with the limitation that they can only be used when one personality is in charge (this will tend to be a lot cheaper).
* Champions. Yuri Kamonov (AKA Sputnik) is a superpowered member of the Supreme Soviets. He won't use lethal force against opponents unless it's absolutely necessary and there's no other alternative. He also tries to avoid conflict and resolve confrontations by negotiation or non-lethal force. This has caused him to get in trouble with Colonel Vasalov, the leader of the Supreme Soviets, on multiple occasions, and Vasalov has punished him by denying him any promotion.
* champion to decide the outcome. Unfortunately, the two killed each other in the first round and an all-out battle still took place. Another prominent Russian warrior monk participant of this battle was Rodion Oslyabya.
* Cham Syndulla is the leader of the rebellion on Ryloth, and while he opposes becoming mixed up in the wider rebellion against the Empire his actions during the Clone Wars have given him experience and Twi'lek support.

* Chan Agi survived Char's Rebellion thanks to the Axis Shock happening just as Hathaway was about to shoot her. She eventually reconciles with Hathaway and helps upgrade his Xi Gundam.
* Chance Activation: Someone luckily (or unluckily) activates a plot device.
* Chance And Choices Adventures, most of the evil characters are ugly (with the notable exception of Hank Butterfield, who is described as being very handsome). It is commonly noted that their faces are wrinkled from years of evil thoughts and grimacing expressions.
* Chance And Choices Adventures, most of the towns and landmarks are real. For example, there really is a Harmony, Arkansas. The people and events are completely made up, though.
* Chance And Choices Adventures. Not wanting Ann to be punished, he claims he never loved her and "just wanted to have his way with a white woman" and even keeps up the ruse in private for fear of anyone listening in secretly. He keeps it up for the entire month of hard labor they're sentenced to. Ann refuses to acknowledge it, though, as she knows the truth.
* Chance And Choices Adventures) only ordering Roy and the Butterfield Gang to stay away from Harmony, Arkansas from now on. Instead, Roy comes back and burns down the Williams Farm.
* Chance And Choices Adventures presents Native American mysticism as being another manifestation of Christianity. Wakan Tanka is God, and the Native American spirits and deities are all either angels or demons.
* Chance And Choices Adventures, Sally ends up developing a phobia of caves after getting stuck and nearly dying in one in the first book.
* Chance And Choices Adventures, who can always be counted on to cut him some slack.
* Chance and Serenity never go beyond casual flirting and ultimately remain only friends because Chance truly does love Simone.
* Chance Encounter 2, Balian is this to Cassandra. Everything he does makes her love him more, and, Balian being Balian, he is totally oblivious until he is told. Whereupon he goes bright red.
* Chance in a Million: The police have arrested Chance so many times for matters that are completely coincidental that they actually now have orders not to arrest him.
* Chance in a Million: The titular Tom Chance is revealed to have a cricket bat signed by Alec Bedser (an English Cricketer) as one of his most prized processions in “Honour Thy Father And Thy Mother”. Naturally, it gets chewed up by an Alsatian who lives next door in that very episode.
* Chance in a Million: The titular Tom Chance would have a tendency to pause in conversation to drink an entire glass of beer in one gulp.
* Chance in a Million (UK 1980's sitcom) had main character Tom Chance constantly plagued by extremely unlikely coincidences, often parodying common sitcom tropes.
* Chance is not unique in this regard, although he is the best. Guerrero's name is enough to scare the wits out of any criminal or even a mob boss, and the guy himself looks like a
* Chance is often seen with knives, be it throwing knives or her own personal switchblade.
* Chancellor is one of the Evil names and falls under all the standard stereotypes of this trope as a result. The current Empress was well aware of how disruptive this could be and it's now considered treason to even
* Chancellor Neighsay is openly racist against non-ponies, claiming that all of them are dangers to Equestria even though the Princesses are all doing their best to try and open the country up to pony ways of friendship. While the
* chancellor of Germany, Brandt in East Germany and deafening cries of "Willy Willy") are still known to most Germans today. He was the first German chancellor to visit Israel and won a Nobel Peace Price in 1971 (which was announced in parliament during a session). In domestic policy, he helped lower the voting age from 21 to 18, which helped in the aforementioned 1972 elections which he won largely on the youth vote. To this day many influential leftists in Germany cite

Willy Brandt as one of their major inspirations.
* chancellor partner and it would take years for the SPD to even poll ahead of the CDU on the federal level again.
* Chancellor Puddinghead, she tried to pass a law mandating earth ponies to drink carrot juice at every meal.
* Chancellor Valorum His getting voted out of office makes a lot more sense now.
* Chancellor Valorum is portrayed as (ludicrously over-the-top) Evil, and he is a Chancellor, but oddly enough, he is not an Evil Chancellor as defined by this trope, because in the Galactic Senate "Chancellor" refers to the equivalent of President or King, rather than an advisor role, so he's more
* Chance Meeting Between Antagonists: A coincidental meeting between enemies.
* chance of improving your lot in life (assuming you are willing to worship Dark Gods who will either torture your soul for eternity or turn you into a Daemon Prince if you are really good or get absurdly lucky).
* Chance Pop Session is about three girls who attempt to become pop idols.
* Chance Pop Session is a major Reika fangirl. The reason she joins the Akiba music school in the first place is for the chance to meet Reika. Even after having success as part of R-3, she still keeps her fangirl status.
* Chances are, if you hear the names "Dante and Vergil", you'll be thinking of the two iconic brothers from
* Chances are, if you hear "Walking in Memphis" on the radio, most often it will be Cher's version instead of Marc Cohn's original...unless you live in North America, where Cohn's version still reigns supreme. Or if you're listening to a country station, where it'll be the
* Chances Are). The end of the movie has his best friend marry his widow, and him admitting that he loves his daughter.
* Chance Time, present in the second and third games, has a chance of stars being swapped, potentially plunging the First Place player into last place — and vice versa. The fourth game introduced the Reversal of Fortune space instead of this, which besides the possibility of swapping stars, coins can be interchanged,
* chance to opt out. He's got a longer yellow streak than a herd of diarrhetic camels.
* chance, which would only be the case if all children drank the same amount of milk but 50% of them didn't absorb the proper amount of nutrition from it.
* chance with the bases loaded, bringing the score to 8-7 Arizona. Amazingly, it worked, and the Diamondbacks went on to win by one run. Bonds had hit 13 homers in 52 games at that point in the season.
* . Chandelure's death involves the setup for the bucket prank...except instead of water, a blanket dipped in cooled Spirit Solutution (an illegal substance used for killing Ghost-type Pokémon) is dropped onto him, melting him.
* Chandler also did this once, while attempting to suck up to Monica's parents.
* Chandler also had this deal with a woman he dated. Despite being thrilled initially, he broke it off when he realized he couldn't handle just sex and wanted a real relationship.
* Chandler and Joey play a number of dangerously stupid games of their own invention. One is "Hammer Darts"; beyond
* Chandler and Joey would almost-hug each other and pat themselves on their back on occasion.
* Chandler and Monica have one in 'TOW Everyone Finds Out'. A big damn one because they have kissed before but this is their first public kiss in front of their friends and right after
* Chandler and Monica have promised to make their anniversary presents instead of buying them. Yet another one of those ideas that sound better in theory. The day arrives, and both frantically think of things to present as their own creation. Monica ends up giving Chandler one of the sock bunnies that Phoebe makes (claiming that Phoebe actually makes sock rabbits, ugh), and he gives her a mix tape that Janice made for him, not realising that Janice had decided to record herself
* Chandler and Monica's conversation at Ross's wedding in the Season 4 finale. Monica confides her fears that she's "never going to get married" and Chandler

responds with: "Who wouldn't want you?". That night they sleep together for the first time and three seasons later, the finale is all about
* Chandler and Monica. The first time the viewers see it is the first episode of season five the day after they slept together for the first time. Having agreed to meet up again, Chandler tells Monica he's thinking they should back out of it because he's worried about what it'll do to their friendship. She agrees with his concern, then they abandon the worry anyway. It's later revealed that they also discuss this after they first see each other naked just before sleeping together for the first time.
* Chandler and Phoebe have precisely no chemistry. When Rachel and Phoebe find out about Chandler and Monica's
* Chandler comforting Phoebe after her heart attack in the hypothetical episode.
* Chandler, despite being known for his sense of humor, has a lot of these:
* Chandler does one of these a few times: once when he sleeps with his annoying ex-girlfriend Janice on Valentine's Day after being accidentally set up, and another time when he makes out with one of Joey's many sisters at a party. He doesn't know which one.
* Chandler ended up on a blind date with Janice, who he's dumped twice in the last three months. The next morning, we see him wake up, with two hands on his chest. A third hand comes into shot, rubbing his eyes. He looks down at the two hands on his chest, then — with mounting horror — over at Janice in bed next to him..
* Chandler falls for this again with her so-called soulmate Don and 'the funniest guy she's ever met' Jeffrey. Monica is completely oblivious, as it's based on throwaway comments she can't remember making.
* Chandler "good luck" with a suggestive look. The audience laughs as he looks appropriately freaked out.
* Chandler got out that he loved Monica but immediately took it back. (Luckily Monica knew he loved her and gave him time to tell it once again.)
* Chandler had a bit of this with Kathy as well, and Monica whenever
* Chandler had an on-and-off relationship with Janice for several years, even after Janice got married.
* Chandler has always had huge commitment issues. He gets cold feet on his and Monica's wedding day and runs away. Ross finds him and they manage to get him back on track with slow steps. Joey is supposed to be officiating, but he's shooting a movie and his acting partner got drunk, so he's unable to leave the set on time. Rachel persuades a minister from another wedding to perform the ceremony as well. Monica then finds out Chandler wanted to leave, and is understandably upset. Joey manages to show up at the last moment, but he's still in his costume: a blodied uniform from WWI. The reception is going better but Chandler's shoes are slippery and he can't dance properly, Ross has to sit with children, Joey wears a tennis outfit and Rachel is freaking out because she had a
* Chandler, in both the season 5 and 6 finales, thinks Monica is going to leave him for her ex-boyfriend
* Chandler is constantly knocked by himself and others for being terrible with women. While he does have commitment issues that prevent his relationships lasting long, he has no trouble getting women. Later in the show, once he's in a stable relationship with Monica, the show claims he's always been terrible with women, unable to even talk to them, despite the early seasons showing he successfully uses humour to smooth-talk and charm women without any problem at all and the later seasons having him and Monica being the only two in a
* Chandler is in bed with Janice who likes to cuddle, he thinks to himself: "Look at all this room on her side of the bed. You could fit a giant penguin in there." And then goes on to add a mental remark: "That would be weird, though."
* Chandler is the past master of this. His analogies are usually novel, powerful, and operate on many levels. This effect is often imitated but rarely equaled.
* Chandler manages to earn a five-person dope slap (or at least two or three plus some stuff thrown at him...) after a particularly flagrant bit of
* Chandler manages to hit almost every definition of feminine guy by the end of

the series. Lack of Athleticism: Although he's ok athletically, he doesn't enjoy sports and can be very clumsy. Lack of Aggression: He's the least aggressive friend of the group and frequently plays peacemaker. Open or Emotional Personality: Sweet, sensitive, and talkative. Typically Feminine Interests: Loves Broadway shows, parades, and watching E! Effeminate or Non-Masculine Appearance: He's the smallest of the guys compared to the tall Ross and more burly Joey, with fairly delicate features.
* Chandler — probably the nicest character on the show and the one who gets the least action dating-wise - lampshades on this, quipping that someone saying he's a nice guy means "I'm going to be dating a
* Chandler once dates Rachel's boss, who leaves him handcuffed to a chair because she has to go to a meeting, with
* Chandler once got tricked into going on a blind date with Janice shortly after they broke up. Despite their initial anger they end up sleeping together. Janice thought this meant they were getting back together forcing Chandler to dump her again.
* Chandler refers to Martin as "the idiot" before he does anything stupid.
* Chandler responds to Ross' new leather pants by informing him, "Tom Jones called, he wants his pants back."
* Chandler says it to Monica twice. The first time he blurts it out and then takes it back in panic because he's not ready. The second time he yells it out in front of all their friends and refuses to revoke it. This time, she happily says it back. Before they got together, they were so close that they mentioned they loved each other on several occasions. However, the relationship - and declaration - was platonic. It's only after they started having sex that Chandler began panicking about their emotional bond; something Monica had anticipated as she was very well-versed in his
* Chandler sees Joey making an umpteen amount of jars full of spaghetti sauce so Chandler asks if Italy called and said they were hungry.
* Chandler, several times during the series he has accidentally revealed his friends' secrets. Probably his biggest offence is when he revealed to Rachel that Ross was in love with her. In a final season episode, he reveals to a child that they were adopted and then later reveals to Phoebe's nieces and nephew that Phoebe actually gave birth to them.
* Chandler's folks: his mother is a gorgeous sex-driven blonde writer of erotic novels who even kisses one of his best friends, and his father's a gay transgender Las Vegas cabaret entertainer. At one point, Chandler was worried that he was turning into his parents. Ross asks him:
* Chandler's girlfriend Janice has the magician David Copperfield among her freebies.
* Chandler's job as a "Transponster" to which Monica replies "That's not even a word!"
* Chandler's old girlfriend calls him "skidmark". He also was called "Sir-Limps-A-Lot" for a year after getting the tip of his toe cut off in an accident during one Thanksgiving.
* Chandler's successor, Robert B. Parker, used this trope often with
* Chandler's weight also fluctuated throughout the series, much more than the other characters, due to Matthew Perry's drug problems. In the early episodes, Chandler was average size, however, in later seasons he was extremely skinny and in other seasons he gained weight back. In one case he looked noticeably heavier in a season premiere that was supposed to take place shortly after the previous season's finale.
* Chandler's work laugh is very annoying and he explains it was invented for survival reasons. He warns Monica she will need to invent one as well to survive his work colleagues. She does.
* Chandler thinks he has lost the photos of his and Monica's wedding. With Ross's help, he crashes another wedding and takes a bunch of pictures of himself and Ross in an attempt to pass that wedding off as his own. For the finishing touch, he walks up to the bride (who fortunately happens to resemble Monica from the back),

kisses her while Ross takes a picture, then runs. When Chandler later shows Monica the pictures, she informs him that she had their wedding photos all along... leaving Chandler to try to explain why he took a photo of himself kissing another woman. They call it even when Chandler notices that Monica opened all their wedding presents without him.
* Chandler towards Monica in the Season 5 finale when he thinks she still loves Richard. A brief scene has him watching her, almost saying something and then quietly walking away.
* Chandler tries to stop Monica entering the apartment while he and Ross are trying to fix the furniture by saying "You can't come in! Ross is naked!". This is just as embarrassing for Chandler as it was for Ross, though.
* Chandler was mistaken for a doctor when he and Monica met their surrogate.
* Chandler was Monica's third love; her first love was Richard and her second love was Pete. She had other short relationships, but they were the only ones she seriously thought about marrying. The writers specifically hammered it in, when Richard returned wanting to marry her and she decisively picked Chandler, showing how people do move on and your first love isn't necessarily the love of your life, a label she specifically gave Chandler.
* Chandragupta Maurya, had an army of more than 500 highly-trained bodyguards of Greek and Indian warrior women because he considered them less likely to participate on a coup conspiracy (and considering that he lived to renounce his kingdom and sit his son Bindusara on the throne in 297 BCE, he may have had a point there). This custom was also used by other Indian rulers according to chronicler Strabo.
* Chandra Sijiema has a blade hidden in his flute, which he attempts to use against Domon Kasshu to eliminate him before their scheduled Gundam Fight match.
* Chandra Suresh. Chandra×Gabriel and Chandra×Eden are usually considered consensual, if
* Chanel's for Rob and Steelo (and the audience) to laugh at. She's also there, like us, to giggle fiercely at the people getting hurt.
* Chang and Eng Bunker - 19th century conjoined twins who were exhibited during sideshows.
* Change 123 and glasses. His mom on the other hand is short, squat, and plain-looking.
* Change 123 (and once when explaining Hibiki her mother's family history), the audience only diagram is sometimes used, in form of a mixture of schematic diagrams and portraits of various characters/personalities, and once a diagram drawn by Kannami himself on a sheet of paper.
* Change 123 chases Sora, at one point she does a spectacular three-point landing (presented on a double page spread, no less) after jumping off from a moving truck.
* Change 123 Fujiko. Kosukegawa, who is always willing to be a hero despite him not being an athletic type, instinctively tries to grab Fujiko and run away. However Fujiko, being a good strategist, knows that they don't have enough time for this, so she forcibly holds Kousukegawa near her and then manipulates both of them to the spot where she calculates that a hollow part of the staircase will fall down.
* Change 123, in which the characters are generally drawn very realistically (at least from the neck downwards), various chibi versions of the main female character are used throughout the series to indicate certain visible moods of hers, but always with a sense of good measure, varying the degree of chibiness. Also, sometimes the artist uses a different line style (a soft pencil style or a charcoal style) to indicate various internal emotional states of characters.
* Change 123 is a particularly standout example, given that he nevertheless has a nasty habit of trying to interpose himself between danger and his friends, who are usually fifteen to twenty times stronger than he is.
* Change 123, Kosukegawa imagines Motoko as his future wife in a hadaka apron a couple of times.
* Change 123, the character Col. Ralph Austin (an American soldier) lost his left arm and had it replaced with an advanced prosthetic.
* Change 123 the described risks of fighting as Zero are frightening as Zero

doesn't seem to have the mental blocks everyone else has holding them back and could easily rip her body apart by fighting all-out. Luckily she usually over-exerts herself and passes out before anything like that can happen.
* Change. Although he's aware that their relationship is now damaged beyond repair, he still wishes that his former friend would change back to the way he was so that they can be together again.
* (Chang'e) Annie's classmate, Matt. Then lad helped her to catch the white rabbit, they had a nice chat and he ended up a little... moonstruck. She also "borrowed" his mp3 player with the full Dire Straits discography on it.
* change clothes in the womens room with another girl present, without her realizing Oboro was a guy. All she saw was what she thought was an attractive looking darkhaired girl in lingerie.
* changed Chapter She even rips her fingers off with her teeth and eats them!!
* Changed My Jumper: Time-travelers somehow don't attract attention in the past with their modern clothes.
* Changed My Mind, Kid: Friend abandons hero, then returns to save them at the last minute.
* changed the Exalted physically in different ways depending on the type used.
* changed their mind about what would work for the story (for better or worse).
* change gender depending on the sentence and nobody seems to be bothered by this.
* change her form at will. Her only true limit seems to be that using too many powers at once or switching forms too quickly on the fly can drain her energy.
* change into a girl at using his shapeshifting for perversion to his own ends.
* changeling and invites her to rejoin their world. Eve enjoys her new friend and powers at first, until Lyria demands Eve let her kidnap Eve's little brother...
* Changeling Angelina Jolie's character is force-fed pills by a mental hospital staff after refusing to take them.
* Changeling, a serial killer sings "Silent Night" to make himself feel better immediately before he gets executed by hanging.
* Changeling: By the end, Walter is not returned to Christine... but in the epilogue, one of Northcott's escaped victims has been found. He says that both he and Walter escaped from their prison, but were separated in the dark. Maybe Walter was recaptured by Northcott, maybe he got away.
* "Changeling Child" by Heather Dale tells the story of a woman who bargains with the faeries for a baby. They give her exactly what she asked for:
* changeling children about them that the human witnessing them can't quite pin down until they learn their true identity.
* Changeling Courtship Rituals, and their hero and villain rivalry afterwards just added more fuel to the fire from Chrysalis's perspective.
* Changeling Fantasy: A character's real parents are much more exciting than their other ones.
* Changeling folklore often includes the changeling (who looks like a baby or small child) revealing that it's actually several hundred years old or 'as old as Wester Wood'.
* Changeling has Captain J.J. Jones, who is willing to go any length to protect the image of the LAPD, including giving Christine a stand-in for her missing child, forcing her to care for him, and committing her to a mental institution when she finally decides to stand up for herself.
* Changeling has this, but it does make sense as the movie is set in the 1930s.
* Changeling Northcott was supposed to die this way at the gallows, but ends up being strangled to death due to a rope malfunction.
* Changeling, one of the first things he gets is an implant in his left eye. With a lens that buzzes and changes color adapting to illuminance.
* Changelings against their enemies, the True Fae. Powerful Changelings gain "frailties" as the storybook logic of faerie magic takes root within them; for example, the Summer King of Miami is harmed by the touch of copper and can't rest in a room without open windows.
* Changelings are the progeny of humans and fairies. They make a choice between becoming fully human or fully fairy, and can make that choice at any time.

* changelings are welcome in the Packlands. Luckily, she is able to calm herself before she unwittingly causes an international incident; it helps that the changeling in question is from a different hive than Chrysalis'.
* Changelings are well aware that there are creatures out there that might as well be divine... of course, as these same creatures abducted and tormented them, transforming them into half-human freaks, they generally aren't inclined to worship them, and often become skeptical of human religions as well. Some don't feel that way, especially if they become convinced that their Durance was God's punishment for sinning or some such thing, but they tend to be a minority.
* Changelings become enormous four-legged insects who evolved to mimic ponies (their food source) and that feed on both emotional energy and solid matter. Their transformation in "
* Changelings can leave near-perfect imitations of the people they've taken, that they have agents operating on this side of Arcadia, and that — while mercurial — many of them would very much like to get their property back. Much of their society is based around institutional structures that effectively throw up cloud cover for the Gentry.
* Changelings cannot stand lemons and lemon juice, so Lemon Hearts, whose special talent is the ability to summon and control lemons in very creative ways, is very dangerous to them.
* Changeling, set in New York Between, where Folk (supernatural creatures) from many different myth and fairy tale cycles live side by side and frequently interact. Logical, because of New York's multicultural immigrant population.
* Changeling setting) embodies this trope, as the Wyrd, which is the life's blood of all things fae and of which Faerie and the True Fae are essentially manifestations, is the fundamental narrative force of the universe, incorporating time and fate, destiny and chance, predestination and free will. The above-mentioned Talecrafting works because, due to the Wyrd, the New World of Darkness runs on tropes.
* Changelings, half-humans-half-Fae, are human unless they Choose to be Fae.
* Changelings mostly ditch the standard sins in favor of an extremely legalistic tangle of requirements to keep oaths explicitly stated. If you can rationalize your way around an oath so that you completely violate the intent while technically obeying the wording, that's a positive quality.
* Changeling Space Program & The Maretian: After the Hab breach of Sol 88, Cherry Berry, who feels she has failed as leader of the pony crew, attempts to resign as mission commander. The others aren't having it, not even Spitfire, who up to this point has felt awkward about being the lowest-ranking member of the crew after being commander of Equestria's most elite military unit.
* Changeling Space Program & The Maretian: Averted with the first "Group Photo" sent to Earth after radio contact is reestablished. (Everyone had their polarized helmet visors down, and Starlight wasn't going to risk a lapse in concentration while maintaining an air bubble spell.)
* Changeling Space Program & The Maretian that dragons need to eat some gold for their nutritional needs.
* Changeling Space Program, the changelings' standard procedure for pony prisoners is to keep them comatose and give them dreams about their strongest desires, so the changelings can feed off the resulting positive emotions. When Cherry Berry wakes up from her imprisonment and sees the changeling who had been guarding (and feeding from) her:
* Changelings; the "humans" they kill actually are magic duplicates left behind so nobody would miss them, and they are just trying to take their old lives back.
* Changelings (theorized to be descended from dopplegangers) can likewise assume other humanoid forms. Changeling wizards can confer a shapeshifting power to their
* Changelings. The Prince's sword is in fact, specifically built to puncture chitin.
* Changelings use names derived from arthropod anatomy and biology, usually ones with emphasis on sibilants
* Changeling Tale: Elves kidnapping human children and replacing them with elven

children.
* Changeling Tale: Fairies kidnapping human children and replacing them with fairy children.
* Changeling Tale pretend to be human infants, usually after abducting the real babies and switching places with them.
* Changelingthe Dreaming allows the user to warps and bends the target’s identity to the nickname provided by the changeling. While the cantrip stays in place, everyone around the focus of it sees them through the lens of the Nickname. If the target is an inanimate object, it conforms to the spirit of it. If applied to a changeling, mortal, or other sentient creature, the target cannot regain Willpower unless she acts in accordance with the spirit of the Nickname.
* Changeling: The Dreaming, and have a miserable time fitting in with "banal" normal society. Changelings also either come into their fae identities in early childhood (realizing they're "different" from the other neighborhood kids) or during puberty (dealing with this new rush of sensations and body issues).
* Changeling: The Dreaming are immune to being made to look like fools with magic, and if you manage to do it the mundane way, they get a big stack of bonuses to cut you back down to size.
* Changeling: The Dreaming are the embodiment of these, and once upon a time were summoned by parents to punish exceptionally unruly children.
* Changeling: The Dreaming. As the kithain's reincarnation process isn't exactly tied down by things like gender, star-crossed lovers tend to be flexible just in case.
* Changeling: The Dreaming because many people subconsciously believe in them. Still, the Technocracy would like to change that.
* Changeling: The Dreaming), Chu Jung (Fire; strategists), Hou-chi (Wood; healers), Komuko (Earth; Balanced), and Suijen (Water; jerkasses).
* Changeling: The Dreaming filled with monsters that view you as commodity as best and speed bump at worst, your muggleness itself ensures nothing could ever be done to possibly make things better.
* Changeling: The Dreaming gleefully abandoned this, along with cleaning up a lot of the dissonant tonality in the original. In the new edition, exploring the wonders of the natural world through science is a perfectly valid source of Glamour, and Banality is a dampening force on science because it drains curiosity and stifles creativity, including technological innovation. The Technocracy are still Banality-spouting walking wastelands, but this is because of their loathing of all things unmeasurable and pathologic need to quantify and classify everything into neat little boxes, not because of their relationship to science.
* Changeling: The Dreaming has the overhanging threat of Endless Winter, a time when imagination, belief and hope are all but gone and the world of the fae slowly withers and dies.
* Changeling: The Dreaming: House Leanhaun has a particular frailty where its members will age rapidly unless they manage to reap deep bursts of Glamour. In keeping with their namesake, the best way to do so is to inflict Rhapsody on artists, which typically either kills them or burns out all their verve so they can never create again.
* Changeling: The Dreaming's Nockers. Their kithbook outright states that half of their profanity is just a verbal tic, and the other half is the result of frustration. Either way, it makes them the most foul-mouthed of all the kiths, and there isn't any method of permanently keeping them from swearing.
* Changeling: The Dreaming tends to assume science is Fae-smothering Banality, though the Nockers might disagree (indeed, the largest infusion of Glamour in recent history was the moon landing).
* Changeling: The Dreaming: The Piskies aren’t exactly thieves, but items of great value somehow always end up in their pockets. When a piskey sees something she desires, she can’t help but swipe it, often without consciously making the decision to do so.
* Changeling: The Dreaming: There were two ways for Changelings to gain Glamour (AKA imagination, creativity) by draining it from humans.

* Changeling: The Dreaming: The Willow Whisper cantrip lets you literally talk to everything and anything in its own language, with the exception of cold iron. The Zeitgeist cantrip gives you temporary knowledge of the local human language.
* Changeling: The Dreaming. Those who were looking for something along the lines of the rest of the World of Darkness found something covered in glitter; those who wanted something cheerier found the glitter flaked off easily.
* Changeling: The Dreaming, trolls become physically larger and stronger as they age.
* Changeling: The Dreaming, which contains both individual dream realms and archetypal dream realms, covering the fundamental concepts dreams encompass.
* Changeling: The Dreaming, who in their Fairy self look nothing like the creatures in the movies of the same name but more like small pointy-eared people with green skin and sharp pointy teeth... and they grin a lot, especially when they've just planted a booby-trap somewhere or sabotaged a piece of technology.
* Changeling: The Dreaming. You are a fairy, living off of the imagination you inspire in others, and doing courtly fairy things and adventuring in a dream world. Except the modern world is so poisonous to fae that you can literally die of boredom waiting in line at the bank, and all the best ways to stave this off will slowly drive you crazy.
* Changeling: The Dreaming, you can have wings as either a merit or a flaw. As a merit they do indeed allow you to fly, while as a flaw they get in the way a lot and make clothes shopping hard (but they look cool).
* Changeling: The Lost (1st edition) divides Changelings into seemings (general 'character classes' as determined by appearance and magic affinities) and kiths (specialized classes determined by the nature of the character's Durance). The Wizened seeming has the "Chatelaine" kith, for preternaturally skilled manservants and house-managers. Combine this with a fighting style (such as Kung Fu or Boxing), and BAM, instant Battle Butler.
* Changeling: The Lost allows the possessor to hold perfectly still, making this trope much easier to enact.
* Changeling: The Lost. All types possible, but they tend to focus on supernatural methods primarily.
* Changeling: The Lost always appears as the beholder's perfect ideal of beauty.
* Changeling: The Lost a magical effect preys on the beliefs and psychological expectations of mortals and other supernaturals to make Changelings and Fae Tokens appear as mundane people and objects, rather than the (sometimes flagrantly) magical things they are.
* Changeling: The Lost. An abducted human could spend two hours in Faerie, only to find that ten years have passed on Earth... or they could spend ten years in Faerie, only to find that two hours have passed on Earth.
* Changeling: The Lost and alien tropes in a blender and set it to "Pulse," and nowhere is this more apparent than in the mindset of the True Fae. They cannot understand humanity. At all. They can pretend to, but their emotions and attachments are fleeting, to the point that one of them can murder a human servant because they view a moment's hesitation as gross disloyalty, then forget all about it a few minutes later. Trying to understand humanity actually forces True Fae to forget all about their fairy homeland, lose most of their powers, and become an amnesiac humanoid who thinks that one particular person or type of person is just the niftiest - which is a problem, because their object of fascination could be anything from a lonely romantic type to a serial killer.
* Changeling: The Lost and books that multiply when nobody's watching.
* Changeling: The Lost, and other threats to the freehold), whereas others will just take any job that pays.
* Changeling: The Lost are based around this, though it can be anything from a stuffed doll to a clockwork dancer and so on.
* Changeling: The Lost are based on extremely literal interpretations of fairly general ideas. Nonsensical catches in the contracts can allow you to call upon its power without cost- for example, smearing a mirror with a saliva-wettened tongue, being at a formal party of eight or more people, or using the contract purely to

prove you can, depending on the contract.
* Changeling: The Lost, a slightly altered human guise. The changeling, and other changelings (as well as the Fey), however, are all capable of seeing the changeling's true form. The "Rites of Spring" sourcebook has a segment that explains that the Mask actually covers all aspects of the Mien (true form), but it is weakest in disguising scent and taste.
* Changeling: The Lost as their kin, are content to stay in Arcadia, pursuing their own interests, rather than go mess with humans.
* Changeling: The Lost away from the supernatural and to study the supernatural themselves, are quite likely to develop this kind of attitude as well.
* Changeling: The Lost. A Year and a Day is used instead of a year because of problems with mortal timekeeping (leap years, for instance) synching up with the actual passage of a year, causing the magic to unravel.
* Changeling: The Lost bad stuff goes down. As part of their membership, they receive masks that can instill phobias in those who look at them.
* Changeling: The Lost before the mundane world starts to smother them, and a few hours more before they're destroyed completely. They can adapt by becoming "Charlatans", albeit at the cost of their memories, power, and what passes for their sanity.
* Changeling: The Lost better chance to succeed). In fact, the description of the power directs you to this very wiki for inspiration.
* Changeling: The Lost, but only because they've been reading humanity's subconscious. Even they don't know if aliens are real.
* Changeling: The Lost, but those with the "Mimic Contract" ability can also duplicate any of their Changelings' supernatural powers as long as they're nearby.
* Changeling: The Lost: Cannibalistic urges can appear among those of the Ogre and Beast seemings. Fee, fie, foe, fum...
* Changeling: The Lost: Changelings have Arcadia and the Hedge, but they do not map onto the real world as much. And Arcadia is the realm of the fae which Changelings are not too keen on getting to.
* Changeling: The Lost check. Either of these can be foregone- and the items can be used by mortals- by paying the "Catch," a "dread cost." Examples? One, a minor thing that empowers your car, requires you to run your car on a pint of your own blood (one point of lethal damage); another one, a more potent one called a Pledge Stone, requires you to rip out your own tongue and burn it (one point of lethal damage and you don't have a tongue).
* Changeling: The Lost craftsmen and servants. Like dwarves, there's usually something "diminished" about them (sometimes size, sometimes muscle, sometimes social presence), they tend to be cranky (see "diminished social presence"), and they're very, very good with crafts.
* Changeling: The Lost gain most of their magic by forging these Contracts with the forces that technically hold the keys, and their changeling servants gain mastery of them by proxy.
* Changeling: The Lost has a minor bend into summoning with the higher levels of the Contracts of Communion, which allow you to summon a guardian made of the Contract's chosen element and bind it to serve your purpose.
* Changeling: The Lost has the Spring Court. Every court has a signature emotion they can feed off of and manipulate, such as Anger for the Summer Court or Fear for the Autumn Court. The Spring Court's emotion is Desire, so they can do things like learn someone's desires, alter someone's desires, appear as the person a target most desires, or compel someone to pursue their desires regardless of the costs. Desire isn't just lust, but lust and sexual desires are explicitly included.
* Changeling: The Lost in addition to the enemy "[because] they will be able to fight through" the pain... You get the idea.
* Changeling: The Lost in a number of places. It is later explained that the True Fae need conflict to prevent themselves fading away into the random background chaos of Arcadia. As a result, the closest thing they have to friends among other Fae are their sworn enemies, as by fighting they're keeping each other alive. They can also be inanimate objects (Props), legions of lesser beings (Wisp), and entire

self-enclosed universes (Realms) in addition to their normal forms (Actors). With enough Titles, they can do the aforementioned simultaneously!
* Changeling: The Lost, in the specific context of Dream Combat, and with some caveats appropriate to that.
* Changeling: The Lost: It's entirely possible for a changeling, in the game of the same name, to be one of these. By default, they will be human-shaped, but there are options for other forms and characteristics.
* Changeling: The Lost like them, but a different age), who hates their guts and has strange magical powers, they are perfectly justified to think they are the victim of this trope.
* Changeling: The Lost. Likewise, there's the incubus/succubus (depends on gender) Kith of changeling, which has an easy time dealing with lustful humans.
* Changeling: The Lost missing something of the personality they were meant to replace. It could be a negative trait (quickness to anger) or a positive trait (dedication to a task), but there's always going to be something missing.
* Changeling: The Lost mortal invoking every bane she knows from the old tales in an attempt to scare off one of the Gentry. None of them work.
* Changeling: The Lost not only turns you into a nigh-unstoppable monster, but is free to cast if you are seeking vengeance for an injured or killed loved one.
* Changeling: The Lost. Now the two have pooled Marker's knowledge of the mortal world and the Shrike's ages of hunting experience, planning the most heinous crime in human history...
* Changeling: The Lost obtaining cold iron is to get your hands on meteoric iron, since melting down normal iron ore is pretty much the only way to get iron out of it in the first place.
* Changeling: The Lost offers several Emotion Bombs to the members of the Great Courts. Each Court (Spring, Summer, Autumn, Winter) has a Fleeting [Season] Contract list centered around manipulation of the Court's ruling emotion (desire, wrath, fear, sorrow). In addition, high-powered changelings have the ability to inflict bedlam, which hits everyone in the immediate area with an intense dose of an emotion.
* Changeling: The Lost (on a scale of 1 to 10, with 7 being the normal starting point) — meaning that even the sanest of them are at least a little out of touch with reality and starting to think like the True Fae.
* Changeling: The Lost: One of the Kiths available to Ogre characters gives you this as its special power. Depending on how powerful you are and how big you are already, you grow to anything from the size of a gorilla to bigger than an SUV. Coincidentally, this Kith is called the Gargantuan.
* Changeling: The Lost or their servants who kill a changeling must mourn their victim's death in some fashion before they can resume fighting. It's mentioned that the rare full battle fought under Winter is a truly surreal sight, especially as most Keepers have no concept of grief or mourning and have to guess at appropriate acts of sorrow.
* Changeling: The Lost pale compared to it, simply due to its sheer variety and absurdity.
* Changeling: The Lost pass inspection when you're pulled over) to 4 dots (a well-constructed identity that would take some deep probing by a federal agency to dismantle).
* Changeling: The Lost prophetic before they can act on it. Some Merits, however, allow them to refine this talent, to the point that they can dream of the past or gain beginner's knowledge of any skill or language from the collective unconscious.
* Changeling: The Lost rare occasion that two Changelings actually manage to reproduce may also spawn a child as half-fae as their parents, whose Fae nature can be detectable (or even obvious) before its birth.
* Changeling: The Lost refuses to actually define the Wild Hunt — probably because no-one has ever seen it and lived.
* Changeling: The Lost shows hints of their true nature — if you were turned into a mountain goat, your shadow's going to show horns, even if you strengthen the Mask to the point that even other Changelings can't see through it, or use

Contracts (Fae magic) to appear as something or someone else entirely. Fortunately, the shadow only looks 'off' to other fae or creatures that can see through the Mask, not to everyone in general.
* Changeling: The Lost Some of them might even have been more moral or noble than the originals, having lost some fundamental character flaw.
* Changeling: The Lost still heavily traumatized by what happened to them in Arcadia, they're just in heavy denial and/or trying to sublimate their psychological issues through partying.
* Changeling: The Lost suspicious than one who acts like an arrogant prat.
* Changeling: The Lost, take their place, and actually believe themselves to be the person they replaced. Getting your old life back may very well involve doing this, in reverse, to an innocent being who's totally unaware that it isn't really you.
* Changeling: The Lost than on actual distance, meaning that getting from Miami to Tucson might require more time (and bloodshed) than from Miami to London. In the Infinite Macabre setting, it's made explicit that yes, the Hedge can be used for interstellar travel, though the base time for navigation is longer. Oh, and getting a ship back out requires finding a portal that said ship can fit through, which is implied to be a rare occurance.
* Changeling: The Lost that says the merchant has to fully disclose all negative qualities and side-effects of a purchase.
* Changeling: The Lost that strange unlicensed exterminator will clear all the insects out of their house for just a cheap trinket.
* Changeling: The Lost: The advantage for being part of the Beast seeming is that "animal magnetism" is no longer just an expression - you gain bonuses on social rolls.
* Changeling: The Lost. The fae's lack of empathy make them seem utterly alien to those they kidnap, enslave, and shape to their own twisted desires. The very few times a fae does develop real feelings for their unwilling playthings they actually lose most of their supernatural power and memories of their previous existence.
* Changeling: The Lost, the Fetch can sense the Changeling's presence in advance and prepare, and Arcadia usually leaves the Changeling physically and mentally altered from the person their loved ones remember, few Changelings succeed in reclaiming their old life.
* Changeling: The Lost. The fruits range in appearance from "like typical fruit, only in slightly off colors" to "resembling everything from roughly-carved human heads to icicles to ovaries." Most of them have a beneficial effect on changeling metabolism, allowing them to heal damage, but a good number of the fruits have side effects, such as increased alertness, unceasing hunger, guaranteed fertility, or the temporary ability to understand any spoken language.
* Changeling: The Lost the protections granted by the seasonal Bargains, they know exactly how to exploit the chinks in those protections. And finally, a Huntsman's heart is not in his breast, but hidden within the dreams of some mortal. If you actually kill him, he will be reborn within a month so long as the Heart remains undisturbed.
* Changeling: The Lost there before you can control it... but level 4 of the Contract allows you to summon a large quantity from elsewhere if there's none available.
* Changeling: The Lost, they are unharmed by it and so make frequent use of it in their tools and weapons.
* Changeling: The Lost. They have an affinity with Contracts of Artifice that allow them to manipulate and construct (or deconstruct) machinery; the top level of one set allows them to make a hovercraft out of a go-kart and an inflatable raft. And due to the fact that ANY changeling can purchase Contracts of Artifice like the Wizened (it's just more difficult for others) virtually any changeling can be a Gadgeteer Genius as well.
* Changeling: The Lost. Thus leading to the trope in question... sometimes literally; couples arranged by Crimson Weavers have been known to end in suicide and/or murder, or complete insanity. Crimson Weavers never take responsibility, see themselves as responsible or consider it their fault; they merely gave each person

a guaranteed soul mate, it's the people involved who refused to accept that.
* Changeling: The Lost to cover up their abductions. They're usually made from whatever stray garbage seems appropriate and a piece of the abductee's soul. Many of them, though not all, believe themselves to be the person they're meant to replace, but always seem to lack at least one feature (positive or negative) that went into the character of their template. Occasionally they are complete psychos.
* Changeling: The Lost, to keep from drawing their attention, the Lost refer to their Keepers as the True Fae, the Gentry, and the Others.
* Changeling: The Lost. To the mages, the dreamscape appears an endless tapestry of human thought, whereas to the changelings, it appears a labyrinthine structure of ornate chambers decorated with the dream stuff of a billion sleepers.
* Changeling: The Lost Two children might be kidnapped on the same day. One spends 30 years in Arcadia, and returns to find that it's only the next day. Another only spends a week in Arcadia, but comes back after 60 years in the real world. This is one of the major obstacles the Lost face when trying to regain their lives.
* Changeling: The Lost uses this trope as a metaphor in the Courts. The courts represent everything from Acceptance, Denial and Defiance, while loyalists and Clarity Zero changelings have chosen Betrayal.
* Changeling: The Lost utter bullshit is true when coming from the speaker's mouth.
* Changeling: The Lost. When people who've made a pledge are near each other, the bands are connected with red threads.
* Changeling: The Lost, who escaped by figuring out the story they were caught in and how to get out of it, was planned to tie into this version, as was an unnamed eighth Seeming in a planned Hedge supplement, who escaped by embracing randomness, chance and luck. The game got overhauled when Olivia left Onyx Path and was replaced as developer, with fae magic instead centered on reciprocity, the principle of exchange, of give and take.
* Changeling: The Lost who the last person who used the book was and what they were looking for, which could be mildly inconvenient, embarrassing, or incriminating (kinda like your search history).
* Changeling: The Lost with concepts such as dreams, beasts, stone, death, and the edge of a blade (how these are different from spirits is never really explained, but it's likely a matter of the crazy-ass fae mindset). The founders of the changeling Great Courts — Mother Susan, Sam Noblood, Clay Ariel, and Snowflake John — managed to use this to their advantage by making various deals with the seasons for protection from the Gentry.
* Changeling: The Lost) with fate working for and against the Players as well as being avertable.
* Changeling, the young protagonist runs away from home with the help of a more worldly friend who he eventually realizes has been manipulating him all along in order to take advantage of his developing magical gift.
* Changeling uncle to help kidnap other young boys, and later on to dispose of the bodies.
* changelog 1.9.3 (and 1.9.4) interrupts the traditional "Removed Herobrine" entry to acknowledge that "This is getting old."
* change, nor do they dream, so the Dreaming Dark can't get information that way either - and their mindsets are so inhuman that you can't reason out their strategies either, to whatever degree they even have them.
* Change of command: When a soldier or officer is in command of an outfit and another soldier or officer (be it equal or greater rank) arrives to relieve him of command, the commanding officer salutes the newcomer to acknowledge the change.
* "Change of Direction" definitely qualifies, as a hobgoblin saves Redcloak from a catapult shot.
* Change of Habit, Amanda hears Irene, the only black nun, talking about her difficult background. Later, Amanda shows up at a party with a black hand puppet, and when an adult tries to talk to her, she says, "My name is Irene. When little white girls was playing with dolls I was praying I could be somebody and not just another nigger in the streets."
* Change of Habit, he carries it in a sack, presumably the one he stole it in.

* Change of Habit in 1971 after a young woman was severely injured under his care.
* Change of Habit teaches Michelle how to play guitar by standing behind her, wrapping his arm around her waist, and putting his hands on hers.
* Change of Heart, constantly waiting for her beloved to look at her romantically.
* Change of Plans take on "The Ex-Files" where Courtney tries this trope with Cody instead of Tyler. Ultimately this results in Cody and Courtney actually getting together.
* Changes, and when he needs to deal with something that can survive being thrown through a city block, he can do the throwing.
* Changes around is a major reason people he cares about get in danger.
* changes genders, their hair usually gets longer or shorter to complement their new gender. Justified, as it's built into most of the forms they usually transform into, especially the Female Variant #5 form.
* Changes had Harry getting shot and dying as the last scene in the book.
* Changes, Harry Dresden ruefully remarks that he'd just sent in his check for the next month's rent on the place.
* Changes, Harry's occult dealings take so much of his time that he subcontracts out most of the mundane tasks to the aforementioned colleague.
* Changes. He gets better, after making a deal with a very powerful faerie and some rather painful (for him) plot twists.
* changes her mind and wishes to keep making memories with Tsukasa until the end.
* Changes, he still almost manages to kill Harry without raising a finger. The only problem with this is how the hospitality extends to the enemies who landed with him, and they claim Harry sought to bring them here for the Erlking to attack. Harry ends up having to prove him claim is true by combat.
* changes his gait and posture so the waiters think he's a rich diner.
* changes his name to Blizzard and joins the Academy, he rescues Storm from drowning in a river, then passes out from exhaustion. He then wakes up in the infirmary with Storm.
* Changes in barometric pressure (such as before a tornado) turn the sky
* change(s) in medium, especially if it comes without warning and changes back just as quickly.
* Changes. In response to Susan's assertion that Molly is (still) in love with him, Harry argues that he's seen her date other people.
* Changes is almost as bad, as it starts literally just a few minutes after the previous book. Ironically the book is still packed with little reminders of who people are and what's going on, despite the fact that there's no possible way it could get someone who isn't already caught up back up to speed.
* Changes is jumped at by a monster, so he activates his shield — while flipping the monster off at the same time.
* Changes Not that there was much in the way of better options at the moment.
* Changes slices the front of a Red Court noble's skull off with one of the Swords of the Cross. Not as horrific as some examples, as the vampire in question was wearing a mask, so the actual face is fully covered as it falls to the ground.
* Changes, Susan grabs a Red Court Vampire by the tongue in its true bat-monster form, and then rips said tongue right out with her bare hands.
* Changes, thank you very much, she's a Winter Fey), it scales back down to his regular old duster — and had sustained so much damage that one could have made a rather risqué bikini out of the remains.
* Changes, the Red Court makes heavy use of an unidentified South American PMC to guard the Mayan temple where they're having their happy blood sacrifice holiday.
* Changes. There's no flash, no sound or anything, he just makes a wide gesture with his staff and those he points to simply drop dead.
* Changes. Tilly eventually orders him out of the room for impeding the investigation.
* changes to certain characters' ages for him to be anywhere close to willing to play father figure with Storm and Xavier for an entire group of mutant children before any school for gifted youngsters or superhero team was properly established.
* Changes to leveling up prayer have made pretty much all of the bosses from

earlier quests this. The prayer skill has some mid level prayers which grant complete immunity to attacks, but only one style at a time. At first, prayer was tough to level, but now, it's become easier, such that Protect prayers are standard among lower-mid-level players. Since most monsters in older content used only one attack style, they can't even scratch a player. Special mention goes to Nezikchened and Tarn Razorlor, both of whom drain prayer to make up for only using melee. A single dose of Prayer Potion, which can be bought easily, will fix this. Nowadays, pretty much any boss, and many of the Mooks you fight on the way to them, will either ignore your prayer completely or use multiple attack styles.
* Changes, where a Red Court vampire assassin, upon seeing Harry, screams and runs away.
* Changes which is also responsible for the general long lives of wizards (Harry expects to live to be around 200, unless someone or something kills him off first).
* change the card as soon as he draws it to "Rank-Up-Magic Numeron Force". Vector calls him out and accuses him of cheating, but given Vector's atrocities and broken cards, Yuma doesn't care and beats him.
* Change the "Japanese" to "British", and you'd have a pretty accurate assessment of the British music scene in
* Change the Uncomfortable Subject: Changing the topic of conversation to try and avoid discussing something you'd rather not.
* Change the Uncomfortable Subject: when a joke gets out of hand or a description gets too risque or explicit.
* Change the word science to magic and you have the motives of essentially every (non main character) magus in the
* change to become orange-ish yellow when he goes into Dying Will Mode).
* Change Your Mind, all the way to the ending with Steven and the Crystal Gems on the beach.
* Change Your Mind is animated much more fluidly, courtesy of the work of veteran animator James Baxter.
* Chang gets a field promotion to chief of campus security after the current chief has enough of the insanity and quits. The Dean gives Chang the position because he is the only security guard left. The college is broke and all the other guards quit when they are told that in lieu of pay they can attend classes for free.
* "Changing Channels" monster whose entire modus operandi consists of inflicting comical deaths.
* Changing Gameplay Priorities: A game's mechanical elements grow and change over the course of the game, such that the things you prioritize in the early game are much different than the things you prioritize in the late game.
* Changing Gameplay Priorities as the result of specific plot developments, or vice versa.
* changing her clothes in the middle of a conversation not the one being unreasonable here!"
* Changing Lanes: Lawyers Gavin and Michelle are shown to have had a fling in the past, despite the fact that Gavin is married to their senior partner's daughter.
* Changing Lanes plays a recovering alcoholic who is on the verge of turning his life around, as evidenced by his cheery speech at an AA meeting near the beginning of the film. Unfortunately for him, the situation is about to change drastically for the worse.
* Changing Luck. She can't even use computers much because they end up getting viruses.
* Changing of the giggle pins - Needs a friend in the tank corps: Making new recruits hold a Challenger MBT's barrel up whilst the "giggle pin" is changed. The gunner and the Sergeant then sit in the turret and depress the barrel by hand whilst the poor recruits struggle, whilst the Sergeant makes dire threats about what he will do to the recruits if they don't hold the barrel up.
* Changing of the Guard: A sequel which features or focuses on different characters from the original work.
* Changing of the Guard. In addition, the Forever Knights are aware of Ben having the Omnitrix and the Trolls underneath Arcadia, and are definitely plotting

something.
* Changing sea levels and plate tectonics have caused low-lying areas of today's continents to spend long periods submerged. Presumably this
* Changing the Baby", Clyde is unhappy because his best friend Lincoln is hanging out with his (Lincoln's) baby sister Lily instead of him. Clyde tries to win Lincoln's attention back by dressing as a baby.
* changing their color during the match, essentially forcing the opposing team to beat every last one of them to win.
* changing their hair for a particular role is a good part of helping get into character.
* Changing their personality in ways that majorly conflict with their established mannerisms (again, for either
* Changing the Majority: A character who was a majority being made into a minority.
* changing the map (though in context doing so was not unnatural). Of course Pete decides to use this pertinent information for malicious purposes.
* Changing the Minority: A character who was a minority being made into a majority.
* changing the quantum frequency, but the prototype never worked properly and subjects would start phasing randomly. The unfortunate person trying to use the stolen prototype has a finger phase back into normal while he's passing through a wall and it gets left behind.
* Changing uniform with the rank seems a common practice, as lieutenant Girodelle of the
* Changing Yourself For Love: Changing your image to impress a love interest.
* Chang is generally incompetent to the point of insanity, but he's a top-notch actor.
* Chang Lee). He also did it to the wife of Bruce (the guy whose body he stole).
* Chang's entrance to the study room is straight out of a John Woo movie... minus the doves.
* Changsha is remarkable for being successfully defended three times, from 1939-41, until it fell in 1944.
* Chang, the natives construct these to trap wildlife. When they catch a baby elephant, they fish it out and try to tame it so they can put it to work. When they catch a leopard, they shoot it.
* Chang when admonishing Jeff for "taking advantage of the emotionally vulnerable".
* Channel 19 was a de-facto calling channel - Bandit-Snowman comms was on whatever channel they were operating on - but Bandit hailed Mr B's tanker on channel 19 at 33 seconds in.
* Channel 4 documentary "Old People's Home for 4 Year Olds" brings children aged 3 or 4 to an retirement village were the producers plan activities in home they will befriend each other. At the start and endof the programme tests are given on their health to see if there is any health benefits for both age groups.
* Channel 4 has an excuse plot at the beginning explaining that the malfunctioning electronics in the pranks were created by a robot who gained sentience to punish humans for mistreating their electrical appliances. No story progression after that.
* Channel 4 is sponsored by Nescafe" clip had two women drinking coffee. The one with the huge cream cake in front of her was offered the sugar and reacted with horror, taking sweeteners out of her handbag.
* Channel 4 logo, a building-block style "4". Decoloured, but otherwise not changed since 1982.
* Channel 4, one of the female teachers gets romantically involved with a sixth-form student she mistook for a teacher. All her fellow staff (aside from the one vindictive secretary and the head who would care) know about their relationship (which continues long after she finds out his age) and don't care about it.
* Channel 4 parodied this in a launch advert for their "adult entertainment" channel, More 4. The advert features Ron Jeremy as a repairman who

* Channel 4 removed when John Tenniel protested it was impossible to draw.
* Channel 4's cult late-night video review show Vids featured a notable example. The show was filmed in Glasgow (or Glasgow, Scotland, if you prefer). Presenter Nige, in the guise of cheesy American host McLumperty, once introduced the location as "Glasgow - London, England".
* Channel 4 Since they only did a couple of scenes, they didn't have to maintain the concept for the whole play.
* Channel 4's spinoff channel E4 would have ad bumpers consisting of one word, with both bumpers in one ad break forming some two-word phrase, so (as an example) before the ads it would say "Hello" and after "World". Eventually sent up by both words once being "Bling".
* Channel 4. The adverts in question resembled a cross between a relaxation tape and a personal loan advert, and it was only the constant use of words like "erection" that marked them for what they were.
* Channel 4 tried to stick with the US advertisement frequency when showing
* Channel 4 was full of topical references, and had started four years earlier...
* Channel 4, which started out as an aftershow of sorts for the Paralympics before becoming an independent show, though it continues to focus on the Games whenever they're on.
* Channel 4, with the series airing at 9pm on E4, and repeats airing in the afternoon on Channel Four), several episodes have been subject to this:
* Channel 5. It was said that broadcasting regulations required the cut-off, as the watershed hours for free-to-air television end at 5:30 a.m.
* Channel 5: The Musical satirizes the media's focus on entertainment over news.
* Channel 99 - a failed sitcom about a high-powered LA TV executive who returns to her hometown after being released from a mental institution in order to try to revive the local TV station which is struggling in the ratings.
* Channel Ate could easily be renamed "The funny suicide webcomic" and still make sense without changing anything else.
* Channel Ate, one character offers another lemonade with a wink. The second character promptly refuses to drink it.
* Channel Awesome and Rob countered that while that particular act might have been defeated, the fight to keep the Internet free will still go on, with more effort on the part of people like them than most people probably realize.
* Channel Awesome and therefore assume the catch phrase originated with him.
* Channel Awesome are like this. They've gone through depression, abusive relationships, and illnesses, but use comedy to tear those taboo subjects down.
* Channel Awesome episode where the characters smoke giant blunts, set to a "Smoke weed everyday" audio clip.
* Channel Awesome hair, odd clothing, and her face resembles squirrel". Her response? The only thing I disagree with is the overweight thing."
* Channel Awesome has multiple, mostly due to a lack of actors. A list:
* Channel Awesome is a grown man whose squee reaction to things such as cats is almost hilarious to behold.
* Channel Awesome is going to care about bad nostalgic shows/films, bad comics, or bad anime?
* Channel Awesome is impossible unless you have a good understanding of the group's dynamic, and the use of past characters.
* Channel Awesome is Snow White, so she knows that she's contractually obligated to be horrible in battle.
* Channel Awesome' lampshaded-sexy voice, nobody noticed the actual product.
* Channel Awesome" — a film so bad the censors really oughta go and pull it.
* Channel Awesome members won't pull any punches when it comes to their verdict on topics.
* Channel Awesome on their Twitter account where they told their viewers and their former contributors that they "sincerely regret that you felt that way", attempting to evade responsibility for nearly ten years of behind-the-scenes abuse. This resulted in disillusioned/disappointed fans leaving in droves and all but three of their remaining contributors leaving in less than a week.

* Channel Awesome's mistreatment of its producers. Most of the executive decisions and abusive behavior came from Mike Michaud and, to a lesser extent, Rob Walker, who hold the majority stake in the website and dictate most business decisions. Some ex-producers do criticize Doug's lack of interference, however.
* Channel Awesome, some of the critics have a fight scene in a park against the supernatural villains.
* Channel Awesome (The Chick not only kidnapped Todd multiple times, but turned into Alex Forrest when Lupa turned up in her apartment.)
* Channel Awesome. This brought way more negative publicity to the movie, the website, and the names behind it than any review ever could have. After a short while, the review was allowed to be put back up. The "Tommy Wiseau Show" sketch is also still up.
* Channel Chasers Channel Chasers' ending and by extension Tommy and Tammy Turner out of existence entirely.
* Channel Chasers, Timmy's mom mentioned that she punished him by making him eat chocolate. Then she says that, in hindsight, it wasn't a good punishment.
* Channel Four (13 episodes in the channel's first year) starred two bag ladies, both named Pat (distinguished as "Old Pat" and "Lanky Pat") and played by Patricia Hayes and Pat Coombs.
* Channel Four (as it does add some localized acts to the mix), a few of the more prominent recurring acts from the British version (particularly Olivia Lee and Neg Dupree) participated as well, meaning that it could considered to be a de facto continuation of the British version.
* Channel Hop - A show moves from one network to another or from one local station to another
* Channel Hop: A television series ends up airing new episodes on a different channel. This also applies to works changing publishers and distributors.
* Channel Hop: A television show ends up airing new episodes on a different channel.
* Channel Hop: A television show ends up airing new episodes on a different network. Can also apply to works changing publishers and distributors.
* Channel Hop: A television show starts airing new episodes on a different channel. This also applies to works changing publishers and distributors.
* Channel Hop Notably, each version changed the series title. The tie-in books were also published by different companies and based off different dubs, adding to the confusion.
* channeling is at best frowned upon and at worst actively prohibited unless one is a woman who has been trained in the White Tower, though the Tower's ability to enforce this is shown to be much more limited than it would hope.
* Channeling results in physical and mental fatigue, depending on the amount and duration of the channeling. In extreme examples, channellers have "pushed" themselves past usual levels, but it puts them at the risk of losing the ability to channel, or, in extreme cases, dying. Quite spectacularly in a
* Channelling, hence they hit multiple times over one long cast and nothing will hasten or slow down their casting.
* Channellock pliers, nearly all adjustable off set pliers, (sometimes known as 'water pump' pliers) are called by this trademarked name, even the ones that do not use the patented tongue and groove (channel) adjusting joint.
* Channel Nine Show, the main joke apparently being that it wasn't actually on Nine.
* Channel Orange review also gets this a lot, despite that he gave it a Strong 7 (which is quite a good score).
* Channel [V] Australia launched in 1995 and spun off a second channel, Club [V], in 2004. The latter became Channel [V]^2 in 2007 and then [V] Hits in 2009. Then [V] was closed in 2016 and V Hits became the main focus. The following year [V] Hits was renamed to simply [V] and the original Channel [V] became a
* Channel [V] Taiwan began in 1994 and was replaced domestically by FOX Taiwan in 1 September 2012. On 15 July 2018, its overseas operations have officially shut down.

* Channel Zero at the first sign of creepiness, is attacked and killed by a robed dwarf with a meat hammer.
* Channel Zero; meanwhile, Zoe is able to ultimately resist those same temptations, emerging as the true heroine of the story.
* Channel Zero: Mike's dream at the beginning of "Candle Cove", as the film crew of the man interviewing him turn out to be mannequins and dummies.
* Channel Zero who brutally kills a man only to then perform a circus act (complete with jazz hands).
* Channing Tatum he hosted was immune to exploiting this: he admitted it in the monologue, was shirtless in a couple of sketches, and even played a male stripper in the final sketch of the night.
* Channing Tatum, he played around with what would eventually become that image:
* Channing Tatum said the special effects are more animated than Tatum).
* Channing Tatum's roles. The other half is "Southern guy who beats up people".
* Channing Tatum was up for the role of Antonio. Among other things, Dito thought he was far too good-looking to believably play such a troubled kid. He was won over by Channing's desperate longing that he brought to the character - and worked with him twice more afterward.
* Channing Tatum with his male co-stars. This film implies something of a twisted sexual relationship between Mark Schultz and John Du Pont.
* Chano Pozo: A short-lived but highly influential Afro-Cuban percussionist best known for his work in Dizzy Gillespie's various outfits, where he played a crucial role in the establishment of Latin jazz. A heavy drinker and brawler, he was shot dead at the age of 33; while there are multiple stories about why he was killed, the prevailing one is that he threatened a drug dealer who he thought had ripped him off.
* Chanson de Roland: In Roland's final battle, he slays thousands of enemies before perishing from blowing his horn too hard.
* chanson had a song called "Un p'tit coin d'parapluie" ("a little piece of umbrella") about a boy who shares his umbrella with a girl, and whose chorus went: "A little piece of umbrella/For a piece of heaven/She sure looked like an angel".
* "Chanson pour l'Auvergnat" tells the story of a man who has been thoroughly hated and condemned by society but fondly recalls three persons: the titular "Auvergnat" (a person from the Auvergne region) who gave him firewood in winter, a hostess who fed him bread when he was starving, and a traveler who kindly smiled at him when he was about to be taken to jail. Each memory finishes with the narrator hoping that they will go to Heaven for their kindness.
* Chant des Partisans, which exalts the sacrifices made by the opponents to the Nazi occupation and became the unofficial anthem of the French Resistance, is one extremely badass example.
* Chante Jawan Mallard, who struck a homeless man with her car, drove home with him clinging to the roof, and left him to bleed out in her garage rather than taking him to a hospital.
* Chantelise, there are Eyebats, oculothoraxes with wings that shoot magic rings.
* Chantelise: There are sword wielding skeletons that can only be defeated by magical attacks.
* Chantelise: The witch's curse, which afflicts one pair of sisters every few years.
* Chanters of Tremaris and directs her to a teammate who has been stabbed in the chest with a spear.
* Chanters of Tremaris, as the magicians who run it are all priestesses of the goddess Taris.
* Chantez declares herself as such when she first meets Fuka since she's a sister of the Saint Church and Fuka grew up in a church run orphanage. Nothing ever really comes of it other than her teaching Fuka to swim in the third OVA.
* Chanthaly: Chanthaly's father won't even let her leave the house due to her heart-based disease.
* Chanticler, the farm's treacherous cat plots with the Blackbird and the predators of the night against the titular rooster.

* chant of "Fix Your Wedgie" broke out among the female fans during one of Queen Aminata's Premier Championship Wrestling matches. Aminata's response was to pull her trunks up further and sit on the barricade right in front of a woman's face...
* chantries by finding a location they identify closely with and forming a physical reflection of it within their souls. Though not as mutable once they're made, they are manifestations of the mage, who is as aware of the chantry as of their own body.
* chants of "break his neck" while mauling whatever hapless heel happened to be in her way.
* chants of the Roman priesthood for a history on the different forms of the language.
* Chanur Novels aliens has to use a pick to operate the recessed controls usually operated by the Hani's retractable claws.
* Chanur Novels by painting a stsho passenger's quarters white and grabbing a random assortment of white furniture.
* Chanur Novels dignitary on their starship as a passenger. Knowing that the stsho love the color white, they get their hands on whatever white furniture and decorations they can and hastily shove them into the stsho's room. It turns out that stsho art consists of abstract designs in infinite shades of white, and they'd created for their passenger a masterpiece of stsho interior design.
* Chanur Novels kif are stated to have phyrangeal jaws largely for the same reason moray eels do: they can't swallow without them. The outer jaws hold their live prey (they also have such weak stomachs that anything less fresh than "alive" is disgusting) down while their inner jaws chew their currently-bitten section into a fine paste that will fit down their straw-width esophagi.
* Chanur Novels. Not only is he a Token Human, but he's a non-viewpoint secondary character with hardly any dialogue. In spite of all that, though, his presence is the catalyst which drives the story.
* Chanur Novels, the Hani species are essentially terrestrial lions given intelligence and stood on their hind legs. The way that the biological imperatives of a pride-grouping species would impact a sapient culture are shown, without rubbing it in the reader's face. It's "just" background.
* Chanur Novels. This form of Colony Drop was never used in the series, but one of the antagonists did threaten its use.
* Chanur Novels told from the perspective of a group of vaguely lion-like aliens who pick up a human stowaway.
* Chanur Novels was a bold explorer who got lost in Compact space, captured by the Kif, and rescued by the Chanur clan.
* Chanur Novels, with the plot being driven by their rescue/capture of the first human anyone has encountered. The story's all about them learning to understand not just the human but the several different alien psychologies she's invented.
* Chanur Saga in order to hide from kifish hunterts, and spy ships can sit invisible at the edge of a star system while gathering information on passive scanners.
* Chanyeol blames himself for Suho getting hurt in the first place, but as he was the one who knocked over the water bottle Suho tripped on, he's not entirely blameless.
* Chao does this to Negi's friends after sending them a week into the future when she'd already won the battle by sticking a note gloating about her victory on the side of Eva's resort.
* "Chao in Space," and rushes up to Eggman, fist out. It then proceeds to punch Eggman in the face so hard it sends him falling as Sonic watches.
* Chao. It's like going to 1900 and saying that airplanes are impossible because no one's ever built one. While having a working airplane.
* Chao Lingshen's about a dozen volumes later. Then another dozen or so volumes after that, she becomes plot-important again.
* Chao Lingshen, we finally get a peek at her character bio. Listed under her Likes? World Domination.
* Chao Linshen's red rings of death are actually magical runes engraved on her

body which allow her to use powerful magic, but have a deadly strain on her body.
* Chao of the World, Unite!, plot holes are used so frequently they are a form of transportation.
* Chao results in this. Considering you tame your Chao by petting or feeding it, it's pretty much unavoidable.
* Chaos! #3, Red Eye blows up a gas station by tossing his still-lit spliff into the pool of gasoline leaking out of the wrecked pumps.
* Chaos accepts/corrupts everyone, regardless of gender, race, age, ability, social standing, or species (though the main species other than humans are conveniently resistant or immune); as long as you can prove yourself to the Dark Gods, magnificent and terrible power is yours for the taking. It's part of the reason so many willingly defect from the Imperium, as at least Chaos gives you a
* Chaos ages ago, and by every account is chafing at the edges of what it means to be human, but he retains his mortal form out of sheer will, making the deliberate decision to refuse Daemonhood. His rationale is that he has seen in his predecessor and his peers what happens when you throw in with the Chaos Gods: you lose your humanity and your ability to control your own destiny. Abaddon, while unquestionably the villain of his own story, believes the destiny of the galaxy should be decided by humanity, and not the unintended and ignored consequence of fickle and distant gods fighting one another simply because its their nature.
* Chaos and Creation in the Backyard. Notable because this album was immediately recognized as a concept album, but it took over a year for Paul's fans to learn what the concept actually was.
* Chaos, and mortal Chaos Champions can live for thousands of years. Given that the best way to gain favour with the Chaos Gods is indiscriminately conquering and slaughtering everything in one's path, inevitably this trope is involved.
* Chaos and Takato do something moronic (which is pretty much all the time).
* Chaos and the Aftermath: Samus sees her sexual cravings as simply a biological urge to be satisfied. She routinely has one-night stands whenever necessary. She's only ever loved one of the men involved, with most others being nameless and forgettable.
* Chaos and the Aftermath that Samus has had sex with her employers in the past.
* Chaos and the Aftermath. This was before canon clarified that she doesn't hunt humans.
* Chaos and Varuna, the god of darkness and a goddess of light, will never be together in the
* Chaos Architecture: Building dungeons from the ground up can take up far more time than programming a random dungeon generator, and locations become boring if they look identical game after game.
* Chaos are on the receiving and giving end as well. A vast majority consists of Imperial traitors or descendants of such separatists so the Imperium already despises them even without the whole selling out your soul to Dark Gods that want to rule everything and makes you into various forms of psychopaths or obsessive lunatic that is a parody of your former self thing. The Lost and the Damned in turn consider every war to be a guilt free extermination war, after all, the Dark Gods care not for such petty concepts like basic decency or reason.
* Chaos Attack pleased when he reveals his gender. So they choose to have him pay them back for saving his life by having him be their manager.
* Chaos avert this in that they are constantly coming up with new stuff or, rather, are prepared to let their
* Chaos Bleeds; an odd example, as the Scoobies are technically working for him, as Ethan chose them to be his competitors in a contest he challenged The First Evil to. Ethan will become a Chaos Demon if he wins the contest.
* Chaos boss wants them fired, but as long as they do not screw up in a major way, their everyday misdeeds will go unpunished.
* Chaos Campus: Sorority Girls vs. Zombies with two slashers named Kurtis Kasey the Body Snatcher and Mikhail the Meat Man.
* Chaos Card Captor Sakura: In the second chapter, Sakura and Kero are trapped in a inverse Lotus Eater Machine in the form of the Nightmare Card, which plays out

extreme forms of Sakura's insecurities and feeds off of them.
* Chaos champions who are favored by their gods and don't lose their minds to the constant mutations are sometimes transformed into Daemon Princes. They go and live in the
* Chaos Chanpuru play this trope more straight than the above examples.
* Chaos;Child who can also sense the emotions and feelings of people she interacts with, and is able to tell how they feel about her at any time, which makes her very uncomfortable and she struggles to form any genuine connections with people as a result of this.
* Chaos Chosen in general fit fairly well with this trope and have the advantage of
* Chaos Chronicles isometric, party-based, tactical turn-based RPG on a hex grid.
* Chaos Code food and a microwave oven appears before him. Enraged, he flips it at the opponent.
* Chaos Code in 2017. Lin attempted to keep up development, but it ultimately proved to be too big of an undertaking both for him and for FKD as a whole.
* Chaos Code in his stead until February 2020 (only a month after the game was announced to the public) when FK Digital announced that the game was cancelled.
* Chaos comes in four main flavors. You have your standard daemons, entities formed from the aforementioned thoughts and emotions of mortals who are usually aligned with one of the main four
* Chaos! Comics’’ whose hosts were Mister Mischief and Pyschotica.
* Chaos! Comics. After that event established a multiverse for Chaos!, there was supposed to be a title using established characters in a world after the Zombie Apocalypse, but Chaos! went under before it saw print.
* Chaos Cult causes balefire to engulf his enemies, inflicting damage equal to auto or las weaponry.
* Chaos Cultists, because they're the most numerous faction of the biggest evil in the galaxy. Within that group, you're more likely to see Khorne cultists than any of the others simply because they don't usually have a plan more complex than "kill things" so they're easy to write.
* Chaos Cultists tend to view the mutations and horrible deformities as blessings. There does exist for every follower of chaos a very small chance of getting immortality by being promoted to a demonic demi-god. Most of them die or go insane way before ever getting close, but as with the D&D example above, most don't look at the likelihood of death or spawnhood and think "hey, that could be me"; they're convinced that they will be among those lucky enough to ascend to daemonhood.
* Chaos cults have little problem sparking wars between different countries (who are already at war with each other more often than not). The in-universe Crusades were started by a Tzeentchian daemon manipulating the Sultan of Araby into declaring war on the Empire.
* Chaos cults of all people get their start like this: organizations that genuinely try to achieve some kind of social reform are either infiltrated by Chaos agents or start getting more desperate to achieve results.
* Chaos damage he's based on, and his damage isn't so high that he can't be held in melee while ranged units peck away at him.
* Chaos, Dark Elves/Eldar, and Orcs/Orks love wearing the heads and skulls of their worthiest opponents impaled on their
* Chaos Diamonds 1 because there are three Chaos Diamonds in the story.
* C.H.A.O.S Director Higgins is this to the ODS team and his goal is to have the ODS team disbanded. His obstruction can result in someone dying or a dangerous criminal or terrorist getting away. However, his actions are often justified by the fact that acting on unconfirmed intelligence from dubious sources can result in the deaths of innocents and a PR nightmare for the CIA. Once he approves a mission he will give it his full support and do everything he can to keep his agents safe.
* Chaos does not qualify, even if it seems like it should. Chaos is essentially the twisted mirror image of the Imperium and shares the same
* Chaos Dreadnoughts are even worse: They work on the same principle as Loyalist

Dreadnoughts (armed and armored life-support tanks for Space Marines), but where the Loyalists use them to preserve their most experienced veterans and let them sleep for centuries between battles, CSMs use it as
* Chaos Dreadnoughts fall deep into this category. Dreadnoughts are a combination
* Chaos Dreadnoughts. Where the Space Marine Dreadnought is the greatest honor a Chapter can bestow on one of their own too grievously wounded to return to active service (instead being interred in a mobile sarcophagus armed with huge weapons to fight ever more), being put in a Dreadnought is one of the worst fates possible to the forces of Chaos. And for a very simple reason: Loyalist Dreadnoughts are put into artificial sleep during the centuries between their activations, Chaos Dreadnoughts get their weapons and legs removed, get strapped to the wall of a starship, and
* Chaos Dwarfs also have disposable slave troops, mostly Hobgoblins but other Goblinoid races as well, while they couldn't fire into combat they did have a large amount of area of effect weaponry that was fairly indiscriminate, also in past iterations they had a magic item that caused Hobgoblin heroes to explode...
* Chaos dwarfs lords and sorcerers ride upon great tauruses — red-skinned, fire-breathing bulls with dragon wings — and lammasu — much like the former, but black-skinned and with the heads of ugly, horned dwarfs — both of which are supposed to descend from ancient chaos dwarfs whose taurine mutations got really out of hand.
* Chaos Emeralds held within a space station, and said cannon can end the world when at full power.
* Chaos energy caused by spreading through contact, and the crazy effects on the sky. Standing on such ground and not going crazy requires considerable mental fortitude.
* Chaos ensues when the Knights attempt to use snack foods instead of miniatures when enacting large scale battles in
* Chaos exists. Latter editions redefined this to being too trusting of the Ethereal Caste's teachings, with the Ethereals themselves intentionally hiding unpleasant truths, that they're completely not prepared to face some of the threats out there or seeing some of their side's own questionable actions and hypocrisy.
* Chaos Faction, Vortigon, returning, but it too focused much more on the actual combat, other than the stage-specific scenarios.
* Chaos Fighters are science fiction with significant fantasy style battles.
* Chaos Fighters, a serial novel series with extreme amounts of fighting scenes.
* Chaos Fighters due to every new installment contains entirely new characters, save for a few recurring characters.
* Chaos Fighters is exactly the same with what he wrote a year before.
* Chaos Fighters is the nickname of Rakion Kalsa, Malay speakers can tell that this novel revolves around mercury.
* Chaos Fighters it becomes a plot point when the hollows are made from chemicals, causing environmental damage.
* Chaos Fighters. They are all as capable of fighting as other characters.
* Chaos Fighters when Etlis used a pyro attack on her, but the final blow that defeated her is a hydro attack on her which put out the flames just in time.
* Chaos Fighters which refers to potassium (kalium as of IUPAC official name) iodide which declared as being in MIA status.
* Chaos followers themselves can be broadly split up into the Norsca (Vikings), Kurgans (Scythians), and Hung (Mongols), with the Norsca getting the most attention.
* Chaos forces, especially the Heretic Astartes, use chain weapons for essentially the same reasons, although theirs are usually much nastier in form and function.
* Chaos forces have daemonically possessed/traitorous versions of all the above, sporting screaming mouths the size of houses and bladed tentacles the size of trains.
* Chaos forces, similarly, like to apply the eight-pointed star of Chaos and the icons of the Dark Gods wherever they can, and also use skulls often. And the Chaos symbols are partially weaponized, since looking at them

* Chaos" for the last ten thousand years. Luckily, nobody minds, as his men are just as psychotic as he is.
* Chaos God, a god of the Eldar Dead, Ynnead, which will presumably be a good guy and kill the other Chaos God they created, Slaanesh. To do so they'll need millions if not billions of the souls that power the Eldar Wraith machines — and while in the wraith machines the souls are trapped inside crystals that are very fragile. In addition, while inside the Wraith machines the Eldar are basically being kept away from their afterlife AND are trapped in a half-awake hell. There's a reason the Eldar are loath to use them.
* Chaos God. Bloated, rotting, contagion-spewing shambling corpses, they just want to give you a biiiig hug so that you too can know the joy of being blessed by the Lord of Decay. Papa Nurgle loves you~
* Chaos god of desire, and thus is the most desirable to whomever views it.
* Chaos god of desire, excess, decadence, beauty, pleasure, love, lust, and this trope. Its lesser demons, Daemonettes, exemplify this trope and all its servants eventually become this through the "blessings" of Chaos mutations.
* Chaos Gods and daemons Which is when the Commissar ability "It's for Your Own Good!" comes into play....
* Chaos Gods had consumed so many elf souls they could no longer move (and to add insult to injury, the souls were set free soon after).
* Chaos Gods magic of the Sister Gods is less effective than normal on him because he doesn't truly consider Jannina to be his proper name.
* Chaos Gods series, a ritual called a Binding allows two people to share their souls and energies. This allows each to draw upon the strengths of the other; but it also means that if one dies, so will the other. Several important characters are Bound, including Ki's parents and De's parents.
* Chaos Gods series, Ki normally uses magic provided by her god, Tavk. If Tavk chooses to withhold his power from her, she can cast spells using her own energy; but doing so consumes her own flesh as fuel.
* Chaos Gods series, Rising Chaos intends to destroy everything — all humans, all demons, the Four Realms themselves, and even his fellow gods. His goal is a completely empty, eternally unchanging world where nothing exists but himself.
* Chaos Gods series, when the demonic energy tainting Ki's body rises to the surface, her skin becomes covered in black lines.
* Chaos Gods. Thus they became Fallen Heroes to take the action a Right Hero should do.
* Chaos Gods, when De discovers that people are being abducted en-masse and transported to the Sister Lands to be used as living batteries to power the magic of the Blessed.
* Chaos has various Daemon engines which are usually clanky mechanical creations that have a daemon implanted inside to power and control the constructed husk.
* Chaos;Head all with a mysterious connection to a series of murders going on in Shibuya. This makes it extremely hard to tell where the events of the series lie on the line between paranoid hallucination and supernatural strangeness — if there is in fact any separation between the two at all.
* Chaos;Head antics but is portrayed as much more confident in his ambitions, att least until the plot rears its head.
* Chaos;Head, a young girl, that is forced to hear the thoughts of people in her general vicinity without any control over it and is unable to shut them out, which makes her go crazy to a fair degree mentally.
* Chaos;Head could be considered a master of illusion; his illusions mostly affect himself, but given that half the time he doesn't know if it's reality or not...
* Chaos;Head goes through this. He hallucinates, thinking that there were enemies blocking his path, which makes the trek through the subway scarier. The music doesn't help to alleviate the suspense.
* Chaos;Head right hand gets cut off and then sent to the main character, as a way to intimidate him.
* Chaos;Head visual novel and anime, on the other hand, are regarded as high-tier science fiction.

* Chaos. He gets upset about his followers misinterpreting his teaching and committing atrocities for the sake of chaos or for selfish reasons.
* Chaos himself uses it: "Who do you think you are boy, the Light Warriors? Don't make me laugh, although you ARE glorious. How do you get your hair to match your armor so well? I bet your manicurist has a DOZEN stories to tell!"
* Chaos is also the true evil in the anime as well. In the manga, it is also the true power behind every other major villain in the series. The Sailor Senshi exist to fight it, and will likely be fighting it for eternity.
* Chaos is sending out stronger and deadlier incursions from their alternate universe than ever before — and all it takes is
* Chaos is the villainous variant who's willing to kill to get what he wants.
* Chaosium also published a series of adventures based on the setting during the same time period.
* Chaosium among others, the Katana does the same amount of damage as a bastard sword but it has a higher "base" value, meaning that people who train in the use of a Katana start out with a higher chance to hit — and it can be used one handed by weaker and less dexterous fighters, as well!
* Chaosium can get inside the troll tunnels by finding one of the airholes that the trolls use as a ventilation system.
* Chaosium game is based on the stories of King Arthur and his Knights of the Round Table.
* Chaosium Role-Playing Game. With most of its focus on the Ringworld itself and less on the rest of Niven's "Known Space", it did had a small problem...
* Chaosium supplement describes Scarlet Stalkers, which capture human beings and insert eggs into their bodies. The eggs keep the humans paralyzed until the eggs hatch and the young eat their way out of the body.
* Chaosium tabletop RPG). As of this writing, the banner ad for "Lovecraft Country Online" shows two squid-like monstrosities levitating through the night sky, with the caption "Pretend that nothing is wrong."
* Chaosium. The Daughter of Kali can only cross running water at night.
* Chaosium. These are quite complex and play a very important role in the game, much more so than in most other RPGs.
* Chaosium type games or a practical decision due to the investigators' need for money to carry on their work.
* Chaosium Volume III. The Dread is an intangible undead falcon that can fly through solid objects.
* CHAOS: largely found both their best and worst years in this decade.
* Chaos Legion had its mechanics changed (e.g. enemies can be either organic or metallic, and can take more damage some Legions while resisting others), nerfed Sieg's damage output and resistance to enemy attacks, and making some enemies more aggressive, effectively making the game harder than the original Japanese version after receiving criticism for the underused Legion system and Sieg being considered too powerful from the outset. New enemy types, altered enemy placements, and inflated EXP requirements for the Legion's abilities were also present in the international versions.
* Chaos Legion is an obscure enough Hack-and-Slasher by itself, but is apparent based on an even more obscure series of light novels.
* Chaos Legion: Sieg has the power to summon Legions, powerful demons that are big as life and twice as nasty. When summoned the Legion usually forms a protective ring around Sieg, attacking of their own accord (Active Mode) or waiting for the player's input (Passive Mode). Sieg cannot run when the Legion's out, but they're a big help when surrounded by lots of enemies (which is most of the time). They can gain experience points and determine what kind of stat boosts and skills Sieg can acquire from them.
* Chaos likes to do this, doesn't it? At least Purge made occasional truces with other Chaos Forces (Vraks, anyone?). Sons of Malice is a Renegade Space Marine chapter that worships minor Chaos God Malice. He represents the aspects of Chaos fighting Chaos, meaning that his followers will attack any Chaos force on sight. They also attack any non-Chaos force on sight, but its kind of normal for Chaos.

* Chaos), living avatars of a war god present as figures of molten iron carrying a giant sword and an ever-bleeding hand, and what can only be described as divine magic to the point of one of their heroines self-resurrecting and having a few beings tantamount to angels.
* Chaos Lords gain their position through sheer power and favor from the Gods. The latter is gained by the Chaos Lord's quality in the former. Kharn the Betrayer, for example, is the greatest of all Khorne's Champions due to his
* Chaos Magic and Technoshamanism believe that this is essentially true.
* Chaos mini-event. In an author's note. For a completely separate out-of-continuity series.
* Chaos, not being left out of the fun, comes in with the Forgefiend Daemonengine. Mounting not one, but TWO Hades Autocannons, this freak of un-nature can fire eight autocannon shots per turn. That's eight heavy caliber armor piercing shots in the same time as the aforementioned assault rifle fires two shots. If that's not enough to utterly flatten whatever it's looking at, you can opt to trade it's cannons
* Chaos Number 39: Kibou'ou Hope Ray V subverts it. His armor and swords are black/dark purple and red/dark magenta (depending on how you look it), making him look sinister. Given that this form is the Barian version of Hope's Chaos forms, the sinister-looking colors are invoked to make the connection to the Barians more obvious.
* Chaos of the Bells: When "Carol of the Bells" is used as a soundtrack to underscore suspense, action, and/or dread.
* Chaos on Deponia, the main character can hear the background music from where they are (presumably there is a local orchestra) and you actually have to mute the music from the options to pass a puzzle (The music is catchy and therefore makes him forget what he was thinking.)
* Chaos on Deponia, which Rufus then uses to make a wax mold of his face.
* Chaos on the Bridge's vision for the future, you should be locked up somewhere. It's wacky doodle, but it's his wacky doodle.”
* Chaos outright dwarfs any of the playable characters, except for Feral Chaos in the sequel, with even Goblez and the two characters around his size, Exdeath and Garland, being around foot shorter than him.
* Chaos Overlord had a (relatively) realistic rendition of this — basically, if you caused too much Chaos in any given city square, it would cause The Law to descend on that area, reverting the area control to 'Neutral', and utterly destroying any units there. Not because of endless hordes, but because they ride around in squad cars armed and armored like tanks. Even the toughest units available to you are still infantry and don't stand a chance against The Law's armored vehicles.
* Chaos prosthetics tend to be spikier and more weaponized. The Obliterators are former Mechanicus troops who found themselves melding with their prosthetics, to the point where they now function as a living
* Chaos Rings being one of the most bizarre. The games explain it as these monsters, called congloms, are created by from the DNA of terrestrial animals, but that doesn't really explain why they aren't given new names.
* Chaos Rings. He has dark skin but blue or grey eyes and has white hair.
* Chaos Rings II does this. After defeating Necron, the credits roll and you unlock the ability to replay past chapters taking different routes, but it also turns out there's more story if you keep going on the route you've already taken. Play through that and you'll learn who the real villain has been the whole time and get another credit roll. Players can sense it coming, both from the story and from the fact the main character doesn't unlock his 3rd and final ultimate attack prior to defeating Necron.
* Chaos Rings II, is clearly based on the Grim Reaper. He has a long, tattered robe, is vaguely skeletal underneath it, and has a scythe-like weapon which has a bird's head, the bill forming the blade of the scythe.
* Chaos Rings III, the four Purple Gifts that can be found over the course of the game can be used to create items that allow the characters to summon the Zodiac Arms: powerful robots located inside satellites orbiting Marble Blue. However, they

can only be used once a day in real time, limiting their usefulness. Furthermore, said Gifts can instead be fused together to create a powerful light-elemental Gene.
* Chaos Rings III, Theia was unable to leave Marble Blue's orbit. Unable to fulfill its original purpose of finding a new home for the humans onboard, Theia instead became that home. Chancellor Steiner reveals that they lost contact with the rest of the fleet a long time ago. For all she or anyone else knows, the people of Theia are all that remains of humanity.
* Chaos Rings III Unable to carry out its original purpose of finding a new home for humans, Theia was repurposed to be that home.
* Chaos Rings, it's not hard to guess what this collection consists of.
* Chaos Rising, adding a single new faction, a single new campaign (not even for the titular Chaos Marines, but rather about the same group of Blood Ravens struggling against Chaos), and requiring the base game to be installed.
* Chaos Rising hero Librarian (mage) is introduced in a hurling storm of Warp energy that obliterates several squads of Eldar. Then he spends the rest of the mission (and most of the others) lying around beaten waiting for the others to revive him only to collapse immediately after.
* Chaos Rising moved away completely from the trope, however, as every character except The Ancient speaks and this is due to a vow of silence he made.
* Chaos rituals almost invariably call for a human, or at least sapient alien, sacrifice at some point.
* Chaos screws with your controls in a subtle way - you move the distance you clicked, but not the direction. It's often impossible to tell when it first hits if it's the status effect or just plain lag, especially when making a very small movement.
* Chaos Shogun Kitsune, the fourth Chaos Lord, is confident that the hero will have no idea how to deal with illusion, trickery and lies. Naturally, in the final cutscene of the Yokai Island storyline, he receives a big shock when, while he's running around invisible leaving the hero trying to figure out how to defeat what he/she can't even see and rapidly swinging the Hanzamune Dragon Koi Blade around trying to hit him, the hero accidentally tears open a rift leading to the Yokai world in front of him. Unable to stop in time, Kitsune screams, "No! Not like this! It can't end like this! I won't go back to the Yokai world!", lets out a
* Chaos Sorcerers Lufgt Huron; though neither a sorcerer nor a psyker, he was granted the Hamadrya, a small daemonic familiar which casts psychic powers on his behalf.
* Chaos Space Marine chapters and warbands fit. Most notable is the Word Bearers legion, who are arguably the ones ultimately responsible for the state the galaxy is in, who were the first Crusaders of Chaos, opened the way to Chaos worship for every other Imperial faction, and of course remain its most fanatical followers. Ironically, the Word Bearers turned to Chaos because the Emperor rejected their worship of him, culminating in him sending the Ultramarines to demolish the cathedral city the Word Bearers built in his name and forcing them to kneel before him in subjugation. The sting and humiliation of rejection coupled with their need to worship a higher power led them to Chaos.
* Chaos Space Marines are a villainous example of this trope; every Chaos Marine strives for recognition and glory in the eyes of the Chaos Gods, because when you serve Chaos, you either
* Chaos Space Marines for the centuries between activations. Chaos dreadnoughts are kept awake and unable to die.
* Chaos Space Marines frequently raid their loyalist counterparts for gene-seed, as their own have been mutated beyond recovery by the Warp. How this is done tends to differ depending on the writer; either the Chaos Marines harvest the corpses of everyone on the battlefield, or they will make a raid on one of the genetic labs found on a Chapter Homeworld or a Forge World tasked with storage of gene-seed tithes.
* Chaos Space Marines have Cultists, dirt cheap troops of similar stats and equipment to Imperial Guard Conscripts, meant to be disposable bodies and "hiding spots" for the elite marines and special characters. The Alpha Legion is uniquely

the only Chaos legion which actually bothers to train their cultists and rely on them for something other than catching bullets,
* Chaos Space Marines have similar bipedal Mecha monsters that were formerly entirely mechanical. They have mechanical dinosaurs with
* Chaos Space Marines have their own dreadnoughts, the Ferrum Infernus, but are in worse shape as the means to make more, let alone repair the ones they have, have been long gone. That doesn't mean there isn't new ones as many Space Marines make parasitic sarcophagi to twist and torture the marine inside until he is rendered completely insane and turn into a Helbrute, a hideous mix of metal and flesh. For Marines who worship Slaanesh they have the Sonic Dreadnought variants of the Ferrum Infernus which gives them immense firepower but robs them of
* Chaos Space Marine Sorcerers are probably the truest example, since they combine the military training of a Space Marine (albeit a renegade one) with psyker abilities and a generous dose of quite literal
* Chaos Space Marines over 10,000 years old (although Kharn and fellow Champion of Chaos Lucius the Eternal have both been known to be killed and brought back by their patron).
* Chaos Space Marines until they're deemed worthy of fighting again. Is it any wonder they have a special rule that makes them fire on their own side sometimes?
* Chaos Space Marines, what with being devoted to various horrifying gods, are even
* Chaos Squad, children as young as eight are shown serving as defense forces to protect Earth following the first half of an alien war.
* Chaos. Then again, they spend most of their lives in a hell-dimension where the laws of physics are the playthings of crazy gods.
* Chaos Theory, a cop gets blown up just as a fishy smell hits the air. In the usual subversion, he is not actually that dead in the end...
* Chaos Theory and you're free to power through. There are still occasional missions where being spotted causes a game over, but there's always a mission-specific reason for it.
* Chaos Theory built into his robot arm after a weapons malfunction caused him to lose the original left one.
* Chaos Theory, doing things around mooks like whistling in the dark, destroying lights, knocking their comrades out/killing them and leaving the bodies for them to find and throwing cans and bottles around gradually builds the enemy's fear to the point where they fire blindly at where they last heard the noise or run away screaming. The interrogations also generally have Sam using threats of bodily harm to scare mooks into giving up information.
* "Chaos Theory", had a similar storyline: As the episode progressed, every possible suspect was eliminated by the CSI's own investigations. Somewhere around the 43 minute mark, someone finally proposes that maybe the "murder victim" was "victim" only of a horrible series of coincidental accidents that led to her death. This turns out to be true, but her parents can't accept that their daughter died from nothing but a series of random events. It's implied as the episode ends that they'll never give up trying to find a culprit.
* Chaos Theory, there is a competition to see who has the best name for their penis. Two of the names are "Master of the Universe, Defender of our Galaxy" and "Truth".
* Chaos Theory: True Assassin, on behalf of Zouken, tells Sakura to return to the Matou house and implies that if she refuses, harm will come to Taiga and the archery club members.
* Chaos there's no denying that he's one of the most ruthless and hilarious characters in the series.
* Chaos, though the change was so last minute that both films are still extremely similar.
* Chaos Timeline also has them. Except that everyone calls them Socialists. They take over Britain in the mid 19th century and spread over all of Western Europe.
* Chaos Timeline Atlantis, and sometimes China, France and Russia. And even New Albion (New Zealand).

* Chaos Timeline" but found out that German neo-Nazis use this term already for the existing internet, so he changed it to "Weltsystem".
* Chaos Timeline etc. Justified, since history diverged in 1200 and people could well invent different names for things.
* Chaos Timeline has a Sir Winston of Marlborough fighting the Socialists who's quite similar to him.
* Chaos Timeline has its own version, with the Socialists governing western Europe and the Red Pirates terrorizing the seas.
* Chaos Timeline has one, appropriately at the end of the story. It doesn't last long (less than one day, in fact), but afterwards, the world will never be again as it was before.
* Chaos Timeline has Prince Alasdair, later king Alexander of Scotland, Ireland, Scandinavia, and (shortly) elected king of Poland and Holy Roman Emperor. Later inspires this world's most famous modern fantasy epos.
* Chaos Timeline has the New Roman Empire, the Russias and the German technocracy. However, the trope is mostly avoided by introducing "Chaos" - wide areas of the world, esp. in Africa, where the governments change every few months and the borders every few years.
* Chaos Timeline has the Sixtine Calendar (actually a subversion, since it's identical to the Gregorian), and ends up using 100 seconds per minute.
* Chaos Timeline has various. Spaniards against Republican France, Germans against Russians and Italians, (again) various against the Socialists.
* Chaos Timeline (of course, only towards the end, since it starts in 1200).
* Chaos Timeline: Some fan suggested that the head of the Socialist part of Germany should have the title "Oberster Politischer Kommissar", which became canonical.
* Chaos Timeline, the fighting down there does not end until eighty years later.
* Chaos Timeline... well, since this is a realistic (hi)story, it's a question of your POV. The New Roman Empire, the German Technocracy and others might all qualify.
* Chaos Timeline with national precursor systems akin to ARPANET established up to half a century earlier.
* Chaos Titan is once depicted with a necklace of skulls. Providing how humongous the thing is you could guess how many skulls that would take.
* Chaos tricked half the Dark Angels into turning against the other and the battle they waged destroyed their home planet. While some of the Fallen continue their war against the Imperium, some have realised their mistake and are now on the run.
* Chaos Walking (2021) Todd and Viola are both around thirteen, while here they're in their late teens.
* Chaos Walking series, the trope is attempted but failed by the first settlers. They get rid of most of their technology but absolutely fail the peaceful part.
* Chaos War’s human alter ego, Donald Blake, merges with his love interest Becca Steinhardt to become Thor once again.
* Chaos War #3, while under the influence of Venus's magic song, Amadeus admits to Thor that he loves him. Thor says he loves him too, and then says not to speak of it ever again.
* Chaos War burns out out of his godly powers and for the first time in his long, long life fully mortal without any god or demigod powers. He is so "weak" that he has to leave Olympus since he cannot survive around the other superpowerful gods. Of course "weak" is relative. He is still an extremely muscular man in top physical condition with centuries of combat training and experience. So he goes on to fight street level threats. He also steals some magical weapons from Olympus to help him fight more powerful foes.
* Chaos was invading the world, wrecking havoc and ruin all over the place, in battles that players could play out and send the results of to Games Workshop, and those results would influence the narrative. What actually happened was that the Chaos factions horribly lost almost every single battle, being stopped at the first village in the mortal nations for several real-life weeks. So the writers of the events decided that Chaos had won anyway and would continue their invasion, and this kept happening until it reached its narrative conclusion (Chaos almost

destroyed everything and was barely defeated)
* Chaos. What you get is the creepiest Moe character in the series who wants to share her "love" with everyone.
* Chaos. Who he turns into. resulting in wielding four bows, each with three arrows apiece loaded.
* Chaos, who produced Gaia, Tartarus (Hell), Eros (Love), Nyx (Night) and Erebus (Darkness) without help from a partner—though given that Chaos was the only entity in existence at the time, they didn't exactly have a lot of options.
* Chaos worshippers like building altars out of them or wearing them on trophy racks, while the Imperium has flying skull-robots and buildings with skulls of the dead in shrines on the walls.
* Chaos worshippers who win the Gods' favours and turn into Daemon Princes are, according to the fluff, pretty damn powerful in and of themselves, but are still not gods.
* Chao takes every opportunity to let the group know she's a "Martian" but doesn't clarify whether that means alien or just human living on Mars (she's also from the future), which got more complicated after it was revealed
* Chaotic, "Allmagedon", a creature uses an attack to defeat an army of underworlders, at the expense of all he was trying to protect.
* Chaotica's Death Ray does prove deadly to other-dimensional photonic beings who assume the holodeck is a real world (they've never heard of biological life).
* Chaotic, before a match (and after every battle) begins, players assemble their battle teams via a holographic console. Logical considering Chaotic is a VR simulation. Interestingly, it averts the two way translucency by not letting opponents see each other's card selections. From one side, you get creatures, mugics, and locations, but from the other it looks like a floating plexiglass pane.
* Chaotic episode where Kaz and Peyton try to prove that he is the best chaotic player to the other one. There is a scene where Kaz goes into Ulmar's lab to scan a weapon for their battle. He bumps a cart with the door causing Ulmar to say this before throwing a fireball in Kaz's direction.
* Chaotic Evil and deeply contemptuous of afflicted werewolves, other lycanthropes and non-lycanthropic humanoids, viewing the first two groups as their lessers and the third as prey. They however get along fairly well with winter wolves, a breed of giant, intelligent, evil wolves capable of speech. They usually worship Jezelda, the demon lord of werwolves and the moon. Natural werewolves cannot be turned into non-werewolf humanoids by any means short of magic capable of outright changing a being's species.
* Chaotic Evil and leaves the pantheon to become a greater deity in his own right).
* Chaotic Evil and ruling the Nightosphere with a curse amulet and she forgives him pretty easily.
* Chaotic Evil as they won't want to give their blessing to someone actively working against their tenants or goals.
* Chaotic Evil by the authors with terms like "rotting" or "decaying" and spending more of its forces fighting futile battles to suppress internal dissent and political upheaval than against fighting the very real alien invaders, it's kind of hard to argue that maybe it would be best for the setting if it was quietly killed off and something new allowed to evolve in the ruins.
* Chaotic Evil. Chaotic Evil is the evil of madness and oblivion, the kind of evil that wants to just destroy everything for no other reason than because it can.
* Chaotic Evil even by beholder standards, so it's not like she'll be mobilizing the kids any time soon.
* Chaotic Evil god of frost giants, who is named for an actual frost giant from a Norse myth.
* Chaotic Evil god of war. His only sympathetic trait is that unlike most of the other major gods, he isn't a hypocrite at all, being completely honest about what he wants and what he believes, and actually does it always.
* Chaotic Evil has always been the "Kill, Crush, Burn" evil alignment, as opposed to "Whatever benefits me" of the other branches of Evil.
* Chaotic Evil. In contrast, Luffy, Ace, Roger, Saul, Law, and Rouge were good and

brave people.
* Chaotic Evil — as well as anyone living close to them — usually are leery to the extreme.
* Chaotic Evil Ravagers is to sacrifice an innocent to Erythnul, the god of slaughter. This serves as a means of weeding out good-aligned infiltrators seeking to destroy the Ravagers from within.
* Chaotic Evil (though it doesn't necessarily kill you) and the battle begins. (The meeting takes place indoors incidentally.) Unless your main character actually is a priest of Talos. Hilariously, if you're wearing the cloak that reflects lightning, the ostensibly god-sent bolt bounces back and incinerates the guy you're talking to, ending the conversation prematurely and stopping the normally ensuing fight scene.
* Chaotic Evil to the core, but he's also deeply learned and an accomplished scholar, and one of the greatest sages among the dragons and the fey.
* Chaotic Evil was retconned into in 4E. Which is a common misinterpretation of what the term actually means.
* Chaotic Evil: Will do whatever they want to, especially if it hurts other people, without regard for the rules. While a Neutral Evil person would work within the system until it was convenient not to, a chaotic evil person would often work outside the system. Contrary to what some believe, Chaotic Evil does not mean the kind of wanton, meaningless slaughter and destruction. Rather, they usually consider what is practical in a particular situation.
* Chaotic Evil you go to the Abyss, an unfathomably deep series of pits and caverns boring down into the Outer Sphere itself. There the Abyss feeds on you sin to produce new demons, typically consuming the soul in the process.
* Chaotic featured a father and son who had both won the codes to transfer to Perim. Rather than focus on his own game, the father became one of these with regards to his son, constantly coaching the boy in his games and actually managing to get on even Klay's nerves. Ultimately Major Tom, challenging the father, managed to remind the older player how much fun it was to actually play the game rather than just coach.
* Chaotic Good: A character alignment which involves a hero who breaks the law to do what's right.
* Chaotic Good and fights only against evil. He's also a deity of storms.
* Chaotic Good can get in the way of doing good. Their free-spirited, easily bored nature means that if the local government isn't considered sufficiently oppressive, they might just go out and find one that is.
* Chaotic Good (even when raised by vermin), and badgers, who are the epitome of heroic warriors (with berserker tendencies).
* Chaotic Good goddess of hunters and fey creatures, has a fair bit in common with Artemis.
* Chaotic Good: Not the most law-abiding person around, but not a bad person either.
* Chaotic Good of people, but is increasingly disturbingly casual about not caring about actual, specific people he meets and even relies on.
* Chaotic has a lot of this. When traveling to the game world, characters pass through a tunnel made out of swirling letters and numbers, and when a creature loses a battle, they dissolve into exploding letters and numbers. Justified, since the code is actually a plot point (sorta).
* Chaotic. However with the current season's trips through time, the possibilities for new cat characters are there.
* Chaotic: In the first episode of the third season, The four tribes hold a race to celebrate their victory over the M'arrillians and peace between the tribes. A riot erupts due to all of the tribes cheating in the race and disagreeing about who won, wrecking the peace treaty. The humans characters, who are partially to blame for this due to getting involved in the race, act like this is a good thing because the world of Perim will always be chaotic.
* Chaotic. Kaor's plan to steal Maxxor's new battle gear is one of the first things the audience learns in the episode. It goes off without a hitch.

* Chaotic Neutral and cares nothing for the causes that people fight for; as long as there is war, Gorum will be there to aid the good and the evil alike. He is chiefly concerned with the physical aspects of battle, and is worshipped by frontline soldiers in particular.
* Chaotic Neutral can be callous, self-serving, greedy, and foolish. But he's still one sharp looking cat, pun fully intended.
* Chaotic Neutral in the first three editions, generally respects the rules of war and firmly believes that war for its own sake is pointless; the only thing that gives it meaning is the peace that follows.
* Chaotic Neutral led him to commit what is possibly his only act of true empathy (not including the times he was magically influenced to feel empathy).
* Chaotic Neutral situation. The main difference between Chaotic Neutral and Chaotic Evil is a matter of execution.
* Chaotic Neutral than true evil. Her followers are generally depicted as smart and possessed of personal honor.
* Chaotic Stupid: A dumb character who lacks any rhyme or reason to their actions.
* Chaotic Stupid: Being so devoted to anarchy & nonsense kills common sense.
* Chaotic Stupid: Deprived of common sense and abidance to any code of conduct.
* Chaotic Stupid, leading to spontaneous and erratic behavior, which alienates potential allies and makes her a highly unpredictable force in the ongoing conflict.
* Chaotic, the Doors of the Deepmines, that act as the M'arillians' prison requires four keys held by the other four tribes to open.
* Chaotic, the Liquilizer is capable of refilling itself with just the water in the air.
* Chaotic. Though they start off as independent jerks hated by everyone around them, they quickly meet and become friends due to their equally horrid personalities, underhanded behavior and bullying ways, as well as sharing an intense hatred for the main characters. They never display any romantic attraction to one another, being simply two jerks who enjoy hanging out together because they can do twice the damage and cause twice the grief to other people.
* Chaotic through a trading card game. Then this trope is subverted when Chaotic turns out to be real.
* Chaotic VR-style game is based on. There, they can scan the characters and their abilities, items, and even locations, and all can be used for the game.
* Chaotic your founder" with Kiru, the greatest Overworld hero (even got a beautiful city named after him)and the ancestor to Chaor, currently one of the Overworld's greatest enemies.
* Chaotrix, we get some glimpses of everyone's class lists. Without exception, every single student is registered for the class "Reading and Writing 1".
* Chapayev, a popular ex-USSR board game based on checkers, which can have dozens of spoken/unspoken rulesets and houserules... yet basically goes down to "flick your pieces everywhere until you win somehow". One of the common things among casual Russian players is to turn a round of checkers into chapayev mid-game whenever they get too bored to finish the game the right way.
* Chapel counts because she's a drug dealer who rarely wins, but usually, of course, survives. So far.
* Chapel was replaced by a similar character named Jessica Priest in
* Chap-hop is made of this, blending modern urban American hip-hop with sophisticated British culture. Mr. B the Gentleman Rhymer has
* Chaplin stated that he couldn't have made the film if he had known about the true extent of the horrors of the Nazi concentration camps at the time. Most Jews would be glad that he didn't.
* Chapman again played an Chinese stereotype in the "Cycling Tour" episode, who had difficulty pronouncing
* Chapman seemed to be fond of portraying the Chinese stereotype, as in the School Prize-Giving sketch where he portrayed a Chinese Maoist impersonating the Bishop of East Anglia and awarding the prizes to "Peopre's Repubric of China!"
* Chapo Trap House is known for its constant vitriol towards the (perceived)

racist, sexist, classist, imperialist attitudes that animate American politics in general.
* Chapo Trap House) seemed to rely on this stereotype rather than the usual right-wing methods of smearing him as a nefarious lefty demagogue.
* Chapo Trap House. The first campaign is the (Republican) Pizzagate conspiracy theory; the second is based on Eric Garland's (Democrat) "game theory" conspiracy theory.
* Chapo Trap House to make sense of it, making it seem like a weird detail.
* Chappaquiddick: 2017 film about the Chappaquiddick incident in 1969.
* Chappaquidick incident by the infamous law firm of "Winer, Diner, Dicker and Dunker".
* Chappelle's Show about monsters who happen to be African-American (or African-Americans who happen to be monsters), it's unclear whether the mummy is unable to hail a cab because he's a mummy or because he's black. This makes him late for his appointment with his parole officer.
* Chappelle's Show, after Tiger Woods — who is a quarter black, a quarter white, and half Asian (specifically a quarter Thai and a quarter Chinese) — has been drafted by the black delegation and is now officially 100% black, the commentator played by Dave says the following:
* Chappelle's Show analogue) expounding on the evils of materialism and the pointlessness of working to improve your life.
* Chappelle's Show, and a lot of Chappelle's jokes in general. He uses this to great effect and may have lead to a recent upswing in the use of this trope.
* Chappelle's Show) and some people regard it as one of the greatest sketch comedies ever made.
* Chappelle's Show, and thus no longer has the ultra-squeaky clean and wholesome image he used to.
* Chappelle's Show as an over-the-top, violent and vulgar comedian out to steal the title character's show — a complete opposite of what Wayne Brady is like in real life, and a result of one of Paul Mooney's characters saying, "White people love Wayne Brady, because he makes Bryant Gumbel look like Malcolm X."
* Chappelle's Show: A Season 2 episode features a sketch where Dave, restless because of a big meeting the next day, is offered a sleep aid called Ribs.
* Chappelle's Show, a woman enters an elevator full of horny middle-aged men. They don't say anything to her, but she knows exactly what's on their mind (and almost every lewd detail within, since she can read their thoughts). She manages to get away from the situation when the elevator arrives at her floor when a young boy in the elevator thinks to himself, "I'd put a hurtin' on that bitch!"
* Chappelle's Show before being moved down to a TV-14. It still retains the TV-MA rating on most streaming services, however.
* Chappelle's Show, but a whole year after the original British version.)
* Chappelle's Show, Charlie Murphy remarks how Mickey Free, a member of Prince's crew, looked like a girl.
* Chappelle's Show: Dave Chappelle explains that since semen is also a tool used by police to frame the black guy while doing their jobs, they might check that instead.
* Chappelle's Show, Dave Chappelle is getting a haircut when the TV in the barber shop reports that he just signed a contract for his show paying him millions of dollars. Cut to everyone at the barber shop looking at him and the barber announcing that the bill for the haircut is $11,000.
* Chappelle's Show did this straight on occasion, one particular skit parodied the concept, with Dave telling his White Dude, Black Dude comedy routine through interpretive poetry:
* Chappelle's Show does this when the song "Get Low" plays on the radio, since it contains the word "skeet".
* Chappelle's Show: During the Mad Real World sketch, when Chad is trying to get a good night's rest because he has to work in the morning while all the other housemates are up partying loudly. He finally reaches his breaking point and goes downstairs, launching into a furious tirade at the others.

* Chappelle's Show had a sketch where Dave visits the Internet as a physical place, represented as basically a gigantic shopping mall. He almost immediately gets accosted by a shady guy who tries to sell him a penis-enlargement drug, who uses "It's all-natural, dude!" as part of his sales pitch.
* Chappelle's Show has walked off stage due to fans endlessly repeating it during his performances.
* Chappelle's Show: In "Clayton Bigsby, White Supremacist", the camera zooms in on the titular character when he rips off his Klan hood, exposing himself as a blind black man in front of his white supremacist followers.
* Chappelle's Show in Dave Chappelle's infamous Rick James sketch, when Charlie Murphy mentions that Rick James had a "kind of aura" around him. Cue shot of James surrounded by an orange glow.
* Chappelle's Show is about a convention of haters who are hating on each other on a proffesional level and are competing for "Hater of the Year" award. It's seven minutes of nonstop trash talking.
* Chappelle's Show is a perfect example of a show people watch so they can quote it with their friends.
* Chappelle's Show. It's actually pretty hilarious, though. At one point, even a little boy is heard thinking about how hard he would hit that.
* Chappelle's Show, Mader breaks down and puts his head in his hands in tears. The reporter says, out loud, to the cameraman, "Cut", but mouths the words "Keep rolling" when Mader's not looking.
* Chappelle's Show, Mader puts his head in his hands in tears. The reporter says "Cut" to the cameraman, but mouths the words "keep rolling" since Mader's not looking.
* Chappelle's Show named Clayton Bigsby. The mistake? He doesn't know he's black, and he's a prominent white supremacist writer and KKK leader.
* Chappelle's Show on the DVD, where after several color combos and unusually specific shades, it ended in "The color of these shoes".
* Chappelle's Show skits show various reactions to this. In one instance, the stoned driver convinced the cop to smoke his weed, and then sped off.
* Chappelle's Show spoofed this by using slow motion to turn an ordinary day at the laundromat into a sexually charged romantic encounter.
* Chappelle's Show, that he did in fact grind his feet in Eddie Murphy's couch to show him up.
* Chappelle's Show the victim of prejudice, but it's not clear whether it's because he's black or because he's a mummy.
* Chappelle's Show, this happens to a KKK member out of sheer cognitive dissonance when he realizes that one of his fellow Klansmen is actually black.
* Chappelle's Show to take drugs, steals food, and murders a cop for pulling him over on a traffic violation.
* Chappelle's Show track starts out by vaguely describing events that happened long after Tupac's death to parody the theories of him still being alive. While several events in the video could be explained away, it ends with the tape observing and admonishing people in the club where it's being played, including repeatedly pointing out Dave shouldn't be there.
* Chappelle's Show, Tyrone Biggums is confronted by a group of people he had wronged and they try to force him to go into drug rehab. At this point, Tyrone goes to the bathroom to attempt an escape, but then realizes the restroom has no windows, so he flushes himself down the toilet.
* Chappelle's Show, where a woman develops the ability to read men's minds. She walks into an elevator, and one by one, every man has some sort of thought about her looks. She's relieved when an eight-year-old walks into the elevator, but then he turns out to be even worse.
* Chappelle's Show, where close-up shots of newborn Dave show his adult head. (Wider shots show an obviously fake baby... with an enormous penis.)
* Chappelle's Show where the president reveals all the nation's secrets in the shadow of impending doom. One of these is the existence of aliens who brought us technical marvels such as both Playstation 1 and 2. (3 and 4 had yet to be

released.)
* Chappelle's Show, who lies to Dave about being operated on just to avoid hanging out with him. And when that doesn't work:
* Chappers And The Captain At Andertons features Rob "Chappers" Chapman and Lee "The Captain" Anderton, talking (about guitars) at Andertons, a music shop in the United Kingdom.
* Chappe telegraph also has man-in-the-middle attacks. Also, the Clacks is a shutter-telegraph system, not a Chappe-telegraph one, and is thus rather faster than a Chappe style system would be.
* Chappie, but both are eventually mind-uploaded into robot bodies after Chappie figures out how.
* Chappie ex-Special Forces operator, who carries a gun to work and causes the worst crime spree riot that South Africa has ever seen (by shutting down the Scouts) so he can force people to accept his idea to demonstrate what his robot can do.
* Chappie has Hippo, a gang leader who demands 20 million dollars in 7 days from Ninja's gang after a failed job, and Vincent Moore, a jealous engineer who wants to do away with Deon's scouts and replace them with his MOOSE robot.
* Chappie, Hugh Jackman's character points a gun at the protagonist's head and threatens him. After realising it probably wasn't a smart move to openly threaten a coworker in the middle of a busy office, he laughs it off, claiming the gun wasn't loaded and that the whole thing was just a hilarious prank.
* Chappie; it's so overdesigned - an officer laughs when Moore mentions 'ground-to-air' engagement ability - and expensive that no police force is willing to buy them.
* Chappie, while the villain Vincent secretly uploads his virus at Tetravaal's high security area, security guards enter the room, which prompts Vincent to grab a random clipboard in hope it makes him look like official staff. The trick works.
* Chap Stewie", Stewie, tired of living in the Griffin family, goes back in time and breaks up his parents before he was conceived. Instead of no longer being born, Stewie is instead born as the son of rich British parents (He surmises that his soul was simply transferred to the next birth at that point in time).
* Chapter 10 breaks the pattern with a heart themed title, "Diastole", after the part of the process of a heartbeat when the heart expands. The cover page also displays
* Chapter 10 has Danny going to Metropolis to meet the Kents, appropriately titled "Ghost Boy Meets The Man Of Steel Part 1".
* Chapter 10 has Genji the Slicer, an enforcer of the Mundus Crime Family. Receiving little characterisation (former warrior banished for his violent actions against women and children), his purpose in the story is to show how the Good Hunter's conducts his investigation in the
* Chapter 10 is a more action-packed breather episode for the entire party and player. After the
* Chapter 10, which gives all the various characters a chance to recover from the intense action of the previous chapter.
* Chapter 11 has Black Dog recruit Anders Bleu. Like many of his peers, he is offed by the Good Hunter (by a backstab-visceral attack no less!) merely four paragraphs after his introduction. Right before his untimely demise, however, his narration characterises him as a
* Chapter 12 involves the party heading to a fractured dimension that overall seems rather happy... except
* Chapter 12, there's Nanoha's "Bruce" construct, a giant hundred-meter long green shark with whirring chainsaw teeth and insides that look like a nightmare of spinning cutting rings.
* Chapter 13 opens with a particularly savage one, as a group of hired guns are slaughtered, one by one, by
* Chapter 140 did the same thing for the announcement of the live-action movie, complete with having the same actor in the lead male role.
* chapter 14, after Sirius Black is brought out of Azkaban for a trial and

exonerated, a reporter asks him "Are you happy to be free, Lord Black?" Sirius responds "Don't you think that's quite the idiotic question?"
* Chapter 14, Clover accidentally walks in on Mandy and Brittany about to get it on.
* Chapter 14 has angst and very important plot developments, but is still much lighter than the several chapters before it.
* Chapter 14 of the manga adaptation of the first season features Fate performing this for Nanoha in a
* Chapter 15: Garrus dismisses the idea of a shapeshifting killer, to which Adam says that
* Chapter 174 starts off looking like it's going to be another fourth wall-poking
* Chapter 17 has Nate being formally introduced to Yancy's parents. Thankfully, this meeting is cordial and not awkward.
* Chapter 180 ends with some of Shirogane's guy friends seemingly trying to convince him to peep on the girls while at a hot spring. However, Chapter 181 opens back at the student council room, where Ishigami and Iino
* Chapter 181's "fanservice" chapter is mostly light in comedy in the middle of the very dramatic Kyoto Class Trip arc.
* Chapter 186 implies that Hayasaka's relationship with Kaguya mirrors the one that her mother had with Kaguya's older brother Unyo.
* Chapter 18 and 19: While previous SUE attacks had interfered with the canon villains' plans,
* Chapter 18 begins with Kat walking in on her parents as they're getting intimate. They resume intimacy after she had left the room.
* Chapter 18 has the Black Knight Leadership learn that Suzaku pilots the Lancelot.
* Chapter 195 is a Valentine's Day chapter which, in Japanese tradition, involves girls giving chocolate to the boys they like
* Chapter 19 deals with all the fallout from the conclusion of the Dark Hand arc, and gives all the heroes a chance to recover from it...
* Chapter 19 has Yancy meeting Mr. Kyouhei at the Kyouhei Residence in Aspertia City. It again turns awkward when Mrs. Kyouhei manages to tell her husband about the aforementioned first meeting between her and Yancy.
* Chapter 1, and that McGonagall really wishes Hermione would invest in a hairbrush.
* Chapter 1 has Hanahiko, the spirit of a cross-dressing boy who largely despises adults. He'll also kill you if you tell him he's pretty...
* Chapter 1 has the Urashima Woman, the spirit of a pregnant woman who was murdered by her midwife after she gave birth, and then dumped in the lake alongside all evidence of the crime. She kills those who throw rocks into the lake, as she interprets it as an attack on the dead fetuses that the midwife also disposed of there. She's pacified with
* Chapter 1: Launch of the Screaming Narwhal feels the need to upbraid him for it:
* Chapter 1 "New York". A lawyer named Bradley Grey handled the legal work of passing control of the Carlyle fortune to Erica Carlyle. If a
* Chapter 1 of both versions spend most of the time showing what Kiryu was up to the night of Sohei Dojima's murder, and the circumstances that led to his arrest and imprisonment.
* chapter 1 part 11 daughter Hitomi Kira appears in a black kimono, described with having red flowers on it.
* Chapter 1 starts out a while after the death of Kaworu. After Shinji visits Asuka while she's hospitalized, the story skips ahead several weeks.
* Chapter 1 takes place between 1:00pm and 2:00pm and includes everything that happens to Alice during that time period without regard to what Bob is going through.
* Chapter 21.2. It's strongly implied that she visited regularly before the events of the series.
* Chapter 21. Fittingly enough, one of his teachers asks a question about the "elephant in the room" question in that chapter, which also bears the name.

