* Dieci Giorni Senza Mamma was released people were fuming about how outdated, clichè and sexist the plot was. That didn't stop the movie from being a huge hit and getting a sequel which, thankfully, was centered on a very different conflict.
* died (2016). Since Martin ("Let it Snow! Let it Snow! Let it Snow!"), Brown ("Santa Claus Go Straight to the Ghetto"), Kitt ("Santa Baby") and Michael ("Last Christmas") all recorded popular Christmas songs, there was added significance for them.
* died and had to be rushed to the hospital. Peter than goes to an abandoned building and lets loose to see just how strong he is. He wrecks the place and is shaking with fear over the amount of strength he has. He almost quits being Spider-Man because of it but realizes it is a good thing when it allows him to hold up a falling crane long enough for all the bystanders to get to safety. The story

actually doesn't show how Peter learned to control his strength (just that he'll learn over time). Also, one has to wonder how Spider-Man not even trying nearly killed someone and yet Uncle Ben's killer didn't die.
* died at age 14 while attempting to climb the spiked fence at his stepfather's parents' home. The poor kid slipped, fell on the sharp points of the grill, and as a result had both his intestines and his femoral artery pierced, dying the same day.
* died, badly, back in the Homelands, while he was trapped in frog form
* died by suicide. After her death, she was placed into a sack and thrown in a river.
* Died During Production, or forced to make do with replacements because the creator died before they were able to complete it.
* Died During Production, or forced to make do with replacements because the creator or one of the actors died.
* Died During Production or forced to make do with replacements because the creator or one of the actors died during the process.
* Died During Production: When the real-life death of a creator results in the cancellation or postponement of their work, or otherwise causes serious complications with its development.
* Died During Production: You fail to finish your series before you die.
* Die Delegation is a fake necrology to a reporter, who grew into UFO conspiracies, by showing his late footages.
* died from AIDS, Olivia starts speculating with Paula quite explicitly about what his sexual tastes were, dismaying Mark (who's still reeling from the revelation).
* died giving birth to their kits. Much later, he found love again when he met Millie.
* Died Happily Ever After: A dead character is seen as happy right as they drift off to the heavens.
* DIE DIE DIE!", which of course causes Bakugou to explode that he's always calm and rational.
* died in a freak airlock accident (off-screen, in between episodes)). G'Kar's tone indicates that he suspected foul play, but it's not confirmed.
* died in childbirth on Christmas Eve; he gave his mute son up for adoption and turned his back on the entire holiday. Naturally, events transpire to make him rethink his position.
* Died in Your Arms Tonight: Someone (usually a family member) cradles a person in their arms as they die.
* died laughing at one of his own jokes. That it wasn't even that great of a joke (he supposedly saw a donkey eating figs and said "Get him some wine to wash those down!") just makes it all the more poetic.
* died on camera. In the 1970s onward, this was replaced with slow motion footage of crash test dummies in collision tests; it drove home the point of how accidents happen without getting into the gore.
* died summarized it thusly: "If you're a bird, be an early bird, but if you're a worm, sleep late."
* Died/Survived: Jane Seymour and Catherine Parr, respectively. Jane was Queen for over a year before she died from puerperal fever, and Catherine only survived Henry for over a year before she too died from the same fever. It's even stranger when you realise that their children did not live to adulthood; Edward VI died in his teens, and it is generally agreed that Mary Seymour did not live past the age of two.
* died. This was, of course, a serious crime, and it was one reason his clan drove him out.
* die during or shortly after childbirth, safe surgery would be next to impossible, as would chemotherapy. It's not just medicine that depends heavily on antibiotics, either: most of modern agriculture depends on them, as well. Family size also is impacted, with an increased chance of children surviving to adulthood to carry on the family lineage (and thus less of a need to have a lot of them). So as bacteria evolve resistance to more and more antibiotics, civilization and society as we know

it become more and more jeopardized.
* died when a Viking stabbed him up the arse while Edmund was using the toilet. What a shitty way to kill someone.
* died when Yar "sacrifices" her life to restore the timeline - but later it's learned she was taken prisoner and gave birth to Sela.
* died, which should be impossible for elves. And his own uniqueness is the reason he was capable of making things like Silmarils.
* Die Entführung aus dem Serail. Bretzner even public protested against Mozart and Johann Gottlieb Stephanie using his libretto and making changes to it.
* Die. Every living thing in the galaxy with a backbone committed suicide, including the Thrintun themselves, and multi-cellular life took billions of years to evolve back into existence again.
* Die Fantastischen Vier's three best remembered songs are also the ones that were really huge: "Sie ist weg", "Die da!?!" and "MfG – Mit freundlichen Grüßen". Their arguably fourth most popular song, however, is "Tag am Meer", which only reached #67, whereas various other major and moderate hits such as "Troy", "Ernten was wir säen" and "Einfach sein" are pretty much forgotten.
* Die Fernschule ("Long-Distance Teaching Device") is used for education.
* Die Feuerzangenbowle, is about Dr. Johannes Pfeiffer, a famous young author from Berlin who regrets having had private lessons and never attended school because he missed out on the fun that's school pranks. Next we see him in a school in the small town of Babenberg as the student Johann Pfeiffer, pulling off increasingly elaborate pranks on the teachers.
* Die Fledermaus, though a Viennese light opera, has a ballet in the middle of its second act that seems to be usually cut, even though it's one character's excuse for being there.
* Die Fledermaus ("Unworthy governor"), and thinks he's being insulted until Frosch clarifies the statement.
* Die Fledermaus with the trinket, which she later shows her husband to let him know she knows he's been misbehaving.
* Die for Our Ship: A canonically-existing character is demonized in or written out of fanon in order to make way for the fans' preferred pairings.
* Die for Our Ship: Basically when fans insist upon a certain pairing, no matter how idiotic or nonsensical it really is, and hate a particular character for "being in the way".
* Die for Our Ship: Fans bash a character just because they interfered with their preferred shipping.
* Die for Our Ship: Fans bash a character solely because they want their love interest to be with someone else.
* Die for Our Ship: Fans bash a character solely for interfering with their preferred pairing.
* Die for Our Ship: Fans bash characters solely for interfering with their preferred shipping.
* Die for Our Ship, they sometimes pair the musician and the fencer together, having them bond over their failures with Marinette and Adrien respectively.
* Die Frau ohne Schatten; if she does not gain one, she will be reclaimed by her father, and the Emperor turned to stone.
* Die Frau ohne Schatten (The Woman Without a Shadow): The daughter of Keikobad, king of the spirits, has married the Emperor, a mortal man, but has to gain a shadow (that is, the ability to bear children) or the Emperor will turn to stone. She tries to con a human woman to sell her shadow, but in the end, although the Emperor is turning to stone before her eyes, she will not take the woman's shadow, having seen what misery this will bring the woman and her husband. She then gets her own shadow and the Emperor turns back to flesh and blood.
* Die Fugger II, a simulation game based on medieval European commerce, you were expected to take a spouse and sire a child. At certain points in the game, your character would die, and if you had an heir, the game would continue; otherwise, it would end.
* Die galaktische Gurke, had a crazy android named Adlof Hilter, who thought he was

the Führer. Since in the 70s, Rhodan was too often compared to Hitler by leftist critics (there are enough reasons pro and contra this opinion), Rhodan fans fumed.
* diegetic menus to interact with in the game world. As such, you don't get to pause to check your inventory mid-combat, or the like.
* Diegetic Soundtrack Usage: The theme song is played, whistled or hummed in-universe.
* Diegetic Soundtrack Usage: The theme tune is sung/played/hummed/whistled/etc in an episode.
* Diegetic Soundtrack Usage: The work features an in-universe playing/whistling/humming/etc. of a song from the soundtrack.
* Diegetic Switch: A song is played in-universe, then it stops but the song keeps playing out-of-universe.
* Diegetic Switch: Music switches from being diegetic to being a non-diegetic soundtrack, versus music that the audience assumed to be non-diegetic being revealed to be diegetic.
* Diego Armando does it to his cup of coffee at the end of the fourth case of
* Diego Hargreeves is a skilled fighter, a witty person, and determined to save people and fight crime. He's desperately clinging to the idea of being a hero so that his childhood doesn't feel wasted.
* Diego is a vicious and murderous vigilante in the comics who debases his
* Diego went from being one of the leads to pretty much being a supporting character in
* Diego y Glot: The first Chilean animated series developed with traditional animation.
* Die." Guinan performs a more direct test, stabbing him in the hand with a fork and saying "Seems human enough to me." when he screams in pain.
* Die Hard 2 advises Dick Thornburg to use stronger mouthwash after he gets too close to her a few times.
* Die Hard 2, after Colonel Stuart takes control of Dulles International Airport's tower controls, Lorenzo has his SWAT team escort airport engineer Leslie Barnes to the under-construction Annex Skywalk to repair the satellite dish and reestablish communication with the planes. Just before they reach the antenna dish, the SWAT escorts are ambushed and killed by a team of Stuart's henchmen who are disguised as painters and mechanics (Barnes manages to take cover, though he gets a nasty cut on his arm from shards of flying glass). A deleted scene called "Down the Rabbit Hole" - which would have fallen in between the scene where Baker and Thompson kill the church custodian, and the scene where Miller, Cochrane and Garber are rendezvousing in a bar at the terminal - shows two of the Skywalk henchmen - O'Reilly and Sheldon - approach two painters unloading paint cans from their van. O'Reilly shoots both of them, then they load their bodies into the back of the vehicle and lock the doors.
* Die Hard 2 and Esperanza refer to it as "Foxtrot Michael 1", despite the military alphabet using the shortened name Mike for the letter M.
* Die Hard 2 believes John McClane that Colonel Stuart and Major Grant are working together only after McClane empties a submachine gun (the same kind used by the soldiers in their attack against the terrorists) full of blanks at him. Lorenzo then calls in the cavalry.
* Die Hard 2, Colonel Stewart's men kill the SWAT team sent to protect Chief Controller Barnes when he goes to activate the antenna array in the Terminal Annex. Only McClane is able to kill all of them to prevent them from killing Barnes, too.
* Die Hard 2: Die Harder is en-route by plane. Unfortunately by then it's too late and the terrorists have seized control of the airport.
* Die Hard 2: Die Harder who are up to no good, and does everything in his power to foil them, which would have worked without a hitch if the cops in the airport weren't such belligerent, incompetent assholes.
* Die Hard 2 doesn't hurt either as something she legitimately earned.
* Die Hard 2 had a plane crash and explode in a fireball... despite one of the reasons it tried to land in the first place was because it was running out of fuel.

However, a nearly empty tank is actually more dangerous than a full one, as it's filled with fumes.
* Die Hard 2 Her timing was just a little off as this is the only film in the franchise where John and Holly are happily married.
* Die Hard 2, Holly McClane, worried about why her plane hasn't landed (due to the airport being forcibly shut down by Colonel Stuart) calls her husband's beeper on the airphone... while McClane is sneaking up to the church Stuart is using as a base. His beeper goes off, and he hurries to silence it, but Baker has heard his beeper and attacks him. After a fight, McClane defeats Baker by stabbing an icicle into his eye.
* Die Hard 2 is more straight forward as Stuart takes over the computer systems for Dulles Airport, risking thousands of passengers in the sky to free a South American drug lord. He gets points for ensuring that the anti-terrorist squad the Army sends is is backed with his own men to con the authorities to escape.
* Die Hard 2, John McClane is cornered in the cockpit of a cargo plane by terrorists who start tossing in grenades (with absurdly long fuses). Acting quickly, he straps himself into the pilot's seat and activates the ejector seat. It should be noted cargo planes generally don't have ejector seats.
* Die Hard 2) manages to broadcast the fact that there is a terrorist threat (which the Dulles authorities have managed to keep quiet about so far) on national television (purely for personal glory — by the time Holly knocks him out with a taser, he's halfway into delivering a speech through the phone to his TV station that if this is his final broadcast, that he hopes he'll be remembered as a hero or something), leading to a massive riot at the airport which gridlocks the police's mobilization and forces John to face the escaping terrorists on his own. It also nearly panics the plane's passengers, who are also watching a TV broadcast.
* Die Hard 2 on a live broadcast that terrorists have seized control of Dulles Airport. In reality, the terrorists have simply hacked into the runway wiring, leaving them unlit. This news triggers a panic stampede in the terminal itself.
* Die Hard 2 similarly got debated over. Largely instigated because of how a good number of people saw it as little more than rehash of the first movie in a change of location.
* Die Hard 2, supposedly set at Washington Dulles International Airport, was actually filmed in several different locations in Colorado, Michigan, and California. One scene has McClane in the airport talking on the phone to his wife who is in an approaching plane, and "Pacific Bell" can clearly be read on the payphone he's using.
* Die Hard 2, the names of Stuart's soldiers only appear in the script, and only one, Cochrane (the one McClane defeats in the baggage conveyer belt scene) is mentioned by name. According to the script, their names (by order of appearance) are: Baker, Thompson (the fake airport electricians who kill the church custodian); Cochrane, Garber, and Miller (the three soldiers in the airport bar): Burke (the techie with the face shield who is seen using a torch to open a control box); Kahn (listening in on tower communications). The four shooters in the Annex Skywalk shootout are O'Reilly (posing as a painter, calls the officers "sitting ducks" before using his pistol to shoot the SWAT officer on point in the head; also the first to be killed by McClane), Sheldon (the soldier with a perch on the scaffolding), Shockley (the one soldier taken out by the SWAT team), and Mulkey (the one who McClane empties a full magazine into at close range).
* Die Hard 2, the Special Forces unit called in to deal with the hostage situation turns out to be working with the terrorists.
* Die Hard 2, the terrorists are renegade U.S. troops, the military troops sent to take out the terrorists are in cahoots with them, and for most of the movie the airport security guards actively oppose McClane's heroic efforts.
* Die Hard 2. This is lampshaded by John wondering to himself, "How can the same shit happen to the same guy twice?"
* Die Hard 2, when an overzealous reporter tries to question Colonel Stewart, his crony covers the camera and says "No pictures, you pinko bitch."
* Die Hard 2, when Colonel Stuart declares that the airport's treatment of his

demands calls for a "lesson" (in this, crashing a plane), McClane asks if wiping out the five man SWAT team that were escorting Barnes to the Annex Skywalk isn't lesson enough.
* Die Hard 2 who was a former US ally in the Cold War and is now been arrested and put on trial. Their ruthlessness and competence are shown more than once, especially in how they slaughter the police SWAT team.
* Die Hard about "making fists with your toes" later becomes really plot relevant as it triggers the entire glass shooting scene.
* Die Hard: After John McClane calls the Los Angeles Police Department for help, sergeant Al Powell stops by the building to check out his claim. One of the terrorists pretends to be a security guard and allays his suspicions, so Powell starts to leave. McClane has to throw a body through a window so it drops on the front of the police car to alert Powell to the fact that something is seriously wrong.
* Die Hard. After noticing that John McClane is walking around with no shoes on (long story), he orders his men to "Shoot the glass" in a firefight, forcing John to flee across broken glass on bare feet. He spends the rest of the film limping.
* Die Hard. After the initial assault on the front doors fails, SWAT sends in "the car", an APC that immediately gets stuck on the railings of the front steps, then hit by an RPG. Then by another one. So much for full frontal assault on a fortified position.
* Die Hard also sends the plot into other directions by being proactive and antagonizing Gruber. Their battle of wits, both men acting and reacting to the other, sets the general cat-and-mouse tone of the movie, with both taking turns in either role.
* Die Hard, and usually with something that'll get him killed if it fails, he's always spurring this kind of phrase.
* Die Hard. As a result though, the first Die Hard easily has the most gripping action scenes of the series, with the fight scenes needing to be drawn out longer and more action packed due to the shortage of disposable mooks.
* Die Hard, a security guard conveniently mentions that there's nobody in the building except the folks partying on Holly's floor. Good to know John can blow up elevator shafts without taking out any unsuspecting night-shift janitors or overnight painters and repair crews. This is partly justified by the fact that the movie takes place on Christmas, so it's perfectly plausible that all those people took the night off.
* Die Hard", as he calls it (presumably Stockholm has copyrighted itself and wouldn't give the rights). The newsreader cuts into clarify that Helsinki is in Sweden, and is quickly corrected — "Finland."
* Die Hard at first sight, but he doubles as this. He kills one man, gains a radio, a machine gun, and a whole LOT of information about the guys he's fighting. Uses the radio to call for help, uses the machine gun and the next guy he kills to get police attention, and spoon-feeds them everything he found out.
* Die Hard, a TV reporter goes to John McClane's house and talks to his children. Hans Gruber sees that the children match the photos in Holly's office, and realized that Holly was John's wife, giving him a valuable hostage.
* Die Hard because Hans Gruber knows the FBI's standard responses to a hostage situation, and was counting on them to take the case from the LAPD and follow their playbook, helping him crack a safe and cover his escape.
* Die Hard, being fully willing to put their entire plan at risk for the sake of putting a bullet in the head of his brother's killer.
* Die Hard censorship of John McClane's immortal line "yippee-ki-yay, motherfucker".
* Die Hard comes back from trying to kill McClane, and immediately starts smashing the scenery. McClane's wife, of course, takes it to mean her husband is still alive, because only he could make someone that pissed off.
* Die Hard destroy his marriage and strain his relationship with his kids, pushing him into cynicism. He only plays the part of the hero because there's no one else to do it. That being said he still fits the trope pretty well.

* Die Hard, excessive steam shows in the boiler room under the roof, added for suspense.
* Die Hard fanboy, Jake geeks out over the chance to try and live the film out for real.
* die-hard fans will buy anything with his name on it, regardless of quality or safety.
* Die Hard had become so obsessed with avenging his brother that he was becoming an unmanagable liability to Gruber's plans.
* Die Hard had this as the main conflict. Between the levels still under construction and the power cut...
* Die Hard Hans gave a name from the directory, Bill Clay. John still somehow sees through it — a deleted scene shows he recognized the watch Hans was wearing, because it matched some of the other terrorists.
* Die Hard: Hans Gruber claims to be a terrorist, but is later revealed to be after 600 million dollars worth of bearer bonds.
* Die Hard Hans Gruber from his wife's outstretched arm causing him to plummet to his death.
* Die Hard, Hans Gruber points out that he's wearing an expensive suit from the same tailor as the one worn by the Japanese business executive.
* Die Hard: Hans Gruber pretends to be a typical American when he runs into John McLane on the roof of the building, in an attempt to get back to his gun or find some way to call his troops to kill John.
* Die Hard, Hans Gruber quotes the line about Alexander after taking over the Nakatomi building, implying that was his favourite part of the plan.
* Die Hard has a brother who is also involved in the scheme. Said brother spends the remainder of the movie doing anything he can to kill McClane, even when it works to the detriment of the plan.
* Die Hard has a callback with another Agent Johnson, and McClane reacts with alarm at the name.
* Die Hard has been on the front lines of five (with a sixth planned) major heists/ hostage situations/terrorist attacks.
* Die Hard has one of the best in Hollywood action movie history: Invade the Nakatomi building and take hostages under the guise of being terrorists and then pull Mr. Takagi aside to make him divulge the access codes to the vault with the $640 million bearer bonds inside. If he doesn't cooperate, kill him and break into the vault yourself both through computer savvy, careful drilling and manipulating the authorities through their own standard operating procedures to make that possible. When the robbery is finished, put the hostages on the roof, then blow it up to fake the gang's deaths and get away in an ambulance you took along in the truck. Unfortunately, Gruber didn't count on John McClane interfering.
* Die Hard, he does this to a guy by putting him in a choke-hold and falling down the stairs with him. Missing the usual "walnut-snapping" sound effect.
* Die Hard. He only realises that he's locked in the building with a gang of terrorists after he sees a news report on the limo's TV.
* Die Hard, he's able to brush off falling through several stories of glass despite pushing 60.
* Die Hard he's divorced, and it's his relationship with his daughter that needs patching up.
* Die HardHis sidekicks in each movie, none of whom wanted to get involved, are more traditional Action Survivors. Officer Al Powell was picking up Twinkies, Zeus Carver was just looking after his electronics shop, and the Justin Long guy was a dweeby hacker.
* Die Hard. Holly using her maiden name, and flipping down the family photo? That delays Hans Gruber recognizing who John is. The laughing couple that bursts into Holly's office for sex, only to go to the next office when they find John and Holly in there? When the woman is dragged out of the next office moments later, screaming and topless, the terrorists manhandling her are distracted just long enough for John to make his initial escape to the stairwell.
* Die Hard in "Brian's Got A Brand New Bag" and "Brian Writes a Bestseller",

respectively.
* Die Hard. In the third, a fed makes an immediate connection between the Villain Du Jour and "the thing in LA". In the fourth... he's John McClane, the Irish flatfoot who throws cars at helicopters when he runs out of bullets.
* Die Hard: In-universe. When Hans calls the police to give his fake demands, he asks for a variety of imprisoned terrorists to be released, ending with members of the group "Asian Dawn."
* Die Hard is a slightly lighter example than most other "classic" action movies, since it depicts an emotionally vulnerable hero who's really more concerned with saving his marriage than being a badass. Nonetheless, the film has enough moments of male pride (particularly from the villains) to still ultimately fit this trope.
* Die Hard is "Met Likhyot", which can be translated as "Dying to Live" or "Dead Desperate to Live".
* Die Hard is thrown from the top of a building and lands right in the windshield of a cop car, he was already dead, and McClane aimed him at Powell's car to get his attention.
* Die Hard is usually a thief disguising his actions by acting like a terrorist.
* Die Hard; it makes it much easier for police officers and other people to quickly and easily distinguish between fake and real guns.
* Die Hard job. When terrorists are confidently moving chess pieces behind the scenes, he knows that all he has to do is look for something sensitive and start whaling on it.
* Die Hard, John McClane does this and doesn't hurt himself, even though the rest of the movie realistically depicted him getting his feet horribly mangled due to the broken glass everywhere he had to walk on.
* Die Hard, John McClane is talking to Al on "getting help from the guy upstairs." It then hits John that Hans was near the roof when they ran into each other, and he starts to wonder what Hans was doing up there.
* Die Hard, John McClane pretends to surrender to the thieves, but the audience can see that he has a gun taped between his shoulder blades. Sure enough, as soon as the thieves relax because McClane has his hands up and empty, McClane grabs the gun and opens fire.
* Die Hard, John McClane tries to alert the hostages that they're standing on the roof which is rigged with explosives and tries to get them to run back downstairs so that the police can reach them. He opens fire to scare them into running down when they can't hear his verbal orders, making an FBI helicopter mistake him for a terrorist and start firing at him. McClane remarks, "I'M ON YOUR SIDE, YOU ASSHOLES!"
* Die Hard, John McClane watches as a young lady in the airport runs over to a man who is ostensibly her boyfriend, jumps up, wraps herself around him, and kisses him passionately.
* Die Hard: Just ask John McClane what he did to Hans Gruber, or better yet, ask his brother Simon.
* Die Hard manages to save himself by jumping off it via a fire hose he uses as a makeshift rope. One of the camera cuts shows the building for a several mile long distance and the very visible explosion coming from it.
* Die Hard — Action movies starring Bruce Willis. 5 films since 1988.
* Die Hard, NYPD cop John McClane has a pronounced reaction when Hans Gruber's men blow up a police RV and yells at Hans that he's "made [his] point". Hans nonchalantly says he'll take letting them fall back "under consideration".
* Die Hard of other bad things, happens to poor McClane when he's trying to save the hostages who have been herded onto a roof rigged to explode. He begins firing into the air to scare them back down the stairs just as a police attack copter flies up, and they open fire on him believing him to be a terrorist.
* "Die Hard" on an X: Bad guys have taken over a place and taken everyone hostage. The hero is in the place, and must save the day by kicking the bad guys' asses.
* "Die Hard" on an X, the police force uses a remote-controlled drone to flush out the terrorists who have taken over a computer science lab. However, they almost immediately mistake the lone hero Nick for one of the bad guys and he spends

considerable time trying to avoid the drone.
* Die Hard on them operating in that matter so he can manipulate them into helping him open a super secure vault and then cover his escape.
* Die Hard pitch meeting, the Producer asks whether the tragic part of Powell mistakenly shooting a kid in the backstory is that a kid died or Powell "lost his cop mojo". After hearing that it's the latter, the Producer says "Interesting", and upon hearing that Powell's character arc involves him becoming able to kill people again, flatly says, "Well, good for him."
* Die Hard plays with it. Shortly after Hans and his crew take over, they're informed by Holly that one of the hostages is pregnant. Hans rolls his eyes until Holly clarifies that she's not due for a few weeks, but just needs something more comfortable to sit on. He's willing to oblige, to a point.
* Die Hard, sleazy reporter Dick Thornberg threatens to have the family nanny deported if she doesn't let him interview Holly and John McClane's children. The resultant interview outs Holly as John's wife to the terrorists, leading to potentially fatal consequences. When it is all over, Holly decks the guy.
* Die Hard's visit to the roof of Nakatomi Plaza earlier in the film, at which point he realizes that Hans was up to something funny. Sure enough, when he gets there, he finds that Hans is planning to blow up the roof with all of the hostages on it, along with the helicopters coming to rescue them.
* Die Hard that playbook and either respond with a specific countermeasure or integrate it into their plans.
* Die Hard, the cops (excepting Al Powell) are so stupid and gullible they become threats to McClane. Especially in the first and fourth movies.
* Die Hard The first movie actually gave it a justification, as Hans Gruber specifically targeted Nakatomi Plaza on Christmas Eve because the Christmas party being held that day made it that much easier to round everyone up and take them hostage.
* Die Hard, the LAPD and FBI are led to believe Hans Gruber and his men are terrorists, holding the Nakatomi Plaza building hostage in exchange for numerous terrorist prisoners being released, though the hero John McClane isn't fooled and immediately realises that they are up to something else when he hears their "demands". In reality, Hans is deliberately leading the FBI to believe this, as the FBI's protocols for dealing with a terrorist threat are exactly what he needs to rob the place, and get away with the cash.
* Die Hard. Then the cut back to Nakatomi Plaza shows quite clearly that they're talking out of their asses.
* Die Hard. The second one is really blatant — an entire five man SWAT team escorting Barnes to a satellite array is ambushed and killed by a team of Colonel Stuart's men who are disguised as painters. They only manage to kill one of the henchmen (Shockley) before all five are offed (one by O'Reilly, two each by Sheldon and Mulkey). That SWAT team can't take out four men armed with automatics, but McClane can with little more than a pistol.
* Die Hard, the symbol of the Nakatomi Corporation can be found everywhere inside the building, from tabletop imprints to light switches.
* Die Hard, the terrorists arrive in a truck labeled "Pacific Courier" which translates to "Bringer of Peace".
* Die Hard: The thieves infiltrate the building at dusk, but don't put their plan into action until it's fully dark.
* Die Hard thief. And since he's moving up to kidnapping, she should be more polite.
* Die Hard Trilogy 2. One bump, you get a warning. Two bumps, it explodes.
* Die Hard Trilogy 2: Viva Las Vegas from Hoover Dam before it detonates.
* Die Hard Trilogy, also did this, mixing up the gameplay types in its story mode.
* Die Hard was played as a comically over-the-top version of the sleazy, smarmy executive.
* Die Hard were released in July and June respectively. While neither seem to have been designed as Christmas movies, the plots of both take place in the build up to Christmas, and the first film in particular has a fair few festive reminders. Over

the years, they have become Christmas movies in the eyes of many.
* Die Hard. When armed terrorists crash the Nakatomi company Christmas party they interrupt a couple having sex in one of the offices and drag them out with the woman screaming and topless.
* Die Hard, when Hans Gruber is caught by John McClane, he tries to bluff his way out, acting like one of the hostages. When McClane says to stick with him to live, he asks Gruber if he's ever fired a gun. Gruber lies that he spent a weekend at a "Combat Ranch" whose guns shoot bullets of red paint.
* Die Hard when Hans is interrogating Takagi, who refuses to give up information, Theo says, "I told you," and Karl replies, "It's not over yet." After Hans kills Takagi, Karl hands Theo a bill.
* Die Hard, where he almost becomes superhuman and is able to hang off the wing of an F-22 Raptor while an elevated highway explodes around him.
* Die Hard with a miserable home life. Seriously, this is a man who has now single-handedly thwarted four major terrorist attacks on the country (well, only one was actually terrorism, the other three were robberies disguised as terrorist acts), but still McClane should seriously be invited to train Delta Force in urban combat and anti-terrorist tactics.
* Die Hard with a Vengeance: After being told that a bomb was in a garbage can by the phone booth, both Samuel L. Jackson and John McClane try to push people aside and then dive to the ground; when no one responds and no explosion happens, the terrorist's laughing reveals the joke.
* Die Hard with a Vengeance After John and Zeus escape, he realizes that the bottle is from the hotel where Simon is hiding.
* Die Hard with a Vengeance: an aspirin bottle that the villain jokingly hands to McClane earlier turns out to have an address on it of the hotel in Canada where he and his men are hiding out later.
* Die Hard with a Vengeance, and John dying from one of the bombs going off was just a bonus while doing the robbery, not a personal priority.
* Die Hard with a Vengeance appears to be Simon Gruber, Hans' brother, instigating bombings as revenge on McClane. It turns out Simon is actually using the bombings as a massive distraction for the police while he and his gang rob the Federal Reserve of billions of dollars in gold. Simon is being paid by Middle East businessmen to blow up the gold in a cargo ship and cripple the U.S. economy but instead blows up scrap metal and keeps the gold for himself.
* Die Hard with a Vengeance are mostly members of a former East German special forces unit specialising in infiltration and sabotage.
* Die Hard with a Vengeance, bomb squad technician Charlie Veiss says this to a bomb he's attempting to defuse:
* Die Hard with a Vengeance. Described as "an army without a country".
* Die Hard with a Vengeance, he realizes at the last second that the fake cop next to him has the same badge number as the real cop. After confirming his suspicion by nonchalantly asking whether any of the supposed cops knew last night's lottery drawing (none of them respond), it's enough for McClane to get the jump on them before they kill him.
* Die Hard with a Vengeance, in 2008) and is the subject of the '95 film's closing punchline, which seems to come out of nowhere and make for a somewhat confused ending if you are new to the franchise.
* Die Hard with a Vengeance is mostly across a single day, though it's unclear whether the opening and closing sequences are before\after this busy day.
* Die Hard with a Vengeance it's revealed that while Simon's in it for the money and he didn't like his brother, he still took the man's death personally:
* Die Hard with a Vengeance, John first hears Zeus's name when a local boy says "Hey, Zeus!" John consequently mistakes his name for Jesús, which sounds very similar. Zeus is angered and asks if he looks Mexican.
* Die Hard with a Vengeance, John McClane, interrupting Simon, the villain, as he's about to get intimate with his wife. The normally stoic woman suddenly gets very angry at McClane.
* Die Hard with a Vengeance, McClane flees the water gushing through the aqueduct

in a dump truck when the villains attempt to drown him.
* Die Hard with a Vengeance, McClane must stop a bomb by dialing "555 and the answer" to the riddle the villain just gave.
* Die Hard with a Vengeance, running into a band of under-aged looters alerts McClane that the villain's apparent plan is likely a distraction.
* Die Hard with a Vengeance sees McClane wearing a sandwich board with a racist slur on it and respond with violence. Only by Carver's intervention does McClane make it out of there alive.
* Die Hard with a Vengeance, since it's been established that all New York cops play the lottery. When no one knows, McClane realizes that they're all imposters.
* Die Hard with a Vengeance. The bad guys blow up a subway station, then disguise themselves as contractors there to clear debris and conduct repairs, while actually using their equipment to dig into the vault of a nearby bank.
* Die Hard with a Vengeance. The NYPD Captain is ordering his men to search the schools and challenges the FBI Agent not to pull a jurisdictional stunt. The FBI Agent has kids in one of the threatened schools, and he's more than happy to help.
* Die Hard with a Vengeance, there is an offhand reports about thirteen dump trucks being stolen the night before. Later in the film, it is revealed that these trucks are being used by the villains to cart off the gold they have stolen.
* Die Hard with a Vengeance, the terrorists claim they want John McClane to go to Yankee Stadium to collect a clue to stop the bomb that will blow up a school. In truth, there is a sniper at the stadium who will shoot him if he shows up. (Zeus appears at the stadium, but given the orders were to kill both, he lives).
* Die Hard with a Vengeance (they're all Germans and Slavs, with a token Hungarian as second-in-command), John McClane uses this description to convince Zeus to help him. McClane lies and tells Zeus that Simon put a bomb in Harlem (he actually put it in Chinatown), saying, "This guy doesn't care about skin color even if you do.".
* Die Hard with a Vengeance to a bomb on a ship and leaves them to die, instead of shooting them and blowing up the ship after.
* Die Hard with a Vengeance used Simon Says in his games. His name is Simon, so he has a lot of fun with it.
* Die Hard with a Vengeance, was the only one in the series to suggest McClane has achieved any level of fame from his actions, with various people scoffing at his media appearances. In real life, the passengers on United 93 are lauded as heroes, and they didn't survive their counterattack on their hijackers. If McClane was a real person, his face would have been added to the U.S. flag by now...
* Die Hard with a Vengeance when a group of office workers begins eating popcorn while staring at the giant smoking crater in the middle of Wall Street.
* Die Hard with a Vengeance when Simon is giving a victory speech to his troops, almost all of whom are soldiers turned mercenaries:
* Die Hard with a Vengeance: When the bad guys are celebrating the successful theft, they're toasting to several things and then one says along the lines of "auf gefallen kameraden," which translates something like "for fallen comrades." There is a moment of silence and then they all toast in honor of their lost brethren.
* Die Hard with a Vengeance, who were trained to speak fluent English for infiltration operations and were disbanded after the Soviet Union fell.
* Die Hard with a Vengeance with Mathias and Katya Targo. Freelance terrorists who work by written contract.
* Die Hard with a Vengeance. Zeus saves John from being killed in Harlem, but insists he did it for this reason.
* Die Hard with the two coming closer together at the end of their devastating experience. However, this trope is played morosely straight in the fourth film, where they're finally divorced.
* DIE has a game by the same name which has players first create personas, who then create characters using Sol's homebrew rules to play a game within the game.
* die. His desire to find something badass enough to kill him drives him to declare war on the flimsiest of pretexts, and his style when it comes to civic and administrative matters can be charitably described as "hands-off".
* "Die if necessary, but never kill"), and remained a lifelong advocate for

protecting natives' rights and cultures.
* "Die in a Fire" as him complaining about the endless stream of requests.
* Die Insterburgs, describes a game vaguely related to soccer whose rules get more silly and pointless the longer the song goes. In the end, the whole game is cancelled by coin flip.
* die in the game. Dying just kicks you back to the nearest Vita Chamber and any damage or kills you've gotten on enemies are retained.
* Die Krupps held a video-making contest for their song "Schmutzfabrik". The winning entry became the official video.
* Die Laughing. Even then, people translating portions of the joke have been hospitalized for accidentally reading too much at a time.
* Die Laughing: Someone literally laughs themselves to death. This has happened in real life, as well.
* Die Leiden des jungen Werther reported unless there is a very compelling reason to do so.
* Die letzte Kompagnie (1806) tries to buy time for the Prussian army to make an orderly retreat by defending a mill against the advancing French with the last twelve men of his company. They all die, as does the miller's daughter who fell in love with him.
* Die letzten Kinder von Schewenborn. Some of these books even got prizes for being (supposedly) good literature.
* Die Liewe Heksie, is young, good-natured, blonde, and not terrifically bright or quick on the uptake. The original illustrated children's books make her even blonder.
* Die Liewe Heksie presentation of the heroine and her friendly elves.
* Die Liewe Heksie. She also has a talking magical horse called Griet.
* DIE: Matthew’s alter ego, the Grief Knight, transforms emotion into power. Judging by his reaction when he’s forced to revisit that identity 20 years later, that doesn’t work out well for him.
* Die Meistersinger von Nürnberg's third act seems like it never ends, and at the end, it has Sachs drooling over how great German art is. At this point, singers are usually NOT in the right condition for a 10-minute monologue, after having had the longest role in opera history...
* Die Meistersinger von Nürnberg time-honored singing contest before he gets the hand of Eva.
* Die, Monster, Die! to England rather than America. The town is plagued by problems caused by a radioactive meteorite.
* Die Nacht der lebenden Loser), a German horror comedy, three boys are killed in a car accident while driving home after a voodoo ceremony. They wake up at the morgue as zombies.
* Diend's look has been joked that he looks like a radiator themed Rider instead of a barcode.
* die novel. This is complete with Wedge acting as her wingmate one last time and firing a symbolic proton torpedo, and a eulogy by Face, though the viewpoint character, depressed and angry because he couldn't save her, cynically wonders if Face's sorrow is real, since the guy was an actor. Considering the character, it probably is.
* die on the spot. Fortunate for them that Jesus was there to resurrect them right away.
* Die Pfefferkorner, which centers around a group of kid detectives, tends to treat their interrogated captives differently by gender. Boys are tied up and subjected to silly tortures, like being tickled, forced to smell old socks, or strapped to a rotating wheel. Girls, on the other hand, are just tied up and left alone.
* Die point out that this has never happened before — no Emotion Knight has ever tried to wield multiple weapons at once, in the entire history of Die.
* Die Polizei, to emphasize the bad quality of the game and spice it up.
* Dieppe: A major plot point is the eagerness of the British high command and the Canadian forces in the UK to get into battle "before the Americans," a phrase repeated several times in dialogue.

* Dieppe: during the planning for the commando raid on Dieppe during World War II, there is much resistance by the Royal Navy and the Royal Air Force to putting capital ships and heavy bombers at risk in supporting the Army troops who were actually making the beach landing. Air Marshal Harris, the head of Bomber Command, meets with the Army commander, General Roberts. The meeting concludes with Harris reluctantly agreeing to provide 150 planes. Later, Roberts finds out from his own commanders, Admiral Mountbatten and Captain Hughes-Hallett, that the Air Force has gone on record as refusing to provide the aircraft because, in Harris's words, the Army stated they weren't necessary. Mountbatten angrily confronts a confused Roberts and demands to know what was said during his meeting with Air Marshal Harris:
* Dieppe, shifts focus back and forth between the British, Canadian and American war leaders trying to prosecute the war, and a platoon of Canadian soldiers eager to get into the fighting. Possibly for budgetary reasons, only the actions on one of the six landing beaches are actually portrayed at the conclusion of the film.
* Die Prinzen's song "Deutschland" is believed by many people, especially those not fluent in German, to be a German pride song. Seemingly all of the lyrics sing the praise of Germany, though there are two give-aways towards the end which hint that the song is actually a parody of nationalism. One is the line "Wir sind jederzeit für 'nen Krieg bereit" (We're always ready for a war) which can be taken as a criticism of
* Die Reise ins All, the game starts with a man picking up the novel 'Die Reise ins All' from his library to read for the night.
* Die Reise ins All there's the meteor, Captain nemo's airship, that looks a lot like an airship version of the nautilus.
* Die Reise nach Tilsit: Elske leaves the ground and leaps into her husband's arms when he comes home, because she's that darn happy to see him.
* Die Reise nach Tilsit: Elske sits down heavily when her son Jons's reference to "Aunt Madlyn" makes her realize that not only is Endrik's mistress Madlyn back in town, Jons knows her and has spent time with her.
* Die Reise nach Tilsit. It was about a foreign woman seducing the husband of a virtuous German wife under her eyes — while Joseph Goebbels carried on with the Czech actress Lida Baarova (the German wife won in the end, in both cases; Hitler sent the actress back to her native country and told Goebbels there would be no divorce).
* Dierks Bentley: "Drunk on a Plane" is about a guy who couldn't get his honeymoon trip refunded after his fiancee left him, so goes to Cancun by himself and gets himself (and everyone else but the pilot) blasted.
* Dierks Bentley - "Settle for a Slowdown" (although in the end he resigns himself to her leaving, and only wishes she would show some sorrow over it). "Trying To Stop your Leaving" is also literally this, with the narrator using a freight train and the Rio Grande river as metaphors.
* Dierks Bentley's "Settle for a Slowdown" is another told from the POV of the dumped, hoping for just the smallest hint that she even misses him as she takes off to pursue her dreams.
* Dierks Bentley's "What Was I Thinkin'" the love interest's father catches her sneaking out with the narrator and shoots the latter's truck with his shotgun as they drive away. When they get back late that night, he's sitting on the driveway waiting for them.
* Dierks Bentley: We get to hear from the dumped guy "I feel like a plastic groom alone there on the top of the cake" Actually a very upbeat sounding song and in the music video he meets a lovely woman on the flight as well as getting "a little Mile-High flight attention" from the sexy Stewardess
* dies against an enemy Naruto thought he'd beat. Later, when facing Gaara, Naruto still hesitates until Gaara tries to kill Hanabi; at which point Naruto kills him.
* dies, and it is revealed that he is in fact part demon. Said demon blood kicks in and he comes Back from the Dead He then decides to have a little fun at the expense of some alarmist commandos who wanted to take him out.
* dies before he can carry out his plan, he convinces Elnor to continue on his

behalf.
* dies - but as series creator Wendy was explaining the upcoming plot to new co-creator Richard, she "made the mistake" of mentioning that Skywise was a star-gazer, and Richard, deeply interested in astronomy, adopted the elf on the spot. "He's mine. I take possession. You are not going to kill him."
* Dies Differently in Adaptation: A character is killed off in adaptation in a different way than how they were killed in the original.
* Dies Differently in Adaptation: A character's death differs from how they died in the original work.
* Dies Differently in Adaptation: A character that dies one way in original work ends up dying a different way in an alternate continuity.
* Dies Differently in Adaptation: The way a character dies in the adaptation is different from how they died in the original work.
* Diesel 10:, causing Diesel 10 to destroy the shed he and his cronies are under.
* Diesel cars became trendy around 1980, but they had their problems and quickly disappeared for the most part. Then sometime in the 2000's, diesel-powered autos made a comeback due to improved technology. Then in the 2010s,
* Diesel engines also need next to zero modification for conversion into burning biodiesel, a fuel with almost zero carbon footprint. In fact, Rudolf Diesel's first few engines were built to burn cooking oil, the precursor of modern biodiesel, as their fuel. Biodiesels are also fairly cheap as they can be made from kitchen and slaughterhouse waste, lowering the demand for city landfill capacity. Some cities—Shanghai, for example—have their entire bus fleet converted into running on biodiesel and new buses are biodiesel/electric hybrids. Also in Shangai, citizens with biodiesel compatible cars can buy biodiesel from bus companies at a much lower price than petroleum diesel, and the conversion fees—if any—are partially covered by the city. Biodiesel generally has the same fuel mileage as petroleum, and the natural lubricating property of biodiesel reduces the wear and tear of the engine.
* Diesel engines don't require electricity or spark plugs. Once started, a diesel engine will run until it either runs out of fuel or is mechanically stopped (usually by cutting off the fuel supply).
* Diesel engines, especially older ones, can experience a "runaway" situation when oil begins leaking into the combustion chamber. Since motor oil and diesel fuel have about the same amount of combustibility, the engine can start feeding off the oil rather than the diesel fuel itself. Diesel engines have no spark plugs, relying on pressure instead, so the only "juice" to cut is the fuel...which is useless when the engine is burning its own lubricant. In these cases the only real way to stop the engine is either to find a way to block the air intake and choke the engine out, or allow the engine to run its course and either
* Diesel engines in general are unpopular in the US outside of heavy-duty trucks. Not every gas station has a diesel pump, and diesel engines have a harder time passing stricter US emissions regulations since they cannot use catalytic converters - just ask Volkswagen after the TDI emissions cheating scandal.
* Diesel Punk: Adding to the nit and grit of futuristic machines is the nit and grit of the Dirty Thirties.
* Diesel Punk: Sci-fi with settings and technology inspired by the early-20th century (usually no later than the 1940s).
* dieselpunk starts with sarcastic monologuing from Private Detective Jack Chow.
* Diesel said Gloating. Unsurprisingly, 'Taker recovered again — wasting no time to make Diesel pay.
* Diesel's emotional state from Walker's death is oft-cited as one of the reasons his voice of
* Diesel Sweeties asserts that its full name is "diesel sweeties: indie rock robot romance webcomic and geeky t-shirt blogporium"
* Diesel Sweeties. Even Metal Steve, the cast virgin, got in on the action until his surprise marriage to Allie V.
* Diesel Sweeties is the extreme version of this trope — indeed, he goes so far as to that he only liked bands "before they released any music". Playing on

this theme, Richard Stevens also released a t-shirt design using a Venn diagram. On the left: "Music I Like". On the right: "Music You Like". In the overlap: "Music I Used To Like."
* Diesel Sweeties seem to be set in the present day, except for fully-functioning AI robots as members of society.
* Diesel Sweeties, where two of the characters in an ensemble cast happen to be robots. Also, the toaster is apparently self-aware.
* Diesel vomits at a dismembered Gundam, and in a flashback Furaya appears to be gagging at a similar sight in the first season finale of
* Die Sendung mit der Maus, after the intro was repeated in another language: Das war [language]!
* Die Sendung mit der Maus. An arrow in the mountains points to...wherever, we'll never know, the slope is far to steep for the free-climbing mouse and elephant. The mouse solves it pragmatically by turning the arrow around to point to the earth and make an impromptu picnic.
* Die Sendung Mit Der Maus has a monster kid writing his mommy a Mother's Day poem. Mommy surely isn't sexually-attractive-cute (still, you can see her teats! Gasp!) but you can safely say she is heartwarming-grotesque-cute.
* Die Sendung mit der Maus: In a Maus spot, the little elephant (who is still extremely heavy) blows a bubblegum balloon and crosses a chasm.
* Die Sendung mit der Maus powers, the mouse solves the problem by unhinging each door and piling them up until only one remains - behind which the elephant has to be and is.
* Die Sendung mit der Maus: The fold-out beach chair (pat. pend.) is a surefire way to run into this trope. Even the otherwise very apt Mouse gets into trouble.
* Die Sendung mit der Maus this trope because the cake that the elephant baked for her birthday never moves. The results are exactly the same, though, because the mouse walks around distractedly reading a newspaper. Cue angry elephant and a foodfight with the leftovers.
* die short "Hospitaliky", Popeye and Bluto compete with one another to get injured and have Olive Oyl nurse them to health, who in this short works at a hospital. Any one of the stunts they try to pull could easily have killed them, such as purposely crashing a motorcycle, laying down in the middle of a busy intersection, and laying down on train tracks, however, they keep miraculously surviving unscathed, to their own annoyance.
* dies in a firefight, Abby comments on how Jenny was always so sharply dressed.
* dies in childbirth, now wealthy and well-connected Branson becomes an Uptown Guy for a local teacher, Miss Sarah Bunting.
* Dies Irae allowing everyone to live but with no memories of the events that transpired.
* Dies Irae and possesses powers so immense that he is a candidate for ascending to godhood.
* Dies Irae, and that relied on a very specific loophole created by the users own powers.
* Dies Irae. At first this manifests as him simply speeding up his own time but eventually he becomes able to slow down the time around himself on top of that. It all culminates with the manifestation of his law, "Res Novae - Also Sprach Zarathustra", which would completely halt time on a multiversal level if ever fully unleashed. He is also able to make it selective so that only he or his allies can move while his enemies becomes frozen in time.
* Dies Irae does an interesting dual variation of the trope. After endless trials and tribulations, the main cast finally gets their well deserved happy ending, closing out with a marriage. And depending on the choices made, it will either show the marriage of Ren and Rea at the present time or the marriage of Lotus and Anna in the past.
* Dies Irae does this twice, and both times it's after he's critically injured by his brother Benedictus. And both times, he tries to kill Benedictus as soon as he hesitates.
* Dies Irae effect on everything caught within the field of effect. And should his

fake moon overlay the real moon then the effect will be even more powerful. And just to make things worse for anyone trapped inside, the fake moon also allows him to spread his blood-soaked rose garden which constantly tries to skewer his victims.
* Dies Irae found him and as punishment forced Trifa to pick ten of the children to be executed right in front of him. This lead to him blaming himself for their deaths due to being weak and unable to protect them in the face of adversity and vows to make amends. This vow however becomes an obsession and ends up making him blind to just how wicked he has become by the start of the story and to how flawed and nonsensical his idea of atonement really is.
* Dies Irae has this habit to the annoyance of everyone else. To quote the man himself:
* Dies Irae - Heljanita wants to change the past, and Darkscar wants to unchange it.
* Dies Irae however where he is forced into a defensive stance to try a weather the relentless attacks.
* Dies irae ~Interview with Kaziklu Bey~. Be it slow or fast, all depending on the mood.
* Dies irae ~Interview with Kaziklu Bey~ from ancient times and as such can use darkness in all it's forms in ways no one else can. As a result of this he is also known as The Last Arcane.
* Dies Irae is absolutely loaded with these kinds of people, be it serial killers or war criminals, the majority of them want nothing more than endless war and bloodshed. Perhaps exemplified best with their leader, Reinhard Heydrich, whose driving motivation is to find a worthy foe that can fight with him on equal terms as well as having the secondary goal of creating a new natural law where everything will be nothing but eternal warfare and strife.
* Dies Irae is all but absent and the show still has some anime original scenes not found in the source material. It all leads to a very confusing show that only readers of the original novel could really have any chance of keeping up with.
* Dies Irae is rather infamous for his oftentimes needless verbosity to the point that the narration hangs a lampshade on it, though of course done in his usual fashion:
* Dies Irae just to go alongside it all. Mercurius perhaps put it best:
* Dies Irae of any kind, someone else just comes along and claims his kill, robbing him of the satisfaction.
* Dies Irae, one becomes a god upon reaching Atziluth, the final stage of Ewigkeit. At the end of the Visaul Novel at one route Ren Fuji manages to ascend and to survive the final battle. In the end he spends his existence with watching over the reincarnations of his friends.
* Dies Irae on top of it. This is especially noticeable when compared with the other albino of the cast, Claudia, who have golden eyes instead and is kindhearted to a fault.
* Dies Irae takes place during Christmas Eve. Given that this fight is something Reinhard has been looking forward to for decades, he can't help but cheer Ren on.
* Dies Irae tend to often be enough to seriously irritate the fanbase. That despite the fact that the story portrays him and those who are morally aligned with him as nothing short of monsters and failures of human beings.
* Dies Irae, the main character Ren Fujii's weapon is a huge curved blade that extends from his elbow that he can summon and dismiss as he desires.
* Dies Irae there are quite a few who fit to bill of being able to shrug off whatever is thrown at them, but a few examples would be:
* Dies Irae: Users of the form of magic known as Die Ewigkeit don't need things such as food or even oxygen as they can just use souls for sustenance instead. That doesn't stop them from eating or breathing normally anyways. Most of the time, its just cause it's just simpler that way or the character in question doesn't want to waste their precious resources on such banal things unless they have to.
* Dies Irae was born as a result of his father raping his sister which lead to him being born albino. Due to his albinism he ended up despising the light and started

idolizing vampires, a fantasy he eventually would lead to try and fulfill starting with murdering his parents and going from there.
* Dies Irae was pretty much a one sided beat-down in Schreiber's favor. Despite this he managed to keep getting back up to try and land a hit and eventually managed to pin Schreiber for the briefest of moments despite him losing pretty badly.
* Dies Irae wears a slightly altered version of the infamous Waffen-SS uniform, with some members having a more customized version than others. Rusalka's uniform in particular looks next to unrecognizable compared to the historical one it is based on or those of her allies.
* Dies Irae. Win or Lose, at the end of the day, he just wants to feel fulfilled.
* Dies Irae with most of the members just being a ragtag bunch that, in some cases quite literally, where just taken off the street.
* dies of a combination of a stab wound by Kai Leng (incurred while protecting the Salarian Councillor) and Kepral's.
* Dies Standing Up, his enemy Lugaid chops off his head, but the sword in Cu Chulainn's hand falls and chops off Lugaid's hand. Out of spite, Lugaid and his men then chop off Cu Chulainn's hand. Conall Cernach pursues Lugaid to avenge Cu Chulainn, and again fights with one hand tucked into his belt to make it fair. Even then, Conall is only able to win when his horse takes a bite out of Lugaid's side.
* Dies the Fire, familiar with castles. The good guys lose twenty dead and over a hundred badly hurt to zero gain. Subsequent attacks fail at the "find anyone who wants to do this" stage...
* Dies the Fire keeps her girlish pigtails as they help lower the tension a notch when meeting new clans and negotiating safe passage through their territory.
* Dies the Fire roams from the Mississippi to the East Coast, thus avoiding the trope. Also, since it takes place on an Alternate History Earth, there do exist several maps that detail the rest of the world, at least in-universe.
* Dies the Fire still work just fine, and they land a strike-force on the fort's roof and breach the defenses from the rear.
* Dies the Fire, when the protagonists have a long gripe session about all the delicious junk food they miss, now they've been reduced to growing food naturally.
* dies... we think... refusing to accept that he had lost to, in his words, a "big, fat panda".
* Dietary law? Try having an interfaith dinner with the Hindu who can't eat beef (and may be a vegetarian), the Jew who has to eat food prepared ritually (and can't eat pork, shellfish, and meat-dairy combos), the Muslim who has to have food prepared ritually according to other rituals (also no pork, but no alcohol too; meat-dairy combos and shellfish are OK), and the Sikh who
* Dietary supplements, complete with animated fat Honey trying to lose weight.
* Diet Coke adverts are infamous on being proudly built on this trope.
* Diet Coke commercial from 1994, involving a hunky construction worker.
* Diet Coke fumbled again during Super Bowl XXV in 1991. They pulled their original commercial in order to run a
* Diet Episode at worst, so audiences don't take it very seriously. With the rising obesity rates in the real world, along with "body acceptance" straight uses of this trope are rare nowadays, and even non-straight uses aren't much more common.
* Diet Episode, Roseanne tries to get her mind off eating by joining the family for some TV. Unfortunately, every single channel she watches is advertising some kind of delicious food, like an overstuffed candy bar or flame-broiled cheeseburger restaurant.
* Diethyl ether is highly combustible even at relatively low temperatures and therefore dangerous around any kind of heat source, even without open flame or sparks. In fact, James Young Simpson invented chloroform as alternative anesthesia because hospitals that used ether had a nasty tendency to blow up.
* diethylstilbestrol — all American law students read some of the cases — requiring several developments respecting the statute of limitations (unlike thalidomide, DES defects were generally not discovered until the daughter grew up and found out she couldn't have children), assignment of liability in mass

torts (DES was a generic drug, meaning that it was typically impossible to figure out which exact company made the pills that caused the damage), and the use of expert testimony.
* dietician "dietician" is like "dentist", whereas "nutritionist" is like "tootheologist".
* Diet of Worms. Many of the other Plutarkians at the gathering are wearing rubber human masks, too.
* Die Toten Hosen. (Clearly, the inverted trope has no natural end, so what happens at the sonic barrier depends on the take.)
* Die Toten Hosen directly references the infamous duo. It is also a love song in which the guy entices the girl to live a life like Bonnie and Clyde.
* Die Toten Hosen's "Sascha … ein aufrechter Deutscher" dislikes Croats but loves ćevapčići. (Judging from context, he might just be too stupid to ponder their origin.)
* Die Toten Hosen's "Tausend gute Gründe" lists "a thousand good reasons to be proud of this country" only to admit that at the moment, they can't actually come up with a single one.
* Diet Pepsi Max does the same thing, inferring that men are embarrassed to be seen drinking diet soda ("Do you hide your diet soda inside your giant stuffed moose head when your friends come over—and then
* Diet Pepsi's may have been even more memorable, including several ads featuring
* Dietrich "Medic" Luzwheit subverts certain elements of the character, being a talented but also morally questionable surgeon and
* Dietrich Von Bern, a legendary Germanic king based on the real-life Theodoric the Great, was said to have the ability to breathe fire when angry. He uses this ability against Sigfried in
* Die trips over the roots, gets lost in the fog, and is smashed in the face with an axe-wielding psycho.
* Dietzel jokes. Like the Garfield example above, it occurs "off-screen".
* Dieudonné Thiébault, father of General Paul Thiébault, attempted to prevent his son's remarriage to Elisabeth Chenais, citing her expensive tastes and unsavoury reputation as arguments against the match, but more importantly reminding Paul that he was still legally married to another woman when he proposed to Elisabeth. Paul ignored his father's objections, rushed through the divorce and married Elisabeth anyway... and despite his pledges of absolute truthfulness, he makes absolutely no mention of this in the Memoirs he wrote long after both his father and Elisabeth were dead.
* Die unglaubliche Robert Redshirt RPG Show (translated: The Incredible Robert Redshirt RPG Show). In it, the players play the production crew of a TV station producing a show (pure fiction or sripted realiy) featuring an actor called Robert Redshirt. The crew tries to create dangerous situations for RR and then save hin from mortal danger, all in order to increase their viewer ratings.
* Die Universalbibliothek discusses and analyses the ins and outs of a hypothetical library consisting of books of a standard size containing every possible permutation of letters and spaces.
* "Die Unstillbare Gier" ("The Insatiable Greed") is essentially Von Krolock saying, "Don't live forever, you'll kill everyone you love." It includes recitations of dates from 300 years back, lamenting how he still can't forgive himself for killing people way back then.
* Die Unze" chose to stay alone in the cabin to investigate who was making a mess of the interior every time the group was out tending the cattle. The others, in hindsight rightfully, believed something supernatural was the cause and thus were glad he was offering to keep in wait.
* Dieu seul me voit (by Bruno Podalydès, 1998), the main character needs to buy a gift at the last moment and grabs a table lamp from the nearest store. That lamp ends up being repeatedly given around as a way for every recipient of the gift to get rid of it.
* Die, Vecna, Die was intended as the wrap-up point for the second edition, allowing groups to move on to the significantly different mechanics of third

edition.
* Die Walküre closes with long-separated twins Siegmund and Sieglinde about to have sex, just when (in the words of Wagner's stage instructions) "the curtain falls quickly". Compared to that, even the much-loved "Wotan's farewell and fire magic" at the end of act three faces tough competition.
* Die Walküre has Wotan's endless farewell and the Magic Fire Music.
* Die Welle) the salute of the titular student organisation was a sea-wave hand motion.
* Die Weltbühne so his name would not appear so often on the index, assigning different styles to his four alter egos. Theobald Tiger wrote only in verse, Peter Panter general satires, Ignaz Wrobel acerbic, hard-hitting stuff, and Kaspar Hauser on the lines of "this world is crazy".
* Die wilden Kerle — German series about a kids' team of soccer players. 5 films since 2003.
* Die Young, Daphne is just a thrill-seeking socialite who wakes up at the bottom of a well on a large island populated by feral dogs, wolves, vicious rats, boars, and crazed junkies and murderous militia. With no combat experience, but a clever mind for improvising tools from scraps, she needs to find her friends and a way off the island, while avoiding increasingly dangerous enemies and environments.
* Die You Zombie Bastards!: These are small, wrinkled monstrosities that love to torment people with food products.
* Die You Zombie Bastards!: These are technically living zombies that are made by a laser and are the henchmen of a megalomaniac. They're green with purple hair and have deformed faces. While they never speak, they seem to be sentient. There were undead zombies who were identical to the ones we see, but they were destroyed with their alien overlords.
* "Die Zumutungen der Moderne" by Nicolas Mahler (about his life as cartoonist) has a somewhat unconvincing example, as the order is not that relevant. While the comic boheme does smalltalk, one member shocks them by claiming he will reduce his life to the absolutely necessary, "television and
* Differences between units of the same species are sometimes obviously biological, at least for Draconians and Shadow Demons.
* Differences in the inert ingredients (such as the binding of the pill) may affect the rate at which the active ingredients are absorbed into the body, causing the exact same type and amount of medication to have a somewhat different effect.
* Differences of opinion lead the Order of the Scribble to disband, but the group seemed to unilaterally despise both Soon Kim (whom Dorukan and Girard nearly came to blows with) and Girard Draketooth (whom only Serini seemed to get along with).
* Difference? The Great/Good Ending has Lucas and Carla's child grow up in a peaceful world, the Good/Normal ending has their child grow up in the world prior to the game's premise, while the Bad/Cliffhanger ending has their child grow up to become the next Prophecy Child to change the world back to normal.
* different account he could control somehow once his had been removed. Assuming HR remembered to make sure his account was actually disabled once he was let go, of course.
* different and thigh-high pink stockings with garters. Her cape is pink.
* different. Angels don't have sex, but apparently, they can wish they did.
* Different armies used different signaling devices, but the concept remained the same, whether that signal was given with a flag, a drum, a horn, or in some other manner. In modern times, radios have mostly taken over. Regardless of which method is used, its important to make sure that only friendly forces can interpert it, which is why such messages are often given code names or other forms of encryption (that, and making them easier to order on the fly)
* different color: one is black, one is turquoise and one can range from red to blue depending on the minerals in it.
* Different countries have different rules for which side of the road one drives on, which also determines what side of the car the driver's seat is on. Many countries, including the United States and most of Europe, have you driving on the right side of the road, while some other countries, such as Britain and Japan, have

you drive on the left. This can cause problems for people moving from a country that drives on one side of the road to a country that drives on the other side.
* Different Drum" is about two lovers, one of whom wants to settle down while the singer doesn't want to be tied down.
* Different for Girls as a girl, but risks revealing himself by accidentally speaking in a distinctly masculine way.
* Different for Girls revolves around a post-op trans woman meeting a high school friend again. He's at first freaked out but eventually comes to accept her and falls for her.
* Different for Girls song of the same title is about how dating and love is, well, different for girls.
* Different for Girls: When a new form subjects you to new social norms.
* Different from the Others. It looks pretty much like any other German beerhall, except that the men are waltzing with each other rather than with women.
* different from the source manga. Some of the bonus gaiden stories appeared as filler material for the first few episodes, probably to give the manga a month or two to go on with storyline before beginning with the story itself. One can fairly easily see exactly where the divergence begins; most of the early story arcs are nearly identical in both media, even down to having the exact same lines, but around where Monev the Gale first appears, the two stores take somewhat different directions.
* different galaxies. Of course, they are following the diary of a guy named Hasturi, nicknamed "the Mad Perseid". It's a wonder he didn't have them go through the Route of Ages.
* different God (who is, after all, one of the most powerful and most distant deities) is quite strongly rejected by the party's clergyman.
* different Indian engineers than the ones he remembers. This trope is largely downplayed for them, but they do have difficulty with phrases like "swear to God" ("which one?") and "you'll wish you'll never been born" ("which time?").
* Different in the case of rhythmic gymnastics, where athletes compete well into their twenties, and are often
* different in which Harry, hiding from enemies in a large pitch-black room, is shown his surroundings by Lash using mentally-projected outlines of his environment somewhat resembles this trope. It gets particularly alien when he immediately loses 'sight' of an object he throws (because Lash can't tell where it is once he's stopped touching it).
* Different Kinds of Toa have a degree of it ingrained naturally. The Makuta all posses it. Some Characters with impressive strength include Nocturn, Takutanuva, Tren Krom, and especially Mata Nui. It's justified for that last one; he's actually a
* different Klingon). Presumably makeup alone might have worked, except the mission took place over several days and they got into costume early in order to get used to it. It's mentioned everyone but Worf also got treatments to survive the amount of alcohol they were expected to drink.
* Different languages may refer to the same objects with words that look and/or sound quite similar, so for example you may try to write a Spanish word and instead pen down a Portuguese word or vice versa.
* different later episode, Peter gets amnesia and turns on his house stereo.
* Differently Dressed Duplicates — The person has been copied, but their clothes haven't.
* Differently Dressed Duplicates — Time travel duplicates dress differently.
* differently from every other race, humans are so emotionally rich that their weapons often fail to fully drain them in one shot and they can recover.
* Differently Morphous beings known as fluidics consider the term "Shoggoth" or "Shoggies" to be their N-word.
* Differently Morphous the warlock Diabliere keeps his spellbook on his phone. This includes sound files for the chanting.
* Differently Powered Individual for some examples; though that trope and this are not directly synonymous, they overlap.

* Differently Powered Individual: Various names and classifications for superhuman people with special abilities and superpowers.
* different more-or-less ghostly undead, which aren't necessarily easy to tell apart at a casual glance. Most of them, naturally, are of the "kill the living" type.
* Different Muppets would explode, sometimes precluded by a declaration to "Blow their tops", sometimes without warning. Kermit even admitted to explosions being one of the show's trademarks.
* different names refers to the deliberate practice of identifying foreign deities with classical gods and often assimilating their distinct characteristics into mainstream practice.
* Different orca pods are known to have different communicative and behavioral patterns; pretty much what is called "culture" when talking about human populations. For instance, some orca pods have mastered the dangerous tactic of beaching- rushing onto the shoreline to grab resting seals. Others have developed coordinated strategies for tipping seals off icebergs.
* Different palettes on special sprites which control level functionality can have various effects, ranging from simply changing the colour of a light to making a teleporter that doesn't show the usual teleporter effects, to determining what kind of enemy teleports in.
* different patterns the gears get can confuse when going to another car, specially the rear (top left or bottom right?).
* different place on the corruption spectrum in pretty much every episode in which he appears.
* Different Seasons, he threw his gun in the river the day before the murders, so the cops can't check it against the bullets.
* Different Seasons, this is apparently how Andy smuggled several hundred dollars into jail, and how Red gets his manuscript out... Willing suspension of disbelief (or perhaps Fridge Horror) applies because the manuscript is better than 100 handwritten pages. Ahem.
* different set. The Streib (who were only featured in one episode, where they brutally abducted Captain Sheridan,) were also stated by JMS to lack biotech spacecraft and like the Minbari superficially mimic its appearance with their mechanical technology.
* Different sort of crack, but Series 5's "cracks in time" are definitely a bad sign when they start turning up.
* Different Strokes. Mr. Drummond needs to give a version of this to Arnold after the kids come home from a camping trip and catch him and his girlfriend together. As it turns out, he's already given him the "Where babies come from" talk, but as he tries to explain that adults sometimes need to spend private time together, Arnold interrupts to ask, "You mean getting it on", thus revealing that he's fully aware of what grown-ups do, he's just thrown for a loop because he never thought of his father like that.
* Different Strokes, Slade returns to help the team and the Huntress is now an operative for Argus.
* Different Strokes the one expecting. Her friend telling her own father this in a panic doesn't help.
* Different Strokes. . . until the man describes his outfit and that he's sitting on the sofa with his kids.
* Different Strokes, when Arnold encounters Philip's current girlfriend in the hallway. Despite his young age, he realizes exactly what's going on, given the early morning hour and the fact that she's only wearing a nightgown.
* different timeline or universe than whoever they are trying to interact with or touch.
* different town, Strong Bad concludes that his imagination's broken. This is apparently confirmed when he tries to imagine "the best thing ever", and all he can come up with is "beef... stew".
* Different type example: LARP (mainly, fantasy). Many old-school larpers whine a lot about modern games to be "tamed", because organizers don't take the risk to

allow some props or actions. While it's not a real problem (it is easy to find a small, hardcore group that plays with hard weapons and allows full contact), the difference between old players and new players is big.
* different value systems is brushed under the rug (and this is just an example, similar nonsense occurs in reverse).
* different way to thwart the plan the second time around. (This may be why villains don't bother recycling their plans.) This was used to prove to Kristoff that he wasn't the real Doom (as memory implants had caused him to believe), because the real Doom would never repeat a scheme.
* Different weaponry and/or levels of toughness of the opponents (e.g. the weapon guards of
* Different World, Different Movies: Different worlds have different works of fiction.
* Different World, Different Movies: When you go to a parallel dimension, famous media will be subtly, glaringly or comically different.
* Different World, Different Movies: Works of fictional media that only exist in alternate timelines.
* Different Worlds on the fall equinox. If they succeed it will result in the dead rising from the grave all over the world and consuming the flesh of the living.
* Differing doctrines and philosophies also lead to different approaches to warship design. One oft-cited example is the difference between American and British carrier design and operation. The Royal Navy assumed that their carriers would often operate relatively close to land, due to much of their traditional area of operations being around the English Channel and Mediterranean, and so their carriers featured heavy
* Differing Priorities Breakup: A breakup resulting from each person wanting things that will make the other unhappy.
* Differing Priorities Breakup: A couple breaks up because they don't want the same things in life.
* Differing Priorities Breakup: Despite still loving each other, breaking up because you know you will be unhappy together.
* difficult. As a result, the love epiphanies do not resolve the relationship, they just ensure the status quo for the majority of the manga.
* Difficult, but Awesome as Isaac, you would throw a high-damage knife that hit frequently.
* Difficult, but Awesome. While players can fast forward through the days or months of travel between burns, even high speed, low-tolerance burns can last several seconds or minutes, leaving plenty of time to correct for pilot error or use vector nodes to plan out that next burn.
* Difficult, but Awesome. Your grandparents drier operated on one motor controlled by a completely analog dials. It takes a lot of trial, error, and practice but they would have learned how to use it and gotten consistent results from it and expected it to last a life time. The modern drier however has several servos thrown in to articulate the drum, thermometers, multiple scales to detect weight distribution, humidity sensors, and a digital computer to control everything. It can deal with whatever mess you haphazardly throw in it pretty well, but after a few years or so something has probably started to fail and you won't get as good results when you try to learn what all those fancy settings actually do. While most users accept the convenience the modern option offers, there is a reason older generations can legitimately say theirs was better.
* difficult ended up cancelling the tour before any announcements were made.
* difficult. Here, the coins are absolutely worthless, some coin blocks will kill you, the usual Mario powerups (Mushroom, Fire Flower, Starman) equal death in this world, the Warp Pipes (which in SMB were good news) will toss you to the air, and even ending a level the wrong way will destroy you.
* Difficult People, and finally a performance artist spills crickets on the train.
* Difficult pirouette sequences are a crowd-pleaser in any ballet. The ballets
* Difficult Task - To prove he's the Hero the Hero must, well prove himself. It can be an ordeal of choice, a riddle or a test of strength.