* Chapter 21 sees Kyouka, Hinata, Kumi & Aria make a Christmas Cake so that
* Chapter 22 is sort of a continuation to that. Due to her inexperience, she started seeing every word and action as an innuendo. In particular, she described the act of sharing earbuds as "penetrating a membrane with a foreign object".
* Chapter 22. She's in the NPC house, and Hawkeye says her name if he goes in there.
* Chapter 23, and quickly corrects herself, saying that she meant "the laws of humans".
* Chapter 23 has Rufus flying AVALANCHE out to Corel to intercept a WEAPON bearing down on it. Shortly after takeoff, Barret demands to know how much longer. Rufus informs him that if he's not satisfied with their progress there are parachutes in the back.
* chapter 24 after seeing a morbidly obese version of himself covered in dirt and smears of food and condiments.
* Chapter 25: After Robin accidentally insults everything about Shogun Octavio and his country (
* Chapter 25, after the chapter's events, a couple of listeners express their thoughts:
* Chapter 25 introduces a subversion in Kingbot. He's introduced with a face that's a featureless slab (aside from two small eyes), but he
* Chapter 269 When Kort accused McGee of being "impolitic", Vance laid down his punishment(this chapter takes place in late July):
* Chapter 26 features many of these, as the new Bearers explain about their adventures and what they learned to the six Captains, including Violet Lulamoon canonically learning about her being descended from Trixie. It also
* Chapter 26 has the whole world learning that Suzaku is the pilot of the Lancelot.
* Chapter 26: "You're an artificial human that can regenerate from fatal wounds in seconds denying the possibility that a young Asari can breakdown alcohol quickly."
* Chapter 27 focuses on Blitz's mentor, Hercules the Heracross, dealing partially with the aftermath of the last few chapters.
* Chapter 28 has Optimus tell Euphemia the history of the Cybertronian War.
* Chapter 28 officially reveals, both in-universe and to the reader, that Page Turner is and always has been a Changeling/unicorn hybrid named Lamella.
* Chapter 29 reveals, via Discord, what the final chapter (pre-epilogue) of the first story did: that Balance had committed all sorts of terrible acts in order to ensure that the Six would become its new Bearers (such as delaying Night's birth), including what they each would have done with their lives if not for its meddling. The Six are quite stunned by this.
* Chapter 2 also takes place between 1:00pm and 2:00pm, except it is told from Bob's point of view and has absolutely nothing to do with Alice.
* Chapter 2, a neighbor finds out the Dursleys locked four-year-old Harry Potter out of the house overnight and he got frostbite. The concerned neighbor goes over to interrogate Petunia Dursley, inquiring after Harry. When the neighbor, not seeing Harry or knowing where in the house he is, says "I note you've not left the house at all this morning, and wanted to confirm YOU gave him the appropriate treatment, and didn't just shove him into a cupboard somewhere." The cupboard statement was supposed to be facetious, but it startles Petunia into a heart attack, and then Dudley begrudgingly reveals that Harry Potter really is in the cupboard under the stairs. The neighbor is horrified.
* Chapter 2 ends with a brief glimpse into a private meeting with Amical and his guards which offered a little insight into what he expects of the seedlings, but not enough information to be sure of what.
* Chapter 2: From Stonebridge, the players progress to a dungeon infested with giant spiders and undead before reaching a
* Chapter 2: "Goroh, The Vengeful Samurai". Samurai Goroh, bandit leader and Falcon's longtime
* Chapter 2 had two of them, one about the victim, Chihiro ("This...this girl is...! ...is a boy!"), and the reveal of Genocide Jack's identity ("In fact, it's

Toko.").
* Chapter 2 has Kubitarou of Kintoki, a giant man who chops the heads off of animals. In actuality, Kubitarou is a woman who was mentally disabled in life and mistook a bear plushie as her younger brother. When said plushie lost its head, she started bringing animals heads to a sacred tree in the hopes of reviving him. She cut the tree down in anger when it didn't work, and in retaliation, the villagers tied her up and starved her to death. She's pacified when
* Chapter 2 has Shimi-O, a figure in the forest who kills people with a power drill.
* Chapter 2 of "Axe Cop" (the Moon Brothers arc) is this. The Moon Brothers find their family turned into bats, travels to Earth to defeat the villain who did it, meets up with Axe Cop's party, gains a bunch of utterly random power-ups, defeat the villain... and finally realize that they had a magic potion all along that could have turned their family back into humans, making the entire story-arc mostly pointless.
* Chapter 2. While Renai is doing housework, she passes by the living room, where the female ghost, Michelle Crane, can be seen calmly sitting on the far side of the room several minutes before Renai encounters her properly.
* Chapter 30 similarly comes after two action-packed chapters and focuses more on advancing several subplots (romantic and otherwise) while preparing for the three-part finale to the first "season" of the story.
* Chapter 31 further reveals to the reader that Page isn't just any Changeling — she's the Changeling Queen
* Chapter 32, during the accidental landing in G-8, when the crew realizes that Vivi and Carue are being pampered in luxury by a barrack of overly-chivalrous Marines.
* Chapter 32 ends with Deadpool getting a text to come to the school because Ellie's been in another fight. Next chapter preview pages show him with Ellie in the principal's office, visibly not happy with her.
* Chapter 33 fanfic by DarkFyre99, actually quotes the first paragraph of this article (as it stood as of November 2009) as its disclaimer.
* Chapter 33 has Kyril showing Celestine and Olga more segments of the Night of the Hunt: his battle against a Cleric Beast, the opening cutscene of the game, his first death, his journey through the Forbidden Woods and Byrgenwerth, the descent of the pale moon, and lastly,
* Chapter 36 is this in the aftermath of the above, after leading to another major
* Chapter 36 revisits Foley House, where former fairies and other Gillitie Wood creatures go, specifically the class of those four ex-fairies we have seen in Chapter 15.
* Chapter 38: Adam is confused by the sight of a sapient anthropomorphic rabbit-cat.
* chapter 38, in the immediate aftermath of Harry Potter violently preventing an attempted gang rape on Daphne Greengrass, Professor McGonagall asks her "Are you alright?" While wrapped in a conjured sheet to salvage her modesty, bleeding from her forehead and earlobes, and barely able to stand, Daphne snaps back "Do I look alright?"
* Chapter 39, Harry Potter, acting as Apprentice Healer, tells an injured Tonks to take off her shirt and jeans. She knows why, but she takes the opportunity to tease him a little anyway.
* Chapter 39 reveals, via the new Bearers figuring it out and the originals confirming it, that Balance is actually an alternate identity of another spirit, Harmony, who assumed a new form suited for an as-yet-unidentified mission.
* Chapter 3 has Hanayome, who has a thing about people "seeing it" and eats the eyeballs of her victims.
* Chapter 3 has the gang involved in a feud between two families as they believed there was gold involved. For some time, they
* Chapter 3 involves the three main seedlings calling their families. The narrative didn't elaborate on the history of some of the things they were saying. Asia in particular leaves a lot of intrigue for debate given the clues we have been

given about her abnormal upbringing which resulted in her being "rescued".
* Chapter 3: Lucky Red Shirt, from Hell’s Children by Andrew Boland. The Shirt does not turn out to be lucky.
* Chapter 3 with drastically reduced standards of skill, experience or even basic competence. Since all the greatest heroes of the land are either dead or retired, there aren't many legendary candidates available, and since the greatly reduced powers of the Crown mean that Brienne doesn't have the authority to demand able men from the Lords, she's reduced to populating the once-mighty Kingsguard with a procession of wide-eyed young men with no training in the dim hope that she can build them up into suitability.
* chapter 40 entwined on the couch. He flees to the greenhouses, only to walk in on Neville Longbottom's threesome with Hannah and Susan. Harry flees out of the greenhouses and into the Room of Requirement, only to catch Tonks and Fleur in bed together.
* chapter 40 not a terrified scream, it was a manly utterance of surprise. A quick embarrassed conversation later, he flees for the greenhouses.
* chapter 41 as they explain to the extra credit Defense Against the Dark Arts class why the shield spell absorbs some spells and reflects others. Harry Potter overhears while he's trying to figure out why his runic cluster isn't absorbing the pieces of Voldemort's soul.
* Chapter 42, when Xvital puts on her Element, has her visit with the Magi of Stars... and learn that she's alive, but not well, being held captive by their enemy.
* Chapter 43 introduces Hetty, an animated porcelain doll and Renard's acquaintance, who bears an inexplicable grudge against her owner, a young boy named Adam. She quickly goes from
* Chapter 43 reveals Xvital's past as having been engaged to the prince-king of the Cuanmiztl Kingdom until his mother found out about her being a thief and manipulated her into running away before the wedding.
* Chapter 45 (Make a Break For It) stars Kairi and her break-out from her prison in The World That Never Was.
* Chapter 45 reveals that the Avengers, in their capacity as a semi-independent force aiding the Republic, have taken to dividing their resources whenever they assist the republic on an assignment, with around half the team remaining on Coruscant at all times in case reports come in that may lead to the discovery of another of the missing Avengers.
* Chapter 45 takes place right after the Mewtwo arc, being the main cast's last break before the
* Chapter 46 reveals that it's a blank novel that brings to reality anything written on its pages.
* Chapter 498 has an absolutely adorable/heartwarming moment where Naruto suddenly surprises his mother with a hug and cries while hugging her upon meeting her for the first time.
* Chapter 49 is the first chapter set during the present day in which none of the main characters even appear, as the chapter focuses on Blitz's family at Lightning Plateau,
* Chapter 4: After a bit more snow, you enter an odd cavern system full of
* Chapter 4: "Challenge of the Bloody Chain". Michael Chain and his subordinate
* Chapter 4, Chapter 31 revealed why Misa does that—she wants to do that herself.
* Chapter 4: Cordelia learns that a spell was cast on her as a child to manipulate events so as to insure she stays a virgin. That causes her to realize she should have stayed together with Xander. She dumped him on Valentine's Day in front of everyone right after he gave her a beautiful gift, all with some flimsy excuse about Harmony. Under normal circumstances, she'd have spent the night riding him like a rented mule but she broke up with him instead.
* Chapter 4 has Killer Peach, who in life was a dietwoman seeking to expose injustices. She was brutally murdered by the 5/5 Club after she was about to expose the president's involvement in an arson case - after she became a spirit, she

sought her revenge on all four of the men. She's pacified by evidence that
* Chapter 4 has Miss Zoo, a former teacher at H Elementary that loves animals.
* Chapter 4 He also is considering how he's essentially allowed all of his students to suffer under Snape and other bullies at his school due to his inattentiveness.
* Chapter 4 on Professor Sprout by claiming he said "she'll explain some facts too" instead of "she has a nice rack too".
* Chapter 4 shows several flashbacks in reverse, ending with Jin appearing back on his room from before (with a text showing the date, even), taking off the sweater he was trying on to reveal an absolutely exhausted and sad expression, putting on a casual cap instead. This reveals Jin's ability to go back in time.
* Chapter 4 starts with Jiraiya and Tsunade, after a few years of raising baby Naruto, getting married and coming back from their honeymoon.
* Chapter 5, “Meeting the Smiths”, focuses on Beth and her first time meeting Kitty, the first friend other than her father that Morty has made in a long time.
* Chapter 52 shows Charlotte Pudding listening to Lola's guest appearance on SBS. Despite all the change that the Straw Hats have brought about and the respect they have earned, she does not think much of them.
* Chapter 539 provided us with an unknown ninja who is infatuated with Sakura, going as far as previously writing her a
* Chapter 53, the Gryffindor students go from encouraging Harry to open the golden egg to begging for him to close it as soon as it makes a horrible noise.
* Chapter 54 ends with the line "End of Prologue." If 54 chapters of a weekly-turned-monthly-comic being a "prologue" doesn't give you an idea of how long the author plans to write this, then nothing will. Guess he's living up to the name Vinland
* Chapter 54. When he tries to escape, Pinkie Pie invokes this trope by warping his escape routes to bring him right back where he started so that he can't escape his punishment.
* Chapter 59 reveals that, following the return of his full Red Room memories, seeing
* Chapter 59 sees Mikoshiba sending an email under the pseudonym of "Mamiko" to one of the judo team members who is posting the artwork under the guise that it's a blog for a female student in the team, because well, it'd be seen as a bit suspect if a guy sends a message to a junior high school girl right? The two judo team members promptly react to the email with cheering "HIGH SCHOOL GIRL! MINISKIRT! WHOOOOOOOOO!" after realizing the email has a female name.
* Chapter 5 has Celestine and Olga taking a peek at Kyril's journal. The journal shows
* Chapter 5 has the Kannon Soldier, an experiment gone wrong that killed the IJA scientists that performed on it back towards the end of
* Chapter 5 opens with Kaguya being scandalized at the sight of a girl offering her boyfriend some food from her bento.
* Chapter 5 "The Laird of Castle McDuck:" Scrooge is called home to help his family protect their ancestral castle from their rivals, the Whiskervilles. He arrives just as his
* Chapter 6, “Tales of the Drunken Rick”, focuses on the characters of Bridgette and Courtney as they start hearing the rumors about Rick and Morty.
* Chapter 615 brought around arguably the most astonishing one of all, from
* Chapter 61 is the only one to completely lack Kobayashi, Tohru, Kanna, and Ilulu.
* Chapter 61 of the original includes a flashback to the moment when Sonic,
* Chapter 61 sends Sakura and Rock Lee to rescue a weaponsmith from bandits who intend to sell him the Akatsuki, and gives Lee a chance to show off his skills as a more traditional ninja.
* Chapter 64 clearly shows how utterly powerful the Survey Corps has become. A well-trained, fully equipped squad of 35 black-ops commandos in their element is decimated, outmaneuvered, and outwitted by seven teenagers with obsolete combat gear. The derailing train of thought from the squad leader's point of view says it

all.
* "Chapter 64", the penultimate episode of Season 5, sees two examples of this, one lethal and one not.
* Chapter 6 and 7: "Black Shadow's Trap" and "The F-Zero Grand Prix". Captain Falcon's
* Chapter 6 begins with Shinji looking at Asuka as she sleeps and thinking of how much he enjoys staring at her beautiful face.
* Chapter 6 DLC has Red Riding Hood, who drives people crazy to the point of them committing suicide if they go into the abandoned love hotel with her where she haunts when it rains.
* Chapter 6: Leaving Fortress Kroth takes you through the Hall of Skulls, a spooky skull-themed dungeon, and then out into the
* Chapter 6 mentions that Lyra and Bon-Bon proposed to one another and got married after Bon-Bon announced she was joining the army.
* Chapter 6, Peeves the poltergeist hastily hides something behind his back and whistles as he floats away. Professor McGonagall squints suspiciously at him.
* Chapter 6. Raised by Master Chiun of Sinanju in the "Remo Williams" universe, Harry is an assassin who killed Lucius Malfoy during an attack. Going to Malfoy Manor on Boxing Day, he guesses Narcissa wants Voldemort dead so Draco won't get further infected by his evil. Her offer to "ensure a more binding agreement" leads to Draco seeing them in the bedroom and Harry zinging Draco with "Don't worry Draco, you won't have to call me 'Father' right away. We'll work into it." Needless to say, this doesn't end well for Draco.
* : Chapter 6, where Cameron killed a thug by smashing his head with a door, but not before telling him a joke John told her earlier.
* Chapter 6 where, seemingly out of nowhere, Antimony starts bawling her eyes out over her mother's death. This marked a turning point for Antimony — since then, she's opened up to her close friends, while maintaining a stoic façade to the rest of the world.
* Chapter 70 of the first book has Albus Dumbledore casually analyse the casting styles of four HYDRA assassin wizards sent to kill him, defeat them with a couple of spells, then destroy their wands with another, without even giving them more than half his attention.
* Chapter 7, “Summertime”, focuses on Summer’s struggles with popularity as she joins Heather’s cheerleading clique.
* Chapter 72 the obstacles, not defeat them. Sometimes your best choice is to run away."
* Chapter 74, due to the three of them having binged too much shojo manga, shows Kaguya in an imagined love triangle, where Shirogane and Ishigami try to court Kaguya.
* Chapter 76 has a non-romantic example. While Naruto visits the Hyuga estate, he notices that several of the clan's members (including
* Chapter 76 reveals Fu has been staying with the Aburame Clan. She seems to be getting along with them just fine.
* chapter 7 and sends Albus Dumbledore flying out the door for trying to send Harry Potter back to the abusive Dursleys.
* Chapter 7 has Isshin mention the Hospital's Director would do anything for him, implying either friendship, some kind of debt, or both. Two hundred chapters later, the Hospital Director is revealed to be Uryuu's father, Ryuuken. Chapter 241 confirms Isshin and Ryuuken know each other. Isshin's surprise at Ryuuken's
* Chapter 7 of the first game is titled "Police Brutality" and, fittingly, features Max (then an undercover cop) interrogating a crook at gunpoint after killing all of his henchmen. The crook tries to call Max out on "police brutality", to which Max calmly replies that
* Chapter 7: The leader of the Droog village sends you on the path to Castle Ehb, a fairly nondescript route where the desert gives way to more green hills. Along the way is an optional location, Dragon's Rathe, a frightening bone-filled cavern wherein dwells the toughest boss in the game, the Dragon Queen. The outskirts of Castle Ehb are downright serene, and the castle itself is very beautiful, apart

from being eerily empty, inhabited only by the final race, the mystical Seck, besieging the castle from below. The chapter ends when you find the king in the castle dungeon.
* Chapter 80 has Shino and Takatoshi buying supplies, while Aria and Hagimura are "conveniently" busy with something else. It later becomes an excuse for them to go out and eat, and it ends with Shino
* Chapter 88 of the manga is mostly a Breather Episode, about the main cast helping a village in their annual
* Chapter 8 are turned into vampires. Harry tries to carry his friend and fly across a river, but Harry's new flight power fails and they both fall into the river. The vampire who turned them has to fish them out.
* Chapter 8: Descending further into the castle dungeon brings you into contact with more Seck and other demonic entities.
* Chapter 8 fanfic "Twist of Fate", Tadashi once ended up at Fred's manor "after Baymax's 72nd test run" and tells Gogo, Honey and Wasabi they "don't wanna know".
* Chapter 8 had Tohru decide to throw a Christmas party. Due to the anime rearranging the timeline, the party was changed into an excuse for Kobayashi to get out of the company cherry blossom viewing festival. The anime had its own Christmas episode later on when all the dragons performed a
* Chapter 8 has Kara meeting Jack and Maddie, appropriately titled "Kara meets the Fentons".
* Chapter 8 has Sazh and Vanille walking around Cocoon's theme park, overall taking a break and nothing out to fight them. Most of the chapter is spent checking out the theme park and chocobos. Then the end of the chapter has
* Chapter 8 maliciously and with forethought takes an axe to the fourth wall, using this very wiki as the tool to do its evil work.
* chapter 8, Neville Longbottom asks Harry Potter what the glowing rune on his robe sleeve means. Harry Potter calmly explains "Someone's trying to get into my trunk," then realizes what he just said and repeats angrily "Someone's trying to get into my trunk!" He runs off to confront the thief.
* Chapter 8, Rei is asked by Asuka, "Aren't you hot wearing all that??" To which Rei replied, "Yes. Very. Thank you." It took Asuka couple seconds to figure out what Rei had said, then she became more specific.
* chapter 8 Ron comes in for a double dose of this from Ginny and Tracy.
* Chapter 91's balloon game concludes Volume 9/Season 2 after a series of very emotionally heavy moments before.
* Chapter 94 features Sebastian grabbing Ciel and tying him up with tendrils of darkness as well as grabbing his face in his hands and getting quite close. This occurring while Ciel was in a bed, still weak from
* Chapter 99 brings out a revelation no one would have expected with the appearance of the
* chapter 9, Harry Potter complains that his headache feels like someone is trying to break into his mind. Dora, who is expecting Voldemort to do just that, muses how Legilimency is supposed to require eye contact and how weird it is that Voldemort can still try Legilimency on Harry even though they're nowhere near each other. And then Dora realizes that that means Harry and Voldemort are somehow connected in a way that bypasses the need for eye contact, which can't be good no matter what way they're connected.
* Chapter 9 has a downplayed version with serious but not immediately life-threatening injuries. Madam Pomphrey the school nurse takes a few members of staff to meet the rescuers and rescuee at the exit of the Chamber of Secrets. There, she starts treatment of multiple cuts and abrasions, physical and magical exhaustion, spiritual draining, and blunt force groin trauma. A couple of minutes later, she moves everybody to the infirmary and finishes treatment there. There's nothing she can do for Gilderoy Lockhart's lost memory.
* Chapter 9 rear during their fight, mocking her efforts to capture him.
* Chapter 9, though regarded as the best level in the game, is notorious for the fact that that's the chapter where
* chapter begins "#include "stddisclaimer.h"; in fact, the first 33 chapters

include a variety of humorous disclaimers, often with shoutouts to various fandoms. The author also posts this on chapter 7:
* chapter five, after having been thinking she was getting fat (despite her age and knowledge as a kitsune, she is quite inexperienced, likely due to being servile), she discovers she was indeed pregnant.
* chapter four. Too overwrought too deal with that sort of thing, Thomas escapes Carson's office by claiming he has to go down to the village to post a letter, though by his own internal admission he has no letter, nor anyone to write to.
* Chapterhouse: Dune also has Futars, part human and part cat, that are a threat to the Honored Matres.
* Chapterhouse: Dune has Odrade again experiencing prophetic dreams, but hers contain more symbolism than a direct vision.
* Chapterhouse: Dune Honored Matres ships destroyed the planet Tleilax and many Bene Gesserit Sisterhood planets.
* Chapterhouse: Dune it is speculated that Foldspace may even move people between universes as part of a multiverse. This is because even after 15 millennia, no-one really knows how Holtzman's technology works.
* Chapterhouse: Dune. The Honored Matres are going around exterminating any worlds with Bene Gesserit presence, they have suborned the Spacing Guild and are using Navigators to find targets. Chapterhouse survives solely because it is invisible, surrounded by no-ships and only those with the Siona gene walk freely around the planet.
* Chapter Masters of the Space Marines only get there by earning the respect of an entire chapter of super soldiers. Usually done by, at the very least, surviving and distinguishing yourself in centuries of battle against nightmarish odds in a crapsack universe. After first growing up on and proving yourself Badass by the standards of a
* Chapters 14, 18, and 37 require "your choice in Chapter 16" in order to succeed. However, Chpater 16 is not included. As of the latest update, it has not yet been posted, leaving these games unwinnable for now.
* Chapters 30 and 31 are a lot more relaxed and low key than the Tag Tournament and Janine gym battle chapters, with the end of Chapter 31 showing that the story will soon be going into high action again.
* Chapters 42/43, while entirely offscreen, have SHIELD enacting Operation Overlord to wipe out most of HYDRA's bases.
* Chapters 59 and 60 see the Avengers and Harry and his friends (the latter being
* Chapter seven reveals Technus's contribution to the villain's plan; mind controlling a group of alternate Ben's with nanites from the
* Chapters presented from the killer's point of view are presented throughout the novel
* Chapter three has one in revealing a new player in the ongoing crososver plot of
* Chapter twelve features Morei intending to deliberately wet herself in front of Shouta, chicken out, then wet herself for real while she and Shouta are
* Chapter Two has the Room of Lies scene, where, unbeknownst to the player, Reko gets replaced by a duplicate while the lights in the room are off. However, the game immediately draws your attention to the fact that there's something inconsistent about her outfit, and later several characters note that Reko seems to be acting different than usual. By the time the negotiation scene at the end of the chapter brings up the possibility of someone being an impostor, a lot of players will know right away where the scene is going.
* '' "Chapter VI: The Abyss Gazes Also", skirts around this trope. The focus character, a psychiatrist trying to interview Rorschach, finds himself
* Character actor Gregory Ratoff was a good friend of Preminger from his earliest year at Fox, and appeared in three films directed by Preminger; Preminger also played a small part in one film directed by Ratoff.
* Character actor John Nolan, the director's uncle, appears at Bruce Wayne's birthday party.
* character actually values their life, it's unlikely that they would treat their life like a game.

* Character Aged with the Actor: Rather than replace the actor when they become "too old" to play their character, they simply develop the series to accommodate the actor's aging so they can still play the role indefinitely.
* Character Aged with the Actor takes place the same number of in-universe years after the end of the series as in real life, to account for cast aging.
* Character Aged with the Actor: The actor's character ages as the actor does (as opposed to simply replacing them with a younger model).
* Character Alignment-aligned Sword of Zariel overwrites all its bearer's personality traits with an "idealized" version of them.
* Character Alignment) is a Valhalla-esque realm of glorious combat and self-satisfying struggle.
* Character Alignment. The Turban likes to engage in philosophical conversations and see new places, and becomes depressed should its host leave it behind, but despite its intelligence it isn't a reliable adventuring partner - a Vizier's Turban reacts with a sense of wonder to just about anything, so it won't think to warn its wearer if it sees a monster about to pounce on them.
* Character Alignment tropes tend to be constructed so as to yield opposite pairs — as seen in the most commonly used system:
* Character AlignmentYour character's morality, usually on the good vs. evil and/or lawful vs. chaotic scales.
* Character appearances have been pretty well cemented by Luke McKay's fan art, leading most people to believe Caboose is a
* Character Archetype desperately trying to show off as a hero by making senselessly acts that seem brave.
* character arc. Zig-zagged and possibly deconstructed with protagonist Piper, who comes to question whether prison has really changed her, or just brought out her true self.
* Character attributes: all attributes effect both gameplay and story. Mental attributes emphasize opening more dialog and story choices and provide some gameplay benefits (experience point gain, learning spells, shop prices), while physical attributes mostly provide combat bonuses and have occasional effects on dialog options (such as physical threats and catching pickpockets in the act). Different dialog choices can also raise characters' attributes.
* Character Blog: A character has their own account on a real life social media website.
* Character Blog: A fictional character has their own social media account.
* Character Blog and how much it sucks to have to walk everywhere and how he's got man-tits now and how there aren't enough people at the Superman statue lately. But he's not Superman, really. They're two different people.
* Character Blog, Mumbo simply said, "Mumbo never been so insulted in whole life".
* Character Blog, to the point that they published items with titles like "Superman Gets In Fight, Again" and "What Superman Had For Breakfast." Most of the currently-depowered Clark's output currently consists of articles like "Ouch, I Stubbed My Toe" or "I'm Depressed."
* Character Celebrity Endorsement: Convincing your audience that your product is desirable by having a fictional character praise it.
* Character Check briefly lapses back into their original characterization.
* Character Check can help steer a character who developed too far from their original character back into being themselves, or remind the audience that they still are the same person they used to be no matter how much they've changed.
* Character Class for the simple reason that it boosts your chances of acting before your enemy in combat. The Alert feat in 5th Edition performs the same function, with the added bonus that you also cannot be surprised.
* Character Class is a major case of this trope, being perfectly at home visiting caves filled with giant man-eating spiders.
* character class, while having mostly magical healing abilities, begins with a scalpel as their melee weapon.
* "Character C" Mutsumi goes the "wanting Character A to be happy" route — in a way — earlier in the series (Chapter 82 and 83)... by revealing that

she's equally in love with Keitarou and
* Character concept-wise, mentioning that the cast is a complete rip-off of
* Character Customization: Altering the statistics and appearance of your character in relation to the game the character is in.
* Character Customization from NPCs. Paya, Impa's teenaged granddaughter with a nervous crush on Link, will become deeply embarrassed and asks him to cover himself.
* Character Customization, the lightsaber parts and stim canister upgrades once you've unlocked the requisite Jedi abilities.
* Character Derailment: Audiences complain that a character has diverged too much from their original characterization.
* Character Derailment: Character changes personality with no explanation.
* Character Derailment: Fans get angry when a character changes characterization with no reason or explanation shown or given. Only place examples on-page or in the appropriate subpage.
* Character Development (about bullying and marriage) were more poignant coming from her.
* Character Development: A character changes and grows as they progress through the story.
* Character Development: A character gradually develops into having a different personality from what they had at the series' start.
* Character Development: A character's personality and behavior changes as the story goes on.
* Character Development after he had been absent from the slums for 3 years.
* Character Development and acts detached to his harem to make them distance themselves from him.
* Character Development and becomes more confident in himself. He tops it off by using Gryffindor's sword to slice Nagini off (and thus, giving Harry the edge needed to settle things with Voldemort.)
* Character Development and her vocabulary has degraded as a result. She's still just about the only character in the comic to never drop an f-bomb, though.
* Character Development, and instrumental in helping Goku defeat Kid Buu, he is nowhere even approaching the level of strength of Goku or his peers.
* Character Development and is able to support him when Phoenix has a crisis of conscience over a client who really is guilty.
* Character Development and now appreciates her family's lifestyle, equally joining the bandwagon at the same time, as she learned that ghosts are real.
* Character Development and so the supernatural baddies will generally try to ambush him to get him out of the way. But once he has time to plan...
* Character Development arc. Over time, Sean becomes less nervous of going into space, and more open to trying and failing. In "Astronaut Ellen Ochoa", he learns that he doesn't have to worry about training to be an astronaut for years, and he should just enjoy life since he's still a kid.
* Character Development, as she is becoming more desperate. Also, her near-total inability to process ordinary social cues maybe gets worse over time.
* Character Development becomes a sadder, but wiser and more considerate person by the end of his quest.
* Character Development by telling the truth to the owner's widow and apologizing. Turns out she and her husband knew Stevie's aunt and she invites them in to pay their respects.
* character development centers around her forming a relationship with Garrett.
* Character Development continued. Even the Doctor would lean away from her, wincing, when she got going.
* Character Development, Dawn has learned at least Turkish and Sumerian between Seasons 6 and 7 of Buffy.
* Character Development despite being capable of perfectly mimicking any species in the galaxy (Odo, being young for a changling and having been separated from the people who could teach him, isn't quite that proficient).
* Character Development. Earlier, it has been established that Po binge-eats

whenever he was upset (the second movie implying since the trauma with his mother) and thus, his refusal of the dumpling is a sign of his growth in the belief in himself.
* Character Development eventually leads him to mellow out considerably.
* Character Development exaggerated the idiot part while diminishing the "Hero" part. He's still a well-meaning guy, if thoughtless.
* Character Development fillers tend to ignore that for the sake of comedy.
* Character Development has her improve somewhat by the end, moving her from "utterly hopeless" to "moderately good" at caring for herself.
* Character Development has said was intentionally written out-of-character to represent how he'd imagined the first Doctor as a child from reading Target novels).
* Character Development he became in middle age, he didn't see anything wrong with wars of this nature.
* Character Development, he didn't have any ambitions or goals of his own.
* Character Development, he even outright dismisses skill and technique as "children of human weakness" and doesn't bother with such things out of arrogance.
* Character Development. He gives Daniel one of the highest compliments he can both in his own culture ("one of its greatest warriors") and in his adopted one ("one of my greatest friends").
* Character Development he grew out of it and formed a friendship with The Doctor in later seasons.
* Character Development, he is thrown into a high-stakes adventure where fights to the death happen frequently. He discusses this with his party members and the conclusion is basically that killing is, unfortunately, necessary (incidentally, all of them at that point were soldiers). This is the point where Luke canonically starts seriously fighting human beings instead of just monsters.
* Character Development Hyun is an absolute dick — and his parents and sister were even worse, with his parents telling him to deal with the bullying he was dealing with on his own and his sister calling him an embarrassment to her friends.
* Character Development in the process. That's because Games Workshop were savvy enough to control Ward's antics this time with at least two people getting the job of simply checking he does it right and stopping him when it goes awry. It worked. Of course, it also resulted in the complete destruction of the Necron's pre-fifth-edition backstory, but hey, you can't win them all.
* Character Development is cited as the return of "love, hope and legacy" and comic books following after make a huge emphasis on Wally being the heart of Flashfamily and beyond. Writer Geoff Johns admits that's why he chose Wally as the lead character of DC Universe Rebirth one-shot.
* Character Development is not "are you kidding?" but "this is so cool!"
* Character Development. It turns out Rom's an idiot by Ferengi standards: he has no business sense, which is practically regarded as some kind of mental disability on Ferenginar. However, Rom has a natural gift for engineering, a talent that moving to the station to be with his brother allows him to discover. Encouraged by the non-Ferengi around him, he's allowed to develop his talent and eventually joins the Bajoran engineering staff that work alongside the Starfleet engineers. By the end of the show, he's playing a major role in protecting the entire Alpha Quadrant through some genius self-replicating mine inventions that stop Dominion reinforcements reaching the Alpha Quadrant.
* Character Development kicked in: ostracizing Veronica, wrecking her car with a baseball bat, organizing bum fights...
* Character development late in the eighth season brings him a fair bit closer to playing this trope straight, though.
* Character Development. Lori begins genuinely connecting with Lincoln more often, Luan vows to stop with the April Fools Day pranks, Lola's anger and bratty demeanor slowly go away, and the siblings in general begin to treat Lucy with more respect.
* Character Development Mad Dog of Shimano persona as both a coping mechanism and an act of rebellion.
* Character Development— her magic makes her more powerful even than Buffy.

* Character Development — unlike his wife and son, who also started out pretty awful. After the series ended, Rowling revealed that one of the endings she thought up was Dudley fathering children who become wizards, but then she thought that would make Vernon their grandfather and ultimately decided against the idea, stating that "no magical genes could survive contact with Uncle Vernon's DNA".
* Character Development, Mercury actually becomes a better person, even getting a girlfriend.
* Character Development over her first book as she learns to become a more grounded, mature, selfless individual.
* Character Development, replaces the GM III Beam Master with the Jegan Blast Master, a heavy ordnance variation of the RGM-89 Jegan which includes various heavy beam weapons up to and including twin Satellite Cannons.
* Character Development, replaces the Justice Knight with the much powerful Aegis Knight, going in reverse in units (The Justice Knight was based off of the Infinite Justice, the Aegis Knight based off of the Aegis.)
* Character Development results from his dealings with born-and-raised Klingons who variously fail to live up to his idealized image of Klingon honor or disapprove of his choice to stay with the humans instead of returning to his people (where his family was disgraced anyways).
* Character Development she did a sneak attack on Aang just to make her feel better. Thankfully the journey and interactions with others mellow her out and eventually break her of this.
* Character Development, she doesn't come in when Edward sings the line.
* Character Development, she remains honest but is far less cold about it.
* Character Development she was a mature, intelligent, confident and extremely powerful young woman and crimefighter who didn't need her cousin's advice or approval (a fact Superman agreed with). Many creatives and fans kept brushing her off and dismissing her as "Superman with boobs", though.
* Character Development, some characters have come to lose their weapons. For example, early on, when he was just the thick-headed male figure, Sokka retained a war club. Then of course, there's the symbolic ending of the season three premiere episode, in which Aang burns his staff. On the reverse, as a sure sign of his growing into a capable leader, Sokka has come to receive a straight sword.
* character development system the energy weapons using energy restored by power stations could be really life-saving. In the first game the energy weapons were very important alternative to bashing enemies with lead pipe in the first half of the game... Nevertheless the "boring" Scorpion submachine gun was arguably the most effective weapon.
* Character Development than the comparatively lackluster heroes, especially if the villain happens to be the only character with believable motivation or emotional responses.
* Character Development that he started thinking and asking questions first.
* Character Development that she throws propriety to the winds and starts openly living in sin with him.
* "character development through manual labor"), etc. In this case, the potatoes are actually all-purpose alien fruit-vegetable-things called "purps", but we still get the same imagery you normally get when this trope is played straight: the big pile to be peeled, the paring knife, the lonely corner, and Jim distracting himself from the mundanity of his task with memories and fantasies, as well as the idea of huge amounts of work being piled on the lowest-ranked crew member in order to show him his place and keep him busy.
* Character Development was actually a calculated act designed to reach a specific goal.
* Character Development. Whether this was completely incidental or 'assisted' is never clarified.
* Character Development which gave the Kazon some motivation, and showed that the possibility of redemption existed in a few of them. Sadly, that was the show's only attempt to give the Kazon some depth.
* Character Development, while in canon she simply doubled down on her jerkass

attitude in her second appearance.
* Character Development who is a badass assassin) became so popular so fast.
* Character Exaggeration: The adaptation makes a character into a caricature of their original incarnation.
* Character Exaggeration. The movies tended to make Ron the butt of jokes, specifically his incompetence and Rupert Grint's astonishing array of terrified faces.
* Character Filibuster and invalidates his own argument a few moments later.
* Character Focus in a deadened, soulless, metal-tinged voice, and the rest of the team's left shaken by a conversation with him...
* Character Focus. Luckily, they both get some decent character development in seasons 4 and 6, which keeps them from being completely useless.
* Character generation can result in this too. Height and weight in D&D,
* Characterisation Click Moment: A previously undeveloped character shows the starting signs of their finalised personality and role.
* Characterisation Marches On and they're much more likely to want to help Candace out than annoy her.
* characterised), they still seem happy enough to serve Starfleet in a military capacity when required, and even maintain a small fleet of their own warships. Though the Romulans (or at least Sela) seemed to think that 4 warbirds would be enough to conquer Vulcan, so they can't be that militaristic (or the Romulans wildly underestimate them, which is also possible).
* Characterising their favourite work as superior or revolutionary with little to no justification — they may like it more, but that doesn't mean it's really unique.
* Characteristic Trope: Trope becomes discredited due to audience associating it with a certain show.
* Characteristic Trope, typically used to make something mundane suddenly terrifying.
* character itself is a hedonist who is all about enjoying the earthly pleasures for the kicks, likes physical fighting, and is the most prone to mischief.
* Characterization and setting tropes specific to game characters and settings.
* Characterization By Action: Being characterized by something you do.
* Characterization by Item: Characterizing by connection to an item. Items can be people:
* Characterization by Relation, because emotions usually involve other people.
* Characterization Marched On to be this, and based on his interactions with Absalom, he likes to think of himself as a Covert Pervert. However, it's been blatantly obvious to everyone from day one that he's a huge perv, and judging by his behavior as of late, he's at least a little more open about it.
* Characterization Marches On and in later episodes/seasons, we discover that Michael is almost as much of a hopeless weirdo as the rest of his family. He just pretends that he's not.
* Characterization Marches On: Character's personality is different in later episodes than they were in the beginning.
* Characterization Marches On. Earlier seasons had him being as athletic and knowing about sports as Danny and Joey; after the fourth season, he has no athletic ability and claims to know nothing about sports at all.
* Characterization Marches On is any indication, he's certain that any good people he kills will be rewarded in heaven.
* Characterization Marches On "like a second language" to him) and at the time he's very desperate to be bought by Owen. Threepio often makes word flubs when agitated later too, which could explain his phrasing here.
* Characterization Marches On of this fact. This can be supported by the fact that in the Decolore Islands, Ash was aware that his Oshawott was in love with Osharina.
* Characterization Marches On shorts. In "Where's the Wand?" she ends up ruining Cosmo's plan to get the wand back because it involves flirting with Vicky.
* Characterization Marches On, where a character undergoes significant changes in characterisation early on in the work due to creators changing their minds about

them, and the original characterisation is simply forgotten about.
* Characterization Marches On, Yoshi became this, as he has almost no text-based dialogue, and like Steve, almost all his current voices have been provided through voice clips.
* characterization rather than support his lawful ruler who would undoubtedly have rewarded him handsomely, most likely by fulfilling Stannis' ambition to be Lord of Storm's End.
* characterization. She stops talking to both Takatsuki and Nitori. It takes until late middle school for them to become friends again.
* Characterized Kanye West as a "Jackass" after antics at MTV Video Music Awards. Many conservatives commented that they
* Character Level. It also inconveniences the developers in the event they ever want to raise the level cap again: the increase in rank cap to fleet admiral resulted in jokes that the next expansion would make you President of the Federation.
* Character Levels, a vampire's kiss ages the victim by 10-40 years instead.
* Character-Magnetic Team: A group of magnetic heroes that attracts fringe characters and party replacements.
* Character Model Karma Meter often makes good-aligned characters become more traditionally attractive.
* Character Name Alias: A character uses an in-series fictional character's name as an alias.
* Character Name Alias: Choosing a fictional character or celebrity for your fake identity.
* Character obliviousness is a genre convention for several stylized theatrical forms, particularly opera. There's no unified standard, of course, but the basic rules are roughly as follows: anyone hiding behind or under something is invisible, and that talking or even singing won't attract attention unless their speech happens to be a startled exclamation; anyone wearing a mask is unrecognizable, sometimes even obscuring gender. Individual productions have been known to subvert these rules, for instance by having all five eavesdroppers on a scene hide behind the same chair, concealed for plot purposes not only from the scene's principals but also from each other.
* Character of the Day, who came to the shop to teach one of the child characters magic tricks for the school talent show.
* Character Outlives Actor: A character is established to still be alive, though no longer given major appearances, after their actor has passed away.
* Character Outlives Actor: A character remains alive even though the original actor passed away.
* Character Outlives Actor: When the actor who plays the character dies, this is worked around by reducing them to voiceless cameos, replacing their actor or otherwise making do or removing them from the spotlight without killing them off.
* Character Overlap: When certain characters have a tendency to do the crossing over.
* character points in proportion to the evilness of whatever's corrupting you this week.
* Character Portrait do), then only important characters will have unique portraits (or even portraits at all).
* Character Portrait double as this, as if to tell player, "Nice choice!"
* Character Portrait may have pictures of them display during dialogue.
* Character-poser software such Poser and Daz Studio, and full animation suites such as Carerra and 3DSMax, have a cel-shader packaged or available as an optional extra. 3D Custom Girl features cel-shading by default. The last one is used more for producing hentai images, but
* Character Rerailment, a new director, and certain announcements exciting the fanbase, a lot of people came back.
* Character Rerailment: Character has their original characterization restored after having previously been derailed beyond recognition.
* Character Rerailment: Consistent with original characterization at the expense of

later characterization.
* Character Rerailment: Inconsistent with later characterization in favor of original characterization.
* Character reveal trailers tend to portray newcomers dealing with ease against multiple fighters, whereas in-game balancing means that no single character is able to take on a whole crowd of opponents single-handed. The most noticeable example of this is
* Character's actions in one world directly affect the other (a seed planted in the present grows into a climbable tree in the future)
* Characters also frequently address the audience directly, most frequently Peter, who even tells off the audience for being offended at his antics on account of it being a cartoon.
* Characters also use magnetic boots when this happens, and while on the Moon.
* Characters and/or groups that exist for one act in particular, but might have a member or two appear elsewhere in the show (i.e. the Zebras in
* Characters are spun off into their own series almost every season. The original cast includes gym teacher Mr. Faunce, who gets a spin-off after the original main trio graduate high school (after three years as seniors). Elsa's partner in the pool room she buys after selling her bowling alley, Emilio, gets a spin-off after the sixth season with his fourteen younger siblings (introduced the previous season). Mangler gets a spin-off after the ninth season, and most of the remaining established cast members get spun off early in the tenth season.
* Characters being frozen by El Chapulín's Chicharra Paralizadora is made by the actors actually standing still.
* Characters besides Klug getting possessed by the demon is a fairly popular subject for fan art.
* Characters called Exiles operate computers which monitor specific people from 413 years in the past. Several times, Exiles try to assist those they monitor, but they never attempt to send messages any time except
* Characters can also easily take "Ambition" as a Foible (similar to the Hubrises of
* Characters can do occasional ceiling running, though they can only get into it if the floor curves up at walls
* Characters deal with personal issues or live out fantasies by going up against rivals or bullies. Possibly, if the characters are usually
* Characters do have sex in space aboard spacecraft and both deep space and orbital facilities in the
* Characters drained of their chi by the chi vampire receive chi transfusions from others and gain their personality and mannerisms but not voice (or knowledge as Jade with Uncle's chi explains).
* Characters Dropping Like Flies: Lots of named characters die throughout the course of the series.
* (character)!" series of image pools, used for instances of a particular character being a troll, whether to other characters or the viewer.
* Characters from several different canons end up being related to each other (something engineered by Doctor Strange as part of
* Characters generally use fictional profanities, such as telling people to "Zark off", or swearing to the great prophet Zarquon. Interestingly, it mixes in the occasional real swear word, although usually only for effect, such as when a character receives an award for "The most gratuitous use of the word 'Fuck' in a serious screen-play".
* Characters go to the past! In the past, they change history: If they do so by accident, it well may end the story with a
* Characters have preferences when it comes to provisions they enjoy and gain additional fatigue recovery from, and these preferences often tie into their backstories. For example, Silque enjoys "Rough" provisions like Mana Herbs and
* characters have, which creates a "witching world" where witches outnumber wizards about ten to one.
* Characters having English as their second language, and avoiding contractions

because
* Character Shilling: When the Author talks about a character's traits rather than showing them, the audience will generally not take him at his word.
* Character Shilling: "Wow," said Alice, "Bad Bob is the most amazing guy in the world, isn't he?" "He sounds wonderful; I can't wait to meet him in person." said Carol.
* Characters in the books have a tendency to refer to things in vague terms early in the series, after which they are only ever referred to by name. For instance, "the Azkaban guards" are mentioned several times in
* Characters in this and later series tend to touch their communicator badge when making or receiving a call. It isn't strictly necessary, as saying "[X] to [Y]" or "[Y] here" would open the channel. It is probably force of habit on the part of the characters ("picking up the phone", as it were).
* Characters in this manga tend to look really weird, too. Case in point: compare
* Characters killed by explosions, airstrike, rockets, or missiles in
* Characters learn important information while another character talks in her sleep in
* Characters like Link and Fox can come equipped with blasters, bombs and
* Characters like Riokku and Amenbo were just forgotten about before the zombie outbreak even started. Minor villain Jigabachi actually comes back in
* Characters like the computer programmer, Soona, and the consulant, Trant Heidelstam, for example, show the downsides of having too much Interfacing and Encyclopedia, respectively, becoming obsessed by minutiae and indifferent to the actual people around them, and
* Characters named "Optimus Prime" generally look more or less the same (with the movie design
* "Characters need to appear in more than a single game" was disproven as early as
* Characters not on the Queen Zenobia generally refer to the enemies they face as, again, B.O.W's, although they'll occasionally call Hunters by their actual name.
* Characters often have unique voicelines for whatever map they’re in that reflect their in-story opinions, such as the omnic-hating Torbjörn and Zarya complaining about being in Numbani, or Winston being very uncomfortable in the Horizon Lunar Colony (where he grew up in canon).
* Characters of the same gender can fall in love and move in together, even if they can't get married like their straight counterparts. The problem is corrected in
* Character-Specific Pages: Character entries that are so large or detailed that they have their own pages.
* Characters played by Kyle MacLachlan seem to attract these moms. Orson Hodges's "crazy mother" Gloria from
* character's POV — that is, this character would be "I" if the section were shifted to first person. This is not standard, in part because it's dangerously easy for third-person to slip into omniscient on short notice.
* Characters reading from books will typically open to the middle of the book and start reading from there, as if the pages up until that point were all blank. The only exceptions are if the book is
* Characters regarded as overbooked supermen, primary and most controversial example being
* characters Robin, Batgirl, and Black Canary. In the sequel, the Bat-crew from the prior adventure make the reverse journey, seeking Nita's and Kit's help against one of Poison Ivy's plant toxins... and are greeted in Times Square by a gigantic movie poster promoting Christian Bale's latest Batman movie.
* characters simply had hit points and died only when they reached 0 more believable, as once you reached 0 or lower, you simply dropped unconscious, and if you were at below 0, you bled out until you reached -10, at which point death ensued, but included abilities that allowed a person to be a true implacable man, able to take full actions while at negative points, until they reached -10 and keeled over.
* Characters' skills tend to be appropriate to their backgrounds and interests

— for example, housewives Blodeuwedd and Solveig start with high Cooking skill, while tomboyish Kari has low Cooking skill but high Hunting, Scavenging, and Exploration. A character having a skill that seems out of place with their background is even used as a subtle form of
* Characters sometimes remark on the clothing and armor you're wearing. For example, wearing the Spacer's Choice mascot costume around Martin Callahan (who also wears that costume), gives you a unique dialogue tree discussing how you two are wearing the same outfit.
* Characters so vile and horrific in their actions that it is completely impossible to find any kind of redeeming quality in them.
* Characters suddenly having knowledge that was never passed to them, or vice versa; characters not knowing something they knew last week, or something that anyone in their position must know.
* characters''s "Want You Gone" is a perfect example of this kind of song.
* Characters taking their visors off, even assuming they are full face masks or even wearing anything to begin with, which is the number one piece of safety gear
* Characters tend to this in response to Chris mentioning something particularly dangerous about a challenge.
* Characters that fall down or take a long slide often will use the phrase "Was that/Is this trip really necessary?", a common slogan used to encourage people not to take unnecessary trips to free up gas and rubber for the war effort and to free up space on trains to ferry troops to their duty locations. Daffy uses it when he's dropped down a trap door in
* Characters that have died in this comic include Hot Dog, Jughead, almost all the major adults, Ethel, Moose, Midge, Vegas, and Jason.
* Characters that would only appear in future locations, like the Whitebeard Pirates, the Marine higher-ups, or the Revolutionaries appear to show
* characters thought it was an original concept that just needed some tweaking.
* Characters who are downright nightmarish in their actions and personalities despite being on the side of good.
* Characters who are little more than named, providing perfect Self-Insert material, especially among the Slytherins. Aside from Blaise Zabini, we have Astoria Greengrass. Name known only by
* characters who are products of the Used Future, in the form of a defective hologram, a senile computer, a neurotic service droid and the way the sassy Scutters seem to have almost developed 'personality' over the millions of years they've been left unattended.
* Characters who can change their shape or are made of something inanimate, such as
* Characters who have scars in the original story don't have them in the play, resulting in Shireen not having her greyscale scar and Tyrion's face looking fine despite "The Siege of King's Landing" covering events that got him disfigured in canon.
* Characters who individual party members have had assorted interactions with include Eugene Greenhilt (Roy's dad, who was an adventurer in his heyday) and Sir François (the guy Elan was Heralding before he ditched him after screwing up another one of their adventures).
* Characters who lose arms like: Shanks, Jozu, Nekomamushi, Perospero or people lose legs like: Zeff, Kyros and Inuarashi have grand reactions ranging from just wincing in pain to "Oh well it's just a limb" or in Kyros case not even reacting at all and just keeping on fighting.
* characters who popped up in Mickey and Minnie's wake for "Well, she's got a bow on her head!"
* Characters who pose a threat to the Statue of Secrecy are institutionalized. Dumbledore's family had to pretend his sister was sick when she actually suffered from
* Characters whose travels we do not follow sometimes seem to travel ridiculously fast, even if their ships should be no faster than the Straw Hats' ship. The following examples are not the only ones:

* Characters who utilize the Satsui no Hado (Akuma, Evil Ryu, Oni) get special finish backgrounds when their Raging Demons connect. There is no KO announcement from the announcer (implying the opponent is dead), and instead of the background flashing orange, it flashes monochrome and a different KO sound effect is used. Akuma and Oni even get this effect from their Ultras, which use a modified version of the Raging Demon KO sound effect that adds in creepy children's laughter in the background.
* Characters will fall faster than a heavy object — ensuring that the object lands on them.
* Characters with divine Manipulation abilities can function as both consummate liars and lie-detectors.
* Characters with Down syndrome are almost always played by actors with Down syndrome due to the characteristic facial features of the syndrome, which are hard to fake.
* Characters with dwarfism are also usually played by little people like
* Characters with firearms training occasionally double-tap their target if they can get away with it. The most impressive headshot in the series, however, was in
* Characters with Luck of at least 7 will probably run into the jackpot limits and get barred from gambling in about an hour of gameplay or two. The devs put this in to keep the players from breaking the in-game economy, but it also has the effect of blunting this trope.
* Characters with other Disciplines can fill this role by choosing General Skills such as Acting, Bribery, Conversation, Engaging Banter, Etiquette, Fence, Flirting, Seduction, Streetwise and Trading.
* Characters with red hair and blue or green eyes are fairly common in classic Chinese novels such as
* Characters with the Blue Magic ability can learn enemy magic by simply observing the ability in action or survive getting hit by an attack.
* Characters with these backstories feature in just about all the works in the
* Characters would occasionally help out at front line aid stations or at Korean field hospitals where they had to conduct even cruder procedures than at the 4077.
* Character Tic of Kazu, who drops whatever he's holding almost every single time he's asked a question or is told something even remotely dramatic. (This is in almost every scene he's in.) Inverted in the fact that he hardly even seems to be fazed by this in any way, regardless of what he may be holding, be it a spoon, a suitcase, a teacup, etc, even if the object breaks.
* Character Tic's difficulty remembering the name "Ian Chesterton" in rehearsal. Since it fit the Doctor's detached and absent-minded personality perfectly, and because William Russell (who played Chesterton) was able to make the cast and crew crack up by adlibbing around them, it was agreed it would become one of his most memorable quirks. (Some fans believe that the manglings of "Chesterton" in the series itself are all genuine flubs, but a quick look at the script proves this is not the case.)
* Character Tic (slapping his knee), frequently repeats words and phrases, appears to laugh and/or applaud when he isn't sure how to react to something, and fails to realize when he's said something rude.
* Character TicsYou can tell he's feeling a certain way because he's doing that thing he does when he's feeling that way.
* Character Tiers spell and switch them out regularly, meaning the DM has to pay specific attention to the character's daily loadout just to make sure they don't accidentally skip a third of the adventure.
* Character Tiers system with about five different developed metagames.
* character trait because he neither wears a belt nor wears pants that rise higher than his underwear.
* Character will generally be some kind of foil for the protagonist, especially if there is no central antagonist and the show is more about averting the disaster of the week.
* Character-wise example; Goro Majima seemingly looked like he was dying from his injuries after his second battle with Kiryu in

* Charade and tries them on, quickly discovering that they're quite real.
* Charade are going through her late husband's luggage to see if they can find something valuable enough for him to have been murdered for. They find a tin of what appears to be tooth powder; at her urging, he does the test... and concludes that either it's peppermint-flavoured heroin or it really is tooth powder.
* Charade is an animated short about a Charades player who grows increasingly enraged as his obtuse audience cannot guess his increasingly elaborate and obvious clues.
* Charade, one murder victim writes the name of his murderer on the carpet, as shown in the page pic.
* Charade plays this for laughs: Audrey Hepburn is attending the lying-in-state of her husband when three former associates show up, one by one. One begins sneezing violently, causing the widow's best friend to remark that he must've known the dead man very well: he's allergic to him. Another holds a mirror to the corpse's nostrils to check for breathing. And the third slams open the church door, strides in fiercely, and jabs a pin into the dead man's hand. Audrey's wide-eyed look is hilarious.
* Charades are sometimes used by a character to attempt to convey information which for whatever reason, such as being mute, they cannot simply say aloud.
* Charade, where a gun pointed at the heroine by a black gloved hand turns out to be a child's water pistol.
* Chara running commentary, take notes in their journal on the monsters they encounter along with illustrating the monsters with crayon drawings, and their sprite has open eyes but a neutral expression like the Human Child's, giving them an earnest, serious look at all times, even when sitting on a bench and childishly swinging their legs back and forth. It gets extra adorable if you equip the Cowboy Hat that Chara is under the impression makes them "look tough", since they wear it in the overworld too and make a point of carefully taking it off for naps and putting it back on when it gets knocked off their head.
* Chara the Fallen Child about wanting to kill only enough humans to break the barrier, or may have wanted to lay waste to their home village, or possibly to get revenge on the human race.
* Char Aznable, a.k.a. Casval Rem Deikun, is a prince from the Deikun family, and one of the most skilled pilots in the entire Universal Century.
* Char Aznable doesn't start out as one of these. In fact, it would be fair to say that in
* Char Aznable gets a section of his own, as his inability to relate to others causes much of the conflict in the various stories. When it came to Lalah Sune, he was almost as infatuated with her as Amuro was, and Lalah reciprocated, but that didn't stop him from subjecting her to horrific
* Charby the Vampirate Adria has a preference for seducing men before killing and eating them, not necessarily in that order.
* Charby the Vampirate after he continues to prove himself a disappointment by not following their village's murderously racist traditions.
* Charby the Vampirate all of Menulis' early dating attempts end with the death of his date during their first date. Luckily his eventual girlfriend is functionally immortal, especially considering she's not immune to this luck and ends up decapitated on their first date.
* Charby the Vampirate and he ended up burning his clothes rather than put them back on.
* Charby the Vampirate are a race of bunny demons whose weaker males traditionally stay hidden in their Kingdom's caves while the females are their warriors and gatherers. A group of young orycalope girls called the Rose Sisters work as guards for King Samrick since he finds it hilarious that they are surprisingly stronger and more vicious than they appear, even if they are far from the strongest things in Kellwood.
* Charby the Vampirate are informed they are the chosen ones to their respective peoples.
* Charby the Vampirate a smarmy jock's last words end up being a complaint about

his shirt being ruined when Charby tears open his torso with a pair of large hooks.
* Charby the Vampirate at speeds even Wolverine would envy. To top it off they have super powers even by vampire standards.
* Charby the Vampirate before being resurrected as zombie slaves by an actual magic user.
* Charby the Vampirate Blaine started hiring hunters to take out the vampires and other monsters preying on people living in Kellwood after seeing a vampire tear his parents apart and after becoming a competent hunter himself came before the mayor with proof of the supernatural and now has city support for his group of hunters.
* Charby the Vampirate changelings look like this mid-change as the absorb the next unfortunate whose form and memories they will take at the end of the transformation.
* Charby the Vampirate Charby understood why he felt he had such a mind-blowing experience when he spotted a piece of his own brain stuck on a friend's suit. How fast Charby noticed it tends to be mind bl.. er, to show that he's still street smart even with a piece of brain missing. Charby also had punched Zeno with perfect accuracy on the face while still headless! What a badass!
* Charby the Vampirate: "Classic" vampires have all the classic weaknesses of the vampires, while "elites" possess none of the weaknesses, save one... Obsessive Compulsive Disorder. If they come across a pile of identical objects (a pile of rice, beans, the beads from a woman's dress that had accidentally come apart), they have to count it, regardless of the circumstances. For classic vampires, this can cause them to count until the sun comes up, and they die. For elites, trying to use this on them just ends up pissing them off, since the sun has no effect on them.
* Charby the Vampirate comes back as a vampire with an altered personality and tries to turn Victor he puts her back in the ground for good.
* Charby the Vampirate Daray's parents issue a kill on sight bounty on him after he proves a disappointment by not murdering any dragons, which is considered a traditional coming of age right in their village, being mistaken for trans by his homophobic father after a magical mishap temporarily enlarges his chest, for which they disown him, and setting their house on fire as a birthday present to himself.
* Charby the Vampirate: Demon King Samrick has four arms, two legs and a pair of wings.
* Charby the Vampirate discovers that he died of his injuries after escaping the lab and was brought back as a zombie by the two "elves" that had taken him in prior to meeting Charby and Menulis.
* Charby the Vampirate doesn't know most of the forms abilities. While she did suddenly learn she could teleport during a fight, and apparently has much greater strength, she still hasn't gotten around to learning to fly and mentions the fact to herself every time she gets stuck in a situation where flight would get her to safety.
* Charby the Vampirate enforced it on LaBelle with a curse that makes her actions affect her beauty.
* Charby the Vampirate fashion whom they probably considered a friend.
* Charby the Vampirate forces you to do this, so cancerously numerous are the characters... and unlike some amateurs, the author will keep track of every single one of them correctly and will give us time to be emotionally attached before she gets around to killing them off so the archive binge is as necessary as it is recommended purely to get full emotional stress when the killing begins!
* Charby the Vampirate has her throat torn out by the titular character for her fearless, whiny, and loud complaints about his behavior, which at the time consisted of drinking blood from a dog, and his wearing "lipstick" (actually blood). To his horror, she returns as a nigh immortal vampire with a severe case of sire attachment and no more maturity than she had in life.
* Charby the Vampirate has quite a few admirers among short demons and fay. It helps that in many ways her body is alive if not aging and therefore not rotting.
* Charby the Vampirate have bodies constructed using a lost art that were brought to life with the insertion of their soul gems.
* Charby the Vampirate he starts by slaughtering their female warriors and

gatherers whenever they are out of the caves in small manageable groups. He even manages to have one of his people slip in and assassinate their queen, leaving only men and children when he actually invades and massacres the rest of the survivors.
* Charby the Vampirate Hexavier is a zombie necromancer, building Remote Beast out of several dead dogs and raising a zombie cat.
* Charby the Vampirate including the vampires Charby, Zerlocke and Adria and the zombies Mye and Hex.
* Charby the Vampirate is a cat youkai with cat ears and a humanoid face and figure, her calico hair is styled in a loose layered bob and her remaining hand is multicolored calico, her twin brother is slightly more humanoid in appearance than she.
* Charby the Vampirate is full of man eating monsters rather like the surrounding forest.
* Charby the Vampirate is particularly susceptible to possession, due to his broken mind, lack of self worth, and submissive personality.
* Charby the Vampirate is quite nice and well lit, except that it is a complex of caves with a laboratory and deep pit from which at least one monster has come.
* Charby the Vampirate keep a bookshelf full of spell and potion books in the basement next to their cauldron.
* Charby the Vampirate later after it got loose. We didn't learn that evil came in cans until after the fact.
* Charby the Vampirate Manick finds himself scolding the arms and tentacles from his stomach portal as they have a tendency to try and pull things in.
* Charby the Vampirate: Maro is an adoring father and good husband to boot. On the other hand most other parents shown have serious failings or are outright abusive so his cheerful family provides a nice contrast.
* Charby the Vampirate Maro tries out his "dad jokes" on his kids before coming to work and inflicting them on his fellow retainers.
* Charby the Vampirate Menu escapes from the much larger werewolf that turned him by fleeing into a small abandoned mine shaft it can't fit in.
* Charby the Vampirate monster hunters, alongside multiple flavors of vampires, werewolves and zombies among other things.
* Charby the Vampirate: Mort is the tallest human in the cast, and his boyfriend is a petite thing that comes up to about his elbows. Mort is also a muscular amoral monster hunter while Velvet is a skinny innocent who is unaware of the supernatural mess around Kellwood.
* Charby the Vampirate Nikodemus keeps delaying informing Vita of his feelings for her even after a coworker has informed her of his very obvious crush. Her annoyance with his hesitation eventually leads her to turn her attention to Quixoto.
* Charby the Vampirate of being vivisected alive his first night in the cabin and one of the individuals trying to manipulate him gives him further bad dreams in the attempt, some of which are shown in comic.
* Charby the Vampirate: One of Charby's preferred forms is of a red-eyed white bat and he starts off the series proper as an unrepentant murderer that Kellwood's vampire hunters have been warned to avoid who casually kills people in relatively secluded places all over the city.
* Charby the Vampirate: One of the monsters that killed Jorro and Ezza had a mouth full of sharp teeth on its stomach.
* Charby the Vampirate on his head. Their was also a story arc in which the hat was mad at him, so he experienced many Rummage Fails in quick succession.
* Charby the Vampirate on the place. When Charby and Mye invite Yiska into town with them she insists they disguise themselves as human first although Mye points out that it's not really necessary.
* Charby the Vampirate: Sadick’s journey to find his runaway little sister and return her and Meerse back home led to him accompanying K’ale to help K’ale find his little brother, acquiring K’ale, Bojo and LaBelle as companions in traversing King Samrick’s lands in search of his sister and eventually entering King Samrick’s employ to irritate his father as it should theoretically make his recovery of his sister legal.

* Charby the Vampirate s before Hex regained enough control to fight back and ended up very lifelike.
* Charby the Vampirate. She kept Zerlocke chained and repeatedly gave him mortal wounds for a human lifetime, his preferred prey is human children, and he likes to mentally torment his prey and let them try to escape him before eating them.
* Charby the Vampirate's Mye says she's not that kind of zombie, right before tucking in to a meal of chilled human brains anyway.
* Charby the Vampirate starts in 1994, eventually things progress into the 2000s and the current arc is set in 2004.
* Charby the Vampirate than it looks on human maps or when flying over it or walking around it would make it an easy place to become hopelessly lost.
* Charby the Vampirate the fire sprite that ends up living at the cabin with the main characters had never met anyone who could actually be hurt by being set on fire before arriving there so he thinks Menulis is overreacting when he sets him on fire.
* Charby the Vampirate. The hunter George was dating a human girl who was changed into a vampire by vamps seeking revenge against him, and she retained enough of her personality that they continued dating. Victor was courting a fellow hunter who was changed and who pretended to be into him in order to get close enough to try and kill him. At Samrick's party one of the members of the Vampire council is noticeably interested in Victor and flirts with him, but the chaos that soon unfolds prevents them from interacting again.
* Charby the Vampirate: The Orycalope Kingdom was dug into the hills as a series of labyrinths and underground cities. They kept to themselves which meant many of their nearby neighbors were not even aware when the orycalopes were massacred by King Rodericke. Those living nearby did notice that there were suddenly a lot more vampires around as the newly emptied underground cities proved a convenient place to stay out of the sun during daylight hours.
* Charby the Vampirate. The prince himself lost an eye and was shunned by his father and kept hidden from the public following the event.
* Charby the Vampirate: The reason the Elite Vampire Council is trying to recruit Charby is that he is older and stronger than any of them.
* Charby the Vampirate Tony sees an elf girl being chased by a large pointy-toothed beast and he kills it to save her only for her to start railing on him for killing her pet.
* Charby the Vampirate turns himself into a swarm of cockroaches so often in his physiological torment of Blaine that Blaine recognizes a mass of the things in his room as the vampire even without seeing them while they are still in his shape.
* Charby the Vampirate, vampire hunters Vic and Blaine both wear long coats when they go out a-slaying. Nebbish boss Blaine wears a black, buckled coat over his office attire. Vic sported a plain grey coat for the longest time but recently had an upgrade to a dark grey long coat with red trim. Charby himself prefers long coats with lots of expressive tendrils of shredded cloth at the bottom.
* Charby the Vampirate was slapped by his eventual fiance the first time they met since she didn't recognize him and subsequently couldn't get her out of his head.
* Charby the Vampirate wears a mostly standard uniform except for her missing right sleeve which is likely due to the nature of her new right arm.
* Charby the Vampirate: When Charby escaped from Captain Blackheart's ship he packed his belongings in a knapsack tied to a stick.
* Charby the Vampirate when they can't find the remote. Tony has found it by the time they are finished.
* Charby the Vampirate while out jumping over rooftops as a ninja by night.
* Charby the Vampirate whose trade with their god for power has caused descendants of Ixzerites that are completely unaware of the religion to unconsciously act to support Ixzerit.
* Charby the Vampirate, winged large-eyed gerbil-like traders that often to wear hats and scarves and whom shopkeepers cater to as they’ll get a place more business if they like the shop.
* Charby the Vampirate, with red upholstery and a tail hole for comfort.

* Charby the Vampirate, Yiska has three bird familiars, their skulls adorn her tarnkappe where they maintain a glamor to make its color match her outfit and she uses two of them to send and receive messages.
* Charby the Vampirate: Yiska's hat is adorned with the skulls of her avian familiars.
* Charby the Vampirate Zeno was forced to wear 'the loincloth of shame' and ostracized by the other Scotodino as a child.
* Charcoal March of Spiders: when you absolutely, positively have to punch out everyone on the
* CharCole is a female Cubone, but since Cubones are a Pokémon species without visible sexual dimorphism, her trainer, Brian, did not realize this until he was informed of Dante's sex by Pokémon Center staff weeks after first catching her. Until Dante's gender was revealed, Brian's entire Pokemon Team (who were just as clueless as their trainer) considered her a boy, something that Dante is quite offended about once she learns it.
* Chardee Macdennis). Challenges ranged from getting darts thrown at your hand to having insults hurled at you for extended periods of time. The winner gets to smash his opponents' game pieces.
* Char delivers quite the coup de grace to Princess Kycilia. With a rocket launcher. He also took off the Gundam's head with the Zeong.
* Charge Attack, but sometimes certain Pokémon just fire it immediately without charging and with no Sunny Day to accelerate the process. This is especially blatant in the Kalos Saga.
* Charge-into-Combat Cut: The film switches to a different scene just as an epic battle is getting started.
* Charge-into-Combat Cut - Two people or groups of people get ready to fight, but the scene shifts.
* Chargeman Ken!, The Jural, strangely enough, are not affected by bullets, but they are by Ken's laser gun.
* Chargeman Ken!) uses of this trope in an episode where the evil aliens turn a kind-hearted scientist into a human bomb. When Ken finds out he gives a perfunctory apology, then dumps the scientist out a trapdoor onto an enemy spaceship, blowing them to Kingdom Come.
* Chargeman Ken!, where the number of frames of animation in any given scene is usually in the single digits.
* charge out from their cover into a firefight that'll most likely kill them.
* Charger is little more than an oversized paperweight, and completely worthless outside of melee combat.
* Chargesdotcomdotbr family. Maluf also claimed the accusations are a consequence of the Brazilian Presidential elections of that time because he led the run. The bad angel said it's just someone summon him for an official statement and he runs off to Paris. The good angel quit after that.
* chargesdotuoldotbr once parodied it with a Ford advertisement parody. The disclaimer stated that, like every ad, it has something written on a small and almost unreadable font that serves as the advertiser's defense if someone sues by saying "Hey, that I didn't know".
* charges the teacher and slaps him. She then starts talking about his seduction methods with first-hand knowledge. With her husband the cops all staring, she says she and the guy had a one-night stand... 17 years ago. "Do the math," she snaps as she reveals he's been sleeping with his own daughter. Unlike others from the show, he's more horrified than anyone else, begging "I didn't know" when the man everyone thought was the father has to be held back from throttling the guy. The girl's reaction? She smiles brightly
* Charging into battle in a righteous rage, wreathed in power, is not a good idea when you are severely outnumbered
* Charging) when observing from a safe distance might make more sense.
* Charging with light cavalry exactly once, in the middle of the enemy lines. Light cavalry are usually used for flanking, since their attacks lack either the power, reach, or the sheer crushing momentum of heavy cavalry to penetrate enemy

lines.
* Char inherited his mask from the character he was inspired by, Prince Sharkin of
* Chariot is simply inspired by the fact that a 727 Boeing disappeared without a trace in 2003.
* Chariot is simply inspired by the fact that a Boeing 727, sitting on the ground doing nothing in Angola, was stolen by a mechanic, took off, and disappeared without a trace in 2003.
* Chariot of Fire is set in an updated version of Dante's Inferno, and follows the posthumous adventures of a British railway man tasked with building a railway between the Circles.
* Chariot. Operation Chariot is a secret government program to save valuable or useful people in the event of a massive attack on the United States. Those on the list are kidnapped from their homes by government agents, regardless of whether they might want to stay and die with their families.
* Chariots of Fire) did the flipside of this also in 2009, appearing as a conman called Lewis, who had a brief affair with Ken's wife Deirdre.
* Chariots of Fire, Eric is more Harmony, though he as a good streak of discipline as well. Harold is the extreme of discipline.
* Chariots of Fire felt that an utterance of the word "shit" in its dialogue would keep the film from a G rating.
* Chariots of Fire. Interestingly, it is well done enough to make him more likable because of this instead of making him "sue-ish."
* Chariots of Fire is a biopic about track athletes Harold Abrahams and Eric Liddell, who competed for Britain in the 1924 Olympics.
* Chariots of Fire shows Harold Abrahams and Eric Liddell training for the Olympics, with Abrahams doing runs on a track in Cambridge and Liddell running through the highlands of Scotland.
* Chariots Of The Gods: Discussed via thought experiment. Von Daniken postulates a world where much of civilization has been destroyed. The older generation tell stories of how it used to be to their children, who write it down. Each story begins with "My father tells me..." After a few generations the context of "My father tells me..." is lost, and new translations/editions of the collected stories of the fathers use "My father says..." and eventually "Our Father says..." promoting the first generation to virtual (if not actual) godhood.
* Chariots Of The Gods He followed it with a long series of sequels, getting even more out there (in some cases also bizarrely racist, e.g. once "speculating" that races were genetically engineered by ancient aliens, Black people being a much inferior, abandoned variety in comparison with the Europeans).
* Chariot. The drydock was disabled for the rest of the war. The entire operation was so ballsy that the Germans sent messages to the British recommending that the raiding party be decorated for their gallantry and the British handed out medals based on those recommendations.
* Charisma (a measure of physical appearance, leadership skills, and ability to influence others).
* Charisma Carpenter, already 10 years older than her role, matronly bobs didn't help sell her as someone just out of high school.
* Charisma Carpenter" because that was the first time she got to stake a vampire.
* Charisma Carpenter — has said that numerous fans tell her they named their daughters Cordelia after her. The name had declined in popularity after the 1800s, and the show gave it a small resurgence.
* Charisma Doll Kazuma wants Sara to "follow in her footsteps" and have a chance to be a star. Sara doesn't like being a pop idol, because she feels that her androgynous appearance and voice are nothing but a cheap gimmick to get money.
* Charisma Doll, Sara likes Hayase, who's the most popular guy. He's also a huge pop star, so that's why he's so popular. He actually likes Sara's alter ego popstar personality Sala.
* Charisma is a pegasus pony born with a "Killer Mark", which makes her a natural born
* Charisma Man, a comic book produced for English-speaking expatriates in Japan.

The title character was a dorky Canadian unsuccessful with women in his own country - until he arrives in Japan where he instantly becomes suave and supercool, admired by all the locals, and able to pick up any girl he wants. His mortal enemy is "Western Woman", the only one aware of what a loser he really is.
* Charismatic is what brings, and keeps, the team together. At an impasse, everyone else is willing to agree to what they want to do and won't argue. The strongest of these are the core of their group, weaker ones are mascots or figureheads. May overlap with or evolve into any of the other three types.
* Charité at War after her daughter's disability becomes obvious, but she still takes advantage of de Crinis' affection for and attraction to her to save someone from the concentration camp.
* Charité at War and makes this a huge theme; protagonist Anni has to recognize this about herself. Like many others, she isn't exactly a full-on Nazi, but she never did or said anything when "undesirables" were systematically sorted out and murdered by the eugenics programme. That attitude is decried by dissidents like her brother Otto, but it's still extremely prevalent — even Professor Sauerbruch, a supporter of the resistance, is not innocent of it. Anni learns to acknowledge her guilt.
* Charité at War, and several dissidents angrily call the passive supporters of the regime out on their willingness to turn a blind eye to the persecution and systematic murders of "undesirables". Protagonist Anni, reproached by her dissident brother Otto, insists that something so horrible would never be lawfully made possible, but later has to face that she knew early on and decided to condone it.
* Charité at War, and the Nazis are still a lethal threat for Anni's disabled baby daughter and Martin's boyfriend, a deserter, so keeping them hidden is necessary, and since the city is falling to pieces around them, the supply situation has broken down entirely.
* Charité at War, an oblivious Otto helps his colleague and co-veteran Martin with his prosthesis, which includes applying ointment to his sore thigh stump. Martin is... well, mildly flustered.
* Charité at War: A rather unusual political version of this trope. Sauerbruch the good doc is anti-Nazi and tries to avoid handing over soldiers with self-inflicted wounds to the army for court martial, and he firmly protects resistance fighter von Dohnanyi and is disgusted with and horrified of the eugenics programme. De Crinis the bad doc is an evil Nazi who fully supports the entire eugenics ideology and denounces wounded veterans.
* Charité at War: During an air raid in Berlin, Hans von Dohnanyi and his wife turn on the radio and dance, ground-shaking noise and flickering lights be damned. They have gotten so used to the permanent bombings that they might as well share some quality time as a couple while waiting out whether or not they have to die that night.
* Charité at War, gets massively drunk on his sister's party in an attempt to forget about his war trauma. It's not pretty, but at least he doesn't make it a habit.
* Charité at War is the last straw for him — he deserts and goes into hiding.
* Charité at War, Nazi nurse Christel drops her tray of surgical instruments when she hears that there has been an attempt on the life of Adolf Hitler.
* Charité at War. Protagonist Anni starts out as one of those but has to reconsider her passive compliance when her own daughter is born disabled.
* Charité at War regarding her passive support of the Nazi regime and the eugenics programme now that her own daughter is at risk.
* Charité at War, renowned surgeon Professor Sauerbruch exploits this trope for all it is worth, though it has less to do with his ego and more with wanting to protect people, especially dissidents, from the Nazis.
* Charité at War; the first episode features a leg amputation, and the patient angsts about being a cripple but is reassured by the medical staff, especially orderly Martin, a veteran himself whose right leg is a prosthesis. Thanks to the rather sophisticated prosthetics techniques, it's a pretty good one,

too; Martin barely even limps (and is able to carry someone his own weight down a ladder and a staircase). Later in the series, Graf von Stauffenberg shows up at the hospital after he's lost his hand, and him getting a prosthetic for the right hand and a few new fingers for the left is discussed between him and the doctors.
* Charité at War was a success. They're in for a bitter disappointment.
* Charite. But when she also stands up against his wife to get him help when he's ill, has his back during the scandal that destroys most of his career, and marries him after his fame has paled somewhat, it becomes increasingly clear that she really loves him.
* Charite, Doctor Behring says to his very gracious benefactor, Director Spinola, that he feels honored to be treated by him as a part of their family — and has missed that, only a moment before, Spinola was commenting on what a pretty couple Behring and his daughter Else are, having always tried to make a match of them. Before Behring has realized as what his phrasing comes across, Spinola already announces their engagement. It's rather dramatic as Behring was at the time making plans to marry the love of his life, Ida Lenze, who now thinks he's let her down, and there's no way for Behring to back out without getting into serious trouble with the prestigious Spinolas.
* Charite ends this way, with protagonist Ida Lenze marching out of the hospital where she's been a nurse after she's worked off her debt, travelling to Zurich for her medical studies to become a doctor. It's a triumphant end for her, but she leaves a lot behind: colleagues and companions, two men who loved her, the grave of a dear friend whose loss she still mourns.
* Charite had this as a pretty important secondary plot: Nurse Edith, a woman of a social-democratic mind, complains about the terrible working conditions of the nurses in her hospital, and gets politically active to get them more rights, better their working situation, and achieve some recognition for the hard work they do in sixteen-hours shifts and with low hygienic standards.
* Charite. Note that the latter at that time still thinks they're just really good friends; the matron was the only one who realized how deep Therese's affection actually went.
* Charite, nurse Ida and Doctor Behring. Noticing her interest in medicine, Behring lets her listen in on the auditorium in secret (women aren't allowed to study medicine in late 19th century Germany), gifts her with an anatomy book, teaches her medical and surgical procedures, writes her a recommendation letter for the University in Zurich — and kisses her whenever he's in a good mood over his successes. Ida knows what a troubled character he is, but she's also fascinated by him and admires him, and there's the fact that he's the only one who supports her plans and believes in her abilities. Downplayed, because Ida is an adult and Behring has no official authority over her.
* Charite sketches Ida, a young woman who's a patient of the university hospital, when she's sleeping after her surgery. Afraid to have offended her, he gives her the sketch later when she has recovered and they know a bit better, and Ida decides to keep it.
* Charite, troubled Doctor Behring. Ida insists that he can be caring and compassionate — which barely anyone but her ever gets to see.
* Charity and Michael Carpenter Harry looks at Charity embracing her children and thinks:
* Charity Hospital in New Orleans was somewhat rundown before Hurricane Katrina. Afterwards...
* Charity Motivation Song, a concert dedicated to environmental causes, was almost universally criticised for its ridiculous carbon footprint, the idea of charity songs with dozens of participating artists and massive charity concerts fell heavily out of favour due to public cynicism about the artists and organisers motivations. Since then any charity songs and concerts have been much smaller scale and lower key, often to benefit one single issue charity, a venue or to assist someone in the industry suffering hardship.
* Charity Motivation Song as remotely high profile and effective for a good cause.
* Charity Motivation Song: From late 1984 and 1985 on, when "Do They Know Its

Christmas?" and "We Are the World" came out respectively.
* Charity Workplace Calendar: Posing for a workplace calendar to raise money.
* Charizard and Dragonite, both of which have fully functional wings, could not learn the move Fly until the releases of
* Charizard became this to the rest of Ash's team (Pignite in particular).
* Charizard flips out when Team Rocket destroys the table full of food he is eyeing.
* Charizard. Iris makes the assumption that Charizard is a Dragon-type, much to the disbelief of everyone, mirroring those who don't know Charizard's actual typing (fire/flying), and the fans who would repeatedly correct them, respectively.
* Charizard 'M. Charizard 'M can also change all of a player's party Pokémon into Charizard 'M, but the moves and type do not change, and putting these "transformed" Pokémon into a box makes the other Pokémon Charizard 'M also.
* Charizard was very popular in Pokémon's heyday, despite Pikachu being the mascot. A substantial amount of people bought
* Charlaine Harris, Harper develops a romantic and sexual relationship with her stepbrother Tolliver that eventually leads to them becoming engaged, much to the shock of their relatives. Making it especially squicky, they have two mutual half-siblings from his father's marriage to her mother.
* Charlaine Harris's Harper Connelly series. Harper has the ability to detect the location of the dead after being struck by lightning. In addition, she is scarred, and has muscle spasms and debilitating migraines as a result of the lightning strike as well.
* Charla Nash, a woman who was mauled by her neighbors' pet chimpanzee before receiving a facial transplant.
* Charla Nash, the victim of a domesticated animal attack, had most of her face as well as her right hand ripped off when her friend's pet chimpanzee mauled her in 2009.
* Charlatan, a biography of notorious quack doctor John W. Brinkley, starts with Brinkley's demonstration for the Kansas State Medical Board in 1930 and the board's subsequent revocation of his license, then jumps back to tell Brinkley's life story starting with his birth in 1885.
* Charlemagne: although (while not on campaign) he refused to dine unless all of his available children (he accepted that sometimes, his sons would be out on kingdom business) were at the table with him and forbade all but one of his daughters from marrying, he also was more than happy to let his daughters have children out of wedlock with various courtiers.
* Charlemagne at the beginning of the 9th century. It is actually unclear if Abul-Abbas was trained for war or Charlemagne intended to use it as such, because later accounts were sensationalized. What is certain is that Abul-Abbas lived for eight years after arriving in Aachen, that Charlemagne took it with him when he marched north to answer a Danish attack on Friesland, and that Abul-Abbas died suddenly at some place beyond the Rhine called "Lippeham". The prevailing theory is that Lippeham is the confluence of the rivers Lippe and Rhine, and that Abul-Abbas died of pneumonia after being made to swim across the Rhine, which proved to be far too wide and cold for him.
* Charlemagne, or Charles the Great, as their ancestor. Charles was not a first-class fornicator; he had five wives (two marriages were annulled, three wives predeceased him) and five concubines, but he never had more than one wife and one concubine at a time, and he doesn't seem to have done much outside those relationships. However, he had eighteen children, of whom all but two or three survived childhood, and most in turn had children—many of whom were illegitimate and therefore ended up having descendants marrying into the lower nobility or the ranks of the commoners sooner rather than later.
* Charlene and Scott began when she punched him in the face after he mistook her for an intruder breaking into his neighbour's house.
* Charles Addams cartoon features the gag of a woman with eyes where her nipples should be. It is funny. And appalling.

* Charles Addams cartoon has a non-verbal example where a skier looks in shock at a skier managing to get past a tree in his way just by spreading his skis around the tree.
* Charles Addams did a visual variant on this with a cartoon showing the members of Smith, Smith, Miller & Smith leaving their office- three tall identical guys, and one shorter guy who looks totally different, and as indicated by the name, is standing third in line.
* Charles Addams had a group of jungle explorers come across a plant that might be a new species of carnivorous plant. It has one of the explorers halfway eaten.
* Charles Addams human is being carried off in this fashion from a beach.. with the guy's wife running along underneath yelling up at him to drop the keys to their car.
* Charles Addams once drew a cartoon showing a golfer grimly prying open an alligator's mouth as his young black caddie pokes around inside the beast with a club attempting to retrieve a swallowed ball; the golfer's partner admonishes him to "just play another one."
* Charles Addams, or somebody along the same line showed some witches arriving at a coven meeting riding their broomsticks this way. They're described by another witch as "the beach crowd" or "the Malibu crowd."
* Charles Addams: The cake really is a giant cake, and everyone except the guest of honor looks rather disappointed at the gigantic slices they get served.
* Charles and Alex discuss this as they're heading towards Moira's office.
* Charles "Andy" Williams was smiling while shooting at his classmates.
* Charles Atlas Superpower, and even that would be only a minor inconvenience). At the end, their adversaries would either be swiftly brought to justice or ironically killed in the last few panels, and the comic would abruptly end with the heroes leaving to go elsewhere. From the perspective of an unsophisticated, hard-living guy like Hanks, who abandoned his children at a young age and regularly got into bar brawls in taverns across New York, this was a perfectly sensible way of telling a story.
* Charles Atlas Superpower and he only uses them when he thinks he needs them or if it makes his job easier.
* Charles Atlas Superpower: A non-powered character after plenty of training can do things only superhumans are capable of.
* Charles Atlas Superpower: A normal that does things that only superhuman are capable of after lots of training.
* Charles Atlas Superpower, because it is pretty much done by further adrenalizing an already trained and powerful body.
* Charles Atlas Superpower: The basis of many special powers and abilities is presented as long, arduous training, often from childhood.
* Charles Atlas Superpower). Thus, even insanely powerful ninja have to avoid simple things like kunai and explosives and the strongest techniques are the ones that make being hit nearly impossible.
* Charles Atlas Superpower to fight Earthling-level crimes as a superhero.
* Charles Atlas Superpower - Unpowered character who can do superhuman things after extreme training.
* Charles Augustus Magnussen is the updated version of Charles Augustus
* Charles Augustus Milverton in "Dead Man's Switch" killed his blackmailing partner, Abraham Zelner/
* Charles Augustus Milverton, who bought compromising documents from disgruntled servants, squeezed the documents' writers for every farthing he could, and then ruined them anyway when they revolted or if he simply felt like it. After his death,
* Charles Barkley did this to a fan as retaliation for getting hit with a cup of ice.
* Charles Barkley famously used this stigma to great effect in a Nike commercial that began with him saying, "
* Charles Barkley was known, among other things, as the Round Mound of Rebound. Despite being listed at 6'6" (1.98 m) and actually standing a little less than 6'5"

(1.95 m), which was short for an NBA power forward, he was very thick, heavy, and strong, and would win rebounds and score putbacks by physically clearing the taller, scrawnier players out of the way with brute force.
* Charles B. McVay III labored for years to try and overturn the court-martial, and eventually McVay was exonerated by President Clinton in October 2000.
* Charles Boyer in a Paris cafe, but Ricky convinces him to tell her that he's just a look-a-like. She later persuades this "false" Boyer to play the real one in an attempt to impress Ricky and the Mertzes, instructing him on how to be a more convincing Boyer as he doesn't quite have the same passion.
* Charles Boyer. Interesting detail: the line was prominent in the trailer, but not in the movie itself.
* Charles Brockden Brown (1771-1810): The first important American Gothic writer, best known for
* Charles Bronson as "just another Michael Winner-Charles Bronson picture"
* Charles Bronson, Bronson's character Albert Johnson breaks up a dogfight after he arrives in the Yukon frontier town and rescues a wounded dog. The locals try to get payback for this by laying siege to Johnson's cabin, killing the dog in the process.
* Charles Bronson despite the fact that any number of people must have seen the incident, and the injuries would be more consistent with suicide or an accidental fall.
* Charles Bronson-esque attack on a woman's dormitory) while completely naked.
* Charles Bronson of the crew, had worked as a coal miner in his youth and was able to advise Sturges on earth movement.
* Charles Bronson's whole career. After an early life of extremely unpleasant and menial jobs, he took a stab at acting simply because he thought it looked like an easy way to make money. Even after he became the best-paid actor in the world, he described himself as "a product, like a cake of soap to be sold." In all of his interviews, he insisted that he had no opinions about the movies he appeared in or the roles he played. He simply memorized his lines and performed as needed.
* Charles Bronson. That man's son, Steve, ends up being trained by Bishop as his protege. At the end of the movie, the sociopathic Steve poisons Bishop, who as he dies asks if this is revenge for his father. Steve replies casually: "Oh, you killed him? I thought he just died."
* Charles Bukowski gave up writing for ten years because he stopped caring about it and grew fed up with publishing. He admitted that he was hopelessly lazy and unambitious and spent years in a low-paying position in a post office. It wasn't until he nearly died of a bleeding ulcer that he started writing again. After that, he became extremely productive with his poetry. His protagonist Henry Chinaski was the epitome of this trope too.
* Charles Bukowski's short story "The Copulating Mermaid of Venice, California" is about two drunks who steal a corpse out of the back of a hearse as a prank only to discover that it's a beautiful naked woman. One of the two men quickly decides to have sex with it, and the other man follows suit. They eventually dispose of the body by pushing it out into the ocean, but not before the first man has fallen in love with the corpse.
* Charles Bunsen the chemist proposed to a girl who said yes. He then became so engrossed in his lab work for weeks on end that he forgot about her and his proposal. When he emerged and proposed again, she turned him down.
* Charlescomm: Diplomat/Espionage, with some Unit Specialist on the side. Charlescomm only uses archons, flying units with a variety of special abilities that make them suited for spying and surprising the enemy with unexpected tactics. Any archon can also open up a line to Charlie at any time, allowing him more diplomatic options than most Rulers. More than anything else, Charlescomm relies on deals, loopholes, and unique magic items Charlie created by hiring casters from the Magic Kingdom.
* Charles Dance is planning to move to Clatterford becomes a major plot element in the third season.
* Charles Darwin and Alfred Russel Wallace. One reason you don't hear as much about

Wallace these days is that he outlived Darwin for 30 years and bought hard on the Spiritualism fad of the Turn-of-the-Century, becoming a prominent advocate for it and the non-material origin of the human mind.
* Charles Darwin. And his first scientific monograph discussed the formation of coral reefs from subsiding volcanoes. Keep in mind this was before the discovery of plate tectonics.
* Charles Darwin based on ancient Sparta's practice for instance. Selective breeding of plants and animals is as old as agriculture.
* Charles Darwin, had Darwin gotten to read the paper that clarified the one part of his theory (patterns/mechanisms of heredity) for which he'd not found decisive evidence.
* Charles Darwin). Indeed he intended for it to be published posthumously until Alfred Wallace had a similar theory and Darwin had to publish it or lose credit for his life's work.
* Charles Darwin is a decent treatment of hominid evolution, many creationists still dissent from its claims.
* "Charles Darwin" is a trademark when applied to roses, according to a sign in the Bronx Botanical Garden.
* Charles Darwin once famously pointed out that the way Laocoön's eyebrows bulge in
* Charles Darwin, one of the onlookers, "trembling with honorable Christian rage, picked up a Bible and was just prevented from throwing it at Huxley."
* Charles Darwin tried using bolas during his visit to Argentina. He was relatively lucky, and only tripped up his own horse. The gauchos with him reportedly found this very amusing.
* Charles Darwin was so horrified by finding out about the habits of parasitoid wasps that it destroyed his faith in a benevolent God.
* Charles de Gaulle in France. Hitler had been able to seize power partially thanks to Germany's hatred of France after the humiliation from World War I, and he wanted to break the cycle of hatred between the two countries. Thanks in part to his efforts, the two now get along pretty well. He also granted an amnesty to Marshal Pétain, leader of the French Government of Vichy (who had collaborated with Nazi Germany), arguing Pétain's actions could be explained by his old age.
* Charles de Gaulle: President of the Provisional Government of the French Republic from 1944 to 1945 and President of the French Republic from 1958 to 1969.
* Charles de Gaulle states that his wife walked in on him while in his bath, and promptly exclaimed "Oh my God!" To which Charles replied "You may call me Charles, dear, I've learned to remain humble."
* Charles de Gaulle was solved when a wanted Foreign Legion deserter was detained for not having papers at a police checkpoint.
* Charles de Gaulle, where it was seen as a serious breach of protocol.
* Charles de Lint has a character based on the legend of the guitarist at the crossroads.
* Charles de Lint have no sense of empathy and are very mischievous. The ghost in the book was a lonely nerdy boy whom they befriended because he could see them. They told him they would make him able to fly and when he jumps off the school roof they let him fall to his death for their amusement. They don't really understand why he's so mad when he comes back as a ghost. They didn't lie to him, they can actually make him fly and they were doing so but they just decided it would be funny to let him fall.
* Charles de Lint, Lillian is assured that the Father of Cats can get into your dream and chase you there, and if he kills you, you die in reality.
* Charles de Lint maintains consciousness only long enough to see his body collapse.
* Charles de Lint, she has to pull out the poisoned arrows he was shot with, and then bring him to Aunt Lillian for more treatment.
* Charles de Lint, the deceased Kathy describes herself as not being gay or straight, she doesn't love anyone else, just her best friend (and protagonist) Isabelle... who is, if not precisely homophobic, definitely very straight.

* Charles de Lint, the Yakuza (or, to use in-universe slang, the "yaks") are the primary antagonists — in Canada.
* Charles Dickens, 1870). All in an urban environment and graphically depicting the life of the low classes.
* Charles Dickens: After the death of the old convict, Pip runs home and falls into his bed in a fever, only to discover on his waking that he is now at Joe's house.
* Charles Dickens; although he was deeply in love with Belle, his pursuit of fortune eventually drove her to break off their engagement. The Ghost of Christmas Present shows him what she's doing now - she married someone else and is the matriarch of a loving family, and Scrooge is devastated to think that he could have had this with her if he'd been less materialistic.
* Charles Dickens and Quilp praise the profession of a lawyer and its advantages before Richard Swiveller.
* Charles Dickens) are doomed to wander the earth observing all the people they could have helped, but lacking the power to do anything for them.
* Charles Dickens, both of which take place within what was then living memory.
* Charles Dickens breaks up with Scrooge when she realizes that his personality has changed and his love of wealth now overshadows any feelings he has for her. When Scrooge points out that he has never asked to break off their engagement, she rejects it as pity or a sense of obligation.
* Charles Dickens by Thomas H. Bartholin, which provides a report of such an incident that is dated from the late 1400's.
* Charles Dickens Compeyson, remaining dressed in her wedding dress with the clocks stopped at the time she was betrayed, and the rotten wedding feast in place.
* Charles Dickens). Fagin didn't care at all about members of his gang that were hanged for stealing (the fact that most of them were children only made it worse), but he would do anything in his power to silence one who he thought would rat on him to the authorities.
* Charles Dickens. He published his first works as "Boz." Years later, he went back to using his real name.
* Charles Dickens. He tells various Companions that works by these authors endure for millennia after even the Companions' time.
* Charles Dickens is very short by his standards. (Then again, he WAS paid by the word...)
* Charles Dickens) It's a great moral breakthrough when Arthur Clennam and Mr. Pancks both accept their sole culpability after things go haywire.
* Charles Dickens knew a lot about debtors' prisons — his father had been in one. His experience working as a child while his family struggled to lift themselves out of debt inspired a number of characters and plots detailing the horrific plight of children in poverty.
* Charles Dickens, Pickwick, talking to his landlady, asks whether it's true that two can live as cheaply as one — because he's thinking of hiring a manservant. She takes it as considering whether this trope applies and so a marriage proposal.
* Charles Dickens recounted that while writing and plotting novels by day, the characters got into his dreams and spoke to him by night, offering critical comment on the plot and characterisation and helpful advice as to how it should proceed.
* Charles Dickens regularly published his stories as serialized articles in newspapers and magazines. In addition to the primary story, he'd often include extra scenes, out-takes, where-are-they-now-style vignettes, and so on.
* Charles Dickens, Rosa Bud and Mr Drood are to enter into a marriage arranged by their late fathers.
* Charles Dickens. Something of an aversion in that, even though it was almost immediately a critical hit and is regarded as a classic today, it ultimately didn't make Dickens as much money as he hoped it would — he had to pay for the publication of it himself because his usual publishers refused, but what set him back was his insistence of hand-colored illustrations and page decorations, which ate into his share of the profits.
* Charles Dickens speaks entirely in non sequiturs. People can sometimes figure out

what she means, such as that she has taken an intractable dislike to Mr. Clennam.
* Charles Dickens thanks to the machinations of Mr. Quilp, but Dick Swiveller manages to prove his innocence in the nick of time.
* Charles Dickens. The Fryes end his reign of terror by eliminating him and his followers.
* Charles Dickens, the Ghost of Christmas Past comments that Old Fezziwig has spent "a few pounds of your mortal money."
* Charles Dickens). The last-named features a supporting character (Josiah Bounderby) who claims that his mother abandoned him soon after his birth and that he was completely independent by the age of three. It is later revealed that his parents adored him, and scrimped and sacrificed so that he might receive a good education and a promising apprenticeship. He then rose rapidly through the ranks of society and deserted his doting parents in their old age.
* Charles Dickens, the main character Pip is raised by his sister and her husband Joe, but the sister's given name is never mentioned. She is referred to only as "Mrs. Joe".
* Charles Dickens, the title character Edwin disappears mid-novel and is assumed to be dead, a victim of murder, although no body is found. Because the author died before completing the book, the intended resolution is unknown and subject to much speculation. One theory is that the character Dick Datchery is actually a disguised Edwin.
* Charles Dickens tragically so. He was notoriously financially irresponsible throughout his life and at one point while Charles was still a child, John was sent to debtor's prison and Charles had to drop out of school and go to work at a factory to help get his father out of debt. It got worse when Charles became a famous author, and John would send letters to his son's friends and associates begging for money.
* Charles Dickens, while Charles Darnay gets a much more subdued one later on.
* Charles Dickens; while really grateful to him, the heroine essentially tells her guardian that she loves him as a daughter and not as a wife.
* Charles doesn't find anything wrong with how Chazz is constantly putting down a female classmate as a nerd. St. Peter (his angelic guide) brings Charles into the future to show how that treatment set the woman on a path to become a pathetic, single woman who's just been fired from her job at a diner. Charles gets Chazz to help the girl gain some self-confidence and even "glam up" for a date. St. Peter takes Charles back into the future to show the woman is now a strong, happily married mother who owns a chain of diners.
* Charles Fort bordered on this. He wrote several satirical books on news stories from around the world that were ignored by Western scientists. Many of the supposedly "impossible" phenomena he wrote on, deemed too ridiculous to warrant an inquiry by mainstream scientists, later turned out to be true - for instance: blood-red rains, fish and frogs falling from the sky, and ball lightning. They weren't supernatural, though.
* Charles Foster Kane is a broken man who can't hold down a relationship with anyone and desperately longs for his stolen childhood.
* Charles Foster Ofdensen was the lawyer and manager of Dethklok for years before
* Charles Fouriers Works describe the Need to build a free love Utopia.
* Charles Francis Adams, the diplomat representing the US to the UK during the Civil War,
* Charles Francis Adams was the American ambassador to England during
* Charles G. Dawes's Vice President, no one knows who he is anyway. But he wrote a tune he called 'Melody in A Major,' which later was given lyrics by Carl Sigman and became a No. 1 hit for Tommy Edwards in 1958. Yes, a No. 1 hit song was basically co-written by a US Vice President.
* Charles Gemora is another actor who made a career of playing gorillas in older films and movie serials.
* Charles Godefroy completed the task on August 7th, 1919 with tactically placed film crews on hard to document the event.
* Charles Goodyear discovered vulcanized rubber when he accidentally dropped his

rubber concoction on a hot stove. He saw a charred leather-like substance with an elastic rim, which would make rubber weatherproof.
* Charles Gordon, the popular ex-Governor of Sudan, was sent with a few Egyptian staff officers to organize the withdrawal of Anglo-Egyptian soldiers (and civilians) from Sudan during
* Charles Grodin, actually an extremely nice guy by all accounts, adopts the same curmudgeonly, cynical, easily annoyed persona in his public and television appearances that he became known for in film. It got really confusing when he hosted an ostensibly non-comedic cable chat show as the comically serious and bitter "Charles Grodin" instead of as himself.
* Charles Grodin has permanent scars on his wrists due to the handcuffs he wore in
* Charles Haddon, singer for the British band Où Est Le Swimming Pool, killed himself by jumping off of a television mast immediately after the band's performance at the 2010 Pukkelpop Festival. Apparently, he was suffering severe guilt after he injured an audience member while stage-diving.
* Charles had his lips ripped off before being stuffed into the Boozoo animatronic (seemingly whilst still alive, going by the shot of Boozoo's bloody and empty head breathing in
* Charles Hamilton, writing under the pseudonym Frank Richards, made his William George (Billy) Bunter character practically live this trope. If questioned about something wrong which he had done, Bunter would almost always reveal his indisputable guilt while trying to deny it.
* Charles Harness, Earth has been bombed back to the Azoic after starting a nuclear war against rebellious colonies, and is so execrated that most people have forgotten that "Terror" used to be "Terra".
* Charles has mourned and buried most of the members who died in the game. He buries Kieran Duffy and even admits to Arthur that he was starting to like him too, takes a few seconds to mourn Lenny Summers when he’s gunned down and buries him alongside Hosea Matthews, and, as mentioned before, he’s the one who buried Arthur and Susan on top of beautiful sceneries by the end of Chapter 6. By the Epilogue, he buries Mr. Wayne, a gun he hired, after he's killed by the Skinners. If anything, he’s essentially the gang's gravedigger.
* Charles Hawtrey actors, and was briefly fired from a film project for being a diva.
* Charles Hawtrey series, he retired to Deal, Kent where he became a complete recluse, getting drunk, soliciting sex from sailors, and sporadically acting. When he died, only nine people attended his funeral, none of whom were friends or family.
* Charles Hayter is trying to secure a position to enable him to marry Henrietta.
* Charles-Henri from Innocent is show like this on several pannels representing executions.
* Charles Hickson, one of two shipworkers in Pascagoula, Mississippi who claimed to have been abducted by aliens in 1973, at different times described the UFO in question as eight to ten feet, sixteen to eighteen feet, twenty feet and twenty to thirty feet in length. Similarly, he stated that the incident had taken place at 7 PM, between 8 PM and 9 PM and "around nine o'clock."
* Charles Hobaugh, although not the pilot during that mission, is the one calmly repeating "
* Charles II's mistress Nell Gwynn is that she spiked the cakes eaten by Moll Davis, a rival for the King's affections, with laxatives, thus ensuring she was the one who spent the evening with Charles.
* Charles in Charge had an episode in which Charles got a credit card with a low limit, intending to use it responsibly. However, the kids get hold of it and run up a large bill, causing Charles to be embarrassed when his card is rejected during a date.
* Charles in Charge has a multi-tiered example; Charles and Buddy don't know what temperature to bake the cake at, so Buddy surmises that if a baked potato cooks at 350 degrees, a cake, which is approximately 10 times as big, should cook at 3,000. Since the oven only goes up to 500, they decide to compensate by cooking it for 6

times as long.
* Charles in Charge in his last appearance, when it is revealed that delusions of grandeur have led the character to repeatedly "promote" himself to increasingly higher-status positions.
* Charles in Charge: In the first episode, Mrs. Pembroke is hurrying to her job while Mr. Pembroke is trying to give Charles some advice on bringing a date over to the house:
* Charles in Charge was brought back in syndication in 1987 after it was dropped by CBS after only one season in 1985.
* Charles is often described as a pit bull terrier by viewers. While this is mostly true, his grandfather is revealed to have been a Labradoodle in "Party Down", meaning he's actually three quarters pit bull terrier, one eighth Labrador and one eighth poodle.
* Charles. It's pronounced in the French style, like the first half of "Charlemagne". When the manga/anime was localized, she was given the feminine variant, "Carla", appropriately.
* Charles Ives, often considered a cornerstone of modern estate planning.
* Charles Ives, which has several unexpected outbursts from the brass section and one particularly huge one near the end; this circus march portion then cuts off rather abruptly.
* Charles Ives, which is essentially the same symphony movement in a condensed form with fewer sections, the ending is even more abrupt.
* Charles Ives: Wrote experimental music using vernacular music and also did a lot of Church music. He was a fan of polytonality and manly dissonance.
* Charles J. Guiteau, the man who shot US President James Garfield, attempted to do this in order to evade a murder charge, arguing that even though he shot Garfield, he wasn't responsible for Garfield's death because Garfield's death resulted from medical malpractice in the treatment of his injuries rather than as a direct result of being shot (which is technically true — many historians believe that Garfield would likely have survived with proper care — but does not negate the fact that Guiteau set the chain of events in motion). The argument failed to persuade, and Guiteau was found guilty of murder and executed.
* Charles Joseph "Joe" Gliniewicz of the Fox Lake, Illinois police force. When he initially turned up dead on September 1, 2015, he was thought to have been killed with his own .40-caliber service weapon by three unknown assailants. But two months of intense investigation led authorities to conclude that Gliniewicz had actually committed suicide because he found out that his long-term criminal activity faced imminent exposure from an internal financial audit that had been under his direct control. He had been embezzling and laundering money for about seven years from a youth program for prospective cops. He had even gone as far as to ask a prominent gang member to kill the town administrator who was conducting the audit, but the murder never took place. Further investigation discovered a litany of issues during Gliniewicz's career, including threatening an emergency dispatcher with a gun, allegations of sexual harassment, and numerous suspensions.
* Charles Julius Guiteau attempted to use this defense after assassinating President
* Charles Laughton, so Peter Ustinov rewrote all of the scenes featuring the two of them, which placated Laughton enough to complete his portion of the film.
* Charles Lindbergh accidentally flushed away his son when he was teaching him how to use the toilet, then got rid of Amelia Earhart because she had seen too much.
* Charles Lindbergh, a colonel in the Army Air Force, the first man to fly solo across the Atlantic, and combat veteran of World War II (even though at that point he was a civilian).
* Charles Lindbergh when visiting his secret second family in Germany.
* Charles Logan receives a potentially fatal knife wound in a Season 6 episode, but is last seen in an ambulance, thus leaving his fate unclear (especially by
* Charles Logan takes over as President of the United States following a semi-successful assassination attempt on the standing president.
* Charles Manson, a group of TV reporters did some experiments to find evidence

that the police were too incompetent to find. For instance, they changed clothes in a car that was proceeding from one of the murder sites to see if they could end up in the likely place where the murderers ditched them. It turns out they found the dump site right away and got the police to search the area while they covered the activity for their news show.
* Charles Manson was notorious for demanding to represent himself at his trial for his mass murders despite the pleas of the judge to reconsider. Of course, the fact that he is completely deranged made him hopeless at doing that, making insane motions and requests.
* Charles-Marie Widor are popular with organists, most listeners probably only know the concluding Toccata from his Organ Symphony No.5 in F minor, Op. 42 No. 1, a popular recessional.
* Charles Martinet instead is the fact that because Paarthurnax is so different from his other roles, many people don't realize it's him.
* Charles Mingus Also one of the great jazz composers after Duke Ellington (who he cited as a major influence), writing longer, more complex compositions that seamlessly brought together blues and more avant-garde influences (as a teenager growing up in Watts, Los Angeles, he studied Schoenberg and Stravinsky alongside Ellington) in addition to more conventional jazz "tunes" based on 16- or 32-bar progressions. He was the first jazz musician to have his entire (gigantic) catalog acquired by the Library of Congress.
* Charles Mingus could be argued to be a genre buster. His music combined elements of beebop with dixieland, blues, free improvisation, and later on classical music. Check out his album "Let My Children Hear Music" to hear all of these elements work together.
* Charles Mintz, Disney's one-time distributor and the man most responsible for causing Walt to leave Universal in 1928, was himself dropped by Universal in 1929. His response was to fully take over his wife Margaret Winkler's company the Winkler Studio (which he had been
* Charles Montgomery Burns. It's pretty suspicious that he can take a bullet in the chest from a gun fired by
* Charles Montgomery Burns. Truth be told, different episodes of the show have provided wildly conflicting backstories for him. Originally he was from a clan of stuffy New England snobs (Monty himself being a Yale graduate), but then the episode "Rosebud" hinted that he was Jewish, the older brother of comedian George Burns (although that was obviously a
* Charles M. Schulz solve that way, and to introduce more complex problems so that Eugene could solve them took power away from Popeye.
* Charles M. Schulz would never be concluded. There was, thus, no carefully hidden strip in which Charlie Brown gets the little red-haired girl, or in which Snoopy finished off the Red Baron. Nonetheless, he still only barely avoided this. He died the night before his final strip (written months prior) was released.
* Charles Musgrove is a fairly intelligent and friendly chap in the book. In the 2007 adaptation, he's a stupid, ditzy guy who doesn't seem to realize how embarrassing his wife is and behaves like a dimwit. For instance, unlike in the book, he doesn't seem to realize that his wife only pretends to be ill.
* Charles nearly gets his feet sliced into by the lumber mill's machinery in the fourth book of
* Charles Nelson Reilly, officially came out near the end of his life.
* Charles Paris, a perennially semi-employed British actor, in a series of books by Simon Brett. He's usually a suspect at some point.
* Charles Perrault doting on one of their children while mistreating their remainder offspring.
* Charles Perrault. Ironically enough Perrault felt ashamed about these childish stories and published them under his son's name.
* Charles Perrault lesser know tales "Riquet à la Houppe", or as it is known in English, "Riquet with the Tuft", or even more simply "Tufty Ricky", a princess is gifted by a fairy on her birth, the gift of beauty. However, the fairy also throws in the caveat that she will be extremely stupid. One day she comes across

the ugly, but charming, Gnome Prince Riquet, who also was blessed by the same fairy, however this time with the gift of intelligence and wit. He reveals that he was granted the power to gift one person with intelligence, and thus out of pity for the lonely and crying princess, whom all avoid due to her inability to carry on a conversation, he passes on his gift to her. A year later, the princess, now very popular in court due to her wit as well as her grace, crosses paths with Riquet once again and discovers she too has the power to pass along her gift. After thinking of Riquet's kindness, as well as his charm and wit, she is able to render him handsome, and the two are married.
* Charles Perrault nose. He leaves the decision about the third wish up to her, and she decides she would rather stay poor and beautiful than be a queen with a sausage-nose for the rest of her life.
* Charles Perrault, when the king unexpectedly returns to the castle, causing the execution to stop and the queen's evil plan to blow up.
* Charles Robert Jenkins, an American soldier, defected to North Korea in 1965 and remained cut off from the Western world. He made it out in 2004, finding that the U.S. had changed a bit since the 1960s.
* Charles Robinson shares the same last name as his character Mac Robinson.
* Charles Schulz & Bill Melendez were given only six months to complete
* Charles Schulz cite him as one of their influences, and that the saga of Charlie Brown and Co. continues to endure, even over 20 years after Schulz's passing.
* Charles Schulz originally created the character of Peppermint Patty for a children's book he planned to write. He never got around to writing it, so he made her a
* Charles S. Dutton as his directorial debut, also starred as Felix Reynolds in the film.
* Charles Sheffield (book 1 of the Heritage Universe) has excerpts from Lang's Catalogue of Builder Artifacts to explain the mysterious structures mentioned throughout the book. Extra points to the fact that the author of the catalogue is a main character.
* Charles Sheffield Eons pass, he gets cloned a few billion times, merges with the clones, becomes a god, and restores his wife on his own. The end.
* Charles Sheffield offers what seems like a realistic aversion in the Sturm Invocation, a training protocol that, when activated with a special whistle, invokes an involuntary reaction of quick blinks to preserve your eyesight plus other adaptations that allow one to stay in vacuum just long enough to cross a short distance (from one ship to another) and get to safety. The penalties for false activations are very severe. Notably, blinking is inverted — instead of eyes open most of the time your eyes are closed most of the time. This has nothing to do with pressure but is designed to prevent eye damage from excess UV radiation.
* Charles Sheffield plot, is resolved in the main story. The others are swiftly, and without explanation, dealt with in the Epilogue.
* Charles Sheffield's Heritage Universe, a computer brain inside a vat-grown human body.
* Charles Sheffield's short "The Treasure Of Odirex", a dwindling tribe of Neanderthals lives in hiding in an abandoned Derbyshire gold mine, and make necklaces and other simple ornaments from a shiny yellow mineral they occasionally come across.
* Charles Sheffield story "Killing Vector", energy extracted from a Kerr-Newman black hole is described as powering the rocket engines.
* Charles Soule's Daredevil have all been a dream in his mind as he's near death from the accident.
* Charles Soule's Daredevil, Matt has somehow forced everybody in the world to forget that he is Daredevil. He only allowed his best friend Foggy to remember.
* Charles Spencer "Spen" King, the chief engineer of the Range Rover sport-utility vehicle, designed it as a genuine off-road vehicle with more amenities than a regular Land Rover, and was deeply dismayed to see it and SUVs like it driven mainly by rich people who never took it off-road.
* Charles Stross, a group of people has the ability to travel between alternate

universes by staring at a mandala. The branch of the U.S. government tasked with studying these "worldwalkers" uses explosive leashes to make sure they come back from these universes.
* Charles Stross (also, it's revealed in passing that the main universe isn't ours, but a slightly different one-in which, for example, Saddam Hussein is killed in a coup just before the U.S. invasion).
* Charles Stross at the age of twelve via a complicated scheme that involves the relationship between shari'a and modern corporate law — she essentially sells herself into slavery to a computer-run company operated by a blind trust of which she is the sole owner. Her mother attempts to regain guardianship over her, in part by converting to Islam.
* Charles Stross crossed with computer science with a little quantum physics for seasoning.)
* Charles Stross, inspired when he realized the two were remarkably similar in theme: the human race existing at the mercy of vast, uncaring entities with the power to end civilization at any moment.
* Charles Stross, in which a character is able to wear a thin, non-insulating suit to walk on a no-atmosphere planet and begins to feel uncomfortably cold in the suit only after he's entered a facility with a pressurized atmosphere.
* Charles Stross is from The People's Republic of West Yorkshire, and claims that there are over 1,500 countries on Earth, although it's clear that Earthers have outgrown the concept of nation states, and just keep the names for sentimental reasons.
* Charles Stross is set in 2018. Apparently Scotland's independence vote went forward in 2012.
* Charles Stross is that the characters come from a society where Gender Benders are ridiculously easy. It's implied that most people tend to settle on a particular gender for the sake of convenience; the protagonist is usually male, but doesn't even remember what his original body's gender was.
* Charles Stross: Mimes. Mimes who reproduce themselves by hitting humans in the face with pies — the pies are full of nanotech that reformats the human into a new Mime, complete with more pies. Lucky for those being pursued by Mimes, they are afflicted with the sort of tics you'd expect, such as occasionally being trapped inside an invisible box or having to walk against the wind.
* Charles Stross - no one, neither HR personnel nor the people they're supposed to oversee, can be fired until they screw up big enough to get killed.
* Charles Stross, one of the two alternate universes featured in detail uses zeppelins for air travel. (The other one has a roughly medieval level of technology, so it doesn't have air travel at all.)
* Charles Stross. People using public transportation similarly have advertisements projected onto the windows for their viewing pleasure.
* Charles Stross, Portia Hoechst has all the subordinates who were supporting her predecessor's rogue operation killed (at least temporarily).
* Charles Stross: Reeve spikes Fiore's coffee to give herself time to take an impression of his key to the special room in the library.
* Charles Stross: Robots have "soul chips", which contain a recording of their experiences and thoughts, so if they were to wear someone else's soul chip, they would wear that other robot's personality as well.
* Charles Stross. She's a robot built for ultimate human sexual pleasure in an universe where humans no longer exist.
* Charles Stross. Some of the highest levels of overkill in a handweapon, given that the same design could conceivably slag an entire world.
* Charles Stross): the English lost city of Dunwich (which Lovecraft used as a name for a fictional town) was not lost at all, but rather the training ground for the Laundry, a secret organization that prevents "reality incursions." Apparently someone in the Laundry noticed the very odd census reports, and the citizens were relocated and the town erased off the maps. The only way to get there is with a specially-programmed GPS unit and a key for the appropriate wards. Stross' Dunwich is also slowly sinking into the water.

* Charles Stross, the things that humans and the artificial intelligences they spawn turn into are effectively transhumans; they do not communicate with the remnant of humanity in any direct way because their minds are so totally alien in structure and function. Having your mind adjusted to cope with their fiendishly complex economic system they use is effectively a one-way trip and results in you losing your humanity.
* Charles Stross; they're still bound by the same (magically enforced) secrecy provisions, but are allowed to take ordinary jobs in society, with the Laundry using them as contacts in the larger world or a reserve force to be drawn on in case of emergency.
* Charles Stross, we meet Ramona Random, a Deep One hybrid who's knock-out gorgeous even after she drops her glamour. It's mentioned in the story that Deep One hybrids generally tend to be very attractive, as this aids in achieving their design purpose of serving as effective ambassadors to the surface world.
* Charles Stross, when Miriam confesses to sleeping with Olga's fiancé Roland, Olga asks if Roland was any good.
* Charles Stross, where it's acknowledged that FTL travel would make a form of time travel possible if a super-powerful AI didn't outlaw it.
* Charles VIII, King of France and conqueror of Italy, died by hitting his head on the lintel of a door.
* Charles VI of France was originally known as "the Beloved", but later acquired the name "the Mad" after his increasingly-severe mental illness built into a delusion that he was made of glass and that nobody could ever touch him.
* Charles wipes Magneto's mind after the first arc to prove he can be redeemed. The Brotherhood eventually find him and restore his memory, and Magneto is pretty damn pissed.
* Charles would've rammed his helicopter into the cafeteria window. Ellie gets confuest as to how this would work, muchless help. By the time they decide to go through with the plan, the rocket is too far away for Charles to actually do it.
* Charles Wright. Retired in 2002, but returned to the ring for sporadic appearances from 2007 on.
* Charles Wright used this when he was using his "The Godfather" persona. However, instead of being a mafioso, he was a pimp, and his "offer you can't refuse" was to either step in the ring with him for their match, or the opponent could take their pick of any of the fine hos he always brought to the ring with him. Needless to say, it was very rare that the offer was refused.
* Charles Xavier and Moira MacTaggert may have developed a romance while he was recovering from his injury because he kisses her at the end.
* Charles Xavier. And that's before you get into how they are, respectively, the most mentally powerful and the most physically powerful people in the world. Xavier also has Cassandra Nova, who exists to be his polar opposite in absolutely everything.
* Charles Xavier. Aside from being a telepath, he keeps secrets even from his own team, has faked his own death as a ruse, and has employed secret operatives for when
* Charles Xavier boldly hits on co-eds, but when his latest target for conquest sincerely needs help, he's all business.
* Charles Xavier came back alive and well in the Stinger, to Wolverine's surprise.
* Charles Xavier is put through what could be considered an even worse hell in
* Charles Xavier is the psychic detective (as in one who investigates mysterious psychic attacks, not as in investigating arbitrary mysteries using psychic powers).
* Charles Xavier is this to the X-Men as a whole. Particularly Cyclops, who along with the other adult members of the X-Men, goes on to be a mentor in his own right to many young mutants attending the school.
* Charles Xavier's all powerful but tragically insane son, David Haller, has multiple personalities that are multiplying all the time. During his ongoing solo series he was given an
* Charles Xavier's chair bounces back and forth between this and more conservative varieties

* Charles Xavier uses his telepathy to "guess" the drink orders of the women he flirts with. Executive producer Tarquin Pack lampshades this specific example in the rare "Extraordinary Abilities" featurette.
* Charles Xavier uses the word "groovy" when chatting up a girl at a bar early on; a term which wouldn't become popular until the final couple of years of the decade.
* Charles Xavier was killed by Cable and only his bones remained. The X-Men held a funeral for him, and then Cyclops disbanded the X-Men as a fighting group.
* Charles XII; according to folklore (reality is of course different) he couldn't be shot with normal bullets, but the one that killed him was made from a button from his own coat.
* Charles XII of Sweden dropped dead from a gunshot to the head while peering out of a trench during a battle in 1718. Rumour has always had it that one of his own officers was sick and tired of twenty years of uninterrupted war and blew the King's brains out (using a uniform button for a bullet).
* Charles XII of Sweden rode from Istanbul in Turkey to Stralsund in Northern Germany (a trip of around 1200 miles) in fifteen days on a single horse, which is an incredibly impressive feat for both man and horse (the horse's eventual fate is not recorded).
* Charles XII was shot, thousands of them froze to death. The local Saami who found the bodies were not lax in "re-distributing" the stuff they could find. However, this being the early 1700s and the Saami having little use for the fancy sleds (that some officers rode — and died — in) or cannon, one of the most popular items to "acquire" were the soldiers' wigs. Apparently they were really warm and the Saami used them as insulation under their fur hats.
* Charles XI of Sweden realized that he had neither the economy nor the manpower to support a large army to defend the empire his father, aunt, and great-uncle had built. Instead he established
* Charles X of Sweden, according to the official historians at the time, eventually "assumed the perfect form of a sphere." His uncle, Gustavus II Adolphus, "became quite fat as the years passed" as one historian put it. Interestingly, both of these kings were
* Charley Chuck's Food Fight look on your face and the food magically homed in on YOU, burying you in a messy pile!
* Charley Parkhurst. One-eyed Charley was known for his toughness and could handle anything, up to and including armed bandits. After his death (at age 67), the person who laid him out discovered "Charlie" was biologically female, and his birth name turned out to be Charlotte.
* Charley Pride had one of his last major hits with 1984's "The Power of Love," a No. 9 hit late that summer.
* Charley Pride: His 1978 hit "Burgers and Fries." While it doesn't point to a specific era, the lyrics recall a more carefree time (some time earlier) that a young couple wishes they could go back to – this includes holding hands while walking on the beach and making love in the back of a car while at a drive-in movie theater.
* Charley Pride, whose version peaked at #4 (its chart run having been eclipsed by the Sovine/Pierce duet). Still, since Jones is by far the most famous person to have sung the song, this might be averted now.
* Charley's Aunt so Charley could tell his sweetheart's father that he had a chaperone) tells Donna Lucia (Charley's real aunt) that "in future I resign to Sir Francis Chesney all claims to 'Charley's Aunt.'" Brandon Thomas, who wrote the play, also was the original Sir Francis.
* Charley's Aunt upon hearing the news that one man intends to marry Charley's Aunt, who is actually another man in drag, drops the tray he's holding.
* Charley's War titles — because Pat Mills wrote it. It's an extremely realistic series of WWI war stories.
* Charley Varrick, Charley breaks into his dentist's office after hours and removes the dental records of a deceased gang member, to prevent the police from identifying her body. He also decides to switch the records of himself and his unreliable partner, which later allows him to pass off the latter's dead body as

his own.
* Charley Varrick: The protagonists rob a small town bank that happens to be a mob bank, and the spend the rest of the film trying to evade both the police and the mob.
* Charley Varrick to recover their money inadvertently stolen by a gang of small-time bank robbers.
* Charleyyy and Friends) is already in the bathroom. Charleyyy then improvises by using the litter box.
* Charlie and Amita had sparks flying pretty much from the first episode, but Charlie specifically mentions (in response to his father's prodding) that the school's rules prohibit them from dating while he's her thesis advisor, so they only get together after she finishes her PhD. There is also less of an age gap than most since Charlie was a
* Charlie and Dee start making out, and the scene ends. Cue them acting awkward around each other the next morning.
* Charlie and Franklin are at the beach, carrying surfboards. Charlie explains to Franklin he must lift the board before beginning to surf on it. Franklin appears too tired to lift his board. Charlie reprimands Franklin, stating he should have eaten Cheerios for breakfast for a boost of energy. Having set up a place setting atop a cooler, shaded by a beach umbrella, Franklin enjoys a bowl of Cheerios as Snoopy sunbathes in a lawn chair nearby. Franklin surfs a massive wave with great enthusiasm, catching up to Charlie and surpassing him, sending a smaller wave splashing on Charlie. Charlie, now jealous, states, "Beginner's luck."
* , Charlie and Kazuko's father disappeared right before Kazuko was born. His fate is unknown.
* Charlie and Lola, Charlie pours all the cereal out of a box and gets the second-to-last dinosaur he needs for his collection of plastic dinosaur figures.
* Charlie and Lola, Charlie says that all of his friends are invited to his birthday party, and Lola. Which comes across as a bit odd since the two are generally pretty friendly.
* Charlie and Lola episode "Help! I Really Mean It!", the title characters are looking after their grandparents' cat Casper. Lola and her friend Lotta then put a hat on Casper, which makes him run away.
* Charlie and Lola: In the ending of "I've Won, No I've Won, No I've Won," Charlie asks Lola if she's asleep. She replies that she is and he asks how she can be asleep if she's talking to him. She answers that she's talking in her sleep.
* Charlie and Lola is about Charlie and Lola having a number of these about various things. Eventually, after one too many, their parents send them to time-out or the "Simmer Down Chairs."
* Charlie and Lola is based off an inquisitive young girl that author Lauren Child met on a train.
* Charlie and Lola - revealing that he had been eavesdropping on his sister (and her imaginary friend) in the process.
* Charlie and the Chocolate Factory. (Also has a shift in storytelling pace in that Act One unfolds over a few months and Act Two takes place over a single day.)
* Charlie and the Chocolate Factory, also voiced the character in the Swedish dub.
* Charlie and the Chocolate Factory applies, with the songs drawing upon many different styles (and eras) of music — British music hall, jazz, disco, rap, techno, etc.
* Charlie and the Chocolate Factory as a candy shop owner for Act One.
* Charlie and the Chocolate Factory, as Charlie is shining Wonka's shoes:
* Charlie and the Chocolate Factory at the top of the show, killing all the mystery the novel tries to build up in one fell swoop.
* Charlie and the Chocolate Factory based on it, with the exception of Charlie Bucket, all the children who got the golden ticket are spoiled.
* Charlie and the Chocolate Factory bevy of chirpy animatronics telling the listeners how amazing its owner, Willy Wonka, is. The gathered winners and their parents just stare, unsure what to make of it... except for Augustus Gloop (and his mother) who can be seen smiling and dancing a little.

* Charlie and the Chocolate Factory, but also bends the way a bamboo cane does.)
* Charlie and the Chocolate Factory), but it is always comedy-centric.
* Charlie and the Chocolate Factory, but that means he's capable of learning and becoming a unique talent in the process; moreover, he's "not just any careless child", but a bright, imaginative, kind, unspoiled, and disciplined one, "So aren't you glad upon review/That Charlie Bucket I chose you!"
* Charlie and the Chocolate Factory buying bulk orders of Wonka Bars and tearing through their wrappers in hopes of finding a ticket, presumably discarding the chocolate. In fact, this is how Veruca Salt's father got her a ticket — he bought up all the Wonka Bars he could and gave them to the workers in his nut factory to "shell" until the ticket was found.
* Charlie and the Chocolate Factory. By the end, he is checking his pocketwatch — and those sitting in the front rows can hear him shouting to the orchestra to play faster (this Wonka is obsessed with keeping to a schedule).
* Charlie and the Chocolate Factory can be considered this. Violet chews gum constantly? She gets turned into a giant blueberry. Mike watches too much TV? He gets shrunk and then stretched out in a taffy puller.
* Charlie and the Chocolate Factory cause trouble during the tour of the factory...
* Charlie and the Chocolate Factory: Charlie Bucket loves chocolate more than anything, but his family is so poor that he only gets one chocolate bar a year, on his birthday. This makes it painful for him to constantly walk by shop windows full of chocolate bars, and see other kids enjoying chocolate bars...and worst of all, to live near the world's largest chocolate factory.
* Charlie and the Chocolate Factory chewed upon, can one blame them for indulging?
* Charlie and the Chocolate Factory complained that the Burton adaptation chickened out by showing that the bad children survived their ordeals, where the 70s film had stayed "faithful" — but the Burton film was actually being faithful to an identical scene in the book. The only drastic change to the film came towards the end with the subplot about Wonka's father, which is all Burton. The bad kids survived in the 70s movie, too, but a lot of people, including that film critic, apparently missed the line explaining it.
* Charlie and the Chocolate Factory could figure out how it was possible, since no one was ever seen entering or leaving the place. Thus, when the prospect of winning a visit to the factory is raised, it becomes a global obsession...
* Charlie and the Chocolate Factory downplayed this trope in the original West End staging, then averted it on Broadway.
* Charlie and the Chocolate Factory expressed interest in playing the role of Willy Wonka, and outlined his theory that Wonka was Satan, tempting and leading the damned souls (the children) into Hell.
* Charlie and the Chocolate Factory for work in the interim. They are finally forced to reveal the truth when the Golden Ticket contest is announced and must break the news to Charlie that they won't be able to afford his usual birthday bar of chocolate this year (whereupon Grandpa Joe decides to give up what little change he's saved to make sure he gets it).
* Charlie and the Chocolate Factory further strengthened by the audience realizing that the offscreen narrator was actually Mr. Wonka. "Creation Overture" was cut when the show had its first major cast change, so the echo is now lost.
* Charlie and the Chocolate Factory gives us Wonka's dentist father who was so obsessed with teeth that he didn't care about Willy's feelings and part of his development was reconciling with his estranged son.
* Charlie and the Chocolate Factory had the same costume designer as its West End counterpart, but redesigned the Bucket family's costumes to have brighter color schemes — leaving poor Charlie stuck in a hideous orange-and-purple sweater that looks better suited to a Muppet for almost the entire running time.
* Charlie and the Chocolate Factory has been dubbed in Japanese twice. There's the theatrical dub and the other made for television viewing.
* Charlie and the Chocolate Factory has didn't belong in this line in the first place.
* Charlie and the Chocolate Factory has two examples, one straight and one

subverted.
* Charlie and the Chocolate Factory) he keeps switching around words and correcting himself upon realization of such.
* Charlie and the Chocolate Factory, he may or may not be taking advantage of a child's gullibility here.)
* Charlie and the Chocolate Factory he runs amok there too before he's "retrieved" by the others.
* Charlie and the Chocolate Factory if she is. The audience will never know...
* Charlie and the Chocolate Factory in commercial TV airings is because the director thought Charlie's situation/personality was well-established by that point and wanted to pick up the pace, but he wasn't able to cut it from the theatrical release.
* Charlie and the Chocolate Factory. In particular, Mike Teavee's addiction is changed from gangster movies and westerns to violent video games! There are animatronic puppets that malfunction comically! (Strangely enough, when Teavee is confronted with a video game setting inside the factory, he claims that it is "lame".)
* Charlie and the Chocolate Factory. In the book and most adaptations, Veruca Salt is tested by squirrels to see whether she is a "bad nut" — bad nuts sound empty when tapped — when she tries to claim one of them for herself. A squirrel taps her on the forehead, and when this produces a hollow sound, they dump her where all bad nuts go — down a garbage chute.
* Charlie and the Chocolate Factory in white as the cameras in the Television Chocolate room.
* Charlie and the Chocolate Factory, is an ordinary, if virtuous and poor, kid, who — like everyone else in and out of story — is curious about what's in the mysterious titular factory, and it's through his perspective that the audience is introduced to all of the other major characters as he and his family follow news of the Golden Ticket contest. And then he finds the last ticket and gets a chance to visit it...
* Charlie and the Chocolate Factory is captured by Wonka's army of intelligent nut-cracking squirrels, their first instinct is to treat her as just another walnut. They tap her head to test, and then, to the observers' alarm, begin dragging her to the garbage chute.
* Charlie and the Chocolate Factory is dirt-poor to begin with. After Mr Bucket loses his job, things get worse, but no one seems to notice the four starving grandparents confined to a single bed or that Charlie is looking a lot thinner and doesn't have the energy to go outside at recess.
* Charlie and the Chocolate Factory is mostly underground. The book contains an explicit explanation of this by Wonka, where he tells everyone that he decided to expand his factory by tunnelling downward and outward so that he could basically expand indefinitely. (Fridge thinking suggests that he wouldn't have to buy any more land or pay any rent to the property owners most of his factory is under, either; this would of course be all kinds of illegal in real life, but Wonka likely doesn't care.)
* Charlie and the Chocolate Factory is that when the tour group reaches a flight of stairs that leads to the Nut Room, Willy Wonka chooses to slide down the banister and the three remaining kids in the tour group follow suit.
* Charlie and the Chocolate Factory, it's noted that "Grandma Josephine dropped her false teeth" in shock.
* Charlie and the Chocolate Factory, languishes in Stage 1, perhaps because Dahl forbid any adaptations to be made of it.
* Charlie and the Chocolate Factory manage to avoid the conventional problems with food in pill form—it's clear Wonka thought both of the psychological need to do something resembling eating over a period of time and of the physical need for stomach fullness. He's just not through with the new set of problems created by the solution.
* Charlie and the Chocolate Factory — and outfit it with an amazing array of inventions that use technology the outside world might fight over...even though he

rarely ventures outside of it (to the point that no one, in the novel, has seen him in 10 years when the story begins) and apparently makes no contact with anyone beyond it, nothing so much as a phone call!
* Charlie and the Chocolate Factory, Mike wins his ticket by tracking a winning candy bar through info such as manufacturing dates. A reporter asks Mike what he would do with a lifetime supply of chocolate. After Mike says "I don't know. I hate chocolate," Grampa George begins to rant, "Well, it's a good thing you're going to a chocolate factory, you ungrateful little ba—", at which point Charlie's ears are covered by Mr. Bucket, and we hear nothing until he removes them. Fair guess that it's swearing.
* Charlie and the Chocolate Factory movie leaves it ambiguous, while theatrical production plays the trope rather straight.)
* Charlie and the Chocolate Factory, Mr. Salt hands Wonka a business card, which Wonka promptly whips over his shoulder without even a glance at it.
* Charlie and the Chocolate Factory: Mrs. Teavee exclaims "I'm going to be sick!" during the factory tour's wild ride on the Great Glass Elevator and "Now I am going to be sick!" when Wonka reveals that if the Oompa-Loompas are using the other elevator they might collide. Wonka holds his top-hat upside down in front of her mouth to avoid a mess, but she doesn't vomit after all.
* Charlie and the Chocolate Factory?", no one answers in the affirmative! As the party further dwindles, though, anxiety creeps into the wonder of those still standing...
* Charlie and the Chocolate Factory of flags, to symbolize the countries he has visited. Then a museum guard tells him it's time to close and we see that he had been walking through the museum's "Flags of the World" exhibit.
* Charlie and the Chocolate Factory often have differing personalities depending on the adaptation. Violet Beauregard and Mike Teevee's traits are changed to reflect raised their children in that time period:
* Charlie and the Chocolate Factory owing to this process-of-elimination structure, so adaptations tend to tweak the plot to make him more proactive in his fate.
* Charlie and the Chocolate Factory pushes her to win pretty much any competition she enters, including those involving her beloved gum-chewing. We don't see her interacting with (or even acknowledging the existence of) the other kids or parents, but she keeps pushing Violet and plays up to a very indifferent Willy.
* Charlie and the Chocolate Factory, rather than a genuinely demented individual. Also, young Willy apparently did have some real problem with his teeth, since old Wilbur actually recognises his son from his unique dental condition decades later.
* Charlie and the Chocolate Factory, resulting in a complex example of this trope.
* Charlie and the Chocolate Factory's 50th anniversary in 2014 ("50 Whipple-Scrumptious Years") was marked with a variety of events and offerings. This milestone celebration specifically kicked off on January 31st, since that's the day Charlie finds his Golden Ticket in the novel.
* Charlie and the Chocolate Factory, several audiobook versions and a pop-up book abridgement, and the following adaptations, all of which are distinct takes on the story:
* Charlie and the Chocolate Factory, several Oompa Loompas dive into the chocolate lake Berkeley-style and then are seen from overhead creating synchronized patterns around the chocolate pipe.
* Charlie and the Chocolate Factory shows the titular character's backstory near the end of the movie, where his father had pinned up newspapers on a cork board, while also showing that the elder Wonka was still proud of his son despite what happened.
* Charlie and the Chocolate Factory since Charlie thinks the last Golden Ticket had already been found when he bought his two bars. The moment he starts unwrapping his second bar, a news broadcast reveals that the last ticket was a forgery. The only reason he could even afford the chocolate bar with the ticket was because he just happened to find a discarded fifty-pence/dollar bill (practically a fortune to Charlie due to his family's poverty) on the street.
* Charlie and the Chocolate Factory son and a key source of comedy in Act Two.

* Charlie and the Chocolate Factory spends most of the movie looking bored or surly. When the Wonka Television machine causes him to float in the air, however, he does some silly karate and dance moves, then smiles and waves at the others.
* Charlie and the Chocolate Factory's regular illustrator Quentin Blake, "Creation Overture", that whimsically depicted the making of a chocolate bar. It was dropped upon the show's first major cast turnover in 2014, for reasons unknown (possibly pacing, or even not wanting to rerecord the narration provided by Douglas Hodge, the first actor to play the role of Willy Wonka).
* Charlie and the Chocolate Factory tendencies ("If [Veruca Salt's] a lady then I'm a Vermicious Knid!").
* Charlie and the Chocolate Factory that follows ("Juicy is a girl named Violet B./ She doesn't have a talent as far as we can see").
* Charlie and the Chocolate Factory that made his company the biggest, and wealthiest, candy maker out there.
* Charlie and the Chocolate Factory that Mr. Salt does learn to say "no" to her though, subverting this ultimately.
* Charlie and the Chocolate Factory. That said, Violet seems to enjoy it.
* Charlie and the Chocolate Factory, the grandparents' understandable panic over all of this becomes the start of a variety of further adventures for the group. (Incidentally, this trope is absent in most, if not all, adaptations.)
* Charlie and the Chocolate Factory. The lead-in dialogue is as follows:
* Charlie and the Chocolate Factory. The Nut Room's squirrels toss them down the bad nut chute, which is directly connected to the factory's rubbish pipe, and emerge from the building in the denouement completely covered in garbage. It could have been worse though — the rubbish pipe ends at an incinerator, and had luck not been with them, they would have been burned alive!
* Charlie and the Chocolate Factory, the Oompa-Loompas are seen mining chunks of chocolate from Cocoa Mountain, a literal mountain of solid chocolate caught in an icy blizzard inside the factory.
* Charlie and the Chocolate Factory, the Oompa-Loompas' song about Augustus Gloop:
* Charlie and the Chocolate Factory, the poverty-stricken Bucket family can only afford to have one large bed in their little house, which is shared by the four grandparents in the family; the paternal grandparents on one end, and the maternal grandparents on the other. Charlie and his parents must sleep upon mats on the floor.
* Charlie and the Chocolate Factory There are several other storerooms, each labeled with equally atrocious puns.
* Charlie and the Chocolate Factory, there is a room where the oompa-loompas are whipping a cow. Willy Wonka explains they're making whipped cream.
* Charlie and the Chocolate Factory, the tour passes by a room where the Oompa-Loompas are drinking "butterscotch and soda" and "buttergin and tonic", which make them "tiddly".
* Charlie and the Chocolate Factory, they go past a chocolate mine and, indeed, strike chocolate.
* Charlie and the Chocolate Factory things make children happy but that in and of itself doesn't make them successful; moreover some responders had seen the show earlier in the run and were forced to put up with kids who were bored and/or disruptive, or even personally knew kids who hadn't enjoyed it when they had enjoyed other family-friendly musicals. (As a note the far more elaborate London version of the show, which came first, managed a far longer run along with better reviews, though it wasn't a critical blockbuster.)
* Charlie and the Chocolate Factory to be seen as worthy of inheriting the factory besides simply staying out of trouble and thus becoming the last remaining kid in the tour group.
* Charlie and the Chocolate Factory, to entice them into misbehaving and imperiling themselves.
* Charlie and the Chocolate Factory to most of the world, with people being driven to ridiculous and even criminal means to find the tickets.
* Charlie and the Chocolate Factory: Upon meeting Willy Wonka the first thing

Veruca does is curtsy.
* Charlie and the Chocolate Factory uses this as the main device to select who will inherit the factory.
* Charlie and the Chocolate Factory). Veruca and her father are much iffier cases as they are last seen headed for an incinerator, with no hope of rescue mentioned. The fourth and arguably worst kid, Mike Teavee, doesn't face death, but he instead looks to remain shrunken forever (because his long-suffering mother prefers him that way). In the book and most adaptations, all the characters survive their potentially lethal experiences but are definitely changed for them, while the 1971 film version left their fates ambiguous.
* Charlie and the Chocolate Factory, Veruca Salt ends up decapitated and torn apart by Mr. Wonka's Nut Room squirrels.
* Charlie and the Chocolate Factory, Violet Beauregarde ignores Willy Wonka's warnings and chews on some prototype gum that's supposed to taste like a three-course meal. The gum tastes fine, but the dessert—blueberry pie—transforms Violet into a giant blueberry: she turns blue all over, then fills up with juice until she's almost spherical.
* Charlie and the Chocolate Factory wanted to save money and have a production that would be easier to put on tour.
* Charlie and the Chocolate Factory, we get to see what happened to all the bad kids. Violet is let off the easiest, and is pleased to find that she's much more flexible after becoming a blueberry and then getting juiced. Only her mother is bothered that she's still blue.
* Charlie and the Chocolate Factory, when Augustus Gloop falls into the chocolate river and gets sucked up a giant pipe, his parents express fear that he'll be made into marshmallows, and Mr. Wonka tells them not to worry... because that pipe goes to the fudge room, not the marshmallow room.
* Charlie and the Chocolate Factory when expressing disagreement of Charlie suggesting he open his birthday present the next day. In the original version, he just says "like hell."
* Charlie and the Chocolate Factory, when Mr. Wonka goes into depression, his creativity goes downhill, and the chocolate factory faces harder times.
* Charlie and the Chocolate Factory. When she decides she wants one of Willy Wonka's nut-sorting squirrels though, she learns the hard way that cute is not nice.
* Charlie and the Chocolate Factory, when the singing puppets catch fire due to some fireworks, Willy Wonka does nothing to put the fire out. Thankfully, the fire puts itself out.
* Charlie and the Chocolate Factory: When Veruca climbs through the gate to the room with the squirrels, and is attacked by them, Willy Wonka casually takes out his huge keyring and starts to search for the key that opens the gate so he and Mr. Salt can rescue Veruca (see page image). He fails to find the right one before Veruca is thrown into the garbage chute, but considering how he was taking his time going through the keys and what kind of man Wonka is, that was most likely his intention.
* Charlie and the Chocolate Factory, where she was notably nastier than her book counterpart and stood out compared to the other child actors, claiming that she will always be a winner, calling Charlie a "loser" at one point, and showing off as she leaves the factory by cartwheeling.
* Charlie and the Chocolate Factory, which eases potential tedium, and once the characters are in the factory, the story becomes a briskly-paced lark.
* Charlie and the Chocolate Factory, which was written by Wonka himself, and could also be said to represent some of his character traits. Again, he is far more eccentric than the song suggests, as it only concentrates on his "positive" traits.
* Charlie and the Chocolate Factory, which works wonderfully until the blueberry dessert stage...
* Charlie and the Chocolate Factory, while most of them are normal-sized, there are several large ones (big enough to have Oompa-Loompa riders) that emerge to confront Veruca.

* Charlie and the Chocolate Factory who are only innocent in the trope's negative aspects: self-centered, naive, and prone to foolish behavior because they think they know better. The 1971 film and 2013 stage musical adaptations avert this trope by making Charlie flawed but still good at heart and possessed of a huge sense of innocent wonder (and, in the musical's case, creativity) that the other kids lack.
* Charlie and the Chocolate Factory who come up to his knee at most in the book! Adaptations usually have them at the stature of real life little people instead, but he's still the tallest.
* Charlie and the Chocolate Factory who makes the most of his meager lot in life, falls into one of these after learning that the fourth of the five Golden Tickets has been found just after his one chance at finding a ticket failed. For the next week he is glum and quiet, not even asking to hear one of Grandpa Joe's stories. Even when his father suggests they could look for shooting stars in the sky to wish upon, Charlie's response is a mere "Don't waste a wish on me". Thankfully, the next day fortune finally smiles upon him when circumstances result in him finding the final ticket.
* Charlie and the Chocolate Factory, Willy Wonka runs into the Great Glass Elevator twice: once because he's caught up in his excitement about the successful results of the tour, and the other because he's talking over his shoulder to Charlie.
* Charlie and the Chocolate Factory, Willy Wonka with regards to how the Oompa-Loompas seem to know so much about the members of the tour group and the trouble they get into.
* Charlie and the Chocolate Factory with a song about its now-swollen rump.
* Charlie and the Chocolate Factory, with references to many other works also proposing that Wonka is God. It's... pretty intriguing stuff.
* Charlie and the Chocolate Factory with sweets like the "Scrumdiddlyumptious Bar" and the "Whipplescrumptious Fudgemallow Delight."
* Charlie and the Chocolate Factory women, and even works on children — which is his intention, in order that "there'll be no excuse any more for little boys and girls going about with bald heads!"
* Charlie and the Chocolate Factory, Wonka brings up a gum intended to grow hair that he's working the kinks out of. We're shown an Oompa Loompa who tested a piece, who walks up looking like Cousin Itt.
* Charlie and the Chocolate Factory), Wonka gives credit to the Oompa Loompas for inventing these fruit snacks, and ends by saying, "There's a little Oompa in every Loompa." This almost becomes literal in the commercial, as one of them is caught in the machine that makes them and turned into one. He turns out okay, however.
* Charlie and the Chocolate Factory works aimed at children qualify as fairy tales as well, and his Revolting Rhymes is a collection of tongue-in-cheek retellings of "Cinderella", "Snow White", etc.
* Charlie and the Chocolate Factory, wound up drawing criticism from viewers unfamiliar with the book. But three '71-specific details stick like glue to parodies, adaptations, etc.:
* Charlie and the Chocolate Parody episode has one of the golden ticket winners be an American ninja who appears to be a completely normal married man, aside from the obvious.
* Charlie and the Great Glass Elevator after being turned into babies and then brought back, Georgina says George was cuter as a baby but she likes him better as an adult as now he does not wet the bed.
* Charlie and the Great Glass Elevator after Grandma Georgina eats too many anti-aging Wonka-Vite pills and disappears, the Oompa-Loompas sing a song about a girl named Goldie Pinklesweet who greedily ate an entire jar of her grandmother's chocolates, only to realize too late that they were actually very powerful laxatives.
* Charlie and the Great Glass Elevator: Although Willy Wonka cannot stand ugliness in his factory, his pockets are always incredibly full. When he wants to find his very important recipe for Wonka-Vite, he digs for it in his pockets, bringing out objects including a trick fried egg made of rubber, a yo-yo, a tooth with a filling in it, a stink bomb, a slice of salami, a packet of itching powder, before

eventually finding the recipe on a very crumpled sheet.
* Charlie and the Great Glass Elevator, and then the vanished one reappears as a centuries-old crone. Once Mr. Wonka restores everyone to their original ages, the parents are happy. Once the news comes that everyone's been invited to the White House and a helicopter is waiting for them, the grousing grandparents are so overjoyed by the prospect that they voluntarily get out of bed for the first time in decades, and all is forgiven/forgotten.
* Charlie and the Great Glass Elevator are said by Willy Wonka to have caused the extinction of life on the Moon, Venus, Mars and many other planets. They are unable, however, to survive the friction caused by entering Earth's atmosphere.
* Charlie and the Great Glass Elevator, but he also clearly expects his young readers to be at least dimly familiar with the things.
* Charlie and the Great Glass Elevator calls a wrong number twice, and both times ends up speaking with East Asian men who talk like this.
* Charlie and the Great Glass Elevator has a major portion devoted to Charlie et al. visiting a Space Hilton that has been taken over by vermicious knids. In this case, because they came in the titular elevator they are able to just leave again, though it's a narrow escape.
* Charlie and the Great Glass Elevator: More like "There Was a Hole". Willy Wonka picks up Charlie Bucket's family in the Elevator and then takes off into the sky in order to reenter the factory by punching a hole in the roof... next to the hole he already made *exiting* the factory. (Two holes are better than one, as any mouse will tell you.)
* Charlie and the Great Glass Elevator: Mr. Wonka has to turn out his pockets — which contain (according to him) all his most important possessions — to find the recipe for Wonka-Vite, bringing up such items as a rubber fried egg, stink bomb, and "homemade catapult" along the way.
* Charlie and the Great Glass Elevator. Sadly it was quickly invaded by Vermicious Knids and everyone on board eaten.
* Charlie and the Great Glass Elevator, said elevator finds its way into orbit with Charlie and his family inside. They try swimming at first, then Mr. Wonka suggests they try blowing in order to jet themselves about.
* Charlie and the Great Glass Elevator) the American Military Officer known only as The Chief of the Army.
* Charlie and the Great Glass Elevator, the President suffers an unexpected consequence of a sharp intake of breath.
* Charlie and the Great Glass Elevator to invade and conquer Earth the way they did the Venus, the Moon, and Mars, but Earth's atmosphere is too much for them — what look to humans like shooting stars are actually Vermicious Knids burning up when they try to pass through. In the novel's present, they invade Space Hotel USA and manage to eat some of its crew, but the rest are rescued by Willy Wonka and company using the titular elevator to tow their ship to safety. When the aliens attempt to drag the humans to their home planet, Mr. Wonka instead steers the elevator and ship back into Earth's atmosphere, finishing the monsters off.
* Charlie and Vaggie make out, Charlie admits she wants to eat off of them. Even Vaggie admits that Kira is incredibly handsome, noting she's gay, not blind.
* Charlie Baker before Billy shot them, killing seven people in the span of two days. Then he personally killed four more people to frame his brother, and kidnapped two women and left them for dead.
* Charlie Barkin, a large, masculine dog, sheds a manly tear at the end of
* Charlie Bartlett: A High School Hustler becomes an underground school psychiatrist!
* Charlie Bartlett has a scene involving the title character taking too much Ritalin. It was depicted as causing him to run around, singing in his underpants.
* Charlie Bartlett, two girls run topless down the hallway after Charlie has sold students drugs at the dance.
* Charlie Bartlett was set to open on August 3rd, 2007 and had trailers, posters and TV spots but MGM delayed it due to financial issues and a crowded release schedule. Amazingly enough, the studio never had the TV spots pulled and TV

stations were still running the ads with the old date the week of the canceled release date. MGM finally released the film on February 22nd, 2008.
* Charlie Bradbury, a geeky but beautiful lesbian hacker who has many of the traits of the show's female fans is thought to be an avatar of writer Robbie Thompson. Some fans loved Charlie, happy to have a female companion for the Winchesters who was not going to interfere with their slash fantasies and one who became a "sister" to Dean much like many
* Charlie Bradbury of the show, no matter how competent a hunter and survivalist.
* Charlie Brooker about how he once tried to get out of trouble for not paying attention when his girlfriend was talking by claiming that he couldn't hear her because he was completely deaf in one ear. Of course, he then had to keep up the absurd pretense for years, occasionally forgetting what ear exactly he was supposed to be deaf in.
* Charlie Brooker among people or it simply allows humanity to be bastards more easily.
* Charlie Brooker as "rolling at high speed through a jolly cartoon world just like real hedgehogs don't".
* Charlie Brooker commented on how US TV is much more capable of pulling off witty banter between news reporters than the ones in the UK, as they just manage to come off as much more relaxed. In his own words, "when our news-readers try to relax they just look awkward, like they've accidentally shat themselves and don't want to let on".
* Charlie Brooker described the telethon for Haiti's post-earthquake aid as "a collection of all the musicians you would ever want to listen to... and Sting".
* Charlie Brooker Great British Wee", where Konnie Huq (as herself) tries to fight the scourge of shy bladder syndrome by getting a group of sufferers to take a group piss on a hill.
* Charlie Brooker has pointed out; wording in advertising is key. For example you can't say a toothpaste will "eliminate" plaque build up but will instead, "help fight". As you can fight a wall but you probably won't get far.
* Charlie Brooker — is all about tearing into the crass stupidity and manipulation of much of television. The rest is bemoaning other things or praising something that deserves it.
* Charlie Brooker once wrote a column about a documentary on the case of Jonathan King (a British pop singer who was serving a sentence for committing sexual offenses against underage boys) and ended the column with asking the readers to send in drawings of other acts of depravity involving celebrities. The only reply came from the imprisoned Jonathan King, who sent a drawing of Charlie Brooker writing a column. Brooker thought it was hilarious.
* Charlie Brooker was about a guy who, unlucky in love, asked a wishing well for "a great bird who'll sweep me off my feet". Nothing happened. "Just typical", he said to himself, as the giant talons descended towards his shoulders...
* Charlie Brown and baseball-playing, kite-flying, writing with an ink pen, talking to the Little Red Haired Girl, etc. To elaborate, on one occasion he won a game, but had to revoke it because Rerun bet a nickel on it. On two occasions, he legitimately won games... only to later find out a girl on the team let him win. Though his team has won several times, except only when he is not able to make it. Or the time when a bug hit every team in the local league except his.
* Charlie Brown Baldness has green eyes and two strands of green hair.
* Charlie Brown Baldness: Illustrated character is ostensibly not bald, but has only two or three visible strands of hair on their head
* Charlie Brown can be considered this, while he was one of the main characters from the get go it took a few months for him to be solidified as the focus character of the strip.
* Charlie Brown Christmas trees, which existed before the animated special).
* Charlie Brown failing to kick the football after Lucy pulls it away.
* Charlie Brown from Outta Town to infiltrate an organization of evil Choujin. When the World Choujin Federation suspect 'Chanelman' of being Kin, they put out a picture of Mayumi, as part of a Fumi-e. Kinnikuman gladly stomps on the photo, to

which Meat silently remarks that this sort of test is easy for Kinnikuman, who has the least respect for his father.
* Charlie Brown from Outta Town wasn't particularly mysterious either.
* Charlie Brown himself is the biggest offender, and might even be the
* Charlie Brown in the first few years of the comic was quite different from the self-hating loser that he would later become; he was rather cheerful, he liked to play pranks on others, and sometimes even boasted about himself.
* Charlie Brown is an avid baseball player, but he can't seem to do anything right, not even hold a 50 run lead with one out left when Peppermint Patty puts him in after he's sold some peanuts. (Once again, the keyword is "somehow": We cut from Patty getting hit by Charlie's 2nd pitch, to her waking up in bed and finding out from Marcie that Charlie Brown's losing streak is still intact.)
* Charlie Brown is seen in a wide panel in "No Business Like Snow Business" (DC issue #39).
* Charlie Brown is "that round-headed kid" to Snoopy and "Charles" to Marcie.
* Charlie Brown (of course) once got a chain letter and agonized about sending it or not. He finally decides to tear it up. Then it starts raining.
* Charlie Brown's All-Stars, after Snoopy "wipes out" surfing in Linus's kiddie pool, Linus attempts to bring him back and asks if anyone knows mouth-to-mouth resuscitation, but the only person around is Sally, and her reaction is quiet apt.
* Charlie Brown, Schroeder tells him that it’s nice to listen to something “Semi-Classical” after Charlie Brown asked him if the music was beautiful, leaving him shrunken.
* Charlie Brown's inability to talk to the Little Red-Haired Girl in
* Charlie Browns of the world do this to Lucy when she pulls the football away.
* Charlie Brown, somewhat surprisingly, was a victim of this trope. In his earliest strips, he was basically the prototype of Calvin from
* Charlie Brown's pitcher's mound, that would rather be anywhere else than where it is.
* Charlie Brown was one towards the Little Red-Haired Girl, Sally was one towards Linus, and most of all, Lucy was one towards Schroeder. (Many fans had to wonder just why he even let her into his house to bother him, as she could often be an outright vandal when he ignored her, destroying his piano on two separate occasions.)
* Charlie Carver, who played the gay werewolf Ethan, also came out as gay after the departure of his character.
* Charlie Chan "automatic stick-shift transmission", so there was no need to work the clutch and shifter.
* Charlie Chan-based one called "Harry Hoo" on more than one occasion.
* Charlie Chan books and films have this as well, and again cigarettes and cigars can be part of the clues.
* Charlie Chan, Charlie's son when he hears his dad is going to Reno — actually to consult the Reno Police on a case — is afraid his parents are getting a divorce.
* Charlie Chan dropped pronouns and articles, called himself "humble self", and uttered wise proverbs, but used few of the other conventions, which are typical of "pidgin". Earle Derr Biggers, his creator, specified that Chan learned English by reading poetry. In one story a man he's been working with catches a fake pretending to be him over the phone because he says "savvy," which Chan would never do. Sidney Toler and Warner Oland, who played him in the movies, for the most part kept to this characterization.
* Charlie Chan features Chan investigating a plot at the 1936 Berlin Olympics, and features possibly the most sympathetic portrayal of Nazi police ever depicted in American film. Even just a few years later, such a plot would be unthinkable.
* Charlie Chan films, the detective's sons fill that role. For all their occasional goofiness as sidekicks, they are otherwise intelligent and brave young men, who are actually portrayed by Asian actors.
* Charlie Chan. Keye Luke played him in the films (in the first film, they explicitly refer to Luke's role as Henry).

* Charlie Chan — The Chinese detective created by Earl Derr Biggers has been featured in nearly 60 films between 1926 and 1997 — but only four times by an actual Chinese actor, starting in 1989.
* Charlie Chan novels by Earl Derr Biggers, in which the author set out to create an Asian character on the right side of the law for a change. How accurate they are is open to question, but at least some respect for the Chinese and their culture is shown.
* Charlie Chan that even Charlie Chan does not realize what is happening until it is too late.
* Charlie Chan. The 1930s saw at least two other superficially similar Asian detective characters, John P. Marquand's Mr. Moto and Hugh Wiley's Mr. Wong. Both of them had film adaptations as well.
* Charlie Chan. The franchise began with a series of novels that started in 1925.
* Charlie Chan. The use of color-face (blackface, whiteface, yellowface) isn't seen as offensive as in the US, especially if it's not used spitefully. A commercial by Nippon Airline had an actor dressing up in whiteface for a gag, and most Japanese didn't see the problem, and an English competition in China featured middle school students dressed as "foreigners".
* Charlie Chan to the tired "fortune-cookie" stereotypes then popular.
* Charlie Chaplin as an escaped convict masquerading as a minister. After Charlie retrieves the money another hoodlum stole from Charlie's girlfriend, and returns it, the sheriff arrests him. The sheriff then lets Charlie escape to Mexico.
* Charlie Chaplin as "the cleverest, most brilliant film I have ever made".
* Charlie Chaplin as the decades go by, however, and his feature length films from later in his career are the most well-known.
* Charlie Chaplin at the height of his success, a serious drama that doesn't have the Little Tramp in it. It was given high critical acclaim but it failed due to disappointed audiences upset about the notion of a Chaplin film without Chaplin.
* Charlie Chaplin begins with King Igor Shahdov being deposed by a revolution in his distinctly Ruritanian East European country, fleeing to the United States only to discover his securities were embezzled by his Prime Minister.
* Charlie Chaplin, cast his son Sydney Chaplin to play his rival Neville. It was Sydney Chaplin's film debut. Chaplin also often cast his wives in the main roles of his movies as The Tramp.
* Charlie Chaplin, Charlie, an escaped convict on the run, puts on the first clothes he's able to steal. Naturally, it's a Protestant minister's vestments.
* Charlie Chaplin comes from the factory boss pestering people via videophone, including when poor Charlie tries to take a badly needed break.
* Charlie Chaplin ends with Charlie and his girl kissing outside in the pouring rain, and then entering the "Marriage Licenses" office.
* Charlie Chaplin failed to even make it to the finals in a competition to impersonate Chaplin in the "Little Tramp" persona that Chaplin made famous (he was deducted points for not showing up in costume — his participation was a spur-of-the-moment thing).
* Charlie Chaplin features a ballet - "Harlequinade" with the Commedia dell'Arte characters.
* Charlie Chaplin features the Tramp's zany antics as a construction worker. The main gag that falls under this trope is malfunctioning elevators, with some mishaps involving falling bricks and a blow torch for good measure.
* Charlie Chaplin film from 1928 who looked to be talking on a cell phone. Apart from the ability (or lack thereof) to travel in time — there weren't any cell phone towers to make it work.
* Charlie Chaplin grew up in Dickensian poverty. When he was seven, he and his brother were sent to a workhouse. He abandoned his education at thirteen and worked odd jobs in between stage appearances.
* Charlie Chaplin has a time skip from the time the orphan he picks up as a baby to the time he's five years old.
* Charlie Chaplin, has Charlie promising to do this for an unscrupulous captain. He winds up getting shanghaied himself.

* Charlie Chaplin. He was allowed back in with open arms in the early 1970s, attending the 1971 Academy Awards where he was presented with the Lifetime Achievement Award.
* Charlie Chaplin: In the eating machine scene, a device that makes people eat without using their hands is tested on the factory worker played by Chaplin. Due to a malfunction it ends up rubbing a corn in Chaplin's face and pouring soup on his shirt, among other things.
* Charlie Chaplin in which they discussed modern technology. Chaplin did not understand why Gandhi generally opposed it, though he granted that "machinery with only consideration of profit" had put people out of work and ruined lives.
* Charlie Chaplin is a satire on Hitler, Nazism and Fascism. Given the subject, it's Juvenalian, but surprisingly mildly so.
* Charlie Chaplin, Mr. Chaplin hides in an unusually-large dumbwaiter just as the butler upstairs is summoning it. He gives one of the party guests quite a fright when he arrives on the upper floor.
* Charlie Chaplin: Probably the oldest example in film. His work is not only worshipped by fellow comedians (comic actors, mimes, clowns,...), but also by film directors for being able to make comedies with strong narratives that made you actually care about the characters. He pioneered many gags, techniques and storylines that have been copied by all comedians that came behind him. Thus he is still seen as the greatest clown of all time.
* Charlie Chaplin reports that Clair was horrified by the power of the film, crying out that this should never be shown or the West was lost. Chaplin, on the other hand, laughed uproariously at the film, thinking Hitler was the greatest comedian he'd ever seen.
* Charlie Chaplin's "Charlie" character, the center of many of his movies.
* Charlie Chaplin. She was a Russian singer and dancer who "was a stateless person marooned in France without a passport". The idea, according to a press release written by Chaplin after the film received a negative reception, "resulted from a visit I made to Shanghai in 1931 where I came across a number of titled aristocrats who had escaped the Russian Revolution. They were destitute and without a country; their status was of the lowest grade. The men ran rickshaws and the women worked in ten-cent dance halls. When the Second World War broke out many of the old aristocrats had died and the younger generation migrated to Hong Kong where their plight was even worse, for Hong Kong was overcrowded with refugees".
* Charlie Chaplin Shout-Out became such a huge movie star that he became the first pop culture icon, with countless references to his character the Tramp being common through the middle of the decade.
* Charlie Chaplin. Some consider this version of reality to be too humorous.
* Charlie Chaplin the Depression, after all) but they gave him a signed recommendation that would help him find work.
* Charlie Chaplin, up with a beautiful nightclub singer. In the last scene the Tramp and his wife are working a little farm. They come inside and coo over a cradle—which contains Scrappy, nursing her litter of puppies.
* Charlie Chaplin was also paired up with several beautiful actresses. The trope is sometimes subverted, however. The final scene of "City Lights," features the beautiful blind girl, who regains her sight thanks to Chaplin, looking shocked and disappointed when she finally sees her benefactor.
* Charlie Chaplin when he has to sneak behind German lines to gain intelligence. This works pretty well until a German soldier decides to chop him down for firewood.
* Charlie Chaplin, where Chaplin is strapped into an automated eating gizmo that presents the corn this way.
* Charlie Chaplin where Chaplin's barber shaves a customer in time with the (frighteningly fast) Hungarian dance on the radio. The intention was to do the shave repeatedly and then patch it together with the music in editing. Chaplin had the music playing on-set, though. Result: The shave was filmed perfect in one take. The first one.
* Charlie Chaplin, which is also the last appearance of the character.

* Charlie Chaplin, who often cast much larger actors to surround him in scenes, so his Tramp character would appear small and fragile.
* Charlie Chaplin, whose body was stolen two months after his death. The ransom was not paid and the body was recovered eleven weeks later.
* Charlie Chaplin wrote, directed, produced, starred in, and composed the music for many of his films.
* Charlie Christian: Oklahoman guitarist, the first great electric guitarist in jazz, not just because of his fleetness as an improviser but because he recognised that amplification took the guitar from being a barely-audible part of the rhythm section and stuck it out front, making him one of the most influential guitarists of all time. Was the best thing in Benny Goodman's band, while he was in it; also helped create bebop by hanging out in clubs and jamming with musicians such as drummer Kenny Clarke. Died of TB aged 25.
* Charlie Daniels Band's "Legend of Wooley Swamp" talks of the titular swamp as a place where travelers are advised not to go at night, as there are "things that crawl, things that fly, and things that creep around on the ground", and can "make a strong man die from fright".
* Charlie Daniels mentioned that he was "way behind" and getting desperate.
* Charlie Daniels was not happy with using a cover of "The Devil Went Down to Georgia". Not so much the cover itself, but for the fact that it was possible for the Devil to win.
* Charlie Day's character has an unrequited crush on a waitress played by his real-life wife, Mary Elizabeth Ellis.
* Charlie didn't get much USO. He was dug in too deep or moving too fast. His idea of great R&R was cold rice and a little rat meat.
* Charlie died while he was writing his last request. However, on other copies of the book, extra pages after this request are deliberately left blank, leaving open the possibility that Charlie may have regressed to the point of extreme illiteracy instead of death.
* Charlie Dog — topped by a scene in "A Hound for Trouble", while posing as a waiter at an Italian restaurant. A customer asks for a
* Charlie Dog pulls this on Porky Pig. When Porky looks down, he finds Charlie lying on a pile of mattresses several stories high.
* Charlie Dore's "Pilot of the Airwaves": The singer tells a D.J. (unclear whether on the phone or only in her head) that she stays up listening to the overnight radio show every night and the D.J. seems like a friend.
* Charlie engages in this from time to time. Some would find that very annoying, but that comes with her being a young adult and teenager who hasn't grown up enough.
* Charlie Eppes's mathematical anticipations of the deeds of evildoers in
* Charlie Evans from "Charlie X" was given superpowers by the Thasians after his ship crashed and everyone else was killed. When the
* Charlie forgets about Jake after the latter's school play. And at the very end...
* Charlie Frost (Woody Harrelson) describing what the Apocalypse is in
* Charlie gets one of these as payback though: when Viola is asking her a list of personal questions, Charlie imagines smashing Viola with a frying pan. In reality, once again, she is sitting there and smiling.
* Charlie getting shot in the throat with an arrow), and most of the episode leads up to this.
* Charlie Harris's Maine Coon cat Diesel has a knack for telling nice people from nasty ones. People he dislikes include one crook in Book 2 and two
* Charlie has a rather human appearance (especially if we compare her to the other inhabitants of hell), but she is the daughter of Lucifer and Lilith, she is a powerful
* "Charlie" has long been a go-to unisex name, as it can be short for both the male Charles and the female Charlotte, but for most of its history it was more commonly given to boys than girls. Starting in 2016,
* Charlie Hebdo brings up more associations with Muslim terrorism, religious fanaticism and the right for freedom of speech than the actual ideology and content

of the magazine. Most people have never read an issue and thus have only a vague notion what the magazine is about.
* Charlie Hebdo. Furthermore, the attacks sparked massive support for the publication and caused the offending cartoons to be seen worldwide across the Internet.
* Charlie Hebdo magazine other than the fact that its offices were subject to a terrorist attack in January 2015.
* Charlie Hebdo terrorist attack in France, news channels confirmed that one of the employees of the factory where the terrorists hid was still in there after police besieged the factory. Fortunately, the terrorists chose to ignore him, being concerned only about how to resist as long as possible.
* Charlie Horse Music Pizza that taught about various concepts of music.
* Charlie. In case you thought him training to be a Kingsman indicated some inherent need to do good in him,
* Charlie introduces her to Patricia, recognizing the name of his ex-girlfriend. It turns out that this Patricia at the wedding was his cousin.
* Charlie is actually a subversion of this trope as his relationship with the President's daughter was a major plot point in seasons 1, 4 and 6, and at the end of season 6 he actually hinted that they might be considering marriage which would tie up the romantic loose ends of that long story, however in the last season there is not a single mention of whether he and Zoey were still dating let alone if they were planning to get married.
* Charlie is easily the most innocent member of the gang but this stems more from his sheer immaturity than any genuine moral standing being an unstable
* Charlie Is So Cool Like, uses a box of buttons, a toy TARDIS, a clothes iron, and other such 'instruments' in "A Song About Love."
* Charlie is the princess of Hell but is generally a very kind-hearted person. However at one point during her otherwise upbeat
* Charlie is unable to fully understand social cues due to the fact that he has always had to fear and run away from people all his life.
* Charlie Jade, all people in the Alphaverse have chips implanted in their arms that act as identification, an electronic wallet and a tracking devices. The plot of the series is kicked off when a women is found dead, and the autopsy reveals that she does not have a chip and never had one implanted at all. This is an impossibility in that world, so the titular detective is asked to investigate.
* Charlie Jade, certain people can move between alternate universes by covering themselves in water.
* Charlie Jade — co-produced by the Canadian CHUM Television and the South African Industrial Development Corporation.
* Charlie Jade: The Alphaverse is far more technically advanced than our universe (the Betaverse); it's also severely polluted, run by corrupt corporations instead of governments, and is built on a caste system where the lowest class is considered property. A rather more subtle example, as not everyone who travels from Alpha to Beta prefers the latter. One scientist assigned to the Betaverse is disgusted by the crudity of cancer treatment, implying it's easily curable in her universe, and Charlie himself spends much of the series unimpressed by Beta and trying to get home to Alpha, which he describes as "Some place just like this, only better. And much worse."
* Charlie Kaufman, is about a playwright who, as part of his new play, creates a life-size model of New York in a warehouse filled with thousands of actors. This model contains a warehouse, which contains another life-size model of New York, which contains another warehouse...
* Charlie MacDonald: Not only is he an assassin, but so's his harem of twenty-four cheerleaders, and apparently their collective
* Charlie McGee's name change to "Shar" is partly to conceal her identity and partly to avoid confusion with Charlie O'Neill.
* Charlie meets an old flame who has had a sex change and became Bill. He is freaked out by it but eventually comes to terms with the idea
* Charlie Mohr was an amateur boxer for the University of Wisconsin-Madison; his

death at the 1960 national championships led the NCAA to discontinue the sport.
* Charlie Moon And The Big Bonanza Bust Up where the kids are wondering why the hallway smells so bad and one of their speculations is tomcats. Since cats themselves don't smell bad, they're probably thinking that the cats are peeing to mark their territory.
* Charlie Morgan, UK wrestler and retired in 2019. Came out 2017 as a lesbian.
* Charlie Muffin) ends with Charlie (having betrayed British Intelligence in revenge for them setting him up to be killed) relaxing with his wife in a hotel in Brighton, England. "They'll look all over the world, but they won't look here." In the novels the movie is based on however, Charlie does eventually get caught.
* Charlie Munger, Vice-Chairman of Berkshire Hathaway Corporation, is blind in his left eye and has little peripheral vision in the other
* Charlie Murder. A later version of the skill eventually provides healing for eating the heart too.
* Charlie Murder is a literal curb-stomp. The enemy's head will explode violently underfoot, but strangely their brain will remain intact and can be used as a projectile.
* Charlie Nash played this role twice for The Illuminati and Shadaloo (Udon comics) when he
* Charlie O'Connell also appeared in a third season episode, as a different character (before his regular character was introduced).
* Charlie O'Connell would later make an appearance as the brother of Jerry O'Connell's character in
* Charlie opens the fridge in the apartment they've borrowed for the interrogation, only to find a dozen human heads to the end credits.
* Charlie Parker is a careful, reverential and misleadingly depressing biopic of Parker; he had his demons, to be sure, most of the time, he was swaggeringly confident, charming and mischievous, much like his music.
* Charlie Parker, repeatedly, and without being gentle about it. It's made rather obvious this reaction is born of fear and adrenaline, and Louis takes it all in semi-amused stride.
* Charlie Parker Series, a flashback to Louis and Angel's first meeting has Louis emerge from the shower and pull a gun on Angel, who has broken into his apartment and is attempting to steal his television. Louis also keeps a small arsenal hidden in the medicine cabinet in their guest bedroom' en suite.
* Charlie Parker Series, at Sam's baptism while Angel and Louis are acting as Sam's godfathers, Angel wears a suit so horrendous that fashion-conscious Louis spends the entire day pretending to have no idea who he is, even when Angel is standing next to him and talking to him.
* Charlie Parker Series do this constantly, with Parker and Angel in particular often doing it intentionally to irk their enemies.
* Charlie Parker Series has Jackie Garner and the Fulci brothers, thugs whose only real redeeming factor is their love for their mothers. Arguably, Louis also fits this trope, a hardened assassin whose love and respect for the women who raised him has led him to swear to never kill a woman.
* Charlie Parker Series kind of retroactively applies this trope as well, and he gets steadily more broken throughout the series from then on as his age and lifestyle catch up with him.
* Charlie Parker Series, Parker, Louis and Angel frequently travel separately to and from meeting points, particularly if there's a likelihood that somebody is going to die. They even go so far as to take separate rooms in the same hotel and spend their time there refusing to even look at each other.
* Charlie Parker Series, who is always the first to run and help a child in trouble, and never has any problem gaining their trust.
* Charlie Parker's life and career were nonetheless cut short at the relatively young age of 34 due to his ongoing problems with drugs and alcohol. During that span, he was a constant innovator and experimenter whose effects on saxophonists in particular, jazz especially, and even music in general, are still being felt to this day. Many of his contemporaries continued to speculate on what new ideas he

might have come up with even years after his death.
* Charlie Parker were well-known for extremely long practice sessions, sometimes lasting up to 14 hours.
* Charlie Peacock contends that as a messenger it is his job to deliver both good news and bad news. A line from the song is "all I ask is remember, I am only the message boy."
* "Charlie"- Project 670 SSGN- guided missile nuclear submarines, capable of firing nuclear warheads. Included the "Charlie I" type, seen in the Pacific Fleet and the Northern Fleet's improved "Charlie II".
* Charlie Puth gave cover artist Kurt Hugo Schneider a "Well done!" in the comments of his version of Puth's song "One Call Away".
* Charlie Puth: In "One Call Away", the singer assures his lover he'll be there if she calls.
* Charlie Puth's appropriately title "Attention" is all about him tearing down one, when he realizes his ex-girlfriend is going around bad mouthing him to get a rise out of him and trying to get him to pay attention to her, when he knows she doesn't care about him at all, and she's just doing it for her own vanity.
* Charlie recruits Mike to act as her boyfriend when she has to go to a sleazy bar to make a delivery for Paige. If she went in by herself all the sleazy men would start hitting on her and she would have too many people looking at her. She even tells Mike to "grab her ass" to sell people on the idea that he is her cocky, possessive boyfriend.
* Charlie Rich: "When we get behind closed doors/Then she lets her hair hang down..."
* Charlie Robison's "John O'Reilly" is about a boxer who's paid to throw a fight, bets the money on himself to win, and uses the proceeds from that to escape New York before the inevitable retribution finds him.
* Charlie's actual funeral in the first episode of season 9. Alan's eulogy was interrupted by Charlie's ex-girlfriends insulting the deceased, and Evelyn used the occasion to remind everyone that Charlie's house is up for sale.
* Charlie's Angels (2000), Alex uses a grappling hook bow repeatedly throughout the movie, most notably at the end when she hooks it into the fuselage of an airborne helicopter with enough force that it can hold all three of the girls.
* Charlie's Angels (2000) and knocks on the glass door to ask the family for help.
* Charlie's Angels (2000): At the end of the movie the Angels arrive at Charlie's beach house and do this through the front door.
* Charlie's Angels (2000) bought the rights to the film so that she could produce it through her Flower Films production company.
* Charlie's Angels (2000), but they're just practicing lines for his movie.
* Charlie's Angels (2000), Dylan orders three burgers, three fries, three shakes, and three apple pies. She turns to the others and asks them what'll they have.
* Charlie's Angels (2000) has Lucy Liu's character Alex attempting to keep her soufflé intact while the trailer she's in is getting perforated with bullets. The soufflé never stood a chance.
* Charlie's Angels (2000) is that he believes that Charlie left his father to die.
* Charlie's Angels (2000) Natalie casually talks with her boyfriend Pete while rescuing Bosley in the bad guy's hideout. She assures him that he didn't call at a bad time, when he comments she seems distracted.
* Charlie's Angels (2000)'s character plants a camera into the trunk his car.
* Charlie's Angels (2000): The Angels and Bosley pose as a Swedish-themed yodel-gram group who arrive at the "wrong" address to get access to a Redstar executive and scan his retinas via a device hidden in Bosley's sousaphone.
* Charlie's Angels (2000), the Angels have stood in front of massive explosions that should be enough to rip them to shreds, but they just sent hurling 5 feet in the air without any signs of wounds or bruises.
* Charlie's Angels (2000) when Jaclyn Smith reprises her role as Kelly Garrett.
* Charlie's Angels (2019) felt it was important to show, as Stewart previously had been told not to be too "public" about being bisexual for her career (however, it was still only an implied sexuality).

* Charlie's Angels (2019): John Forsythe (the voice of Charlie) passed away at the age of 92 in 2010 and thus, Charlie apparently died and his successor is a woman using a voice changer to sound like him.
* Charlie's Angels (2019): Sabina is seen to flirt with men and women but it's unclear if her attraction to men is genuine or merely pragmatic. Her saying that her seduction of Johnny in the opening scene was the worst date of her life suggests the latter, and she only seems to notice hot women.
* Charlie's Angels: a rather unexpected (for the era) use of this trope when a mook does this to a female roller derby athlete at the start of "Angels on Wheels".
* Charlie's Angels, but (thankfully) nothing like what happened in "Get Busted".
* Charlie's Angels, but the movies emphasize the parental relationship he has with his "Angels".
* Charlie's Angels episode "Angel Hunt". The Angels are lured to Diablo Island by an old enemy of Charlie's who plans to hunt them down and kill them in order to avenge himself on their boss.
* Charlie's Angels episode has the title characters entering the "Miss Chrysanthemum" pageant to find out who's frightening away the contestants.
* Charlie's Angels features a villain who runs a business creating examples of this trope and selling their services to other villains.
* Charlie's Angels: Full Throttle: an illegal chinchilla ranch on the premises is an 11-350.
* Charlie's Angels: Full Throttle had lots of cool cars, and a special featurette on the DVD to showcase them all.
* Charlie's Angels: Full Throttle has at least a couple examples of this, with Seamus O'Grady walking through a wall of fire, and with Natalie looking all prettied-up for the red carpet even after we saw her pull a hand-sized chunk of glass out of her abdomen mere minutes before.
* Charlie's Angels: Full Throttle has the Angels disguised as nuns. And that's the sound of Theology flying out the window.
* Charlie's Angels: Full Throttle Seamus O'Grady survives a roaring inferno. There is no explanation for this.
* Charlie's Angels: Full Throttle the villain steals a copy of the list of people currently in the witness protection program. As part of the Angels' investigation it's revealed that Dylan is on the list having turned in evidence against her former boyfriend, a member of the Irish mob who she saw murdering someone.
* Charlie's Angels: Full Throttle was up for a cameo, but the producers only wanted the original three.
* Charlie's Angels: Full Throttle, where the Angels confirm a character is an assassin by asking Drew Barrymore's character whether she found him attractive.
* Charlie's Angels had several episodes like this. One involved getting a compulsive gambler thief to lose his ill gotten gains in order to force him to steal again at a time and place of the heroes' choosing, so the police would have the evidence to arrest him. Another involved conning a conman in order to recoup his victims' money.
* Charlie's Angels has the Angels undercover at a 10K footrace. Kris sees something important but when talking to Bosley about it she doesn't remember exactly what, so she starts running in place. When Bosley asks what she's doing, Kelly tells him she's "jogging her memory."
* Charlie's Angels; he never even makes an appearance until the movie adaptation (and even then his face isn't shown on screen).
* Charlie's Angels is an iconic 1970s show and even received reboot movies decades later.
* Charlie's Angels Kris sees Arnie's butt and says that she thinks Arnie's butt's better shaped than Bob's when she says "Oh yes! It's much better!"
* Charlie's Angels, particularly in early episodes. Although attempts are made to avert this by having Jill display unexpected insight and knowledge, there are still moments like in "Night of the Strangler" where Jill, for no reason whatsoever, asks about a suspect's astrological sign in the middle of a mission briefing (the same episode includes a joke that she's taking memory classes because she keeps

forgetting things; Jill says she forgot to take the class). Jill (and her successor, Kris) also play up the stereotype as missions demand, as do (very rarely) Sabrina and Kelly as they attempt a "dumb brunette" variant.
* Charlie's Angels plays a liquor-store owner who wins a Sammy Davis Jr. look-alike contest. He accepts the award — from Davis himself, via split-screen — but insists that he doesn't 'really' look like Davis.
* Charlie's Angels revamp adds a black Angel in order to appeal to modern audiences.
* Charlie's Angels: Sabrina has to wear an explosive belt with a remote detonator in the second season episode, "Hours of Desperation".
* Charlie's Angels, the angels are given "costumes" to wear, namely skimpy bikinis. One of them quips:
* Charlie's Angels: The episode "Lady Killer" uses the "chloroform in a rag" trick, however unlike many uses of this cliche in TV shows of the era, it is used to kill rather than simply sedate. But the death is still shown to be almost instantaneous. (Except, of course, when it's tried on one of the Angels and she manages to come out of it unscathed).
* Charlie's Angels: The Patriots for a Free Society in the "Terror on Skis" episode seem to fit this trope. Their motivations seem to be muddled.
* Charlie's Angels, which is so iconic that it is still being parodied decades later.
* Charlie's boarder Justin Wardlaw is absent for the entirety of books 5 and 10. Unlike other cases, there's no reason given for his not being around these times. He's also off-screen for all of book 6, being mentioned all of once.
* Charlie's death in Season 10 was not well-received by fans or some members of the cast and crew. Given the show's habit of killing off female characters, the fact that it was a classic
* Charlie's Farm: The Wilsons were farmers in the Australian bush. They were brutish, murderous cannibals, and were killed by their neighbors. However, one child (Charlie) survived... and grew up into an even worse horror.
* Charlie's fiancée Chelsie's father, a virulently homophobic man’s man, comes out of the closet, divorces his
* , Charlie's girlfriend Lynn acts like this towards him, trying to make him jealous by kissing another girl and then spreading the rumor that he raped her when that doesn't work, and yelling at him because another girl flirted with him (and he tried to brush her off).
* Charlie Sheen always looks as though he's scowling, even if he's smiling or telling a joke. His eyebrows seem to be the main factor.
* Charlie Sheen got booed during his first presentation of his comedy show. How did you find out Charlie Sheen had a comedy show?
* Charlie Sheen has had many social issues in the past, including wild womanizing and drugs. At the end of the episode, he very publicly apologized to a past fling explaining that he has entire weeks he doesn't remember, one where he ended up in a tour bus with a bunch of groupies "And I wasn't even in a band!"
* Charlie Sheen since O'Neal and Sheen had never met prior to the Roast.
* Charlie Sheen, such as "Tiger blood" and "Winning!" He even got the word "Winning!" tattooed on his wrist.
* Charlie Sheen was living with a porn actress named Bree Olson and a model named Natalie Kenly.
* Charlie Sheen watching one on FOX News and telling him to get some help
* Charlie's new stepfather does one worse. He gives Charlie, who is not done grieving her biological father's death, a self help book telling her to smile more. The fact that he does this without a trace of irony or meanness but genuinely believes in it just rubs it in further how the rest of her family has moved on emotionally without her.
* Charlie's opening song shows her crying and looking at disdain at Hell's clocktower as it resets the countdown to the annual purge, showing that she's genuinely distressed at her subjects being brutally murdered every year. Her second major establishing moment is her interview and her second song "Inside of Every

Demon is a Rainbow", firmly cementing her as a
* Charlie's ridiculous stage play "The Nightman Cometh" proved so popular that the gang staged it in real life in 2009 and took it on a six city sold-out tour.
* Charlie tends to stand out in particular, as while the others are mostly average-to-below-average in terms of intelligence and education, Charlie is barely
* Charlie the intelligent, bipedal, amorphous mutated great white in
* Charlie, the protagonist of the former, is an upbeat, loving and sweet demon that looks the most human-looking among every other character; she's the Princess of Hell and has enough resources to get an entire hotel for her project; she believes in the goodness of others and that sinners can be redeemed, but she's also not stupid, nor a pushover, and can stand her ground when needed. Blitzo, the protagonist of the latter, is a low ranking imp that looks like a mix between a devil and a jester that opened his own business with the intent to murder people in the living world that demons dislike or want gone for revenge; he is extremely needy and lonely, and tries to make a family out of his work colleagues; he couldn't care less about the general state of Hell, or the people that don't directly concern him.
* Charlie the Tuna actively seeks out their tuna scouts to be captured, only to constantly get denied because he has good tastes rather than tasting good. Either Charlie misunderstands what StarKist is saying, or he actively seeks out death.
* Charlie the Tuna is adamant about being made into StarKist Tuna. He also encourages people to eat his fellow Tuna.
* Charlie the Tuna of Star-Kist seems to be suicidal and misguided at the same time — he tries to demonstrate his good taste (in art, theatre, music and so on) so that Star-Kist will take him, only to be told repeatedly that Star-Kist would rather have tuna that taste good.
* Charlie the Tuna will never be caught by StarKist, no matter how many attempts to show off his "good taste" he tries.
* Charlie the Tuna with being classy enough to be put in a can. "Sorry Charlie, Star-Kist doesn't want tuna with good taste... Star-Kist wants tuna that tastes good!"
* Charlie the Unicorn animations, the pink and the blue Unicorn suddenly start speaking Russian, literally saying "My hovercraft is full of eels."
* Charlie the Unicorn are named Roffle and Lolz respectively, but you would only know that from reading the script, which wasn't publicly available for a very long time.
* Charlie the Unicorn, Charlie reacts this way when he and his two... um... friends encounter a giant letter Z.
* Charlie the Unicorn flash has one of these. Er...sort of. It turns out that the door is not as fantastic and mysterious as advertised.
* Charlie the Unicorn, having been through everything else the cartoon is going to throw at him, at least he finds that kidney they stole back in the first one.
* Charlie the Unicorn is actually to the tune of a song called "Clarinet Polka" that dates back all the way to the 19th century.
* Charlie the Unicorn makes use of the "missing kidney" legend in the first video.
* Charlie the Unicorn. "Oh yes, the Banana King, of course. Absolutely not."
* Charlie the Unicorn Playlist LIVE video to describe the resurrected Jenna Marbles.
* Charlie The Unicorn that starts with a "w", which is never the same exact group of syllables twice, talked up in slapdash tones like they can't be bothered. (Based on the other times, Charlie historically knows that he has no choice but to follow them anyway, and says as much before he's swept up.)
* Charlie the Unicorn video series, apparently almost every other major character besides the titular equine can explode, which they typically do at the end of each video's musical number.
* Charlie the Unicorn when he finds out that the journey to save the world from 1000 years of darkness was actually a trap to steal his television.
* Charlie walks into the room, clearly not on the phone, while Bob is still 'talking' to him and asks "who are you talking to, Bob?"

* Charlie Williams: Britain's first prominent black footballer turned Britain's first well-known black comic. The novel combination of a black man with a Yorkshire accent and his first-hand experience of life in the British working class made him unmistakable.
* Charlie Wilson's War. Congressman Charlie Wilson and CIA operative Gust Avrakotos travel to Israel to see arms merchant Zvi Rafiah about securing Soviet-made weapons (as they want to avoid any direct American connection) to supply the Afghan mujahideen.
* Charlie Wilson's War is not actually banned, but Universal Pictures International Russia decided not to release it, as they was thought that a film with such a strong anti-Soviet tone would be unlikely to make a profit in Russia. Among the Russians who have seen the film, the response is overwhelmingly negative.
* Charlie Wilson's War is the need to find a weapon the Afghans can use to shoot down Soviet Hind gunships, which are armoured against anything up to .50 calibre. The venerable Oerlikon 20mm cannon is mentioned as a possibility, but dismissed because the Soviets will just switch to flying higher-altitude missions, above its effective ceiling. The key turns out to be the Stinger AA missile, though the CIA weapons expert also points out that a lot of other hardware is needed to make the Afghan fighters effective - including advanced communications gear so "they won't be so fucking easy to find".
* Charlie Wilson's War: Opens with the titular character naked in a hot tub with several equally naked Playboy Playmates.
* Charlie Wilson's War suggests that this is what happened in Afghanistan (see below):
* Charlie Wilson's War, with the heavy implication that they have sex later.
* Charlie X", in which Kirk and McCoy debate hotly who has to give the titular Charlie "The Talk". Turns out Kirk's absolute rubbish at it. Trips over himself the whole way and ends up telling Charlie almost nothing.
* Charli's biker gang is coerced by a cartel boss to transport a sealed cooler to Santa Fe within seven hours. Halfway through the story she finds out it's a human heart.
* Charli XCX her songs normally are. This is most likely why she never had another major solo hit afterwards.
* Charli XCX of handsome male celebrities in scenarios usually reserved for women.
* Charli XCX's "Femmebot" may or may not be from the point of view of a literal robot girl, with a ton of liberally-peppered and playful robot metaphors that at least invoke this trope.
* Charli XCX, the XCX standing for "Kiss Charli Kiss", though when she was first signed to a label, she told them that it actually meant "X-Rated Cunt X-Rated" in order to make it sound cooler.
* Charli XCX, which would be released in 2019 containing all-new songs. Despite retaining pride in the leaked material, she's actively refused to release them legitimately as she considers them irreparably "tainted", with only a handful of songs managing to evade this principle.
* Charlize Theron is that apparently she just doesn't get offered that many comedies, and she prefers them to the dramas she's always cast in.
* Charlotte after she starts coughing to see if she has a cold or not.
* Charlotte, and ironically did more harm than good to the division as a whole. The fact that the feud was mostly one-sided in Charlotte's favor, with most of the hot-potatoeing being Sasha winning the title and then almost immediately losing it back to Charlotte, also did the new title no favors.
* Charlotte, Ayumi seems to be perpetually happy, especially when talking to her brother Yu.
* Charlotte "Big Mom" Linlin has a tendency to cast aside the fathers of her many offspring once she gives birth to said children. The Straw Hats meet Pound, whom Big Mom abandoned before he could even properly meet his children,
* Charlotte "Big Mom" Linlin's favorite child is one of her youngest daughters, the teenage Charlotte Pudding.
* Charlotte Bobcats (now the second incarnation of the Charlotte Hornets) were

named after their founding owner Robert "Bob" Jackson.
* Charlotte Bronte. Poor girl has less than a chapter to be happy with the love of her life.
* Charlotte Brontë finally gets to the altar with her employer/true love Rochester when it is revealed that Rochester is already married to a mad woman he's got locked in the attic, and the wedding is canceled.
* Charlotte Brontë in these narratives, which went on for their entire lives.
* Charlotte Brontë, Lucy Snow meets a group of three men and three women while traveling. She is absolutely flabbergasted to realize that most unattractive man in the group (in terms of looks AND personality) is married to the prettiest young woman (proving that even back then, people found such a pairing highly unrealistic), and further stunned to realize that the woman is quite happy and content.
* Charlotte Brontë, who wasn't interested at all — until her father drove Nicholls out of the parish. The canny Reverend began to write Charlotte desperate and touching love letters and persuaded her to meet him secretly, ultimately resulting in their marriage. Tragically, she died soon after their wedding, while pregnant with her first child. But she died after knowing a year of great happiness, in contrast with the rest of her rather miserable life.
* Charlotte Church began her career aged 12 as a classical singer with a squeaky-clean image that played on her background from a Catholic family in Wales. As a teenager, she was photographed smoking, drinking and going to clubs; and stated repeatedly that she wanted to shed her "choir girl" image, to criticism from fans and the press. She also made offensive comments about Pope Benedict XVI, frequently swore in interviews and engaged in a public feud with the pop group Scooch. She did eventually release a moderately successful pop/rock album and is now better known as a TV presenter and the ex-girlfriend of rugby player Gavin Henson. Church addressed the problems of this trope herself in her statement to the Leveson Inquiry regarding phone-hacking by journalists.
* Charlotte Church's short-lived TV show; it included one sequence in which she went undercover as a Charlotte Church lookalike. Her disguise? Deliberately singing horribly. The judges were shocked at her uncanny resemblance to the, er, real Charlotte.
* Charlotte Corday, briefly reacted and turned indignant. Legros was arrested for his actions.
* . Charlotte expected her to either get killed or at least be humbled by the experience. Not only did Becky succeed, but she did so with astonishing ease.
* Charlotte features a scene where Yuu hunts down other ability users in other countries, starting with the Philippines.
* Charlotte Flair 2018 following Charlotte winning the SmackDown Women's Championship in match that originally involved Becky and then-champion, Carmella. The angle made Charlotte as if she was the one who valued friendship and Becky the selfish one who only cares about the championship, completely forgetting that Charlotte betrayed Becky first two years earlier for similar reasons. Charlotte would also called out Becky's heel traits in the following months (traits that Charlotte had done as well during her 2016 heel run) as well as calling her a no-show for being absent for two weeks after receiving a broken nose when Charlotte herself was absent for a month due to ruptured breast implant.
* Charlotte Flair. Also a star Volleyball player in high school.) Daughter of...
* Charlotte Flair - are recognised as the four hard-working women whose matches and feuds with each other showed that WWE was finally taking women's wrestling seriously. The era is recognised as having begun in 2014 when Charlotte first won the NXT Women's Championship and all four started feuding with each other. Just only a year later, three of the four were called up to the main roster (Bayley being the lone holdout). Becky hadn't even been on NXT for a full year when she was called up.
* Charlotte Flair: Debuted in 2013. Debuted on the main roster in 2015 and was the final Divas Champion and became a multi-time Women's Champion afterwards. Added "Flair" to her ring name in 2016.

* Charlotte Flair: head of the Flair crime family. Cold-hearted, cerebral, keeps her emotions hidden when dealing with her contemporaries.
* Charlotte Flair is always dressed to the nines in designer clothes and sunglasses, and almost always in white outfits with gold accessories.
* Charlotte Flair minus the party lifestyle. She's called the Nature Girl, her entrance theme includes the famous intro of his, and she has adopted several of his moves and mannerisms (Figure 4 [though she now uses a bridging version], knee drop, strut, WOOOO, etc.). This is not lost on people; in fact the sheer number of borrowed aspects from her father has been openly criticized both in-universe by her rivals and by a growing list of detractors amongst the fans.
* Charlotte Flair, Nikki congratulated her and offered a handshake. Charlotte knocked her down, kicked her in the face, and walked away while calling her a loser.
* Charlotte Flair on the other hand have less title reigns and are rarely focused on after losing the titles, especially Becky who is the only one who did not win the NXT Women's Championship.
* Charlotte Flair to cash in and take it immediately after Flair and Ripley's rematch the next night.
* Charlotte Flair. While she is a great athelete who balanced between great matches but poor storlyine, her main issues sterns over the fact that WWE is playing favourite with her, giving her multiple title matches over women, to the point by the summer of 2021, she is a twelve time champion, twice more than Trish Stratus, with seven. Another issue is that she is highly protected by the company and rarely loses a match (or being pinned/submitted in non-single matches).
* Charlotte Forever", on the other hand, feels more romantic than creepy. Of course for some that may make it all the creepier.
* Charlotte Gage-Radcliffe, one of the many girls who took up the mantle during Barbara Gordon's retirement, was barely a teenager.
* Charlotte Gray, which takes place in Nazi-occupied France, the eponymous heroine and a member of the French resistance are being held in a house by Nazis, and manage to distract the guard who's supposed to be watching them by making out, then jump him and run for it when he comes over to separate them.
* Charlotte is a main cast member in the fourth season and then is killed after only a few episodes of the fifth.
* Charlotte Katakuri invokes this towards his siblings, not only will he use his Devil Fruit powers to aid them in battle but will protect them ferociously. Luffy learned this
* Charlotte Katakuri is one in the Whole Cake Island arc, who's Big Mom's second son and strongest commander. Although Big Mom is the
* Charlotte Katakuri, one of Big Mom's Sweet Generals, prefers to fight at long distance by
* Charlotte Linlin aka "Big Mom" has no Logia power but bullets, cannon balls, missiles just bounce off her and swords break on her skin. She's been dubbed an "Iron Balloon" for her durability and only mental trauma can lower her defense and potentially leave her vulnerable to attack. The exact reason for durability is unknown, she is simply a
* Charlotte Linlin, aka Big Mom, seems to be some kind of freak, since she was the size of a normal giant child when she was five-years-old, despite having normal-sized parents. As an adult, she is seemingly taller than a house, but is significantly smaller than actual giants (still around half the height of one at 8.8 meters tall).
* Charlotte made that they'd start dating when he got back. However, despite some initial confusion, he seems to take her introducing herself as his girlfriend fairly well.
* Charlotte, Misa falls into this because, while she has the athletic skill, she can only act by possessing the body of her non-athletic sister, Yusa. This leaves her with a body that can't keep up with her actual ability. Despite this she's a key player in the baseball game against a telekinetic pitcher.
* Charlotte: Nao is subjected to this in episode 11, when some rogue ability users

attack her in her apartment at night. She is hit rather hard, and is knocked out by said punch.
* Charlotte, Nao Tomori dislikes being pitied by Yuu Otosaka. Whenever Otosaka expresses pity for Tomori's circumstances, particularly how her older brother was used as a lab rat and left traumatized by the experience, she snarks at him and says she doesn't want pity from someone who used his powers to cheat on tests.
* Charlotte "One-Eyed Charley" Parkhurst, a stagecoach driver during the Gold Rush, who wasn't publicly outed until after his death.
* Charlotte Opera in Whole Cake Island arc had years of his life ripped out by his mother Big Mom for lying about Luffy and Nami's deaths. It's unclear whether he’s still alive or not, Charlotte Moscato was thought to be dead when Big Mom did the same thing to him when on a hunger rampage but was revealed to be alive later. No such luck for Opera though, whose fate is unknown.
* Charlotte Oven introduces himself in the anime by just walking through the Chateau door, melting it on contact thanks to his powers, because he was in a hurry and didn't want to wait for the servants to open it.
* Charlotte Pollard the Edwardian Adventuress. She was the 8th Doctor's main companion in the monthly audio series and ended up getting her own spin-off. She has finally become a
* Charlotte Powers, at least on appearance. She cannot intuitively 'read' the emotions of others, and has difficulty understanding and expressing her own emotional state.
* Charlotte PPV was the worst offender, taking place only five days after an NXT special.
* Charlotte Praline is half mermaid half human and is rather easy on the eyes especially considering her mothers looks.
* Charlotte Prospero, who can create and manipulate candy as weapons, servants, and even prisons for his enemies. When he loses an arm in a surprise attack, he's even able to create a working replacement made of candy.
* Charlotte Pudding is an excellent chef, but an especially great chocolatier; her chocolate confections are unrivaled. Her sister Charlotte Chiffon is another excellent chef, with her own specialty being her namesake, the chiffon cake.
* Charlotte Roselei, noblewoman of the House Roselei who becomes Captain of the Blue Rose squad, had fallen for Yami Sukehiro, a foreigner from another nation who went on to become Captain of Black Bulls, who saved her from her curse by a witch that required her to fall in love to break it much to her dismay.
* Charlotte Ross) — more than twenty years younger and so out of his league they might as well be different species.
* Charlotte says that he'll be angry if the other two are dead, and after Yuu learns of Kumagami's fate, Shichino says that it happened because Yuu was "trying to save (his) own ass."
* Charlotte Scherzen, and will stamp out any potential threat to her power. And she tirelessly attempts to acquire power and influence on Mermaid to fuel her ego.
* Charlotte's disarmingly cute appearance is probably the main reason for her
* Charlotte signature Knife Edge Chops, a neckbreaker, a spear, and finally either a Natural Selection or a Figure Eight Leglock.
* Charlotte Smoothie while very nonchalant most of the time will act aggressively to anyone who hurts her younger siblings, as in the anime when Reiju poisoned Mascarpone and Joscarpone, she quickly used the her powers to wring the poison out of them and attacked Reiju in revenge.
* Charlotte's role is greatly expanded to become a friend who is there for Lizzie at several points where she wasn't in the books.
* "Charlotte's Thong" by Connan Mockasin - official lyrics were never released, and the artist himself supposedly said the vocals were in-studio
* Charlotte: Subverted in episode 11. Due to extensive Black Mail, Yuu is tasked with stopping the rogue ability user group by himself with Shunsuke's group nearby to assist if needed. Unfortunately one of their members attacks him to prevent him from using his abilities properly. Though he nominally stops them after unconsciously triggering the "collapse" ability, Kumagami, one of the hostages, is

killed shielding Nao from the falling debris. Shunsuke's group was also unfortunately unable to assist as Yuu used that ability rather quickly due to being stabbed by the girl attacking him, and they were wondering why he hadn't used the time-leap ability yet.
* Charlotte's Web 2: Wilbur's Great Adventure which it is intended to be a sequel to.
* Charlotte's Web at the county fair, Lurvey runs off to get water again, but instead Templeton revives Wilbur by biting his tail. Lurvey reappears with the water moments later, impulsively throws it before noticing that Wilbur has already revived, and accidentally drenches Mr. Zuckerman and Avery.
* Charlotte's Web: Avery — brother of the main human protagonist Fern Arable — tries to knock down the webs Charlotte created and kill the spider. His mother gets wind of this and immediately sends him to bed without supper as punishment.
* Charlotte's Web has three Japanese dubs: one for its theatrical release in 1973, the second from 1985 for VHS/laserdisc, and the third from 2006 for DVD.
* Charlotte's Web is from the POV of a pet pig living on a farm. Almost all the characters are either farm animals or wild animals that live on a farm.
* Charlotte's Web. It's stated that while Charlotte's daughters do become Wilbur's new friends and help soothe the pain of her death, they can't replace her.
* Charlotte's Web showcases how the deceptive female spider's archetype can use her guile for good: manipulating humans with "miraculous" spider webs to spare the life of Some Pig.
* Charlotte's Web speaking the eponymous spider's lines. Go ahead. I dare ya.
* Charlotte's Web. They see killing spring pigs at Christmas as perfectly normal. They never realise that they're causing Wilbur to feel much fear and stress when he is told what they're going to do to him.
* Charlotte's Web warns Templeton the rat that if Wilbur is killed, then Templeton, without getting any of his food scraps, "will grow so thin we'll be able to look right through your stomach and see objects on the other side."
* Charlotte's Web: When this happens to Fern and Henry, Wilbur realizes he is no longer the most important thing in her life.
* Charlotte's Web, who makes himself useful, Wilbur gets saved merely by having a benevolent spider crochet words above his pen to convince humans that he's too special to eat.
* Charlotte's Web, Wilbur befriends a lamb named Cardigan, who is rejected by the other sheep due to Cardigan having black wool.
* Charlotte's Web, Wilbur (the pig) is literally this trope. He is saved by Fern, who begs her father not to kill him because he is smaller than the other pigs.
* Charlotte Temple is the story of a young English girl who, sincerely in love, runs away with a soldier to America, beyond her family's ability to help her. Her soldier then abandons the girl when she's pregnant for a prettier, wealthier model, leaving Charlotte to eventually beg in the streets, and get a "happy" ending in that she dies in her father's arms.
* Charlotte Temple," which is more accurately "And By This, We Mean Those Who Would Criticize It For the Sentimental and Predictable Melodrama That It Is."
* Charlotte that he writes a thesis claiming that they were all drunks and druggies and their brother Branwell (who was the drunk and druggie of the family in real life) wrote all their stories for them.
* Charlotte, the early red herring love interest's friend pulls one of these, leaving her and Yuu free to eat alone together after school.
* Charlotte, though he compensated by buffing up his body for extra toughness and wearing armor concealed under his school uniform.
* Charlotte, Tiana's best friend, fits this trope down to T. She adores her father, and as a child, she clearly got many of her dresses made by twisting his arm until he paid for each one.
* Charlotte to Yu and Yumi. He is forced to transfer to Hoshinoumi Academy, which is really far away from her school. He is also unable to visit her without supervision, and she's unwilling to constantly visit him lest she seem like a

stalker. As a result, she feels it's best to cut their losses there, though he doesn't take it too well, and has the same shocked look on his face after going home.
* Charlotte Wells finds herself in this trope in the first season of
* Charlotte were extremely successful and influential authors, but they only wrote a total of seven books between the three of them. Also, they all died young; Charlotte at age 38, Emily at age 30, and Anne at age 29.
* Charlotte, Yu and the team confront a young pitcher who's using his telekinetic powers to win baseball games. They figure the best course of action is to play him head on.
* Charlotte, Yu is told to transfer to Hoshinoumi Academy, or else his cheating would be exposed.
* Charlotte, Yu uses his ability to transfer his soul to another person to look at their answers on the test. This catches up with him after Nao catches him in the act repeatedly. He's called in to the office and forced to take a test to prove that he'd legitimately earned his scores, and when he tries to use his ability on the proctor, he gets found out.
* Charlton Comics becoming more prominent than it was in the original era, and becoming an important character.
* Charlton Comics had an especially large and colorful stable of Horror Hosts:
* Charlton Comics purchased them, and the only appearance of Gladiator Voltron in official media.
* Charlton Heston as a personal favor, but he demanded that they kill him off in the first reel. As a compromise, he disappears at the end of the first reel and reappears at the end, to die in the last reel.
* Charlton Heston because he believed Michelangelo was straight and played him as such.
* Charlton Heston. He favoured the smaller, yet pivotal role of Cardinal Richeliu.
* Charlton Heston. In real life, Charlton Heston was also president of the National Rifle Association.
* Charlton Heston's name is spelled "Charlton Easton" due to his regular name sounding like Greek for "shit him" or "fuck him."
* Charlton Heston that his SUV has a custom transmission with eight forward speeds and three reverse, people flooded into Chevrolet dealerships to get one, but they couldn't. The custom transmission was built by the studio for that truck.
* Charlton Heston. This ended up being one of his final film appearances.
* Charlus Potter decides that Neville's parents are suffering from a magical version of PTSD and he and his mostly-Muggle fellow veterans should kidnap them from St. Mungo's so they can recover among friends.
* Charly has a Latter-day Saint BYU student, Sam, and his free-spirited non-Mormon love interest, Charly.
* Charly,, has an intellectually handicapped man undergo a treatment that boosts his intellect up to normal and then far beyond. Unfortunately, as he discovers from checking out the test rodent Algernon, it'll cause him to burn out and wind up even stupider than before, possibly brain-dead.
* Charmander evolves into Charmeleon, but he keeps his nice personality. He trusts Ash too much to treat him badly.
* Charmcaster, although she is still sometimes manipulated by certain male characters even then.
* Charm City Devils' cover version of "Man of Constant Sorrow," the bluegrass song popularized by
* Charmed (1998) about him prior to the reveal due to Piper's bad luck with men (her boyfriends often ended up being revealed as evil warlocks) but the reveal that he's their guardian angel does come as a shock to all of them. Since whitelighter/witch romances are traditionally forbidden, the couple do spend most of the entire eight seasons struggling to make it work before everything finally works out in the end. Subverted in that whitelighters are actually born human but are transformed into whitelighters and can be turned back into humans if the occasion demands. All three of their children are half-whitelighter, half-witch.

* Charmed (1998) all originally auditioned for Andy in Season 1. Brian Krause got the last laugh, staying on as Leo for eight seasons, while Andy was written out at the end of the first (Leo had been written as a recurring character first, and didn't become a series regular until Season 3).
* Charmed (1998)", Angel and Cole form a bond as demons with souls who have defied their natures to fall in love with a Charmed One.
* Charmed (1998): A variation happened with two entire dimensions in the season 6 finale where the sisters found an evil alternate dimension to their good one. They did too much good while in the evil dimension and that caused both dimensions to become extreme versions of their former selves. In the good dimension everyone was over cheery and smiling and people were shot for minor things such as using your phone at work. In the evil dimension it was the reverse where people got killed for saying "bless you" when someone sneezed.
* Charmed (1998) before turns up out of nowhere and Phoebe's blonde hair, dyed in the kitchen sink, suddenly reverts back to brunette.
* Charmed (1998), Billie combines her scrying stone with a GPS device, a serious upgrade compared to the sisters using their scrying stone on a map or globe.
* Charmed (1998), but finding traditional magical disguises too confusing (particularly for Wyatt and Chris), they came up with a glamour that would make them appear as themselves only to "those [they] call family," while everyone else would see a pre-selected alternative appearance.
* Charmed (1998), but the Charmed Ones constantly having to work around the ones who aren't. The first season heavily featured the sisters being investigated by the police, and that subplot showed back up periodically throughout the series.
* Charmed (1998) claims that she's giving Phoebe a tonic to boost her strength when it's actually a potion that will corrupt Phoebe and turn her to evil. Phoebe gets suspicious and dumps the tonic in a nearby plant. The next time The Seer arrives with a vial of the "tonic" Phoebe notices that the plant is now very dead and starts demanding the truth.
* Charmed (1998): Cole Turner, the source of all evil, marries Phoebe Halliwell, a good witch who is tasked with fighting evil.
* Charmed (1998) episode "Forget Me... Not". Instead of simply reversing back to the beginning, the sisters' memories were erased and they used a spell to relive the same day to discover what happened and how they lost baby Wyatt.
* Charmed (1998) episode "Hell Hath No Fury" when she finally breaks down and reveals that she is furious with Prue for dying, and then starts to scream and cry and bang on Prue's headstone until she finally just collapses and cries in Leo's arms. Such a well-acted scene that most viewers were able to overlook the flawed psychology of it all.
* Charmed (1998) episode "Something Wicca This Way Comes" has a scene outside the manor where Piper says to Phoebe "don't tell me you spent last night flying around on a broomstick" - which is a different audio level to the rest of the dialogue and is also said while Holly Marie Combs's head is facing away from camera.
* Charmed (1998) episode "The Painted World", a demon is trapped inside a magical painting.
* Charmed (1998) episode "They're Everywhere", the plot revolves around demons wanting to find the knowledge contained in the Akashic records.
* Charmed (1998): Flashbacks to the death of the eponymous Charmed Ones' mother is specifically set in February 28, 1978.
* Charmed (1998) for the first half of the series' run. It was later revealed that "The Source" was actually a primordial force that lived inside whatever demon was currently the leader of the underworld at the time.
* Charmed (1998)" gives an interesting slip where Piper is anxious about a dream where she makes out with another man:
* Charmed (1998) goes back to college in season 2 where she earns a degree in psychology, then returns in season 7 to become more professional in her career as an advice columnist. However, she doesn't continue where she left off after faking her death and assuming a new identity next season.
* Charmed (1998) gone evil in the future - trauma over someone capturing him and

trying for weeks to figure out a way to kill him.
* Charmed (1998) had various characters with every power listed above, some possessing them seperately, others possessing them all at once, like the Avatars.
* Charmed (1998) has an episode "The Eyes Have It" in which a Romani tribe is being hunted down by an enemy they defeated years ago. They're portrayed as having similar powers to the witches - of course with an emphasis on clairvoyancy. The ones with powers are referred to as Shuvanis - which is indeed a term for a wise woman in Romani culture.
* Charmed (1998) has an episode where the sisters have to distract a street full of workmen without using magic, so Piper tells Paige to use some of her "God-given magic" while unbuttoning Paige's blouse to show off her cleavage. Paige then steps outside with a tray of lemonade, causing all the workmen to rush to her and letting Piper get past them.
* Charmed (1998) has Paige going back into her younger self to re-live the day her adoptive parents died.
* Charmed (1998): In "All Halliwell's Eve", the sisters are sent back in time to save one of their ancestors; at the same time, team evil is sending back their main agent to prevent their birth.
* Charmed (1998): In "Morality Bites", the sisters go into the future, where one of them has killed a man with her magic and is executed on live TV via being burnt at the stake.
* Charmed (1998), Jason Dean actually bought the paper where Phoebe works to set up this scenario. Well, meeting and seducing her was at least part of his motivation. He did directly leverage his position by making her write an article defending online dating because she hadn't responded to his profile.
* Charmed (1998): Leo served in WWII. When he attended a reunion (pretending to be his own grandson) all the other veterans, many of them war heroes themselves, and their families all gathered around Leo to talk about how he saved their lives.
* Charmed (1998)", magic turns them into the tights-wearing kind of superhero.
* Charmed (1998) opted to gain about ten pounds to "look super non-threatening".
* Charmed (1998): Paige, Henry, and Billie are being held hostage in a bank by one of Henry's parolees. Paige tells the parolee that she needs to use the bathroom and he checks with the manager to make sure that there are no windows for her to escape through (not knowing that she is a whitelighter). Once in the bathroom, Paige orbs back to the manor.
* Charmed (1998), Phoebe accidentally transfers her powers to one of her neighbors, who promptly decides to use the power of premonition to cheat at casinos.
* Charmed (1998), Phoebe and Piper briefly compete for Leo’s affections. Prue points out to Phoebe she only likes him because Piper does, and she later admits as much when under a truth spell.
* Charmed (1998), Phoebe should have had more of a reaction than mild surprise.
* Charmed (1998) Phoebe was during the show's second half, some would argue that Paige's lack of similar "growth" is a good thing.
* Charmed (1998)", Piper expresses concern over the Succubus appearing at the club and scaring a band away:
* Charmed (1998) plays with this when Prue is turned into a man in order to track down a succubus. She dresses like a man and attempts to copy Dan's posture in order to appear masculine, which is a conscious choice on her part. But as the day goes on, she starts feeling more aggressive and has an instinctive reaction to the word "impotent," culminating in declaring herself a full man after she reflexively punches another man in the face. Piper chews her out for defining masculinity as aggressive and violent, pointing out that Dan isn't either of those things.
* Charmed (1998): Prue once had to contend with a reporter who saw her using telekinesis and was desperate to out her and her sisters as witches. At one point, he sabotaged her car to make her desperate enough to confess on camera.
* Charmed (1998), Prue, Piper and Phoebe time-travel back to the '20s.
* Charmed (1998) said that it was already the plan and Holly's pregnancy was "convenient timing".
* Charmed (1998) saw the death of Prue Halliwell, the original lead witch of the

show. She was replaced by Paige Matthews, the witches' long-lost half-sister.
* Charmed (1998)'s Christy Jenkins is rescued from years of being locked in a cave by demons. It turns out she's now working with them to corrupt her sister, so they can kill the Halliwells.
* Charmed (1998) she didn't have any particular cravings. Her unborn demon child, on the other hand, had a habit of turning whatever she was trying to eat into raw meat. Which, interestingly enough, was not the worst of the symptoms.
* Charmed (1998) she's surprised to find herself suddenly speaking French.
* Charmed (1998) situation, but the Hollow can take over weaker-willed individuals who think they can control its power.
* Charmed (1998) stereotype). A lot of people were inspired to seek out witchcraft from watching the show; many covens and groups recall getting emails and phone calls from people asking if they could be like the Halliwell sisters.
* Charmed (1998): The Charmed ones are living through fairy tales due to the balance being destroyed, and the big bad wolf eats their grandma and Piper. It ends badly for the wolf.
* Charmed (1998), the Devil ("the Source", short for "Source of All Evil") appears in several successive versions, but the show is maddeningly vague about who or what is in charge of "up there". The "Whitelighters" answer to "the Elders", but who do THEY answer to? Blank-out. The Elders seem to be the highest authority for the side of good, considering they were the ones who released the power of the Gods onto the mortals. Even so, they never actually do anything, except make things even more difficult for the main characters.
* Charmed (1998): The epilogue shows that Phoebe and Paige eventually had children with their love interests - each with three, to continue the theme of the series. Piper - who already had two son in the course of the series - is shown with a daughter to give her three children as well. For an added bonus, the last scene shows her grandchildren playing around her.
* Charmed (1998) Then again again, he absorbed all those powers in order to be able to return to the mortal plane to be with her again.
* Charmed (1998)." There's also a twist that, having been created by scorned love and vengeance, it specifically targets virtuous people.
* Charmed (1998). The same woman returns with a rifle and shoots Piper in the back when she and Prue are talking in the living room. And Leo is in the Underworld, where he can't hear them.
* Charmed (1998), when Phoebe and Dex got married under a spell, Dex carried Phoebe over the threshold and then they realized what happened. Confused by what happened, Dex promptly dropped Phoebe on the floor.
* Charmed (1998), when their secret is finally revealed, they encounter a young witch who wants to join their coven. After she breaks into their house and is promptly shut down, she doesn't take it well and ends up shooting Piper.
* Charmed (1998), which was used for all of three episodes before disappearing in season three until it finally resurfaced for one last use in season 8.
* Charmed (1998) who is estranged from her sisters. Her attire is a tight strapless dress that's very flattering to Shannen Doherty - and she looks stunning with long blonde hair.
* Charmed (1998), who is implied to have had a relationship with the stunning Seer, Kyra.
* Charmed (1998), who was turned human because she guided good witches. Inversely, an evil familiar got turned into a warlock when he killed his witch.
* Charmed (1998) with a blue moon, which... somehow... turned them into werewolf-like creatures who attacked Whitelighters. They're unaware of the situation at first, but strangely consider it a perfectly logical reveal once they figure things out.
* Charmed (2018): After Trip is accidentally killed, Charity plants evidence at the scene of his death to implicate him in the recent Halloween murders, to Mel's shock and his partner Niko's grief.
* Charmed (2018): Maggie's telepathy works through touch. When holding hands with her sorority sisters, she is able to hear thoughts from everyone in the circle.

* Charmed (2018) runs even more with this trope, with Macy often finding a scientific basis for various spells or demonic actions. Meanwhile, demon Alistair Cain is the head of a multinational biotech company, while Elder Charity works for a firm that helps women in developing countries start businesses.
* Charmed (2018) spell, when two of the protagonists see Hilltowne University during this period. Besides the general bright, spandex clad and patterned aesthetic, there's also a protest against apartheid going on in the background.
* Charmed (2018): The Eternal Spring instantly healed all wounds no matter how severe and granted the drinker agelessness and invulnerability. The demon Tull used it to become invincible and immortal, but while he couldn't be harmed or killed by conventional methods and was made an ageless immortal, the effects of the spring offered no protection against transmutation, and he was ultimately defeated by being turned into a tree. Even as a tree, the effects of the spring prevented ageing, as the tree itself would never wither, though it is unclear if it remained indestructible.
* Charmed (2018): The sisters have to deal with this when Angela gets possessed by the Harbinger.
* Charmed (2018), who can transform into a shadowy figure and phase through solid objects and travel long distances.
* Charmed about how magic works throughout the whole show, but sometimes, their powers will weaken or vanish when they have a falling out, use them against each other, etc.
* Charmed", a demon's powers cause the characters to become real, then the sisters to be trapped in the movie.
* Charmed admits to her that he can't deal with her being a witch and probably wouldn't be able to no matter how much time he had to get used to the idea.
* Charmed, after making out with a guy under the bleachers in high school, poor Phoebe ended up with the nickname "Freebie".
* Charmed: A group of demons perpetrates a series of attacks using an Alice in Wonderland theme. The justification is that the Charmed sisters have recently faked their own death, and the demons have a theory that they are still alive and won't be able to resist investigating murders if there's a fairytale theme to give it that extra captivating interest.
* Charmed allowed everyone who knows them well enough to see them as they are (most notably the child who couldn't recognize his own mother anymore otherwise) but everyone else will see the glamor.
* Charmed, along with having a demon possess her with insanity. He uses demon powers around her, and erases the evidence, so she can't be sure she's seen anything.
* Charmed Amusingly enough, he was actually a stripper playing out this trope.
* Charmed (an ability he did not attempt to use earlier) so that he and his operative can have a conversation (in front of the Charmed ones) without them knowing about it. He then leaves without attempting to harm the Charmed Ones.
* Charmed, and Alyssa Milano was always going to have this.) Season 8 adds the beautiful Kaley Cuoco to the line-up as well.
* Charmed and had to be saved by the others. (They also turned into good creatures a lot, too.)
* Charmed, Andy brings Prue back this way. She coughs a little bit when she starts to come back, but not very much and it very quickly turns into a hug. Possibly justified given that Prue's stopped heart was intentionally induced using a potion from the Book of Shadows, and she explicitly stated (to Phoebe; Andy had no idea what was going on) that it was completely revivable with CPR as long as the CPR was administered within four minutes of taking the potion.
* Charmed, an inspector at an autopsy appears to believe that a woman with "high levels of testosterone" in her bloodstream is a biological anomaly, rather than a statistical outlier. "Testosterone? How's that even possible?" It's as if the writers believed that women normally have no testosterone in their bodies at all (in actuality, they do, and some have more of it than others). This might be an in-universe error, as the inspector wasn't a biologist and was generally portrayed as

a perverted fool, but the coroner he was talking to certainly didn't bother to correct him.
* Charmed are seen only by demons who steal the sight of children. They then use their new-found Aura Vision to seek out people who are supposed to do great good, and kill them before they do.
* Charmed, as after Phoebe kills Cole to vanquish The Source of All Evil inside him, he steals powers from the Demonic Wasteland to return to life and get back with Phoebe, only to have her keep saying, "You're evil, you're evil, you're evil." This is a guy who became a DA to put criminals in jail and counter the demonic side he was born with, helped Phoebe escape the Underworld, ultimately had his demonic side vanquished, became The Source only as a side effect of helping slay the previous Source, came back from the dead solely because of his love for Phoebe and kept trying to prove he was a good person, only giving up completely after she and her sisters tried to kill him again. There's a reason many fans referred to Phoebe as Phoe Me after Season Five, and in this case, the main question fans had was why Cole would take her back.
* Charmed a spell causes sisters to mentally revert to little children. Penny tries to sit Piper down for a talk. Piper thinks it's this talk but Penny is really just trying to tell her she's a witch.
* Charmed as well as some of their ancestors and descendants. People that are half-whitelighter, i.e. Paige, have telekinetic orbing, a combination of the orbing and telekinesis powers.
* Charmed. (At this point, "Source of All Evil" is eventually revealed to be a title rather than a literal descriptor.)
* Charmed bad. One of things that is now off in the bad universe is that is now always night.
* Charmed, Barbas mumbles this when his mole revealed itself when captured.
* Charmed, because Phoebe was supposed to be the pretty one (although everyone secretly likes Piper best, and Paige is way sexier.)
* Charmed because "where else will the children learn about magic?", even though none of the other magical characters shown in the show up to that point went there.
* Charmed, but is never full blown. Phoebe, being actually psychic, can access and manipulate this connection the easiest. When Piper is caught on a separate plane, Phoebe is able to sense her. In the comic continuation of the show, Phoebe, Piper, and Paige all enter a literal and stronger telepathic connection thanks to a spell which lets them communicate across three different planes.
* Charmed. But then later on in the show, all men with powers tended to lose them or turn evil and get vanquished.
* Charmed can be mortally wounded by arrows tipped with Darklighter poison. Additionally, a wounded Whitelighter/Elder cannot heal themselves in this event (but another, unwounded one can).
* Charmed can kill almost any enemy by holding hands and simultaneously chanting "The Power of Three will set us free". As the series progressed they used specific spells for various enemies.
* Charmed: Constance M. Burge stated that the Halliwell sisters were based off her and her own real life sisters.Prue is based off of her eldest sister Laura, Piper is based off of her middle sister Edie and Phoebe was based off of Burge herself.
* Charmed, Coop, a cupid whose job is to find true love for people, falls in love with his charge, Phoebe.
* Charmed coworker and she growled about her toupee and accidentally orbed it off of his head.
* Charmed dark magic (the main ingredient needed for casting it is a fresh human heart).
* Charmed: Demons are quick to kill their underlings for even the slightest infractions. They'll even kill their underlings for not saying exactly what they want to hear at the time. About the only way a demon can hope to last long is by having a skill that's really hard to replace.
* Charmed demons, though. A smattering of other characters also possessed the ability to create shields, whether through inherent magic or through artifacts.

* Charmed did this right from the pilot. Between them the Halliwells have dated and in some cases married demons, half-demons, warlocks, angels, ghosts and god only knows what else.
* Charmed differentiates between "magical witches," who are part of the witch subspecies and are born with magical powers, and "witch practitioners" who aren't born with powers but can study witchcraft to limited effect.
* Charmed ended, Zenescope Entertainment started publishing a monthly comicbook series set eighteen months after the events of the final episode.
* Charmed episode 3 season 2 "The Painted World", and in episode 7 season 8 "The Lost Picture Show".
* Charmed Episode 4 Season 4 "Enter the Demon", a zen master can jump through any water surface (usually of a pool) to enter the plane of limbo.
* Charmed episode "Brain Drain" has The Source create an elaborate spell to trick Piper into giving up the sisters' powers. He makes Piper imagine that she is really in a mental hospital where Prue, Phoebe and Paige aren't really her sisters and she doesn't have powers. The doctors in the hallucination claim she created her life as a Charmed One to cope with the death of her grandmother. The chilling part is that the hallucination is well timed to Piper regretting becoming a witch so she almost believes the hallucination.
* Charmed episode "Chick Flick", Phoebe and her fictional horror-movie crush do this through the fourth wall to say goodbye.
* Charmed episode "Chick Flick", which is an indecisive parody of horror films, features a scene from an original slasher "My Axe Husband" where the killer is indeed chasing a blonde victim.
* Charmed episode "Dead Man Dating", when Piper falls for the ghost of a handsome Chinese-American man. She and the sisters must help him with two goals: punish his murderer and retrieve his (the dude's) lifeless body before the Chinese spirits of the dead come for his soul. They succeed, and after a tearful goodbye the girls watch him cross the bridge to the afterlife.
* Charmed episode "Love's a Witch," Paige has to play mediator in a feud between two magical families.
* Charmed episode "Magic Hour" when he and Piper try to get married against the Elders' will. Just as the little ceremony is about to start, the Elders abduct him. They do get married later though with permission.
* Charmed episode "Pardon My Past", Phoebe discovers that she was evil in a past life, but her vision lacks details. To get them, she decides to go to the only person from her vision who's likely to still be alive, who was a kid at the time.
* Charmed episode, Piper changes a baby's diaper and she freezes time to dodge the urine stream.
* Charmed episode, Piper is baking a soufflé. When Leo walks in, speaking loudly, Piper threatens to blow him up if her soufflé falls.
* Charmed episode "Sight Unseen", a stalker turns out to be a human woman and not a demonic threat after all.
* Charmed episode "Size Matters" has a demonic construct who demonstrates to Paige that he's not like ordinary people by showing her that he lacks a belly button.
* Charmed episode "The Day the Magic Died" when the girl's father and his fiancee are visiting is that she goes on and on about their great sex life, to the point that Phoebe and Paige use the first opportunity to flee, leaving poor pregnant Piper who has to stay in bed to fend for herself.
* Charmed episode "The Devil's Music", Phoebe plans to defeat a soul-eating demon by feeding him a balloon full of a potion that will force him to regurgitate all the souls she's eaten. When she actually encounters the demon, her reaction is, "We're gonna need a bigger balloon."
* Charmed episode "The Legend of Sleepy Halliwell", with the sisters only surviving as they were decapitated in the Magic School that protects the residents from suffering permanent damage.
* Charmed episode "Witch Wars". Aware that Piper, Phoebe and Paige are on the verge of discovering that he is after Wyatt, Gideon conspires with two demons to make the girls part of Witch Wars, a new demonic reality television show where demon

contestants compete to hunt down the Charmed Ones, with the winning demon acquiring the witches' powers
* Charmed fans were convinced that Piper's unnamed third child from the finale would be named Melinda, after the daughter she had in the future in "Morality Bites". This is despite Piper mentioning that, when she thought Wyatt was going to be a girl, she had planned to use the name Prudence instead. The Season 9 comics gave the child the name Melinda, making this canonical.
* Charmed featured a man who could enter dreams, and when women rejected him he killed them there.
* Charmed fiance Henry who spends the rest of the episode explaining why he and Paige were meant to be while the British half-whitelighter tries to show Paige that her life is too dangerous to have a human husband plus he doesn't think Henry is a worthy mate for her. The episode ends with the two men actually sparring in an alleyway.
* Charmed: First we learn of witches and demons, then angels, spirits, fairies, and a whole mess of critters come crawling/teleporting/orbing/shimmering out of the woodwork.
* Charmed flip-flopped on this. In the early seasons, both good and evil tried to keep a low profile. When the Masquerade was broken it was revealed to be a big deal and required time travel to fix often at a high cost. Later seasons introduced the Cleaners who would rewrite history to cover up events.
* Charmed for defeating a ghost only works if it's said by another ghost. Fortunately, becoming a ghost doesn't require that you actually die, just be unconscious and near death.
* Charmed forgetting they're the ones that should be bought. Finally she go back home with all of them, and never so much money was won.
* Charmed for it, since nobody else noticed the bad guy and thought Chris just stole a car.
* Charmed gives Piper a semi-panic attack that is most definitely meant to be funny, along with her delivery of "the wedding is off!" — plus another small gag when Phoebe accidentally steps on her train.
* Charmed gives us a live-witness version. Leo and Piper are in the club on a rowdy night with quite a few scantily clad girls dancing on podiums. Leo tilts his head and says "Can you do that in public?"
* Charmed goes above and beyond, giving the waiter specific instructions for how the chef should prepare the fish she orders. As her date points out, it comes with the territory, what with her being a professional chef herself.
* Charmed, going to Limbo greatly increases one's magical ability. Phoebe's ability to levitate a few feet off the ground on Earth practically became full-on flight while in this plane between life and death.
* Charmed had an episode about Paige being insulted by a student who called her Ma'am.
* Charmed had an episode based around a book taking them to a place with this style.
* Charmed had an episode called "Chick Flick" featuring psycho killers being released from horror movies. Prue becomes the Final Girl when her sisters get trapped in the movie, but she saves them. The in-universe "Kill It Before It Dies" features a teen couple surviving.
* Charmed had an episode involving a cursed ghost town that seemed to have disappeared off of the face of the earth.
* Charmed had a tendency to only pair the three female leads up with white love interests. Despite living in San Francisco, the majority of their love interests were white. All of the sisters marry white guys, while the token black character Darryl is married to the black Sheila. The only minority love interests for the sisters were the Asian Mark from "Dead Man Dating" for Piper and the black Mason in "Enter the Demon" for Paige.
* Charmed had a variation on the Vegas version: Billie casts a spell on Phoebe intending to help her find love. Unfortunately, it just bewitched Phoebe and her current boyfriend Dex, causing them to become ultra lovey-dovey and get married.

The trance breaks when they cross the threshold, and they're very confused as to why they're dressed as bride and groom, he was carrying her, and they have rings.
* Charmed had a variation where the sisters had faked their deaths and were holding a wake for themselves. Annoyed that so few people were mourning her, Paige cast a spell on herself to look like Janice Dickinson and give a tearful speech on how Paige was Janice's only real friend. And Phoebe tried to pick up a guy who was mourning her.
* Charmed had forbidden the producers from ever using archive footage of her. The result was one shot of Prue from behind (which was done by a stunt double) and a clip from when she was turned into a dog. The show did a couple more episodes like this, but the first one is what's remembered.
* Charmed had no supernatural enemies whatsoever. Instead, the episode's villain was a corrupt District Attorney who was trying to frame his mistress for murder. Towards the end of the episode, the mistress confronts the District Attorney and the two of them suddenly engage in a brief kung fu fight completely out of left field.
* Charmed had Piper and Leo falling in love in a past life. Leo didn't tell Piper since it would be awkward. Especially since, in the past life, they were broken up and she was dating a past life of her current boyfriend. In that episode it was a problem since Phoebe's past life was turned evil by an immortal warlock whom was feared to follow her in all future lives, as it was belived to be true love, and turn her evil. So they cursed her to die young.
* Charmed had Simon summoning a glove and slapping Henry with magic for a duel over Paige.
* Charmed had the ability to put his dead wife's soul into the body of a hot mortal woman, thus turning her into a seductive mummy. He targeted Phoebe and Paige for this vessel.
* Charmed had the sisters finding out that at one point in time all fairy tales were actually true, and they have to battle against an evil witch who finds out by asking her magic mirror that she isn't the most powerful witch in the world because the Charmed Ones are. To fix this, she puts the sisters into different fairy tale roles in order to kill them — Phoebe becomes Cinderella, Paige is Snow White, and Piper is Little Red Riding Hood.
* Charmed has a few cemetery scenes and it's mentioned a few times that Cole can't be tracked in a cemetery.
* Charmed has a twist on this in Season 2's "Morality Bites"; after the sisters use their powers to pull a vengeful yet relatively harmless prank on a man who continually lets his dog defecate on their driveway, Phoebe has a premonition of being burned at the stake for killing someone with her powers a decade in the future. One adventure later, they are sent back to that point in time to prevent falling prey to this trope, worded well by Phoebe:
* Charmed has Leo, Cole, Chris, Billie, and Coop all acting as sixth rangers to varying degrees.
* Charmed has notably darker skin that her sisters Prue and Piper and half-sister Page. The character is played by Italian-American actress Alyssa Milano. This is never acknowledged in the series, though.
* Charmed has novels of both original stories and several based on actual episodes.
* Charmed. He needed to regularly steal the youth of his victims, aging them into old people, in order to retain his youthful form. If he doesn't, he ages rapidly.
* Charmed. However the jury were on the verge of declaring a hung jury when Phoebe indicated she wouldn't vote to convict, then when she starts talking about magic the other jurors threatened to simply tell the judge she was insane so they could call in an alternate juror rather than declare a hung jury.
* Charmed". If someone wants to remain aligned with Evil in marriage, it must be performed with a Dark Priest, at night, in a cemetery.
* Charmed included witches, vampires, leprechauns, elves, zombies, harpies, mermaids, angels, demons (and possession), ghosts, genies, the Titans, gnomes, gremlins, werewolves, banshees, a siren, succubi, warlocks, a wendigo, Egyptian curses, toys coming to life, sandmen, the Four Horsemen of the Apocalypse,

unicorns, fairies, trolls, different dimensions (or something like that), Pandora, the seven deadly sins, nymphs, ogres, the Furies, the muses... even stuff that contradicts itself, like afterlife and reincarnation...
* Charmed in the episode "She's a Man, Baby, a Man!" and Prue changes into a man to lure her.
* Charmed: In the episode "Soul Survivor", this represents a prehistoric environment into which Leo and Chris stumble through a time portal.
* Charmed: In the episode "They're Everywhere", the Akashic Records are described to be this. However they will never be read; being destroyed before it was possible at the end of the episode.
* Charmed introduced an evil counterpart to the main universe so whenever good succeeds in "our" world, evil succeeds in the other. Things have to be that way so the sisters can't help the other world but they continue to do good in our world knowing that means that they are doing evil to alternate people in the other.
* Charmed introduced in the same episode, causing "a shift" in both worlds when they perform an act of good in the other world. Their world turns into a manically happy world, complete with an anthropomorphic cartoon sun that never sets, where minor infractions are punished severely; Phoebe is shot by a police officer for having parked illegally, and the hospital is mainly in the business of amputating the limbs of lawbreakers—and those of people who violate hospital rules. The Charmed Ones from the mirror world reveal that the opposite has happened to their already-evil world; mutilation is now the standard punishment for exhibiting a minor kindness like saying "Gesundheit" if someone sneezes. After Leo commits an act of "great evil" in the main narrative world by killing the Elder Gideon—ostensibly a good guy but who is actually the antagonist of the season arc—both worlds regain their respective status quos.
* Charmed, in which Piper contracted an obscure deadly illness, showed how using the sisters' powers for personal gain could backfire: the spell which removes her fever also places it in the body of a ninja doll...which then animates and runs around the hospital, infecting everyone it can with its little katana.
* Charmed is a magical tome the girls inherited which conveniently has listings for whatever monster they might be fighting that week, along with the appropriate counterspells to use. In one episode, after fighting a monster with no article, they add it to the book themselves.
* Charmed is an excellent cook and worked as a sous-chef. It's suggested that this was the primary reason that she was such a skilled potion-maker as well because the two skills compliment each other.
* Charmed is a whitelighter that could heal anyone but he was a World War II medic when he was alive.
* Charmed is cold with most people, with her warm side mostly shown towards her sisters Piper and Phoebe.
* Charmed is still a classic, "How Soon Is Now?" Is now best remembered as by the Smiths.
* Charmed is that the franchise had a wrench thrown into it when the WB and UPN merged into the CW - and the network decided not to pick up the show.
* Charmed", it turned out that maintaining it involved the deletion of anyone whose violent tendencies survived their spell.
* Charmed. Just when the antics are starting to get interesting, Piper puts her hand on her hips and says they still need to defeat the monster of the week. It wouldn't be so bad if she would show some real fear (of the monster) or annoyance (of the antics) in her delivery. Instead, it just comes across as flat, and a way to remind the viewers of the plan they made ten minutes earlier.
* Charmed, Leo takes a curious Piper "up there" to meet the Elders for the first time. They return to Earth during the Season 3 premiere, which takes place a month later. Piper, however, thinks she's only been gone for only one day.
* Charmed Life, Cat and Gwendolen's parents were first cousins. Chrestomanci explains that when they decided to marry, it caused their family to make a great fuss. "It is, you see, rather a bad thing for cousins to marry when there's witchcraft in the family."

* Charmed Life, Gwendolen turns one of the maids into a toad, having previously claimed that her bulging eyes make her look like one already.
* Charmed Life, the enchanter who keeps all the other magic users in line, is that he have nine lives. This makes it possible for him to go to other universes comparatively easily: he has the extra lives because the alternate selves who would otherwise have them don't exist.
* Charmed made it her personal mission to find love during the last few seasons. In the end, she got a Cupid. Yay?
* Charmed means that she's evil in some way. She spends a whole episode psyching herself up to walk into a church and is relieved when she doesn't suddenly burst into flames or something.
* Charmed (mortal= non magical "normal" human) accidentally find a loophole. They cast a spell by playing a tape recording of Phoebe chanting her edits to a spell they were researching, and it worked because Phoebe did the rhyming.
* Charmed. Most of the main characters end up married to men who were already part of the masquerade to avoid this.
* Charmed never has a premonition without the standard gasping, shuddering, staggering, but when she has a particularly scary one (e.g. Herself being burned at the stake in Morality Bites) it's usually accompanied by her falling over, crying, screaming, and generally freaking out other people.
* Charmed. Not only did they have to undo the ending of the previous season, which could have been a final ending, but budget restrictions meant not being able to have Leo in most of the episodes.
* Charmed of Wicca religion whenever the plot called for something religious to take place. They once had Leo and Piper gain the powers of the Hindu Gods. Piper even gets six arms, and fights demons with her goddess powers. And, the Greek gods were revealed to be humans empowered by whitelighters.
* Charmed. Oh, and of course, with Phoebe. He even later tells the shapeshifter he'd hired to look like her that she's only "good for the occasion dance" and that he needs the real thing.
* Charmed once had a chameleon demon named Alastair, played by Alastair Duncan.
* Charmed. One episode featured the sisters trying to stop them erasing Wyatt from existence.
* Charmed Ones are magically restricted from using their magic for personal gain. Try to predict the winning lotto numbers? The ink on your ticket disappears.
* Charmed Ones had once traveled into a dark version of their world created to keep balance with their version.
* Charmed on school grounds that prevents anyone from dying. This makes a mystery when bodies start showing up.
* Charmed, Paige has the ability to teleport objects which she uses to fight demons mainly by teleporting their magical attacks back to them.
* Charmed, Paige Matthews was given to normal parents after her birth and didn't know her true heritage until her powers started manifesting in her early twenties, thanks to a spell Piper had cast to bring Prue back awakening her powers instead.
* Charmed", Paige's powers are activated at the time as Prue, Piper and Phoebe's as she and Piper became friends shortly after Grams' death and she was in the house when Phoebe cast the spell, Paige gaining the power to generate a forcefield as a 'new' power since the three foretold powers are already present. When the Halliwells first vocally affirm that they all consider Paige their sister, the Triquetra on the cover of the Book of Shadows changes to include an extra circle surrounding the three points, which Piper concludes is intended to represent Paige just as the Triquetra itself represents the Power of Three.
* Charmed, Paige (who was unaffected by the changes) discovers her counterpart in this new world is dead ("This universe sucks").
* Charmed - Phoebe becomes a local celebrity for her advice column and faces one or two admirers - particularly in Seasons 5 and 6. She's even convinced to do a sexy photo-shoot to cater to them.
* Charmed, Phoebe finds the box from a pregnancy test Piper had taken in the trash, and touching it gives her a vision of a demon child being born (the first warlock

they fought after discovering their powers turned out to be Piper's boyfriend, adding a bit more credence to the idea). Typical comedic misunderstandings ensue until Phoebe confronts her with "I'm going to have to kill you before you can give birth to the prophesied demon, but it's okay, because I haven't found the specific knife yet, so we've got some time." Piper is, of course, not pregnant, and is more offended by that implication than the death threat.
* Charmed). Phoebe marries a Cupid. Paige's husband Henry (a 100% normal cop) plays this straight, his only reaction to her confession being mild surprise.
* Charmed, Piper and Leo travel to the future and meet themselves as an elderly couple. Grandma!Piper even had fresh-baked cookies ready for them in expectation of their meeting.
* Charmed, Piper and Phoebe enchant a pair of sunglasses so that the wearer can see the true form of evil beings.
* Charmed: Piper Halliwell's past life, P. Baxter, was the great-grandmother of her present life. Points for being biologically possible, as the soul is the same, not the body.
* Charmed: Premonitions usually come true, but it is possible to stop them from happening with such knowledge.
* Charmed projects and TV movies, but never with the high profile she once enjoyed.
* Charmed, Prudence turns into a guy. No, wait. She turns into Shannon Doherty in a bad wig and mustache. Her voice was just as unconvincing.
* Charmed, Prue is in the elevator on her way up to a job interview, and talking to her sister on her cell phone. Prue is clearly trying to use a little reverse psychology to psych her self up for the interview, talking about how she doesn't really need or want this job and it doesn't matter how the interview goes. She then gets to her interview and finds that the owner of the company she's interviewing with was the man standing next to her in the elevator.
* Charmed. Prue remembers it because she was mistakenly trapped by the ice cream man when she was younger.
* Charmed: Rebecca Balding, who plays Phoebe's newspaper boss Elise, was the aunt of a young witch in the Season 1 episode "The Fourth Sister".
* Charmed repeatedly tries to kill himself because Pheobe doesn't love him any more. He tries fire and even a Guillotine (he gets stopped before he can use that one though).
* Charmed's episode "A Knight To Remember" features Paige's medieval past life. The prince goes to see the Evil Enchantress wearing his full suit of armor, while his fiancee is wearing a very grand-looking gown (she was admittedly summoned in a hurry). The Evil Enchantress shows that she wants to be queen by wearing a grand medieval gown throughout the whole episode. Presumably as she can rely on her magic, she doesn't care about mobility.
* Charmed's episode count was drastically slashed, leading to Leo Wyatt appearing in only the first ten episodes and returning for the final two episodes. The void in between was explained by a convoluted plot where Leo was supposed to die, but (via a deal the sisters make with an Angel of Destiny) is instead simply frozen in a block of ice. Bad as that might've been, Dorian Gregory fared worse: being cut altogether and it being stated that Darryl Morris moved back east with his family. Curiously, this trope is not invoked in the first few episodes of the season where the sisters cast a spell to make themselves and Leo look like different people. Other characters see them that way, but viewers see their true selves. This also happened during the previous seven seasons, though not for the exact same budgetary constraints. During their respective tenures, Cole, Andy, Chris and Dan missed a handful of episodes. Even after being promoted to main cast halfway through Season 2, Leo missed a few episodes over the next five years. Darryl had it even worse, though. He doesn't appear in half the episodes of seasons 3-7. Andy is an interesting example. While Ted King appears in all but one episode of the first season, his character technically does when the Charmed Ones encounter his younger self in the past.
* Charmed's episode, "Rewitched", Paige went to a speed dating event at P3 and went though a montage of awful dates until she meets the last one, "Whit".

* Charmed's fifth season premiere has Phoebe and Cole mutually agreeing that their relationship is over - which is very inconsistent with Cole's attempts to win her back for the rest of his time on the show. This is because the episode was going to start an arc with Cole falling in love with Paige instead. When both actors protested the storyline, it was dropped.
* Charmed, she is changed into a dog so she can detect the cries of a Banshee (who, by the way, is a possessed Phoebe) and lead Piper to her.
* Charmed: Shortly before Phoebe and Cole's wedding they give Paige a tarot deck as a bridesmaid's gift. She does a reading for them and draws The Lovers, "Despair" and Death. Despair appears to be a subtitute for the 3 of Swords, the image shown is of a man with three blades piercing his chest. Unfortunately the series proceeds to play the Death card completely straight as a portent of doom. In the following episodes the sisters learn Cole is evil and Phoebe turns her back on good to be with him.
* Charmed sisters then kill. Phoebe doesn't seem particularly shaken up about it, which makes sense since when the baby controlled her she felt that it wasn't hers nor did it have a soul (which was true, since it was the Seer's own evil spawn) and it absolves her of all the crappy things she does while she was pregnant.
* Charmed, so it isn't clear how that works, but their fathers are still nonhuman.
* Charmed's Phoebe got turned into one. French Stewart also played one in Season Two, as the archetypal trickster character.
* Charmed's Season 6. Paige decides to find herself, so she goes to loads of temp jobs. These end up being annoying jobs such as dog walking, fruit packing in a factory, secretary to a sleazy businessman, etc. She usually finds a magical purpose in them, however.
* Charmed starts out as one but eventually evolves into a Deconstruction. The endless stream of failed relationships leaves her emotionally damaged and terrified of heartbreak again. After she gets a vision of having a baby in the future, she misuses her powers to see if her relationships will go anywhere on the first date. The final season Reconstructs it when she decides to get a sperm donor and she then realises that she doesn't just want a baby, she does want love as well and a Cupid gets sent to help her overcome her relationship issues.
* Charmed storylines involving magic. The show was often accused of going from "three sisters who happened to be witches to demon-hunters that live under the same roof". Seasons 5 and 6 introduced more overt fantasy elements, which did not please hardcore fans of the first seasons.
* Charmed: Subverted for the most part, as both good and evil have a tendency to reject any demon that attempts to pull this.
* Charmed tended to put up a blue forcefield if something evil came too close.
* Charmed tended to vary in the tone of its genre depending on what season it was on:
* Charmed tends to have furniture destroyed and windows bashed open when a demon teleports into the house. Slightly averted in that the characters can fix it using magic (maybe they use magic to make the local furniture more comfy to land on if thrown across the room). Their guardian angel is a handyman. Lampshaded by the characters several times as the series went on, particularly the tendency for people (both good and evil) to get hurled into the giant grandfather clock.
* Charmed than the Charmed Sisters themselves, but the Halliwell Sisters still had a tendency to wish that they could give Wyatt a normal life.
* Charmed that doesn't make things better. Piper drinks a potion, gags, then says, "Ugh, it tastes like ass... phalt."
* Charmed, the Angel of Destiny offers to take the Charmed Ones' power in return for defeating the Source (of all evil). Of course after feeling powerless in a battle, they decide to keep their powers.
* Charmed the costume designer Eilish appears in season 4's "A Knight To Remember" seen in a picture with Paige from one of her work parties.
* Charmed: The Council of two Elders and two powerful demons who control the Cleaners. When asked what happens if it becomes a tie, the Sisters are told this trope.