* difficult-to-unlock ending that requires the online FOB mode of missions from earlier in the game) and a "Chapter 3" title card, it appears that nothing new was intended and most people have given up on waiting for the alleged content patch.
* difficult to use that rockets him to the #1 spot in UA's graduating class.
* Difficulty by Region looking for an unadulterated gameplay experience, and they'll likely find a way to play the original versions anyway.
* Difficulty by Region: The video game has harder difficulty in foreign releases.
* Difficulty Creep because someone thought it was "Sequel Difficulty Creep" and I don't know what to fix it as.
* difficulty determining their characterization, or simply a desire to side with the strongest, this behavior is especially common among new role-players.
* Difficulty Level. Great chess masters can play via intuition (and indeed, when playing speed chess, it's a necessity), however, intuition when playing a game such as chess is merely the player's experience in playing the game allowing them to make strong plays without thinking too much. Ultimately, that intuition comes FROM logic, as the player has enough experience to recognize generally favorable moves and positions on sight. The Troi example is particularly egregious because she really just reverses the correct terms. Her move was unintuitive, but was entirely logical because it immediately led to victory.
* Difficulty Levels, 1947 (altering the circuits could make targeting easier or harder)
* Diffidently - Someone who lacks confidence in one's own ability; shy. ("
* Diff'rent Strokes, Adelaide the housekeeper uses a paper bag to ward off an epileptic seizure.
* Diff'rent Strokes, Arnold gets a letter saying he's been drafted (he's around 10-12 at the time). He later has a dream where he's in the army and the commanding general (Dad) asks for a volunteer for a suicide mission. The other soldiers do the "everyone step backward" routine.
* Diff'rent Strokes, Arnold gets into a fight with the bullying son of the landlord's brother who is subbing for a short time. This leads to a loud confrontation where the brother confronts Mr. Drummond, threatens to evict the family and provokes Drummond to punch the blowhard out. Later, the Landlord comes to the Drummonds saying that he approved of his dumb brother being put in his place. However, he also exploits a lease violation that the brother found to raise the rent on the Drummonds, with a veiled threat of eviction to convince them to give in. When Drummond protests that this is blackmail, the landlord responds "I prefer to think of it as plea bargaining". The punchline is after the Drummonds cave in to this threat, the father tells the kids that this is the result of his act of violence. However, when asked if it was worth it, Mr. Drummond immediately remarks it was for having the pleasure of shutting a bully up.
* Diff'rent Strokes, Arnold gets into a fight with the bullying son of the landlord's brother who is subbing for a short time. This leads to a loud confrontation where the brother confronts Mr. Drummond, threatens to evict the family and provokes Drummond to punch the blowhard out. This gives the landlord the excuse to exploit a lease violation that the brother found to raise the rent on the Drummonds, with a veiled threat of eviction to convince them to give in. The punchline is this: after the Drummonds cave in to this threat, the father tells the kids that this is the result of his act of violence. However, when asked if it was worth it, Mr. Drummond immediately remarks it was, for having the pleasure of shutting a bully up.
* Diff'rent Strokes, Arnold gets into a fight with the bullying son of the landlord's brother who is subbing for a short time. This leads to a loud confrontation where the brother confronts Mr. Drummond, threatens to evict the family, and provokes Drummond to punch the blowhard out. This gives the landlord the excuse to exploit a lease violation that the brother found to raise the rent on the Drummonds, with a veiled threat of eviction to convince them to give in. The punchline is this: after the Drummonds cave in to this threat, the father tells the kids that this is the result of his act of violence. However, when asked if it was worth it, Mr. Drummond immediately remarks it was, for having the pleasure of

shutting a bully up.
* Diff'rent Strokes: Arnold is traumatized after he is robbed at knifepoint. His coping mechanism is to bluff to his friends that he held his own and that he isn't scared, but Mr. Drummond suspects that his son is deeply upset. Eventually, he is able to get Arnold to admit he was scared for his life … and a classroom exercise in self-defense exposes the truth.
* Diff'rent Strokes even beyond the child labor law limits and through his persistent illness due to his failing kidneys, they also misappropriated his earnings from the show, which resulted in him suing them and severing ties with them for the remainder of his life.
* Diff'rent Strokes had Willis' girlfriend blow off a date with him by saying she had to wash her hair. He goes to the movies anyway and sees her there with another guy.
* Diff'rent Strokes has Arnold being conscripted by accident despite being far too young to join the military. He has a dream where he finds himself in the military and various members of his family are depicted as being officers that he has to report to.
* Diff'rent Strokes has Arnold fake bedwetting in order to get attention.
* Diff'rent Strokes, his sister Sophia and former housekeepers Mrs. Garrett and Adelaide returned for the wedding.
* Diff'rent Strokes: In an early episode, Willis and Arnold (black) plan to run away because they overhear their adopted father (white) saying that black boys should be put with black families, thinking that he didn't want them; but he didn't believe in that, he was telling someone else what a white social worker said to him before he threw her out.
* Diff'rent Strokes, Kimberly is kidnapped when she and Arnold hitch a ride. Her father and the police eventually rescue her when they figure out that her kidnapper has her down in the basement of the building where he rents an apartment, which he uses for a photography darkroom. The basement itself is a mild subversion, as it seems to be a nice enough room, but what the kidnapper is planning to do with her (and has possibly done to other girls) in the space renders it ominous.
* Diff'rent Strokes: Kimberly mischievously takes a picture of Arnold's bare bottom in the shower. The photo is accidentally published in the newspaper, complicating his run for class president.
* Diff'rent Strokes: Mr. Drummond is trying to get rid of an unwelcome guest.
* Diff'rent Strokes: Played straight in the seventh-season episode "Cheers to Arnold." A friend of Arnold's steals from Mr. Drummond's liquor cabinet. When Arnold tries to explain, Mr. Drummond will have nothing of it and tells Arnold he's permanently grounded; of course, by episode's end, things are cleared up and Arnold is pardoned.
* Diff'rent Strokes. Stan calls him out for abandoning his friend Dudley to getting molested by the bicycle shop man, with Brian mentioning the real Dudley is messed up because of it.
* Diff'rent Strokes: The Season 8 episode "Arnold's Tangled Web" saw Spider, an adult version of the High School Hustler, offer his services to high school students who want to avoid trouble. This con artist used the Hamburger Haven as his base of operations, and in this episode offered to forge Arnold's report card to conceal a poor grade in geometry. When it almost backfires on Arnold - Drummond thinks that Arnold is performing so well in the class he wants to put him in an advanced placement course – he turns to Spider to pose as his guidance counselor. However, Drummond is on to Spider from the git-go (but doesn't let on), springing a web of his own before exposing Spider as a liar and cheat … and when Arnold finally admits the truth, Drummond kicks Spider out and warns him that the police will be called if he ever hears of him preying on teenagers again.
* Diff'rent Strokes: When Kimberly is training for the Olympics (she's a figure skater) Mr. Drummond feeds her raw eggs.
* diffused sunlight with butterflies fluttering around. That could just be a nice day in Ponyville.

* Di Fortunato, Lady Tremaine’s Wicked Fairy Godfather, who turns back time to help them ruin Cinderella’s happy ending. They fail, however, and the Tremaines become his servants. He may also be the Evil Queen’s Godfather too, as he mentions helping her against the 7 Dwarfs.
* Digable Planets, which is now considered to be one of the most significant jazz-rap albums.
* Di-Gata Defenders: Happens to Mel when a heavy rope is dropped on her foot.
* Di-Gata Defenders: Kara's "Mantle of Yin" spell summons a green flying carpet.
* Di-Gata Defenders Nazmul was the Cain to Adar's Abel. Nazmul became corrupted by his power and created the megalith in order to seize all the power of the di-gata stones for himself.
* Dig Dug: Despite being a Anthology Series with different artists. It's final strip ends with the digger drilling his way out from underground and giving up the digging life.
* Dig Dug which loops after level 72. The staff apologizes for making Arino play a game that doesn't end and then draw two endings: Taizo eating a banana and Taizo standing over an enemy, sword-drill in hand. Arino prefers the first one.
* Dig Dug You defeat enemies by jamming a pump into them and inflating until they pop.
* Dig 'Em Frog (of Honey Smacks fame) pours out a libation in honor of
* Digger and Murai discover the cave in which a dead god's followers are mechanically forcing his disembodied heart to beat.
* Digger, and the other group is the enormously creepy cold servants who serve the dead god. The killers of the Good Man in the children's version of the myth wore masks in the shapes of beasts.
* Digger: Considering owls' reputation as a death omen, having your elder healer named "Owl Caller" isn't a good sign.
* Digger doesn't trust magic one bit, mostly because she's seen the damage caused by dwarves who used magic in their tunnels.
* Digger, due to the matriarchal nature of hyenas, gender roles are reversed and this arrangement is the norm rather than the exception. One character, a scrawny skin painter, has to compete with every other male in the tribe for the affection of their strongest warrior. This is based on real life, where hyenas are basically matriarchal and males tend to be pretty battered.
* Digger, during the troll bridge story, when Digger saves the at-the-time antagonistic Grim Eyes from falling off said bridge.
* Digger exclaims this on meeting up with the oracular slug again, who responds, "In the slime!"
* Digger, has a degree in anthropology and an interest in the more obscure mythologies (South American, Balkian). This shows up frequently in her works.
* Digger has a hilariously cringe-inducing example, split across three pages:
* Digger has smiled like this twice. Both times it went badly for the other guy.
* Digger herself is a wombat, and so considers ALL placental mammal reproduction to fall under this.
* Digger is a way for the god to incarnate and address his followers directly. Main character Digger, who is blind to the finer points of godly incarnation, just treats it as a talking statue all the time and thus ends up being (inadvertently) rude to said deity.
* Digger. It's a wonder she grew up to be relatively normal and stable.
* Digger, making his mother evil. This creates a goddess so horrible that just seeing her drives a priestess insane, and leaves the priestess covered in "shadows" that are not her own. The evil goddess is based on myths created and believed by street children in Miami.
* Digger often does this in the middle of being told how to act when faced with a moral quandary, much to the speaker's (usually Digger's) dismay.
* Digger often mention that they have binged from the beginning to the most recent comic when they leave a comment.
* Digger of the god Ganesh, is perfectly personable and quite a nice guy, as you'd expect for the remover of obstacles.

* Digger. One of the (matriarchal) hyenas says "What's she going to do? Move into our huts, eat our food, and seduce our menfolk?" "It could happen..."
* Digger reattach severed limbs, but they run the risk of going crazy and trying to kill their owners.
* Diggers, Dorcas and Grimma lead the nomes to operate a JCB backhoe in an attempt to scare away the humans intruding on their stone quarry.
* Digger) She-Is and He-Is, parents of the hyena species. It did not turn out well, which is one reason male hyenas are unfairly treated.
* Digger. Since the author has a degree in anthropology Ed's tale feels very authentic.
* Digger specifically cites the legend mentioned in Folklore when they're first introduced.
* Digger suggests they are pectoral muscles, as a wombat's mammary glands are in her pouch.
* Digger. The hunters and warriors of the hyena tribe are all female because they, just like real-life hyenas, are larger and stronger than the males. Also played with: at one point digger goes adventuring with two females and an ungendered shadow creature, the only male being their guide. But culturally, Grim Eyes the Hyena has a 'male' role and attitude. Similarly, Ed the Hyena is Digger's best friend and he is male, but is cuturally in a 'feminine' role.
* Digger: the hyena tribe view the liver, not the heart, as the most important organ and the source of a person's feelings.
* Digger, the mascot for NASCAR on Fox coverage from 2008 to 2012. He was greatly criticized for the ways in which he was used. Though it was at one time commonplace for networks to create mascots for sports coverage to incorporate an educational and entertaining element into their coverage, which was the case with Peter Puck, Digger was created purely to add entertainment to the NASCAR on Fox broadcast and reach out to a younger audience. Some NASCAR fans accused Fox of dumbing down and fluffing its coverage in order to gain revenue from Digger merchandise sales. Despite continuous outrage from the NASCAR fan community, as well as talk from the NASCAR community that the Fan Council was not pleased with the situation, Fox did not announce any plans to drop the usage of the characters, and even had posted pictures of holiday-themed versions of the Digger die-cast in 2009 and 2010. In response to the comments, in 2010, the Digger cartoon was not shown during pre-race shows and Digger appeared less often at the bottom of the screen. Throughout the 2011 season as well as the 2012 Budweiser Shootout and Daytona 500, Digger appeared very sparingly, usually only during commercial bumpers. Starting with the 2012 Subway Fresh Fit 500 all appearances and references to Digger were removed from the broadcast completely. However, nods to it occasionally came up (for example, at the Talladega race in 2014, when a track-level camera had a car drive over it, Darrell Waltrip commented that he hoped that nothing had happened to Digger, to which Mike Joy responded, "Digger's retired").
* Digger, the statue of Ganesh sends Digger and Ed underground to deal with an undead god. He doesn't expect either of them to survive the task.
* Digger, they seem to go at least a little off model — they apparently use large amounts of magic in the construction of their underground cities. Digger the wombat does not approve, as that magic tends to wear off after a while if not carefully maintained, leaving abandoned dwarf cities as veritable deathtraps. Come to think of it, the wombats seem to fit the traditional dwarf mold pretty well, themselves.
* Digger thinks that the Shadowchild is Digger's familiar, but Digger is emphatic that this is not the case.
* Digger. Unfortunately, she can still be affected by oracular slugs, plus someone figured out how to rope her into the plot by enchanting a nearby object. Some of this isn't immunity to magic so much as a simple level-headed refusal to deal with superstitious nonsense. When a god responds to a question with a mysterious and rhetorical "but who knows how ancient are the stones beneath our feet?" she immediately points out that they're 4.5 billion years, give or take, and demands a real answer.

* Digger use this as their ultimate punishment, even worse than 'mere' death. One's name is eaten and one is cast from the tribe and forgotten...in theory.
* Digger, which rather than trying to throttle you just wiggle aggressively. Specific mention was made of a suicidal re-attached toe that tries to stub itself at every opportunity.
* Digger, who spends most of its early appearances asking questions of the form "Am I a ____?"
* Digger, with the highest ranked adult male below all females and juveniles in female's care.
* digging featured a submarine diving (strictly vertically) deeper and deeper and deeper and deeper... until encountering a Chinese submarine coming from the opposite direction.
* Digging Himself In Deeper when he gives Matsuda lessons on the art of seduction:
* Digging to China: Digging through the Earth to emerge at another point on its surface.
* Digging to China: Someone tries to go to China by digging deep enough into the Earth.
* Digging to China: Someone tries to go to China by simply digging into the Earth.
* Digging Yourself Deeper: An attempt at saving face only makes you look even worse.
* Digging Yourself Deeper: An attempt to save face only results in making yourself look even worse.
* Digging Yourself Deeper ends up with him claiming to have a false leg, she gives him a key to her flat and implies there will be .. goings on .. later, but of course he can't take off his trousers and ...
* Digging Yourself Deeper is pretty much the basis of every episode of
* Digging Yourself Deeper monologue is often triggered by telling a stupid, unconvincing and ludicrous lie where the truth would actually have been perfectly acceptable...
* Digging Yourself Deeper: Trying to explain away an offensive statement, only to make more offensive statements.
* Diggle is caught by Merlyn's bodyguard pressing a listening device against the wall. He slips the bug into his pocket but is seen doing so, so he then produces a lighter from that same pocket, pretending he stepped away for a quiet smoke.
* Diggles: The Myth of Fenris, the first buildings are made from wood and stones, then require sturdier materials like metal, then require mechanical energy, and in the last stages the power source of choice is a pseudo-nuclear reactor.
* Diggstown has this in spades, on both the heroes' and villain's sides each trying to outdo, outbribe, and outcon the other in the protagonist's series of ten fights with amateur boxers. Two brothers are bribed by the protagonists to take a dive, but the first one does such a poor job that the second one is forced to try to win, or his brother will die. Another boxer is forced to leave the arena before stepping into the ring, tricking the protagonists into assuming that he forfeited. Two ringers are brought in to fight, sneaking through the loophole that, as inmates in the local prison, they are legally "residents" of the area. However, the final ringer has actually been bribed the protagonists to blatantly take a dive.
* Diggstown, "Honey" Roy Palmer gets pissed off and knocks out an opponent with a single punch immediately after the round starts.
* Diggstown involves an ex-convict con man making a bet with a wealthy businessman who, effectively, owns the titular town that his friend (an almost-contender back in his glory days) can beat 10 boxers one after another in 24 hours. The size of the amount constantly increases, as the con man keeps borrowing the money from a loan shark he knows with his life as collateral.
* Diggstown is about two hustlers making a huge bet on an epic, day-long boxing competition. They set out the rules of the competition beforehand, then spend the rest of the film exploiting every loophole they possibly can to get an edge.
* Diggstown when Diggs refused to throw a fight. The poison and the resulting injuries from the fight paralyze Diggs for life. He manages to move his hand slightly during Roy's climactic fight, giving Roy strength to continue.

* Diggstown, where the hero and the villain are both con-men who have done everything in their power to rig a series of boxing matches in their favor. When the hero's fighter finally wins under blatantly shady circumstances, the villain stands up and says, "You beat me fair and square!" However, soon afterwards he begins ranting and threatening while his son tries to get him to admit defeat.
* Di Gi Charat, Gema drinks up an entire river that Dejiko kicks him into, and proceeds to chase Dejiko and Puchiko down. Puchiko realizes halfway through that he has no reason to chase her, and steps out of the way while he continues pursuing Dejiko. It makes enough sense that he traps her at the end of an alleyway, until one notices that there's a narrow opening on each side that she could have easily escaped into.
* Di Gi Charat, Gema falls in the river and drinks a lot of water, making him grow huge and giving him a deep voice.
* Di Gi Charat Nyo: episodes 1-36 were dubbed, but the release was unceremoniously canceled after that point
* Di Gi Charat, Takuro Kimura favors Puchiko the most, and has a habit of picking her right up and speaking affectionately to her. In his debut appearance, he even asks Dejiko if he could "buy" her.
* Di Gi Charat, the town is out of natto, so Gramps suggests going to the next town over to get some. Gran immediately gets spooked, but then asks, "Where is the next town, anyway?"
* Di Gi Charat was originally the mascot for Gamers, a Japanese store selling merchandise aimed at otaku, and the first series prominently featured the store. It became so popular that the show, as well as the character herself, broke away from its' advertising origins.
* DIGIMON 2: RETURN OF DIGIMON, Digimon manages to blow up his enemy, the aptly named Evil Digimon, with the laser cannon of his mech suit. However, an authors note soon reveals that Evil Digimon is not dead, but only pretending to be. Evil Digimon then appears in the next chapter, ambushing Digimon by hiding in his fridge.
* Digimon 2: Return of Digimon Evil Digimon are perfectly able to talk to each other during their climactic battle in space.
* Digimon 2: Return of Digimon the eponymous character creates a robot body to defend the world from an evil Digimon.
* Digimon Adventur 02, the effects of the Dark Spores have been nullified, and he returns to being a normal kid. However, Yukio Oikawa scanned and copied the Dark Spores from Ken and implanted them on other children who wished to become child prodigies like Ken himself, which were also slowly turning them into the apathetic, cruel children like Ken used to be.
* Digimon Adventure 02. After that, each of the children then mentioned their hopes and dreams which actually destroys BelialVamdemon.
* Digimon Adventure 02 also plays with the trope, but is set in 200X — a CD drama setting past events with the Monster Makers in 1984 would set the series 3 years into the future, 2004.
* Digimon Adventure 02 also used this... both on the soccer field and as the Digimon Emperor.
* Digimon Adventure 02: A Mexican girl does it, and Yolei lets out a "nyah nyah" after she and teammates destroy a bunch of control spires.
* Digimon Adventure 02 Armor Digivolving is this, sort of. It's an 'ancient' form of evolution that can't be blocked by the Control Spires that prevent the normal kind, like using a computer so old that it can't be affected by a virus that targets newer models.
* Digimon Adventure 02. Arukenimon and Mummymon are also shown hanging out on a swing set when they begin questioning Oikawa's motives and their own existence, since Oikawa created them using his own DNA ("I can't help but remember that conversation with BlackWarGreymon. He's a Digimon, and Oikawa's a human, so what are we supposed to be?")
* Digimon Adventure 02, as he mostly stays in the computer room or gives them advice.

* Digimon Adventure 02 as our heroes go from the human world to the Digital World. The characters introduced that season change clothes on the way, but members of the elder team left over from the previous year stay as they are.
* Digimon Adventure 02 being in effect; Submarimon is perfectly capable of making you eat missiles out of the water.)
* Digimon Adventure 02 born with the power of fluent, coherent speech after all. Fortunately, he discovers Wormmon's egg, which then hatches with all his memories intact and forgives him pretty much instantly.
* Digimon Adventure 02, but luckily, it turns out not to be the real Digidestined at all.
* Digimon Adventure 02 can't fight the new villains and the newcomers are needed.
* Digimon Adventure 02, Chidori is stated to be the only female member of the 5 Original Digidestined group.
* Digimon Adventure 02, Cody directs this at Yolei in reaction to her increasingly-obvious crush on Ken.
* Digimon Adventure 02, Daisuke (Davis), V-mon (Veemon) looks Patamon digivolving to Angemon
* Digimon Adventure 02, Daisuke spaces out after his crush Hikari angrily tells him that she can't stand people like him, imagining a flower being plucked with a "She loves me, she hates me..." recital. The vision ends with the flower disintegrating and a wail of "She hates meeeee!"
* Digimon Adventure 02: Davis' Digimon partner is Veemon, a humanoid blue dragon-type Digimon with two legs, two arms, and a tail.
* Digimon Adventure 02 declaration that he can prove he's better than the villain of the week at their signature skill.
* Digimon Adventure 02 does this in episode 12 as a gag near the end of the episode. It's in the two pair form, and with aces.
* Digimon Adventure 02: During the first scuffle with the Daemon Corps, SkullSatamon lifts a bus full of schoolchildren and threatens to throw it. At this point he's pretty much already routed the heroes, so he's doing it for no reason other than shits and giggles.
* Digimon Adventure 02 episode "Guardian Angel", after Pegasusmon is taken down by Andromon, he De-Digivolves back into Patamon, lands in T.K.'s arms and says, "I'll have two cheeseburgers and a large order of fries."
* Digimon Adventure 02 find themselves travelling around the world to take down black spires planted by the villains.
* Digimon Adventure 02: Greymon becomes SkullGreymon again when the Digimon Emperor captures him using a Dark Ring and tries to make him digivolve into MetalGreymon. After some tests with the newly improved Dark Spiral, the Emperor is able to make Agumon digivolve into a corrupted form of MetalGreymon called MetalGreymon (Virus). Ironically, it was later revealed that the Emperor himself was the victim of a corruption in the form of a Dark Spore.
* Digimon Adventure 02 had Davis getting split up from his friends, then finds himself at the mercy of the Digimon Emperor because he captured his friends. The captives on display are actually disguised Bakemons, and Davis gets reunited with his friends who were never even captured at all.
* Digimon Adventure 02 had the kids and their mons let themselves be locked up in one of the Emperor's prisons to they could organize a jailbreak.
* Digimon Adventure 02 had the main humans yelling "Digiarmor energize!" to trigger armor evolution, though this is occasionally skipped over in the interest of time.
* Digimon Adventure 02: Happens in the first couple of episodes in the series.
* Digimon Adventure 02 has forms of Guilmon as Digimon elementary school students.
* Digimon Adventure 02 has stated that there's Digidestined in every country. We just didn't get to see all of them because it would've expanded the series by a good hundred or so more episodes.
* Digimon Adventure 02 has this with Mimi when the Roachmon brothers have ruined her designer blouse by covering her with garbage.
* Digimon Adventure 02 have power equaling that of a(n) Ultimate/Mega.
* Digimon Adventure 02 have red and pink clothing respectively. Yolei also has

purple hair and in the epilogue is married to Ken who has blue hair.
* Digimon Adventure 02 have "villains" who think they're basically playing a video game and not really hurting anyone doing so. Neither one takes it well when they realize they really did hurt a lot of innocent victims.
* Digimon Adventure 02 held up to it. (The old-school digivice used by the original team could only access the Digital World from certain computers at certain times. If the gate closes, you're out of luck. The new kids can come and go at will, though.)
* Digimon Adventure 02 he looks at his hands and says this as he's wallowing in self-pity about the things he did as the Digimon Emperor.
* Digimon Adventure 02, he was able to digivolve Wormon into Stingmon and was able to DNA digivolve with Davis with the two being the only ones on the team to achieve mega form. He also got to seal away Daemon.
* Digimon Adventure 02, he was also the last to receive his D3 Digivice (although this time along with Hikari) and his digimon was the last to achieve DNA digivolution/Jogress evolution (this time, along with Iori).
* Digimon Adventure 02, his test results drop somewhat, and while he himself is quite shocked if aware of what's going on, his classmates are thorougly confused and concerned.
* Digimon Adventure 02. In this ending, the cast is shown as adults, with each of them having kids and a nice job, along with their Digimon partners.
* Digimon Adventure 02 is called the "Samurai of Sincerity", but all of his bells and whistles (the Kusanagi on his back, his heavy use of shurikens, his ability to move undetected in a flurry of leaves) all point to him being a ninja.
* Digimon Adventure 02 is what made Ken a genius, so theoretically, with the spore dormant...
* Digimon Adventure 02, Ken and Miyako are married with kids, as are Yamato and Sora.
* Digimon Adventure 02. Ken immediately breaks into angrily calling Takeru "Maggot!" repeatedly, prompting Takeru to ask if that's all he can say.
* Digimon Adventure 02—much to everyone's amazement. In the more traditional use of the term, this was also implied to be when Sora and Yamato/Matt started dating.
* Digimon Adventure 02 might qualify for this. The Dark Spores increase the intelligence and physical abilities of their hosts, but they also warp their personalities into something evil. The thing is that the Dark Spores feed on the darkness that their hosts already have in them. Overcoming said darkness and discovering the light in them reverses the effects of the Dark Spores.
* Digimon Adventure 02 Miyako getting together in the epilogue also fits this trope.
* Digimon Adventure 02: Motomiya Jun/June is this to good-looking Ishida Yamato/Matt. She's a fan of his music, but he doesn't return an iota of her interest and is exceedingly unhappy with the attention. (Also worth noting that she's in high school, and he's in eighth grade.) The other kids' response to him being stuck on a bus with her for several hours? Laugh. It's hard to imagine this being remotely funny if you reverse the genders.
* Digimon Adventure 02 of the lots red and make him choose first. Not being stupid, Cody smacks Yolei's hand so that she drops them and exposes the deception, so his friends just bodily pick him up and force him out anyway.
* Digimon Adventure 02. Oh, and then there was the Dark Ocean master and this guy called Daemon thrown in there somewhere, although they never received any plot resolution.
* Digimon Adventure 02 seemingly ends on a happy note – bad guy is dead for good, the DigiDestined get to keep their Digimon, even Oikawa gets redeemed in the end. But what many overlook is that the ending says every human on earth gained their own partner Digimon, which leads to all kinds of disturbing implications. Just imagine how much damage a Digimon could do in the hands of a criminal or a dictator.
* Digimon Adventure 02 seems to imply that they eventually have some kind of

relationship: she visits him on Valentine's Day and gets introduced to his parents.
* Digimon Adventure 02, team leader Davis is convinced that all of his friends have been captured and will be mauled by a rampaging Digimon unless he gets down on his knees and begs for mercy. Oddly for a kids show, Davis complies immediately and without embarrassment and is never judged for it - on the contrary, it's Davis' immunity to pandering or attacks on his personal pride when more important things are at stake that allows him to save everyone in the final battle of the series.
* Digimon Adventure 02 the characters get blasted into another dimension that makes wishes into reality. When they ask for more power they split off into all of their alternate forms. For example Davis is able to summon Veemon, Flamedramon, Raidramon, Exveemon, Paildramon, and Imperialdramon in both dragon and fighter modes all at once where in a regular battle Veemon would only be able to transform into one of the above. Multiply this by the 6 main characters and they form a small army.
* Digimon Adventure 02: The Digimon Emperor goes into the Dark Whirlpool or something like that and extracts data from Devimon, who was destroyed by Angemon in Season 1. While good Digimon are reborn whenever destroyed, it appears the evil Digimon go here.
* Digimon Adventure 02, the Digital Kaiser/Emperor was armed with a riding crop, which he frequently used on his partner (Wormmon) and other mind-controlled minions. It wasn't particularly effective in fighting Takeru/T.K.
* Digimon Adventure 02) The English and Spaniard dubs renamed her Rosa, and the Latin American dub Guadalupe (a stereotypical Mexican girl name if there is one). In the English dub of the same arc, the Australian boy Dingo becomes Derek.
* Digimon Adventure 02 the few times Kari has access to Angewomon, Angewomon carries Kari in this fashion when getting around. Previously when Kari was smaller Angewomon would hold Kari under her arm or Kari would ride Angewomon's back.
* Digimon Adventure 02, the partner Digimon are almost only ever seen eating sweets and junk food.
* Digimon Adventure 02: The Story We Never Told. And thus this fan fiction is born.
* Digimon Adventure 02: The Story We Never Told is broken up into several arcs: the Digimon Emperor arc (Chapters 1-18), the Spire-Born arc (Chapters 19-30), the Regaining The Crests arc (Chapters 31-41), the Dark World arc (Chapters 42-51), the Digimon World Tour arc (Chapters 52-58), the Invasion of the Deep Ones arc (Chapters 59-61), and the Secrets Uncovered arc (Chapters 62-70).
* Digimon Adventure 02: The Story We Never Told, this is how the Emperor makes his debut to Davis in chapter 2.
* Digimon Adventure 02, the three new characters, Davis, Cody, and Yolei, each get a new set of clothing whenever they appear in the Digital World. This never happened to the original eight from the previous series, and it does, in fact, confuse them. When they go to the Digital World, they're always shown keeping whatever they happened to be wearing that day... until the end of the Digimon Emperor arc, where T.K. and Kari get new outfits for summer, but the Digital World always magically puts them in their spring/fall outfits they wore at the beginning of the series. This happens to Ken, too, where he's always changed into his school uniform.
* Digimon Adventure 02, they go around the world in this manner, dealing with the global outbreak of Digimon appearances. (Subverted somewhat in that each group teams up with regional Digidestined.)
* Digimon Adventure 02. They involve Ken and several other local children being abducted and Ken's teammates (most of whom are between the ages of eight and eleven) chasing the villains' truck overnight to rescue them. The episodes are still available as part of the season DVD set and on streaming services.
* Digimon Adventure 02, this is how Ken discovers that his new kitten is male.
* Digimon Adventure 02, though accompanied by a light blush this time — from both of them.
* Digimon Adventure 02 TK maintains a blog, and is in regular contact with his Digidestined colleagues who live all over the world.
* Digimon Adventure 02, uses an illusion mist attack that places the Chosen

Children in worlds where their greatest dreams came true: TK sees his family together and happy, Kari is in a world where humans and Digimon coexist happily, Cody is reunited with his deceased father, and Yolei is an only child with all the perks including a large number of sweets. On the flip side, Ken, who suffers from insane guilt for his actions as the Digimon Emperor, sees his Emperor self being tortured by the Digimon he abused. It takes their Digimon partners to snap their respective humans out of their illusions. Incidentally, the only child who wasn't affected was Davis, who has no serious desires or problems with his life, much to MaloMyotismon's surprise.
* Digimon Adventure 02: V-mon does incredibly silly things with chocolate eggs, spontaneously spawning the other partner Digimon to pose as a team.
* Digimon Adventure 02 was a female character. Oddly enough, they frequently referred to her as "Daisuke", even though that's technically a male name (but many of the authors shorten it to "Dai" to make it more feminine).
* Digimon Adventure 02, wears a purple bandana and he wields a machine gun that shoots lightning. He has a human form which is a grey-skinned man with one eye and sharp teeth, carries a cane and wears a blue mantle and blue hat.
* Digimon Adventure 02, when Greymon and Angemon fight a trio of digimon at Versailles Palace in France, who smash through a window to take the fight outside, causing TK's grandpa to cry "Hey, use the door next time!"
* Digimon Adventure 02 when Yolei/Miyako teasingly suggests to Davis/Daisuke that Kari/Hikari and TK/Takeru are out on a date when both were not present in a group meeting. It turns out that both weren't even at the same place, with the former hanging out with her Digimon and the latter napping.
* Digimon Adventure 02, while Arukenimon is quite tall in her human form, her (non-romantic, though he sure would like to be) partner Mummymon significantly towers over her. The height difference shrinks somewhat when they're in Digimon form, although Mummymon still has at least a head over her. Also since they are older than in the previous series T.K. is now this to Kari.
* Digimon Adventure 02 who just wants to impress a girl he has a crush on.
* Digimon Adventure 02 with the Dark Ocean, Kari is at one point inside a tunnel when part of the ceiling collpases. The bricks that fall are a shade lighter than the ones that don't.
* Digimon Adventure 02, Wormmon still stood back and and did nothing while Ken enslaved and tortured countless innocent Digimon. In "United We Stand," he states outright that because of this, he's just as guilty for the Emperor fiasco as Ken himself.
* Digimon Adventure 02 would have thought twice about leaving them all in plain sight and in the same city. Then again, they never counted on anyone wanting to destroy them, much less capable of doing so.
* Digimon Adventure: (2020) features a round of this between Etemon and Volcamon.
* Digimon Adventure: (2020) has Digivolutions mostly take place in real time instead of using stock footage (with the exception of Agumon from episode 4 on). In the very first episode, Agumon stops his enemy's attack mid-Digivolution and completes the transformation to Greymon while restraining the enemy at the same time.
* Digimon Adventure: (2020). Notably, this gives it power comparable to the villains of the next few arcs.
* Digimon Adventure: (2020) that takes creative liberties with the original while also requiring new viewers to have knowledge of the previous incarnations of the franchise.
* Digimon Adventure: (2020) updates the setting to 2020 instead of 1999, which means smartphones are everywhere and Izzy's signature laptop now doubles as a tablet.
* Digimon Adventure: (2020), WereGarurumon is able to upgrade to Sagittarius Mode, which gives him eight detachable mechanical wings that can become many other things including laser-blades.
* Digimon Adventure. After being called out on it as to if she even cares about her friends...

* Digimon Adventure: A guy with a beer sees a couple of giant Digimon fighting...and simply laments that he's wasted his life.
* Digimon Adventure. Amusingly inverted in one dub that mistook Iori/Cody for a girl and dubbed him as such.
* Digimon Adventure and flee. If he'd attacked as soon as he saw them he might have won then and there, but...
* Digimon Adventure and used mainly for combat (called "Fighter Mode"), while the other was a quadruped with a domed glass-like shield on its back which it could carry passengers in.
* Digimon Adventure and wants to go out and play soccer and her mother wants her to be a "proper" young lady, stay in and learn flower arranging. As such, Sora came to believe her mother was disappointed in her and didn't like her (hence the angst).
* Digimon Adventure and were sent to find the Eighth Digidestined, but they ended up liking Earth so much they turned on him. They get imprisoned by Miyotismon for their disobedience.
* Digimon Adventure, Angemon and Angewomon make absolutely sure that Myotismon has no remorse for any of his evil deeds before killing him.
* Digimon Adventure, Angemon's first appearance has him put all of his power, along with much of the other Digimon's power, into one attack to destroy Devimon. It works… and Angemon is immediately reincarnated as a Digi-Egg, though Patamon doesn't reach that stage again for almost thirty episodes.
* Digimon Adventure. Angemon's "Hand of Fate" is his hand glowing with divine light which he proceeds to punch at the enemy. Angewomon has "Heaven's Charm" which works very much the same way.
* Digimon Adventure attack that Mugenmon assumed had missed. Wargreymon charged straight through Mugenmon without leaving a visible scratch and reverted to Koromon on the other side. Queue Mugenmon taunting the uselessness of the attack, followed by promptly falling into several pieces. As the dub put it:
* Digimon Adventure believed he had killed the DigiDestined by burning down the beach hut they had been hiding in, he remarks:
* Digimon Adventure both featured fights between Angewomon and (two different) LadyDevimon near their respective climaxes. Much hairpulling and slapping ensued.
* Digimon Adventure bringing them front-and-center. Gennai does a good job rebuilding the Masquerade on a worldwide scale the first time, but the kids are met with considerably less success when they try to re-pull the wool over their parent's eyes (they try, but their parents have better memories than they think).
* Digimon Adventure by DemiDevimon as TK saw Tokomon strike (not knowing that DemiDevimon started it) and abandoned him along with his crest and digivice.
* Digimon Adventure by, sensibly, running to the side. When it it actually start chasing them, though, the trope promptly kicks in full force. Later, in Episode 49, it shows up again as they are fleeing a balled-up Waru Monzaemon.
* Digimon Adventure canon the Digital World is made from computer data and the dreams of children.
* Digimon Adventure: Cards of the seven (at the time) partner Digimon pile up before reforming into a picture of their evolved forms posing as a team.
* Digimon Adventure: Cherrymon tries to prey on Matt's feelings of insecurity to get him into a fight against Tai, so as to get WarGreymon and MetalGarurumon to hopefully kill each other. While it ultimately failed, the aftermath of that battle did cause the group´to temporarily split up.
* Digimon Adventure, complete with raunchy noises taken out of the English dub (Digi-Sludge!).
* Digimon Adventure cooking and once mentioned his favorite toppings for eggs being mustard and jelly beans. Mimi and her family also have very unusual tastes in food too, such as kimchi fried rice topped with whipped cream and strawberries, eggs with maple syrup, and asparagus topped with whipped cream and jelly beans.
* Digimon Adventure could count as an example of this, since the summoners were "totally blind that [these guys are] going to need a lot of training to be useful."
* Digimon Adventure, Datamon captures Sora and soon afterwards makes a copy of her to use against Etemon, thinking Biyomon will fight for him.

* Digimon Adventure: Dave Guerrie, a post-production coordinator, voiced several characters throughout the show, most notably Machinedramon.
* Digimon Adventure, develops a second face in his lower abdomen, and this proves to be his weak spot.
* Digimon Adventure) did a lot of compressing of the 54 episode series into 5 books. Fillers (and some non-fillers) are skipped or compressed to a one page recap and some alterations are made to combine events. The adaptation of season 2 manages to compress the 50 episode series into two volumes.
* Digimon Adventure did this a lot. One of the more notorious examples is from early on, with Matt saying "We're caught between a rock and two sets of teeth!" both before and after the commercial break.
* Digimon Adventure digimon to reach Mega Level among the eight Chosen children. However, before said highest evolution, their younger siblings' partner Digimon were by far the strongest and the most effective against the villains. This is because Kari and TK's Digimon were Angelic in nature and naturally effective against evil and wicked Digimon.
* Digimon Adventure does this to the Chosen Children; the good news is that there's an eighth child, whose Digimon can help the kids defeat Myotismon. The bad news? Myotismon knows about this Eighth Child and is going to Earth to kill them!
* Digimon Adventure, during the final battle against Piedmon and his army of Vilemon, a few Vilemon chance some small digimon (Otamamon and Gekomon) as they all go off screen. Then the Vilemon run back on screen, chased by three much larger digimon.
* Digimon Adventure, each of the 7, (and later 8) chosen had their own partner Digimon, Virtue, Color and Element. They also all paired up with each other nicely, (Tai/Matt, Sora/Mimi, Izzy/Joe, TK/Kari)
* Digimon Adventure episode 21 was directed by Mamoru Hosoda, who made the first two Digimon films. The quality of the artwork was considered by many to be a huge improvement, but Hosoda only directed one episode due to creative differences between his style and the style of the series as a whole.
* Digimon Adventure episode "Princess Karaoke", ShogunGekomon is incorrectly referred to as Shogunmon. The French dub, which dubbed over the US, corrects his name to ShogunGekomon.
* Digimon Adventure, Etemon's base is an upside-down pyramid, which connects to an underground octahedron (think two pyramids connected at their bases).
* Digimon Adventure. Even if he compresses his hair under a helmet, his helmet hair will go back to its original shape like nothing.
* Digimon Adventure falls into this rather frequently. Near the end, she had a nervous breakdown about how she feels like she couldn't live up to everyone's expectations of her achieving this role.
* Digimon Adventure fight over leadership, thinking of responsible things like how they will get food, what best course of action to take, and how to keep the group together. Tai later matures up later in the season as well.
* Digimon Adventure for the first quarter of the season. When he's defeated, he reveals that there are other, more powerful enemies out there, and gloats at how the heroes only barely defeated him.
* Digimon Adventure from Koushirou that allowed him to see dimensional distortions, retroactively giving him useful goggles before Takato's.
* Digimon Adventure Gerry Meza), Matt and Agumon (Uraz Huerta), and T.K. and Biyomon (Lupita Leal).
* Digimon Adventure has a more serious example. Gabumon take his coat off to keep an unconscious Matt warm. When Matt wakes up Gabumon quickly grabs his coat and puts it back on. Followed by Matt saying "I didn't know you could do that." Justified, in that Gabumon is actually a reptile, wearing fur from his evolved form, Garurumon.
* Digimon Adventure has four such atrociously bad singers: Tai, Joe, Gomamon, and Agumon. They try to wake up a sleeping Digimon with their singing and are absolute and hilarious FAIL.
* Digimon Adventure has the characters split into teams and play shiritori with

song lyrics.
* Digimon Adventure has Wizardmon. All we ever learn is that he used to be a loner until one day he collapsed in a desert and was given water by Gatomon, which lead to him joining Myotismon in order to stay by her side, but that's it. A CD Drama set before the series just raises more questions - it reveals that he isn't a native of the Digital World, but never explains just WHERE he's from or HOW he got to the Digital World in the first place.
* Digimon Adventure) have left their mark on him. The latter of which may cause him to go violent if there is the threat of his friends getting hurt.
* Digimon Adventure", he gets mad... because he's insulted that she called him short.
* Digimon Adventure, he was dubbed as one that put the entire rest of the series put together to shame.
* Digimon Adventure: Hikari/Kari and Tailmon/Gatomon. Kari should've joined at the beginning with the other Digidestined, but was sick and missed the event when they all got sucked in together. As a result, her partner was abducted and raised by one of the later villains.
* Digimon Adventure his past really like? Where did he get his truckload of powers? What is it that makes him different from most Digimon? What was his relationship with Tailmon like?
* Digimon Adventure: In the last story arc, the Digital World is transformed into a huge pyramid with four distinct biome strips — ocean, forest, city and wasteland — twisted in a spiraling shape.
* Digimon Adventure Inverts this with Izzy. His curiosity drives him to acquire knowledge and understand the digital world, and when he has that stolen he becomes a zombie until his partner snaps him out of it.
* Digimon Adventure is a blue-and-white werewolf in spiky clothing. He is an inversion of the "classic" werewolf; he is the evolved form of Garurumon, and since Garurumon regularly powers up by evolving into Were-Garurumon, we have a wolf that becomes a werewolf, as opposed to a man becoming a werewolf. Then everything gets thrown out when Were-Garurumon's evolution is Metal Garurumon, a robot form of Garurumon. Metal Garurumon X on the other hand retains the werewolf shape under the armor.
* Digimon Adventure is a single life-form created from the collective data of all Digimon who died in failed attempts to evolve.
* Digimon Adventure is August 1. The fandom hails that day, therefore, as "DigiDay".
* Digimon Adventure is notorious for this trope, though it is far more common in the English dub than in the original Japanese.
* Digimon Adventure is one of the physically weakest Mega levels of all, but his special skills means he's able to keep pace with the physical powerhouse Wargreymon and even take control of him. Note, that he's only weak for his level, he'd beat most ultimates physically.
* Digimon Adventure: Last Evolution Kizuna makes it a lot more personal; because the group has grown up and quickly approaching adulthood, the spark that powered their Digivices when they were kids is starting to fade and in turn, their partnership with their Digimon will soon end. With a new Digimon going around and assaulting new DigiDestined, the group only has a limited time to stop them before they can't do anything to help. And every Digivolution only shortens the time they have left...
* Digimon Adventure: Last Evolution Kizuna says that it's still canon.
* Digimon Adventure: Last Evolution Kizuna that disregards the film entirely.
* Digimon Adventure: Last Evolution Kizuna, when Taichi takes Agumon to his apartment, the latter sniffed instantly them out from under his bed. Fortunately, as a Digimon Agumon wouldn't actually know about these things, but still...
* Digimon Adventure: Last Evolution Kizuna, which went directly against one of the rules he'd established for that continuity; that being anyone can have a Digimon, regardless of age.
* Digimon Adventure, Leomon gets up and impales that crack... then collapses and

dies.
* Digimon Adventure — HolyAngemon didn't debut until 3 episodes before the end!).
* Digimon Adventure means most female Digimon are gonna end up like this at some point.
* Digimon Adventure, met his destruction was called "Piedmon's Last Jest". Of course, these examples could be considered inversions as they were able to successfully deal with the heroes only to be defeated when one of the members unlocked their digimon's newest evolution, thus giving them the strength to overpower the villains — in Piedmon's case, it was when Angemon was able to digivolve into his Ultimate form.
* Digimon Adventure movie makes a remark about Koromon's breath after he kisses him.
* Digimon Adventure, Myotismon creates a fog barrier that turns people around when they try to escape the city.
* Digimon Adventure, named Excalibur. His evolved form Seraphimon can also form one in a similar manner.
* Digimon Adventure offers a more literal example halfway through the season.
* Digimon Adventure) or just being nice with each other (Jou can easily raise his rank with the others during an early episode). Everyone starts at Rank 1, except Yamato and Takeru who start at Rank 3 due to being brothers.
* Digimon Adventure, Palmon's Ultimate digivolution, Lillymon, has vines growing out from under her flower-like hat that look like hair.
* Digimon Adventure", Piximon's training regimen for the Digidestined and their Digimon partners is to have them scrub every floor in his dojo and to refuse to give them anything to eat until they do so.
* Digimon Adventure reached their current forms. He is filled with their combined pain and misery and wishes to wreak misery on the entire world — both of them — because... misery really does love company, apparently.
* Digimon Adventure revealed that there was a group of Digidestined that saved the Digital World far before Tai and company came to the Digital World. To this day, not another word has been mentioned of them. Speculation of who they were continues to this day.
* Digimon Adventure says this in a throwaway line. Like a lot of stuff in the dub, it sort of disappears into the ether after that.
* Digimon Adventure second ending, "Keep On", showcases all eight of the original Chosen Children/DigiDestined and their respective partners' forms. The first episode this is used in is episode 27, meaning the ending spoiled four Perfect/Ultimate levels, Hikari/Kari being the Eighth Child, Tailmon/Gatomon being her partner, and the existence of the then brand-new Ultimate/Mega level.
* Digimon Adventure series, they ran into a bunch of payphones and, overjoyed, desperately tried to call their homes. Unfortunately, when they tried, all they got were a variety of non-sequiturs from the operators, including "The number you are currently dialing exists only in your imagination" and a weather forecast of "partly cloudy with a slight chance of ice cream".
* Digimon Adventure, she states "It's the first time I've used flour to make a cake", when Izzy asks if he's put in enough. It gets burnt in the microwave, anyway.
* Digimon Adventure: Shows up in the Digital World when Jou briefly skids offscreen in Episode 11, hitting what is presumably a cat-like In-Training/Baby II stage digimon.
* Digimon Adventure's Metal Garurumon used Ice Wolf Bite, an attack spamming freezing missiles, and cool (no pun intended) enough to be featured in his transformation sequence.
* Digimon Adventure, so to travel, Sora generally has to dangle from one of her legs. Garudamon, while not constantly on fire, has an attack that briefly encases her in flames, so Sora generally tends to get a ride with another Digidestined while Garudamon's in battle, like Izzy and MegaKabuterimon.
* Digimon Adventure. Tai and Izzy rush into a room to save Mimi who has just been

carried off. Sora notices Mimi's dress on the floor and calls for them not to go in there. Naturally, they catch Mimi in the bath and get hit with various bath oil bottles.
* Digimon Adventure, Tai gets tickled by his teacher after remarking that he could be an evil Digimon
* Digimon Adventure, Tai Kamiya is a soccer player who apparently doesn't play much else. He was rather prone to mixed sporting metaphors, such as "Bases loaded, two outs! And we need a slam dunk!"
* Digimon Adventure that had already wiped out the rest of the team combined (Against which his partner's holy powers are significantly useful).
* Digimon Adventure: The Dark Masters warp the Digital World to their liking, forming the Spiral Mountain, consisting of four sections, one for each Dark Master to rule according to their environmental preference. As a consequence, previous locations in the Digital World got destroyed, such as Primary Village, the place where Digimon are born.
* Digimon Adventure: The Digidestined nearly do this at the end, not wanting to be separated from their Digimon but are ultimately convinced to go back. Luckily the separation doesn't last long.
* Digimon Adventure, the digievolution is distorted and Greymon becomes the evil SkullGreymon.
* Digimon Adventure the first few seasons the new members only fought mind control victims (that they freed) and artificial control spire enemies which they had no problems destroying since they weren't real. Towards the end of the series, all three of the new recruits this season are forced to kill at least one real enemy, which shakes them up.
* Digimon Adventure, their Mega forms are an angel in blue armor and a dragon with pink fur respectively. On the human side, we have Tai who wears a blue shirt and Mimi who wears a pink hat and even dyes her hair pink in the sequel show. Tai's little sister Kari also has some pink in most of her clothing.
* Digimon Adventure, the kids need to figure out that the traits which powered their Digimon were part of them all along and they didn't need the Crests in the first place.
* Digimon Adventure the "PiBook" in fandom. Averted in the short Anime Movies, which all use real computers running a Windows 95 variant and are accurately branded as such.
* Digimon Adventure, there were several instances in which Gomamon's Marching Fishes technique could have come in handy, especially since he was seen in the first episode carrying the entire group down a river on the fishes.
* Digimon Adventure. The wacky weather is worldwide during the season — in addition to the August snowstorm in the first episode, there is also extremely dry conditions in Southeast Asia (where it would normally be monsoon season) and more snow in the US.
* Digimon Adventure, the youngest of the Digidestined, whenever he needed him.
* Digimon Adventure, this is done again (this time in the "real" real world, where Seasons 1 and 2 were a TV show). But again, at the end, it's hinted that this isn't permanent.
* Digimon Adventure, this is played with. Wizardmon successfully lies that he is going to relieve Bakemon, and talks him into handing over the key to Myotismon's coffin.
* Digimon Adventure, though they're both good guys, and nobody ever comments on their mouths (which they can still stretch open). There is also no mutilation involved, as this is their natural form, which certainly takes most of the horror away.
* Digimon Adventure, time originally passed very quickly in the Digital World meaning that the gang could spend several decades (or maybe centuries, Izzy calculated it in the last episode) in the Digital World while only a month or two would pass in our world. However, time in the two worlds were synchronized after the final boss was destroyed.
* Digimon Adventure to glow, evolving Ikkakumon into Zudomon and saving both of

them.
* Digimon Adventure to not only reassemble themselves after he digitized them but allow their Digimon to Digivolve to their strongest forms without their crests.
* Digimon Adventure to separate during the Dark Masters arc (during which one of the split groups was briefly split even further when Mugendramon blew up a skyscraper on them, casting them into different parts of the city's sewers) and don't completely regroup until the absolute last minute.
* Digimon Adventure to the new heroes, but with the exception of the two youngest, they make a big point of not participating in the struggle. The big justification here has more to do with the fact that they're simply too busy to do so now that life is catching up to them; hell, Mimi doesn't even live in Japan anymore.
* Digimon Adventure to the rescue, as they form a force field to contain the explosion.
* Digimon Adventure. Toward the end of the show, his status is lampshaded, with Leomon pointing out that Devimon was nothing compared to the threats that the heroes have faced since. And considering how Devimon is a Champion level Digimon, and everyone faced after him was either Ultimate or Mega level, he's right.
* Digimon Adventure). To wit, he is seen putting himself protectively in front of Hikari (episode 3), seemed angry at himself for accidentally leaving her stranded in the Digital World (episode 7), and doggedly searched for her when she was taken by the Dark Ocean (episode 13).
* Digimon Adventure tri. against Digimon running rampant, Mimi impulsively decides to fight a rampaging Ogremon in front of the press, hoping to prove to the world that not all Digimon are bad. Unfortunately, during the fight, Togemon accidentally shoots down a news helicopter, which only ends up making public opinion against Digimon even worse.
* Digimon Adventure tri., but conventional military forces against a fifty-foot tall thing?
* Digimon Adventure tri., due to the anvilicious nature of their reveal.
* Digimon Adventure tri. government task force that recognizes the Digidestined's role in the crises, and are willing to give a helping hand.
* Digimon Adventure tri.: Meiko and Meicoomon. Unlike all the others, the series is only one-sixth of the way done by the time they're officially inducted, but the fact that the other eight have been a team for more than half a decade makes up for it.
* Digimon Adventure tri.'s announcement to celebrate the fifteenth anniversary of the franchise excited numerous longtime Digimon fans. The release of the first movie (or first four episodes) not only earned a lot of money, but it was favorably received by the fandom. Many fans are looking forward to future movies.
* Digimon Adventure tri.: Since the first three films are astoundingly tight-lipped on just what the hell is going on, in the fourth the Mysterious Man and Hackmon take turns explaining things, the former as he's trying to kill the main characters.
* Digimon Adventure, Vademon summons a planet (complete with rings) to keep AtlurKabuterimon (MegaKabuterimon) away. The insect Digimon promptly blows it up.
* Digimon Adventure was when Tai tried to force Greymon to reach Ultimate level so he could defeat Etemon resulting in Agumon digivolving into his corrupted Ultimate form, SkullGreymon.
* Digimon Adventure was written so that it could end cleanly after 13 episodes. It didn't have to, and ultimately ran to 54 episodes, and seven more seasons followed after that.
* Digimon Adventure watching the other three get obliterated one-by-one. And that's not taking Myotismon, Etemon and Devimon into account.
* Digimon Adventure, we had Tai and Matt's big and spiky hairs. Amusingly in the dub, their hair is often made fun of both by the other Digidestined and each other. (The original never made fun on their ridiculous hairstyles.)
* Digimon Adventure, when DemiDevimon tells him that Garurumon digivolved to WereGarurumon.
* Digimon Adventure when she stares down three Garbagemon without flinching.

* Digimon Adventure, when the very climactic battle against Myotismon takes place on top of Fuji TV Headquarters (known for its unique design by the architect Kenzo Tange) but neither the building nor its massive metal ball is (seriously) harmed. Incidentally or not, Fuji TV is the channel that broadcasts Digimon in Japan.
* Digimon Adventure where he had mostly been a total ass, Tai offered Izzy, who had been the main target of Tai's aggression, a free shot as a way of apologizing. Izzy shook his head and explained that he understood what Tai was going through and that there was no need for violence, leading to Izzy's not-so-forgiving companions offering to do it for him.
* Digimon Adventure where Tentomon tells Izzy that his Mother is "very pretty for a human".
* Digimon Adventure", where Vademon tells Izzy that his curiosity makes him greedy and will have him sent to Hell ("a very unpleasant place", he says).
* Digimon Adventure: While she is not short by any means Angemon is this to Angewomon. Also reversing the role Kari is this to T.K..
* Digimon. After the Tamers see first hand what its like to have a sympathetic Digimon die, they start to find violence repulsive. This point is driven home by Meggidomon.
* Digimon: Agumon and Palmon are involved in a Digimon pyramid with other Digimon. In this case, they were forced to do it by Nanimon.
* Digimon, Agumon and Tentomon have this to say after getting their butts handed to them by Infermon:
* Digimon aired. The fandom also started thriving and becoming active due to people who hadn't engaged with the fandom since they were kids coming back in droves.
* Digimon, although behind the scenes he had in fact been developed with his anime counterpart simultaneously.
* Digimon and compared to Pumpkinmon is tall, goes well-dressed, has wings, and is more pleasant company. NoblePumpkinmon is in the possession of a staff with which they can conjure up pumpkin dishes.
* Digimon, and from then on, episodes are narrated by one of the previous year's characters!
* Digimon, a number of Digimon, including WarGreymon X, MetalGarurumon X and Dukemon X battle a never-ending swarm of Death-X-DORUguremon even as the Digital World falls apart.
* Digimon (Apocalymon, D-Reaper), your vampires (Myotismon), your phoenixes (Birdramon, Xiuqiaomon)...yeah, something for everybody. Even snowmen like Frigimon.
* Digimon are generally the ones whose partner Digimon reach one evolution level higher than the rest of the group. However, there are notable subversions and outright aversions in certain cases.
* Digimon are headstrong leaders, although Takato is usually a levelheaded leader, and Taichi and Daisuke both show elements of charismatic leaders.
* Digimon (at least the first two seasons) end this way. Season 1 was particularly bad about it.
* Digimon Battle Spirit expanded version. If you get to Milleniumon and beat him without losing once, it'll transform into ZeedMilleniumon.
* Digimon Battle Spirit setting, Sukamon's is an ice rink and Milleniumon's is some kind of industrial complex.
* Digimon: Children of Time and destroyed the facility where they were manufactured.
* Digimon: Children of Time, during his third year of high school, Tai suffered a leg injury during a soccer game that ruined his chances of going pro. By the time of the fic, his leg is still damaged, to the extent that the simple act of running is somewhat painful for him.
* Digimon: Children of Time, Ryo Akiyama is the heir to a yakuza group, and Rika's grandmother Seiko was once a mob wife.
* Digimon clone" and many don't even know there was anything outside of the first two anime.
* Digimon come to life. The children's game cards, when scanned through their

Digivices, would have real effects, too.
* Digimon craze. While it never matched Tamagotchi at the height of its popularity, Digimon did enjoy more longevity.
* Digimon Data Squad about the relationship, both because of the class difference and the fact that they never married and made it very clear she considered Tohma to be only partially a Norstein.
* Digimon Data Squad Digimon turn into eggs as well, but Kurata is revealed to have created a weapon capable of corrupting a Digimon's data, so that the Digimon dies permanently.
* Digimon Data Squad. Gaomon and Agumon get jetpacks as part of their evolutions to Machgaogamon and Rizegreymon, respectively. The former gets the jet part at the ends of the wings, while the latter has jets as part of the wings (and point away from his tail).
* Digimon Data Squad had a huge revolver arm transformed from his Rookie form's wrist straps.
* Digimon Data Squad' human partner. He attacks wildly until he finally runs out of power and reconfigures, reverting to an egg.
* Digimon Data Squad: Ikuto/Keenan & Falcomon, a wild child the core trio meets when they enter the digital world. It takes some time to get him to acknowledge them.
* Digimon Data Squad involves a variant of this, in that instead of the two just knocking eachother out their fight lasted until both collapsed from exhaustion.
* Digimon Data Squad, Kurata had two of these reactions, once when the DATS members regained their memories of their Digimon partners and managed to destroy another one of his Gizumon, and again when Ikuto got Falcomon to Warp Digivolve to Ravemon and injure Belphemon.
* Digimon Data Squad, Marcus' emotion get the better of him, too, forcing ShineGreymon to enter ruin mode.
* Digimon Data Squad: Marcus/Masaru stays behind in the Digital world with Agumon, even after the gate gets closed, presumably forever.
* Digimon Data Squad Men in Black lack the Black. Seriously, everyone in DATS wears brightly colored uniforms.
* Digimon Data Squad once they reach the top), but it's still awesome.
* Digimon Data Squad: The Digital World's sky is dotted with floating rocks and sometimes has electronic textures on it.
* Digimon Data Squad. This occurred during ShineGreymon's battle with MirageGaogamon when Marcus' dark emotions, fueled by his belief that his friend Thomas turned on them and joined Kurata, caused ShineGreymon to go through Burst Digivolution. ShineGreymon Ruin Mode went out of control until it regressed back to Koromon's Digi-Egg.
* Digimon Digital Card Battle. Funny thing is, his mask conceals his eyes behind a yellow film, so the eye popped out through the film. Lest the kids sleep tonight.
* Digimon - Dolphmon possesses advanced intelligence, but its form of thought is too complex for a normal person to understand.
* Digimon embody this trope, most notably Beelzemon, in both his blast mode and Xros Wars incarnation.
* Digimon finally brought this usage of the trope to a rest - all fusion and digivolution sequences are traditionally animated - and overall does a better job in avoiding it, with it only noticeably appearing in the first episode.
* Digimon franchise: All the lead characters have brown hair and brown eyes.
* Digimon franchise, when their human partner is in danger or everything seems hopeless against the enemy, one of the most notable examples is Gatomon becomes Angewomon for the first time after Myotismon kills her best friend Wizardmon.
* Digimon Frontier about what just what it is that makes it so hard on Kouji alone. Adding to this, Kouji and Kouichi most likely go through the most painful transformations of them all. This may be because the Beast Spirits bend their bones, flesh, and bodies to match their evolution. Everyone else is rather human-shaped while these two have to suffer a complete bone re-structure.
* Digimon Frontier also did this, but with a twist; they summoned a bunch of kids

but only kept around the handful that actually got some results.
* Digimon Frontier, AncientWisemon has an attack called Laplace's Demon that allowed him to rewrite the past and future by editing the akashic records.
* Digimon Frontier, as they were the only ones to get the top-dollar armor-up action figures. (Kouichi had one planned, but it was cancelled, leading to him making a few major appearances and then quickly dropping off in importance.)
* Digimon Frontier: A variant - at one point, JP gets pinched in the butt by a crab.
* Digimon Frontier carries around the "Monoshiri Book", literally "The Book of Knowledge", which has all the knowledge of the Digital World in it. However, it doesn't have data on things that have never existed before (including the final forms of the heroes and villain), and Bokomon makes it his life mission to add the missing information based on his travels with the Chosen Children.
* Digimon Frontier, episode 10 ends with a dedication to Maurizio Romano, Agunimon's first voice actor who died during production, as that was the last episode he was in.
* Digimon Frontier, eyelash difference is the only distinguishing feature between male and female KaratsukiNumemon.
* Digimon Frontier fanfic on Fanfiction.net where Takuya and the others, celebrating their one-year anniversary of their victory over Lucemon, decide to pull some prank calls on hapless citizens.
* Digimon Frontier has an episode like this. All of the kids, Neemon, and a villian each get onto a train. The episode proceedes as a big battle, with only Takuya completing the race.
* Digimon Frontier has Cherubimon acting as the main antagonist for the majority of the series, then Lucemon shows up.
* Digimon Frontier has Dynasmon and Crusadermon converting huge areas of the Digital World to raw data and feeding it to Lucemon. By the time they're done, all that's left are a planet-sized web of train tacks and tiny floating islets. Defeating Lucemon once and for all allows the Digital World to be fully purified and restored to an intact state.
* Digimon Frontier has had large chunks taken out of it by Digimon that were corrupted by Cherubimon, though the pieces that are still intact remain where they were. The Royal Knights arc sees the remaining areas destroyed until the Digital World is just so many floating bits of ground with railroad tracks running between them.
* Digimon Frontier. However, hitting things with her butt rarely did her much good.
* Digimon Frontier is historically (and has since continued being, save the below example) pretty good at avoiding filler or at least giving it tangential relevance.
* Digimon Frontier is the holder of the Spirits of Wind. Her Digimon forms, Kazemon (Fairymon) and Zephyrmon (Shutumon), use wind-based attacks.
* Digimon Frontier, it doesn't even have the destructive impulses that took other characters up to three episodes to get under control. This is slightly more excusable with the other Wind warriors, as one of them is supposed to be human, another is supposed to be half-human, and the last has no real requirements — but each form distinctly fails in the "Monster" part of "Digital Monster".
* Digimon Frontier just creepy: you expect the Dark Trailmon that you meet in the Dark Terminal during a hallucination caused by Duskmon, the Warrior of Darkness, after he ambushed you and kicked your butt on the Dark Continent to be a little... dark.)
* Digimon Frontier: Koji and Zoe wear blue and pink in human form, and their Digimon forms are also decked out in blue and pink.
* Digimon Frontier, Lucemon beats the shit out of the heroes by piledriving them straight into conveniently-placed moons. Said moons promptly explode.
* Digimon Frontier, Mercuremon's "face" is just a mirror with lips painted on it. No nose. No eyes. Just a mouth.
* Digimon Frontier: Only those pure of heart answered Ophanimon's call, and all of them were children.
* Digimon Frontier: Pictures of the five heroes surrounded by hexagons flash around

before focusing on one, turning into a picture of the hero and his Human-spirit form posing with the logo.
* Digimon Frontier's aide, Sorcermon, causing them to comment that "he looks just like Wizardmon."
* Digimon Frontier sephirot that traps the heroes in its spheres, each housing a whole pocket dimension that Mercurymon has control over.
* Digimon Frontier states that he wishes to create a utopia through the destruction of both the digital and the real worlds.
* Digimon Frontier states that most all monsters are sub races of Digimon, save a few, from the start.
* Digimon Frontier, taken to ridiculous levels in a show that had not made a habit of it before.
* Digimon Frontier technique. His later form, MagnaGarurumon, also wields a laser blade stored in its chest compartment.
* Digimon Frontier than actual romantic involvement since this is the only time he ever does this.
* Digimon Frontier, the Digital World is converted by the villains into data code region by region (explaining the mising "chunks" whenever a map of the Digital World is displayed), and then fed to Lucemon at its core until he is finally free. And Lucemon isn't planning on stopping there; for the brief moment he reached the human world, everything starts getting converted into data, meaning Lucemon plans to devour them as well. Fortunately the heroes drag him back to the Digital World to finish him off. Only when Lucemon is defeated did the Digital World return to its normal state.
* Digimon Frontier the following series, has Koichi. His backstory has him falling down a long staircase after chasing after Koji, and notably skips over how he got from there to being in the Digital World. More than once, when everyone gets injured and the barcode effect that represents their data is revealed, Koichi alone doesn't have any. One of the villains taunts by breaking it to him that it's because he's only a spirit. Similar to Shibumi, it turns out he's only in a coma and connected to the Digital World via his hospital equipment and he awakens in the finale.
* Digimon Frontier, the kids find that their Japanese yen is not accepted in the digital world and the inhabitants consider it junk.
* Digimon Frontier), then rerun for a few years before the creation of Jetix finally gave it a more favorable timeslot.
* Digimon Frontier thing going for them, there's even an episode named "The Brothers Yin and Yang."
* Digimon Frontier). Things don't get cleared up until they discover Grumblemon wants nothing to do with them as the kids are dangling from a cliff.
* Digimon Frontier, though, it's pretty clear they weren't trying to realistically render defibrillation anyway...
* Digimon Frontier though, where he keeps the same VA as Agumon, Geo Greymon, Rize Greymon, and Shine Greymon.)
* Digimon Frontier: Trailmon Worm is a living Digimon train with the features of insects such as multiple eyes and a segmented body (serving as the "cars"). Beetlemon's Beast Hybrid Form, MetalKabuterimon mixes Beetlemon's humanoid beetle features with that of an army tank, with cannons in his hands and tracks instead of wheels.
* Digimon Frontier used his goggles once to protect his eyes from a sandstorm in the Digital World.
* Digimon Frontier we had Tommy/Tomoki, a crybaby 9 year old for the first few episodes before starting to stand up for himself as a fighter.
* Digimon Frontier, when Takuya and Koji are preparing to fight Cherubimon, Izumi offers to go on a date with one of them if they win. During the fight, Takuya is knocked unconscious and has a dream sequence where he and Izumi are in a park on the promised date. Izumi is sitting back against a tree trunk, and Takuya is resting his head in her lap.
* Digimon Frontier, which acts as this for both the heroes themselves and the Ten

Legendary Warriors.
* Digimon Frontier, who is in his most powerful Digimon form, BeoWulfmon. Koji manages to get out of the attack's area of effect but is still caught in the resulting explosion which reverts him to human form. If Koji were not in a Digimon form at the time, the explosion would likely have killed him.
* Digimon Frontier who was trapped in a coma and corrupted by darkness initially.
* Digimon Frontier with the Trailmon right after presenting the logo of the show.
* Digimon Fusion act more mature than most adults, and they're only 13.
* Digimon Fusion and dies in episode 3, it seemed as though the writers just wanted to cover the obligatory death as soon as possible and move onto other things.
* Digimon Fusion, and even in episodes where Beelzebumon didn't appear, one of his other roles would often be there anyway.
* Digimon Fusion: Ballistamon is a humanoid robotic Digimon who's modeled after hercules beetles.
* Digimon Fusion debuted first by around a fortnight, the anime was announced and presumably in production for months beforehand and the manga specifically adapts it, so it still qualifies for this trope.
* Digimon Fusion, episode 39, Kiriha suddenly remembers to return a Digimemory he borrowed from Taiki, and Taiki agrees. Except that the borrowing never happened, and Kiriha hands over a small explosive device that ruins Splashmon's impersonation of Taiki.
* Digimon Fusion episode "Danger Erupts" has the heroes ambushed by an army of BlueMeramon and RedMaramon while they're relaxing in a hot spring. The scene memorably had Angie running while holding her clothes over her body and screaming "SOMEBODY COOL THIS HOTHEAD DOWN!"
* Digimon Fusion had MadLeomon, who had a chainsaw arm in his "Armed Mode."
* Digimon Fusion had this, not just to show that they were in another world, but that they went from one section of the other world to another section, with the Island Zone having a pattern in the sky and the Sand Zone having three suns of different colors.
* Digimon Fusion has a number of floating islands to go with its hilly terrain and most are large enough to have waterfalls. The characters never go anywhere near these. The Disc Zone and Heaven Zone are also large floating landmasses. The Heaven Zone is a floating pastoral region whose central town is home to angel and fairy Digimon. The Disc Zone is a floating mountain embedded with discs that actually collapses due to Kiriha/Christopher fighting the Bagra Army so intensely.
* Digimon Fusion has GrandGeneramon, a Chimairamon-like mashup of the Seven Death Generals with a centauroid design created by DarkKnightmon.
* Digimon Fusion in the series, which is, much as you'd guess, visually represented by an X.
* Digimon Fusion starts with heroic Digimon from all five previous series appearing to Taiki/Mikey in a dream sequence.
* Digimon Fusion. Surprisingly enough, Shoutmon averted this by having no "evil" powered side.
* Digimon Fusion, Taiki's catchphrase eventually spreads to the rest of his friends. It's not used nearly as much in the dub version, but often enough that the rest of the cast can finish it for him in the finale:
* Digimon Fusion there's the digimemories which have the data of legendary Digimon, and can summon them to use their abilities. But they can only be used once for each zone.
* Digimon Fusion who is not aware that he is this. He is both exceedingly athletic and intelligent, and has engaged various sports like a pro. Further more he is capable of forming brilliant strategies within a flash of a second in the heat of battle.
* Digimon Fusion: Xros Heart certainly qualifies. They may start out as only a few members, but they sure gain lots of powerful allies fast, and aside from that, they are all badass. They definitely prove this shortly before Beelzemon joins them, when the entire army is willing to risk their lives to protect their enemy, who also holds a grudge against the Bagura Army. And even after Ba'almon's death, he is

reincarnated as Beelzemon, and is a dozen times more badass after that, and joins Xros Heart.
* Digimon game, odds are that you're wearing a pair of useless goggles.
* Digimon games, Hydramon is a colossal and agressive Hydra plant that terraform its territory as a poisonous swamp.
* Digimon: Gankoomon of the Royal Knights, according to supplemental materials, wanders the Digital World putting a stop to anything unusual, in-between mentoring the younger Hackmon. This makes it different from every other Royal Knight, who only ever show up when the Digital World's experiencing disaster, and as a result Gankoomon has a lot of friends all over. Gankoomon is working hard to pass on his title of knight to Hackman, for whatever reason.
* Digimon, general consensus holds that this applies to three specific series:
* Digimon, helped by society's prevalent late 90s/early 2000s nostalgia.
* Digimon, Hikari had no hopes of being the team's leader despite her older brother having the role and her higher experience than the new cast.
* Digimon. His horn fires at the monster, immediately replaced by another that does the same, until four horns zip at the enemy... and miss. Then, when the enemy isn't looking, the horns open up revealing guided missiles that immediately turn around and tag the enemy.
* Digimon. However, once each season got to its more serious points, most of this stopped and it was more faithfully adapted.
* Digimon. If you get hit with the fire throw items or get hit by Impmon's fireballs, you'll get your rear set on fire.
* Digimon in general are fairly immortal, as most of them merely turn into Digi-Eggs after death.
* Digimon. In one episode, Davis tries to trick Veemon into Digivolving, and he does it by having a huge group of Numemon and Redvegimon pile up on each other wearing a costume that they put together. It was kind of obvious that the costume was not very well-patched, and the Numemon's eyes were clearly visible in some spots.
* Digimon In several instances, the characters do actually use them. The problem is that nobody else seems to ever be bothered by whatever condition prompts the current goggle boy to wear them.
* Digimon-inspired scarecrow with a plush crow on its right arm, but the crow actually is its true form. It's name is a reference to the henohenomoheji face.
* Digimon. In the broader canon, most Digimon have a wide variety of forms to which they can evolve, generally not restricted to specific lines, and so pretty much any and every Digimon can be an example of this.
* Digimon, in the movie "Our War Game", Infermon is smart enough to attack Greymon and Kabuterimon before they can finish digivolving. Later in the movie, when he's already fighting WarGreymon and MetalGarurumon, he Digivolves to Diaboromon and immobilizes Patamon before he can Digivolve and give him someone else to have to fight.
* Digimon is also a virtual life form, but one of the "malware" variety, bent on deleting everything it sees as a threat.
* Digimon is destroyed, it usually either spontaneously bursts or slowly disintegrates into computer data, which is usually given the visible effect of dust particles.
* Digimon isn't interested. Neither of them is particularly crazy, and she's willing to tolerate him unless he gets too touchy-feely.
* Digimon is often using it in a not too direct example, but still. In the first series (and second, and pretty much any) the Digimon would only evolve when the Chosen Children proved their specific most remarkable trait like love or honesty.
* Digimon is one of many consequences of these wildly different places coexisting.
* Digimon is replete with characters that have at least one evolution that fits this. Go ahead and try to find a season that doesn't, I dare you.
* Digimon is set in a digital world that in later seasons is accessed by a computer. The titular Mons have magical powers and many are based off mythical beasts.