* Charmed - the episode "Charmed and Dangerous". You know things are going south when Leo is shot by a darklighter's arrow and Paige has her powers stolen too, effectively leaving Phoebe as the only sister with her powers (and she is the weakest active power-wise) with the Source of All Evil out for the kill.
* Charmed: The first few times Piper tried to blow up demons, there was usually a small delay before it actually happened. As she got better at using it, it became almost instantaneous.
* Charmed the go-to handwaver was Leo, whose encyclopedic knowledge of magic and the Elders' rules allowed him to consistently offer an offhand one-sentence explanation for blatant inconsistencies between episodes. A good example of this is his explanation of Piper's powers working by speeding and slowing molecules, which doesn't scientifically add up.
* Charmed. The Halliwell house is built on a Nexus, which is why it's so magical.
* Charmed; the last thing she said to her mother before she died was "I love you." As such, she avoids saying the same to her sisters, lest the same thing happen to them.
* Charmed, the Lazarus Demon always comes back to life fully healed, even if he is reduced to ashes. The only way to neutralize him is to bury his remains, and he'll come back if he is dug up.
* Charmed: The loss of magic is an ecological disaster. When magic disappears for a day as an omen of Wyatt's birth, a warlock visits the sisters under conditions of truce to discuss the crisis and mentions that their garden hasn't died yet but soon will, since nymphs and gnomes are no longer tending nature.
* Charmed, the main characters are witches who have many relationships with ordinary men. They aren't always successful, but Paige and Henry are doing fine, although the comic book continuation shows them going through a rough patch.
* Charmed: The most prominent one is Lieutenant Darryl Morris, who helped the sisters throughout the series, except in the first and last seasons. The first season had Darryl's partner and Prue's boyfriend Andy Trudeau, and the last season had Homeland Security Agent Murphy and Paige's boyfriend Henry Mitchell, a parole officer.
* Charmed, there are special anti-witch talismans that can make a witch powerless if they are in the same area.
* Charmed; therefore, the Charmed Sisters are only marginally less sexy than the female demons. Male demons would seem to be a straighter example of this trope, at least in the later seasons, when you had fellows like Zankou using leather outfits as a symbol for their status as evil demons.
* Charmed, there is the Grimoire, which is the demon equivalent of the Book of Shadows.
* Charmed, the sisters have to take a potion to help fight the Demon of Illusion. Piper's reaction to the taste is "Ugh, it tastes like as... phalt."
* Charmed). The sisters spend the rest of the episode working to put Jinny back in the bottle.
* Charmed the sisters were prohibited from using their power for "personal gain" to the point where they couldn't even use it to save Piper's life when she was about to die from natural causes, even though it would preserve their special Power-of-Three-ness and presumably save many lives in the long run. Later on, the writers played with this trope a bit.
* Charmed. The two knew each other since kindergarten and had an on and off again relationship throughout high school, but have remained friends with benefits by the time of his introduction. Paige later develops feelings for him but is disappointed when she meets his fiancé.
* Charmed, the villain is a man who shrinks people and turns them into porcelain figurines.
* Charmed: they sleep together on the first date of their new relationship, but Prue objects when Piper argues that that's equivalent to sleeping with the guy on the "first date," since they already know each other.
* Charmed. This got reversed in the seventh and eighth seasons which were more serious - but not as much as the first two.

* Charmed, this is Cole Turner's final fate - he ends up stuck in limbo, too good for Hell but too bad for Heaven.
* Charmed, this is Piper's primary witch power, to Freeze and Un-Freeze things and people. While useful for combating demons and warlocks, she uses it mostly to get a handle on various arguments between people or just to get a breather.
* Charmed, though he doesn't do anything to force her into love or marriage. He seems content with trying to convince her, proving himself, and challenging Henry for her hand.
* Charmed throw fireballs. Phoebe also had this power in her past life.
* Charmed to a human under the sisters' protection to becoming the new Big Bad (replacing the one he had originally worked for) to not caring about anything but trying to win Phoebe back by any means necessary.
* Charmed to collect their magical sand; as the Sandmen's numbers dwindled, they were unable to spread positive dreams throughout San Francisco. As time passed, the citizens became angry and short-tempered with one another, and one of the surviving Sandmen explained that humans need to dream to work out their problems and aggression subconsciously; if the demon succeeded in wiping out his kind, humanity would destroy itself in unchecked rage.
* Charmed to discover who had taken the hit out on them and the thing she regretted having to give up at the end was the wardrobe.
* Charmed to his healing powers. And even before that power-up, he has proved himself to be capable of combat, once even taking on a medeival knight in a sword fight and winning.
* Charmed took this to the extreme. Prue works at an auction house and one episode has her at work wearing a see-through blouse. Phoebe and Paige in the sixth and seventh seasons. Several episodes had the sisters turned into various magical creatures that required a skimpy outfit such as Valkyries in the sixth season premiere. Phoebe was the worst offender getting turned into a genie, an Egyptian bellydancer, a mermaid (the episode in question featured another mermaid who was reasonably covered up while Phoebe was only barely covered) and one infamous example where Cole got a demon to impersonate Phoebe and give him a lapdance. Paige also got turned into a wood nymph.
* Charmed to snark on Twitter "guess we forgot to do it the first time."
* Charmed. Two, whoever wishes the genie free is forced to take her place.
* Charmed type. They're tricksters by heart and will twist wishes in order to gain their freedom.
* Charmed uses this line repeatedly when her boyfriend Andy gets upset that she's keeping secrets from him and missing dates, and also when she eventually breaks up with him.
* Charmed utilized this, although it became less prevalent in later seasons.
* Charmed was like this, since they were often implied that they had always been there, and the Charmed Ones really should have seen them already, prompting fan reactions of "Where the hell were they before?!" Two examples:
* Charmed was shunted to Fridays for its second season, but was still able to procure a third season early renewal that also would see the network move the reboot back to its original Sunday slot for the 2020-21 midseason.
* Charmed was this due to being on the bubble throughout its seventh season. Brad Kern has said that production was game for an eighth season, but they had no idea whether or not they'd be renewed. (They actually didn't get renewed until a week before the season finale aired—meaning, unlike prior seasons, production completed on an air of uncertainty.) So, the writers tried to provide an episode that would allow for closure (the title mirroring the first episode, references to Prue and other departed characters and concepts, Daryl's conflict of loyalties reaching a head, and the destruction of the Nexus), but also leave the door open for continuing (the Charmed Ones being thought dead by everyone and changing their faces). Of course, the eventual eighth season was heavily panned for recycled ideas, a hated new character, budget cuts (which led to Leo having a minimized role and Daryl being outright dropped), and a lack of direction, but its last episode ended up being widely praised.

* Charmed went to producers and said: "Paige isn't a ho" - resulting in more long term romance plots for her. In a straighter example, Rose contributed to most of Paige's wardrobe in Season 4.
* Charmed, were found to have killed and taken over the identities of the original Rex and Hannah in an attempt to get the Charmed Ones powers.
* Charmed, when he was promoted to an avatar. He created a world where he was married to Phoebe, but she hated him, and to add injury to insult, he became Balthazar again, thus getting himself killed rather easily.
* Charmed when Piper and Leo have their powers magically switched while Piper is pregnant. Leo also somehow got all of Piper's symptoms. And again in the Sandman episode in which Leo ended up pregnant with Piper's baby until he felt the baby kick.
* Charmed, when Piper is possessed by a demonic spirit, the possessing spirit cannot access any of Piper's memories but can communicate with the real Piper's consciousness when looking at a reflective surface such as a mirror. The real Piper takes advantage of this by repeatedly withholding key details or intentionally feeding the spirit false information in attempts to trick her into blowing her cover. It finally works when Piper tricks the spirit into addressing her boyfriend, Leo, by the wrong name, tipping him off that she isn't the real Piper. However, the spirit catches on quickly and knocks Leo unconscious before he can take any action against her or alert the other sisters.
* Charmed when they were children. Piper's taking over of this role is the first indication that she had stepped up into Prue's shoes after the oldest sister's death.
* Charmed where this happens to Piper whenever she wants to have sex with Leo. This happened because she was afraid of the elders watching.
* Charmed, while Holly Marie Combs was virtually unknown. The first episode drew 7 million viewers and the first season kept a 10 million viewer average. Despite Doherty leaving at the end of the third season, it lasted for eight seasons in total.
* Charmed", while in a parallel universe, Paige and Evil Paige's phones both pick-up the call from Evil Piper while they are in the Underworld.
* Charmed, who can reassemble himself if his body is destroyed. The sisters have occasionally used him for target practice (with and without his consent), and a throwaway gag indicates that Piper tends to make him explode when she's mad.
* Charmed, who gained the ability to see when people were or would be in trouble.
* Charmed, who possesses his victims and assimilates their personalities into himself, becoming more powerful and intelligent. The problem comes when after assimilating Cole Turner, his feelings for Phoebe and humanity makes him difficult to control. Eventually it backfires, because he can't hurt Phoebe or her sisters without Cole interfering and making him vulnerable to being vanquished again.
* Charmed ("Witches", though the word is more neutral and would be closer in meaning to "Female Sorcerers").
* Charmed, with the requisite raw egg thrown in with who knows what else in a blender, to give to Piper.
* Charmed, worsening the estrangement. At the end of the same episode, he visits the strip club again and asks another shapeshifter to impersonate Phoebe, but this time he kills her.
* Charmed would get renewed and each year I would cry". The seventh season was expected to be the last, the finale of that even Book Ending the pilot episode. But an eighth season was ordered - also intending to set up spin-offs featuring Billie, Chris and Wyatt. Season 8 was the definite end, though a continuation in comic book form later resurfaced.
* Charmed: Young Wyatt Halliwell was played by the twin actors Jason and Kristopher Simmons, throughout his run in the series, exempt only in the cases of his older, future self-appearing.
* Charm explicitly didn't work like this, despite being used as such in every game. It only makes the victim think of the caster as a friend, but it doesn't let them forget their other loyalties, meaning they'll likely be rather confused and

anguished when their friends attack each other.
* Charmian Carr's first (and largest) acting role was as Liesl von Trapp in the film adaptation of
* Charming Opal series tell rather different stories of Opal losing her first tooth. In the book, Opal loses her tooth when she, Toot and Puddle are playing at Pocket Pond and Toot has to find it at the bottom of the pond. Then, later, Puddle dresses as the tooth fairy to leave a quarter under Opal's pillow. The animated story focuses mainly on Opal's worries about her loose tooth, i.e. "What if it never comes out?", "What if I lose it?", "What if a new tooth never grows?", etc. She finally ends up losing it in a piece of bread at dinner, then the group hurries to go to bed so that the tooth fairy can come. Opal wakes up the next morning, happy to find her quarter.
* Charming: Played with, as the prince's "charm" is part of a curse — as long as it's in effect, no woman can love anyone other than him. The central plot revolves around him trying to get rid of his charm, only to get the real non-magical version in the process.
* Charming's Jerkass father will take any chance in either world to separate the two, for a variety of reasons but mostly stemming from a vindictive streak after Charming refused to make a marriage alliance because he was in love with Snow.
* charming that Santo Trafficante Sr. (who had stayed neutral during the war) was able to move into the power vacuum and become the new boss of the region.
* charming, their personality is like a physical force. While they exist on the darker end of the moral spectrum, they never take disgusting actions that undermine their magnificence, leaving them diabolical but in a way the audience can't help but enjoy. And they are definitively not cowards. Ever.
* Charming: When Phillipe and Lenore first meet the cannibals, Lenore says they're so dangerous nobody met them and lived to tell the tale, prompting Phillipe to ask how she knows about them. She admits it doesn't make sense.
* charming, who served as script editor during the show's seventeenth season, once stated that "Tom is one of those people who oscillated between being one of the most wonderful, awesome, engaging people you have ever met, to someone you would gladly shove off a cliff."
* Charm School of the Nelson DeMille novel of the same name is a school for Soviet recruits to learn to behave like Americans before being sent on deep cover assignments.
* Charm webcomic by bkub, Yuyuko has done this at least once, and Yukari at least twice, although they use the Japanese equivalent of Squee, which is "KYAAA".
* CHARNAME, over the course of the games, lost (for the sake of convenience) his father, his home, and a startling number of friends (
* Charname's foster father, dies right after the tutorial of the first game. Doesn't stop him from appearing in Charname's dreams a lot, or certain enemies from impersonating him.
* Charnel Houses of Europe. Such a premise is too dark and serious even for this setting, and most fans were alienated as a result.
* Charon can revive you for a fee of either Macca or 3DS Play Coins. If you don't have enough of either, Charon himself has an AFF: He'll revive you anyway, and simply put you on a tab and charge you once you have enough Macca—just don't die again before you do, or it's Game Over as usual.
* Charon Industries and the Space Pirates in general are this, given the mere mention of them reveals that there's a third-party in the Chorus Civil War.
* Charon, the ferryman who takes the dead to the underworld. He is often represented as a skeletal figure dressed in dark robes with a long pole with which he steers his barge.
* Charo. She was born January 15 of either 1941 (what her birth certificate says), 1945 (what
* Charotte Katakuri is one for all his siblings, they all hold him in high regard and call him "big brother". Brulee especially gloats to Luffy about how untouchable her older brother is and she's mostly right.
* Char's Counterattack as Amuro was previously using a Re-GZ, a downgraded version

of the Zeta Gundam. This example is notable in that, much like Kamille's Zeta Gundam, Amuro designed this upgrade himself.
* Char's Counterattack more or less revolves around Char doing this and even begins with a preliminary meteor drop on Tibet.
* Chars Counterattack, then launched without fine-tuning the instruments.
* Char's Deleted Affair), Oksana Boginskaya, and a young Nanai Miguel all attracted to him.
* Chartbreak, Finch (last name) and Christie. The former's a girl, the latter's a guy.
* chart can be an example, Living Colour actually achieved better results on Alternative than on Mainstream Rock. 1990's "Type" hit #3, 1993's "Leave It Alone" achieved a #4. You will not hear any of their songs on an Alternative-formatted station today, outside of maybe a stray appearance of "Cult Of Personality", which pre-dated the Alternative chart (though it likely would have topped it if it had existed during that song's run).
* Chart Displacement: An artist's best-known song is one that didn't do well on the sales charts.
* Charter Communications has "Open to legal US residents of the 48 states (including DC)" except New York and Florida", though it has no coverage in Florida.
* Charter member Campbell left in 1993 and returned in 2011. However, its football team didn't join until 2018.
* Charter member UNC Charlotte, which changed its athletic identity to Charlotte in 2000, left in 2005. The 49ers came back in 2013, the same year in which they launched their football team (which joined C-USA in 2015).
* Charter member Western Kentucky left in 1982, but its football team came back in 1999 before leaving for good in 2001.
* chart manipulation, while the better-known song achieved its peak naturally.
* chart that activate seemingly at random means it's not recommended for high-level competitions.
* Charybdis Heights A footnote concerning the change and a link to the original strip can be found underneath the revised version.
* Chas & Dave, best known for their humorous and fast-paced songs, had a hit with their maudlin ballad "Ain't No Pleasin' You".
* Chase and Gert are a happy, mostly well-adjusted couple at the beginning of the second series. Naturally, the events of the second series put their relationship under strain... and then Gert dies.
* Chase Cartoons could think of) was a success in its own right when people took it at face value instead of the satire it was supposed to be. But while a lot of those characters remain beloved icons of the medium, you just don't see a lot of these kind of shows anymore. The very few attempts to revive this premise in later years are seen as obscure, or as cult shows at best.
* Chased by Angry Natives: A character gets chased by angry native population.
* chased by half the student body, he hides from them, and then realizes The Pit needs lots of people at their party, so they can raise money. He then gets the people to chase him to the party.
* Chased Off into the Sunset: The story ends with a character being chased by another character towards the sunset.
* Chase Field in Phoenix was formerly Bank One Ballpark, the name change falling in line with JPMorgan Chase's merger with Bank One in 2005. Arguably, "chase" evokes the feel of baseball better, making the stadium's corporate sponsorship not so obvious.
* Chase has been described to carry enough weapons for a small army. When asked if he'll really need all of them, he answers "I know that if I leave any behind, I will." That being said he's willing to lend a long knife to an unarmed woman traveling with him.
* Chase hastily covers Molly and Klara's eyes after they stumble across a television display showing footage of the Young Avengers apparently getting slaughtered by the Skrulls.
* Chase He's so competent, he's never been bested in straight 1v1 combat by the

main characters. While still playing a very active part in season 3, he eventually gets overshadowed by....
* "chase" him into Central Park and, while the leader is giving a rousing speech about how Spider-Man's rep had to be overblown and that he was just an amateur and to play by the numbers, Spider-Man is taking out each of the other mercs behind the leader one at a time, while they're traveling in a tight formation and looking just about every direction except the one that matters (up). The leader ends his speech to turn around and gauge its impact on his men only to find them all gone... and then he goes berserk. Spider-Man ends up leaving the unconscious mercs webbed up around the house of the enemy who'd hired them. Think it was the Chameleon... he freaked out.
* Chase: In the episode Repo the criminal they are chasing is a believes that America stole the territory and doesn't believe in the authority of the police, making comments about it to most people he meets.
* Chase is infamous for doing this frequently in the series being that he's allergic to cats and birds.
* Chase is portrayed by a Samoan actor, with his family and many minor characters being Maori.
* Chase Me in November 2019, and was pronounced dead shortly thereafter.
* Chase No Face, a cat who looks like someone took a blowtorch to her eyes and nose. She was hit by a car and survived, but her nose, whiskers, and most of the fur on her face could not be repaired by doctors, leaving nothing but pink flesh left where her fur was. Now works as a therapy animal for people with disfiguring injuries.
* Chase No-Face, who lost her nose and eyelids in a car accident but lives a normal life, needing only a dash of eyedrops twice a day and a dark room to sleep in. If you feel slightly queasy now, brace yourself before looking at this link.
* Chase plants one on Gert right after she saves his life with CPR right after
* Chaser. The protagonist is forcibly enlisted by the local Italian mafia to fight them for several levels, until the player manages to wipe out both groups.
* Chase Scene slower than Obi-Wan, allowing Obi-Wan to fall in at a relatively small speed.
* Chase's increasingly erratic behavior, culminating with him going on a bender while Cameron has no idea where he is, leads Cameron to believe he's cheating. Even when he tells her it's something even worse, she still circles back to cheating because she can't imagine what's worse. As the audience already knows, Chase intentionally killed a patient.
* Chase's inspiration for Dr. Melfi came from his own psychiatrist at the time, Dr. Lorraine Kaufman, and eventually contributed to the psychological development of some of the characters.
* Chase's role in their relationship, even Chase is shocked to find out that Leo is gay, let alone that he has feelings for him.
* Chase Stein spent years haunted by the death of his girlfriend Gertrude Yorkes, who died in order to save him from being killed by Geoffrey Wilder, which drove him to several attempts to resurrect her, the most recent of which finally took.
* Chase teaches him how to do it), but later on the moves become more ridiculous, with such moves as "Grasshopper Doing Dog-Paddle", "Dogs Playing Poker" and "Spider Doing The Hokey-Pokey".
* Chase the Chuck Wagon meant to advertise Purina dog food. It was available through mail order by sending in proofs of purchase to Purina. It's a simple maze game.
* Chase used a pair of X-ray goggles on Karolina and Nico, and it naturally had the "see underneath clothes" setting.
* Chase was originally intended to be British, but Jesse Spencer gave such a brilliant audition that he was made Australian instead.
* Chase was physically and verbally abused by his father, to the point where he blamed himself for his abuse. Frighteningly, in the last arc before the series was cancelled, he threatens to beat Klara because she's crying too much after he's deliberately gone out of his way to be cruel to her, because he blames her for

* Chase was renamed "Bang a Gong (Get It On)" upon its release in the United States.
* Chase Young convinced him to trade his soul for an immortality potion. Since then, he's been one of the world's greatest evils.
* Chase Young has this as his entire motivation - he knows Omi has the potential to defeat him someday, but also that their combined power would make him invincible. Therefore, he never puts his
* Chase Young spends almost the entire second season working to corrupt Omi and convince him to join the forces of evil.
* Chas Finster is a kind, well-meaning man, but is also clumsy, awkward, absent-minded, and frequently a
* Chas Finster's nickname is sometimes spelt "Chaz", with a Z, by fans.
* Chasing a Butterfly: A kid or similarly innocent character chases a small animal out of curiosity.
* Chasing Agent — An agent who eagerly chases after UFO information.
* Chasing Amanda mentions being raped by her brother almost casually. Her uncle is appropriately stunned, but she zips right by it. Her treatment of the subject may be partly due to her tendency to "hide" from her own life, but it still feels like an attempt at cheap sympathy for a movie lacking in sympathetic characters.
* Chasing Amy," and this trope could in fact be renamed to that with little difference in meaning.
* Chasing Amy (bisexual female main character, gay supporting character, lesbian supporting characters; subject matter includes biphobia)
* Chasing Amy: Holden is seen alone on a swing set following a huge argument with Alyssa. (The same swing set they had the "what is sex" discussion on earlier in the film.)
* Chasing Amy is in fact the most critically succesful of Smith's movies)
* Chasing Amy. The second half of the movie becomes a deconstruction of this concept, eventually shifting from a story of unrequited love to a cautionary tale about forcing someone to love you on your own terms.
* Chasing Amy, when Alyssa takes Banky, Holden, and Hooper to a bar in New York. It's a normal New York dive bar, so much so that Holden doesn't realize the significance that Alyssa chose it until after he's fallen for her.
* Chasing Amy, which makes BOTH other characters turn their backs on him.
* Chasing Dogma which in turn lead to their involvement in that movie.
* Chasing Dragons and orders that every man, woman, and child on the island fight to the death. And true to form, he goes down fiercely himself when royal forces breach his throne room.
* Chasing Dragons: As in canon, armies routinely rape and sack their way through Westeros. Even the normally honorable Blackfish accepts this as a reality of war in a time where soldiers are paid in plunder and the chance to rampage. The Ironborn embrace it, and for Lyn Corbay it's a specialty.
* Chasing Dragons: At one point, Baelish notes that the Kindly Man (who is strongly implied to be Varys) has positioned himself just right in Myr's criminal underworld — he has enough power to be a valuable source of information and aid to both the royal government and other criminals, but not enough that either side views him as a threat that needs to be eliminated.
* Chasing Dragons has the Iron Legion, a Romanesque infantry created by the Kingdom of Myr, consisting of former slaves and some Ironborn. Their competence on the battlefield is only exceeded by their hatred of slavers.
* Chasing Dragons is to have his guards assault not just any of its preachers, but also anyone who listens to them, even if it's just to heckle them.
* Chasing Dragons, Khal Pobo unites a massive Dothraki horde to wage war against the Kingdom of Myr in order to avenge the death of his own Khal, Zirquo, at the Battle of Narrow Run. In return, Robert swears revenge against the Dothraki for the depravities performed on his subjects during this conflict.
* Chasing Dragons: Oberyn Martell tries doing things this way after failing to defeat Stannis in a conventional war. While it works seemingly alright for awhile, after his death his movement either broke up or degenerated into banditry.

* Chasing Dragons radical faction of the Faith starts burning those they deem heretics (which is basically all prominent nobles who refuse to convert to their teachings).
* Chasing Dragons, the Faith of the Seven continues to serve as a counterpart to Christianity. Following the various schisms, the main (Baelorite) branch is more clearly based on Catholicism, with the Jonothorians being a counterpart to Lutheranism, the Rymanists being a counterpart to Calvinism, and the Old Faith being a counterpart to Presbyterianism/Puritanism.
* Chasing Dragons. They both share the AU of Rhaegar surviving Robert's Rebellion and fleeing to Essos with surviving Targaryen loyalists, with Robert then abdicating the Iron Throne and chasing after him with a sellsword company that eventually conquers Myr. Beyond that, things take rapidly different courses.
* Chasing Dragons, this is Stannis' reaction when he hears that Cersei threw an ink pot in Praela's face for not-so-subtly calling her fat.
* Chasing Dragons: Unlike the rest of the Sunset Company's leadership, Ser Lyn Corbay doesn't care about the righteousness of their cause and is only interested in gaining wealth, fame and whatever power he can from the wars. As for the company as a whole, he is hardly the only one.
* Chasing Dragons: While Norvos is ruled by its priests, it's actually administered by a byzantine arrangement of councils and committees with a complex checks-and-balances system which means that it usually takes forever to get anything done.
* "Chasing Gold"), an ordinary kid who loves singing about Nacho Fries and becomes a star after his gift is discovered by a talent agent. Zack enjoys his stardom, at least until he finds out that it's only for a limited time, and, unable to accept his impending doom, begins his downward spiral.
* Chasing Jenny has a thief trying to recover a rare stamp he stole years ago. The story ends with the stamp in the hands of a little girl. She doesn't understand its value and just sticks it on her teddy bear.
* Chasing Liberty proceeds from the President's daughter ditching her Secret Service detail to get some personal space.
* Chasing Liberty so she'd have somebody keeping an eye on her). Romance ensues.
* Chasing Liberty: The president's rebellious daughter Anna decides to go skinny dipping in the Danube so she can "experience freedom at it's utmost freest", much to her bodyguard's frustration.
* Chasing Mavericks was actually filmed in Santa Cruz and Half-Moon Bay, California. The local pizzeria at Pleasure Point even did a bit of remodeling so that it resembled its past self at the time the movie was set.
* Chasing Redbird by Sharon Creech have this problem — there are seven children in the family. Some of the children propose color-coding their clothing to avoid this.
* Chasing The Shadow fight scene includes both him and Kakashi requiring serious emergency treatment.
* Chasing the Sunset. All the female characters wear practical everyday clothing which generally bares just the arms and lower legs. Clothing for special events is slightly more revealing; clothing for combat is heavier.
* Chasing the Sunset compiler (it's a programming language), spells out "beep".
* Chasing the Sunset have the attention span of a moth, probably as a counter for their omnipotence. A pixie can do anything she believes she can, but it vanishes as soon as her attention goes elsewhere. Naturally, all pixies love "shinies".
* Chasing the Sunset regards anything shiny as there for the taking. (Spelling her name backwards gives you a clue to her personality.)
* Chasing the Sunset. Their foremothers were ordinary women who took up combat to save themselves: by the time we meet them in the comic, they are blue-skinned warriors who reproduce asexually.
* Chasing the Sunset, whenever Leaf's eyes go red, it means he's about to unleash the Furies. Not sure if it persists later.
* Chasing the Sunset. When she gets interrupted in mid-sentence, twice, she is stuck until she can rhyme what she just said. A helper character explains that she always gets out of it.

* Chasing Yesterday. At the Juvenile Service Center, she gets into a fight with The Bully girl, at Alexa's home a Bratty Half-Pint picks on her because he's never seen her before, when she runs away from that house temporarily with her friend Daniel, a man comes out of a dark alleyway and tries to knock her out, and then later on she and Daniel are cornered in an old, run-down house where her fake real mother tries to kill her J.D. thinks that's what happened. And that's only from book one. Not to mention that J.D is connected to many crimes of which she doesn't remember.
* Chasm City features a space station that is cooled by pumping ice through pipes, turning to steam in the process before being ejected into space; this is justified, as the station's heat radiators were broken off by space debris.
* Chasm City has a space elevator on the planet Sky's Edge; the main character gets attacked while he's riding it into orbit.
* Chasm City, Orcagna has a large square hole cut through his abdomen.
* Chasm City, when a group of characters uses it to gain entry to a hostile alien structure.
* Chasms of Malice, by Luke Sharp, an adventure set entirely underground.
* Chasm. There's even a skeleton boss, King Trell, whose lack of lungs doesn't stop him from blowing into a horn to raise skeleton archers out of the ground.
* Chassis 1940s, and the mobsters are portrayed as stereotypical 1930s gangsters.
* Chassis: After Matt Geer's aero-car is damaged by sabotage and crashes. Chassis saves him from the subsequent explosion by having him leap on to the hood of her car and flying off while he clings on for dear life.
* Chassis and Crossbow depicted the even more apocalyptic 2010's, where following a nuclear war and mass collapse of civilization, the trade value of a gallon of alcohol-derivative faux-gas is... about $3 a gallon. Eerie.
* Chassis, anyone who competes in the Aero-run has to be an ace pilot by definition. This includes Chassis McBain.
* Chassis crash.She underwent extensive reconstructive surgery that included the implanting of various mechanical improvements in her body. However, her lungs were so badly damaged that she cannot survive without a portable respirator machine she must always carry with her.
* Chassis is the scion of an old, traditional family from Japan. He scandalised his father by becoming thoroughly Westernised. His father paid for him to move to California to get rid of him. After failing to become an actor, he became an Aero-run racer. After acquiring a reputation as one of the dirtiest racers on the circuit, and an Anglo girlfriend, Sabotage has been disowned by his father. He doesn't care.
* Chassis, several of the Aero-run racers are much better known by their nicknames than their real names. These include Covergirl, Sabotage and Sky Fish.
* Chassis so obsessed with her favourite Aero-run driver that she is willing to do whatever it takes to ensure he wins: sabotaging, and even killing, his rival racers.
* Chassis, Twist's personal droid clings to the underside of Chassis's aerocar to sabotage it during a race.
* Chassis was more of driver, but she certainly knew her way around the underside of a bonnet.
* Chasteberry E wherever she goes, and is happily together with her crush.
* Chaste Hero: A common magnet of unrequited love is someone who can't even comprehend love and sexuality.
* Chaste Hero: A hero who is oblivious of another person's attraction to them no matter how obvious it is that the other person has a thing for them.
* Chaste Hero: A hero who is oblivious to the feelings of someone who is in love with them.
* Chaste Hero: Character has yet to develop a lustful side and remains oblivious to sexual intentions.
* Chaste Hero, Hayate pulls this on Hinagiku. After his gaze lingers too long she chastises him for it, but she definitely enjoys the feeling. It helps that he told her straight up that he got completely distracted because she looked so amazing in her dress that he couldn't help but stare.

* Chaste Hero, he doesn't pay it much thought, and Shirahoshi is more anxious about someone being in her room than anything else.
* Chaste Hero of pirate movie cliches fits this description perfectly.
* Chaste Hero on the outside. At first, his confidence seems genuine, but as time passes it quickly becomes apparent that Eleven is just as riddled with grief, rage and self-loathing as Ten.
* Chaste Hero, so that logically includes sexual sin and he wasn't just clueless about it.
* Chaste Hero (though at least now she's lucky enough to be dressed). Even after she asks to stop groping her, he still remains that way for a bit until she smacks him.
* Chaste Hero. When a spirit guide Zelda tells him that he can use magic, his first thought is using it to remove her clothes.
* Chaste Toons: Characters who have nieces and nephews but never any children of their own.
* Chastity: A vampire punk/goth girl who worked as an assassin for a council of vampires to kill other vampires.
* Chastity belts, at least in the common conception (i.e a metal belt a man forces his wife to wear while he's away) were never a real thing. The reason for this is (seemingly) obvious - how would the wearer go to the bathroom? Unless they opened at the back, which would
* Chastity Couple: A couple willingly abstains from sex and are perfectly content with never having intercourse.
* Chastity Couple: A romantic couple is never depicted or implied to have sex for some reason, yet are happy together regardless.
* Chastity Couple: They're in love, but they're not physically intimate with each other.
* Chastity Dagger against rape, but also could be against theft or attempted murder.
* Chastity Dagger: A woman carries a dagger with her to defend herself (often from getting raped, as the "chastity" implies).
* Chas' very domineering (and supernaturally charged) bed-ridden mother in
* Chateau Snively, a failed pilot from 1978. Changed the setting to a highway motel.
* Chat functions in video games. Enter-message-enter is a common one, but other varients include space-message-enter, y-message-enter and t-message-enter. This is before getting into games with multiple "channels", for example
* Chat Noir acts the part of a MPDG, as a way of coping with his abusive home life. He can become surprisingly bitter and sullen
* , Chat Noir is badly injured despite his suit when an akuma throws his own staff back at him.
* Chatoverse Conversion Bureau, in which it is revealed that the Equestrian reality is completely and utterly divorced from that of Earth, to the point that its matter is composed of entirely different fundamental particles. Despite being intended to explain the differences between the two worlds, it actually raises questions as to how the two dimensions are able to interact at all.
* Chatoyant College series about a group of friends of are studying at the only university in America that teaches magic.
* Chatoyant College: There are strict rules on what can be achieved with each type of magic.
* Chat program Discord normally alerts you every time that someone posts in a server that you're in. While you have the option to turn this off, the message pings are on by default when you join a new server. However, if a server has a sufficiently high number of people in the server when you join, this is silently turned off as soon as you join so that you're not overwhelmed with pings from the program.
* "Chat Room" also demonizes the internet, with parts of the episode dedicated to Stabler's unease about the world wide web, equating the family's computer with a window for perverts to potentially sneak in through to take advantage of his

children.
* Chatrooms themselves can be hit by this. In chatrooms with an RP bent, a person can make alternate characters if they feel like playing something else. Non-roleplayers may also make alts just because they want to be anonymous or play creative pranks. Some people can get addicted to this, with people having hundreds of alts, without exaggeration.
* Chatroom Trap. All those creeps who wanted to see the girls naked online? Have nothing to do with the crime. The culprit is the man who runs a fake model agency.
* "Chatterbox Gary" has SpongeBob buy a collar that translates Gary's meows and speak in the voice of
* Chatterbox mentions that he was disciplined as such by his nanny when he was a boy. Now he's seeking a nanny because "Freddie's been a very naughty boy". About a minute later, it's revealed that the caller himself is Freddie and he now gets sexual satisfaction from spanking.
* Chatter Telephone from the third film is deliberately modeled after
* Chattery Teeth", when a salesman, against his better judgment, picks up a hitchhiker who promptly tries to rob him. This does not go as planned.
* Chatting at the Amber Teahouse features romance between a tea house owner and her assistant.
* Chatting at the Amber Teahouse, Seriho (owner of a teahouse) compares herself to a teapot who wants to make tea for everyone, and Sarasa, to a cosy that keeps the tea inside warm. Sarasa is slightly embarrassed by this story.
* Chauncey is played on a music box. This includes the music that plays when you unlock the door to his room, the music in the said room, the music when you are talking to him, and his battle music.
* Chava is a golem crafted in Poland and migrates to turn of the century New York where she befriends the djinn Ahmad in
* Chavo Guerrero in that Morrison had a victory over Pain prior and Dementus put up a very good fight.
* Chavo Guerrero Jr. crossover show) he gets riotously cheered, similar to Triple H on NXT.
* Chavo Guerrero Jr. had the previous month. Kerwin also periodically updated fans on how he was adjusting to life in "Middle Class America".
* Chavo Guerrero Jr.: Left WWE in 2011, debuted in TNA in 2012. Founded Nación Lucha Libre along with Alberto el Patrón (Del Rio) in 2019.
* Chavo Guerrero Jr.'s suburban, golf-playing alter ego, "Kerwin White."
* Chavo Guerrero of many matches, resulting in them ending because of some outside interference or Chavo, himself, being a Heel, never pressing to win many of his matches, resulting in him holding back most of the time in the ring.
* Chavo Guerrero once denounced his Latino heritage all together and started calling himself Kerwin White. This character, which he fully believed himself to be, was a middle-class white man who despised all non-whites, working-class whites, and Latinos of any race. This is perhaps the best example of this trope in wrestling.
* Chavo Guerrero Sr. (67 years old at the time of his last match; he died a few months later at 68.)
* Chayne Summers, while not as bad as Ashton, was also indifferent over her associates dying—or worse—due to the effects of her experiments with Tango.
* Chayyiel, already one of the most powerful Seosten, wants a powerful host she can do this with.
* Chazz Michael Michaels performs one of these with his jock strap in
* chéchia cap, a leather visor and two stars from an Italian captain's uniform from 1942 to the end of the war.
* Chériefm, a French radio station, offering in its site, several webradio specialized in various musical genres dont chérie love song (its slogan "la webradio de l'amour" in English is "the webradio of the love") and periodically "cheriefm romantic" its slogan? "la webradio des amoureux" (in English: "the sweetheart's webradio)

* Cheapass Games, a game where looters with guns raid a mall for the best presents this Christmas. Being shot only makes you "fall down." You get up shortly thereafter. There are no health meters or character wounds.
* Cheap car challenges sometimes involve driving to a given speed and then trying to brake within a certain range. While the obstacle at the end of the lane is sometimes daunting (e.g. a river full of crocodiles), as of Season 13 only James May has failed to stop in time, destroying his own piano as a result.
* Cheap Costume: Someone in need of a disguise must make do with whatever they can find.
* cheaper and faster to build and deploy the aircraft if they didn't waste time painting them first. It was also pointed out that the olive-drab favored by the Army didn't exactly blend in with the skies of Western Europe to begin with, which was where the Germans tended to run into them anyways.
* Cheaper by the Dozen and the many actors who play his children, superimposed against a white background with red letters. Gets across that the movie is about a large family without giving too much else away.
* Cheaper by the Dozen book, the father of said dozen children wants the removal of his children's and his own tonsils filmed. Since he wants to direct the filming of his own tonsil removal, he stays conscious during the procedure, and suffers great pain because of this. The pain turned out to be all for naught when the cameraman revels he accidentally left the lens cap on.
* Cheaper by the Dozen, Dad comments that it could have been worse; at least it didn't rewind it so it looked as though they vomited their food onto their plates.
* Cheaper by the Dozen, Dad has recently pulled a practical joke on his children, telling them to look in the engine for a bird and then honking the horn loudly. One day when Dad is having to fix the car after a family picnic, one of the younger children sneaks into the car and presses the horn, causing him to hit his head on the hood and burn his wrist on the exhaust pipe.
* Cheaper by the Dozen did this. The rich kids were reading about a family that was worrying about how to pay their car payment that month, and then they all shuddered in fear and disgust at the thought of not being super-rich.
* Cheaper by the Dozen: Frank Gilbert becomes increasingly strict with his daughters as they approach womanhood, refusing to allow them to cut their hair, wear stockings, perfume, and makeup, deeming all of the above as only worn by loose women. He doesn't mind it on his daughters' friends, though.
* Cheaper by the Dozen has a variant. Hank notes, "All I'm saying is families are inevitable; they're like death or taxes."
* Cheaper by the Dozen has several commentaries, by the older actors and creators, and then another with several of the child actors. This second commentary is absolutely hilarious, the kids going wildly off subject and clearly having a lot of fun.
* Cheaper by the Dozen mentions that Frank Gilbreth was very close with their first four daughters, despite his wish for a son, affectionately dubbing them his "harem".
* Cheaper by the Dozen, one of the early signs of Frank Gilbreth's interest in efficiency is when he works as a bricklayer in his teen years: Normally, as the wall got higher, a bricklayer would have to stop periodically to collect the mortar that falls to the floor, but Gilbreth devised his own system to minimize and catch any wasted mortar. His boss at the time told him: "You ain't smart. You're just too damn lazy to squat."
* Cheaper by the Dozen, the kids prank the eldest sister's boyfriend by dipping his underclothes in meat and setting the family dog on him.
* Cheaper by the Dozen, the second one, Lorraine fitting this trope is a running gag. Sarah her sister comments on a huge suitcase "This one just for the make-up?"
* Cheaper by the Dozen: Tom gets Mark's name wrong twice throughout the film. Both times, Mark corrected him. The second time Tom corrects himself.
* Cheaper by the Dozen. Tom is unable to control the kids at times, but he's clearly frustrated, not stupid. Although many claimed Tom was stupid, this clearly is not the case.

* cheaper-to-manufacture and more tactically versatile boltgun we know and love today.
* cheapest, way of disposing of enemy mecha—at least, if you're not up against a skilled human opponent.
* Cheap Gold Coins: People spend solid gold coins like they were pennies.
* Cheap Gold Coins: While in reality, gold coins were extremely special (and still are as collectibles), being used almost exclusively for larger transactions (silver and copper coins forming the bulk of the cash in circulation), this isn't the case in fiction, where it seems just about anyone can get their hands on a hefty money sack full of the stuff!
* Cheap Heat. Interrupting someone's well-deserved title match to spoil their opportunity at glory is a truly nefarious act, and being booed for this is well-earned. Reminding the town you're in that their local football team just lost to [some other city] is done For The Evulz. Sometimes, cheap heat really adds to a wrestler's charisma (it's a great way to show how arrogant their character can be), but done sloppily, the facade is easily lost and the obviousness that it's a swing at just being bad for bad's sake is made evident.
* Cheap Heat: It's real easy to come out, act like an arrogant prick, mock the local sports teams and get booed.
* Cheap Heat/Pop can also be easily gained by both male and female wrestlers just by flashing a smile or
* Cheap LCD drawing boards advertise themselves as easier to erase than a regular chalkboard, since it only takes one button. What that means, of course, is that you
* cheaply parodied (how else could you parody it?) by an Alteil ad where the skinsuit elf girl has a caption that says "She is actually in our game, my lord".
* Cheap Photoshop-jobs of fake sets, often made to look like grainy pictures taken from a retailer's catalog, regularly caught on within the fandom, as have rumors of alternate builds of certain models being sold as separate sets. So when similarly fake-looking images of two supposedly Korean-exclusive Piraka combo model sets surfaced, there were many discussions on their legitimacy, especially since they were totally unknown in the Western world and their packaging also contained bad Photoshop work. These are now seen as real since Korea tends to release their own multi-packs. Legit leaks of the line's unexpected 2015 reboot were also initially dismissed for this reason.
* Cheap pop was taken close to its logical conclusion in the Pure Wrestling Association where
* cheap puppet show. One episode in particular is "Pressure", in which SpongeBob, Patrick, Mr. Krabs, Squidward and Sandy all leave the ocean, and when they arrive on dry land...they are lousy toys or models propped up as puppets. The only exception, of which, is Squidward, whose puppet looks disturbingly like the actual Squidward.
* Cheap Seats featured a reference to Eddy Raven's obscure 1985 single "I Wanna Hear It from You". Any upload of this song online will very likely have multiple people commenting on the fact that they were exposed to Raven's music through this one joke.
* Cheapskate villain Frugal Lucre once threatened Kim and Ron with a kiddie pool full of baby snapping turtles.
* "Cheap Sunglasses": "Now go out and get yourself some thick black frames/ with the glass so dark they won't even know your name/"
* cheap tech directly connected to your brain). It shows up again in a later episode on a minor criminal character. In both cases, the interfaces are very useful for getting into secure systems and data, but the drawbacks include nasty physical pain from security features designed to counter just such breaches, to the point where the users risked permanent damage, paralysis, or even death. Its implied the combination of their use for breaching security barriers and the associated dangers are the main reason that such implants are mostly used by criminals (and thus have a stigma attached to them)
* Cheap Thrills has an eccentric billionaire who offers two down-and-out losers $25,000 to whoever is willing to cut off a pinkie in the name of entertainment.

Craig accepts the money in exchange for having his pinkie cut off. The lost digit is momentarily forgotten and rediscovered when the neighbor's dog chokes to death on it. In a later challenge, the billionaire offers $50,000 to whoever eats the finger, and Craig ends up eating his own pinkie.
* Cheap Thrills: Shortly before Jeordie's graduation, his mom shows his girlfriend photos of him as a baby bathing in the bathtub, dressed as a fireman, and dressed in a pink onesie, to Jeordie's complete embarrassment.
* Cheap Thrills that Jeordie's parents did this since his father met his mother while he was an exchanges student. It's never confirmed either way if this was actually the case, though they do truly love each other.
* Cheap Trick is probably best known for three songs; "I Want You to Want Me", "Surrender", and "The Flame". Good luck trying to get them to perform "The Flame" live, however. They've hated that song from the beginning.
* Cheap Trick record has them in a police lineup, with each band member appearing twice in the lineup (once dressed normally, once dressed in their "Dream Police" uniforms from the front cover photo). The also appear as the witnesses. These would get recreated in the video for the title track.
* Cheap Trick's country version, due to the genre change working so well that someone who heard Yoakam's version first would be hard-pressed to believe that it was a rock song first.
* Cheap Trick's "Dream Police," Bun E. Carlos says, "Listen, I'll never eat a double cheeseburger before bed again, really."
* Cheap Trick song Man-U-Lip-U-Lator includes the line "full alert, DEFCON 4." Even if the scale were 1 to 5 instead of 5 to 1, DEFCON 4 still wouldn't be full alert.
* Cheap Trick, which Rick Nielsen described as "about being fourteen years old and wishing you had a car, riding out, where your best friend was the guy on the radio."
* cheat all the time. They also can be, and often are, programmed to go on a suck cycle and take in way more money then they need to, in order to save up for a large series of payouts later.
* Cheat Code allows players to perform pratfalls and faceplants for their own amusement.
* Cheat Code in single-player modes, although they will block achievements when used.
* Cheat Code: Support Strategist, ensuring that his classmate gets the help they need.
* Cheat Code: Support Strategist finishes the USJ Arc by having Mei and Shinsou visit Izuku at his house to help him pick out a logo.
* Cheat Code: Support Strategist: For Izuku's practical Support entrance exam, Nedzu has Izuku hack UA's servers. Izuku is devastated when he's unable to succeed, but then feels better when Mei points out that since the school's cybersecurity is top-notch and impossible to be hacked by any random hacker, it's very likely that Nedzu's test was to see how Izuku dealt with problems he couldn't solve. Izuku's acceptance letter in the following chapter confirms this, with Powerloader admitting that if Izuku was successful, he would be extremely worried about the quality of UA’s cybersecurity.
* Cheat Code: Support Strategist has Izuku attending UA's Support course, choosing the Intelligence and Analytics Track, with the intent of putting his analysis abilities to use helping other Heroes.
* Cheat Commandos Adventures where the Blue Laser Commander's evil plan for that episode for some reason involved him taking off his pants in public. He is foiled by the Cheat Commandos who force him to put his pants back on while in the middle of his evil plan.
* Cheat Commandos are viewed as disposable — the straplines on the packaging of their discount 3-packs boast that they're "Extra Melty!".
* Cheat Commandos has Fightgar, Crackotage, Silent Rip, Firebert, Gunhaver, Flashfight, Ripberger, Foxface, Reinforcements, and Reynold. Reynold is named last as an obvious joke, being the nerdy non-combative Commando.
* Cheat Commandos involves said commandos intercepting Blue Laser at the

supermarket and trying to apprehend him for having "Two too many" items at the express lane. The items are actually two twin babies.
* Cheat Commandos. It doesn't elicit more from the unfortunate minion than an "Ow!".
* Cheat Commandos parodies this with its Green Helmets. "We've got, like, fifty of them!" Taken further as Green Helmet action figures come in packs of three, and are advertised as being "extra melty".
* Cheat Commandos: Shopping For Danger! revolves around this premise. The villainous Blue Lasers are at the supermarket, picking up their groceries, which the Commandos assume must be part of some sort of plan to "make it snow at the beach". It turns out that they're half-right; the Blue Laser Commander was convinced that the mildewy grout in his shower was the reason his organization couldn't crush the Cheat Commandos.
* Cheat Commandos short "Shopping For Danger", Reynold is fooling around with Reinforcements' Justice Rocket Backpack Rocket Rocket when he accidentally falls over, its weight pinning him down as it's suddenly about to go off. Reynold's reaction is simply "My land, I can't see this ending well."
* Cheat Commandos: the name "Gunhaver" itself, and sentences like "who will have gun?"
* Cheat Commandos, the villainous Blue Laser plot to blow up the ocean.
* Cheat Commandos. When Gunhaver is giving out orders to infiltrate the grocery store, he says to the last guy, "Firebert, you stay here and think of a better commando name." It's a running gag in the Cheat Commandos that Firebert (The Cheat in the show's main 'verse) is a terrible commando name.
* cheat death for as long as possible which took every bit of remaining strength, only to have the boulder roll downhill and he would be stuck trying to push it uphill and failing time after time...
* Cheated Angle: A character has part of them always facing the same angle regardless of which direction they're facing.
* Cheated Angle - A part of a character's body is always drawn a certain way, even if it really shouldn't be from that angle.
* Cheated Death, Died Anyway: A character cheats death...only to die in different, but equally cruel and unusual circumstances, later.
* Cheated Death, Died Anyway: A character survives a near death experience, only to die in different but equal cruel and unusual circumstances a short time later.
* cheated on him with) to Aidan's country house, without asking Aidan his permission.
* Cheat(er) Code: A gay erotic comic book; the main character is gay, the supporting characters are gay and/or queer men, subject matter includes queer male sex/sexuality.
* Cheaters give when pressed about why they're cheating. Apparently, they don't want to really break up the relationship but are fine spending lots of time pissing off their partner...
* Cheaters Never Prosper: Characters who cheat will and do get hit with karma.
* Cheaters Never Prosper story. As the teacher says, ignorance is not knowing the answers to a test. Stupidity is copying one's answers off the ignorant person.
* Cheaters runs on this trope, with men and women who believe their partners are unfaithful setting up scenarios where they can test their partners fidelity.
* Cheaters, the girl being cheated on and the other girl became friends, much to the horror of the cheating boyfriend.
* Cheaters, there was an episode where the woman set her cheating partner's possessions on fire.
* cheating a bit worse than just failing because you don't know the material. Interestingly, this designation was the students' idea — they didn't want failing for being dumb to be mistaken for failing for being dishonest.
* "Cheating" by looking in the next day's newspaper or the back of the magazine—absolute rotter.
* cheating has Lois catch Peter seemingly having an erotic dream about another woman.

* Cheating, it's parodied when Crow copies Gypsy's paper and Tom Servo wants him dead for it.
* Cheating Men Must Die exist and was in fact Lüxia's cousin from another city, but her spirit was so weak that she used up all her meagre energy and passed on in captivity before Su Lüxia took her place.
* Cheating Men Must Die Gu Chen, a character from the world, but she never ages a day while he continues to age normally throughout their marriage. She's visibly saddened while looking at footage of his later years after her leave is up, and she comments that she won't date in modern-themed worlds anymore because she's unable to do something as basic as growing old with her mortal partners.
* Cheating Men Must Die. Mingyue plots to engineer a scandal between Ziyue and the second Ling son, wanting Ziyue out of the way so that Mingyue will be the only Su daughter presented to the emperor. Madam Ling goes along with it as the Su family is highly prestigious and the Ling family will rise in status after the marriage.
* Cheating Men Must Die so that she'll be forced to marry him instead, and Mingyue makes it clear that she doesn't care if Ziyue is raped or killed in the process.
* cheating the child being tested is told to drink a Truth Drug in a form of a buttermilk-like liquid which tastes faintly like peppermint.
* cheating with another woman. Neither of them ever brought it up. (It also explains why he always knocks three times: the second and third knocks gives time to put one's pants back on.)
* Cheating with the Milkman: A housewife has an affair with service personnel that visit the house.
* Cheating with the Milkman: A wife cheats on her husband with the milkman or some other man in a profession that requires visiting houses.
* Cheating with the Milkman (plumber, maid, pool boy, delivery driver, etc.)
* Cheating with the Milkman, which is based off of professions which do continue to make visits to customers' homes (besides food delivery, repairmen are also a common part of the joke).
* cheat on Andy with Jo, his ex who transfers to the 15th Division in the first episode.
* Cheat Slayer that are closer to straight out plagarism of other Isekai protagonists, portrayed exclusively as horrible monstrous people that are nothing like their original counterparts, than any of the manga's actual story merits.
* Cheat websites will tell of "Woody's Workshop" which can supposedly be accessed if you collect 100 coins on the first level "Andy's House" and then go and see Hamm. Supposedly, if this was done, he would take you to "Woody's Workshop", a secret area which gave you cheat-codes to the game, special power-ups (such as an infinite green laser), and level shortcuts. However, there are only 97 coins on the first level, making it totally impossible. Despite this, you can still find "Woody's Workshop" listed on every possible cheat website that
* Cheburashka, a cute creature with big ears who would later become popular in Japan and Russia.
* 'Chechnyan Firecrackers' is a slang term for home-made firearms... which are legal in most states of the US, by the way (so long as they aren't capable of full-auto). Have fun! In fact, there have been several examples over the years of enterprising people building operational firearms with things commonly found in
* Checkerboard Nightmare. A webcomic about a webcomic character trying to become famous. The Postmodernism and humor are milked for all they're worth — then milked some more.
* Checkerboard Nightmare had the minor character Shrodinger the Cat, who could see every possible reality simultaneously and was, naturally, driven insane by the information overload.
* Checkerboard Nightmare — the story of Checkerboard Nightmare's attempt to create a wildly popular webcomic, starring himself — smashed the fourth wall to bits and danced across the rubble from day one.
* Checkerboard Nightmare nature is so transparent that the show becomes a hit amongst teenagers and young adults who mistake it for biting satire (the fact that Chex could only afford for the show to be run on a 4AM timeslot didn't help).

* Checkerboard Nightmare parody. In his review of CN itself, he remarked that "At first I imagined the robot to be some sort of rape symbolism, and was quite disappointed to find it was merely a robot."
* Checkerboard Nightmare pointing out that that's just a lawyer joke, said superiors persist.
* Checkerboard Nightmare's Jeff Lynne to force him to write said theme. Jeff Lynne escapes, but leaves behind a letter denouncing Chex as a "sick bastard". Chex reads the letter and thinks it's the song he asked for.
* Checkerboard Nightmare, some kind of time-travel mishap flings past-Chex into the present. Upon realizing that the many-worlds hypothesis must be in effect, present-Chex fixes this problem by killing his past self.
* Checkerboard Nightmare, wants nothing more than to kill every human. Preferably by strangulation.
* Checkered Ninja, the titular character asks Aske to get him a sheath for his small sword. Aske naturally tries asking his wood shop teacher for help. Since the Danish word for "sheath" (Skede) is also a word for a vagina, he gets sent to detention.
* Checker Monarch's persona gradually slipping into psychotic rage as Trixie's charity show manages to proceed as planned despite her attempts at stopping it before she snaps completely.
* Checkers: During an end game, if the vanquished player is stubborn about it, he can retreat to a double corner. It needs a carefully choreographed sequence of moves to dig him out and is rather like a siege.
* Checkers has a rule that you must capture an opponent's piece if you're able to. As such, it can be played with a variant rule where the goal is to lose all your pieces as soon as possible. Since both players will be trying to do so, one of them will invoke this trope.
* "Check In and Check Out" seems like an ordinary episode: we have a nice couple who help the homeless found murdered in a motel room (stabbed over 100 times each), and the motel room is apparently also the crime scene of two earlier brutal murders. We get an early suspect too soon to be the culprit. Then a homeless man is accused...and turns out to be the actual murderer, seemingly subverting this. There's still half the episode to go, and another murder turns up at the motel room, prompting a closer inspection of the room itself and revealing an air freshener that sprays LSD onto anyone unfortunate enough to set it off and sending them crazy. This almost causes Hodges to kill Henry and is what happened the last four times, and ends up with the owner of the motel arrested for all those murders.
* Checking In equally successful — cancelled after four episodes. Florence returned to her former employers.
* Check It Out! with Dr. Steve Brule has a faux-VHS look that adds to the show's appeal. They actually recorded the show through a VCR to get that distinctive look.
* Check It Out! with Dr. Steve Brule has the newsreaders Doug Prishpreed (Doug Foster), Carol Krabit (Carol Kraft) and Scott Clam (Scott Stewart). In particular Foster found the name Prishpreed very odd and seems to struggle to pronounce it every time he appears, adding to the awkwardness of his character.
* Check It Out! with Dr. Steve Brule - Sketch comedy's worst nightmare's nightmare.
* check it right now. Missing a bus or train, being late for school or work, etc. is better than coming back to a sabotaged car or worse, no car at all.
* "Check" lists: "X? Check. Y? Check. Z? Check^2." TV Tropes examples are already in list form, so we don't need unnecessary sub-lists like these when there should be a proper writeup. Additionally, these gags get grating starting from about the fifth time you see them due to their repetitive formula.
* Checkmate, a wizard describes magic to an atheist skeptic as "the cheat codes to the universe".
* Checkmate in the DC Universe is part of the greater Department of Metahuman Affairs and has a chess motif.
* Checkmates, Ltd.: "All Alone By The Telephone" is about waiting for one's lover to call.
* Checkmatey, the rapping chess master of X Middle School, has one in the

* Check out any baby name book advertising on the cover that it has tens of thousands of names in it. Betcha anything they're counting 15 spellings apiece of Brittany, Megan, and Carly as 45 individual names.
* Check out the blink-and-you'll-miss-it diagrams and labels in some of the trailers.
* Check out the wonderful book "Annotated Alice" where famed (and late) mathemagician Martin Gardner takes the time to annotate virtually
* Check, Please! among the house. Early on, Bitty makes a comment lampshading that he has his doubts about the fraternity accepting him so easily, but this is mostly related to his still lingering fears of jocks due to his bullies.
* Check, Please!) and Lardo (the 5'1" team manager and only female character in the main cast).
* Check, Please is a one-act play by Jonathan Rand about a series of hilariously awful dinner dates. "Check, please," is also the last line of the play, and it's said by a guy in a burlap sack. To a mime.
* Check, Please! may be the most adorable tiny big-eyed pie-baking college hockey player ever.
* Check, Please!'s creator has stated that she has planned the most important plot point very thoroughly, but everything in between is pretty much this.
* Check, Please! than the stereotypical male student athlete, and Jack is an emotionally inept perfectionist with anxiety issues, but they're both very sympathetic characters.
* Check, Please!: There's a happy m/m relationship between two boys, one gay and one with an unspecified sexuality. It has a very slow burn. There are also implications of a past same-gender relationship with one of the boys and another boy.
* Checkpoint: A point to which the player can return after play has been interrupted, especially by player character death.
* Checkpoint Bluff: Trying to get past an enemy checkpoint under disguise.
* Checkpoint Charlie by removing the windshield on his convertible and driving straight under the barrier pole. After the same stunt was repeated a couple of weeks later, the guards lowered the pole.
* Checkpoint Charlie: Someone has to go through an international border crossing in order to reach wherever their travel destination is.
* Checkpoint during a tense discussion with the Watcher's Council. When Travers threatens him, he breaks his glasses because he's cleaning them at the time.
* Checkpoint has the player compete in a series of rally races around the world.
* Checkpoint: Shoot the ramp within five seconds of plunging the ball for bonus points.
* Checkpoint", with Anya trying really hard to convince the Watchers' Council that there isn't anything demonic in her origin, no sir.
* "Checks", where a player can pass the action to the next player without a bet if no betting action is required, almost never appear in poker as depicted in fiction. Checks are a commonplace action in poker (since there's no monetary risk), either as a tactic to feel out what other players could have, or as a way to conceal hand strength, but it rarely shows up in poker plots; expect every important player to bet — and bet handsomely — during each betting phase.
* Check the car's interior before entering, watch for areas someone could hide, etc.
* check too many items while locked up in a airtight room at one point in chapter 10, Kyle will run out of oxygen and die. Interestingly, the Game Over screen still shows Kyle leaving the hotel.
* check to see if it had washed away? Or heck, if she went far enough that he wouldn't likely see it in a consignment shop or something, why not hock the thing for extra cash?
* Check Your Head - Ad-Rock is wearing sunglasses, MCA is covering his mouth, and Mike D is wearing a woolen cap.
* Check Your Head, Ill Communication) that went back and forth between each genre almost at random.

* Chedan acknowledges Lissi, his fiancee Elis' daughter, as his even knowing he's not the father. He dislikes it at first but grows to love her. Later we discover her real father is
* Cheddar cheese is actually white. The bright orange cheddar North Americans are used to is dyed to have those colors (using carrots and beets, so there's no cause for alarm). What is shown off as "white cheddar" is just cheddar with no food coloring added.
* Cheech & Chong's The Corsican Brothers they describe men so evil they "rape the fields and pillage the women".
* Cheech and Chong album, but 'man' is never said in that line. That doesn't stop people from misquoting it though, this is mostly due to the duo's liberal use of the word. Also, the sketch is just called "Dave", not "Dave's Not Here".
* Cheech and Chong. All the father could do at that point is rejoice and tell the doctor to "keep the change".
* Cheech and Chong, a substitute teacher, faced with a class of unruly teenagers, repeatedly invokes this trope, with the screaming at even higher decibel levels as the skit progresses:
* Cheech and Chong' features Cheech's long and funny answering machine message before Chong tells him they need to catch the plane to Amsterdam.
* Cheech and Chong has "Basketball Jones, I got a Basketball Jones, I got a Basketball Jones, oh baby, ooh ooh ooh" repeated over and over.
* Cheech and Chong, he tries to use pliers to remove the bullets, but eventually settles for just using a hammer, which causes the bullets to explode, presumably taking the boy's face with it. All the father could do at that point is rejoice and tell the doctor to "keep the change."
* Cheech and Chong LP, Chong is attempting to play a humorous record his friend had ordered; cue about 15 seconds worth of horrendous needle scratches.
* Cheech and Chong, Man in "Pedro And Man At The Drive-Inn" goes over to the next car over in order to get something to open the trunk with, only to find a guy making out with a girl inside the car. Not that it interrupts the activity going on, though, as the guy gives Man something and then just continues on without breaking the flow.
* Cheech and Chong, man. They constantly use the word "Man" wherever it makes sense, man. Sometimes twice consecutively, man.
* Cheech and Chong — 6 feature films since 1978 and one animated movie in 2013.
* Cheech and Chong movie. From the car speaker, he hears the end of the movie:
* Cheech and Chong movie in "Pedro And Man At The Drive-Inn" where the murderer's identity is about to be revealed when the drive-in manager interrupts with a message that the snack bar will remain open for another fifteen minutes.
* Cheech and Chong movie made it seem like two characters were having very loud and rambunctious sex inside a van, much to the embarrassment of those outside. However, the guy was moaning and banging the wall because of a cramp in his leg, while the girl was trying to demonstrate the noises her roommate made while having sex.
* Cheech and Chong movie. You're never more than five minutes away from this.
* Cheech and Chong paper. This is actually referenced in the last track on the album, where one of the characters shows another the biggest joint he's ever seen and explains that he got the papers from Cheech and Chong's new album.
* Cheech and Chong; recorded a string of successful albums and followed with a string of successful movies in the 1970s to early 1980s before breaking up; reunited in 2008.
* Cheech and Chong's "Basketball Jones" is much better known than the song it was originally parodying: "Love Jones" by The Brighter Side of Darkness.
* Cheech and Chong's "Basketball Jones". "That basketball was like a basketball to me!"
* Cheech and Chong's "Earache My Eye" sketch starts with a song about a rock star which is cut short by a needle scratch, followed by Cheech yelling at Chong to get up and get ready for school.
* Cheech and Chong she doesn't finish the poem, but it's pretty obvious the missing

fourth line ended with something about kissing someone's ass.
* Cheech and Chong's Nice Dreams, they have an ice cream truck named "Happy Herb's Nice Dreams". Take the words, "Ice Creams" and add an "N" in front and make "Creams" into "Dreams". Naturally, they sell marijuana from the truck, along with ice cream. How "wholesome" this is depends on your views.
* Cheech and Chong's "Pedro & the Man" skits, the duo are approached in their stalled car by a Harlem youth offering them a watch, a transistor radio and a diamond ring.
* Cheech and Chong's self-titled first album features Tommy Chong attempting to put a vinyl record (supposedly the very one this skit is on) on the phonograph and failing miserably, the skit (and this side) ending in a fluster of wild record needle scratching.
* Cheech and Chong: this part of the argument in "Strawberry Revival Festival":
* Cheech and Chong when Cheech hides under the bed as the husband and wife have sex and the bed collapses on him.
* Cheech Marin's rapid stream of Spanish in the middle of "Taco Grande" by
* Cheek Copy: Someone uses a copying machine to produce a picture of their bare buttocks.
* cheeks that conduct electricity. This trend is spoofed by the introduction of Mimikyu in the seventh generation, a Ghost and Fairy-type who wears a poorly-made Pikachu costume in the hopes that he will become as popular as Pikachu.
* Cheeky Angel and patiently wait for the guy to come home... to name a few.
* Cheeky Angel at the very end. Shortly afterward, he discovers and pulls out the Note To Self... which contains not the secret but rather some other perverted fact he had witnessed at that time, which given his character got the higher priority.
* Cheeky Angel takes advantage of being pinned under Fujiki to scream and accuse him of being a pervert, in order to knock Megumi down a peg.
* Cheeky Angel was a Benevolent Genie all along who granted Megumi her wish to the best of his ability and pretended to be a jackass genie to faciliate the illusion.
* Cheeky Bastard. Stewie claims that the show is "recorded in front of a live audience", but the (fake) laughing is actually provided by him.
* Cheeky Little Wine by the comedy band Dead Cat Bounce. In it, the singer compares the various wines he drinks to different kinds of women, and ends up drinking lighter fluid and paint.
* Cheeky Mouth - A character's mouth drifts from the center of their face to their cheek when viewed in profile.
* Cheeky Mouth) appear in their original styles alongside more "realistic" ones.
* cheered since he'd spun Kenseth out for the lead at Kansas earlier in the year.
* Cheerful A.I.: Greetings, human. I have personally been programed to be cheerful and kind no matter what.
* Cheerful Amnesia. Arisa was always the one that took the lead in her relationship with Mari, so her amnesia means that both of them are at a loss for how to be intimate.
* Cheerful Amnesia: A story about a girl losing her memories of dating her lover for three years.
* cheerful and friendly do this, apparently this time he failed in some unseen but comical manner.
* cheerful cartoon octopi advertising dumplings filled with their brothers.
* Cheerful Child, and Deku's journey to finally realizing his dream begins.
* Cheerful Child, cementing him as the most innocent member of the Cul-de-sac.
* Cheerful Child Gon was born on May 5th (a.k.a. Children's Day in Japan).
* Cheerful Child. While she is part of the gang, she isn't really participated within some of their activities, since they're "ball games".
* Cheerful Child who giggles at everyone she meets. She wasn't even scared when she met the changeling Thorax, even when she saw his true form she giggled at him like everyone else.
* cheerfully explains serious, because if it was, then they'd have Dreen, unaware that this dimension not only has Dreen, but that the timestop appears to have attracted something that's like Dreen only more so.

* cheerfully whipping her boyfriend with a belt. This also inverts the standard "adopted vs. biological" relationship, as Aaron adopted Trina with his first wife, while Logan is his biological son.
* cheerful of this trope since they clearly do display emotion but apparently do not have any other emotions to display.
* Cheerful Reaper (who does the same "killing people" job) to be really creepy.
* cheerful rhyme game - both cases M was (allegedly) based on (Peter Kuerten and Fritz Haarmann) inspired rhymes such as these in the populace. Less scary in the original German, where they included lines such as "he'll turn your ass into ham".
* cheerful says everything with excitement, even when announcing that he's going to kill you.
* cheerful snark, but she's determined not to let it overtake her, and has a flirty, friendly personality.
* Cheer! get turned into cheerleaders. Nobody much notices or cares. The few who do know all decide not to rock the boat since everyone seems happier.
* Cheerilee is constantly pushed around, insulted, and even manipulated
* Cheerilee is somewhat depressed after several loops. After explaining why to three of her fellow Loopers, they give her one of these to help cheer her up.
* Cheerilee's speech to Scootaloo and not letting her hate and anger consume her enough to become a bully was partly based on an experience of their author's where he attacked a bully and choked him until he turned blue after having all he could take from him.
* Cheerios (General Mills) and Rice Krispies (Kellogg's) are still under trademark protection in the U.S., but Frosted Flakes are not.
* Cheerios had the Cheerios Kid who ate the cereal and got strength to seal volcanoes, rescue people and save his girlfriend, Cheerios Sue from wild animals, kidnappers, etc. Later they both ate Cheerios and worked as a team. The Kid and Sue were around from the fifties to the eighties.
* Cheerios would often feature a red heart-shaped bowl in its advertisements because the cereal was "good for your heart". In the early 2000s they made the bowl available through mail order.
* Cheerleader Melissa, and for seven years she had come up short in every last title opportunity she had until 2012 when she managed to beat Madison Eagles for the singles title belt.
* Cheerleader Melissa. As Flash's TNA career wound down though, she started wearing new, zipper less gear and using Cheerleader Melissa's moves, and stopped using Sherri makeup. In post TNA appearances Melissa would wear that same gear and openly refer to Flash's actions as her own.
* Cheerleader Melissa, being from the same region of the country and having a very similar wrestling style but fighting with Oedo~tai to takeover the promotion.
* Cheerleader Melissa but good luck finding anyone who knows the tag team she used to lead cheers for, the Ballard Brothers. They do still appear on the same card every once and while, even if no longer on the same spot, so the Ballards have benefited from her success to an extent.
* Cheerleader Melissa, but she is genuinely smiling and affable too, as if she doesn't always realize how badly she comes off to others sometimes.
* Cheerleader Melissa. However, she still spent a lot of time harassing Melissa, interfering in her matches and such. Mary Lee Rose did want to wrestle someone eventually, so she issued an open challenge. Not only was Cheerleader Melissa the first person to accept, but she couldn't help but point out how dumb Rose was for not realizing that would happen. Unfortunately for Melissa, Mary Lee Rose's manager, Mademoiselle Rachelle, lobbied to stop the match from happening and pitted Melissa against Yumi Ohka instead.
* Cheerleader Melissa regards Looney Lane, Nikki The NY Knockout and Sara Del Rey as worthy opponents. Del Rey and Lane do not feel the same way about Melissa but one out of three's not too bad.
* Cheerleader Melissa was actually training and working behind the scenes at shows on the road and her uncle's training school while she was still in high school, completing most of her classes by emailing her teachers. She had her first match on

her 17th birthday.
* Cheerleader Melissa: While not as big as she was the previous decade, she remains a fixture in SHIMMER.
* Cheerleader Melissa worked in TNA as Awesome Kong's manager Raisha Saeed, who was billed from Syria.
* Cheers 11. As a result, Kelsey Grammer played Frasier Crane from 1984-2004.)
* Cheers, a fake ending was shot for Diane's last episode, which faked out the live audience attending the filming and they got to see Sam and Diane actually get married. The real ending was shot without the audience present.
* Cheers: After Sam hits on her yet again, Rebecca clarifies the matter for him: She not only doesn't want to go out with him, she'd rather have her gall bladder removed.
* Cheers. After they leave, Woody finds the hairpiece left in the washroom sink and assumes it's a giant rat.
* Cheers: after unsuccessfully auditioning for the part of Norm, Ratzenberger asked the producers if they had a "know-it-all" character, and made up Cliff on the spot.
* Cheers almost did this at the start of season eight, planning to buy an abandoned bar after getting fed up with Rebecca's bossiness. Robin Colcord talks him out of it, though, and steers him on the path he really wants: buying Cheers itself.
* Cheers, a local tour guide has been passing the bar off as a historic place so that he can warm up and drink during walking tours. Meanwhile, the bathroom is out of order and Carla is trying to fix it because they can't get ahold of a plumber.
* Cheers always had a teaser unrelated to the main plot of the episode.
* Cheers, and as we're going to actually get to see Norm's wife Vera — who has remained unseen throughout the show — she gets hit in the face with a bowl of mashed potatoes!
* Cheers and became the central character, he had to become more complex and well-rounded, and his prissiness and bluster were slightly toned down (though still a frequent subject of jokes at his expense). Cue the appearance of his brother Niles, who was everything Frasier used to be and more — geeky, neurotic, and the butt of (almost) every joke. David Hyde Pierce even described Niles as "what Frasier would be if he had never gone to Boston and never been exposed to the people at Cheers."
* Cheers (and only because it saves him hours of picking out a shirt in the morning), and Sam and Carla spend a lot of time trying to get out of them or just destroy them, eventually succeeding halfway through the season. Unsurprisingly, they turn out to be one of Rebecca's hair-brained ideas, which is why she's so adamant on keeping them.
* Cheers and she bids on Sam to get revenge. (Woody participated too, and the winning bid for him went to a rather eccentric, rich woman who was chain smoking through the whole scene and the next one. Unfortunately, the show episode focusing on Woody there.)
* Cheers, as Diane left him at the altar for Sam. You'd think, then, that he might have been a bit more disapproving of the above.
* Cheers, as he feels it shows Frasier's snootines toward his working-class job.
* Cheers attempts stand-up at one of those amateur hour comedy clubs, and his entire schtick is endless variations of "...what's up with that?" Yeah, he bombs.
* Cheers bar, and have to sheepishly turn back and find the right door.
* Cheers, bar owner Sam Malone is approached to come out of retirement as his old team really needs his services as a reserve player. Sam consents to this, then when he is on tour with the team realises he is an old man in his thirties among players ten years or more younger, whose priorities aren't his. He understands that he has grown up and moved on and this isn't his life any more. Sam returns to Cheers and accepts this is where he belongs now.
* Cheers began the series with Sam Malone coming out of the back room, turning on the lights and opening the bar. The series ended with Sam locking the bar, turning off the lights, and strolling back into the back room.
* Cheers, being set as it is in a bar, has been known to infrequently feature this trope.

* Cheers bursts in wearing a belt made of dynamite and demands to see Diane. After Woody informs him that Diane hasn't worked there in years, Andy just leaves and Norm and Cliff go back to discussing what they're doing that day.
* Cheers. By the finale, Carla's fear of Diane is so extreme she'd rather believe she's near death in hospital rather than acknowledge she's seen her again, and when she's faced with Diane in the flesh repeatedly screams in horror.
* Cheers by yelling at a prospective employer, "I will not sleep with you!". It actually manages to go downhill from there.
* Cheers!"). Carla and Phil try turning down the volume, but to no avail; Sam stomps over and unplugs the jukebox, but the music continues playing. Finally, Sam smashes the glass of the jukebox and pulls the record out. He stomps back over to the phone to call Gary and give him a piece of his mind... only for "Monster Mash" to come out of the receiver.
* Cheers, Carla didn't believe that a customer was waiting for friends. They immediately arrived.
* Cheers: Carla, normally an expert at putdowns, meets her match in Lilith's even nastier, acerbic mother. The first time, Carla insists she was just rattled, but after a few more becomes convinced she's actually ill and takes the rest of the day off.
* Cheers, Carla's husband got cut from the Boston Bruins and ended up wearing a penguin suit in the Ice Capades. (Eventually, a rogue Zamboni machine killed him.)
* Cheers: Carla's husband is a pro hockey player, but he gets cut from the Bruins. He calls her to let her know he got a job as a Penguin. She thinks he means with the Pittsburgh Penguins, but no - he's in a penguin suit for the Ice Capades.
* Cheers: Carla used astrology to determine that Woody's wedding would be a disaster (she was right). Despite her belief that the wedding would go horribly wrong, she still believed that attending would be preferable to spending the night with her kids.
* Cheers", Carla was in the market for a new house and found one for a suspiciously low price. Norm later discovered that the house was built over the cemetery for a prison where some really nasty criminals were sent, implying the house was haunted by their spirits. Definitely a bad thing for the really superstitious Carla. Subverted. It's actually really cheap because it's at the end of a runway.
* Cheers. Cliff, a notorious braggart, claims to know martial arts. He busts a board in half and his friends are convinced. Quietly he asks Diane to take him to the hospital, for he has broken many fingers.
* Cheers. Cliff claims that a new resident in his apartment building is actually Hitler and starts investigating him, at one point talking about preventing the "Fourth Reich." Eventually, his landlord tells him to cut it out...leading Cliff to conclude that Hitler had brainwashed him.
* Cheers. Cliff gets bitten by a dog on his route and decides to sue the owner. The owner then starts up a relationship with him instead. Eventually, she gets him to sign a document dropping the lawsuit and checks her messages. One of them is from her husband who disappeared in Vietnam and just came back. (It's heavily implied to have been a huge con and Cliff fell for it.)
* Cheers, Cliff mentions a favourite restaurant that serves "loobster" (with two "o"s).
* Cheers. Cliff tricks Carla into being nice to him by making her think he's a judge in a waitressing contest and humiliating her by having her give him foot massages. She naturally finds out and Norm states that Cliff is dead meat. Cliff invokes the trope.
* Cheers, Cliff tries telling another bar patron about his trip to Florida. The other patron excuses himself by saying "You know, I just realized that I think I left my oven on." As he heads for the door, he mutters "If I hurry, maybe I can stick my head in it."
* Cheers, Cliff wins the bar beard-growing competition by super-gluing a fake beard to his face. He then calls a doctor about getting the beard removed, and gets some very bad news: "...Can that be done on an out-patient basis?"
* Cheers concept. He was added after John Ratzenberger went to audition for the

part of Norm. He ultimately didn't get the part but, while he was there, he pitched them the idea for another character, a typical bar know-it-all. He improvised a performance to give them an idea of how the character would act, and that sealed the deal.
* Cheers (Diane) became pregnant; Perlman's pregnancy was written into the script (as the result of a fling with Frasier's mentor, Dr. Bennett Ludlow), whereas Long was mostly shot from the neck up or behind the bar.
* Cheers Diane convinces Sam to let her be the bartender for the evening rather than just being a waitress. An order comes in for a Bloody Mary, a particularly complex mixed drink. Naturally, Diane doesn't know how to make it so she looks it up in a bartender's manual, taking a long time to make sure it's just right. As she finishes, she remarks that it is a complicated drink. Sam agrees, which is why he always mixes up a big batch before the evening starts and stores it in the mini-fridge behind the bar.
* Cheers", Diane dreams that characters in the show one by one go down into the bar's basement and disappear, presumably murdered by the homicidal character Andy Andy.
* Cheers, Diane has taken to a convent after breaking her engagement to Frasier, realizing she loves Sam. After Sam comes to visit her, she asks God for a sign. Sam returns and asks where the men's room is. Says Diane, "Well, that's not exactly the parting of the Red Sea..."
* Cheers Diane if she doesn't stop dating her son ("I've got a gun and I'm not afraid to use it!"), and later tries to bribe Sam into stealing Diane back from Frasier.
* Cheers, Diane meets Sam for the first time—and it's through her covering for him when a jilted former lover of his calls the bar. Especially cute is that he's implied to be rinsing his mouth—and therefore can't talk at the moment, and can only "mime" instructions on what to say, which leads to an exasperated Diane finally saying to the phone, "He had to go to mime class!"
* Cheers, Diane mulls over this subject often, regarding Sam's feelings towards her.
* Cheers: Diane reacts to Coach's daughter Lisa's fiancé's ideal sport: "full-contact female karate":
* Cheers", Diane serves on a jury and is desperate to talk about the case with the folks at the bar even though it's not allowed. In the jury room she irritates the hell out of her fellow jurors.
* Cheers: Diane's exact age is never given, and she dodges the subject whenever it comes up, though presumably she is the same age as her actress was. One episode has her actually shocked to meet a young-looking doctor who remembers her from med-school, where she was his senior.
* Cheers, Diane turns down Sam's proposal thinking at first that he's only asking her to marry him on the rebound; she eventually changes her mind, but now Sam wants no part of it. Sam then spends the entire next episode avoiding Diane any way he can.
* Cheers did it with Jay Thomas's character Eddie LeBec, Carla's (Rhea Perlman) husband. Hollywood legend has it that Jay Thomas mouthed off about Perlman on a radio show, Perlman later went to the writers and wanted him gone. Eddie was later killed by a Zamboni at an ice show.
* Cheers did this as a throwaway gag. The reading of Eddie LeBec's will comes a significant amount of time after his funeral. Carla explains that he trusted his will with one of his hockey buddies who forgot where he put it.
* Cheers, does magic, small-time con artist (which Anderson wasn't, but had an onstage persona who was).
* Cheers does Sam ask to change to the "jumper" and they realize who it is.
* Cheers episode "A Ditch in Time". Sam Malone gets involved with Amanda Boyer (Carol Kane), who becomes obsessed with and possessive of men she goes out with. When he tries to break up with her she implies that she'll commit suicide if he does.
* Cheers episode "Diane's Nightmare". Andy-Andy Schroeder wants Sam to pretend that

he owns the bar and Sam is his employee so Andy can impress his girlfriend.
* Cheers episode, Diane tricks the bar folk, then becomes increasingly paranoid that they're plotting revenge. When she's asked to read her poetry for a TV show, she thinks it's a ruse, and humiliates herself by clucking like a chicken on television. Turns out all the gang intended to do was dump a bucket of water on her.
* Cheers episode "Never Love a Goalie", in which Diane serves on a jury in an assault case filed by a woman against her husband, and Diane is the only one convinced of the defendant's guilt, to the exasperation of the other jurors. Ultimately, the woman drops the charges and the deliberations are ended prematurely, but when the woman and her husband visit Cheers at the end of the episode, Diane manages to provoke the husband into threatening his wife, thereby demonstrating his guilt in front of witnesses.
* Cheers episode "Pick a Con... Any Con", Coach is bilked out of a large amount of money by a con man. Recurring character Harry The Hat, himself a con man, devises a plan involving most of the Cheers regulars to get Coach's money back. The plan seems to fail miserably because Coach's bumbling reveals the scheme, but later they learn the ruined plot was actually a ruse to cover the real con, known only to Harry and Coach, which was successful.
* Cheers episode "Sam at Eleven", Sam orders Harry to leave the bar, giving him ten seconds - and realising as he looks as his empty wrist that Harry has stolen his watch. Harry returns the purloined timepiece, but opens his coat to reveal numerous watches and asks if Sam wants to upgrade - which just gets him a more forceful order to leave the bar.
* Cheers episode "The Triangle," the bar regulars (who frequently debate mundane topics) get into an intense discussion of Roadrunner-Coyote cartoons. The argument escalates from whether the coyote is obsessed or simply hungry, to whether his ability to survive falling off a cliff indicates he's the Antichrist.
* Cheers episode "Young Dr. Weinstein" ends with Sam Malone trying to run out on a check at a fancy, ultra-exclusive restaurant. He has secured a reservation there and eaten a meal while pretending to be someone else, but when it comes time to settle the bill, he attempts to pay with either a credit card or check with his own name on it, which the restaurant won't accept.
* Cheers established this as the reason Sam left baseball... with a twist.
* Cheers featured more than one occasion in which Diane told a joke with a French punchline: "So I said, 'Si vous parlez lentement, je ne peux pas comprendre!'", which translates to "If you speak slowly, I can't understand!"
* Cheers featured three beta couples in Frasier and Lilith, Carla and Eddie, and Woody and Kelly, all of whose relationships went rather more smoothly than those of alpha couples Sam and Diane and later Sam and Rebecca (though they were not without their strained moments) and ended in marriage (though in the first case, the marriage ended in separation and eventual divorce, while in the second case, the marriage ended with Eddie's death and unmasking as a bigamist).
* Cheers, featuring Carla's ex-husband. The show did not last very long.
* Cheers finds the Cheers crowd watching a football game when the picture quality suddenly drops. Sam sends Woody over to the set to adjust the antenna, which involves balancing on the panelling while hanging onto the set; inevitably, he loses his footing, but as he hangs from the set, several feet off the floor, the picture clears up - almost. Cliff makes a minor colour adjustment by picking up one of Woody's legs to balance his foot on top of the panelling.
* Cheers, Fraiser learns that Carla is afraid of flying. He offers to take Carla on a flight to help her overcome this fear. Realizing this would be a good opportunity to flex his psychology skills, Frasier gets a plane full of people who are afraid of flying. Pretty much every single thing that can go wrong on the flight does. In the end, Fraiser cures all of the previously phobic people, but gains a fear of flying himself.
* Cheers, Fraser's son Frederick is given a teddy bear that repeats a jingle with a former girlfriend of Fraser's phone number (ostensibly so Frederick can use a similar jingle to remember his own phone number). Lilith (Fraser's then-wife) rips

off the bears head.
* Cheers Frasier calls Sam and Diane out on their reluctance to admit their feelings for one another in Season Four's "Triangle."
* Cheers, Frasier can't get Norm to understand what a stress headache is until he compares it to eating ice-cream too fast.
* Cheers, Frasier is pleasantly surprised to learn that their son is smart.
* Cheers: Frasier starts salivating with desire when Lilith, who normally sports a criminally tight bun, lets her hair down.
* Cheers: Frasier, though not as much as in his spin-off series, when he gets worked up (especially later on in the show's run).
* Cheers: Frasier tips a bellhop the equivalent of $100 US because he's overestimated the exchange rate. Soon the entire staff of the hotel shows up hoping for extravagant tips.
* Cheers had an episode where the entire gang got drunk on the lethal drinks Carla made.
* Cheers had an ongoing prank war with Gary's Olde Towne Tavern that spanned six seasons.
* Cheers had the gang making a film to send back to Woody's parents to convince them to let him stay in Boston. One segment was filmed in Frasier's office, and upon replay they see someone falling past the window. Frasier notes that he'll have to tell one of his colleagues, whose office was on a higher floor, that he needs to keep the windows in his office locked.
* Cheers has Sam reuniting with an "old" flame and her daughter, who was a child when he knew them before, but now not so much. He tries to sleep with both mother and daughter.
* Cheers. He finally comes up with something new, unique, and tasty, but can't remember what he put into it.
* Cheers. He's terrified at the thought of meeting her out of his costume, but he gathers up his courage and gets dressed up to see her again at the bar...and she doesn't show. She doesn't show because she was terrified to meet him without her costume. At the end, after she makes it back to the bar, they have to be literally pushed together to overcome their fear.
* Cheers in five days just so he and Diane could have something to talk about), but neither of them is ever satisfied and demand more. Their inability to accept each others' differences is one of the biggest problems in their relationship.
* Cheers in its timeslot). NBC stuck with it anyway, and following its surprise success at the Emmys, the ratings immediately picked up, and up and up.
* Cheers: In "Look Before You Sleep", Sam winds up without a place to sleep after his apartment is being fumigated, his date has to cancel on him, and he locks himself out of the bar. Having already been up all night the previous night, he goes on a merry adventure all over town, trying to find a somewhere to sleep. Unfortunately, a Shriners convention has filled every hotel in Boston, Carla is in the middle of a tryst with John Allen Hill, Norm has no bed to spare (he'd rather sleep on the couch than with Vera), Frasier's son Frederick is having a very noisy tantrum, Cliff drives Sam away with incessant chattering, and when Sam finally shows up on Rebecca's doorstep, she accidentally locks herself out, leading to both of them spending the night with Cliff.
* Cheers: In one episode, Cliff claims he fooled around with a woman in Florida; in reality, the letter belonging to "her" was the hotel threatening to sue him for stealing almost everything from his room. In a subversion, Maggie is a real girlfriend of Cliff's — and she moves to Canada.
* Cheers In season 5, Diane follows Sam everywhere he goes, insisting they will get married even when Sam flat-out tells her he's no longer interested, even when he's on dates, and when Sam finally caves and proposes, she refuses yet again... then tries to blackmail Sam into proposing to her once more by claiming he assaulted her when she trips, playing up her injuries in court so that Sam is nearly sent to jail. This is all played entirely for laughs.
* Cheers: In the episode "License to Hill", Cliff manages to get drunk on fake booze. In fact, he's drunker than he usually gets despite spending most of his time

in the bar drinking.
* Cheers", in the first appearance of the character that Kelsey Grammer played on TV for 20 years. He is first seen mutely holding a beer mug as a drunk Sam Malone storms out of his office. During the whole scene where Diane and Sam argue about Sam's need to see someone to help him quit drinking, Grammer sits mutely at the bar, next to Norm, randomly nodding along with the rest of the barflies. Finally Sam agrees to see Diane's shrink and tells Diane to tell him to drop by. Diane says "Why don't you see him right now?", and Frasier stands up and says "I'm Dr. Frasier Crane."
* Cheers: In the first episode Sam asks Diane what he should say if any of his regulars ask why she's hanging around the bar, she says he can tell them whatever he wants. The first time someone asks, Sam says she's a hooker.
* Cheers: Invoked at one point by Lilith, when she's getting fed up of Sam spending too much time with her and Frasier's son, telling Frasier if it goes on she'll have to play the part of Bad Cop. Frasier is appropriately alarmed by the implications of that statement.
* Cheers: Invoked, of all places, in one episode. Woody, upset that he has told a lie, worries about the consequences.
* Cheers is a benevolent boss during the seasons when he owns the bar. He helps Carla out financially when she's pregnant for the fifth time, drives her to the hospital to give birth, lets her breastfeed in his office, accompanies her to her ex-husband's wedding, never bugs her about being late, etc. Before and after dating Diane, he was shown to be very attentive to her as well — comforting her when her cat died, for example. Also, although he romantically pursues more than one waitress, it's absolutely clear that their employment does not depend on being friendly to his advances.
* Cheers" is a creepy example. Norm's boss offers to help Diane learn how to play pool. When the boss starts getting aggressively physical with Diane, Norm has to intervene. Norm loses his job.
* Cheers is to imagine the audience naked, but wearing black socks. Frasier, a licensed psychiatrist, initially scorns this idea, then gives it a try himself, finding it apparently works. Except when he tries it on Rebecca, causing the doc to break out in a cold sweat.
* Cheers known is that the show was originally set at a hotel before the creators noticed most of their story ideas centered on the hotel bar and changed the setting accordingly.
* Cheers Lilith chimes in from behind that she can hear him, and so can their kid. Frasier has to beg profusely to get out of trouble.
* Cheers) loves to la-la-la quite a bit—and two episodes in particular ("Father Knows Last" and "Coach Buries A Grudge") feature her singing her heart out, to beautiful effect.
* Cheers makes a visit to Seattle to attend a wedding where both bride and groom are his cousins, and by extension cousins to each other.
* Cheers meets her in "The Show Where Sam Comes Back," they flirt with each other, causing Frasier to muse:
* Cheers no less! - but is disgusted when Frasier loudly exclaims about an article about psychological distress full of technical jargon, unable to eat anymore.
* Cheers: Norm and Cliff are waiting for another regular Paul so they can celebrate his birthday. Since he's late, they eat his birthday cake. They console themselves with the fact that they have pizza too. Then they eat that.
* Cheers, Norm and Cliff discover that they had gotten tattoos on their butts, only they had mixed up the requests: Norm's reads "Post Office Forever", while Cliff's reads "I love Vera".
* Cheers, Norm and Cliff sing "Lollipop" this way at Rebecca's bridal shower until Frasier stops them. They then join in his rendition of "Isn't It Romantic" after inhaling helium again, whereupon Frasier pops one of their balloons in a rage.
* Cheers Norm has a home decorating business which he names "AAAAAAAAAAA" in order to be listed first in the phone book.
* Cheers, Norm is forced to shout over construction noises, but the audience still

can't hear what he's saying until the construction pauses just as he shouts, "The world's biggest ass!"
* Cheers Norm joins a fraternal organization called "The Knights of the Scimitar".
* Cheers. Norm would much rather sleep on the couch than in the same bed as his wife Vera. This is only a problem when Sam needs somewhere to stay for the night. Norm's initially willing to let him stay on their couch, until he accidentally wakes Vera. Norm then boots Sam off the couch and out of the house.
* Cheers of women before he ever met Diane. Any time this happens, Diane lashes out, either childishly (spraying Sam in the crotch with water), or with an angry rant about how Sam is the worst human being ever. Even when they're supposed to be broken up, Diane obsessively follows after the woman Sam is dating, trying to sabotage their relationship.
* Cheers once appeared in a commercial for a vegetable drink where he simply holds up a bottle of the product and says, "I like it." He's quite proud of the ad...until he tries the product and hates it. Now he can't stand the commercial because he essentially lied in it.
* Cheers once. Diane made them take a break for a week to figure out what the relationship was, and he spent the week partying with his friends, claiming that, even as a relief pitcher, he was known for 'coming through in the clutch', and that he worked better under a deadline. He was wrong.
* Cheers: One episode had Cliff explaining to Woody that a Freudian slip was "when you say one thing when you're actually thinking about a mother."
* Cheers One episode has Sam and Norm march into Rebecca's office to show her a chart of her recent sexual activity.
* Cheers on the part of the writers after Jay Thomas insulted Rhea Perlman's attractiveness on his radio show.
* Cheers opens with the bar's beer keg running out. As Sam replaces it, the gang holds a funeral march for it. Then inverted when they hold a coronation for the new one. The whole ceremony drives Norm to tears.
* Cheers open. While Cliff recaps last week's episode, slides from his trip to Florida appear on screen. Cliff notices this, realizes it's the wrong slides, then continues on before someone pulls the plug.
* Cheers originally auditioned for Norm Peterson. When he failed that, he asked the writers if there was a know-it-all character in the series. Thus, Cliff Clavin was born.
* Cheers, or sharing stories about how she had difficulty giving birth to Cliff in the first place. That's when she's not being genuinely emotionally abusive towards him. Strangely enough, most of the Cheers gang still seem to prefer her to Cliff.
* Cheers, people keep trying to grab Coach by his tie when he tells them he invited Diane back to Cheers - but he's wearing a clip-on, so it just comes right off! Eventually, Coach grabs his own tie and throws it to the floor.
* Cheers problems between Sam and Diane is that Diane thinks like this, hoping their relationship will be a tale for the ages, ending with them dying in one another's arms, while Sam generally doesn't. Diane doesn't tend to take it well.
* Cheers, Rebecca, in a the-hell-with-it moment (she had no genuine intentions), passionately kissed Cliff Clavin right on the lips. Cliff stood in the bar all night in a catatonic daze, muttering "Thank You" over and over...
* Cheers, Rebecca is devastated when she loses her last chance to confess her feelings to the boss she's nursed a crush on for years. Sam comes to her apartment to console her, but quickly makes his excuses when he realizes he doesn't have the willpower to stay there without trying to seduce her. Left alone and bereft, Rebecca casually lines up a series of shots of liquor to consume in succession. Subverted when Sam calls from the downstairs lobby, insisting it's the only way he can be there for her without giving in to his baser nature.
* Cheers, Rebecca's boyfriend from high school(played by Harvey Fierstein) pays a visit and she finds out she was this to him.
* Cheers refused to go along with it, and while he did appear in an episode of Frasier, it was as a different character.
* Cheers revolved around Frasier being sent on a Snipe Hunt, though he later gets

back at the others by agreeing to go on another and abandoning them in the cold.
* Cheers revolved around Sam's incredible curving bar slide, which had never been seen before nor was ever seen again.
* Cheers: Sam and Diane have done this plenty of times throughout the first five seasons. S1: Sam —> Diane. S3: They swap per episode. S4: Sam —> Diane then Diane —> Sam. S5: Diane —> Sam.
* Cheers, Sam and Diane were supposed to be getting married, but they started arguing. While they carry on their dialogue in the foreground, everyone in the bar behind them is passing money back and forth, apparently having bet on whether or not they would go through with the wedding.
* Cheers", Sam donates his old baseball jersey to a PBS pledge drive, and is humiliated when the jersey doesn't sell.
* Cheers: Sam hooks up with his waitress Diane at the end of season 1 (resolving the UST), and they almost get married at the end of season 5.
* Cheers": Sam is trying to bury his distress about Diane leaving on a trip with Derek by going out with his babe of the week. As they are canoodling in the front of the bar, a plane whooshes overhead, and Sam looks up.
* Cheers, Sam Malone relentlessly hits on women with terrible pickup lines. While Rebecca was disgusted by Sam using them on her, Diane was more amused by the dumb women who fell for Sam's pick-up lines... often to immediately be swooned by Sam, who was only using them to prove she was no better.
* Cheers. Sam reminded Coach that he never did handstand pushups, that was his teammate. Coach immediately fell down.
* Cheers: Sam's extended metaphor on how Carla sleeping with Hill hurts him works relatively fun up until the last hurdle.
* Cheers, Sam's friend, sportscaster Dave Richards, stops by the bar, and Norm excitedly asks him to repeat his closing remark from his report the night before. Dave says, "Oh, I said, uh, 'Good night, and remember: the world is full of winners and losers. Here's hoping you're one of them.'" Norm, a little deflated, says, "Well, I guess I did hear it right."
* Cheers, Sam unwittingly insults Carla's mother and is punished by being stuffed into the wall on the Murphy bed. Says Carla, "You cross Mama, you sleep in the wall."
* Cheers, Sam wanted to relive one of his greatest sexual encounters (sex in an elevator with him tied up) with Rebecca. At the end of the episode, she ties him up, pulls his pants down, presses a bunch of the buttons and leaves him there.
* Cheers Sam was a Major League baseball player before he retired and bought the bar. Coach was actually Sam's old baseball coach and now works at the bar.
* Cheers several characters in the bar have this, despite their many shortcomings. It's usually suggested this is because Sam's just not willing / able to find anyone to replace them.
* Cheers). She ends up getting a makeover and having men drooling over her.
* Cheers, she knows in her heart that the answer's "no", as far as Sam's concerned.
* Cheers, she let out a scream that went through the commercial break.
* Cheers shilling polishing wax at a car show. In the background is a large advertising poster about a new model called the Candiru 1991. You might take this to be an import from Japan or somewhere else in the Far East. The candiru is actually a Portuguese word: it's that pencil-shaped fish in Brazil that allegedly swinms up inside your penis and lodges there.
* Cheers showed up frequently to swindle money out of the patrons and staff of the bar, but at times, he helped them out, partly out of sentiment, and partly to protect them from operators and crooks even more unscrupulous than himself, noting "I don't like the idea of someone else plucking my pigeons."
* Cheers speak French). Frasier explains that she said she refused to let her son marry Carla, and would rather be dragged around by her tongue. Either that, or she called Carla a small grapefruit.
* Cheers' standalone opening scenes, a radio ad for a court stenography course gives listeners a number to call starting with "five-double-five."
* Cheers", the dumbwaiter at the Gaines mansion gets quite a bit of usage when

Woody and Kelly get married. First, Kelly hides in it since Woody's there and the ceremony hasn't started yet. Then the justice of the peace dies and they send him to the basement in it. When they try to bring him back up, he's gone. Now, Carla goes down the dumbwaiter to find him, only to get dropped. Both times she tries to come back up, she gets dropped again.
* Cheers The first date between Dr Frasier Crane and Dr Lilith Sternin goes disastrously not least because Lilith has no filter about anything she witnesses, and can see through Fras' attempts at keeping up the appearance of calm, even as he's getting angry, telling him outright that despite his hopes, he's not gettin' any.
* Cheers, the gang finds out that Rebecca's college nickname was "Back Seat Becky".
* Cheers the gang got into a bowling contest with Gary's Old Town Tavern. It turned out that Diane had taken bowling for a P.E. credit in college, and was the best bowler on either team. Sam was so thrilled to be able to beat Gary that it never even occurred to him to be bothered that Diane, of all people, was a better bowler than him.
* Cheers theme song, appears in State Farm insurance ads, minus the line about always being glad you came. Presumably, being glad that people are coming to them with insurance claims after various misfortunes would convey the wrong image.
* Cheers. They foreshadowed it for a few episodes but transformed him from the nicest guy you'd ever want to meet, to a cheater who married the woman he had his affair with and never told Carla (it became public at his funeral). This was deliberate payback on part of the producers for Jay Thomas having insulted Rhea Perlman's attractiveness on national radio.
* Cheers, they had the Best Boston Barmaid competition in which Carla won every round, including customer service, only to be informed at the end that she lost to the terrible, blonde barmaid because the winner is always the barmaid with the biggest breasts.
* Cheers, this is why Carla married Nick...and Eddie. In the final season, Carla's daughter ends up marrying her ex-cop boyfriend for the same reason. It's also revealed this is why Norm and Vera got married, but she was lying and didn't tell him the truth until afterward.
* Cheers". This was spoiled by the opening credits, where Neuwirth's name appeared again for the first time since she left the show.
* Cheers) threatens to murder her if she doesn't break it off with Frasier. She goes to Sam for advice.
* Cheers to a dead drunk Rebecca, doodling a Mexican mustache and beard on her, then putting a poncho and a sombrero on her head as she dozes.
* Cheers to be delivered by Johnny Carson on Doc Severinsen's birthday. The joke is "Doc is so old that on his first birthday, he didn't blow out the candles. They didn't have fire yet." Only Lilith finds it funny.
* Cheers to buy Diane a knockoff ring. He ends up spending thousands of dollars covering for the plan, then ends up buying the real ring anyway, only to have Diane discard it, thinking it's the fake.
* Cheers. To sell the act, Rebecca's sister screams "I'm too young to die" just before Rebecca pulls the trigger.
* Cheers to Woody bidding everyone goodbye, though Diane never gets that she's responsible.
* Cheers turns out to be the hotel he stayed in there, and Cliff took more than just towels. He took the shower curtains, hair dryer, welcome mat, bed sheets, and so on. Needless to say, the hotel was not amused.
* Cheers, two women vie for Woody's attention and start fighting. The others start chanting "Cat fight! Cat fight!", until the actual fighting turns out to be disappointing, at which point the chanting changes to "Kitten fight! Kitten fight!"
* Cheers, used by Sam to Diane in a heated argument which culminates in the following exchange:
* Cheers was an excellent bowler because she had taken bowling for her PE credits in college.
* Cheers was cast, as he didn't look like a football player. Thus, he became a

former baseball player (specifically, a relief pitcher for the Boston Red Sox).
* Cheers was never named, although there were fleeting glances of the packaging of at least one real beer brand.
* Cheers was pulled from the Telecinco schedule after three weeks on air (in which, for whatever reasons, two consecutive episodes were aired each Sunday). The station attempted to hire a new team of writers to improve the show, but eventually the remaining episodes were kept as they had been filmed and the series was ultimately canceled after the first season finished airing on Telecinco's sister channel FDF on July 2012.
* Cheers, was renamed to Cheers and references the show prominently in its marketing. A replica bar opened in 2001 in Faneuil Hall that closed in August 2020. There was also a chain of airport bars.
* Cheers were frequent, with all of Sam, Diane, Lilith, Carla, Norm, Cliff, and Woody all making appearances at one point or another.
* Cheers what she's talking about, despite being a know-it-all herself.
* Cheers when after much agonizing, Rebecca decides to turn Robin in for insider trading and the guys encourage her on her way out.
* Cheers when Carla reveals to Norm, that she sometimes spits in a customer's drink if she doesn't like their attitude. Remembering the argument he had with her the other day, Norm decides to switch beers with Cliff when he isn't looking. He ends up performing a spit-take when he's trying to take a sip of the beer and Cliff apologizes to Carla for calling her a "sawed off witch" that morning.
* Cheers when Carla was pregnant. Diane was having a roast beef sandwich for lunch and Carla sat down with her to have her lunch as well. She brings up the strange cravings pregnant women tend to have, using her lunch as an example: green olives, pimentos, and anchovies. It was ultimately subverted. Carla was really trying to make Diane lose her appetite so she could take her lunch.
* Cheers", when Eddie shows up at the bar after a long time on the road, Carla takes him out to the front door. Then the gang has to uncomfortably listen to a lot of orgasmic moaning from the other side of the door.
* Cheers, whenever Henri enters some of the barflies start talking about how much they don't like him, then when he say's hi, they say hi back nicely
* Cheers. When greeting a German man, Rebecca shouts at him, "I wanted to take German in high school", then acts shocked that he doesn't understand her.
* Cheers when Rebecca accidentally hits Sam in the crotch with a coatrack, excited about the prospect of making a baby with him. Later, as he sings to her seductively while they dance, she comments that she didn't know he could reach a note that high. "I couldn't before the coatrack," he admits.
* Cheers, when Rebecca finds out at a restaurant that Sam's plan was to get into bed with her as a reward for getting their boss to rehire Rebecca (without telling her it was under extremely crappy conditions), she simply whispers to his ears all the randy, salacious things they could do. Then she just ditches him at the restaurant because she knows Sam won't be able to stand up for a while in public.
* Cheers' "Where Everybody Knows Your Name" about the impromptu bar they opened in Ted's apartment.
* Cheers, where it's revealed that Frasier still has emotional trauma over how Diane treated him, even after several years have passed, and he gets the chance to call her out on her behaviour after seeing how she's skewed their relationship in a play that she's written.
* Cheers, where it turns out that Frasier has implanted some in Lilith. "Tambourine" causes her to strip, and "tractor" makes her sing.
* Cheers where Norm attempts to make a career of a little-used talent for interior decor — but finds he must act the role of a Camp Gay in order to be taken seriously by potential customers. Since he's a burly, beer-swilling, and gruff straight, this is a tall order, and he eventually breaks character in front of some clients, resulting in his new career going down the tubes.
* Cheers, where Rebecca does this to a very short man in a lift who turns out to be the owner of the bar.
* Cheers where Rebecca marches into her new boss's office and takes an older

gentleman for the boss. Turns out that's his assistant, and her new boss is the many-years-her-junior executive who hit on her in the elevator on the way up.
* Cheers where Sam tried to use several negatives in a question to get Diane to agree to sleep with him.
* Cheers where the Cheers gang is running the bar for Woody and Kelly's wedding. Roughly 2/3 of the episode, namely everything after the gang gets to the Gaines kitchen, is in real time, as they engage in a chaotic scramble to avert several disasters before the wedding starts.
* Cheers", where the gang can't be with their loved ones on Thanksgiving and instead eat dinner at Carla's. In the end, they declare they're thankful for all the people they miss (Norm's wife, Cliff's mother, the recently-deceased Coach) since it does mean they have people they care about.
* Cheers where Woody couldn't afford to get his girlfriend Kelly a present so he writes a song for her and plays it at her birthday party (no backup dancers or fog machine though).
* Cheers why he tied it. However, we never find out what he tied the other string for.
* Cheers wife Lilith contrasts him by balking at even these small concessions.
* Cheers, with Norm later huffing at Cliff, "I suppose that proves that the Coyote's the Antichrist? Come on!"
* Cheers with the kids microwaving his pants. It doesn't get easier from there. Even Ludlow, the nicest and smartest of Carla's kids, ends up setting Frasier's shoes on fire in a crowded restaurant.
* Cheers with the mentally unbalanced Andy Schroeder as the title character and herself as Desdemona. Unfortunately, Andy still has unrequited feelings for her and tries to kill her during the performance. Luckily, Sam realizes what's going on and rushes to her aid.
* Cheers, Woody Boyd's hometown of Hanover, Indiana was occasionally depicted as one of these.
* Cheers, Woody gets elected to the city council. Unfortunately, Al doesn't live to see he was right.
* Cheers. Woody successfully cured his hangover with a cure that worked all the time in Hanover: put on your pajamas, take an aspirin with a glass of water, then vomit till your nose bleeds and you see the angels.
* cheer that the headmistress has been killed. After you visit the boy who escaped and collect your payment, a soldier might tell you about the murder (that you performed) and comment "The children must be devastated."
* Cheer!. The other three jocks-turned-cheerleaders have so far averted this trope, since they don't appear to remember the past.
* "Cheer Up Candace", for the Mix-and-Mingler Machine and for when everyone is ejected there (a particularly egregious example)
* Cheer Up, Charlie Daniels. (She's already a cheerleader, but as far as personality goes.) He notes that she "used to be sweeter", indicating that she may have been nicer before.
* Cheer Up, Charlie Daniels song "Yeast Infection" is one of these in regards to bread. And/or money.
* Cheer Up, Emo Girl: Lindsay is far more competent and intelligent than her canon counterpart.
* Cheer Up Episode: One character is down in the dumps, and the other characters attempt to make them happier.
* Cheer Up! Love and Pompoms: Annie is a tomboy lesbian and Beatrice is a popular cheerleader and trans girl. They are former friends who end up falling in love over the course of the book.
* Cheer Up! Love and Pompoms (main characters are a lesbian and a trans girl and the book involves their romance)
* Cheer!. When we finally see the covered eye, there's a nasty scar going over it.
* Cheer! who talks to squirrels. She's also an absolute genius when it comes to analyzing motives and relationships.
* Cheery Littlebottom, asked how she'd parted company with the Guild, replied as

follows:
* Cheery Littlebottom, the Watch's forensic department, is part this. She doesn't like many traditional
* Cheery, perky Sailor Moon has pink, silver, white, or yellow hair in the
* Cheesburger's "Winner", owing to their composing the theme song for
* cheese advert in New Zealand in this situation. She finds a wedge of Gouda cheese to ward off the mouse, only to frown and pause for a moment before eating it herself. Oops.
* Cheeseboarding. This involves force-feeding Pip truly ridiculous amounts of cheese without so much as a cracker, or even some chutney, until he begins to go mad.
* Cheeseburger used to be an anonymous member of the ROH ring crew until he Rhett Titus and
* Cheese-Eating Surrender Monkeys: French soldiers depicted as cowards.
* Cheese-Eating Surrender Monkeys laughing stock of the western world. In hindsight the conquering of France also marked the end of western Europe's dominance as colonial powers, with the downfall of one of Europe's biggest colonizers (other than Britain) sending out the message that white imperialists were not so high and mighty after all, leading to a rapid period of decolonization as various European-owned nonwestern territories fought for independence in the face of France's loss to Germany.
* Cheese Festival is an interactive game based on the cartoon "Hey Arnold" with teenage versions of the characters. The player chooses Helga's moves throughout the three days before the Cheese Festival, however the outcome of the story remains the same.
* "Cheese food product" contains less than half cheese, and sometimes no cheese at all. In fact, any food with "product" in it is a worry.
* Cheese on pizza often isn't real cheese at all. Grated imitation cheese is often labeled as "pizza topping" or "grated cheese topping". And it's surprisingly easy to make a convincing imitation mozzarella from just soy milk and enterprising use of other flavorings.
* Cheese Sandwich during the song "Cheese Confesses" in "Pinkie Pride".
* Cheese Sandwich's idolisation of Pinkie Pie appears to be simple respect for her talents. However there are a couple of lines in the episode that suggest he could have actually fallen in love with her. The subtext for a romance is definitely there. It may have been intentional, given that
* Cheese Sandwich's rubber chicken Boneless and Pinkie's pet alligator Gummy are briefly rendered in live-action during a musical number.
* Cheese Sandwich, voiced by Weird Al, is essentially him in pony form. Accordion-playing polka music pony.
* Cheese Sandwich was inspired by Pinkie Pie to become a party pony just like her, and eventually became good enough to have an ultimately friendly rivalry with her
* Cheese Shop dialect to make himself understood. This is probably why the shopkeeper spends the rest of the sketch deliberately wasting his time.
* Cheese Shop" sketch, so not only is the shop overspecialized, it doesn't actually have any polearms at the moment. Fortunately for the shop owner, Roy doesn't have a weapon with which to kill him with for wasting his time like in the original sketch.
* Cheesestrings UK adverts changed it to "Bend me, shake me, any way you want me / You got a Cheeststring, you're alright"
* cheese, they occasionally shout totally inaccurate one-liners like "Touchdown!" or "Hole in one!"
* Cheese uses the diuretic version of this in the story "The Bad Seeds". The risk of dehydration get a passing mention.
* Cheesie Charlie's and defends himself to Lois with a false story of how awful the place was:
* Cheesy, right after you defeat the final boss Cheesy throws the last ingredient into the magic pot, and then jumps inside it. He falls into a room filled by mouse traps; he looks around and shrugs. Then the screen goes black and you hear the

mouse traps being activated and you hear him scream in pain.
* cheesy video game enemies... but at least behave like leeches, and according to the story, have long tails that unfold, unlike in the sets.
* cheesy yet fairly popular", which by all rights should preclude any more bosses showing up.
* Cheetah attempted to kill Doctor Light for being a rapist — yet before that, she attempted to force herself on Wally West.
* Cheetah (Barbara Minerva) is much faster than her animal namesake and has learned to steal speed through the Speed Force meaning she has enough speed and knowledge to be a threat to The Flash if they fail to take her seriously enough and lose track of her in a fight.
* Cheetah have become friends with Diana after their defeat. This generally doesn't last past any shakeups in the creative team as new writers want to have Wondy face off against her iconic villain once more.
* Cheetah her powers, is a cruel evil god who requires his worshipers to sacrifice humans to him by draining their blood, which caused his temple to be hidden and all refrences to him destroyed in an attempt to drain him of his power.
* Cheetahmen 2. The only fix was that you could now play all the levels.
* Cheetahs and pumas are the two largest of the small cats and can't roar. Both, on average, outweigh a leopard (which can roar) and are several times more massive than an ocelot. Both cheetahs and pumas can purr and, when a tame one is petted by a human they are comfortable with, their purrs sound like a very loud and never-ending low pitch growl.
* Cheetahs are known for being the fastest land animal, but that speed comes at the cost of being very fragile compared to the other predators in Africa. They also must stop and rest after a full blown run or they will die from overheating, so they can't even eat immediately. This means other predators commonly steal their kills.
* Cheetahs are quite often depicted with a leopard style rosette fur pattern while lacking their characteristic facial "tear" stripes. This is probably due to artists being more familiar with leopards (and jaguars, which do resemble them) and erroneously generalizing their characteristics. Real cheetahs have solid round black spots and stripes on their tails and sides of the muzzle. Although king cheetahs, a color variation of cheetah, are known to have rosettes.
* Cheetah starts turning to a more friendly enemy to Diana after Di saves her life, though she's still a murderer who will happily take on contracts that set her against Diana. She ends up rescuing Diana from Poison Ivy and Cheshire's poisons while the three are all working for the same boss, though she still helps capture Di for their boss she just refuses to kill her or let anyone do so in front of her.
* Cheetahs. They're the frailest of the big cats and they have to eat quickly because of their inability to defend their kills from other carnivores, but they're the fastest land animal alive. In fact, they're so lightly built that they have difficulty pulling down a prey animal that's standing still, so they use their speed itself as a weapon: they intentionally startle antelopes into running at top speed, overtake them, and trip them.
* Cheetah wants to have sex with her in exchange for turning her human again. Instead, he just wants her to wear a t-shirt claiming he "sucked the pussy right out of her".
* Cheetah was Diana's friend before being tricked into thinking Diana had betrayed her and led into the painful unwanted transformation which gives her her powers.
* Cheetah were each deadly fighters and manipulators with malicious intentions, Pris was even working for Imperial Japan and the Nazis before she ever donned an animal themed costume.
* Cheetor, Optimus Primal has one of these, prophesizing of new characters who appear in the second season.
* Cheetor TRIES to invoke this during his final battle with Spittor; Spittor dies, Cheetor lives.
* Cheetos ad, a boy is magically blown up like a big balloon. Despite only wearing swimming trunks, he gets to keep his modesty intact without even a hint of ripped

fabric. Possibly justified in that trunks do sometimes have a lot of stretch, but considering the size he gains it still seems like an unlikely that they wouldn't at least snap off due to his sudden bulk gain.
* Cheez Doodles (cheese puffs): It's used as a stand-in for all cheese puffs in the east coast of America.
* Cheezies (cheese curl) in Canada. In the U.S., any form of cheese-flvored snacks will more often than not be called "Cheetos"
* Cheez-It crackers, introduced in 1921, make that particular spelling
* Cheez-It crackers now come in a sandwich version. The lab tech and the immature box of sandwich crackers begin arguing over whether the new snack is pronounced "san
* Cheez-its commercial with the "interrupting cheese" joke. The idea of all the ads is waiting for the cheese to mature, and there are always cheeses doing childish 'immature' things. This one has the cheese doing a knock knock joke about 'interrupting cheese' and then interrupting the guy's reply question.
* Chef Aid album, where Cartman does much the same when he and the other boys guest on the Wyclef Jean track "Bubblegoose".
* Chef Al Yeganeh, the New York proprietor of "Soup Kitchen International" (later "The Original Soupman"), and the real life inspiration for
* Chef At Home seems to be a casualty of this. All of his ingredients are in glass jars, and he refers to them as such.
* Chef calls out the others for making fun of his "ethnicity." However, Kevin looks identical to all the white characters (without a "squint") and has a rather European-sounding surname. Were his parents white people who lived in China? Was he adopted? But then, how is Chinese his "ethnicity?" Fans tend to just say he's Asian and not question it further.
* Chef Chris Sell, in the episode "Belly Up": "Bollocks, bollocks, bollocks!"
* Chef Goes Nanners. The boys were so un-racist that they had no idea that the town flag was racist and simply thought the flag represented capital punishment.
* Chef!. Her father, the nouveau riche owner of Chateau Anglais, makes Gareth take her on to work in the kitchen even though she can't even chop a carrot, and she whines, complains, and generally throws a fit any time she's expected to actually do anything.
* chef Millefuille's which is very addictive and fattening. When Queen tries to exit the room she's in, she gets stuck firmly in the doorway until she eventually uses her sword to cut herself free.
* Chef of Iron: A chef who is just as good with his knives outside the kitchen.
* Chef Pee Pee carry him on his back, much to the latter's ire, the result of which makes the latter go into a coma.
* Chef Pee Pee's Birthday Surprise!", after he has a dream about the Statue of Liberty, due to the fact that it's surrounded by water.
* Chef's Chocolate Salty Balls. Which is then subverted, or something, when Chef goes over to
* Chef's Luv Shack spoof "Asses in Space" has Terrence and Philip firing at the titular objects with only one planet in the background.
* Chef's Salty Chocolate Balls which features gratuitous microphone feedback as part of its artistic makeup.
* Chef Tony once advertised the Perfection Series knives as so sharp they can cut a pineapple in half in midair. Also a
* Chef!, was a classic example of this, although he would occasionally bestow compliments as well. "Everton, let me explain things to you. In the world of cooking, I am Einstein. Lucinda is Isaac Newton. And you are a mud-dwelling unicellular bit of jelly with a predilection for consuming its own excrement."
* Chef!) was the Chef himself, who didn't think they should date because they were colleagues.
* Chef!), who, caught between his restaurant owner boss who wants him to stick to his tried-and-true favorites, and a food critic blogger who finds the same old thing mediocre, has a major meltdown that goes viral. He gets a shot at starting over running a food truck with his estranged son.

* Che Guevara during the Cuban War. His actions become the subject of a best-seller titled Call Me By My Real Name: Confessions of a Fallen Hero.
* Che Guevara," Guevara lambasts Fawkes not for attempting to blow up the King of England, but for failing and getting caught:
* Che Guevara nickname of "Che" is actually rather embarrassing when you know the meaning. It’s a meaningless filler word in Argentina similar to “um.” However this was completely unknown to the Cubans who gave it to him as a nickname because he said it a lot. “El Che” to someone of Guevara’s region of Argentina sounds like “The Umm.” Guevara didn’t expressed any dislike of the name while in Cuba, but did confess the Khrushchev that he would be rather embarrassed to return home with it.
* Che Guevara used to say to the future guerrilla warriors training in Cuba: "From now on, consider yourselves as dead men, and that the life you'll have from now on is lent".
* Che Guevara was disappointed that the USSR backed down on the Cuban Missile Crisis, and sought to spread communism his way. His actions caused the USSR to distance themselves from him, his exploits in Congo was an utter failure and he finally met his end at Bolivia.
* Che Guevara was most successful when he served alongside Castro but he didn't succeed on his own in the Congo and finally in Bolivia, where he was captured and executed.
* Che Guevara, with many young people just buying T-shirts and posters with his image just because he looks "cool" on it.
* Cheiron's Bow, and the Great Bow. It is refreshingly easy to obtain, requiring no grinding or ultra-rare ingredients.
* Chejop Kejak, the oldest and most powerful Exalt in existence, possesses one of these.
* Chekhov and Uhura illegally boarding a US Navy vessel and stealing power (for the purposes of recrystallizing the dilithium matrix in the warp drive allowing them to get home); then Kirk and co. removing a criminal suspect under arrest (Chekhov, who gets captured in the process) from police custody.
* Chekhov at the end of the episode, when Loveless pulls a gun on a hostage, only for West to remind him that there were two identical-looking guns in the bag, only one of which shot forwards.
* Chekhov, Chekhov tropes often imply that something introduced early in the plot will come to be used later, or fail to be used.
* Chekhov's Boomerang: A plot device that has already been used once, then shows up again later.
* Chekhov's Boomerang: Chekhov's Gun has already been used once, then unexpectedly turns up again.
* Chekhov's Boomerang in the head with its hilt. In the following episode, Sokka returns the favor with Aang's staff. Then, in the third season, Sokka pokes Zuko to get him angry.
* Chekhov's Classroom: Someone learns something in school and unexpectedly applies that knowledge later in the story.
* Chekhov's Exhibit: A standby of all Caper films, or any other action story where a museum is involved.
* Chekhov's Exhibit: Chekhov's Gun will be put on display for the general public to gawk at. Before it's stolen, of course.
* Chekhov's Exhibit: If a fancy exhibit is shown in a museum, you bet it will be stolen.
* Chekhov's Gun: A plot device that the heroes have been carrying around since the first five minutes finally gets used.
* Chekhov's Gun. Archer dismisses this as "a facile argument" and Woodhouse chimes in that it's "also woefully esoteric".
* Chekhov's Gun: If a table is set up at the beginning of a match, a wrestler will go through it by the end.
* Chekhov's Gunman: A fleetingly introduced character turns out to play a role in resolving the main plot.

* Chekhov's Gunman and is murdered by Voldemort as the first chapter ends.
* Chekhov's Gunman involving physically perfect people from throughout the world, and these are the people he's recruited.
* Chekhov's Gunman: When a character seems to be there for no reason, they must be important. In other words, the Chekhov's Gun is a character rather than an object.
* Chekhov's Gun news and choosing Raoul; all (further) hell breaks loose from there.
* Chekhov's Gun. One of the first things we learn about him is that he's in mint condition, helping to establish that he, Woody, Jessie, and Bullseye are there for a collection. Later on, however, his mint condition turns out to be one of the most critical aspects and drivers of his character — which makes perfect sense, but in a way you don't think about earlier on.
* Chekhov's Gun tells the same story...only it's Ishmael who gets trussed up, rather than Isaac. No mention is made of "the son who counts", however.
* Chekhov's Gun that's following them. This pod externally bridges the two mandibles at the front of the ship.
* Chekhov's Gun where everyone checked the gun for a bullet, and put it away in a box, and then all wondered why they heard a bang in the back of the storeroom.
* Chekhov's Hobby, but it is merely established that the character has the skill rather than showing them using or learning it beforehand.
* Chekhov's News: When a news report mentions something that will be important later.
* Chekhov's Party: If a party happens or is mentioned, pay close attention. Something important happened there.
* Chekhov's Scar that is to blame for the wound gave him...naasty experiences and also scarred Alec's hand when he removed the thing. Alec had no after effects since the magic pattern of the disk was on the side touching Seregil's skin.
* Chekhov's Skill: What you learn along the way can be a Chekhov's Gun.
* Chekhov's Skill when Willy figures that they can use this celebrity to force President Caylo to unlock the funds needed to repair the busted Titan Maximum.
* Chekhov's VolcanoIf a volcano is shown or mentioned in a story, it will inevitably erupt at some plot-critical point.
* Chekhov's Volcano: If it wasn't going to erupt, it would have just been a mountain.
* Chekov claims that "If the shoe fits, wear it." is a Russian proverb in the same movie. Though the current version of the saying has a complicated origin
* Chekov, who insists variously that Scotch whisky, the Cheshire Cat, Cinderella, and the Garden of Eden are all Russian. According to
* Chelgrians. The Chelgrian Sublimed are also unusual in their emotional attitude to events in the corporeal realm — most Sublimed races develop a relaxed aloofness to events in our plane, but the Chelgrian Sublimed at one point actively ordered the corporeal government to kill billions of Culture citizens in retribution for the billions who died in the Chelgrian civil war, which was unintentionally sparked off by Culture agents.
* Chella daughter of Cheyk, the chieftainess of the Black Ears, stays true to her tribe's custom of stringing the ears of defeated foes on a necklace. She can be seen taking a new pair in "Baelor".
* Chellan, Sword of Greed is a scimitar made of gold, and thus so heavy that it requires exceptional strength to wield. It can transform those it strikes into crystalline statues.
* Chelle, Emma and Josh are highly-intelligent: Chelle excels at verbal/reading/writing skills; Emma at mathematical and probably spatial reasoning; Josh at social skills and animal handling.
* Chell herself universe, in a world occupied by the Combine, with no weapons, no current allies, and no idea about what might lie beyond.
* Chell is the daughter of Cave Johnson and Caroline's storyline, its likely there will never be a concrete answer.
* Chelon names have lots of short, sharp syllables that sound like wet clicks and snaps - "i"s and "t" are common (e.g. Rinsit, Simmerith, Latanum, Jetanien,

Miltakka).
* Chelon names have lots of short, sharp syllables that sound like wet clicks and snaps - "i"s and "t" are common (Rinsit, Simmerith, Jetanien, Miltakka)
* Chelsea and Manchester City both received massive (if controversial) cash injections in the 2000s and 2010s respectively that suddenly made them contenders for massive silverware hauls, yet the former seemed to keep fizzling out in their attempts to win the UEFA Champions League (twice losing to Liverpool in the semi-finals and once losing to Manchester United in the final), while the latter never quite seemed to get a league championship run together. Then in 2012, Manchester City won the Premier League for the first time since 1968, and Chelsea conquered the Champions League for the first time ever (leading to many jokes regarding this as proof of the Mayan Apocalypse... or maybe just a Man United Apocalypse, given their implosion in the 2013-14 season after Ferguson retired and Moyes took over). City has yet to master the art of succeeding in the Champions League, however, a trend continuing in 2015/16 despite their reaching the semi-finals, and losing the 2020/21 final to Chelsea.
* Chelsea Boys, both tied up in chairs by a kinky guy they met on the internet who then proceeds to rob them.
* Chelsea Boys plays it straight with some characters, and averts it with others. The main character's best friend pretty much says that this trope outright, and that the main guy is going against all common gay logic in wanting to be monogamous.
* Chelsea Collins's "Happy Together" is about one of these; the singer and their partner are both miserable with each other, but neither can bring themselves to leave.
* Chelsea falls under this when the others tire of her long stories about her classmates.
* Chelsea Lately: One skit has Chelsea give one of her male employees repeated wedgies as a form of exercise.
* Chelsea Lately, sometimes the comedian Loni Love will suddenly grab the man sitting next to her by the head and kiss him. She calls it "face-raping someone".
* Chelsea Manning sent documents regarding war crimes and other things to WikiLeaks.
* Chelsea Peretti's pregnancy during production for the second half of Season 4. The show spent a couple of weeks keeping Gina behind her desk and dressing her in baggy clothing. Also, because Gina is more than a little odd, Peretti would stand in strange poses to distract from her belly. This didn't last very long, however, as they decided to simply work the pregnancy into the plot and have Gina fall in love with
* Chelsea's Ron "Chopper" Harris effectively took Leeds' Eddie Gray out of commission soon after kickoff with a savage tackle to the back of the leg, while Leeds' Jack Charlton kneed and headbutted Chelsea striker Peter Osgood.
* Chelsie Hill, an aspiring dancer who became a paraplegic after a car accident during her senior year in high school. Rather than giving up on dance, she simply moved to promoting adaptive dancing for people in wheelchairs, and started an organization called the Rollettes to inspire other women who use wheelchairs to do the same.
* Chelsie Hill was an aspiring dancer who became a paraplegic after a car accident during her senior year in high school. Rather than giving up on dance, she simply moved to promoting adaptive dancing for people in wheelchairs and started an organization called the Rollettes to inspire other women who use wheelchairs to do the same.
* Chelworth Tish is having a really rotten morning after the night before: she's woken in a trashed flat to find her fellow partygoers have deserted her, and two policemen have come to see what all the trouble was. Then, just to add a finishing touch to her humiliation, when they arrest her she wets herself.
* Chely Wright, American country music singer notable for being one of the very few who is openly a lesbian.
* Chely Wright - "Shut Up And Drive" (talking herself into going through with a

breakup)
* Chely Wright's "The Bumper of My SUV" is about the narrator getting the finger by a driver who opposes her Marines bumper sticker.
* ChemicalAlia has a mod to replace the Scout, Heavy, Engineer, Medic, and Spy (with more coming) with female models and fan-made female voices.
* Chemical Hazard (Chemical Hazard Warning - CHW. A similar code, RHW, exists for radiological hazard warning, which specifically refers to when a vehicle transporting radioactive material crashes or otherwise spills such material, particularly when it is _not_ from a nuclear power plant. That has its own separate code, NUW.)
* Chemical-herbal Booster Drugs are available for unicorns and pegasi, providing one of the only ways to increase field strength — temporarily: most mixes last about fifteen minutes. Boosts range from five to fifty percent of the user's original power, and the higher the percentage, the more strain the pony is putting on their body: post-dose death caused by the most potent mixes can and does occur. Most versions have visible side effects, no race can take a drug meant for another without getting sick, and no mixes are
* Chemical Kid and Dragonwing do it in the first issue of the 2011 reboot of
* Chemically-Induced Insanity: Drugging someone to induce or fake mental illness.
* Chemically-Induced Insanity: Intentionally inducing a desired effect onto another person (does not have to be madness).
* Chemical Messiah: A drug or chemical that is worshipped like a god for its properties.
* Chemical Messiah: A drug that people hoard and worship insanely even though it does more harm than good.
* "chemical restraint") The B-52 has been solving unsafe situations in emergency departments since the 1970s, but it takes at least 10-15 minutes to work. Modern versions typically use droperidol and midazolam, and kick in within 3-5 minutes.
* Chemical Specialties Manufacturers Association v. Clark, 482 F.2d 325 (5th Cir. 1973) (Brown, C.J., concurring)
* Chemical X available. It can even be found in the toilet! The girls did create another girl to help them out, but she turned out to be unstable and exploded. Since the Professor was successful the first time, maybe more heroes could be created that didn't suffer from that problem.
* Chemistry – Catalysis alters the series of structural changes a chemical has to go through in a reaction, usually with the end effect of the reaction occurring at a lower temperature and, due to the nature of heat loss in most chemical equipment, requiring less heat input from the equipment.
* Chemistry and Physics are often taught that way as well. In the first year you learn a simple concept that works for some applications without actually being correct (e.g. atoms as little round balls). The next year (or unit of lectures) begins with: "Well what we previously taught you is not actually how this works. We will now explain how it actually works" (e.g. introducing the concept of electrons), the next step is pointing out how the real world is not that model either. Rinse, repeat. Justified insofar as many things can satisfactorily be explained by a "wrong" theory - Newtonian physics works just fine for human sized objects moving at highway speeds; it doesn't for atoms at near light speed. And some of the "wrong" theories are actually the basis for understanding the more advanced ones which are closer to reality.
* "Chemistry", he gives up being Batman when he finally found the love of his life, preferring to settle down and marry (though Nightwing believed he would be back in the suit in a month). However, it is later discovered that she (along with everyone else's partner on said ship) is a plant person created by Ivy to inherit all their fortunes once they're dead. Bruce returns back to being Batman in order to foil her plot.
* Chemists and chemical engineers tend to be like this when encountering strange odors or substances.
* chemists, and was "sodium bicarbonate" rather than "bicarbonate of soda" for some time before that). And then there's the possibility they ran out of baking soda

using it to, you know, bake; or that they bake pies and pastries which don't require it.
* Chemists often have to resort to these when attempting to describe extremely foul-smelling chemicals, as most of these smells are more or less entirely unique despite their similarities to other smelly compounds. The descriptions can get quite interesting for some of the worst, like selenophenol being described as "6 skunks wrapped in rubber innertubes and the whole thing is set ablaze".
* Chen-Chen has incredible abilities relating to her martial arts training she received as a member of a religious order.
* Cheng Pa. He gets Sergeant Hong to put in a good word to her for him, which he does (but until he makes a proposal through the proper channels, won't make up her mind).
* Cheng Zhi and Phillip Bauer. The former become a triumvirate if General Mohmar Habib is counted.
* Chenjesus with their partners the Mmrnmhrm) immediately showed that their current tech and military might is more than a match to the Ur-Quans', and won the war.
* Chen Lu was turned into the Radioactive Man in a Chinese attempt to create a human weapon. Pity they didn't check if he had plans for world domination first...
* Che Part One (a film about Che Guevera). When Che is visiting New York, he learns of a bomb threat against him. Che tells his personal security guard that he wants his guard to ride in a separate car (so his guard will be safe), but his guard says, "With all due respect, I should ride with you."
* Cherchez l'idole, was 18 at the time and played a secondary character who was a singer. The Japanese public took interest in her, and later started referring to female singers who shared her aesthetic as an "idol." Her song "La plus belle pour aller danser" sold more than a million copies in Japan at the time.
* Cherenkov radiation — going faster in the process, by losing energy.
* Cher. Her full name used to be Cherilyn Sarkisian, but she legally changed it to just "Cher".
* Cheria's healing focuses on multiple targets for less power and less speed. Offensively she throws away the staff to focus entirely on throwing knives and uses powerful offensive magic including
* Cherie Johnson) and Waldo Faldo (Shawn Harrison) are much more recognizable.
* Cher in 1990. The song dated much older: The first version is by Mary Clayton in 1963.
* Cher in 2010 about going to the wedding of two male friends of hers. Someone saw her and assumed since they were at a gay wedding in San Fransico, she was a Drag Queen. She asked Cher for her card and told her she was the best she'd ever seen and wanted to hire her for a party. She then realized it was the real Cher.
* Cher in her "Turn Back Time" video. Jenner would then come out as a trans woman in April 2015.
* cherishes said moment in which the protected was there for them, feels indebted to them and decides to protect them as a way to pay them back for their help. Debts must be paid, after all... even if it involves going to Hell and back to not owe that person anything.
* Cherish has similar powers as her father, though non-permanently and at a longer range. She uses it to
* Cher Lloyd - "Want U Back," about a girl who dumped her boyfriend because he "never had much game" and then got all pissy because he got together with someone else instead of crawling back to her like she expected.
* Chernobyl. After the nuclear disaster in 1986 all villagers were quickly deported outside the danger zone and left everything behind. Today Chernobyl is a ghost town where many things still remind visitors of a typical Soviet village, with flags, statues and pictures of Lenin and the Red Banner.
* Chernobyl. All three survived, although unfortunately the same could not be said for most of the first responders and a fair percentage of the other liquidators.
* Chernobyl and a place where plants and animals have won back ground on humans.
* Chernobyl and she is getting no response, making her realize that something is very much going wrong there.

* Chernobyl (and so didn't exist), but it's heavily implied that the negative consequences of what Shcherbina and Legasov told them was too much of an inconvenient truth which resulted in their testimony being removed.
* Chernobyl at the end of episode Five, the text states that thirty years after the disater, the uniforms are still in the basement of the hospital, and are still dangerously radiactive.
* Chernobyl at them, then smashes the phone to scrap for good measure.
* Chernobyl. A woman is warned not to touch a radiation victim, but this trope happens instead when the distraught man hugs her and she is unwilling to refuse this comfort.
* Chernobyl courtesy of Legasov, to "innocently" question Bryukhanov and Fomin about just what is going on.
* Chernobyl Curs: An OCT where all of the characters are sapient dogs, to varying degrees. Since the story is told by multiple people through multiple characters, some show more human-like behavior than others.
* Chernobyl Diaries film wherein a bunch of tourists explore Pripyat (the abandoned city next to Chernobyl) and are picked off by the mutated descendants of the people who stayed there despite the radiation leak.
* Chernobyl Diaries harmless, the startled animal books it outta there rather than attacking, making this a Double Subversion of sorts.
* Chernobyl Diaries: One scene has the characters arguing on an empty street as a figure is seen walking on the background, unnoticed by any one of them.
* Chernobyl Diaries, the tourists initially blame their guide's grisly off-camera death on feral dogs, which survive as aggressive scavengers in the exclusion zone.
* Chernobyl disaster, the breached reactor put out enough particle radiation to do this to a helicopter attempting to dump a sand/boron mixture into it. Rather than instantly turning it into dust, however, it instead wore it away at an atomic level. When it crashed, (pilot error caused the rotors to strike a nearby chain, the weakened metal snapped rather than bent, and the aircraft dropped) it splattered when it hit rather than smashing.
* Chernobyl disaster, was in one of the main pump circulation rooms of the reactor 4 building when said reactor exploded, which presumably killed him instantly. His body is assumed to be under the debris of the circulation pumps. A memorial dedicated to him was built just outside of the reactor 4's now defunct control room.
* Chernobyl exploded. If they had been, the radiation would have blown south over Kiev, making that city uninhabitable. Although the explosion ruined large swathes of Belarusian and Ukrainian countryside, caused the abandonment of one town, Pripyat, and has caused cancer in many people, the city escaped largely unharmed. The danger is still present, though, as large wooded areas were likewise irradiated. Most of those trees are now dead and dry. Forest fires are now a real threat, once again raising the possibility of radioactive smoke blowing into a populated area.
* Chernobyl had a flawed failsafe. Making a really long story short (the full version can be found in the real life section), when AZ-5 was engaged, the control rods would eventually do their job, but not before causing a power spike. Reactor #4 was already experiencing a runaway reaction (caused by human error), and the power spike was just enough to break the control rods, preventing them from cooling the reactor, and ultimately causing the explosion and full meltdown. Now, the Soviet authorities knew RMBK reactors had this flaw, but covered it up so as to save face. This one lie meant that nobody who worked at the plant knew that the AZ-5 would be worse than useless in their situation, and it's speculated that Dyatlov (the guy in charge at the time) pushed the reactor beyond its limits because he thought he had a failsafe, not a detonator. The mechanics behind the explosion (and the politics behind those mechanics) are discussed in episode 5, which focuses on the trial of Dyatlov, Bryukhanov, and Fomin.
* Chernobyl in Episode 5 when Legasov and Khomyuk testify at the trial of Dyatlov, Bryukhanov, and Fomin.
* Chernobyl: In the early minutes of the disaster, Dyatlov mentions that he's "seen

worse" but the show never follows upon. Another episode was going to reveal that he had survived a nuclear accident two decades prior, but the relevant scene was cut.
* Chernobyl in the USSR, simply the most famous. Shcherbina comments that anyone who tries to stand up to the Soviet government to fix said issues will not just be threatening themselves, but encouraging the government to go after their friends and family.
* Chernobyl is overall very subtle and understated, but uses a low, unsettling droning sound - reminiscent of the workings of the fateful power plant - as a common motif to add to the series' bleak, eerie atmosphere.
* Chernobyl Nuclear had all the normal failsafes for its reactor design but operators had deliberately disabled many of them to test a new shutdown procedure.
* Chernobyl on, went into the decommissioned nuclear power plant in Lithuania that would be used to film the series, and recorded sounds there, including pumps, reactors and turbines. Then she arranged the haunting soundtrack of the series with them.
* Chernobyl, particularly as the supervisors and power plant managers feign ignorance to the true calamity of the situation.
* Chernobyl Power Plant about eighty miles from Kyiv, and evacuated after the Chernobyl disaster. It's more or less a perfectly preserved Soviet ghost town. You can actually visit it under supervision, but you wouldn't want to live there. The picture on this page is from the amusement park in Pripyat.
* Chernobyl power plant lived) has a few that can be seen in documentaries. (But that comes with the whole "city of creepy abandoned stuff" thing.)
* Chernobyl received universal acclaim around the world for its depiction of the Chernobyl disaster, its reception in Russia was more mixed. Many nationalists and the pro-Putin state media openly lambasted the series as American propaganda for depicting the Soviet government as corrupt and incompetent – prioritizing its ideology over facts — which contributed to the disaster and bungled the response. On the other hand, many survivors and responders, including retired General Nikolai Tarakanov, have praised the series for its startling accuracy and heroic depiction of the emergency response crew.
* Chernobyl relents and sends him to the scene along with Boris Scherbina. This turns out to be the right move, as Legasov is quite possibly the best man for the job, and Scherbina, as Legasov later points out, is a good man with enough political knowledge to get things done.
* Chernobyl sense. The man's just so deeply in denial that most of his lines are ripe for mocking.
* Chernobyl, Shcherbina insists that they take a walk. Legasov thinks he is about to get a dressing down, but instead, Shcherbina quietly asks him for more information on radiation sickness, then points out that they have KGB agents following them. Shcherbina actually agrees with Legasov that they need to amp up the evacuations, but he knows they have to be careful what they say.
* Chernobyl so they don't spread radiation outside the containment area. On their first patrol, Bacho shows Pavel the tried and true technique to attract their quarry, which is to whistle the way a dog's owner would to attract their pet. This causes a pack of dogs to happily come out of hiding and enjoy some human contact, which allows the squad to gun them down as quickly as possible.
* Chernobyl's songbirds, to some extent. Basically, they're responding to higher amounts of radiation by producing more antioxydants, which help repair damaged DNA. This also has the side effect of prolonging their lives.
* Chernobyl that numerous species of birds that lives in the general area of the Chernobyl Exclusion Zone have actually thrived and adapted to the irradiated areas. They began creating more antioxidants that are needed to repel free radicals that would normally age the bird into a premature death.
* Chernobyl. That was all the time Chernobyl needed for a runaway reaction to go completely out of control and turn from a problem to a disaster.
* Chernobyl. The evolutionary adaptations that allow these organisms to survive extreme levels of hard radiation are the same adaptations that allow them to survive dessication.

* Chernobyl. The local emergency committee has the city put into lockdown to prevent the spread of 'misinformation', not to protect the people from radiation which is already being carried beyond the city limits. As a result Pripyat is not evacuated until 36 hours after the disaster, and the upper echelons of the Soviet government (not to mention anyone downwind of the Chernobyl plant) are unaware of the true scale of the disaster and the need to take immediate anti-radiation precautions.
* Chernobyl the reaction for a short while when SCRAM (or AZ-5, as the Soviets called it) was initiated due to the graphite tips on the boron control rods. The flaw had been discovered ten years previously, but Soviet authorities clamped down on the knowledge and declared it a state secret, all to avoid looking bad and being forced to fix the problem. Dyatlov was being so reckless when trying to get the test completed specifically because he believed that he always had the AZ-5 failsafe in case something went wrong. So when the reactor started to overload, he ordered the AZ-5 button pushed. All the rods dropped, but the temporarily increased reaction damaged the control rod channels, keeping the graphite tips in perpetual contact with the core, accelerating the reaction. Moments later, the enormous steam pressure blew the steel lid open, and the air the rushed in caused the whole reactor to explode.
* Chernobyl. This attitude not only creates even more needless victims of the incident than if the situation had been treated with the necessary seriousness, but ultimately drives the population of the USSR against the government and contributes to the fall of the Soviet regime.
* Chernobyl to assess the damage after an explosion at the reactor. When he gets there and figures out exactly what the problem was, the mission changes to 'desperately attempt to contain the flood of radioactive contamination before the entirety of Europe becomes uninhabitable'.
* Chernobyl, two of the old Soviet Lunokhod lunar rovers are taken out of mothballs and re-purposed as remote-controlled bulldozers (their design already being radiation-hardened in order to survive in space) and are used to help clear the debris on the roof of the reactor building after the explosion.
* Chernobyl version of a Cosmic Horror Story. The show is a bleak five-episode miniseries dramatizing the worst nuclear accident in history, and a major theme is the lack of control humans have over the imaginably powerful and destructive forces of nuclear energy and radiation. Characters scramble to try and contain the accident as it threatens to bring about the deaths of millions of people in Europe while incomprehensible horrors erupt around them and kill hundreds, if not thousands of their comrades. The environment is left forever altered, with the half-life of some of the dangerous elements released by the accident being tens of thousands of years long. If you were to go over the criteria atop this page, the only one you would firmly be able to answer 'no' to is the literal indescribable nature of the disaster.
* Chernobyl, when he directly confronts Charkov (a high-ranking KGB member) to release Khomyuk from custody, despite Scherbina trying to be diplomatic about it. This actually saves Legasov and gets Khomyuk released; Legasov's performance was so bad that he came off as too much of a "naive idiot" (in Scherbina's words) to be a threat.
* Chernobyl where the first responders' uniforms were dumped is so radioactive that simply walking into it without proper protection will significantly increase your chances of developing cancer.
* Chernobyl which opens with the distant flash of the explosion seen through the window of a distant apartment, then the building shakes from the shockwave, then we cut to events in the reactor control room.
* Cherokee Hair Tampons had a commercial advertising "natural tampons" made from "real Cherokee hair".
* Cherri Bomb has one large red cyclops eye and is a violent psychopathic anarchist.
* Cherry 2000 executive for a cable television station, and his swanky apartment is very cassette futuristic.

* Cherry 2000 shoot your captors while suspended in midair, deactivate the wrecking crane and safely land in the spillway, cut your car loose from the flimsy rope... works every time. This is apparently the "usual way" to get in. May cause engine trouble to your Mustang after repeated journeys through the spillway.
* Cherry 2000: Subverted, intentionally or otherwise, when a gang of wasteland marauders pushes a captured van off a cliff into a deep pit. The mangled van crunches to earth, the camera lingers, and... nothing happens. Perhaps the FX crew's explosives failed to detonate?
* Cherry 2000, the Cherry 2000. When the robot is damaged beyond repair, he ends up hiring a tracker, Edith "E" Johnson, to go into the restricted Zone 7 with him to find a replacement body/chassis. In the end, while escaping from Lester's gang, he finds the robot's personality to be too artificial and he returns to rescue Edith and dump Cherry.
* Cherry 2000. Unfortunately she short-circuits at the beginning of the movie, setting off the plot as the owner goes looking for replacement parts rather than buy a new sexbot, as he's fallen in love with her.
* Cherry #9 (actually titled "The Phantom Hitchhiker"). This being a Cherry story, she has sex with the truck driver before disappearing.
* Cherry Ames, a little boy shows Cherry his stuffed panda. She pities him, because he had asked for a "teddy bear", and his grandmother had given him a panda, which "isn't even a bear." Since the 1940's, during which the book was written, DNA tests have proven that pandas are in fact bears.
* Cherry Ames, the heroine does this, causing her mother to jokingly remark, "Shocking behavior for a graduate nurse!" Cherry says her brother Charlie used to do it without using his hands.
* Cherry Blossom Girl: A character whose appearance, name, personality or whatever make references to cherry blossoms.
* Cherry blossoms are pointed out to be the motif behind the emblem of the
* Cherry Blossoms: Japanese cherry blossoms are used to symbolize love and romance.
* Cherrybomb) was English and his love interest (Kimberly Nixon) was Welsh, and yet they were required to put on strong Irish accents for their roles.
* Cherry Chocolate Rain, which he did as an advert for Dr. Pepper's Cherry Chocolate flavoured soda.
* Cherry Comics #12, where Cherry starts to undo the zipper on her boyfriend's pants so that she can perform fellatio on him. All of the sudden, a male voice yells "CUT!" and the panel pans out to show Cherry and her friend on a set and surrounded by a film crew. The director states that there has been a couple of script changes, much to Cherry's confusion.
* Cherry Comics, Cherry and Ellie have sex with a vampire, a mummy and a ghost.
* Cherry Comics: Cherry wears one in her role as Sgt. Cherry in "Sgt. Cherry and her Squealing Commandos".
* Cherry Comics feature Cherry or one of her friends having sex with a teacher.
* Cherry Comics: In one story, the characters of a soap opera come out of the television to have sex with Cherry.
* Cherry Comics, Lola's plan for seducing the hot science teacher involved using a subliminal seduction tape.
* Cherry Comics: pool cleaner, delivery guy, washing machine repairman...
* Cherry Comics. She ends up derezzing the video game's main character by having sex with him.
* Cherry Comics story "Cherry Meets Rambone", Rambone and Captain Guts wander off and leave Cherry staked out naked on the ground. She even calls after them to no avail.
* Cherry Falls: After Sandy doubts boys are as clueless at sex as Cindy claims, the scene cuts to Ben and his friends in their van, debating how many holes a vagina has.
* Cherry Falls: After the fall fails to do the killer in, Deputy Mina comes to the rescue with two handguns.
* Cherry Falls: The killer has all sorts of knives, including ballistic knives where the blade can be fired out of the handle.

* Cherry Falls, though mainly out of virtue of being the main target and taking the fight to the killer, as many other female characters (Sandy, Cindy, Sharon, Heather, Jan and Deputy Mina) all survive as well.
* Cherry Falls: Timmy's corpse in the locker, which falls on top of Jody when she opens it.
* Cherry has sometimes been billed as Che Li in Ice Ribbon, Neo Women's Wrestling and
* Cherry Hill Park". She "sure was fun down at Cherry Hill Park, playin' games with everyone 'til way after dark".
* Cherry Jam when she meets Strawberry for the first time. Since she was invited by Strawberry's friends as a surprise, she introduces herself as Buttercup, after spying some nearby flowers.
* Cherry Juice brother and sister have to share a room when their grandmother moves into the house after suffering a hip injury.
* Cherry Juice features a boy and girl of the same age becoming step-siblings as young children, who eventually grow to have the hots for each other as teenagers. Their relationship is supported by both the girl's friends and her grandmother, who does everything she can to get the two together.
* Cherry Poppin' Daddies recorded music in practically every genre, but their main one was primarily ska. Yet they are labeled as a swing band, thanks to "Zoot Suit Riot". To be fair, "Zoot Suit Riot" was also the title track to a compilation specifically meant to highlight their swing material, which then became their most commercially successful album. Even before "Zoot Suit Riot" became a hit, the swing revival caused them to pick up a new fanbase, so their manager suggested they put together a compilation featuring just the swing songs from their previous albums.
* Cherry Poppin' Daddies Top 40 Mainstream, and hit the top 20 of the Modern Rock and Adult Top 40 charts. It just barely missed the top 40 of the Hot 100, however.
* Cherry Poptart #3 had a parody titled "Oklahoma Smith and the Lost Temple of the Doomed Raiders". After surviving countless dangers to recover the secret idol, Smith exits the underground labyrinth only to find himself in downtown Puerto Vallarta, where identical "idols" are on sale in a souvenir shop. He comments "I'm gonna' kill the guy who sold me that map!"
* Cherry Sisters did a notoriously bad vaudeville routine during the late 1890s. Throwing of eggs, tomatoes &etc. was so common that they eventually had to erect a wire mesh screen during performances.
* Cherry Tapping: Because "tap" can be a slang for sex, and breaking the hymen (which can happen during sex) can be called "popping the cherry", this can sound sexual. Its actual definition, however, is when somebody is defeated with a weak attack to embarrass them.
* Cherry Tapping: Someone is defeated by a weak attack to humiliate them.
* Cherry"). This being a Cherry story, she has sex with the truck driver before disappearing.
* Cherry Tree High Comedy Club is good at several sports, including hockey. Talking to her about sports makes it much easier for Miley to recruit her into the comedy club, as it's one of Vivian's favorite conversation subjects.
* Cherry Tree High Comedy Club: Miley Verisse. Most of her peers think of her as a weirdo because she's passionate about stand-up comedy.
* Cherry Wilder the protagonist takes part in an air race where one of the other aircraft crashes and the pilot is killed; there is a short story in which the engineer who set up the race visits the pilot's family and we learn more about the pilot (and the engineer).
* Cherry Wilder trilogy concerns the first contact between the Moruians of Torin and visitors from the alien planet Earth, told almost entirely from the viewpoint of the Moruians.
* Cherry Wilder trilogy is an account written for posterity by that novel's protagonist. The narrator/protagonist of the second novel mentions that she's not much of a storyteller and that she's only doing it because she was asked to specially by the narrator/protagonist of the first novel, who'd missed some important events that she'd been present for.

* Cher's biological father left the family when she was ten months old, and she considers her mother's second husband to be her real father.
* Cher's full name was Cherylinn Sarkisian until she legally changed it to her single name.
* Cher song "Gypsies, Tramps, and Thieves" calls people out on this in the chorus:
* Cher that to this day, they have never allowed a music act to shoot a video on one of their ships.
* cherub and a cherub; and every cherub had two faces; So that the face of a man was toward the palm tree on the one side, and the face of a young lion toward the palm tree on the other side: it was made through all the house round about."
* CHERUB, has James and his friends sent to infiltrate an American maximum security prison.
* Cherubic Choir: A kids' choir signifies victory or that the danger is over.
* Cherubim, which are a type of alien species that grow large wings in adulthood. They are extreme loners, often never meeting another of their kind except to mate, and their idea of romantic attraction is Belligerent Sexual Tension
* CHERUB Series. After a few days of it most of the other CHERUBs on campus at the time help her finish it, and the director lets it slide at it's felt she's suffered enough.
* CHERUB Series agent Bruce Norris once joked that he wanted to make business cards to leave in the mouths of the people he knocked out.
* CHERUB Series book "Divine Madness" has James try to envision himself "as the plucky underdog in a kids movie" during a Martial Arts exercise. Needless to say, he's one of the "losers" when it's all over.
* CHERUB Series has every member of the titular organization be trained in martial arts, justified in that it's a spy school and the pupils are required to know this for missions.
* CHERUB Series. If it wasn't for references to his partner Gareth and their adopted daughter, it'd be impossible to tell he was gay.
* CHERUB Series kill her rabbit, then asks for a knife to gut it while discussing curing the pelt to make a hat.
* CHERUB Series to various characters, by various characters. James and Kerry seem to particularly enjoy it.
* CHERUB Series twins are rarely perfectly identical is acknowledged, and a makeup artist is used to make the two boys look even more alike.
* CHERUB Series whose number #2 on the FBI's most wanted list. After escaping from an abusive Arizona military boarding school, he went to a nearby liquor store and requested vodka from the clerk behind the counter. When the clerk asked for proof of age, Curtis shot the clerk dead with a handgun and heavily drank the vodka. On the way out, Curtis spotted a man with a Jaguar car. He then killed both the driver and his girlfriend and took the Jaguar and drove more than twenty miles at a dangerous high speed while slugging down a mix of vodka and coke at the same time before his arrest. Following revealing what he had been through to his lawyers, they managed to arrange for him to be sent a mental health facility.
* Cher, which Cher cited was the final straw that broke their marriage.
* Cheryl/Alessa, has her hair dyed blond as part of her disguise to avoid the titular town's cult. Her father probably does this from the time she's young, and she apparently continues doing it when she gets older. She is a teenager, however, so it might have been a style choice.
* Cheryl and Krieger dated for a while until she left him because he was too weak to strangle her and the "robot choke arm" just wasn't the same.
* Cheryl Blossom and Toni Topaz have only ever been interested in boys in the comics-here they're interested in each other.
* Cheryl gets aroused by emotional and physical violence, is extremely aggressive, constantly tries to call attention to herself, and according to her brother, her pyromania has been a problem since she was a little girl.
* Cheryl Ladd), which led him to volunteering for some dangerous missions just so he could see her.
* Cheryl Smith had a sizable co-starring role in the original longer cut of

* Cheryl was regularly sexually abused by her grandfather as a child, and when she tells the team that he would use the Tunt family mansion's tunnels at night to "check on the children,"
* Chesapeake, neither ship firing until they were at point-blank range. After the battle, there were more than 200 killed and wounded, one of the bloodiest ship-to-ship battles of the age. Captain Broke was badly wounded and would never command another ship. The American Captain Lawrence was killed in action, and buried with full military honors by his enemies, with 6 Royal Navy officers as his pallbearers.
* Cheshire and Artemis's mother, Huntress was one in the past, before a
* Cheshire Cat Grin". (To be fair, he only bent it a bit and the sound effect is just extra snappy — the man gets up soon after.)
* Cheshire Crossing casually informs her that her two roommates have the same talent, she outright scoffs at the very idea. Boy, is she wrong...
* Cheshire Crossing plays this straight with Dorothy's ruby slippers: The teleportation power was all hers. However, the slippers do possess some intrinsic power: the power to mimic the abilities of the last person to wear them.
* Cheshire Crossing witches are vulnerable to water (while in Oz, at least)—she was keeping the water on hand should Glinda the Good Witch launch a surprise attack. (In a later scene, the bucket is labeled "In case of Glinda".) She just never expected her enemy to bully a little girl into doing the deed.
* Cheshire is a sneaky and deadly assassin who works for the Light. After
* Cheshire wears a cat mask with a permanent scary grin during her brief but memorable appearance in the series. She made enough of an impression that the
* Chesney also released a cover of "Down the Road" (which Mac originally recorded on that album and later included on
* Chespirito and depended more on adult humor, a lot of jokes rely on Maruja's promiscuous past. María Antonieta de las Nieves, who played her and the more innocent character of Chilindrina has stated that she hated the character.
* Chespirito, especially regarding his wife Chimoltrufia and his best friend and criminal accomplice Chompiras, in the case of the latter Botija would normally punish his stupidity with a slap in the face. Should be noticed that of the three, Botija is by far the most intelligent, not only is he shown to know a lot of culture and history, in later seasons, once they left the life of crime and became law-abiding citizens working in a hotel, Botija is always shown reading. Of course, considering that both Chompiras and Chimoltrufia are dumber than average… It is also explained in-universe that Botija is not from the same poor and humble origins as Chimoltrufia and Chompiras, instead, coming from a high middle-class household, which may explain his more cultured persona.
* Chespirito had its 90's seasons dubbed in Brazilian Portuguese by the BKS and Parisi Video studios. These were then redubbed in 2001 by Gota Mágica.
* Chespirito had several instances of this in pretty much every work. Some notable instances:
* Chespirito is that the mosquito is a trickster: once the man hits the ground outside, the mosquito buzzes off "neener, neener".
* Chespirito once her name is revealed to be Zoila Expectación del Macho (meaning I am the Male's Expectation).
* Chespirito tended to recycle scripts every two or three years, sometimes with minor variations in the setting or characters (especially during María Antonieta de las Nieves's leave of absence, or Ramón Valdés and Carlos Villagrán leaving the show), though that certainly didn't stop Chespirito making nearly identical episodes, or even recycling a script once a year (or even twice a year sometimes).
* Chespirito whenever they were near the pool. Notably in the final scene of the latter, as it follows a quick succession: first, it's kicked off by Quico pushing la Chilindrina into the water (for mocking him before); Don Ramón pushes Quico in retaliation; Professor Jirafales falls in while trying to get Quico out; Mr. Barriga tries to help the professor out only to get pulled in himself; then while Don Ramón argues with Doña Florinda, the latter gets pushed in by Doña Cleotilde; and while Don Ramón's busy laughing at her, el

Chavo throws a coconut at his head by accident and falls in. Doña Cleotilde then goes "Stand back! I'll save him!" and jumps in herself.
* Chespirito who does it the most often, usually followed by a "Wonder that they meant by that?" in response to somebody insulting him.
* Chess: Almost the only option if you castled (pun for once not intended) to different sides.
* Chess always ends with a Bolivian Army Ending. The game ends when one player moves a piece into a position that makes it impossible for the other player's king to escape, even though it would still take one more move by each player to actually capture the king.
* Chess, American chess player Freddie Trumper sees his opponent this way.
* Chess, Anatoly defects to the West after winning the match against Freddy. His wife implores him to reconsider in the second act.
* Chess, and other ancient board games—they have the themes of "warfare", "strategy", and "outwitting your opponent", but no actual plot to speak of.
* chess annotations use B for Bishop, R for Rook, Q for Queen, K for King, and N for kNight. The more proper abbreviation, Kn, is too easy to confuse for KN, which stands for "King's Knight."
* Chess boxing is a sport designed for genius bruisers. The players alternate between rounds of boxing and rounds of speed chess. You can win by a knockout, a checkmate, judges' decision or by your opponent running out of time in the chess game.
* Chess Boxing, the player who scores a checkmate during a chess round automatically wins no matter how they've been doing in the boxing rounds. Conversely, a player who scores a Knockout or Technical Knockout in the boxing rounds wins the match no matter how they've been doing in the chess rounds. And if neither player wins at chess by the time the allotted rounds are up, the winner is determined strictly by boxing rules.
* chess, but it's considered good etiquette over dragging out an impending defeat; at professional levels, resignations are far more common than playing all the way to checkmate.
* Chess by using one to defend the other, or use a third piece to defend them both. Most of the time though, they have to sacrifice the less valuable one.
* Chess champion Garri Kasparov has recounted how he once met the former World Champions Tigran Petrosjan and Michail Tal, both of whom were marked by serious illness, and expressed his awe at being in the presence of "two living legends":
* Chess Champion Magnus Carlsen as guest artists. If you read the YouTube comments — most of which aren't even in Norwegian — it's clear that most of the listeners are only there to hear Carlsen rap.
* Chess Champion Magnus Carlsen as guest artists. Most of the YouTube commenters — many of whom don't even speak Norwegian — admit that they're only there to hear Carlsen rap.
* chess championship in 1972. Pity Bobby was insane and Spassky was not a serious Communist Party member. (Unlike Anatoly Karpov, who took over after Bobby went into hiding.)
* chess champions were described as "Russian," due to their countries being a part of the Soviet Union, even though they were:
* Chess, each King could move like the Horse (=Knight) exactly once — after that the horse was apparently exhausted.
* Chess, especially Broadway) can be inconsistent in general. Some notable examples include:
* Chess, Florence's father disappeared during the 1956 Budapest uprising.
* Chess: Florence, who's the lead and working for the Americans, runs up against Anatoly, the Russian chess player.
* Chess for either Florence or Svetlana. Plus Molokov and Svetlana's new songs in the Stockholm version.
* Chess. For example, in the 2008 concert production, Soviets and emigres wear black, Westerners wear white, loose cannons wear both. In that show,
* chess game played between over-competitive nerds is always done incorrectly.

* Chess. Getting a Pawn all the way to the opposite end of the board allows you to ask for one back (or declare it a second Queen, depending on rulesets).
* Chess Grand Master Garry Kasparov was in a foul mood after finally being defeated by the computer, Deep Blue. He claimed that IBM had a team of Chess Masters aiding the computer. IBM declined Kasparov a rematch due to the insinuations.
* Chess Grandmaster Ivan Cheparinov once refused a game-starting handshake with fellow GM Nigel Short.
* Chess grandmasters, specially world champions. Small example: Jose Raul Capablanca learned to play chess at the age of 4 and had beaten the Cuban national champion by the age of 12!
* Chess had Mexican-American David Bedella performing the role of a Russian, Molokov.
* Chess has had a few names over the years—Constantine Stannos (Broadway), Jean Jacques Van Boren (Swedish), Kobe Obe (US tour). Most adaptations only refer to the character as "The Arbiter," and the ones that name him generally just call him by his title.
* Chess has many openings from Russian players, among them the Petroff/Petrov/Russian defense (1. e4 e5 2. Nf3 Nf6), and the Tchigorin/Chigorin defense (1. d4 d5 2. c4 Nc6).
* Chess, he frequently becomes a key fighting piece in the endgame. And the queen is the most powerful piece on the board and is in the thick of things throughout the game.
* Chessie the Autograph Hound will go through any lengths to get the autographs of
* Chess if any did at all, so new variations of the story continue to pop up.
* Chess, if one side only has a king, there are quite a few combinations of pieces that can force checkmate. However, if their opponent doesn't have enough pieces, or just makes a mistake, the losing side can sometimes maneuver into a stalemate. Like other draws, a stalemate is counted as half a win, and drawing a much stronger opponent is considered a great accomplishment.
* Chessington World of Adventures in London was originally a small side-attraction to Chessington Zoo. The zoo is still there, but now it's a side-attraction to the theme park.
* Chess. In particular, the chorus of "I Know Him So Well" was based on the chorus of "I Am An A" and the chorus of "Anthem" used the chord structures from the guitar solo from "Our Last Summer".
* Chess in the 1956 Budapest Revolution, is brought up many times, in most versions eventually becoming a an important part of the plot when it's revealed that he may, in fact, be alive in a prison in Russia... but Florence will have to give up her Soviet defector boyfriend if she wants him released. (Meanwhile, her mother is rarely mentioned.)
* Chess, in their handling of a Russian potential defector. The lyrics of "Embassy Lament" really say it all.
* Chess is pretty much the same thing — you must capture an opponent's piece if able and you win the game by losing all your pieces.
* Chess. It all culminates in “The Deal (No Deal)”, a song that’s essentially just ten minutes of Walter and Molokov manipulating the entire cast.
* Chess. Its first few productions required revisions to allow it to continue to make sense in "the present", and after 1991, only five years after it originally opened, there wasn't much choice but to treat it as a period piece instead.
* Chess, it's just a bluff. Chess, in turn, comes from the Persian Shatranj (below), which in turn came from the Indian Chaturanga.
* chess knight), has elements of this. Her intelligence and reserve make her a natural counterbalance to the berserker war deity Garagos.
* Chessman Of Mars, the hero infiltrates the game of the title, where the pieces are living swordsmen, and fights; he wins and leads a revolt.
* Chessman Of Mars: the hero infiltrates the game of the title, where the pieces are living swordsmen, and fights; he wins and leads a revolt.
* Chessmaster 2000 game has a key that puts up a fake screen of a "real estate investment analysis".

* Chessmaster by her explaining that "everything you need to know to make people do anything is in this book".
* Chessmaster. He makes a lot of inspiring speeches (when his assistants moan about how well Kira, Mello, and the mafia seem to be doing), but some that are clearly insincere.
* Chess Master; he manipulates absolutely everybody, and is more often on nobody's side than on any particular side.
* Chessmaster in both versions, but his scenes with Arya in Harrenhal in the show bring out a softer and paternal side that's not present in the books. Also, Book! Tywin is an all-out misogynist who locks Cersei out of the Small Council because she's a woman. In the show he's still dismissive of her, but when she accuses him of sexism, he says he distrusts her not because she's a woman, but because she's a fool.
* Chessmaster named Margaret who works as a secretary (which may have been the whole point, as the sort of people he usually meets through his work aren't really the kind anyone sane would want to start a family with).
* Chess Master nature. This allows him to reap the benefits, while everyone including Vimes himself thinks it was his idea, and thus all the power players blame Vimes for the trouble (which, to be honest, he probably enjoys more than their praise).
* Chessmaster Sidekick — A sidekick who is actually manipulating events.
* chess, masters playing casual games against weaker players will often "give odds", which requires them to start without a certain number of pieces.
* chessmaster than a robot buddy. His miniature counterpart on the other hand...
* Chessmaster was because he fully expected her to instantly backstab him if he didn't. Wuya acknowledges it was probably a good idea on his part.
* Chess — meaning if another piece aside from another Knight threatens it, the Knight has no way to fight back aside from fleeing.
* Chessmen of Mars books. Gahan, the Jed (Prince) of Gathol, first shows up to court Tara in a gloriously bejeweled outfit worthy of his wealth and status. She is unimpressed. When next they meet, he is in the garb of an ordinary warrior. She doesn't recognize him and falls head over heels.
* Chessmen Of Mars is a creepy old taxidermist who likes to reminisce about his past as a ladies' man and tries to hit on Princess Tara. However, he later turns out to have an honorable side, when he aids Gahan in his efforts to rescue Tara because he doesn't like the cowardly manner in which the Jeddak is trying to woo her.
* Chessmen of Mars). Later, Gahan briefly convinces himself that Tara hates him when he is left prisoner without her aid.
* Chessmen of Mars, with each taking of a piece being a duel to the death. Captives, criminals and slaves can win their freedom by winning enough games.
* Chess method. If you can't see the point of the sacrifice, or even if you do see the point but don't think it will be all that effective, the recommended course of action is to accept it and continue playing natural moves, daring the opponent to show you their idea. Sometimes this works and the sacrifice fails. When it succeeds, however, you end up with this trope.
* Chess, most people will try to learn the flashy openings and glitzy combo attacks, but the tactics of piece exchange should come in second place to the logistic considerations of controlling board space. It sounds boring, but it pays to know when to crack open the defense of a turtling player or to suffocate an aggressive attacker with a locked pawn center.
* chess motif, and both the anime and visual novels are filled with chess references.
* Chess Motifs being in effect; the Felt (including Doc Scratch and Lord English) all have the same shade of green.
* Chess names a wide range of studied openings and gambits that run in fairly set patterns, frequently using the names of prominent players, key pieces, or locations in what is not necessarily intuitive to any outside the field of study. Talk to a chess player about a Ruy Lopez/Spanish Opening, Sicilian Defence, Two Knights

Defence, or the older Giuoco Piano, and they will probably understand, predicated on the obscurity of the referenced opening.
* chessNowdays, the advent of powerful chess computers has made adjournments a thing of the past – there would be no way to stop either player from firing up the latest chess software and just memorizing its recommendations. Instead, modern chess competitions simply speed up the time limits so that adjournments aren't necessary.
* Chess Piece fit this rather well. Danny's cousins both seem to want to boink him. One is much younger and the other has tried poisoning him.
* Chess Piece, had a couple of contests, the winners of which would have their OCs featured. Said OCs only appeared in one page and got two or three lines, but still.
* chess players James M. and Chantelle Foster look very similar to each other and to both parents.
* Chess: Resigning before you're put into checkmate. Often symbolized by deliberately knocking over your own king's piece, though this is not required. Both players may also choose to agree to a draw if they realize that neither of them can reasonably checkmate the other. Draws can also occur under the threefold repetition rule in which both players end up in the same position three times.
* Chess, so as to understand every available nuance of both how you played then, and potentially will now.
* Chess, still use the old Elephant piece, though, at least in Xiangqi, their offensive use is limited by their not being able to cross the river in the middle of the board. Some editions of chess also design the Rook (castle) unit to be an elephant with a howdah on its back.
* Chess, the concept of prophylaxis could be described as this. Rather than playing to improve your attacking chances, a prophylactic move is one that limits the opponent's opportunities. Former world champion Tigran Petrosian is probably the best example; while he had fewer wins than other world champions, he had almost no losses, even going through 1962 without losing a single tournament game.
* ChessThe original Anatoly on the concept album (and the West End production) was Swedish performer Tommy Korberg. His accent is tough to place, sounding somewhere between English (to match the rest of the cast) and his native Swedish. Bjorn Skifs, the original Arbiter, is also Swedish, but his character's nationality is made intentionally ambiguous—pretty much the only thing we can say for certain is that he isn't American or Russian.
* Chess, the song "One Night in Bangkok", plays on different meanings of "mate" and "queen" while comparing the chess championship with the sex tourism that also happens in the city.
* Chess, though his ace reputation is also notoriously short-tempered and cocky. Still, he drove himself to be a chess champion due to his rather hellish childhood and doesn't want anyone seeing his weakness. The audience only finds out during "Pity the Child".
* Chess to the other player because it suggests that you don't see your opponent as skilled enough to warrant bringing the more powerful piece back. However sometimes underpromotions are strategically valid due to the complex nature of the game; knights are often valid picks for their atypical movement.
* chess variant allows pieces that capture other pieces to use the captured piece's move once.
* Chess, via taking out the enemy king. Taking out the enemy pieces doesn't matter, although it makes life easier on you.
* Chess was in full swing and the impending fall of the Soviet Union was already visible on the horizon. As a result, vast swathes of the story — and several of the songs — had to be rewritten to accommodate the new political reality. (For instance: in one of the dropped songs, the civil servants of the British embassy complained that so many Russians defecting to the West "makes you wonder what they built the Berlin wall for"; in a newly written song, a CIA agent and a KGB agent agree to cooperate to the point where "the Berlin wall becomes a backyard fence.") Modern revivals of the show seem to be getting round this by more-or-less sticking to the plot of the album, and simply making the whole thing an early-80s

period piece.
* Chess, which focus on minimalism and have a penchant for elegance through simplicity in their designs.
* Chess, who nobody would give the time of day if he weren't every bit as good as he thinks he is at chess.
* Chess With A Dragon, humans are one of only a dozen mammalian races in a galaxy dominated by thousands of reptilian and invertebrate civilizations. The only races that don't think we're unspeakably disgusting are the ones that think mammals like us belong on a plate.
* Chess With A Dragon newly-spaceworthy species gets conned into the same position, and it's become routine for carnivorous races at the top of the galactic pyramid-scheme to eat whichever species are indentured to them.
* Chess with a Dragon, some insectoid aliens are shown engaged in some sort of gambling game. The biggest loser of the evening is said to be dangerously close to "gracing the table", i.e. becoming dinner for the winners.
* Chess with Death: Challenging the Grim Reaper in a game or contest so that you may have a chance of cheating death.
* Chess with Death: Some mythical Greek characters challenge gods to contests and end up dead or otherwise badly off. e.g. Marsyas the Satyr, Arachne (in Ovid and Virgil), and Thamyris in Apollodorus and Asklepiades.
* Chess with Death so that you get to live a little longer in the event that you win.
* Chess wrote while having an affair with Elaine Paige, starring Elaine Paige as a woman with whom a famous chess player has an affair.
* Chest Burster: A creature that hatches through another being's stomach.
* Chest Burster: An alien parasite leaves its host's (usually a human) body by bursting through their chest.
* Chest Burster are two of the most widely referenced and parodied moments in modern film. Even if you haven't seen the movies, you know those scenes, or at the very least the line:
* Chest Burster the newborn Set, god of deserts and violence and chaos, tears his way out of his mother Nut's womb.
* Chestburster, with some of host's DNA (eg; Chestburster from dog becomes quadripedal drone instead of bipedal drone).
* Chester A. Bum had to happen to make him homeless and keep him that way for so long.
* Chester A. Bum, he points out this trope and then proceeds to shoot poor Sailor Pluto.
* Chester A. Bum, they all suffer from The Curse of the Missing Shirt.
* Chester and Spike as Villain Protagonists target Sylvester who is in one of his few "pure victim roles". The fact that Spike
* Chester Bennington, and in part uses one of his last singles, "Heavy."
* Chester Cheetah: Too Cool to Fool, but he doesn't seem like the fastest animal on land in either game.
* Chesterfield cigarettes, along with several other such claims that went so far as to have specific numbers attached to them, a type of proofiness he refers to as "Potemkin numbers."
* Chester McBadbat, one of Timmy''s best friends. Chester is a poor kid who, unlike Timmy, is happy despite of it and is shown to be extremely poor at school.
* Chester McTech is younger than most of the cast, but by how much is never specified.
* Chest Insignia: the Brazilian and Argentinian shields, the German eagle, the French rooster, the English three lions, the Dutch single lion...
* Chest Monster: A monster that is disguised as a box or chest, luring in victims under the pretense of containing treasure or other valuable items.
* Chest Monster: A predatory creature that disguises itself as a seemingly innocuous object.
* Chest Monster: A video game enemy disguised as a treasure chest to lure players into approaching them.

* Chest of Medals: Character in the military whose uniform features an improbable number of medals.
* Chet and Bernie mystery series is narrated by Chet, the dog belonging to Bernie, a private detective. Chet understand more English than a real dog (probably), but the author has gone to some lengths to describe things realistically from a dog's perspective, including senses (smell being major of course), intellect ("We've watched this movie more times than I can count, which in my case is Two."), and memory ("I saw I had been digging a hole," Chet remarks, when he had told us about starting it two paragraphs back. Then he got distracted).
* Chet Baker: cool jazz trumpeter, famously handsome as a young man, who was also a lovely singer; beloved for his intimate way with a ballad but also a notorious junkie whose addiction to heroin seriously messed with his career for most of his life.
* Chet in The Escapist's new series "Game Dogs". According to his employee dossier, he's known for two things: his lacking work ethic and the attendant reprimands for tardiness and missed deadlines, and the unparalleled brilliance of his work and problem solving when he does produce something. As only the pilot has actually been aired, it remains to be seen whether or not this will turn out to be an
* chetvert (an old Russian style vodka bottle, literally translated as "quarter", as in one quarter of a bucket, which at the time was 12.3 litres or 3.25 US gallons) holds about three liters of the stuff, equal to six normal 0.5L vodka bottles (or five oldschool 0.612L ones). Vodka is no longer bottled in chetverts, and surviving bottles are used mostly for moonshine, which is even stronger stuff.
* Cheval de frise is a larger anti-cavalry obstacle consisting of a rack of spikes mounted in a portable frame that can be set in place and anchored.
* Chevalier as well. He's one of the most morally upright characters in the setting, and for bonus points he actually wears shining armor.
* Chevalier d'Eon, 18th Century French spy and diplomat, who presented as male for most of his life, until his political enemies began to circulate rumors that he was secretly a woman. Rather than dispute the rumor, d'Eon inexplicably elected instead to live openly as a woman for the remainder of their life. A post-mortem examination revealed that d'Eon was biologically male (albeit with some mildly feminine characteristics). Theories that they may have been transgender or intersex still abound.
* Chevalier de Villiers entered high society under the tutelage of French philosopher and patron of the arts
* CHEVALIER is a romantic fantasy adventure that features a cast of Funny Animals.
* Chevalier vs. Rogue against the vandals or outlaws, or the cowboys against the Indians.
* chevals, have been subjected to radical brain-hacking processes related to Voudoun ideas of spiritual possession. They can trigger secondary personalities with advanced skills and even borderline-superhuman abilities. The result looks much like possession, though the Project would insist that it's no such thing.
* Chev Chelios gets "a steel hardon" after taking too much epinephrine in
* Chevrolet runs a TV commercial where it shows all of the cars it makes that get better EPA estimated mileage than the equivalent Honda. At the end of the commercial, the announcer says, "There's one thing Honda makes that we can't compete with. It's even self-propelled," and the camera pans down to show a Honda lawnmower.
* Chevrolet Vega by the magazines which published the glowing reviews.
* Chevy Chase as his favourite film of his own because it allowed him to be himself.
* Chevy Chase behind the scenes over it. He ended up quitting the show in November 2012 with only two episodes left of the shortened fourth season to film. However, while he was vocal about what he thought was the poor quality of the show, he was willing to return to film a brief cameo appearance in Season 5, indicating that the feud between himself and Harmon has largely been resolved or was overstated.
* Chevy Chase gone, some fans began questioning how much longer the show could go

on, and to reflect that, Annie asks if Greendale is even worth saving now that Troy and Pierce are both gone.
* Chevy Chase includes the following exchange when the two hear a strange loud noise:
* Chevy Chase's character Pierce does this almost once an episode in
* Chevy Chase the protagonist is desperately trying to contact the sheriff's department on the phone (because there is a dead body in his back yard). He only has a normal phone, but apparently all phones in this region are pay-phones and the operator refuses to connect him unless he puts a couple of dimes into the nonexistant coin slot.
* Chevy Chase was hospitalized after an injury sustained during one of his pratfalls. Since that was a common running gag used to start the show, he called from his hospital bed and had Gilda Radner move the phone and push it over the desk, thereby completing a long-distance pratfall.
* Chevy Chase, whose selfishness, bordering on psychopathic, wreaks havoc on the show.
* Chevy Colorado, after being discontinued for years, has returned to the North American market, but it's based off of a Thailand-Brazilian GM project that had been released three years before. The Ford Ranger is also from a similar background, only being available to this market
* Chevy's "Real People Not Actors" have been documented to have been done with actors posing as unrealistic focus group people (and Chevy spokesperson Potsch Boyd has documented his appearances in the ads as being part of his acting career) - Chevy's excuse is that, since the ads are filmed in the Los Angeles area, many of the focus group people have acting careers and that is a pure coincidence... despite the fact that some of said "real people" have listed their appearances in the ads on their acting resumes.
* Chew and a bit of a mainstream comic hit, with an Asian American protagonist.
* Chew and so insists on involving himself in the illegal underground trading of poultry products).
* Chew Applebee (to get Applebee off their backs) and later with his USDA boss.
* Chewbacca Defense get the bar association to hate you and have at least a few moments that are so ridiculous, are in such bad faith, and fly so flagrantly in the face of basic human decency and professional ethics that anything less would compromise the integrity of the profession).
* Chewbacca Defense— "Winning" a debate through failing at logic.
* Chewbacca DefenseYou pretend you can win the argument if you get the other guy to shut up by any means.
* Chewbacca has his bowcaster, a laser crossbow that makes a subversion of the
* Chewbacca is already attracting stares just by being a Wookiee on an Imperial world, so just to ensure that all eyes are on him, Han suggests he
* Chewbacca is pretty much Han Solo's Morality Pet. If he weren't so good at guilting his buddy, the
* Chewbacca is probably the most well-known example, though he does solve the pocket problem by wearing a
* Chewbacca owes Han Solo a life debt, because Han saved his life once, as depicted in ''
* Chewbacca's dad Itchy is clearly cracking one off to Diahann Caroll during
* Chewbacca, they show a scene without the growling dubbed in; it's the one where they have a strange sort of conversation with Obi-Wan Kenobi. Chewie declares, "That old man's mad." "You said it, Chewie."
* Chew has a law enforcement division on par with the FBI (it's set in a dystopian future where chicken is a controlled substance). Later on, we bump into buxom female cyborg ninjas working for the USDA, and alien star children at NASA.
* Chew, he can see Toni effectively talking to him. Toni's memories are able to respond to Tony's questions and comments with uncanny accuracy which is largely played for laughs, but can be chalked up to a combination of her precognition (having bitten her brother several times previously) and knowing her own brother well enough to predict his responses.

* Chewing gum is Serious Business in this universe. Calvin is an enthusiastic reader of a magazine called "Chewing" which is dedicated to it, and informs an incredulous Hobbes that as many as twelve such publications exist.
* Chewing Gum, the (female) protagonist Tracey has a cousin with the same name who she calls Boy Tracey.
* chewing like old leather, for the lower-quality varieties. They mostly come out in emergency situations and for prisoners, and sometimes as the economical choice on long tours of duty in various space navies and mercenary outfits.
* Chewing the Scenery: A character displays exaggerated and over-the-top behavior.
* chewing you out from the future for messing up history and creating a time paradox.
* Chewin' the Fat in Scotland) to show their disdain for pretentious wank. When his last sentence describes how the bullet ended up in the patient's "tummy", they're a bit disappointed.
* Chewin' the Fat involved a teenager with his parents, who cheerfully announce to anyone they meet that their son has just started masturbating.
* Chewin' the Fat plumber, and ad-libs lines asking why the woman is trying to have sex with him when he's only there to fix the sink.
* Chewin' the Fat where doctors are using defibrillators on a patient to no effect except the usual cliche muscle spasms you would expect. One doctor then suggests "Try his nuts!" at which point they use them on the patient's crotch, which revives him immediately.
* Chewin' the Fat where Ronald, "the second worst actor in the world", lands a movie role as a Puritan villager demanding the burning of an accused witch. As usual he ruins the scene despite having no lines.
* Chew. Naturally, he stole an ice cream truck in order to sell his ice cream to the unsuspecting civilians.
* Chew-Out Fake-Out: A person looks like they're going to rebuke someone for doing something bad, but it then turns out that they're proud of what the person has done.
* Chew-Out Fake-Out: A person looks like they're going to reprimand another person for something they did, but they instead give praise for their actions.
* chew the others out for ousting her out a job after she went through the trouble of relocating, when they ought to know that she'll simply be replaced by someone exactly like her, and they've therefore accomplished nothing. This is partly what spurs Dr. Cox into taking the offer for the chief's job.
* Chew, this drives the plot of the book "Flambe" in which strange writing made of fire appears in the sky. It's up to Tony to stop people doing this.
* Chew, this happens between Agent Colby and his supervisor Appleby. Colby is certainly not happy...especially when he sees the in-laws...
* Chew thrives off this trope. The protagonist is a detective who can determine something or someone's past by taking a bite, which comes in handy- if you're willing to chow down on human remains, or even living people. As you can imagine, things often get dark quickly- but usually hilariously so.
* chew toys (Alice Margatroid, Hong Meiling, Reisen, Youmu...) regardless of whether or not anything in the official works points to such a fate. In Alice's case, the fanon version is almost the complete opposite of the canon version.
* Chex mix (snack mix): Chex is a trademark of General Mills, but some generic snack mixes use chex like cereal pieces.
* Chex Quest is a game whose entire enemy roster are sticky slime creatures that try to cover you in sticky slime to defeat you.
* ChexQuest was probably the coolest thing you EVER got out of a cereal box if you grew up in the 90s.
* Cheyenne Autumn featured cast members from the Navajo Nation. While the lines are subtitled for a serious conversation, they're actually making various ribald and obscene jokes about the director, crew, and various non-Navajo cast members. Navajo theater patrons cracked up.
* Cheyenne Autumn, which took place in Oklahoma, Kansas, Nebraska and Wyoming.
* Cheyenne Cinnamon and her interest in the aforementioned pregnant teen does the

poor girl more harm than good and eventually gets her arrested.
* Cheyenne Cinnamon and the Fabulous Unicorn of Sugar Town Candy Fudge
* Cheyenne Cinnamon and the Fantabulous Unicorn of Sugar Town Candy Fudge
* Cheyenne Mountain fell victim to this, as descendants of the remnants of
* Chez Geek, a high-scoring Nookie card can force other players to discard Sleep cards they've already played.
* Chez Geek, as well as its spinoffs, contains the tongue-in-cheek warning "For adult audiences only. Actual maturity not required."
* Chez Restaurant: Stock restaurant names that generally sound French.
* Chhota Bheem, with its 277 episodes and 40 direct-to-television movies. And that's not factoring in the spinoffs.
* Chhouy Harm, a Cambodian immigrant living in Seattle, attempted to kill her daughter and succeeded in killing her son-in-law and two granddaughters before killing herself.
* Chia Black Dragon take place in 2nd century China, but there also appear Indian Buddhists, ancient Egyptians (in the back story) and a few Christians. It is suggested that the mythologies and afterlives of all four religions (Chinese, Buddhist, Egyptian and Christian) all exist. In addition to Stephen Marley's own original myths and creatures, of course.
* Chia Black Dragon, take place in 2nd century China, but there also appear Indian Buddhists, ancient Egyptians (in the back story) and a few Christians. It is suggested that the mythologies and afterlives of all four religions (Chinese, Buddhist, Egyptian and Christian) all exist. In addition to the Stephen Marley's own original myths and creatures, of course
* Chiai Lung: Has the body of a panther, but with hooves, a human face, and a snake for a tongue.
* Chiaki and Eichi met in the hospital together as kids and became friends, but
* , Chiaki describes taking condoms from the nurse's office as stealing loot from a video game boss.
* Chiaki helps Hajime out her as the accidental culprit of Case 5, and meets her end calmly, giving encouragement to the students before her sentence is carried out.
* Chiaki Konaka's in a future where humanity extinct. They still have to cruise looking for men because it's in their programming.
* Chiaki's fourth free time event, after Hajime catches Chiaki after she trips, Chiaki says "You're pretty hard, Hajime." Following Hajime's flustered reaction, she clarifies that she meant his arms and chest are well-built.
* Chiana, actually. rescue and next episode she's back to kicking butt and taking names.
* Chiana and Jothee sleep together. The following episode D'Argo finds out, which completely destroys his relationship with Jothee and isn't repaired again until the finale miniseries.
* Chi, and her saying "Chi?" at least eight times per episode and you have a serious overdose of cuteness in one lovable character.
* Chiang, for his part, was only nominally allied with some of the warlords. Zhang Xueliang was none too pleased that Chiang preferred to focus attention on his fellow Chinese communists rather than the Japanese invaders, and took him prisoner until he agreed, on paper, to play nice.
* Chiang Kai-shek, despite being an authoritarian military dictator, managed to keep the entire Kuomintang, or Chinese Nationalist Party, united under his rule. This is made more impressive by the fact the KMT was actually more of a non-aligned/centrist political coalition with various bickering wings, ranging from liberal to conservative to traditionalist. In one case, Chiang 'retired' on 10 December 1931 during a particularly stressful period. Within hours, military officers refused to obey the new government, public protests demanded Chiang to come back, the entire government panicked and tax offices refused to submit forms without Chiang's return.
* Chiang Kai-shek) would have no choice but to sign a humiliating peace settlement with Japan. Nanjing was taken at a considerable cost to Chinese civilian dignity

and life, but no surrender was forthcoming.
* Chiaotzu appears to be based on these, wearing a Qing Dynasty outfit and having extremely pale skin. His telepathic attacks also require him having his arms outstretched, in a rather jiangshi-esque way.
* Chiaotzu, what exactly is he? Is he a type of human or an alien hybrid like Tien? How did he come to meet Tien and the Crane Hermit? It doesn't help that Chiaotzu gets the least amount of screen time of the original cast. Speaking of Tien, he also gets almost no background information outside of being the Crane Hermit's student and training to be an assassin. How he met the Crane Hermit or Chiaotzu is never explained.
* Chiaroscuro: There's only one bright source of light. Everything else is shadow.
* Chiasmata counts. While mostly offing civilians, 564 has exactly one survivor from one of his attacks. He has a bodycount in the thousands, and is bar none the most powerful superhuman in the setting. He's more dangerous than a man who has turned the southwestern United States into a glass bowl.
* Chiasmata: Misanthrope, a friendly, social girl who is so radioactive that can't even be in the same room as anyone without some serious detriments to their health.
* Chia The Wildcat is a 1970s book about a wildcat surviving in the wild and raising her young.
* chi-based techniques to fight against benders, though in her case it's mentioned that she did teach it to some others.
* Chiba wore pigtails in middle school (though only while at school), but they comes off as
* Chibi afterwards, seeing as she and Usagi get along even better here.
* Chibi-Chibi is absolutely adorable, being just a toddler who mostly says her own name instead of sentences. Usagi even points out that she's much sweeter than
* Chibi Chibi is introduced in the series' last season to replace Chibiusa as the resident
* Chibi Devi becomes the surrogate mother of Mao, a demon baby. Slight variation in that Honoka is only 14.
* Chibi Devi, the principal of the daycare center is constantly set on fire, electrocuted, and frozen, but he always recovers after a bit of bed rest.
* Chibi Jaune is stuck doing one as people get in the door ahead of him, but he doesn't want to admit to Pyrrha why he's acting like that.
* Chibi Maruko-chan among other shows. One of the widest-known shoujo manga adaptations, and both male and female viewers alike know and love it for its relatable story and cast while being thoroughly girly from tip to tail.
* Chibi Maruko-chan franshise has been running for almost 30 years, with the manga running for 23 years before ending and the second anime (over 900 episodes so far) running for almost 19.
* Chibi Maruko-chan has an episode where Maruko gets a stomach ache (it later turns out to be appendicitis). However, despite her moanings and groanings no one will take her to the doctor thinking it's a simple stomach ache (they don't realise it's appendicitis until later). This prompts Maruko to wonder why she can't pull a look on her face to resemble extreme pain. As this happens we momentarily shift from the style of animation normally used to one normally used in anime where we see Maruko drawn in regular anime style.
* Chibi Maruko-chan manga issues/Episode 297, where she starts doing "the duck walk".
* Chibi Maruko-chan, passed away due to breast cancer, a memorial tribute of her aired after the anime episode.
* Chibi Maruko-chan, two classmates of Maruko are known to have bad handwriting.
* Chibi Maruko-chan. Whenever a show gets cancelled, they replace it with one of these shows.
* chibi. Not only did the poor girl freeze to death, her fingers actually snapped apart right before the end!
* Chibi-Robo!) frequently feature a black-and-white dog named Tao, who is usually portrayed as somewhat lazy and often very hungry. Tao was the actual dog of Skip's creative director, looked exactly like his fictional counterparts, and... was

somewhat lazy and often very hungry. (The real dog died in 2009, but the fictional version will live on in games forevermore.)
* Chibi-Robo! is just English, but spoken very, very quietly. Once Chibi-Robo gets an upgrade called the "Alien Ear Piece," he can understand them just fine.
* Chibi-Robo! is normally spoken for by his partner Telly, but when faced with a yes/no situation (usually a player choice), he can pop up one of two signs: a green exclamation mark for "yes" and a red no-sign for "no".
* Chibi-Robo!—include a black-and-white dog named Tao, who frequently has a lazy and hungry personality. Tao was a real dog belonging to one of their head game designers. Even though he passed away in 2009, Skip still features a few hidden references to him in their games.
* Chibi-Robo!, Mr. Sanderson suffers this for spending so much money on the titular robot.
* Chibi-Robo!, When Chibi plugs in to recharge, if the player mashes buttons in an effort to rush through Telly's save dialog (and on a heavy "15 minute" day this can be as many as 3-5 recharges), then when Chibi goes to unplug he gets harmlessly whacked with a pan or can top dropped from above, further delaying the game. Telly (a FLYING television) denies it, of course, stating he has no idea where it came from, but counts the number of times it has happened.
* Chibi-Robo!, which are only about the size of the protagonist himself.
* Chibiromano (South Italy, or Italy Romano, as a child) was spoiled, lazy, and entitled to boot, as his caretaker
* Chibitalia fan comic, Holy Roman Empire gets the Chibitalia bridge dropped on him.
* Chibitalia (young North Italy). Many nations, including his caretaker Austria, were convinced he was a girl, and the Holy Roman Empire even
* Chibi Usa also goes through this when Wiseman transforms her into the
* Chibiusa also thinks Shingo (who, for the record, is her uncle and goes from pre-teen to young teenager in the series itself) is pretty cute.
* Chibi Usa and Chibi Chibi take the odango to a next level with pointed and heart shaped buns in pink and red respectively. Even better, Chibi Usa's hair is naturally pink, even though her mom is blonde and her dad's hair is black.
* Chibi-Usa, being in training to become the next Sailor Moon, although she only ever appears in-series as a
* ChibiUsa finds a little boy's keychain when he drops it. Cue bishie sparkle when she sees him and he seems wonderful... until he starts doing a lewd routine from Shin-chan, which his keychain depicts. ChibiUsa is not amused.
* Chibiusa has a precocious crush on Mamoru, despite knowing that he's her
* ChibiUsa/Rini is a perfect example, monopolizing her future father Mamoru/Darian's time and fighting over him with her future mother Usagi/Serena. Her unfortunate transformation into Black Lady even twists her innocent need for approval and love for Mamoru into a vision of her kissing him (
* Chibiusa (Rini) is a sad version of this (when she's not acting like a
* Chibiusa says her goodbyes to Usagi and returns to the future. There are other melancholy versions of songs used throughout the series, usually a rendition of one of the ending credits songs.
* Chibiusa's Seventh Birthday has this trope in play, with Usagi and Mamoru raping their daughter alongside the rest of the Senshi.
* Chibi Vampire adding angst to her stories. Usui-kun, the lead male in the series. replies, "I'm so glad that my slow descent into a mental asylum is so wonderful to you." (something like that).
* Chibi versions of the X-Men — it's a long story): During one issue where they are always barely escaping being captured, Cyclops yells "back to Plan B, everyone! RUN!" At this point Gambit snarks "No offense, but it seems to me you only got de ONE plan!"
* Chicago acknowledges that he feels betrayed and ignored in his relationship with Roxie but still pays for her lawyer and offers to stay with her for the baby he suspects isn't even his, and in truth didn't exist at all.
* Chicago, a dripping tap is one of the noises Roxie hears as she tries to get to

sleep on her first night in prison. It turns into part of the rhythmic accompaniment to "Cell Block Tango".
* Chicago" adult contemporary act. Their signature "25 or 6 to 4" from their jazz-rock days, however, only hit #4.
* Chicago and using and abusing the court of public opinion via reporters (including having the Chicago-born Rosie blatantly lie that she's a simple Southern girl out of her depth in big-city life).
* Chicago (appropriately, the city's Greektown neighbourhood featured prominently in the latter).
* Chicago area broadcaster Bob Sirott trademarked "OJ TV" during OJ Simpson's first major trial because he didn't want anyone to use it.
* Chicago area, you need an Irish-sounding name—nobody's ever heard of any of the candidates, so the "vote for the person who sounds Irish" contingent swamps the people who are actually voting based on policy. So many lawyers who wanted to be judges changed their names that the county started requiring their old names to appear next to their new ones on the ballot.
* Chicago are fullblooded imagine spots of the heroine, who hopes to become a jazz dancer. There are even a few snapping-out-of-it moments, and the contrast between the reality and her jazz saturated daydreams is often underlined.
* Chicago are using their vamp skills to literally get away with murder.
* Chicago at the request of his third wife, Gwen Verdon, who played Roxie Hart during its original Broadway run.
* Chicago ballad), recorded in the late 90's by Stevie B. and Alexia Phillips (not to be confused with the Italian singer Alexia), was originally by a forgotten late 80's singer named Jaya. Ironically, Stevie B. also co-wrote and did the backup vocals in the original.
* Chicago-based Empire Today continues to use the likeness of former pitchman Lynn Hauldren (in CGI form) in its TV commercials, even though Hauldren passed away in 2011. In 2015,
* Chicago-based shows produced in-house by them, shuttered in late 2015 after losing a ton of money on their Halloween shows two years in a row. The 2014 show, in particular, was a humiliation for them, as it centered around an enormous, spectacular fire display... and it just happened to be raining that particular Halloween, leading to the display fizzling in both the literal and figurative sense.
* Chicago Bears player Gale Sayers had to retire after injuring first one knee (the one depicted in the film
* Chicago, Billy Flynn and Roxie Hart do a number with Roxie on Billy's lap as the dummy and Billy as the ventriloquist.
* Chicago Blackhawks and Detroit Red Wings Finals which has not happened since 1934, in the Original Six era.
* Chicago Blackhawks when noting that five of the last six Stanley Cup winners have won the Cup on the road.
* Chicago blues (an urban delta blues-based style relying on harmonica, amplification and simple progressions)
* Chicago-born Walter Koenig, son of two Russian Jews, as Russian Pavel Chekov.
* Chicago, but Roxie, not willing to let her lawyer steal the show from her, wins without uttering a single line of dialogue.
* Chicago By Night the White Wolf series expanded beyond its Vampire milieu, so she may have picked up some more definitive game rules since then.
* Chicago Cubs radio broadcasts are full of this, especially back when Ron Santo was still alive. Even today, Pat Hughes and Keith Moreland do their best to fill any downtime in the game with inane yet entertaining discussion.
* Chicago, died of a heart attack during a September 2017 performance in Rio de Janeiro.
* Chicago does her own dancing. She cut her long hair into a bob so that her face would be visible, and no one could accuse her of using a dancing double.
* Chicago, either. And when Chicago's next few singles included the pseudo-Cetera-sounding "Will You Still Love Me?" and "What Kind Of Man Would I Be?" many casual

fans didn't even notice the switch.
* Chicago Fire and asks for advice about a fellow firefighter who sustained a head injury a few years ago with the effects resurfacing.
* Chicago Fire: Deputy Commissioner Gorsch in Season 7. When Gorsch was a candidate, Chief Boden gave him a bad performance review, recognizing rightly that this guy was a desk jockey, not a smoke eater. Gorsch then slimed his way up the ranks to a position where he could hover around the firehouse and try to drive Boden to quit — and make everyone's life miserable in the effort.
* Chicago Fire: Firehouse 51 started with Pouch ("half Poodle, half couch"), who is later given to a boy whose mother died in the line of duty. With Candidate Darren Ritter comes Tuesday, a Dalmatian with separation anxiety disorder.
* Chicago Fire manages to avert this in the aptly named episode "Defcon One". The episode focus on the serial arsonist upping his campaign against Firehouse 51. In a sub plot, a rival bar starts to actively sabotage Herrman's bar. When he mentions they just went to DEFCON 5, Otis quietly mentions that is in fact the lowest level.
* Chicago Fire Matthew Casey uses a goofy Australian accent as a joke, once when imitating a neighbor and once during a game. A meta example as Jesse Spencer is Australian.
* Chicago Fire of them know the child, most don't even seem to know each other. This keeps the kid alive long enough for the CFD to arrive, but also means multiple members of the chain need to be helped back up the hill by the fire fighters. Once everyone is safe, the main characters make a point to shake each person's hand.
* Chicago Fire, Severide volunteers to donate bone marrow to a woman in need of a transplant, then ends up falling for her.
* Chicago Fire Sheer adrenaline had prevented him from even feeling it.
* Chicago Fire the firefighters are called in to put out a fire at a prison and end up locked in with a group of violent prisoners who attack them. The firefighters hold off the prisoners using their fire fighting equipment including a pike pole which is essentially a spear with a hook attached.
* Chicago Fire. The show explicitly follows the firefighters of the second shift out of at least three.
* Chicago Fire was discovered to have been set by the homeowner for this. Unfortunately, his estranged wife was still inside and burned to death.
* Chicago Fire where a patient is suffering from cardiac tamponade (blood/fluid collecting in the pericardium), Paramedic Dawson performs pericardiocentesis in the field, draining the fluid from the sac encasing the heart and saving the patient, but accidentally puncturing the heart muscle in the process. While this intervention and even the outcome is pretty realistic, no medic liking their job would attempt such a thing.
* Chicago Fire, with activities at Firehouse 51 coming to a halt when the distinctive klaxon goes off and the dispatcher announces, in the event of a major call out, "Battalion 25, Engine 51, Truck 81, Squad 3, Ambulance 61: [TYPE OF EMERGENCY] at [ADDRESS]".
* Chicago for this reason. After the album was released, band member Walter Parazaider heard the song on the radio... and didn't know it was his own band's work. Needless to say, the success of the song led to a big shift in the band's style. Thirty-five years later, keyboardist Robert Lamm has been known to jokingly introduce it at concerts as "The song that ruined our career."
* Chicago gives us a great example. In 1983, the city Democratic Party nominated Harold Washington as their candidate for mayor. Normally, winning the Democratic primary is tantamount to being elected mayor of Chicago, but there was one problem: Washington was black. This gave the Republican challenger Bernard Epton an opportunity to run a series of racist attack ads telling people to vote for him "before it's too late." Even though Washington won the election, his time in office was marked by racially-charged battles with the City Council, in which a white bloc of 28 councilmen (with one additional
* Chicago gives us Hunyak. The only woman to not commit the murder she was accused of is the only one to hang. What makes this even worse is the fact that this is because no one at the police station could speak Hungarian, and they didn't even

bother with getting an interpreter for her.
* Chicago got so badly out of hand is because the guy manning a fire watchtower misjudged which block the fire was on, due to the still-smoldering ruins from a smaller housefire the previous day. After he realized his mistake he requested a second alarm with the right location, but the guy actually sending the alarms thought the corrected directions would confuse the situation. The third alarm again sent all the remaining fire crews in the city to the wrong location, but by this point the fire was so big that it was visible from blocks away so the crews just followed the smoke.
* Chicago - "Hard to Say I'm Sorry". He still loves her. He did her wrong. She left, and there's nothing he can do to get her back and he knows it.
* Chicago has a madness mantra that consists of multiple words sung by six different women.
* Chicago has Billy Flynn's actor hold a note during "We Both Reached For The Gun" for an impressively extended period of time which varies from actor to actor. Jason Danieley holds the record, maintaining the note for a whopping 35.5 seconds.
* Chicago has often cast an African-American actress as Mama Morton. A few black actors have played Billy Flynn as well.
* Chicago has some really clever explaining to do in order to get her acquitted of murder.
* Chicago has The Cell Block Tango, a song about six "murderesses", detailing their crimes. Their six reasons were, in order, "Popping" gum, Lying about being single, A reaction to a 'jealous rage', (an innocent Hungarian woman whose lover was killed), Cheating on her with her sister, and Cheating on her with random people. Some of the scenarios start out rather romantic.
* Chicago has "Then he ran into my knife. He ran into my knife ten times."
* Chicago has traditionally been the opposite. While the city itself is arguably split between North Siders favoring the Cubs and South Siders favoring the White Sox, the Cubs have generally been more popular nationwide in part because of their "lovable loser" perception. The White Sox broke their long World Series drought first, in 2005, and were almost immediately relegated back to second-tier status long before the Cubs finally ended their drought in 2016.
* Chicago Hope, an elevator door opens and two characters have the following conversation:
* Chicago Hope did it in the middle of its run when one of the doctors, a very manly hockey player, starts dating Mia Sara. When she informs that she has something to tell him, he says that he already knows... that she has fake boobs and he's fine with it, she informs him that she actually used to be his best friend and hockey teammate in high school.
* Chicago Hope had a subplot about a boy who had been raised as a girl. When s/he found out, s/he cut off all his long hair to look more like a boy.
* Chicago Hope moment. Apparently, then-president of CBS Les Moonves personally hated it and gave orders that it never air again.
* Chicago Hope that the girl is actually a boy that was simply raised as a girl after a botched circumcision.
* Chicago - "I Don't Wanna Live Without Your Love," "If You Leave Me Now", "Hard Habit to Break"
* Chicago, in part, as it cover's Roxy Hart's trial for the murder of her lover in a crime of passion.
* Chicago is actually used for the University of Illinois at Chicago Police, not the Chicago Police Department; although it was used by the CPD as the 7th District Police Station prior to 1998.
* Chicago is a satire of media sensationalism and the American justice system, depicting the circumstances of a murder trial as if it were a theatrical production. Roxie's press conference is portrayed as a ventriloquist performance with her lawyer Billy puppeting her, the media is treated like a "three-ring circus," and Billy's fraudulent arguments in the trial are likened to a skillful tap dance.
* Chicago is pretty enough to get away with murder, her attempts at which drive the

plot of the show.
* Chicago, its longevity is partially due to casting numerous well-known actors and actresses (and, occasionally, rock/pop/country singers) in all three of its principal roles.
* Chicago, just as Roxie's verdict is about to be announced, a paper with the headline "Roxie Hart Innocent" is shown. It's also revealed that the newspapers printed up some "Roxie Hart Guilty" issues, just in case.
* Chicago Justice: Albert Forest outright proclaims that in contrast to Stone, he doesn't think trials are about anything like justice at all, only winning, and it's his sole concern. He even wrote an entire book asserting this viewpoint.
* Chicago Justice: In "Lily's Law" at first it looks like the victim was murdered since her mouth was duct-taped and her hands bound but is then revealed to have done this herself. Despite this, Stone charges her abusive ex-boyfriend with murder as he argues he'd driven her to it.
* Chicago Justice is exonerated after evidence comes to light that someone else in fact killed the man he was convicted of killing. Stone publicly apologizes over it.
* Chicago Justice: The defendant in "AQD" is charged with the murder of a man by making a woman believe her daughter had been kidnapped. It caused her to hit the victim while speeding down the street to deliver the ransom money.
* Chicago Justice: The Spanish government sends one to arrest a young woman based on Amanda Know and return her so she can be tried again on murder charges. Realistically, this is quite unlikely, since it would damage relations with the US. The US and Spain have an extradition treaty already (which they are shown invoking later) so going outside official channels like this makes no sense given that too.
* Chicago keyboardist Robert Lamm successfully completed drug rehab in the early 80s, he requested that his bandmates stop calling him “Bobby” and use his full first name from then on.
* Chicagoland Television: Better known as CLTV, it was a 24-hour regional cable news television channel based in Chicago and owned by Tribune Media (hence it is based in the studios of WGN-TV). Shut down in 2019 by new owners Nexstar (who acquired Tribune that year).
* Chicago L has a history as rich as the New York City Subway's. This includes many lines that were proposed but never built.
* Chicago L, there is an extra wide right of way leading to 2 unused tunnel portals at the west portal of the Milwaukee Dearborn Subway on the Blue Line near UIC. These were once intended for a four track subway line; only two tracks were ever built, and the unused tunnels dead-end after a few yards.
* Chicago make the mistake of listing Mary Sunshine's actor with a male name instead of with just the first initial of his name, spoiling the twist that Mary is, in fact, a cross dressing man.
* Chicago manage this, through gifts and money sent to them by the public.
* Chicago Med have episodes where the doctor characters encounter people who believe in vaccination conspiracy theories by "The Government" or "Big Pharma".
* Chicago: Moments after the jury finds Roxie Hart not guilty, three pistol shots are heard, and the crowd rushes out to investigate. It seems that another woman has shot her boyfriend and his wife.
* Chicago mug reflects the fact that actor Carlos Bernard is a huge fan.
* Chicago murder capital of the US, the odds of being victimized are relatively low if you're not living that kind of life.
* Chicago number "Class", in which Velma Kelly and Mama Morton lament the decline of modern morals, is this trope from start to finish.
* Chicago: "Of all the radio stations in Chicago... we're one of them." (during a time when it was a confused hot talk/classic rock/sports hybrid). It's now a simulcast of all-news WBBM, so you can see how well that worked.
* Chicago, one of the girls in the "Cell Block Tango" number mentions how her lover, Al Lipschitz, would go out every night looking for himself. "And on the way, he found Ruth, Gladys, Rosemary...and Irving!"
* Chicago, one of the Merry Murderesses tells the story of her husband accusing her of cheating with the milkman, then she says, "He ran into my knife ten times."

* Chicago, one of the murderesses killed her boyfriend because he kept popping bubblegum after she told him to stop.
* Chicago P.D., as Voight tells Lindsay and Halstead to stay away from one another, not because he worries about his surrogate daughter, but because he's aware of her penchant for leaving men broken-hearted and doesn't want to risk Halstead losing focus on his police work.
* Chicago P.D. enough time to yell for his family to get down before the car blows up. The next episode, "Debts of the Past", features another cop who put the criminal away being killed by a car bomb. Later, Olinsky goes to his car, thinks about what's happened, and decides to take a cab. It is later confirmed his car had a bomb too.
* Chicago P.D., Erin was raised by Voight and his wife as a foster child from age 15, alongside their biological son Justin, who was around 7. When they are adults, Justin clearly expresses a romantic/sexual interest in Erin, which she immediately shuts down.
* Chicago PD has a Special Investigations unit where they dump off all the weird stuff, and they simply handwave it off with rationalizing stories. Oddly, besides
* Chicago P.D. have an incredibly close relationship. In fact, Erin is the one person in Voight's life who is always loyal to him and makes excuses for his often questionable ethics.
* Chicago P.D. is incredibly secretive about her past (understandably so, as she grew up the child of a junkie mother and a father serving life in prison). The few who do know anything about her, Lindsay quickly turns her wrath against.
* Chicago P.D. occasionally makes a point of showing how hidden wire technology has advanced. Criminals will rip open cops' clothing or smash cell phones as precautions only to be taken down and for the inconvenienced cop to point out an inconspicuous piece of clothing that contained the actual wire.
* Chicago P.D., Platt tells Ruzek that she was actually shot in the rear rather than the hip like she tells everyone, saying that her ass counts as her "high hip". She swears him to secrecy.
* Chicago P.D.. Ruzek approaches a lawyer he knows on behalf of "a friend" who covered up his sister's DUI. The lawyer tells him that his "friend" is looking at five years in prison. It's not clear if the lawyer believes him or knows that he's avoiding naming himself so that she herself can't turn him in, as she would be obligated to do.
* Chicago P.D.: Subverted with Halstead. Despite serving in this capacity with the military and now the Chicago police, he is very feeling. He simply knows it's the only way.
* Chicago P.D. supposedly is. But it's also been indicated that he's heavily involved with Internal Affairs and may simply be pretending. He does frequently use non-SOP means of achieving his goals, especially when pressed for time.
* Chicago P.D. to testify. Team Voight ultimately nails Spann for the contribution to the delinquency of and provision of alcohol to minors.
* Chicago P.D. Voight. Given that he has to report to them, it makes for an interesting situation. While Voight is implied to have been dirty in the past, and may still be slightly dirty, both of the ones he deals with are total dicks, and slightly corrupt themselves.
* Chicago P.D.. Wanting to see Lindsay again but not having a reason once his police business concludes, Severide steals a paperweight from her desk, then shows up at her apartment, claiming it fell into his pocket.
* Chicago Phaeton City is giving speeches welcoming their new masters practically before the smoke has cleared.
* Chicago plead this in "The Cell Block Tango". Given their contrasting explanations and lines such as being driven by gum chewed too loudly nobody buys is.
* Chicago, Roxie Hart imagines herself as a Dude Magnet (and a Marriage Proposal Magnet) in her "I'll be a star and boy will it be swell" song.
* Chicago, Roxie merely mentions vaudeville as what she intended to do after getting out of jail. In the musical, vaudeville is the lifelong ambition of both

Roxie and Velma, and every musical number has a vaudeville motif. Women who murdered their husbands for cheating only became a major subject in the musical, which not only added the "Cell Block Tango" but completely rewrote one minor character who appears later to fit that theme.
* Chicago says this when Roxie Hart's verdict is revealed. Mocked, because they have stacks of newspapers with pre-written articles declaring "Guilty" or "Innocent" and use a kid signaling from the courthouse window to tell them which one to sell.
* Chicago's "Colour My World" was a B-side twice; it backed "Make Me Smile" in 1970 and "Beginnings" in '71.
* Chicago, sending their Columbia albums to them in the process, for eight years before deciding to go indie again in 2011.
* Chicago. She can only speak Hungarian and no one bothers to get a translator.
* Chicago she did it; in the original play, what undermines his confession is the ignorant denial of the same known fact.
* Chicago, so that critics couldn't accuse her of having a double perform her singing and dancing.
* Chicago's pockets. Even now, although far better than the Prohibition-era, Chicago Police are known for being very corrupt/incompetent by American standards.
* Chicago's sixth album, is about guitarist Terry Kath's Saint Bernard.
* Chicago's song, "Cell Block Tango": "He ran into my knife! He ran into my knife TEN TIMES!"
* Chicago stands in for the fictional city of Metropolis, similar to
* Chicago takes the metaphor a little further, showing that the singer compares his post-breakup situation to the pangs of withdrawal.
* Chicago, the "Crosstown Classic" between the White Sox and the Cubs blew up into serious inter-fan violence on July 2019. News reports focused on two gangs of girl fans laying into each other as stewards tried to restore order.
* Chicago, their victims were such bastards that they utterly deserved it. Whether they are to be believed is open to question (of course their flip-flopping makes it clear that they are obviously lying through their teeth. All that Hunyak says is that she didn't do it, which makes her more believable.)
* Chicago. The sixth protests that she is innocent; unfortunately, in Hungarian. She's the one who ends up being executed.
* Chicago. Though in this character's case, he was actually married...to a fame seeking woman with low standards who dumped him after she was done using him.
* Chicago Tunnel Company, a narrow gauge railway under the streets of Chicago. Built to remove debris during the installation of underground telephone cables, it was later used to make deliveries to downtown businesses and remove ash from buildings with coal-powered furnaces and boilers. Many parts of the route were replaced by subway tunnels. The rest was abandoned after the railway shut down in 1959...and rediscovered in 1992 when a pile being driven into the Chicago River penetrated the ceiling of one tunnnel, flooding the remaining network (and the basements of buildings still connected to it) with over 250 million gallons of water.
* Chicago uses this for nearly all of its musical numbers, contrasting Roxie's lavish and expansive daydreams with the cramped and discolored 'real' world.
* Chicago, Velma Kelly describes her act with her sister — which can't be done anymore because her sister is dead. Instead of only doing her half, Velma goes "I'd go —" and does her part, then goes "She'd go —" and does her sister's part.
* Chicago, was a composite of William Scott Stewart and W. W. O'Brien, the real life attorneys of Belva Gaertner and Beulah Annan (the real life Velma Kelly and Roxie Hart).
* Chicago was being torn apart by the violence between different mobs in
* Chicago was highly acclaimed when it was first produced in 1926, but now remembered only as the source of the musical adaptation written half a century later.
* Chicago' were currently being filmed in Chicago, how would that make you feel?"

* Chicago when it lands from its jump off a car hauler. In the next shot, we see Peter lying unconscious before being put in an ambulance. The other two guys in the truck? They aren't even singed.
* Chicago (which she wanted to sell to a national network) led her to seek full creative and financial control over her properties from then on out, allowing her to build a creative empire in the mid-20th century.
* Chicago, who spoke no English, worked for Velma's counterpart, Belva Gaertner, was convicted of beating her farmer husband to death with a hammer and chopping him into pieces, and was hanged.
* Chicago women to kill him, as long as they were playing "The Cellblock Tango".
* Chica is sidelined hard compared to the other three original animatronics. She has very little significance to the overall mythos compared to the others, and she's the only one to receive no representation at all in
* Chic And Awe: One character assumes that another will be unattractive, but, upon seeing them in person for the first time, discovers that they're incredibly good-looking.
* Chica the chicken, a kazoo-voiced puppet who interacts with human hosts in the live "
* Chica the Chicken probably got this before, since she doesn't really look female at all.
* Chi-Chi actually gets this too in the anime, in the manga while she of course still loves her husband and sons Toriyama still puts more focus on her
* Chi-Chian: The Roleplaying Game comic books and animated web series.
* ChiChi ChiChi features an in-universe example where Hiraku gets depressed after an erotic novel he wrote sold better than his picture book series.
* ChiChi ChiChi has a habit where she forgets to speak out loud, relegating all her dialogue to thought balloons (though with her mouth still open). The only one who can understand her is her older brother Hiraku.
* Chi-Chi comes across this way towards Gohan, forbidding him from fighting despite her fighting herself when she was a teenager. This is understandable, as she believed that Gohan was far too young to be fighting at age 4-5, and Chi-Chi herself was fighting when she was 12.
* Chi-Chi, especially around Goku. Since she is not as strong as Goku yet
* Chichi has been Goku-sexual since day one, and she's succeeded in marrying him and having two kids. She didn’t remarry while he was dead for seven years. The only other person she's attracted to was Yamcha.
* Chi-Chi's death has got to be the most humiliating and pointless, due to the fact that she brought it upon herself. She slaps Super Buu for supposedly killing Gohan. Buu’s response? He promptly turns her into an egg and steps on her in front of her family and friends.
* Chickadees. They're considered adorable, even relative to other small, cute songbirds.
* ChickBusters. Both AJ Lee and Kaitlyn made their WWE debuts in 2010, the team debuted in 2011.
* Chick Busters for the purpose of tormenting her former friend, yet Big E still reeled with Kaitlyn slapped him.
* Chick Busters) were this to the Dudebusters (Trent Barreta and Caylen Croft, occasionally joined by Curt Hawkins).
* Chick Cancer, and the Kool-Aid Man suddenly realizes how annoying that is.
* Chick Corea: A pianist who got his start in the late '60s as part of Miles Davis' band and gained fame in the '70s as the leader of the jazz fusion band Return to Forever. The group's mix of fusion, Latin jazz and prog rock made them popular with rock audiences, and they are regularly cited as an influence by later jazz rock bands. After Return to Forever split in 1977, Corea embarked on a solo career that has netted him over 20 Grammys.
* Chicken and Moose are these, though they also appear to be made of metal.
* Chicken and Moose has this, seemingly paired with hallucinations. He gets distracted by a "rainbow," which is actually an oil slick.
* Chicken and Moose: The titular Chicken sometimes has these, usually coupled with

bursts of frightening lucidity.
* Chicken Boo. His original skit saw him constantly wander into town in a Paper-Thin Disguise
* "Chicken Chicken Chicken: Chicken Chicken" (read: chicken chicken chicken, chicken chickens chicken).
* Chicken Chicken: The main character and her brother are cursed by a witch to gradually transform into chickens after they're rude to her. It starts with the main character's lips becoming hard like a beak and her brother beginning to grow feathers; by the time they figure out how to get the witch to remove the curse, they've become fully transformed and need to peck at a typewriter to communicate with her.
* Chicken flocks are known to go berserk and peck at birds with blood on their feathers. This cannibalistic behaviour is especially destructive because other flock members often get bloodied in these frenzies, leading the rest to turn on them too.
* chicken hawk screeches overhead and his grandmother appears in front of a booth in the middle of the desert and says that there are six callers ahead.
* Chicken Joke: The old joke about why the chicken crossed the road and variations.
* Chicken Joke: "Why did the chicken cross the road? To get to the other side". Despite being used as the mascot of joke-telling, it's really a parody of other jokes. Where most jokes end with some kind of pun, "To get to the other side" is a straight answer that only works if the listener was expected something absurd.
* Chicken Little actually depend on the acquisition of said soda. When the machine won't take his dollar, Runt goes into a ferocious rage, thrashing and pounding the machine, much to the astonishment of the others. The machine reluctantly spits a single soda bottle out.
* Chicken Little appears, telling people "Don't Panic". After a second, the "Don't" falls off, leaving "Panic" followed by quick clips of the CL movie, to the tune "It's the End of the World as We Know it."
* Chicken Little, as he's bullied in sports class, Chicken Little is thrown against a gymnasium's window where he smacks flat. And then he slides down like a Wacky WallWalker.
* Chicken Little, at the very end with Chicken Little and Abby accidentally touching hands while reaching for the same popcorn bucket and watching the movie about their story.
* Chicken Little, Buck Cluck cooks some on the stove, and it explodes in his face when he hears his son screaming for help upstairs.
* Chicken Little by vocalizing through a tube into a water cooler tank full of water.
* Chicken Little causes her personality to be overwritten from a tomboy into a feminine girl. The aliens offer to turn her back to normal, but Runt of the Litter decides he likes her new personality better. She may have been a bully, but she certainly did not deserve this fate at all and the fact that the other characters treat it like a good thing is very uncomfortable.
* Chicken Little, Chicken Little gets soaked in sports drink after winning the baseball game. This gets lampshaded as being part and parcel with "the glory" by the sportscaster.
* Chicken Little Chicken Little's Dad has a Pear laptop in which he received much hate mail for his son's alleged mischief.
* Chicken Little. Despite his questionable parenting, it's pretty clear he's not intentionally abusive, and he makes up for it at the end.
* Chicken Little, during the cringe-worthy classroom intro scene, the Critic gets a call...
* Chicken Little, gets stuck in road gum...and loses his pants, all while trying not to be late for school.
* Chicken Little has Runt of the Litter, who despite being the smallest of his porky family is the largest of the kids at school. His size doesn't stop him from being dorkily cute.
* Chicken Little has the titular character send the town into a panic because the

sky fell. After everyone thought it was an acorn, the town treats him badly, despite him being young. The film ends with this trope since, while the sky didn't actually fall, a piece of alien spacecraft did, which looked like the sky, and in so doing he helped stop an invasion and restore his reputation.
* Chicken Little. He hyperventilates so hard he accidentally swallows the bag, then is seen breathing on two bags at once.
* Chicken Little, if you look very closely at the aliens' map of the Solar System, Pluto appears to be the first to be crossed out. The movie was released just one year before Pluto's demotion.
* Chicken Little instead of a psychology book), but the message was clear.
* Chicken Little Melvin and Tina are renamed Piotruś and Edytka after their voice actors, Piotr Machalica and Edyta Olszówka.
* Chicken Little, plenty of viewers were cheering on the titular aliens who were vaporizing the citizens of Oakey Oats. It helps that the townspeople were such assholes who mercilessly bullied Chicken Little for no good reason.
* Chicken Little: Provides the contrast between scrawny and geeky Chicken Little and his father, a former star athlete.
* Chicken Little, Runt trips while he, C.L., and the others were running away from the aliens, and belches with each impact.
* Chicken Little sets off a few of these — twice when he tries to sound the town alarm, and again when an attempt to stand up to Foxy Loxy ends with him thrown into a window and smacking the fire alarm.
* Chicken Little struggles with being a father due to being a widower and not knowing how to be there for his son.
* Chicken Little, the titular character is seen as a fool by the entire town after he caused a mass panic when he believed the sky was falling, the only people who support are his friends and his father (who is trying to not reject his only son).
* Chicken Little. They even divide the teams into "popular" and "not popular".
* Chicken Little, though it seems hard to tell whether or not the original plan would have fared better.
* Chicken Little to warn the town about the invasion. When the machine won't take his dollar, Runt goes into a ferocious rage, thrashing and pounding the machine, much to the astonishment of the others. The machine reluctantly spits a single soda bottle out.
* Chicken Little was the first to fall under this as it was the first non-Pixar computer animated film from them.
* Chicken Little when a romantic part comes up. In the background, you hear movie Little and movie Abby exclaiming things like, "Oh, Ace!" and "Oh, Abby!", while Chicken Little and Abby slowly scoot closer to the tub of popcorn. Eventually, they hold hands, with Chicken Little looking very satisfied and Abby sighing in content.
* Chicken Little When it breaks apart, the real sky — broad daylight — shines through the artificial one.
* Chicken Little: When the titular character decides to sign up for baseball in hopes of redeeming himself to the public, he is treated the same way as before with the team not even giving him a chance to go up for bat and just keeping him on the bench for all the games. In the one game where he finally does get to go up for bat, he is told not to swing and go for a walk by the coach while the audience complains that he's going to lose the game. Not only does Chicken Little ignore the coach's demand, he manages to score the winning run for the team.
* Chicken Little, which was somewhat strange considering that the majority of the rest of the cast either wore full costumes or nothing at all (with the possible exception of Fish Out Of Water, but his helmet was for breathing, not really for fashion).
* Chicken "nuggets", "tenders", or "wyngz" are promoted as such to obfuscate where on the chicken the meat comes from. They're likely processed from scraps of breasts, thighs, and other cuts. That means that even "breast tenders" and "white meat tenders" seemingly offer better cuts than they really do. "Tenders" is particularly deceptive, because unlike pig or cow meat, where "tenderloin" refers to the most tender piece of meat on the animal, chicken tenderloin is functionally

identical to the breast.
* Chicken of the Sea ads show a seemingly slim, beautiful woman walking to an elevator with a bunch of men fawning over her, only for her to reveal the big, bloated gut she's been sucking in once the elevator doors close.
* chicken parmesan"). This is why you get such products as "vegan frozen dessert product" and "vegan chik'n".
* Chicken Police Bloodboyle is a racist who can't stand protagonist Sonny Featherland. On the other hand, he is unbribable, Sonny worries about what will happen to the city when Bloodboyle retires, and Bloodboyle congratulates Sonny when he cracks the case.
* Chicken Police is a leisurely point-and-click game, with the following exceptions:
* Chicken Police Natasha Catzenko is a sexy and mysterious nightclub singer, and trouble follows her.
* Chicken Police The Meat War, which happened about 100 years before the events of the game. It lasted 27 years, 80-90 million animals died, and 27 species were declared extinct after the war. Some people are worried that a second Meat War is brewing.
* Chicken Police To get a good score in the interrogation mini-game, you have to pick questions that match the subjects' emotional weaknesses.
* "Chickenpox" ended this way when the boys were at the hospital and their parents got herpes. They all laugh about it, and then Kenny dies. After a brief pause, everyone starts laughing again.
* Chicken Pox Episode: A character comes down with chicken pox (or a fantastic equivalent).
* Chicken Run: After Ginger is taken away to be used to test the pie-making machine.
* Chicken Run, after Ginger shows the other chickens a poster for "Rocky the Flying Rooster":
* Chicken Run among the chickens trying to organize an escape, but finds herself butting heads with Bunty, who's more resigned to being on the chicken farm. The eventually do pull together to escape, but it takes a lot of work.
* Chicken Run, as part of the general prisoner of war pastiche, features a duo of rats serving this role, obtaining items needed for the chickens' escape attempt, mostly by stealing them from the Tweedys' house.
* Chicken Run: As shown in one of the TV commercials, the chickens manage to escape by making their own pedal-powered plane!
* Chicken Run, being a spoof of WWII prison escape movies, depicts Tweedy's chicken farm as this.
* Chicken Run, but he's also significantly shorter, in no small part due to his permanent stoop.
* Chicken Run by Rocky after he tries and fails to keep such words out of conversation to avoid panic. Apparently Americans care more about this trope than British do.
* Chicken Run (certain British regiments do have animal mascots, such as the Royal Welch Fusiliers’ regimental goat). The other chickens think that he served as a pilot so when Ginger tells him to go pilot the airplane they built...
* Chicken Run decides chicken pot pies are more profitable. Even once the chickens have constructed elaborate machinery to escape, she remains resolute as ever to turn them all into mincemeat.
* Chicken Run: Edwina is killed early in the movie for not laying enough (read: any) eggs for the last five days.
* Chicken Run ends with a scene of the chickens in their new home, accompanied by dozens of chicks. Slight subversion as we don't know who the chicks' parents are, they're just chicks, and it's a pretty large colony of birds (though with only two males...)
* Chicken Run ends with the rats Nick and Fletcher getting into a chicken/egg debate. Toward the end of the credits, they are heard still debating, until Rocky tells them to knock it off, causing them to grouse about him and how they did all

the work as the credits end.
* Chicken Run features a non-broadcast version, with Mrs. Tweedy declaring she's sick and tired of making minuscule profits with her husband's chicken farm, only to spot an ad in a pile of mail with the phrase "Sick and tired of making minuscule profits?" emblazoned on the front, which just happens to be for a meat pie-making machine.
* Chicken Run features this after Rocky wakes up with a bandaged wing:
* Chicken Run. Fowler on the other hand always assumed they were listening to him, and is genuinely surprised none of them know what either of those things are, as it's implied he's been going off about both for as long as he's been there.
* Chicken Run, Fowler orders the chickens pedaling to power "The Crate" (the chickens' flying machine) to "increase velocity".
* Chicken Run), Ginger and Rocky make their escape from the crumbling pie-making machine pursued by some large rolling gears.
* Chicken Run, Ginger gets a rather brief one in the climactic escape scene.
* Chicken Run, Ginger gets to the closing oven door easily, but Rocky is stuck falling into pies. She wedges the door open and runs back for him, then makes it out of the oven with the Indy Hat Roll. Complete with Ginger reaching back for her hat.
* Chicken Run; Ginger slaps him for having deserted the hens on the farm and not having the guts to confess he couldn't teach them to fly... Then kisses him for coming back after dumping the cruel farmers for good.
* Chicken Run has Rocky and Fowler forced to bunk together and share a bed, as the only roosters on the chicken farm. Neither of them are very happy about the arrangement.
* Chicken Run has the various machinery inside and leading into the Pie Machine, which is basically lots of conveyor belts all put together.
* Chicken Run has this as a running gag, largely because the animators couldn't figure out how to make two chickens kiss. For the big kiss at the end, their heads were strategically placed so the beak-action was hidden and therefore didn't have to be animated.
* Chicken Run, Mr. Tweedy is fixing the pie machine with Mrs. Tweedy standing watch. When he thinks he fixed it, he plugs the machine back on, only for it to break down again and erupt a cloud of smoke and ash at Mrs. Tweedy, covering her face with soot.
* Chicken Run: Nick and Fetcher the rats bring the eponymous chickens a radio. Upon one of them patting the side, the tuning knob shoots across the coop. "It's supposed to do that."
* Chicken Run of the chicken's escape attempts, and when Mrs. Tweedy tells him to get a chicken to test out the pie machine, Mr. Tweedy comes back with Ginger, having correctly identified her as the chickens' leader.
* Chicken Run) priming and then raising her axe, but then cut away to the other chickens; the muted "thunk" of the blade's chop says it all.
* Chicken Run provide commentary on the chickens' wild and far-fetched attempts to escape in addition to their more plot-relevant role in sourcing useful items for said attempts.
* Chicken Run, Rocky and Ginger are sitting together on the roof of a coop and their wings accidentally touch, which leads to awkward chuckling.
* Chicken Run, Rocky and Ginger are trying to escape from the chicken-pie-making machine. When they get pushed into one chamber, Rocky exclaims, "Whew! It's like an oven in here..." A second later, gas flames shoot up on all sides and the door starts to close.
* Chicken Run: "...So the pig turns to the horse and says, 'Hey, buddy. Why the long face?'"
* Chicken Run's review, Edwina's death (complete with her bones on a dinner table right after) drives home the point that Mrs. Tweedy isn't fooling around - and neither is the film.
* Chicken Run, the chickens attempt to escape by using this trope to impersonate the farmer's Gestapo-inspired wife during the pre-credits montage of failed

attempts.
* Chicken Run. The farm is meant to invoke a prisoner of war camp, with wire fences and constant patrols as well as regular inspections.
* Chicken Run: The fate of any chicken that no longer lays enough eggs it to have its head cut by an axe by Mrs. Tweedy. Poor Edwina meets this fate.
* Chicken Run, the one "name" actor in the film for North American audiences.
* Chicken Run. Unlike most examples, she yelps in pain when she does this.
* Chicken Run, uses CG for rain and for a giant explosion. The rain looks pretty good, but the explosion is quite obviously a computer effect.
* Chicken Run, using the slogan, "Save the chickens, eat more beef." The folks at Chick-Fil-A were not amused, and filed suit to get the ads taken off the air.
* Chicken Run was marketed by Burger King with chicken nugget-esque products, despite the theme of the movie — and the Burger King marketing itself — being against eating chicken.
* Chicken Run, when Ginger falls down a chute in the pie-making machine:
* Chicken Run: When Ginger tells Rocky that she needs him to help her and her friends escape the chicken farm.
* Chicken Run, when the lead couple embrace and and are interrupted from kissing while a gravy explosion goes off behind them. After seeing the resolution of it, they then proceed to do so.
* Chicken Run, when the order "Chocks away!" is given, triangular "Tasty-Choc" bars in yellow wrappers are removed from under a plane's wheels. (Interestingly, the fact that the packaging is exactly that of a Toblerone bar is properly acknowledged in the credits; it seems that the name-change wasn't so much about dodging a trademark as about making sure that the joke was accessible even to people who'd never seen a real Toblerone bar.)
* Chicken Run, when the pie-making machine is first introduced, Mrs. Tweedy snarks at Mr. Tweedy's questions about the pie machine. Provides the page quote.
* Chicken Run, where half the slats in the upper bunk had been removed to shore up the escape tunnel.
* Chicken Run, where the villainess is defeated by falling off an airplane. She survives the fall itself, but is (possibly) killed by the effects of it; the fall triggers a massive explosion, which destroys a barn, which causes the door of said barn to fall on top of her.
* Chicken Run, with the protagonists temporarily getting trapped inside a pie.
* chickens are so funny. They lack facial expressions, which make them look serious all the time. The illusion is heightened by their prim and proper stance and mannerisms, and thus they look silly when they freak out about something.
* "Chickenshit Conformist" by Dead Kennedys is about the state of punk rock.
* Chickens of Distinction has a job standing outside the Chunky Chicken Poultry Palace in a chicken suit and making comments like "Thank you for choosing Chunky Chicken. We hope you gave it five clucks out of five." Typing "examine self" gives you the description "You're wearing a damn chicken suit. You look like an idiot."
* Chicken Soup for the Kid's Soul her when she brought home the straight A and 1 B report card. Yeah...
* Chicken Soup for the Pet Lover's Soul" who use baby talk on their pets. Naturally, she succumbs to it in the end.
* Chicken Soup for the Soul, a story called "The Christmas Spirit Strikes Again" has a woman pay a surprise Christmas visit to her sister by popping out of a large courier package on her front porch. She wasn't actually sent through the mail, though; she got into the box a short distance from the house and the couriers carried her the rest of the way.
* Chicken Soup for the Soul moment comes. Cue the tears. The child would never trade the bike made for them by Daddy!
* Chicken Soup for the Soul to escape her (the friend's) father repeatedly sexually abusing her, as detailed in her suicide note. Months after he's arrested, he finally confesses.
* chickens will fight to establish dominance. The alpha hen in a flock will frequently pull out the feathers of lower-ranked hens, often drawing blood. And

since they usually attack the head, pecking out of subordinate hens' eyes is not unknown.
* Chicken Walkers; fast units can get in before they deploy and shoot them to pieces, safe from retaliation fire. This last point prompted the Steel Talon sub-faction to jury-rig a bunker onto their frame for garrisoning infantry, specifically to protect juggernauts against attackers attempting to close the distance. The resultant 'Behemoth' is still not intended to be used as anything other than a three-barreled wrecking ball, however.
* Chicken Wings Chuck has become sufficiently infamous that in any situation where things have started to go pear-shaped, the first guess of whoever he calls up is that it's him. Again.
* Chicken With Plums, Nasser Ali's wife tries to drag him out of his depression by offering his favorite food, the eponymous chicken with plums.
* Chicken With Plums who talks Nasser Ali out of suicide. He also tells him the folk tale "Appointment in Samarra".
* Chick-fil-A Cows, who ask that America "EAT MOR CHIKIN". Chick-fil-A had previously had an anthropomorphic chicken for a mascot; its switch to cows was widely seen as a wise move, in part because this subtrope leads people to think that anything with cows would be for milk, or perhaps beef... nope.
* Chickification: A female character who can do well in a fight and look after herself is made helpless in the adaptation for the sake of the plot.
* Chickification: An action-oriented female becomes more girly and helpless.
* Chickification: A previously competent female character is made weaker either over time or in between adaptations.
* Chickification enjoyed a boom with the rise of the internet — allowing them to reach a wider audience that did want to see serious women's wrestling.
* Chickification like male characters. They can still fulfill a plot-important function by motivating others.
* Chickification. Or simply because there is no other female on the main cast and someone has to be saved at one point.
* Chickification rather than her and Kent handling themselves like this.
* "Chick Like Me" (the title refers to the book "Black Like Me" which inspired the episode) featured a crossdressing Rider Strong, who looked
* Chick Magnet, apologises if they had some sort of conflict in the past, exasperating Tupp even further.
* Chick Magnet is a World Class beauty; even Word Of God says that a vast majority of the female populace at his Elaborate University High has a thing for him.
* Chick Magnet Miyuki has feelings for him, which makes her get along with Ririka even less.
* Chick Magnet. The anime changes it so that the only girls who came to his soccer games were the cheerleaders.
* Chick Magnet with Reisi starting with their suggestive, almost flirtatious conversation in prison, which is later followed up by Reisi leaning down so close to Mikoto at one point that their faces are only inches apart. He and Tatara were also extremely close with the two being hinted at having a thing together.
* Chick Publications, home to the infamous Chick tracts, is blocked. A Christian couple was convicted of sedition and fined for distributing Chick tracts that portrayed Islam in a negative light.
* chick sexing involving squeezing them to look for a small pimple-like bump to identify males.
* Chick's ex-wife drops the phone when her small child says, "Mommy? That salesman is on TV." 'That Salesman' was her ex-husband, and the TV announcement was of the Freedom and Independence teams being launched to save the world.
* Chicks Galore... which is about baby chickens, not girls, much to Eddy's dismay.
* Chicks in Chainmail, deal with the male-female issues by gender flipping, or other plot device, some well-done, and some belaboring the point.
* Chicks in Chainmail, Erika Stankewicz uses a picture the alien protagonist's daughter was asked to draw of her home to argue that she ought to be transferred to a class for Emotionally and Behaviorally Disturbed children:

* Chick Tract. Apparently this is what happens on the mean streets in Chick's world where no one has heard of Jesus.
* Chick Tract It's not all in question whether it's meant to be funny (it is) or whether the creators think the message it presents is true (they do not); what makes it ambiguous is that it's an official licenced adaptation played totally straight and allowed to be ridiculous on its own merits.
* Chick Tract "Party Girl", a man who drinks a poisoned drink dies in less than four minutes.
* Chick Tracts, although even most people of the same view think he's insane. This is especially noticeable with the sources cited in the tracts. At least 90% of them are published by Chick himself. Which means he is pretty much creating his own research material.
* Chick Tracts are invisible to all the characters... except for Fang, a dog who occasionally barks at them in the background.
* Chick Tracts are set in a world ruled by a single (and malevolent) government, as foretold according to some interpretations of Christian end times prophesies.
* Chick Tracts are set in these sorts of futures, often with the dictatorship being aligned with the Vatican.
* Chick Tract says he's "mercifully" sentencing the woman to 40 years.
* Chick Tracts can sometimes fall into this, such as the gay rights group who wanted to make sure their children wouldn't be bullied by infecting the Red Cross' donor blood supply (which was kept in a huge vat) with AIDS.
* Chick Tracts, created by Jack Chick, are free comics that were intended to be spread by volunteers to disseminate the author's rather radical view on Christianity and what he views as its enemies.
* Chick Tracts. "Dark Dungeons" is also popular among tabletop gamers for the same reason.
* Chick Tracts. Examples include Bruce in "Fallen" and Harry in "Fairy Tales".
* Chick Tracts experience that puts the lie to their assertions, by showing how he became a monster... after learning that Santa, the Easter Bunny, and the Tooth Fairy aren't real.
* Chick Tracts). However, there are times when an unpleasant unsaved character has a point.
* Chick Tracts: In "Four Angels", Henry, the youngest of the four brothers, and the only one Chick believes remained a Bible-believing Christian, refuses to eat with his elder brother Charlie because Charlie is a fornicator. When Henry shows up after dinner, he condemns Charlie's lifestyle, calling him "a friend of the world and an enemy of God." When their brother Bobby asks Henry if he's saying Charlie's going to Hell, Henry says "I didn't say it. The Word of God does."
* Chick Tracts is superior to whatever the villain of the week is. We've also seen a brief five-second prayer dispel a massive tornado (the guy who said the prayer told everyone it was safe literally as soon as he finished), summon storms to blind terrorists in the Middle East, briefly resurrect those who've died so they can accept Jesus, and sense an assassination plot on someone's granddaughter taking place thousands of miles away. It's difficult to say whether these miracles are a cheap plot device or a reflection on how the author seriously views reality.
* Chick Tracts, it's fairly common for people to ask whether a dead "unsaved" person has gone to hell, or whether they themselves will go to hell, and the answer is yes. The following is an exchange between star baseball player Frank Stone and his gardener Oscar after Frank learns that he's dying of cancer; keep in mind that Oscar got in trouble for mentioning his religion around Frank before.
* Chick Tracts of the Catholic Church who are actively working for Satan and are responsible for all the evil in the modern world.
* Chick Tracts of their rebuttal, with no evidence or other argument given beyond that Chick's position is true and this is different than his position.
* Chick Tracts players is highly doubtful, though it may have made them laugh uproariously at the constantly absurd claims it makes.
* Chick Tracts responsible for Nazism, Communism, Islam, Freemasonry, both world wars, Jehovah's Witnesses, Mormons and Protestant bookstores removing his tracts

from their shelves because they were sick of his bizarre, erroneous and bigoted claims.
* Chick Tracts sessions, only to single her out because she doesn't want Marcie getting too close to Debbie. When Marcie breaks down because of the ostracisation, Gina kicks her out of the group and shows no sympathy when told she's suffering.
* Chick Tracts: The Grim Reaper makes appearances frequently, usually accompanied by his catchphrase "Hi there!"
* Chick Tracts the one explaining things to her naive and uninformed classmates, so she could be a subversion.
* Chick Tracts, when you go to heaven, your entire life will be watched by the entire population of heaven, who will laugh and mock you for every single mistake, moment of shame, and angry outburst you've ever had. This is intended to encourage you to lead a good, pious life, to reduce the mocking to a minimum. At no point in the comic is it suggested that the choir invisible might have some sympathy for the pain of others, or get inured to suffering after witnessing it for the billionth time, or might want to spend their afterlife doing something more fun than reviewing real-time footage of the boring lives of strangers for years on end.
* Chick Tracts where Jack Chick went to Hell for publishing his fundamentalist comics and is mocked by the Devil, who tells him that God doesn't exist and never did.
* Chick Tracts. Where to begin? Dinosaurs lived into the Middle Ages, Allah is a moon god and the existence of the Inquisition is apparently almost completely unknown.
* Chick Tracts. Writer Jack Chick is a fundamentalist Protestant Christian.
* Chick Tract "The Last Generation", Bobby turns in his grandfather for being a Christian in order to get a reward. One of the Christians, Paul, reveals the location of the cabin where Connie and Charles are hiding, afraid of being caught and tortured.
* Chiclets (any sort of gum) in Brazil; in the rest of Latin America gum is "chicle",
* Chico and the Man – that Chico had died, leaving the cause unknown. Late Season 3 and earlier Season 4 episodes stated that Chico was "away."
* Chico and the Man: On the first-aired episode following series star Freddie Prinze's death, a pre-taped comment from co-star Jack Albertson was played over the closing credits, thanking fans and viewers for their show of sympathy.
* Chico and the Man was successful in part because it followed Sanford and Son on the schedule. However, after losing both co-star Freddie Prinze (who committed suicide shorty before the end of the third season) and it’s lead in, the ratings dropped tremendously and was canceled during the final season.
* Chico Bon Bon: Monkey with a Tool Belt whenever Chico panics and a character suggests that he needs to take a Banana Break.
* Chico Bon Bon: Monkey with a Tool Belt (who has voiced a number of minor characters).
* Chico, Harpo, Bingo, and Fabio. She eventually gets it right and recognizes him as Nemo near the end of the movie, much to her own delight. Also, Marlin gets accidentally called "Marty" by one of the other fathers and "Tuna" and "Trout" by Nigel.
* Chico Marx is a holdover of the classic "dialect comedian" from vaudeville, specifically a comical Italian.
* Chico Marx was in a car crash that shattered his kneecap, during the filming of
* Chico Science: A musician from Pernambuco, in Northeastern Brazil, who is commonly identified as one of the frontrunners of the "Manguebeat" movement, which mixes traditional Northeastern and African-Brazilian rhythms with
* Chico's. "[You thought I worked at] The circus? That was ages ago. Last week. I have lotsa jobs since then."
* Chidi and Eleanor before finally realizing and accepting the emotions as real.
* Chidi counsels a friend to get back in shape. The friend's leg tendons snap at the gym, he gets a concussion in the accident and pees himself. 62,000 views on YouTube.