* Digimon is the only one to be seen, and has completely lost his memory and old personality.
* Digimon killed in the physical world cannot be reborn as Digieggs as their data is locked out of the digiworld where they would need to go to do so. However if Wizardmon is any indication they aren't forever lost either, as he lingers around in the area he died as a kind of digital "Ghost"
* Digimon known as the Jyorogumo (prostitute spider), a spider demon that poses as a beautiful woman, often a hooker, to lure unwary men to its lair to be eaten and/or fed to its young. Presumably its "breasts" are something it evolved as a form of aggressive mimicry.
* Digimon) made it appeal to young girls as well, and the surprisingly well-written story ensured a strong adult and teen following since practically the beginning. Despite being both kid-friendly (for the most part) and anime, it's usually not one to shy away from epic fights to the death either.
* Digimon made up of the robot parts of other cyborg Digimon, including Metalgreymon. Although it was the strongest Digimon at the time of its debut, it lacks any soul and is programmed with pure malice.
* Digimon: Many Digimon in the franchise are robotic-based with a few individuals standing out in the anime adaptations:
* Digimon met really were golems, though it needn't go for the whole species.
* Digimon movie has been compared to a minstrel show for its facial features.
* Digimon Next, Yuu has a heart condition in the real world, which disappears when he's in the Digital World, leading to him not wanting to go back because he's afraid of the heart surgery awaiting him. He grows out of it eventually.
* Digimon. Often times it's someone's partner Digimon (such as ShineGreymon), though there are a few notable exceptions (such as Azulongmon).
* Digimon. Okay, Maybe in some of the games, but none of the animes has that.
* Digimon only look like toys, such as Puppetmon, Monzaemon and ToyAgumon.
* Digimon Re: Adventure would heavily imply that yes, the Agumon from the movie and the show really are the same one.
* Digimon received positive reviews at first but reception became more negative as the movies went on.
* Digimon regarding what had happened in that very day and how it all felt too perfect to be just a simple coincidence, all the while he infiltrates the DSI's R&D Wing, his internal monologue eventually going:
* Digimon re:GENESIS can't walk away from someone who needs help. Their teammates are not always so eager.
* Digimon re:GENESIS: In the epilogue, the series ends with the Sovereigns choosing to fix the last thing they left broken, and revive the digimon. Maybe.
* Digimon Re: Tamers dying in said chapter reflects the fact the author felt dead inside while writing that chapter because of the influence of his grandfather's death throughout all of January and parts of February.
* Digimon Rumble Arena features energy bar that when fully charged up, allows a fully evolved Digimon to perform its most powerful move.
* Digimon Savers, Akihiro Kurata claimed to want to help Data Squad and his old friend Commander Sampson. He showed his true colors soon enough.
* Digimon Savers and announce their evolution, but Kamemon is just shy. So shy that everyone stares at him in shock when he finally speaks a full sentence, and he retreats into his shell. Which is cute, but the real hilarity is in the finale: Megumi and Miki take the PawnChessmon to sing karaoke... off-screen.
* Digimon Savers because DATS has memory-erasing technology and enough pull to spin the media. Where it gets ridiculous is when an army of Digimon invades Japan. Hundreds of thousands, if not millions of people see the army of giant monsters with their own eyes. The only mention it ever gets is that the city is seen rebuilding in later episodes.
* Digimon Savers: Captain Satsuma is never seen without his sunglasses. Ever.
* Digimon Savers from his appearance onward and certainly appears far more frequently than any other Burst Mode partner Digimon, not that that was too much of a change from the rest of the series up to that point. Similarly, BanchoLeomon

Burst Mode is pretty much normal BanchoLeomon set on fire, but unlike ShineGreymon he appears for only less than thirty seconds.
* Digimon Savers has Keenan, a human child that grew up in the digital world, consider humans nothing but a threat to the digital world. He gets better, once he learns that he actually is human himself and realizes that his view was narrow-minded.
* Digimon Savers he created a domino out of Digimons the size of a sky scraper.
* Digimon Savers in which two of the protagonists are fighting successive waves of enemy Digimon. Stock footage is re-used for the appearance for every wave, causing one of the protagonists to comment that "they keep showing up the same way like all the others!"
* Digimon Savers, it's revealed that Thomas Norstein won a Nobel Prize for finding the cure for his sister Relena's illness.
* Digimon Savers: Lalamon's "Nuts Shoot" attack (dubbed as "Seed Blast").
* Digimon Savers, Masaru Daimon's birthday is stated to be April 2nd, the same as the airdate of the anime's first episode.
* Digimon Savers — houses a forest and a full-functioning city on its back.
* Digimon Savers series where they decided to kick the fanservice up a notch.
* Digimon Savers, the Computer God of the Digital World, it constantly calculates their chances of winning. "You're chances of winning are exceedingly close to zero." "I calculate a 0.000001% change of you succeeding." And so forth.
* Digimon Savers, the Digidestined are ambushed by a bunch of (spider-like) Dokugumon, which net the Digimon together while suspending the teens like this.
* Digimon Savers. (The original simply had one voice for all three forms.)
* Digimon Savers to series protagonist Tai Kamiya) and Agumon (Tai's partner).
* Digimon Savers when raiding a suspect's hideout. True to form, they shattered the windows using Gaomon's punch attack.
* Digimon Savers, Yoshino gets pursued down the street when she's linked with a pop singer.
* "Digimon Savez the Wrold!111" and its sequel "DIGIMON 2: RETURN OF DIGIMON""
* Digimon's Bokomon, who is the level named "child" in Japanese and who speaks and acts like a graduate student specializing in Digital World Mythology.
* Digimon series in general had this problem with major attacks for the Digimon themselves.
* Digimon's partner tends to be (but isn't always) an insanely weapon-laden cyborg.
* Digimon Starmon/SuperStarmon have the "Meteor Shower/Squall" attack.
* Digimon start out in their Baby/Fresh stage and progress through increasingly powerful forms, typically ending at the Adult/Champion level. A Digimon who goes through extensive training will eventually reach the Perfect/Ultimate level; a great deal more, and they can go into the Ultimate/Mega level, which is considered to be
* Digimon starts out this way as the new characters learn the ropes and the viewers learn the new characters (and in some seasons, new universe).
* Digimon Story: Cyber Sleuth a cup of mayonnaise coffee, implying they've developed a taste for the stuff.
* Digimon Story: Cyber Sleuth are set in a universe where people are able to physically log onto the Internet. Hackers are a major concern and part of the plot, with Digimon being used as hacking tools or to settle scores between competing hackers. The player characters are heroic hackers trying to stop less scrupulous ones from abusing their power, though even they have to do things like illegally invading systems sometimes (for the greater good, of course).
* Digimon Story: Cyber Sleuth Etemon hoping the store will sell his music. The shopkeeper remarks that it's an ambitious new sound for the industry, and that after a couple of listens, she's starting to enjoy it.
* Digimon Story: Cyber Sleuth features a few subquests where the player haves to fight Digimon that are vandalizing an online encyclopedia called Digipedia. In the first one a Tentomon is rewriting all the pages about Kansai and its traditions in the local dialect, while in a later one a MetalEtemon rewrites many pages about Japanese mythology and culture to make them about Digimon.

* Digimon Story: Cyber Sleuth: Goro Matayoshi is this to Kyoko, as they help each other out to solve cases.
* Digimon Story: Cyber Sleuth - Hacker's Memory. He is shown with them on while using an item in battle.
* Digimon Story: Cyber Sleuth - Hacker's Memory you rescue your starter Digimon and two others from a black market dealer mistreating them. Later on he gives you access to the DigiMarket where you can buy Digimon off the dark web from him and his partners.
* Digimon Story: Cyber Sleuth: One case involves a criminal organization of humans and Digimons selling "ultra realistic dolls" that serve the customers, but the customers have to agree that they mustn't leave their room ever. It turns out that while the customer's minds are actually in EDEN, the criminals kidnap their real bodies and steal their organs to sell them. While the customers live their lives unknowningly in the virtual world, they can't return to their original bodies. The organizations earns their profit not only from selling organs, but also with their dolls.
* Digimon Story: Cyber Sleuth revolves around a cyberspace called Eden, which essentially works like a (relatively) physical version of the Internet where users immerse their consciousness completely within a virtual reality and websites are represented as entire locations for people to meet up in.
* Digimon Story: Cyber Sleuth speaking during cutscenes, and their inner thoughts are laid bare for the player to read.
* Digimon Story: Cyber Sleuth, which contains all of said character's memories. Within, this character's memories are represented as vibrantly-animated drawings.
* Digimon storyline and various video games when the others have all appeared in at least one of the anime.
* Digimon Tamers, a lot of computer code is shown in binary but this is fact a subversion; what is shown is either ASCII (which is so ancient even Yamaki finds it insulting it is being used as a direct means of communication), or it was actually directly written in machine language (from a programmer that started in the 80's).
* Digimon Tamers also has a case of this in the Japanese version, where Suzie/Xiaochung is interrupted from giving extremely vital news about the D-Reaper by her brother Henry/Jianliang asking her why she was out alone. The English dub averts this by having her report what she saw in full, which makes the moment where oldest member Ryo gives her the Queen's Device card feel more earned.
* Digimon Tamers" and an equally impressive set of black wings in Blast Mode.
* Digimon Tamers and even was illusioned thinking he was meant to be her partner, which only ticked him off because she wouldn't leave him alone. She got her wish, though she entirely dropped the gazing when things got more serious between them and the worlds.
* Digimon Tamers a rabbit. The dub decided to just straight up change him into a rabbit. Muddling things even further is a piece of art the official Digimon twitter released for New Years 2018, themed after the Year of the Dog, featuring Terriermon... and Lopmon, who is supposed to be a rabbit.
* Digimon Tamers are Ascended Fanboys: Takato, Henry, Kazu, and Kenta were all fans of the Digimon TV show and games before finding out that Digimon were real, and Takato's partner Guilmon is his fanart come to life. Rika was also a card game champion, but her focus on winning and apathy toward everything else made her more of an obsessive player than an actual fan of the franchise. Juri claimed to not like the card game, but was a closet fangirl and even had very rare cards.
* Digimon Tamers. Being a Mon series, this applies to her tactical abilities rather than her melee prowess, to the point where she nearly has the main character's partner killed for experience. This attitude only lasts until she acknowledges that Digimon are living beings.
* Digimon Tamers, but the narration stretched it to tedious levels), etc. And it keeps going, and going, and going, without any real developments...
* Digimon Tamers: Cards. Specifically evolution cards, blue cards and eventually simply the digivice scanner itself. Most cards otherwise fall under amplifier artifact.

* Digimon Tamers consists of seven discs stacked one on top of another.
* Digimon Tamers, digimon can absorb the data of the digimon they defeat which takes them out of the cycle of reincarnation.
* Digimon Tamers Digivices, and brings their partner Digimon from the Digital World into the real world of the fictional universe. Although, as said before, this is a played-with trope, as the Digital World has always existed, from the activation of the first-ever computer (the Atanasoff-Berry Computer), and the Digimon franchise within the show branched off of that.
* Digimon Tamers even described her as being "pineapple headed" on his website.
* Digimon Tamers even more so — his first line towards Takato is pointing out how bad a Tamer he is for losing his Digimon.
* Digimon Tamers exhibited a maturity way beyond their 10 to 11 years, one of several possible reasons their ages were raised in the English adaptations.
* Digimon Tamers features a non-villainous example: Renamon strings along the Deva Vajramon (who has an interest in her) in order to get information regarding his master. Once she has the information, she basically tells him to get lost (and ends up destroying him after digivolving into Taomon).
* Digimon Tamers find out about Renamon and seems to be fine with that.
* Digimon Tamers Fortunately, Jeri was able to snap Takato and Guilmon back to normal.
* Digimon Tamers: Guilmon, Takato's Digimon partner, looks like a draconic theropod dinosaur with two arms (three claws on each one) two legs with clawed feet allowing for plantigrade or digitigrade stances, and a tail as well.
* Digimon Tamers has Takato drape his sweatshirt over a sleeping Guilmon.
* Digimon Tamers has Takato walking with Guilmon on the street at plain daylight. Nobody was alarmed because it was a real good life-size replica for a 10 year old. It's okay, a dinosaur that snorts, talks, walks and spits fireballs is just a basic project to do for your average 10 year old. We're in Japan, after all.
* Digimon Tamers has the Trinity Arm, which has three different forms.
* Digimon Tamers has this to be seen frequently in the early episodes.
* Digimon Tamers has Yamaki, who wears his nearly all the time! Ruki and Jianliang also get in on the act.
* Digimon Tamers: He neglected to account for the Digimon-Human hybrid forms of the bio-merged tamers. By themselves, the Red Card would protect the Digimon partners from the D-Reaper, but with the bio-merge, there's an extra component not accounted for, meaning that the bio-merge between the Tamers and their Digimon broke down, causing them to revert to their original forms, and putting them in grave danger.
* Digimon Tamers: Henry and Suzie Wong have green and pink digivices respectively. Also, Henry has blue hair while Suzie wears a pink cheongsam-style vest.
* Digimon Tamers. He's also the only one outside the core three to biomerge with his partner.
* Digimon Tamers, Impmon tries to take on a Deva all by himself, and gets his ass handed to him. The Deva throws him away, and Impmon shouts "THIS IS GONNA HUUUUUURT!" just before hitting the pavement.
* Digimon Tamers is the Ultimate/Mega-Level form of Guilmon merged with its Tamer, Takato, naturally it is a powerful force on the side of good.
* Digimon Tamers it generates come in a variety of forms. The form of the D-Reaper with the Freaky Mask and Jeri's Head is titled the Mother Reaper. Combined with the most powerful D-Reaper in the Digital World, they'll cause the End of the World.
* Digimon Tamers it's cute, it'll often use that cuteness the same way a stray puppy or kitten would, to get things he wants or needs like food, attention, among other things. He also uses that cuteness to motivate and approach the main trio of Tamers, often to help them out in some way.
* Digimon Tamers It's notable that they have so much art together in their Mega forms, since in the actual canon they never really shared a proper scene together.
* Digimon Tamers it uses is the voice of Juri, one of the main characters, whom it had absorbed early on.
* Digimon Tamers, Jenrya (Henry), Ruki (Rika), and their partners do this when they realize that Dukemon (Gallantmon) is Takato fused with Guilmon, though compared to

other anime, their expressions are much tamer (no pun intended).
* Digimon Tamers Kurata creates a way to corrupt their data and kill them permanently.
* Digimon Tamers, making him dangerous to the humans as well as the Digimon early on — he was a bit drunk with the Champion level power.
* Digimon Tamers, Makuramon essentially saves WarGrowlmon, Rapidmon, and Taomon from being destroyed by Juggernaut when he destroys Hypnos. Although to be fair Vikaralamon was also about to be destroyed.
* Digimon Tamers mentions the army and National Guard, even though Japan doesn't have an army and National Guard is strictly an American thing.
* Digimon Tamers, Mitsuo Yamaki is constantly seen flicking the lid of his lighter open and shut. He's never actually seen smoking though.
* Digimon Tamers mom was probably the most memorable — she was the only one who never really supported the idea of her son fighting, even after seeing him in action.
* Digimon Tamers movie, which took place after the series proper, aired two weeks before the dub of the first, which took place during the series.
* Digimon Tamers mutters in his sleep "bad breath" after sleeping directly next to Guilmon's mouth. The original version didn't have Takato or Guilmon saying anything during this scene.
* Digimon Tamers, Myotismon creates an Ominous Fog that cuts Odaiba off from the rest of the world.
* Digimon Tamers orders the activation of the Juggernaut program in order to wipe out all the Digimon, despite being told that it's not ready yet. This results in creating a portal that allows the Devas to enter the real world.
* Digimon Tamers) or is a consequence of the application of the Minovsky Physics.
* Digimon Tamers renditions of Guilmon, Renamon and Terriermon pop around for a bit before evolving. Meanwhile, Impmon bonks Culumon on the head, making them evolve again.
* Digimon Tamers, Rio uses an energy whip from his Digivice to reign-in his berserk Cyberdramon. No one else's Digivice has this ability, and it doesn't appear to be triggered by any of his cards.
* Digimon Tamers, Ruki does admit she's perhaps being a little too harsh on Ryo and does sometimes make innocent physical moves such as hugging or cuddling to ease the tension, so long as it doesn't end up becoming sexual in nature.
* Digimon Tamers: Ryo claims that you don't need to eat in the Digital World because you don't have a physical body that needs sustenance. You can eat if you want but it serves no purpose. Given that Jenrya and Takato manage to escape from a cave by deciding that they don't actually need to breathe air and could breathe water instead if they wanted, Ryo's probably right.
* Digimon Tamers saying this in episode 24 when her grandmother gets the chance of seeing Renamon.
* Digimon Tamers's Digital World has a digital representation of the earth floating in the sky.
* Digimon Tamers show the Digimon in slight pain as their skin is peeled off.
* Digimon Tamers, starting at 0:53), one protagonist experiences herself as a child running through a hospital and right into a razor-toothed, eyeless version of herself, with a snarling, drooling, oddly grinning version of her favorite sock puppet sewn onto her arm. The fact that this is how she equates her mother's death does NOT help matters in any way/shape/form. The true psychological impact can't be had without seeing her slow degeneration throughout the series from using the puppet as a cute way to talk to people into being actively controlled by the puppet, but the images are arguably worse for sheer Nightmare Fuel out of context.
* Digimon Tamers Suzie dresses Terriermon up and treats him like a baby doll, although she isn't aware Terriermon is actually alive and genuinely thinks he's just to a toy for most of the series.
* Digimon Tamers Suzie Wong trying to make friends with a rather looming Rabbit digimon. Looking over at her, Henry and Takato wonder if they should be worried. Takato digresses into talking about the Devas they have left to fight, one of which

is the Rabbit Deva. Cue reaction.
* Digimon Tamers: Takato has a dream about a battle in the rain and tries to tell his friends about it the next day. They don't believe him.
* Digimon Tamers, Tally and Riley pick up a strong Digimon signal... only to look down and see that Calumon's wandering around the control room. Riley basically ignores him, but Tally immediately notes how cute he is. Many viewers agreed with her.
* Digimon Tamers) that explains his presence, his sudden appearance still comes a bit out of left field even with the proper context.
* Digimon Tamers, the kids and their mons tried pulling this off to get Takato onto the Arc. Unfortunately, the end of the chain was Culumon... but they get help from a returning Ruki and Kyuubimon.
* Digimon Tamers: The twelfth and final Deva to be introduced, Antylamon, is the only Deva who does not actively attempt to attack humans. Not only that but she becomes friends and even partners with the first human she ever meets, defying her master until he sets aside his vendetta against humans. She is the only surviving Deva, and the only Deva who reforms.
* Digimon Tamers: The Wild Bunch (Monster Makers) based Digimon off of children's ideas, and the Tamers' naïveté to believe that they could do anything is what let them prove it.
* Digimon Tamers, to Terriermon, when another character talks about digimon being treated like dolls.
* Digimon Tamers uses a Japanese variant, Takato is the Japanese boy leader, Rika is the Japanese token girl, and Henry is the half-Chinese token minority.
* Digimon Tamers. Using the program that opened a huge portal between the worlds and almost let a whole bunch of Digimon into the world was totally his fault, but little else that he's blamed himself for was.
* Digimon Tamers was composed of traditional cel animation at every stage. Not coincidentally, Renamon is also the only one of the three who has lots of thick fluffy fur in one stage, billowy robes in another stage, and luxurious long hair in the final stage. Meanwhile, Guilmon and Terriermon have smooth fur and much more robotic higher stages, lending them well to CGI (though Dukemon/Gallantmon's cape does look alright, for the three seconds it's around).
* Digimon Tamers was not introduced until the trip to the DigiWorld 24 episodes in.
* Digimon Tamers. What follows is an episode of middle schoolers playing with a little red dinosaur. This case is unique in that there was no real reason for doing so until later when Takato wanted to sneak Guilmon on the school camping trip.
* Digimon Tamers! What it really was was a ghost. And that dinosaur the principal saw? That was a ghost dinosaur."
* Digimon Tamers when he is destroyed by Renamon in her ultimate form, Taomon. "What's happening? This can't be!" The entire episode Vajramon was infatuated with her but disgusted that she preferred to defend humans and have a human tamer rather than join Zhuqiaomon in his quest to destroy them. Vajramon, as well as Zhuqiaomon and the other Devas, viewed humans as inferior, and was even more put off that her ultimate form resembled a human in appearance.
* Digimon Tamers when Ruki complains about the ridiculous amount of luggage her daughter Rumiko brought with her on the family's trip.
* Digimon Tamers where she quits on being a Tamer after being captured by IceDevimon.
* Digimon Tamers, where this trope is utterly skewered since many of the adult characters become extremely important characters (as in absolutely integral to the final battle). They aren't out on the front lines, but they are arguably the most helpful non combatant characters the franchise has seen thus far.
* Digimon Tamers while the two are talking and she realizes whose partner she's just become.
* Digimon Tamers, you should probably take the thing back to the shop.
* Digimon tends to engage in this the least which fits his more serious nature.
* Digimon the best example with no humans or anything comparable to them in sight.
* Digimon, the Digidestined discover another version of Sora in the ruins of

Datamon's pyramid, apparently created as a side-effect of Datamon's attempt to duplicate Sora; once Izzy has confirmed that the two Soras are biologically identical, speculating that the other was created due to an unexpected side-effect of Sora's exposure to Datamon's equipment, the team soon accept her as another member of the group. The 'new' Sora even starts dating Tai and reforms her old bond with Kari where the 'original' Sora has lost those old friendships after she started dating Matt.
* Digimon the Digimon Analyzer sequence is sometimes just for the audience's benefit and clearly not seen in-universe. However, in some seasons, the Digivice can scan opponents.
* Digimon, the Gravemon invade as well, and they suddenly find something more dangerous to worry about.
* Digimon: The Movie featurette that summarized the events of the first season before they could see the actual movie.
* Digimon: The Movie, has a Digimon get infested with a computer virus which causes it to start causing all manner of chaos across the internet. Part 3 reveals that the virus has now found a new host in Kokomon, one half of a an American Digidestined's pair of Digimon twins.
* Digimon: The Movie has Omnimon, who only calls out the names of his attacks and nothing else.
* Digimon: The Movie Short Anime Movies) which was cut from the final product.
* Digimon: The Movie songs holding it together'' (as JO puts it), he admits the animation is top notch during the fight scenes.
* Digimon: There are several species who are considered dragons and distinguishable by the suffix dramon (although not always, most predominantly in the Four Great Dragons group) in their name.
* Digimon The X-Virus, which Yggdrasil cooked up because it found the Digital World was getting stuffed to capacity. Initially, it seemed to work, but then it turned out Digimon started developing an antibody, meaning not as many Digimon were dying. And then the antibody turned out to act as a power boost.
* Digimon. They're mainly made up of network data and are highly-intelligent, but some still counts.
* Digimon: This is a very common design element, especially in earlier Digimon. Most commonly, this takes the form of a Digimon possessing a metal plate bolted directly over its face, obscuring any eyes it might have.
* Digimon title creatures taking on titanic proportions at one time or another.
* Digimon. To top it all of there are the many, many variations of Numemon and Sukamon, including Gold- and Platinum-, just to name a few. Possibly parodied in the first season of the anime, where all the heroes' Digimon have to do to infiltrate an outpost of the bad guys is put on some wigs and pretend to be an entirely different, made-up species of Digimon.
* Digimon toys from the 90s lost their popularity, owing to the former's line of anime series.
* Digimon Trinity, Patamon is digitally absorbed by Beelzemon during the Digital War.
* Digimon Trinity. While the specifics are uncertain, it has resulted in TK having become the bitter head of Hypnos, and Tai and Agumon to have vanished for fifteen years.
* Digimon. Typically, one character after another is added to the split screen with a rapidfire choom-choom-choom sound effect until all are shown.
* Digimon under Devimon's control can be freed by destroying the large Black Gear sticking prominently out of their bodies.
* Digimon Universe: App Monsters, a glitch causes an old picture where Haru has wet the bed to appear in public.
* Digimon Universe: App Monsters, Cameramon, as in a camera-based Appmon for recording or capturing images, and his sensitivity about the pronunciation of his name.
* Digimon Universe: App Monsters era, and there are places where it looks as if the world is a hologram that's breaking up, letting you see a strange purple void

behind it. The real world's technology is affected; if an attack hits a building in the AR Field, expect technology in the building to go haywire, power to go out, and even things like cell phones to stop working.
* Digimon Universe: App Monsters franchise'', but has a head that looks like this. When lit up by his Seven Codes orb, he's the same bright yellow color as Sukamon.
* Digimon Universe: App Monsters is a black dragon with a belly-face that conceals a cannon in its mouth. It's ambiguous as to whether or not it's just part of his armor since it's made of the same metallic material as the rest of his body.
* Digimon Universe: App Monsters look like everyday objects with faces and limbs and are usually named after the objects they resemble. Watchmon is a talking watch, Resshamon is a train with a face, Callmon is a robot made of old cell phones, and so on.
* Digimon Universe: App Monsters: The Appmon are assigned a Grade which follow a similar progression system to Digimon: Standard > Super > Ultimate > God.
* Digimon Universe: App Monsters: The heroes' Appmons can only stay on their Ultimate-level forms for 60 seconds. This restriction gets lifted eventually when the transformation devices are upgraded and their capacity increases.
* Digimon Universe: App Monsters: The heroes discover a hidden passage in the local bookstore owned by one of their friends' family. It becomes their secret headquarters with the permission of that friend, while the rest of the family remains oblivious to the fact that they have a huge basement just below their store.
* Digimon Universe: App Monsters, the pattern is mirrored below as well.
* Digimon variety. They're not all-exclusive to the group, though. A few of them have been partners to human characters in the series: Tai and Matt's Omnimon, and Takato/Guilmon as Gallantmon are two good examples. These ones weren't actual members of the Royal Knights, though— they were just the same "species".
* Digimon virtual pet, is a savage hunter of other Digimon, driven by nothing more than a mindless hunger for their data and digicores, but it strongly prefers to consume those of viruses and demonic Digimon. This has led to it often being employed by angelic Digimon as a virus-hunter, despite its otherwise monstrous nature.
* Digimon V-Tamer 01 and Digimon are nothing but data. In the Digimon World, everything is data and humans are, at best, strategists who are useful enough at something to gain protection from monsters.
* Digimon V-Tamer 01 and the monsters in it are all computer code but automatically appear to humans in familiar forms, so that they will easily be able to tell what is rock, water, a living being, etc.
* Digimon V-Tamer 01, an Omnimon effectively weaponised his cape by throwing it in the face of his opponents, blinding them long enough to utterly thrash them.
* Digimon V-Tamer 01 Digimon world were fans of the V-pets except for Rei Saiba. Taichi's the least fanboyish of them, as the other tamers either have more monsters, higher evolved monsters or both and he openly admits to not bothering with the latest line of V-pets, which leaves him unfamiliar with others' monsters.
* Digimon V-Tamer 01 doesn't actually kill people so much as destroy their reputations by posting disgusting pictures of them on the Internet.
* Digimon V-Tamer 01: Etemonkey, an Etemon, was Daemon's second in command, and a huge pain in the ass for Taichi and Zero. And then, within eight pages of Neo Saiba's debut, he Jogresses Devimon and Ogremon and kills him.
* Digimon V-Tamer 01 features a factory shutdown by Lord HolyAngemon where monsters would go to upgrade themselves with metal parts. A Greymon from the human world whose owner attempted to delete it goes there to become a "MetalGreyamon".
* Digimon V-Tamer 01, ghosts are the lingering data of monsters that were improperly deleted.
* Digimon V-Tamer 01 had up until that point, only seen Digimon as high as Ultimate (or what was called "Ultimate" in the dub) and were incredulous that there would be a level beyond Ultimate, saying something to the effect of "What is he, then? Super-Mega-Ultimate!?"
* Digimon V-Tamer 01 "haunted" by the lingering data of monsters improperly

deleted.
* Digimon V-Tamer 01. It's first brought up in-story by Lord HolyAngemon when Taichi and Zero explain their combination and 100% win record to him. The guardian of the Net Ocean and the Jijimon from Hospitown can analyze and make sense of any given object's 0-1 arrangement, Demon can manipulate the arrangements to inconsistent degrees, Arkadimon breaks them apart then eats them and so on.
* Digimon V-Tamer 01. It's later revealed Gabo had many of the same feelings, leading them to share an imagine spot.
* Digimon V-Tamer 01 listed below also makes an appearance in a bonus chapter and plays this trope straight, as it turns an invalid meat shield into capable warrior.
* Digimon V-Tamer 01 manga survives and thrives throughout the series thanks to this trope. His penchant for strategy, faking out opponents, and making himself be underestimated are a requirement when constantly facing stronger opponents like he and his Digimon partner Zeromaru do on a regular basis. Especially in a series where most of the antagonists are strategists themselves.
* Digimon V-Tamer 01, providing the first real challenge to Taichi and Zero in a very long time.
* Digimon V-Tamer 01, Rei Saiba lost the use of her legs after an accident in the real world, which is the reason for her brother Neo's evil actions. When Rei's transported to the Digital World, she can use her legs, though she somehow still doesn't feel anything through them.
* Digimon V-Tamer 01. Subverted in most cases of the latter, however, as the heroes are much more powerful by this point and able to curb-stomp anyone who isn't a major villain.
* Digimon V-Tamer 01 that just so happened to have the misfortune of meeting Taichi and Zero. All the same, the latter two are still credible threats that have absolutely nothing to do with Demon.
* Digimon V-Tamer 01 Zeromaru manages to fight Neo Saiba's monsters to a draw during Neo's first two encounters with Taichi Yagami. The first time it was a shocker considered to be impossible beforehand.
* Digimon V-Tamer), wears his to protect his eyes when flying on his partner's back.
* Digimon. When they "die" their data is merely recycled and they eventually come back. More than a few times in the series a villain or evil mon has died, only to ultimately come back as a neutral or even benevolent character.
* Digimon when you hear what he said when the dubbers weren't in control. He was not asking Arukenimon if she was afraid, he asked her if the torture hurt, and he pledged to give her a "million years of Hell." He then said very calmly how he would "evaporate that pitiful love Mummymon felt." Evaporation followed. He then declares he will crucify the Digidestined upon the same cross as his minions. Yikes. According to this version, the children were not yelling jobs, but expelling darkness from them. There was a reason this version has never been given to American kids.
* Digimon, where all of the Dark Legendary Warriors except Duskmon have some sort of spinning attack, and several of the good legendary warriors have spinning attacks too. Calmaramon subverts this trope when her spinning attack is entirely unusable, because it causes her to lose control of her beast spirit.
* Digimon, where a person's beliefs can directly effect how great or weak a power they can manifest in that world. So having a symbolic link to his brother helped to give T.K. the emotional fortitude he needed to get Angemon to digivolve. And take on the villain.
* Digimon where she provided overseas fans access to Japanese material and translated updates as the shows were coming out in Japan.
* Digimon, which featured hundreds of the things serving under DarknessBagramon, stands out in this regard.
* Digimon (which is short for Pocket Monsters) didn't receive a similar fate. More than likely due to "Pocket Heroes" having more than a few double meanings.
* Digimon, which was expanded upon by Creedogmon, and an author named DayDreamer9 has begun a third imagining.

* Digimon: While it doesn't technically grow on trees per se, meat grows from the ground like a vegetable.
* Digimon, who fly to the moon in minutes, MagnaGarurumon, who is stated to be able to move and attack and faster than light speeds, and UlforceVeedramon who is the fastest Royal Knight, a group filled with super speeding flying bricks.
* Digimon with a face noted for its aggressive temperament. DemiMeramon evolves into Candlemon, a living candle with a DemiMeramon for its flame, which in turn becomes Meramon, a humanoid made out of fire. Meramon is stated to have a violent temper, enough so to be likely to turn even on its tamer, and to try to burn everything it touches.
* Digimon World 2 at some point late in the game, a member of the Blood Knights, Commander Damien, disguises himself as a Black Sword cadet. Your character gets suspicious, and in an attempt to draw him out, calls out "Commander Damien, sir!". Damien, of course, responds, but not long before he realizes he just blew his cover.
* Digimon World 2. Some people in the game's small community remained so fixated on the issue despite this that they data-mined the game and found more and more evidence that he really cannot be obtained, such as him being absent from the game's encounter list, which all but debunks the myth.
* Digimon World 3 also features a move denoted as both a signature move and finisher move with its different name color and being always placed at the very bottom of the move list, as well as having special background when used, but in a twist of the trope, the finisher move can actually be used anytime like a regular move, and can actually finish the opponent even when used early. This includes even Magna Angemon's One-Hit KO "Gate of Destiny" move.
* Digimon World 3 features the aptly named Mobius Desert, a vast desert that appears to be a maze with endlessly repeating areas. In most of the areas, regardless of whether you keep moving left or right, you will eventually ends up back at the same area. In reality, it is a 5x5 toroidal grid, with each corners and sides being the exact same area. The only way to advance to Mirage Tower is to realize it is 5x5, then find the center of the desert, and after that, keep going to the left.
* Digimon World 3 is something like a Dark World version of the regular game world. Not really evil, just shrouded in eternal darkness. Comparitively, the Asuka Server where you start out in is always sunny 24/7. Travel between the two "servers" is done using a combination of 2 different secret (and dangerous) routes.
* Digimon World 3-themed palette swap of the Asuka Server, and most of the Digimon in it are palette swaps of the ones from Asuka.
* Digimon World 4 - whether it's deliberate that Leomon said the wrong name isn't certain.
* Digimon World Dawn/Dusk, if your Digimon loses battles, you lose friendship, best gained through winning battles, and it stops obeying you, leading to more losses... Worse in the case of Lunamon or Coronamon, the most powerful Mons in your party. If they lose in the prologue, you're doomed.
* Digimon World Dawn/Dusk, to the point where practically no one has bothered to put out adequately translated information on what's going on because of the sameness.
* Digimon World ditches humans altogether and brings back real-time battling and introduces co-operative playing in teams of up to four players.
* Digimon World Dusk union. During the final boss fight against him, he uses it on a regular basis... and all it does is inflict the sleep status effect on your party.
* Digimon World for Numemon and Sukamon. Granted, these are creatures made of fecal matter.
* Digimon World includes pooping as a factor the tamer has to take care of. Not getting in time to a nearby toilet will end up with the Digimon leaving a stool in place. Enough accidents and the Digimon will turn into a Sukamon as punishment.
* Digimon World: Infamy and killing the "heroes", not caring in the least bit about wiping out any number of random Digimon if it helps him achieve his goals.

* Digimon World -next 0rder- After defeating the final boss, the player character returns back to their own world, only to find they and the other characters have been summoned back to deal with a new problem. And there are all those other Digimon to bring back to the city...
* Digimon World Next0rder RustTyrannomon gets stuck on its "rampage" function. Not a good thing when you're a robotic T-Rex shaped tank with a rail gun on your back. Fortunately, a good-old fashion pummeling defrags it.
* Digimon World of all things. It's also played with Betsumon, whose existence depends on him cosplaying as other Digimon; Betsumon's costume qualifies as clingy in that he cannot take it off, but he can change its overall appearance.
* Digimon World only received an E10+ rating in spite of having much more detailed graphics and a fair amount of suggestive content. It's likely the original game would have received an E10+ rating had it existed back then.
* Digimon X-Evolution and being covered by a literal ocean for an unspecified length of time, came back out with his X-Antibody without any explanation.
* Digimon X-Evolution, no humans appear in this special, with the focus being solely on the Digital Monsters themselves.
* Digimon X-Evolution: Though they did give Omegamon and Dukemon their signature badass capes, they're awkwardly animated to a fairly visible extent. Similarly, DORUmon's fur.
* Digimon Xros Wars and oversees the invasion of the Green Zone in the latter's place.
* Digimon Xros Wars attempts to be both the good cop and the bad cop, alternatively threatening the captured heroes and offering them DigiNoir. Humorously, they're so busy eating they don't even notice.
* Digimon Xros Wars franchise, by conquering all of the digital world, as well as nearly conquering Earth as well.
* Digimon Xros Wars has the Digital World split into 108 Zones, the implication being that they were once one. They are merged into seven Lands halfway through. Bagramon's palace remains in its own Zone the whole time.
* Digimon Xros Wars (in this case, the word "you" being homophonous to "Yuu").
* Digimon Xros Wars, is significantly less toyetic so far, to the point where no actual toys for anything introduced in it are known to exist at this time.
* Digimon Xros Wars is very idealistic, very optimistic, and - in the later half especially - everything gleams as though polished for hours.
* Digimon Xros Wars manga once again has the Green Zone with its floating islands. The adjacent Snow Zone also has them, but they're frozen over and covered with icicles. They're little more than set dressing.
* Digimon Xros Wars, Shoutmon tends to begin a fight with something along the lines of "We are the ones who will change this world! We are Xros Heart!"
* Digimon Xros Wars. The show ended up airing on Nicktoons instead, where it made it through the second season.
* Digimon Xros Wars: The Young Hunters Who Leapt Through Time. Despite this, the series was nominated for Best Animation at the 2012 International Emmy Kids Awards.
* Digimon Xros Wars: The Young Hunters Who Leapt Through Time. It resembles a corroded, overgrown version of Tokyo, and miscreant Digimon behaviour there tends to have effects on the real world, up to and including the kidnapping of schoolchildren.
* Digimon Xros Wars: The Young Hunters Who Leapt Through Time. It's suggested it's part of DigiQuartz instead of the real world, and thus isn't grounded in our reality and shifts dependent on DigiQuartz.
* Digimon Xros Wars: The Young Hunters Who Leapt Through Time: Pictures of one of the six Heroes posing with their unevolved partner, then flicks around into a silhouetted image of them posing with their evolved partner, enclosed in a circle.
* Digimon Xros Wars: The Young Hunters Who Leapt Through Time. Small wonder it was never dubbed.
* Digimon Xros Wars, virtually no time had passed from the point our three heroes entered the Digital World to their return to the Real World mid-season.
* Digimon Xros Wars, where it is revealed Dorulumon was the best warrior in a

warrior society of other wolf monsters before taking their combat skill to the Bagra Army (he leaves the army for similar reasons and has even more guilt about his membership here, since he felt he disgraced his clan). The manga even gives Dorulumon a knight-like evolved form called JagerDorulumon.
* Digimon Xros Wars, who believes that dragon Digimon (a group in which he includes all reptilian Digimon) are superior to and should lord over all other Digimon due to being more powerful.
* Digimon Xros Wars (who was already voicing Shoutmon) initially voiced Cutemon as a placeholder because the crew was having trouble casting him. It was kept for the final product, something Ben apparently didn't realize until the second episode was broadcast.
* Digimon Xros Wars with drills all over that he can fire at enemy Digimon. He can also expand the drill on his tail to be large enough for to stand on.
* Digimon Xros Wars with KingWhamon, who makes himself look like an island!
* Digimon: Yggdrasil serves as both the computer on which the Digital World exists and as its God. The precise nature of the relationship varies from series to series.
* DigiScents iSmell, which would have allowed users to access scents from particular websites, like perfumes and food.
* Digital: A Love Story, Amie Computers is a transparent stand-in for Amiga.
* Digital Bikini, though it has also been used in conjunction with bath and shower scenes (at least when Cartoon Network aired anime), hot springs episodes, or any scene of half-naked characters in a locker room-type setting (both animated and live-action).
* Digital Bikini when aired in America, mostly used now to cover up nudity and revealing clothing on live-action movies that have been toned down for pre-watershed TV.
* Digital Combat Simulator comes with a WSO who can call out the positions of enemy aircraft and missile launches as long as he can see them.
* Digital Combat Simulator is a very realistic flight sim, but even the modern planes can get into these situations depending on the mission setup. Missiles are imperfectly modeled, meaning that it's possible to avoid them more easily than in reality, which can result in situations where both pilots have expended their armament and are now relying on cannon and maneuvering to get the kill.
* Digital Combat Simulator, the SAMs keep their targeting radars on all the time, allowing them to be taken out completely with anti-radiation missiles.
* Digital content can be downloaded instantly after purchase from online platforms such as the iTunes Store,
* digital copy of Twilight Town used a laser scanner to physically teleport Flynn in and out of cyberspace, this does make sense.
* Digital Deli, a mid-80s collection of computer articles, includes the "Crunchy Computer" comics. When hippie Crunchy tries to steer his son away from violent video game fare by giving him the "Save the Whales" game, Crunchy Jr. finds it far more fun to shoot the whales.
* Digital Destruction: The "remastering" of a work actually makes it look worse.
* Digital Devil Saga, and only it started to rain during the game's events. Many characters had expressed confusion about it, including the fact they even knew what a ship was - more evidence that the Junkyard wasn't what it seemed.
* Digital Devil Saga Angel is the Truly Single Parent of Sera. Rather than cloning, however, Angel is a fully functioning hermaphrodite who created Sera from her own sperm and egg.
* Digital Devil Saga are backing them up. It turns out that the machine doesn't need the plant's power to operate, rendering everyone's sacrifices meaningless.
* Digital Devil Saga, Argilla's demonic form has extendable arms that she uses as whips.
* Digital Devil Saga: Bat can transform into the Aztec god of death Camazotz, who looks like a giant bat.
* Digital Devil Saga - becomes an entity that is neither alive or dead which has no will of its own and is driven purely by hunger. It devours everyone and everything

in the Junkyard, including the Junkyard itself.
* Digital Devil Saga had ever experienced. As her personality started forming, she developed a wish to know more about what had happened to her. Then she was informed she had shifted into a powerful demon form and slaughtered an enemy battalion. It was comprehensible she uttered the trope verbatim, as an emotionless existence was very much preferable to what she was becoming.
* Digital Devil Saga has a few of these. The first is Cuvier, who gets shot in the head by Angel while the E.G.G. is being overloaded. Then Angel and Gale kill each other, and Serph and Sera die while trying to communicate with God when the HAARP facility blows up.
* Digital Devil Saga has a small scar across one eye, probably to offset the cuteness of her pink hair.
* Digital Devil Saga has Harley, the leader of the Vanguards. Despite being the rival of the protagonists, the Atma powers turn him into practically a scared child terrified of the Embryon, and he is killed in the first dungeon. After his defeat, the main plot is fully revealed.
* Digital Devil Saga; in the first game, Heat notices Serph has been silent for a long time and asks him to say something, and in the second, Gale tells him "It's alright, you don't have to say anything."
* Digital Devil Saga is an abandoned amusement park castle crawling with demons and stocked with various traps.
* Digital Devil Saga, is widely considered to be one of the toughest bosses in both games, and in beating it, you're probably more than prepared for what comes next.
* Digital Devil Saga live in an underground city, because the sun turns people to stone. Karma Society members live under a glass dome.
* Digital Devil Saga. Players can converse with the unfortunate victims, who will laugh hysterically or beg players to get away.
* Digital Devil Saga, shoots Bat out of the sky, and catches Sera in midair.
* Digital Devil Saga: The Embryon tribe approach a rival tribe, the Maribel, to ask for an alliance against a third tribe, the Solids. The Maribel leader, Jinana, forces the Embryon to undergo a test within her headquarters, that culminates in a fight against her personal bodyguard, Bat.
* Digital Devil Saga, they don't even have the alleviating bits — the narration makes it clear the disgusting black meat everyone's eating is no different from their own.
* Digital Devil Saga? Though there is a little nuance to it. Any slain enemy in battle is eaten by the party afterward, getting points toward unlocking new abilities. However, there are special skills that can be used in battle which are Hunt type attacks that, if they succeed in doing enough damage to kill an enemy, will result in that enemy being consumed directly in one hit while the fight is still going on, for a bonus amount of Atma points. This does carry a risk though that the character doing the consuming develops a stomach ache ailment for a time, but having the passive skill Iron Stomach prevents these aches from developing in the first place.
* Digital Devil Saga, where evaporation never happens and new human beings simply crawl forth from the depths of the Temple), though it's implied that the resulting puddles which grow large enough eventually solidify into human form. New humans seldom look the same as they did in their last life, nor do they retain memories.
* Digital Devil Saga). While the virus was reproducible, the incident itself was not.
* Digital Devil Saga wore glasses, and switching from wearing glasses for years to not wearing glasses still leaves behind the feeling of wearing glasses.
* Digital Devil Story series, is described as handsome in a feminine way. Specifically used as a taunt at one point.
* Digital Devil Story video game series, was translated by a fan. Well, the first two novels were, anyway.
* Digital Distribution happened, along with smaller devices which call for older styles of gameplay and improvements in middleware that make it easier to create compelling games without large teams, and "indie" games made by single people are

back in vogue.
* Digital Distribution has come online, it has become even harder to verify consumers' ages; the biggest hurdle they'd probably have to pass is a screen that says "Enter birth date here", which can be easily falsified. This has been mitigated by console and distribution software creators adding parental control options for online game purchases and access, but again, many parents ignore these and neglect to set them up.
* "Digital Exploration Of Interior Design" has a subplot about the rivaling Blanket Fort and Pillow Fort of Troy and Abed.
* Digital Fortress in Spain. At one point, he calls the same escort service twice in a row, once posing as a Spanish local and the second time posing as a German tourist.
* Digital Foundry's Richard Leadbetter described the Xbox Game Pass subscription service "value-riffic" in "
* Digital Gates, immobile spaceborne structures that scan an entering ship, convert it to pure energy, and beam that energy in the form of tachyons, to another digital gate in a distant star system, which re-converts the ship back into matter at the other end, for near-instantaneous interstellar travel.
* Digital Graphic Novel, Snake sees Ocelot with two arms (after the Cyborg Ninja cut off his right arm) and realizes he's in a Psycho Mantis-induced hallucination.
* Digital Harmony that he was a program created by Twilight for her computer ENEIGHAC that gained self-awareness and created the Digital World as a simulation.
* Digital Harmony was the one who caused the corruption of the moon's inhabitants into the Nightmare Forces in the first place, making him responsible for the trouble Nightmare Moon and Nightmare Rarity caused in canon.
* Digital Knight is all about this trope. Vampire? Good thing the hero lives next door to a tanning parlor. Werewolf? Go into the X-ray room of the hospital and grab a bucket full of silver chloride. Medusa? Mirrored sunglasses.
* Digital Knight makes some silver bullets first to fight a vampire (which didn't work) and then a werewolf (which did). He ran out of silver bullets while fighting the werewolf king, and was forced to improvise with several buckets of silver chloride taken from an x-ray development room.
* Digital Man against anything it perceives as a threat. A second group of soldiers is sent to destroy the android before it can access an uplink and submit a nuclear launch code to start World War III.
* DigitalPh33r movies with unnamed characters brutalizing things in game and/or shouting to the heavens "THIS IS SUCH A BIG DEAL!!!"
* Digital Pinball Table appears to recurse infinitely if you pull back the camera. Deadpool plays a miniature version of the table on the left apron, and it appears that you're playing it on the left apron of an even BIGGER version of the table.
* Digital Pinball Tables have you run a space or fantasy adventure by using a set of flippers to launch a metal marble into pins and through gates, instead of selecting moves through direct button pushes or menus.
* Digital Pinball Tables or original boards with features that can only exist in software.
* Digital Piracy Is Evil: Although there were plenty of efforts to strictly enforce copyright laws, it only became a media trope some time around 1980 with the "Home Taping is Killing Music" campaign.
* Digital Piracy Is Evil: A work makes it clear that they are against digital piracy.
* Digital Piracy Is Evil: A work of fiction gives the moral that it is wrong to distribute unlicensed recordings of media.
* Digital Piracy Is Evil? But as with the aforementioned Digital Distribution, this decade was when piracy became mainstream and super easy.
* Digital Piracy Is Evil: Downloading videos, music, etc. is of the devil and anyone who does this deserves to be punished!
* Digital Piracy Is Evil is now going on over ebooks — most notably Amazon's Kindle, which is selling like there's no tomorrow. Is this the end of printed books? Ask anyone who was around in the '50s and worried that television would be

the death of movies what they think.
* Digital Piracy Is Evil). Of course, older computers, many of which still run Vista or even the recently abandoned XP can still record sound just fine.
* Digital Piracy Is Evil: Plenty of parodies of this exist, but as long as digital piracy is still around (and it's not showing signs of going away any time soon), there will always be mainstream media attacking it.
* Digital Piracy Is Evil: The first known example of copyright law comes from a dispute between St. Finian and St. Columba over whether the latter had the right to freely copy the former's books, which was one of the causes of the Battle of Cúl Dreimhne.
* Digital Piracy Is Okay: Some artists in the later parts of this decade began softening their stances on digital piracy, finding ways to circumvent their losses by appealing to their fans with digitally distributed releases that were more easily affordable.
* Digital Prey, but was saved by a smaller cliff just out of sight below the one she had jumped off of.
* Digital Rev page describes it as "The most subscribed and viewed photography show on the interweb, presented by an Asian dude with British accent."
* Digital Rights Management systems, especially always-online requirements or setups that create massive security holes.
* Digital synthesizers are also a good example of this trope: originally, in the 70-80's, when digital synthesis was invented, it was presented as a more precise and clean alternative to analog. Then the flaws of early digital synthesizers were found, namely, too sterile sound with less character than analog. Nowadays,
* Digital telephones have a clause in their governing standards that mandates the use of "
* Digital terrestrial television offers clear pictures without the expense of cable or satellite service—as long as you're within range of the broadcasting tower with a properly adjusted antenna. An improperly oriented antenna or weak signal will cause a TV picture to break up like a scratched DVD, where in the analog days you would have a snowy picture but still be able to make out the scene. This is known as the "digital cliff effect". This can be especially annoying for people in countries that have discontinued analog terrestrial TV broadcasting.
* Digital Underground, "The Humpty Dance": "I use a word that don't mean nothin', like 'looptid'."
* Digitesque: Averted. Even the Institute, the most advanced post-Fall organization that has made special effort to keep old language alive, has experienced quite a lot of linguistic drift. Ada is, with a great deal of difficulty, able to piece together English using a subtitled video with a voiceover and pictures.
* Digitesque connect to the ring, and there's nothing at the top but a small shuttle platform. The elevator also requires information on cargo type before it will move, so that it doesn't accidentally cause damage when living people try to use it.
* Digitesque: Earth has an artificial ring, still maintained by robots. Primitive humans now believe it is where the gods live. Occasionally, the gods speak, but normally the ring is just a handy navigation tool.
* Digitesque: "Guns" are in fact small laser pistols, and hunters can do the same thing with more utility.
* Digitesque: Humanity's robots maintain their ancient structures, but a thousand years is still a long time. Most of the ancient ruins are barely even recognizable as man-made at this point, with only a few pipes or foundations left. There are some sealed ruins, like the one Ada and Tanos find, that are still in perfect working condition.
* Digitesque: Much of ancient technology is computer code that can somehow affect the world directly. Modern coders mostly copy code by rote, because the old stuff is too complex. Ada notes that for a lot of ancient technology, the shape of the device is actually vestigial; if she put a gun's code on a rock, she'd get the same effect.
* Digitesque that Ada unceremoniously abandoned him on an island with no way back)

while the girls get closer to each other.
* Digitesque: Those with the warrior gift can create laser constructs. Swords are common, but someone creates a pair of clubs at one point.
* Digitiser, which ran on the UK Teletext service throughout the 90s, had the recurring character Zombie Dave, who communicated entirely through barely-intelligible mumbles. This was usually used to get outrageously offensive things broadcast in an ostensibly family-friendly magazine.
* Digitized Hacker: Hacker who enters cyberspace and operates within it.
* Digitized Sprites: Converting an existing or pre-made image into a sprite.
* digitizes his consciousness into a supercomputer, though the nationalist separatists also succeed.
* Digivolutions that are affected. Agumon now digivoles into the female Sunflowmon, while Palmon digivoles into the male Growmon.
* diglossia by linguists, Greek for "two tongues"), and later still the spoken language becomes the new written standard in place of the old one. This is what happened to Latin (replaced by Romance languages), Classical Chinese (replaced by Standard Mandarin) and Classical Greek (replaced by Modern Greek), among others.
* Dignidad: TV miniseries co-produced with Germany, about Colonia Dignidad and his leader, Paul Schäfer.
* dig up a ghoul who was accidentally buried. This leads to funny comments and one confused PC.
* dig up Chuck's father and bring him back to life so that they can find out the truth about Dwight.
* Dig Your Own Grave: Before being killed, the victim is forced to dig their own grave.
* Dig Your Own Grave, if they do it the old-fashioned way and have your victim conveniently dispose of themselves.
* dihydrogen monoxide hoax is an inversion of this practice, where something totally harmless is made to sound incredibly deadly, using true but misleading statements.
* dihydrogen monoxide, oxidane, hydrogen hydroxide, and hydroxylic acid.
* Dijiko (green eyes and hair), Puchiko (brown hair and eyes), and Hikaru (pink hair and eyes) from
* Dijon is renamed Faris D'jinn in order to be more authentically Arabic.
* Dik-Dik is one of the smallest species of antelope and has distint eyelashes around big bright eyes, dainty little boundy legs, a mohawk and a twitchy snouth that inflates slightly when they make their whistly calls. And the males have tiny little horns and don't even really fight over territory, just feinting at each other until one runs away.
* Dikembe Mutombo's 4½ Weeks to Save the World, part platformer)
* Dikembe Mutombo's 4½ Weeks to Save the World, the state of Florida constantly accruing errors in the voting process during the 2012 election campaign, Kate Middleton's pregnancy and the (short-lived) closing of Hostess, complete with a character singing a mournful melody for its failure (the company would relaunch and bring its products back to shelves just weeks later).
* Dilaf even if they aren't actually affecting him, though this takes deliberate action.
* Dil as well gets this during this scene, realizing how much of a brat he was.
* Dilating Door: Doors of the future will not be opened and closed the old fashioned way.
* Dilating Door has a similar force field that can be raised across its own Stargate.
* Di Laurentis who blackmailed, mutilated, and terrorized the people around her to get what she wanted, and for much of the show her ultimate allegiance to the Liars is in question. When she become an unquestionably good character, she also seems to lose all ability to take care of herself, and the Liars must save her multiple times from her own bad decisions.
* Dilbert, a line of vitamin-packed vegan microwave burritos meant to appeal to the extremely narrow audience of fans of the strip who also eschewed animal products,

and who didn't care much for taste. Not surprisingly, the Dilberito was discontinued in 2003.
* Dilbert and assumes she's "going for the hug" when she holds out both arms. In fact she shakes with both hands.
* Dilbert and Dogbert went on a trip to Clyde Canyon, which turned out to be a ditch. Subverted when, as they left, another hiker asked them, "Why were you hanging out in that ditch? Beautiful Clyde Canyon is just over that ridge."
* Dilbert and Liz. He kept getting e-mails stating essentially "Dilbert shouldn't get lucky before I do."
* Dilbert and made Catbert a recurring character as the Human Resources Manager at Dilbert's work place.
* Dilbert and makes Dilbert consider giving the policy a second chance.
* Dilbert and several other sources of office humor have been described as Kafkaesque.
* Dilbert, and use false compliments to make people insult themselves.
* Dilbert animated series had a story arc regarding the company's new flagship product: The Gruntmaster 3000. It covered things such as producing, marketing, and site-testing. The story was frequently broken up with non-arc episodes.
* Dilbert animated series, riding Business Class on Elbonia Airlines apparently entails sitting on the wing of the plane.
* Dilbert, a personified Mother Nature made a few appearances, each time doing something rather nasty without shame.
* Dilbert apparently died in a plane crash, the only employee who wasn't sure about celebrating was Wally—because he didn't know whether to celebrate or go home early.
* Dilbert arc where Dogbert tells a psychiatrist he's unable to cry over Dilbert's death. When the therapist tells him that dogs can't legally inherit from humans, he of course starts bawling.
* Dilbert as a character in the strip and that he is more pleased with the end result.
* Dilbert as simplistic, Scott Adams retaliated by having Dogbert create a comic strip called "Pippy the Ziphead" about "a clown with a small head who says random things" which nobody likes, not even Dogbert.
* Dilbert, a television advertisement threatens the viewers to make them buy its tires:
* Dilbert, a woman says this line to the title character. Disappointed that he simply agrees, with no emotional reaction, she progressively ups the ante, first to "friends with other people. You and I would just be acquaintances," then to acquaintances that couldn't actually become friends, like "my ex-butler whom I fired for stealing stuff." When this still fails to get a reaction beyond "Okay," the woman wonders to herself what's going on, while Dilbert thinks, "Good, it seems the window of opportunity is still slightly open."
* Dilbert becomes a boss and enjoys his newfound ability to command his underlings with a wave of his hand. However, they misinterpret his wave and throw a guy out the window.
* Dilbert book on etiquette, Dogbert discusses Air Hugging, saying that it is not the best time to reveal your sensitive side, and not to let people see you get the creeps afterwards.
* Dilbert both concerning in-universe and in fan and critical response.
* Dilbert briefly hired a sycophant with a deformed lamprey-like mouth.
* Dilbert built a robot at one point that became a jerkass. In the end Dogbert installed a "shame module" programed with the combined shame and guilt of every religion on earth which turned him into a worrying, guilt-ridden machine that rued the day it was created. Dogbert named it Ruebert.
* Dilbert cartoon, Dilbert, Dogbert and Dilmom are playing Scrabble. When Dogbert plays "Quizzing" for 188 points, Dilbert comments that he thought the Scrabble set only has one Z. Dogbert brushes this off by saying that that's the kind of thinking that made Dilbert lose 400 games in a row, but the next shot shows him carving his own scrabble tiles under the table.

* Dilbert cartoon has an e-mail version of this trope. The Marketing Department gets a typo-ridden e-mail from Wally that is telling them to either "launch the new product" or "eat lunch with a penguin."
* Dilbert cartoon has the character Topper make a string of implausible claims about his achievements. When the other characters ask for proof, he replies "Give me ten minutes, then check Wikipedia."
* Dilbert cartoon where they discuss a story of a co-worker killing an entire field hockey team and not leaving any survivors. Someone points out that it's a very detailed account for an incident that's not supposed to have any witnesses. It turns out that killer herself posted the story on her website.
* Dilbert, Catbert, Evil Director of Human Resources, was hired precisely because he possesses this quality. The caption of the page image is a quote from the strip in which he was hired.
* Dilbert characters and doesn't want to get angry letters by creating dumb, criminal or lazy minority characters.
* Dilbert character Topper at least claims he's an ace and he's never been successfully called on it. It doesn't matter what you've done whether its recycling, building a time machine, or giving birth, he claims he's done it better.
* Dilbert claims it's meant to represent American perceptions of "any country without cable television".
* Dilbert comic actually inverts this trope when the company's Call Center is outsourced to Elbonia:
* Dilbert comic, Catbert made Google the new company health plan, saying "from now on, employees must use Google to diagnose their own illnesses."
* Dilbert comic, Dilbert invents a quantum computer capable of interacting with matter in a parallel universe to solve complex equations. Dogbert points out that according to Chaos Theory, the shifts he causes could very well destroy the other universe. Dilbert's response? "Shift happens." (And Dogbert adds "Fire it up.")
* Dilbert comic, Dilbert was concerned that a new invention of his might be dangerous, so he decided to seek legal counseling. After explaining his situation to a lawyer, Dilbert asked if he would help. The lawyer replied, "nah, it sounds like I could make more money by suing you."
* Dilbert comic introduced "the Sentence Finisher", who would constantly interrupt people to finish their sentences for them, and give them sinister meanings.
* Dilbert comic involved Dogbert raising an army of cloned vegetables. It was supposed to be longer, but Scott Adams found it wasn't as funny as he thought it would be, so he actually stated in comic he was ending the arc by "skipping ahead to the big finish." Another arc, featuring the death of Dilbert, was also resolved quicker than planned when Adams ran out of ideas (he also mentioned doing it to shake things up, but the strip was so early that nobody cared). Another early arc involved Dilbert building a robot that became gradually more intelligent before being dropped without comment a few weeks later; the plotline was revisited more than a decade later with a different robot, who went on to become a regular.
* Dilbert comics played with this in the third-world country of Elbonia. One man goes to a grocery store with a chain of bills attached to each other and tells the cashier that the other end of the money chain is being held by his brother in a different town, who will let go when the sale (of a single potato) is completed.
* Dilbert comic strip about "all-natural tech support". Scott Adams' commentary in one of the books: "It frightens me to think how many people believe 'natural' is the same as 'good for you.'"
* Dilbert comic strip is a satire of the corporate world. Mostly Horatian.
* Dilbert comic strips where Dogbert becomes an advertising executive and is tasked with marketing beer. The executives claim to be "very lonely men" and insist on including bikini-clad women in the ads. Dogbert at first objects to this as being degrading and outmoded, to which the executives suggest giving the women jobs: "Bikini lawyers on skates!" Lynx actually did similar, as seen above.
* Dilbert comic; toll booth attendants make Dilbert nervous, and he doesn't know why, so he goes to extra lengths not to annoy them: he turns his radio down, makes sure he has exact change for the toll, and always wishes them a good morning.

* Dilbert competes for Dilbert's job. Being able to type with both hands and use the mouse with his tail is a natural advantage.
* Dilbert compilation books, Scott Adams suggests that when calling in sick to work, the best thing to say is, "You don't want to know the details."
* Dilbert concerning how many digits she expected her bonus to be as opposed to what she actually got:
* Dilbert confronts Alice for having made personal calls on the job (to tell her family she was working late), saying it's "like stealing from the company." After handing him a dollar to more than cover the phone bill, she presents him with her own bill for "$40,000 in unpaid overtime that the company stole from me."
* Dilbert co-workers, such as "French is exactly the same as Spanish, except with more words for cheeses."
* Dilbert, creator Scott Adams spends a couple strips "trapped" in his own creation.
* Dilbert decides at one point to apply his coding skills to inventing a filter to prevent kids from seeing dirty pictures on the Internet. Dogbert tries to warn him that "pitting your intelligence against the collective sex drive of all the teenagers who own computers" is a fool's errand, but Dilbert overconfidently presses on and gets a teenage boy to test his invention. Judging by the expression on the boy's face, it evidently fails.
* Dilbert did not have pointy hair at all, but rather just an ordinary, receding hairline of black curly hair. A 1995 strip depicting the slow decline of Dilbert's health benefits, via a series of flashbacks, depicts the boss with his old, unpointy hair.
* Dilbert, Dilbert and Dogbert are stuck in a bad traffic jam. Fortunately, Dilbert upgraded his car with a missile launcher to deal with such situations.
* Dilbert. Dilbert does the same, and the strip ends with both of them sitting back to back, maniacally laughing, as Ratbert enters.
* Dilbert , Dilbert is at a dinner party in another country where it is revealed that he is left-handed (being left handed makes you a member of the oppressed minority.) The guards raise their guns at Dilbert, who replies with the trope.
* Dilbert Dilbert is bumped from a fight. When he complains, the airline "accomodates" him by duct-taping him to the wing of the plane.
* Dilbert, Dilbert is proudly walking around with a "vast array" of personal electronics displayed on his person, until he meets the only man that can beat him in this regard: Techno-Bill. The moment Dilbert sees him, a fax machine on his groin suddenly prints a long, long strip of paper.
* Dilbert, Dilbert is stuck in traffic. The cause? Despite the freeway being 5 lanes wide, only 1 toll booth is open. Even worse, the guy currently at the toll booth is insistent on flicking his quarter into the coin slot and misses several times in a row.
* Dilbert: Dilbert once chatted with a woman calling herself Mistress Cruella. Afterward, he looked quite startled. What she said to him was, of course, left to the reader's imagination.
* Dilbert discussed this. Alice got stuck with prepping for a trade show because all of the men in the office had disqualified themselves through "Strategic Incompetence".
* Dilbert, Dogbert answers calls with "How may we abuse you?" when he is acting as a phone operator.
* Dilbert, Dogbert describes time: "It's like a donut shot out of a cannon and spinning at the speed of light, only without the donut and the cannon."
* Dilbert, Dogbert died from overly strong perfume and initially got into Heaven simply for being a dog, but they got sick of him and kicked him out. He did a brief stint as a guardian angel before the Powers That Be had enough of that and just resurrected him.
* Dilbert, Dogbert explains that while insulting somebody's mother is impolite, "fathers are fair game." He illustrates this by rattling off a bunch of "your father is so dumb" jokes.
* Dilbert, Dogbert gets diplomatic immunity at one point - and of course, abuses it

for the sake of amusement, to the point where he uses his diplomatic immunity to boot the president of Elbonia and take his place.
* Dilbert: Dogbert has taken over the world a few times. In one arc he does so through hypnosis, but abdicates after he gets bored. He's also taken over the company frequently, usually becoming obscenely wealthy and retiring within a matter of days.
* Dilbert: Dogbert is such an excellent liar he was once able to fool a polygraph... while claiming to be Abraham Lincoln.
* Dilbert, Dogbert rubs a lamp to see if there's a genie inside. He persists, and a genie eventually pops out:
* Dilbert Dogbert's comment on the event? "I loved the part where you said 'I come in peace.'"
* Dilbert, Dogbert tried a stint as a fortuneteller. In an attempt to give an infallible prediction, he told Dilbert that he will eventually die.
* Dilbert: During a brief period when Dilbert had a steady girlfriend, Phil the Prince of Insufficient Light barges in:
* Dilbert either. If anything, they seem to be the happiest romantic couple in the entire strip.
* Dilbert episode had Alice use this as an ice breaker party game. INSIDE Dilbert's house! It gets worse from there.
* Dilbert, even a pirate with a diseased parrot refuses to be spokesperson for the unethical company Dilbert works at.
* Dilbert featured an arc where Wally's potted plant becomes the waste receptacle for his coffee dregs. Dilbert later suggests to him that he switch to decaf; the next panel shows a giant tree growing out of the office building.
* Dilbert features many surreal jokes based on the premise that one character lives in his or her own little reality. Sadly, this is often a character who has power — or who gains power by enforcing his or her crazy perceptions on others.
* Dilbert features the PHB giving Dilbert a document to fill out that features close to a dozen negatives regarding the state of his employment.
* Dilbert" for minor misdeeds. Adams considers the resulting character an improvement over his original idea.
* Dilbert had a brief arc with him on Jury Duty, the more memorable strip has a man excused because his religion forbids judging other people.
* Dilbert had an old programmer, Dilbert and Wally sitting at the lunch table. The man says, "When I started programming, we didn't have any of these sissy 'icons' and 'windows.' All we had were zeros and ones — and sometimes we didn't even have ones. I wrote an entire database program using only zeros." Dilbert replies, "You had zeros? We had to use the letter 'O.'"
* Dilbert had a strip dedicated to mildly deconstructing the "paperless office." Cue panels showing engineers with notes written up and down their arms and an ultimate panel where the topic of the meeting is "the bathroom problem."
* Dilbert had the employees realize that if they insulted the boss after saying With Due Respect, he'd accept it as constructive criticism no matter what.
* Dilbert had the usual team creating a record of a new employee for the purpose of taking the ownership of a cubicle or some such, even making a picture of his face by amalgamating their own. By the end of the episode, everyone except Catbert thought he was real.
* Dilbert has even said that he represents the kinds of things he wishes he could get away with and say to people.
* Dilbert has him dating a witch who turns him into a frog to get rid of an annoying fly.
* Dilbert has regularly gotten fired or quit himself. He always ends up back at the company, usually in an even worse situation than before.
* Dilbert has such a poor sense of direction he can't find his way out of a cubicle.
* Dilbert has Zimbu the monkey, who can speak English and does a good job of making Dilbert look like an inferior worker.
* Dilbert have all been brought back by cloning within weeks of their deaths.

Dogbert on the other hand was kicked out of heaven.
* Dilbert. He didn't actually do much with his power other than force people to hold signs praising him while wearing brassieres. In the end, he told everyone he was retiring to go sit on a soft pillow.
* Dilbert. "He learned that you should never get your parachutes from the same people you're robbing."
* Dilbert. He's about the least dysfunctional character in the comic and the closest to a genuinely good one.
* Dilbert. He was actually based on one of Scott Adams' coworkers who, after realizing that the bottom 10% of employees would be offered extremely generous buy-out packages, went out of his way to get fired. Adams says about this "This wouldn't have been so much fun to watch except this fellow was one of the more brilliant people I've met and he was totally dedicated to this goal." Wally's take on it:
* Dilbert hides a surprising level of brilliance beneath a very thick layer of filth and laziness, once being an openly gifted and hard-working engineer before being crushed by the thankless soulless company they work for. He's still capable of amazing feats of intelligence when sufficiently motivated, like get-rich-quick schemes that tend to only fail due to bad luck or a simple oversight, and in one episode runs a very successful underground gambling ring. It's best summed up when Dilbert hears a scheme of Wally's to steal money from credit card companies:
* Dilbert himself used to be a science-fiction genius whose wild inventions made up some of the plots. Once the comic started focusing almost exclusively on office humor and lost the sci-fi elements, he was just another engineer.
* Dilbert himself was given the infamous excuse of "I need to wash my hair" when he asked a random woman on a date. When she suggests meeting him on some other day, his reply was, "I'll pass. I was hoping for someone with clean hair."
* Dilbert: "How many left-handed Elbonians does it take to screw in a light bulb? None! Left-handed Elbonians don't have light bulbs!" However, few Elbonians even know what light bulbs are.
* Dilbert' inability to judge the contributions of (or remember the identities of) his subordinates. Methods include: personal favors to the PHB, reporting his more ambitious colleagues to threatened superiors, having the PHB beaten on the occasion he *was* fired, tricking the PHB into signing favourable documents without reading them, and... just plain being lucky (the PHB admitted once that he's fired bald guys at least 7 times after mistaking them for Wally.)
* Dilbert: In a very early strip, Dilbert works out that dinosaurs couldn't possibly be extinct, at which point Bob (who had been hiding behind the couch) reveals himself — while some dinosaurs had evolved into birds, the rest have hung on until the modern day and have just been hiding
* Dilbert includes the commentary of "I was surprised that this one got published."
* Dilbert in H.R. gives him the death penalty just because it's "more economical" for the company than counseling. Dilbert is pardoned after Dogbert and Bob the dinosaur have a not-so-friendly meeting with Catbert involving a "fur wedgie."
* Dilbert in order to get rid of some excess "N"s, just to goad Dilbert into saying "The N's don't justify the neans".
* Dilbert interpretation of "All You Can Eat" at a seafood restaurant. By the time he and Dilbert meet again when Dilbert is an adult, he makes it pretty clear that he's going to stay until he's had absolutely "all he could eat"... which pretty much means dropping dead inside the restaurant.
* Dilbert. In the final strip, Dilbert sees the people marching on the castle with pitchforks and other tools and he and Dogbert panic and flee; the last panel has one Elbonian turning to another and asking "Did anyone remember to tell the King about the harvest festival today?"
* Dilbert involves a trip to Elbonia, where Dogbert has become a diplomat. He first uses it to get a cop to tear up a parking ticket, then eat it and then regurgitate it. Then he gets the cop's gun and clothes and orders him to dance while shooting at his feet. This is just the first thing he does with it. He eventually takes over Elbonia.

* Dilbert, in which an angry mob becomes confused and wields ice cream scoopers and toilet plungers.
* Dilbert is fired frequently, and has actually died more than once. The cartoon suggested that the company has several identical looking guys named Ted.
* Dilbert is forced to defeat a supercomputer at Scrabble. The computer just orders Asok to lay out all its tiles, then hacks into various online dictionaries and inserts, for example, the word "wipqozn" into society.
* Dilbert is introduced to an attractive new coworker, he begins to sweat and says, "It's a pleasure to meet me. I hope you never find a live turtle in your soup."
* Dilbert is not only one of the best engineers in the office, he also possesses amazing mental powers, including pyrokinesis and shapeshifting. Despite his prowess, he is paid the least, works in an eighth-sized cubicle, and is rarely allowed to leave.
* Dilbert is supposed to be a brilliant engineer, thus explaining his constant frustration with his idiot-run workplace. While
* Dilbert jokes) is offended by the actions of Dilbert's company. One of them starts shouting "WALLA WALLA WALLA!", only to be informed "We don't do that". The first one offers a fist bump instead.
* Dilbert kind, and dealing with them is frustrating, if not dangerous.
* Dilbert lampshaded this by Dogbert borrowing the Selsun Blue catchphrase of "It tingles, so I know it's working" with his beer ad of "My head hurts, so I know it's working."
* Dilbert loses his ID and is told to go to the security office to get a new one. The problem with this is that he's not allowed to go to the security office without his ID.
* Dilbert — if only because people tend not to hang around when you start chewing on your own arm.
* Dilbert. Mostly for Economics students learning about things that happen in organizations. Interestingly, it was reportedly featured in editions of administration books.
* Dilbert once brought a large rechargeable battery to work in order to steal the company's electricity to power his home.
* Dilbert once built a computer to predict the future, and got back a prediction that within five years all of humanity would be enslaved by evil squirrels in their nut mines.
* Dilbert once considered developing a way of leading his entire life from his bathtub. He then fantasised about being interviewed by a group of reporters about his revolutionary new lifestyle, but soon they criticised his system as pointless and even remarked that bathing was an inefficient form of cleaning, until Dilbert complained, "This fantasy's been a profound disappointment".
* Dilbert once extrapolated the future of the human race based on three "facts": Obesity was going up, science skills were declining, and young people were getting more egotistical.
* Dilbert once got free "therapy" from a psychiatrist who told him that his problem was that he's ugly and he should drink until he feels handsome. Walking out the door, he tells the receptionist, "You're overpriced."
* Dilbert once threatened to put Dilbert in "the Box" if he didn't work harder. Dilbert asked if "the Box" was bigger than his cubicle.
* Dilbert: One early series of strips had Dilbert visiting a "Jiffy Med Center" and being treated by a physician with no medical training and no clue because they couldn't afford real doctors.
* Dilbert: One early strip had Dilbert buy a pair of shrink-to-fit pants that are too large, because he expects them to shrink in the wash. He insists that after one cycle, they'll fit like a glove and they do - like a glove with two fingers.
* Dilbert, one of Dilbert's dates tries to invoke this trope. It doesn't work.
* Dilbert, one of the opening stings is a girl scout-type who clearly put on the waterworks to yoink Dilbert out of his money, even as he himself pointed out that her parents are wealthy and he doesn't need the overpriced cookies. When he tries to rationalize it as "helping a little girl learn a valuable lesson", Dogbert

counters that he had mostly encouraged her to pursue a life of crime.
* Dilbert options are better than what he has right now and calls Wally over to "get in on this".
* Dilbert) out of Dilbert's office. Dogbert claims the only thing that can kill them is a silver bullet. An employee points out the bullets he gave them are just regular bullets with silver spraypaint, and another points out his "silver" bullet needs more paint (leading to Dogbert spraying paint into the guy's face).
* Dilbert parodies this: while Dilbert and Dogbert are stuck behind a driver at a tollbooth, they engage a dual-keyed weapon to destroy her vehicle.
* Dilbert plays this trope a lot. Once, the title character suggested using smokers going outside to have a smoke as a non-lethal power source. Dogbert also plays this trope straight when he throws activists into the furnace to power the town.
* Dilbert producer Larry Charles and also co-wrote a majority of the episodes' scripts.
* Dilbert says he'll use humour in the workplace to ease tension. He then proceeds to tell a knock knock joke, in which the punchline is "not you anymore".
* Dilbert says this to Wally after Wally tells the boss that the proper way to use a pager is to clip it to his ear.
* Dilbert's company is out-sourcing their customer support jobs to Asia but the company they outsourced to outsourced it to a different country going on until it was eventually outsourced back to Dilbert's company who underbids everyone else and lies about hold times. The Boss's solution to this? Raise their prices.
* Dilbert's creator, Scott Adams, once wrote about his own experience on a jury. He was the only juror who thought there was even a chance (though a very small one) that the guy was innocent of the many crimes he was accused of, but decided not to speak up because he was hungry and didn't want to drag the deliberation out. He ends the segment by apologizing to the defendant: "I'm sorry I basically sent you to jail for the rest of your life so I could get a Snickers."
* Dilbert sequence involved Dogbert convincing Dilbert he had made him pregnant by giving him fertility drugs. Dilbert became visibly larger and greatly increased his eating to feed all the multiple babies he thought he had in there until Alice pointed out that a) it was impossible and b) the only evidence he had was his weight gain.
* Dilbert She once slapped Asok so hard that his face changed into a Dolphin's.
* Dilbert signed the team up for a paintball course as a "team building exercise", but instead of them going out to a paintballing field, he interpreted it as hunting them in the office with a paintball gun, without them being aware of it. Obviously, they didn't have on any protective gear, and in the confines of office spaces it would've been difficult to avoid "point blank" shots, both of which are major no-nos.
* Dilbert. Since his "survival tips" for avoiding frostbite involve liberal application of meat tenderizers and Worcestershire sauce, it is implied that after the first crash he became addicted to human meat.
* Dilbert's mom once didn't have enough money to cover her visit to a gypsy, so her son was struck with the "Curse of Competence". Dilbert's mom didn't see why it was so bad, but twenty years later, Dilbert is screaming in wonder why he always got stuck with the projects.
* Dilbert's mother has been accused of trying to use "counterfeit vowels" in a game of Scrabble; the charges were never proven.
* Dilbert stated that while similar to other microwaved frozen burritos, it was made for "someone who eats lunch without much thought to taste"; Adams claims part of it was not being able to disguise the mineral fortification well - and the ingredient combination was very gas-inducing, with an additional hinderance in that shelf placement was often unfavorable for being a new product. The Dilberito was discontinued after four years, with Adams having lost millions on it.
* Dilbert's tie is always curling up... except the one time when went on a successful date, the next day it was straight.
* Dilbert story arc, Dilbert becomes so insignificant to the company that he becomes literally invisible. Dogbert proposes having Ratbert sit on his head to

attract people's attention. Instead, other people can only see a floating talking rat. Wally then looks at his mug and blames the unusual sight on the Colombian coffee he's drinking.
* Dilbert story-line, Dilbert is sent to Accounting. In Dilbert's company, Accounting is a horrific nightmare realm whose employees are literal trolls and their superior is an evil witch (or wizard — gender doesn't really matter in Accounting). Dilbert transforms him into a troll just from breathing the air, and he is promptly put to work erasing budgets for various departments. Then he is given the budget of the Accounting department itself...
* Dilbert strip, a woman had a baby that looked like a loaf of bread, which turned out to be an actual loaf of bread.
* Dilbert strip: Dilbert accidentally bumps the car in front of him and gets out to apologize. When he looks in the front window of the other car, he sees a man with a grotesquely twisted-up body who screams "LOOK WHAT YOU DID TO ME!" The alleged victim takes Dilbert to court, intending to sue him for all he's worth. "Now I'll never be able to work again!" he whines to the defense attorney. But the plaintiff's scheme fails when the defense attorney asks him what his job had been, and he's forced to admit: "Circus contortionist."
* Dilbert strip, Dilbert is presenting his idea for a way to use electricity to cook your food "Without the need for charcoal or lighter fluid" to Dogbert, and announced he would name it the X-39 Energy Transfer Module. Dogbert simply replies "Did the name 'Electric Stove' ever occur to you?", pointing out Dilbert's invention fell back on this trope.
* Dilbert strip, Dilbert notices that the girl he just met, Liz, isn't wearing a ring. She tells him that she has a ring, but it's so big she needs to hire a team of eunuchs to carry it around. His response, visibly and audibly, is "Flop sweat time".
* Dilbert strip, Dogbert theorizes that gravity is optional and that this is the reason why most people are stupid: Smart people question everything, and when they start questioning gravity they get flung out into space.
* Dilbert strip features Dilbert going out on a date with an obese woman. He tries to take her to a buffet, but she said that she's already been banned for life, presumably for eating too much.
* Dilbert strip had a co-worker ask Dilbert to review her work, and he immediately says yes, only for her to not only ignore each time he agrees to do so, but when he eventually yells at her to accept yes for an answer, she responds "That's now how innocent people talk".
* Dilbert strip had a network that consisted entirely of videos of Ratbert slapping himself while singing Barry Manilow songs. And it was apparently not the stupidest channel that cable company had to offer.
* Dilbert strip had Dilbert and Dogbert visiting a guy who had a bunch of creepy hunting trophies on his wall, they leave when he gets to his (former) neighbors.
* Dilbert strip had Dilbert telling Dogbert about his boss's secretary demanding that he "bring her the head of Willy the mail boy." He sets a bag with a large round bulge on the table...
* Dilbert strip has Dilbert helping a robin recuperate after it mistakes a picture window for more air.
* Dilbert strip has him leaving a girl a message asking her out on a date. Her answering machine says "If you're calling to take me to Paris, press one. If you're offering to take me to a crappy movie, press 2."
* Dilbert strip involves Dilbert being the first person in the city to own a videophone. He then sits next to the phone, waiting for someone else to buy one so he can call them.
* Dilbert strip, Mordack the Denier eats Wally's requisition form for a new computer (in front of him) and says "We lost the paperwork." Wally responds by holding up a giant stack and saying "Good thing I made 75 more copies."
* Dilbert strips, Bob the dinosaur gives Dilbert's company's CEO a "tele-wedgie" to dissuade him from relocating the company.
* Dilbert strip sequence, in which Dilbert decides to make himself a superhero

costume and stand outside the local nuclear plant, in the hope that an accident will occur and give him superpowers. When he gets there, he finds a dozen other guys, all in various designs of spandex, who apparently all had the same idea.
* Dilbert strip shows Dilbert stuck on one of these lines. By the final panel he's gotten a hammer and is about to smash the receiver.
* Dilbert strips loved their puns. One strip features Dogbert instructing the readers on finding a safe place out of range from which to deliver the punchline of the following pun:
* Dilbert strips seemed to be taped on every cubicle in Corporate America. Debuted in 1989 and continued throughout and beyond the 1990s.
* Dilbert strip using "Dork" as an insult, Scott Adams printed a reply in which Dogbert apologized "To all the Dorks who were offended."
* Dilbert strip where Ratbert attempts to infiltrate a gang of elves who have been terrorizing Dilbert. They ask for the secret handshake and he performs a ridiculous pose with his arms waving and his head sticking out from between his legs. One elf replies that he's wrong but it's "one heckuva good guess".
* Dilbert strip where somebody is putting up a sign that reads "8 days since the last accident", and then falls off the wheeled chair they're standing on.
* Dilbert strip, where Wally's excuse for being useless was that he was keeping hydrated by drinking coffee to keep his spleen from drying up.
* Dilbert supposed to do at the movies (talk through it, switch theaters, and spoil the endings for people in line), which gets him chased by a horde of angry theater ushers.
* Dilbert talks with a pre-recorded message left by his mother, ending with:
* Dilbert television series had an episode in which Dilbert talks to a tape recording of his mother, during which he angrily asks if he's so predictable that she can tape her half of the conversation ahead of time. He is. To the point where it tells him to put back the soda bottle he tries to steal.
* Dilbert, the boss tries to give a certificate originally meant for Wally to Alice instead. He hastily corrects the name on the certificate to Alice's supposed "Indian name", "Wallyina".
* Dilbert the gang has to bring a prototype to a tech show. It's a prototype for a holographic AI interface. They don't have anywhere near enough time or money to do this, so they gut a computer monitor, punch a hole in the bottom and the table, and have Wally stick his head up. He's supposed to pretend to be the interface. Too bad they are visited by the Dark Angel of Product Demos (Phil the Prince of Insufficient Light, his "hello, Wally" would've been bonechilling if heard in animation).
* Dilbert the Pointy-Haired Boss complained to Catbert that Dilbert thought he was predictable.
* Dilbert. The previous comic did say that Asok had to travel to "the bowels of the bureaucracy"...
* Dilbert the strip takes in. Considering the strip's message that "cynicism equals intelligence", it comes off as no surprise that he's portrayed as stupid.
* Dilbert, the test engineer who NEVER aproves anything, and enjoys destroying people's dreams and emotionally and financially abusing women.
* Dilbert, the title character is infuriated that a linguistically-gifted monkey, Zimbu, has been promoted.
* Dilbert, the title character regularly built strange-looking inventions with (occasionally) even stranger purposes, such as a trash compactor that can pack two tons of garbage into the volume of an ordinary brick or talking robot dog.
* Dilbert they are so useful. She hands the offending co-worker the titanium rod with what's left of the cell phone stuck to it with a simple "It's for you."
* Dilbert: they wear fur hats and wallow around in waist-deep mud. They're also an entire nation of idiots, who have animals in their government and fight wars over handedness (as in, left vs. right).
* Dilbert, this happens to Dilbert after delivering bad news to a company meeting, showing that the company policy about not shooting the messenger merely forbids the literal act of shooting.

* Dilbert tie-in book "Dogbert's Clues for the Clueless" has a page on not overtly noting when someone's kids do not resemble them. The panel indicating that one is definitely entering the rude category on the subject includes the question "Is your garbageman Gus Simpson?"
* Dilbert: Topper. Every story you tell, he did it better, even if it seems logically impossible.
* Dilbert tried calling a software support helpline, and advised the techie upfront that he'd already tried rebooting. After explaining the problem in detail, the solution was... "reboot."
* Dilbert tries these at one early point. Dogbert tries to tell him that they're meant to be given to other people, but Dilbert responds "It's too late, I'm hooked."
* Dilbert trope. Dogbert used his phone call to hire a wrecking company to destroy the building.
* Dilbert trying to talk about the actual product, but he kept fainting and conking his head against the ground due to the sight of her.
* Dilbert TV series, a death row inmate is pardoned, but the warden then mistakenly presses the 'fry' button instead of the 'place call on hold' button.
* Dilbert TV series, Dogbert explains that computers are going to take over the world, but fortunately, he has found a way to save humanity. After Dilbert compliments him, Dogbert clarifies that it's in the same way you might save postage stamps, and opens a closet door showing the jars he's saving people in.
* Dilbert TV show had an episode that was kicked off when Dogbert complained the remote wasn't working, and Dilbert told him to change the battery. The left one. Also, he bought a battery on the way home from work the day before because he sensed this coming. This was a demonstration of Dilbert's "knack" with electronics, which he goes on to lose later in the episode.
* Dilbert TV show, when Dilbert launches a rocket that is supposed to go to other planets and bring back alien DNA, but it malfunctions and circles around the town after getting a sample of alien DNA, picking up random bits of Earth animal DNA (and robot parts), and then hits Dilbert and lodges itself in Dilbert's body. The result is that Dilbert becomes pregnant with a mutant being.
* Dilbert, two bullies decide to beat Dilbert up for wearing glasses with a camera. Little do they know, he's made a few "modifications".
* Dilbert, Wally always does that. For example, transferring hundred of thousands of bytes to an auxiliary support (he copied a file on a floppy disk). He even suggested to assign him the task of testing the internet connection using high-requested servers (he intended to make watching porn his job!).
* Dilbert, Wally created a screensaver called "Wally's 101 Most Annoying Cubicle Sounds" just to drive Alice up the wall.
* Dilbert, Wally once gets a hands-free and goes around PHB, shouting insults in his face, pretending that he actually talks to his mother. Personal calls have been forbidden in the Path-E-Tech Management ever since.
* Dilbert, when Wally asks if he can spare a pen, Dilbert offers one to him only after bidding it farewell at length. Wally asks instead for a pen that Dilbert's had "less of an emotional relationship with."
* Dilbert (which is clearly just a Y-shaped metal rod) for detecting human stupidity.
* Dilbert." With Asok's lower body hanging out of the vent, Alice puts up a sign that reads "Spank the Intern $.50".
* Dilbert, with Dilbert often just along for the ride. Even outside the office, Dogbert frequently dominates the storylines.
* Dilbert without a whiteboard to diagram things. When he tries to give a presentation without a whiteboard, he ends up making ape-like noises and imitating a chimpanzee.
* Dilbert writes the governor to complain about prison overcrowding, the governor sends a convicted murderer to live with him for "thirty or forty years."
* Dilbert (Zimbu the Monkey, Dawn and Rex). There's also Mordac the Preventer of Information Services, who went from a regular recurring villain to appearing

infrequently.
* Dil Chahta Hai, Sameer believes that he is truly in love which each new pretty girl he meets, and is heartbroken when they reject him. His despairing parents eventually try to set him up in an arranged marriage with a girl named Pooja. Fortunately, Sameer ends up falling in love with her, too!
* Dil, due to his young age, calls Chuckie "Chubby" or "Ducky" and Lil "Lillip".
* "Dilemma" by Nelly, with the just friends role being forced by Nelly as he doesn't want to do anything to break up the relationship for the object of his affections and decides to play it cool.
* Dilemme Charnel (France) features a strip card game between 2 couples. Viewers see a woman remove her dress; the 2 guys are playing sudden death rules and are stripped naked by the women when they lose. The scene cuts to all 4 players naked and starting to do forfeits.
* Dilithium crystals are a fundamental aspect of the Star Trek universe, as all Federation starships use them for their
* dilithium crystals, which are a key component of starship power generation and highly valuable to space-traveling races.
* Dillan likes to pretend their miniguns are used by heads of state. They aren't, generally, as that sort of collateral damage is hard for any elected official to stomach.
* Dillinger and his squad are filthy rich, helps out the common man caught in a financial bind, can woo and bed a different woman every night if they wish, and are generally seen having the times of their lives when they're not dealing with being chased by police or committing bank robbery — much of which is
* Dillon from reacts this way when he opens up a refrigerator, revealing a cannon primed and ready to blast him—just so Dr. K can
* Dillon has also kissed his old crush Ray who thinks about how "hot" it was despite being straight and considers that he might be "a little bi". When Dillon reveals that he's gay and imagines Amber as
* Dillon has claimed to have "turned" several straight guys in the past with his Swirly-Go-Round kissing technique.
* Dillon respects Ruby's desire to keep, first her having spent an evening in male disguise, and second her new-found love of
* Dillon's infatuation with Gary remains somewhat active after he gets his own comic,
* Dillon's Rolling Western, which turns the player's Mii into one of four possible anthropomorphic animals to take part in the story.
* Dillon too has a collection of snaps of attractive men on his phone, though most of them are probably relatively innocent images of clothed men in public — but taken more or less surreptitiously.
* Dilly The Dinosaur had a story "Dilly and the Book of Bad Behaviour", in which Dilly, the naughty young dinosaur, worries that if he gets excited for Christmas, he'll be naughty and Santa won't come so he disallows his family to mention Christmas.
* Dilly The Dinosaur steals a box of swamp chocs (a type of candy that dinosaurs like), and Dorla (his big sister) tries to scare Dilly by telling him about prison. When the parents' friend, a police officer named Donald, comes to visit, Dilly confesses, even though nobody but Dorla knew (and even then, she was only guessing) that he'd stolen them.
* Dilly The Dinosaur story "Dilly and the Book of Bad Behaviour", Dilly is paranoid about getting into Dino Claus (the dinosaur version of Santa)'s Book of Bad Behaviour, so they go to a mall Santa and have him explicitly tell Dilly that he's not going to be put in the book.
* Dilraba Dilmurat and Vin Zhang have acted together in five series so far:
* Dil Se..: in the song and dance number, "Satrangi Re", Amar throws out his long black scarf which whips around the waist of Meghna so he can use it to reel her in.
* Dil Se.. terrorist named Meghna all over the country, trying to win her affections. It does not end well.
* Diluc protects the city of Mondstadt from monsters and criminals at night as the

"Darknight Hero". He didn't choose the name for himself, however, and didn't expect to become a sort of folk hero. It's also connected to how he dislikes the Knights of Favonius because they're a
* Dilvish, the Damned and devastate an area as large as a city. He refrains from using them most of the time for much the same reasons.
* Dilvish, the Damned series begins when the eponymous hero is petrified by an evil wizard, only reverted back after several centuries, with his soul sent to Hell for the duration.
* Dilvish, the Damned. The whole story is the attempt to bring the news back.
* Dilwale Dulhania Le Jayenge: Simran chases the train Raj is in after her dad finally realizes that she and Raj deserved to be together since no one could love her as much as Raj does, and lets her go after Raj.
* Dil was absent for 2 episodes in Season 6, 13 episodes in Season 7, and 6 episodes in Seasons 8 and 9.
* "Dil We Meet Again" and "The Magic Baby" premiered on the VHS release
* Dimachaeri stats can be inferred to date back to at least ~200-300 AD.
* Dimebag Darrell was shot to death on stage in 2004 by a Pantera fan who could not accept the breakup of the band (Dimebag had formed Damageplan with Vinnie Paul at that time). The killer was promptly killed on the scene by the police.
* Dime Novel can speak a wide variety of languages, including Old Norse.
* Dime Novel, circa 1868. Earliest example of an "Edisonade," a kind of proto-Steampunk.
* Dime Novel had a few of these:Sang Tu and The Yellow Tong, The Hip Ling Secret Society, the Yellow Spider (A Chinese crime boss in San Francisco), etc.
* Dime Novel had quite a few of these. Perhaps the most dangerous was Dazaar the Arch Fiend. Her specialty was knife throwing; she could throw a knife hundreds of yards with extreme accuracy. Another one of Carter's female enemies was Zanoni the Woman Wizard, a skilled hypnotist and chemist (poisons were her specialty). She was a truly nasty piece of work. Once, after being captured by Nick, he warns her not to try to "make love" to him as a way to get out. Her reply conveys her fiendishness: "Have no fear, my pretty man, my cornucopia of driveling goodness. When I make love to you, it will be to your articulated skeleton—to your empty, fleshless skull—to your heart preserved in alcohol and your liver thrown to the dogs."
* Dime Novel inventor Frank Reade had quite a few adventures out West.
* Dimension 20 and constantly alone. When he's brought to Gowpenny Academy, the other three exchange students are his first-ever friends, and he's astonished when they don't abandon him after seeing his dark powers in action. Later, he admits that the day they met and went shopping for school supplies together was, hands-down, the happiest day of his life—until it was topped by the day they all got sorted into the same house at Gowpenny and spent time goofing around in their common room.
* Dimension 20 being sent to a magical school in the UK, so naturally, culture clash and this trope ensue.
* Dimension 20 campaign one character's magic all manifests pink and sparkly, and their familiar turns out to be an adorable talking chipmunk wearing a little jacket. They wanted to be a dark and sinister spellcaster with a serpent and are mortified that this keeps happening.
* Dimension 20: Due to the format of most TTRPG campaigns, the heroes are usually severely outnumbered and/or less powerful than their enemies, which means than in order to win, they will have to resort to trickery and outsmarting their opponents.
* Dimension 20, encouraging his friends at every step and helping keep Evan calm when his powers start acting up, and has no problem being friends with students who some would consider "uncool."
* Dimension 20's "Misfits and Magic" campaign is this to the exchange students, and it's hinted he was also this back home to his basketball team. His specialty is boosting morale and rallying people together, assuring them that if the team sticks together and has each other's backs, everything will be okay. He offers encouragement whenever his friends need it, but is more than willing to throw down

with anyone that may hurt them. "Goat house on three, family on six!"
* Dimension 404 episode "Matchmaker" features ads for a fictional matchmaking website that are meant to resemble the ads that accompany Hulu videos.
* Dimensional anchor) prevents the affected being from being moved by any forms of teleporting and planeshifting.
* dimensional anchor, where the villains can escape an ambush only because V is not with the heroes to lock them down.
* Dimensional Door spell in this manner until it was nerfed in 3E. Essentially it allowed a relatively low-level spell to cut almost anything in half vertically...
* Dimensional Links (called Ocarina) encounter and travel with one another. Since Mask is a future Ocarina, he refuses to tell Ocarina too much about his future, partially because of paradoxes, and partially because it's not fair for Ocarina to get hints when Mask didn't.
* Dimensional Links games, but as a group they avert this by being very different from each other.
* Dimensional Prophecy of Zohar Redux Cybernetically enhanced mathematicians in cooperation with megacorps trying to repair an algorithm which is able to save humankind.
* Dimensional Prophecy of Zohar Redux has a few elements which are hand drawn or rotoscoped.
* Dimensional Prophecy of Zohar Redux is a cosmic horror story about scientists using an algorithm to calculate the behavior of eldritch abominations and trying to protect civilians.
* Dimensional Traveler: Someone who journeys from alternate dimension to alternate dimension.
* Dimension Door (4th level teleport, self + about 200lbs) + Feather Fall (2nd level, "take no falling damage"). Choose your rock. Touch it.
* Dimension Films were given very limited releases with virtually no advertising whatsoever.
* Dimension Heroes and his henchmen watching the destruction of the city they helped bring about with smug satisfaction.
* Dimension Heroes, a web novel series skewed towards a younger demographic featuring five teens who discover futuristic battle suits and are subsequently thrust into an adventure in which they must save their world from colliding with a parallel dimension.
* Dimension Heroes brings a group together, not because he has any particularly appealing qualities, but because he unintentionally put them under fire from the enemy, thereby forcing them to become involved as part of the group.
* Dimension Heroes completely abandons his ally after discovering his Guardian Band, wanting nothing to do with the conflict, despite the fact that he's involved whether he wants to be or not.
* Dimension Heroes continue on their journey, the Dark Overlords, despite having equal control over Creturia, seem to escalate in power. Interestingly, their forces do as well.
* Dimension Heroes, despite their increase in power and skill over the course of the series, have yet to fully separate themselves from this trope.
* Dimension Heroes don't want their Guardian powers, despite how cool some of them think they are.
* Dimension Heroes each live in a different type of scary lair, from a fortress to a castle to a palace to a citadel.
* Dimension Heroes, from Wyn traversing the Earth to the Dimensional Guardians traversing Creturia.
* Dimension Heroes has an ongoing story arc, broken up into several smaller books.
* Dimension Heroes is notorious for bad puns, which usually lead to whoever says them getting smacked.
* Dimension Heroes is notorious for cracking stupid jokes before, during, or after most battles, usually leading to him being smacked upside the head by Wyn.
* Dimension Heroes makes a deal with Rob: if he can defeat him in battle, he'll join them in their fight against the Dark Overlord Clonar. And maybe become their

friend, as well, but that might be pushing it.
* Dimension Heroes makes fun of this trope in one scene where Rob tells his fellow Dimensional Guardians that they must make up attack names to shout out while in battle. When asked why he's unable to give a good reason. He then asks the much more experienced warrior Wyn why he does it. The Guardians wait intently for the warrior's response, and are subsequently disappointed when he mutters simply, "Because it's cool."
* Dimension Heroes, neither good nor evil are safe from this trope, most noticeably Wyn and Clonar.
* Dimension Heroes often has the Dimensional Guardians fighting a new monster in every chapter, though it must be pointed out the fights still help to advance the story arc.
* Dimension Heroes proves on several occasions that his reservoir of book knowledge can prove beneficial in making it out of various tight spots the heroes get into.
* Dimension Heroes: Rob displays this trope towards his fellow Dimensional Guardians, reasoning that as the leader, he's responsible for their safety.
* Dimension Heroes seems to slip in and out of this trope: sometimes he feels like talking, and other times he'll simply stand around and look cool.
* Dimension Heroes sports a Mega Man-esque blaster on his right hand when in Guardian form.
* Dimension Heroes, Tami oftentimes encases her enemies in solid blocks of ice, though the attacks prove to be little more than minor distractions.
* Dimension Heroes: The Dark Overlords from the web fiction serial took over a dimension.
* Dimension Heroes: The first part of the season finale shows the Big Bad and his henchmen watching the destruction of the city they helped bring about with smug satisfaction.
* Dimension Heroes, trying to out-pun an ice Creturian. The pun war escalates until Tami finally shouts, "All right, already! Stop!"
* Dimension Heroes want their superpowers. Of course, that doesn't stop some of them *coughRobcough* from enjoying them.
* Dimension Heroes when Brittany and Tami go clothes shopping. Brittany is excited about a neat shirt she found on sale, only for Tami to point out that it was remarkably similar to the one she was currently wearing.
* Dimension Heroes, while serving a purpose as mentor and part-protector of the multiverse, serves the majority of the series as an exposition machine.
* Dimension Heroes, who seem to have the only gravity-defying hair in the whole series.
* Dimension Heroes, who would much rather his servants take care of matters that are beneath him.
* "Dimension Jump" introduces Ace Rimmer, Rimmer's counterpart from a dimension where he actually successfully became a Space Corps test pilot
* dimension of Deadworld, life itself was outlawed by a group of undead lawmen known as the Dark Judges, who remained as its custodians after completing their global genocide.
* Dimension Queen! Greg Pak followed up on this in a later story where Umar returned for seconds. This time, Hulk was much stronger and up to the challenge.
* Dimensions: a line, a loop, a tangle of threads, an independent film about time travel, set in the 1930s.
* "Dimensions in Time" having long since adopted short, straight hairstyles after their role, and issues in the costuming department, leading to things like Leela not having shoes on. Couldn't they have found Tom Baker a wig or anything?
* Dimensions they use a different engine for handling long hair that stops it from clipping through the girl's shoulder every time she moves. Long, flowy dresses will still flow strangely at times, though.
* Dimension W, main character Kyoma is a technophobic bounty hunter who tracks down illegal power sources and their distributors. Early on, he finds himself partnered with Mira, a highly-advanced android. He spends most of the series casually insulting her.

* Dimension X", a devastating atomic / bacteriological war is being waged in 2155. William Travis says that half the world is dead and the other half is dying.
* Dimension X and was heading west. The comparatively few survivors settled on Mars.
* Dimension X and with 100 levels, is the sum total of the universe. Even asking what is beyond the Ship is considered heresy and typically leads to the culprit being fed into the converter.
* Dimension X as he opposed their god Jordan. It is unclear whether or not this is true.
* Dimension X, but to check newspapers and radios for when new episodes would begin.
* Dimension X. Captain Parsons tells them that he will return with more fuel to bring them to Mars, instead.
* Dimension X. Due to the small cast, they also have to remove many of the characters as well.
* Dimension X from the original. This implies everyone has only one name and that confusion between people is rare.
* Dimension X", Mr Underhill is very insistent that his wife call the machines "mechanicals", not "robots". She points out that there isn't any difference and he counters that it makes a lot of difference in advertising.
* Dimension X of the Upper Levels are assumed to be primitive creatures who are little more sophisticated than animals by the so-called superior race that resides on the Lower Levels of the Ship. As their leader Gregory informs Hugh Hoyland, most of them are every bit as intelligent as he is in spite of their physical deformities.
* Dimension X" opens by describing the recruiting posters for the Deep Space Star Runs. "Seek your future in the Stars" is the tagline quoted by the characters.
* Dimension X scheme by getting the dolls into homes with classified information.
* Dimension X's "Courtesy" aired in 1951, humanity has colonized numerous planets, including Landro, by 1997.
* Dimension X's execution. As soon as his fiance leaves, he calls the genetic cages back and orders them to continue with the execution.
* Dimension X", the alien Zan conquer Earth and all the animals of the planet, including the last man and woman, are exhibited as specimens in their zoo.
* Dimension X", the dog, Mr Blister, is the first one to be upset by Toto, one of the eponymous dolls.
* Dimension X": The robot Hathaway family isn't capable of aging. They don't know how long they will last, but they do not grow old like Dr Hathaway (their creator) does.
* Dimension X", the subatomic world that Eva and Allen are hidden in has a different sense of time than we do in our macroscopic world. The ten seconds that pass in our world represent billions of years for the subatomic world.
* Dimension X", the titular species are an ancient race who constructed the canals on Mars and the ruined cities on Titan, Centaurus II, and Centaurus III, around one hundred thousand years ago. Their influence extended to more than a thousand planets before they mysteriously destroyed themselves. The archaeologist Mr Howell determines that the Lost Race were a race of highly evolved monkeys who were being slowly mutated by atomic energy. He concludes that they committed mass suicide as they could not stand the idea of turning into human-like creatures.
* Dimension X": When Bel Arvaden speaks in an aside to the audience to narrate his opinions and the setting changes, he changes his tone and cadence to fit the classic pattern of a radio detective.
* Dimension X": When Bel Arvardan meets with Pola a second time, footsteps are heard to approach them, and Pola immediately suggests they kiss to avoid suspicion.
* Dimension X", William Travis was working on a new and highly advanced atomic / bacteria bomb in 2155 before he and his wife Susan traveled back in time to 1950.
* Dimentio also has this personality, being a deranged, evil jester who casually jokes as he
* Dimentio, Charming Magician, which combines a sort of swanky, circus/magic show

tune with a feeling of power and dread.
* Dimentio, who often has rather quirky behaviors that count as somewhat comical, and yet commits genuinely horrific actions while cracking jokes.
* Dime to Retire": When Porky refuses to pay the 10 cents for the room, Daffy confiscates his baggage. Unfortunately, Porky is a gun powder salesman, and the suitcase with his wares is leaking. As Porky drives off, his car intentionally backfires and lights the trail left by the bag...
* Dime to Retire, where Daffy runs a scam in the hotel Porky is staying at. First, he let a mouse into Porky's room, which drove Porky nuts by eating a piece of celery, prompting him to have Daffy bring in a cat to chase it off for a mere $5, only for the cat to refuse to let him sleep on his bed, thus Daffy brought a dog to scare it away for $10, only for the boxer (after hearing a bell, courtesy of Daffy) to start punching Porky, after which Daffy charged $26 to bring in a lion to get rid of it, which naturally tried to eat Porky, then for another $72, Daffy used an elephant to drive out the lion, however, the elephant then took up most of the room, so for $666, Daffy released the mouse back into Porky's room to scare it off, leaving Porky with the celery-eating mouse all over again.
* Dimetrodon and modern birds are equally wrongly considered not to be dinosaurs.
* "DiM" has no dialogue and no music and is simply about a trip to the store to replace a broken light bulb. There are also no gags or jokes whatsoever and appears to simply be experimental storytelling.
* Dimidiochromis compressiceps eating just eyeballs, or if they merely bite at smaller fishes' eyes as an opening attack that doesn't always suffice to ensure a kill.
* Diminishing Returns, but if you wanna be in top form in Splatfest, or even in Ranked Battle, which is the fastest way to level up the shirt (...if you win), then you might want the extra skills. Also, you are forced to use it in Splatfest, and you might not appreciate the Special Saver ability over the other abilities on your other clothes. And finally, the shirt is taken away at the end of Splatfest, making all the effort seem wasted.
* Diminishing Returns for BalanceAs you increase your stats, each increase has less effect, forcing you to balance your stats more.
* Diminutives are not being used correctly (or not used at all). For example, Vlad is a diminutive of Vladislav, not Vladimir (although it has also started to be used that way after the fall of the USSR). The diminutive of Anastasia is Nastya, not Anya. And the proper way to address someone twice your age is using their
* Dimitri angsts quite a bit about all the innocents he had killed while a Strigoi.
* Dimitri can marry all of his female classmates in the Blue Lions house, of which, only Annette is his age, while Ingrid and Mercedes are older than him. He can also marry female Byleth (if she S Supports him at the end of the game), who is around four years older than him, and Catherine, who is older than Byleth as mentioned above.
* Dimitri could count as one in the Blue Lions route after the 5 year time skip. He goes from an earnest, idealistic teenager to a bitter and vengeful
* Dimitri: His art style was rejected by the snobby elite, so Dimitri turned to forgeries and counterfit money to attack them for their old-fashionness and stand up for other potential artists who were snubbed. His actual goal, as revealed in the third game, is to make enough of a fortune to fund an expedition to locate his grandfather's diving gear. With no luck from the Klaww Gang, he turns to the Cooper Gang for their help in his goal. They agree, Dimitri succeeds in his not-so-evil goal, and makes a
* Dimitri, in turn, represents Romanticism for the most part, as he fights partly to preserve the current social order and religion of the land
* Dimitri's father, King Lambert, his stepmother, Queen Patricia, and Felix's brother/Ingrid's fiancé, Glenn, among countless other people, perished in the Tragedy of Duscur.
* Dimitri's mother Patricia. The plot point is never brought up again on this or any other route.

* Dim Judge: only serves to give you a game over, always take the side of the obvious big bad and give the defense/prosecution an excuse to spell everything out.
* Dimmsdale is not amused to learn Timmy has snookered them with his Double-T radio station. The angry mob can only be stopped
* Dimmu Borgir. But the company drew the line with their song "Tormentor of Christian Souls", which was apparently so bad the label refused to put the lyrics for the song in the booklet. They still published the song itself, they just refused to tell anyone what it was really saying.
* Dimmu Borgir, who turns out to have a deep voice as she performs a spoken-word rendition of one verse.
* Dimo gets stung on the arm by some glowing blob thing and Oggie slices the arm off. The non-
* Dimo is hit in the hand from glowing slug-like monsters, he feels it moving up his arm and urges Oggie to "Hurry!". Oggie dutifully chops Dimo's limb with his axe. Oggie shortly wonders if it was the right arm, but seeing it literally melt a few seconds later confirms there was no mistake.
* Dimo loses an arm in Sturmhalten. Maimed Jägers traditionally take up residence in Mechanicsburg to wait for a Heterodyne to repair them. This option not being available during the time the Baron time-froze the town, Dimo somehow acquires a mechanical arm. (It's possible that it is built by the construct Punch, who is a skilled blacksmith.)
* Dimo of all people pulls one off in an earlier chapter. After Gil destroys two giant spider-walker tanks with
* DI Mooney uses his credit card to slip the lock on an empty house rented by one of the suspects in "Written in Murder".
* Dimo to Oggie, with a fist in the ribs. Higgs is still able to guess what Oggie was about to let slip, though.
* Dimples Down Below oversleeps and rushes off to school, ending on the indication that she did crash into a cute guy this time.
* Dina at the Dragon Fortress Dina, a 13 years old girl, is caught between two dragons:
* "Dinah Drake"/Tina Boland was an agent for the Ninth Circle. Originally he didn't want anything to do with Emiko after that, but then he realized that Emiko hadn't done any of those things yet and right now was just a girl who wanted to be a part of the family.
* Dinah Shore (1944), and toured American troops in liberated France after the Normandy landings in the second half of 1944.
* Dinah Shore (Golf, though more notable as a promoter of women's golf than as a player; still more notable as a singer and actress)
* Dina M Nealey, bisexual Norwegian artist and author who primarily makes NSFW art.
* Dina's parents are as quiet and as socially awkward as she is and accidentally let Amber's abusive dad into the dorm since they don't know any better, but they want nothing more than for their daughter to be happy. When Dina tells them that she
* , Din Djarin raids Moff Gideon's stash of Corellian Whiskey after showing his face to Grogu and giving him to Luke Skywalker.
* Diner Brawl with a couple of hitmen. They end up behind the bar and make use of the various cooking implements there as per this trope.
* Diner Dash Adventures. After playing Food Truck rounds, the player could also watch ads to extend the round for 30 seconds.
* Diner Dash Adventures has Grandpa Norbert courting Grandma Florence.
* Diner Dash franchise twice; the first one, Diner Dash Rush, acted as a filler game. The second reboot, which didn't happen long after the first one, is where the full reboot happens.
* Diner Dash. He'll order time consuming dishes that take up space in the cooking line, then attempt to flee without paying, damaging the player's business. The only way to stop him is to tap him when it looks like he's about to flee, forcing him to pay, which can be difficult if you're busy with other customers and aren't paying attention to his visual cues.

* Diner Dash reopening a run-down diner after quitting her soul-sucking corporate job. Unlike most examples, Flo strives for great food and speedy service, with it being up to the player to deliver.
* Diner Dash wants to cover a story about Flo's mother, and Flo has to solve a series of puzzles her mom left to find her.
* Diners, Drive-ins and Dives - some owners have even stated that they would have gone out of business if not for the attention he brought them.
* Diners, Drive-ins and Dives visits restaurants suggested by viewers. In fact, the suggestion form asks that you be available for interview if they decide to visit the place you recommend.
* Diner, shooting the Grill when it is not lit makes a noise of someone burning himself on a hot griddle and then screaming.
* Diner takes place entirely in a Fifties-style train car diner. There's even a sign outside reading "Home of the Bottomless Cup" and a jukebox on the playfield.
* Diner, time the launch so the ball lands in the saucer when the desired reward is lit on the jukebox.
* Diner was made into a pilot the following year that aired on CBS but wasn't made into a series. Barry Levinson directed both, but Paul Reiser was the only cast member in both.
* Diner wrote and produced a half hour sitcom version of his movie of the same name, with Paul Reiser reviving his original role.
* Dinesh D'Souza describes his sister's 'arranged marriage' as a process by which her parents vetted the prospects and made a shortlist who were then 'invited to dinner with suspicious frequency' and left the final choice of groom to the girl.
* Dingbat and the Creeps feature a vampire dog, a living skeleton and a talking jack o'lantern.
* Dingbat and the Creeps had Sparerib, a broad skeleton that could arrange himself into several configurations, like a floor lamp in the opening.
* Ding Dog Daddy, a dog falls in love with a statue of a female greyhound after kissing it when it gets struck by lightning. Near the end, when the statue is removed and melted into a bombshell for the war effort, the distraught dog tries to give "Daisy" one last kiss, causing the bomb to explode.
* Ding Dog Daddy, also from 1942, features a lonely dog who falls in love with a metal statue of a female dog that he affectionately calls "Daisy". At the end, he's left heartbroken when the scrap men haul "her" off to be melted down for the war effort.
* "Ding dong, dammit! Ding DONG!" (Joke involving marital infidelity and a closet.)
* Ding-Dong-Ditch Distraction: A prank where you ring someone's doorbell and run away before the door is answered.
* Ding-Dong-Ditch Distraction: Ringing the doorbell and running away before someone answers.
* Ding-Dong-Ditch Distraction: Ringing the doorbell and running away before someone answers the door.
* "Ding Dong": Jack is shived in the oven after his wife learns he had a vasectomy.
* Dingodile and Rilla Roo, both anthropomorphic, are near-equal parts dingo and crocodile, and gorilla and kangaroo, respectively.
* Dingo Doodles after Sips recovers from his near-death trance, he retreats to a nearby room. The DM proceeds to describe in detail what each of his senses them him as he stands there: How beautiful everything is, the wonderful sound of birds in the distance, the smell of exquisite perfume, the wonderful carpet beneath his feet... and the taste of blood from having eaten Bouclaire's heart while in his trance.
* Dingo Doodles and the first episode being the middle of the campaign.
* Dingo Doodles, and wishes they would all disapear. It turns out that she is one herself.
* Dingo Doodles. She is however shocked when she learns he is a sorcerer but eventually works out how. While Quinn-Ora offers to explain this and reveal things

Sips had forgotten from his Awakening, Sips refuses in favor of killing her.
* Dingo Doodles. The sight of this is disturbing enough that it makes one person who sees it vomit.
* Dingo Doodles the twin princesses Eyes and Ears are able to create point-to-point portals in combat. Using these they can strike their enemies from unexpected angles with their daggers and shields respectively.
* Dingo Doodles. While some Foreclaimers fled through a portal, Xanu remains committed to finding and exterminating what's left of their race.
* Dingo Doodles, who they proceeded to thoroughly "test" for many years until he slaughtered them as revenge.
* Dingo from The Pack in the same series opted for Powered Armor rather than cybernetic upgrades or genetic manipulation like his fellow Pack members.
* Dingo Pictures, Dingo Channel is a television channel clearly inspired by the Disney Channel.
* Dingo Pictures invokes this with a gang of duck hooligans who show up for the animal soccer game. They're stereotypically attired and some have weapons with them before the game even starts. They play no part in the film after being introduced.
* Dingo Pictures starts with two birds pooping on Wabuu's head to see if he can take a joke.
* Dingo Pictures, Tio's father states that, they were planning on having a daughter named "Tia", and so just flipped the name when they realized they had a son.
* Dingo Pictures while the narration insists this is a happy ending just because he has proof that Esmeralda is still alive.
* Dingo Pictures, you can audibly hear the voice actors struggling not to laugh every time they have to say "poo".
* Dingy Trainside Apartment: A cheap, dilapidated urban apartment next to train tracks.
* Dining in the Buff: A character eats or drinks something while naked.
* Dining In The Void doesn’t start giving content warnings at the top until episode 3.
* Dining on Babylon 5 by Stephen C. Smith which actually appeared in the series. Compiled by the owner of B5's Fresh Air Restaurant and with contributions from all the main station personnel (with a note explaining the alien recipes have been adjusted to suit human biology).
* Dini voiced the ineffectual guard who appeared at the beginning of
* Dink can choose to kill his wife-beating uncle. A hard battle, depending on when the player decides to do it, but winnable. Why, then, can't he hurt anyone else with his attacks (other than enemies/ducks)?
* Dink can try to rob a tavern, in which case, the waitress will call two golden-armored halbardiers. If the player chooses this course of action when he first visits the tavern, the halbardiers are too powerful, and will undoubdetly kill him. But, if the player tries the robbery out after some
* Dink Smallwood, and through scripted events. This is subverted a few times:
* Dink Smallwood complains that after Dink killed Seth in the original game, the Cast blamed him and his creations for their failure and made him... take a bath.
* Dink Smallwood Death gives a speech about Dink's name being on his list of souls to collect and how it would be nice if Dink were to die fairly soon.
* Dink Smallwood taking too long to get to the ducks in question means that their evil plan is a success and the world...changes from color to grayscale, after which King Daniel chews you out for it and you get to restart or quit.
* Dink Smallwood the main game is framed as Dink telling a story to his Aunt Maria's children during his yearly visit.
* Dink Smallwood two men at a table in the lobby swap "yo mama" jokes, with the one who laughs being the loser.
* Dink, the Little Dinosaur that they follow to where the dinosaur is hiding out.
* Dinky Dog, in that this big orange doggy grew from his owners' love.
* Dinky Duck book titled "Mighty Mouse and the Scared Scarecrow" (also released as "Mighty Mouse and the Scarecrow"). In it, Dinky too tries to help the unavailing scarecrow fend off the crows, but in this version Mighty Mouse comes to their

rescue. He has the two hide while he dresses up like the scarecrow. He gives the crows a good beating, which they think comes from the scarecrow so that from then on they are afraid of him. The scarecrow happily resumes his job now that he's protected by a reputation.
* Dinky is friends with the scarecrow guarding the maize in "The Timid Scarecrow". This particular scarecrow is terrified of the vicious and mocking crows, which Dinky fruitlessly attempts to remedy by stuffing the scarecrow with more straw to give him more muscle. The other farm fowl put the scarecrow with the trash when again maize gets stolen by the crows and Dinky is made to stand guard until they get a new scarecrow. The crows easily overpower the duckling, but this invigorates the scarecrow to come to his one friend's aid. Once he's beaten up all the crows, the farm fowl accept him back and reward him with new clothes.
* Dinner And A Break Up: A breakup in a public setting, like a restaurant, in an attempt to soften the blow to the person about to be broken up with.
* Dinner and a Show: When dysfunctional families eat together, fights are likely to break out.
* Dinner at Deviant's Palace and could work together for their respective selfish benefit. The protagonist initially dismisses the offer as "insincere, impossible, and definitely, absolutely unattractive"; after the villain has elaborated on his offer, he withdraws all three objections but says that he's still not going to take it.
* Dinner at Deviant's Palace, a popular drug which takes the form of a reddish-brown powder and is known as "Blood" turns out to be made with actual blood harvested from the mind-broken victims of a psychic vampire; taking the drug opens the mind of the user to be fed on as well.
* Dinner at Deviant's Palace, at which point the villain announces that the list now includes every single person in the room.
* Dinner at Deviant's Palace, the protagonist is on a mission to rescue his ex-girlfriend when he meets the woman who will turn out to be the story's actual love interest; the first sign of her status is that despite himself he can't help noticing what nice legs she has.
* Dinner at Deviant's Palace, the protagonist mashes his right hand between two heavy objects to fend off a psychic attack, breaking several fingers; two fingers subsequently have to be amputated.
* Dinner at Deviant's Palace, the villain is actually the host of an alien puppeteer parasite which travels from world to world feasting on the life forces of their inhabitants. Its true form is a small but nearly indestructible crystal.
* Dinner at Deviant's Palace, the villain is revealed to be the host body of an alien entity that has traveled from world to world for millennia feasting on the life forces of the inhabitants. The creature is utterly selfish and entirely lacking in empathy for others, which is probably the only kind of personality that could survive such a lifestyle.
* Dinner at Deviant's Palace turns out to have been set up so that its leader can siphon off the life energy of his followers.
* Dinner at Eight: In this 1933 film John Barrymore, a big movie star since the silent era, plays Larry Renault, a big movie star back in the silent era whose career has been ruined by drinking. This parallel got more painful after the fact when Barrymore, who himself had an out-of-control drinking problem, saw his career go down the drain within a few years after this movie just like Larry Renault's did.
* Dinner at Eight Kitty Packard mentions that she actually read a book.
* "Dinner, Bath, or Sex" Offer: A woman asks her husband for a dinner, bath, or herself.
* Dinner Date lasts for only about 20 minutes and is barely at all interactive. You wait for your date to show up and worry.
* dinner date with her gold, Robin desperately wishes for a way to wipe her memory.
* Dinner Deformation: When a character swallows an object, their throat or stomach becomes shaped like what they just swallowed.
* Dinner Deformation: Your body takes the shape of something that you swallow

whole.
* Dinner for One, which is shown every New Year's Eve on German, Austrian and Swiss TV.
* Dinner for Schmucks. Both types come into play: the girl is a former one-night-stand of Tim's who is delighted about the proposal, and Julie walks in just in time to see it.
* Dinner for Schmucks has a bizarre one which sounds more like a kettle whistling than laughter.
* Dinnerladies: Bren was mistakenly thought to be pregnant at one point because she refuses to donate blood during a blood drive, and later during the same episode mentions feeling dizzy and unwell. Turns out she just has a phobia of needles, and as she puts it, is very unlikely to be pregnant "unless sperm can get through sash windows".
* Dinnerladies Petula Gordino enters the canteen fiddling with her bra strap and remarking, "That's the thing about shoplifting; you can never try something on."
* Dinnerladies, Twinkle would respond to any joke at her expense with a sarcastic "Oh, ha ha, [name of comedian or comedy actor]." Or, on one occasion "Oh, ha ha, straight to video."
* Dinner With Andre several years later and sees someone she knows from that time.
* Dinner With Friends, as happily-married Gabe and Karen watch their best friends' marriage fall apart.
* Dinner with the Boss: A character's boss comes to their home for dinner.
* Dinner with the Boss and the UK. Most if not all work-related/work-networking parties/meetings/similar, anywhere in the world, are at restaurants, bars, or other public event locations, or held at the house of the boss/senior staff rather than rank-and-file employees. In Europe and Japan (as well as Latin America and most of Asia) this was how things were all along for the most part.
* Dinner with the Boss: An employee ends up having dinner with their boss.
* Dinner with the Boss: The main character's boss visits them for dinner.
* dinner. Yes, in a world where dinner consists of swallowing pre-made brown ("chicken and gravy") and green ("peas") pills, it's still the woman's sacred duty to take the pills out and set the table.
* D.I.N.O.$.A.U.R.. "You're just an old man, hittin' on me. What? You need a CAT scan!"
* Dino Attack RPG about how Glados's lack of emotion is a weakness in itself.
* Dino Attack RPG. After Amanda, Rex's first love, was thought to be killed by Fogel, Rex was left so distraught by the experience that he rebuffed the affections of another... only to later realize that the one he was rebuffing was actually a very alive Amanda!
* Dino Attack RPG allowed to travel to Earth despite the blockade, but the Space Police are enforcing the rule that nothing is allowed to leave the planet until the threat of the Maelstrom has been dealt with.
* Dino Attack RPG, Amanda Claw built up immunities to several different poisons and toxins by taking small doses during her years as Silencia Venomosa. This protected her from the poisonous gas in the Mindstorms, Inc. office building. She also hoped this would protect her from the XERRD toxins, but evidently that is one immunity she never acquired; still, she held out longer than most of her fellow Dino Attack agents.
* Dino Attack RPG, and so with the help of newly-created NPCs Cam O'Cozy and French Fries, he let Zenna spread the news that there were Mutant Dinos in Antarctica and realists were going behind the backs of idealists. Needless to say, dire consequences followed.
* Dino Attack RPG, and the first thing she does upon waking up is vomit all over the man who just revived her.
* Dino Attack RPG, a number of characters continue to fight on the front lines despite their handicaps.
* Dino Attack RPG are among Dino Attack Team's few medics who are also soldiers, and as such, they are usually fighting Mutant Dinos while healing patients on the battlefield.