* Chidi was crushed by a falling air conditioner while paralyzed with indecision about which bar to go to with his friend.
* Chidori sacrifices herself to revive Junpei. In normal gameplay, Jin repels fire.
* Chief actually finally breaks down and shows emotion in his voice and expression when Cortana "dies" at the end of Halo 4
* Chief among these worthless boss monsters were the metallized monsters, Red-Eyes Black Metal Dragon and Metalzoa. They required you to tribute a monster equipped with Metalmorph, but lost the most important effect of Metalmorph (namely, it providing a massive stat increase while attacking) in exchange for gaining 400 ATK instead of 300 when not attacking. Their only useful feature is having cool artwork.
* Chief Bogo is debating it) and thinking to himself how pointless and ridiculous it is. The last couple of paragraphs reveal he only thinks it's ridiculous because he already knows they are.
* Chief Bogo the fact that they have their very first rabbit officer... but he doesn't care.
* Chief Engineer Augie Skinner in theory. Commander Raeder in practice, though officially he's just in charge of maintaining
* Chief Galen Tyrol also exemplifies this, particularly "The Mechanic". He spends most of his appearances fixing one thing or another (usually vipers), is very possessive of the vipers, and has an entire crop of newbies to mentor. The few times he does go into combat mode, it's like watching Gordon Freeman. Then there's the time when he put together a working stealth fighter out of spare parts...
* Chief Guard Sadi-chan of Impel Down wields a whip as well as a trident, in keeping with her dominatrix theme.
* Chief Inspector Conway - The senior manager for operations. Helped put into place whatever decisions were made by Ch Supt Brownlow. Conway was sometimes involved in actual policing but very rarely. As a trained negotiator, most of the time Conway would be seen outside of the station would be if there was a hostage situation.
* Chief Irons' men for the preceding week, but you'd think she'd have turned on the TV or radio at some point. Or looked out the window. Or heard gunshots, explosions and screaming.
* Chief Judge Cal is called out on being an insane dictator numerous times. He was liberal with the death sentence to anyone who brought this up.
* Chief Judge Cal ("The Day the Law Died"), the East-Meg occupational army ("Apocalypse War") and the Dark Judges ("Necropolis").
* Chief Judge Silver was murdered and brought back as a revenant by the Dark Judges, retaining his memories but gaining no powers aside from being a walking corpse.
* Chief Kushima shows remarkably little emotion for a man whose arm has just been torn to shreds by a metal cable in the first episode of
* chiefly a personal decision, he wouldn't have this much of financial problem.
* Chief O'Brien, a senior Starfleet non-commissioned officer, starts out uniquely wearing only a single black pip. Later in the series he's given a unique collar badge inspired by real-life naval chief petty officer insignias, with three stripes and two dots indicating his actual rank to be senior chief petty officer (E-8).
* Chief O'Brien as he spends all day with his hands in various machines, and long sleeves would get in the way or get caught on something.
* Chief O'Brien was forced to work alongside a pompous Cardassian engineer. The two bicker and bicker and bicker until, finally, the female engineer comes on to O'Brien and drops an anvil of a pick-up line on him: "I'm
* chief of police. Like with Aang, Toph's parenting skills are put under a microscope.
* Chief Petty Officer Tobin gave what is probably the most succinct real-life example ever during the rescue of the passengers of
* Chief Prosecutor Lana Skye, who has been taking care of her teenage sister Ema (13 years younger than her) since the two of them were orphaned. Of course,
* Chiefs has a problem wherein the chief of the Delano City Police wants to

investigate a suspected murderer - except the suspect lives in Justin County, and Delano is in Mainbridge County.
* Chief Superintendent Brownlow - The officer in overall charge of the station. As
* Chieftain, also set in the same scenario, focusing on one British tank.
* Chieftain is stopped by an angel from killing a monk whose monastery his troops were raiding.
* Chief takes a hit from a train and plummets to his apparent death from a bridge hundreds of feet above ground. He survives with only a broken leg.
* Chief Tannabok is hinted to have known that it was all a ruse, but went along with it because the more benevolent "gods" cared more about the citizens of the city than their traditions, which required ritualistic sacrifices (something the resident priest was all too happy about). A little silliness was a small price to pay when the strangers brightened the lives of all your citizens.
* chief tech and a pilot under your command. Choosing one made the other unavailable afterward (no Rachel meant you had to configure your own ship loadout, or else you'd launch with no missiles, whereas no Flint just means one less pilot to select for the final mission set), or you could choose neither and make both a little less pleased with you, but keep both of them around.
* Chief Thunderhooves, the leader of the buffalo tribe, is a giant even compared to the other buffalo (who are in turn MUCH larger than the ponies).
* Chief Thunder's example. Notable in that it's made of wood and rope, and actually bends under the characters' weight, making it one of the most unique stages.
* Chief Wahoo McDaniel had his first matches in 1961 and his last in 1996 at 57.
* Chief Wahoo McDaniel. Started wrestling in the football offseason, turned full-time by the end of the decade.
* Chief Warlords are actually empowered to give their own Royals/Overlords commands that they're bound to follow, when the Chief genuinely believes it to be in the best interests of the side, although this can be offset by the Ruler retaining the sole authority to instantly disband any subordinate units (although it may be possible for a Chief Warlord to order their master not to disband them, if they think being removed would spell disaster for the side). This sometimes leads to tense relationships between Ruler and Chief.
* Chief Watsup, arrested the Chief of Police in Roanapur. Not only on the take from the various cartels that run the city but has also used his authority to get an unfair advantage when collecting bounties put out by the cartels.
* Chief Wiggum again, in the "Treehouse of Horror" story "Night of the Dolphin", where dolphins attempt to take over:
* Chief Wiggum and Comic Book Guy are also ridiculed countless times over for being fat.
* Chief Wiggum and the other cops walk into the police station with what appears to be an arrested criminal (hidden from sight). They utter phrases like 'I can't wait to get a piece of you' and 'You think you're so hot? Well, we've got everything we need on you'. It turns out that they were talking to a pizza.
* Chief Wiggum and the Springfield police in are sometimes shown to be corrupt as well as incompetent:
* Chief Wiggum is a morbidly obese and grossly incompetent cop. He rats out his own undercover men by accident, and he releases dangerous criminals on the condition that they go to
* Chief Wiggum often rats out his own undercover men by mistake, is bamboozled by criminals, and generally leaves the citizens he's supposed to protect worse off than before he got there.
* Chief Wiggum, reading from a book of "Truely Tasteless Jokes", concludes "And the third travelling salesman says, 'Don't look at me, I just ate all the hot buttered corn!'" This is referencing a real joke and it is unbelievably filthy. Suffice it to say it involves a bodily orifice.
* Chief Wiggum referenced this trope at the end of Part 1 of "Who Shot Mr. Burns," claiming the victim was actually an impostor in a mask until he tugs at his face a bit. "
* Chief Wiggum was the "Mutton-Chop Murderer", who wanted to create a crime even

Lisa Simpson couldn't solve. Played as a parody, natch.
* Chief would seem to be an example of the "Extremely Lucky" variant of this trope.
* Chie Hallard also behaves like this a little bit, especially early on. Chances are good that she probably picked it up (as well as the
* Chie Hori has shades of this, though she's a freelance photographer and information broker rather than a professional reporter. Through her personal blog, she sells her photographs or trades in information, and has been known to do things like
* Chien Po's chant while trying to calm Yao down is a Buddhist prayer.
* Chie Sagamiouno's patrol Carrera, which was actually bought to her by her father.
* Chie Shinohara: The Best Collection, Masami's mother and younger brother were dead all along. They were killed by the robbers Masami encountered on her way home, but their spirits appeared, in order to keep Masami safe.
* Chie Shinohara: The Best Collection, who married her much-older husband and beat her stepdaughter, Youko, after her husband died. They had a bad relationship even beforehand, though whether Akemi actually beat Youko at that time, too, is not revealed.
* Chi flows. They're usually depicted as more ubiquitous and varied than ley lines.
* Chigara Ashada is the only survivor of the Diode Catastrophe, in which her home planet was swallowed up by an artificial black hole.
* Chigley begins each episode by greeting one of the characters, asking if they're going to Chigley, and then asking if he and the viewers may join them. Needless to say the answer (given silently since the characters are not voiced) is "yes".
* chigo monogatari, and the unabashedly pornographic "Chigo scroll", which may be Japan's oldest preserved piece of pornography.
* Chigusa Nagayo's Marvelous pro wrestling promotion, known for having a much lower budget than its predecessor GAEA, inexplicably has vending machines among the products it sells, when the most expensive thing marketed to its target audience is usually a 60 USD DVD set, and it has a much cheaper rate for its streaming service for its shows than the market standard.
* Chigusa Tsukikage and Ichiren Osaki. The world also seems to be hell-bent on keeping Maya and Masumi away.
* Chihayafuru for a while worrying that she's not a good player, but she then starts to pay close attention to other techniques her opponents use, and after a while her ability to take on new techniques ends up becoming one of her greatest strengths.
* Chihayafuru. If anything, the whole thing reflects much worse on Tsukuba.
* Chihayafuru karuta fanatic she is, and b) she connects to people strongly through karuta so he only sees strong opponents like Arata as threats.
* Chihayafuru to have her own goals, and from then on becomes hotly devoted to the game.
* Chihaya's relentless verbal attacks against Hasebe in episode 13 of
* Chihiro and all remaining Shinji's female classmates chase after him obstinately. They have absolutely no hope, though. He is already in a relationship with Asuka, and even if Asuka was out of the picture, they would have to deal with Rei. When Shinji and Asuka finally come clean about their relationship, Asuka declares that "contest" was over before it began. After their declaration, some girls seemed to be unwilling to give up but most of them seemed to accept they had no hope.
* Chihiro Fujisaki is implied to invoke this by moving Naegi's hand onto his body after he confesses his true gender to him. The official translation censors this into making Naegi feel his chest.
* Chihiro Fujisaki: The Ultimate Programmer. His execution is similar to Chiaki's below, in which he's put into a game styled after
* Chihiro Fujisaki. While Chihiro is easily the sweetest and most innocent out of the cast, a scene in chapter two has Chihiro accepting to go swimming with the girls.
* Chihiro Fujisaki. While he survives the first trial, most of his contributions to the franchise as a whole take place after his death.

* Chihiro it. He doesn't want or need friends and even shows displeasure when Chihiro eats lunch beside him in class.
* Chihiro when investigating their corpse. Having previously done so herself, she's already aware of the victim's true sex, and Sakura's shocked reaction clues in the rest of the cast, ultimately helping solve the case.
* Chiho Saito's Kanon is a textbook case. Everybody, even the readers, is taken by surprise when they find out.
* Chiho Saito (the mangaka and one of the writers) has said that people should consider Utena and Anthy to be like a married couple. This becomes especially noteworthy when you consider that Saito had originally been against the idea of Anthy/Utena being a romantic couple.
* Chihuahua...), despite being in the desert, experiences temperatures that have reached -18° Celsius but usually stay around -6° in winter with ocassional snowfall, then in February and March it's the cold plus hurricane-force winds that cause sandstorms, small tornados and regularly knock off anything not bolted down. Followed by April and May which can either be extreme drought or heavy rain, hail and flash floods. June is half-flood, half-heat. July and August are heat waves reaching up to 45° celsius, (up to 50° in the northernmost parts.), then September brings less heat, but more strong winds and more rain, there's one or two weeks of fall in October and by november it just suddenly turns cold as fuck overnight and stays like that until March. So basically, the "seasons" are Fucking Cold, WHOOSH WHOOSH, Floodtime, Fucking Melting, Satan's Butthole, Kinda-nice Week and Fuck it's Cold Again!!
* Chii. Even after he confesses his love for her Freya taunts him to make certain he's serious by telling him that Chii's actions and thoughts are only programming and she will never love him back. His response? "Her feelings live in me!" In the anime version, it's changed to a straight declaration of love because it's suggested that her advanced programming DOES give her emotions.
* Chiisana Kyojin Microman: Five "Microman", coming from the planet Micro Earth at the far end of the universe, are sent to Earth in order to protect it from Acroyer (who seeks to conquer the universe); their human friend is Kohei Kuji, a young school boy, who receives the package with them and initially mistakes them for action figures.
* Chikage takes this trope to its logical extreme by being willing to risk his life for any girl ever.
* Chikao Ohtsuka hasn't made any major appearances in events or received a 5★ upgrade out of respect for him. Aletheia did appear in the Glorybringer quest in 2018, but the audio used for the characters appearing in the quest were purely short voice clips, possibly reused.
* CHIKARA (2002–2020): Ceased operations in July 2020 after widespread allegations of sexual harassment and other misconduct by co-founder Mike Quackenbush and several other wrestlers.
* CHIKARA 2007 and was connected to so many different storylines that time doesn't permit the listing of all of them here.
* CHIKARA and Del Rey proceeded to turn face and run Castagnoli out of CHIKARA.
* CHIKARA, and freed him from having to work for Bakabella ever again.
* Chikara and prevention of deviANT's attempt to burn down the Wrestle Factory.
* CHIKARA asked various CHIKARA personalities who, growing up, their favorite wrestlers were.
* CHIKARA, but the real mastermind behind the whole thing was Claudio's tag partner Ares.
* Chikara, but they still had masked mooks just to swell their numbers even further.
* Chikara came up with a mascot division where a smaller wrestler teams up with a larger wrestler using a derivative of his gimmick (or the other way around), and a mixed tag team division where a man must team with a woman.
* CHIKARA Campeones de Parejas (tag team champions), since Bakabella's timeline is so confused he probably thought Humperdink was still managing in Florida.
* CHIKARA, Delirious would attack their opponents before the matches, leading to

the BDK winning the first fall in around 5 seconds or so.
* Chikara doesn't raise too many questions if they're from New Jersey.
* Chikara El Hijo del Ice Cream and Ice Cream Junior tend to degenerate into girlish screaming when they lose confidence.
* Chikara for "the world sweetest man" to fight in an ungentlemanly manner.
* Chikara had The Swarm - a trio of evil counterparts to popular ant-themed luchadors The Colony. Their names were puns on the word Ant - combatANT, assailANT, and deviANT.
* CHIKARA has Professor Nicodemus, a similarly hammy mad scientist and the manager of The Proteus Wheel (Volgar, Callux the Castigator and Frantik), three huge
* CHIKARA, he noticed Obariyon and Kodama talking and asked when did they start talking, and they said, "A lot's changed."
* CHIKARA/Hydra) and The Sea Amigos (Call-Me-Kevin/D.W. Cycloptopuss III/Unibouzu).
* CHIKARA Icarus countering his "one move" the Chokebreaker (Chokeslam into a backbreaker across the knee) and making him tap out to the CHIKARA Special.
* CHIKARA in 2007, declaring his desire for a "warrior's death" and pledging to take all of his hatred and misery stemming from an industry that he felt didn't respect him out on anyone who got in his way.
* CHIKARA in CHIKARA by reasoning that he was not Exiled!Archie. Stranger!Archie, well aware that he was on borrowed time, still chose to compete against Kingston at the 2nd Stage of the 2013 Tag World Grand Prix, and was backfisted back to that Loser Leaves Town match, becoming Exiled!Archie and presumably closing the loop...
* CHIKARA is becoming a great source of this. Female wrestlers are successful against male wrestlers often enough that individual examples don't need to be added, but there have been a few highlights.
* CHIKARA It was never explained how he had obtained the information he claimed to have on people.
* CHIKARA Kingston right in front of referee Bryce Remsburg. Claudio's reasoning was that nobody that year had been able to knock Tursas off of his feet, and figured that King wouldn't be able to do that either. He was wrong, as King not only knocked down Tursas, King pinned him to win the match.
* CHIKARA managed multiple 'this is awesome' and 'we love wrestling' chants. Fellow Brit Johnny Kidd was only 55 in the same weekend.
* CHIKARA match. Ring announcer Loudon Noxious asked if Mantis would be joining everyone in the ring and Mantis responded, "Shut your mouth!"
* Chikara, mostly due to the fact he was only 130 lbs, making it really easy to sympathize with him against almost everyone he was matched up with.
* Chikara "n-word," not the actual word Booker T had mistakenly said nine years earlier.
* CHIKARA of the Badd Boyz, they cut a promo proclaiming their toughness in the most stereotypical way possible. Of course, they were shooting pool the entire time.
* CHIKARA on May 25, 2014, as Worker Ant, having taken up the mantle of the original who retired due to injuries in 2009.
* CHIKARA on November 22nd, the man started his promo by saying, "I told you A War Is Coming, and I'm tired of waiting."
* Chikara partner. They made it their mission to defeat the gnashgabs and uplift pro wrestling to a new, glorious level, and they wear colorful 'armor'. "Huzzah!"
* CHIKARA Pro has one of the funnier examples of this trope: Lance Steel, a knight who got time-warped to the present day and decided to become a wrestler. He later formed a tag team with... another version of himself, who he went back in time and picked up a week before he originally went forward in time. Try not to think about the logistics of them performing a double-team move too hard.
* CHIKARA promotes itself as family-friendly and discourages foul language. This led to fans chanting "Holy Poop" after impressive moves or dives.
* CHIKARA, Razerhawk is gold, Nytehawk is dark purplish-blue, and Danjerhawk is crimson.
* CHIKARA's commentators would call Delirious' top rope splash to his opponent's back, which was normally called Shadows Over Hell, "Shadows Over Heck" or "Shadows

Over Hades."
* CHIKARA's "Engel," and are introduced by their own personal ring announcer, Jakob Hammermeier, in German.
* CHIKARA show don't even know Swiss Money Holding was a trio...what's that? It was once a quartet? Yep, early on when the stable was still based in German Stampede Wrestling, they had a fourth member named Don Heavy.
* CHIKARA speaks in a loud, rambling matter, occasionally spitting out a coherent phrase or sentence. Appropriately, his team with Hallowicked and Frightmare was called Incoherence.
* CHIKARA splashed Dunkerton a second time after the match, with Daizee smiling. But then, Daizee generally viewed any guy interested in her as this trope.
* CHIKARA starting with children from the audience coming to the ring to celebrate with them.
* CHIKARA Sword of Destiny. Calhoun pressed her above his head and dropped her into a swing dancing position. Heidi did NOT like it at all.
* Chikara takes it a step forward with the "castigo excesivo" rule allowing the referee to disqualify based on anything deemed "excessive punishment".
* CHIKARA. The BDK won, of course, with Ophidian taking Ragnarok for the pin.
* Chikara. The Reyes del Aire features "high fliers" and Pequeños Reyes del Aire features Mini Estrella High Fliers.
* CHIKARA took out a remote control to turn out the lights, someone in the crowd said, "Wow, this is one of the greatest things ever."
* CHIKARA track, Quackenbush noted that sometimes Reckless did things to entertain the fans and sometimes he did things to entertain himself.
* CHIKARA using the Eye of Tyr on him, he switched to a white and red design, suggesting that this was meant as a sign of things to come.
* CHIKARA was described as "the most multisyllabic name in CHIKARA history."
* Chikara went into a hiatus after it was prevented from running shows out of their own training facility, the Wrestle Factory, because neighborhood activists found, among other things, that the shows detracted from the "complexion of the community". When Chikara made its return, it did so eight blocks away from the Wrestle Factory, in St. John’s Lutheran Church.
* Chikara where The Mysterious and Handsome Stranger chases deviANT through a series of doors, though they were at least all on the same wall.
* Chikara, which did last but rarely crosses over with Chikara anymore.
* Chikara, which lasted until the end of the season, when the hex was broken.
* CHIKARA, who must weigh 150 pounds, but is treated by announcers and other wrestlers as a behemoth.
* Chika seems to be this. It is extremely heavily implied (especially in the manga) that she has sex with those boys that give her gifts, and there are quite a lot of them. Half-averted: when asked how to "do it without screwing up" she declares she doesn't know anything about that. Whether she means she doesn't know anything about sex, or just never worried about messing up, is left to the reader.
* Chik-Fil-A is a popular if controversial fast-food franchise in the United States, but its attempt at extending the franchise into Britain was met with embarrassing failure. Not only does the brand's association with evangelical Christianity not play well with a culture that considers religion a private matter, even without the aggressive queerphobia that's soured the brand's reputation even in its own country, but they were trying to break into an already saturated market: Practically every high street fast-food joint in the country already sells fried chicken anyway.
* Chikyū no Hōkago, a manga about a teen survivalist and his trio of schoolgirl sidekicks surviving in a planet where all other inhabitants have turned into shadow-beasts.
* Chikyuu Sentai Fiveman, dated each other while filming the series. They were married after the show ended and have since raised three children.
* Chikyuu Sentai Fiveman: The Zone Empire's flagship Vulgyre is revealed to have a life of its own, and is in fact the season's true villain.
* Chikyuu Sentai Fiveman uses a different eyecatch every episode on both seasons.

* Chilades is so cold that humans require devices that artificially raise their own body temperature in addition to heavy clothing just to keep warm, has toxic lakes and is inhabited by mutated animals, either native or immigrated and all carnivorous (and it's suggested that any herbivores have either
* Chilanga Mask 3. Aniversario when Ricky Marvin broke out of a pin cover by grabbing his nose.
* Chilanga Mask fans tend to be very accepting of luchadores from the US, to the point fans of other Mexican enterprises
* Child 47; a.k.a. Earl Richard/ Love Henry) the lady gets punished this way for killing her lover. Certain versions also include her trying to pin the murder on her maid, who gets acquitted because she won't burn no matter what the king's men try.
* Child Abduction is Not Funny themselves will abduct their own children! Even the mayor does not question this.
* Child actor Peter Ostrum was offered a lucrative multi-picture film deal after playing Charlie Bucket but found film acting to be too much hard work, and took the option to go to college instead and work as a livestock veterinarian in upstate New York, which he is to this day. He only returns to the public eye to do local school assemblies on his life and career, or on rare occasions for Wonka-related events (such as the commentary for the 25th anniversary DVD). Thus, this was his only film role.
* Child at Heart Forever occasionally inserts herself in her original stories, usually the ones that cross over the
* Child Ballad #100; it has many variations with different names, among them "John Barbour", "Tom the Barber", and "Willie O'Winsbury"), about a king's daughter who falls for a sailor and the king's disapproval, contains the following lines, where the king changes his mind:
* Child Ballad 10) the elder sister pushes the younger sister into the river (or sea) to drown her, and she sinks and swims until reaching a mill pond. (Yes, even when thrown in the sea.) In some variants, she is still alive at this point and offers a gold chain to the miller to rescue her. The miller takes the chain and pushes her back to drown.
* Child Ballad #13, "Edward": A mother questions her son about the blood on his shirt; though he tries to lie, he eventually admits to having killed his brother. (Or, in some versions, "a boy" not related to him.)
* Child Ballad 209 "Geordie" is about a woman pleading for Geordie's life. Sometimes he's pardoned.
* Child Ballad #20, "The Cruel Mother", is about a girl who kills her two babies born out of wedlock, the children's' spectres coming back to haunt her. The song also goes under various names such as "Down by the Greenwood Side" and "Bonny Greenwoodside".
* Child Ballad #49, "The Two Brothers": The brothers are wrestling, one of them stabs the other. In some versions it's an accident, in most it's a murder with very unclear motives.
* Child Ballad and being invited to join his merry band of outlaws. Read or listened to all at once, they become one long catalog of failure, the great Hood getting his ass handed to him over and over and over. He even loses to Maid Marian.
* Child Ballad and works for the king, rising to the position of his chamberlain. (That is the servant in charge of his chamber. Still a very high status for a servant.)
* Child Ballad", he promises to come for her and marry her within seven years, in most variants.
* Child Ballad. In the final verse, the husband catches his wife's lover in the bedroom. The wife tries to claim he's really a milkmaid, and the husband sarcastically notes that he's never seen a milkmaid with a beard before.
* Child Ballad laments how his love had become a serving man, and explains to the king how they had been murdered by the heroine's mother.
* Child Ballad, Lord Thomas, on his family's advice, marries for money.
* Child Ballad — though after that time, the dead have a new demand:

* Child Ballad not to reveal who he is, is reduced to working as a shepherd, and later as a stable boy.
* Child Ballad of "The Suffolk Miracle" (Child #272) has this plot (with a horse instead of a car). In the ballad, the hitchhiker is the protagonist's lover, who died of grief when her father prevented him from seeing her; it also makes use of the reappearing garment device (in this case, a handkerchief which shows up in the man's grave).
* Child Ballad, one variant describes the innocent queen's hair as yellow:
* Child Ballad she can make the shirt, and she escapes the implied rape by demanding impossible tasks of him in return.
* Child Ballad", Sir Aldingar slanders the queen with charges of infidelity for having rebuffed his advances.
* Child Ballads: Many ballads have ghosts coming back to drive their killers crazy ("The Cruel Mother", Child #20), or just to say goodbye ("Sweet William's Ghost", Child #77; "The Wife of Usher's Well", Child #79).
* Child Ballad, some variants have this as the motive to kill the king.
* Child Ballads, turns her stepdaughter into a dragon; the title character must kiss the dragon to restore her.
* Child Ballad, the Duke of France offers a rich dowry with his daughter. The false steward posing as the young Lord of Lorn takes it without comment; it is the true lord who declares that he wants to marry the daughter more than the gold.
* Child Ballad", the hero had promise not to tell the truth to anyone. When the heroine overheard him lamenting his fate to a horse, she asked him to tell her; he refused, she sat down on the hay and told him to ignore her and go on telling the horse, and he did so.
* Child Ballad, the heroine chases after her mounted lover on foot. He tries repeatedly to buy her off until finally, he decides to marry her after all.
* Child Ballad, the heroine goes to serve the king as a serving man after her husband and baby have been murdered; there, the king falls in love with her. In some variants, her dead husband, in the form of a ghost, tells the king what had happened to her; in all, the king executes her mother, who had arranged for the murders.
* Child Ballad, the heroine refuses to leave the hero, despite his declaration that he goes to woo another woman. He insists she dress as a footpage and run alongside his horse.
* Child Ballad, the heroine's husband and baby are killed by her mother, and she disguises herself as a man to run away and work.
* Child Ballad, the hero insists that the heroine dress as foot page and walk on foot while he rides. When she goes into labor and is delivered of his son, he decides to marry her after all.
* Child Ballad, the hero is imprisoned and must be saved by the heroine.
* Child Ballad. The king goes wooing on the recommendation of his brother, and arrives to find the lady is being forced to marry. He rescues her.
* Child Ballad", the mysterious, possibly angelic champion who fights for the queen.
* Child Ballad", the queen's hair is unkempt from the mice and rats gnawing on it while in prison.
* Child Ballad, the sister's motive in drowning her sister is jealousy.
* Child Ballad", the title character sets riddles and executes those who do not answer. A knight comes and answers them; then he explains he is her brother, come to humble her pride. She says she will go with him anyway, and he reveals that he is already dead.
* Child Ballad", the young lord saves his life by promising never to tell that his servant robbed him; the servant turns him into a servant until the daughter of a local lord figures out how to get the story out of him. Whereupon they promptly marry.
* Child Ballad to both be wooed by the false lord of Lorn and come across the true one and decide to hire him.
* Child Ballad to ensure that the baby is born in wedlock, and has her resorting to

some desperate measures to ensure the right father marries her.
* Child Ballad version, of a man about to be hanged, but this is the older variant.)
* Child Ballad", where the ravens instead discuss how the dead knight's hawk, hound, and lady have all deserted him, so they can eat his corpse.
* Child Ballad, Willie's mother is trying to do this retroactively by cursing his wife to die in childbirth.
* Child Ballad", Willie's mother knows his wife could not have given birth without undoing her spells, which lets them trick the knowledge of how to do it out of her.
* Child-based and junior high level baseball and softball, and some semi-professional leagues often have variations of the "mercy rule." For instance, a townball league for children may even have a rule where a team that builds a huge lead — say, 30-0 — after just one inning is no longer is allowed to bat, and the trailing team is given more than the standard three outs (usually six, or if they are the home team and haven't batted yet, nine) to give everyone at least one at-bat, with the game continuing only if in the game manager's judgement the losing team has sufficiently caught up.
* Child Born of Love: After he took over his father, Kid prefers people simply call him "Death." Chrona however still calls him Kid, something he would rather she not do in front of their children.
* Child Born of Love and are practically human until this happens, so they are usually killed when they are young before they fully-develop.
* Child Bride. When watching this movie, the producers decided that they would never use it in their show. There's a hilarious moment in one interview.
* Child by Rape as soon as possible so being pregnant wouldn't have the chance to ruin her body. (It often does that and she's put everything into her physical prowess.) This comes up when it turns out she's given him up as corrupted by Batman's ethics and is replacing him with a clone.
* Child by Rape), but the defendant spins the story well enough to deadlock the jury.
* Child by Rape from her to secure his claim to the North). Knowing this makes him snap and he breaks out of being Reek for the first time.
* Child by Rape setting, where the Factol of the Bleakers was born between a loving couple of human man and female orc.
* Child by Rape Tommy Yates's mother was raped as a teenager and then died giving birth to him, leaving him in the care of his abusive grandmother. Her treatment of him (particularly telling him "My daughter's womb was cursed") made him a violent misogynist who abducted, starved, and mutilated over one hundred women.
* Childcare Action Project, he, without exception, calls it "proof of the objectivity" of his system. He has a long, detailed explanation for watching movies that are rated as being only appropriate for adults. It basically amounts to "a few parents might take their kids to R-rated movies and I know better than them (and everyone else)".
* Child Eater: Sumerian and Akkadian texts mention the malevolent goddess (or she-demon) Dimme/Lamashtu who kidnapped and ate babies. Amulets warding against her were widespread. Dimme-kur/Akhkhazu and maybe Lilitu are other Mesopotamian Child Eaters.
* child eating a bowl of cereal for breakfast will probably eat about 60 grams of it. Yet this is about 2 servings worth of Frosted Flakes.
* Childe Cycle avoid having to pay the Dorsai afterward. "One-fourth of Rochmont's fighting strength — one battalion of Dorsai — were sent by Rochmont forth alone, to bleed Helmuth, and die." It didn't turn out well for Helmuth, and even less so for Rochmont. "No more is there a Rochmont town, no more are Rochmont's men. But stands a Dorsai monument to Colonel Jacques Chrétien."
* Childe Cycle. Dorsai and the Friendlies provide Military, Ste. Marie focuses on Farming, the Exotics on Health Services, Coby on Mining, Newton and Venus on Science, Ceta on Commercial Services, Cassdia on providing Technical Services as well as mercs. Zombri, otherwise an uninhabited world, is a Strategic location.
* Childe Cycle has Mara, named after the Buddhist equivalent of Satan. In-universe,

the name was a holdover from when the Exotics were the Chantry Guild, specifically occultists. Possibly Zombri, which is close enough to "Zombie".
* Childe Cycle has several worlds hire mercenaries out as part of the interstellar market. There are two notables:
* Childe Cycle. It works much like the Geneva convention, but also provides guarantees and responsibilities of Merc officers to their men. For example, if an Officer fails to do his duty or wantonly endangers his men, that officer could be court-martialed and executed.
* Childe Cycle lack metal resources, and as a result have to import it. And because these worlds lack these resources (among others) it affects their economy in interstellar trade.
* Childe Cycle, this trope is subverted by the standard rifles: They are extremely refined bolt-action rifles, powered by mechanical springs and levers. This is explained as they are the most reliable and tamper-proof weapon imaginable, as anything higher-tech opens the opportunity for higher-tech countermeasures.
* Childe Cycle. Though officially they have a planetary government, the Dorsai are fiercely independent folks. As a result, the world government has no real power in comparison to the other worlds.
* Childe Cycle. Though there are constant sectarian violence with the Friendlies, their leadership is powerful enough to keep things in order.
* Childe Morgan. Alyce is conducting a Naming ritual (which is usually done when the child is seven or eight), and she questions him as part of the ritual:
* Childe Morgan, Marie, Ahern). The second and third books add the next generation of Corwyn's ducal house.
* Childe Morgan, new King Brion Haldane recoils when he sees clerics kneeling in prayer around his father's bier and demands to know why they're there. He's told the Archbishops ordered it as a mark of respect. It's possible Brion recalled how Donal was flogged by order of the Church for executing a priest who was an accomplice to the rape and murder of a small boy.
* Childe Rowland", Burd Ellen is kidnapped by elves when she inadvertently runs around a church "widershins" (counter-clockwise), and two of her brothers attempting to rescue her are trapped and enchanted by the King of Elfland, until Childe Rowland saves them.
* Childe Rowland has advised the youngest brother Rowland how to evade the elves' baleful magic, the youngster can single-handedly make his way to the Tower of Elfland and defeat the Elf King, using nothing more than brute force with a sword.
* Child Festival Scramble has Azura, if she's married to the male Avatar, worry that their daughter Kana will end up as cold and anti-social as her.
* child form. This certainly doesn't help in her job as an English teacher, the students frequently taking advantage of her distractions. She's more focused as an adult, but if she stays too long this way she starts reverting to her childish behavior.
* Child Hater) apart from growing up at an orphanage alongside younger kids, although other characters also dislike their talents. Her repeated refusal to let anyone inside her Research Lab makes it very apparent that she's hiding something. Not to mention Kaito even states in Chapter 1 that Maki looks like she's killed before, an odd statement to make about somebody with a supposedly non-violent talent.
* Child Hater: A person who despises children, often to ridiculous levels.
* Child Hater: A person who hates children is liable to try and harm them.
* Child Hater: I despise children. So yes, I'm an ageist and I don't care.
* Child Hater: I hate kids and I'd like to get rid of those little shits!
* Child Hater Poof. Though, his parental skills are quite questionable since Crocker tried to teach him how to shave in total darkness and how to drive... despite the latter being an infant.
* Child Haters by the end of the episode (except Negative Numbuh Four).
* Childhood Brain Damage: A character's stupidity was likely caused by them getting hit on the head as a baby.
* Childhood Brain Damage: Although not always done intentionally, it's possible for

abusers to inflict head injury to children.
* Childhood Friend and a sequence in which Yuri basically rewrites physics to save humanity, we get this line from Flynn to tie up the game:
* Childhood Friend and the black hole that's Ash Ketchum, she would rather stay on the train as long as possible to see what the train has in store and to reinvent herself.
* Childhood Friend Ladybug find the notion of Chloe being a heroine so repugnant, and gets upset when others are glad that she's gotten knocked off her pedestal a bit.
* Childhood Friend Nora. In the story proper, Nora gets rather flinty with her partner Blake when it seems like Blake is getting too close to Ren.
* Childhood Friend of Link's a century earlier, always calls him "Linny."
* Childhood Friend Prince Geordo). Although they can't be together, he admits to her that he's much contented staying by her side.
* Childhood Friend Romance: A character has a crush on someone they've known since childhood, but the recipient of the crush only likes them as a friend.
* Childhood Friend Romance, but gives more focus to the bonds between Alm and the three village boys. Plus, if the player leaves Kliff and Faye at Ram, Celica can recruit them later and have them follow the trope with her instead.
* Childhood Friend Romance is to have them be acquainted with each other as children.
* Childhood Friend Romance near the end, and continue to work together (though Emma does express concern that this will impact their business).
* Childhood Friend Romance. Realizing this helps Tenzin extend the hand of friendship, after which the two manage to get along better. She also seems to get along pretty well with Tenzin's children with said former love rival, especially after they help her fight off the Equalists. By the end of the show, they’re pretty good friends.
* Childhood Friend Romance: Two people who were best friends as children fall in love as adults.
* Childhood Friend Romance: Two people who were platonic friends since they were children end up in a romantic relationship.
* Childhood Friends back or run away. If you make the right choices, however, she can get better.
* Childhood Friends: Friends who have known each other since childhood.
* Childhood Friends, she first appeared in the anime arc based on these games and was never seen or mentioned prior.
* Childhood Friends. They're also completely different. Sonic is a jumpy, messy person who won't hold his tongue while Johnny is mild-mannered and well-groomed.
* Childhood Friends were in preschool, Kaname had a crush on their teacher.
* childhood friends who come from the same sect. This change was done probably to allow for more physical intimacy between the two; it wouldn't have passed censorship if they were strangers like in the novel.
* Childhood Friend Winry Rockbell. At the end of the series, they are married with children.
* Childhood Home Rediscovery: A character rediscovers a place that they lived as a child, but has no recollection of it as an adult.
* Childhood Inspector from that very same country. Who gets into your house very quietly, asks children to show them their bedroom and get dressed and then... he gives them a hot dog if he considers them "child enough". What were they thinking?
* Childhood Marriage Promise promise to get married when they grow up.
* Childhood Marriage Promise to her 17-year-old cousin (the protagonist), to which her father has differing opinions on depending on if his own Social Link was completed.
* Childhood Marriage Promise to seek him out and take him up on the offer.
* Childhood Marriage Promise: Two kids promise to marry each other when they grow up.
* Childhood Memory Demolition Team: A construction team that destroys a character's childhood memories when said character grows up.

* childhood of vicious bullying, during which she was betrayed by someone who she thought was a close friend.
* Childhood's End (1953). The Overlords' ships mysteriously appear over the major cities of Earth. Many years later all but one disappear, leading to in-universe speculation that the rest were illusions the whole time.
* Childhood's End: Aliens guide humanity into ascending into a galactic superconsciousness.
* Childhood's End come from. When the Ouija gives out an answer (which turns out to have been 100% accurate), one of the women faints (who turns out to have been the person who subconsciously knew the answer).
* Childhood's End for a long time, because they know that we will not be comfortable with it.
* Childhood's End has such a device given to humans to look into their past. It causes the collapse of the world's religions.
* Childhood's End have similar technology, and that it contributed to the downfall of mass religion, as people got to see their religious figures in flesh.
* Childhood's End himself. The alien Overlords possess technology so far beyond human understanding that they might as well be gods. Humans for the most part accept that it is in fact some form of technology, but characters within the story observe that from the human perspective, Overlord technology might as well be magic.
* Childhood's End) in view of this, and most of the adults of the final generation linger on for a bit before committing suicide.
* Childhood's End stars. This gives it an utterly bizarre orbit in which every moment brings a unique arrangement of planet and stars.
* Childhood's End that the psychic backlash from it somehow echoes back into the past.
* Childhood's End: The Overlords are speculated to have come from a low gravity world (once they reveal their appearances) as they're twice as tall as humans and have wings. They wear belts that seem to have anti-grav tech when on Earth.
* Childhood's End: The Overlords come from a world whose gravity is weaker than Earth's. Also, before the Overlords show themselves to humanity, one human character points out that as far as any human knows, the Overlords might breathe chlorine.
* Childhood's End, the Overlords superficially look somewhat human, but on closer examination are far more alien.
* Childhood's End). The story also features the Overlords, alien creatures that are an evolutionary cul-de-sac of sorts, who are apparently unable to achieve this level of evolution for some reason.
* Childhood's End, they'll figure out the trick. Their species had been seriously considering voluntary extinction before they were contacted.
* Childhood's End without any hint that humans have even reached Stage 1.
* Childhood sweethearts Ai and G also go at it, though there it's actually an
* childish, and because her obsession with him blinds her to the rest of the world.
* childish and naive enough to believe Usopp's stories. While he is 17 chronologically, he acts much younger than his age (though he was 8 when he consumed the Devil Fruit that granted him his human side and considering the hybrid form resembles a child, this may be the explanation.)
* Childish Gambino. A dark version, with him and his girl who is involved with another man, in their own not quite a relationship where Gambino can't break it off, but isn't able to make it more than what they are already.
* Childish Gambino along with this in its music video. It frequently shifts focus between Gambino's gleeful dancing in the foreground, and the shifting scenes of chaotic violence, death, and rioting in the background, including images of a man jumping to his death and one of the Four Horsemen of Death riding a white horse. Considering the lyrical content itself makes similar shifts between being hedonistic and carefree to critical and disturbing, this juxtaposition is very much intentional.
* Childish Gambino also engaged in a very weird example with his sampling of an

obscure
* Childish Gambino became viral on the internet due to its violence and bizzare allegories, and also because of the advice to not make memes out of it only fueling further meme making.
* Childish Gambino. Even now, the few appearances he makes are usually to promote something specific.
* Childish Gambino" features an animated Gambino walking down a street while animated versions of popular rappers play in the yards he walks past.
* Childish Gambino has this lyric on Bonfire (off his 2011 album Camp):
* Childish Gambino interludes here and there (which still relate thematically to the overall story).
* Childish Gambino said: "I just wanted to make a good song. Like something that people could play on Fourth of Julys."
* Childish Gambino's "Heartbeat" is the narrator having hooking up with his ex while both of them have moved on to other people, and the emotional dynamics of their relationship.
* Childish Gambino's "III. Telegraph Ave. (Oakland by Lloyd)" is framed as the narrator getting in a car and turning on the radio, hearing a radio DJ introduce the next song, "Oakland", by Lloyd (not a real song). The song starts playing and ambient noises (such as car noises, phone ringing) are heard in the background as the narrator sings along to the song. Finally Childish Gambino takes over singing at the chorus.
* Childish Gambino's "Real Estate" suddenly features an ending rap outro by...
* Childish Gambino's "That Power" is about making all details of his life into this trope, so they can't be used against him.
* Childish Older Sibling: An older sibling is less responsible than the younger sibling.
* Childish Older Sibling, breaking his stuff while running away when he tries to stop her, but sometimes is more directly confrontational and often mercilessly teases. She once stole Dexter's money right out of his hands to buy something, and when Dexter asks why she did so, she tells him point-blank, "You're so small and weak that I could!"
* Childish Pillow Fight: A sleepover tradition is a group of two or more people playfully hitting each other with pillows.
* Childish Tooth Gap: A character has a gap in between their teeth that showcases their innocence.
* Childish Tooth Gap: A gap in between one's teeth to signify their innocence.
* Child-killer Freddy Krueger was let off because, as expanded on in
* childlike appearance sure is. (Fortunately, it turns out nothing happened besides cuddling. But it was nonconsensual cuddling, though.)
* Child-Like Voice: A teenager or adult with a notably less matured tone of voice to emphasize their child-like quirks.
* child molestation allegations, in which investigators actually looked for secret tunnels under the daycare facility because children claimed that they'd been abused there.
* Child Naming Request: The parent or expecting parent of a baby lets someone else choose a name.
* Child of Eden has space whales as well as space manta rays and a space phoenix.
* Child of Light, and even deeper within is the magnificent Palace of the Sun.
* Child of Light, a race of travelling merchants whose business thrives thanks to Magna's provision of transportation.
* Child of Light come in elemental variants with differing stats and weaknesses. Their element is usually denoted by their colour or texture — fire spiders would be orange and on fire, ice spiders would be blue with ice clouds, and earth spiders would look greenish.
* Child of Light filled with monsters. She destroys said monsters with a huge sword and light magic.
* Child of Light gets aged from a young girl to a teenaged lady after obtaining the Stars and Moon. The Sun takes her to adulthood.

* Child of Light has a rather short one where a mouse merchant challenges Aurora to "turn an apple into gold". It involves passing an apple to a teacher to obtain his shovel, passing the shovel to a digger for a lantern, then passing the lantern to a mouse miner to obtain the gold.
* Child of Light has the Bolmus Populi, who are obsessed with economics and trade. Their town is built on the back of a giant, which allows them to easily sell their products to distant regions. The main quest when you reach their town is to cure the giant of his illness, which prevents him from transporting them around, and from transporting you to the temple where the moon is kept. Another quest is to open the vault where they keep all their gold, which has been locked.
* Child of Light has the Temple of the Moon, which is suspended above the Cliffs of Erin and surrounded by many smaller floating islands that once made up an aerial city.
* Child of Light takes place in Lemuria, a mysterious continent inhabited by various fantastical races. There are few humans, though there were at one point four human explorers who settled the continent, and the current rulers are descended from one of them (Cynbel the Wise and Erin the Conqueror). Exactly where Lemuria is supposed to be located is unclear. It seems to be a sort of otherworld, and the main character only awakens there after dying in the real world.
* Child of Light with abilities that can slow, stun, or push back foes.
* Child of Light, you can run away from any battle in the game (including all the bosses), recover health and mana for free in the overworld via wishing plants and Igniculus, change the difficulty level whenever you want, and all your party members receive experience from battle regardless of whether they participated.
* Child of the Future" has a white student raising her mixed race daughter after a brief affair with a black friend.
* Child of the Hive are a government organisation officially known as DPNI: Department for the Protection of National Intellect.
* Child of the Hive is shown at the age of seven capable of speaking near-perfect German after only three lessons. She also has knowledge of Latin by that age and is later shown reading a book in the original French. As a teenager, she is acknowledged as being a mathematical genius and being extraordinarily good at computer programming.
* Child of the Hive. When Alex, Ben and Will run into the Underground to escape pursuit, Alex concludes that the trains weren't given a script to follow because they have to wait for one to arrive.
* Child of the Storm across two books, and well over a million words) with a long, leisurely kiss.
* Child of the Storm, after choosing a very poor time to out the fact that the other girl's boyfriend was cheating on her.
* Child of the Storm Agent Yelena Belova and the psychotic Arkady Rossovich a.k.a. Omega Red, who apparently 'got off' on killing children. The former will kill at the drop of a hat, just because someone's annoyed her, while the latter kills/drains the life out of people because it's fun. Both are the Psycho, though Belova pretends that she's the Jingo.
* Child of the Storm alludes to the Celestials as a matter of course, as well as making vaguer allusions to Atlantis before it sunk below the waves.
* Child of the Storm, all with considerable infusions and twists from various aspects of mythology, history and religion.
* Child of the Storm, also famous for never lying, leaves them all in the dust. As is repeatedly pointed out, being truthful is not, by any means, the same as being honest.
* Child of the Storm, ancestress of Helga, who was usually a very gentle and loving healer, but used her skills for the exact opposite when her daughter was assaulted, tortured, and killed by Frost Giants.
* Child of the Storm and a conduit to the Elder God Chthon. Accordingly, it causes most of the problems of the first book.
* Child of the Storm and a Nundu (a gigantic magical leopard), attack something. Then their roars are cut off and the Winter Soldier enters with their heads in his

hands. A Chimera's only been successfully slain once in history and a Nundu takes one hundred trained wizards to bring down.
* Child of the Storm. And, apparently, are addicted to coffee, to the point where Loki wryly considers that Fury could extract diplomatic concessions by placing an embargo on coffee.
* Child of the Storm and can fly, this usually tends to be about fifteen feet in the air.
* Child of the Storm and colonisation of space - after all, many of the limitations on space-travel hinge on transport times and limitations. Make it nigh instantaneous, and, well...
* Child of the Storm and comparing Naked!AU!Carol to Prime!Carol (who he's seen in sleepwear). This is actually justified - the subconscious, after all, includes the libido.
* Child of the Storm and grabs some popcorn to enjoy it. The sheer audacity of this causes all three to break out laughing.
* Child of the Storm and he ends up limping off instead, having stubbed his toe.
* Child of the Storm) and he finally reacts by rolling his eyes and telling her to put some clothes on.
* Child of the Storm, and help build some psychic defences. However, she quite clearly doesn't intend for the contact (primarily just finger-tips to temples, though they're both in close proximity, and her breasts are pressed against his back) to have this effect, and is gently amused, while Harry is utterly mortified.
* Child of the Storm - and if he thought it was necessary, and that it would work, he'd do it in a heartbeat (though he does admit that he'd feel guilty).
* Child of the Storm and its sequel, Asgardians and the mostly extinct Kryptonians (who are stated to have previously interbred) are the most prominent examples of this, as are the Kree - the Shi'ar and Skrulls are mentioned, but like other species like the Jotuns, they are at last humanoid. The classic Marvel explanation of 'the Celestials did it', since the entities in question make a passing appearance, likely holds true.
* Child of the Storm and occasionally references that fact). It's referenced by the narration in chapter 58 of the sequel, where he finally seems to manage it.
* Child of the Storm (and someone who was and is worshipped as one) Thor Odinson reveals that he used to be James Potter, the response from McGonagall is a stunned, "Good God." Thor grins and says, "you called?"
* Child of the Storm, and the Cult of the Eradicator, an apocalypse cult that actively tried to ensure Krypton's destruction and saw Jor-El as their prophet, 'the Herald of the Eradicator', resulting in a brutal three-way civil war.
* Child of the Storm, and, therefore, are far more dangerous than if they were simply warriors. After all, survival carries the requirement of innovation, and Thor notes that Tony Stark, in his quest to survive, created a power source on par with stuff used by most of the powerful alien civilisations and built a battle suit that could take down a god. Admittedly, said god (Volstagg) had been going easy, not wanting to accidentally squish Tony like a tube of toothpaste, but he still got choke slammed into the floor.
* Child of the Storm, and they do their best to help, and keep things like Surtur locked away. However, they now to take a much more hands off approach, after a horrible disaster better known as Atlantis...
* Child of the Storm and this well-meaning gesture went spectacularly wrong, leading to the files being mothballed.
* Child of the Storm and Uhtred is a classic Brick and the most physically powerful of the kids (the jury's still out on exactly how strong Diana is, and she'll be Thor class one day, but he's probably stronger than her for the moment).
* Child of the Storm. And unnervingly, most of it has so far come true.
* Child of the Storm, and with Ross' track record in enhancement, no one could really blame him for getting angry.
* Child of the Storm, a powerful psychic in his own right, would have put up one hell of a fight, and they would have noticed. They then move to the correct conclusion that his mind escaped and is hiding elsewhere.

* Child of the Storm arc of the sequel, when it is very much not). It's one of the things people find both annoying and unsettling about him. However, when he's tap-dancing on the edge of sanity and/or about to pull something spectacular (and usually, terrifying), it widens into something downright manic, with far too many teeth for anyone's comfort.
* Child of the Storm are, at first, also along these lines, and still tend to flare dangerously if he's knocked for an emotional loop. This can be downright dangerous for him and whoever is around him.
* Child of the Storm - Asgard has a very martial culture, but is also aware of the messier aspects, as is pretty much everyone else with even the slightest bit of experience of combat.
* Child of the Storm, as Harry does on himself, being invariably horrified by what he's done when it sinks in.
* Child of the Storm: as in Marvel canon, the Phoenix Force is this, and is merged with Destruction of the Endless, another example of this trope, along with the latter's siblings, and Galactus.
* Child of the Storm, as in the MCU, Asgardian technology is much like this - though the tech is sci-fi level to begin with. It all runs on magic, which is depicted as the fifth fundamental force of the universe (and the more of it you can gather together, the more you can affect the other four).
* Child of the Storm. As it is, though, Ron and Carol actually get on fairly well, and he's actually got a small crush on her in his own right.
* Child of the Storm. As with canon, it doesn't always result in magic, or indicate power. Or at least, you don't have to be born to powerful practitioners to be powerful - Doctor Strange reveals that his parents were pretty limited wandless practitioners at most, yet even as a young man, only Merlin and Morgana were definitively stronger than him.
* Child of the Storm at the time, b) grown up reading stories with forests that were far thicker and more common than they actually were.
* Child of the Storm at this, but also acknowledges that Strange is (when he actually bothers) a very good teacher.
* Child of the Storm, before the half mad Agent finally gets a look at Warren, who then removes his wings, letting him fall to his death. The description is reminiscent of a horror movie based on the Old Testament.
* Child of the Storm, believing that they should let it happen. They also view Jor-El as some kind of prophet of doom to be venerated, much to his horrified despair.
* Child of the Storm bio-weapons facility with a reputation for questionable ethics and human experimentation...
* Child of the Storm. But damn, he's going to offer it to them anyway. Because, you know, Superman.
* Child of the Storm, but he's not naturally super-fast, meaning that he's relatively limited.
* Child of the Storm by combining all the source material canons together.
* Child of the Storm can broadly be summed up as "Apocalypse? Great! Fun day out for all the family!", no one's overly bothered about it.
* Child of the Storm canonical Ms Marvel/Warbird suit, lightning bolt and all, as an example, contemptuously referring to it as a swimsuit... then having it turn up as an actual swimsuit, just to underline the point.
* Child of the Storm, Carol Danvers evolves into this from minor secondary character, particularly by the sequel, when she's got top billing alongside Harry.
* Child of the Storm class) he'd be able to destroy it relatively easily, all by himself.
* Child of the Storm "Death in Black Trousers," and Destruction of the Endless a "Cosmic Whatsit," amongst others.
* Child of the Storm. Death of the Endless notes that he "always tells the truth and almost never tells the whole truth."
* Child of the Storm demeanour. Fury also notes his friend's skill at this trope.
* Child of the Storm derived protection from his mother works - though it's repeatedly hinted that he's got a plan for once he actually figures it out.

* Child of the Storm Doctor Strange does this every now and then, usually on individuals.
* Child of the Storm, Doctor Strange notes that people don't like to see him because he usually only turns up when the shit is about to hit the fan in the most spectacular fashion possible.
* Child of the Storm else to Lucius, though it's never stated exactly what.
* Child of the Storm, even though it's in Hogwarts, on the grounds of all deposits of gold and silver coming under the jurisdiction of Mines Royal, part of the UK's 'Crown Estate' (lands technically owned by the Crown that are administered by the government). He admits, when challenged, that this distinction probably won't hold up for long in court since the chemical relationship of silver and mithril is unknown, but points out that by that point, the definition will have been amended, and in any scenario, any legal case would have to be made in muggle courts, which the Ministry would never think of, or require booting MI13 off the site, which the Ministry aren't capable of (partly due to having lost a large number of personnel only a few months before, partly due to MI13's far greater numbers — including young witches and wizards — and resources).
* Child of the Storm, even with the caveats, this revelation is quite reasonably greeted with horror.
* Child of the Storm, for whom tormenting the Ministry is one of his few pleasures in life).
* Child of the Storm from Professor Xavier to clear out the reflex denial.
* Child of the Storm future self leaving a letter with Xavier fifty years in the past to give to him in the present tends to result in confusion and headaches.
* Child of the Storm graceful to be human, and promptly makes the observer's instincts stand up and scream.
* Child of the Storm, Gravemoss has these as a standard, and is one of the vilest characters in the setting.
* Child of the Storm, Harry and his father, Thor, are initially all but identical — when Thor's using his James Potter form, anyway. Later, some of Lily's features emerge in Harry, meaning that it's a more realistic version of this trope.
* Child of the Storm, Harry does this Neo style in chapter 74, thanks to some impressive telekinetic abilities, though chapter 75 reveals that he needs to be aware that he's about to be shot at to pull it off.
* Child of the Storm has a couple, most notably Harry Dresden and his big black duster.
* Child of the Storm has a number of characters who end up with a lot of names:
* Child of the Storm has a number of examples owing to the collection of canons:
* Child of the Storm has a number of these, as a result of major league world building and the sheer scale of the setting.
* Child of the Storm has, as a side-note, the reveal that Asgardians are more or less addicted to coffee, with it being speculated that Fury could extract concessions from Asgard on various issues by restricting the coffee supply.
* Child of the Storm has Clark, as usual, even if he is a little more paranoid and wary than canon, being a generally cheerful soul who believes in the innate goodness of humanity.
* Child of the Storm has Gravemoss, an insane necromancer who, among other things, croons over super-zombies.
* Child of the Storm has Harry being unfortunately prone to this in the first book and at the start of the second.
* Child of the Storm has Harry prone to using this on non-human monsters (particularly vampires) when he ends up in a particularly bad mood.
* Child of the Storm has hinted that the legacy of Atlantis prior to its sinking (c. 20,000 years before present), when it was the most powerful magical society in Earth's history, will play a key part in the sequels.
* Child of the Storm has many examples. And all of these, somehow, work.
* Child of the Storm has most magical people capable of doing this, but few are particularly good at it — the jack of all trades thing being in play.
* Child of the Storm has several examples owing to its mixture of canons:

* Child of the Storm has Sinister up to his usual shenanigans, genetics wise, though in a slightly different fashion:
* Child of the Storm has the Asgardian royal family produce these on a regular basis.
* Child of the Storm has the bedroom based advantages of being a telepath made clear by Betsy.
* Child of the Storm has the benevolent Stark Industries (stated by Lucius Fox to have a stranglehold on high end tech) and Wayne Enterprises, and the less benevolent Luthorcorp, Oscorp and Roxxon.
* Child of the Storm has the canonical examples of Harry Dresden, John Constantine, Albus Dumbledore, T'Challa, and Bruce Wayne — though the latter two are still in training, so to speak, one being a smart but somewhat brash young Prince when first introduced, and the latter being a teenager. Additionally, it has:
* Child of the Storm has the seven Endless, as well as a few mentions of the Abrahmaic God, who mostly keeps to Himself and may or may not be of the same ilk as Odin, Zeus, etc.
* Child of the Storm has this appear relatively frequently, given the number of teenagers and the story goes out of its way to show how terrifyingly dangerous such powers - even relatively weak ones - could be in the hands of someone with absolutely no idea how to control them.
* Child of the Storm has this as one of Doctor Strange's defining traits, to the point where he almost literally falls apart when things go off his pre-determined rails. However, he doesn't meddle with everything (sometimes he doesn't need to, and in general, he prefers to guide things and people so that they'll follow his preferred course anyway), and it is justified by the fact that he's got the road-map to defeating Thanos in his head. This is part of why the Avengers continue to tolerate him after all the shenanigans he pulls - though it's also why he has a very strained relationship with Wanda Maximoff, his former Apprentice and foster-daughter, and Thor has to restrain the occasional homicidal impulse around him.
* Child of the Storm has this happen a few times, owing to the number of teenage characters.
* Child of the Storm has this inverted when thanks to a surprise and a stumble, Carol ends up falling face-first into Harry's chest. As he dryly reflects, it would have been much more embarrassing if it had been the other way around.
* Child of the Storm has this several times, sometimes on a very meta level.
* Child of the Storm has Thor (formerly James Potter - the first attempt at the whole 'humility' experiment had mixed results) express this to Harry on several occasions.
* Child of the Storm has Tony and Rhodey, in the traditional examples.
* Child of the Storm has Zatanna Zatara appear in the sequel as an Italian graduate of Beauxbatons and the new Defence Against the Dark Arts Teacher, wielding a form of magic that her parents developed, which merges wandless and wanded styles. However, she mostly seems to use the aesthetic rather than actually working as a stage magician.
* Child of the Storm have the Avengers as this. Originally, they were a bunch of misfits, and even if two of them (Thor, and a reformed Loki) were literal legends, and another (Steve) had also achieved legendary status, none of the ordinary human population (or superhuman population, come to that) believed the first two existed, or that the latter was still alive. Now, they're heroes renowned throughout the Nine Realms, and possibly beyond.
* Child of the Storm helicarrier, on the grounds that he's aware that he's not totally sane and he might need stopping some day. Equally, he's suggested to know that a number of his senior staff, particularly Sean Cassidy, are mainly around to keep him in check, and is fine with that, too.
* Child of the Storm (here, the basic version that HYDRA refined), it has a nasty habit of exploding if the process isn't judged carefully/is made too complicated.
* Child of the Storm: Hermione does not believe that Harry Dresden is an actual wizard even though she lives in a world where not only magic exists, but also aliens, gods (or god-like beings) and the Sorcerer Supreme, because Dresden is in

the phone book as "Wizard" (which, in fairness, is against the laws of the magic community she lives in, though not Dresden's).
* Child of the Storm. He's also confirmed as the man who killed Kennedy.
* Child of the Storm), he starts becoming much more creative again - though his default battle strategy is still to try and set something on fire.
* Child of the Storm him, and only aren't as part of a deal Carol made to come quietly.
* Child of the Storm him once he returns his full attention to the matter at hand, and routinely manipulates, bullies, and outright terrifies most of the most powerful beings in the setting.
* Child of the Storm hints at this, with immortal necromancer Gravemoss noting that in reference to Namor in his office as King of Atlantis (and as someone that he, Gravemoss, would not want to face) that Atlantis used to be a) on the surface, b) considerably more powerful, going by the remark 'even though it [Atlantis] was not that which had ruled in times of old.'
* Child of the Storm hold him in check, as well as that it unnerves him as much as anyone else.
* Child of the Storm). However, they stay more or less dormant, with a brief flare up in chapter 44, and for a while, they turn on (to an extent) whenever he gets angry or stressed. By chapter 60, he's using them comfortably and gets stronger very, very quickly.
* Child of the Storm if he uses it/dies and it kicks in to protect him. Consequently, much of the second book is spent trying to master himself and it.
* Child of the Storm includes the common HP fanon idea of magical cores early on, before quietly dropping it, with the author admitting that he'd forgotten they weren't canon. However, it partly keeps the fanon idea of Fred and George constantly finishing each other's sentences - as time goes by, they shift into following on from each other's sentences, meaning that it sometimes seems like one person's dialogue spread over two people.
* Child of the Storm. In short, Harry is very right to worry for the spiders.
* Child of the Storm in the fic, it all gets horribly and confusingly meta.
* Child of the Storm In the latter case, he left behind a note, saying, 'I.O.U. one Loki'. It gets to the point where Thor bluntly states that if Strange wants to steal something (like the Tesseract), then not even Asgard has any real way of stopping him.
* Child of the Storm: in the sequel, Harry tries a number of methods of avoiding girls under mistletoe in the run-up to the Yule Ball, and eventually gets desperate enough to try this with a trunk, so he can hide in plain sight if needs be. Plus, no one's going to try and kiss a trunk. It actually works, more or less, until Trevor (Neville's toad) makes a bid for freedom... near a window... just as Harry turns around suddenly.
* Child of the Storm in which he lays out how his fellow wizards frustrate him and how he could still become a dark lord that would put Voldemort to shame, before stating the reason he remains headmaster and nothing more is because of this temptation.
* Child of the Storm is determined to use MI13 to bring them to heel by force.
* Child of the Storm is done, rather than stick around for an election he's bound to lose because of all the stuff that happened on his watch.
* Child of the Storm is imminent and that you would be well-advised to run. Preferably to another galaxy.
* Child of the Storm is in play, in part because he keeps his eyes on her face, unlike most teenage boys.
* Child of the Storm, is now an example of this trope in its own right, being over 825,000 words long and climbing.
* Child of the Storm is significantly stronger than Harry. However, it's noted that while the Grey bloodline had a psychic or two every now and then, most of them were relatively weak, nothing compared to the latest generation. This is partly explained by the fact that they originally descended from a branch of the Clan Askani, which seemed to have lost its psychic spark... until recently.

* Child of the Storm is starting to come to the fore, with magical governments in the US having been brought to heel by SHIELD, and MI13 doing the same to the British Minister of Magic during the series.
* Child of the Storm. It doesn't hurt that they've got the Winter Soldier on a leash and are allied with a Loki level necromancer called Gravemoss. That said, they aren't invincible and are liable to make mistakes - especially once the Winter Soldier slips his leash.
* Child of the Storm. It doesn't really kick on until chapter 9 when darker themes are introduced, the plot gets going, it becomes abundantly clear that the forces of good aren't going to have it all their way. Even then, it's all shadow boxing until chapter 21, which significantly ups the stakes.
* Child of the Storm, it is repeatedly noted that Harry and Clark Kent look exactly alike - though the resemblance diminishes to siblings/close cousins as Harry starts resembling his mother a little more. This one is actually justified, however - when Thor was incarnated as James Potter, Odin went out of his way to give the House of El a nod by moulding James!Thor's appearance to mimic the 'El look'.
* Child of the Storm. It is worth noting that Harry's a force of nature in his own regard, particularly as time goes on.
* Child of the Storm - it's just that he doesn't either need or particularly want to speak. And it serves to make him even more terrifying.
* Child of the Storm, it's now believed that it can). Additionally, other supernatural beings had gone into retreat following the industrial age, but are now noted to be coming back in a big way. This is all considered to be a rather mixed blessing, with Professor McGonagall observing that while a new age of heroes seems to be emerging, where you get heroes, monsters are rarely that far behind.
* Child of the Storm. It's usually a sign that he's feeling confident, and/or that he's just had enough and is snapping.
* Child of the Storm, magic and technology — though there tends to be a little more emphasis on magic than technology.
* Child of the Storm, magic is a fundamental force of reality, and the likes of the Summer and Winter Courts of the Sidhe greatly influence things like the change of the seasons.
* Child of the Storm — do what is right rather than what is easy.
* Child of the Storm means that he feels that he has a duty to step up to the plate... though he won't be at all happy about it.
* Child of the Storm necromancer from the Nine Realms called Gravemoss.
* Child of the Storm negate those on-paper advantages, even before one takes into account that he tends to go after people who are even more powerful than he is.
* Child of the Storm of more brainwashing. With a bit of Doctor Strange's help, though, he finally manages to break free.
* Child of the Storm of the second book) and other usual suspects, the Outsiders (eldritch beings from outside space and time), and things like Thanos and Galactus, all are present. But the good guys don't lack for firepower, either.
* Child of the Storm of this - you can pretty much guarantee at least one lampshade per chapter.
* Child of the Storm, "Oh, is that what they're calling it these days?"). It also manifests technologically, with Thor's canon comment of Earth showing it's "ready for a higher form of war" being demonstrated by the rapid progression from basic nuclear technology to:
* Child of the Storm, partly (but not exclusively) thanks to the number of teenage characters.
* Child of the Storm performs on anyone unfortunate enough to be near him.
* Child of the Storm plays this for some realistic drama with Carol. She's about 14 or 15, but looks like she's in her twenties. This gets her lots of unwanted male attention, and makes it hard to fit in with people her own age.
* Child of the Storm powered-up Carol in for experimentation. Her uncle, Brigadier Jack O'Neill, objects to this. Very pointedly. A cracked conference table was involved. It stopped just short of being a cracked skull for General Ross.
* Child of the Storm puts it, joined the "scared-of-Harry-Dresden" club).

* Child of the Storm Readers were then informed that yes, it was a joke, and no, they shouldn't be surprised.
* Child of the Storm restrain him, and he had to have the relevant memories removed - his getting them back, after a decade or so, triggers the events of the story.
* Child of the Storm, seeking to nurture its potential. It is notable that those aliens exposed to humanity long term, such as a few Kryptonians (most famously, Jor-El), and Captain Mar-Vell, tend to develop similar attitudes.
* Child of the Storm seems to enjoy shocking the audience at the same time as the characters.
* Child of the Storm) seem to be able to pull an inexhaustible number of tissues out from some hidden place on their person when comforting a crying (grand)child.
* Child of the Storm serves him for only as long as he believes that Strucker is the strongest.
* Child of the Storm, she figures it out very quickly - and is just as tongue-tied herself. Given that both have issues with emotional openness, this isn't surprising.
* Child of the Storm, she finds out the truth: her real name is Rachel Grey, twin sister of Jean Grey, and she was stolen and replaced at birth by Sinister. She quite literally collapses.
* Child of the Storm sniggered at him the whole way through 'Hark the Herald Angels Sing'. Apparently the line 'hail the incarnate deity' set her off.
* Child of the Storm (some characters note that humanity is becoming steadily more accepting of the existence of the supernatural) and the rapid development of human technology. Furthermore, it transpires that some alien races, like the Kryptonians, who visited frequently, and the Kree, who have a sort of Ambassador in Mar-Vell, have been keeping an eye on humanity for a long time. And then, of course, there is the interest that the Phoenix has in it.
* Child of the Storm. So the consequences aren't so much non-existent as... deferred.
* Child of the Storm spell. It is unclear whether the other two captured Champions, Fleur or Krum, are similarly capable, but it is probable.
* Child of the Storm spends in their hands equates to over six months - more than enough time to transform him into the Red Son, the successor to the Winter Soldier, and use him to subjugate half a continent.
* Child of the Storm stage, and so Jean hasn't even realized the depths of her feelings for him or vice versa.
* Child of the Storm strewn through the rest of the story. It is near ridiculously dense.
* Child of the Storm style werewolves, which are like canon, infectious, and akin to lesser versions of the loup-garou.
* Child of the Storm subverts this, with Sean Cassidy and his assistant, Warren Worthington III, as the subject of much lusting by the Hogwarts student body, including Hermione Granger, but nothing more.
* Child of the Storm suggests that Doctor Strange is this, his sole objective being to protect the Earth and, it is implied, arm it so that it can protect itself very effectively indeed. To this end, he has absolutely no qualms about manipulating even (especially) those who trust him into doing exactly what he deems is required and has been doing so for hundreds of years. In fact, he's so good at it that no one really picks up on it until quite a long way into the plot when the various coincidences begin to pile up and it becomes clear that everyone is Strange's pawn. Even then, they can't go against what he says because, as previously noted, it tends to go badly when that happens.
* Child of the Storm, surrounded by people who love and care for her, she's slowly getting better.
* Child of the Storm takes notice when he notes that he's releasing copies of some of his collection.
* Child of the Storm tangle, first sketch a picture, then cover them with a blanket.
* Child of the Storm, teleportation gates, and a 'Nexus Engine', an internal

teleporter that can move something as large as a super-sized helicarrier - or the size of Camp Bastion, if Sinister's technology is based on the same principles), and the results are called 'Nexus Bombs'. They function by targeting an area or a sufficiently large foe and teleporting them without a set destination, essentially scattering them across about 2000 kilometres and multiple dimensions, and they're shown to be hideously effective.
* Child of the Storm tendencies and it's implied that the main reason he's on the Excalibur squad is that Peter Wisdom wants to keep an eye on him.
* Child of the Storm, that Hermione is actually the daughter of Wanda Maximoff and John Constantine, something that even Hermione herself doesn't know, the existence, name, and broad background of Clark Kent (particularly impressive, since his sole starting point was that Jean-Paul, a friend of his, had been in Kansas and being vague as to why, and that strange stuff happened in Smallville), and by implication, the identity of Draco Malfoy's mental hitch-hiker. And that's just the start.
* Child of the Storm that is barely civilised at best and too much trouble for its own good, and a manifestation of Asgardian eccentricity. Others who get a closer look at Earth, however, like Mar-Vell and the late Jor-El, saw a certain something in humanity.
* Child of the Storm that make him more dangerous to himself than anyone else, and a headache when it comes to trying to figure out his family tree. The powers are resolved by the end of the first book. The family tree, however, only gets worse.
* Child of the Storm. That said, it is implied that his mutation and Asgardian abilities will clash in the form of a brain hemorrhage.
* Child of the Storm that she's his great-granddaughter, something she'd only just found out herself.
* Child of the Storm) that the difference between the two is mere "semantics".
* Child of the Storm that was taught by gods - specifically, Asgard), that were incredibly advanced and powerful by modern human standards to begin with.
* Child of the Storm The fact that it's in the basement of one of HYDRA's bases is creepy enough. The fact that Gravemoss uses it as a lair/laboratory makes it a lot more so. Very few of the minions who are unlucky enough to get sent in come back out - and those who do are very rarely in the same shape as when they went in.
* Child of the Storm. The first time was accidental. The second time, on the other hand, was thanks to a very carefully timed remark.
* Child of the Storm the habit of referring to it as "spocking" an eyebrow.
* Child of the Storm. The latter is so hyped up on enhancers that she doesn't seem to notice.
* Child of the Storm, there are a number of characters with greater or lesser degrees of telepathic abilities.
* Child of the Storm. The remains of the body are said to have probably reached Jupiter's orbit a minute or so later.
* Child of the Storm. There's a slight twist in that she was intended as less of a weapon in the conventional sense and primarily to be a "Hound," tracking and capturing subjects for experimentation. Some of these subjects are intended to play the trope straight, but thankfully it never gets that far.
* Child of the Storm: there's Hogwarts, which is a bit eerie, as per canon (even more so, since it's explicitly alive), but it's far from the weirdest example.
* Child of the Storm. The story covers his physical, mental, and emotional progress in between those stages.
* Child of the Storm the traumatic experiences and proclivity for radiating ominous psychic power are taken into account.
* Child of the Storm, they're usually justified by superhuman physiques and necessity. For example:
* Child of the Storm, they sometimes do this, though more usually follow from one sentence to the next - which can still be a slightly disturbing double act.
* Child of the Storm. This is less because of their stupidity (they're all pretty smart), per se, more a complete lack of common sense.
* Child of the Storm, this puts him in position to play this role for both Dresden

and Clark.
* Child of the Storm this trope when she's trying to get a read out of a secret agent sent to recruit her.
* Child of the Storm this version of him wsa a member of the The Omniscient Council Of Vagueness before that page got cut.
* Child of the Storm (though it's hinted that it took a while for it to grow into that).
* Child of the Storm, though the process of resurrection can leave them briefly unstable and destabilise already fragile areas of reality.
* Child of the Storm. Though they're all young (teens/late preteens), considering the people that they become... Loki's spot on.
* Child of the Storm throw down in part of the Nevernever in the sequel.
* Child of the Storm times older than Thor) snaps that he should be glad that Strange isn't calling him a child.
* Child of the Storm (to begin with) led to Magneto taking her in as his ward.
* Child of the Storm to ensure that powerful individuals would be drawn to doing this trope for him.
* Child of the Storm to extract information, and is generally the sort of person you don't want to be on the wrong side of. Ever.
* Child of the Storm to maintain his foothold in reality. The book itself is indestructible, and it just being outside of its containment causes reality to slowly start breaking down.
* Child of the Storm turn up, she gently quotes the marriage vows: specifically, "'til death do us part", and encourages him and Jane to be happy.
* Child of the Storm, two MI13 Agents likely died a horrible death and suffered an unspeakable fate post-mortem in order to give the Prime Minister the chance to escape, doing so in full knowledge of what would happen to them. The Prime Minister rather stiffly insists to Sharon Carter a.k.a. Agent 13 that he be given their personal details so he can ensure that they are suitably honoured. They are awarded the Victoria Cross (the direct equivalent of the Medal of Honour, and even more rarely awarded). This is made all the more remarkable by the fact that they are still technically running for their lives at this point.
* Child of the Storm, Uhtred prefers to wield a single headed war-axe.
* Child of the Storm Unsurprisingly, considering his dorky nature, it's somewhat squashed from his stint in his pocket, but it is nevertheless well received.
* Child of the Storm, use his future knowledge for purposes of perfect comic timing, and indulges in being infuriatingly mysterious.
* Child of the Storm uses the trope extensively, but also deconstructs it.
* Child of the Storm, usually by Harry, due to the fact that he starts the story aged 13; and as noted by the narrative, he is surrounded by very attractive ladies a lot of the time.
* Child of the Storm variant. Or more accurately, 'join and keep some semblance of your independence, or die and be transformed into one of my minions anyway'.
* Child of the Storm walk away whistling. Considering his personality, this is less than surprising.
* Child of the Storm Wanda Maximoff; then, hilariously, try strenuously to deny it. No one's buying it.
* Child of the Storm, was also unintentional, though both she and Tony seem very happy to be parents.
* Child of the Storm was created to hold him, and empower the Alliance that had fought against him. This resulted in every world involved save Earth/Midgard being transported to another dimension, as well as the Jotuns becoming Frost Giants, Dvergar becoming Dwarves, Alfar and Svartalfar becoming immortal Elves, and the Aesir and Vanir becoming Gods.
* Child of the Storm When he was already boxing in Loki's class, magic wise. Yup, creation is screwed.
* Child of the Storm, when looking to emphasis darkness and horror, but sometimes it slips into this when discussing the landscape of Hogwarts and its grounds, and Asgard.

* Child of the Storm when they fight, with imbalances in power between the two manifesting as Ice Ages and Global Warming (along with an explosion in the population of everything, viruses and plagues included).
* Child of the Storm wherein Steve Rogers, still trying to get the hang of laptop computers, accidentally stumbles onto a porn site (he's using one that belongs to Tony Stark, after all). Unable to figure out how to turn it off, he resorts to punching the screen. While complaining that girls should not do such things with cups.
* Child of the Storm), which has detrimental effects on the fabric of reality.
* Child of the Storm, which made a bargain with him, turning him into Doctor Strange.
* Child of the Storm, which months later, he has yet to totally recover from.
* Child of the Storm which so far consists of that first completed book, an ongoing second one, and two shorter side-stories. According to the author, there's plenty more to come.
* Child of the Storm, which underlines the above mentioned example of the Celestials, who meddle in the fates of lower species at their own whim.
* Child of the Storm... which worked very well right up until it didn't, and the Atlanteans destroyed themselves, and nearly took the universe with them.
* Child of the Storm, while the latter has a more subdued freak out and leaves to rebuild their life.
* Child of the Storm. While they don't require it to exist, or even require outright worship, the more people know about them, the more of their power they can exert on the mortal plane. However, he does also note that he's far more capable and dangerous as a result of regaining his sanity.
* Child of the Storm who believes that the strong should rule the weak - he's just a bit more flexible about the whole race thing.
* Child of the Storm, who enjoys fine wines and tends to bemoan the staining of his expensive robes.
* Child of the Storm who knows when the excrement is about to hit the rotating device) evacuates local populations in advance. However, it's made abundantly clear that the Battle of New York claimed dozens of lives, and the Battle of London had casualties too - because while measures were taken to clear Central London of civilians as far as possible, London is still an enormous and densely populated city, and the battle quickly went global.
* Child of the Storm whom many villains want to either capture and use, or get out of the way, before he can grow into his full abilities. As a result, in almost every major battle he's in, he's up against villains at least as powerful as him, usually much stronger. The cases where he wins pretty quickly are usually cannon fodder for something worse.
* Child of the Storm, whose vintage is somewhere in the billions and there is mention of the Dark Elves (though they are believed to be largely extinct).
* Child of the Storm, who started the fic in his final year of school, occasionally observes that he went to a boarding school with shades of this and that Hogwarts was in many respects very true to life, except for the fact that it drastically understated two things: the sex, and the violence.
* Child of the Storm who will do things simply because he thinks that they're funny and both cast and reader frequently want to punch in the mouth.
* Child of the Storm (with, as it happens, coincidentally the same last name).
* Child of the Storm, with both the MCU and Mainstream versions of Extremis being referenced (the latter is a refinement of the former), as well as the Infinity Formula.
* Child of the Storm with careful application of specialised make-up and loose, long clothing that helps conceal her build. It works pretty well, but it's heavily implied that the main reason it works is because like many examples of this trope, no one knows to look.
* Child of the Storm without equal, makes a habit of this as part of his master plan to stop Thanos. He's also implied to not be the only one who's tried it, with the Norns of Yggdrasil previously having meddled the same way, and it's very

strongly hinted that he 'persuaded' them not to.
* Child of the Storm without risking his life. Dumbledore, the realist, expects that a fortnight is more likely.
* Child of the Storm with the attendant indestructibility) barely manages to eat one before 'with a slightly wan smile' politely refusing more, while the narration remarks that they 'went down the throat like a rockslide, sat on the stomach like a cannonball, and had the taste to match.' However, to everyone else's silent astonishment, Uhtred (a teenage Asgardian) wolfs them down, including all the ones others slipped to him, and enthusiastically pronounces them to be delicious.
* Child of the Storm zig-zags the trope. On the one hand, it's heavily character-driven, with the Avengers and their various associates being cast as a dysfunctional family, and the effects of the plot on the characters being emphasised, and a persistent criticism of the first 30 chapters of the first book is that they're very short on actual action. On the other hand, the grander plot starts picking up speed from chapter 40, with the vast majority of major events (and many minor ones) being revealed as part of a grand chess game being played by Doctor Strange, taking on more characteristics of a superhero epic, while the story (and its author) disdain a number of classic soap opera tropes (particularly of the wacky misunderstanding variety) as ridiculous.
* Child of the Wolves was inspired by Hall's pet husky, Nylak. She saw how wolf-like Nylak looked and wondered if dogs could live with wolves.
* Child of Two Worlds he scrambled the Northern and Ironborn versions in his head in a particularly self-destructive way. The result was that those following Northerner standards considered his tactics underhanded and cowardly, while the Ironborn were impressed by his cunning and audacity but thought trying to hold territory instead of looting the place and running was suicidal and pointless.
* Child of Two Worlds: I'm not sure about which of these two groups I personally identify with more, because I feel like I would never really belong with both of them.
* child. Peter's response? "You better watch who you're calling a child, Lois. Because if I'm a child, then you know what that makes you? A pedophile. And I'll be damned if I'm gonna stand here being lectured by a pervert!"
* Child Prodigies are unfun, especially when placed in positions of tremendous responsibility in their mid teens.
* Child Prodigy, although Dee Dee has been portrayed as actually being smarter, or at least more experienced, on occasion.
* Child Prodigy flight training. Indeed, if you check your wingman stats towards the end of the campaign, Grimm has the highest kill count of all your teammates.
* Child Prodigy in mathematics and got his own PhD much earlier than the normal trajectory.
* Child Prodigy — didn't start writing music until middle age, and even the so-called "child prodigies", including both Mozart and Beethoven, didn't really hit their stride until at least their late teens.
* Child Prodigy — he had originally written it with Minerva as the protagonist, but then realized that he was basically writing a book about Artemis and just decided to bring him back as the lead character, while also establishing demons as another subspecies of fairy.
* Child Prodigy one to receive his mother's love, even if this means burning the whole world down.
* Child Prodigy. Thanks to Kaori's encouragement he is getting back into his groove.
* Child Prodigy. This, however, alienated him from his family and classmates and, as such, stunted his emotional development to the point where he has difficulty recognizing basic emotions in others. He's also stated that his eidetic memory causes him to not enjoy much of life because of the lack of challenge.
* Child Prodigy. This is due to her being from a family of super-geniuses, so fans believe it runs in the family.
* Child Prodigy with a cowardly streak (though he's still a good engineer).
* Child Reduction Act. Families with more than one child must either pay a tax on

the extras or send them to concentration camps.
* Children and adults have been worldbuilding and inventing paracosms for a long time. Here's an 1866 article by Francis Jacox about creative people and their imaginary lands: "
* Children Are a Waste: Children are seen as inconvenient and burdensome.
* Children Are a Waste: Our society is better off without bratty, annoying, stupid, and useless children. How dare anyone make babies!
* Children Are a Waste: People who believe that it's wasteful to have children.
* Children Are Innocent: A child is often displayed to be the victim of dangerous political policies.
* Children Are Innocent: Children are devoid of malicious and sexual intentions.
* Children Are Innocent: Children are unaffected by the world's cruelty.
* Children Are Innocent especially in contrast to the more bratty and selfish Bat.
* Children are not immune to impostor syndrome, especially if they've been raised with abusive discipline and punishment. While the conventional wisdom is that kids create an
* Children are often used by supporters to vindicate their ideology. The idea seems to be that if a child believes your view then that is because they are pure and innocent and not just because their parents told them what was "correct".
* Children Are Special: Children have feats that are exclusive to them.
* children being poisoned on Halloween, or given unwrapped treats with razor blades, needles, and the like inside.
* Children brought up in British military garrisons are known by the not-wholly-derogatory nickname of
* Children, Creepy Middle-Aged Weirdos Swept Up In Harry Potter Craze".
* Children do this while standing in the bathroom line if their Restroom need is Critical in
* Children (either by birth or through parents' naturalization) with dual citizenship of two countries that do not allow multiple citizenship. they are excepted until they come of age, when they must choose one citizenship over another. Failure to renounce either, or forgetting to follow through with paperwork proving they have renounced the other citizenship could lead to this.
* Children from Pakistan and other areas that are subjected to military drone strikes
* children-gods to maintain the Earth while he leaves to do vague plot things. When he comes back, the sky-goddess and sea-god have done well, but the land-god has neglected parts of his territory and left it to wither. So the creator-god rewards the sea-god by giving the ocean life, as in animals. (The sky-goddess would have been given the same, but she was "too young and inexperienced" for it.) Then the creator-god leaves again, and the land-god starts getting very resentful of his siblings...
* Children in Heat, depicts a consensual encounter with a monster. This one is rare because it's much less effective at inciting horror than its sibling subtropes are.
* Children Make Terrible Pets. The story is about a young bear named Lucy who finds a human boy out in the woods. She takes him home, names him "Squeaker," and tries to make a pet out of him. Read that title one more time...
* Children Of A Dead Earth: heat management is absolutely crucial in spacecraft construction given that only radiation is viable method for getting rid of heat in space. Not only your spacecraft need radiators, you also need to consider that since they're rather fragile (and while armoring them up is possible, it also reduces the radiator's efficiency, not to mention mass penalty. And if you use naturally fragile material for radiators, armoring it up won't help much), if you have just barely enough and they get shot during combat, you're going to get cooked. This means you might want to install backup radiators, but that would also impose delta-v penalty due to extra mass. This is also something one must consider when designing equipment that needs cooling, since radiator efficiency scales up to temperature^4, but high outlet temperature can negatively affect the system's efficiency and limit what kind of materials you can use.
* Children Of A Dead Earth range that the game will switch into combat mode is 1000

km, so that could be considered as maximum range of sorts, since guns and lasers can only be fired in combat mode. Drones and missiles can be launched in navigation mode, however, and is only limited by its acceleration and delta-v in order to intercept enemy ships.
* Children Of A Dead Earth: Space warfare is a regular occurrence in the solar system, which humanity has largely colonized. Despite this, the entire conflict is between two large human space superpowers and there is no indication that even extraterrestrial microbial lifeforms exist.
* Children Of A Dead Earth system — and has either been produced or the theory behind it is known and is in testing, such as nuclear rockets, gigawatt lasers, and railguns.
* Children of a Lesser God, but as he's about to do that, he slips and falls:
* Children of a Lesser God, every deaf character is played by an actual deaf actor.
* Children of a Lesser God involves a romance between a teacher at a school for the deaf and a female former student (now custodian) at the facility. Deaf actress Marlee Matlin played the latter in the 1986 film adaptation, becoming the first deaf actress to win an Oscar for Best Actress.
* Children of a Lesser God, where the female student also is deaf and has some serious psychological issues.
* Children of an Elder God: After Asuka realized her crush Kaji loved Misato, Asuka broke down sobbing onto Shinji's chest when he tried to comfort her.
* Children of an Elder God: After fighting Amaliel Asuka wraps her arm around Shinji's and drags him away, urging him to tell her all about his battles. She was not intending to turn Shinji on, but "with Asuka's arm entwined with his and her warm tone of voice, his mind turned to mush".
* Children of an Elder God: After losing her mother and being ditched by her father Asuka's temper got real bad. Fortunately she got a decent foster mother raised her properly, and her behaviour softened after a while.
* Children of an Elder God. And after a while they became inseparable. At one point Asuka tells Shinji that she will not leave him, ever. And she doesn't.
* Children of an Elder God and wonders how it can support its own weight:
* Children of an Elder God are flooding the city. As Shinji and Misato are running from them, Shinji sees a man setting himself on fire to burn away dozens of spiders clinging to his body.
* Children of an Elder God are flooding the city. As Shinji and Misato are running from them, Shinji sees a man setting himself on fire to get rid of dozens of spiders were clinging to his body:
* Children of an Elder God, Asuka and Hikari argue because Asuka doesn't like Touji and doesn't get why Hikari likes him. Ironically, Hikari thought Asuka's then-current crush on Kaji was bad because Kaji was an older man and a playboy.
* Children of an Elder God, Asuka and Shinji have their first date. They dance together for a little while, and finally Asuka kisses him. From that point on, they are officially a couple.
* Children of an Elder God: Asuka is a pyrokinetic: she's capable of generating and controlling fire and flames.
* Children of an Elder God, Asuka kissed Shinji for the first time after their first date.
* Children of an Elder God: Asuka to Kaji in the early chapters when she still chased after him. Meanwhile, Kaji (who was after Misato) ignored her or treated her like a little girl.
* Children of an Elder God: At the beginning, when Asuka still had a crush on Kaji, she tended to blush around him. An example happened in chapter 4:
* Children of an Elder God blushes and smiles when Shinji says she's beautiful. Touji and Kensuke agreed that her smile was memorable.
* Children of an Elder God-created five-dimensional dreamworld stuck into the real universe where the laws of physics are polite suggestions. When the buildings are forced to obey gravity and exist in a three-dimensional space, the whole place collapses.
* Children of an Elder God don't belong among normal human beings anymore, and

after graduating high school, they decide to leave their guardian and friends and go sailing "around the world". They never returned to human civilization.
* Children of an Elder God: Gendo is a jerk who treats his subordinates like garbage, mistreats them, sends them on dangerous missions without warning them previously about the risks, insults them and belittles them rather reprimand them properly, and sacrifices them when it is convenient.
* Children of an Elder God get ready to fight a new set of cosmic horrors who menace humanity again.
* Children of an Elder God hated each other as much as they hated the Children, so they tried to fight the main characters and each other simultaneously.
* Children of an Elder God. However, their stolen powers are inherently foul and corrupting. So all of them feel dark urges and desires, and they struggle against them the whole time.
* Children of an Elder God. However they were puppets with no life of their own. They'd stop moving if no one was looking at them.
* Children of an Elder God: In chapter 15, Asuka wakes up, looks around, realizes that Touji is sleeping on her bed and screams. Her screams wake Touji up, he sees Asuka and starting yelling, too.
* Children of an Elder God: In chapter 23 Asuka goes to Shinji's bedroom and while they lay together, they talk about the war, their fear of dying and their feelings for each other.
* Children of an Elder God: In chapter 23, Asuka kisses Shinji and says that she loves him, just in case they die in the next battle.
* Children of an Elder God: In chapter 23, Rei tries to persuade Asuka to share Shinji. Asuka refuses, but she can't help imagine what it'd be like:
* Children of an Elder God: In chapter 4, after hearing false rumours about Rei and Shinji dating, Touji asks his friend:
* Children of an Elder God: In chapter 4 Asuka sees her crush Kaji flirting with Misato and clung to Shinji to make Kaji jealous. Kaji did not even notice her antics, goading her to try harder. Her ploy failed and anyway she eventually fell for Shinji.
* Children of an Elder God in the next battle. Shinji kissed Asuka and begged her never leaving him:
* Children of an Elder God: In the prologue, two scientists and a team of spelunkers are exploring a network of caverns when they hear several faint, faraway screams. They freak out right away:
* Children of an Elder God: In this story, Shinji kept being shy, quiet and non-confrontational like his canon self, but he resolved to learn to face his troubles, and he charged headlong into combat against whatever was threatening him and everyone.
* Children of an Elder God is capable of sprouting flaming tentacles from her back and impale an enemy with them.
* Children of an Elder God live inside them. They have weird, creepy powers (insect and reptile control, fire manipulation, space bending...), their bodies regenerate damage instantly and don't age, and their presence creeps other people out.
* Children of an Elder God: Misato and Ritsuko are old friends... although they bicker constantly, and Ritsuko seems to enjoy getting Misato riled.
* Children of an Elder God", Misato looks over the devastation, and thinks:
* Children of an Elder God, NERV's mobile command carrier, which is described as an aircraft carrier attached to a pair of zeppelin balloons, all heavily armoured and armed.
* Children of an Elder God, never let Asuka cook. She likes being "creative" and mixing foods that were not meant to be mixed:
* Children of an Elder God off her body, and thinking she is a very beautiful girl.
* Children of an Elder God: Played with. Nerv is a pretty informal organization, but when Asuka forgot to follow orders during a sortie, Commander Gendo reprimanded her personally and harshly.
* Children of an Elder God, resembling a humanoid fish with lanky, scrawny, human-like limbs, gills, fins and tail, and she loses the capability to breathe air.

* Children of an Elder God, Shinji and Asuka gain the ability to sprout wings and fly. Asuka in particular has fire wings.
* Children of an Elder God: Shinji and Asuka spent months dancing around each other until they got together in episode 16.
* Children of an Elder God, Shinji didn't think that Asuka liked him because he was only a wimpy kid and she was beautiful and smart.
* Children of an Elder God: Shinji falls for and ends up with Asuka. He meets her in chapter 5, after meeting Misato, Rei, Hikari... and all remaining relevant female characters.
* Children of an Elder God: Shinji is meek and not good interacting with other people (especially pretty girls who are apparently taking an interest in him). He admits that in chapter 4:
* Children of an Elder God Shinji is pretty wimpy and timid, so their relationship looks like this to their friends.
* Children of an Elder God, Shinji is this to Asuka. Sometimes he drives her mad, and sometimes he makes her happier than nobody ever. In chapter 16:
* Children of an Elder God, Shinji is trying to keep his hormones under control, so he makes himself think of his father, hoping that the mental image will turn him off.
* Children of an Elder God: Shinji liked Asuka but he did not dare to spit it out. Asuka had a crush on Kaji but she was beginning to like Shinji. After spending a good while dancing around each other, both teenagers got together.
* Children of an Elder God: Shinji very nearly spat out his drink when he read a newspaper was spreading rumours that Rei and he were dating. In chapter 4:
* Children of an Elder God. Shortly after they were making out in the locker rooms when Shinji's friend Touji suddenly entered, saw what they were doing and gagged.
* Children of an Elder God spread its webs all over the city and spawned millions of smaller spiders danced around its legs and flooded the city's streets.
* Children of an Elder God that has invaded the city together with its spawn. Shinji thinks that he'll let his father down if he refuses, so he agrees.
* Children of an Elder God that raised her, making her easier to hang out with.
* Children of an Elder God, the clones of Rei are seen swimming inside their huge liquid-filled tank (and trying to break the glass to escape).
* Children of an Elder God they are fighting, how longer the war will last… then Asuka tells him she loves him, and Shinji replies he loves her, too.
* Children of an Elder God, they refuse to leave her behind. She insists until they cave.
* Children of an Elder God want them to give in their base instincts so they can wipe humankind out, and she restrains herself, telling herself they are still too young and with no idea of how to do it properly.
* Children of an Elder God were raised by NERV since they were little kids to be the organization's tools because they were the only ones capable of piloting Evangelions without mutating, going insane or dying. Asuka grew into a relatively normal teenager, but Rei was extremely creepy and unable to lead a normal life.
* Children of an Elder God: When a terrorist group attempted to take over NERV's German base, Shinji and Asuka had to kill humans for the first time. After the battle, they spend a good while feeling sorry and depressed, trying to cope with their actions and telling themselves what they did what they had to do.
* Children of an Elder God: When Rei got jealous in chapter 4, her red eyes glowed for a split-second. Touji and Kensuke were utterly scared out of their wits when they saw it.
* Children of an Elder God: When Toji and Kensuke tease Shinji about Rei, he insists that they're only friends.
* Children of an Elder God, where real world laws of physics were nothing but mere suggestions.
* Children of Blood and Bone, all magic is banned and those who have magical abilities (known as maji) are executed by the government, with very few remaining.
* Children of Bodom: The Children of Bodom Hate Crew (Commonly abbreviated to COBHC.)

* Children of Chaos/Chrysalis Corporation busy subverting, sabotaging and corrupting it.
* Children of Demeter (goddess of the harvest) have this power. Meg from
* Children of Dionysus have a more limited version of this ability, mainly applying to crops that can be fermented into alcohol (we see it applied with grapes). Dionysus
* Children of Dune be interpreted as a mortal insult, implying that you weren't worth any more water than that/that you were so offensive in the spitter's sight that they were willing to waste precious water to insult you. One assumes they figure out the difference between the two gestures by how angry the spitter seems to be.
* Children of Dune face and certain parts of his body, and the camera sometimes "lingers" on him like a woman's (or a gay man's) eyes would when staring at someone who is extremely attractive.
* Children of Dune genetic, and when one of his descendants does it, it's significant.
* Children of Dune has Leto II experiencing dreams as well, like his father.
* Children of Dune, he's been bonded to the suit for some 3,500 years and is more of a sandworm with a human face and what USED TO BE a human mind.
* Children of Dune is always either shirtless or wearing his shirt half open.
* Children of Dune is one of many things her mother Jessica takes issue with.
* Children of Dune sets up a three or four-way struggle for control of the Imperium, with the demon-possessed Alia on one side, the Bene Gesserit on another, the remnants of the Corrinos as a third, and an unknown quantity in the form of Paul's children, Leto and Ghanima. Leto is captured by people whom he believes to be working for the Bene Gesserit, only to have it turn out that Alia is secretly calling the shots. He himself, however has a deeper plan that eventually trumps all of theirs and renders them moot.
* Children of Dune water is poured into the desert for fear of being contaminated.
* Children of Earth, but then neither of the actors were able to appear in it.
* Children of Earth. One of the villains observes later, having discovered that his remains are now a skeleton with shreds of bloody flesh, "This was a bag of bits!" Later he wakes up... sometime before his skin is restored.
* Children of Earth, there's Jack's former lover and mother of his daughter. We never meet her as she has already died by this point, but she definitely counts.
* Children of Earth", we get to see him come back from being blown to smithereens — and it's not pleasant. His body literally grows back layer by layer, and he regains consciousness as soon as his organs are working, but before his skin is fully done healing. He does a lot of screaming that season.
* Children of Eldair begins with a telling of how the God and Goddess created Eldair and planted their children on it. Later another one is heard from the Elves perspective.
* Children of Eldair: Eldair has 405 days in a year, and Koe mentions being familiar with several calendar systems, but is wholly unfamiliar with the date Embera, who's from Earth, gives as her birthday, March 21, 2002. She then has to give him the general idea when it is in relation to the Spring Equinox in the northern hemisphere.
* Children of Eldair: In the first chapter, Embera, troubled by demons that have yet to be explained, has a tendency to curl up under her bed.
* Children of Eldair or just commenting on the artwork in a particular frame.
* Children of Eldair: The elves use some kind of horse-deer-goat things as mounts.
* Children of Eldair: The story starts with Koe finding Embera injured and unable to remember how she got there and then using some kind of scrying to see where she came from and what happened.
* Children of Eldair: This is the first sign of life Embera shows after Koe brings her to his home after a month and a half comatose.
* Children of Eldair: When the girls first arrive on Eldair, they are mistaken for angels by Princess Hamara's company.
* "Children Of Light," when a woman pretends to Mac's Chinese foster daughter.

* Children of Mana is the hammer. Its unique ability is to smash large objects.
* Children of Mana, Poppen has the best magic stats of all four playable characters, but atrocious defense and HP.
* Children of Men afflicting women instead of men) made more sense than in the novel.
* Children of Men and only notice the group escaping when the car is right behind them.
* Children of Men attempts to intimidate Theo in the van by describing how they’ll be watching him constantly. Theo, whose head is under a bag, simply replies “Jesus, your breath stinks.” To which Patric, taken aback, lamely replies “no it doesn’t.”
* Children of Men by P.D.James, as noted with the film adaptation, is an archetype of this trope.
* Children of Men disclose the earlier ambush to be an inside job and that are they are about to kill him and kidnap Kee.
* Children of Men. Due to the widespread apathy of a society facing the extinction of humanity, when Theo is kidnapped off the street in broad daylight by masked gunmen working for the radical Fishes, people don't even stop to look.
* Children of Men government propaganda and adverts for various medications.
* Children of Men. However his ex is working for them, so she just turns the spotlight off and lets him out of the room to talk properly.
* Children of Men is that people have suddenly become infertile, and no one is sure why. When a woman who is not only fertile, but actually pregnant, is found she's fought over like she was the last slice of pizza at a frathouse poker game.
* Children of Men is to bring Kee in contact with a mysterious, non-governmental group called the "Human Project", supposedly based in the Azores. This group is sought to be humanity's last hope for curing infertility. The movie ends right before Kee is being picked up by the group and we never learn if they manage to live up to their expectation.
* Children of Men. It's 2027, and the last child was born 18 years ago. For some reason, women all over the world just stopped being able to have kids. The world has descended into nihilistic mayhem, Britain is the only still-barely-functioning nation state (and it's an oppressive fascist hellhole) and most people are just sitting around in depression, waiting for the human race to die out.
* Children of Men mention that the USA has collapsed, with a nuclear bomb going off in NYC, and militias taking control of the cities of Spokane, Cincinatti and Bozeman.
* Children of Men, not knowing whether her baby will survive or how it might change things after she gives birth.
* Children of Men. One dark touch is that an advertisement mentions they're offered free to illegal immigrants, who are horribly persecuted in the film.
* Children of Men's famous cityfighting scene features an obsolete Chieftain tank, presumably because the film-makers couldn't get their hands on a state-of-the-art Challenger II. Though given the state of the UK, and the world in general, it's not inconceivable that a few Chieftains would be reactivated, supported by Government troops using mix of weapons and equipment, including both the L85 and the G36 rifles (the latter not actually in use by the present-day British Armed Forces).
* Children of Men, showing how humanity has been trying to fill the hole caused by the absence of children in the world.
* Children of Men takes place in a world where no human child has been born for eighteen years and humanity faces extinction. While the film's setting, Britain, has mostly held together in the face of this existential crisis, in the background America has become engulfed in internal conflict and militias have seized several cities.
* Children of Men that suggest that the rest of the world is being turned into nuclear wastelands or lawless war zones, especially if you believe the government propaganda.
* Children of Men that the studio didn't have a clear marketing strategy and thus audience awareness was really low.

* Children of Men The fighting starts again shortly afterward. With a rocket launcher no less.
* Children of Men. Theo manages to get Kee and her child to the medical boat in the middle of the sea, but at the cost of being fatally wounded by Luke and succumbing to his injuries just before the boat reaches them.
* Children of Men, where the group's counterpart referenced the Bible passage about two loaves and five fishes in its manifesto.
* Children of Men', which is either available on demand or is actually issued together with each citizen's anti-depressant ration. The instructions assure the would-be user that not only is it quick and painless, but no-one has survived taking it.
* Children of Men, which is set in a decaying world where no child has been born in many years.
* Children Of Mother Earth, in which men are forbidden from carrying weapons, but otherwise everyone is allowed to do everything. A utopic setting, with the plot mainly derived from the fact that a Nazi-like culture invades the country and has to be "fought" off by the pacifist inhabitants.
* Children Of Mother Earth themselves as this, but as they rediscover Greenland, which is already inhabited, the inhabitants (whose point of view is also told) are not happy about being "discovered" by a country that plans to invade theirs.
* Children Of Mother Earth, this trope turned most of the world into desert-like countries, in which life is only possible with massive use of technology, and famines are common. On the other hand, there is Greenland, which became green again due to the global warming, and which the inhabitants, by wisely using the knowledge of former mistakes, made a good place to live in.
* Children of Nature — to date, Iceland's only film to get an Oscar nomination for Best Foreign Language Film
* Children of Remnant: An accidental case. After one of Pyrrha and Tyrian's spars, Pyrrha successfully cut off Tyrian's stinger, which he then presented to her as a trophy. Although she was disgusted, she didn't want to decline his offer, and it apparently still hangs up in her room.
* Children of Remnant: At the party, Jaune is so desperate to appear normal to the other teens that he ends up ordering them alcohol and getting absolutely wasted.
* Children of Remnant. Blake, surprisingly, is romantically but not sexually in love with him; her preferred endgame is that Jaune and Pyrrha get married so that Pyrrha can handle his physical needs while Blake handles his emotional needs. Jaune is mostly oblivious.
* Children of Remnant but decide to let them be for the sake of not causing a scene.
* Children of Remnant: Due to not having the rage issues coming from Raven's abandonment of her, Yang is much more tactically minded than she was in canon; while she can follow orders in canon and gets better control of her emotions later on, this Yang is able to keep an incredibly calm head during her fight with Jaune and was made the leader of her Beacon team.
* Children of Remnant: Fifteen years of indoctrination by Salem begins to be undone by Yang deciding to throw the Claimed a party.
* Children of Remnant) is the Eagle, the Sword of the Grimm. The boys lampshade that it seems unfair that Jaune didn't get a cool title despite the fact that he's the one in charge.
* Children of Remnant: James dislikes the Atlas Council pulling him out of Vale and getting ready to start a war, yet in the end this isn't enough to compromise his sense of duty and he ends up leaving the Kingdom.
* Children of Remnant of empty ice cream bowls. Weiss vomits up a Grimm, everyone in the restaurant runs away screaming, and Emerald kills it as casually as if cleaning up some spilled milk.
* Children of Remnant. One of Pyrrha's biggest problems in the fic is that Jaune desperately wants peace, meaning her ability to kill everything in his path is not particularly useful.
* Children of Remnant or imply that Emerald has some genuine form of mind reading.

* Children of Remnant: Ozpin tells Jaune that he's proud of the man that he's become despite Salem's influence.
* Children of Remnant: The deliveryman who brings Jaune and the boys alcohol originally objects to leaving the alcohol with minors, but Sun gets him to leave by leaving him a generous tip.
* Children of Remnant: The Schnees and Belladonnas are working together to assassinate the Claimed, which, even if they succeeded, would start a war that humanity is simply not prepared to win. It's clear that their grief has destroyed their sense of judgement.
* Children of Remnant. They purposely keep their friendship behind closed doors, allowing Ghira access to information that Atlas only wants Jacques to know.
* Children of Remnant, they're driven by their love for each other and they genuinely do mean to advocate for peace.
* Children of Remnant: This is Klein's opinion regarding Jay Winchester. While Klein honestly believes that Salem is a true goddess who deserves his worship, he believes that Jay is simply an opportunist trying to ensure that he'll get to survive Salem's wrath.
* Children of Remnant: Tyrian has apparently been damaged by training Pyrrha to the point that he's more machine than man.
* Children of Remnant: Weiss was hit with the Darkness the most of her siblings, and it caused her personality to regress to that of a young child. "Nice Weiss" specifically exists so that she can be more responsible when absolutely necessary.
* Children of Steel are identured to the companies that create them for 50 years or until they manage to earn enough to pay the multi-million credit cost of their gestation and education. Or they die considering they tend to work in hazardous jobs. The Egypt-themed planet Pharoah goes so far as to practice outright slavery.
* Children of Steel series, wars between corporations over mines in distant systems aren't rare. Freighter crews (comprised mainly of indentured animorphs) are trained in combat and ships are easily converted into troop transports. A couple books are partially about a war between an alliance of corporations and a multi-system extremist group that hates animorphs.
* Children of Steel universe, the Tri-Star corporation maintains an asteroid mine where troublesome 'morphs are incarcerated. There's an on-site bordello where those criminal morphs considered too delicate for the mines are employed, for instance Dialene after her original captain tried to play pirate.
* Children often do this with their food. Since their taste buds haven't developed yet, and have a lessened ability to distinguish flavors and a considerable preference for sweet foods, they'll happily enjoy a food combination that would likely disgust an adult. Similarly, older adults can seem this way to younger people due to generational differences in food preferences as well as people's sense of taste changing as they age.
* Children of the Atom (one of the main characters is a lesbian and one is asexual, book involves a queer romance)
* Children of the Atom power armor, despite it doing nothing. He kills them all. It's hilarious.
* Children of the Atom that are absolutely normal in every way except that all of them have IQs of over 300.
* Children of the Atom, there is a character called Scab who healed by taking whatever injuries one person had and putting them on himself. He saved Jean Grey's life and promptly died, never to be mentioned again.
* Children of the Black Sun is a very evil and very powerful mage. The evilness and the power are linked — he draws magic from inflicting pain (not that he needs the extra encouragement).
* Children of the Black Sun she kicks up a fuss. It still doesn't work, though.
* Children of the Black Sun to counter that advantage. The protagonist, who is potentially even more powerful, later provides a non-evil alternative once people have reconsidered their hostility enough to trust her.
* Children of the Corn (1984) are superimposed on crayon-drawings done by a precognitive little girl.

* Children of the Corn (1984) depicts what happens to the town after the children murder all the adults through crayon drawings as a choir of children sing wordlessly.
* Children of the Corn (1984), He Who Walks Behind The Rows is never openly shown on screen. Presumably, the kids' murderous fanaticism was sufficiently horrifying that seeing the god/demon/spirit/whatever which they followed wasn't deemed necessary.
* Children of the Corn (1984) involves one of the children attacking Burt from the backseat of his car. He punches her out and the cast start walking to the neigboring town.
* Children of the Corn (1984) Isaac is leading the children, so he betrays him and sacrifices him to He Who Walks Behind The Rows.
* Children of the Corn (1984), when a young married couple drives through middle-of-nowheresville, Nebraska:
* Children of the Corn 666: Isaac's Return Gatlin act normally, but gradually drop it until it's time for the final prophecy.
* Children of the Corn 666: Isaac's Return, the main heroine, Hannah, has sex with Gabriel, the man who turns out to be the big bad of the series. She survives.
* Children of the Corn 666: Isaac's Return uses similar powers to crucify Isaac on the floor with metal spikes.
* Children of the Corn. He had written a script, but the producers instead chose one that turned the story into a more conventional horror film. He was very upset that they misled him long enough to keep him from being able to sue to make them not put "Stephen King's ..." over the title in the ads.
* Children of the Corn III: Urban Harvest is his evil bible, and the book's weakpoint is Eli. To get rid of them, one must destroy them both at the same time.
* Children of the Corn III: Urban Harvest, the process involves his eyes and mouth being stitched shut.
* Children of the Corn II: The Final Sacrifice, has been exposed to contaminated corn that causes hallucinations for years.
* Children of the Corn II: The Final Sacrifice, non-married adults John and Angela have passionate sex. Angela is kidnapped and is almost killed, but she survives. In the same film, teenagers Danny and Lacey almost have sex but are stopped when they find a severed hand. Lacey is kidnapped but is saved along with Angela.
* Children of the Corn IV: The Gathering was poisoned with quicksilver before he died, and now in undeath he has an aversion to mercury.
* Children of the Corn IV: The Gathering when his physical body is mistakenly released from an old well by a thirsty drunk.
* Children of the Corn movies, even though many of the children in the series wish to kill adults because of their loss of innocence.
* Children of the Corn: Revelation a stripper/exotic dancer decides to take a candlelit bath... and ends up killed by cornstalks.
* Children of the Corn series, the children murder all the adults and sacrifice themselves to "He Who Walks Behind the Rows" when they turn 19.
* Children of the Corn short story which was turned into a movie. Spawned a sequel-ridden franchise with 7 films.
* Children of the Corn: The small Nebraska town of Gatlin, which is home to a child cult that worships the corn surrounding the town and a demonic entity known as He Who Walks Behind the Rows. It was originally a normal small town, but the children were influenced by a child preacher named Isaac who led them to massacre the adults, with the motivation that the "corrupt adults" were the reason for an extended drought affecting the corn harvest.
* Children of the Corn V: Fields of Terror become besieged in a barn, Tyrus picks up a chainsaw. After he is killed, one of the children pick it up and start chasing Allison with it.
* Children of the Corn V: Fields of Terror lifts Mr. O'Brien up in the air with his newfound mental powers, and a lightning bolt strikes him dead.
* Children of the Corn V: Fields of Terror plays this pretty straight with Allison. She's the plainest of the group that gets stranded in the middle of nowhere and has

a run in with a deadly cult, with whom she has a tie with considering that her brother is a member. Allison's the last one left standing to take down the cult at the end, as well.
* Children of the Corn V: Fields of Terror to deliver their late friend Kirk's ashes, but a car accident causes them getting spilt all over his former girlfriend.
* Children of the Corn V: Fields of Terror, who was positioned as the leader of the cult for the outside appearance since he is the only adult on its premises. When the charade is over, he burns away, killing the sheriff who tried to arrest him too.
* Children of the Damned the cells of the children are said to be advanced to millions of years ahead.
* "Children of the Force": Cad Bane's hideout, Black Stall Station, is located in an asteroid field.
* Children of the Forest", have not been seen for centuries, the Faith is still very strong in the North of Westeros, but forgotten everywhere else.
* Children of the Glades to Helena, who is soon reduced to begging for mercy.
* Children of the Gods". Jack answers Hammond's question in a reasonably confident tone of voice, but by this point Air Force personnel have been torn up pretty badly by the Jaffa both times they've met them, so you can understand Hammond not sharing Jack's confidence.
* Children of the Jedi. Cray's lover and fellow Jedi Nichos Marr contracted a fatal disease and Cray attempted to transfer his consciousness into a droid body using alien technology. However, the result was merely a droid programmed with Marr's personality.
* Children of the Jedi, has Leia recalling the imperials threatening to lobotomize her and send her to one of the Empire's pleasure houses.
* Children of the Lamp, John and Philippa, are the children of a djinn woman and a human man.
* Children of the Lamp, Philippa grants a police officer three wishes. One of these wishes results in Layla Gaunt's body being incinerated by a volcano.
* Children of the Lamp series use a particular "magic word" as an aid in focusing on their magic, but the word itself is arbitrary. The only rule is that the word be somewhat long and complex, but this is just to make sure that the djinni in question doesn't accidentally use magic in the course of daily conversation. Thus we get everything from real words like "SESQUIPEDALIAN" and "ZYGOBRANCHIATE" to the meaningless but familar "QWERTYUIOP" to the truly nonsensical "FABULONGOSHOOMARVELISHLYWONDERPIPICAL".
* Children of the Lamp, the titular Blue Djinn measures her remaining lifespan by means of an extremely large hour glass.
* Children of the Lamp was a djinn, possibly of the same tribe as the heroes.
* Children of the Last Days series has a similar effect, being essentially a Catholic version of the former (without a Rapture, which is not Catholic dogma). Regardless of the writing, it comes strongest to those who tend to share the author's "traditional Christian" views.
* Children of the Lens. Planets are used as anti-missile missiles, to counter planet-sized negaspheres aimed at Arisia.
* Children of the Lens their glory days, even as they are living a second set.
* Children of the Living Dead as he's shooting up the zombies in the opening (one shot has him say "surprise" before he fires, even though his mouth clearly doesn't move). The original silent ending where Matthew takes Laurie to the cemetery to show her his "shattered dreams" was changed into a first date scene with ADR done over the wide shots.
* Children Of The Living Dead with the characters spouting the word zombies easily. It contributes to the film's overall badness.
* Children of the Mind came out in 1996, and despite fans wanting to know what happens next, Card wrote a ton of prequels.
* Children of the Mind, it's shown to be the payload of a missile or missile-like device.
* Children of the Mind Peter Wiggin and Si Wang-Mu travel to a Japanese-culture

planet which values politeness and humility. Wang-Mu gets into a contest of trying to be more humble and self-effacing than the old man they're interviewing. He eventually seems to relent and give up and Wang-Mu silently gloats, then realizes he probably ceded out of courtesy.
* Children of the Mind, the protagonists encounter an alien species that communicates at least partially via neurotransmitters: the first radio message they get from the aliens are instructions for an opiate. Nobody's sure whether it's meant to be debilitating or pacifying.
* Children of the Night (described as a mindless hulk, with no chance of recovery).
* Children of the Night has a familiar who takes the form of a 10-year-old boy. He's made of Czakyr's desires and is a total perv.
* Children of the Night in order to keep her out of trouble until such time as he could find a cure. Worse still, not only have his efforts been completely in vain, but the connection between the two allows Elaine's Beast to influence Velya, gradually driving him insane.
* Children of the Red King series originally was to end at volume five after Charlie got his father back, but many fans begged for more and so three more books came out.
* Children of the Sea on the other team trips her and causes her to skin her knees. In retaliation, Ruka elbows her in the face. Everyone, even Ruka's friends, turn on her and the coach kicks her off the team because she won't apologize for it while ignoring that the other girl started it.
* Children of the Stars Elves, so they both look of indeterminable age.
* Children of the Stars, there is this exchange between the two leads that hints at the established UST being mutual.
* Children of the Stars, upon waking to a situation that's already taxing her mind, Keleria is further confused by Ayuri saying she's taken a courier job leading to Stranglethorn Vale.
* "Children of the Stone" is notably a much more respectful term, since according to dwarfish beliefs the phrase is literally true and central to their culture. Dwarves and Elves had more than a thousand years of history together before humans moved into the main setting.
* Children of the Stones, Rafael Hendrick "invites" Matthew and his father to dinner before trying to brainwash them.
* Children of the Whales are made up of sand rather than water, but come complete with waves, islands, phenomena such as waterspouts and whirlpools, and an abundance of marine life. Unlike water oceans, however, the sand isn't buoyant enough for people and boats to float on the surface without magical aid.
* Children of the Whales has this as a setting. Characters use boats to travel on a sea of sand.
* Children of the Whales, this is the full extent of Shuan's reaction after spending several days sitting on a bench with his arms shackled above his head.
* Children of Time before he realizes it, and eventually tells her (during their honeymoon) that he would never have given romance much thought if she hadn't entered his life.
* Children of Time, best summed up the morning after their wedding. Both are putting on clothes, and she tells him that he's not the only one "enjoying the show". Cue awkward blushes on both sides.
* Children of Time: Colonists fleeing a dying Earth make their way to a planet already terraformed by one of humanity's earlier projects, started when humanity was in its hey-day before it almost managed to destroy itself. Unfortunately for them a rogue scientist's plan to fast-evolve sapient monkeys hadn't exactly gone to plan (giant sapient spiders, anyone?). In the course of the story, they also end up visiting a world where the terraforming attempt had gone horribly wrong and created a world covered in grey goo.
* Children of Time falls for her disguise, though she later confides to Holmes that she was rather surprised it worked.
* Children of Time monstrous than the last humans they eventually encounter.
* Children of Time, of all people, would have a big enough heart to have loved Mary

and Sally equally.
* Children of Time provides longevity, but at the price of enormous psychic abilities, among other things.
* Children of Time, she has no problems with following someone else's lead), but she's got a Time Lord's brain.
* Children of Time that are pretty detailed (the season one finale page alone proves the series' troperiffic status).
* Children of Time their only hope of getting through Moriarty's defenses.
* Children of Time: The large intelligent spiders. Although the term "alien" is arguable, as they're the unforeseen result of an ancient human experiment gone awry on a terraformed planet.
* Children of Time, the mother of his children), and Watson had Mary before Sally. It is heartbreakingly easy, however, to see that Sherlock and Beth are the only lovers each other will ever have.
* Children of Time. This forms the plot of the fourth episode, as the Holmeses must prove that the so-called philanthropist is actually a criminal mastermind.
* Children of Time. To cap it off, even when things are set right, one married couple has to be separated, because the wife has a destiny in her own time, two centuries in the future for the husband. There appears to be Foreshadowing for this theme in the fourth episode, when the heroes meet a woman from their future who has a brief but charged conversation with the Doctor in this vein.
* Children of Time tomboy. When he sees her next, she's seventeen and has matured quite a bit in the past couple of years, acting far more like an adult than a kid. He's left unsure of how to handle it.
* Children of Time when London receives her first snowfall of the season. Sherlock looks at his bride, standing enraptured in the snow, and tells her that he's just fallen in love with her all over again.
* Children of Time) when she shows up in a dress. Cue further awe at two more elegant dresses later...
* Children of Time who she is, but Holmes and Watson are left in the dark... and so are the readers.
* Children of Zodiarcs rebel who wants to bathe the streets in blood (of all classes), and Argon is doing everything he can to stop the madness, including helping rebel defectors. Unfortunately, this usually means trying to kill you.
* Children on the autistic spectrum have a tendency to be afraid of them (as well as other loud appliances such as lawn mowers and weed-whackers), since being sensitive to loud noises is a common aspect of the condition.
* Children Overboard affair, and the Howard government successfully cashed in on latent national security fears and portrayed the Opposition as soft on illegal immigration.
* Children's author Rob Keeley frequently leaves Easter Eggs for his readers to find:
* Children's books by Laura Numeroff and Felicia Bond hardly even bother with different names. Start with
* Children's game shows would often have players who just couldn't figure out what to do during a certain challenge or endgame, no matter how many times it aired up until then. The most
* Childrens Hospital, Cat tries home nudism after being catcalled. She likes it apart from the fact that she's cold and can't find a place to put her lipstick.
* Childrens Hospital episode, a nurse has her uniform scrubs stripped off in this manner.
* Childrens Hospital expy, he is completely unfunny, cannot tell a joke and his entrance is often accompanied to the screams of terrified children. And it's hilarious.
* Childrens Hospital has only an 11 minute running time, so it does its best to pack in as many jokes as possible.
* Childrens Hospital. Of course, Judaism was a recurring theme in the episode and the character involved was the Jewish doctor (the guy playing him isn't Jewish).
* Childrens Hospital starred a variation of doctors in a children's hospital in

Brazil — some arrogant, some flirty.
* Children Shouldn't Play With Dead Things" is quite attractive, apart from the "homicidally jealous" part.
* "Children Shouldn't Play With Dead Things" (S02, E04), a college student-turned-necromancer brings back a woman on whom he had a crush. She is, of course, a vengeful bloodthirsty zombie. Dean even outright says "What's dead should stay dead", and he obviously thinks this applies to himself as well as the zombie because of the deal his father made three episodes earlier so Dean wouldn't die.
* Children Shouldn't Play With Dead Things (S02, Ep04), Sam and Dean travel to Greenville, Illinois, to bury their father's dog tags at their mother's grave.
* "Children Shouldn't Play With Dead Things": the dead girl's best-friend-with-a-crush brings her back as a homicidal zombie.
* Children's Party at the Palace. Both are shown to be very friendly and caring towards children during the theatrical production.
* Children's Party at the Palace, celebrating both the Queen's 80th birthday and over 100 years of children's literature in the UK, is perhaps the most notable. It is about several characters from well-known British children's literature going on a wild romp finding the Queen's Lost handbag so she can deliver her speech at the party.
* Children's Party at the Palace has Mary Poppins, who first appears wearing a black coat when she chastises the Baddies for their attempted sabotage. Later during the "Supercalifragilisticexpialidocious" performance, her coat is blue instead.
* Children's Party at the Palace look not so hideous as their villainous nature, such as Cruella de Vil and the Grand High Witch.
* Children's Party at the Palace). The Queen, however, isn’t completely blind without them, just farsighted.
* Children's Party at the Palace", though that handheld had been obsolete for quite a while in 2006, when the production was filmed.
* Children's Party at the Palace, two nursery rhymes, “Baa Baa Black Sheep” and “Three Little Kittens” are referenced by Cruella de Vil and her chaperone.
* Children's Party at the Palace: Whilst at the picture gallery of Buckingham Palace, Horrid Henry breaks a ceramic vase on accident when he tried to open a locked cabinet.
* Children's programs with young actors who constantly shout at each other and EMPHASIZE every WORD they THINK is IMPORTANT! — the audio equivalent of
* Children's singer-songwriter Tom Chapin wrote a song called "Great Big Words", which even uses the word "sesquipedalian".
* children's song called "Is Not Is Too" written by Bill Harley that is about this and is said to be dedicated to anyone who has a brother, sister, or a good friend they don't get along with.
* children's song: "Oh, Grandma is a person that everyone likes, / She bought you a toy train and a bright shiny bike, / But lately she hasn't been coming to dinner, / The last time you saw her she looked a lot thinner. Now your parents told you she moved to Peru, / but the truth is she died and someday you will too." Poor, poor little children.
* "Children's Story" by Slick Rick details how the delinquent young man on the run from the law "grabbed a pregnant lady and pulled out the automatic".
* Children's Television Trust International, a joint-venture comprising an
* Children's wood-burning kits are still available. Gloves and adult supervision required.
* Children The first time she linked with Paxton Fettel, things went terribly wrong. The second? It turned an entire city into a Warzone, and eventually to it becoming a paranormal hellhole.
* children to fight for them so not only is gender no object age isn't either.
* children to Hester. As it stands, their hazing of the red-headed witch is directly linked to their terrorizing by a vampire.
* children to their eldest daughter because she knew what was going on. This was

all because they didn't want their children to live in a world without Nazism.
* Children Voicing Children: A child character is voiced by an actual child.
* Children Voicing Children: Animated works have child characters voiced by actual children.
* Children Voicing Children, especially in the earliest ones, often have no previous experience in (voice) acting or have any notable roles afterward. The only character that has always been played by a working child actor is Charlie Brown, as well as Sally in the '80s (by Stacey Ferguson).
* Children Who Chase Lost Voices, Arch Angel's modified AH-1 Cobra helicopter, and the presence of typewriters and vehicles common during the era.
* Children Who Chase Lost Voices can phase in and out of matter at will.
* Children Who Chase Lost Voices: Morisaki's wife Lisa has been dead for years by the time the film begins, but the thought of her continues to drive him, to the point that he seeks Agartha to bring her back and moans her name during nightmares.
* Children Who Chase Lost Voices The movie easily could have made these threats an antagonistic force but instead, all of its drama is derived from the character's personal problems like a standard No Antagonist work, although it still features a lot of real danger from tangible forces.
* Children with Congenital Insensitivity to Pain often unintentionally inflict this on themselves.
* Children with Post-Traumatic Stress Disorder, whether from abuse, war, natural disasters, etc, very often re-enact the trauma in pretend play (this is part of why anatomically correct dolls can be used to test for sexual abuse). A little girl trying to convince a boy her age to let her tie him up and french-kiss him is pretty creepy.
* "Childrick of Mort" sees Rick do battle with a Zeus-like God named Reggie. After the battle he tells the others Reggie was just
* Childrin R Skary: A web animation that manages to blur the line between "Scariest thing you'll see in your life!" and "So cute!"
* child sex offenses or those who have committed acts of vandalism or animal cruelty. As above, in many of these cases, perfectly innocent people have been accused.
* Child's Farm was made to sell, out of all products, shampoo. Although the shampoo is still being made, it is more popular than the show and so the show was cancelled.
* Child Soldier, but he survived and developed precocious talent as a warrior. He killed Gambino in self-defense and got wounded while escaping, collapsing by the side of the road, but another troupe of mercenaries happened to pass by and take him in before he died of exposure.
* Child Soldier by Griffith, who gave her a sword she used to kill her would-be rapist.
* Child Soldier displays these tendencies, likely due both to the trauma of seeing his parents killed in a bombing when he was a small child, and all the violence and strife he has witnessed since.
* Child Soldiers in Africa causes the screen to flash red and the camera to focus on the corpse before going to the normal game over screen.
* Child Soldiers) in West Africa believe they become immune to bullets if they take certain medicines before battle.
* Child Soldiers. Late into the manga, though, there's some talking about it.
* Child Soldiers, or both. This, far more than the actual power of their eyes, is why the Second Hokage considered the Uchiha so dangerous.
* child soldiers, so Snake goes against the mission in order to bring them safely to Mother Base.
* Child Soldiers, the other A.I.M. mercs respond to him by calling him a "traitor" for working with someone as out-and-out evil as Deidrianna.
* Child Soldiers: When underage children or teenagers join an army, they most likely didn't have any choice in this matter.
* Child Soldiers: When very young people are forced to fight in wars, well needless to say it will ruin their childhoods.