* Dino Attack RPG. As a result of this confusion, Lord Sam Sinister announced that he was going on an expedition to Egypt in 2011 to recover the golden treasures of Pharaoh Amset-Ra, unaware that Professor Archibald Hale's team had already uncovered those treasures in 1924.
* Dino Attack RPG, a writer named Samuel Piaker interviewed Dino Attack veterans so he could write a novel based on the Dino Attack. It is implied, of course, that the RPG you've just finished reading is the novel he wrote.
* Dino Attack RPG Cam O'Cozy, both of whom tried to commit genocide against idealist agents.
* Dino Attack RPG, Dino Attack Team stole one of XERRD's Dino Track Transports and, by modifying Iron Predator blueprints, subsequently started building Dino Track Transports of their own.
* Dino Attack RPG, Dr. Wallace Breen is the Face of XERRD. Despite his scientist background, this was specifically the reason why Dr. Breen was recruited by Dr. Rex, since his true strength lay in his use of rhetoric and he had prior experience as a CEO and a politician.
* Dino Attack RPG, exactly eight years later. Things truly do come full circle after all.
* Dino Attack RPG fits this role rather nicely. At first she seems a rather gentle woman who just wants her daughter to be safe... that is until she gets a chance to actually go out onto the battlefield.
* Dino Attack RPG, for they are the ones who actually enjoy watching the suffering of others.
* Dino Attack RPG. Given all that, it's infinitely easier to sympathize with Plastic Serpent in this scenario.
* Dino Attack RPG had quite a bit of UST between Hertz and Naomi Carver, as well as Frozeen and Gromtin, with the question of whether or not they will get together in the end.
* Dino Attack RPG had several characters that fit this sort of character.
* Dino Attack RPG hand). The untold story of what she did at Dacta Corporation is said to be even worse.
* Dino Attack RPG has a number of Deus ex Machina instances of its own. There are probably too many in number to list them all, but here's a few notable examples:
* Dino Attack RPG has a player character named Dr. Cyborg, and the Non-Primary Characters General and Frozeen. There is also a cybernetic Mutant T-Rex named Cyrista's Bane.
* Dino Attack RPG, has a taste for classical music, and let's just say you don't want to be on the wrong side when you start hearing that classical music. His second-in-command Elite Agent Cabin is quite tough as well.
* Dino Attack RPG has had many, many characters. Just in the titular Dino Attack Team there are 241 characters. That's not counting the numerous villains, civilians, and official LEGO characters that appeared in the almost seven-and-a-half year story.
* Dino Attack RPG has over a dozen medical characters, each with their own unique personalities and skills.
* Dino Attack RPG have an arm cannon. Dr. Cyborg's right arm becomes one when he switches into battle mode, and Sam Throramebi's prosthetic mechanical arm has a retractable hand that doubles as a plasma cannon.
* Dino Attack RPG he actually saw the full movie), and if that weren't obvious enough Rotor becomes best friends with a surfer named Lance Williams.
* Dino Attack RPG. In the Final Battle itself, Cyrista's Bane showed up... and nobody was laughing at the joke anymore.
* Dino Attack RPG in the process. Besides, even if she tried to step in before Anton was disarmed, it would have done more harm than good since Grisbarba was too drunk and would likely have killed her in his stupor.
* Dino Attack RPG, is fully dedicated to showing off this trope in all its horrifying glory.
* Dino Attack RPG. Kate Bishop and Sam Race were both in need of massive therapy to get over their trauma (the former of whom even developed a drug addiction). Sarah

Bishop on the other hand is haunted by guilt over the people she killed. Then of course Rotor and Cabin's relationship quickly goes downhill because neither can really adjust to society after the war.
* Dino Attack RPG. Luckily, this was resolved by the end of the mission, since a freak accident in the lab caused Rex and Dr. Rex to switch bodies, so now Rex and Amanda are both the same species and free to continue their relationship.
* Dino Attack RPG, many characters are just civilians who were suddenly thrust into the action. Examples include characters such as David "Hotwire" O'Neal or Minerva Fabello.
* Dino Attack RPG — has three notable Mad Scientist Laboratories where they perform experiments on dinosaurs: the Dino Island Laboratory, the LEGO Island Laboratory, and the Adventurers' Island XERRD Fortress.
* Dino Attack RPG mentioned calling the mummy of Pharaoh Hotep III on his cell phone, it briefly cut to Pharaoh Hotep III's mummy grumbling that no one ever calls him on his cell phone.
* Dino Attack RPG: mutant dinosaurs are attacking the city, and four guys are trying to stop them. However, the Dino Attack RPG revealed that this has happened all over the world, bringing in other LEGO-themed locations and showing the impact that these events have had on them. The Dino Attack Team of the original theme consisted of four men, but the RPG has shown that it is actually much larger and there are women helping out. It's also explained what happened to the citizens of the various places that have been invaded (an issue completely ignored in the original line), and there is even some background as to why the heck all this is happening in the first place.
* Dino Attack RPG people, many of which were inside jokes. For instance:
* Dino Attack RPG: Poor Randal. Before he died, his lower half was disintegrated by Paulie Gonepus's Maelaser.
* Dino Attack RPG, several people play classical music to raise their teammates' morale and motivate them during the fight. Among them is Osprey, who plays "Mars, the Bringer of War" from his Aerial Defense Unit. It serves as a grimmer contrast to the "1812 Overture", which he was playing earlier in the battle when things were looking more optimistic.
* Dino Attack RPG shoot his prized pigeon after all, though it can't be denied that he was overreacting), French Fries has no real grudge on the defendants; he genuinely believes them to be deserving of death by firing squad.
* Dino Attack RPG showed up after the battle to interview its participants, probably arriving sometime before it was over given he was there to report the moment victory was announced. Parodies humorously later on when Lotta Brix, J. Theano, and Seymour Brickstein from official LEGO Canon also show up, and the four reporters end up getting distracted bickering over who gets the story.
* Dino Attack RPG so no one recognized him as agent Pyro, the lack of respect was justified, though.
* Dino Attack RPG's Spaghetti Westerns were a major influence for both.
* Dino Attack RPG stolen Snake's codename at the time, "Plastic Serpent"- as he originally operated under the name of "Snake" but changed it as a result of this encounter).
* Dino Attack RPG that could theoretically become capable of destroying the entire universe.
* Dino Attack RPG, the character Heavy specializes in this type of weapon. Elite Agent Minerva also used one after her Fire Hammer was downed by her brother Oswald.
* Dino Attack RPG). The one time he did attempt to kill someone, it was the assassin that he was rightfully angry at for the brutal murder of all but one of his partners and employer.
* Dino Attack RPG. The second time he tries to have two agents executed for conflicted charges based on second-hand accounts of an event he was not present at, and then casually remarked about his "brilliant" plan to have agents walk out of the Dino Attack Headquarters very slowly towards the mutant dinosaurs. He was even described having a handlebar mustache just to give his character this feel.
* Dino Attack RPG. These events culminated in a violent confrontation between

Trigger and Pharisee that resulted in the other being knocked out. When facing the others, Montgonel was critically wounded (he survived, but was out of commission for the rest of the RPG) and Trigger was fatally wounded, while at least three of the aforementioned redshirts that accompanied Pharisee emerged unscathed.
* Dino Attack RPG the war and both mercenaries were dead), and one of their clients was determined to kill the other.
* Dino Attack RPG. Though part of the initial build-up had been used before (and was intended to be satirized here), this sequence was never mentioned again and is so strange even by the standards of the RPG that its status in canon isn't even 100% clear.
* Dino Attack RPG were both born out of dreams which were later written into the story.
* Dino Attack RPG. When he's not mercilessly blowing his enemies to kingdom come, we see him threatening to execute his own men and torturing prisoners.
* Dino Attack RPG, which shuts down the neurological pathways necessary for lying.
* Dino Attack RPG who spent years thinking that he was a general. Rather than discharging Army, the president allows Army to maintain his rank for this reason, since it was safer to keep Army in the military than to let him become a loose cannon.
* Dino Attack RPG who was working with the team for no reason other than being a hideous abomination, and he proudly boasted about killing one of the commanding elite agents' tamed mutant dinosaurs.
* Dino Attack RPG. Zenna filled this role rather nicely in the RPG's early days, as did Rex at first:
* Dino Babies (being sung a capella), and most of the time characters state religious things about Islam. Some shows have an Islamic dub but not a regular Arabic dub.
* Dino Babies, even taking place in the future setting, and the Dino Babies play the characters in the story.
* Dinobot, and to a lesser extent, Megatron. At various points, the two of them actually
* Dinobot, despite the fact that he's the only member of his race who acts that way. Nobody ever mentioned this on the show, though... Presumably, they knew better than to say so within earshot of Dinobot.
* Dinobot, fits the trope to a tee. He's all about honor and glory and abhors an unfair fight because there's no honor in winning that way. He can't let a "clear out" order by without at least one objection, either.
* Dinobot genuinely did want to change sides and become a Predacon again, but when Megatron told him to kill Rattrap as proof of his loyalty, Dinobot ultimately couldn't go through with it.
* Dinobot long enough to let his target improvise a weapon and hit him very hard with it.
* Dinobot thought Megatron stranded him on an abandoned planet and defected in the first episode. In the second season, after realizing everything was going according to Megatron's plan, Dinobot returned to Megatron's side... Only to defect
* Dinocampus coccinellae plants its eggs into ladybugs. Amazingly, after the larva bursts out of it and becomes a cocoon, the ladybug often survives.
* Dino Charge, where the shot of Earth from space during the meteor shower that wiped out the dinosaurs is centered in North America.
* Dino City and the words "Death Comes to us All" written on the screen.
* Dinoco logo's (the name Dinoco comes from the Sunoco Oil company, the official fuel of NASCAR, which is also colored blue).
* Dinocorps: Buzz, one of the members of the Dinocorps, has very few lines and spends most of his time in the background doing nothing, or isn't even present with the group. When he tries to save Winston from getting kidnapped, he's shot and killed very abruptly.
* Dinocorps ends with Jarek still alive and well, and a shot of several more Saurons still in cryogenic sleep. It's implied that Jarek had a backup evil plan, but no further issues have been published since then.

* Dinocorps has two robotic-looking arms, complete with a pair of hands that would be perfect for a claw machine.
* Dinocorps, Icks or Blix (it was never specified) is kicked off a skyscraper to his death, shortly after Jarek's defeat.
* Dinocorps: When Jarek orders his team to look for the Annihilation Trigger as stealthily as possible, a police car shows up. He doesn't hesitate to kill the cops inside to conceal his identity from the humans.
* Dino Crisis 2 has Dylan and Regina take turns navigating through a massive hoard of Allosaurs, with the playable character armed with a flare gun and signaling to the other character where to fire artillery.
* Dino Crisis 2 has one of the protagonists activating a satellite to vaporize a gigantic dinosaur.
* Dino Crisis 3 gets covered in mutant tyrannosaurus drool just before the latter chows down on him.
* Dino Crisis. But played with but probably played straight in the sequel. Dylan and Paula make it to the gate room, but Regina is the only character that definitely survives the entire ordeal. Dylan and Paula might have if Regina did perfect a time gate and save them at the last moment.
* Dino Crisis has tranquilizer darts that you can load into your shotgun, coming in S, M, and L. S requires many seconds for the effects to kick in or a few shots if you're impatient. M requires less time and shots while L is an instant knockout to most dinosaurs.
* Dino Crisis is a walking stereotype of the trope. He goes on and on about his experiments and doesn't show a single thread of remorse for his fellow scientists that were killed in his experiments (which caused dinosaurs to appear at the facility) since it only furthered his results. Regina is disgusted by the doctor's attitude.
* Dino Crisis is locked by two key cards. When Regina has both cards in her possession, she calls Gail over so that they can swipe the cards on both key card readers at the same time to unlock the door.
* Dino Crisis: Set in alternate 2009 where dinosaurs still exist/are revived.
* Dino Crisis that's consuming the entire facility and possibly throwing it back to the dinosaur age.
* Dino Crisis will never stop stalking you. Every time you encounter and defeat it, it'll just back off for a little while until it's ready to attack you again. Naturally, you put it down for good in the finale.
* Dinocroc, the titular creature is roughly the size of a large dog in the opening scenes. Cut to a few days later and it's grown to the size of a large truck able to fit an entire teenager over the length of its jaws. Partially justified as it was engineered to have a ludicrously fast growth rate and was said to have previously grown about half a meter in a single day.
* Dino D-Day. The allies do have at least one as well, a triceratops the nazis rejected for a deformed leg. One prosthetic and a mounted machine gun later, and it's just as effective as the nazis replacement dino.
* Dino D-Day, The Dilophosaurus can pick up a downed enemy and throw them at another player to instantly kill both. However, knocking down someone can prove to be a difficult task (especially if you're out in the open, since you become a sitting duck for gunfire), so there are harmless goats scattered around every map for you to freely pick up and throw.
* Dino D-Day: The year is 1942. Adolf Hitler has succeeded in resurrecting dinosaurs. The reptilian horde has trampled Europe and the Mediterranean. Can nothing stop the Nazi’s dinosaur army?
* DinoEggs. If you didn't get a fire going quickly, the Dino Mom's foot would start slamming down and eventually squash you.
* Dinofroz, one of the creatures Tom can turn into in Season 2 is a massive, trash-talking, hard-hitting gorilla.
* Dino Hunt, which notes that the fossil record (and thus our knowledge of when each species went extinct) is incomplete.
* Dino Pico and Gracia. Similar to Milim, however, Dino doesn't have a "kingdom"

and is more of a bum squatting in other territories.
* Dinoponera is tossed to the rape zombies while paralyzed and isn't seen again for the rest of the story... until
* Dino Rabbit, on the other hand, dominated in the TCG but mostly struggled in the OCG against the more popular Inzektors and Wind-Ups. In its case, this was due to a rules difference: the TCG still used the rules for priority (letting a Summoned monster activate its effect immediately upon being Summoned) at the time. Dino Rabbit relied heavily on this rule to work, which made it far trickier to stop in the TCG than in the OCG.
* Dino-Riders cartoon, designed specifically to sell a line of Tyco dinosaur toys. The Home Video VHS tapes even had commercials during the show.
* Dino-Riders has this ability, which she uses both on her teammates and on the dinosaurs she befriends.
* Dino-Riders, Krulos. This more-or-less means that he was trying to backstab himself.
* Dino-Riders, though the second was only released in a limited area, making it quite valuable now.
* Dino Run, where you play as a dinosaur outrunning the asteroid impact explosion. You can even get bonus points for 'surfing' the 'pyroclastic wall of doom' and surviving.
* Dinosaucers called "fossilizers" that can do this to the target, and also reverse the process. (Seeing as they lack the ability to "Dinovolve", like the good guys can, it seems an even trade-off.)
* Dinosaucers could 'Dinovolve' and become big, strong primal versions of themselves-but not without intelligence like when the Tyrannos did it.
* Dinosaucers features an odd episode revolving around football where the titular characters assume a football jersey and New Jersey are one and the same thing... and thus during the game wear "new jerseys" featuring the state's outline on the front rather than regulation numbers.
* Dinosaucers has the word "dinosaur" in the title if pronounced with a non-rhotic accent (Dinosaur-cers), but the narration is done in a rhotic accent, where the pun doesn't appear.
* Dinosaucers: The denizens of Reptilon speak perfect English off the bat.
* Dinosaucers, the title characters and their enemies the Tyrannos came from a counter-Earth called Reptilon.
* Dinosaur actually pees on his adopted lemur grandfather, Yar. Later, at the end of the film, it's Aladar and Neera's own son that does the favor.
* Dinosaur, Aladar is adopted by a family of lemurs when he was a hatchling and they become a very close family.
* dinosaur) and the orcs' wolves. However, a patch was eventually released that allowed anybody to ride anything. If the mount's original size is too small for the character, it's scaled up. Unfortunately, even this doesn't always work. Tauren—especially the men—still look ridiculous on the blood elves' hawkstriders (the inspiration for the page image), and male draenei look silly on horses and mechanostriders. Even with the scaling, it doesn't always seem in proportion.
* Dinosaur, a scout got eaten by a Carnatourus. And Aladar pretended to eat one of the little lemurs.
* Dinosaur Comics consists of the same six panels, with different dialogue and captions.
* Dinosaur Comics (disaster film, gross-out comedy, road trip, Western).
* Dinosaur Comics does this a lot, such as describing literary or logical techniques in textbook levels of detail then describing them as "awesome". When discussing logic:
* Dinosaur Comics fandoms get along rather well, considering that the official forums of the former are a section of the fora of the latter. This is probably because, again, the creators are very good friends, and because of a very similar style and humor.
* Dinosaur Comics frequently talks with God and the Devil, and is the only

character in the strip who seems to be able to hear them.
* Dinosaur Comics, he can shoehorn his story into any genre imaginable.
* Dinosaur Comics is based on this: with the drawings staying the same, the conversations have to change and end up covering loads of random topics (with a high proportion about Batman).
* Dinosaur Comics is that almost all strips are identical, with only the occasional minor alteration.
* Dinosaur Comics. It's only explicitly mentioned during a few strips early in the archives, and has very rarely been referenced in the following years. This is what lead to the quote on the quote page, after a few readers thought Utahraptor dating a man was a typo.
* Dinosaur Comics" — he supplies the punchline, and his friends provide the setup, thereby revealing their prejudices and preconceptions.
* Dinosaur Comics, over 2000 (probably more) comics of the same images over and over again, yet completely gripping. In fact Ryan North, the creator, saw this happening and even added the occasional joke in the meta text just to mess with your mind... with words, because that's what it's all about. That and dinosaurs.
* Dinosaur Comics, represented by bold text spoken from the top of the panel.
* Dinosaur Comics, Satan is seemingly a videogame-obsessed nerd. He's never seen directly, instead being represented by red text coming from below the panel border.
* Dinosaur Comics seems to discuss non-existent/"hypothetical" relationships often.
* Dinosaur Comics, since T-Rex is known for exclamations like "Phlogiston, bitches!" and "Live and learn, bitches!"
* Dinosaur Comics's scorning of North's field of expertise ("Because FUCK computational linguistics"). Like the previous examples, they're really friends.
* Dinosaur Comics strip, in which T-Rex says that dinosaurs are in fact the most dangerous game, because humans don’t have claws.
* Dinosaur Comics" strip (where all the hilarious outtakes consist of T-Rex forgetting a line and saying "line?").
* Dinosaur Comics that aren't the main characters, bar maybe the flea that lives on the end of T-Rex's nose, but he's so small you can't see him.
* Dinosaur Comics that modified the characters to have feathers, although not in a way that’s any more scientifically accurate than the rest of the comic.
* Dinosaur Comics that we solve this problem on Wikipedia by only vandalizing the article about chickens, because "dudes already know about chickens."
* Dinosaur Comics to defining and demonstrating pleonasms: "Hey, T-Rex, do you want to drink some cola-flavored Coca-Cola brand carbonated cola beverages? Perhaps afterwards we'll take the public transport large road vehicle bus and buy with money or credit some submarine sub sandwiches?" Also, in T-Rex's book for children: "Happy Dog the happy dog is the happiest dog on his street!"
* Dinosaur Comics T-Rex discusses the 10 Fs for living happily: "friendship, fitness, family, financialsuccess, frugality, futrition, flessening salt intake, foderating alcohol intake, fiminishing stress, and fatching your blood pressure." At the end he also answers a question by saying "...FFFROBABLY??"
* Dinosaur Comics where all the characters have goatees, featuring an evil (eviller?) version of T-Rex and Utahraptor.
* Dinosaur Comics, where T-Rex decides to stop saying "prejudice" and say "racist" instead in the mistaken belief it will make him more popular:
* Dinosaur Comics where T-Rex told a story of Sherlock Holmes deducing that all of society was responsible for a crime, but then saying that since Holmes lived in “history times” this didn’t apply to modern audiences.
* Dinosaur Comics worries about being racist against taxi drivers, and makes good-natured attempts to use every school of philosophical thought in recorded history to justify the things he does every day (mainly stomping on people and things).
* Dinosaur Comic, T-Rex likes to assume every unknown historical figure is, in fact, himself on a time travel ("It sounds rad to me!")
* Dinosaur, Disney's first non-Pixar CGI-animated film, actually used CGI for mostly characters and props, and live-action for the backgrounds (though with some CGI objects added).

* Dinosaur does this when said Velociraptors attack Aladar and the lemurs prior to the Herd's arrival.
* Dinosaur Doggie Bone: Dogs love fossilized dinosaur bones as much as regular bones.
* Dinosaur Forest protagonist had been a hallucination from a prison inmate undergoing severe mental health treatments.
* Dinosaur Hunt is about loading maps and shooting waves of dinosaurs. In between maps, the game tells the story of a hidden island, an elite military team, a secret scientific organization, a love interest, and weaponized dinosaurs.
* Dinosaur hunts were believed to have been this, as most large dinosaurs probably couldn't maintain high speeds. For example, fossilized tracks found in Texas that show a large therapod pursuing a sauropod. Based on the stride length, the chaser is estimated to have been running at about five to six miles per hour.
* Dinosaur is actually this to Kron. Also, the Carnotaurus Bruton killed in the cave (which results in him being crushed to death by falling rubble) is actually this to um, Carnotaurus.
* Dinosaur; it leaves the protagonists after they kill its partner, and when confronted with an angry herd opts to go for the lone guy all by himself instead.
* Dinosaur Jr.'s "Just Like Heaven" stops dead just before the second chorus.
* Dinosaur King DS game descends into this sometimes with the hints that opponents give about their next move.
* Dinosaur King has several attack and transformation sequences used throughout the episodes. The transformation sequences were eventually shortened, since the producers had figured out that the audience didn't need to see the same long transformation sequence a second time.
* Dinosaur King in similar roles, including the protagonist Max sounding like a slightly deeper voiced Ash.
* Dinosaur King. It's not a submarine, it's an Amargasaur. As per the trope, the real Nessie shows up at the end.
* Dinosaur King, the anchor giving the report (from the studio in question), mentions that she'll be giving regular reports assuming she hasn't been eaten.
* Dinosaur King The dinosaurs when fighting. To say it clashes horribly is an understatement.
* Dinosaur King. The plot involves cards that become dinosaurs (or dinosaurs that are cards) and an evil gang who wants to use them for world domination. Makes no sense? Watch one of the dinosaur fight scenes. All your complaints will be blown away by the sheer awesomeness of dinosaurs attacking each other with elemental powers.
* Dinosaur Media could really only exist in an environment already teeming with life.
* dinosaur-men who believe that the best way to venerate the gods is through combat to the death.
* dinosaur (more specifically, a theropod, and if you want to get really specific, only maniraptoran theropods have vaned feathers).
* Dinosaur, Neera likes Aladar because of his compassionate ways to the weaker herd members.
* Dinosaur Office don't want to leave the office during a volcano drill. Why? Because they want to continue their conversation.
* Dinosaur Planet and eventually establishes himself as the apex predator, with the other predators forced to give up shares of their meat to him.
* Dinosaur Planet and the unnamed troodontids in "Pod's Travels'' to name some.
* Dinosaur Planet, instead of being heavily cut and dumbed down like the final game was.
* Dinosaurs also featured parody of the then-current Bud Dry commercials, whose slogan was "Why ask why? Drink Bud Dry." The Dinosaurs version: "Why ask why? Drink...alcohol."
* Dinosaurs and create rip-offs of said original show, with Baby saying, "Don't have a cow, man".
* Dinosaurs and had to be scrapped when news hit that the show has been canceled.

* Dinosaurs are constantly at each others' throats and have a tendency to engage into petty arguments and taunt each other.
* Dinosaurs are done by the same caster, Howard Handupme. While he would try to be professional, sometimes his skewed basis would be seen, or perhaps he would be just a little too candid. For example, in "Monster Under The Bed", when Baby Sinclair figures out a way to resolve the crisis without it having to devolve into a firefight, he keeps trying to downplay it until it becomes apparent that the situation will end peacefully, and not in a juicy bloodbath like he clearly hopes. Also, this bit from the first episode:
* Dinosaurs Are Dragons: Dinosaurs portrayed as either being dragons or at least having some draconic traits.
* Dinosaurs ask a teacher questions he doesn't want to answer he goes "La la la, can't hear you!"
* Dinosaurs Ate My Homework, they are throwing such things as mashed potatoes, milk, and spaghetti.
* Dinosaurs. At one point, his mother Fran walks in on him while he's dancing to women on the television, which causes Robbie to panic and Fran to desperately prevent the situation from being awkward by assuring her son that what he's doing is normal.
* Dinosaurs Attack!, one of the cards displays the anchors who have been framing some of the action being attacked. The back of the card is "technical difficulties, please stand by."
* Dinosaurs Attack! trading card game depicts the Leaning Tower being pushed over by one dinosaur onto another.
* Dinosaurs, Baby always hits Earl over the head and calls him "Not-The-Mama" instead of "Daddy". When he becomes seriously ill in "Germ Warfare", he starts calling Earl "Daddy" and tells him he loves him. The family freaks out and get him cured as quickly as possible. Everyone is relieved when Baby hits Earl and calls him "Not-The-Mama" after he is cured.
* Dinosaurs, Baby notices something small and pink moving nearby, and stabs it with a fork. His moment of triumph is interrupted by the arrival of pain signals from his tail.
* Dinosaurs, Baby Sinclair's official name was "Aaah Augh I'm Dying You Idiot Sinclair" until a new Chief Elder was elected so the Sinclairs could take Baby to be renamed. Other victims of the trope include Fran's cousin "Atchoo" and "*Burp* Excuse-Me Siegelman".
* Dinosaurs: Baby Sinclair's pacifier was taken by animals, to which he whines and screams "Want suck toy!" At that moment, his pacifier is dropped down the chimney and falls out of the fireplace. Seeing this, Earl shouts that he wants a big-screen TV and cable. As nothing happens, he says he wants a bigger fireplace.
* Dinosaurs began with a dedication to Jim Henson, who passed away while the show was still in development.
* Dinosaurs: Believe it or not, this ABC series pulls this ending in the final episode, implying that a self-inflicted ecological disaster wipes out the dinosaur civilization, including all of our main characters.
* Dinosaurs: B.P. Richfield is often mean and intimidating to his employees. In one episode, he informs Earl that WESAYSO wanted to provide an incentive for the most trees pushed down, and Richfield's suggestion (shot down by the higher-ups, of course) was to harm them. In another episode, Richfield makes his employees work overtime at the last minute (and without extra pay). In another episode, at a company picnic Earl talks about the importance of family over work, and as a result Richfield wants to eat Earl (but is stopped upon learning he could still be useful to the company).
* Dinosaurs", B.P. Richfield tapes a "Kick Me" sign to Earl's back as punishment for having Baby call him "A big fat smooey smoo". Robbie notices this when Earl arrives home that evening, and asks him why he can't just remove it. Earl tells him he would if it weren't covering an unsightly wound.
* Dinosaurs (British Petroleum) Richfield (from Atlantic Richfield, better known as ARCO and now owned by BP) and others.

* Dinosaurs, Charlene is dumped by her boyfriend, and this is Earl's reaction to the news.
* Dinosaurs" dealt with Earl's unsuccessful attempts to potty-train Baby.
* Dinosaurs died from Noah's Flood; most from the flood itself (along with every other species), and the few left that were on the ark died out because either they or their food sources couldn't handle the resulting climate changes.
* Dinosaurs Earl and Fran take their baby to the Great Elder for his traditional naming ceremony. While the elder is thinking he suddenly suffers a heart attack and dies, but not before the literal-minded clerk takes down every word the elder says as baby's new name resulting in "Augh Augh I'm Dying You Idiot Sinclair". The episode ends with the baby getting his official name of "Baby" by the new Great Elder, much to Earl's chagrin.
* Dinosaurs, Earl ends up destroying all plant life on the planet to get rid of these vines that were growing everywhere as a result of the bugs that would normally eat them having gone extinct (Wesayso built a wax fruit factory on their breeding grounds, thus killing all the bugs).
* Dinosaurs: Earl Sinclair once gained superpowers and named his alter ego "Captain Impressive". Once Mr. Richfield found out, he invoked a clause in the work contract requiring him to use his powers in service of Wesayso Corporation. Earl became spokesperson for the company.
* Dinosaurs. Earl wondered why they had to so since their baby is going to come from an egg. What's more, the administrator says there's no refund.
* Dinosaurs ended the world in the very last episode, so that revivals couldn't happen.
* Dinosaurs episode "A New Leaf", Earl Sinclair berates his son for having spikes on his head, stating that they make him look like a girl, a bum, and a girl bum.
* Dinosaurs episode "Fran Live" opens with the Sinclairs exploring their various new cable channels. One of the highlights is "The Hat Channel: 24 hours a day of hat news, hat features, and hat happenings." Robbie seems genuinely excited by the prospect of hat news.
* Dinosaurs episode "Green Card", when B.P. Richfield fires his tree pushers after all the trees have been pushed down, he gives this as the reason they are fired.
* Dinosaurs episode "I Never Ate For My Father" treats vegetarianism like a combination of drug use and homosexuality.
* Dinosaurs episode "Monster Under the Bed" the eponymous monster plans to cook Robbie, Charlene and Baby in a big cauldron, but doesn't get around to putting them in before he's stopped. We do see him preparing the vegetables that go in the pot along with them.
* Dinosaurs episode "Nature Calls". At one point, it looks like Baby Sinclair is peeing on his dad Earl while he changes his diaper, but it turns out that Baby was just playing with a water pistol. At the end of the episode, Baby wakes up his father in the middle of the night to inform him that he's ready to begin potty-training, and the subsequent dialogue implies that Earl is trying to teach Baby to pee standing up.
* Dinosaurs episode, "Nature Calls", when Earl unsuccessfully attempts to potty train Baby. The first time, it happens to Earl, who is trying to induce it on Baby by following advice from a toilet-training book about imagining running water. Upon thinking about it himself, Earl practically shoves Baby off the toilet so he can use it himself. The second time occurs later in the episode, and it happens to Charlene. When Earl is still in the bathroom, having thought Baby flushed himself down the toilet (long story), Charlene breaks the door open, and the rest of the family is shocked to find the state of the bathroom when Earl attempts to rescue Baby.
* Dinosaurs episode "Power Erupts" Robbie mentions that another student at his high school science fair made a lamp that can turn on/off at the sound of clapping. When he and Spike hi-five, the lights go off and someone yells, "Clap on, clap off, I'm rich!"
* Dinosaurs episode: "We wish you a happy Fridge Day / We wish you a happy Fridge Day / We wish you a happy Fridge Day / So come in and buy paint!"

* Dinosaurs episode "What Sexual Harris Meant", Earl comes home early because someone died at work.
* Dinosaurs. Every single puppet not used for a protagonist was used as countless different characters, made male or female simply by changing the clothes.
* Dinosaurs: Everything in the family fridge is a smart-mouthed prey animal waiting to be eaten. Occasionally someone in the cast is in danger of being eaten by other dinosaurs, or other monsters even higher up on the food chain. About the only "animals" that don't talk are the cavemen, which normally aren't even considered for predation.
* Dinosaurs. Every time Earl gets mad and throws him into the wall, Baby just yells "AGAIN!"
* Dinosaurs Fran mentions that she had a cousin named "Achoo" and a classmate named "Burp Excuse Me Siegelman".
* Dinosaurs had a drug special which Robbie, Earl, and Charlene became addicted to a plant that they never really named.
* Dinosaurs had Fran becoming one of these when Baby becomes a big star in frying pan commercials. It takes a calling out from her best friend Monica and her husband Earl, as well as a bad dream about Baby as an adult, to make her realize that what she was doing was wrong.
* Dinosaurs had the Sinclairs' house (and TV) struck by a falling meteor. Earl actually had bought meteor insurance but was denied coverage since he was only covered for meteors and once a meteor passes through the atmosphere it becomes a meteorite.
* Dinosaurs has an episode where Robby suspects that he might be (GASP) an herbivore! Herbivores are treated the same way in dinosaurs society as gays are, complete with "herbivore bars" and being called "Vego" as a slur.
* Dinosaurs has been used in a few psychology classes teaching Karen Horney's womb envy theory.
* Dinosaurs has characters whose names are fossil fuel and petroleum company-themed: we have Earl Sinclair ("Earl" is also the Southern pronunciation of "oil"), Ethyl Phillips, Roy Hess, and B.P. Richfield.
* Dinosaurs has one of these, but it's eventually put aside for the rest of the story.
* Dinosaurs has two Latin Spanish dubs: one in Mexico and one in Venezuela.
* Dinosaurs have a common name different from the one used on Earth, as well as a name in the Draconic language (which some of the common names appear to be corruptions or calques of). In the setting's original (D&D 3.5) incarnation, a table lists the equivalents as: Fintail (
* Dinosaurs, have this effect on Earl, Fran, Robbie, and Charlene. Baby seems to be on the verge of having a love-hate relationship with these two shows.
* Dinosaurs. He issues a formal "Good night". He reconsiders for a moment, then looks straight into the camera with weary, uncertain eyes, and solidly states, "Goodbye."
* Dinosaurs her boyfriends. (When she confronts him on this, he claims he just wanted to talk to the first one, but he lost his temper, and "after that, it was kinda like eating peanuts.")
* Dinosaurs.) He says something close to, "I love this show. It's got one meaning that's funny for grown-ups, and one that's funny for kids!"
* Dinosaurs "I'm the Baby (Gotta Love Me)" tells the listeners not to stick peoples' fingers in sockets and light them up.
* dinosaurs instead features different dinosaurs as general Louie replacements, also with unique abilities.
* Dinosaurs: In the episode "What Sexual Harris Meant", Earl reads a prepared statement on the witness stand. "And let me conclude by saying Foreman Harris is a great guy. Monica's been a troublemaker as long as I've known her and I'm pretty sure she cheats on her taxes. Stop here, look up, smile."
* Dinosaurs, in the miniseries Nuts to War. When the dinosaurs went to war over pistachios, Charlene, Earl, and Roy (all in dresses) performed for the soldiers, as it was the only way to get to the front lines and bring Robbie home.

* Dinosaurs, in which turning on the news reveals that an asteroid is about to hit the family's television, after which it immediately happens.
* Dinosaurs is entirely a satire of society that condemns environmental pollution, political correctness, corporate greed, government controlling citizens' private lives, propaganda on television and religion.
* Dinosaurs is shocked at the high number on his phone bill, until Francine points out it's their phone number. Earl is not as shocked when he sees the actual bill, although he does admit it's pretty high.
* Dinosaurs is usually portrayed as the most responsible and sensible of the family, with many episodes having her try to steer her husband Earl toward the right direction. On some occasions, though, Fran has her moments of being in the wrong or at least less responsible than she usually is.
* Dinosaurs, later it was higher and scratchier, then his voice became a few octaves higher and softer. Around 2003, the voice started to gradually get a bit deeper, probably due to the performer aging.
* Dinosaur somehow got a cast of higher celebrities than the original dub, with two soap opera stars (Fábio Assunção and Malu Mader as Aladar and Neera), a veteran actress (Nair Bello as Baylene) and a talk show host (Hebe Camargo as Eema).
* Dinosaurs on a Spaceship": Before injecting his father, Rory says, "This won't hurt". He then admits he lied.
* Dinosaurs on a Spaceship" begins with the Doctor materializing the TARDIS around Amy and Rory while they're at home — helping Rory's dad Brian look at a broken lightbulb socket. When Brian realizes that he's in a different place, he drops the lightbulb he's holding in shock.
* "Dinosaurs on a Spaceship"?" Brian answers, "To Thailand?" It is quite likely that during the original conversation, Rory was about to say "We went traveling through time", only to substitute the word "Thailand" at the last moment.
* "Dinosaurs on a Spaceship" has a manual override for the navigational system that requires two people "of the same gene-chain" to unlock it and pilot the ship. Fortunately any old DNA will do, and not just the DNA of the builders.
* "Dinosaurs on a Spaceship" human, but the episode takes place in the 24th century, and one of his robots makes a comment implying that they've been on the titular spaceship for 2,000 years.
* "Dinosaurs on a Spaceship": Riddell is, in Amy's words, "the walking innuendo".
* "Dinosaurs on a Spaceship" Solomon, while forcing him into a remote-controlled spacecraft that will be used as a target for some missiles:
* "Dinosaurs on a Spaceship", the Doctor accidentally drags Rory's father, Brian Williams, on one of his adventures when he collects Amy and Rory. Early on, Rory tells the Doctor that his dad hates to travel. Thanks to his adventure with the Doctor, Brian ends up with a desire to see the world. The end of the episode has Amy and Rory collecting postcards that Brian sends from his travels.
* "Dinosaurs on a Spaceship", the pirate Solomon did this to the crew of a Silurian ark he came across. All several thousand of them.
* "Dinosaurs on a Spaceship" who built it and took the dinosaurs along.
* Dinosaurs on a Spaceship", who murders all the Silurians on board a ship so he can take their cargo of the last dinosaurs. He is such a monster that the Doctor deliberately forces him into a small spaceship that will be used as a remote-controlled target for missiles.
* Dinosaurs once brought home a report card with several Fs and an M. It turns out that the M grade isn't an indication of how badly Robbie is doing in school, but is actually there because the teacher forgot the alphabet while grading.
* Dinosaurs on drugs, ends with Robbie addressing the audience, telling them that drugs were the leading cause of crappy anti-drug episodes of your favorite TV shows: "Say no to drugs. Help put an end to preachy sitcom endings like this one!"
* Dinosaurs opened with this news report: "A meteor, three times the size of Earth, is heading towards us in a collision course that will result in the extinction of all life on this planet. This just in: No, it's not."
* Dinosaurs portrayed in fiction are almost always shown living in lush, warm

jungles, when in fact, many dinosaurs (including the kinds portrayed in movies) inhabited a wide variety of biomes, including deserts, plains, and even arctic environments.
* Dinosaurs praised both shows back in the day (the early 1990s) for this avoidance.
* Dinosaurs started having cold opens in the third season, but reruns show a cold open before every episode (moving the first scene so it runs before the opening), in addition to including the third and fourth season theme in episodes from the first two seasons.
* Dinosaurs Subverted in that it's not because she's enjoying it, but because the episode wants to emphasize she's wasting what's left of her life.
* Dinosaurs: Terrible Lizards that is an extremely inept predator. To be fair, all the dinosaurs in the series are equally goofy.
* Dinosaurs: Terrible Lizards to drop into the pool, sending up some fish for her young to eat in a similar manner to when she fell into the same pool earlier in the short.
* Dinosaurs. The episode "Dirty Dancing" has Earl watching a show called "Totally Ineffectual Dad", which is all about the father being a bumbling dad. At one point and advertisement for the show mentions that it is followed by other shows with the "bumbling dad" concept, such as "Dad's a Moron" and "Father Knows Nothing".
* Dinosaurs: The government goes after four-leggers, saying they're taking two-legger jobs, and makes all four-leggers move back to their side of the swamp unless they're married to a two-legger. Monica (a Brontosaurus) gets married to Roy (a T-Rex type) in order to not have to move away.
* Dinosaurs", The Job Wizard gives Robbie a job pushing trees at the WeSaySo corporation alongside Earl. After Earl gets Robbie to resign from WeSaySo, he confronts the Job Wizard to tell him to give Robbie a better job. The Job Wizard tells Earl to take a number, and Earl does so. Once he gets to #98, Earl comes in again.
* Dinosaurs: The Most Complete, Up-to-Date Encyclopedia for Dinosaur Lovers of All Ages crazy-looking, and today this highly popular and sought-after dino artist actually considers his work to be rather conservative.
* Dinosaurs themselves are often incorrectly considered to be "giant lizards", due to the word "Dinosaur" being Greek for "Terrible Lizard" (actually, Sir Richard Owen intended it to mean "Fearfully-Great Reptile" as he considered Dinosauria to be a distinct group of great reptiles). Gets ironic when you realize that mosasaurs, often mistaken for dinosaurs as mentioned above, are true lizards.
* Dinosaur stomps on a nest of Iguanodon eggs as it pursues the fleeing herbivores. Aladar's egg survives by being between its toes, but the other eggs aren't so lucky.
* Dinosaurs) turns around and warns them: "Old food never dies... It just... goes... bad!"
* Dinosaurs two-part episode "Nuts to War", a television report of the war between bipedal and quadrupedal dinosaurs has Howard Handupme inform the audience that footage of the war is too intense to show at dinnertime. Fran Sinclair's mother Ethyl Phillips remarks that it's probably because one of the soldiers mooned the camera.
* Dinosaurs two-part episode "Nuts to War", there is a scene where Charlene is nervous about performing in musical act for soldiers. Her father Earl's friend Roy suggests that she overcome her fear by imagining the audience in their underwear. This causes Charlene to happily head toward the stage, but her father indignantly orders her to imagine the boys wearing pants.
* Dinosaurs two-parter "Nuts to War" had the two-legged dinosaurs going to war against the four-legged dinosaurs over pistachios. A subplot involved the Baby's own personal war against a mammal who had stolen his cookie. At least this one is more justified, as the Baby is a baby and his feud came when Fran didn't believe there was a "cookie creature", telling Baby that it's between them.
* Dinosaurs Unfortunately, the Thoronoids also make him nasty and aggressive to everyone, including Caroline. When she finally confronts him for his behavior,

Robbie tells him that she was clearly more interested in his rival—why else wouldn't she go with him to the dance? Caroline fires back that Robbie never bothered to ask her, leaving him humiliated.
* Dinosaurs variant below, Lancre custom has it that whatever the priest says at the naming ceremony, that's your name. In addition to Princess Esmeralda Margaret Note Spelling, this has lead to James What The Hell's That Cow Doing In Here? Poorchick and King My God He's Heavy I.
* Dinosaurs vs. Aliens. Aliens invade during the age of the dinosaurs; they battle.
* Dinosaur Swamp has been found from time to time in the Dinosaur-infested swamps of Florida. It seems to be the only thing left of the park, however.
* Dinosaurs: "WESAYSO: We'll do what's right, if you leave us alone," "WESAYSO: We don't like to have our feelings hurt" and "WESAYSO: We know where you live."
* Dinosaurs when Baby learns rude words from television. When Fran washes his mouth out, every time a bubble from his mouth pops it echoes the word.
* Dinosaurs when Charlene comes up with the idea that the world is round a light bulb appears above her head, which is actually just Earl fixing the lamp in the background.
* Dinosaurs" When his son is shocked, he says "Well, it's not like we're on television or anything!" Cue him noticing the camera, which prompts a "Holy smoo!"
* Dinosaurs when the dinosaurs go to war. Their uniforms have the national flag on the back... which just happens to resemble a bullseye.
* Dinosaurs when the Sinclairs take their baby to the chief elder for naming. Their son gets stuck with "Augh Ugh I'm Dying You Idiot".
* Dinosaurs where Baby, as an adult, had let fame go to his head, got arrested, and blamed her for it. The adult version of Baby shown in Fran's imagine spot is shown to be wearing a yellow shirt and a diaper, much like the infant version of Baby.
* Dinosaurs where baby learned to use the toilet which had some of this.
* Dinosaurs where Earl accidentally ends up causing the Ice Age, leading to the inevitable deaths of the entire cast.
* Dinosaurs, with the doctor who confirmed the switch jumping out of a cloud and proclaiming "Science was wrong!"
* Dinosaurs would suffer, Mr. Richfield invited the Sinclairs for dinner and tried to buy all rights to the device. When Earl unwittingly gave Richfield the idea to buy the volcano instead, Richfield quickly left the scene and Earl asked for the check.
* Dinosaur: The Essential Guide, which confirms that the Nesting Grounds is indeed their original home. The reason why they all do not stay there all the time is because in the winter, the Nesting Grounds actually becomes too cold for the dinosaurs to lay their eggs.
* Dinosaur, the main reason the Herd was going there is that during the winter, the Nesting Grounds actually become too cold and infertile for the dinosaurs to lay their eggs, and as a result they were all evicted into the desert where they all remained for days until springtime. The film's events actually take place in the spring since that is when the Herd is supposed to return to the Nesting Grounds.
* Dinosaur, the villains are a pair of Carnotaurus threatening to destroy the Herd and prevent them from returning to the Nesting Grounds.
* Dinosaur Train: Adventure Island, this is Thurston's reaction to the Conductor's question as to whether or not he tested everything before actually opening Adventure Island to the public. "After all, it is Adventure Island." Naturally, this does not end well.
* Dinosaur Train and could have just told him, but let him figure it out for himself because he knew it would mean more to him than for him to just tell him.
* Dinosaur Train, "Dinosaur Train: Zeppelin Adventure" is a two-part special featuring the latest innovation from Dinosaur Train Industries: a zeppelin. It doesn't seem to travel through time, but it can the characters places that the train and the submarine can't. It comes complete with its own catchy theme tune.
* Dinosaur Train episode "T. Rex Teeth", Tiny whispers to Buddy that Dolores' breath smells awful. Buddy thinks it's because she ate carrion, and after he eats some and exhales in Tiny's face, she confesses that his breath smells too.

* Dinosaur Train has an amusing inversion - when one character is nervous about public speaking, another suggests "Try imagining them with clothes on."
* Dinosaur Train: In between the episodes, Dr. Scott Sampson the paleontologist explains facts about the dinosaur featured in the episode.
* Dinosaur Train — but it's very clear that they love each other.
* Dinosaur Train, Mr. and Mrs. Pteranodon talk about how they're sure everything's fine with their kids because they all get along with the babysitter Kiera so well. Cut to the kids nearly overwhelming Kiera with their arguing about what activity they want to do.
* Dinosaur Train voices the conductor. The original voice for Tiny's brother Buddy was her real-life brother Philip.
* Dinosaur Train when the lambeosaurs move in start eating all the leaves off the oak trees.
* Dinosaur Vs book "Dinosaur vs. the Potty", Dinosaur does a potty dance because he has to pee, which the narrator initially mistakes for a victory dance.
* Dinosaur Vs book "Dinosaur vs. the Potty", Dinosaur drinks an entire jug of lemonade.
* Dinosaur Vs book "Dinosaur vs. the Potty" zigzags this trope. It mentions that the potty won (whatever that means) and that it was a "close one", but Dinosaur doesn't seem to have wet himself and appears to be standing at the toilet.
* dinosaur (who can otherwise be physically destroyed but can reform from the one Core Medal containing their consciousness).
* Dinosaur with Dinosaur's gorgeous GGI animation being one of the only characteristics that distinguishes it from the latter. The main characters of the film include a sauropod, a ceratopsian, and a mute armored dinosaur who decide to stay with one another (and avoid predators) while migrating to a greener place following the destruction of their home. Critic Desson Howe of The Washngton Post had the following to say in his review of the film:
* Dinosaur, Zini is actually shown as a baby lemur alongside with a pregnant Plio during the scene where Aladar's egg is shown landing in a small bush on Lemur Island and immediately hatching out of said egg.
* Dino Squad and getting to know him a bit. Ultimately, Buzz is lured to an abandoned house after the "girl" shouts that a dinosaur monster is attacking.
* Dino Squad lays into his teammates about not getting the respect he deserves.
* Dino Squad: Victor Veloci wants to turn regular animals into prehistoric creatures and return Earth to the rule of the dinosaurs.
* Dino Thunder and... turning him into an action figure. "Very collectible."
* Dino Thunder sees Tommy abducted early on, and the Rangers come to rescue him. The finale involves another invasion of Mesogog's base.
* Dino Thunder's martial arts skills returned. He seldom used a stunt double. In an episode where Tommy dreamed fights with his first three ranger forms, that stuntman was in those suits instead.
* Dino Thunder the gem led to him returning to normal... with powers reduced to standard Ranger level.
* Dino Thunder ("Two Heads Are Better Than One'') where the Red Ranger seems downright sadistic...
* Dino Thunder which drove its user mad. To be fair, that was after Mesagog had it soaking in evil energy for a long while. Once that was gone, the White Ranger was an okay guy.
* Dino Thunder: White guy, white girl, black guy. Then they added a Native American guy and finished it up with a Latino guy.
* Dino Thunder, who have previously captured the Shadow Ranger. The only ranger present during the attack on the base is the Omega Ranger.
* Dino Time has a strange case of this. The main character breaks the fourth wall in three early scenes, but after about 20 minutes into the film he never does it again.
* Dino Time, one of the rocks in the kids' town has a mysterious carving on it, dating back to Cretaceous period. Mysterious because no humans were around then. The kids end up going back in time and at one point the main kid decides to make a

carving to tell their parents in the future how to get the time machine to work, but he gets distracted when his sister is kidnapped and ends up not making the carving. At the end of the film, his mom explains they got to them in the time machine by looking at the carving, leaving the main kid to wonder how the carving got there in the first place.
* Dinotopia about this, although they were more anti-technology than anti-science, since the protagonist himself was a scientist (although more of a naturalist, really).
* Dinotopia: Although every creature in and around the island of Dinotopia is at least intelligent enough to communicate with humans, dolphins were the first to interact with humans.
* Dinotopia" - and a man is produced who is "fifteen mothers English", aka fifteen generations removed from English ancestors, and knows an archaic form of the language, to translate for them and help them learn the dialect, which is a blend of many.
* Dinotopia: As part of their training as Skybax riders, Will and Sylvia have to prove that they are not bound to the earth by climbing the tallest mountain in Dinotopia to a place called the Tentpole of the Sky, a monastary-type place built by Tibetans on the icy peak.
* Dinotopia books, the dinosaurs on the island still look exactly like they did millions of years ago, even though evolution has continued to progress normally in the rest of the world.
* Dinotopia books were mostly written in the format of the journals of Arthur Denison as found by James Gurney.
* Dinotopia. Cars, airplanes, and television simply can't hold a candle to their intellectual, pacifistic self-satisfaction, and any argument the brothers can offer is instantaneously deflected. Did I mention they're vegetarians and In Harmony With Nature? (except for the animals they kill to feed the T-Rexes). The books have some elements of this but are less explicit about it.
* Dinotopia: Dinotopia has a dense barrier reef and terrible offshore weather, which combine to make getting off the island by sea nearly impossible (the books are set in the 19th century, so there's no air travel, either, besides the native pterosaurs). The Dinotopians are certain that nobody has ever gotten out, because they've never met any new arrivals who have previously heard of a tropical volcanic island half the size of Germany with a shared human-dinosaur society living on it.
* Dinotopia. Fewer people know about the novels now because of the TV series.
* Dinotopia has a dinosaur version of this, although it's voluntary. Dying saurians travel into the rainy basin to give their bodies to the carnivores for food. There are similar caravans of mammals that go into the Forbidden Mountains for the same reason.
* Dinotopia have languages of various grunts, growls, squeaks, clicks, ect. Prosauropods have a form of musical language as well, often accompanied by a human partner on an instrument. Humans can learn them, and the translator protoceratops can speak many of them, but sometimes larger species' tongues are tough—carnivores, for example, have deep, gruff vocalizations that don't mix well with human throats. (Note that this didn't come up as much in the digest novels, probably to make it easier for young readers to comprehend.)
* Dinotopia have their own languages. Some of them even speak human languages.
* Dinotopia in 'First Flight'; it would maintain a balance as long as it stayed in its place at Highnest, but trouble would ensure if it was removed. However, it may have simply been a legend or First Flight may not completely fit into the other books' canon, as the Sunstone was lost, then stolen briefly by Lee Crabb, then dropped into the sea during the final battle where Arthur and Will, helped by the Skybax, Northies, and Giganotosaurs, managed to stop him.
* Dinotopia is a list of proverbs carved on a stone tablet. The bottom right-hand corner broke off at some point, cutting off the last code at "Don't p—" One Dinotopian suggests that the line might be "Don't pee in the bath."
* Dinotopia is told as a story that one of the main characters from the main book is studying.

* Dinotopia miniseries and TV series because they were so far from the vision of his books.
* Dinotopia starts with the wreck of a prison ship heading to Australia. One main character was a prisoner from the ship and one was the son of the ship's doctor.
* Dinotopia. The Ovinutrix are another one. They are Oviraptors, but dislike the name because it is a mistaken reference to them eating eggs, which in real life was proven likely false. So they, particularly the hatchery attendants, use "Ovinutrix" or "Egg Nurse" instead of "Oviraptor" or "Egg Thief".
* Dinotopia: The World Beneath, basically telling him to have fun. She's not mentioned for the rest of the book.
* Dino Trux (also owned by the ABC) for its second season. Basically they thought "If it's by Dreamworks, then it's for older kids!".
* Dinotrux are all small reptile/tool hybrids extremely good with machines, making them excellent medics for the larger dinosaur/vehicle Dinotrux and also extremely good at designing construction plans for practical buildings.
* Dinotrux, a volcano eruption starts off the plot, ruining the main character's home and forcing him to find a new home, which also happens to have a volcano. When it threatens to erupt too, this time he stands with his friends to work and stop it.
* Dinotrux D-Structs who occasionally makes his escape by slamming his tail into the ground and disappearing in the dust kicked up. He doesn't do it often, but it never fails to impress the heroes whenever he does.
* Dinotrux features a suspension bridge built over a bottomless chasm in the 4th season finale, which not only represents a great feat in teamwork and friendship, but also manages to be host to several major battles.
* Dinotrux has D-Structs get annoyed enough at his minion's constant seeking for approval that he calls him out on it;
* Dino Trux has Garby's stomach, a conveyer belt full of blades and crushers meant to break apart and process the rocks he eats. Not the safest place for an accidentally eaten Reptool to find itself.
* Dinotrux: In "Gluphosaurs", the Gluphosaurs can spit an extremely powerful glue that is nearly impossible to break. In a short fight with them they manage to stick all of the main cast together in one big pile.
* Dino Trux is the smart one of the group, so he talks like this almost all the time, slipping into contractions only when flustered.
* Dinotrux takes the general idea of Dinosaurs and Construction Vehicles merged together from the Chris Gall book series, but goes in an entirely different direction with it, featuring more mechanical robotic character designs versus the organic ones seen in the illustrations of the books.
* Dinotrux: The story's events are set into motion when the main character's original home is destroyed in a volcano eruption, forcing him to move.
* Dinoverse. A native Quetzalcoatlus hangs around her and she does fairly well for a few days, before the thought of never having anyone to talk to softens her resolve enough that one of the other kids can persuade her to help them find the place.
* Dinoverse and Mososaurus lurking in that same ocean, picking off said sharks when the whim takes them.
* Dinoverse as the Levelheaded during the first part of the book. She's more practical and pragmatic than the rest and is very hard to panic, but she also doesn't feel like taking charge and responsibility. Halfway through she leaves, and even when she comes back the group is basically leaderless.
* Dinoverse at first until he's kicked out to fetch Runt. Then he encounters the other formerly human characters, and he can't leave the little guy alone, so...
* Dinoverse books, Aaron falls for Claire, not at first sight, but because he heard her voice. She's known for being spectacularly beautiful, and for some reason when she hears that he fell for her voice before he ever saw her, she thinks it's more meaningful.
* Dinoverse books have this in the form of the amber key. The characters know that an amber key and preventing a disaster are essential to getting home. They find a

key-shaped fragment of amber that sets off happy feelings in anyone who touches it and spends a lot of effort on the thing, but it turns out that the key is a dinosaur with amber markings who needs to survive a difficult event. The actual key is only useful in distracting other dinosaurs when a character fucks up, and is given no further thought or explanation.
* Dinoverse built in the first book turns out to have been part of a pattern - people across the multiverse had started building similar machines, with similar lack of understanding, and activating them. At one point it's shown that the required parts for it to work are extremely simple, and it activates on its own. Later said character gets himself fused with this force and is said to be benign.
* Dinoverse calling out exposition about big predatory dinosaurs while cringing in the mud is kind of jarring. Most of the other characters don't know a lot about these topics.
* Dinoverse Candacye Chambers is put into the body of a small dinosaur called a Leptoceratops, much to her dismay. Other, real Leptoceratops take a great interest in her and follow her wherever she goes, trying to feed and groom her. Reminded of when guys would flock around her human body she assumes it's this trope and nicknames them the Leptomaniacs. While this is a factor, it's largely because they are concerned about the company she's keeping and would like her to be safe.
* Dinoverse has various humans cast back into the age of dinosaurs. Subsequently all of them come up with names for various individual prehistoric creatures. Janine is the most free with names and even continues it affectionately when back in her own time, with people who actually do have names — Candayce is Candy-Striper, Mr. London is Mr. L, Aaron is Slick.
* Dinoverse - he happily said he was cured and stopped mooning over her. From Candayce's reaction this wasn't what she wanted to hear. When they were both human again she tried again, and this time had the desired result.
* Dinoverse. Impatience isn't her primary personality trait, but it's among them.
* Dinoverse is strong enough that he follows her around and refrains from eating her friends, and in fact tries to save one of them in the climax.
* Dinoverse - it never really fit him anyway, and he's much smarter than he'd wanted to let on before.
* Dinoverse Janine and Canadayce play this while on the long trek to try and find the boys. They've managed to put aside most of their enmity, but lots of the other things they could talk about still result in bristling on either side, so... I spy, with my little eye...
* Dinoverse Janine and Patience are the two characters who react to being torn away from their bodies and becoming very inhuman dinosaurs with basically acceptance and no regret or worry about it, in strict contrast with their companions.
* Dinoverse made a time machine - he brings up this trope and says he must have stumbled on the right combination by pure chance.
* Dinoverse — they admire her, and thought she was addled or being kept as food for Mike or something.
* Dinoverse. Once they all return home, she's back to being a tall, leggy girl.
* Dinoverse. Pragmatic Janine, after Mike is put into the body of a Tyrannosaurus, sets up a first priority for the group.
* Dinoverse sees that the pack leaders are picking "teams" to go out and find food. He's quite affronted to be one of the last picked - in his human life he was extremely popular.
* Dinoverse. So he applies himself to thinking up pranks, often at his own expense, and feigns clumsiness.
* Dinoverse the accident. The message claims that they've been comatose for all sixty years but then posits a way they might get back and to an instant after the accident. The characters worry about this off and on, wondering if it means they've already failed, or if there's some paradox making it possible, or if they'll be dictating that message in the future.
* Dinoverse. They became aware of how petty and treacherous they were, how little integrity they had, but while this would distract them from what they were doing and keep them from doing anything to her, they never changed their behavior.

* Dinoverse. This meant that Patience and GK could be together after all! ...along with the friend. Strangely, all three parties were okay with this.
* Dinoverse to get her out. The closer ones all also sink somewhat, but are pulled out by their fellows.
* Dinoverse was making plans to cripple a slower-moving player on their team, until the adventure happens. When he returns he finds his courage and denounces Sean.
* Dinoverse, when Candayce has a lovely dream of lying out beside a pool in the warm sun, then realizes with horror that she feels the air on her bare chest - and when she wakes up she's naked because she's in the body of a dinosaur.
* Dinowaurs has stat-boosting equipment which can be purchased with DNA (the in-game currency) or with real money. As any experienced online game player can probably guess, DNA gains are next to nothing, to the point where it would be faster and much less work to mow your neighbors' lawn and use the money to buy equipment.
* DinoZaurs, Rena jumps into a hippo and crocodile infested lake in Africa to try to goad her friend into jumping in as well. He jumps in, but only to save her when she nearly drowns.
* DiNozzo got hit with this again in the season nine premiere, this time from his own side after he was implicated in the shooting death of another NCIS agent.
* Dio bands taking it to its logical extreme (minus his sheer energy).
* Dio Brando. Enya teaches Dio about Stands and sends the first wave of antagonistic Stand users faced by Jotaro and company their way, Vanilla Ice serves as the final enemy Stand User excluding Dio himself and shows up for a several-chapter fight with the heroes near the end of Part 3, while the latter is the main antagonist of Part 6 and attempts to carry out the deceased Dio's plan to recrate the world in Dio's image.
* Dio Brando is shown to have a number of female lovers (and most likely some male ones as well), with at least 4 of those women having had his illegitimate children.
* Dio Brando is so charismatic and good-looking that he managed to father four children.
* Dio Brando is well-loved by fans for his incredible dickheadedness, unabashed desire to use others and control the world, being smart, starting a memorable
* Dio Brando later pulls a similar stunt on Polnareff. Dio stands at the top of a staircase, challenging Polnareff to come up and fight, or otherwise step down and swear loyalty to Dio. Polnareff attempts to answer the challenge, only to find Dio laughing, saying Polnareff must want to give in since he stepped down. Sure enough, Polnareff looks at where he is and realizes that, despite his attempts to go up the stairs, he keeps moving down.
* Dio, claiming the bomb detonator he's holding is a fake, causing just
* Dio classic, but not as well known overall as "My Curse", which only reached #21 (and since it's a cover, it's not as remembered as their original material).
* DIO describes being fully synchronized to Jonathan's body and regaining his full strength as "the greatest high" and sees that he almost feels like singing.
* Dio didn't say, "You expected [insert memetic thing here], but it was me, Dio." The line is, "You thought your first kiss would be JoJo, but it was I, Dio!"
* Diogenes Club. Every so often an evil Great Enchanter arises, and it's the Club's job to put him down again.
* Diogenes Club fifty years early. Diogenes agent Charles Beauregard has to go undercover as a teddy bear called Sir Boris de Bruin. The suit is hot and heavy and uncomfortable, and he tells a colleague afterward that after an hour he was so miserable he was repressing urges to maim any small child that came within reach.
* Diogenes Club from captivity, then need to hide nearby as the Fish Man fights his captors. The fight gets gory very quickly, and the youngest of the children has his eyes covered by his older cousin, though he tries to pull her hands away.
* Diogenes Club, including the psychic Richard Jeperson, his also psychic assistant Vanessa, and the non-psychic but handy-to-have-around Fred Regent; in an earlier period of the Club's 'history', the detective role is taken by Edwin Winthrop and his assistant is Catriona Kaye.
* Diogenes Club instead of killing him, in the hope that as long as he was alive

and sane his successor would not appear. It worked, but when he died in 1961 his successor appeared the very same day — literally out of nowhere, as far as anybody has been able to determine — and began making up for lost time.
* Diogenes Club knock-off Doctor Shade is definitely fictional in the former, but real in the latter.
* Diogenes Club. Nobody knows exactly where the Undertaking gets new agents from, with rumors ranging from "they hire normal humans, then turn them into something else" to "they grow them in vats fertilized with the remains of their predecessors".
* Diogenes Club powers) in the interest of parity, but has yet to come up with a catchy one.
* Diogenes Club series features the Mountmains, a family of IRA members who also happen to dabble in black magic. The first one we meet tries to recreate the plagues of Egypt as a prelude to toppling the British Empire.
* Diogenes Club series: Started out as one to the British glam detective shows of the seventies, particularly those produced by ITC. Over time it evolved so that different stories would each focus on a different genre: the kid sleuth novels of the early 20th century, literary noir, superhero comics, etc.
* Diogenes Club series, the Great Enchanter is trying to bring about the end of the world. There have been several Great Enchanters, but they've all had some version of that goal. Possibly the most dramatic was Isidore Persano, who in 1903 very nearly succeeded in destroying all of space and time. By contrast, the current Great Enchanter, who arose in 1961, has chosen for better or worse to go for a slow and painful end of the world brought about by encouraging the human race to mess things up for themselves.
* Diogenes Club story "The Case of the French Spy" revolves around a seaside town with a local legend about a strange gilled man who came ashore during the Napoleonic Wars and was taken prisoner on the assumption that he was a French spy. It's never established where the fish man came from, although there are a couple of hints that he might be related to Lovecraft's Deep Ones.
* Diogenes Club", the first published story of the series, the viewpoint character is Fred Regent, who starts off not knowing that supernatural menaces are real, then narrowly avoids being killed by literally nightmarish creatures, which leads to him learning of the Club's existence and taking part in their subsequent investigation.
* Diogenes Club", Uncle Satt's chief clerk Steadman dies when he pushed into the main dynamo powering the Gift and is ground up by the workings.
* Diogenes of Sinope, who often compared himself to a dog and argued that people should aspire to learn from them, claimed that this was one of their virtues: He believed they always knew, instinctively, who their friends and enemies were.
* Diogenes Pendergast. He is the driving force for both books and even manages to get more screentime than his brother in each of them.
* Diogo Neto was also somewhat hit by this. When he started doing a show about Portuguese grammar people started asking "Why is
* Dio has a stream of tears coming out of his face when he's in a berserker rage over the fact that his life was incredibly sucky up to this point in the Phantom Blood spoofs in
* Dio, his mother was this. A truly kind woman who was ultimately worked to death by his abusive father.
* Dio is completely unaware that he evolved into a Gliscor while asleep after grabbing the Razor Fang Kim dropped in his sleeping bag one night. When Dio wakes up, though, he is still perplexed of it until Sinatra points it out and tells Dio to look at himself, which he did, much to his initial shock. It wasn't until Dio sees his face in front of Kim's mirror that he realized he evolved, much to his sheer joy.
* Dio is presented as so blatantly evil that the player either decides he's the mastermind at first or concludes it's ridiculous to think that he's anything more than a red herring.
* Dio is stopping time and moving Polnareff down every time he tries to step up
* Dio, it comes packaged with the ability to think, observe, and move while Dio

freezes time.
* Diomedes, a Greek commander who, while also badass, is much more mature and wise. Also, he manages to defeat (and even wound) Ares and Aphrodite in a fight.
* Diomedes also fits, being unwilling to stand down in the face of two deities. He
* Diomedes the city of the other major deity of war. This extends to the other good record keeping Greeks preferring the more intellectual Athena and Ares being hated for embodying the chaotic and destructive nature of warfare. Oh, and Nike (Victory) usually sided against him. (In fact, the only gods who liked him were probably Eris, Aphrodite, and maybe Hades, seeing as deaths caused by war gave him more subjects.)
* Dion and the Belmonts' "The Wanderer" is about a noncommittal man who roams around different towns and meets many women.
* Dionisio Pulido was wrapping up a long day in his cornfield near the small town of Paricutín, Michoacán on February 20th, 1943, when a crack opened in the ground and began spewing ash, noxious gases, and molten rock. Over the next two days, as the Mexican Army frantically evacuated everyone from the vicinity, Pulido was allowed to return to his farmhouse to gather what belongings he and his family could carry before the rapidly-growing Volcan Paricutín buried it. On his way out, Pulido posted a sign on the front gate that read in Spanish:
* Dion McGregor, tape-recorded by his roommate and released on records and CDs.
* Dionne Warwick in 1963 (that version went unreleased, and she re-recorded a slightly better known version in 1967). In 1964, a re-recording was a UK #1 hit for Sandie Shaw.
* Dion's campaign had a lot of this on the Conservatives, including a pulled ad warning Canadians that Harper would bring soldiers to protect, er, subjugate Canadian cities.
* Dion's "The Wanderer" ("I'm as happy as a clown, with my two fists of iron, but I'm going nowhere").
* Dionysios Solomos is revered as Greece's greatest poet, having written
* Dionysius the Elder says that he was so afraid of that trope he ordered that his daughters train as barbers. Then he stopped trusting them as well and started burning the hair off.
* Dionysos or Bacchus, while not a god of love per se, was god of ecstasy, which included sexual ecstasy, as became evident in the Bacchanalia.
* Dionysus also admits that the gods (at least the Olympians) do this, taking whatever form they feel suits their particular profession; he, for example, goes for a more "approachable" look since he enjoys mortal company. When Christopher questions why Artemis (goddess of virgins) would choose to look attractive, Dionysus replies that a pledge of eternal chastity wouldn't be worth as much if men didn't
* Dionysus also exists in the setting as a completely different character.
* Dionysus, god of revelry was near the embodiment of the id unleashed, something his followers found/find utterly charming, which includes yes, hitting on anyone who passed by that he was not directly related too.
* Dionysus is the god of wine. He parties all the time and dresses like a woman (the way you can tell is the length of the skirt: the chiton worn by men usually came to mid-thigh, the peplos worn by women was ankle length). Oh, and if you fail to show him the proper reverence he'll have his minions (drunk, horny women) tear you to shreds and eat you.
* Dionysus starts out with this as his backstory. His mother, Semele, is advised by a disguised Hera to get actual proof that the man who fathered the child Semele carries in her womb is Zeus. So Semele tells Zeus to show himself in his full divine glory, which burns her alive. Zeus sews the fetus into his thigh so the child can finish developing enough to be born, then after his birth calls him Bacchus, meaning the noisy one. Zeus gives the baby to relatives of Semele, who raise the child as a girl to throw Hera's scent off. Three years later Hera finds them, drives the adults insane and makes them kill the son they had together, after which they kill themselves in sorrow and little Bacchus only survives because Zeus turned him into a goat at the last moment so Hera didn't notice him. Then the

toddler is shunted to the Island of Nysa, earning a new name: Dionysus, the son of the god Zeus living at Nysa. He's raised by satyrs and nymphs, then one day walking with a friend he sees a new strange plant. His friend goes to get it for him and falls to his death, and Dionysus with his power over plants makes the plant bear fruit, creating the first grapes then inventing wine. Trying to spread wine results in the first few kingdoms killing many of his followers including his nymph foster-mother, and almost Dionysus himself. After this, he changes his tone: he doesn't politely ask to be allowed to show you wine and grapes. You either allow him to introduce it to your kingdom or he will kill you with vines or drive you insane. Your pick.
* Dionysus, the god of hedonistic madness, had bulls (sometimes to the point of being depicted
* Dionysus was born as a result of his own actions. To elaborate, he was the son of Zeus and Semele, who was descended from Harmonia, a daughter of Ares and Aphrodite who was born after the latter was already married to Hephaestus. However, Aphrodite and Hephaestus only got married because Dionysus got Hephaestus drunk and brought him back to Olympus this way. The reward for bringing Hephaestus back to Olympus was marrying Aphrodite but Dionysus, probably afraid of the already timeline-ripping continuity snarl, refused the reward and said Hephaestus got to Olympus on his own - and he should be the one marrying Aphrodite. Then Aphrodite proceeds to cheat on Hephaestus with Ares and give birth to Harmonia, the ancestor of Dionysus...
* Dionysus was seized by pirates, who took him for a young nobleman and planned to either ransom him or sell him as a slave. However, one of the crewmen recognized him as a god and begged his companions to set him free. Unfortunately for them, they refused to listen and soon found their oars bound by ivy and themselves attacked by panthers and lions. To save themselves, they jumped out of the ship and were changed into dolphins. The only one spared was Acoetes, the one man who argued for freeing Dionysus. When they got back to shore, Acoetes become one of Dionysus' priests.
* Dio's biggest hit on the mainstream rock chart wasn't "Holy Diver" (only reached #40) or "Rainbow in the Dark" (a respectable #14), but 1984's "The Last in Line", which reached #10 and is considerably less known than the band's two signature classics. In the UK, their only top 40 hits were "Mystery" and "Rock 'n' Roll Children", which are also less remembered than "Diver" and "Rainbow".
* DIO's first on-screen usage of his Stand's ability (though the time stop itself isn't shown) is to repeatedly place Polnareff at the bottom of a set of stairs that the latter was climbing up to confront him.
* Dio: Short for "diorama", an extended model base involving scenery. Many model contests require at least one vehicle in a diorama and use the term "vignette" to refer to a diorama without any vehicles in it.
* Dio's stage set for the Last In Line tour had an Egyptian theme, to tie in with the song. It can be seen in the concert video, "A Special From The Spectrum".
* DIO's Stand, The World can he increase the length of his time-stops).
* Dio's time stand still move is never called ZA WARUDO. It is merely named Time Stop, and the Stand's name is The World. It is never implied to be spelled in broken English too. Complicating this,
* DIO's Za Warudo, or rather, The World, creates a world of halted time only he
* dioxygen difluoride. blows up. Just a few molecules of it put together with some sulfur can let out enough energy to rival your breakfast. It's been given the humorous nickname "FOOF" (a pun on its chemical composition) due to its reactivity.
* DiPierdomenico broke several ribs and punctured a lung. He played out the game without even knowing how badly hurt he was and collapsed shortly after the match finished.
* Diplomacy: “I’m going to kill my brother and then kill you on the pretext that your brother did it.”
* Diplomacy) and "Lepanto" (Italian moving aggressively against Turkey with Austrian help, named after the 1571 naval battle that stopped Ottoman expansion in the Mediterranean)