* Child Soldier that Chakotay took prisoner, disgracing him in the eyes of the other Kazon. Chakotay is told he'll be released if he kills Kar, but he uses the weapon to escape with Kar instead. Their leader was trying to demonstrate that an enemy you don't kill will kill you instead, so it makes sense he'd have to give Chakotay a working phaser.
* Child Soldier, the 2002 anime adaptation opts to change Sousuke's stated home country from Afghanistan to the fictional "Helmajistan," refrain from naming the guerilla force he was part of, and remove any references to the fact that he was raised Muslim.
* Child Soldier, which is quite unnerving to his mercenary teammates due to his young age. He also is not afraid to do a bit of Vaporizing when the situation requires it.
* Child's Play (1988): Karen Barclay is forced to become this over the course of the first film.
* Child's Play (2019) and Chucky becomes violently attached to the boy.
* Child's Play (2019), Chucky (and presumably, any other Buddi doll, although we don't see it) does this whenever acting beyond his programming.
* Child's Play (2019) produces into a deadly weapon, from toys to cars to lawnmowers to thermostats.
* Child's Play (2019) where Chucky is a doll possessed by the soul of a serial killer.
* Child's Play (2019), which Andy is shown watching in a prior scene).
* Child's Play 2, a factory worker is shoved in and has plastic eyes forced into his.
* Child's Play 2 after getting covered in melted plastic Kyle sticks an air hose in his mouth causing his head to inflate and explode.
* Child's Play 2 makes this an even more blatant example by having Chucky get resurrected immediately.
* Child's Play 3 is a budding teenage Kilgore, being aptly described by his superior Colonel Cochran as having "an excess of zeal" when it comes to his duty, and all things military for that matter.
* Child's Play 3 takes place in a carnival haunted house ride, Which has a giant, uncovered rotary fan in it for some reason
* Child's Play 3 types come to a sticky end at the hands of Chucky: "Don't fuck with the Chuck!"
* Child's Play: A serial killer transfers his soul into a Good Guy doll named Chucky to avoid death after getting gunned down in a toy store.
* Child's Play a young boy recives a toy doll for his birthday that's possessed by a serial killer.
* Child's Play Chucky and Tiffany in the older films, also expressed their disapproval with the remake.
* Child's Play: Chucky. Yes, he is a psychotic mass murderer, but he just looks so adorable in his doll body.
* Child's Play derives from the power of this trope, at least before the doll starts running around openly trying to kill everyone.
* Child's Play films, "Chucky" is a doll possessed by a psychopathic criminal.
* Child's Play. In 2011, a third dub produced by Zone Stúdió was produced for MGM Channel.
* Child's Play: In the original trilogy, as Chucky stayed in the doll's body, his face slowly changed from a young boy's to looking exactly like Charles Lee Ray.
* Child's Play is based on the premise "What if the killer was a kid's doll?"
* Child's Play justifies the film as being a Christmas movie because "It's got snow, presents, decorations, murder, plenty Christmas-y!"
* Child's Play. Literally no one but him is surprised by how he meets his end.
* Child's Play — Slasher film series starring a killer doll. 7 films since 1988.
* Child's Play movie has only a few minutes of screen time and serves as little more than another person for Chucky to kill. However, John’s role in the series is significant, as Chucky mentions that John was the one who taught him the

Dembella chant in the first place, meaning if John hadn’t been around, Chucky would have never been able to transfer his soul into the doll.
* Child's Play movie. Making this stranger is that the writer claims that he was basing it on the Cabbage Patch Kids line. Given that the doll seen in the movie bears virtually no resemblance to a Cabbage Patch Kid, and a strong resemblance to a My Buddy doll, and even has a name more similar to My Buddy than Cabbage Patch Kids — namely "Good Guy" — it's understandable where the "confusion" could occur.
* Child's Play. Nobody but Andy believes that Chucky the doll is alive... at first.
* Child's Play occurs when the mother of the family realizes there are no batteries in the Chucky doll... and yet it's been walking and talking as advertised since they bought it.
* Child's Play opened on November 9th, 1988, which is also the day when Charles Lee Ray becomes Chucky in the film.
* Child's Play remake, he can control anything made by the same company that made him. Including TVs, phones remote control drones and Automated automobiles.
* Child's Play, serial killer Charles Lee Ray transfers his soul into a doll named Chucky and then spends much of the rest of the series trying to transfer into a human body. Until he suddenly has the epiphany that he actually digs being a killer doll and humanity is overrated.
* Child's Play series. He ends up being killed at the end of each film, but is always brought back at the beginning of the next film. As its been put:
* Child's Play series. The premise of the first film is a serial killer who uses voodoo to transport his soul into a children's doll. For most of the series, he's trying to find another body to jump into. However, in the fifth film, he discards the idea. He decides that as "Chucky" he's become an icon and that he never needs to worry about getting sick or old.
* Child's Play). She justifies these as "Rome wasn't built in a day", and that one of the people she killed had it coming.
* Child's Play starts with Charles Lee Ray, a serial killer, almost dying from a gunshot wound in a toy store. Using a voodoo ritual, he puts his soul in a talking doll.
* Child's Play, though true to the story the film is referencing, he is harmless and merely trying to warn Michelle that...
* Child's Play to transfer his soul into a doll after he is fatally shot by the police.
* Child's Play uses this in its opening scene. The lightning strikes are clearly cartoonish.
* Child's Play vaguely states what had happened but it is not clearly shown and the relationship between the two girls is unclear but it is safe to assume that they are sisters like "The Two Sisters" example or that they are very close friends.
* Child's Play, where the protagonists burn devil doll Chucky to a crisp. It only makes him angrier and freakier-looking.
* Child's Play who used voodoo to transfer his soul into a Good Guy doll before dying from being shot. Even in his doll form where he's been brutally killed numerous times, he is seemingly immortal and unstoppable.
* child vampire by Spike early in the season when it became apparent the actor was visibly growing up and wouldn't be able to remain convincing as a never-aging vampire for long.
* child with her. Yet he constantly brags about how his TVs have no wires now that he switched to Direct TV, often right in front of his wife, son, or father-in-law. While he attempts to deflect he was talking about the TVs, it all comes off as a man who's hating his own family for being different.
* Chile also have various notable Telenovelas being remade mostly in Mexico, like
* Chilean cops are generally this, especially the young ones fresh out of school. Don't ever, EVER, try to bribe one to get out of a ticket. Lie, cry, say your mother is dying, but do not try to bribe the cop. This is even mentioned in tourism information about the country.
* Chilean economist and politician Jaime Estévez was a big fan of the

Universidad Católica soccer club and later became its executive president.
* Chilean humorist Coco Legrand once told the following joke with a variation: Two vultures went to a restaurant and one of them ordered a dead animal for lunch, describing in detail how
* Chilean journalist Carolina Brethauer (who is also of German descent) recounted that her father once said that he "hoped none of his daughters would marry a Jew." She reacted indignantly, thinking that her father was being anti-Semitic, but he explained that he did not want a Jewish husband for his daughters "because Jews are very sexist" (Ironically, she later married, and later divorced, with a Chilean-Jewish journalist.)
* Chilean lawyer and reality show star Juan Cristobal Foxley, nicknamed "Dandy Chileno" ("Chilean Dandy").
* Chilean novelist Alberto Blest Gana was pretty fond of this type of hero, and his two most famous leads are these: Martin from
* Chilean: Rafael Cavada, Alipio Vera and Amaro Gomez-Pablos (the latter eventually became TV anchorman of the channel between 2004 and 2015).
* Chileans, combined with this trope and the fact they have a very unique accent, are a nightmare for people from other Spanish speaking countries to understand. Think Spanish,
* Chilean screenwriter and cartoonist Marco Rauch, founder of the publisher Mythica Ediciones, passed away in April 2020, leaving many projects on hold, such as the third - and final - volume of the epic fantasy comic Cronicas de Myhtica, as well as new volumes of of his most successful work,
* Chile broke away from the Viceroyalty of Peru in 1818 after its war of independence. Peru itself achieved independence from Spain in 1824.
* Chile has its share of "barras bravas"; its biggest rivalry is between Santiago's Colo Colo and Universidad de Chile, and when these two teams are playing, the rest of the city universally stays the hell away.
* Chile may well be the last South American country where beat cops are still using revolvers, with the
* Chile struggling with several workers, and some claim it later caused a secretary's miscarriage.
* Chile's VTR. "Press three if you have questions about the internet service". Automated recording following: "You can also go to our online service at...". And the actual operators do not understand why it doesn't make sense.
* Chili and the Chocolate Factory: Fudge Revelation stories as possible before having a thoroughly insane pun as a punchline.
* chili dog as bait, but Tails manages to trick them into thinking they caught him, thus trapping them in it.
* Chilito" in some locations. After much snickering, they learned that "chilito" was Hispanic slang for "small penis" and went to "Chili Cheese Burrito" for the product name.
* Chiller, after being unfrozen, Miles Creighton was changed (he became a cold-blooded killer).
* Chillerama, is called The Diary of Anne Frankenstein. The film has the distinction of making fun of both Hitler and Anne Frank.
* Chiller is legendary for being banned virtually everywhere, and distills splatter horror down to its 8-bit core, offering up bound torture victims that the player can shoot at to open bloody wounds or set off traps and torture devices to mutilate them.
* Chiller was an American network themed around horror films and television series. Starting in 2017, several companies began dropping the channel due to it being too niche. The channel shut down completely on December 31, 2017, with the movie
* "Chille Tid" onto the ceiling for everyone to see, much to Amethyst's amusement.
* Chill Factor: A 1999 movie that's perfectly described as this trope on ice. Two civilians have to deliver a highly unstable substance that will detonate if it gets above fifty degrees to a military base in an ice cream truck.
* Chill Factor a short while later after he ends up gaining the upper hand: "I'm an

amateur, this is going to hurt like hell."
* Chill game animals (including dogs) can detect the use of Evil Way Disciplines or creatures from the Unknown up to 200 feet away.
* Chill had an Accounting skill available to characters. The text specifically said that it could be used to examine financial records to determine if embezzlement, money laundering or other kinds of financial crimes had occurred.
* Chill had the Ganabe monster, which gains power by murdering human beings and takes the form of its latest victim. The monsters in the adventure took the form of Secret Service agents and police officers in a plot to assume the form of the leaders of France, Great Britain, the Soviet Union and the U.S.
* Chill had the Societas Argenti Viae Eternitata (SAVE), an organization similar to the Hoffman Institute, below.
* Chill. If a barghest is tracking another creature that passes over running water, the barghest cannot cross the running water until 24 hours after its prey does.
* Chilling Adventures of Sabrina, and her mother was an ordinary human.
* Chilling Adventures of Sabrina, and three more or less ordinary teenagers. And they managed to stop the armies of the devil.
* Chilling Adventures of Sabrina and trying to secure Sabrina's soul for him, even if they don't like each other and have very different methods and ideas of how to do so.
* Chilling Adventures of Sabrina and unaware Hilda is a witch. Once his secret comes out she's perfectly accepting, revealing her own and applying her knowledge to help him manage his "condition".
* Chilling Adventures of Sabrina: Averted with Aunt Hilda, whose pet spiders are her familiars. But Sabrina uses these spiders to traumatise her principal when he turns a blind eye to her friend being bullied.
* Chilling Adventures of Sabrina backfired and got his daughter killed.
* Chilling Adventures of Sabrina back to being in the sixties, more specifically 1968.
* Chilling Adventures of Sabrina, but she then buried the sacrifice in the special earth to bring back both. We don't know what would have happened if she had performed the ritual properly, but it is implied that this trope would have been averted.
* Chilling Adventures of Sabrina, claiming that she showed up with the intent to marry the Dark Lord and backing out constitutes breach of contract.
* Chilling Adventures of Sabrina franchise. It has a much deeper plot than the previous works in the franchise, and its antagonists are definitely a lot scarier than before. However, it is still very much tongue-in-cheek, and has lots of undeniably goofy moments.
* Chilling Adventures of Sabrina is. Both impostors realize they've been found out.
* Chilling Adventures of Sabrina is played by non-binary actor Lachlan Watson.
* Chilling Adventures of Sabrina, it's in this form. Also, the Academy of the Unseen Arts has a Baphomet statue in its foyer.
* Chilling Adventures of Sabrina Kiernan Shipka sports Sabrina's iconic bob from the comics - in contrast to the sitcom that gave her long hair. Ross Lynch is normally blond but became brunet to play Harvey.
* Chilling Adventures of Sabrina of her focus on simple, practical magic fool you into thinking Hilda is in any way, shape, or form weak:
* Chilling Adventures of Sabrina - Ross Lynch is normally blond but has brown hair as Harvey because they feared he looked like he was related to his blonde co-star Kiernan Shipka (who plays his girlfriend). Ironically Kiernan herself had to change her hair for the role (she's naturally blonde but had gone brown before she auditioned).
* Chilling Adventures of Sabrina Sabrina is basically a younger version of her mother. It's more obvious in flashbacks as her hair significantly lightened with age, from a deep blonde shade to near white.
* Chilling Adventures of Sabrina The backstory is that Edward Spellman imprisoned this Batibat in an arcane puzzle … which Sabrina solves years later, causing the demon to attempt a break-out.

* Chilling Adventures of Sabrina: The Students of the Academy of Unseen Arts — witches wear mostly dresses and skirts, all black, grey, dark purple, or burgundy, dressy tops and long sleeves, while warlocks wear dress pants and button ups or sweaters, also in black, grey, burgundy or white. Also, almost all the girls wear high heels.
* Chilling Adventures of Sabrina to her. That conversation apparently went so badly that Zelda is genuinely shocked when Blackwood finally tells her it ever even took place.
* Chilling Adventures of Sabrina turns out to be a demon that turns the "elves" who work for him into statues.
* Chilling Adventures of Sabrina when Sabrina is due to stand trial before the Court of Witches, her aunts are stripped of their powers start aging decades in a day. They instantly get their powers and youth back when Sabrina wins her trial.
* Chilling Adventures of Sabrina, who looks so much like Shipka she might as well be her clone.
* Chilliwack are classic-rock icons in Canada but had only two top-40 hits in the United States: "My Girl (Gone, Gone, Gone)" (#22) and "I Believe" (#33).
* Chill of Undeath: Undead creatures with abnormally low body temperatures.
* Chill Out, Scooby-Doo! combines both elements of bear traps when a deranged cryptozoologist uses them in his attempt to capture the Yeti. When he is caught in his own traps, it is vaguely scary to small children and vaguely humorous to everyone else.
* Chill Out, Scooby-Doo!: Everyone besides Fred is at the same café in Paris when they get a phone call. Fred has somehow ended up in the Amazon. The gang runs off to save him while yelling something along these lines.
* Chill Out, Scooby-Doo! was dedicated to Iwao Takamoto, the artist who originally designed Scooby and the gang.
* Chill. S.A.V.E. (Societas Albae Viae Eterniata AKA The Eternal Society of the White Way) does battle with supernatural creatures from The Unknown.
* chill without apparently putting the excess heat anywhere. It's implied that they're using their links to Sun and Moon to cheat slightly, with Celestia drawing heat from Sun and Luna sending it to Moon.
* Chilly and Perry become a part of the ensemble from episode 5 onward.
* Chilly Beach centered on himself that dupes a few townsfolk into waiting on him hand-and-foot-for about as long as it takes for the government to destroy the black hole Dale told everyone was the devil (the science of the episode is soft enough to spread on toast, of course).
* Chilly Beach covering the local election, and a third announcing that "Small town can support three newspapers!"
* Chilly Beach. Dale proceeds to annoy death by taking too long to pick what game they're going to play, leading Death to yell at him to choose something or he'll choose for him. Dale picks hockey, which proves to be a mistake as Death is, in fact, quite good at hockey.
* Chilly Beach had two spinning papers covering the local election, and a third announcing that "Small town can support three newspapers!"
* Chilly Beach, one of the townspeople is changing a sign marked "Number of days Since Last Polar Bear Attack" from "0000" to "0001". He gets eaten by a polar bear and the number blows off.
* Chilly Beach, Season 1 "Slush Fund", after discovering that mining the slush of Chilly Beach is destroying the environment of their land, Frank explains this to Dale and decides to shut down the mining to save it. After shutting it down, April comes by to protest the slush mining, but Frank already tells her they already know and he stopped it already. April is disappointed that she has nothing to protest but then tells him to stop eating meat.
* Chilly Beach, where in a skating performance circus (long story), a man jumps into the air while on skates and attempts to catch a bullet in his teeth.
* Chilly Reception: We don't like you, new guy! And we're going to make your life miserable!
* Chilly Willy: Chilly the Penguin almost never speaks; there are only a small

handful of cartoons in which he actually speaks.
* Chilly Willy) ran from 1953 to 1972. However, the studio only did an average of three cartoons per year with the character. As a result he only has 50 shorts despite being in production for 19 years.
* Chilly Willy short "I'm Cold", in which Chilly lives in a village called "Colder'nell"
* Chilus: release a swarm of mind-eating insects to bring about "the end of the world through bugs" as prophecied.
* Chimaera Studios' superhero comics always took place in a shared universe, but it wasn't obvious aside from a few cameos/references until Chimaera Studios released its first team book,
* Chimamire Sukeban Chainsaw However, she gets put in the same prison where most of her surviving experiments ended up, and the last we see of her is her cowering in the corner of her cell as they start to beat down the door.
* chime is played, with a warning message about the incoming earthquake played over it and the original audio, and a blue banner overtakes part of the screen. Given the number of earthquakes hitting the area, it's rather justified.
* Chime Maidens were mad Pthumerian women, they bring back the dead from the ancient land of Pthumeru to haunt the city of Yharnam. They are also responsible for the summoning of The One Reborn.
* Chimera as it was cursing the Order. Haley even complained about Belkar killing it mid-speech, pointing out that since it had a name it was probably meant to be a recurring adversary.
* Chimera Beast appropriately known as Eaters. By using your bite move on organic enemies, you can gain similar abilities to them.
* Chimera Beast resembles a green-coloured cross between a lion and a boar.
* Chimerae (two-headed flying dragons) can be upgraded to do very high damage to buildings.
* Chimera genetically engineered animals are somewhere between slaves and second class citizens, the Heroine is a Jaguar Woman named Zoe Domingo created to be a sex slave.
* Chimera: Michael, who's had little exposure to the world outside of field trips and the occasional movie.
* Chimera of this type can occur naturally when two embryo fuse in the womb. One case resulted in a woman whose apparent genome did not match her children's because her salivary glands and ovaries actually had two different genotypes.
* chimera overrides the time limit (and, implicitly, gender identity), Vladia, as she is now called, is treated as a woman from then on. She actually could change back, but because her original form was A) hidious, and B) in constant pain, she has no incentive to ever do so.
* Chimeras, animal-human hybrids, get this treatment with their ears and tails.
* Chimeras have the head, wings and tail of any one of the five species of chromatic dragon, the forelegs and a second head of a lion, and the hindlegs and a third head of a ram or goat. They were created when the demon lord Demogorgon visited the material plane and, unimpressed with the local creatures, fused some of them into a new species of many-headed monsters. Gorgimeras are a further variant that replaces the goat parts with those of a metal-plated bull.
* chimera. So they feed it elemental attacks while it is growing larger so it loses control of its size and grew so large that it evaporates due to its density decreasing as its volume increases. It eventually reformes but with most of its powers gone.
* Chimera Squad to soak up return fire while the rest of the team opens fire to sending a heavily armored soldier in a berserker rage to make the enemies inside panic while the rest of the team blows up a wall and toss a flashbang in.
* chimera will be unable to turn back since it wasn't possible on her own.
* Chimeri/Dunmeri compared to the races of Men, but that is still quite old for a Mer. (Not counting those who've enhanced their lifespans with magic or divine powers.)
* Chimer, led to the Velothi dissident movement and eventually, their exodus to

Morrowind.
* Chimes at Midnight - because the labor was cheap, the terrain was varied, and, frankly, Franco's government was incredibly receptive to bribery.
* Chimes at Midnight if only for the simple practical reasons of having a consistent shape and fat-suit to allow for camera angles. Welles was in fact fiercely disciplined in terms of controlling his weight when needed.
* Chimes at Midnight was co-produced by Internacional Films (Spain) and Alpine Films (Switzerland).
* Chime: The town of Swampsea is next to — what else? — a giant, terrifying swamp infested with witches, dead hands, and talking flowers, among others.
* chimichanga, a deep-fried burrito garnished with vegetables and sauce, is said to have earned its name in 1922 when a Tucson, AZ restaurateur accidentally knocked a prepared burrito into the deep-fryer. She began to utter a Spanish curse word but, upon realizing children were present, modified her oath into "chimichanga".
* Chimney Chickens, and Blaze is hoping Marshall won't notice the photocopied student records.
* Chimney Chickens Blaze Hanson pushes the door marked "Student Records" open, right into the face of some poor nameless background chicken.
* Chimney Chickens, Blaze implies to Buzz that he already has some girls' phone numbers by saying "I'll just bust out the ol' Rolodex here and have a date in about thirty seconds." But the only three numbers in Blaze's contact list are for his mom, Buzz, and 911.
* Chimney Chickens, Blaze remarks, "Oh, I don't like where this is going..."
* Chimney Chickens, Rob McLaury mugs Wade O'Donnel by holding him by the ankles and shaking coins onto the floor.
* Chimney Chickens, Rob's mad-libs comeback follows the pattern of "(variant on the previous line of dialogue) SHUT UP!"
* Chimney Chickens's car into a girl's car in his latest attempt to get her phone number, Buzz clarifies what he meant by Blaze being more responsible.
* Chimney Chickens, Slick Hisoka the ninja is running from Rob McLaury. When Slick gets backed up against a wall, he gets away by throwing down a smoke pellet. Slick is somehow gone in the split second it takes for the smoke to clear.
* Chimney Chickens's poster, then left a note with Buzz's name to help Buzz find his paint - making it look like Buzz was the one who vandalized the poster. When Buzz finds his paint next to a disapproving Dash, Buzz name-drops this trope.
* Chimney Chickens, when Blaze throws the nitroglycerin he was asked to fetch at Buzz, the camera cuts from inside the lab to outside the school to show the resulting explosion.
* Chimneyspeak, a small cut across the nose of wealthy heiress Chelsea Grinn caused her to go absolutely insane, and turn into an absolutely insane woman who is now covered in scars, is nigh unstoppable, and kills for basically no reason at all. The voice in her head representing what is left of her reason at one points gets angry and reminds her that they could have had a perfectly normal life if they just applied a small amount of makeup.
* Chimneyspeak had to do this, since he was contracted to kill a man, then made a friend, and didn't realize they were the same person.
* Chimneyspeak is brought to the brothel, strips naked, and gets examined by Alice. At first, the girl seems perfect, with a gorgeous body and a pretty face. When Alice asks what's the catch, Gnasher gives a sheepish grin... and reveals a mouth full of razor-sharp fangs. A visibly-disturbed Alice remarks...
* Chimneyspeak, the dead Highlanders' graves are marked with their swords as well as name plaques.
* Chimneyspeak where Elgie, who's under one meter, has had relationships, sort of, with the normal-sized Chelsea (when she wasn't trying to kill him) and Alice.
* Chimney Swift 11: The creator calls his fans "The Swifter Army". Sometimes, he also calls them "Swifters".
* Chimpanzee observes the developing bond between Oscar a three-month-old orphan and Freddie the troop leader (likely in his twenties or thirties.) This bond is

especially noteworthy as while Chimpanzees are considered capable of adopting orphans this was the first time it was captured on film and even rarer seeing as it was an adult male and the alpha male no less.
* Chimpanzees are capable of empathy to some extent despite being aggressive animals. In one episode of
* Chimpanzees are known for being human-like, to the point where they are dressed in human outfits. Also, they can make a funny, huge, toothy grin they flash for the cameras, it makes them look devilish. The bad thing is, it's not a grin, but a mouthful of very large teeth being bared. Despite their small size, they're strong enough to literally tear a human limb-from-limb with their bare hands.
* Chimpanzees have a dark-pigmented conjunctiva, which makes their sclerae look black. Captive chimps that have been mistreated or poorly-socialized are notoriously prone to unpredictable outbursts of violence and destructiveness.
* Chimpanzees have been sighted manufacturing stone tools, so they have officially entered the stone age. Corvids (crows and ravens) do one better, as they sometimes bend metal into useful shapes and then use these metal tools to various tasks. They also remember where they put them for later re-use.
* Chimpanzees subvert this trope as often as they play it straight. The dominant male of a troop is often the best fighter, but if he's not skilled at troop politics and tries to be too much of a bully, other males might team up to attack him together, using superior numbers to make up for being individually less powerful. This usually results in two or three males being co-dominant fore a time, often with the more dominant individual being one that's better at making friends with the rest of the troop rather than being the best fighter.
* chimpanzees. The executives are celebrating the upturn in sales until the guy turns the graph right side up. One of the chimps turns it back the other way and continue partying.
* Chimpanzees. when an entire troop attacks, screeching at the top of their lungs, the effect is absolutely terrifying. Also deafening.
* Chimp J. Fred Muggs, alongside Dave Garroway in the earlier days of the
* China and Japan; notable in that the status of China's other siblings
* China Anne McClain. Different spelling but it still counts, although in real-life she goes by China Anne instead just China, similar to Mary-Kate Olsen not going by just Mary.
* China Anne McClain's music video "Calling All the Monsters" features all sorts of monsters.
* China, around the Spring and Autumn Period until the end of the Han Dynasty, had the
* China", as Taiwanese computers struggled to deal with the impending Minguo 100.
* China Beach has the surviving veterans reunite and visit the Vietnam War Memorial in Washington D.C.
* China Beach, the characters are trapped in a bunker under heavy fire. Some of the men spontaneously burst into song.
* China Beach. The show also featured a performance by Nancy Sinatra, who performed for the troops during the era.
* China Beach when Nan Woods' character Cherry White was killed off in 1989.
* China Blue is a documentary about the working conditions in China's textile industry.
* China breaks apart completely during the Sino-Soviet War. What's left is a PRC rump, a southeastern part controlled by the KMT, an independent Tibet, a series of Soviet satellites in the Northern parts and a Taoist extremist group that rules over Chongqing. Eventually, the KMT takes over most of the country and destroys both the Taoist extremists and the PRC, and finally reunifies China after decades of bloody fighting.
* China gets a lot of accusations of this trope. While ancient China was known for developing many foundational technologies that have forever altered the world such as paper, gunpowder, printing, and the compass, critics note that the country hasn't innovated much after the 1200s (perhaps not coincidentally when the Mongols invaded and conquered them). It doesn't help either that the current Chinese

government makes extensive use of spies and hackers to steal technology from the rest of the world, nor that Chinese culture in general doesn't place a high value on copyright and patent protections, leading to a lot of knockoffs and therefore a disincentive to create.
* "China Girl" is best known for David Bowie's 1983 hit version from
* China has a reputation for doing exactly this with their military hardware, sometimes obtained legitimately—the Soviet Union donated a lot of plans and tooling in the 1950s and 60s- but frequently through reverse-engineering or industrial espionage.
* China has a virtual monopoly on rare earth mineral production. The United States used to carry this monopoly, but a combination of factors have made it no longer economically viable to produce them in the US. Since rare earths are absolutely vital to the manufacture of modern electronics this is very much a case of Not Rare Over There.
* China has had a similar system since antiquity (being able to make Epic Hails was one of the reasons the Great Wall got built)—in fact, one regime got invaded because
* China has the "Romance of the Three Kingdoms" period that was pretty much this trope. In fact, this trope can be easily summed up in just three battles of this time period: Chibi, where western Shu and eastern Wu alliance to battle against northern Wei; Fan Castle, where Wu betrays Shu with the help of Wei to take control of an incredibly important part of central China; and Yi-Ling, where Shu responds to the betrayal by attacking Wu, losing a huge chunk of troops and their leader, and eventually surrendering to Wei, which, after undergoing a mostly bloodless coup and becoming Jin, quickly sweeps up the rest of the empire.
* China, Hong Kong and South Korea also only dubbed the first 52 episodes of the 2003 series.
* China, IL however, the show was very unpopular. And after dismal ratings and unkind reviews, was done after one 10 episode season.
* China, IL, "Life Coaches", Baby Cakes is sitting in class naked for some reason and eating an apple while his classmates avoid looking at him.
* China is a major exception: ever since the founding of the People's Republic in 1949, beat cops have not carried firearms with only very few exceptions. That all came to a shocking end in March 2014 when a group of 8 Islamic terrorists armed with knives and hatchets slaughtered 29 civilians at a train station. Except for a few train station guards who futilely used tear gas launchers to slow them down, the terrorists ran rampant for ten minutes completely unopposed until a SWAT Team arrived on scene and gunned down half the group while arresting the other half. Following this incident, the Chinese government moved to begin
* China is embroiled in civil war at the very start of the game, not too dissimilarly to how China was in 1936 in
* China, it was also the center of world manufacturing, in large part due to inexpensive labor costs, extensive water infrastructure, and lack of administrative barriers to internal trade. All of this not only enabled the production of the aforementioned commodities, which require considerable processing to be made into viable consumer goods, but also of other more common products such as wooden furniture and lacquerware. Nowadays, while China is the leading producer of natural silk and tea leaves, it is no longer the only one, or indeed regarded as providing the best. This is particularly marked with porcelain, where the best examples generally come from either Europe or Japan.
* China (literally "worthless"), and has since been banned from TV programs by the mass communications authority in Japan. In the Chinese subs, it is replaced by "Blue Planet".
* China Miéville all but outright states that human colonists habitually do this to the native animals of colonized worlds, and that the alien creature refereed to as a rabbit on one world may bear as little resemblance to the alien creature refereed to as a rabbit on another as it does to an actual rabbit.
* China Miéville are scared of the things that have crawled out of there.
* China Miéville are working-class. The novel even features an attempt to

unionise familiars.
* China Miéville. At least, the men. The women, on the other hand...
* China Miéville being a veteran of the city of New Crobuzon's not-exactly-legal underground arena circuit.
* China Miéville, but sometimes as something weirder like hair, hands, lips and other body parts.
* China Miéville Ear Worm that can be spoken as well as sung. If you hear it intoned correctly, it causes a feedback loop in the brain that not only makes you recite the wormword over and over, potentially infecting other listeners, but also causes your brain proteins to distort, as if you've contracted a prionic brain disease.
* China Miéville employ this trope heavily — vampirs, chymistry, elyctric elementals.
* China Miéville from the city for fear of what they could become.
* China Miéville has 'knacked' mobile phones that can do things like communicate with Wati, a disembodied spirit, or communicate over an unlimited range.
* China Miéville has several examples, such as a prop phaser from Star Trek that's been enchanted so that it actually works.
* China Miéville, incorporating so many mismatched limbs, eyes, mouths, and miscellaneous appendages into the same freakish body that, when Lin is hired to sculpt a statue of him, she can scarcely imagine how anyone could possibly begin such a task.
* China Miéville its rival's substance into itself through this improvised 'esophagus'. A few gulps is all it takes to suck the horse-sized elder's entire bulk down the pipe, bit by bit.
* China Miéville might not have been such a bright idea after all.
* China Miéville, much less be able to return there. The character who discovers her breakdown is completely stunned.
* China Miéville race, female members of which possess slight ornamental breasts useless for lactation.
* China Miéville ride donkey-sized chickens. They also use these oversized, highly aggressive roosters in gladiatorial cockfights.
* China Miéville, Silas steals a statue from the grindylow which grants him mysterious powers, yet has the unfortunate side effect of slowly turning him into a fish-person.
* China Miéville's "Reports of Certain Events in London" is an account of a secret society which investigates migratory streets that appear and disappear from cities, derived from a package of documents delivered to him in error.
* China Miéville. The citizens of one city are taught from birth to completely ignore the existence of the other, setting up much of the book's plot.
* China Miéville. The city state that serves as the setting makes uses of its "militia" which has agents that can be anyone.
* China Miéville, the discovery that Bas-Lag's ancient race of anophelii (mosquito-folk) aren't extinct comes as a shock to many in Armada. Soon enough, an Armadan diplomatic party goes to visit them, and brings one back with them.
* China Miéville to spontaneously re-form into worm-shaped coils. These coils then slither into the speech center and make them recite the wormword again and again, driving their host insane and tempting any other listeners to repeat the brain-destroying word in turn.
* China Miéville two cities are juxtaposed in space, yet every single citizen 'unsees' the opposite city which is right in front of them. However, they are allowed to cross the border and be a tourist in the other city, in which case they unsee their own city and see the other one instead. Unseeing is a deliberate act and you can 'see' the wrong city if you want, but you will immediately be 'disappeared' if you do (children are allowed some leniency while they learn the system). It is never clear if this is a masquerade created by the people who live each city or if there is some other cause.
* China Miéville with a thought process no human can truly understand, talk

like this all the time.
* China movies were inspired by the crime wave sweeping Hong Kong at the time of filming.
* China relies on this for some of the stunts it pulls in the South China Sea, such as unilaterally expanding its airspace, betting that no one will call them on it because it would be too costly to fight a war over it.
* China Rich Girlfriend, Colette Bing is unable to pay for one of her typically jaw-dropping dinners, unaware that her father has cut off her Titanium card out of spite—and that there is, in fact, such thing as a credit card rejection. Her assistant, Roxanne, steps in to pay with her black card.
* China's Great Leap Forward, which tried to compensate lack of technology with combined forces and enthusiasm, gave birth to a bunch of jokes.
* China, since they're just an island facing off against one of the world's largest countries there's very little chance that they'll actually be able to become the recognized government again. They differ from a true government in exile in that still they hold land and reside in Chinese territory.
* China's Mandarin name, Zhōngguó, means "central states" or "middle kingdom". Sometimes referring to the culturally distinct core area of the region or the capital, sometimes referring to the belief that they were the center of civilization. Though often the empire was known by the name of the ruling dynasty, such as the Qin dynasty which may be where the English name comes from.
* China's one-child policy introduced in 1979 (before the policy was instituted, China
* China's own attempts at gunboat diplomacy seem to actually be backfiring against them. By antagonizing their neighbors, China has actually pushed these to have closer ties to the US. The Philippines is already a given considering that they're already a recognized "Major Non-NATO Ally". More ironic however is Vietnam, a communist country and America's former foe in
* China's People's Liberation Army & People's Armed Police, with more young men wishing to join than they have room for, selects only the most physically fit without any physical "defects". Things like nearsightedness, tattoos, being over the age of 21, and inadequate education are amongst many disqualfiers. Once they do get accepted, the average infantry undergoes brutal training where they are expected to
* China's primary arms company, Norinco, produces an unlicensed copy of the M16A1 known as the Norinco CQ. Although it never saw much service with the Chinese military, primarily intended for export sales, what makes it notable is that the Iranian military has been producing unlicensed copies of the unlicensed copy, one of which became the primary assault rifle of the Iranian military. Despite
* China Strike Force. In the English dub, at least three characters are named for the actor: Coolio plays Coolio, Norika Fujiwara plays Norika, and Ken Lo plays Ken Lo.
* China Takes Over the World and large population which has also made the Chinese an influential target for corporations and movie studios back this claim alongside China's powerful army. With a recession in the 2010s and an increased desire to perpetuate a trade war to avert this trope however, this trope may now be discredited even with China's overall economic growth taken into account.
* China Takes Over the World by Robert Hugh Benson, both published 1907-1908.
* China Takes Over the World is still a complete clusterfuck even after 20 years.
* China Takes Over the World: The whole world is somehow under the effective control of China.
* China to describe the treaties that resulted from these losses. Even in contemporary China, it's still invoked with anger as is the Six-Nation Army's sack and looting of China in the Boxer Rebellion and the defeat to Japan in the First Sino Japanese War.
* Chinatown, but gets drawn into a labyrinth of danger where nothing is what it seems. This is a common problem for this character type.
* Chinatown, Jake tells an off-color joke while Mrs. Mulwray stands right behind him in his office doorway. He ignores the efforts of his associates to either shut

him up or draw his attention to the visitor.
* Chinatown revolved around this concept. It was alluded to rather blatantly in an old draft of the script, but it was removed at the behest of the director, who felt it was too obvious.
* Chinatown strongly implies that Mulvihill was one during his time with the police. In their first scene together, Gittes mentions that when Mulvihill served (during Prohibition) "the rumrunners never lost a drop," hinting that he was on the take.
* Chinatown) to smash the TV in Nicholson's trailer. This sparked an argument that culminated in Nicholson tearing off his costume and storming off the set, then realizing that his trailer was attached to the set and having to slink back on in his underwear.
* Chinatown Wars, the sexy Ling appears on both the cover and a poster included with the game. She survives for barely one mission.
* Chinatsu, a teenage member of a two-man hit squad under orders to kill Koko. Her hobbies include cold-blooded murder,
* China was an example of such) don't play well to Chinese audiences who prefer to enjoy large, precision group numbers (think the 2008 Olympic opening ceremony).
* China was not a politically stable place, especially during the 1940s, when the Communists, Nationalists, and various warlords were all vying for power in different bits of the country. The currency during this time was so mistrusted that smart Chinese businessmen preferred to be paid in gold, silver (still plenty of Qing-era ingots left), or opium.
* China White, a Romeo and Juliet-esque love story set in Amsterdam's Chinatown, where the protagonist, a Chinese triad enforcer Bobby Wong had a rocky relationship with his Dutch girlfriend Anne Micheals, an Interpol investigator. Anne is clearly submissive to Wong throughout the entire movie.
* China White, one of the Triad higher-ups is brutally killed, and his head is placed in a wrapped box to be sent back to his subordinates.
* Chinchilla fur is so thick that it cannot air-dry on its own. If a chinchilla gets wet and is not dried properly, the fur on top will dry and trap the moisture on the skin underneath. While this doesn't lead to death immediately, it opens the chinchilla up to fungus growth, fur rot, and other diseases.
* Chinchillas. Take a mouse with bunny legs, but make it fluffy. No, fluffier. Keep going. Little more. If you're picturing basically a poofy gray cloud with big ears and eyes, little paw hands in front with big feet in back, and the softest fur you can possibly imagine, you've got the general gist.
* Chindi) after a hull breach. Another man is trapped in a compartment separated from the ship by the process of rescuing him, and it's a race to complete the rescue as everything inside it starts icing over.
* Chindi, a ghost who haunts the bathrooms of a school built where her house used to be.
* Chindi gently mocks the leader of the Contact society who, when he finally encounters the alien spacecraft he's been searching for his entire adult life, can only think to give this trope.
* Chindi, Hutch is piloting a ship being sent for standby duty at a research station near an unstable star. When she's nearly there, she realizes that the list of Academy personnel on the station includes a teacher, which suggests that the researchers may have their families there—but due to a bureaucratic snafu, her ship is only large enough to carry the listed personnel! At which point, an EM pulse from the star fries everyone's communications systems, and the explosion that caused the pulse looks like it will destroy the station. A number of researchers volunteer to go down with the station, so that others might live, but fortunately, someone back home noticed the snafu, and when communications go out, hurriedly redirects another ship, which arrives just in the nick of time.
* Chindi is a 16 kilometer alien spaceship (apparently automated) that when the protagonists encounter it is 'tanking up' from a gas giant. It does this by lowering a free-standing nozzle into the gas giant's atmosphere that pumps hydrogen into outer space like a fountain, and all the spacecraft does is orbit the planet

regularly scooping up the hydrogen until it's fully fueled. The spacecraft then retrieves the nozzle and accelerates up to a quarter light speed to the next planetary system.
* Chindi is over 16 km long, and apparently uninhabited, but still intent on its unknown mission.
* Chindi points out that thanks to his trope, time is moving slower on the alien spacecraft so he actually has several hours left.
* Chindi (though her rescue plan fails the second time and it's Tor who realises how to save them both) and the epilogue implies they've got back together again, mainly because Tor has an epiphany about his life after facing his death on two separate occasions.
* chindi, which is discovered refueling itself in orbit around a gas giant in a remote system.
* Chinese air combat film but if reviews of the film are any indication, it's a lot more of a snoozefest.
* Chinese (and occasionally Japanese) characters were the tribal tats of the 2000s, only they affected men and women equally. They were intended to look exotic and mysterious, but instead, they made the wearer look like an idiot if they couldn't actually read the tattoo for themselves. This can obviously be averted if the wearer knows the language, but by the end of the decade, Chinese tattoos had become such a cliche that they would be embarrassing regardless. Most Asian languages are tone-based, meaning that the kanji can mean anything if you don't know how to pronounce it accurately. The blog
* Chinese athletes at the Olympics are typically under such overwhelming pressure from their home nation to win gold that anything less than first place is a massive disappointment for them. One example of this is Qiu Bo being caught crying on camera after David Boudia unexpectedly beat him for gold in men's 10m platform diving at the 2012 London Olympics, in stark contrast to Great Britain's Tom Daley who was so ecstatic to win bronze that he did a victory dive into the pool.
* "Chinese Box" has only an attempted murder; the intended victim gets a few non-lethal gunshot wounds.
* Chinese Box has this trope near the end of the film with Vivian and John, just when John's disease takes its toll on his body.
* "Chinese Buffet"-themed buffet and a buffet at Disney land which, being air conditioned, doubled as a welcome respite from the heat.
* Chinese characters encode concepts and not sound, so when Chinese characters get adapted for writing other languages like Korean and Japanese, written texts can be partially readable across language boundaries because of shared meaning of glyphs. You can potentially learn to read Chinese without knowing how to say a thing. This is only possible since there was no unified Chinese 'tongue' until recently, thus a writing system based on sound would have been utterly inconvenient. In addition, Chinese grammar tends to be far simpler than the aforementioned languages, thus it was less complicated to adapt.
* Chinese cinema featuring martial arts in the 1970s would frequently pair real-life
* Chinese Civil War c.1916-1950 is a setting for a smattering of mainland-Chinese dramas and several foreign sinophiles' diaries
* Chinese Dialects and AccentsOf course the most-used language in the world has its own accents ... wait, is it actually another language?
* Chinese dramas, especially ones based on the lives of emperors or their concubines, are known for this. Justified, since the dramas are usually loose adaptations of novels that are also only loosely based on real events. Sometimes this is because of a scarcity of accurate information about the real people. Sometimes it's because a historically accurate story just wouldn't be interesting.
* Chinese exemplary tales of filial piety feature many wicked stepmothers.
* Chinese fairytales and children's tales: a day in the celestial plane (or the underworld in some) is about a year in the land of the living. Examples:
* Chinese Fake-Out", Alejandro discloses that he's been dreading the inevitable eating competition, because his body is too flawless to contaminate with gross

food. To illustrate his assertion, he rips off his shirt and flexes his pecs.
* Chinese Fake-Out", Heather tells Blainely to take a mint when she finds the other running too close to her.
* Chinese General Fai loves hordes of infantry that can rip apart enemy aircraft or armor, but is frighteningly vulnerable to area-of-effect attacks. General Tao is obsessed with nukes, to the extent that even his basic tanks have nuclear reactors and uranium shells, but all that radiation is as dangerous to his own forces as it is to the enemy. General Kwai has the best tanks in the game and is great at rolling out tons of them, but has little access to support units, so he'll have to batter through enemy defenses the hard way.
* Chinese Ghost Story steals a rich townsman's horse to elude police and rush back to rescue his ghost-girlfriend.
* Chinese Girl. She uses "Kai Men!" (The same phrase, but in Chinese.)
* Chinese, Guatemala and Nicaragua. Though in post-revolutionary Nicaragua, it was the American-backed right-wing Contras who fought against the Warsaw Pact-sponsored democratic socialist Sandinista government.
* Chinese Hero, starting with Chinese fighters defending Chinese pride against racists in America with martial arts before moving on to other settings.
* "Chinese Jinks" (1932) reuses a sequence from "Laundry Blues" (1930).
* Chinese legends say that the goddess of fire sometimes manifests as a young woman in a red dress asking for a ride. If a kind person offers to help, then during the ride, she'll warn them of coming fire-related disasters in their neighborhood and offer advice on how to avoid or at least escape them. Another tale has the famous mad monk Ji Dian attempt to bar the fire goddess from a monastery, only to be forced to let her in on order of the abbot, who believes she is just another pilgrim. Soon after, the monastery burns down.
* Chinese Letters", after the protagonist asks why his aunt's talisman faces the wall:
* Chinese literature on filial piety includes the righteous stepmother of Qi. When her son and stepson were found by a murdered man, and both confessed in an obvious attempt to shield each other, she said they should execute her son — both because her husband had particularly put her stepson in her care, and because it was the place of her son, who was the junior and therefore inferior. For which devotion to duty both men were pardoned.
* Chinese man gets remote control stuck in bottom after a drunk prank.
* Chinese. Most jokes revolve around their sheer numbers and sometimes backwardness mixed with ambition.
* Chinese Mythology about a shopkeeper that tried to sell a valuable pearl by putting it inside a pretty box. Unfortunately, the person that bought it was only interested in buying the box and left the pearl. The Aesop to the story is not to ignore the deeper meanings of Buddhism in favor of the superficial.
* Chinese Mythology, a legend of the stars Vega and Altair. Star-crossed lovers Zhi Nu and Niu Lang are separated forever across the Milky Way. They may only reunite once a year when magpies form a bridge between them. This is the basis of the Chinese cultural equivalent to Valentine's Day.
* Chinese Mythology: Almost half of the gods were mortal people in a distant past — some myths tell that even the Jade Emperor was a mortal, and every one of the Eight Immortals was made "xian" ("immortal" or "god"), after a tragic life or death. In Buddhist lore, almost every bodhisattva (god-like buddhist saints who obtained Nirvana but rejected it to help out suffering people) are proof of this trope.
* Chinese mythology, and by extension Japanese and Korean as well has a legend about a
* Chinese Mythology, but one parable told by Daoist philosopher Chuang Zu tells the story of The Blank "Hun Dun": the other gods took pity on him and tried to give him regular facial features like everyone else, but the process ends up killing him.
* Chinese Mythology has many stories that feature the Peaches of Immortality, which, as their name suggests, grant immortality to those who eat it. At one point, Sun Wukong was given the title of "Protector of the Peaches", but it was like

letting a cat guard a canary...
* Chinese Mythology has seven daughters, the youngest (seventh) is the one that has the most stories associated with her.
* Chinese Mythology mini dress. Resulting in people easily confusing him for a girl at first sight.
* Chinese Mythology, Mount Penglai has no pain and no winter. There are rice bowls and wine glasses that never stay empty no matter how much people eat or drink from them and there are also magical fruits growing in there that can heal any disease, grant eternal youth, and even raise the dead.
* Chinese Mythology serve the same purpose to Judeo-Christian angels, bearing messages from heaven and back and so forth.
* Chinese Mythology, Shun is often considered to be the first parachutist. According to legend, Shun was repairing the roof of a granary when his father and step-brother set it on fire. Shun escaped by using two big straw hats as an improvised parachute.
* Chinese Mythology suns. They took turns being the sole sun day after day, until they got fed up and rose all at once. This prompted the archer Yu to shoot and kill nine of them, leaving a single sun left.
* Chinese Mythology, the Peaches of Immortality grow in the garden of the Jade Emperor of Heaven and are given to gods, sages and others deemed worthy of them.
* Chinese Mythology the Ruyi Jingu Bang also weighs over 17,550 lbs (7,960 kg) which about 8 tons.
* Chinese Mythology with arrows. And would have taken out the tenth and final Sun if it weren't for the Emperor reminding him that we still need at least one sun to survive.
* Chinese-only which it can use to generate barriers and charge Hunters, changing who its positive and negatively charged thunder shots will target. The Poikilos subspecies, on the other hand, ditches this gimmick and instead generates Dragon energy using its wings.
* Chinese opera is much the same, with generals representing entire armies.
* Chinese or the listener does not have enough context from the sentence to get gender.
* Chinese Paladin 3 problem with this. Not only does he struggle obviously and markedly with pronunciation, he often sprays innocent bystanders with spit in the process.
* Chinese Paladin, and becomes a vengeful ghost who, a hundred years later, is so powerful none of the monks dare enter the Demon Pagoda.
* Chinese Paladin, at one point you are required to help a relative overcome some demons. To that end you are tasked with finding an exorcist, who promptly performs the ritual with all the bells and whistles, while chanting a chinese rhyme. Hilariously the moment he finishes, his wards and seals burst into flame as the real Demon shows up. Apparently the words he used to bring demons out were right, but all of his wards were fake. Ironically, at the end turns out the demon he aggravated was the benevolent one, so even if he was real he would have done nothing anyways.
* Chinese Paladin by (accidentally) groping her. She's startled into dropping her guard; but when he turns his back, she retaliates by running him through. (He gets better).
* Chinese Paladin. He eventually gets the point and agrees to let her go.
* Chinese Paladin personality, minimalist fighting style, and dress style contrasts with the more rambunctious and tomboyish Yue'Ru. Although Ling'er primarily uses magic as a ranged weapon, she can also handle a sword and staff.
* Chinese Paladin, sufficiently powerful characters do this rather than do anything as undignified as walking.
* Chinese Paladin, Tang Yu and Ah Nu are this, although they fulfill the "foil to the main couple" role only in being equally dysfunctional.
* Chinese Paladin, the Lunar Sect Cult devotees wear full-face masks with a subtle animal motif to emphasize their brainwashed, dehumanized position.
* Chinese People's Volunteer Army during the Korean War. That's right:

* Chinese polygamy legally worked like this as well; the status of the main wife is above that of concubines and maid-mistresses. Family laws from the Tang to Qing dynasties dictated that the status of a wife, concubines and maid-mistresses couldn't be altered.
* Chinese pop star Wang Rong Rollin's song Chick Chick is all about chickens, accompanied by an
* Chinese products tend to have this reputation. Due to their massive labor pool and limited government oversight, China became a powerhouse of low-cost production, resulting in a massive proliferation of low-cost, low-quality manufacturing. Poor oversight and complex supply chains has resulted in everything from tainted food and drink to counterfeit parts. There's been a substantial effort to change this reputation, and transition to a center of high technology production (much like what happened in Japan and Taiwan starting in the 1960's). Whether this effort will be successful remains to be seen.
* Chinese room. By extension, this is the basic concept for many Q&A AI, such as chatbots.
* Chinese Roulette, but also has very good abilities to discover dirty secrets and understand hidden desires of adults around her.
* Chinese smartphone manufacturer Xiaomi took one look at the "cult of Apple" and crafted its
* Chinese "Treasure Fleet" of XV Century, before they decided to ban anything remotely seaworthy. One of its points was to invoke this trope to awe China's neighbours into vassalization.
* Chinese uniform to wear is generally thought of as genderless, he will often end up being turned back to male while wearing feminine attire (much to his chagrin and ridicule). On the other hand, standalone character illustrations, cover art, and chapter breaks tend to depict female Ranma as unusually feminine. However it depends whether or not it consider cross-dressing since through magic, Ranma can be completely biologically female or male at anytime. Either way he does seem to spend a lot more time being a woman than strictly necessary, and several gags are made out of him willingly dressing up in some very effeminate clothes and seemingly enjoying it.
* Chinese Vampire: An undead hopping corpse from Chinese folklore that drains life force.
* Chinese Vampire, is known to hunt by a person's breathing. Holding your breath makes them unable to find you.
* Chinese Vampire: The Jiangshi, a Chinese equivalent to Western vampire myths.
* Chinese warlords often had to carry a sword and obsolete firearms as modern weapons weren't readily available for them.
* Chinese, which, in-game, only consists of 4-5 separate units at best. They expanded the race using both unused concept sprites, mishmashed existing units (which they did VERY well), or design from scratch.
* Chinese wrestler Jun Hado uses a Japanese ring name on the account of being a fan boy of
* Chinese zodiac. While the physical Talismans were destroyed, the magic within them each transferred to a corresponding animal, forcing them to search for the Talisman powers again in a different form.
* Chiniride vigorously supported her clan's religious intolerance to half-breeds, even though she is the daughter of a light elf and gray drow herself. (And she knows this and even contemplates killing herself to purify the world from her own kind.)
* chinks are Chinese. I'm Korean. I'm a gook, all right? If you're going to be racist, at least learn the terminology.'"
* Chino Amobi, a Nigerian Igbo-American electronic musician who identifies as queer.
* Chinoiserie becomes a hot topic in two waves. The first wave came in 1993 following the premiere of
* Chinpokomon" featured two mock advertisements. The first was the "Wild Wacky Action Bike", a bicycle with both front and rear handlebars, advertised as "almost

impossible to steer". The second product was the "Alabama Man", an action figure of a stereotypical redneck who spends his time drinking beer, bowling, chewing tobacco, and beating his wife ("When Wife asks him where he's been, just use the action button and Alabama Man busts her lip open! 'Shut up, bitch!'"). After a focus group consisting of Cartman, Stan and Kyle dismiss both as "gay", the researcher says, "Oooh, dear. Well, let's keep trying. How about this?" Cut to real commercials.
* Chinpokomon is brainwashing kids into becoming terrorists. They know the surest way to get their kids to stop liking Chinpokomon is to pretend to like it themselves, because anything parents like is automatically uncool and embarrassing for the sole reason that parents like it.
* Chinpokomon toys by buying the toys themselves, hence making the kids think the toys now suck (although this is more because "Adults are uncool and lame, so anything they like must also be uncool and lame" than this trope).
* Chinpokomon" was completely banned (and thus not available on DVD) due to mockery of the Japanese and Emperor Hirohito, including a plot point where the Japanese were brainwashing the children to bomb Pearl Harbor.
* Chintsubu is about talking penises with their own thoughts at feelings. Yeah.
* Chintsubu is saturated with penis-based puns, and to make it worse, events happen such as the characters going to a restaurant with a name based on a penis-related pun.
* Chiodos' "Those Who Slay Together Stay Together" details the events of a Zombie Apocalypse. It eventually culminates with the narrator and his group of friends
* Chio is one of these. Aside from the hangars, most of the base appears to be underground.
* Chiori Amamiya had this problem as a child star. Her first role was that of
* Chio's School Road, the animators had a little fun and showed some made-up mishaps, such as Chio missing the suitcase jump in episode one or Andou falling over while catching Chio.
* Chip and Dale will see them, bend down to grab a few, and then we'll come from behind and... They put some nuts, Gadget passes by... but doesn't pick up any. Instead, she tries to quickly sneak by. So the two chipmunks come out and ask her "Gadget, aren't you hungry?" She says "No, thanks, I ate plenty of cheese already".
* Chip and Potato: In "Spud's Homework", Chip mutters "Mmm, watermelon custard. Mmm, pumpkin pudding, my favorite" in her sleep just before going to bed, agitating her mouse Potato, whom she neglected to share her cookie with earlier.
* Chip and Potato . Only 10 episodes (20 stories) were released on Netflix at first, but as of November 2019 all 40 stories are available.
* Chip and Potato, to everyone other than Chip, Potato is Chip's snuggly toy Potato, a cute little stuffed toy she totes with her everywhere. Nobody but Chip knows that she's actually a real live mouse.
* Chip Cheezum. In the ensuing gunfight you can take bullet after bullet directly to the face and only lose a little hp each time.
* Chip Cheezum, leaving Fiddy and his opponent in a void covered by film grain.
* Chip Cheezum they do when they're not fighting and killing each other to climb the ranks.
* Chip flirts with the idea of revealing the secret to her best friend Nico in "Chip's School Trip" and does tell him "Hospital Trip Chip," allowing Potato to stay overnight with him because he's in the hospital, having broken his arm, and she wants to cheer him up.
* Chipmunk brothers Alvin and Simon start one over a small blanket while sleeping on a couch in
* Chipmunk Rock had Simon and Theodore coax Alvin into dressing up like a girl to be the lead singer for "Leader of the Pack," with Theodore joking they could be "the Chipettes" (predating the actual Chipettes' debut by a year) in performing what Alvin refers to as "a girls' song". (Later releases of the song would cut out this intro.)
* Chipmunks are often depicted with shorter deer-like tails in cartoon, likely to distinguish them from squirrels.

* Chipmunks Wrong with the Radio". (Simon kept correcting the lyrics while he was singing the song, earning Tippin's ire.)
* Chip 'n Dale), act this way towards each other, always praising each other, and trying to give the other the opportunity do first whatever mischievous act they were up to.
* Chip 'n Dale both have dog-like noses and short deer-like tails, something real chipmunks do not have.
* Chip 'n Dale, but in previous years they've been shown to be brothers.
* Chip 'n Dale. Dale has and idea, a light bulb appears over his head, and he shows it to Chip, who rejects it. Trying again, Dale comes up with a bigger bulb, which Chip approves.
* Chip 'n Dale gag it came out back in 1949, though ironically it was directed by one Jack Hannah (no relation).
* Chip 'n Dale: Park Life episode "The Jungle", this happens to the duo three times in a row.
* Chip 'n Dale: Rescue Rangers, "Adventures in Squirrelsitting", one-shot character Tammy gets a crush on Chip, based on him saving her from a fall (that would generally be no problem for a real squirrel, but nevermind that) and some impressive backlighting. She comes to realize that she doesn't need to prove anything to Chip in order to be special, though whether she actually gets over her crush is unknown.
* Chip 'n Dale: Rescue Rangers: Almost all of the Rangers had a moment like this:
* Chip 'n Dale: Rescue Rangers and incidental or background characters.
* Chip 'n Dale Rescue Rangers and she's just started to redeem herself.
* Chip 'n Dale: Rescue Rangers, and this. Sparky's a more traditional male version of this trope.
* Chip 'n Dale: Rescue Rangers: An episode has a chase scene in a TV studio - they bump into a TV show chef, just as he is in the middle of explaing how much care today's dish requires.
* Chip 'n Dale: Rescue Rangers, an oil lamp containing a genie appears. If anyone wishes to free the genie, he takes the genie's place inside.
* Chip 'n Dale: Rescue Rangers as Dale uses his abilities to steal all the world's monuments for ransom. When the Rangers investigate his travel agency, Dale thinks the models of the monuments on his desk were the real things miniaturized.
* Chip 'n Dale: Rescue Rangers as they're homesick Chinese pandas at an American zoo.
* Chip 'n Dale: Rescue Rangers authors having a large slew of differing ideas. However, the important parts of her backstory were stated within minutes of her first appearance: she's the daughter of an old pilot friend of Monty's, Geegaw Hackwrench, who had died a year before to the start of the series
* Chip 'n Dale Rescue Rangers because they destroy the soufflé before it can even be put in the oven.
* Chip 'n Dale: Rescue Rangers before falling into a dumpster together. Then again, Foxy had had a crush on Dale even before they met for the first time which heavily implies that she has been at least watching the Rangers since their arrival at the drive in, if not outright secretly stalked them since even earlier. Their first meeting is cute nonetheless.
* Chip 'n Dale: Rescue Rangers: Being a team comprised of rodents with a cat for their primary adversary, being devoured is a common danger from villains such as Fat Cat and Sewernose de Bergerac.
* Chip 'n Dale: Rescue Rangers comic, this happens to the team when they're buried in a box under the sand. Fortunately, the Pi-Rats happen to sail ashore not long after and are able to dig them up.
* Chip 'n Dale: Rescue Rangers) committing crimes and plotting against the Rangers.
* Chip 'n Dale Rescue Rangers, Dale looks into a cave and yells "Hello down there!" The echo repeats this. He then says "Say, you're handsome!" The echo says "Thanks!"
* Chip 'n Dale: Rescue Rangers. Detective Drake points out the possibility of his survival using the title of this trope.
* Chip 'n Dale: Rescue Rangers elements, and the boss is a cat magician who tosses

playing cards.
* Chip 'n Dale: Rescue Rangers episode "Adventures in Squirrel-Sitting" had Chip and Dale doing this. In drag. Singing "The Fat Cat Stomp". So Gadget could sneak around.
* Chip 'n Dale: Rescue Rangers episode "A Fly in the Ointment" Dr. Nimnul invents a "modemizer" helmet that allows him to travel through telephone lines so he can escape after committing burglaries. He is ultimately defeated when Zipper dials 911, therefore transporting him right to the police station.
* Chip 'n Dale: Rescue Rangers episode "Chipwrecked Shipmunks", Chip gets coconuts to the head. Now add to this the fact that one coconut is both bigger and heavier than a chipmunk, and that Chip is standing on sand.
* Chip 'n Dale: Rescue Rangers episode, "Dirty Rotten Diapers", a series of robberies results in Thaddeus, an adopted baby being returned to the adoption agency by every couple whose house was robbed. It is later revealed that Thaddeus is really a dwarf disguised as a baby who runs the robberies.
* Chip 'n Dale: Rescue Rangers episode "Gadget Goes Hawaiian" Gadget switches places with Luwhinie (spelling uncertain), who is her exact duplicate (aside from being voiced by Gidget actress Deborah Walley).
* Chip 'n Dale: Rescue Rangers episode "Good Times, Bat Times", Chip tries to reveal his feelings to Gadget. Twice. He always fails.
* Chip 'n Dale: Rescue Rangers episode "Good Times, Bat Times", the cleaning woman-turned-witch Winifred temporarily changes Dale into a frog. He even accidentally almost devours Zipper.
* Chip 'n Dale: Rescue Rangers episode "Last Train to Cashville", Dale is sleep-deprived as the Rangers try to foil Fat Cat's plans, and begins to sleepwalk, right into a construction zone, narrowly avoiding death several times thanks to his friends chasing after him and some conveniently placed girders. The scene ends with Chip falling down multiple stories and landing in a pile of cement.
* Chip 'n Dale: Rescue Rangers episode "Out to Launch" a reporter is making a live-action about a new Space Shuttle as it suddenly gets out of control and goes plummeting towards the control tower. It takes about two seconds after relaying the info for him to realize that he too is in said tower.
* Chip 'n Dale: Rescue Rangers episode "Pied Piper Power Play" the team destroys Nimnul's rodent-powered generator by convincing the mice to constantly run the treadmills. The twist is: the explosion would kill them all, as well as all the Nimnul's hostages, so they have to stop it afterwards.
* Chip 'n Dale: Rescue Rangers episode "Pound of the Baskervilles" has the intrepid rodents go snooping through Baskerville Hall in search of mystery writer Howard Bask's last will. As Chip is an avid fan of Bask's stories, he's able to deduce clues about various hidden latches in the manor house that ultimately lead to a secret workroom where Bask penned most of his stories. It is in this room that the will found.
* Chip 'n Dale: Rescue Rangers episode "Robocat", the titular robot even has different personalities according to what game cartridge is inserted. Yes, its AI runs on arcade game code. Fat Cat takes advantage of this with a wargame cartridge in a plot to steal a rare fish.
* Chip 'n Dale: Rescue Rangers episode "The Carpetsnaggers" to chase humans from one side of a flying house to the other to prevent it from hitting any buildings.
* Chip 'n Dale: Rescue Rangers episode "The Case of the Cola Cult" has Gadget half-heartedly attempt to join a soda-worshiping cult of mice. The leader of the cult is benevolent and genuinely believes in what he says, but his evil second-in-command was taking all the belongings new members gave up and keeping them.
* Chip 'n Dale: Rescue Rangers. Especially Gadget, who is a fan-favorite (Disney was honestly surprised with her popularity).
* Chip 'n Dale: Rescue Rangers, falls out of the sky and lands in a man's soup.
* Chip 'n Dale: Rescue Rangers fanfic, long before actual fanfic was written.
* Chip 'n Dale: Rescue Rangers, Fat Cat gets Plato out of the way at one point by spraying his mouth with whipped cream and stuffing a visitor's lapdog into the middle of the mess.

* Chip 'n Dale Rescue Rangers, Fat Cat is using a device that makes cows unable to give milk. When the protagonists question the cows, they're clearly nervous, because if they "don't think milk, the farmers will start thinking hamburger!" (The heroes manage to destroy the device, but seeing as this is the eventual fate of most cows anyway...)
* Chip 'n Dale: Rescue Rangers featured Prof. Nimnul using electrical flying carpets to steal valuable objects.
* Chip 'n Dale: Rescue Rangers features Professor Nimnul threatening to destroy the city with a machine connected to a phonograph that causes whatever record it plays to manifest itself (for example, playing the sound of a tornado will cause a tornado to appear). He gloats that he'll have the entire city in his sway! But when the Rangers swap his record of destructive noises for a jazz record, instead of the city being under his sway it just starts...swaying. As in, instead of being destroyed, all the buildings in the city are grooving to the beat!
* Chip 'n Dale: Rescue Rangers. Finding a missing kitten → foiling a plot by a mad scientist to level the city with lightning. Reuniting a nightingale with a Chinese ruler → foiling a plot by said ruler's sister to take over the throne. Helping a kid find his lost science project → foiling a plot by the same mad scientist wanting to level the city...again. An attack on a fish truck → stopping a submarine full of seas creatures from flooding the city. Even their first mission had a case of a stolen ruby turn out to be part of a scheme to rob the world gold depository.
* Chip 'n Dale: Rescue Rangers for a TV cartoon made by Disney. All of which was likely to shoot right over the heads of the target audience.
* Chip 'n Dale: Rescue Rangers. For example, from the episode "Fake Me to Your Leader":
* Chip 'n Dale: Rescue Rangers, Foxglove is victim to this in her only episode. She arrives to save Dale from falling. Dale didn't know bats like her can carry anything/anyone her size. She ends up remembering this before they start falling into a trash dumpster.
* Chip 'n Dale Rescue Rangers from whence it took inspiration, there exists a rodent society alongside the human one. The Rangers often cross the barrier between the two dealing with human villains that cause problems for animals.
* Chip 'n Dale: Rescue Rangers: Gadget doesn't even remember Glitch at first, so is confused just why she has a vendetta against her.
* Chip 'n Dale: Rescue Rangers: Good Humor released an ice of Chip's face.
* Chip 'n Dale: Rescue Rangers got one in 2010 that continue where the series left off where the rangers regroup once more. Lasted for only for eight issues due to Disney revoking Boom's license after gaining Marvel.
* Chip 'n Dale: Rescue Rangers had an Acme product: the Acme Majestic Ultra-light All-Weather Fiberglass Volcano as shown in the episode "Gadget Goes Hawaiian".
* Chip 'n Dale: Rescue Rangers had an episode, imaginatively called "Space Plane" which revolved around Chip and Dale getting trapped in a space plane, forcing Gadget to cook up a scheme involving a homemade spaceship with fire extinguisher thrusters, dynamite-powered rockets, all powered by pulling cables with nuts and washers attached to them.
* Chip 'n Dale: Rescue Rangers had Gadget make a matador machine out of random junk so the team could bullfight El Emenopeo.
* Chip 'n Dale: Rescue Rangers has an episode where Monty sees Zipper as a piece of brie while attempting to go cold turkey on cheese after his addiction puts Gadget's life in danger.
* Chip 'n Dale Rescue Rangers has little trouble driving a bus (the rodents advice him, though). He mistakes brake pedal for gas only once.
* Chip 'n Dale: Rescue Rangers has Plato, a police dog known for his "crime bite", which involves him biting a criminal in the backside. However, he only appears in the story arc which explores the origins of the Rescue Rangers.
* Chip 'n Dale: Rescue Rangers has tons of it. Gadget's pre-"To the Rescue" life is as unknown as her father Geegaw's fate (let alone that of her mother) or what happened in Zanzibar back then, Tammy and Bink's mother has neither a name nor a

husband, and so forth.
* Chip 'n Dale: Rescue Rangers have this happen, and it's usually the villain of the episode who has it happen to them. Typically, they steal something and by the end of the episode the Rescue Rangers will have either returned the item themselves or left it somewhere for the police to find.
* Chip 'n Dale Rescue Rangers. He had invented an aging ray, and tried to demonstrate it by turning a huge bottle of milk to cheese. Not that cheese works that way, and the convention hall full of the dairy industry should've mentioned that ... and the ray does work to age things. Notably, the two cops and the police car, as well as one of the Rangers.
* Chip 'n Dale: Rescue Rangers in 65 episodes was one of his inventions re-used (a shrinking/growth ray), and even then it was not being used by Nimnul.
* Chip 'n Dale: Rescue Rangers in death after abandoning his post in life. By scaring off Fat Cat and saving the Crown Jewels of England, he redeems himself and is able to pass on in peace.
* Chip 'n Dale Rescue Rangers: In in "Chocolate Chips", the confectioner Heinrich von Sugarbottom uses mind control juice injected via intelligent mosquitos to compel the local wildlife, including the visiting Rangers, to transplant cacao trees closer to his Incan temple hideout.
* Chip 'n Dale: Rescue Rangers into making a misguided wish, allowing Chip & Dale to reach the genie's lamp. They wish that none of this ever happened to reset reality.
* Chip 'n Dale: Rescue Rangers in which Gadget utters that she thinks she "left the thingy on the whatzit".
* Chip 'n Dale: Rescue Rangers is a parody of both Dan Rather and Walter Cronkite.
* Chip 'n Dale: Rescue Rangers. It can even be said that since Gadget very rarely acts girly, the team has a woman but no Chick.
* Chip 'n Dale: Rescue Rangers. Later, when the opera is repeated (only with an alligator now in the lead role), the camera focuses on the window, only to have the alligator burst through the wall right next to it.
* Chip 'n Dale: Rescue Rangers, leading to an episode wherein she learned the valuable lesson to stop thinking so much.
* Chip 'n Dale: Rescue Rangers, making one a voluntary werewolf and the other an involuntary wolfwere.
* Chip 'n Dale: Rescue Rangers moment, Fat Cat declares, "Why, Mole, you surprise me."
* Chip 'n Dale: Rescue Rangers, Monterey Jack had known Gadget when she was younger; when he and his two friends first meet her in the story, he exclaims that he hasn't seen her "since you were knee-high to a knee!" (Slightly inverted because Jack shows more a paternal attitude towards her than anything else since he was friends with her dad and she probably thinks of him as a favorite "uncle".)
* Chip 'n Dale: Rescue Rangers, Monterey Jack only joins the team after a fight with the titular chipmunks.
* Chip 'n Dale: Rescue Rangers, Monty would have married Désirée D'Allure if he hadn't encountered that truck loaded with cheese.
* Chip 'n Dale: Rescue Rangers: Most notably in "Good Times, Bat Times" when Winifred pulls this out instead of the list of magical items she needs for her brew.
* Chip 'n Dale: Rescue Rangers, most often by but not limited to the two chipmunks.
* Chip 'n Dale: Rescue Rangers mouse Gadget Hackwrench constructs a spacesuit from a rubber glove and a glass jar. Plausible, in that Gadget spent less than a minute outside a pressurized spacecraft.
* Chip 'n Dale: Rescue Rangers nature. There's still a Gadget-themed roller coaster at Disneyland, twenty years after the series run.
* Chip 'n Dale: Rescue Rangers often runs on the spot at the beginning of a cheese attack. If he doesn't float in the air, that is.
* Chip 'n Dale: Rescue Rangers: One of the most famous upgrades Gadget added to her father's plane, as Monty accidentally finds out.
* Chip 'n Dale: Rescue Rangers pilot, Aldrin Klordane had turned a cave

conveniently placed underneath the Federal Gold Reserve into his own Elaborate Underground Base which not only has a diagonal monorail, but even a real railroad connection.
* Chip 'n Dale: Rescue Rangers qualify, most notably Gadget Hackwrench. The closest the series ever gets to specifying the characters' ages is that two episodes imply that Monterey Jack is much older than Gadget, Chip, Dale, and Zipper. His character design also suggests this, as he's considerably taller than the others, heavyset, and mustachioed.
* Chip 'n Dale: Rescue Rangers, released in 1996 as the first of its kind. Ever since, these names have been established as fanon.
* Chip 'n Dale Rescue Rangers" sees Chip and Dale discover that there is a strange anomaly in their blood that makes standard blood transfusions impossible except between each other, even though they aren't biologically related. Dale eventually realies that this is because of the past accident where Nimnul's teleporter caused the Rangers to switch heads; as he and Chip switched with Gadget and Monty respectively, they retain some mouse DNA even after switching back, which also has the long-term benefit that Dale and Gadget can have children (based on tests Dale carried out before proposing to Gadget after Chip falls for his doctor during his time in the hospital).
* Chip 'n Dale: Rescue Rangers sees the Rangers encounter a small, rodent sized stegosaurus who turns out to be a hyper-intelligent alien. He reveals that several million years ago, his people sent a colony ship to Earth and he's been sent to find out what happened to them. The Rangers discover that exposure to Earth's atmosphere and vegetation caused the colonists to grow to humongous size, but also destroyed their intelligence, turning them into the lumbering mega-fauna we know as dinosaurs.
* Chip 'n Dale: Rescue Rangers; she’s able to turn any house appliance in all sorts of rodent-size machinery like airships, rockets, weapons and vehicles.
* Chip 'n Dale: Rescue Rangers she can remember which control operates that craft's skylight. She finds it, of course, with scant few seconds to spare, but not before activating the wipers.
* Chip 'n Dale: Rescue Rangers's life above his cheese addiction that Gadget is saved.
* Chip 'n Dale: Rescue Rangers sometimes puts quite some dakka into the paws of chipmunks.
* Chip 'n Dale Rescue Rangers, so whether their fears are founded or not is never shown.) A simpler example from the same show would be the cast frequently using large (for them) human-made tools with relative ease.
* Chip 'n Dale: Rescue Rangers's size, also since it's his only fanfic that ever won Golden Acorn Awards (one in 2007 and 2008 each).
* Chip 'n Dale: Rescue Rangers suffered this thanks to being zapped by a prune powered aging machine built by Dr. Norton Nimnul. The heroes discover that they can reverse the process by loading it with plums.
* Chip 'n Dale: Rescue Rangers. The alien in question has three mouths nested in one another, the last one is just big enough to pinch the Ripley look-alike's nose.
* Chip 'n Dale: Rescue Rangers: The booby baby in "Three Men and a Booby", Jeremy in "Bearing Up Baby", and Bink (and Tammy) in "Adventures in Squirrelsitting".
* Chip 'n Dale: Rescue Rangers: The eldest Baskerville brother inherited their father's manor because there was no (known) will stating otherwise. Hidden somewhere in the house, there was a will through which the youngest son inherited.
* Chip 'n Dale: Rescue Rangers: the end result is Fat Cat and his goons improbably stuffed into tiny cans, humiliated but apparently no worse for the wear.
* Chip 'n Dale: Rescue Rangers, the episode "A Lad In a Lamp" saw a genie trick Rescue Ranger Monterey Jack into taking his place, thereby being able to leave the lamp. He doesn't even get to the point of lots of backfiring wish fulfillment. It could be argued that Monterey filled this role when he was captured by Fat Cat and his minions, as he then managed to trick the minions into making wishes that would benefit the other Rescue Rangers rather than Fat Cat; he was just being a Jerkass in favour of the good guys.

* Chip 'n Dale: Rescue Rangers, the gang encounters a cult that has a soft drink commercial as its inspiration and use its jingle as their hymn.
* Chip 'n Dale: Rescue Rangers, there are still landmarks from New York City to be seen and identified, namely the Chrysler Building ("The Carpetsnaggers"), the Twin Towers ("Robocat"), and the Statue of Liberty ("It's a Bird! It's Insane! It's Dale!").
* Chip 'n Dale: Rescue Rangers. The Rescue Rangers have an Easter basket that turns into a tank. And since Everything's Better With Pineapples, they use a hollowed-out one to spy on Fat Cat.
* Chip 'n Dale: Rescue Rangers. The Rescue Rangers set out to clear his name.
* Chip 'n Dale: Rescue Rangers the treasures, from doing that with the ring.
* Chip 'n Dale: Rescue Rangers, though instead of being garbed in the traditional black, they are dressed in the soda-colors (orange, grape, and cherry) of the rest of the cult's members.
* Chip 'n Dale: Rescue Rangers through the sewer system into the bank vault. Neither Sparky nor Buzz are aware that they're accessories to robbery; according to Sparky, it's "action without thinking."
* Chip 'n Dale: Rescue Rangers to cause a thug who was controlling a tank with a neural interface helmet to lose control and allow them to escape the villains death trap.
* Chip 'n Dale: Rescue Rangers "To the Rescue". When Fat Cat accidentally steps on him while running, he turns into an Accordion Mouse for a second before stumbling on along his way.
* Chip 'n Dale: Rescue Rangers trick him into going there." Great consolation, Gadget. Chip bonks himself on the head and resolves to rescue his friend.
* Chip 'n Dale: Rescue Rangers typically had Chip, Dale, Zipper, Monterey Jack, and Gadget Hackwrench face one-shot antagonists in episodes that didn't focus on their main enemies Fat Cat and Professor Norton Nimnul.
* Chip 'n Dale: Rescue Rangers. Unfortunately, Dale's overjoyed glomp after seeing him alive and well interrupted a much more welcome hug from Gadget...
* Chip 'n Dale: Rescue Rangers video games, you can duck while carrying a box to hide from enemies. The presence of blinking chipmunk eyes on the box does not give away your presence, amazingly enough.
* Chip 'n Dale: Rescue Rangers was beginning in the feature department.
* Chip 'n Dale: Rescue Rangers wear clothes and can be good or evil, they just hide it from humans and act like normal animals among them.
* Chip 'n Dale: Rescue Rangers; we have the robot cat Tom, when trying to place his hand in a fishbowl we see sparks fly but no permanent effects, and he tries a second time after donning a rubber glove with no problems. Later in the episode, he ends up falling into a sewer, violently shorts out but comes out at the end repaired and no worse for wear.
* Chip 'n Dale: Rescue Rangers when he finally catches up with the Rangers and tries to kill them. In the end, another blow to the head restores his memory.
* Chip 'n Dale: Rescue Rangers, where it is very dark. The throat-slashing gesture was made by the bad guy's pet monkey.
* Chip 'n Dale: Rescue Rangers, which leads her to blow up and burst bubble gum.
* Chip 'n Dale: Rescue Rangers, Widget and Jürgen are temporarily deafened by the report of a Darned Nearly Recoilless Rifle in an enclosed space, and spend a couple of lines explaining this to each other.
* Chip 'n Dale: Rescue Rangers wish is required to revert things to normal.
* Chip 'n' Dale's cigarette tobacco with gunpowder. This winds up backfiring when Pete tosses the resulting loaded cigarette away, where it explodes near the 'munks.
* Chippewa Lake Amusement Park which had trees growing in and through them. As of 2010-2011 the park is now being torn down. The hamburger stand and coaster have been demolished and the remains of buildings and rides will be likely be removed soon. The Ferris wheel and tumble bug ride are being saved to be possibly be restored.
* Chipp Zanuff-esque technology to Tager's certain vital part. Which is covered by either Kenji Nomura giving his own version of "GAUNTLET HADES!" or an existing

voice clip of "GIGANTIC TAGER!!". The latter caused the joke to become even funnier.
* Chipp Zanuff's does this several times in rapid succession, and Ex Chipp can perform the Alpha Blade up to three consecutive times as part of a combo (normal Chipp can't).
* CHIPs admitted the costumers sewed in extra zippers on his pants at strategic places.
* CHiPs a patrolman is killed in an auto accident by a motorist who was trying pull off an insurance scam. The accident happened when a delivery van got in the way of the driver and his target.
* Chip's Challenge, makes it easier for having 200 levels (the first game and the fan sequels all have only 149 each).
* Chip's Challenge replaces them with orange-colored ants, which retain the same behavior.
* Chip's Challenge, who steals all your tools if you run into him, wears sunglasses with a blue fedora and trenchcoat. The same icon is used for the Microsoft 'Spy' utility, with the costume changing colour with the version.
* Chip (Season 5) had this reaction after getting smoked by the Bowling Moms in what he described as "putting together a car", but was really just decorating it by attaching a bunch of pieces to it.
* CHiPs episode has a pair of teenage girls hitchhike to get where they're going. This works well until the person who stops for them turns out to be a kidnapper. One girl abandons the other and Ponch and Jon come to the rescue.
* CHiPs episode "Quarantine". A boy with a pipe bomb holds the station hostage before collapsing from a mystery ailment, resulting in the titular quarantine. The quarantine also prevents a bomb squad from entering to take care of the pipe bomb. While Grossman fruitlessly tries to get the bomb squad to come in, Harlan (who hasn't been told of the situation) casually walks in, picks up the bomb, and opens it. It turns out to be just a carrying case disguised as a pipe bomb. When Getraer asks him how he knew it wasn't a bomb, Harlan yelps and drops it.
* CHiPs had the CHP faced with the son of a diplomat who routinely sped/drove recklessly knowing that he couldn't be arrested for it. They eventually get him to stop by taking him to view the wreckage of a high-speed car accident that killed a young child.
* CHiPs had to go BOOM. In one episode, the timing was a bit off, though, as it went off a cliff and exploded BEFORE it struck the canyon bottom.
* CHiPs has Bonnie go to a strip club with her friends. They see a stripper who looks a lot like Ponch who starts his act wearing a CHP uniform. Bonnie later admits she had to look closely to be sure it wasn't actually him.
* CHiPs. In a second-season episode, a multi-car pileup occurs on the freeway, and a huge explosion occurs, resulting in mass deaths and destruction of vintage iron. (One cop makes a dark joke about finding an "F" that had blown off the tailgate of a Ford station wagon that was involved in the crash.) Ironically, no Pintos were damaged during the filming of this scene.
* CHiPs. In the first one, a man in a CHP uniform pulls over young women in an effort to have his way with them. It's repeatedly said that he bears a strong resemblance to Jon which causes problems for that character. In the second, the brother of an officer killed in the line of duty does this in a well-meant attempt to carry on in his brother's legacy. (This impersonator was kept out of the police academy only by his color-blindness; he then uses his late brother's old uniform and a replica motorcycle.) Near the end, Jon gives him a lecture about all that could go wrong (safety and legal ramifications) and demands that he turn himself in on the next day.
* CHiPs. Newly-transferred CHP officer T.C. can seemingly do no wrong; he's so good at his job, the other officers start a pool on when he'll finally screw up. T.C. finds out, and enters the pool himself...just to show that he's a good sport about the whole thing. At the end, Sgt. Getraer points out that he missed an important clue during an investigation, finally making a tangible mistake. But guess who wins the pool?

* CHiPs. Randi Oaks played a car thief named Kim Balford in the Season 2 episode "Down Time" and joined the cast as officer Bonnie Clark at the beginning of Season 3.
* CHiPs reunion movie, this turns out to be the MO of a car theft ring.
* CHiPs revolved around a new communications system and a new dispatcher. However, said dispatcher suffers from speaking issues and has a grating voice. Getraer later reveals her name is Kathy Lark and comments on the irony.
* CHiPs, so the same thing happened to Ponch. After the accident, Estrada literally shot scenes from his hospital bed.
* CHiPs, the captain's adult daughter comments to her father about the habit he had of greeting her dates while cleaning his gun.
* CHiPs, the captain's adult daughter complains about her father's habit of greeting her dates while cleaning his gun when she lived at home.
* CHiPs where someone steals a car that had the owner's baby still in the car, escalating their crime from joyriding to kidnapping.
* CHiPs who would hitch rides from strangers, hold them hostage with a water pistol, and rob them. Their crime spree ends when they try this on someone who recognizes the water pistol for what it is and threatens to commit sexual assault on them. Luckily, the officers intervene before anything happens.
* CHiPs, with the lead characters' call signs starting with 7M (Seven-Mary), with M the common designation for a Motor(cycle) unit.
* Chipsy: For potato chips in Egypt. Chipsy is the biggest potato chip brand in Egypt; it was bought out by Lay's in the mid-2000s and serves as the local Lay's brand name.
* Chip×Gadget. And yes, it's really just about that one pairing.
* chiptunes 'tastyvein'. It claimed to have found a tune similar to the Will of One in an old NES game, with an mp3 as proof. It took about 20 pages for the forumites to figure out that it was a plug for M&VS's chiptune version of Act I, with Protomen member Heath Who Hath No Name having to point out the anagram.
* Chipz and Vevina are the battle couple of Ignis Squad ever since they became a couple after the Desert Mission.
* Chip Zdarsky between Reed and Sue Richards' abusive behavior towards Franklin and parents refusing to accept that their children are trans or otherwise LGBT.
* Chip Zdarsky has Matt renouncing Daredevil after accidentally killing a criminal, though he continues to fight crime in simple, alternative mask. As Hell's Kitchen plunges into chaos, ordinary citizens don the cowl to fight for their neighborhood, but are quickly defeated. This causes Matt to realize Daredevil has become such a meaningful symbol for the residents of Hell's Kitchen, and inspires him to once again don the mask.
* Chirault, "demon" is a pretty broad term, and Kiran's "species" of demon (horned humanoids) seems pretty rare. Many of the demons that Kiran kills seem to be non-sapient.
* Chirault has two-way radios and what appears to be a city-wide public announcement system, presumably powered by magic because it's a pseudo-Medieval fantasy setting.
* Chirault. It seems to give her a lot of sweet options, from going through objects and flying to dispelling magic by touch. However, she still has a problem with not falling through the ground: the gravity does not affect her, but she thinks that it should...
* Chirault Teeko is a young girl—and she's been shrunk to a few inches in height by a stray magic spell.
* Chirault who's accidentally been shrunk to a few inches tall! They fight demons!
* Chiromancy, Cheirology and Chirognomy are all terms for Palm Reading or Palmistry which is divination from the lines on people's hands. Chirognomy is more specifically a focus on the general hand formations being size, shape and appearance of the hand.
* "Chiron Beta Prime" is about human slaves on an asteroid mining prison following humanity's defeat in a robot war... and how they celebrate Christmas.
* Chiron can choose to appear in a wheelchair instead of Centaur form depending on

what he feels like.
* , Chiron decides to keep it secret and recommends that Harry to do the same, fearing that the kid would be ostracized and subjected to murder attempts if it were known he's a son of Hades.
* Chironex fleckeri more potent than an actual wasp's venom, though. In fact, the sea wasp is considered one of the most venomous critters on the planet.
* Chiron—also called "Planet"—the planet where humans land, orbits Alpha Centauri A alone. Chiron is in a Type III situation. Alpha Centauri A and B orbit each other in a relatively close and mildly eccentric elliptical orbit, with them coming closest to each other (periastron) at about 11 AU (roughly the distance between the Sun and Saturn) and furthest apart from each other (apastron) at about 35 AU (roughly the distance between the Sun and Pluto); any planet orbiting in Alpha Centauri A's habitable zone would thus receive a non-negligible amount of light and heat from B (and vice-versa). Since the developers
* Chiron/Planet also has two moons, called Pholus and Nessus. We should pause at this point to note the
* Chiron the centaur was gifted with immortality, but was allowed to renounce it when accidentally shot by Hercules: the arrow, poisoned with the Hydra's bile, caused an
* Chiropterans are a way to lampshade that they are sorta different from... Vampires. To be fair, the only things they have in common are the blood-sucking habit and the bat-like characteristics.
* Chirox and his Matoran partner Kirop: chiroptera, the order of the bats
* Chirping crickets are heard at the end of "Homestarloween Party" after Strong Sad's
* Chirping Crickets: Cricket chirps are heard to emphasize the dead silence in response to a character telling a bad joke or saying something that would warrant shocked stares.
* Chirping Crickets reaction), a character is instead met with the sound of chirping crickets.
* Chirping Crickets represented by a live-action shot of an actual cricket in grass. The second joke bombs so bad even the cricket won't dignify it with a response.
* Chirping Crickets: Visual/audio representing silence, often of the awkward variety.
* Chirrut Imwe has a Jedi master-like understanding of the force, he can't use it the way a Jedi can. Though he has learned to sense it, which comes useful in both defensive and offensive combat applications.
* Chisame calling Rakan the man with infinite cheats, the one time he doesn't
* Chisame Hasegawa also has one, and she's the only class member without a
* Chisame seems to be enjoying her magical disguise a bit too much. Also, the first time she's a focus character, she was dressing up in various costumes for her website.
* Chisa's murder in the first episode is what drives Kyosuke off the deep end, with him vowing to eradicate despair and going on a bloody rampage to avenge her.
* Chisato has known Kaoru since they were very young (and she has the
* Chiselers in table tennis are players who solely play defense, whittling down their opponent's bodies or psyches. A famous match between two world-famous chiselers (Alex Ehrlich and Paneth Farcas) lasted two hours and twelve minutes before the very first point was scored, and that was because Farcas's arm had locked up. The referee had to be replaced part way through, as his neck began to lock up. The match led to table tennis receiving a time limit of twenty minutes.
* Chi, she's the happiest and most satisfied with her life of anyone in the group.
* Chi's New Address — but as it turns out, her brother happens to be Yohei's friend Ryu, who got over his fear about 20 episodes before this was revealed.
* Chiss space. Anything you can do, they can do better, indeed. Worthy of note is the fact that Chiss Force-users are exceptionally rare, neatly avoiding the magic-user aspect of the trope.
* Chi's Sweet Home, but Chi ignored them and played with the plastic bag they came

in instead.
* Chi's Sweet Home has preschooler Yohei having an accident at the same time his mother is litter training Chi. Chi herself simply fails at first to grasp that her litter box is just that.
* Chi's Sweet Home, the mother misplaces her wedding ring. Chi the kitten is the one who ends up (accidentally) finding it.
* Chi's Sweet Home. Yohei remedied this by putting a peed-on sock in the litter, and Chi got the message.
* Chisum: Bounty hunter Dan Nodeen sorts through wanted posters in the sheriff's office.
* Chitãozinho & Xororó haircut" (though only the latter of this country duo still wears this hairdo).
* chi techniques. When Ranma tried to use the overwhelmingly powerful Hiryu Shoten Ha technique on him, Herb recognized it and easily dodged it, since he had seen it many times before in the past and it was arguably part of his education. This is later turned around on Herb when Ranma tries the technique again, mocking her that it won’t work since he’s dodged and countered it before. Ranma counters that Herb’s dodge move won’t work this time as she had upgraded the technique within the battle into the Hiryu Korin Dan. This was the same problem with Happōsai, who had once been on the receiving end of this technique (from a young Cologne) and already knew how to thwart it.
* Chitose Get You!!, Chitose and Fuji-sensei do this to each other, although they're stopped by the restaurant staff before going too far.
* Chitose Get You!!, Chitose uses her friend Hinako this way in episode 26 to block the book bag Mika throws at them. It hits Hinako in the face.
* Chitose, she is often accused of being a covert pervert by Nine. While not quite as romance-obsessed as her new little sister, Chitose certainly blushes quite easily.
* Chitra from history, and the average drops result in average soldiers and tradespeople from the past. But "the past" was a time when magic was better understood and more commonly deployed in all facets of life, not just warfare. The "average" archer or architect or farmer from the past was augmented with enhanced speed, stamina, and minor magical abilities that allowed them to heal more quickly from injuries, build faster, or produce more crops.
* Chitra from the God of Beauty, she uses her powers to grant some of her ugly-but-virtuous subjects a facelift in Chapters 34 and 35 with the kingdom's first "Men's Beauty Project."
* Chitra, he steps right into the role of butler to the Serekino household. Though Radelk dresses in a well-tailored suit and serves a perfectly brewed cup of tea, he retains his incredible combat prowess and magic casting abilities, serving as Chitra's first and most trusted enforcer.
* Chitra in Chapter 44, he fantasizes about the delicate, feminine Chitra becoming taller and more muscular (...and more interested in having an intimate relationship with him):
* Chitra world where each kingdom is dedicated to the worship of a different deity. The rulers are a class of priest-royalty, whose titles are religious in nature but whose duties more closely resemble those of a feudal lord — e.g. collecting taxes, determining the punishment of criminals, allotting land to farmers, and directing military forces. The protagonist winds up with the body and memories of Chitra, a priest-princess whose family served as the apostles of the God of Beauty. Other major Kingdoms in competition for resources (and citizens/ devotees) with the God of Beauty's kingdom include the Kingdoms of the God of Lightning, the God of Plague, and the God of War.
* Chitty Chitty Bang Bang affectionate mood but repeatedly tries to kill his clueless wife while her back is turned.
* Chitty Chitty Bang Bang also acts as a parachute when she is shot into the air by Grandpa.
* Chitty Chitty Bang Bang (And you're my teddy bear. Together we're a Chu-Chi Woo-Chi, Ooo-Chi Coo-Chi Pair!) Of course, the entire time the Baron and Baroness are

singing this to each other, he's trying to arrange an untimely death for her, resulting in her getting more and more nervous and uneasy as the song progresses.
* Chitty Chitty Bang Bang, Baron Bomburst's spies kidnap Grandpa Potts after mistaking him for his son Caractacus by hooking his shed from their airship and flying off with the entire shed, with Grandpa still inside.
* Chitty Chitty Bang Bang but due to differences from the original book, the movie was novelized by John Burke.
* Chitty Chitty Bang Bang: Caractacus' works exhibit this, such as his automated breakfast maker.
* Chitty Chitty Bang Bang: Children are not permitted in Vulgaria, so parents have to hide their kids in the sewers.
* Chitty Chitty Bang Bang follows up its intermission with a replay of the scene preceding it. The intermission is included on VHS and DVD releases of the film.
* Chitty Chitty Bang Bang" Grandpa nonchalantly replies, "You've heard it before." And everyone laughs.
* Chitty Chitty Bang Bang herself, who possesses buoyancy and flight capabilities.
* Chitty Chitty Bang Bang in the stage musical, which included a line about how the children "won't even need [their] pajamas". It proved so disturbing that the song's been cut from many productions.
* Chitty Chitty Bang Bang movie where the Vulgarian spies are attempting to capture the car.
* Chitty Chitty Bang Bang of the eponymous novel (and film). Written by - who else? -
* Chitty Chitty Bang Bang of the story. The car itself was named by the owner's children for the noises that its engine makes.
* Chitty Chitty Bang Bang shows such a race involving the Captain in a rat rod, two others in another with a roller on the nose, another racer on foot with springheel boots, and a girl in a light airship. They are all attacking each other, and at the end a newspaper clipping shows that they were all disqualified for cheating. And burning down the countryside.
* Chitty Chitty Bang Bang-style, into driving up into the back of a truck.
* Chitty Chitty Bang Bang terms: "...Easy to pack and peel and so forth, but expensive to grow, each in its own little iron box."
* Chitty Chitty Bang Bang: The cavalry rides out through the city gates, followed by the Admiral screaming "Charge!" — cue the gates being closed — "Let me in!"
* Chitty Chitty Bang Bang (the first time) and Caractacus Potts comes to her rescue. Truly is at first reluctant to accept his help, likely due to the romantic connotations associated with this.
* Chitty Chitty Bang Bang, the narrator will use one of these words, and immediately give the more common word. Example: "...transmogrifications (this is a big word for 'changes')."
* Chitty Chitty Bang Bang; the original book was set in the present day (at that time, the 1960's), but the filmmakers decided to move it back to the 1900's.
* Chitty Chitty Bang Bang - This instance of the trope is not so much the fault of the audience as it is the fault of the main characters who endow Chitty as a character themselves. One may notice that the characters only take it so far; for example, they never refer to Chitty as 'he,' only as 'it.'
* Chitty Chitty Bang Bang used "phantasmagorical" in a similar way, although that word actually dates to the turn of the 19th century.
* Chitty Chitty Bang Bang were initially upset that the stage version omitted it, but they accepted the producers' decision.
* Chitty Chitty Bang Bang; when Caractacus kisses Truly at the end of the movie, she teases him that "Now you have to marry me!" and they both laugh, implying that this is exactly what will happen.
* Chitty Chitty Bang Bang, would omit the movie on his resume and ask his manager to not mention it because he was afraid it would damage his credibility as an adult actor, i.e. that casting directors would only see him as a "child actor". But as he got successful in his adult acting career, he would put the movie on his resume and

speak about it more often.
* "Chitty Chitty Moon Walk" does this in a hayfield with Dennis and Joey in Henry's solar-powered moon walker, a pair of spies in a forklift disguised as a haystack, and a police officer chasing them. It ends with the police officer crashing into the spies and arresting them.
* Chivalric Romance and his knights took over as a favored theme. Many nobles and kings were related to one or the other figure in the Matter of France, and others claimed to be (even the fictitious ones). Arthur was safer. (Political use of him did occur, but was obviously derived from the romances, making their political implications less.)
* Chivalric Romance and puts up with endless abuse as penance for his sins.
* Chivalric Romance by his Wicked Stepmother. A rare example of the stepmother getting redeemed, as she willingly turns him back by the end.
* Chivalric Romance: Differs from actual medieval chivalry and romances, in that it's more idealistic and nostalgic than its inspirations.
* Chivalric Romance features the Green Knight who is overtly one of the Fair Folk.
* Chivalric Romance, Floris is told that Blanchefleur is dead; it grieves him but does not shake his love.
* Chivalric Romance, Gamelyn violently resists one brother's attempt to cheat him of his inheritance and use false jurors to condemn him. When the king discovers the truth, he pardons him and his brother who helped him, and installs them as royal officials.
* Chivalric Romance has her refuse the advances of her brother-in-law, who then claims to his brother that she had tried to seduce him.
* Chivalric Romance. He is seeking adventure and she knows where adventures are to be found.
* Chivalric Romance not to reveal his true identity, he had no other means of support.)
* Chivalric Romance "Olivier de Castile et Artus d'Algarbe", Olivier has to flee because his stepmother tried to seduce him and accused him of rape when she failed.
* Chivalric Romances, and Beves and Guy are both seeking to win renown so that the princess he is in love with will find him worthy, despite his low birth. All of them wriggle out of the marriage and (in due time) win their first loves.
* Chivalric Romance, Sir Amadas pays a dead man's debts so that he can be buried. A White Knight appears to help him. After Sir Amadas has married a princess, the knight reveals that he is the ghost of the dead man, come to aid him as a reward for his deed.
* Chivalric Romance that a queen attempts to solicit her. Silence is put in a very uncomfortable situation as the queen locks her in a room and sexually harasses her, since she cannot submit or refuse without revealing her secret.
* Chivalric Romance, the lovers are forcibly separated to prevent a mesalliance. Neither of them is shaken by that — even when Floris believes that she is dead.
* Chivalric Romance, the matter of Britain was known as the one that dealt with love, with Lancelot and Tristan as exemplars. Later works, though continuing many of the elements, would allow the couple to marry.
* Chivalric Romance tried to seduce her stepson; when he refused, she told her husband that he tried to rape her. He is saved by the title sages, who counter her stories of designing councilors with those of evil wives.
* Chivalric Romance, when Horn left his childhood sweetheart, she gave him a magical ring that let him know that he had not lost her. When it changed color, he hurried back and found her being forced to marry.
* Chivalrous and unfailingly polite to women? Check (unless you insult his girlfriend. The worst you'll get is temporary hives. If you're a man
* Chivalrous Pervert - A character (usually a man) who seems sex-crazed on the surface but who is always respectful of the wishes and feelings of those they persue.
* Chivalrous Pervert: An individual who has some filthy desires but holds themselves to a standard when going about them.

* Chivalrous Pervert: A pervert who is a decent person in spite of their filthy interests and has lines they refuse to cross in regards to placating their urges.
* Chivalrous Pervert aside from his inability to stay faithful to anyone.
* Chivalrous Pervert as well he endlessly teases the girl about her figure (and can give her the Dragon Tights, one of the outfits required for the dancing competition in the Harvest Festival).
* Chivalrous Pervert Frohike also has an impressive stash, and the first thing Mulder says with being reunited with Frohike after being thought dead is that Frohike will have to wait a bit longer to inherit Mulder's stash.
* Chivalrous Pervert, gives them a few sideways glares and finally intervenes by telling the one guy to take his hat off, before reaching over and physically removing it for him, with the obvious overtone of "pay attention to your surroundings, you little prick."
* Chivalrous Pervert so willing to fight to help any pretty lady he comes across that he's developed a "damsel-in-distress" sixth sense.
* Chivalrous Pervert that he is, actually against this kind of relationship on principle (primarily for practical reasons, but he also has some ethical qualms about it). However, Don's principles went out the window in Season 4 (the one right after his divorce), and he started sleeping with his secretary Megan. He married her. It doesn't last, either.
* Chivalrous Pervert: They put love, respect and decency above their desire for sex.
* Chivalrous Pervert who mouths off to authority). And if you max out their supports, they get married.
* Chivalry & Sorcery can find the log of an old expedition that was destroyed by a disease. Because the members did not die on holy ground, they were not properly laid to rest are were condemned to become undead.
* Chivalry and Knavery. A Christian knight (who happens to be an anthropomorphic lion), who is kind, brave and extremely strong. And patient, otherwise he would have run screaming from Kira and Ulf. According to his character description, he believes that there is good in everyone - amazingly, his time with the two of them hasn't beaten that belief out of him.
* Chivalry by Optimum Resource: The evil Black Knight has kidnapped the king and you must lead his 1-4 loyal retainers through a board of various events, until you eventually face the Black Knight in a Donkey Kong-like platformer.
* Chivalry. Don't fire/throw into melee, it's just not going to end well. Fortunately, melee attacks can't harm your allies, though weapon swings will probably bounce off them (similar to swinging at a wall, for instance).
* Chivalry: Medieval Warfare has serious problems with this, mostly because all battles eventually turn into multi-man melees with archers firing into the fray. And when you swing any sort of weapon into a fray that size, you're eventually going to chop your ally's head off by accident. Archers don't have it any better, and unless you're really good a sizeable portion of your arrows will end up adorning your pals. Even with proper caution taken it's very, very hard to avoid decking someone on your side during any battle bigger than a three-on-two.
* Chivalry: Medieval Warfare, it is possible to behead or dismember someone by swinging weapons such as hunting knives and spears.
* Chivalry: Medieval Warfare makes decapitations (and other severed bits and pieces) non-lethal, allowing for a headless, armless knight to run around kicking people to death.
* Chivalry: Medieval Warfare. Turning on low gravity and jumping into the air causes characters to start screaming in terror at the top of their lungs.
* Chivalry: Medieval Warfare will put hairs on your chest, guaranteed.
* chivalry, morphs into Nami, causing Sanji to have a brief dilemma about whether or not to keep fighting him.
* Chivalry of a Failed Knight and takes off his shirt to even the slate. Turns out to be a genuine misunderstanding because the headmaster intentionally made them roommates.
* Chivalry of a Failed Knight by the end of the first volume of the light novel /

first arc of the anime adaptation. The other girls still develop romantic feelings for the protagonist, but, while he cares about them, the romance is one-sided.
* Chivalry of a Failed Knight: happens rather quickly by romance anime standards, Ikki tells Stella he loves her shortly after he wins his first fight, she becomes very embarassed and tries to avoid a bit the subject, but he reaffirms his love for her, she then accepts and they become a couple.
* Chivalry of a Failed Knight has Stella Vermillion and Shizuku Kurogane trading barbs about each other's bust size while they are cleaning the girl's bathrooms as punishment.
* Chivalry of a Failed Knight has the terrorist organization, Rebellion, which aims to create a world where Blazers rule over ordinary humans. The majority of their members are ordinary humans who fully support this cause, believing themselves to be inferior and therefore obligated to serve the Blazer members of Rebellion.
* Chivalry of a Failed Knight. His magical ability is best described as "barely". Nonetheless, he manages to hold on through skill, endurance, the ability to read his opponent's fighting style, and a technique that pools all his meager magic into one single attack.
* Chivalry of a Failed Knight Ikki's family put pressure on Hagun Academy to keep him from graduating. This resulted in new rules that require students to have a certain ranking in order to take classes, keeping Ikki from getting units and passing his first year. Luckily, Kurono Shinguuji became director and fired the obstructive staff. Turns out to be the real reason they were trying to stop Ikki was they want Ikki to fail as an example. They don't want other F-Ranked to try to succeed as unlike Ikki, they will fail causing unrest in the mage-knight system.
* Chivalry of a Failed Knight, Ikki's Itto Shura technique can boost his strength and speed to superhuman levels, but if he uses it for too long or more than once a day, it severely overstrains his body and causes bleeding.
* Chivalry of a Failed Knight, to the point even world class swordsmen would find the moves he makes to be simply impossible to recreate by real life human standards.
* Chivalry of a Failed Knight You'd think with the very strict gun and blade laws in Japan, someone would have noticed....
* chivalry when he physically throws Nami, Chopper and Brook to safety out of Bege's body. Though he does tell them to watch their heads as they land.
* Chiwetel Ejiofor's character is offered an opportunity to make his MMA debut days before the event begins. There are numerous reasons why this would and could not happen.
* Chiyo and Osaka also sometimes count, such as when Chiyo's overpowering cuteness and Osaka's gentle, slow-going pace lead to Chiyo in a penguin suit getting happily hand-fed by Osaka.
* Chiyo-chan Which is the approximate response of many when they see that suit.
* Chiyo, in chapter 42, does it only because Kankuro mentioned that Temari thought she was going to do it. For that matter, the Sand Siblings basically spent their evenings since their return to Suna watching the council bicker all the time as entertainment.
* Chiyo Mihama seems to exist for the sole purpose of having everyone fawn over her. Not that we can blame them, since calling Chiyo "cute" amounts to calling the ocean big.
* Chiyotaikai — Promoted to ozeki after his breakout January 1999 basho, he stumbled horribly out of the gate in March and May, but recovered and had a pretty good track record through 2000. And then he suffered two nasty injuries in 2001 and 2002 that completely ruined his form (the pressure of being Kokonoe-beya's next great hope after Chiyonofuji certainly didn't help either). From then on he was largely doomed to a 6 to 9 win treadmill and a humiliating parade of kadobans. He finally was demoted in January 2010, where he blasted off to a 0-4 start and promptly retired.
* Chiyo wears a navy-blue floppy bow, while the official bow is more stringy and of a different color required for her year (the color for her current year should be red).

* Chiyo wears her hair this way, signifying how she's the youngest and most innocent of the cast despite her high intelligence. However, they look more like two footballs attached to her head than anything else (in the manga, her pigtails started out looking like actual hair before they
* Chizu after Sawako's friendship with the two other girls is cemented.
* Chizuru acts like this for both Kotaro and Natsumi, despite apparently being completely powerless. However, she does seemingly summon large onion stalks (to be used as suppositories) at will (and she's
* Chizuru "Chizu" Honda and her older sister Ichiko, both their respective class beauties, in
* Chizuru constantly tries to grope Orihime and convert her to the joys of women's love.
* Chizuru fills this role where Shingo, Yuki, Kyo and Iori are concerned, albeit begrudgingly in the latter's case. Kyo even mentions how
* Chizuru is very, very excitable when around Orihime. Tatsuki does her best to keep her in line but there's only so much she can do.
* Chizuru Kawanami, and "oooohhhs" and "aaaaahhhs" from the guys. She's not very popular with the fanbase.
* Chloé considers herself of equal standing both academically and socially to Diana, and frequently says as much to anyone who will listen, hating that Diana always seems to get the spotlight. Diana never appears to know she exists.
* Chloé: In season 1, she is completly absent in 5 episodes, "Stormy Weather", "The Pharaoh", "The Mime", "Animan", and "Simon Says". In season 2, she does not appear in "Riposte", "Befana", "Gorizilla", "Sapotis", "Syren", "Captain Hardrock", "Frozer", "Anasi", and "Sandboy". In season 3, she does not appear in "Backwarder", "Reflekdoll", "Weredad", "Silencer", "Onichan", "Desparada", "Christmaster", "Feast", "Ikari Gozen", and "Timetagger". So far in season 4 she does not appear in "Truth", "Mr. Pigeon 72", "Furious Fu", "Crocoduel", "Sentibubbler", "Hack-San", and "Rocketear".
* Chloé/Marinette has a surprisingly massive following due to their surprising similarities. Many fics turning them into lovers and even the ones that don't are very offering of plenty of teases between them. Let's not forget in canon how Chloe can't seem to prevent herself from touching
* Chloé measures if she sees anyone else with him. For his part, Adrien thinks of her as a very clingy annoyance.
* Chloé's father is a somewhat overweight older man, while her mother is a glamorous woman who looks more like she could be Chloé's older sister.
* Chloé, surprisingly. She has a three episodes arc where she have to deal with her own faults, her abusive mom and goes from
* Chloe also seems to have become this for Astruc, though this is mostly due to him being frustrated with fans who dislike that he has no plans to change Chloe from being a
* Chloe and Oliver from other factions filled the empty space where the build-up belong.
* Chloe becomes one by the end of the movie. She's rather nonchalant and lampshades it:
* Chloe Bennet in the show, being that she's the show's biggest badass.
* Chloe (bisexual main characters; subject matter includes queer female romance)
* Chloe... but remains unaware that his friend Ondine might like to become more than friends.
* Chloe calls Pokémon "creatures" as a way to distance herself from the same monsters that made her feel isolated from everyone.
* Chloe Cerise showcases a love for the macabre as the story progresses, which includes a fondness of writing morbid stories taking place in the
* Chloe Decker's father, John, is portrayed by Chris Payne Gilbert, who is married to
* Chloe does this to Clark a lot of times. In "Zod", she does this to Clark when he returns from the
* Chloe does this twice, the first time on the fifth season, when she gives Clark

a goodbye kiss before he goes
* Chloe dresses in white and blue, while Gladion's outfit is black and red.
* Chloe has a simple relationship meter, based on five specific choices Max can make regarding her. If you side with Chloe on at least three of them, then in the
* Chloe has done two bubble gum popping scenes. First was in part 2 of the Origins episode, where she blows one in front of Alya.
* Chloe herself has a crush on Adrien, but he's completely uninterested... save for a brief period where he thinks Lady Wifi correctly exposed
* Chloe if she survived the end of the original game, which reveals she dyed her hair green between the events of the two games.
* Chloe is often absent for much of the seventh season despite being the most important character after Jack by that point. In this case, it's due to
* Chloe is once affected by some parasites that makes her go crazy over Clark and doesn't miss the chance to mock Lana on the way about it; she
* Chloe, Lana, and Lois all do this on occasion, Lois and Chloe usually to Clark and Lana to both Lex and Clark. Allison Mack, Chloe's actor, even says in the commentary of "
* Chloe of Marinette and her well-being, becoming jealous and vindictive towards Alya before she even officially becomes Marinette's friend. This also applies to Adrien, Chloe chasing away everyone that approached him claiming that they "weren't good enough."
* Chloe once started kissing Clark when the two were about to be caught looking at hospital records, then fed the security guard some story about taking a break from their "
* Chloe proceeds to try and get to Marinette and her newfound friends in other ways, such as
* Chloe's Closet, although Chloe's room and certain scenes are normal, a lot of the environments when Chloe and her friends are imagining are CGI, using normal 3D shading instead of the style the characters use (which is closer to cel-shaded).
* Chloe's death at the very beginning was this, and that saving her life will somehow cause a tornado to destroy Arcadia Bay.
* Chloe's father must die in a car accident. When Max changes the timeline to save his life,
* Chloe's hair is dyed bright blue. Old photographs show it's naturally the same shade of blonde as her mother Joyce's.
* Chloe's hair was light brown in the original six specials, but it became bright orange/titian in the series.
* Chloe's Lament, expecting Marinette to become just as despised as she was... while ignoring that she was hated for her cruel, bullying ways.
* Chloe's Lament gets to become Paris' beloved superheroine while Marinette is stuck as the one everyone hates.
* Chloe's Lament, Marinette instead uses her family's connections purely to help people. When Chloe confronts her about this, she states outright that she has to set a good example to others, much to Chloe's bewilderment.
* Chloe's Lament. Since her father is now a 'mere' baker rather than the Mayor of Paris, she's no longer able to fall back upon this tactic.
* Chloe's Lament to see that it's her own selfish behavior that made her so despised.
* Chloe's story in Chapter 6 references Eligos, who is a demon in the
* Chloe's story of the wish-granting shapeshifter references two myths: that of Greek God Proteus (a primordial sea god who could see your future if you held onto him as he changed forms) and Irish myth Tam Lin (of a woman who has to grab onto her lover who constantly shifted forms due to a fairy curse).
* Chloe Sullivan also has an unfortunately brief period in late season one when she is dating Clark.
* Chloe Sullivan has a similar situation with Davis Bloome in Season 8, where he's clearly a
* Chloe Sullivan", who is terrified that she is going to end up insane like her mother.

* Chloe's wedding, but they are interrupted by the reappearance of Clark's ex-girlfriend, Lana.
* Chloe's younger brother Parker also shares this trait. They regularly watched children's horror shows together, and she would also regale him with creepy bedtime stories upon request. It's later harshly deconstructed in Chapter 22 when
* Chloe, the girl Chandler and Joey constantly fawn over (before we're even introduced to her) and Ross eventually cheats on Rachel with. This one had the slight justification that, since she was referred to frequently as "the girl with the belly button ring," her attraction might have been less being astoundingly beautiful and more about her aforementioned navel ring and short, punk haircut might have made her seem "exotic" to the somewhat vanilla Friends.
* Chloë Grace Moretz in private, and as an adult, she's become known for her outspoken feminist views.
* Chloë Grace Moretz. It should be noted that one of her trainers for the film was Jackie Chan.
* Chloë Grace Moretz. Notably, in unarmed combat against an opponent who is an equally skilled martial artist, his significant advantage in terms of weight means that she actually has trouble keeping up with him.
* Chloë Sevigny on the Internet. When Sevigny saw the videos she laughed hysterically.
* Chloë Sevigny: "... yeah, I did that job. For money. I was paying my mom's mortgage. I've still never seen that movie. People say it's really good. We all gotta make a living."
* Chloe was briefly able to make people tell the truth, before the producers decided to give her a set of Healing Powers. Then her already
* Chloe, which is performed in a light, sing-song-y voice like a child reciting a rhyme. The background music is creepy enough on its own, and the "la-la"s in the chorus don't help at all. Then you actually start paying attention to the lyrics instead of the overall tone and realize it's about a girl hitting her head and drowning in a stream.
* Chloe, whose whole relationship with Jimmy, from beginning to end, was strained by her keeping first Clark's secrets and later,
* Chloe William's comment to her husband Buck when he tries to explain the reason he calls a car by a girl's name in the
* Chloe would also act this way towards Clark frequently in the earlier seasons, though she eventually grew out of her crush. They ended up as
* Chlois Theory showrunners finally decided to have some fun spoofing this fan theory in the episode "Hex," to the annoyance of the Chlois theorists...but the utter delight of everyone else in the fan base, who were equally tired of the Chlois theory.
* Chlorhydris assumed that this was what happened to her fiance Manfred the Magnificent on the day of their wedding in
* Chlorine gas is a particularly noxious respiratory irritant that just so happens to be yellowish green in colour. It was the first substance used in chemical warfare in
* Chlorine Grown Roses, Azusa's maids are forced to wear skimpy French maid outfits around her mansion because "papa liked that kind of stuff o.o".
* Chlorine trifluoride too volatile, with the interviewee - John Drury Clark - giving the "running shoes" soundbite.
* chlorine trifluoride was, in effect, a chemical weapon that set its victims on fire. Thankfully for the battlefields of Europe, only 50 tonnes were ever produced and these were captured unused by the RKKA in 1945.
* Chloroform is highly toxic and it is frighteningly easy to administer a lethal overdose even with proper medical equipment and training. Portrayals of chloroform use (particularly those playing to
* Chlorophylle -a male rat- impersonates an attractive lady cat with such a disguise, and several males find "her" attractive.
* Chlorophylle: Célimène is a white cat who likes to kidnap and ransom mice.