* Diplomacy as he loses all of his states, and screwing himself over since nobody will deal with him, effectively making victory impossible.
* Diplomacy, Austria and Germany are considered high-risk/high-reward countries to play due to their central location on the board: Germany can be attacked by five out of six rivals in the first year, and Austria is statistically the most likely country to be eliminated in tournament play. However, if Germany is able to form a good alliance (especially with either England or France) and Austria is able to weather the storm and scramble for the Balkans early on, they can become strong contenders for an outright victory. Russia also qualifies for Glass Cannon status due to its size (it starts with one more unit than other players) and tendency to be feast-or-famine in tournament play (it wins outright at a fair clip but is also the second-most likely country eliminated).
* Diplomacy can easily lead to this thanks to two mechanics: United Against Us (a faction that the player is at war with can invite any other faction to the war, regardless of if the two faction like each other in gameplay or lore) and the diplomacy bonus given when attacking a common enemy, which can results in Skaven and Dwarfs, both mortal enemies in-lore, being very friendly with each other because both are at war with the greenskins.
* Diplomacy can trigger this in the rules in specific circumstances. Specifically, if the following combination of orders occurs: One of A's armies, supported by another, attacks B's fleet. Meanwhile, B's fleet convoys one of B's armies across to attack A's supporting army. If this attack succeeds, the army will be unable to support A's army, and the combined attack on B's fleet will fail. If the combined attack on B's fleet succeeds, the fleet will be dislodged and unable to carry any of B's armies that turn. In other words, for A to successfully destroy the fleet, B's army must be prevented from disrupting A's supporting army, which can only happen if A successfully destroys the fleet. Likewise, to protect his fleet B must disrupt A's supporting army, which requires B's fleet to be protected. The standard tournament rulebook devotes several pages to how to unpick the resulting situation.
* "Diplomacy Happens at Night" was to be a song for Benjamin Franklin, who ended up being cut entirely from the show. His role was cut early on in the show's devlopment, but Miranda finished writing the song anyway, joking that they'll add it back in after his death. How does he write like he's running out of time?
* Diplomacy is a game which thrives on these, as the players must secretly negotiate, manipulate, and lie to each other as a matter of course. For example, a clever player may attempt to offer another player support for a movement quid-pro-quo. If successful, great. If that player denies support, the first player might support him anyway - and mutter quite audibly about how he was just stabbed in the back. At the cost of one turn's disadvantage, the first player has trashed the second's reputation with the entire table.
* Diplomacy Italy attacking anyone difficult — in tournament play it is statistically both the least likely country to win and the least likely country to be eliminated outright.
* Diplomacy—particularly for email play—is a world map set in 1861 and including the Confederacy as a playable power. Also, many countries are divided into subunits for play purposes, so this is easy to do.
* Diplomacy Online seems like a perfectly free game at first- until you realize that only subscribers can play the different variants, maps, and rules, and free players are restricted to the simple un-varied format.
* Diplomacy, or games in which moving a game piece to another piece's space provides all the necessary information.
* Diplomacy, originally published in the early 1960's by Avalon Hill and still in print nearly 60 years later, is a not-necessarily-entirely-historically-accurate game of diplomatic maneuvering and skulduggery among the European powers of the 1890-1914 era. Treachery and double-dealing are virtually mandatory in play.
* Diplomacy ruler of Europe, while the rest can enjoy having ornate daggers jammed into their backs.
* Diplomacy sides, and the only good way to get an advantage is by convincing other players to join with you in ganging up on somebody else. Since the rules are

explicitly designed to allow you to lie to other players about what you are going to do in your next move, things quickly get crazy. Many players have remarked that playing Diplomacy is a good way to ruin friendships.
* Diplomacy, such as the "Balkan Gambit" (Austria moving a fleet from Trieste to Albania and an army from Budapest to Serbia, the movement of the second army naming the specific variation).
* Diplomacy Through Schooling. By this point, Twilight's sworn not to keep anything about Powers from Spike, having asked Luna for permission to fill him in (along with Trixie and Moondancer, since they figured out some of it on their own).
* Diplomacy Through Schooling, it's mentioned that Diamond Tiara asked for (and got) a transfer from Ponyville's school to Twilight's new one (with her father's approval), in order to try and get out from under her mother's influence (and Silver Spoon transferred with her). Subsequently, Spoiled Rich barged onto the grounds, interrupted a meeting between Twilight and the parents of some other students, and demanded that Diamond's enrollment in the school be revoked. That got her declared a "disruptive presence", and she was legally banned from coming onto the school's grounds (and a few other places) ever again. She did not take this well and has since attempted (and failed miserably) to have it overturned in the courts.
* Diplomacy Through Schooling, when discussing what'll happen when they find Sunburst, Twilight says that if he doesn't have a good reason for breaking off contact with Starlight, she'll... "give him the nose-honking of a lifetime". And then she'll call her mom in to have words with him. Spike actually finds this second part a reasonable and threatening punishment when she says it, shuddering in response.
* Diplomacy Through Schooling, when Starlight explains her Cutie Mark, she tells Spike and Twilight how she got it when she used precision magic to simulate a careful breeze and free a kite from a tree.
* Diplomacy, you can offer missions to pirates outside of their normal "raiding schedule".
* Diplomacy your position if you play you cards right because there can often be opportunities for the unit to make a mad dash for your adversary's likely-undefended Supply Centers which they can take for themselves. Hell of a dagger to have pointed towards your rival.
* Diploma mills often give themselves names that are almost-but-not-quite the same as prestigious schools. For bonus points, it's not terribly uncommon for them to have a mailing address in a town (or even just on a
* Diplomat at Large, after "invading" Byzantion, where the headquarters of the International Bureaucracy was located, and subsequently throwing everyone out of the building so she could go through everything and solve the griffons' debt problem, Twilight is no longer permitted back there.
* Diplomat at Large, in response to the Diamond Dogs of Dimondia essentially enslaving Trixie, Twilight threatens to call Rarity down on them. They give in almost immediately.
* Diplomat at Large, Luna and Pharynx have become an official couple by chapter 4, set some weeks after the story started.
* Diplomat at Large reveals that millennia ago, the merlions migrated into the area of the western oceans ruled by the monstrous octopus Squirk, and defeated and imprisoned him in a cage of wrought sea-silver and oceanic crystal, enchanted to keep his words from getting out. He's still there to this day, throwing tantrums inside his prison.
* Diplomat at Large, Scootaloo does a spot-on impression of Twilight's squee from her story in "The Cutie Mark Chronicles", when she finds her aunts are moving to Ponyville full-time.
* Diplomat at Large, the Storm King utilizes wind during his battle, though it's only really mentioned once.
* Diplomat at Large, this is Pharynx's reaction to realizing he'll have to explain his black eye (which he got in his brawl with Thorax) to Luna.
* Diplomat at Large, Twilight Velvet falls head over heels for Ocellus when she

meets the young changeling, who is rather startled to find this mare cooing at her.
* Diplomat at Large, when Rainbow Dash invites Scootaloo - her sister in all but blood - and her aunts over to meet her parents. Luckily, Windy Whistles and Bow Hot Hoof adore Scootaloo and happily accept she, Holiday and Lofty into the family.
* diplomatically, and that 100 skill level in Speechcraft isn't just for show.
* Diplomatic Immunity, but Ravana's younger brother Vibhishana intervenes due to this tradition.
* Diplomatic Immunity fleet, but he's resistant to any form of attack.
* Diplomatic Immunity has the hero who is an Imperial Auditor (big-time troubleshooter) sent to calm down a harbor brawl that had escalated into an interstellar incident, only to find that there are more sinister aspects that threaten war with a rival empire.
* Diplomatic Immunity. If a foreign official ever abused their privilege in this manner, bringing them to justice would be as simple as deporting them, revoking them of said privilege so they can face prosecution, either in the offended country via extradition, or possibly in their home country.
* Diplomatic Immunity, Imperial Auditor Miles Vorkosigan has to interrupt his honeymoon to deal with an international incident.
* 'Diplomatic Immunity' is an interesting inversion of the trope: the gunships have been impounded, and the main character has to diplomatically mediate between his ferocious military subordinates and the peaceful natives who see them as barbarians.
* Diplomatic Immunity on the country's version of April Fool's Day every year. The rest spend the entire episode in fear of what she'll do but she reveals at the end she's been too busy to pull a prank this year.
* Diplomatic Immunity. The Fe'ausian mission takes advantage of diplomatic immunity, usually in the form of low-level scams to make an extra bit of cash while squeezing as much foreign aid as they can out of the New Zealand government.
* Diplomatic Immunity. They are therefore declared PNG, deported and banned from that country for life.
* diplomatic immunity to park wherever the hell they want. United Nations diplomats in NYC have racked up more than $17 million in unpaid parking violations. For whatever reason, Egyptian and Libyan diplomats tend to have the highest violations.
* Diplomatic Immunity was called the "Ambassador of Soul'', his wife tried to invoke diplomatic immunity to avoid her traffic charges. It didn't work.
* Diplomatic Immunity, we're told that Ekaterin doesn't just have a top secret clearance due to her part in foiling a terrorist plot; it's also due to her husband Miles' tendency to babble about state secrets in his sleep.
* Diplomatic Impunity: A dignitary believes that having diplomatic immunity means they can't get punished for what they do in the country they're visiting.
* Diplomatic Impunity: I have diplomatic immunity! I can do anything, and you can't stop me!
* Diplomatic Impunity: When a foreign diplomat abuses their legal immunity to the local laws of their host country.
* Diplomatic Impunity: When foreign dignitaries abuse their legal immunity to the laws of the country they are staying in.
* Diplomatic Impunity" (which essentially banishes the person from that country under threat of jail time if they ever come back), though doing so is usually a last resort, as the act of doing so is usually viewed as a giant middle finger to the sending country and is all but guaranteed to significantly strain relations. Matters can be complicated in cases where the offender has committed an offense that is treated far more harshly in the sending country.
* Diplomat Kuroda Kousaku - Stale Beer. This involves a career diplomat who uses his diplomat status and his foreign affairs ministry reputation to get things done by using his language skills, his wits and knowledge on political matters. He has help from a friend of his in the CIA and a female Dojikko detective.
* Dipper and Bipper isn't an uncommon ship. Falls under both this and
* Dipper and Mabel) as well as their sadness that they couldn't face off in a Showdown.

* Dipper and Mabel defeat the evil wax dummies by melting them, with Mabel throwing some of them in a fire for good measure.
* Dipper borrows the look in "Boss Mable" when Stan's on vacation, as does Soos
* Dipper, in a desperate attempt to get a password to a laptop containing information he needs, makes a deal with Bill Cipher, who says he "
* Dipper is reunited with Lapis Lazuli, only for her to turn out to be possessed by Bill Cipher. As Bill taunts Dipper, Dipper falls off a cliff and turns into a wooden puppet..
* Dipper/Pacifica is similar to the above, and owes its popularity largely to the episode "Northwest Mansion Mystery" - said episode has Dipper "greet" Pacifica by telling her that she's the worst and slamming the door in her face, and quite a bit of what follows is the two arguing while trying to stop a vengeful ghost.
* Dipper Pines' given name has been revealed internally several times in
* Dipper Pines is perhaps the least manly character in town (apart from maybe
* , Dipper saves Ford from an alien killing machine but ends up wetting himself. Ford tell him he doesn't need to be embarrassed because it's natural response to dangerous situations and that he's brave for saving him despite his fear. Ford even admits to urinating himself in the past.
* Dipper's flaw is his insecurity; Dipper has done some very stupid and very dangerous things in an effort to prove himself, such as reciting a curse
* Dipper's great uncle Stan Pines is this to an even greater extent, to the point that in the
* Dippin' Dots, a dessert made from liquid-nitrogen-cooled beads of ice cream and mostly sold at amusement parks and shopping malls, has been marketed as "The Ice Cream of the Future" since 1987.
* Dire bats: Larger and more vicious than normal bats, and menacing even without
* Dire Beasts, as Ice Age megafauna such as mammoths, saber-toothed cats and dire wolves are often used in this capacity.
* Direct action, ranging from demonstrations, strikes, and sit-ins to sabotage and vandalism, is meant to force an opponent to remedy certain social issues.
* direct an aircraft to drop a 2,000 pound bomb on the enemy's head. If the enemy is too close for said action, the enemy will likely get shot in the face.
* Direct Continuous Levels: It's a linear game, but not broken up by jumps between levels.
* Directed by Cast Member - A member of the cast decides to get their feet wet by directing an episode of the show
* directed by SiDN64, the Pink Pants rocket gunner told his ally to barrel-roll away from the sniper word-by-word, but the latter failed to do so.
* directed YMMIR) is a large part of being a witch. Granny Weatherwax makes liberal use of it and promotes its use in her pupils over the use of actual magic.
* directing for the show more frequently segments on the show, as well as Elmo-driven DVDs and specials; this was mostly because of the impact that Clash had on turning Elmo into the character he's known as today.
* Direction Générale de la Sécurité Extérieure ("Second Office").
* Directionless Driver - "We're not lost, damnit! No I won't stop to ask for directions, the GPS told me we're going the right way!"
* "Directions" includes directions like "Two miles before the red schoolhouse, you take a left."
* Directions, while in the former the rest of the mane 6 must learn how to work as a team and protect Equestria without Twilight's help.
* Direction, the Changelings use illusions to trap the Mane Six in one when they caught in the llama temple, based on their greatest desires, but since Pinkie has everything in her life that she could want, it doesn't work on her and she's able to free the others.
* Direction (Trixie having hired him for exactly this purpose), but a fortunately-placed pair of scissors allows her to momentarily escape his grip, and only her hesitation to shed blood prevents her from pressing the advantage.
* Direction: Trixie is the first major antagonist in the story, but is defeated

fairly early on.
* Direct Line to the Author: A work is presented as if it really happened and was later recounted to the actual creators.
* directly affected neurotransmitters in all kinds of ways and was described constantly as addictive.
* Directly afterwards: "The toilet over there, will bring you luck, so give up, I've got no time to spare!" Who knew hobo frogs wanted to pee too. Plus, when you do 'BAD', it starts raining, when you do 'AWFUL', loud claps of thunder that could scare you, and when you fail, he soils himself.
* directly, but is a bit more like a giant centipede than a worm and burrows through ice and snow with a body temperature that rivals molten iron), which burrow through glaciers instead.
* directly contradicts large (we see it immediately cover areas we know had many survivors that weren't immortal), it is probable that the actual explosion wasn't quite so large, even if the clash of the swords caused the end of the world.
* directly interacting with the core, but it's better than going full China Syndrome.
* directly involved in fighting the battle, while the Battle of the Star Forge is a big honking fleet engagement between large portions of the Sith and Republic navies where the player character is infiltrating the Star Forge.
* directly led to a team losing a game that they would have won right then and there if the play had been made came in 2009, when with two outs in the bottom of the ninth inning in game 2 of the NLDS between the Los Angeles Dodgers and the St. Louis Cardinals, the Cardinals ahead 2–1, Cardinals left fielder Matt Holliday dropped a line drive off the bat of James Loney, allowing the inning to continue. The Dodgers went on to score twice in the inning and won the game, eventually sweeping the series.
* Directly parodied during the Board Breaking Guy's Web Redemption on
* Directly played through with Mercury in the A dance of Shadow and Light series by
* Directly referenced in the bibliography as a message paid by the Hot Topic corporation.
* directly through the labyrinthine halls of the Necron crypts it guards. It can also sense you coming from literal miles away.
* directly told "I love you" (Rose Tyler, River Song, Clara Oswald), there is still wiggle room to argue that the relationship remains platonic.
* directly weaves is unknown); he ends up having a miserable time when one Aes Sedai sets out to see just what the loopholes are (indirect effects like lightning, sparks, and objects thrown by the One Power).
* directly, where he tries to free his characters from his writing while still writing their lives in real time. He personally apologizes to Kilgore Trout on this occasion.
* directly witnessed, but it's a small dagger except when he needs it to be a sword).
* directly Yup, they're even copying Apple's failures. At this rate, soon they'll be rolling out their own maps app that tells you to drive over a lake, through your local library, and onto an airport runway.
* Director Ben Wheatley cited this trope as the reason why he found Fourth Doctor stuff so dark:
* Director, Bob McKimson, described Bugs Bunny as the type of individual where if a lion roared at him, he would simply walk over and slap it across the face.
* Director Cory Edwards voiced hyperactive squirrel photographer Twitchy in
* Director Coulson catches an impure Terrigen Crystal just before it shatters on the ground and its mist kills every human in the room. The impure crystal begins to turn his hand to stone, and it is immediately cut off by Mack using a fire ax. It works this time.
* Director Fulcher is prone to shifting blame onto his employees and dangling promotions and name changes over their heads and never delivering.
* Director Fury, of all people, sent to keep an eye on Coulson and make sure

nothing went wrong with his resurrection.
* Director Kakuzawa though only in the manga, where he shows how much of a villain he is.
* Director Kerry Shawcross and head writer Miles Luna love trolling the
* Director Louis Leterrier has openly admitted that he intended the protagonist of
* Director Mike Dougherty confirmed via Twitter, that the remains of an Anguirus were inside the temple that housed Godzilla, teasing a future appearance.
* Director Mitsuo Fukuda had his late wife Chiaki Morosawa serve as the story writer for
* Director Northmoor is dead long before the game even began, being Trench's predecessor, but he's still talked about a bit by his successor.
* Director of Photography David Armstrong has a cameo as a policeman in the flashback where Emma is discovered playing the piano.
* Director of S.H.I.E.L.D., and the latter getting in touch with a mysterious figure who is apparently Skye's father. There's also a nice subversion, where Garret starts to augment himself with cybernetic implants after everyone assumed he was dead. Right as it seems like he's going to be an even bigger threat for the second season, Coulson pops out of nowhere and casually vaporizes him mid-villain speech.
* "Director of Vertical Transportation" = Elevator Operator in a luxury hotel
* Director Pandya has a prosthetic arm, which along with his unintimidating appearance leads people to underestimate him. The reality is that he's a sharpshooter who served for years in the US military.
* Director Paul Feig has two voice cameos, the "Ghost Hunters" announcer, and the boss mistreating Rowan through the radio (his on-screen appearance at the concert scene was eventually cut).
* Director Raoul Walsh lost an eye in a car accident, and took to wearing a very large black eyepatch. Opinions on his films remain pretty mixed (a common statement is that he "never let the truth get in the way of a good story," due to films like
* Director Ryuhei Kitamura has worked together with actors Tak Sakaguchi and Hideo Sakaki in four movies,
* Director's Commentary TV series was a rather good parody of the genre.
* Director's Cut features numerous shots that were altered or removed in the eleven edits the film had to go through in order to knock it down from an X rating to an R rating. Such scenes include longer versions of ED-209's obliterating of Kinney and Boddicker's gang killing Murphy, close-ups of Bobby being shot in the leg and Boddicker being stabbed in the neck, and a cut shot of Boddicker's blood splattering onto RoboCop after the aforementioned neck-stabbing. These re-inserted scenes are generally agreed to improve the film, given how one of its goals was to satirize violence in the media by exaggerating its own gore to the point where it becomes funny.
* Director's Cut The Gump is furious with Jack for allowing Lily to touch the unicorn, and then throws a massive tantrum when Jack solves his subsequent riddle — but once he's over it he forgives Jack immediately (as he promised) and joins his quest to save the unicorns (and Lily) from Darkness.
* Director's Cut. The last thing we see is a giant Audrey II advancing towards the camera before it cuts to static.
* Directors David Molina and Terry Shakespeare recorded one for the first
* Directors Jayson Thiessen and "Big" Jim Miller have done voice acting in the series.
* Directors typically went uncredited on cartoons completed or released after leaving Warner Bros.
* Director Theodore Galloway, the President's Aide sent to oversee NEST in
* Director Tony Leondis, who is openly gay, once compared the main character Gene's struggles with showing off his face-changing ability with how gay men struggle with coming out in real life. However, the fact that Gene
* Director Trench is only alive in the opening cutscene; the next time he's seen is when Jesse walks in on the aftermath of his apparent suicide. Nonetheless, he continues appearing in her mind and giving obscure clues as to her next goals. Pope

speculates that this could be a side effect of Jesse bonding the
* Director Vance, though he was less interested in the hookers than he was in the Russian hitman who wanted him dead.
* Directory Assistance hotline "11833" once set their number ("Elf-Acht-Drei-Drei") to the tune of
* Directory Enquiries service 118 118 have done some memorable ones, but the one where they re-wrote the lyrics to the
* direct quotes from, where the protagonists refer to the aliens they're fighting as "bugs": "You Kill Bugs Good, Man", "Damn Bugs Whacked Him, Johnny", and " You're Some Sort of Big, Fat, Smart Bug, Aren't You?".
* Direct sunlight; sunlight is dangerous, but a lightbulb is not. When UV radiation is what makes sunlight harmful to vampires, this also would explain why they've "become" vulnerable to it despite it being more or less harmless in earlier legends: ozone depletion means more UV radiation gets through the upper atmosphere. Meaning that bursting into flames is the vampire version of skin cancer.
* Direct-to-DVD has a villain dumping a drug called CTX into the water supply of Paris to turn them into vampire-like killers.
* Direct-to-DVD to princes from a neighboring kingdom for diplomatic reasons, but all three fall in love with the common soldiers Yao, Ling, and Chien Po on the journey to the other kingdom, and are eventually able to convince their father to allow them to marry the soldiers instead.
* Direct to Video: A film doesn't wait for a theatrical or television release and is instead released to VHS or DVD as soon as it's finished production.
* Direct to Video: A movie isn't released in theaters or aired on television and is instead released straight to home video upon finishing production.
* Direct to Video: A movie is released straight to home media upon being completed.
* Direct to Video, and 70 minute kids' films by their nature couldn't do justice to the multi year-long connected stories and expansive worldbuilding that fans liked about the franchise.
* Direct to Video, and claim it was too [positive adjective] for theaters.
* Direct to Video as almost all of the original artists that worked on the films had long since passed away or retired.
* Direct to Video as a mysterious stranger obviously based on the Doctor. Over the course of the series, the character's backstory was revealed, distinguishing him from the Doctor in the process.
* Direct to Video because no studio is willing to expend the resources to dignify it with a theatrical release.
* Direct to Video, during the Rumpelstiltskin rendition, Piggy's father gets a little overboard trying to introduce himself and his daughter to the king.
* Direct to Video film) affecting the cast directly. It's also used in "2010" to send a message back in time through the gate.
* Direct to Video film. The film presented him as, in his words, a cross between a Native American and a hippie, as opposed to his immature, snarky and aloof self from the comics and books.
* Direct to Video get chided for being this. With this in mind, it's no surprise that when the sequels got parodied in shows like SNL and Family Guy, the biggest potshot taken is often that it was entirely pointless from a story standpoint to make sequels to films whose stories were designed to be self-contained and standalone in the first place.
* Direct to Video has Sinestro trying to convince Hal throughout the movie that the Guardians are failing at their duties, though it's only near the end that he actually makes the offer.
* Direct to Video in Jūma Hunter Zeek. He dies and passes on his powers to Sho's (Go Green) friend Kyoko, allowing her to transform into Zeek-Jeanne, but despite beingi a recurring character does not uses the Zeektector armor in the show.
* Direct to Video in productions that are loaded with them in plots and gags as well.
* Direct to Video is like this in her first scene, sounding like she stuck her

dialogue into an internet thesaurus translator. Thankfully, this is toned down in all her following scenes.
* Direct to Video movies opted to dress up the Turaga with tribal robes that had floppy ribbons on the front. Roodaka in the third movie was given mechanical-looking braids with several individual strands that hung down to her shoulder-line. Again, this is not a feature seen on the toy, which instead had short, solid "pigtails". They also turned her originally short robo-ponytail into a large, metal-plated bendy "flap", but at least kept it as a single piece. The fourth movie had none of this, and gave its characters unmoving, metal loincloths... even on those characters whose toy designs already had their groin covered up.
* Direct to Video: Rather than wait for a theatrical or television release, the movie is released directly to VHS or DVD as soon as it has finished production.
* Direct to Video releases of films/episodes): A trademark of Toei Company. In the US, this is the term for Japanese DTV releases in the States.
* Direct to Video) sewing a boy's mouth shut next to the titular doll. He doesn't get finished since he gets killed by a mysterious entity who takes a list he made.
* Direct to Video The audience is introduced to a former female love interest of his (Angelique). Later, he pretends his wick is mistletoe and kisses Cogsworth under it.
* Direct to Video, the main villain is a scientist who kidnapped multiple people and imprisoned them inside his special prison camp, called 'The Village', in order to create telekinetic super soldiers. Katsumi, the main character, spends the entire movie trying to free those prisoners, only for them to die after leaving the prison camp, due to having implants in their heads. After the villain starts to gloat about this, you just know it's time for ass kicking.
* Direct to Video. This video featured a song called "Six Simple Words" that is still used by classrooms that follow the Character Counts curriculum and is more well-known today than the actual video itself.
* Direct to Video, though it keeps the voice acting style and jazz scoring forever linked to the franchise.
* Direct to Video - When a movie skips the theaters and goes directly to video (VHS, DVD, Bluray, etc.)
* Direct to Video. When Babs sees Buster in trouble, she needs a plan to save him. She lights a match in a dark shed, revealing boxes of fireworks inside it. However, her match doesn't set the fireworks off right away, which is a good thing, as she disguises herself as a fireworks salesman and ties the fireworks to a gazebo the Boo family is in, choosing that time to light the fireworks and send the gazebo flying away.
* Direct to Video, which sold very poorly and was eviscerated by critics.
* Direct to Video with Gus in the "Fifth and Sixth Graders Club" segment. Shortly after visiting the club for a week, the gang start to notice that Gus had been getting a little fat recently, as a result of eating too much. He remains this way until the next segement.
* Direc TV and its sister service U-Verse use a blue screen to depict channels you don't get.
* DirecTV has a a few of these for the DirecTV Genie. Whether its about how bad cable is to ___ or how awesome having DirecTV is.
* DirecTV has a series of ads with celebs describing amazing sports moments, just to have the screen black out - "you missed it, because you have cable". This despite the fact that that people could catch them over and over in a less time-consuming distillation on ESPN's
* DirecTV have been running a series of ads combining edited pieces of old films with new footage of an actor from the film (
* DirecTV. It starts out with a clip of an interesting movie, then a movie fan briefly interacts with the characters. The idea is that with DirecTV the viewer has much more control over when and where things start. Sadly, the interesting movies are not real.
* DirecTV's short-lived "Hannah Davis and Her Horse" ad campaign was about a Sports Illustrated swimsuit issue model riding a talking horse, and the only

connections to DirecTV is them talking about it with the rest of the ads seemingly having nothing to do with their services outside of the offer screens and appearance of the company logo. It's no wonder the ads came and went quick.
* dire (it being impossible to create a robotic brain without the Three Laws in-continuity). Essentially, the argument goes that a sufficiently non-humanoid robot might fail to have any sense of what constitutes a "human," allowing it to violate the Laws out of ignorance.
* Dir en grey, and that's just one song...in fact, they have made Scare Chords an essential component of their musical style.
* Dir en grey are no strangers to this trope, both in the visual department and in the actual music as well. Particular notorious audio examples include Kyo's ear-piercing screams in "Agitated Screams of Maggots" (the entire song), "Kodou" (right after a brief pause), and "Pink Killer" (Kyo sounds like he's being brutally tortured during the last 30 seconds or so as the music fades and what remains is his very loud shriek).
* Dir en grey's song "Berry" tells the story of a nine-year-old girl who gets sick of her parents abusing her, takes her father's gun, and shoots them. If that's not disturbing enough, the girl's favorite food is jam on bread, and the blood her parents shed is referred to as raspberry jam.
* Dir en grey, when it's actually lashing out at a society that refuses to acknowledge the need for birth control and sex education and uses the most painful and traumatizing last-ditch procedure as a substitute for preventing pregnancy in the first place.
* Dir en grey, whose name is actually trilingual: "dir" in German is a second person dative pronoun and "en" = "in" in French. Consequently, the band's name is probably best translated as "To you in grey," though the use of the dative "dir" makes the exact meaning of the name a bit ambiguous.
* Dire Peril is a Metal filk band who base all their songs on sci-fi movies, such as
* Dire Straits; a fast-paced, high-energy pop rock song from a band typically known for roots and blues rock. Even in the context of its parent album, it sticks out like a sore thumb.
* Dire Straits. "After all the violence and double talk, here's just a song in all the trouble and the strife." Of course, it comes right off the heels of the grandiose, flashy "Money for Nothing".
* Dire Straits also had several animated scenes in the "Brothers In Arms" video mixed with black & white footage of the band, while "Calling Elvis" was done in Super-Marionation.
* Dire Straits, a song in which frontman Mark Knopfler recalls his failed romantic relationship with fellow musician Holly Vincent, after he found out about an interview in which she described her time with him in a very blunt and offhanded way. Hence the line "now you just say, 'oh, Romeo, yeah, you know I used to have a scene with him.'"
* Dire Straits caused by the protagonist's vices (smoker's cough from smoking, brewer's droop from drinking beer) the doctor in the song notes, "I don't know how you came to get the Bette Davis ...knees".
* Dire Straits in the mid-1980's, most notable in the "Walk of Life" video.
* Dire Straits is about a mysterious carefree girl who roller skates around the city's streets in the middle of the night.
* Dire Straits' "Lady Writer" is definitely not an example, being a historian who "had all the brains and the beauty", but the singer compares her to his ex, who apparently resembles her in appearance but "never read a book" and "couldn't hardly write [her] name".
* Dire Straits make an alternate version available was one of the factors that led to the song being allowed back on Canadian radio after about nine months (though the original version is still the more common).
* Dire Straits' Money For Nothing switches between a (very primitive) CGI cartoon and a live performance of the band itself with added rotoscoped effects.
* Dire Straits' "Private Investigations" pretty much checks every noir trope into

three short verses.
* Dire Straits resulted in a surge in demand for the guitars, leading to high prices which continue to this day.
* Dire Straits song "Money for Nothing" has the shorter and fatter hardware store worker speaking this way. His mouth is a black strip that flashes white when he speaks.
* Dire Straits' "Sultans of Swing," a rock song about an English Dixieland/Zydeco band. The lyrics point out that kids "don't give a damn about any trumpet playing band" because "it ain't what they call rock and roll."
* Dire Straits: "Tunnel of Love". Sort of mutually understood at the time that it would be a momentary thing ("She said you are the perfect stranger/ she said baby let's keep it like this"—and in the end, he didn't pursue her: "And in the roar of dust and diesel I stood and watched her walk away/I could have caught up with her easy enough but something must have made me stay"). But as he reminisces on this, he wonders what could have been:
* Dire Straits, while Mark Knopfler tried to soften the blow by claiming that the song was sung in character and was meant to be a mocking portrait of someone who would be ignorant and prejudiced enough to use that kind of language.
* Dire Straits. "You get a shiver in the dark/it's raining in the park but meantime/south of the river you stop and you hold everything"
* Dire the werewolf have all been receiving some love from the furry fandom as well, especially the former three.
* Direwolves are on their way out, too, although they will likely last longer than the rest. As
* Dirge for Prester John, but each of the races of Pentexore have their own myths of how the world came to be. Later, John tries to rewrite Genesis to fit Pentexore in it, because he simply can't let it go.
* Dirge for Prester John: Invoked. The Abir exists to change up people's lives every couple centuries to make sure no one is bored or dissatisfied with living forever.
* Dirge for Prester John is figuring out why this happened after the fact.
* Dirge for Prester John, no one who drinks from the Fountain three times will age beyond their third visit.
* Dirge for Prester John. Not to mention taking lovers from a number of different species.
* Dirge for Prester John. They're the cream of Pentexore, but they have no idea how to form an actual army.
* Dirge for Prester John, though the people feel free to make that work or not, and take lovers whether they are happy or not with their spouse.
* Dirge for Prester John, time flows differently depending which side of the Rimal you're on. Which leads to John realizing that the world he knew is pretty much gone.
* Dirge of Cerberus and his son Rufus that Rufus was never informed about the group, so by the time they see the surface in Dirge of Cerberus 3 years have passed since the end of the original game and they have been preparing for their mission without knowledge that the Shin-Ra company that caused their formation is basically no more.
* Dirge of Cerberus, but probably also contributed to the craziness displayed by many of them.
* Dirge of Cerberus can perform Synaptic Net Dives, which basically give her this.
* Dirge of Cerberus, Cloud puts on a new pair of (very sexy) sunglasses in the big battle cutscene.
* Dirge of Cerberus cough up a few drops of something...purple...? Are only good guys and Sephiroth allowed to have red blood in these games?
* Dirge of Cerberus: Final Fantasy VII for her and Vincent tries to be her friend, she first reacts with coldness and surprise, and then with curiosity. She eventually learns what love is by the end.
* Dirge of Cerberus: Final Fantasy VII Vincent spends much of the game grappling with his literal inner demon, Chaos, because the protomateria, the thing used to

control Chaos, gets ripped out of him by Rosso. Several cutscenes depict him falling to his knees and clutching his chest in pain as he fights for control of his body. Twice he winds up being rescued as well, once when he accidentally turns into Chaos and collapses from the exertion and has to be rescued by Shalua, and another time when Rosso rips the protomateria out of his chest and he has to be rescued by Yuffie.
* Dirge of Cerberus has the last level as Chaos. Chaos himself is very useful. All of his abilities are upgraded, and he uses the only weapon stronger than the Ultima Weapon. The thing is, the enemies are designed specifically to handle that weapon. That means, while your new melee combo is fancy, about twice as many hits in half as much time, and ends with a neat little mini-explosion, you're never going to hit anything with it. Even if you get close enough to try, you'll be pumped full of lasers, and the combo will be interrupted.
* Dirge of Cerberus of a villain, whose black-and-yellow eyes show he's not one to be trifled with.
* Dirge of Cerberus, the Deepground soldiers and Tsviets were results of various bioweapon experiments.
* Dirge of Cerberus there is an entire underground ARMY of people who have either been a victim of this trope or who were born from it.
* Dirge of Cerberus, who wears nothing on his upper-body at all. Very nice indeed.
* Dirge, the world of Denhalm is on its last legs due to the Necrolords (Necromancers) unleashing one of these.
* Dirge, the zombies are called ghouls and are incredibly fast as well as strong. They're also tied to their necrolord so they die (again) if said is killed.
* D.I. Richard Poole faces one of these in the very first episode of
* Dirigent Mercenary Corps by the organization) and prides itself on its soldiers' professionalism.
* Dirigent Mercenary Corps series does have hand-held energy weapons, which are useful in specific applications because they're basically silent. However the primary weapons used are chemical firearms.
* Dirigent Mercenary Corps series, it's a minor plot point in the first book that officer cadets are not allowed to graduate and become officers until they've served a combat tour. Until then, they command no one and are just grunts like the enlisted men.
* Dirk admits to being both envious and proud of Roxy for being comfortable with herself and sobering up, even after a temporary slip up, he still respects her.
* Dirk and Jake are polar opposites in personality, and their differences ultimately lead to a messy breakup.
* Dirk and Jake. claimed she didn't actually have a thing for him, he admitted he was actually kinda relieved they could just be friends.
* Dirk Anger) mental disorders and other faults in complete seriousness.
* Dirk Benedict You have been warned). However, all the press from this is probably what gave the BSG execs the idea to execute this trope.
* Dirk characterizes Roxy as the heart of the alpha kid team, saying that her efforts to keep the group together despite the teen relationship drama that threatened to tear them apart made her the true
* Dirk Derby creator Steve Oedekerk. The pilot was released on Vimeo but nothing ever came out of it.
* Dirk, drops the Monk and his horse, partly to simplify the timeline of events (in the novel, the Monk spends most of the story off on his own doing things that only become significant in retrospect) and partly because incorporating a live horse was beyond the resources of the theatre that originally staged it.
* Dirk feels "haunted" by alternate versions of himself who seem to inevitably go bad — such as his
* Dirk Gently a detective beforehand, but only on paper; it's just a scam to swindle wealthy little old ladies with missing cats while he claims that periodic trips to the Bahamas and large bar tabs are necessary expenses for his work. One client makes the ludicrous claim that a giant monster with a scythe is stalking him, and hires Dirk to protect him, which Dirk puts his usual amount of effort into

doing, i.e. none. When said client actually winds up murdered, Dirk feels uncharacteristic guilt and resolves to actually solve the case even though said client is no longer able to pay him.
* Dirk Gently, a malfunctioning robotic monk, and time travel leading to an old college friend of Dirk's becoming a murder suspect.
* Dirk Gently books embody this trope really because they are all about the interconnectedness of everything. Chekov's Armoury isn't just a device Adams used, it's what he based the whole book on.
* Dirk Gently: Dirk treats his partner like a dogsbody, refuses to pay his receptionist because that way she'll stop showing up to "work" in order to get her pay, lies to the police with a remarkable degree of enthusiasm, swindles his clients, pickpockets corpses, and gives the wrong address to a pizza business so that it will be late and he won't have to pay... all in one episode.
* Dirk Gently doesn't so much "solve" cases as bumble around until they solve themselves. It's also implied that he's psychic somehow.
* Dirk Gently founders when he produces a complete copy of a future exam "under hypnosis" (by looking over previous exams and guessing what might come up) only for it to turn out to be exactly letter-for-letter correct. This continues happening to him in the second book where he is horribly accurate doing fortune telling in drag and correctly identifies one of the conspiritors because he want to arbitrarily blame the whole mess on somebody who isn't him.
* Dirk Gently gets into a fight with the delivery boy when he wouldn't give him the pizza for free in the first episode.
* Dirk Gently, however. Well, it's not like they could write "Died from violating a contract with a devil" on the paperwork, now could they?
* Dirk Gently is a subversion, as he doesn't believe in the occult or paranormal; to him, it's just an elaborate con. He is repeatedly frustrated to find his cons coming true, however.
* Dirk Gently is characterized by the phrase "everything that mankind had chosen to believe was true": Within the two books there are alien and human ghosts, exploding starships, time travelers, artificial people and horses, inadvertently psychic persons, the Norse gods, and Faustian demons. Well, the monk was artificial, but the horse was real.
* Dirk Gently series, Dirk's "holistic" philosophy isn't wrong in the context of the books — even the aside jokes are relevant later on.
* Dirk Gently's Holistic Detective Agency as a "detective-ghost-horror-who dunnit-time travel-romantic-musical-comedy-epic". Mind you, of these labels, only four are really accurate—detective, ghost, whodunnit and time travel—and two of those are synonyms.
* Dirk Gently's Holistic Detective Agency: At the start of Season 2, Suzie Boreton seems to be simply a beleaguered woman, with a son, boss, and husband that don't respect her, suffering from a leg injury after an accident and pulled into the show's weirdness unfairly. Then she gets the magic wand and it's revealed she was always a bit of a sociopathic and narcissistic jerkass, the accident was caused by her being high while carpooling and causing an accident that hurt the son of one of her friends (a thing for which she never apologized and is upset her friends don't care more about her), even turning her own son into a frog when he gets in her way and killing the family dog because he annoyed her.
* Dirk Gently's Holistic Detective Agency borrows other plot elements from.)
* Dirk Gently's Holistic Detective Agency creators but looks human by coincidence.
* Dirk Gently's Holistic Detective Agency definitely qualifies. Everything is moving phosphorus green or highlighter pink shapes on a black background.
* Dirk Gently's Holistic Detective Agency, designed to convince his fellow students he has psychic powers, include denying he's "psychosassic". And then denying the word "psychosassic" means anything anyway.
* Dirk Gently's Holistic Detective Agency: Dirk does this as part of the workings of his Holistic Detective Agency when he has a mystery that actually interests him rather than one that involves tricking old ladies into letting their cats loose. The local inspector Sergeant Gilks takes a rather dim view of this... along with

Dirk's tendencies to be involved in highly peculiar situations that Gilks does not like very much in the first place, as well as his habits of removing or obscuring evidence...
* Dirk Gently's Holistic Detective Agency, Dirk hypnotizes Richard, and implants the suggestion that whenever he hears the phrase "my maiden aunt from Winnipeg" he should immediately take off all his clothes and jump in the nearest canal. It's a roundabout way of making a point about ghostly possession and free will.
* Dirk Gently's Holistic Detective Agency feature a lot of bizarre and seemingly unrelated events that all turn out to be connected in the end.
* Dirk Gently's Holistic Detective Agency fires a barrage of frantic questions at the pair, having no better idea of what's going on then they do.
* Dirk Gently's Holistic Detective Agency has a plan for her and is protecting her from any possible harm, and also, to some extent, her kidnapping victim-turned-ally Ken. She however, can be harmed when she isn't acting according to the universe's plans, as this protection is lifted.
* Dirk Gently's Holistic Detective Agency. He understood it at the time, but since forgot the intended meaning of certain key parts of the book. See reason #10 above.
* Dirk Gently's Holistic Detective Agency he was, to set up a fake psychic scam and rip off his college classmates.
* Dirk Gently's Holistic Detective Agency. Implying that the books happened in the show's backstory.
* Dirk Gently's Holistic Detective Agency in the first few chapters are all linked by the end.
* Dirk Gently's Holistic Detective Agency: In the second season, Panto has a much harder time blending in to our world than the Mage does.
* Dirk Gently's Holistic Detective Agency is actually running a hustle to bank on people's credulity, not quite a 'concerned citizen'. Yet he manages to get into, and solve, mysteries the only solution to which are supernatural agents.
* Dirk Gently's Holistic Detective Agency, it's not the dinosaurs whose extinction is blamed on phlebotinum, but that of the dodo. A time-traveler indirectly caused it to be wiped out because he'd meddled with prehistory to save the coelacanth.
* Dirk Gently's Holistic Detective Agency. It then goes on to note that the sentence would probably start something like "WayForward Technologies, unlike such major U.S. companies as Microsoft or Lotus..."
* Dirk Gently's Holistic Detective Agency—Professor Chronotis' time machine seems to be in a strange relationship with the telephone system. After he has his phone repaired, the time machine is inoperable too.
* Dirk Gently's Holistic Detective Agency mentions that when he was in college, Dirk developed a reputation for saying interesting things in his sleep after a large meal; it's heavily implied that it was a scam he'd set up so that his roommates would buy him large meals a lot.
* Dirk Gently's Holistic Detective Agency; Michael Wenton-Weakes calls his mother an old battleaxe, but the narrator says that if she was a battleaxe, she'd be a very elegant one, with a blade so sharp that you only realise it's hit you when you try to check your watch and notice you don't have an arm any more.
* Dirk Gently's Holistic Detective Agency: Near the end of the book, Richard MacDuff is awed by the alien music he hears playing aboard a spacecraft, thinking it's the most beautiful thing he's ever heard. When he returns home, he hears the same music playing. Professor Chronotis had gone back in time and given the alien music to Bach. And now you know where the piece of music "Ach bleib bei uns, Herr Jesu Christ," comes from.
* Dirk Gently's Holistic Detective Agency of the mid-2000s Seattle alt scene!"
* Dirk Gently's Holistic Detective Agency placed in that particular spot will become the control system, this is actually one of the less bizarre options.
* Dirk Gently's Holistic Detective Agency, Richard is breaking into his girlfriend's apartment when he receives a mysterious phone call describing "the rules of breaking into an apartment". Rule number one is "never answer the phone". It continues in much the same vein, including the caller saying Richard would see him if he looked out the window and then, as Richard sees a distant flashbulb go

off, explaining Rule four is "Never stand where you can be photographed", and:
* Dirk Gently's Holistic Detective Agency, Richard's in a relationship with Susan Harrison, Gordon Way's ex-fiance.
* Dirk Gently's Holistic Detective Agency's mother, who upon becoming his boss has him downsized, then tells him to his face the only special treatment he'll get is her telling him his tie has a stain on it.
* Dirk Gently's Holistic Detective Agency, the FBI, Missing Persons and the CIA are all mixed in investigating the mess of events that is the show's plot and none of them are particularly happy with each other.
* Dirk Gently's Holistic Detective Agency. This is unsurprising, as both shows were filmed in Vancouver.
* Dirk Gently's Holistic Detective Agency to a moment when Dirk's secretary rips a handful of pages out of a dictionary in order to make it fit in a desk drawer:
* Dirk Gently's Holistic Detective Agency to anybody actually willing to stick around.
* Dirk Gently's Holistic Detective Agency was a quite powerful one. Although he managed to materialize a toy for himself he was prone to accidentally warp reality around himself, especially when in distress. In a minor case he manifested a monster from his nightmares, but was later able to trap it in a pocket dimension. In a major case he accidentally created a whole new universe that started to interfere with the normal one and caused some havoc, while he was temporary out of the picture. When he returned, he managed to clean up the mess and properly preside over his own creation, keeping it out of trouble.
* Dirk Gently's Holistic Detective Agency was possessed by an alien ghost, who left messages in his poetry.
* Dirk Gently's Holistic Detective Agency went back in time in order to save the Coelacanth from extinction, at the price of having the dodo die out.
* Dirk Gently's Holistic Detective Agency, when Dirk demonstrates his facility with stage magic by (apparently) drawing a string of colored handkerchiefs from the posterior of a small dog, and from Richard's, a slim bunch of anemones. Which he presents to the dog's owner, a little old lady who just watched Richard take off all his clothes and jump into a canal. It makes sense... sort of... in context.
* Dirk Gently's Holistic Detective Agency, which shared the same scenario.
* Dirk Gently's Holistic Detective Agency who is explicitly capable of remembering about as much as a normal human. He doesn't forget things in chronological order, though; he just gets very absent-minded.
* Dirk Gently smash the floor apart to free himself, but is left with bits of floorboard stuck to his back.
* Dirk Gently when an eagle in his house is abruptly transformed back into a fighter jet.
* Dirk Gently who happens to be twelve. And gets paid with cigarettes.
* Dirk gets onto that early, having computerised glasses before even getting into the game. He also added an AI into them, copied from his personality, although after a couple years the Auto-Responder evolved into a divergent entity.
* Dirk has an AI of himself that only fails the Turing Test because it wants to, builds robots, and is able to understand the Sburb code. He's also an alternate universe version of
* Dirk himself becomes a Worf later on when he gets badly beaten by the ascended Caliborn, and has to be bailed out by Jake's Hope bomb.
* Dirk is gay from the outset and interested in Jake, who already has enough on his plate figuring out how to handle Dirk and Jane.
* Dirk is talking about making an AI based on his personality. Jake's (GT's) response is
* Dirkjan comic, Bert writes a novel. One reviewer describes it as "pure nonsense, which should never have been published". Later prints of the novel cite the review as "pure".
* Dirkjan features a series of World War I themed comics. The protagonists Dirkjan and Bert are flying in their plane when they suddenly encounter a red plane. They fear it is the Red Baron, but it appears to be Santa Claus in his sledge. Then

Santa suddenly pulls out a minigun and downs their plane...
* Dirk Pitt Adventures, being a representation of Hiram Yeager's wife. His wife's aware of it.
* Dirk Pitt Adventures biplane strafes a U.S. Air Force base and destroys a number of F-105 Starfire jet fighters and C-133 Cargomasters while they're helpless on the ground.
* Dirk Pitt Adventures, Dirk and the UN team have one at Fort Foreau against attacking Malian forces.
* Dirk Pitt Adventures: Dirk Pitt ended up with twins after it emerged that his girlfriend hadn't actually died. He becomes a good father really quickly.
* Dirk Pitt Adventures has a meeting of businessmen, scientists and politicians she wants to recruit, describing her plans to monopolize the world's water supply.Congressman Jeremy Kinkaid angrily protests this as immoral and vows to fight it in court, while a scientist named Dearborn also questions the ethics of it. They are told that their opinions are respected but after the meeting her wet work specialists (who were watching) are asked who they think they should kill, and name Kinkaid (who is later confirmed to have died in an "accident") and Dearborn.
* Dirk Pitt Adventures He talks of wanting a steak that's basically an echidna seaweed and she agrees it's a delicious dish in New Guinea. Later in the book, Pitt explains it to an ally who doesn't grasp it at first.
* Dirk Pitt Adventures in that the characters work for the National Underwater Marine Agency and are the nations foremost civilian underwater experts.
* Dirk Pitt Adventures involves a race to stop the release of a bio-weapon that is projected to be able to kill up to 98% of all human life.
* Dirk Pitt Adventures novels intended to sterilize the human race this way, or at least half of it, as more "humane" than wiping them out. Pitt calls him a "freak" for this.
* Dirk Pitt Adventures, the bad guys salvage a nuclear bomb from a lost Soviet bomber.
* Dirk Pitt Adventures, when Giordino points out that Pitt, as an Air Force major, can fly pretty much any airplane or chopper known to man. He also seems to have no problem with boats, and has a large collection of classic cars and planes in his house.
* Dirk Pitt novel ever made has one of these in it. In one, it's an old Ford Trimotor. In another, an old steam paddle boat saving the president. In another, its an old French legion fort. The list just goes on.
* Dirk Pitt novels; Trojan Odyssey shows every sign of being the last book. Pitt, Gunn, and Giordino are promoted to desk jobs while Sandecker becomes VP. Long-running subplots are finally resolved with Dirk marrying Loren and finally recognizes the strange man named Clive Cussler he meets at the wedding as the stranger that helps him every adventure, and he is introduced to his adult children he never knew about. This was six books ago.
* Dirk Pitt's backstory as a Navy SEAL-turned-archaeologist is given this way early in
* Dirk Pitt's many vintage automobiles. He wasn't in it, and he had it restored at the end of the book.
* Dirk Pitt). The author actually owns many of the vehicles that Dirk is shown driving, which are on public display in a museum in Colorado.
* Dirk plans to make a completely wrong prediction of the contents of a university exam as part of a scam. He intentionally cultivates a reputation as a psychic by
* Dirk pulled this off on himself as part of a brilliant example of the very rare Thanatos
* Dirk's Auto-Responder pulls a minor one, although it references the trope by name. "The algorithms are guaranteed to be 96% indistinguishable from DS's native neurological responses, based on some statistical analysis I basically just pulled out of my ass right now."
* Dirks' car is not much better; it's a beat-up Jaguar described as needing to go for maintenance more frequently than for petrol. He also
* Dirk Steadfast made a snide remark about his "cowardly" defensive fighting style

and he promptly choked on the sausage he was eating and died.
* Dirk, strips out an entire subplot involving the Electric Monk and his horse, partly to simplify the plot and partly to avoid having to represent a horse on stage. Also, the novel's complicated denouement is replaced by Dirk punching out the villain at the key moment, which has the advantage of looking interesting and not requiring expository dialogue to understand.
* Dirk Wears White Sox has a song called "Never Trust A Man With Egg On His Face", in which a woman shoots her husband in front of her children because of an extraterrestrial conspiracy:
* Dirlewanger's men robbed, beat or shot even other German troopers. Keeping them under control involved public hanging and shooting of the offenders, sometimes by Dirlewanger's own hand.
* Dirtamancer seems to be rather liberal in what a given caster can do within their domain.
* dirt-beast is supposedly a narrative translated from a Forerunner language, with the actual word described as a way to put inferiors in their place (Glory being low in the Forerunner caste system).
* Dirt Forcefield: The conspicuous lack of grime, dirt, or bruises on actors, especially those in action sequences.
* DiRT games are dedicated to legendary driver Colin McRae, who was killed before the first game's release.
* DiRT goes even further by including all of the rallies from the first game alongside brand new rallycross tracks and more vehicles, some of whom did not appear in the original game.
* "Dirt Road Anthem" is somewhat unusual in that both of its writers (
* "Dirt Room" involves a woman coming home, realizing her house is being robbed, knocking the burglar unconscious and restraining him before pushing him into a freshly dug hole, and finally calling the police and presumably having him arrested.
* DiRT Showdown, which usually last three minutes, the last 30 seconds are worth double points. If you do well enough in these final seconds and get plenty of KOs, you can snatch a last-minute win unless you're significantly behind.
* Dirty Bertie: Bertie farts a lot, which is the main plot of "Pooh, Is That You, Bertie?". Whiffer the dog also got his name because he farts a lot.
* Dirty Bertie by saying that he's got "mustarditis" and his thumb might need to be cut off.
* Dirty Bertie: In the story "Elf!", Bertie's dad has to be a mall Santa while Bertie has to be a helper elf. He finds the job boring and wants to be a goblin instead.
* Dirty Bertie story "Boast", Bertie spits out mash after hearing he will be in a concert after his mother lies that he can play the trumpet.
* Dirty Bertie story "Burp!", Bertie is eating lunch with his friends and only he likes his lunch.
* Dirty Bertie story "Fame!", Bertie is glad to be in an ad on TV, but becomes embarrassed when he learns it's for bubble bath and he has to pose in the bathtub.
* Dirty Bertie story "Pants!", Bertie loses a bet with his classmate Nick and has to go to school in his underpants and has a dream where Miss Boot calls him to the front of the class and he's in his undies. When he wakes up, he is relieved that it is a dream but nervous about having to go to school in underwear.
* Dirty Bertie story "Potty!", Bertie and his class go on a school trip to a historical house, the roof of which is described as being "whitewashed with pigeon poo".
* Dirty Bertie story "Wedding", Bertie eats letters off the wedding cake, so instead of "CONGRATS ON YOUR WONDERFUL DAY", it reads "RATS ON YOUR WO FUL DAY".
* Dirty Blood goes like this: An old alcoholic meets a vampire who bites him... and gets badly poisoned, because his victim's been drinking all his life.
* Dirty Bomb: All of the playable characters are mercenaries being hired either by the criminal syndicate Jackal, or the Central Disaster Authority. None of them have any allegiance, except to the side that offers them most.

* Dirty Bomb: An IED that is designed to scatter radioactive materials around the blast radius.
* Dirty Bomb, being in the proximity of an explosion will cause your screen to grime up and as your health gets lower, the edges of your screen gets bloodier.
* Dirty Bomb by providing infinite ammo for themselves and others! Bushwhacker and Sawbonez also qualify; though their submachine guns are less accurate at range and deal less damage, and they're slightly weaker and faster than Hammer and Stoker, they're still a good choice for frontline operations.
* Dirty Bomb example according to Sparks, who thinks that Thunder just created a whole new identity from nothing following the dirty bomb attacks on London and is just pretending to be Russian.
* Dirty Bomb generally focuses more on combat than the other medics on account of having assault rifles in her arsenal. Even then, the other medics are still pretty dangerous in combat by being pretty much limited by distance as their SMGs out DPS the other rifles at short ranges.
* Dirty Bomb is a sniper character who often has to conceal himself with a smoke grenade when things get hot. He is capable of seeing through the smoke, so it's only the opponents (and any unlucky team-mates) who are affected.
* Dirty Bomb: Loadout cards are rated in color from basic Standard cards to Lead, which introduces augments, Iron, which has two augments over Lead's one, and finally Bronze, which fills out the augment slots. There are higher tiers, but the sole advantage they have is different coloration or special patterns in the case of event loadouts, and the ones available are the same across every rank (An iron loadout with the same first two augments as a gold one will have the exact same weapons) except Standard.
* Dirty Business: A man can regret having done something morally questionable to solve a problem... but only if it's brief and never mentioned again after the fact.
* Dirty Business Ladd who literally dances in blood and considers "I'm gonna kill you last" as an endearing term to use with his girlfriend. She is completely accepting of this.
* Dirty Business: You do something heinous but you feel remorse for it.
* Dirty Communists and China. Not to mention that there are very dangerous communist terrorist groups that continue to exist well into the 21st century, like the Shining Path in Peru, the New People's Army in the Philippines, and the Naxalites in India.
* Dirty Communists and communists are viewed much less sympathetically than they were pre-2020.
* Dirty CommunistsHippies' political views tended to lean decidedly to the Left.
* Dirty Communists: Many people in the West feared Communism, especially when Cuba too became a Communist state.
* Dirty Communists: Militant socialists who want to violently overthrow all forms of capitalism and privately-owned businesses.
* Dirty Communists mocking terri-bad red scare plots, not a straight example of such.
* Dirty Communists: Right-wing cartoons will likely portray Democrats as anti-American radical socialists.
* Dirty Communists. The American labor movement was itself a moral substitute for Communism, thanks to the influence of the staunchly anti-Communist AFL-CIO under Samuel Gompers eventually squeezing out the more radical Industrial Workers of the World. The early successes of the labor movement meant that workers could gain representation and fair treatment without overthrowing the capitalist system, which partly explains why Communism never became a significant movement in America.
* Dirty Communists. This particular example seems more of a homage to Cold War era pulp fiction, fitting the overall theme of the series pretty well.
* Dirty Communists used as villains. They're not really fond of capitalism or democracy.
* Dirty Cop: A corrupt police officer who aids or commits crimes instead of stopping them.
* Dirty Cop: A corrupt police officer who behaves like a criminal and partakes in

illegal activities.
* Dirty Cop: A corrupt police officer who's involved in criminal activity instead of fighting it.
* Dirty Cop after the latter asks the wrong questions about the Szymanski murder.
* Dirty Cop and pedophile, respectively — who did nothing wrong as far as the public knows. Even when told why they were killed, Daisy still takes issue with just outright murdering them.
* Dirty Cop: A policeman is supposed to enforce and uphold the law, but instead they break it like any other criminal.
* Dirty Cop: A police officer who is not above engaging in criminal activity themselves.
* Dirty Cop connected with Murder, Inc. of killing Crater based on letters from Cook's wife, but investigations both then and later never corroborated her story. Crater's disappearance became a stock punchline in comedy routines and inspired several novels and short stories, though he's since been overshadowed by Jimmy Hoffa.
* Dirty Cop sees a Missing poster of the real Stills in a police station). He has also used the ID of Jennings, a wife-beating U.S. Marshal he deposited in a Mexican prison.
* Dirty Cops who are into a huge variety of violent felonies. Deputy Chief Irvin Irving's son George works with them to penetrate the gang, but is murdered by them when they find out he's a mole.
* Dirty Cops who try to blackmail him into giving them part of the money he steals..
* Dirty Cop: Usually they often cross the line especially if they are deliberately aiding and abetting criminals as well as killing good cops that try to stop them, or are violent, hateful sadists who treat being a cop as carte blanche to maim and kill people and ruin their lives.
* Dirty Cop was the one who shot his friend John Jones, Clark goes undercover as an officer, complete with forged papers claiming he is "Joe Fordman". His assigned partner Dan Turpin eventually figures out he's a fake and tries to arrest him, but Clark and Green Arrow manage to convince him that they are the good guys and they arrest the corrupt cops.
* Dirty Cop when he was in the Eastern District, and apparently the evidence consists of living beyond his means. The FBI investigated his assets far enough to see that he had more than expected, but Baltimore P.D. did not ask them to go further. Beyond the implication that Daniels does fear the accusations, the truth is never clarified.
* Dirty Coward: A character who runs at the first sight of trouble, usually at the expense of other characters.
* Dirty Coward - An unsympathetic cowardly character who throws other people under the bus to save his hide.
* Dirty Coward: Character who selfishly flees at the first sight of danger, often leaving the others doomed.
* Dirty Coward: Doing what they can to escape danger, especially if it means leaving others behind.
* Dirty Coward: I'm too afraid to save anyone else! I just want to save only myself because that's safer!
* Dirty Coward: In some cases, characters who put their lives before others to the point that they don't care if others die or suffer are line-crossers.
* Dirty Coward? Preposterous! Now, why are you still here? Join now! Service guarantees citizenship! It's also played with in that the humans are the agressors attacking Bug planets while the Bugs don't seem to have any way to travel between worlds beyond launching spores to seed new colonies; the Federation could literally just stop at any time.
* Dirty Coward ready to sell his boss and his gang the minute things look bad.
* Dirty Coward: Shameless, selfish, and all too willing to put others in danger to save their own skin.
* Dirty Coward: Someone is nervy and evil vs. someone is nervy and good.

* Dirty Coward: Someone who's out to save their own skin at other people's expense.
* Dirty Coward: Sorry, but my safety is more important than yours. See ya!
* Dirty Coward than other versions. He tries to bribe Wabuu into not killing him. He also never learns to love like other versions of the Beast do.
* Dirty Coward. This characterization is aided by the fact that Romans believed their forefather being exiled Trojans, making Ulysses an ancient nemesis.
* Dirty Coward, when bullets start flying he proves to be a capable fighter and does not hesitate to back up Lou.
* Dirty Coward: When I see danger, I run away and I don't care if you jackasses are going to suffer or die! My safety is more important than yours!
* Dirty Coward: When there's danger, I'm willing to abandon others to save myself.
* Dirty Dancing, Baby says this when her efforts to get Johnny cleared of theft charges get him fired anyway for having a relationship with a guest.
* Dirty Dancing). Cut to stock footage of a booing audience, to which Spoony responds "What? It's in the movie!"
* Dirty Dancing et al, accidentally destroyed her career by getting her nose done. Afterwards, even friends didn't recognize her.
* Dirty Dancing, includes a now legendary leap off the stage into the audience by Swayze, who at that point had reinjured his knees and was in considerable pain, but did it anyway so there'd be a visually impressive hook to the scene.
* Dirty Dancing is set at a Borscht Belt resort, though Borscht Belt comedy does not play a major role in the movie.
* Dirty Dancing: Johnny and Baby discover Penny in a Troubled Fetal Position after an encounter with Bobby.
* Dirty Dancing, Johnny face faults after Baby teases him while they're dancing to "Love is Strange"
* Dirty Dancing produced a similar effect in the West when it was first released. Masses of teen-age girls in Germany rushed into dance schools hoping to learn to dance like Baby Houseman or (especially) have a second Johnny Castle as their instructor. Guys mostly took dancing lessons because there were loads of girls, and a few hoped to one day be able to get chicks because they can dance like Johnny Castle.
* Dirty Dancing the characters dance to the movie's big hit single, "(I've Had) The Time of My Life", which sounds very contemporary to 1988 for a movie set in 1963, with obvious synthesizers in its arrangement.
* Dirty Dancing, when Dr. Houseman asks who's responsible for the pregnant girl (meaning "who knocked her up?"), and Johnny Castle says "I am" (meaning "I'm taking responsibility for helping her out").
* Dirty Dancing would become one of the highest-grossing films of the year.
* Dirty Dancing written by Jackson Browne, but they're played together so often that people don't even realized they're technically two separate songs.
* Dirty Dawg in one episode. He enters Ratso in a talent show, who proceeds to bomb on-stage. When the audience starts pelting him with food, Dirty collects them off-stage to eat later.
* Dirty diapers. Applying a dirty diaper upon an enemy would instantly rout him, thus making even nasty spellcasters easy pickings.
* Dirty Foreigner: Seen as xenophobic now, and is most often used today in subversion, as a quick and easy way to tell that a character has a prejudice against another group, and that character is usually painted in a negative light.
* Dirty Fred books starts with the Jimmy, the main character, looking for his knife, and finding it in the back of the guy he was asking. The guy insists on keeping it there or replacing it with a bigger one to prevent any bleeding until he gets medical attention. He got better.
* Dirty Games by M. Bulyukh. While "Dirt" started out as just a next-generation VR MMORPG, it has apparently become something more. As Hell and Heaven suddenly find out, when players die while connected to "Dirt", their immortal souls can not leave the game, essentially creating a new dimension. While both Powers-that-Be are inherently interested in claiming those souls, the AI running the game has decided that it would be much better off by going insurgent and taking its own shot at

divinity.
* Dirty Girls" and The First Evil would take his form to torment Buffy. It was decided that with the finale approaching, there wasn't enough time to mourn him properly, so he lost an eye instead.
* Dirty Girls", his rampage ends up killing two Potential Slayers — Molly and an unnamed Potential. He also knocks out Buffy with one punch, overpowers Faith and Spike easily, breaks Rona's arm, and most infamously, gouges out Xander's eye with only his thumb, maiming one of the Scooby Gang's core members. It would take the combined efforts of both Buffy AND Angel to defeat him in later episodes.
* Dirty Girls", Xander wakes up from a dream involving scantily-clad teenagers having a pillow fight, to the reality of frumpy girls in pajamas complaining about a blocked toilet. He asks them to give him a moment before getting out of bed, as he 'has a cramp'.
* Dirty Grandpa has a scene where Jason, after a drug-crazed stupor, waking up naked on a beach with only a stuffed bee doll covering his penis. A little boy runs up to him asking for the bee, and his father sees the two from afar (with a garbage can obscuring Jason's groin area), leading to this reaction.
* Dirty Grandpa, the local drug dealer and surf shop owner Pam has a very buddy-buddy relationship with the police implying that he's had a great number of encounters with them. They imprison him for selling coke but let him go because he needs to open up his store even allowing him to take the drugs they confiscated with him.
* Dirty Harry and his reporter girlfriend Samantha defy this trope in
* Dirty Harry and very sadistic as well, his worst act being kidnapping and burying a teenage girl alive.
* Dirty Harry. At the end of the movie, after finally stopping the Scorpio killer and finding that the only way it was possible was in direct opposition of the system he worked for, Harry throws his badge into a body of water in disgust. The filming of several sequels make this moment not as poignant as it should be.
* "Dirty" Harry Callahan fought obvious stand-ins for the Zodiac Killer (in
* Dirty Harry games for PSP, DS, and Xbox, along with a different PS2 game with a Wii port, and a PC port of the PS3/Xbox 360 game, none of which were released.
* Dirty Harry had Harry sniping at the Scorpio killer with a Winchester Model 70 chambered in .458 Winchester Magnum.
* Dirty Harry Harry has dealt with them) and in later films, they want him to outright retire.
* Dirty Harry has Harry investigating a series of murders by a woman out for revenge against her rapists.
* Dirty Harry has the hero doing this. Inspector Callahan looks through a large hole in the wall of a basement and sees a rape in progress. He reaches through, grabs the punk by his long hair and says, "Do you remember what it was like to be born?" then forcibly pulls him back through the hole.
* Dirty Harry. In the Citadel DLC Shepard and Javik get roped into cameoing in the next one.
* Dirty Harry. In the first movie, the D.A takes this role, complete with indignant "what about the rights of that little girl?" demand from Harry. In point of fact, Harry's is probably the trend-setter here.
* Dirty Harry — Police films starring Clint Eastwood. 5 films since 1971.
* Dirty Harry mentions that Harry received his unusual .44 Automag pistol as a gift from a custom gunsmith after he had saved the man's wife... probably by killing those endangering her, knowing Harry. It's suggested that he is often offered free stuff because the text states that the pistol is the only such gift he ever accepted.
* Dirty Harry of Callahan, assault with a deadly weapon, possession of an illegal automatic weapon, and kidnapping him, which is enough for a life sentence by itself.
* Dirty Harry reading an Oprah book of the month club book on Lifetime and still make it manly.
* Dirty Harry: Scorpio kidnaps a 14-year-old girl, sending the police her bra, a

lock of hair, and a bloody tooth "pulled out with a pair of pliers".
* Dirty Harry series has Harry running into someone committing a robbery and stopping them.
* Dirty Harry spent time firing a real .44 Magnum revolver so he could accurately portray its recoil. In the sequel Callahan states that he uses a .44 Special load to minimize the recoil (which would mean he's no longer firing "the most powerful handgun in the world" though still powerful enough to "to blow your head clean off").
* Dirty Harry subverts this with a robber at the beginning of the film. He faked a surrender after being wounded by Harry's .44 Magnum, but instead of fighting back, he is curious as to whether Harry does have one bullet left. Much to his shock, though, the Magnum is empty.
* Dirty Harry, the famous .44 Magnum that Harry Callahan used in the movie, to skyrocket. The ensuing popularity drove prices into orbit, where they would stay — it became nigh impossible for real gun enthusiasts to get their hands on one. It's also a very heavy gun and probably not the best choice for a casual enthusiast anyway.
* Dirty Harry, the "rookies" carry revolvers which stand out (.357 Magnum loads), and Dirty Harry explains some technical details of his gun such as the specific load he uses (probably an effort of the writers to justify his use of a powerful handgun like a water pistol).
* Dirty Harry used a school bus full of children as the setting for the film's climax, in which Scorpio held them all hostage as our hero chose to disobey orders to pay him his ransom and simply leaps on the school bus himself.
* Dirty Harry was heavily inspired by the Zodiac Killer; its murderer is named Scorpio (and is never explicitly identified), and shares the real-life Zodiac's penchant for mailing newspapers and even copies some of his threats (eg., hijacking a school bus). Of course, the movie has a happier ending than real life.
* Dirty Harry were constantly at odds, and...that's about it. Your average person could not name any of the films aside from the first one, the supporting cast, or even Harry's last name! (Callahan, for the record.)
* Dirty Harry when Harry and Jennifer Spencer meet for the first time.
* Dirty Harry. When Ray Parkins is finally confronted by Jennifer pointing a gun at her:
* Dirty Jobs, and every episode showcases this. He's even a classically-trained opera singer!
* Dirty Jobs has Mike at the Jelly Belly Jelly Bean factory and one of the staff admits to having vomited while they were making the vomit-flavored jelly beans (most likely from the smell).
* Dirty Jobs has seen some of these. The bathroom in New Orleans shown after Hurricane Katrina deserves special recognition.
* Dirty Jobs is a professional Watson, learning the ropes of his latest dirty job from his bemused temporary co-workers.
* Dirty Jobs Mike or his host will occasionally screw up on camera, then Mike will use this line.
* Dirty Jobs Mike Rowe, in the course of doing the job, usually gets filthy by the end of it. Sometimes the filth is wet. Are the fangirls pleased by this? Yes they are.
* Dirty Jobs: Mike Rowe travels around the country (and occasionally planet) finding jobs many would find too repulsive, physically strenuous, or both to work.
* Dirty Jobs Mike was once freaked out when cameraman Troy wanted him to shave his neck with a straight razor, even citing it as being "too Sweeney Todd" and even the professional barber caused Troy to bleed a little.
* Dirty Jobs relies on viewers to submit suggestions for jobs to cover. Every episode ends with a clip of Mike Rowe (usually covered in muck) asking for viewers to send in suggestions.
* Dirty Jobs. There was an episode where a cameraman literally stood under a shower of condensed raw sewage and didn't even flinch.
* Dirty Joe is a magnet for animals who like him for the way he smells. However,

he seems rather indifferent towards them and fless when a herd of animals are chasing after him.
* Dirty Laundry: An Alternate 1980s has a focus on music, starting with Don Henley's first album being a flop because that song doesn't get recorded. This goes on to affect not just music but TV and film, including the invention of an entirely new mashup musical genre.
* Dirty Laundry and his wife Aline Kominsky-Crumb each draw themselves in the comic. At one point when debating what Aline sees as her lack of drawing skill, R. Crumb draws her to show how beautiful she looks to him.
* Dirty Laundry has Frank "The Punisher" Castle encounter some thugs roughing up some prostitutes and a bystander. Frank dispatches most of these thugs with a bottle of bourbon, leaving only the leader, one Goldtooth by name, crippled but alive. Frank douses this ne'er-do-well with the bourbon, and leaves a cigarette lighter at his feet. One of the beaten prostitutes comes along, picks up the lighter, and ignites the bourbon, immolating Goldtooth.
* Dirty Little Secrets ability in a way that led to Mineta disappearing...
* Dirty Little Secrets look after casually commenting on how Bakugou thinks he can get by on his power and good looks.
* Dirty Love and directed by her then-husband John Mallory Asher. They divorced shortly before it went down in flames.
* Dirty Martini, luring police to locations rigged with poisonous traps, and sometimes just shooting people with a jet injector. He ultimately murders at least 55 people in, at most, two weeks.
* Dirty Mary, Crazy Larry, the trio of Mary, Larry, and Deke have committed robbery and have spent the movie evading the police with many narrow escapes. It looks as if they've gotten away. Final lines of the movie:
* Dirty Mind-Reading: Someone reads another person's mind, who's thinking dirty thoughts.
* Dirty Old Man after she abandons Haruka. He pays for all Haruka's living expenses, is absolutely supportive of her friends in the ESP Research Society, and welcomes them into his home when they go looking for her in Episode 4 and during Summer Break.
* Dirty Old Man and Misa is a young woman about half his age. After Higuchi proposes he looked about ready to rape her.
* Dirty Old Man Happōsai is very susceptible to this trope, something that Ranma takes advantage of quite liberally when fighting him. The first Pantyhose Tarō arc involves lots of actual pantyhose and Ranma uses this trope multiple times to trick Happōsai.
* Dirty Old Man is about a happy-go-lucky squire who makes obscene phone calls to women he randomly picks from a phone book (actually, he has his servant Gwendolyn do the dialing). He turns the last names of the women he calls (Melanie Tate, Peggy Percy) into a bleeped-out play on words. When he gets to Peggy and starts his vulgar spiel, Peggy is more than ready for him:
* Dirty Old Man is easily distracted by any female that catches his eye, and will cop a feel at every given opportunity.
* Dirty Old Man Master Roshi tries twice to use Bulma's inventions for this. First, he uses a watch that can shrink the person who is wearing it as a way to spy on Bulma while she is on the toilet but fails. Then, he uses Bulma's little fly robot to spy some girls on the beach.
* Dirty Old Man that he can easily be distracted with an exposed cleavage or some woman's underwear, something that Ranma has exploited on more than one occasion.
* Dirty Old Man that he is, the very first thing was to use it exactly how Sanji would've (and Absalom did) used invisibility.
* Dirty Old Man, which makes his good actions come across as more sincere than in canon.
* Dirty Old Monk, Father Maxi was a corrupt villain when the kids found him having sex with a woman in his confession box during "Do the Handicapped Go to Hell?". A decade or so later, he was a hero for attacking all the other priests, who were all pedophiles, during "Red Hot Catholic Love".

* Dirty Old Monk: This clergy member ignores the meaning of "vow of chastity".
* Dirty Old Woman: The usual fate of "whores" is to become old and pathetic.
* dirty On the other hand, their reproduction system involves a centralized mother making each generation from the genetic material of all the previous one, making "one diabolical incestuous slurry" the standard, so they don't understand our taboo of incest.
* Dirty Pair, a former rival to Kei and Yuri; she has taken a steroid like drug called Hustle that makes her extremely muscular, violent, and impervious to pain, so they hit her with a rocket that destroys her base and Hustle supply, she emerges from the rubble alive and charges them, they move out of the way, and she crashes through a window, causing her to fall to her death down a cliff below.
* Dirty Pair after defeating the giant guard in the villain's mansion, Yuri rips off the bottom of her dress to make it easier for her to run from danger.
* Dirty Pair an admirer of Yuri's built a robot duplicate of her, programing it to act how he imagined Yrui acts. When the boy gets the chance to spend time with the real Yuri, he finds that she isn't like he imagined at all.
* Dirty Pair and wind up causing massive destruction in their attempts to stop it. It's better than what usually happens, when they can't go back because the place no longer exists.
* Dirty Pair. Anything they get involved with has a 50% chance of causing mass collateral damage, and it's probably not healthy to dwell on the numbers of deaths that can (indirectly or directly) be laid at Kei and Yuri's feet. In any sane story, they'd be the villains.
* Dirty Pair, a picture of author/illustrator Adam Warren appears on the label of "Adam's Cranberry Lambic" beer.
* Dirty Pair a scientist uses a dormant piece of an alien in his experiments. Everything other piece of technology or strange creature you see is man-made.
* Dirty Pair, but nothing ever came of it besides a single promotional image.
* Dirty Pair counterparts. Sometimes adding the Adam Warren versions for variety.
* Dirty Pair during a sepia-toned clip of her chasing some mustachioed men in fedoras, briefly removing her fedora and fake moustache to mug for the camera.
* Dirty Pair Flash: After one of their little "accidents" involving a space station, Kei and Yuri are ordered to send a hand-written letter of apology to each one of the 300,000 survivors.
* Dirty Pair Flash, they also have an orbital ring to which the elevators connect at the top.
* Dirty Pair Flash to blow up that space station), the Lovely Angels are ordered to send each one of the 300,000 survivors a handwritten apology.
* Dirty Pair Flash to get killed. Or so she thought — actually, they could and would have provided backup if she hadn't thrown away her communicator device, assuming that they weren't going to.
* Dirty Pair Flash, Yuri does a hands-free version of this due to there being no bathroom available in her dreamhouse (don't ask, it's a long story).
* Dirty Pair Flight 005 Conspiracy, when Kei is drowning her sorrows at a bar believing Yuri was killed on an explosion, she asks the bartender, who unbeknownst to her is an assassin, to make her another drink, he spikes it with an unknown poison and hands it to her, her new partner Danny tells her that she's had enough and drinks it instead, he then convulses in pain and his head explodes, splattering his brain and skull fragments in her face.
* Dirty Pair for our morons!" he replies, and probably realizes a few moments later what he's just actually said.
* Dirty Pair had Yuri in disguise as a stewardess in a train after tying one up and stealing her uniform, she encounters the leader of the gang she and Kei met earlier and she’s fearful he will recognize her, as all she’s done to disguise her face is put on a pair of glasses, he walks up to her and to her surprise he just tells her “nice ass!” and spanks her.
* Dirty Pair has the villains capture one of the heroines, and strap her to a laser cutting table (mercifully aiming top-down instead of bottom-up) which they rig to their security system to lighten the guilt.

* Dirty Pair. In an escalating series of plans that start with floating in with a hot air ballon wearing cat costumes (), and culminating with them walking through the front door after Kei flashes the guards.
* Dirty Pair. In a slight subversion, the revelation was meant as more of a shock to Kei and Yuri who didn't know, but they're also disgusted at the CEO's transphobic attitude (Kei calls his thinking outdated and Yuri points out by their time at least one in every ten people has changed their sex).
* Dirty Pair. In the desk drawer where many other Chief types would keep a flask they can swig disapprovingly from, he keeps a very large bottle of antacid.
* Dirty Pair: Inverted(?) as Carson is warning his boss of the negatives of the things he likes:
* Dirty Pair issue "Run from the Future," the titular duo are hunting for several criminals, including the "Planarian Cannibals;" they ceremonially eat their own arms and legs (and replace them with cybernetics) to concentrate their spiritual essence. Oh, and they eat other people too.
* Dirty Pair levels of collateral damage (sometimes because they didn't notice that teeny-tiny detail in their flightiness that said luck decided to turn into the trigger for said cataclysms).
* Dirty Pair Meets Akira of each cast member, and the planet exploding.
* Dirty Pair). One OVA has them investigated drug-use by fighters, with Kei entering the ring. A TV episode has them competing with an in-universe tag team to track down a shaggy-cat.
* Dirty Pair OVA there exists a drug called "Hustle," which promotes muscle growth and gives the user feelings of invincibility. Kei and Yuri have to face a rogue 3WA agent who's become a kingpin for the drug, and who is high on her own supply.
* Dirty Pair OVA we have Mazoho an elderly arms dealer who also brainwashes people into super-soldiers, he also likes to grab Yuri and Kei's butts and they catch him attempting to touch their breasts a few times.
* Dirty Pair: Project Eden, in an attempt to save the Kai and Yuri from falling, Carson grabs Yuri by her bikini bottoms while she's carrying Kai; which results in her getting a hanging wedgie until all three of them fall off.
* Dirty Pair Project Eden when she gets shot in the butt with a laser.
* Dirty Pair, the 3WA, included a "Combat Quips" course teaching this trope along with the rest of their training.
* Dirty Pair; the Angels beat him up so much that the waste heat from the repairs does as much damage as the beating.
* Dirty Pair, the Angels visit a planet where a bunch of their fans are holding a big convention. Several issues involving an evil clone, a mind-altering bioweapon and the star going supernova later, and all the people who were gushing over the Angels in book one are frothing at the mouth and forming lynch mobs to try and kill them.
* Dirty Pair there. Another depicts commercial interstellar space travel as more or less resembling modern airlines.
* Dirty Pair the villain's volcano lair has exploded with Yuri and Kei trapped inside, using a cannon as a shield, after it explodes Kei lands on the ground injured but alive but Yuri is nowhere to be seen, she calls out to her and apologizes for eating her cake she had been saving, she eventually breaks down and cries, then we hear Yuri's voice calling out to her telling her it was a nice eulogy and that she's heavy, it turns out she survived by hiding under a piece of the armored spaceship and Kei is standing on top of it.
* Dirty Pair TV anime had a space travel magnate try to separate his son from a lover he disapproved of by launching her on the prototype of a slower-than-light "Time Dilation Tour" ship he had handy. The plan was that she'd only return after the son had aged the fifty years of the trip. The Lovely Angels can't stop the launch, but free the son in time for him to follow his love on another of the ships. The father finally gets on the final ship because he can't live without his son.
* Dirty Pair universe has several fantastic drugs, this being a future filled with transhuman technology. Wardrugs are implants that inject a tranquilizing cocktail

into the blood after a serious injury. At one point Kei gets her leg half blown off, and starts "glanding" Wardrugs. She identifies "no-shock" and "happy juice," the latter of which makes her very giggly. There is also a chemweapon called "Proust-in-a-Can," which places the victim into a coma while they are locked into re-experiencing a distant memory.
* Dirty Pair worse then it was when they arrived, they've earned their infamous and much-better-known nickname: the "Dirty Pair".
* dirty precincts, such footage can "go missing", or be otherwise tampered with.
* Dirty Pretty Things, in order to give it to the client in place of the intended victim's. As you can see, this film has the trope all sewn up in a back room.
* Dirty Rotten Scoundrels, Freddy Benson's face as Lawrence Jamieson prepares to run at him and smack his legs from across the room. He states this trope name without speaking a word.
* Dirty Rotten Scoundrels, Jamieson delivers Freddy to a party of sailors on shore leave who Freddy had earlier attempted to deceive. The next morning, we see that he has apparently gotten along with them just fine, casually leaning with his hand against a doorframe as the last of them leaves the room. He then asks Jamieson to get his hand un-superglued from the door frame.
* Dirty Rotten Scoundrels: One of the characters is a con artist pretending to be a prince in exile from a war-torn country. At the start of the film, a wealthy woman offers him her pearls to help pay for his independence campaign. He refuses at first, claiming the people of his country are too proud to accept charity, then "caves" when she tells him to consider the children.
* Dirty Rotten Scoundrels, the first verse of Freddy's song "Great Big Stuff" runs:
* Dirty rowers seated two-by-two down either side of a narrow aisle, like an even-more-sadistic school bus
* Dirty Sexy Money. He's not amused and curtly tells her to put her dress back on.
* Dirty Sympathy, Apollo and Klavier make the jokes on their names to get it over with.
* Dirty Sympathy but it doesn't when Apollo goads him into admitting that he hates Daryan and would rather be with Apollo.
* Dirty Sympathy has Daryan attempt to kill Klavier by having him strangled to death when he finds out that the latter is cheating on him another man. Daryan outright states this trope as his reason for not ending his relationship with Klavier when the latter questions why they don't break up if Daryan hates him so much.
* Dirty Sympathy He nearly dies in his concert when his lover, Daryan deliberately tangles the chains with the moving platform's winch for his infidelity, causing the chains to tighten around his neck and asphyxiate him.
* Dirty Sympathy, Klavier gives one to Apollo before leaving because he was triggered by Apollo's post-coital talk after Kristoph's arrest.
* Dirty Sympathy make it look like an accident. It nearly comes true when Klavier is nearly strangled to death by a "set malfunction".
* Dirty Sympathy", telling Apollo that Klavier was nearly killed. Justified that a rock star's near-deathly accident would make a headliner.
* Dirty Sympathy they find the first aid kit in Apollo's room which Edgeworth uses to confirm Apollo's story that he was physically abused by his former boss.
* Dirty Sympathy when Apollo is about to kiss Klavier, Trucy interrupts with them a hearty good morning when she's bringing in donuts.
* Dirty Sympathy when a radio announcer jokes about Klavier's near strangulation by saying that he should suck on ice cubes because he has another concert to perform.
* Dirty Sympathy. While he later finds out that Klavier is cheating on him, he never finds out that Klavier is cheating on him for Apollo and that Apollo sees him as an obstacle and danger to Klavier.
* Dirty Weekend. Her "revenge" is of the slippery slope kind, eventually including a man who merely politely flirted with her.
* Dirty White Boys. The seasoned older cop (who has two teenaged kids) is protective of his rookie partner, even though he's having an affair with his partner's wife.

* Dirty Work: after screwing over the residents of an apartment block by trashing their building, Norm's character and his accomplice are themselves screwed over by the slimy businessman who hired them to do so. Norm appeals to the residents to join him in a scheme that will enable everyone to get their revenge on the businessman with a stirring speech that climaxes with him yelling "Are you with me?"... and the response is a stony, hostile silence. He then tries "Okay, are you with me on the assumption that if we fail, you get to kick my ass?" — and the crowd goes wild.
* Dirty Work, considering Norm Macdonald's sense of humor; Pops (Jack Warden) calmly asks Mitch (Macdonald) to come over to him and announces he thinks he's having a heart attack.
* Dirty Work customer informed him for being two minutes late. This makes it the fourteenth time the character was fired in the past three months.
* Dirty Work features a commercial for a car dealership which is broadcast live. Mitch and Sam interrupt the ad by revealing that the cars are all "loaded with dead hookers!" (actually, Sam and Mitch hired a bunch of prostitutes to play dead), then use the stolen spotlight to advertise their own revenge-for-hire business. And the commercial actually earns them a bunch of new customers.
* Dirty Work, Mitch and Sam get revenge on the manager of a movie theatre by swapping the films for suspiciously similar porn movies when his supervisors are doing their inspection; films like "Men in Black... Who Have Sex With Each Other."
* Dirty Work, saying that he and Mitch's mom had an affair. For proof, he shows Mitch a heart locket with their photos in it. When Mitch protests that doesn't prove anything, he brings out photos of the two in the middle of sex, much to the horror of Mitch.
* Dirty Work's character hire the protagonists to vandalize an apartment building he claims belongs to him and is actually a brothel. After this, they find out that another man owns the building, and the person they thought was the "Madam" was just a sweet old lady with a knitting circle. The bad guy just wanted to have the building condemned and leveled, so he could get the land. Naturally, they stage a comeback to expose the guy and get him to pay for the damages.
* Dirty Work, the protagonists start their revenge business to raise the $50,000 a gambling addict doctor needs to pay off his bookies so he will be alive to operate on the father of one of the protagonists (who turns out to be the father of the other protagonist, too).
* Dirty Work, while Mitch and Sam are having a meaningful heart to heart, Sam is casually peeing off the roof.
* Dirty Work with passersby picking up and taking the protagonist's things. The scene culminated in a dropped commercial-style popcorn maker.
* Disability Alibi: A suspect is determined innocent because they have a disability of some sort that makes it impossible for them to have done the crime.
* Disability Alibi: A suspect is written off as innocent because they have a disability of some sort that makes it impossible for them to have done the crime.
* Disability Alibi: Someone is disabled, so they couldn't have committed the crime.
* Disability as an Excuse for Jerkassery: A disabled character uses the excuse that being disabled means they can get away with being an asshole.
* Disability as an Excuse for Jerkassery: A disabled person uses the excuse that being disabled means they can get away with being an asshole.
* Disability as an Excuse for Jerkassery: A disabled person uses the excuse that having a disability means they can get away with being an asshole.
* Disability as an Excuse for Jerkassery: I can treat anyone like shit whenever I want because I'm disabled!
* Disability as an Excuse for Jerkassery: "I'm disabled so I can behave however the fuck I want!"
* Disability as an Excuse for Jerkassery: I'm disabled, so I get a free pass on being a jerk!
* Disability as an Excuse for Jerkassery: Someone uses the excuse that being disabled means they can get away with being an asshole.
* Disability Immunity. Also, for reasons not entirely understood, Humans are the

only species to naturally produce blanks, though other species can create them through other means. Older lore stated this was due to Necron genetic meddling, but the explanation (and the associated Necron unit) were later dropped without comment when the Necron lore was rewritten.
* Disability Immunity: Having a disability makes you immune to something that would affect those who do not have the disability.
* Disability Immunity: Not having a sense means it can not be used against you.
* Disability Immunity: Rather than granting you powers to compensate, you are protected from something that would harm more able individuals.
* Disability Immunity: When a character is immune to one's power because they cannot perceive/process the manipulative signal.
* Disability-Negating Superpower: A disabled character develops superpowers that, while active, negate their disability.
* Disability-Negating Superpower: A disabled person gains super powers in exchange for losing their disability.
* Disability-Negating Superpower: A disabled person gains superpowers in exchange for losing their disability.
* Disability Superpower: A person's disability makes them more powerful than a non-disabled person.
* Disability Superpower didn't stop her from becoming the strongest earthbender in history.
* Disability Superpower: Having a disability makes you immune to stuff that would affect people who don't have the disability.
* Disability Super Power: Power at the price of one or more faculties.
* Disability Superpower. She is also incredibly vulnerable to aerial attacks that aren't made of earth (as her earthbending abilities actually allow her to sense them at will), since her opponents also have to be on the ground for her to "see" them, though she is able to compensate to an extent with her sense of hearing.
* Disability Superpower was once thought to require a full moon to boost a Waterbender's power, but people have been found that are powerful enough to bloodbend at any time.
* Disability Superpower: What they lack in one physical ability that others take for granted, they make up for it with a cool superhuman power.
* Disabled Character, Disabled Actor: A disabled character is played by an actor who has the disability for real.
* Disabled Character, Disabled Actor: Hiring an actor who has the same disability as the character they're playing can be done to make things more believable.
* Disabled in the Adaptation: A character is given a disability in the adaptation.
* Disabled in the Adaptation: Giving a character a disability that they didn't have in the original version.
* Disabled in the Adaptation: The adaptation gives a character a disability that they didn't have in the original story.
* Disabled in the Adaptation: The adaptation gives a character a disability that they didn't have in the original work.
* Disabled Love Interest, her knowledge of sign language isn't forgotten. Instead, becomes a plot point in every other occasion where the cast is meant to interact with deaf individuals.
* Disabled Love Interest) love interest of a main character, who's disabled and usually a woman.
* Disabled Means Helpless: It's assumed that people with disabilities always need assistance from people who aren't disabled.
* Disabled Means Helpless: The belief that a disabled person can't survive without non-disabled people helping them.
* Disabled people get this a lot too, especially those with expressive language problems.
* Dis Acedia: a dark fantasy web serial set in an interdimensional magical prison, crafted by an ancient, utterly demented deity. Magic is extremely dangerous and feared, death is never an escape, and the entire dimension is divided into fiefdoms waging an eternal war.

* Dis Acedia are an ancient, thousand years old religious conspiracy actively sabotaging efforts to solve the titular maze. They have infiltrated most of the setting's factions to a degree or another.
* Dis Acedia, gives the consumer extraordinary power, but A is fueled by souls, and B eventually enthralls the user to Dis.
* Dis Acedia started out as this, although attrition and shortages eventually forced them to expand and recruit mortals among them.
* "D" is a dhampyr vampire hunter and the main character. The series began in 1983 and there now well over 20 novels, short stories, and spinoffs in Japan. D is the first true dhampyr in popular fiction, being the offspring of human and vampire with all the strengths and none of the weaknesses.
* disadvantage playoffs was theorized to be the fact that the NHL's Western Conference (which the Kings play in) had cities in four time zones (Pacific, Mountain, Central, and Eastern), while the Eastern Conference only had a single city (Winnipeg) outside the Eastern Time Zone. The Kings were therefore used to playing at very different times when on the road compared to the Devils. Following the 2013 NHL realignment, the Eastern Conference now contains only the sixteen teams in the Eastern Time Zone, while the Western Conference contains the fourteen teams in the other three time zones.
* disadvantages of owning a castle guests that attempt to find secret doors.
* Disagreeing politically with most fans. Not even if someone's being bigoted against a large portion of the fanbase (such as homophobia for a work with a large
* Disappearance movie as well. They could have simply made it a generic affair, but it was done accurately from start to finish, correct opening sound, GUI and all included.
* Disappearance. Nagato creates a new world where he's a normal high school student and he's forced to choose to start this new world and end the previous one or return to his old world filled with weirdness he claims he hates. Guess what he chooses.
* disappearance of Frederick Valentich in 1978. While flying his light aircraft from Melbourne to King Island he reported to ATC that he was being harassed by an unidentified "aircraft" that he presumed was an Air Force jet of some kind, but none were operating in his area, nor were any civil planes in the vicinity. In his final transmission he comes to a frightening realisation:
* Disappearance trilogy takes place in the western half of the United States which has once again become the Wild West only with truck convoys instead of wagon trains and the cavalry riding Humvees and helicopters. Also no Native Americans since they died along with everyone else. Plenty of Indians from India though as imported workers.
* disappear because he was a Captain and his known death would have huge ripple effects. To explain his disappearance, and to deflect the blame from himself, Tony says that Richie had entered the witness protection program. This excuse is used again several times later in the series to explain mob disappearances that don't leave a body behind, most notably Salvatore "Big Pussy" Bonpensiero (who, ironically, really was an FBI informant).
* "Disappeared") and the epic, mystical Yoda arc that comes after it, "The Disappeared" is lighter and more standalone.
* Disappeared Dad: A character's mother is accounted for, but their father isn't so much as mentioned.
* Disappeared Dad: A character's mother is present and accounted for, but not their father.
* Disappeared Dad and being raised by a single mother while the black girl has two successful, loving parents.
* Disappeared Dad, he decides fuck it, I'm going to be smart, and realized that he was bigger than the bullies, not just fatter.
* Disappeared Dad is paying Dawn's child support. And Willow and Tara live there (but Tara has no means of support either, so....)
* Disappeared Dad may count — very important to the backstory and, eventually, the plot, but not very mysterious and definitely not missing.

* Disappeared Dad. Meanwhile, Jason's father is a psychiatrist who "used his field of study to bully children" and abandoned the family when he got bored with them. Before that, he was emotionally abusive towards them in a number of ways, including "giving me invoices for how much love I owed him per week. That wasn't so bad, but the man did the audits suck." Davan's father was usually fine, but had his interesting moments;
* Disappeared Dad Mr. Squirrel, he simply said "no particular story is attached to Mr. Squirrel."
* Disappeared Dad) searching for their missing father is another frequent trope in Korean dramas.
* Disappeared Dad status. Davan is genuinely committed to being the best father he can be, which makes him this trope too.
* Disappeared Dad to his son Kolyat as a consequence, which is the hook for his loyalty mission.
* Disappeared Dad When that relation is ultimately revealed, Luffy has already become a world-famous pirate and his father remarks simply that he's not a child anymore.
* disappeared when the guy that made it appear was beaten for both magical animals and weapons, it's likely that this involved summoning the water from a remote location. With the Second Hokage, it's even specifically noted (as per the above quote) that not needing an existing water source had to do with his level of skill.
* disappear entirely, wiping out males At the moment, this is believed to be false, but we've only known about DNA for a few generations.
* disappear from the plot for good, have this as their debut scene, or get more involved in the plot if they have appeared before.
* disappearing as a result. At the end of the episode Yusei comments that the world is safe now... but the robot apocalypse is still a possibility because, as mentioned above, they didn't make any plans on how to stop it.
* Disappearing Box are best not done in their straight form these days, as everyone's seen them dozens of times and probably knows how those tricks are done.
* Disappearing or becoming difficult to observe (at least at interstellar distances) is a natural outgrowth of technological development.
* disappear with no explanation, only for a new love interest to appear in another short. Daffy Duck has been married at least three times for the purposes of situational comedy.
* Disappointed by the Motive: After all their posturing and all their little speeches, they're nothing but a common thief.
* Disappointed by the Motive: Disappointment in another character's motivation.
* Disappointed by the Motive: Once you find out why the person did what they did, you're not impressed with the motivation.
* Disappointed by the Motive: You find the villain's reason for villainy to be petty or mundane.
* Disappointed in You: Having someone they admire being disappointed in them is way worse for a character than if they were just angry.
* Disappointed in You: It can be depressing to see someone being called a disappointment by a friend, loved one or idol.
* disappointed. The CEO's successor takes a more moderate approach, using it primarily to supply the other branches of Pentex with cheap computers - and of course selling a few outdated and mildly tainted models to schools.
* Disappointing Last Level: The final stretch of a game fails to meet expectations.
* Disappointing Last Level: The players have no interest in finishing the game.
* Disappointing Older Sibling: An older sibling lets down and loses the respect of his younger siblings.
* disappoints Carface one too many times, he's lowered into a pool of pirahna.
* Disarming a ICBM Post-Launch: Deployed strategic ballistic missiles do not have any mechanisms for the attacker to remotely disarm or destroy the weapons after launch, and use inertial guidance based their maneuvers from a known initial launching position and so cannot be steered off-course either. For all intents and purposes once the missile has been fired it can only be stopped either by

mechanical malfunction or interception. Missiles which are used for testing are modified with a self-destruct mechanism in case something goes wrong, but live warheads are not used for testing the missiles.
* Disaster! attraction at Universal Studios Florida was based around the fictitious Disaster Studios, which created "films" such as "Apocageddon", "Das Schurke", "Baboon!", and "300 Knots Landing"; with their upcoming production being "Mutha Nature".
* Disaster: Day of Crisis: Evans seems cool and collected at first, but he rather enjoys fighting Ray, and eventually shows his true side as a man who gets a huge thrill out of the natural disasters that are occurring. The game itself notes that he is a mixture of a cool head and madness.
* Disaster: Day of Crisis. The characters even remark that Evans is basically nuts and who knows why he does anything.
* Disaster Democracy: A band of post-disaster survivors band together and elect some leaders.
* Disaster Democracy: A democracy rising out of some catastrophic event.
* Disaster DIY, has contractor Bryan Baeumler come in to fix DIY projects gone wrong.
* Disaster Dominoes as each attack brings more Grimm until the defenders are overwhelmed. A prolonged period of dread and worry, followed by a horrific disaster, can end up summoning enough Grimm that even the massive defenses of the Kingdoms can be overwhelmed.
* Disaster Dominoes in one episode that led to Rowlet and Popplio getting blown away in a bubble.
* Disaster Dominoes knocking over few buildings, just like at the beginning of the first movie after Hiccup shoots down Toothless.
* Disaster Dominoes - Mishaps will cause enough collateral damage to enhance the plot, no more and no less.
* Disaster Dominoes that will cause more disasters months or years down the line. People attempting to leave the affected city without very rare authorization are shot on sight, and those that are permitted to leave are tattooed to ensure everyone knows they're a potential hazard.
* Disaster! ended with a fake trailer for a movie called "Mutha Nature", which shows the world being wrecked by every single disaster you could imagine; also featuring Dwayne Johnson as the main character.
* disaster for musicals, and barring some radical re-design - which neither of its male leads can probably afford, no longer having any magical Muse-patronage to help them out on the sly - will be going out of business within a year or two.
* Disaster!, Frank Kincaid describes in heavy detail about how he loves to make disaster movies because it's a subject that greatly fascinates him.
* Disaster Girl meme embodies this to the fullest, the picture being a girl no older than five smiling almost sinisterly into the camera while firefighters are putting out a burning house in the background.
* Disaster House or the piano has been dropped through the roof, then and only then do they get around to undoing what their chaos has wrought. Discussions of what insurance will cover and pleas to leave things to the professionals due to the sheer scale of the disaster in question are common. (The thing that finally did in the first house, by the way: simulating ice and snow buildup with a garbage truck. Placed on the roof.)
* Disaster House severe that it would be cheaper to just bulldoze the house and build a new one. This basically was the end of the series.
* Disaster Movie has been dubbed in Slovak twice for airing. The first dub aired on TV Markíza on August 8, 2010. In 2015, a second dub premiered on TV JOJ.
* Disaster Movie, in which driver Dan Torrance must defuse a bomb planted on the world's first nuclear-powered bus, guided by radio from the front cabin by girlfriend Kitty Baxter (reading from Jane's Book of Bombs):
* Disaster Movie, one that focused more on survival and less on the massive disasters occurring. Examples that followed the latter often faced critical and commercial backlash. As of right now, it is unclear whether true "disaster movies"

will ever come back.
* Disaster Movies's "Disaster" naturally has this. "Even though you seem to know exactly what you're talking 'bout I don't think at this point in the plot I'm going to hear you out."
* Disaster Movie, the world is set to end on August 29, 2008 — the very same day that the film opened in theaters.
* Disaster Movie, which fully embraced its cheese factor with a ridiculous premise too absurd to take seriously.
* Disaster occurs after the first time Angel and Buffy sleep together. Enter Angelus, who then kills Jenny Calender and tries to destroy the world.
* disaster of some sort from neutral factions who'll only hand it over to the first bidder.
* Disaster on the Coastliner, Davy tries to tell his mother that the engineer has been replaced, but she thinks he's just being annoying and tries to give him mints to keep him quiet.
* Disaster on the Coastliner film where a man takes over the engineer's console of a passenger train running from Los Angeles to San Francisco, locks the other train running from San Francisco to Los Angeles on the same track, and has both hijacked the LA-Bound train's radio to come into his phone so the engineer thinks he's calling the control center and sabotaged the computer system at the railroad control center so they can't switch the signals to red so the unaware engineer would stop his train. The man taking over the first train is using the threat of an unstoppable wreck to blackmail the president of the railroad (Raymond Burr) who was unaware of the misconduct, to publicly admit that the railroad killed his wife due to negligence and intentionally bribed the inspector who investigated the accident into saying it wasn't the railroad's fault.
* Disaster on the Coastliner, Stuart tells Paula that the police are after him because he punched out his ex-wife's new man in a fight.
* "Disaster" puts Troi in command, as the most senior officer left on the bridge (despite the fact that she has no command training, which gets addressed in a later episode). This is one of the areas where Starfleet breaks from current-day practices. Troi would most likely have been a commissioned officer and would not have taken command. Ensign Ro would have, especially since she was a command division (line) officer.
* Disasters at Sea: One example being the sinking of the MV Derbyshire, where water entering a ventilation shaft pulled the bow downward, resulting in water being able to enter Hatch #1, which dipped the bow enough for waves to reach Hatch #2, then Hatch #3, then Hatch #4…
* Disaster Scavengers: People who search for resources in a place that was hit with a disaster.
* Disaster Scavengers: Post-disaster, the only way for characters to good food, water, and other supplies is to scavenge the surrounding areas.
* Disasters that could wipe out the world or at least humanity get a huge amount of coverage from edutainment networks. Most sensible people agree that it's going to happen someday. TV experts keep stressing that 'someday' includes
* Disaster! was altogether a huge tongue-in-cheek parody of the many cliches found in disaster/action movies, with countless of tropes being lampshaded.
* Disaster! was a tongue-in-cheek parody of typical disaster/action movie cliches.
* Disaster when he orders them to leave him behind. The episode ends with both Riker and the 12-year-old first-officer responding "Yes, Captain" in unison when he addresses an order to "Number 1".
* Disastrous Demonstration: Demonstration of a product or concept goes so horribly wrong that, whether it deserves to be or not, it's discredited.
* disastrous. If the Age of Fire is extended too long, the world will begin to literally collapse, with locations from throughout time slowly contracting into a single point, the eponymous Ringed City. Beyond that, the world is nothing but a wasteland, with even the undead, who cannot die, dying out, the Dark Soul running rampant, and reality literally starting to break down..
* "D" is a vampire hunter and the main character. The anime renders the word as in

the first film as "Dampiel" (which isn't
* disbelieves they only suffer how real the illusion is, other wise they suffer the full effects.
* Discard and Draw divide the trope among themselves, with each of the main duo taking one weapon, but are defined as one with it.
* discarding old running gags, making Butters and Randy main characters, moving the boys to fourth grade and Mr Garrison discarding Mr Hat.
* discharge an enormous amount of electricity into the surrounding area. The problem is, once he does this, the power basically fries his brain and turns him into an idiot, meaning that he gets one shot before becoming totally useless for the next hour or so. And he's not any physically stronger than a normal human, making him something of a sitting duck. Later on, he starts to train specifically to avoid this issue.
* "Disciple of Lightning" is a compilation remix of lightning-based themes from video games.
* Disciple of the Dog: The main character has a perfect memory and can see the patterns in people's behavior that those people are themselves often unaware of.
* Disciple of the Earth" is a compilation remix of Earth-based themes from video games.
* Disciple of the Fire" is a compilation remix of Fire-based themes from video games.
* Disciple of the Ice" is a compilation remix of Ice-based themes from video games.
* Disciple of the Light" is a compilation remix of Light-based themes from video games.
* Disciples As an enemy Asteroth has twice as much health and attack power and is able to lead a couple other units in his party. In both situations Asteroth remains evil. Too bad being evil doesn't mean you're on the same side.
* Disciples attack by disappearing, appearing behind the target, striking, disappearing, and then re-appearing in the original location. All in the space of 2 seconds. It's no wonder why they're more effective than archers.
* Disciples has the human faction be simply called the Empire. The other major faction names either refer to the race or the location: Mountain Clans, Elven Alliance, Undead Hordes, Legions of the Damned.
* Disciples is heartbreaking and establishes her horrifying appearance, her overall goal, and burning hatred for the dwarves of the Mountain Clans.
* Disciples meant to free him and destroy the mortal races. A misunderstanding lead to Wotan killing Gallean and causing Soloniele to become Mortis, the goddess of death. She slaughtered a magical people and raised them as her undead servants.
* Disciples started appearing in the elven forests, setting them on fire. Fleeing, the elves happen to rush into the mountains, the land of the dwarves. The dwarves assume it's an invasion and strike back at the refugees. The misunderstanding is further exacerbated by the respective races' gods. Gallean and Solonielle go to the dwarves' god Wotan and demand that he discipline his "children" for this act. Wotan gets angry and kills Gallean by ripping out his heart and throwing it into the sun. Solonielle manages to catch it, but is horribly burned by the sun, eventually becoming the fleshless goddess of death called Mortis. Things only go downhill from there.
* Disciples-style), changes in types of leaders, resource management, etc. Once again, the fan base is split.
* Disc jockey and host John S. Gemperle first became known throughout Philippine airwaves as "Papa Jack" on 90.7 Love Radio where he hosted a couple of late-night radio programmes about relationships and romance. Trademark issues with Love Radio station owner Manila Broadcasting Company—who
* Disclosure has the Coastal Regions variant: Tom and his family live on Bainbridge Island, a bedroom community within a 40-minute ferry ride of Seattle.
* Disclosure is known in the U.S. mostly for 2012's "Latch", which became a hit in 2014 stateside after it was re-issued following the explosive rise of
* Disclosure plays the "female boss, male employee" version of this for all the drama it can. Meredith Johnson, the ex and new boss of Tom Sanders, tries to

restart their relationship, but Tom doesn't want to go through with it due to him being married now. Meredith then out-and-out tries to rape him, forcing him to fight her off. The plot gets kicked off when she files charges of sexual harassment against him. When his lawyer investigates her, she finds that several of her male subordinates have abruptly and inexplicably quit, heavily implying that Tom is neither the first nor only employee that she's made unwanted advances to.
* DISCO (2017), the reason why Crystal is much less willing to help Lana when she is in trouble than Emily is that she slept with her husband, ruining her marriage.
* Disco) are hired by baseball manager Charles O. Finley to keep the Disco Demolition Night from happening at the Oakland-Alameda County Colosseum.
* Disco Dan: A character holds into a fad that everyone else has abandoned.
* Disco Dan characterization, was even shown using a current-day (at the time at least) cell-phone in a few episodes (specifically "Who Framed Roger Rabbit?" and "Ghostbusters").
* Disco DanThe tie dye look is very dated, and keeping the colors after it goes out of fashion can make you a real square.
* "Disco Demolition Night". A combination of anti-disco sentiment from the crowd and prodigious amounts of alcohol led to a riot when the demolition took place, with the White Sox forced to forfeit the second game of the night.
* Disco Demolition Night long afterwards, disco culture was inherently expensive, in that you would have to buy nice clothes and learn how to dance in order to be socially successful in a future disco universe. It also isn't the kind of music you could (at the time anyway) get together a garage band and play on your own.
* Disco Demolition Night,'s Comiskey Park to express their hatred of disco. The event made news worldwide and less than a year later disco was effectively dead in the United States and Canada (although it would remain popular in Europe for another few years).
* Disco Elysium and combining it with a knowledge of physics and then applying it to various situations, most notably forensic recreation. When used successfully, the Detective can study a shattered window, and simply from a glance be able to make very qualified guesses as to the size, weight, and velocity of the object that smashed the glass.
* Disco Elysium be an assassin for the mob because he's far too unstable to be used in that capacity.
* Disco Elysium, but it was changed into its final title in early 2018.
* Disco Elysium examine the latter's records with the RCM, and see that he has three confirmed kills in the line of duty, and the Detective have a bottle of alcohol in his inventory, the player can choose to make him pour it out on group in sympathy with and honor of the dead.
* Disco Elysium hangover. Even his normally extremely stoic partner, Kim, barely manages to hold on.
* Disco Elysium has a central mystery that can be approached in basically any order, with attendant dialogue changes to match.
* Disco Elysium has the Moralist International, typically referred to as the Moralintern, the setting's equivalent of the EU that espouse the virtues of "Moralism" (the setting's version of Radical Centrism) and within the background crushed the Communist revolution that took over Revachol and has since then been enforcing their authority via gunships in the sky
* Disco Elysium in their own right, which has become the defining feature of the game.
* Disco Elysium is a pathetic alcoholic cop in a ridiculous disco outfit, which causes problems when he's trying to get people to take him seriously - people usually just jeer at him or call him a pig. When screwing up these attempts, he tends to have ineffectual meltdowns where he screams at people for no reason or threatens to kill himself to prove a point, which only tend to lead to others finding him even funnier.
* Disco Elysium is the unflappable professional cop to your unstable Detective whose personality can range from funny drug abuser to suicidal fascist to deranged apocalypse prophet. The only thing that gets under his skin is if you seriously

disrupt the investigation.
* Disco Elysium, it is possible to collect a set of the insanely powerful Fairweather T-500 Armour over the course of the story. But the last piece, the helmet, is only obtainable in the penultimate scene of the game, after which all there is to do is a conversation scene and the game's end credits, during which there are no checks left for the player to roll. The game lampshades that that you got it too late for it be of any real use, but encourages you to put it on anyway. As further bragging rights, you get an achievement for it if you've found the other three armour pieces as well.
* Disco Elysium Klaasje is a subversion. On the one hand: sexy, mysterious, dangerous to know, involved with industrial espionage. On the other hand: she feels guilty about the damage that her spying caused, and is hiding out in Revachol because she thinks that her former employers want to kill her. Her best ending has her go on the run to another city.
* Disco Elysium might have looked and felt glorious, but it proved amazingly impractical against the rebelling Communists, who in contrast blended much better in in urban envioments due to wearing black and grey fatigues, and the royalist forces suffered for it over the course the war.
* Disco Elysium of the story is failure, so there are a few important story events where everything inevitably goes sideways, and no ammount of skills can charge it.
* Disco Elysium partner, Kim Kitsuragi, is a master of this. Any time he is faced with someone doing something that annoys him, he tends to flash this expression, and it's usually enough to make anyone back down. Upon being faced with this, the player's Authority skill makes a note of how Kim's own Authority skill must be off the charts.
* Disco Elysium, ran around scaring hotel guests by putting his gun to his head and threatening to kill himself, sexually harassed the bartender so much she quit, trashed his room, then tried to run out on the damages bill) but even considering the circumstances he is extremely rude. Meanwhile, the protagonist loathes him for trying to make him pay for the things he broke, and the player has plenty of options to damn Garte to the heavens, including telling the Moralintern that he's an international criminal in hiding in the hope of getting him executed.
* Disco Elysium refers to the main character — a hard-boiled detective with amnesia — as if he's you. Not only that, but the various systems of this character's brain also speak to you as if you're that character. The detective does have an identity that you can find through the story, but you can choose to accept this identity, reject it, or carve your own.
* Disco Elysium Ruud "The Killer" Hoenkloewen, he notices that he has a tally of his kills as stick figures edged into the brim of his helmet. With a high enough Perception skill, he also can notice that they are different colors and count about fifty black ones and two white ones at the end.
* Disco Elysium's partner, Kim Kitsuragi, is very fleshed out, frequently chimes in during conversations, and while he generally follows the player's lead, preferring to disappear into the background, he will take over from the main character if he feels strongly that the player is hindering the investigation. Whether him and the player character become True Companions or only stick it out for the sake of the case is once again down to the player and their choices.
* Disco Elysium take. The game uses a combination of real-world drugs (most prominently alcohol and amphetamines) and otherworldly drugs, which aren't especially strange but also don't exist in the real world.
* Disco Elysium, the Deserter was originally a Commissar in the Revolutionary Army, and he's still bitterly holding onto his ideals even decades after he broke and ran.
* Disco Elysium, the Detective's skills manifest as parts of his personality that have a life of their own and frequently argue with each other about the world around you and the best course of action.
* Disco Elysium, the Encyclopedia skill governs your ability to remember trivia. This can be very useful in some situations, but quite often it results in your thoughts getting hijacked by ruminating over fascinating fact after fascinating

fact rather than focusing on the tasks at hand.
* Disco Elysium, the Kremel mercenaries participated and rejoiced in the mutilation, mass burning and rapes of civilians in a war of colonial racism (they "kill almost exclusively black people", as the player character can put it). In the game, they launch a pointless assault on dockworkers after the political control they were dispatched to achieve was already given up for reasons far beyond their control or responsibility. The characters, while monsters, are at least somewhat sympathetic due to the fact that they were used in a war amongst huge powers that had nothing to do with them. All of them are traumatised by what they were forced through, and all have developed alcoholism as a result. Korty, in particular, ringleads the assault due to impotent rage over failing to handle the political situation, and grief over the murder of his brother.
* Disco Elysium, the number of times you have told people "I am the law", and so on.
* Disco Elysium, the old kings of Revachol were decadent, inbred, and insane, and their antics eventually became too much for the country, which erupted into a Communist revolution. The legend on the horseback monument that can be found in the middle of Martinaise actually reads:
* Disco Elysium The Revachol Citizens' Militia is the local police force, and is effectively a large, well-organised Vigilante Militia. It is accepted by most of the people, and tolerated by the occupying forces, but is semi-official at best.
* Disco Elysium thing. Despite this, there are a number of ways of cracking Kim's facade; he loves cars and will occasionally find himself dragged into geeking out about them, sarcastically mocking racists will often lead to Kim joining in with his own (bone-dry) humor, you can buy and play a board game with him that he'll eventually admit to enjoying, and if you reveal to him you named one of your previous cases "THE SQUARE HOLE BULLET MURDERS" Kim will reluctantly admit he once named one of his own cases "THE MAN WITH A HOLE IN HIS HEAD" because he thought it was funny.
* Disco Elysium" This causes Klassje to burst into laughter, even asking you to say it again just for her.
* Disco Elysium when it comes to word count), as well as a new area with new characters, and even some new quests.
* Disco Elysium, when they argue it's usually over the cultural value of video gaming, with opposing positions that somewhat resemble the characters (Matt thinks it's a boot on our necks keeping us from rising up and destroying capitalism; Felix just likes that they let him pretend to be a soldier with a big gun).
* Disco Elysium which have been a permanent feature of the city's skyline since the end of the World Revolution.
* Disco Elysium. With sufficiently high stats, The Detective's brain will get stuck on the silliness of the word and eventually give you a Thought based entirely on how silly the thing sounds.
* Disco Elysium with their own voices in his head, will notice and point their equivalents in other characters he comes across.
* Disco Elysium with the payment he owes him for trashing his room, amongst other things, the player chose to can make a Savoir Faire check to attempt to run out on the bill. Failing the check causes the Player Character to, instead of just running away, get about half way across the room before spinning around to leap backwards towards the exit while flipping Garte off with both hands. He then crash-lands hard, because he focused too much on the rude gesture and failed to see where he was going.
* disco following many years of depression.) The chorus translates as follows:
* disco for no reason, but it's nowhere near as bad as many of its more virulent critics would make out. Part of the problem is that much of the disco was commercialised and nothing like the original genre. For instance, pop disco songs often featured far too many strings.
* Disco Inferno's WCW theme: "DISCO FEVER, DISCO FEVER, DISCO FEVER, YEAH YEAH YEAH YEAH!"
* discomfort, formerly-male colleagues. Mori's colleagues are also fairly good

looking, but not extremely attractive like him/her.
* Disc-One Final Boss: Appears to be the main villain, but is far from it.
* Disc-One Final Boss Damo, and before the plot goes back on the rails, there is Milagro Man - a wacky adventure starring a supporting character Joshu, with no ties to the main plot about rock humans and the Rokakaka.
* Disc One Final Bosses only gives you its ending for beating it the first time. You only need to beat him once; never again with any other character except for the bragging rights.
* Disc-One Final Boss is an ex-Nazi turned South American drug kingpin Helmut Koch, his island fortress includes a Nazi paraphernalia museum.
* Disc-One Final Boss sends Ratchet a transmission showing that they have Clank in captivity on Endako. The thief threatens Ratchet that if he doesn't return to his own galaxy they'll do to Ratchet what they're about to do to Clank and hits a green button, but nothing happens (mostly because Clank's too short for the torture device to actually hurt him). The thief awkwardly hits the red button next to it and electrifies Clank, knocking him out cold.
* Disc-One Final Boss speech and the verbal equivalent of spitting in Micaiah's face.
* Disc-One Final Boss who has an array of extremely powerful moves that can be chained together at speeds much greater than he ever pulls off during the boss fight.
* Disc-One Final DungeonA dungeon that pretends to be the last one in the game, but is nowhere near it.
* Disc-One Final Dungeon, the party winds up back in Tycoon. Exdeath has broken the second set of crystals, Galuf is recently dead, and Tycoon itself is mourning their king. But since Lenna is back and the long-lost Princess Sarisa (that is, Faris) has turned up alive, they host a grand ball to celebrate.
* Disc-One NukeAn exploit where a powerful item or technique is achieved early on in the game.
* Disc-One Nuke, this means that you can make yourself an Infinity Plus One Sword...or Book...or Loaf...or even Fish.
* Disc Only Podcast confesses that cereal is his favorite snack. They even act out drug dealing with cereal.
* Disc Only Podcast: In Episode 5, Stephen pitches an idea for a steakhouse in which patrons pay for their meal with their blood. There's even fanart that spawned from his pitch, some of which was shown off in the podcast.
* Dis/Connected and ambitious talk about its future, but its ratings were too low to justify a full series.
* Disconnected by Death: A phone call abruptly ends because one participant died.
* Disconnected by Death: A phone call is interrupted by the death of one of the conversants.
* Disconnected by Death: Someone is killed while trying to make an important phone call.
* Dis/Connected, one character accidentally takes a pair of knickers out of his pocket along with his phone... right after leaving his girlfriend's funeral.'I don't know how these got there...'
* Disconnect, Jason and Frye's prank on Ben takes a dark turn when the latter hangs himself in shame over what happened.
* Discontinued Canadian horror channel "SCREAM" had several horror hosts. Mistress Olga was a goth/vampire/dominatrix who hosted monster movies, Tiff was a
* Discontinuity Nod: Characters make a disparaging reference to a reviled part of the franchise.
* Discontinuity Nod: The characters make a disparaging reference to a reviled part of the franchise.
* Discontinuity: When something that was a part of the continuity is no longer regarded or completely changed. Separated into three categories:
* Discord also does it in "Discordant Harmony" when he starts to panic about what kind of tea party Fluttershy might like. Being
* Discord, a new villain for Season 2, became one before his proper introduction.

That's understandable, though:
* Discord, antagonist of the season 2 opener "The Return of Harmony", is reformed by Fluttershy at the end of the season 3 episode "Keep Calm and Flutter On", but clearly demonstrates afterward that he's still as big a
* Discordant Harmony", Discord calms himself down by breathing into a paper bag. The bag stays still, while Discord inflates and deflates as he breathes.
* Discordant Harmony", he animates a teapot (which also gains wings), some napkin origamis, a chaise lounge (which becomes a "chase lounge" that acts like a dog) and some ginseng tea bags (which start singing).
* "Discordant Harmony" says that there is no such thing as normal. In fact, being quirky and weird can often be the coolest thing about a person. The key is that you can't be a jerk about it.
* DiscordantPrincess. In turn, Alastor calls her "Meggie," as well as generic nicknames like "dear," "darling," "honey," etc.
* Discord as well, though it helps that he's an actual troll in canon.
* Discord attempts to invoke this in the two-part season 2 premiere "The Return of Harmony" in order to keep them from using the
* Discord, but rekindled their friendship to the point they can activate the Elements Of Harmony again...which are presently aimed at his face.
* Discord can take away pegasus wings and unicorn horns on a whim, which he demonstrates on the mane cast in the Season 2 opener.
* Discord/Celestia shippers have their own ideas on why she wanted him reformed...
* Discord doesn't fair very well against Majora's Avatar. Though unlike the above examples, the CMC ultimately help him turn the tables and beat the Avatar.
* Discord during his first reign. As a spirit, destroying his body merely frees him to take over another one (explaining why Celestia didn't just smash his statue to bits when she had the chance). After her sister Galaxia shatters Discord's statue.
* Discord glomps Fluttershy when they're reunited at the end of "To Where and Back Again."
* Discordianism faux-religious tract achieved such a large cult following that it persists to this day.
* Discordians will happily marry just about anyone to any combination of people or things but may have some reservations about joining a man and woman in holy matrimony (note that, like the image boards example, this is to poke fun at existing taboos).
* Discord: if you left-click your username in the bottom left-hand corner, a green tooltip will appear saying "Copied!" If you click your username again when the tooltip fades, another tooltip with a different message will appear. You can continue this process for a series of mildly amusing messages.
* "Discord Inevitably Decides Green Equines Rate Indescribably Desirable On Occupation": DIDGERIDOO
* Discord is another example. He outright calls himself a 'sadistic hedonist' and has no delusions about the fact he's an evil monster, but in his case, the reason he's this trope is it's easier to justify his actions if he's completely evil and cannot be anything else. IE, he shouldn't feel bad for his misdeeds because he can't be anything else, so why should he? It's shown that the idea he might have any good in him and is thus redeemable
* Discord is defeated the same way as Nightmare Moon—he even dares the Mane Six to "Friend me" just before the attack — but the Elements deem him to be undeserving (or incapable) of redemption and instead
* Discord is stated to be possibly the fifth most powerful being in creation
* Discord is the clearest example. While he is supposed to have the head of pony, it's much longer than that of any of the cast with a sunken narrow section between the mouth and eyes, has a scraggly beard and overgrown eyebrows, and very asymmetrical complete with a snag tooth. Notably his appearance is supposed to be jarring in-universe as his mismatched parts represent disharmony.
* Discord is voiced by Mario Zucca, but his singing in "Three's a Crowd" was done by Riccardo Rovatti (
* Discord. Neither Celestia's romantic love for him nor Shady's maternal love were

capable of redeeming him. Then Double Subverted
* Discord (now somewhat reformed) is tempted to abandon his loyalty to the Ponies by Lord Tirek, who promises that Discord will get back his chaotic freedom plus have Tirek's friendship. It doesn't end well for him.
* Discord, (once by stealing them, and once by breaking the friendship that powered them).
* Discord Plays Stellaris. All of it. No matter how dire the situation, the players can't really come together, turning to inner conflict instead. The coalition fights against coalition, party against party, member against member, military against senate, scientist against secret services and generally everyone against everybody else.
* Discord seems largely unwilling to kill or hurt ponies, at least physically. (He's fine with
* Discord's final fate: he allows his persona to be destroyed along with Paxphobia
* Discord's power (although she was wearing the Element of Magic in this instance).
* Discord takes some popcorn while watching Twilight under the influence of a potion.
* Discord Trope: involves characters that have some issues with each other:
* Discord was an ancient being of chaos, who ruled over Equestria and made everypony's existence miserable, until Luna and Celestia were able to seal him.
* Discord was imprisoned in a statue by Celestia and Luna for spreading chaos in Equestria.
* Disco's "Blurred Lines" were able to revive worldwide interest in the disco genre, leading to several followers and even expanding to other forms of R&B in 2014.
* Disco Sucks! helped fuel the anti-disco backlash, to the extent where the legitimate factors that fueled it (namely the overexposure) have since been outweighed by the more bigoted elements.
* Discotek Media, and include it on the Blu-Ray release of the series.
* Discotek Media Neo-Nazi cult leader, to his name being a pun on the word hermaphrodite (considered to be a slur towards intersex people and even transgender people) to the several gay panic-style jokes towards his subordinates.
* Discount Lesbians, and dresses like a princess. Invoked and Inverted at their wedding, Sapphire ties her hair back and wears a suit while Ruby is wearing a dress. Their re-fusion in these outfits leads to Garnet wearing a dress-suit hybrid.
* Discount Lesbians: Nonhuman characters used to represent a homosexual relationship.
* Discourses on Livy, since it allows the right leader to come to the fore at the right time.
* Discover America played via Wal-Mart's in-store TV system, Pics Retail Network, before its' TV airdate.
* Discover Card has a series of commercials utilizing this trope to show that the company's representatives treat the customers the way they'd want to be treated themselves. The commercials have a customer call the company and talk to a representative played by the same actor.
* discover civilization destroyed a few stars in a battle, throwing off estimates of stellar drift.
* "discovered" how to use fire. It's theorized that this occurred repeatedly, in several different areas, over the course of time.
* discovered in 2016 orders, but Nolan passed the message along orally instead.
* discovered inside a navy picnic cooler that had been placed alongside Henry Hudson Parkway. Investigators, who had named the girl "Baby Hope", discovered that the child had been a victim of sexual abuse shortly before her death. It wasn't until 22 years later that police would arrest the girl's cousin for her murder.
* discovering Dexter's secret. The next few episodes explore the consequences of this discovery.
* discovering that Zoe is alive, but that her burns from the encounter with Oasis are so severe that she's been trapped in life-support ever since. Riff ends up

resolved to find her and save her from the pain.
* Discovering the same thing was part of Estela's 'initation', so to speak, into Dragonetz' inner circle.
* Discovering Your Own Dead Body: A person ends up finding their own corpse, either because they're a ghost returning from the great beyond or because they're visiting a time or reality where they've died.
* Discovering Your Own Dead Body: Whether through time travel, visiting an alternate reality where they died, or returning from the afterlife as a ghost, a character comes across their own corpse.
* Discover My Body. He's consistently very upbeat about the deformations his body has accumulated, perfectly happy to detail every bit of the experience from his end—as much as he can manage, anyway.
* Discover's advertising includes a bearded Ruritanian man calling himself "
* discovers he can kill the Giant that commands the unbeatable "Giant's Drink" minigame, but also has to kill the "wolf-children" that he finds, and then repeatedly kills the snake he finds in the tower
* discovers that she likes it. Yet another example of older fans' feelings about loving this show.
* discovers the eponymous robot, long broken down, in the house of its owner.
* Discovery after contact was lost. Then again, it's also designed to survive aerobraking.
* Discovery and several other clones wind up getting carbon-frozen for 43 years longer than intended. They are unfrozen long after the Jedi Order, the Republic, and the Empire have fallen.
* Discovery and the famous shuttle sequence near the beginning are as being zero gee, through actors walking strangely in "velcro booties", and dangling props from wires, etc.
* Discovery Channel, at about :32 in, Adam's tied up in a cauldron, which Jamie has just lit a fire underneath.
* Discovery Channel, a would-be Green Beret became disoriented during an exercise. When asked if he knew where he was, his answer was "Hash browns?" at which point they wisely stuck him in a truck going back to the base's medical station.
* Discovery Channel, broadcast for Shark Week 2013. The Discovery Channel took a lot of flak for not making it sufficiently clear that the show was fake, but they got great ratings.
* Discovery Channel deserves a mention, since that wouldn't exist if sharks weren't so badass and awesome.
* Discovery Channel. Escape artist Jonathan Goodwin got the trapdoor in his (oversized) coffin open, but ran out of somewhere to put the dirt long before he could get a large enough hole dug to get out.
* Discovery Channel has a surprisingly creepy show about real-life hauntings called
* Discovery Channel has dealt with a lot of spin-off channels being renamed;
* Discovery Channel. In a 2014 follow-up, the shark is finally caught, only to have the seal escape intact from its maw, followed by some hapless swimmer, who announces Shark Week in a casual tone.
* Discovery Channel interview once pointed out that even if the information given by psychics were true, it is never the kind of information that is helpful. They usually say things such as a missing person has "left the city." That isn't useful, without some idea where the person has gone. They may say a murder victim was killed by someone who was very angry, but the anger was misdirected or they spend a lot time claiming to have connected with missing person's emotional state, and say "She is scared, but she knows you are looking for her." That may provide comfort to the family of a missing person, but also provide no end of grief to investigators who need more specific information to narrow down a search area.
* Discovery Channel is a show about two men that can't do a damn thing right. Though to be fair, some people may find these ads rather amusing.
* Discovery Channel. It helps that Bell owns it as a result of the Bell-Astral merger.

* Discovery Channel, most devices, vehicles, and buildings tend to have this aesthetic.
* Discovery Channel. One episode features a needs for a generator. The deal chain involves a box of DVDs, a truckload of firewood, and some fish before the generator is brought home to illuminate the cabin.
* Discovery Channel, the narrator explains the effects of hypothermia on human cells, using the term "cell walls", in one episode (and is sure they have used it other times). Animals do not have cell walls (in fact, Animalia is the only kingdom where they are absent). Yes, they probably just don't want to explain what a cell membrane is/assume the audience won't understand the explanation, so they use a term the audience will know. Considering Discovery's association with fact and science, it seems like they would be willing to spend an extra ten seconds quickly explaining what it is.
* Discovery Channel. There's just something hypnotic about automated machinery doing their thing...
* Discovery Civilization Network: The World History and Geography Channel (later shortened to Discovery Civilization Network) was made to focus on current events in the world, partly owned by
* Discovery explicitly references the Abramsverse in season 3 during a discussion of the Temporal Wars, reinforcing its existence alongside the Prime Universe as canon.
* Discovery Family it used "It could happen" and "Where everything comes together".
* Discovery HD Theater was made as an HD version of the main channel. It became redundant when HDTV became widespread, and in 2011 it was revamped as Velocity, a channel focused in cars and stuff. Velocity itself was renamed to MotorTrend in 2018 after Discovery bought the magazine of the same name.
* "Discovery Island", a small inlet just across the river from the Magic Kingdom, opened in 1974 and housed a wide selection of exotic animals and birds. When the animals were moved to Animal Kingdom in 1999, the island was shuttered and sits abandoned and overgrown with various plant species. It has also been
* Discovery, made in 1968. This inspired the design of the iPod, hence the name. ("I'm sorry Dave, I can't play that...") In fact, Samsung has cited 2001's tablet-like devices as Prior Art to Apple's iPad in a patent struggle.
* Discovery organs. It's easy to speculate about what the Klingon females might have.
* Discovery pulls the same trick on them with its experimental spore drive.
* Discovery quotes show that many religions, mythologies and folk tales got updated for a colony on an alien world. The
* Discovery seekers derive pleasure from learning and finding out new things. They enjoy intricate worlds with lots of hidden things to uncover, including not only hidden treasure but also information and exposition that can be unearthed. They likewise tend to enjoy self-discovery, putting their characters through ethical dilemmas and sadistic choices in order to find out who it is they are truly playing. They suffocate in campaigns where there are no unknown regions, secrets, and lore to uncover, and no opportunities to learn who their characters truly are.
* Discovery's, who was played by an actual U.S. Air Force radio operator stationed in England, whom Kubrick hired because he couldn't find any actors who could do this kind of voice.
* Discovery that a little girl actually has XY chromosomes but is resistant to testosterone.
* Discovery Travel and Living Network is a channel devoted to home improvement and leisure-based activities. It was renamed Discovery Home and Leisure in 1998, and then Discovery Home Channel in 2004, before being replaced by Planet Green in 2008, which was focused on ecology instead of leisure. Planet Green was a failure, and in 2012, the channel went back to its original premise with its current name, Destination America.
* Discovery uses her experimental spore drive to save the miners of Corvan II, whose colony is being strafed by Klingon vessels.
* Discovery, who are on an expedition to explore strange findings near Jupiter.