* Chlorophylle, Duke Bihoreau de Bellerente wants to kill his king to take his place.
* Chlorophylle has the titular character and Minimum in "Zizanion Le Terrible". Zizanion exploits it by phoning their newspaper with a bomb threat.
* Chlorophylle, humans have this vicious tendency to create a lot of things dangerous to animals.
* Chlorophylle kills his mooks Escalope and Fricandeau so he can pass himself off as a hero. He also gets the mooks who helped him bring two predators into Coquefredouille blown up with a bomb so they can't talk.
* Chlorophylle, the black rats invade Val Tranquille (the Quiet Vale) after they've been chased away from an old mill.
* CHOAM (Combine Honnete Ober Advancer Mercantiles) is a massive entity in
* Cho Aniki with three little crewmen on her back who can be used as weapons.
* Chobani donated Greek yogurt to the American team for the 2014 Russian Olympics. However the Russians refused to let the refrigerated crates into the country and after a few days of reported talks, Chobani backed down and said that the yogurt would instead be donated to NJ/NY food banks. Problem solved. Well... not quite. On 2/14/14 a new news story made the rounds — Food Banks were refusing the yogurt on the grounds that the homeless are used to sweet yogurt, and were turning their noses up at the Greek variety.
* Chobits Abridged has this. Loitering is so heinous, the police pull and cock their guns just to be sure.
* Chobits (actually used to contain interface jacks) may be deliberately designed to resemble Catgirl ears.
* Chobits: After Hideki finally finds Chii, she walks over to him, glad that he's back with her again and attempts to kiss him. She is instantly interrupted by becoming unconscious.
* Chobits, aimed at men at least of college age, but the romantic story and the cute outfits that Chii wears made it very popular with girls, specially in the west were it seems to have a bigger female fanbase.
* Chobits, although it's implied that the Chobits series of androids can do much more.
* Chobits and she was in her mid-twenties and therefore this wasn't as iffy as usual for a CLAMP case of this trope.
* Chobits can only take questions literally, according to Shinbo, due to her lack of processing power as a "laptop" Persocom.
* Chobits: Chii is a justified example. Her memory and personality were wiped clean so she has the maturity and awareness of a child.
* Chobits drops his jaw in four stages, each time making a sound like a squeaky hinge when Chi points at a want ad for a dominatrix and asks whether it's a job she could do.
* Chobits due to the fact that no one would mourn a broken down persocom as much as he did.
* Chobits has an episode with the heroes trying to play a fantasy MMORPG with Chi. We never exactly see how the game works for the characters, but the viewers see it from a deep immersion point of view, with the regular characters all transformed into their fantasy counterparts.
* Chobits has the Persocoms, of which the main character is one. While male persocoms are actually quite common, since the main human cast is male, the majority of persocom characters in the series are female.
* Chobits Hideki), could use her as a sexbot because she loves him, but anyone else would simply deactivate her and wipe out her memories by attempting to use her that way.
* Chobits Hideki gets chalk thrown at him when he falls asleep in class and cries out when a nightmare wakes him.
* Chobits: Hideki leaves the countryside for the city so he can attend cram school and retake the college entrance exam, while at the same time having a part time job at a bar. He makes friends with fellow ronin Shinbo, and their cram school teacher Takako Shimizu also figures into the story.

* Chobits. Hideki's teacher suffered a gradual marriage erosion due to her husband slowly but surely becoming more and more smitten with his flashy, attractive persocom, and forgetting that his real wife even exists.
* Chobits is all about this question (and goes back and forth a lot on what the answer is).
* Chobits is only 12 years old but he is a computer genius who is an expert on persocoms, and knows the answers to almost all of Hideki's problems when he gets screwed over by technology.
* Chobits is said by Chi: "Pervert! Hideki is a pervert!" In one translation, that line (mostly, being reassigned to Hideki compels her to call him "my master") is also given to Sumomo/Plum.
* Chobits is sort of naive about this and sort of not — she picked up the behavior from one of Hideki's hentai manga, but she doesn't understand anything about it other than that Hideki liked the manga.
* Chobits let it go. One of the main characters becomes so depressed over her unrequited love situation that she loses her will to live and lapses into an irretrievable vegetative state.
* Chobits, mostly coming out late in the story, is that no matter how human the persocoms look, they cannot have children because they're robots.
* Chobits. Robot Persocom Chi has a personality living inside her called Freya. Freya always wears darker clothes, sports far less innocent expressions than Chi and is the one to take action to defend Chi when others threaten her. She's not evil, just less innocent than Chi and the holder of the answers to many mysteries of the series.
* Chobits, Shimbo finds Takako Shimizu sitting on a swing, lonely and desolate after her husband has locked her out of their house.
* Chobits show that her personality can be much deeper (and it can possibly become like that again).
* Chobits, Sumomo/Plum does it, despite being under a foot tall. Plum's previous owner encouraged this (and many other) behaviors Hideki has issues with. Persocoms in general are as unconditionally affectionate as housepets; their (usual) extreme sensitivity to their owner's preferences and comfort levels are the only reason we don't see more generalized public glomping.
* Chobits, there is an urban legend that there are special Persocoms (humanoid computers) called "Chobits" that have real emotions and free will instead of just having emotions programmed into them.
* Chobits were two of the first persocoms ever built, yet their capabilities exceed any that were built after them.
* Chobits who will suffer a personality death if he actually were to act on any sort of desire towards her. This is probably the most justified example here.
* Choblik have a two-syllable first name and a last name consisting of three hyphenated syllables. The only two individuals known are Torvig Bu-Kar-Nguv from
* Cho Chabudai Gaeshi in a bout of over-the-top rage, sending the wedding cake flying.
* Cho Chabudai Gaeshi. The player only gets to do one thing. After an extended setup scene loaded with various irritations, the prompt comes to lose it and flip a controller shaped like a small table as hard as possible. The score is based on how much the room is disrupted.
* Cho Chabudai Gaeshi, unless your arcade decides to grey market import it.
* Chocho Akimichi has her father Choji wrapped around her lil fingie!
* Chock Full o' Nuts coffee has a jingle that dates back all the way to the heyday of radio; as of late Spring 2007, they were running a contest for customer-created "modernizations".
* Cho claims that the Hulk actually does this subconsciously, since he still has access to all of Banner's smarts, and that that's why in all the seemingly random destruction he causes, innocent people usually escape unscathed.
* Chocobo Hot and Cold, Hades (who's actually scared of you for beating the last guy), and then you can synthesize a Pumice and learn Ark. Or, you can just beat Ozma by yourself in the first place and use it to beat bosses you've already

beaten.
* Chocobo Racing 3D was announced for the 3DS, and was cancelled in 2013.
* Chocobo's Dungeon games, confusion will make Chocobo attack or move in a random direction. Fortunately, the effect is brief, and if you're not in danger, you can remedy it by walking in place.
* Chocobo's Dungeon, the player can go to the second floor of the Bomb House in the village to find some monsters that are avatars of some of the programmers.
* Chocobos (large rideable birds) and Moogles (fluffy flying mole/bat) from the
* Chocoholic Mysteries as a confession to the murder of Moe Davidson. He's confirmed innocent, with the real killer behind bars, by the end of the book.
* Chocoholic Mysteries) elope while Lee and Joe are on their honeymoon.
* Chocoholic Mysteries: Every book in the series contains at least half a dozen pages of chocolate trivia between the end of one chapter and the start of the next, all spaced out throughout the book.
* Chocoholic Mysteries has its first victim, Fletcher Mendenhall, be a former college teacher who made a habit of seducing his female students. He's later murdered by someone out to protect the reputation of one of his former victims.
* Chocoholic Mysteries has Lee in this role when she "kidnaps" Emma Davidson, currently a patient at the hospital, at the woman's request in order to protect her — someone's already tried to kill her once, and she doesn't feel safe there.
* Chocoholic Mysteries: Hogan Jones, the chief of police for Warner Pier, is this for Lee, especially after he marries her aunt Nettie. However, this doesn't always help — some of the state police and the sheriff's department suspect that he's helping keep her out of trouble whenever she gets involved in a crime, either as the target or just because she found the body.
* Chocoholic Mysteries: In "Kidnapping Clue", Lee (then a teenager) meets and, after some initial nervousness, becomes friends with Inez Deacon, a retired schoolteacher.
* Chocoholic Mysteries. It's revealed the victim was killed by a blow to the head, and then a bookcase was pushed over on her to fool everyone else.
* Chocoholic Mysteries. Lee learns from Chief Jones that the night Julie Singletree died, the fish tank she used for her pet mouse Blondie was knocked over, and the animal escaped. Both get a chuckle out of the thought of it popping up and triggering this reaction from one of the officers who's looking around the apartment.
* Chocoholic Mysteries: Lee was this to her husband Richard Godfrey, a wealthy real-estate developer from Texas, for five years. Finally, she got fed up with his behavior and left him, taking only her clothes and van to avoid accusations that she was only interested in him for his money.
* Chocoholic Mysteries, librarian Betty Blake considers her bachelor's degree in English to be this, because she was told that if she got one, she'd be in line to become the new library director... except soon after she did, they hired a man with a master's degree in library science for the job instead.
* Chocoholic Mysteries — turns out to be a private detective and former police officer who'd been hired to investigate the involvement of a man in what was ultimately revealed as a major burglary ring.
* Chocoholic Mysteries: More than one book features a villain who was doing this.
* Chocoholic Mysteries, picking up twelve years later, reveals that Phil had died in a car accident (caused by a drunk driver) eighteen months before the book starts, but he remains an important part of the background throughout the series.
* Chocoholic Mysteries reveals that Lee's mother Sally was this (because she had to flee for her life, after she and her fiancé stumbled onto a crime)... and that the groom turned up dead later the same day.
* Chocoholic Mysteries, Rich Godfrey wanted one of these for his wife and thought Lee was one because of her speech impediment. When he found out she was actually very intelligent, it was the beginning of the end for their marriage.
* Chocoholic Mysteries: Several of the victims throughout the series are murdered because they found out what the culprit was up to, or at least part of it.
* Chocoholic Mysteries, she refers to herself at one point as having been one for

her former stepson Jeff, but in fact, she'd actually tried to be a nice parent, even though Jeff avoided her as much as he could while she was married to his father. Despite his earlier behavior towards her, he ends up coming to her for help during the events of the book, and she helps clear his name when he finds a body and becomes a suspect for murder as a result.
* Chocoholic Mysteries, the book's second death turns out to be a case of this — the actual killer murdered someone who'd been causing trouble for him, then arranged for another person to find the body, knowing the police would automatically suspect her (since she was already a suspect in the first murder) as a result.
* Chocoholic Mysteries: This is the plot of the debut story "Kidnapping Clue", in which a teenage girl, one of the summer people at Warner Pier, arranges her own kidnapping by another teenager in order to get attention from her mother (who'd basically left the girl at their home in town and run off to Europe with a boyfriend for the summer).
* Chocoholic Mysteries, two of the characters are revealed in the last chapter to be named John Tallboy and Kurt Small. However, their surnames and their physical descriptions are exact opposites: Tallboy is short, and Small is tall.
* Chocoholic Mysteries when a detective is killed while trying to track down one of the women that's being helped to do this.
* Chocoholic Mysteries, when Lee's found their footprints and made plaster casts that could potentially be used to identify someone who's been prowling around an area and might be the killer, the villain of the book (who's apparently been spying on her) promptly smashes the casts and then rakes over the original prints to destroy them when she leaves the area for a short time.
* Chocoholic Mysteries, who had a habit of taking bribes from the summer people (AKA wealthy people with part-time residences in the area) in Warner Pier to look the other way when they were breaking the law. He ultimately had to resign for it sometime after Lee's mother left town.
* Chocolat almost ended this way. Vianne had previously dragged her daughter Anouk through several moves, usually because they got thrown out, and also because her own mother had done the same thing to her. After the story is settled and the pair hasn't been thrown out of town, Vianne gets set to move on anyway — but then realizes that she wants to stay, and instead dumps her mother's ashes out the window, leaving her mother's spirit free to roam and no longer forcing the family to accompany it.
* Chocolate and caffeine are lethal to the majority of animal species, though rats and mice can metabolize the theobromine present in the former at a rate approaching humans.
* chocolate at the turn of the twentieth century, but the chocolate looked so bad that he didn't even dare taste it.
* Chocolate Baby: A baby doesn't look much like one or both of their parents, hinting that their mother may have cheated on her husband with the child's real father. The child being a different ethnicity may be an indicator.
* Chocolate Baby: A child doesn't look like either of their parents, suggesting that their real father is someone their mother cheated on her husband with.
* Chocolate Baby, a Greek romance by Heliodorus of Emesa (c. 3rd century AD), starts with Queen Persinna of Ethiopia giving birth to a white daughter, despite she and her husband being black, which causes her to give the baby away to avoid accusations of adultery. After many adventures, it is revealed that Persinna had been looking at a painting of Andromeda while she conceived, and so Andromeda's white skin "imprinted" on her child.
* Chocolate Baby: The baby isn't the supposed father's and it is obvious from the baby's colouring (hair, skintone, etc.)
* Chocolate Baby: The child doesn't look like either of their parents, implying that their mother cheated on the "father".
* Chocolate Baby: When a newborn infant looks nothing like their "dad", implications that their mom slept with another man soon follow.
* Chocolate brand Milka became memetic in the nineties due to it's TV commercial,

where we see a man discovering several moutain animals making Milka chocolate bars, with particuliar attention to a marmot putting the chocolate in tinfoil. The man is then seen explaining the marmot part to a woman, who looks crazy at him. It was so memorable that today, "La marmotte, elle met le chocolat dans le papier alu"
* Chocolate Chip Cookie Murder (the first novel of the series), Hannah and her assistant Lisa Herman visit the Tri-County Mall, where Hannah is surprised to find Christmas decorations out in October. Lisa tells her they put them out right after Labor Day.
* Chocolate chip cookies, the most popular variety of cookie in the world, were supposedly created by accident.
* Chocolate Com Pimenta because of the big age gap between her and her husband.
* Chocolate com Pimenta lawyer to take the case to the courts because: a) honest lawyers would be less likely to figure out the document was a fake; b) even dishonest lawyers would refuse the case once they figured out; and c) the more regarded their lawyer would be for honesty, the more likely would be their chances a judge would rule in their favor.
* Chocolate desserts have a bizarre tendency to be named things like "death by chocolate" or "grave dirt": despite chocolate neither being poisonous nor in any other way deadly. In fact, cocoa has medicinal properties. At most, there's obesity-related health hazards of eating too much of those desserts. Its dark brown color, uncannily similar to freshly dug soil, probably doesn't help matters.
* Chocolate Frogs and Caramel Flies now exist as well, although the frogs are just Pop Rocks in a frog-shaped shell, which come with holographic trading cards.
* Chocolate-Frosted Sugar Bombs: Cereal that is made of nothing but sugar.
* Chocolate-Frosted Sugar Bombs: Modern children's cereals are made with much more of an eye towards nutrition, thanks to backlash regarding marketing junk food to kids during the late '90s and early 2000s. Many European and Latin American countries have banned most (if not all) kid-targeted marketing for products deemed unhealthy.
* Chocolate-Frosted Sugar Bombs". With a lot of added sugar. And chocolate milk. They make it with marshmallow bits but his mum won't buy that for him. He once tried it with soda instead of chocolate milk, but the bubbles went up his nose.
* Chocolate is this to dogs, due to the way they metabolize theobromine differently from humans. A person gets a warm, fuzzy feeling, similar to falling in love or other pleasantly-giddy experiences. A dog, meanwhile, acts like it's mainlined pure espresso - because from its body's perspective, it has. The dog's heart rate speeds up and it may even have seizures if it's too much; obviously, such strain on the body can be lethal.
* Chocolate learn at least a dozen separate fighting styles for the movie, and displays them flawlessly.
* Chocolate Milkmaid can absorb the powers of anyone she "takes in a part of". Bodily fluids count. All of them. But it only works when she's in Milkmaid mode.
* Chocolate Milk's "Blue Jeans" repeats the title 66 times throughout.
* Chocolate movies and observing lessons at a nearby Muay Thai school.
* Chocolate of Romance: Expressing love through the giving of chocolates.
* Chocolate: The entire premise is that the main character's autism allows her to perfectly imitate movements that she watches other people perform. She becomes a martial arts master after watching a whole lot of kung fu films.
* Chocolate to canines. While it is much less known, chocolate is dangerous for cats too, though cats are much less likely to eat it than dogs are.
* Chocolate: Zen, an autistic teenage girl who is martial arts savant.
* Chocolate: Zin is a former loan shark. She spends most of the movie trying to give up her old life, but when she's threatened she proves she's still extremely dangerous.
* Chocolatier, where the factory's production is determined by a minigame where the player fires ingredients into a machine to make the product. The more successful the player is, the faster the machine goes, and therefore the more chocolates they can make, but inevitably it'll get to the point where they can't keep up and miss the machine. The player can miss up to eight times.

* Chocolat is a chocolatier whose creations are mouth-watering enough to win over an entire town of strict Catholics during Lent.
* Chocolat is rather minor, his face is the one occupying half of the movie poster.
* "Chocolatl" is also used instead of "hot chocolate" (based on the Spanish spelling of the Aztec "xocolatl"), while "experimental theology" is used instead of "physics".
* Chocolat no Mahou has a variation in the form of a chocolate shop, run by a mysterious girl named Chocola and her black cat, Cacao. The variation is that the shop will still be there tomorrow, but most of Chocola's clientele first find the shop by accident - and if they were actively looking for it in the beginning, it takes them a long time to find it.
* Chocolat's transformation into Nyanma. Evil energy pulses around her, her eyes dilate, her muscles tighten, and she screams in agony the whole time.
* Chocolat uses this to attempt to cover up the fact that his wife has left him by claiming that she's on an extended holiday and will come home soon.
* Chocolat, Vianne and her daughter Anouk have Romani blood and are "cursed to wander", just as Vianne and her own mother did when Vianne was a child, which is why they entered the village. At the end, Vianne tries to force Anouk to leave, but in the process she drops the urn containing her mother's ashes and they are scattered to the wind. Depending on the interpretation you prefer, this either breaks a literal spell or reminds Vianne that her mother is dead and cannot control her any more. In any event, subsequently Vianne ignores the North Wind's urging to leave, letting someone else fight the battles to be fought.
* Chocolat, when Josephine learns Vianne is leaving after taking much of the tiny French town by storm:
* ChocoMimi are very close, to the point of when being asked who they like, one girl automatically says the other's name. On one occasion, the boys deduce that Mimi is the reason that Choco has such high expectations for men.
* ChocoMimi may look tough, but he has a soft spot for cute animals, especially Picho, his pet bird. Worth noting is that he once randomly hugged Jin simply because Jin was wearing a raincoat that made him resemble Picho.
* Chocotto Sister already walks on thin ice with her groping of Chitose's breasts, but she really crosses the line when she forcefully removes Yurika's dress.
* Chocotto Sister: Chitose, the landlady, wears thick glasses and is very self-conscious about it. A boy calling her a "four-eyed dog" in high school is a major emotional hurt of hers and Haruma's complimenting her on how she looks wearing them is a large part of why she falls for him.
* Chocotto Sister, Choko believes her handbook (apparently written by a perv) when it claims that older brothers like this.
* Chocotto Sister does this a lot to Yurika — usually under loud protest from the latter.
* Chocotto Sister, nobody raises any eyebrows when 9-year-old Choco appears out of nowhere.
* Chocotto Sister takes on more jobs than she can handle and then tries to let Haruma take the less attractive ones.
* Cho'Gath is feared primarily for just how many roles he can effectively play on a team.
* Cho Hakkai's cute little dragon/car was creatively renamed Hakuryu ("white dragon") for the anime versions.
* choice but to work with animals for a few TV shows. There are probably retired TV station employees still walking a little funny after Delilah the porcupine.
* Choice Items like Choice Band and Choice Scarf can greatly increase a Pokemon's power or Speed, at the cost of
* Choice of Games is a company specializing exclusively in text-based CYOA games, with several dozen already on offer, all of them available for free on their website. Among their number are:
* Choice of Games is a little odd: when you're asked if you want to get married you can choose to claim you are attracted to your own gender; if you do this, and are friendly enough to Villeneuve, he/she will hit on you and you can accept. If you

chose differently, this will never happen. However, after your affair you might have the opportunity to still get married; the text implies at first that you are doing this just to go through the motions or increase your position in society, but after that the description is pretty much identical to what it would be if you truly were interested in these men or women.
* Choice of Games is somewhat similar, but not quite as pronounced — the game culture is a bisexual one. The player's choice of character sex and sexual orientation determines the sex of his/her suitors, but the suitors' characters remain the same.
* Choice of Magics work in an entirely consistent manner, having unpredictable side-effects that are partly tied to humor and whimsy.
* Choice of Robots involves a robot-worshiping movement arising. As a robotics pioneer, the player character can take advantage of the movement, seek to dissolve it, or just plain ignore it.
* Choice of Romance plays this extremely straight with your main two suitors (not including the King/Queen) being wealthy but unattractive nobleman Torres and romantic but impoverished artist Mendosa. Picking Mendosa gives you a considerably happier ending where the two of you live a wild, love-filled life and eventually come into money too; while Torres is genuinely sweet and devoted to you, you never truly love him and wonder what could have been if you had followed your heart more.
* Choice of the Dragon: Axilmeus, one of your dragon's elder clutchmates, who even as a hatchling always tormented others hoping to take what didn't belong to him. No matter what choice you make as a hatchling, he always succeeds in stealing your golden shield, but as an adult, you have an opportunity to teach him a lesson after he encroaches on your territory with designs on your treasure hoard.
* choice of the heroes’ (and writers’) real world opposition.
* Choice of the Vampire is ambiguous, and the vampire community treats the matter with some caution as a result.
* Choices", affable villain Mayor Wilkins ended up the one to get Buffy and Angel to seriously consider their relationship when he relates how painful it was to watch his mortal wife grow old and die while he stayed the same.
* Choices are about a lesbian high school student with a crush on her math teacher.
* Choices, Buffy and Angel gripe that he doesn't know what he's talking about, being a "big, stupid...evil guy."
* Choices. She would usually go to sleep and wake up in a new universe.
* Choices: Stories You Play app offer gay options in some form or other.
* Choices: Stories You Play is a collection of multiple visual novels that all have rather different genres, themes, settings and tones.
* Choices: Stories You Play. It has a history of cults, witch trials, massacres, and unexplained coma cases attributed to a local supernatural entity named Redfield.
* Choji Akumichi's "Butterfly Mode", at least when it's introduced, is in the form of a pill that
* choke a Gammorean he was choking but not put him in any real danger.
* choked with auto-playing ads and scripts without the blockers. So much stuff tries to run at once that the pages lock up.
* Choke has one scene wherein Lord High Charlie, played by Clark Gregg, catches Victor (Sam Rockwell), with his pants down with "Ursula the Milkmaid's" hand on his penis. Ursula is Charlie's dream girl and so he is reasonably upset by this sight saying he can never look at her the same way again.
* Choke, the main character and his buddy work in a Colonial Williamsburg-esque town which punishes loafing employees by making them sit in the stocks all day.
* Choke, the protagonist thinks of corpses and other disgusting things to avoid early ejaculation.
* Chokey Chicken!" past a family of chickens who are about to go inside.
* Chok There by Linear, still remained obscure, and is remembered faintly only because Anu Malik copied it.
* Choku!: Nao is disgusted at Serika's pursuit of him and she always has nosebleeds whenever she lays her eyes on him.

* Choleric: Elekai Echidna, a serious ex-military brat who's always on his toes and shows extreme respect to authority.
* Choleric: Kensei is excitable and twitchy. He's almost always enthusiastic about everything, whether it's building gadgets or breaking into a room he wants to get into.
* Choleric: Walburga. Forceful and domineering, Walburga is well aware of her authority and is not afraid to exercise it. She is regarded by her children as the ruler of the household.
* Cholly does this when he gets rejected after finally meeting his biological father.
* Cholo: This is the background premise: the radiation from the nuclear holocaust has mostly died down, but you must take control of robots on the surface and crack the exit open from the outside before anyone can leave. (BTW, there's a free PC version available now!)
* Chompiras and Botija, problem is, the original Honeymooners never was popular in Latin America and nor even ran in some countries, so very few Latins other than TV Geeks would know the reference.
* chonchon, is a ghoulish undead humanoid head with leathery wings for ears and jagged teeth. This monster reproduces by paralyzing and then 'kissing' a victim, which causes a curse that slowly makes the victim's hair fall out, followed by their ears turning into wings, then they slowly lose ability points, until finally the head takes flight and simply removes itself from the body as another Vargouille.
* Chongqing Municipality (a combination of four former prefectures) is sometimes mistaken for being the world's largest city containing 29 million people (the urban Chongqing is large and important, but it has only about 8 million people).
* Choo Choo Hot Fish to a since-demolished soul food fish restaurant in Chattanooga, Tennessee, near where the album itself was recorded.
* "Choomba": "friend." Normally shortened to "choom" or extended out to its full form "Chombatta". Originally a Neo-Afro-American slang term that spread to the rest of American society.
* choose instead of a race, and just so happen to have primary/secondary stats in line with the Vryloka's racial bonuses, and were introduced in the same book...
* Choose Me: Mark or Doug has the characters Mark, the familiar childhood friend and coworker, as Betty and Doug, the suave bartender you just met, as Veronica to your Archie.
* Choose Me otome audio drama series. You, as the main character in each story, must choose between two love interests vying for your attention.
* Choosers of the Slain is noted to have been more of a "ballbuster" for him.
* chooses clothing to reflect the gender they currently identify as and never actually crossdresses if they can help it because it causes them to feel dysphoria.
* chooses not to because he wants to prove his own innocence via the justice system.
* chooses race, can make the same claim. The Orks, Necrons, Daemons, and Tyranids are just as murderous as the Imperium, but the former three are artificial creations made to be that way, while the latter aren't sapient.
* chooses to become a villain, her halo grows spikes and her magical girl costume disappears completely. So, of course, she has to get a new outfit made by a villain fashion designer.
* choose to be that shape for convenience, and it's strongly implied that Engi spacecraft are technically the same species as their crew, or at least closely related.
* choose whether or not they want to cut something. He demonstrates this by purposely failing to cut a piece of paper. During Zoro's battle against Mr. 1 in Alabasta, he shows that he's mastered this aspect by running his sword through some palm leaves- and doing no damage.
* choose who they want to be in charge. He knew about democracy beforehand, but seeing it in real life is different.
* Choose Your Destiny series. Each book has one canonical path for how things went

down.
* Choose Your Enemies path, and Jurgen's melta would just torch the maze and everyone in it (including Cain, Jurgen, and the two inquisitors). Cain calls on his innate sense of direction and his chainsword to carve his way through.
* Choose Your Own Adventure), after one of your tanks becomes bogged down and C Squadron is diverted to help the Polish detachment, your tank's gunner says, "First we lose a tank, and now we lose an entire squadron. I say we join the Navy!"
* Choose Your Own Adventure, a portrait of the titular vampires from when they were still human. It's kept in a special crate and is effective as a weapon against them .
* Choose Your Own Adventure as it led to a lawsuit from Chooseco due to its usage of "choose your own adventure" in promotional materials.
* Choose Your Own Adventure because if you ever stop following him, you're sent to an ending which states that since the author was no longer with you, he can no longer write about what happened.
* Choose Your Own Adventure book does this heavily, in order to keep it interesting through multiple re-reads.
* Choose Your Own Adventure books by Edward Packard, one gets the impression that recurring guest character Dr. Nera Vivaldi doesn't just show up only in adventures that happen to involve you.
* Choose Your Own Adventure books. One has the main protagonist fall into a bottomless pit (one is a dragon, and the current speed prevents the dragon from opening the wings), and another has the lead characters fall down a bright, cold, icy slide.
* Choose Your Own Adventure books were a gateway for many roleplayers of the 80s.
* Choose Your Own Adventure book titled "Who Killed Harlowe Thombery?", the titular murder victim is suffering from a poisoned drink. When asked who did it, only choked out "It...it was..." before dying. Your job is to find out who poisioned him.
* Choose Your Own Adventure has branched out into real life, as a cult of "dice living" has developed. People make real-life decisions, ranging from where to go on Saturday night to what career to choose, based on rolls of the dice. Dice living was inspired by the novel
* Choose Your Own Adventure has you end up five minutes out of sync with the rest of the universe. This doesn't make you unreachable, but it does have the effect that others perceive you doing things five minutes after you've actually done them.
* Choose Your Own Adventure has you leaving the haunted house after being told by a ghostly creature never to look back at the house. Of course if you don't like that ending, you can choose to look back one last time anyway, the resulting page of which simply has a bloodcurdling scream down the page followed by a THUNK.
* Choose Your Own Adventure is the single remaining Samurai-class battledroid currently residing in the museum. A nice touch is that you have to roll for its stats at the start, to see how badly the droid has deteriorated over the centuries.
* Choose Your Own Adventure just to get rid of him. The end of this path has the protagonist joining the very aliens he originally opposed.
* Choose Your Own Adventure like obvious Schmuck Bait which turn out fine and options that appear harmless leave you to a horrid fate.
* Choose Your Own Adventure novels, where various decisions can be made about either progressing or leaving the main plot line.
* Choose Your Own Adventure of the idyllic world Lorwyn. At one point you encounter a pond in a cave and the description suggests it might be a portal pool to Lorwyn. If you enter it however, you are promptly ripped apart by vicious Merrows, and the game calls you a naive idiot.
* Choose Your Own Adventure: One of the good endings of "Your Very Own Robot" ends with the protagonist and robot going to Venus, which is a sticky, gooey mire; later she has to play dumb when her parents ask about the goo on her shoes.
* Choose Your Own Adventure role. Whether s/he gets out of their influence sphere alive, it again depends on the reader's decisions.
* Choose Your Own Adventure series (by the same author), which elaborated on the

somewhat simplistic descriptions (and presented a more realistic view) by pointing out that Turtalia was a deliberate attempt to maintain the democratic ideals of the collapsed United States, while Dorado was a military dictatorship set up by a former crusading lawyer and the remains of the New Mexican National Guard, while "Rebellium" was simply a nickname given to the collection of warring city-states that made up much of the East Coast. There was a fair amount of corruption in Turtalia, as well as a number of soldiers in Dorado who sincerely believed that the only way to preserve civilization was to enforce totalitarian rule until things stabilized, and had no doubt that they were in the right and that the Turtalians were deluded idealists whose society would eventually collapse on itself.
* Choose Your Own Adventure-style books have hidden endings that are not linked to any of the storylines — the only way you'll ever find them is by flipping through the book to see all the endings without following the storylines.
* Choose Your Own Adventure that has an explicitly female protagonist, most of the love interests are male but one of the story branches lets you get together with another woman instead.
* Choose Your Own Adventure, the protagonist is accompanied by a magical talking amulet named the Mouth of Mimulus.
* Choose Your Own Adventure who appears in the book actually called "The Planet Eater".
* Choose Your Own Adventure who rediscovered the book were pleasantly surprised to find a mature, sensitive and well-researched handling of the subject material.
* Choose Your Own Adventure: your character gets his head bitten off by dinosaurs, smashed by glaciers, bisected by ninjas, etc.
* Choose Your Own Adventure you will have success in the future, leaving many plot points unsolved.
* Choose Your Own Horrible History is a choose your own adventure type game about killing or eliminating Hitler to make the world a better place. There are a myriad of options available, though the choice is up to you. Some of the options include infanticide, homicide, altering his preferences in partners, biological warfare, art school, raptor Nazis and of course the most cruel, getting him hitched with lots of kids thereby putting to sleep his dreams like he did so many others.
* Choose Your Own Mind Fuck Fest, a parody successor to the beloved childhood series. All endings are losing situations.
* Choose Your Own Nightmare in them, being adapted from the books of the same name. Humorously, you can hear Mithos Yggdrasil and possibly Spinelli in a few.
* Choose Your Story is a website allowing all members to join and take part in writing their own interactive stories, otherwise known as story-games. (However, due to the versatility of the site's editor, CYOS (or CYOA) are not the only option. Quizzes, games of chance, regular stories, and role-playing games are also possible.)
* Choose Your Weapon did not also get a positive reception, with many questioning whether or not he fully listened to the album.
* "Choosing a Bride" or "The Cheese Test", revealing that she is gluttonous and lazy. The second girl takes a knife and chops off the rind, but also a lot of the good cheese, revealing that she is wasteful and careless. The third trims off the rind without wasting any cheese, proving that she is attentive and hardworking.
* Choosing a charity based on its overhead (i.e. how much is spent on administrative costs and bureaucracy versus actual aid) can cause the exact problem that it is supposed to prevent. As it turns out, the money "wasted" on overhead is actually necessary for keeping the charity operating smoothly, and charities with low overhead costs are typically a lot less competent due to them
* Choosing Death: Tropes about people committing suicide (i.e. the act of killing oneself).
* Choosing Dennis the Wolf as your mask lets you start off with a knife.
* Choosing to work with Hanson has you working against the clock to save Terran camps, destroy the shield generators for the Planet Cracker, and ultimately taking the Planet Cracker down (Selendis survives).
* Choosing to work with Selendis has Raynor call Selendis off to attack only the

infested Terrans. You run through infested camps and destroy all of the infested Terrans and structures you can.
* Choosing Up Sides, Luke wanders into the outfield of a baseball game, where he picks up a ball and hurls it about three hundred feet to home plate. Having been raised by a fundamentalist preacher who forbids sports, he's uncomfortable with the attention from everyone who wants him to pitch for the local team.
* Choosy Beggar: A character is picky, even when the situation doesn't allow for it.
* Choosy Beggar: A character is unrealistically picky about something they find or are given.
* Choosy Beggar: Beggars can't be choosers, but this guy clearly didn't get that message.
* Choosy Beggar: Someone who keeps complaining and making demands despite not being in a position to do so.
* Chop Chop Fruit salad Mystery Jam DokiDoki Dating Sim THingy and they fall in love.
* Chop Chop Fruit salad Mystery Jam DokiDoki Dating Sim THingy: Apple can walk in on Banana masturbating in the school bathroom. Given the protagonists are sentient fruit without hands, it's anybody's guess how this works. It ends with Banana squirting fruit juice (which bananas can't actually squirt).
* Chop Chop Fruit salad Mystery Jam DokiDoki Dating Sim THingy flood the room with their "fruit juice" every time they have sex in the latter's good ending, causing repeated property damage. Apple thinks it's worth it.
* Chop Chop Ninja Challenge: None of the four ninjas ever speak as they attempt to accomplish the various challenges their sensei puts out for them in these 90-second shorts.
* Chop Chop Ninja sees ninja Iro enter a highly competitive game of mini-golf against a mini-golf champion (though unbeknownst to him, it's a trap set by The General and Splat).
* Chopin's "Minute Waltz," whose name is usually pronounced as the time unit despite the fact that performances of it are usually slightly longer than a minute, is said to be a misunderstanding of the (translation of the?) title, which apparently was supposed to be the "Mine-ute" (that is, "minute" as in "very small") Waltz.
* Chopin They don't really have the "je ne sais quoi" you expect from those composers, do they? Now listen to their second piano sonatas and suddenly, all is well with the universe.
* Choplifter! ends with the understated quote: "Don't blow it. Being a hero isn't easy, or everybody would be one."
* Choplifter!, is a SNES game that most people have never heard due to its rarity.
* Choplifter!; the only way to get the good ending is to rescue all 64 hostages.
* Chopped acts as host and constantly refers to the competitors as "Chefs... and Ted."
* Chopped, as they contain ingredients (and occasionally other instructions.)
* Chopped containers or, in the case of sealed cans and jars, have any identifying labels replaced.
* Chopped example above, although Alton comes up with the sabotages, he isn't the one saying it.
* Chopped, faced with lutefisk as an ingredient, remarked that he'd never even heard of it before, then (after reluctantly tasting it) that it was like biting into an old kitchen sponge. Which, for the record, he denied he'd ever done.
* Chopped is a fast-paced timed competitive cooking show frequently has contestants disregarding safety for speed and isn't shy about showing the consequences. Serving blood-contaminated food to the judges is a sure way to get chopped, so all contestants go into the kitchen knowing where the gloves are — if you cut yourself, you slap on a glove and keep going.
* Chopped reinforced her own commitment to remain a chef, rather than return to corporate life, by having each knuckle tattooed with small pictures of desserts. She knew that having such tats would hinder her chances at potential white-collar

job interviews.
* Chopped required ingredients happened to line up exactly with his grandmother's grits recipe, allowing him to cook it exactly the way she would've.
* Chopped surprised at the ingredients the home viewers chose for the contestants, thinking, "They could NOT possibly know about those kinds of ingredients."
* Chopped, when a contestant finishes assembling their dish as the clock runs through its final seconds, sighs in satisfaction that they've completed their task on time...only to notice that one of their four basket ingredients is still sitting there at their work station, overlooked and untouched.
* Chopper claimed to have killed 19 various underworld figures, which he downgraded long after the film came out to "four or seven, depending on how you look at it". He was only ever tried for one murder, of which he was acquitted when the jury accepted his claim of self-defense.
* Chopper denies driving Neville Bartos to the hospital after shooting him, saying "it defeats the purpose of having shot him in the first place!", but he is shown doing just that. The real life inspiration for Bartos later offered a third version: the shooting never happened.
* Chopper: From the Inside, that the best way to find a criminal that didn't want to be found was either to wait outside their mother's house or to put her in hospital. They would always turn up because their love for their mums was so predictable.
* Chopper gets this from Hiruluk in his backstory after he recovers from his injuries, as Hiruluk is
* Chopper goes over to treat Usopp after he loses his duel against Luffy, saying crewmember or not, he needs medical help, but Sanji tells him that Usopp knew what would happen, and it would be even more painful to be pitied after his loss. Chopper opts for just leaving medical supplies for Usopp to tend to his own wounds. Chopper's done this a few times as well, but it's played for humor.
* Chopper however probably plays this trope most straight, his fighting style consists of maneuvering his opponent around until he can transform into Arm Point and use one of his Roseo moves.
* Chopper is an interesting case. He's quoted as saying he does not feel physical attraction to humans. Nami trusts him enough that she permits him to see her naked in the shower in Episode 574.
* Chopper is a reindeer that can not only talk to humans, but other animals as well. This is thanks to the Devil Fruit he ate, the Human-Human Fruit, which gives him human-level intelligence and the ability to talk to them (As for the other animals,
* Chopper is based on Mark Brandon "Chopper" Read's memoirs, which are full of disputed or unverifiable claims. Some of it is true, such as Chopper earning his nickname by losing an ear in attack he staged on himself in order to be transferred to a safer prison wing. Other parts, possibly not so much:
* Chopper is now treated as a legitimate pirate threat as the "Spark of Genius".
* Chopper: Made in 2000, mostly set after the protagonist's release from prison in 1986.
* Chopperman, which stars Chopper as a super hero fighting against the evil Dr. Usodabada. It was initially a gag story in one of the databooks, before it was adapted into its own spin-off manga.
* Chopper may be the sole other Straw Hat besides Luffy who is a candidate for this trope, mainly thanks to his innocence. Having been rejected and hated his whole early life, Chopper was overjoyed to find people who could care about him and put faith in humanity in him, causing him to want to become a doctor to help people. However, Chopper's blind trust in people is cruelly subverted as Hogback, the doctor he idealises, turns out to be a
* Chopper's half-human form is definitely an example. Even though creatures of his type (animal zoans) look like adult humans crossed with animals, Chopper ends up looking like a three-year-old cosplaying as a plushie, for reasons of Cute, and possibly because he was actually an animal that
* Chopper's Heavy Point and Arm Point give him much greater attack power and his

Monster Point can level a whole village and almost destroyed the Tower of Justice.
* Chopper. The eponymous character suspects his hooker girlfriend of having had an affair with one of his enemies while he was in prison
* Chopper to Hiluluk — his "father," a doctor with faith in miracles, who wanted to cure all diseases.
* Chopper, who is also on the page picture, does not have a bad sense of direction per se (his is probably quite average). He is just very fearful, and as the forest the four characters were traversing was full of dangerous enemies, he got so scared that he just ran off without noticing where he was going.
* Chopper written by Martin Shapiro, is a modern-day reimagining of the headless horseman. It features a headless outlaw biker on a motorcycle who collects the souls of sinners. The only people who can see him are those who have consumed a strange new ecstasy-like drug that triggers their sixth sense and opens a gateway to the afterlife. During the hallucinogenic high, any characters who have committed significant sins are hunted by the headless ghost. Once the drug wears off the victim is safe and beyond his ghostly reach.
* Chopper yells "look what you made me do!" after beating his girlfriend.
* Chopping Block, a serial killer in a hockey mask, is quite offended when his female victims cry rape as he drags them into the alley, 'cause he's not some kind of sicko pervert.
* Chopping Block, being partially based on Bates. Except he still tries to off her from time to time.
* Chopping Block. Butch admits he has no idea what it does, but he claims it has "a certain je ne sais quois."
* Chopping Block: "Butch always felt the term 'gallows humour', while accurate, was redundant."
* Chopping Block, Butch meets a French speaker who he thinks is either telling him to kill for Beelzebub, or asking where the bathroom is — he opts for the first to be safe. If you understand the French, it turns out that, against all odds and logic, Butch actually guessed right.
* Chopping Block: Butch tried to grow one. All he got from it is confirmation that he's terrible at raising plants.
* Chopping Block comic has Butch come across a dad buried by his kids and decide to finish the job...
* Chopping Block had a dream about this, in which he discovered how much better the world would be without him. (The dream ended with him violently killing the angel.)
* Chopping Block has tried this, but the victims never live long enough to see their own hearts.
* Chopping Block: "If experience had taught him nothing else, Butch had learned that you never, ever leave witnesses. So this "Jehova" fella, whoever he was, was about to owe Butch a favor."
* Chopping Block In a later strip, he's revealed to have a "dead in thirty minutes or you go free" guarantee.
* Chopping Block likes to use its protagonist as the "psycho" in this situation. Naturally, the girl is much less likely to survive here.
* Chopping Block once tried to do this, only to learn that you should probably turn the music off after you kill the driver.
* Chopping Block pages consist entirely of an usually silent picture and a caption.
* Chopping Block recipes of gingerbread men that inexplicably omit the obviously most important ingredient.
* Chopping Block seems to consider killing a woman equivalent to deflowering her, and usually avoids having sex with (and/or cannibalizing) her body until she's already dead.
* Chopping Block wanted to do it as quickly as possible. Especially since he didn't work in the office, nor was it his own cheeks.
* Chopping Block, with Norman's timid obedience replaced with not-giving-a-crap.
* chopping his head off. Remorseful, Shiva put everyone he'd killed back together, but some of the body parts got jumbled up; Shiva couldn't find Ganesha's head so he used the head of a female elephant that he found near Ganesha's body as a

replacement.
* "Choppy-choppy your pee-pee!" was kidnapped by Japanese stable Kai En Tai for sleeping with Mr. Yamaguchi's wife and was strung up so they could "slice the cucumber" with a samurai sword.
* Chop Raider: "We're not going to force you to do it, but we know you won't decline."
* Chop Shop: London Garage. To promote their coachbuilding business, Bernie and Leepu go on a radio station's morning show. The host commissions them to modify a Rolls-Royce into something resembling a bacon sandwich (as a breakfast theme since they're a morning show). Bernie and Leepu decide the suggestion is silly and go in a different direction.
* Chop Sockey: This is a loaded and rather disrespectful term, but may apply in movies depending on the production values.
* Chop Socky Chooks and his brain gets sucked out, leaving him with the intelligence of an infant.
* Chop Socky Chooks: Happens to Chucky and Joe when they are trapped in Wasabi's Dream World and the giant mechanical duck Mr. Quackers knocks a building over on top of them.
* chops off all of Severard's fingers on one hand, joint by joint. Glokta himself, on the other hand, is intimately acquainted with damage to the toes.
* Chorae, also known as "Tears of God", are small metal spheres that counteract magic. The objects themselves cannot be affected by magic, nor can a human that has the Chorae in contact with their skin, and they turn sorcerers to salt on contact. This makes them extremely valuable in a setting where sorcerers would be otherwise practically unstoppable — they are crucial to the power balance between magic-users and non-magic-users on a geopolitical level and on the field of battle.
* Chore Character Exploration: Characters (and the audience) learn about each other while doing chores together.
* Cho Ren Sha 68k hitbox until it reaches the top, so that you don't suddenly lose your shield or die with no warning.
* Cho Ren Sha 68k show up after beating the regular final boss on the second loop, and has several phases that must be defeated.
* choreographed is dedicated to addressing and debunking the myths that come from it.
* Choreography Porn: Describing a dance in great detail, not when the sex scenes in a porn are carefully planned out and practiced.
* Choriflan (Fish Chocolate) until the end where the card for the aforementioned product is displayed with the slogan, "No mezcles en tus platos sabores que nunca mezclarías" (Don't Mix in Your Plates Flavors You Would Never Mix).
* Chorlton and the Wheelies-pointed Star of David (either the modelmaker responsible was unaware of the connotations, or he simply thought a six-pointed star would be easier to draw). This wouldn't have been so much of a problem, but the spellbook also happened to speak with a German accent. Needless to say, the studio was soon met with accusations of anti-semitism from the Israeli Embassy in London, who stopped the series being sold to Israel.
* Chorocojo Roxy went into a coma due to Cuteness Proximity Overload at one point. This trope is her hat, the same way that being a gamer girl is Sammy's, being a rage-spewing badass is Misty's, being the
* Choromatsu: A planet-like mass that's floating above the city and blinding the people below it with its bright green light. It becomes bigger and more unstable whenever Choro's self-consciousness rises and he’s seen reading a book about how to control it in "The Star of Hope, Todomatsu".
* Choro Q allows you to make powerful parts out of spoon, wrist strap, piece of cloth, paper bag, and others. The strongest chassis of the game is happened to be made of eraser.
* Choro Q has a track in a rural area. During night races on this track, it's possible to see this trope in action as a UFO beams up a cow.
* Choro Q HG 4 has this as an actual plot and goal: Two friends are working from being the bottom to top racers.

* Choro Q series isn't as wacky as others in term of a racing rule. However, after the 2nd game, the series started to put the racing courses that are beyond reality such as a disco factory, a sewer, inside a castle, a haunthouse, outer space, on the sky, under the water, and other weird possible areas. And instead of powerup, they have upgradable parts which are crazy instead.
* Chorus Girl. Improvements in microphone technology may have made this singing style obsolete, though the modern-day counterparts of these performers are more likely to be lip-synching.
* Chorus New Republic leader Vanessa Kimball gives one that unites the Federal Army and New Republic soldiers in the wake of Federal General Doyle's Heroic Sacrifice.
* chorus says, vehemently (and often) "it ain't me". If anything, the song is telling you not to buy what's on the commercial.
* chose doing good if it's convenient for them, Spike seems to be the first and only to go as far as to retrieve his soul himself and firmly choose the side of good completely of his own volition.
* "Chosen by history, a man becomes a hero. Engraved into history, a hero becomes a legend." —
* Chosen Conception Partner: Someone wants a child and chooses someone to be the other parent.
* chosen for a good reason, in that the commercial Common Desktop Environment (which is a proprietary (i.e. not open-source) program with more restrictive terms than KDE) already claimed the name CDE, so KDE was chosen instead to avoid lawsuits from the owners of CDE. Plus, well, "kool" is better than "common." (Eventually KDE and its rivals GNOME and Xfce went on to replace CDE on Linux and some other Unix-like systems.)
* chosen humanity to be the "Reclaimers" who will take up their cultural legacy known as .
* Chosen of Khorne, which is hardly the MO of a frothing, myopic lunatic.
* Chosen One. He does not handle being the chosen one well in general, and what would happen to his love interests if his enemies find out about them is one of his many worries. The three of them handle it with varying levels of grace, but they're considering the possibility of polygamy. It helps that one of them is from a culture where that is acceptable.
* Chosen One, not knowing what to do next, consults the prophecies written about himself in a deliberate effort to fulfill them.
* Chosen One", she remarks to a recently-defeated foe, "If I were at full Slayer strength, I'd probably be punning about now."
* Chosen One to displace the Omrid Dynasty. But he went overboard in his massacre of those affiliated with Ahab. Then he ended and persecuted Baal worship only to continue in Jeroboam's false worship.
* Chosen One who should have corrected Solomon's mistakes again fell to idolatry when he built idols to prevent pilgrims from going to Jerusalem (now enemy territory).
* Chosen supposedly made the change due to learning how popular her character was becoming and wanting to amp up the sense of loss in the final battle.
* "Chosen", the final episode of the series: the zombie looks at the camera, growls, then keeps walking.
* chosen to become outcasts because they disagree with the Homeworld philosophy (mostly on the topic of fusion.)
* Chosen. When Angel asks her where he is, she replies "He had to split." Subverted when immediately after she bursts out laughing.
* "Chosen", where the Chosen One who saves his people from the dragon does so by getting eaten and being so unappetising the dragon leaves them alone.
* chosen wielder may draw from its pedestal. In all incarnations besides the original two NES games, Link is a blond.
* chose then complained as though they didn't have any choice. They were damn good at it, too.
* chose to cover it up forever in a steel mask messed his face up, and made wearing the mask necessary.

* chose to get transferred into a supremely masculine body time and again, but still had a nagging fear of not being man enough to attract women.
* Chou "Bladedancer" Lee can use Taoist "chi" healing techniques through "laying on of hands".
* Chouces mood), only a solid layer of Plot Armor prevents Willow's jaw from shattering.
* Chou Dengeki Stryker as well, but at the cost of being calibrated for Zero's older hardware, limiting its use to him alone.
* Choudenshi Bioman features a rare aversion (almost): instead of traditional monsters of the week, five recurring human-sized "beastnoids" fought the team instead, although there was always a giant robot of the week instead of an enlarged normal monster. Given that this meant the giant robot costumes got little use, this approach has only been done in Bioman.
* Choudenshi Bioman: Fire (Red), Wind (Green), Thunder (Blue and Yellow), and Light (Pink).
* Choudenshi Bioman, Mika was killed off by one of the villains in Episode 10 (even being buried in her uniform!), leading to the introduction of the second Yellow Four, Jun Yabuki.
* Choudenshi Bioman, which involves the Biomen fighting against the Neo Empire Gear.
* Chou in the thinks that she is becoming The Load for Team Kimba due to her complete lack of powers when not doing what the Tao wants, which has lead to serious injury for her in some battles.
* Chouji actually lampshades this often in the series, as well as invoking the trope constantly. When he encounters the son of a debtor that he had just had murdered, Suitengu says "If you want my life, make money, then come and buy it."
* Choujikyuu in the original Japanese title translates as "transcending space-time", as in physical concept, a rather fitting title to an SF show.
* Choujin Barom 1 - One of Toei's most famous manga-to-live-action adaptations
* Choujin Heiki Zeroigar for the NEC PC-FX (and one of the system's very few action-oriented games), received a fully subtitled translation patch in August 2015.
* Choujinki Metalder times, and some who rise to become major characters even if not "Victorious Saint" (general) rank.
* Choujin Sensen: Baron Saijou has been a killer since he was 18, recalling how his first kill was in Vietnam, and then followed by Somalia, Iraq, and Afghanistan.
* Choujin Sensen: Baron swallows a live grenade and forcibly grabs onto Tomobiki in an attempt to take out his target.
* Choujin Sensen gains telekinesis as a result of participating in the [Superhuman Game].
* Choujin Sensen: Kaminashi Akira uses this power to escape from his death penalty in Tokyo's prison.
* Choujin Sensen manages to weaponize his blood by shaping his blood drops into pin needles, thereby raining through his opponent.
* Choujin Sensen narrates Tomobiki Rinji's POV on how he got thrusted into the world of the [Superhuman Game].
* Choujin Sensen of Tomobiki, it was her that encouraged Tomobiki to search up the [Superhuman Game] online and participate the death match (although Tomobiki didn't exactly expect that his life is on the line). You can say that she's the whole reason why Tomobiki starts to fight for his (somewhat pathetic) life.
* Choujin Sensen: Sasamura's sword style is dedicated to the [Void] technique in order to cut his opponent down.
* Choujin Sensen that hones both his body and mind through his Buddhist mantras into his signature "Fudoushinjuken" style.
* Choujin Sentai Jetman after being stabbed by a random mugger on the way to his friends' wedding.
* Choujin Sentai Jetman from the disgusted coffee drinker when he sees Radiguet's eye in his mug).
* Choujin Sentai Jetman in his end, his reasoning for that boils down to just "I'm

a warrior, this is all I can do". He died commending Gai for his victory and muttering Maria's name.
* Choujin Sentai Jetman); it worked for a while, but the Jet Garuda punched it off of him and destroyed it, leaving him vulnerable to the Jetmen's desperation attack, which he ultimately falls to.
* Choujin Sentai Jetman, Raita unlike Gai, didn’t even have a remote chance with Kaori which is probably why he was so quiet and didn’t butt himself into the main love triangle.
* Choujin Sentai Jetman, Ryu was so broken up over losing Rie, that he kept burying himself in his work as a Jetman, ignoring Kaori's advances when Rie was revealed to be brainwashed into becoming Maria, it got way worse.
* Choujin Sentai Jetman shows that they marry three years after the events of the show.
* Choujin Sentai Jetman, the Black Condor's Jet machine is called Jet Condor, but can be seen with the writing "JET CONDOL" on the side.
* Choujin Sentai Jetman the closure he needs to finally begin a relationship with Kaori.
* Choujin Sentai Jetman, the Jetmen's base, the Sky Camp, is a smaller one which houses most of the mecha inside it (the Bird Garuda is perched atop it instead).
* Choujin Sentai Jetman to him and runs out of the church to rejoin her teammates in fighting Road Jigen.
* Choujin Sentai Jetman while hanging out with some non-Jetman friends at a pool.
* Choujin Sentai Jetman who absorbs women's voices. He successfully pulls it off, too - apparently, even fatties can make convincing women with just some makeup, a wig, and a kimono.
* Choujin Sentai Jetman) would often do a straight, two-fingered salute of sorts whenever activating big attacks with the mecha, most often the Jet Phoenix and the Tetra Buster.
* Choujin Sentai Jetman would recall that it was originally "Birdman".
* Chouji's special food pills convert calories into chakra at an alarming rate. Chouji's girth is the only reason it isn't instantly fatal, and it would have been anyway if not for proper treatment.
* Choujuu Sentai Liveman had an orbiting base, that the Livemen couldn't attack until it was brought down by Red Falcon infiltrating it in the finale.
* Choujuu Sentai Liveman had a pizza parlor whose front sign announced their "deliverly" service.
* Choujuu Sentai Liveman modified his own body, allowing him to generate three clones of himself, called the Shurer Three. These more or less fill the role of Elite Mook.
* Choujuu Sentai Liveman transformed the departed souls lingering on Academia Island into Jiangshi in order to have a private army.
* Choujuu Sentai Liveman was an early example, although she was unambiguously mechanical at a glance. She was specifically built to serve as a base operator, but jumped into battle far too often for her own good.
* Chou Kuse ni Narisou: An idol singer disguises herself as a boy and enrolls in the toughest junior high school she can find in the hope of attracting a new heir for her family dojo.
* Chou Kuse ni Narisou considers Nagisa to be her rival, but Nagisa doesn't learn of Momoko's identity until the second half of the series.
* Chou Kuse ni Narisou hamming it up, and the series lead not noticing.
* Chou Kuse ni Narisou the string, and yells at the teacher to cut it out....
* Chou Ninja Tai Inazuma the main character, a TV producer from 2076, starts out trying to make three losers from the Edo period think they're superheroes, but when actual monsters start attacking she has to make them into real superheroes.
* Chouriki Sentai Ohranger: After Emperor Bacchus Wrath was killed by the Ohrangers, the Machine Empire Baranoia is briefly taken over by the usurper Bomber the Great, who promptly dispatches himself of the young prince Buldont, who was officially first in line to the throne. Since all the villains are robots, Buldont is subsequently rebuilt in secret by Empress Hysteria, into the much more powerful

and adult Kaiser Buldont.
* Chouriki Sentai Ohranger can be really badass, but also just as equally be distracted by cute things. To the point were she almost let a bomb into the base because someone gave her a cute doll!
* Chouriki Sentai Ohranger example, since the event shown here did not happen in either of those series).
* Chouriki Sentai Ohranger: Gunmazin spends most of his time in a small tiki form, which can only be unlocked via inserting a special golden key into its forehead and reciting a spell. His Zeo counterpart, Auric the Conquerer, requires only the key and no spell.
* Chouriki Sentai Ohranger had lower toy sales compared to the former.
* Chouriki Sentai Ohranger is premised on this. In it, the Ohrangers battle the forces of the Baranoia empire.
* Chouriki Sentai Ohranger: Juri ends up on the receiving end of this in an early episode.
* Chouriki Sentai Ohranger, Kaiser Buldont and Princess Multiwa wed in episode 41 and have a child near the end. It's okay because they're robots.
* Chouriki Sentai Ohranger lampshades this by having Ohranger's Grand Power allow them to build their own Team Bazooka, the Gokai Galleon Buster.
* Chouriki Sentai Ohranger: OhBlocker, the team's second five-piece mecha, has two swords that combine into a BFS made of energy that is as long as it needs to be... but is so heavy that it's not wielded so much as formed above the monster and allowed to simply fall, slicing through.
* Chouriki Sentai Ohranger robot, and combines with the rest of the team's mecha.
* Chouriki Sentai Ohranger, "The Five Robos' Great Riot", the Ohrangers trick Bacchus Wrath into bringing the new secretly-constructed Blocker Robos inside his base by disguising them as powerful, jewel-decked blocks and presenting these as a gift. Once inside, the Ohrangers activate the robos and trash the place.
* Chouriki Sentai Ohranger wearing a somewhat color-coded brief-style bathing suit as he relaxes.
* Chouriki Sentai Ohranger, which went berserk and killed its first pilot.
* Chou Ryuuen aka Nuriko. His actual gender is revealed pretty early on in the series.
* Chou Sei Shin Gransazer actually averts this trope for most of the series. The first 12 episodes has an alien agent put the Gransazers against each other. The next quarter of the show deals with a trio of recurring villains. Only the third quarter of the show has the heroes consistently deal with random monster attacks, which subsequently get replaced by another set of recurring villains in the final arc.
* Chou Sei Shin Gransazer someone thought that its support vehicle should be a conventional tank- only a hundred times bigger.
* Choushinsei Flashman as a possible way to conserve her physical strength due to even her strongest and punch based attacks easily exhausting herself in battle.
* Choushinsei Flashman does the same thing the Timerangers do. Unlike the Vortech bazooka, it's a revolving BFG when combined (Rolling Vulcan).
* Choushinsei Flashman had the same voice actors from the Brazilian Portuguese dub also doing the Latin Spanish dub (save for the narration which was instead dubbed by legendary Puerto Rican comedian Luis Antonio "Yoyo Boing" Rivera.)
* Choushinsei Flashman, it fires a beam out of its' big red eye, reconstituting and growing the monster. At which point, the Kuragen shrinks, and shrinks, into a tiny little octopi creature (often seen scurrying away from the battlefield). In this case, it seems that there's only so much "big" to go around; the Kuragen is basically transferring its' size to the monster (after it shrinks, the other villains put it in a small pool for it to recharge).
* Choushin - Tsunami, Washu and Tokimi - can produce wings on their own, but if they go over ten, they can break reality. Washu created Ryoko for purpose of being able to create wings on her own and, when Ryoko's body matures, it's said she would be.
* Chousoku Parahero Gundeen - A 3-episode series where the main hero is disabled.

* Cho was unconciously projecting Cedric onto Harry, after the Second Wizarding War, Cho ended up marrying a Muggle.
* Chowder about any of this) in the recording booth, debating what to do, and ultimately starting an impromptu car-wash to raise money.
* Chowder, a diverse and bustling metropolis with an exotic aesthetic, all manner of strange sights straight out of Dr. Seuss' work, some truly whacked-out everyday occurrences, and some of the most whimsical culinary delights one can imagine.
* Chowder, after Mung forgets their wedding anniversary, Truffles kicks him out of their room and forces him to room with the titular character.
* Chowder also does it with money; dollars and cents are now "dollops" and "sments".
* Chowder, a Magoo-like character crashes into Mung Daal's kitchen, mistaking it for his home, and tries to make out with Schnitzel, whom he mistakes for his wife. Throughout the episode, he confuses a boiling tea kettle for a phone (the which he burns Schnitzel's face with)and eats plates. Due to this, he's also a wanted criminal.
* Chowder and Mung once hid behind a sign that forbade hiding behind it. Not that the sign would be a good hiding spot regardless of what it read.
* Chowder and Panini are both a cross between a cat, bear, and rabbit. However, the original idea for the Chowder design was to look like some sort of squeeze toy.
* Chowder and puppets, so the one time it uses CG is jarring — and is meant to be. The baby minotaur in "The Deadly Maze" is considered terrifying in-universe.
* Chowder, a pig named Reuben eats a sandwich with mayo in it. He then mentions he is allergic to mayo, and starts breaking out.
* Chowder as a puppet version of himself, as well as the voice of the adult Chowder in the finale.
* Chowder at the fourth stop, when a giant says "I'm beginning to see a pattern here...")
* Chowder becomes so smart that he realizes that he is in fact in a cartoon. The show is promptly 'canceled'.
* Chowder by Gorgonzola in a baseball-like game. And he really would prefer to go back.
* Chowder, Chowder and Schnitzel had to deliver an order before sundown or else it was free. The customer lived on top of a giant. They finally make it just before sunset, but the customer delays them until the time is up. Then the giant helps them out by walking west until the sun was up again.
* Chowder; Chowder even takes time in the middle of said take to brush his teeth and go to sleep, and the moon and sun in the sky even get into it. He finally stops the next morning.
* Chowder Chowder, Mungal, and Schnitzel are locked in the bathroom. Chowder has to go, but, Chowder can't go in front of Mungal and Schnitzel, saying they are "all old and grody."
* Chowder. Chowder scribbles on the screen and gets yelled at. After it's cleaned up he points over at the Cartoon Network logo and asks "What about that one?" to which Gaspatcho responds, "That one doesn't come off. I've tried." The channel icon is part of the episode, making it obvious that the logo has changed since the episode's initial airing.
* Chowder, Chowder swallows all the gum he has been chewing, which leads to a very messy situation where everybody gets stuck in the gum, until it becomes a huge pink ball that seemingly swallows the whole planet. When the camera zooms out, it's revealed the ball of gum arrived at the exact spot from which Chowder bought the gum at the beginning of the episode and he hears the same screams when he puts it in his mouth, seemingly relieving the same events.
* Chowder, Chowder takes an orange from a fruit bowl only to suck out the rest of the fruit and put the orange back in the bowl.
* Chowder cream known as the Thrice Cream Man. He had a strange obsession with getting other people to eat him, and pretty much went crazy when the main character became sick of thrice cream.
* Chowder did this. Endive cooks herself a "beefcake" — which in the context

of the show is a living food that looks like a man — but gets the recipe wrong and he turns out ugly. She rejects him, but later finishes cooking him and he turns into his "true form"... a pink cake with a topless cowboy coming out of it.
* Chowder does most of the heavy lifting and cleaning, but this largely goes unnoticed by the rest of his co-workers.
* Chowder does this in "The Prank", eating the giant pie that squashed Mung. Endive then spends much of the episode trying to stop Chowder throwing the evidence up again.
* Chowder does this with food. Butter is now "blutter", coriander is now "snoriander", pizza is now "feetsa", etc. It should be noted that the characters themselves are named after actual foods, such as Chowder, Truffles, Schnitzel, Gorgonzola, Panini, etc.
* Chowder ends with Chowder taking over the kitchen with Panini, their children and an apprentice of his own.
* Chowder episode "Chowder Grows Up". It even says "Wait! I'm still talking!" when Mung closes the shutter while it is still playing.
* Chowder episode "Chowder's Catering Company", after Schnitzel walks in on Chowder disobeying one of Mung's orders, Chowder knocks him out with a shovel and hides him in a pickle barrel. When Mung sees Chowder with the pickle barrel (Note: Mung doesn't know that Schnitzel is in the barrel.), he knocks him out as well. Then Truffles comes in, he knocks her out as well. Fortunately, Chowder lets them all out just as he's about to throw them down a pit.
* Chowder episode "Gazpacho!", Lemon drives a snail bus through the wall of an arboretum.
* Chowder episode "Mung on the Rocks", an unsatisfied customer claims that he ordered a Super Happy Cake, but the cake is clearly depressed and lets out one of these.
* Chowder episode "Paint the Town" ends with Chowder leaving Mung Daal, Truffles and Shnitzel stuck in an alternate dimension with no way home...then it suddenly goes to black on their cries for help...which Chowder doesn't hear.
* Chowder episode "The Moldy Touch" Chowder, after being tricked into searching the spooky basement, encounters a skeleton dressed and positioned like a mirror image of himself.
* Chowder episode "Weekend at Shnitzel's" that he uses when he abducts Senorita Mesquite.
* Chowder, even though we never see her onscreen. Gazpacho always complains about her though- albeit cautiously, since she might hear him.
* Chowder experiences the effects of eating a raw Puckerberry as Mung lists them.
* Chowder for the trouble that Chowder causes because he should know better to expect Chowder to listen.
* Chowder, Gazpacho bans Mung Daal from his fruit stand, then confidently proclaims that he had to drop the banhammer on him.
* Chowder, Gazpacho was given his own episode toward the end of the series' run. Chowder and Mung only appear briefly in the beginning.
* Chowder had a falling-out with his mother over proper tooth-brushing technique.
* Chowder has Mung Daal step on a rake, which then slaps him for kissing her.
* Chowder has the Marzipan City Apprentice Games, which the apprentices of Marzipan City come to compete against each other for honor and glory in a variety of physical competitions. The winner of the Apprentice Games is awarded a shiny golden medal, and the games are hosted by the Queen of Marzipan City. Every year, the competitions revolve around a single unique theme (in the episode it is Apprentice Teamwork). Unfortunately, Chowder and Gorgonzola are kicked out of the competition by their masters after they lose several events. Now the duo must now get back into the games in order to reclaim their dignity.
* Chowder has various food items swish across the screen in between scenes. Sometimes, what's used is actually tied into the plot of the episode — "Grubble Gum", for example, obviously has bubble gum pieces being manipulated in several ways, and "Shnitzel Makes a Deposit" features different types of currency being stacked and shuffled about.

* Chowder, her only real character trait is that she has a crush on Chowder. Her whole character revolves around Chowder to the point that not much is known about her personality (besides having a crush on the main character).
* Chowder: In "A Taste of Marzipan", during Mung and Endive's food war started over the fact that they prepared the same dish at an annual street fair, one of them hits Gaspacho in the chest with a tomato. This makes him think he's dying and laments that he's too young and handsome for this.
* Chowder In "A Taste of Marzipan," Mung Daal and Endive get into a fight over who makes the best dish that escalates into a military skirmish, complete with foxholes, civilian casualties (Gazpacho), and heavy artillery (Schnitzel jumps off a roof and lands on Endive's camp).
* Chowder in exchange for an exotic fruit necklace. Their final task was to peel "growtatoes", which are just like normal potatoes, except they grow exponentially until fully peeled and threatened to crush the two chefs.
* Chowder: In "Gazpacho Stands Up", Chowder helps Gazpacho with material for his upcoming stand-up comedy gig. After failing twice to improve his handwriting, Chowder tries finding a book with jokes at the last minute, but only finds cookery books and picks one of them. During his performance, Gazpacho simply recites some recipes, yet the audience, particularly Mung-Daal, finds him funny. Lampshaded by Truffles, who says she didn't get it.
* Chowder: In one episode, Chowders love of midnight snacks has turned him into a Sleep Eater, a monstrous creature that he turns into when he's asleep and mindlessly devours everything it can get it's hands on. Chowder desperatly wants to stop doing it, since he can't remember anything he ate, making it pointless, but the only cure is to keep the monster from eating for an entire night, which is easier said than done.
* Chowder in that show is alive (but Chowder still freaks out when he finds a talking toilet).
* Chowder: In "The Blast Raz", the gang have to deliver a crate of highly explosive and unstable blast raz fruit. Their route takes them over a pothole-filled road, across a storm-tossed lake and up the side of an active volcano.
* Chowder: In "The Poultry Geist", the eponymous spirit possessing Chowder says this and runs through several of his titles before declaring that they can call him "Florentine".
* Chowder involved Shnitzel and Chowder spending nearly the entire episode waiting in line at the bank. Not only did poor Shnitzel have to deal with long, slow-moving lines and customers who were depositing huge amounts of change, he also had to put up with Chowder's shenanigans.
* Chowder in which the title character is conversing with his own stomach. Chowder once had a conversation with the representation of his self-esteem, manifested as his own hand.
* Chowder is considered a pioneer of the style, despite the characters having slightly rougher lines than the others on the list.
* Chowder is fond of destroying the fourth wall whenever possible. Characters constantly acknowledge that they're within an 11-minute episode (or, alternatively, a double-length special) or a season, and refer to the viewers regularly. One time, Chowder even pointed to the Cartoon Network logo bug at the bottom of the screen.
* Chowder is loud, frantic and over the top, with the title character being the loudest of all.
* Chowder is shown to have one that is filled to the brim with money - One of his more endearing qualities when he was missed after quitting his job.
* Chowder: Mung Daal falls into this as he needs to clean up his kitchen before the health inspector enters.
* Chowder no one is attractive and practically everyone is either some kind of a weird creature or a weird-looking humanoid, but Chef Mung Daal's main rival is a monstrous woman called Ms. Endive, although in one episode it's revealed that she's bitter and advises her apprentice Panini to stay away from boys only because she was left at the altar on her wedding day.
* Chowder, not-so-subtly suggested to be because she got engaged in her youth and

her groom-to-be never showed up to their wedding.
* Chowder occurs in the interim. He, in fact, grows up over the course of holding that note.
* Chowder often overeats himself into a huge ball, then deflates back to normal with one burp.
* Chowder of the show, will typically punctuate a sentence by flapping his arms.
* Chowder of the time because there are times Mung has her caught by the short hairs such as "Endive's Dirty Secret" where not just Mung Daal's Catering Company blackmails her into letting them use her pools but also the rest of Marzipan City as well!
* Chowder opens with Chowder eating a gumball with muffled screaming being heard as he chews it. At the end of the episode when Chowder has gummed everyone and everything on the planet together, the planet gets eaten by another Chowder and the same screaming is heard.
* Chowder, Schnitzel and Chowder had to climb a giant to make a delivery. Not to the giant, to the guy living on top of the giant.
* Chowder. She's much larger than any of the other characters with green hair, orange skin, and a long aardvark-like nose. All the other characters in the show seem to acknowledge this too.
* Chowder tears this one apart with a montage set to a song in which the last verse is just the word "Best" repeated over and over.
* Chowder tendencies are taken to the extreme when she mentions she always visualized her and Chowder being buried together in a tomb.
* Chowder than actually evil, Chowder does not know this yet, and thinks that the Monster means to hurt him. This trope is used to make the Monster seem scary because that is how Chowder sees the Monster.
* Chowder that resulted from the last time Mung Daal cooked "Tooty Booty Beans".
* Chowder, the audience has no idea what the joke is, just that it's very dirty, leaving viewers (especially older ones) to fill in the gaps with their own dirty jokes.
* Chowder: The catering team and Gazpacho make a delivery to Mr. Fugu, who is down the street. However, due to unexpected work on Mr. Fugu's driveway, they're forced to take the long way around, turning it into an actual road trip, much to Chowder's enjoyment.
* Chowder) There was one player who had dodged numerous obstacles. Truffles then yelled "Duck!" The player turns around and is eaten by a giant duck.
* Chowder, the title cat... bear... thing gets some Grubble Gum. Unfortunately, it gets stuck on his face, then his body, then to Mung Dahl, Schnitzel, Truffles, a random bear, and eventually all of Marzipan City. Bonus points for playing the Katamari Damacy theme in the background.
* Chowder they made a joke about the Cartoon Network channel bug in the corner of the screen. On DVD the channel bug just appears and disappears when the joke comes up.
* Chowder, trying to warm the bench with radiators and hairdryers, then finally setting it on fire.
* Chowder was originally 13 half hours before being expanded to 20, resulting in the redesigns planned for season 2 to be implemented within season 1.
* Chowder, when Mung, Chowder, and Gorgonzola wouldn't stop dropping their jaws several times to the floor.
* Chowder when Mung decides to give Chowder food anyway, only Chowder ran away just before entered his room.
* Chowder, where a hotel is called the No-Tell Motel. We don't actually see this trope in action, though.
* Chowder where the title character tries to publish a magazine whose cover consists of one of these and is genuinely shocked to learn that a cover with a picture is more likely to attract potential buyers.
* Chowder. While Mung gets chewed out for forgetting his wedding anniversary, Shnitzel sits down on a stool in the background with a bag of popcorn, enjoying the show. He even interjects with an "OOH! Radda!"

* Chowder, with the episodes "The Wrong Address" & "The Wrong Customer": During "Address," Chowder and Mung see a seemingly insignificant police chase and go about their business. At the end they return home to find it destroyed and Truffles being arrested. In "Customer," we find out that the police were chasing an old owl, who causes Mung's place to be destroyed. Truffles being arrested is due to a separate but somewhat related matter.
* Chowder with the object being Mung's childhood bicycle, I mean Dice Cycle.
* Chowder, yet Chowder has sought him for advice on women a few times.
* Chow does this to the Wolfpack after they help him steal the gold from the Mexican villa. He then proceeds to reactivate the alarm and snaps the necks of the guard dogs before leaving them to their fate.
* Chow saves The Wolfpack from being killed by Marshall in the climax by shooting the latter and his men courtesy of Alan freeing him from the trunk of the car and handing him his gun.
* Choza Akimichi is the only surviving member of his team after the other two members, Inoichi and Shikaku, were killed by the Jyuubi.
* Chrétien de Troyes it's done one better, with implications that Guinevere is playing Maleagant with full knowledge Lancelot will save her, knowing that this gives him a right to her (in a narrative sense, if not a legal one).
* Chrétien de Troyes (mid- to late-1100's): French troubadour who made great contributions to the Arthurian canon, including the quest for the Holy Grail and possibly Sir Launcelot.
* Chrestomanci, alternate worlds come in sets of nine and there's usually a version of the same person in each world of the set. Gwendolen moves to a different world and thereby forces all her alternate selves to shift worlds too. They all find that their new circumstances suit them better than the old ones, and turn down a chance to go back.
* Chrestomanci, a minor plot point involves Conrad accidentally entering a parallel universe through the portal hallway in the Stallery attic, and running into a strange woman who he takes a photograph of. It turns out that the universe where he encountered the woman is one where cameras are banned because they entrap people's souls, and the woman was a witch who was likely trying to kill him.
* Chrestomanci. However, every Chrestomanci has one particular weakness.
* Chrestomanci is very fond of these, and his friend the Goddess isn't above half-truths either.
* Chrestomanci learns of his regenerating power after he accidentally has his skull broken by a cricket bat, and wakes up in the morgue perfectly intact.
* Chrestomanci that inhabit Theare include household gods and kitchen gods.
* Chris Adams, and others. According to Adams's bio on Wikipedia, the first "superkick" Adams used was in fact the move now known as the enzuigiri. After a stint in Japan, he saw the move we commonly know as the superkick being used, and adapted it.
* Chris Adams: Competed in various Texas promotions and had a small run in WCW.
* Chris Adams: Debuted in England in 1978, debuted in the U.S. in Los Angeles in 1981.
* Chris and Clare also become love interests for each other, though this was an element that Douglas Adams had intended to put in the story, managed to get elements of in the first couple of episodes, but then got cut thanks to a combination of deadlines and
* Chris and Scottie's Road Trip, have its titular protagonists traveling across the world and encountering various national stereotypes. (The second episode stays in the US instead.)
* Chris asks who is excited for the second disaster-themed challenge in "
* Chris Avellone, about a Sith hunting down Jedi during the Imperial era.
* Chris Avellone has a Twitter account as well as a Facebook account. For a man who's big on deconstruction and has a strong anti-romance bent, he's quite a nice person.
* Chris Barrie hosted a similar Discovery channel program, but unlike Bruce couldn't land the Zeppelin airship (modern, not Hindenburg-era) simulator without

smacking into the mooring mast quite hard. In another program he showed just how hard it is to ride a police motorbike round the police testing course, wobbling around and toppling over since all the emergency kit makes such bikes very top-heavy. He could ride an old Brough Superior (belt-drive gears and all) with no problem though.
* Chris Barrie mentioned in an interview that until about ten years after the last episode of
* Chris Bell. He released only one solo single during his lifetime, and then he died in a car accident a few weeks short of his 28th birthday.
* Chris Benoit’s wife, Nancy, during her time in WCW in 1990-1991, played Robin Green, a nerdy, bookish and plain Jane fan of Rick Steiner, coming to all his matches (always wearing pigtails, thick glasses, polo shirts and jeans) and declaring her devotion and love toward him. Eventually as part of the angle, Rick requited Robin’s crush and agreed to go on a date with her. On date night, he got a stunningly attractive Woman a (very) low-cut dress, her hair down, earrings, mascara ... the works. Unfortunately for Rick, their date was Doom-ed from the start ... as in, a vicious attack by the men Robin was working with, Butch Reed and Ron Simmons, and Robin’s “crush” was a sham to get Doom a shot at the WCW Tag Team Champions ... coincidentally held by Rick and Scott Steiner.
* Chris Benoit a month later to explain that he'd faked the explosion in an attempt to see what people really thought of him.
* Chris Benoit and Orlando Jordan had a hilarious storyline in 2005 where the former routinely embarrassed the latter in a series of squash matches, making him tap out progressively faster with every match. Benoit would frequently mock Jordan in backstage segments by indulging in mundane activities (like making a cup of coffee or taking a piss) just to show how much he can do in the same amount of time it took him to beat Jordan.
* Chris Benoit, Austin) against a common (heel) foe, but with everyone involved painfully aware of Shawn's eventual inevitable betrayal… which, sure enough, always came. Almost always via Superkick.
* Chris Benoit, but Chris caught his punch and locked him in the Crippler Crossface for victory.
* Chris Benoit, but he went up to ten during his career), Swan Dive headbutt, Crippler Crossface.
* Chris Benoit, but his voice was relatively high-pitched. Edge was tall, rather lanky, and had perfectly styled long blond hair, but his voice was often a low growl and noticeably more masculine than Benoit's. (And just to add to the irony, both men were Canadian.)
* Chris Benoit made a huge deal over the fact that, despite receiving numerous opportunities, he always seemed to choke in world title matches, and thus both felt he was not in their league. Guess who won?
* Chris Benoit. Part of his "Silent But Violent" persona was that he was ridiculously strong for his size and able to perform power moves on wrestlers literally twice his size.
* Chris Benoit, regardless of the importance of his involvement in any particular storyline of that time. It led to the WWE not showing certain matches that involved Benoit in any way. When the WWE had its Classics On Demand service, for example, the War Games 1997 match was not on the list of viewable War Games matches because of Benoit's involvement. It got to the point where many fans were willing to at least let WWE acknowledge his existence, especially after the revelation of Benoit's severe brain damage being the likely cause. The Benoit footage was reinstated when the WWE launched the WWE Network (which includes near the entire WWWF/WWF/WWE, WCW, ECW and other video library), but with the same Parental Advisory Warning that they usually show before a program that might contain any aspect of its "Attitude Era". Benoit cannot be searched out individually as his name yields next to no results and he is not in event descriptions, instead replaced by something along the lines of X in a Y stipulation match for Z, X obviously being Benoit's opponent for that match. Certain pay per view posters remove Benoit and the match he no-showed during the incident was edited to remove

any commentary mention of him, and the tribute show that was aired for him before the circumstances of the event became known was replaced by the program shown in the internationally aired version of the same time slot, a highlight reel showing some championship matches.
* Chris Benoit's double murder-suicide, anything on the WWE Network featuring him are preceded by the following: "The following program is presented in its original form. It may contain some content that does not reflect WWE's corporate views and may not be suitable for all viewers. WWE characters are fictitious and do not reflect the personal lives of the actors portraying them. Viewer discretion is advised." To avoid further "promotion" of Benoit, none of the events — even the ones he headlined — mention him in the program descriptors, and his matches lack a chapter select on every show. This warning also follows any archived or content programming that is rated TV-14 or TV-MA, as they run counter to the current company image of "family-friendly sports-entertainment".
* Chris Benoit's "feud" with Orlando Jordan consisted of Jordan tapping out to the crippler crossface in increasingly short intervals of time.
* Chris Benoit. Throughout most of his career, he tried to keep his missing tooth hidden behind his lips, but WWE bookers decided to have him accentuate it with a slasher smile.
* Chris Benoit was outed working a minimum wage mall kiosk job on the side to make ends meet.
* Chris Benoit, whom Benoit hated, to lure Benoit into a beat down in the locker room. Thing is, Angle didn't like the Guerreros too much either and soon he and Benoit were teaming up against them.
* Chris' boss Carl just watches movies (some of which are fairly obscure) for the
* Chris Brody uncontrollably makes people fawn over him through eye contact. It works over Skype.
* Chris Brown had two #1 hits, one of which was the well-known "Run It!". What was the other one? "With You", "Forever", "Deuces", "Yeah 3x" and "Look at Me Now" are all reasonable guesses, but it was actually "Kiss Kiss", which faded into relative obscurity after Brown and featured artist T-Pain's careers got damaged.
* Chris Brown in March 2009. He eventually pleaded guilty to felony assault and was forced to do 6 years of community service as a penalty.
* Chris Brown's 2009 hit "Forever" (of viral wedding video fame) is the extended version of a song for Doublemint gum, and the lyrics actually contains their jingle, "Double your pleasure, double your fun".
* Chris Cagle's biggest hit, "I Breathe In, I Breathe Out", is a cover of a song first recorded by David Kersh.
* Chris Cagle's only #1 hit was not "Chicks Dig It" (his most-downloaded song), "What Kinda Gone", "What a Beautiful Day", or "Miss Me Baby" (his most-viewed music video on
* Chris Candido have in common is their unapologetic pride for Joisey, both even using the New Jersey Jam leg drop.
* Chris Candido or be fired, which came after Storm was kicked out of their group, Triple Threat.
* Chris Candido's 2005 Lockdown event, making this a combination of medical and accidental (although the medical cause was the ultimate cause of death).
* Chris Candido: Started in the 1980s, first made his name in ECW and SMW in the 1990s.
* Chris Candido twin out; he turned back just in time for Johnson to hit his finisher and get a three-count on the "wrong" man.
* Chris Carter: in the final episode of season 2 he has a brief role as "Another Agent" questioning Scully in one scene, and has a non-speaking cameo as a cinema audience member at the beginning of season 7 episode "Hollywood A.D." He also appears in the background of a hospital scene in the second movie.
* Chris Carter tries to peddle the idea that the emotions from the almost kiss in the hallway plus the CPR scene later in the movie equals a kiss. Not surprisingly, nobody buys that.
* Chris Cason was the original voice of Mr. Popo for Funimation's in-house dub,

but left after the Freeza Saga was over, and
* Chris Chibnall" also showed the Doctor having previous regenerations before Hartnell and the Seventh Doctor was also hinting at a mysterious origin and not being an ordinary Time Lord. So essentially Chibnall was simply just building on some ideas already introduced.
* Chris Chibnall and Pip and Jane Baker on an '80s TV discussion show about the failings of Seasons 22-23.
* Chris Chibnall's run as showrunner took this to obsessive extremes, even when there would have been alternate means of spoiler avoidance.
* Chris Chibnall statements to avoid spoilers without technically lying:
* Chris Chibnall was a well-known fan of the show, even appearing on national TV in the 1980s to discuss it.
* Chris Claremont and any Acolyte who wasn't Fabian Cortez burn up and die in Earth's atmosphere as Asteroid M disintegrates.
* Chris Claremont. And of course, the most famous of all X-Men, the Canadian Wolverine. Incidentally, Wolverine's later origins revealed him to be an immortal whose family came from Canada's patrician colonial gentry, complete with the Preppy name of James Howlett. So Wolverine is technically Canadian-WASP but he comes across as an anti-establishment bad boy.
* Chris Claremont, and the story that revealed it, are widely considered to be even worse.
* Chris Claremont creator Len Wein next to Claremont in a government committee).
* Chris Claremont growing as a couple and comment on how far the two have come since they originally worked on the book.
* Chris Claremont had wanted him to be the son of Mystique and Destiny earlier).
* Chris Claremont one-shot and ends up marooned in the middle of nowhere in Scotland, and an employee of Mojo's who acts a lot like him gets killed.
* Chris Claremont; only a bare handful of writers have managed to carve an identity out on the X-Books that did not have Claremont's shadow hanging over them. Similarly, everything Chris Claremont himself has done since then has been inevitably been declared not as good as his original X-Men run.
* Chris Claremont slaver villains. Who, coincidentally, the team encountered in another dimension where they teamed up with a blue-skinned princess-cum-sky pirate and a humanoid version of Lockheed.
* Chris Claremont's run. For instance, the "Proteus" adaptation was shortened to a single two-part episode, as opposed to the original story, which run for several issues after being built-up by a number of prior subplots.
* Chris Claremont's run, Wolverine (pre-character development) snaps at Cyclops for being harsh on the X-Men over Thunderbird's death. Banshee steps in to point out that as obnoxious and rude as Wolverine is being, he's not wrong. Cyclops concedes the point.
* Chris Claremont, the later writers didn't follow through with the hints he was able to sneak in.
* Chris Claremont; the team travels to an alternate Earth which is covered in an endless ocean that seems to have frozen time.
* Chris Claremont, the writer replacing Claremont was Fabian Nicieza.)
* Chris Claremont to a favorite band that several were associated with.
* Chris Claremont type, and often affected this pose in the earlier comics.
* Chris Colfer appears to be Murphy's apprentice in the art. He is a lying little tease who is not to be trusted when it comes to show information.
* Chris Colfer is slightly taller than his on-screen love interest, Darren Criss, but, because Criss' character was meant to serve as a mentor-type figure, efforts were made to make him appear taller than Colfer, even in photo shoots promoting the show.
* Chris Colfer's (Kurt) skill with Sai swords. It's pretty damn awesome.
* Chris Colfer vocal range simply by continuing to sing in a high pitch into adolescence, thereby retaining his childhood range even as his larynx grew to encompass much lower notes, too.
* Chris Columbus as Susan Bones. Additionally, one of the moving portraits features

a girl with flowers, who is played by another of Columbus' daughters.
* Chris Columbus came from his loft, when at night "what sounded like a platoon of mice would come out and to hear them skittering around in the blackness was really creepy".
* Chris Columbus due to family commitments. He stayed on as producer and then vacated the series.
* Chris Connelly first collaborated with Al Jourgensen when Jourgensen had asked him to add vocals and lyrics to an instrumental he'd written... That instrumental recording was later turned into "I Will Refuse" by Pailhead, with
* Chris Cornell. All you can really say about this one is that it's about the bitterness and resentment of being dumped for someone else, but the details are up in the air. Is it about a straight man lamenting that his girlfriend left him for a lesbian? Or is it about a gay man lamenting that his boyfriend left him for a straight woman?
* Chris Cornell, but he decided that the fact that "mourning" and "morning" are homonyms would cause confusion about the title when it was said aloud on the radio. He later regretted this decision (citing friends telling him the album title sounded like an air freshener scent) and went back to the working title 16 years after the fact: A 2015 reissue restored the original intended spelling to the artwork.
* Chris Cornell - the latter was his originally intended title, but he was convinced to alter it because "mourning" and "morning" are homonyms, and listeners who heard the album title mentioned on the radio would be more likely to assume it was "morning". He'd come to regret this decision, so when the idea of a reissue came up, he belatedly had the title changed.
* Chris-Crossed" brings up a ton of them. First of all Chris's hair is long in the flashbacks when it was short when he first appeared at the end of Season 5, as well as his clothes being different. Second of all, the flashback shows Chris going through a portal in the attic when he orbed into the attic in his first episode. And when he first appeared, he says he has come to stop the Titans as they rule the world in his future. Yet the flashbacks have no mention of the Titans.
* Chris Crutcher often plays with this in his books. He usually has several straight examples of the Jerk Jock, but his protagonists are often jocks who are good people, and the extra characters who are jocks can be either.
* Chris Cunningham was banned in some places because networks feared it could trigger seizures.
* Chris Cuthbert during the 1988 Stanley Cup playoff game between the Washington Capitals and New Jersey Devils on April 18. A power outage struck the
* Chris de Burgh... he did a mushy love song, "Lady in Red". Which he specifically did as a tribute to his wife. Guess which one gets the most airplay?
* Chris de Burgh's "A Spaceman Came Travelling" is based around the idea of an ancient space traveller visiting Earth at the time of Christ's birth. His glowing spaceship stops above Bethlehem and resembles the Nativity Star- leading both him and the various visitors to the Virgin Mary and the infant Jesus to bring a message of peace and goodwill from the stars.
* Chris de Burgh song "A Spaceman Came Traveling" (a sci-fi interpretation of the first Christmas) explicitly refers to "light-years of time"; the writer not only makes the mistake but goes out of his way to wave it in the listener's face.
* Chris develops a habit of leaning forward and stepping on his hands when he's sitting down.
* Chris doesn't tell the Killer Grips about the mouse traps he's hidden in the tires of the tire obstacle course in "
* Chris does this from time-to-time usually when introducing contestants. Most notably in episode 1 of
* Chris Doucette read the comics and were surprised to see how little characterization both FOXHOUND and the Cobra Unit received when they played the games.
* Chris Evans about the part of their live show where they have a staged argument, appeal to their audience for support, and conclude:

* Chris Evan's (in)famous BBC Radio One Breakfast Show from 1995 until 1997. Initially credited with "saving" the station (the hugely-popular national station had suffered a drop in listeners following a serious shake-up under Matthew Bannister starting in 1993 in his attempt to re-position Radio One as a "youth" network following two decades of it being a "housewife's favourite"; Evan's show co-incided with an upturn in listener numbers) he increasingly became egotistical, dismissive of BBC and general broadcasting guidelines and often took what many thought was a bullying attitude to his on-air colleagues. Things eventually came to a head when he and the rest of his staff refused to come in for a Friday morning show leading to someone else having to cover for him. Evans was subsequently sacked and his career took a long, very slow nosedive which culminated in several flopped attempts at TV "comebacks" in the 2000s. He has now reached middle age, has regained much (if not all) of his former popularity and hosts the Radio Two Breakfast Show. He apparently regrets many of his past mistakes and behaviour.
* Chris Evans is a huge goofball on set, yet when the director calls action his costars notice that he immediately stops smiling and becomes deadly serious.
* Chris Evans movie, which has him naked and in an impromptu sauna after his powers burn all his clothes off.
* Chris Evert's other two ex-husbands are also sportspeople: Alpine skier Andy Mill (1988–2006) and golf legend Greg Norman (2008–2009).
* Chris Evert was involved in two relationships within the sport: first a brief romantic relationship in the mid-'70s with Jimmy Connors, then marriage with John Lloyd from 1979 to 1987. See "Cross-sport" below for Evert's other two marriages.
* Chris Farley did his own stunts for his films, when they couldn't find a stunt double to match his size he insisted on doing them himself.
* Chris Farley paid tribute to Farley by playing a clip from a past appearance in which he sang "I'm a Clown, But I Cry".
* Chris Farley played the same type of character in his sadly short career, a walking disaster area who nonetheless was sympathetic and likable.
* Chris Farley which were released after his death from a drug overdose.
* Chris Farley would do this on several occasions, particularly with his Matt Foley character. He has gone on record to say that's it's based on a quirk his father used to embody.
* Chris from the two-part episode "Do The Handicapped Go To Hell?"/"Probably" is also an example of this, as he lets the rude/abusive Saddam walk all over him during the episode and reacts very passive-aggressively to Satan cheating on him.
* Chris Gardner, whose rise from homelessness to top stockbroker was chronicled (
* Chris Gethard Show were told Random Messenger Bag would undertake a Hero's Journey, defending Chris from a full hour of attacks to the point where Chris actually referred to him as the Mr. Baggins to his Sam Gamgee. In fact, Messenger Bag betrayed Chris when given an opportunity for more screen time, leaving him to fend for himself while handcuffed to a chair. Messenger Bag was in fact on a villain's journey, Chris is the true hero.
* Chris gets infected by demonic spider venom; as he transforms into a spider, he resides in the basement, transforming it into a webby lair.
* Chris Griffin is one of the nicest Griffins (particularly in the earlier episodes), but also an idiot.
* Chris Griffin is the only blond member of the Griffin family, and is quite possibly
* Chris Hackney, Boey's English VA, has acknowledged a number of Boey-related jokes on his Twitter. Most notable are the ones regarding his strange liking of flour and the infamous scream he makes in Act 4.
* Chris Hackney near the end of the first part of the game until he recorded the lines for it.
* Chris Hardwick of TheNerdistPodcast, started out as a (very well connected) interdisciplinary geekdom VIP, but is now a
* Chris has had a few attractive girlfriends, despite his less than flattering traits. He reasons if his dad could get his mom, there must be hope for him yet.
* Chris Hastings once wrote down every single '80s action movie trope that he

could remember. Then he crammed every one of them into a story. The result was
* Chris Hemsworth as Thor when he kisses her Ray admits "Any straight man could agree he's handsome."
* Chris Hemsworth became a soft reboot of his most famous role and won rave reviews for the new direction he took.
* Chris Hemsworth before Chris got the part, partially because the people at Marvel thought Liam was too young (he celebrated his 20th birthday during the audition process).
* Chris Hemsworth likewise didn't want to grow his hair out again for
* Chris Hero aka Kassius Ohno, as Ohno has yet to make it out of WWE's developmental system.
* Chris Hero (aka Kassius Ohno) idolized Misawa, so he loves the Rolling Elbow and uses countless variations. Additionally , he invented a discus pump kick called Cyclone Kill or the Cyclone Boot.
* Chris Hero defecting from ROH to join them in their attempt to destroy the company. Even after the CZW incursions were put to an end The Kings Of Wrestling continued to cause trouble in ROH for years to come.
* Chris Hero for the IWA Mid-South Heavyweight Championship in a two out of three falls bout that went ninety-two minutes.
* Chris Hero has a naturally elevated testosterone level. Most men would think that would be awesome but in Hero's case, it causes him to fail drug tests.
* Chris Hero: Left ROH in 2012 to sign with WWE, where he was re-christened Kassius Ohno. Left WWE in 2013 and returned to his Chris Hero name. Wrestled mainly for NOAH and EVOLVE until 2017, when he returned to WWE and became Ohno again.
* Chris Hero's later involvement. Zandig was ultimately responsible, due to negligence causing the antipathy between promotions, and when Zandig did act, Hero and Butcher quickly became subservient to him. However, for most of the "feud" he was nowhere to be seen, leaving Hero and Butcher to do all the heavy lifting and between the two, Hero acted as leader more often than not, had the most to say, had the most grievances, did most of the planning, etc.
* Chris Hero willingly ran "an infinity gauntlet" hosted by SMASH where he promised to wrestle thirty minutes for every 500 USD raised for combating ALS. $3440 was raised, resulting in him wrestling for three hours and ten minutes straight.
* Chris Holmes, the original lead guitar player for W.A.S.P., became unfortunately renowned for his drinking habits near the end of his first tenure in the band, with him admitting that he drank upwards of five pints of vodka
* Chris Hughes who was born on-screen in 1986; by 2003, he was a doctor.
* Chris Hülsbeck has kindly asked not to have his video game tunes remixed, which is why there is a standing ban on derivative works at the Videogame Music Archive and only four remixes on
* Chris Hyatte from Scoops Wrestling and the early days of 411 Mania was a mixture of this and a rare example of a malicious
* Chris Hyde got himself bumped off doing his one last job. His son Kyle spends
* Chris Isaak's "Baby Did A Bad Bad Thing" went mostly unnoticed upon release. Then it started being used on the trailers and TV spots for
* Chris is a bit more specific in his threats to Gary. "If you fuck us out there I'll rip out your balls and shove them up your ass so the next time you shit, you'll shit all over your balls!" Or, "If you fuck us out there I'll drill holes through your dick so the next time you piss it comes out in all different directions!"
* Chris is also portrayed to masturbate more often than an average teenager would, especially in "
* Chris is good at drawing... or at least used to be. They had an episode about and showed it a few other times, but then they apparently forgot about it. Chris also has a good knowledge about drugs, as shown in the episode where Lois and Peter get high before a talent show.
* Chris is hated by the majority of the contestants in-universe, but some of the fans find him to be an interesting part of the show.
* Chris is one to let the opponent launch first, then respond, in line with his

sensitive and peaceful nature. In most other respects, he is the
* Chris Janson's only #1s are "Good Vibes" and "Done", nowhere near as popular in the long run as his other top-ten hits "Buy Me a Boat" (his
* Chris Jericho, and works a hard-hitting, high-risk style in which several peers have destroyed their own bodies.
* Chris Jericho appears to be turning into this, alternating stretches of helping to put over younger wrestlers or rookies on WWE programming with tours with his rock band Fozzy.
* Chris Jericho as the first main event of AEW, most fans were probably expecting Jericho to be the face and Omega the heel. Nope, it was the other way around.
* Chris Jericho, as the WWE creative team had no plans for him or Christian.
* Chris Jericho. Back in 2008 and early 2009 when everyone took his heel character completely seriously, Jericho would do this weekly. They rarely worked, but they were awesome.
* Chris Jericho: Began working a reduced schedule as of 2012. Worked his first non-WWE matches in two decades with his 2018 NJPW run. Joined All Elite Wrestling in 2019 and became its inaugural World Champion.
* Chris Jericho, calling them gelatinous tapeworms, germ incubators, hypocrites, pharisees, among other not so nice things.
* Chris Jericho, chief among them a new Hart Foundation stable led by Bret Hart's nephew Teddy), which reportedly drove WWE's creative team nuts.
* Chris Jericho did the same thing in the middle of a Money in the Bank match. Both of them were on ladders trying to reach the briefcase, so Del Rio removed Mysterio's mask who immediately covered his face. Del Rio then kicked him off the ladder before winning the match.
* Chris Jericho eras). He would call them "filthy, dirty, disgusting, skanky, brutal, bottom-feeding trash bag hoes".
* Chris Jericho. 'Everyone', however, did not include Jericho, leading to some sexual tension.
* Chris Jericho from AEW received massive heat due to the Fozzy tour that had a lack of COVID-19 procedures. His comments received backlash for discussing the "low number percentage" inconsiderately. Fans were not pleased with AEW not punishing Jericho, who still remained on TV after failure to disclose COVID-19, which would have placed AEW in jeopardy.
* Chris Jericho had been a fan of his since he was 16, and was able to team with Jericho for the better part of a year after coming to the WWE.
* Chris Jericho has been said to have very evened attributes. He is an adept high-flyer, a decent brawler and well-versed in technical submissons. He has an average build (not too big, not too small) and average speed/agility. Throughout his career, he's been seen to have bested the best, and has been bested by the best.
* Chris Jericho has been trying his damnedest to get "fruit" turned into a synonym for "cool" or "sweet", under the logic of "someone had to be the first guy to say something was 'cool'". Has not been working out for him so far.
* Chris Jericho. He then suggested that "bargain basement slut" and "miserable slimeball pig" were more appropriate.
* Chris Jericho in 2001 and won the Intercontinental Championship for a record-breaking nine times at the very end of the decade.
* Chris Jericho. In Jericho's mind, it's not him that turned; it's the fans.
* Chris Jericho in the summer of 2002 not once, but twice, including Cena's first ever match on PPV. While both were "fluke" wins (Cena won both by roll-up), it was enough to establish Cena as someone to keep an eye on on the Blue Brand. The rest is history.
* Chris Jericho isn't particularly muscular or tall but he's WWE first Undisputed champion and has held the most intercontinental champion reigns.
* Chris Jericho. Jericho and Christian spend most of the night wearing only towels and trying to find something to wear. Later, the Dudleys come out to the ring with the bags and toss their clothes into the crowd. If that wasn't enough, Spike Dudley then ripped their towels off.
* Chris Jericho, leading into a Chicago Street Fight at Extreme Rules for the

title.
* Chris Jericho lost to that! He knew 1004 holds and they were almost all ARMBAR!
* Chris Jericho of conspiring to rob him of the Cruiserweight Championship.
* Chris Jericho of it. It's almost like it was a vehicle solely to make Cole look bad.
* Chris Jericho once referred to Crash Holly as "Elroy Jetson", and fans began chanting "El-Roy" at Crash, much to his dismay. He eventually came to embrace it later on.
* Chris Jericho once remarked that after he joined WWF from WCW he had to change his finishing move name from the Lion Tamer to the Walls of Jericho as
* Chris Jericho on top of the Cell at Judgment Day 2002. This was the only time someone had been pinned on top of the Cell.
* Chris Jericho's autobiography, he mentions that while he worked in Japan, he couldn't really speak the language and a couple of the friends he made there couldn't really speak English. However, he said that because he was fluent in "broken English" that he could still communicate; asking his friends "Would you like to go to the music store with me?" wouldn't work, but saying, "Maybe you me go CD shop?" would.
* Chris Jericho started a heavy metal cover band, Fozzy, as a side project, they introduced themselves as being the real writers of the songs they were covering, with the story that a crappy recording contract had them trapped in Japan for decades. Jericho himself performed using the stage name "Moongoose McQueen", and insisted that he wasn't Jericho, but that Jericho was just another guy ripping him off. (Eventually the gimmick was dropped, as ironically the band started recording well-received original material and spends much time touring real metal festivals now. Jericho is a widely respected metal frontman now, as well as a main event pro wrestling star.)
* Chris Jericho's unification of the WWF Championship and the WCW World Heavyweight Championship at Vengeance 2001.
* Chris Jericho's WWE entrance for many years was inspired by a similar clock he saw at a post office that was counting down to the new millenium.
* Chris Jericho (that Jericho was acting as special referee for and sympathized with) then pulled even more shenanigans when Jericho himself took on Shawn the following month to steal a win. Jericho, rightly annoyed at Michaels and the fans for validating such behavior, invited Michaels onto his Highlight Reel show and beat him down out of frustration.
* Chris Jericho. The announcers remarked that they weren't even sure of what they'd just seen.
* Chris Jericho Then later in the same episode, since ECW seemed to have launched a two-front war, there was a match with those ten guys versus five WWF guys and five WCW guys... only to reveal the Alliance of WCW and ECW. Cue fifteen-on-five beatdown.
* Chris Jericho tore his Achilles tendon, putting him on the shelf for the rest of the year. WWE Creative, backed into a pretty unpleasant corner, had Jericho cut a promo on Edge for having the gall to get injured during their title run; he then hyped up his new mystery partner (who was much better than Edge)...who he'd be debuting at the next PPV. This bought them enough time to actually get a new story together.
* Chris Jericho traded his signature long tights for briefs in his 2008 heel turn.
* Chris Jericho week by week. Currently post-"End Of the World", it's lower but more emotive.
* Chris Jericho went into the ring, and Jericho proceeded to cut a promo on Cassidy, telling the audience that Cassidy wouldn't get a rematch and that his career was dead. Cue Cassidy coming into the arena, listening to a little more of Jericho's remarks, not saying a word, and then slowly raising his fist into a thumbs-down gesture. Followed by the Inner Circle being drenched in orange juice dropped from the rafters. To add further humiliation, Jericho received a towel from ringside to wipe himself off, not finding out until several seconds later that it was an Orange Cassidy towel.

* Chris Jericho, who had also appropriated the nickname. This did not go well for him.
* Chris Jericho would also occasionally bust it out during his goofier days.
* Chris Johnson actually had a pretty good career, but never matched his 2009 season with the Tennessee Titans where he rushed for 2,000 yards.
* Chris Juul (Tinkoff-Saxo) crashed during the 2015 edition of Milano-San Remo (mid-March) and broke his wrist. While he didn't complete the Italian race, he went on to complete the entire season (including
* Chris Kanyon and WWE star who was one of the earliest openly gay wrestlers in the industry in the 2000s.
* Chris Kanyon, his entrance was accompanied by an ominous pipe organ.
* Chris Keller turns on his father for shipping 128 cracked engine heads that caused the deaths of 21 men. When he finds out his father knew about it but told nobody until it was too late, he asks him what kind of a man would do such a thing. His father says it was to keep the
* Chris Keller, when he basically kills all of Beecher's previous lovers as well as his father's murderer.
* Chris K Larry Zbyszko's specially chosen opponent for Raven, who was feuding with Zbyszko at the time.
* Chris Kraft badly burned his hand as a child. When he applied for flight training, the damage was deemed too extensive and he was rejected.
* Chris Kyle came off as this in his book, at least concerning shooting insurgents. Contrary to myth, he didn't go down to New Orleans and shoot looters. By most accounts, when dealing with his family and teammates, he was a very nice guy but took no shit.
* Chris Kyle. With 160 confirmed kills under his belt, the Marines and Army men he saved in Iraq, and his widow, Taya, remember him fondly as a good ol' boy from Texas and a loving family man. Folks who met Chris at a book signing remember as he joked leaning in saying "I am so sorry. Here you waited all this time and got to the front only to find another dumb redneck standing here." As the line burst in laughter.
* Chris LeDoux's "Silence on the Line" is about a cowboy who calls his wife after his last rodeo. He says he's got this friend whose rodeo career left him unable to walk, and would like to bring him home with him, but the wife says no. The cowboy, crippled himself, goes to Mexico instead.
* Chris LeDoux would sign a record deal with Capitol Records shortly after
* Chris likes Heather's and Alejandro's belligerent romance. He does not like it when they get lovey-dovey and fail to provide any drama. Thus, to get entertaining footage, he changes the rules of the finale midway in "
* Chris McLean ends up getting away with nearly everything he does, aside from the occasional mishap here and there
* Chris McLean. His favorite thing is himself, to the point that he puts his image on many items that go along with the challenges.
* Chris McLean's a terrible singer, which is probably why his being in a boy band is an off-limits topic of discussion.
* Chris McLean, the show's host, may be considered as such by the way he creates dangerous challenges and tweaks the rules to his own sadistic liking.
* Chris Mess from "Chris Messin' August" tried to ruin Christmas for everyone by impersonating Santa and convincing all the children that they now had to be naughty if they wanted to have presents.
* Chris Metzen has stated that Thrall just plain isn't into human women and married an Orcish woman.
* Chris Metzen — meaning the very ship he so despised was crafted from his material in the first place. One wonders how he didn't notice it earlier...
* Chris Metzen said he's not sure if that's true or not that left no body to bury.
* Chris Moneymaker. His ancestors were apparently responsible for minting gold and silver coins in Germany, and Americanized their name when they immigrated.
* Chris Morgan is infamous for a video of him ranting at customers and female workers in a Bagel Shop about how women on dating sites rejected him because of his

height of 5'. The video ended with a customer tackling him and pulling his shirt over his head after Chris challenged another customer to a fight. The video caused him to receive much backlash and mockery across the internet. Chris used his publicity to sign a deal offered to him to fight other internet celebrities and even train with UFC fighters to prepare. You could say this uniquely made Chris transition from a heel in the original bagel shop video and for all the internet into an actual heel within the world of professional fighting.
* Chris Moriarty's books have any sort of identifying pronouns in either the endorsement blurbs or the author bio. She has confirmed that that omission, along with the ambiguous first name, was a deliberate decision by the editors.
* Chris Morris for talking out of their colons. And that's not even taking into account the pranks he was responsible for back when he was a humble DJ for Radio One.
* Chris Morris is known for the lengths he will go to to achieve his effects and his sheer guts and bravery (even memorably mocking drug dealers to their faces). His agent has commented that she doesn't tell Chris what his fee will be for any one programme...because he's likely to negotiate it away to pay for extra filming.
* Chris Morris, who keeps up his Dumbass DJ schtick even when broadcasting from a war zone.
* Chris NEO characters, skits and special effects have been retired — and more focus on the games themselves.
* Chris Niosi, a voice actor and animator, has mentioned in several videos that he has Asperger syndrome, having been diagnosed at a young age.
* Chris' original plan for Issue 9 involved Punchy and Layla Flaaffy having sex in the handicapped stall of the women's bathroom at the
* Chris Parnell's "Merv the Perv" (who also had a brother played by Johnny Knoxville named "Irv the Perv")
* Chris Parnell was originally considered for Brick Tamland before being cast as Garth.
* Chris Patton even when he was shown as a child. The audio commentary shows that they used a mixture of Patton speaking higher and editing. The Japanese version used a voice actress.
* Chris Patton, gay American voice actor known for his roles in English dubbed anime.
* Chris Pine has a variety of nicknames that include (but are not limited to) Captain Fine, Berkeley Nopapz, and most hilariously, Princess Whitelaw.
* Chris Pine. He's one of the few young actors who doesn't use social media despite being fairly outgoing and congenial.
* Chris Pine, who played his father George towards the beginning, looked so much alike that according to Abrams, some viewers mistakenly believed Pine played both characters.
* Chris Pratt and has maintained that physique since, even when he went back to playing Andy.
* Chris Pratt, and in addition sharing a little of his day-to-day hobbies from his farm life.
* Chris Pratt character to a Children's Hospital in the winner's city (Boston, for New England). Despite the Patriots winning, Evans and Pratt both visited hospitals in both cities.
* Chris Pratt does his own singing and guitar playing as Andy Dwyer on
* Chris Pratt; he had to be reminded that they would add sound effects in post-production before he realized he was making "pew-pew" noises for his prop pistols.
* Chris Pratt. In addition to being nine inches taller, Andy's about twice as broad as she is. It's best shown when he tries to protect her from a bee swarm and is able to cover most of her upper body with his jumper, while her head still only barely reaches the bottom of his neck.
* Chris promotes Chris McLean Instant Coffee during the episode introduction speech in "
* Chris Ramirez, aka Kamen Rider Sting, comes from a long line of Marines and would've been one himself if he didn't get a medical discharge for asthma. He jumps

at the chance to (he believes) protect US citizens as a Kamen Rider, and is the only one of those tricked into serving the bad guys to realize he was on the wrong side and defect to the good guys.
* Chris Ray Gun. He then tries to figure out what happened before he got amnesia, and immediately finds a YouTube video by Zarna Joshi, which becomes the topic of that Episode as Chris gives every criticism he has of that video. When the video ends, Chris regrets wasting his time watching it, and promptly builds a time machine out of his swivel chair, intending to use it to go back in time and prevent himself from ever watching it - and it is revealed that his crash at the start of the video was the result of him time travelling back to the past at the speed of light.
* Chris Ray Gun in his videos is for one of his YouTube friends to cameo as the voice of his evil llama toy, Paul.
* Chris Ray Gun's video on Biden winning the 2020 election - Chris recycled the script from his video when Trump won, to demonstrate how he was not siding with either candidate.
* Chris Rea is best known as a blues-rock artist and for his slide guitar playing, but his biggest American hit was his debut single "Fool (If You Think It's Over)", a keyboard-based soft rock song which is also the only song he's released that he doesn't play guitar on.
* Chris Redfield, Jill Valentine, and Barry Burton were founding members of the organization.
* Chris Redfield, meanwhile, is stated to be former U.S Air Force, where he served as a pilot. However, background material from the first game also states that he served as a "marksman", which would be under the purview of a dedicated ground-service branch such as the Air Force Pararescue service, and it would be extremely unusual for someone to have combat experience as such while also serving as a fixed-wing pilot. Chris is also stated to have experience flying VTOL's, which during the era that Chris served would have only consisted of the Harrier Jump Jet, which were exclusive to the Marines.
* Chris Rice parodied the concept of moral substitutes in his "Cartoon Song." He stopped playing it live in 2004 because too many people were
* Chris Rock and lack of good roles. Has done stand-up ever since, mainly focusing on racial differences and relationships.
* Chris Rock bit in which he claims "if you haven't contemplated murder, you ain't been in love", then cites the various preparations that one might make for said murder, including, "if you haven't bought a rug to roll their ass up in."
* Chris Rock has a bit about the hypocrisy of women in clubs dancing to songs that are sexist, and that if you point it out to them, they'll go to impossible lengths to justify it. Pointing out the artist's use of words like "bitch" or "ho" elicits the response "He ain't talkin' bout me!" He continues saying that even if it were bizarrely specific, they'd still deny it:
* Chris Rock in black comedy by taking on stereotypical "terrible black comedian" characters in his shows and books.
* Chris Rock, in which he plays a guy who runs for President. The challenger runs an ad saying, "This is what will happen if Mays Gilliam [Chris Rock's character] is elected President," then showing the White House getting blown up.
* Chris Rock — Rock's three out of five albums have great comedy, which are equally as excellent as his stand-up.
* Chris Rock of the roast and acts annoyed at the comedians making fun of their fellow celebrities.
* Chris Rock points out, he was the only one in the cast without any distinct personality. In one interview, Schulz admitted that he really didn't know what to do with Franklin, since he had no experience with black children. Amusingly, cartoonists of Schulz's generation were not taught how to draw black characters without making them look like grotesque stereotypes, so for Franklin, Schulz just drew a "white" kid and then gave him curly black hair and lines across his face to symbolize dark skin.
* Chris Rock said the same thing, asking, "What's sexual harassment, when an ugly

guy wants some?"
* Chris Rock's division of North Americans of color into "black people" and "niggas".
* Chris Rock through a filter of automatically-presumed prejudice, even when it made no sense whatsoever. For instance, he was the host of a public-access cable TV show in a 15-minute slot, but claimed a racist conspiracy kept him from having a full half-hour, and he believed racism was the reason black jellybeans tasted so awful. He also thought "Black History Month" was in February because that was the shortest month:
* Chris Rock used a variant set-up, which was 'For $300 I'll do anything you want', to which he responds 'Bitch, paint my house'.
* Chris Rock, who is still recovering from an accident that killed his friend and left Tracy in a coma for weeks.
* Chris Rock with remarks to this effect about the Man, who personifies institutionalized racism.
* Chris Rock would prove to be one of the most critically and popularly received stand-up specials in history, netted him two Emmy awards, and put him back on Hollywood's radar. HBO would give him his own show the following year and Rock would also get to star in several movies over the next few decades, cementing him as one of the most popular comedians of all time.
* Chris runs off to live with a tribe in the jungle. When the family arrives to get him back Peter learns that his $37 makes him the richest man in the village and he begins giving out tiny bribes for everything, including the natives acting out
* Chris Sabat also had roles in other shows he's voice directed, such as
* Chris Sabin and Jay Lethal gave Petey Williams a laxative before one of his matches when
* Chris Sanders had multiple roles. Jeffrey Katzenburg, later co-founder of Dreamworks, headed the division at its peak.
* Chris Sanders has him and co-director/co-writer Dean DeBlois appearing in a blink-and-you'll-miss-it cameo as two tourists running past Cobra Bubbles after being scared by Stitch angered by camera flashes at Lahui Beach.
* Chris Savino) but also for Nickelodeon. Unfortunately, this status has been irreparably destroyed in light of the allegations of sexual harassment that have been levied at him. He has since been fired, and is now a pariah within the industry.
* Chris Savino two years later with new stories, pilot ideas, published books, and a comic strip. Time will if he ever gets another chance in the animation industry.
* Chris Schenkel at the 1958 NFL Championship Game between the Baltimore Colts and New York Giants, dubbed "The Greatest Game Ever Played".
* Chris' section, you're bombarded with swarms of Lycans and your weapons only have a limited amount of ammo to take care of them without the high possibility of getting cornered. It's far worse on harder difficulties, due to the Lycans' increased health.
* Chris Stapleton had been a popular songwriter for many years, but didn't have much success as a singer until he left two other bands: The Steeldrivers and The Jompson Brothers.
* Chris Stapleton: "Say the word and I'll be there for you / Baby, I will be your parachute"
* Chris Stuckmann, American film critic and YouTuber, came out as pansexual in 2021.
* Chris Stuckmann message that "it wasn't made for you" and was made only for women.
* Chris Sullivan, the off-Broadway Hermes, was the one behind the "that ain't easy walking, jack" line in the "Wait For Me" intro. He texted the idea to Anais Mitchell and she wasn't convinced until he sent her audio of him saying the line, and when he left the role of Hermes he gave her permission to keep it.
* Chrissy Blake Thorpe was a little kid in the late 70s, was gone for 8 years, returned as a full adult. One of the better cases at least.
* Chrissy Steltz got a prostetic face (well, eyes and nose). She previously wore a

sleeping mask when she went out.
* Chris's zit. A little different from others in that it turns out to be sentient...and evil.
* Chris' talking pimple forces him to rub grease on himself to make more pimples. One of them says "Where the white heads at?"
* Christ and St John have sometimes been seen this way, e.g. in the poem 'Whom Jesus Loved'.
* ChristCenteredGamer.com is also a video game site that reviews games in a Christian viewpoint, but is more rational than Family Friendly Gaming and also takes a secular viewpoint for its reviews.
* Christ Clone Trilogy, "life completion clinics" become commonplace. In-story, they are noted as having a preternatural tendency to know when someone is going through a difficult, depressing time, and sending them bright and cheery brochures advertising their services (this being explained by the power of the Antichrist, who set them up).
* Christ Clone Trilogy successfully deceives the world by harnessing humanity's outrage to God performing atrocities all for some apparent power trip he gets out of making God sad for having to damn people to eternal damnation. Even early in the series God kills or torments millions of people in various horrific supernatural ways indiscriminately, including newborn babies and children, for no readily apparent reason. The first thing He does is detonate all the nuclear weapons in Russia in retaliation for Russia occupying Israel. And with Christianity being true, that means that all those people that were killed are now in Hell suffering for eternity. The only excuse given: "Oh well, they had a choice. God feels really bad about it, but His hand was forced. In fact He's the real victim here."
* Chris tells us that the only thing that can distract the cops from seeing a black kid in a car is
* Christendom. America collapsed into anarchy, but the fundamentalist Christian nation of New Jerusalem eventually arose on the East Coast and took back the rest of the country. After a series of wars, it went on to 'reclaim' parts of Australia, India, China, and northern Europe, as well as all of Egypt and Japan.
* Christ even provides the literal interpretation of the Parable of the Sower.
* "Christgrinding Avenue" features the line "I'm on my way. Destination, Hell. By the power of will, I shall complete the Devil's work."
* Christ had the ability to perform spells at random to help save the world, but every one of her miracle spells left open the possibility that they had happened by chance.
* Chris Thorndyke became this in the second series (third season outside of Japan) of
* Chris Thorndyke's aged up and smarted up version pretty much fills this role.
* Christian. A major factor in this has been the advent of internet streaming, as it means wrestlers and companies no longer need TV pay-per-views to gain exposure.
* Christian (a name he had not used in over a decade). The thought that he would ever wrestle again, let alone outside of WWE was shocking to many.
* Christian and Duncan are both older than the toddlers and probably not teens, although they could be anywhere between five and twelve, and it's hard to tell who's the oldest of the two or if they're twins.
* Christian and family games were also produced on shoestring budgets as many of them utilized pre-rendered graphics and in-program character models and props.
* Christian and yet amazingly, this wasn't even hinted at during the match. Christian never turned and everyone was rather surprised and happy. When Edge retired days later to a legit injury, it meant that instead of having Edge's last match be a loss due to the betrayal of his best friend, it meant he went out and retired as the champ.
* Christian Bale, Bale vowed to not try anything so extreme ever again. Let's just say Bale's refined Dyeing For Your Art to an art form itself.
* Christian Bale, he'd developed a reputation as someone difficult to work with but seems to be easing up on more recent movies as behind-the-scenes photos and videos of him breaking character and goofing off occasionally pop up on the internet.

* Christian Bale. In the leaked audiotape, Bale chews out the director of photography for changing the lighting levels while he was in the midst of performing a scene, and subsequently tells director Joseph "McG" McGinty that he will not have it happen again. Of course, Christian Bale would later go on to apologize for this rant sometime later of his own volition, and most of the cast and crew's reaction when asked about it was "You don't change the lighting during a scene".
* Christian Bale likewise lost his Welsh accent at a young age and speaks in an English one nowadays.
* Christian Bale's permanent scowl and emotionless deadpan voice his real face intriguingly meta, really.
* Christian Bale visited the victims unannounced on his own money and time.
* Christian Bale, whose father finds him masturbating over a picture of two men kissing (and promptly kicks him out of the house). It's heart-wrenching.
* Christian both spent years making their names on the independent circuit in their native countries prior to their WWF/E television debuts, upon which said surnames were scrapped.
* Christian Broadcasting Network (CBN), a slickly-produced alternative to secular soap operas.