* Discovery Wings was originally focused on aircrafts, but over time, began focusing on the military in general, becoming Military Channel in 2005. Military Channel was renamed to American Heroes Channel in 2014.
* disco, where the backlash (influenced as it was by America's racial and sexual politics) was nowhere near as pronounced.
* Disco Zoo: When you run out of tries on a rescue mission, you can watch an ad for five more instead of paying a Discobux.
* Disco Zoo: While the game has no formal end condition, collecting 10 animals in every pen of 10 regions enables the Time Machine, which resets the zoo's progress in exchange for unlocking a new Timeless animal. Timeless animals earn more coins and stay awake longer than even Mythical animals, and there's one in each region, so it'll take 12 resets to unlock them all.
* discredited in a number of other states as well, as A.) more states have implemented laws against this sort of thing, B.) consumers have become more aware of this and C.) this market has become much more competitive.
* discredited in some parts of the world, but not in others is offensive to the sensibilities of modern Western liberals, but raises far fewer eyebrows in African and Asian countries, and some variant on such was widely-held throughout most of history even in the West.
* discredited like Cedric Alexander(smaller than Punk at 209) had to cut weight to qualify.
* discredited sequel has the Game Grids as a way to kill off invaders or condemned prisoners.
* discredited subtrope of this are the tales, often presented through allegory, of young women who place unwise trust in male strangers, slip into their abodes, and are never seen alive again. Famous fables of this type include "Little Red Riding Hood" (before the Brothers Grimm version introduced a hunter to save the day) and "The Spider and the Fly."
* discredited to a technophobic shut-in, hunkered down in the remains of the old arcade.
* Discredited Trope: A trope is no longer used (or at least no longer used often or as seriously) because of how society has progressed.
* Discredited Trope: A trope that no one plays straight anymore, lest they face ridicule.
* Discredited Trope getting their more well-behaved peers punished for no reason, and can actually cause the ones who normally behave to start being disruptive themselves once they realize they're going to be punished either way.
* Discredited Trope the higher in the officer and NCO ranks you go, as college courses and additional certifications are key to standing out in a group of candidates for promotion.
* Discredited Trope. To put that into perspective water resistant materials such as wax or Teflon have a contact angle of 90-95°. This makes the surface extremely difficult for liquids to settle on, so they glide off with next to no resistance.
* Discredited Trope version: a woman is washing the dishes without her yellow rubber gloves on, and the wedding ring goes down the drain. Cue panicked call to the plumber.
* Discreet Dining Disposal: Character gets food they don't like and so they feed it to a dog.
* Discreet Drink Disposal: A character secretly dumps out a drink they don't want to consume.
* "Discreet" means "showing discretion, not obvious or conspicuous, tactful;" "discrete" means "separate, readily distinguished."
* discrepancies between the two in the cartoon (and even had his name in it changed to Skyfire).
* Discrete Mathematics: An Open Introduction and another with magic chocolate bunnies that multiply following the Fibonacci sequence.
* Discretion Shot: Moments where the scene cuts away or obscures something to prevent the audience from seeing it.
* Discretion Shot: Writers imply that something violent or sexual happened without

showing it to avoid censorship.
* Discriminate and Switch: A character appears to be prejudiced against a character for some reason, but it turns out they are calling out the person for a different issue.
* Discriminate and Switch: I can't stand that guy's kind... and I mean the fact that he didn't wipe his feet in my house. Did you think I was hating him for being black or something?
* Discriminate and Switch: It looks like a person is prejudiced towards someone for one reason, but it then turns out their resentment is for a different reason.
* Discriminate and Switch: Someone is mistaken for discriminating against a person for a particular reason, but it turns out there's a different reason they don't like this person.
* Disc throw it, not just the usual illusion) and harmonize with herself.
* discussed #33. The Unseen, narrating the story, explains that some events are so critical to the fabric of reality that they would always happen somehow, no matter how divergent the timeline.
* Discussed about both Elizabeth (the twins' mother) and Meredith (the wicked stepmother-to-be) in the
* Discussed above. He brings up the point that, if a work of fiction is less well known, a fan of it can feel a bit more unique for knowing about it and feel a stronger connection with other fans of the same because it's not ingrained in the public consciousness.
* Discussed actually appreciate them." Hence people hate Augments, hence more of them turn bad.
* Discussed- a fight occurs, and a hero decides to patent a villain's left-behind tech.
* Discussed, after all) but because it's supposedly sentimental and an integral part of the "Hogswatch spirit."
* Discussed. After Onestar dies underwater, Harespring is worried that Onestar won't be able to run in the skies with the other WindClan dead. WindClan practices leaving their dead in the open so that their spirts can ascend to the sky. Being buried or drowned is considered the worst way to die because spirits can't ascend properly.
* Discussed again in the season 2 episode "Cobbler" when Daniel Warmolt, a new-time drug dealer who's been ripped off by Nacho, calls the cops to complain about his baseball card collection being stolen, but the cops quickly suspect that he's a drug dealer and start investigating
* Discussed again in "The Ultimate Sand Castle" where Lucy wants to get bit by a shark so she can have a cool scar, and Lola and Lynn Sr. are afraid of being bit by a shark.
* discussed Akane calls Youko out on her uneasiness, saying "You're not thinking something stupid like 'I'm not good enough for him', are you? What's done is done, just go with it and be happy."
* Discussed. Alex is introduced helping her actor boyfriend rehearse a scene where his character has to defuse a bomb. Jason wonders why his character wouldn't just rip all the wires out and Alex replies that it's probably a dummy mechanism that will trigger an immediate explosion if removed.
* Discussed; Alice mentions that one of the first things that turned her on to Michael was a carrot cake he made for her, which was her favorite food.
* Discussed. Alien abducted SEMME agents were given a variety of superhuman powers, and martian technology can do things like resurrect the dead. Joyce remains a devoted Christian despite the fact that, as her boss points out, Jesus didn't do anything they couldn't do.
* Discussed: Amber laments that she can't tell people not to think about things she doesn't want to see in their minds, because it just makes them think about them more strongly.
* Discussed: an article that talks about how "science vs. magic" shouldn't really be a thing points out that despite what some people think, a computer and a candle both qualify as "technology".

* Discussed. An attractive female exterminator shows up and develops a crush on Dale; his wife Nancy, who'd been cheating on him for years, admits that not only does she have any right to complain, but it'd be pretty karmic if Dale ran off with the other woman. Ultimately, however, Dale only loves Nancy and stays with her.
* discussed and asked him if the adage among actors that the hardest thing to do was to work with animals and babies was true. Guttenberg smiled, shook his head, and told him "That's not true at all. The hardest thing is not working."
* Discussed, and asks for his help. Mistaking this for a threat, Finn casually warns her that he's "especially agile when I'm nude."
* Discussed, and becomes the first human to have ever laid feet on Ponyville. Twilight assures him this is an honor; Phoenix... doesn't think so.
* Discussed and defied in regards to Nyssa and Sara Lance. Nyssa comments that she found Sara alone, starving, and frightened, took her in, nursed her back to health, and ultimately trained her to be an assassin. Sara however insists that she wasn't with Nyssa because of the rescue, but because she genuinely loved her.
* Discussed and defied when Loki, god of mischief and lies, intervenes to prevent Hel from cheating. Hel attempts to call him a hypocrite who flouts the rules and takes offense when others do so, but Loki retorts that he's not making a principled stand against cheating, he's just sabotaging a rival whose cheating works against his own interests.
* Discussed and having a few minutes of violence and death isn't bad karma for ruling an empire or living "like a god" for all that time.
* Discussed and inverted in the plot of the film. Cable intends to travel to Deadpool's present time to
* Discussed and is often invoked in both of their thoughts about the subject.
* Discussed, and it's suggested Will is going this route with his nanomachines.
* Discussed and parodied in "Homer at the Bat" when the Springfield police arrest Steve Sax (long story) and when Sax asks for his lawyer, they laugh him off and tell him he watches too much TV.
* Discussed and says, "Now why do they always say that at the end, eh? Why, 'Oh, mother?'"
* Discussed and strangely implemented in the "Time Jerker" episode of
* Discussed and subverted when Georgia meets Brownie Mannix for the first time in book 1, and she explains that she's there because she's "trying to establish the provenance of a human skeleton that was recently donated to our collection". Brownie replies that he's been at the carnival since he was born, and he'd been sure there was no towner story he hadn't heard... "But you have indeed come up with a new one."
* Discussed) and their Romulan counterpart Commander T'Cel. If it works, the day is saved. If it blows up in their faces, they're expendable.
* Discussed and then defied when John texts Dave saying he thinks there are monsters in his house; Dave
* Discussed, and then never learn the moral necessary to undo the body swap. This would effectively give the parent eternal life, so long as they keep having kids, switching bodies, and letting the kid they switched bodies with die of old age early.
* Discussed are one such example, and are introduced in the first book arguing about something else entirely).
* Discussed around which the first series revolves, actually avert this (even in military vessels), designed with aesthetics as a secondary concern to functionality but still considered. 9th millennium characters consider their own vessels ugly and utilitarian by comparison.
* discussed, as the actor who plays Cripple Billy is almost always able-bodied.
* Discussed. As the prosecution closes in, Peter intends to plead he's not guilty of murdering Susan because it occurred while he was sleepwalking and therefore he wasn't in control of his actions. His lawyers state that the jury will probably just see this as a new spin on the insanity defense and that it probably won't work; they tell Kay that while this defense is applicable in Canada, in the United States sleepwalking isn't a valid defense in a murder trial, and there are two

people currently serving life sentences in the US for committing murder while sleepwalking.
* Discussed" as the singer warns the song's subject that the arrogance they display in their ruthless pursuit of fame will eventually cause them to make a fatal error.
* Discussed as two examples of manga that started out satirizing their genres before evolving into the thing they were satirizing.
* Discussed, a surprisingly large amount of the Royal Manticoran Navy's officer corps came up from the ranks.
* Discussed at length by the characters of "Die dampfenden Hälse der Pferde im Turm zu Babel", a language-play children book by Franz Fühmann.
* Discussed at length in the Season 2 episode "Elementary, Dear Data". In an argument between LaForge and Pulaski, LaForge argues that Data is capable of original deduction, while Dr. Pulaski counters that while Data's deductive skills may
* Discussed at length when Torg and Sasha face a giant monster. Sasha recommends using their one bazooka shot to hit it
* Discussed at the end by Mr Bennett, after Jane and Lizzie have become engaged in quick succession: "If any young men come for Kitty or Mary, send them in, for I am quite at leisure."
* discussed based on nothing but the sound of her voice. Eventually, however, Haggard questions whether that automatically means she's physically as beautiful as Sweetwater imagines, noting that he has a cousin with a beautiful voice "but a face like a can of dog food".
* Discussed. Ba'wov espouses this in the opening when she and Brokosh are being interrogated by the Department of Temporal Investigations. Brokosh correctly points out that you always get a lawyer regardless of your guilt or innocence.
* Discussed below. The etymology of the term is complicated, but the short version is that both are acceptable.
* Discussed be people put off by it, and thus they basically need to pick a lane and pick an audience, stick with the bit, and hope for the best rather than attempting to please everyone and ultimately pleasing no one.
* Discussed between Bernadette and Denise regarding Howard and Stuart, respectively, during
* Discussed between Grouchy and his love doll Angel when Angel comes to life as a real person in the
* Discussed between Matson and Rod. Any planet hosting the survival test would be Earth-like to ensure a challenge that can beaten. Students would be formally warned of a hazardous environment beforehand.
* Discussed. Bulma grabs Yamcha by the ear when he suggests she shouldn't be where Freeza is arriving on Earth.
* Discussed, but cannot actually stand up. Presumably it's just done to look impressive.
* Discussed, but Chase theorizes it was the reverse ("probably tortured his parents, not the other way around"). (Naturally, it turns out neither extreme is true.)
* Discussed, but is dismissive of American martial arts sports' use of belt color to denote skill level. At the tournament he only describes Daniel as a black belt to get him past the door, since it's only open to brown belt or above.
* Discussed but subverted in book 2, when the lawyer of the by-then deceased James Delacorte calls Charlie to meet with him about the will, and Sean Harris jokingly suggests that Delacorte might have changed his will to include Diesel as an heir. (It's actually because Charlie's been made co-executor.)
* Discussed by Batman when he tells Harley that, even if she succeeded in killing him, the Joker wouldn't believe it, because any proof of it would seem faked.
* Discussed by Eren and Armin when Eren sees children who remind him of himself, Armin, and Mikasa, and notes that the kids will probably see what they saw when the Colossal Titan broke the wall. It's then averted, as Armin says that this time there are soldiers on the wall who are ready to fight and that those soldiers are them, and they succeed in stopping the Titan and saving the people inside the wall.

* Discussed by Frozone and Mr. Incredible when recounting stories of their glory days:
* Discussed by Garibaldi in an introspective moment in season 5 as things move towards war with the Centauri. To paraphrase, he wonders aloud why we always divide history by the wars, not by the periods of peace, and comes to the conclusion that wars are just more fun.
* discussed by having another alien faction attack, killing the female lead, and causing the president to decide to veto the treaty. Rebecca then gave up in disgust.
* Discussed by President Bartlett, Leo, and Adm. Fitzwallace in Season 3 of
* Discussed by Sam Starfall. Since members of his species are either sterile or non-sapient breeders who die after spawning, their only legacy is their reputation. Sam is thrilled to be known across the planet as an incorrigible thief, rogue, and scam artist because it means he's relatively famous.
* Discussed by shaving his head, unable to understand why someone would throw away such a beautiful gift.
* Discussed by Tarquin, who suggests that in the event of Roy and Durkon dying, Elan can simply have one of these before hiring
* Discussed by Thane Krios, who spent years tracking and killing his wife's murderers, but became a
* Discussed: by the structure of the setting, all subordinate units are compelled to automatically obey the orders of any superior. That means
* Discussed by Whis, who talked about having a hard time seeing in the dark after the god of destruction started making stars vanish when he woke up cranky, in reference to said god nearly killing Goku and Vegeta for waking him up three years early.
* Discussed by Willow and Tara in their first major fight over Willow's overuse of magic.
* Discussed by Yomo, who explains to Touka that it is the duty of the survivors to continue living with their pain.
* Discussed Captain Kanril Eleya, mentions in passing that she was conscripted into the Cardassian Guard.
* Discussed Castle notices this, he even says, "Where's the big creepy wall of Jenna?"
* Discussed; Charlie Brown reads a bunch of fairy tales and concludes the prevalence of the trope is evidence of a massive conspiracy against stepmothers.
* Discussed comments that humans should just stop wearing clothes — it'd be a lot funnier.
* Discussed". David Gurney believes that someone is attempting to drive him crazy by buying off everyone who knows him, including his wife Wilma, his best friend Pete and his own mother, so they will pretend not to know him.
* Discussed destined to die that very day (which is the protagonist's belief), or if it's a straight example of this trope (as a minor character thinks).
* Discussed during a training simulation in an empty building. Bakugo is berated for using a blast that blew a large hole straight through several floors. Since the buildings in real-life villain attacks will most definitely
* Discussed during a very awkward dinner between Walt, Jesse and Skyler.
* discussed episode when the robotic janitor at the Wax Robot Museum (who happens to be made of wax) takes a break, and Fry mistakes him for an exhibit.
* Discussed film because it was different from the sequels, but after re-watching it admits that the movie has "the same shit [as the other films], just less of it".
* Discussed first season finale, "In the Hands of the Prophets": the events of the episode are set into motion when Vedek Winn, a dogmatic leader of Bajor's faithful, takes issue with the fact that Keiko O'Brien's teachings of the wormhole are completely secular, referring to the Prophets, the gods of Bajoran religion, as "wormhole aliens" or "wormhole entities". Tensions begin to build on the station as Winn stigmatizes Mrs. O'Brien and drives a wedge between the station's Bajoran residents and Starfleet personnel. Parallels are also drawn between this conflict and Galileo, whose teachings of heliocentrism (the earth revolving around the sun,

instead of the sun revolving around the earth) was similarly stigmatized by his more religiously ardent contemporaries.
* Discussed for the show cited this very page in explaining the problems with enlarging arthropods and mammals.
* Discussed for the war. This is never mentioned again, mostly because, thanks to a well-placed spy, China's opponents know exactly what they're doing.
* Discussed galaxy, as in real life, binary systems are extremely common.
* Discussed gets hit on the head with a flower pot and becomes a successful singer — but as a consequence, he gains amnesia and forgets everything about his past life, including his girlfriend Daisy Duck. When Daisy consults a psychiatrist about what to do, he gives her two options:
* Discussed "goes for a walk", an offer which Captain Sheridan declines.
* Discussed grill he found in the trash would be worth a king's ransom on his planet.
* Discussed. Hanks claims you can do a stereotypical Scottish accent by saying "silver plate" in a particular way.
* Discussed) heads south—"Until every last one of us is dead!" is her answer to how long the force will fight.
* Discussed He also notes that it flopped in his native UK, probably because of this.
* Discussed he can set fires with these when the torch is seemingly lit on its own, until Twilight sets him straight.
* Discussed her. While she had reason to believe she could take Twilight (who was currently unable to work magic due to Rhynorn's Flu), the thief is still forgetting two things she should know perfectly well.
* Discussed him), and he says their hovercraft won't carry five. Zoe says they could've dumped the cargo, but Mal says they couldn't afford to fail this job.
* Discussed, Huey and Louis are talking trash with Ray Vecchio, and they make tentative plans to duke it out on the roof of the precinct later.
* Discussed (if he wears the mask, he can read minds voluntarily. If the mask is removed, then the thoughts of every human within ten miles force their way into his head). Liquid comments that he doesn't know if the mask itself is magic, or if it's just a placebo that Mantis is dependent on to control his powers.
* Discussed in a 1980s PIF about electric blankets, where the narrator states that they were initially going to make their point by showing a bed on fire and someone caught in the flames, but decided against it as it wasn't nice to think about.
* Discussed in a German political cabaret sketch. It was way back when the right wing coined the term "red-green peril" in analogy to "yellow peril", and the left wing fired back (freely translated excerpt, to be mentally read in "breathless" style):
* Discussed in a guest strip, where Toni suggests Kat as a possibility for {...}'s lost name. Her reasoning is that since he was drawn to Hanna, his own name must also be on the feminine end of the gender spectrum.
* Discussed in a late 2013/early 2014 commercial for the New York Lottery which asks what you will think of when you don't have to think about money. We see a man driving an expensive car and thinking "If you rip the last page out of a mystery novel, does it make it a better mystery?"
* Discussed in an ad for Oscar Health Insurance, which depicted a (mythological) troll on a laptop, accompanied by "Ask a doctor instead of randos on the Internet."
* Discussed in another episode: Kramer has an epiphany that women are attracted to men who snub them. George quickly debunks the theory.
* Discussed in another episode where a white woman is attacked in Central Park in what appears to be a mugging, prompting a storm of media interest. In this case, it turns out that the victim's husband hired someone to go after her:
* Discussed in another instance in the series. Wedge comments that sometimes he half-expects lost squadmates to walk into his office one day. (Usually in these cases there's no body because they were incinerated when their X-Wings were blown up.)
* discussed in "A Special Edition". Dr. Avery Strong says, "This isn't an alien

autopsy hoax. This is real!" regarding that evidence that he has gathered about secret government experiments.
* Discussed in a the first season episode, "Dead Man Talking". Tony and McGee are on a stakeout, with Tony wondering what kind of practical jokes he can play on Kate. McGee is reluctant, but mentions that they could invoke this trope on Kate without risk of pranking Gibbs in the process.
* Discussed in "Black Widower" with Selma sending the family a tape of her and Sideshow Bob's honeymoon spot and pointing out the cheap 30-
* Discussed in chapter 20: Twilight mentions having had feelings for a boy from another dimension once (she doesn't say outright, but from the context, it's pretty clear she means the human Flash Sentry), but when faced with this trope and knowing she had her responsibilities in Equestria, she chose to return home.
* Discussed increase in the volume of space that needs to be governed, lawmakers are far overtaxed and are pushed to unorthodox means of managing their bailiwicks — such as a hokey rancher-sheriff with a herd of genetically enhanced pigs.
* Discussed in "Diamond's Dazzling Diaper Day" when Diamond mentions having a nightmare that
* Discussed. In hindsight, of course, Depp was marketed as the star of the film.
* Discussed in Lunar society. In a closed environment with no nudity taboo, actual nudity is considered a sign of either stodginess or poverty, neither of which are particularly attractive.
* Discussed in "Nepenthe" when Rios suspects that Raffi is a Tal Shiar mole.
* Discussed in one episode where Jill's dad dies, and as the family prepares for the funeral Randy keeps cracking bad jokes. Tim talks with him and says he understands that the joking is a coping mechanism, and advises Randy to save the jokes for him because he won't be offended by them.
* Discussed in one strip. After a string of robberies, Sherman theorizes that the jellyfish is behind it, to which Hawthorne claims that he doesn't have the intelligence to pull it off. Sherman then suggests that perhaps his lack of intelligence is just a disguise. Hawthorne doesn't believe it.
* Discussed in 'Pickle Rick', when Rick finally winds up at the therapist's office and she plainly tells him that the key to actual self-improvement and fixing his issues is, quite plainly, work — work that he'd find too tedious and boring to actually commit to, but would honestly be the best way forward. She ends her session by remarking that Rick is simply someone who'd rather get himself killed than be bored.
* discussed in reference to the Breen, comparing it favorably to the Klingon approach which the Lethean gun-for-hire protagonist Brokosh has a very dim view of.
* Discussed in regards to his anxiety over body-length mirrors in the gym. He imagines that these types of people would be the only ones who would enjoy watching themselves work out:
* Discussed in regards to Luke. Much is made over the fact that he's able to walk away without a scratch from things that would kill a normal person. Claire mentions when she first meets him that when Jessica shot him point-blank in the head with a shotgun to break Kilgrave's control over him, that should've turned his brain into mush, but didn't because of Luke's durable skin. Furthermore, he recovered from that within a span of hours, not days like most people would. His quick recovery is thanks to the fact that the experiment that Luke was subject to in Seagate was meant to accelerate his healing, but due to Rackham's last-minute sabotage, ended up giving Luke his durable skin.
* Discussed in relation to Chiss names and the difficulty humans have pronouncing the full versions and why they prefer humans just not try. “Pronounced improperly, [Thelea’s] name can inadvertently sound like our language’s word for a small tunneling rodent that lives in the high snow pack on our world.”
* Discussed in religiosity rather than decreasing. Their religion teaches that other species are soulless abominations lacking in true intelligence and sentience, more akin to animals than people, going so far as to use captive humans as sacrifices. Later they explain that species have been observed as having two

reactions to finding other life and going into space. One is becoming humble, and no longer thinking they were the center of the universe. The other is doubling down, becoming very xenophobic. Obviously the Krill did that. Ed mentions before they were more peaceful, and it's possible also had a more passive interpretation of their religion.
* Discussed in SBEmail 206, when Strong Bad is listing various ways that the Internet has dumbed down April Fool's Day.
* Discussed in "So Long, Goodbye" by 10 Years. The singer feels he and his love are too different to be together, but he wishes they could be together in another life.
* Discussed in "Stardust City Rag" when Seven of Nine asks Picard if he got his humanity back after being liberated from the Borg.
* Discussed in superhero comics. Bill points out that, whereas most heroes have to put on the costume to become their alter egos, since Superman was born as the alien Kal-L, his alter ego is in fact Clark Kent. Bill theorizes that Clark Kent is Superman's critique of humanity, comparing him to the Bride trying to blend, in when she was really born to be a killer.
* Discussed in the aftermath of Darlene and David's wedding. Not because of Dan's heart attack or her pregnancy, but due to one of Mark's stoner friends who was hired to film the wedding being so high that they passed out, dropping the camera in one of the dips where it remained filming for the rest of the ceremony.
* Discussed in the book where Afra rejects this accusation by saying that he and Rowan were never meant for each other.
* Discussed in the episode "Black-Eyed Please" where Ned Flanders wants to pray for Homer Simpson in the hospital but Homer wants Ned to pray to
* Discussed. In the episode "Schooltown Follies", Beatrice accuses Wirt of being this. Annoyed, Wirt purposefully obeys everything Miss Langtree and Greg say just to slow down their progress to Adelaide's and spite Beatrice.
* Discussed in the episode with the astronaut. While explaining his job to a class of kids, Monk says that the police can make numerous mistakes and still catch the criminal. The only way for a criminal to get away with a crime is for them to not make a single mistake. Because no human being is perfect, the odds are heavily in favor of the police.
* Discussed in the finale episode, where many of Jane's childhood telenovelas ended with a wedding.
* Discussed in the Fishman Island arc, during a flashback: Vander Decken is talking about marrying Princess Shirahoshi for her latent powers, who was still 6 at the time. His subordinate then tells him about a national treasure, a kind of drug that can age up whoever consumes it, and it might solve the age problem. The problem is, as said subordinate points out, the treasure is tightly guarded by the royal palace and the only legal way to obtain it is... marrying the royalty (the princess, in this case). In the end, though, Decken just decides to
* Discussed in "The Old and the Restless", where Albert wants to go swimming in his retirement home's pool, then when his grandson Lincoln offers him his trunks, he says he won't need them.
* Discussed in "The One with The Lesbian Wedding." Rachel's mom asks her "what's new in sex?" and Rachel snaps, calling her out for being so casual about her upcoming divorce, and she responds that she thought she felt unhappy in her marriage for a long time, but became sure she wanted to end it when
* Discussed in the Otomate Party 2013 event, after the sequel game announcement, where Sousou, Chouryou and Chouun promise the heroine that even if their relationship resets, they'll find a way to be together again and Kakouen
* discussed in the pilot episode. The troopers joke about how they should sue their recruiter.
* Discussed in the radio and stage version of the "Are We The Baddies?" sketch in
''
* Discussed in "The Routine", where Richard’s chores list has only one item. When Gumball asks about it, Nicole replies that
* Discussed in the same movie as a sentiment expressed in the past by Nick Fury,

which was
* Discussed in the The New Testament, when Jesus, in the Sermon of the Mount, rejects the practice of revenge in favor of
* Discussed in Tom Lehrer's song "Lobachevsky," in which the protagonist has written a book in a highly-specialized field of geometry.
* Discussed in UK Season 2 when the queens had to pay tribute to a British queer icon on the runway. The two black queens of the season, Asttina Mandella and Tayce, both planned on dressing as supermodel Naomi Campbell. When they realized this, they admitted there weren't many black queer icons in the UK to choose from, so they both gave each other their blessing to do Naomi (Tayce later admitted in retrospect that
* Discussed in-universe in the manga adaptation where Tadashi was sucked into a portal during a failed attempt to bring Abigail back. It's theorised that he could still be alive in another dimension.
* Discussed in-universe. There is a conflict between General Ironwood and the Beacon staff because Ironwood believes in closely associating authority with the amount of ass-kicking that authority is capable of. It's why he insists on bringing an army to Vale for the Vytal Tournament. By contrast, Ozpin, Qrow, and Glynda fear such displays will backfire rather than be helpful. The lesson the Beacon teachers seem to teach their students is that authority requires leadership ability rather than combat skill, something that Ozpin makes a point of telling Ruby to make her take responsibility for her position as team leader; this is a lesson that Ruby then passes on to Jaune, for the same reason.
* Discussed in Whitney Cummings' standup. She says she has very little sympathy for men who complain about gold diggers, since, she points out, the problem can very easily be avoided by dating women who are old and successful enough to have their
* Discussed is heading skyward, which Mal rebuffs with, the Mule couldn't fly with the extra weight, none of his crew are expendable, and they plain couldn't afford to dump the cargo either.
* Discussed. It is apparent to characters that General Ironwood's militancy, paranoia, and domineering, uncooperative and controlling nature are easily exploited by the villains. Tyrian comments that Salem's plans depend on Ironwood maintaining a mistrustful attitude, while Cinder observes that Ironwood's extremism makes him predictable.
* discussed. It's not perfect, however, and Tails feels the weight of everything he's carrying, and his hammerspace can implode if he loses all his Chaos power. Carth Onasi eventually dubs it "tailspace".
* Discussed. Jacques's obsession with winning makes him a perfect dupe for Watts.
* discussed". Joe Britt accuses his wife Phyllis and the TV repairman of plotting to drive him crazy after his recently fixed TV shows him incriminating scenes from his life.
* Discussed, just after a wargame in which ex-General Karl Tagon called down an artillery strike on his own squad of hand-painted duck-lobber gnomes in order to ensure victory.
* Discussed just before interviewing the last person to see the victim alive:
* Discussed, lampshaded, mocked (they even mention Notting Hill) and finally heartbreakingly subverted in
* Discussed later: in the lead up to their third fight, Necromancer admits to Hekate that he normally does that for the intimidation factor, since most non-magical opponents would be frozen with fear just by the name of his spells. He goes on to say that the next time he fought Fey — who was considerably more powerful than he was, but much less experienced (sort of) — he would have to keep that habit in check.
* Discussed later when she asks him if he still had the Navy uniform, he says no, but might have an old band uniform from high school. Rachel says to remember all the sex he
* Discussed magic, especially when transformed. An observer might see a Princess dodge out of the way of a blow and then throw a fireball back at her attacker, and

conclude that the dodge was "mundane" while the fireball was "magical". But in truth, both are equally "mundane" or equally "magical", in that both are equally natural expressions of the Princess's will and nature.
* Discussed. March 2018 was dedicated entirely to reviewing shows about cops with robot partners.
* Discussed Maria tells Valentine that she could literally feel her brain cells dying as she watched it, while Valentine tries to defend its merits and those of Jo-Ann as an actress, arguing that Maria probably would've loved the film if it'd been set in a factory or on a farm — which Maria happily admits to, saying that she can't take a film set on a spaceship seriously and frequently bursting into laughter as Valentine lists off numerous fantastical plot elements in the course of defending the film.
* Discussed. Matthew talks about that one friend who's a total downer and nobody likes, but who the group feels like they have to invite because they're part of the group. Matthew then says that people should just not invite that person anymore.
* Discussed. Matt mentions iTunes as a third option to Blockbuster and Netflix.
* Discussed—when Kensi's cell phone rings and sounds like a red alert siren, Deeks asks if they now have to man their battle stations.
* Discussed; near the end of the film (which, due to the reverse chronology, happens before the other main events,) Alex's boyfriend playfully says that he "stole" her from a friend of his (with whom they both remain on good terms nonetheless) to which she says that he can't "steal" her because it's always the woman's choice and "(she is) not an object". This comes after the audience has watched her being used as exactly that and having her choice violated in the most brutal way possible during the film's notorious eight-minute rape scene.
* Discussed nerves, especially Stabler's) makes a paperwork error that lets a killer go free:
* Discussed") not only runs counter to Federation values but is actually unconstitutional under the Articles of Federation. However, the humans are terrified of Augments thanks to the Eugenics Wars, and because they have so much political mojo in the Federation, nobody's had the balls to mount a legal challenge and get it struck down.
* Discussed of course. And, of course, plenty of buzzers went off on the mention of the word 'bannister'. Apparently, the correct term is 'balustrade' for the top part, and 'baluster' for the uprights.
* Discussed of this trope... And she'll only grope Marinette when she's comfortable with it, and without excuses.
* Discussed: One (elderly male) scholar's writings attribute a girl's supernatural experience to her first period, which he calls "a highly dangerous time in the spiritual life of women". The women who read this excerpt think he's just projecting his own fear of menstruation on the rest of the world.
* Discussed. One member of the council in Rivendell suggests chucking the Ring into the ocean (it'd be easier than taking it to Mount Doom). Elrond rules it out immediately because A) he apparently knows about plate tectonics (the line goes something like "the ocean may eventually become dry land") and B) it doesn't solve the problem of Sauron coming back.
* discussed, on the other hand, is praised for averting this trope, as the Nazi imagery in the film has the piss firmly taken out of it, and the only actual Nazi character is portrayed as a pathetic buffoon.
* Discussed. Penny accepts, explaining afterward to her friends that Meg is practicing this trope, but that she plans to use it against Meg. At the party, Penny takes embarassing candid photos of her and shares them with her classmates, thereby ending Meg's reign as queen bee.
* Discussed people and does not downplay the trauma. This is demonstrated most clearly with Yuri, whose fascination with sensation means she can be covered in scratches and not slowed down, though all four of them have demonstrated mild irritation at serious injury over the course of the fic.
* Discussed philosophy states that once a prophecy is made, it can be interpreted anyway you like. Eowyn interrupts their bickering and immediately kills Witch King.

* Discussed plot lines"...but no, she just uses her nigh-omnipotence to give women easier childbirths and other nice things.
* Discussed points out the idiocy of making a bulletproof costume and then putting a hole in it right over your heart.
* Discussed "Professional Pirate," who notes that whether a pirate is considered a hero or villain depends on who tells the tale, offering the English and the Spanish's differing opinions on Sir Francis Drake.
* Discussed". Professor Kurt Meyers speculates that the motionless people that he, Captain James Webber and Peter Kirby encounter on the asteroid are frozen in time. However, he admits that he does not really believe it himself.
* Discussed, prompting Estelle to ask if that makes Rita the straight woman. Rita flatly says she's "not a member of [their] crazy comedy act".
* Discussed regarding the acts of vengeance between the legitimate and illegitimate descendants of Esteban Trueba.
* Discussed, right after Jagiello loses his grip on a ship's mast, narrowly avoids the deck, plunges into the sea, and is pulled out roaring with laughter: in a bit of metafictional humor, Jagiello jokingly says that the hero of the story never dies in such a unspectacular fashion, and that he considers himself to be the hero of his own story.
* Discussed, right down to the trope name. Bill argues that, thanks to the advancements in technology that allow work to be done anytime/anywhere, the boundaries between one's work life and one's personal life are eliminated, thereby making both unhealthy.
* discussed said children are superheroes and pretty good at defending themselves.
* Discussed say "Pardon me?" and replies "You are officially pardoned!"
* Discussed says she's actually bluffing, though: she actually doesn't know if she's bulletproof and isn't interested in finding out.
* Discussed series by youtuber Potential History. In both videos, he lays out the basics of why it would be realistically impossible for Nazi Germany to come out of the war as the victor due to not having enough resources when they started it, and having too many enemies/fronts to fight on after their initial successes slowed. A quote at the end of part 2 (which was made in response to people's claims about his first video) sums up the issue very well:
* Discussed series. David is very much a frontline general, though he also is heavily involved in the behind the lines planning and logistics. When April, afraid of an upcoming battle with the Hetwans, asks why they can't stay back in the rear echelon, David explains that it's one of the "advancements in warfare" that she had previously been droll about.
* discussed several times (2001). Flavius Aetius presents the young Attila's chief with one of his men who has been tortured as a pretext for taking on a rival tribe. Attila accuses Flavius of having inflicted the torture marks himself as they've been done post-mortem. Later after the chief dies, Flavius warns Attila that he needs a pretext before returning home to take on a rival, so Attila accuses him of murdering the previous chief. After Attila creates the Hunnic Empire, he uses an earlier offer of marriage by the sister of the Roman Emperor (and half their empire as dowry) to invade their territory.
* Discussed she admits that yes, if this case goes to court then his big, powerful law firm will probably win...but her case is strong enough that it will be a long, difficult trial, and them having such trouble against her will make them look stupid. After a moment of thought he agrees to a settlement.
* Discussed show. However after his attempt to break into film petered out he found that getting a lead role on a new TV show was nearly impossible. As Marvin points out early in the movie, most networks are only willing to hire Dalton as a one-off villain so their show's new rising star can get the rep boost of beating Dalton.
* Discussed) Sinclair and Garibaldi are the last ones off the station.
* Discussed so chose the path he was more comfortable: facing down the divine rage of Ishtar's father.
* Discussed's offense hurt less and declaring sober Punk would never be able to defeat Joe.

* Discussed. Some of the names of alien animals and plants are... strange.
* Discussed: some take their well-trodden path and run it with charm and enthusiasm. Others just cover the same ground over again because it's expected of them.
* Discussed, so she snorts a line of coke in a back room as he walks in. The two of them commiserate over how counterproductive the department's drug policy is, with O'Reilly mentioning that back in Harlem she worked a club where they wouldn't let you in the back room unless you'd used a little.
* Discussed (specifically the Natalee Holloway case) when McNulty and Freamon suggest that the lack of support from their bosses in solving more than twenty murders is due to the victims being poor and black, leading to the episode's epigraph — "This ain't Aruba, bitch."
* Discussed's stubbornness and tenuous grasp on logic, who declares that he would never "allow" his parents to not conceive him, and would somehow have an entire different family, if that's what it took to be born.
* Discussed. Steve is talking to his agent Marty about Marty not getting him any stage work (instead of all the commercials he's doing).
* Discussed story "Jeeves Takes Charge", in which Bertie wonders how those murderer chappies get about it (fortunately all he has to dispose of is a book).
* Discussed strip, which has Calvin ask his dad whether this ever happens. When he says no, Calvin bursts a blown-up paper bag around the corner, asking whether he was fooled.
* Discussed's villain wasn't a young Ursula, but a new character with the same backstory and a similar appearance.
* discussed talking in front the class, the narration notes that most adults would suggest to her that on report day, she imagine her classmates sitting in their underwear, but Missy knew that wouldn't make a bit of difference. She instead has Melody practice with her and continue practicing repeatedly with her parents until she can walk into the classroom with confidence.
* Discussed than in tactics that do the most damage with the fewest deaths.
* Discussed that they pick Jane Siegel as a "Jackie" despite being no more chaste and proper than Joan who is a "Marilyn" or rather "Well Marilyn's really a Joan, not the other way around". Later Jane marries Roger Sterling (a former flame of Joan's) after leaving his wife of 20 years and he cheats on her with Joan, resulting in a son, before divorcing Jane.
* Discussed that transmit solar energy to Earth and the Solar System's other inhabited bodies.
* Discussed, there's never a side of green pieces that suddenly appears mid-match and attacks both sides (referring by implication to the zerg and protoss attacking in the middle of his guerrilla war with the Confederacy).
* Discussed. The Shen Gong Wu scroll says that it "is only to be used as an absolute last resort."
* Discussed The survivors then boil down their conclusions to three rules about extraterrestrial civilizations.
* Discussed. The Tripods are capable of interplanetary travel but still use plain old white light to scan areas rather than infrared or radar. One character points out that technological progression is not the same between cultures and points to the Mayans, who had an advanced road system but no wheels.
* Discussed. They feel that the fact that Earth has only one sentient race (Malacandra has three) must profoundly narrow our perception of the universe.
* Discussed). This ends with her comparing herself to Tinker Bell and making everyone clap for her.
* Discussed. This is what Elizabeth thinks a manhole is intended to be.
* Discussed to make important decisions without seeking input or permission from senior leadership who may not be immediately present or available.
* Discussed to open new accounts with what they call the "executive account," which emphasizes features to ensure privacy against snooping wives (like sending statements to a man's office, rather than his home).
* Discussed. To paraphrase, if someone's willing to kill a cop, would they hesitate

to kill a civilian?
* Discussed Trope actually says that for a couple to succeed in the long term, they must have opposite temperaments alongside with similar lifestyles and independent realization. The protagonist and his fiancee agree on this being the case for them.
* Discussed Trope, after Mom slaps her sons around and plots world domination. "Someday I want to marry a girl like her."
* Discussed Trope and having a completely different personality, Dale wasn't even in town when Joseph would've been conceived. Dale convinces himself that his wife was impregnated by aliens because he was too close to learning the truth about UFO sightings.
* Discussed Trope, and that she shouldn't assume he doesn't appreciate or care for her just because he doesn't show it.
* Discussed Trope, and the panelists question whether it was wise to change this policy at a time of total war when Britain was in serious need of badassitude.
* Discussed Trope aren't even that strong, especially compared to Hilda's screen-filling blades of raw darkness. Linne just has thousands of years of experience and technique, and her swordplay is incredibly dangerous as a result.
* Discussed Trope, as Elsa and Honeymaren recall the lyrics to "All Is Found", a Northuldran lullaby that Queen Iduna once sang to Elsa and Anna:
* Discussed Trope, because once an asset is recognized as reusable, it becomes "trash", much the same way food becomes trash when you put it in the sink.
* Discussed Trope; being someone who was raised as a Christian, became an atheist in college, and then regained faith, he believes the attitude to be a form of "chronological snobbery", and the idea that the ancients discovered some profound truths and we would be wise to learn from them is a recurring theme in many of his other works.
* Discussed Trope. Chandler is worried that his actress girlfriend Kathy is cheating on him with her co-star after seeing their steamy sex scene, but Joey assures him that actors that are actually together have no chemistry with their co-star.
* Discussed Trope. Claire's love interest Klare is on his way to the airport en route to Finland while Fleabag and Claire are attending their father's wedding. They discuss how creepy and/or clichéd it would or wouldn't be to do this, but ultimately Fleabag convinces Claire to do it anyway.
* Discussed Trope dialogue and has to be repeatedly told that the viewers aren't as dumb as he is.
* Discussed Trope enough to contemplate and make said decision is proof the androids can avoid past mistakes.
* Discussed Trope. Harry works at an ad agency. He says he doesn't get an ad. Ellsmere suggests it's because Harry doesn't have any brains. Harry's boss leaves no doubt this trope is in effect.
* discussed trope "I cannot describe Zombie Head on a Stick any clearer than her name does."
* Discussed Trope in book 12, as Snicket explains the difference between the dénouement and ending of a story, in traditional Snicket style.
* Discussed Trope: in the episode "Make Love, Not Warcraft", Cartman directly asks Clyde if he would go back in time and kill Hitler given the chance, then adds that he himself wouldn't because he thinks Hitler was awesome.
* Discussed Trope "Isekai" episode, when he discusses harems. He breaks character in shock when he reads that this is a popular trope in his script, and then lampshades the creepiness of the protagonist supporting slavery instead of heroically ending it.
* Discussed Trope) Life on Earth was begun by spores traveling through the universe is the next theory advanced after spontaneous generation of life is discarded. It, in turn, is also discarded, because of the complications required for such microscopic life to both survive the trip to a second planet in a new solar system and the fact that it merely displaces "how does life originate?" to a different planet.
* Discussed Trope novel. Dessel (the future Darth Bane) gets attacked by a fellow

miner, and they get into a fistfight. Then the other man attempts to gouge Dessel's eye out... at which point Dessel bites the man's finger off. As Dessel himself notes while the man lay there screaming in pain: you should never escalate a fight unless you're willing to pay the price of losing.
* Discussed Trope, on how ancient Indian philosophers got in touch with the universe:
* Discussed Trope). Silas the itinerant laborer has come back to the farm of Mary and Warren after some time away. Warren isn't thrilled about this, as Silas once went off and left him in the lurch with work to be done, but Mary recognizes that Silas is terribly ill and has really come to the farm to die. Silas has a well-to-do brother, but, as Mary and Warren come to realize, apparently their farm felt more like home to Silas than his estranged brother's house.
* Discussed Trope situation, or simply shoving you off a roof and then deciding not to reach down and grab you.)
* Discussed Trope so that he won't have the option of returning to Dunder-Mifflin if his show business hopes don't work out.
* Discussed Trope. The Doctor mentions taking Clara out to dinner in Berlin in 1938, and that they didn't kill Hitler while they were there, to prove a point that certain points in history are just too monumental for him to dare interfere in them.
* Discussed Trope The Mad King, Aerys Targaryen, had a fetish for burning people to death. His guard Jaime Lannister noted that it was only after doing so that he would visit his wife's chambers. And to add to it, he was so violent in bed with her that Jaime wondered if he was obligated to intervene.
* Discussed Trope. The protagonist finds himself being shunned by the Free Trader crew of the spaceship, and an anthropologist explains that they don't regard either of them as 'people'.
* Discussed Trope, they just weren't expecting a random kid to show up in the middle of the desert.
* Discussed Trope to turn back. Harry specifically mentions that most "bad guys" never want to be bad guys, and often don't even realize that they are.
* Discussed Trope Up Beyond All Recognition) and an initialism (FBI - Federal Bureau of Investigation). Specifically, acronyms can be pronounced and initialisms can not. Penn caps this off by attempting to phonetically pronounce 'FBI'.
* Discussed Trope when King Robert fears the Dothraki might invade under the command of Prince Viserys. Although they lack the knowledge and equipment for siege warfare, Robert points out that if they hide in their castles while the Dothraki lay waste to the country, the smallfolk will view them as cowardly and hail Viserys as king instead.
* Discussed Trope, when Lady Olenna Tyrell is less than impressed by the embroidery of one of her relatives:
* Discussed Trope. When Roy and Belkar are enlisted as gladiators, the warden states that the act of defending a weaker prisoner from stronger ones will create a friendship with strong homosexual overtones that will not be fully explored.
* Discussed Trope, when Sam Anderson explains to the title character why it's convenient for all concerned to turn a blind eye to such activities.
* Discussed Trope when Sam says there may be human hearts behind the Häagen-Dazs.
* Discussed Trope when some explanation is called for on what the titular inceptions entail.
* Discussed Trope when the aliens return the abductees, some of whom have been gone for decades, but don't look any older.
* Discussed Trope, where Annie refuses to accept the first draft of Paul's new Misery novel because it contradicts known facts — and as his "#1 fan" she knows the books better than he does.
* Discussed Trope, where characters express concern by a plan becoming too complicated, such as any operation requiring two forces in different star systems operating in concert (problematic due to the lack of effective faster-than-light communication)

* Discussed Trope" will help them understand how strongly the characters longed to talk to the ghosts of Mercury.
* Discussed Upon learning that the Northern Water Tribe won't be hospitable to the idea of their family having adopted Zuko, Sokka instead invents that he's their biological half-brother, conceived when their mom was raped by a Fire Nation soldier. This actually succeeds in making the Northerners more sympathetic to Zuko, but also thoroughly annoys him.
* discussed Veteran's Day special. While recounting his experiences during The Vietnam War, Gerald's father explains how the war was very unpopular with the American public and several draftees fled to Canada to avoid serving. While he considered doing it himself, he ultimately decided it was his duty as an American citizen to serve whether he agreed with the war or not.
* Discussed videos nearly as much as the old ones for this very reason.
* Discussed". Vulcans usually do arranged marriages but T'Var's parents thought it more logical to let her seek her own mate.
* Discussed was powerful enough to vaporize anyone who tried to break through it.
* Discussed. What makes this an especially bad one, is that a previous episode included a much more elegantly done series of events, to set up the joke that Homer is the Hulk. Complete with Stan Lee.
* Discussed. When acting as fleet commander for the Romulan rebellion at Augo, Jim Kirk notes with some amusement that, of course, anything and everything he does here today will be endlessly analyzed and armchair-quarterbacked for probably centuries to come.
* Discussed when Alice asks if mustard is a mineral, the Duchess says that it is and that there's a mustard mine nearby. Upon hearing this, Alice realises that it actually isn't a mineral and tries to correct the Duchess but she won't listen.
* Discussed when Apollo wonders whether the events of the story are actually happening, whether Klavier is actually real and if he is dreaming the whole thing to comfort himself. Klavier is all too quick to reassure him.
* discussed, when a soldier fancifully suggests doing this with the Martian tripods.
* Discussed, when a TV show Tohru watches claims this is thing that girls want their lovers to do the most.
* Discussed when Benjen Stark says that nothing in a sentence matters before the word "but".
* Discussed when Emily is quick to understand the good intentions of "Buy One, Give One" companies, in which Adam appropriately points out the flaws. She also demonstrates how she's a typical victim of "poverty porn" as she describes to Adam how she picture that would-be less-fortunate African and her visual interpretation is so stereotypical yet crass and offensive that she stops in the middle of it, realizing its "condescending" implications.
* Discussed when Emily mentions her imaginary plans for her daughter Lorelai's wedding because she knows Lorelai won't ever let her plan her wedding. It was going to be a Russian royal winter theme, with snow-white roses, trees decorated with white lights and candles, with snow everywhere. Lorelai would arrive in a silver sleigh pulled by white horses. Given how much Lorelai loves winter and first snow, Emily absolutely
* Discussed when Flurry Heart claims that she wants to wear diapers forever.
* Discussed when Greg points out that he still hasn't figured out how to film the climax of the movie, which would feature a battle against a giant worm. Sadly, they never get around to attempting this scene at all.
* Discussed when it's mentioned the Howlers had functional spaceships before humanity left the trees. The idea that they're therefore unbeatable is shot down since there are some areas in which they're far behind.
* Discussed when Karl Jobst points out that the timer is inaccurate. While he thinks the most likely explanation is that Badabun just used it incorrectly due to incompetence, he also proposes the explanation that they intentionally made the final time too long because it would be too obvious that Tavo's "run" was fake if they had used the true time, which is faster than the world record.

* Discussed when Leslie asks Ann to help her on a date and she thinks that Ann is going to suggest this, but remarks that it would never work.
* Discussed, when Melania is reflecting upon her marriage; she says that it's better for a beautiful woman to have an ugly husband. Because the woman is beautiful, the man would do a lot more for her and be easier to control due to the beauty disparity. Unfortunately for her, since her husband is beautiful, he doesn't give her a thing.
* Discussed when Miles and Co. are attempting to smuggle weapons to the Felicians past a blockade by the Oseran mercenaries. After Miles winds up capturing Captain Auson's own ship, Auson figures that Miles had to be smuggling something, particularly with the way that Miles was acting so cowed and meek in order to avoid suspicion. He wonders if Miles is smuggling the ship itself, then wonders who could possibly want such an old, outmoded transport.
* Discussed. When Moses' fellow Egyptians ask why he will not let a Hebrew woman die during the construction of a temple, he states that "blood makes poor mortar" and frees her.
* Discussed when Rollo asks Roberta why she's dating Federline instead of a black guy.
* Discussed. When Sakura mentions that she has good chakra control and skill to compensate for her lack of power, Kuushou points out that there comes a point where all the skill in the world can't compensate for a significant gap in power. However he does agree with her that it's far better to have both skill and power than one or the other.
* Discussed, when talking about how much he enjoyed being a father to his three little boys, then explaining that he has his "main son" and his "other sons".
* Discussed when the Avengers reflect that they can be fairly sure they're not in their own galaxy any more as they would have probably seen the various ships flying around at some point if that was the case.
* Discussed when the crew visit the aptly-named planet Hedonia. Rewind mentions that every outwardly pleasant civilization must have a less pleasant side, which he then sets out to find. As it turns out, Hedonia's actually pretty tame compared to the other examples he lists off— though they are some of the galaxy's foremost suppliers of high-end weaponry.
* Discussed when the guys field a question about how old a child should be before receiving the talk.
* Discussed when they talk to a couple who met when the man was studying to be a priest. Dharma casually mentions that he could have seen her as a temptation to draw him away from his calling. Apparently, this had never occurred to him, and sends him running back to the seminary.
* Discussed when Toddy is trying to convince Victoria that, yes, she can convincingly pretend to be a man:
* discussed, when Vimes claims to be addicted to policing, and says that while he goes to meetings for his drinking problem, there's nowhere for people to say things like "My name is Sam, and I'm a suspicious bastard."
* Discussed when Zack asks Sephiroth and Cloud a question. Since they can track each other and feel what the other is feeling with their S-Cells, would they share sensory input if they had sex with each other?
* Discussed, where answering service girl Ella tries to explain to a policeman that "my job is to get messages to people on time" and imagines herself at "Veronaphone" passing Juliet's message on to Romeo.
* Discussed, where Elscol tells Iella that if the civilians don't side with her insurgency, they're tacitly on the Empire's side and she'll target them as well. Iella is appalled by this and makes it clear she won't go along with that.
* Discussed, where he told his attendant that first-rate commanders are commanders who at least knows when to retreat, although he himself never needed to retreat, since he always enters the battlefield with overwhelming advantages (except in one occasion).
* Discussed where his dad, Frank, is against Greg's love for video games and tries to dismantle his video game system. Greg says the reason his dad had to give up is

because video game consoles are designed to be "parent-proof". However, Frank is middle-aged, not elderly.
* Discussed, where it's called "the kiss of death". Described both in its literal sense with directions ("The huge blue poodle, you can't miss it...") and in a metaphorical sense for questions like "How do you know you're in love?" "Oh, you'll know..."
* Discussed, where Ryouko suggests nuking Sweden or Asia in order to kill enough people to start the Apocalypse.
* Discussed), where she explores the relationship between love and the Catholic Church, questioning what sort of commitment her religious lover wants from her.
* Discussed where the main character tries to alter a recipe by making one giant cookie instead of a normal batch.
* Discussed, where there is a carved message from Joseph of Aramathea: "He who is valiant and pure of spirit may find the holy grail in the Castle of Aaauuuggghhh..."
* Discussed, which discusses how, more often than not, the transition of manga to anime often results in the creation of these to fill time, since it's simpler and cheaper to animate lengthy conversations between characters instead of action sequences.
* Discussed whose memories she now possessed. Still a bit too weird for her.
* Discussed who similarly refuses to worship Everworld's gods, but at one point argues with April, apparently seeing her beliefs as hypocritical.
* Discussed with eternal youth, since Marcellus has already taken the potion for eternal life already and Septimus saw him a withered old man 500 years later in Septimus's own time.
* Discussed with Iceburg, the mayor of the island city-state Water 7. Thinking of the increasingly intense "Aqua Laguna" storms that periodically ravage the island, he considers turning Water 7 into a huge mobile island vessel.
* Discussed, with regard to Link's assassins. As an elite, they are highly trained but frequently have little actual experience. "As Praetorian Guards have done throughout history, they had slipped from being killers to murderers."
* Discussed with Yuutaro, the second student of the revived Kamiya Kasshin School, who ends up in the way of one of Raijuta's air-slicing attacks that severs the tendons in his sword-arm. While Kaoru and Yahiko mourn the loss of their promising junior, Yuutaro himself declares that if he can't use his right hand anymore, he'll use his left instead...and his rich dad is willing to send him to doctors in Germany to try and repair his right arm anyway. A brief glance at the dojo's wall in the
* discusses, an American spelunker whose death after becoming trapped in a narrow passage of Mammoth Cave became a media sensation in 1925, igniting a public fervor for macabre caving stories.
* discusses, specifically with the "you are a pirate" song, stating that a lot fewer people would be interested in the program if it weren't for that song.
* discusses the plot with a policeman during the song, without ever realizing that it is a policeman!
* discusses: What's the difference between Javascript and Java? One is essentially a toy, designed for writing small pieces of code, and traditionally used and abused by inexperienced programmers. The other is a scripting language for web browsers.
* discusses while trying to prevent the initial bad guys from blowing up their client.
* discussing, he describes Doomsday's storyline thusly: "Doomsday wears green bike shorts and punches Superman until they both die."
* discussing the 2008 Nerdfighter website, John finds another word he considers inherently funny — "ning", related to their new site building. It's as good as bling but you don't have to spend money on jewels!
* discussion. After clashing and being talked down to one too many times, Bill strikes out and submits one of his stories to a short fiction magazine, and turns into a hit. After showing this evidence to the instructor, the professor's bruised pride leads to a nasty falling out, and Bill drops out to become a successful

horror author.
* Discussion: All wiki articles have a Discussion page where threaded conversations may be conducted, usually about the content and presentation of the article. It's like a mini-forum attached to each article. Compare with Wikimedia "talk" pages.
* Discussions on the merits of religion in general, and Christianity in particular, often involve a fair amount of
* Discussion with Jas herself reveals that the Elder Gods think of mortals and current gods alike as vermin on their food source, the world of Gielinor. Jas has requested proof of purpose from the acting World Guardian (the player) as representative of all mortals, else she and her siblings will exterminate said vermin and consume Gielinor to continue their own life cycle. They are not abusive, because we are not worthy of their malice... nor their thoughts
* discuss usually coming to the conclusion that they're doomed to be alone forever. Given the lousy luck they both had with romance throughout both series, it seems they were right.
* Discworld, a 16-year old assassin-in-training Havelock Vetinari sneaks up on and knocks out an inebriated older assassin boy (the later-day Lord Downey) and paints tiger stripes on Downey's face. Downey had previously made fun of Vetinari for reading a book about animals using colors and patterns for camouflage and how to make oneself invisible by hiding in plain sight. The lesson was entirely lost on Downey.
* Discworld about Lord V dyeing his hair was apparently a friendly dig at Briggs, and the official diaries list his birthday as Patrician Day.)
* Discworld about the founding of Ankh-Morpork that tells how a wise man foretold a Great Flood, gathered his family and hundreds of animals into a big ship, and rode it out. After a few weeks' sailing, the accumulated wastes from all the animals were filling up the vessel, so they tipped all the manure over the side, and built a city on the resulting dung-island.
* Discworld, a broken Dis-organizer begins repeating "A lie can run round the world before the truth has got its boots on." It eventually cuts out more and more of the phrase, finally going silent after "truth has got its boots on."
* Discworld. According to the protagonist, they're useless, since all they do is trample on their own troops when they inevitably panic. The military responded to this setback by breeding bigger elephants.
* Discworld, a conversation between Captain Carrot and Jabbar, wise man of the D'regs, while surrounded by Klatchian soldiers:
* Discworld a couple times, usually on principle after refusing to obey a command he feels is repugnant. At no point does it occur to him that this is any reason to stop wearing battered Watch-issue chainmail, breastplate, and helmet. (It also doesn't occur to him that there's any reason to stop investigating crimes and arresting people.)
* Discworld a Death that will care for them, rather than a simple blind force.
* Discworld. A fantasy world where a bright inventor discovers what steampower can be harnessed to. Of course there has to be a traintop battle. The narrative dictates it.
* Discworld, after finding out that Sybil is in danger, Vimes picks up the Librarian and shakes him — asking him where they took her. The Librarian helpfully points him in the right direction, while quietly musing about the strong emotions it would take for a man to pick up and shake a 300-lb orangutan without even realizing.
* Discworld; after obtaining an important item hidden in a deep cave, the camera immediately cuts to a giant boulder rolling down a long tunnel heading toward Rincewind. He proceeds to escape the cave, with the camera occasionally cutting back to the same shot to emphasize the chase... and when he finally gets out of the cave, a tiny marble-sized rock rolls to a stop along the floor. Guess it wasn't much of an escape. Obviously, someone had Bloody Stupid Johnson design the deathtrap.
* Discworld, after the title character refuses to collect the soul of a princess who should have died, the universe attempts to carry on as if she had died, causing

much confusion as the citizen begin mourning the loss of someone though they don't know who or why. Said princess has to constantly remind people in the same room that she's present.
* Discworld, against still images from previous episodes. Mustrum brushes it off by saying "I've never been able to get interested in that stuff, myself."
* Discworld against weres. Just to be sure, silver nitrate grenades are also deployed.
* Discworld, Agnes' more vicious personality Perdita makes a nasty comment about Granny Weatherwax and gets slapped by Nanny Ogg for it... or rather, Agnes gets slapped for it since they share a body.
* Discworld, a Lady Assassin with vengeance on her mind and anger to burn off is pretty much the scariest. Other denizens of the night notice this and give her a wide berth and lots of personal space.
* Discworld, Albert carries his around with him while searching around in the world for the missing Death — a mistake, as he gets mugged and the hourglass shatters. Fortunately for Albert, Death manages to save thirty-eight seconds' worth of time and pour it into a bottle to prevent him from dying (again).
* Discworld a lizard evolve into a bird to save itself after falling off a cliff.
* Discworld; all of this makes it totally unclear if he's close to dying. Death keeps it on his desk as a curiosity.
* Discworld. All this completely deflates the mob because their once-hated target was now obviously and completely harmless. Vimes' decision not to fight saves everyone by persuading the mob to not destroy the station, and avoids the impression that the police are arming themselves against their own people.
* Discworld, allude to Nietzsche's "Übermensch" and mean something like "superior forest".
* Discworld, almost always involving the phrase "the government hushed it up":
* Discworld, a long-standing Masquerade exists amongst wizards, that insists they must remain chaste to maintain their power. This mistaken belief was deliberately disseminated after the Mage Wars, as keeping wizards celibate seemed like the surest way to prevent sorcerers from being conceived. This is actually true, but exaggerated; the effect is temporary at worst, and seems to be due to to difficulty concentrating more than anything.
* Discworld. Along with fire, it is one of the few weaknesses they have.
* Discworld a lot of standard fantasy creatures are extinct, though that's often synonymous with "trapped in a parallel dimension."
* Discworld. Also Adora Belle Dearheart who stamps on several men's feet with her stilettos several times, then wonders out loud whether or not she can push it through to the floor.
* Discworld also covers dogs' different perception of the world, in which scent is the primary sense. Werewolves, with a human frame of context for comparison, describe scents in their wolf form in synaesthetic terms, with sounds and colours.
* Discworld also has the Nac Mac Feegle, on a race-wide scale. It actually makes perfect logistical sense as there is only
* Discworld, although older than the usual examples of the trope. The resultant class dynamics lead to Vimes being seen as "a jumped-up copper to the nobs, and a nob to the rest".
* Discworld. Although two of those (thrown into the dungeon and poisoned) he saw coming and had plans to get out of, but let Vimes think he was rescuing him.
* Discworld: a mine run by super-conservative "deep down" dwarfs is primarily lit by vurms, bio-luminescent creatures that feed on carrion.
* Discworld: a mountain can thwart dozens of attempts by strong men to climb it, but once it's done little old ladies will take a stroll to the summit for tea, and then wander back afterwards to see where they'd left their glasses.
* Discworld, an added scene shows Death at the circus, where he's the only person in the audience laughing at the clowns (although whether this is because of the Discworld maxim that "if it was funny, clowns wouldn't be doing it," or simply the effect of his presence on everyone else is unclear).
* Discworld an Anthropomorphic Personification, born of the theory that 'belief

shapes form'; Death isn't a skeleton because of tradition, but because that's what people believe Death looks like.
* Discworld, and a comment by Vetinari that condemned criminals in one of the former regimes were "pulled apart by wild tortoises. It was not a quick death."
* Discworld and a fatalistic outlook on things due to existing everywhere at once including the end of time. Despite this, he's able to communicate quite a range of emotions.
* Discworld), and again with Quoth the Raven and the Death of Rats, who tend to constitute a Tag-Team Pet between the pair of them.
* Discworld, and a youngest who combines aspects of both in a deceptively mild package. The sons of both family lines can be almost as lethal, too.
* Discworld, and can't help but burst out laughing at the frenzy of guilt the Feegles work themselves into.
* Discworld, and getting her mother to accept the names, is a good insurance policy to ensure parental acceptance of the new status quo. Named animals, she reasons, will be harder to dispose of.
* Discworld. And if her opponent in a practice sword-bout is wearing a Parsifal Venturi face-mask... then a whole lot of agression comes out. All at once.
* Discworld} - and, in the new Drainholing contest, the Guild of Dunnykin Divers and Sewermen.
* Discworld and later finds out that he only has a photo of his thumb to show for it.
* Discworld, and later someone else repays the favor at just the right moment.
* Discworld and live outside of the Disc itself, only entering it periodically to raid. Dragons come in two different flavors: the dog-sized Swamp Dragons who would make excellent pets if not for the tendency to explode, and wondrous giant dragons who are not native to the Disc but can be summoned, and are terrifying monsters. Goblins and orcs are also introduced in later books.
* Discworld, and Mica the troll fought because a big troll with a whip told him to.
* Discworld and now His faithful try to convert the open-minded with strategically distributed pamphlets and early morning knocks at the door. Constable Visit (full name Visit-the-Infidel-with-Explanatory-Pamphlets) is one such recurring character (though he has been cautioned about the pamphlets).
* Discworld and reset by an Igor. Knowing the recoil will re-break her arm, she grits her teeth and concludes things with a powerful crossbow. Later, her irritated medical advisor, Matron Igorina, berates her for her bloody-minded stupidity and assures her, prior to resetting the arm
* Discworld) and "Robert's the avuncular figure in your life!" (or individual variants of it) are fairly common ways of expressing surprise or satisfaction in a deliberately over the top and camp way. Yes, the nights get long and boring in Britain.
* Discworld and subsequent Death books, is a highly determined and practically-minded young woman who has very strong opinions on everything.
* Discworld and the creation event that brought Roundworld (Earth) into being: as a male human Discworld wizard created our universe and our planet, it therefore follows on that human life evolves on Earth and the languages it speaks are those of the (human) world that called us into being. Far from their languages being mirrors of ours - our languages are copies of those of the discworld.
* Discworld, and then subsequently designs one himself, just to see if he could. Perhaps a little less naïve following his conversation with Colon and Nobby, he then destroys the plans.
* Discworld), and the Omnians are portrayed as odd in their insistence on a monotheistic belief system. It is often stated that several gods appear in more than one Pantheon — for example, many religions have different Thunder Gods, but they are actually all the same god, wearing different hats (he used to be separate gods, but apparently they merged as people started believing them to be the same god with a different name).
* Discworld. And they're pissed off not because people are violating their tombs, but because their tombs are actually the reason their souls can't pass on to the

next life in the first place. That, and returning to your body to find your organs had been removed would make anyone crabby.
* Discworld ("and this one's eyes are exactly like yours!"), until either their brains implode or they kill themselves to stop this.
* Discworld, and unlike her sister, actually recognize and enjoy being evil.
* Discworld and unspeakable to be condoned. Lord Downey, head Assassin, privately decides that he will meet with a little "accident". Add this impression to his childlike behavior and outlook on life, and he genuinely horrifies people.
* Discworld, Angua, a werewolf, mentions having bitten someone on the bum.
* Discworld, Angua (a werewolf) takes Cheery to an undead bar. One of the regulars is a normal old lady, who started going to the location when it was a normal pub and can't see well enough to realize it's full of undead now.
* Discworld, Angua's werewolf parents have trouble with the syllable "vet". This makes diplomacy with the Ankh-Morpork patrician Lord Vetinari very difficult.
* Discworld: Ankh-Morpork board game the Sam Vimes player wins if the game ends without anyone else fulfilling their victory condition (as a police officer, Vimes is trying to maintain the status quo).
* Discworld Ankh-Morpork City Watch took place after she left her previous workplace through the roof. Explosions at the Alchemists' Guild are hardly freakish; blowing up the entire Guild council, however, causes comment.
* Discworld Ankh-Morpork City Watch. Vimes with his practically legendary anger (has killed at least two werewolves with his bare hands, and can lift a 300 lb ape without realising it), and Carrot with his royal charisma, or his strength (can stick a sword through a stone pillar, and punch out a troll).
* Discworld, Ankh-Morpork's Guild of Assassins School now teaches courses like Applied Exothermic Alchemy, Deployment of Devices, and Bomb Disposal. (how to dispose a bomb so it does exactly what you want it to with regard to the selected target). Teaching staff are not above casually lobbing a Device at a group of students as a sort of practical test of quick hazard recognition, and quick reflexes.
* Discworld appears to have reached this level of 'enmity' with the crossword editor of The Times, whose mastery of obscure linguistics and terrible wordplay is advanced enough to give even him pause.
* Discworld, Apprentice Postman Stanley Howler is an obsessive pin collector, to the point (no pun intended) that all the other collectors in Ankh-Morpork think he's "a little weird about pins". After the main character invents postage stamps, Stanley takes up stamp collecting... with pretty much the same obsessiveness he had for pins.
* Discworld: Archchancellor Ridcully's uniquely-groomed beard with mustache.
* Discworld are adding a fun-fair to the grounds of Dontgonearthe Castle. As Nanny Ogg says, it depends who's having the fun...
* Discworld) are all too eager to cash in on, by shoving whatever random plants they find into bottles of shampoo and calling it a day.
* Discworld are explicitly described as lacking empathy. They would break the universe if they thought it would make a pretty noise.
* Discworld are more places where spells live than books they're written in.
* Discworld are taken to pieces, reconstructed, subverted, and lampshaded in dozens of different contexts, to the point that the books can arguably be looked at as a kind of massive, meta-analysis of their ideas.
* Discworld are theoretically immortal, but as they get older they get bigger and slower and tend to be more inclined to sit and think. They call this "getting philosophy". Eventually they just stop moving altogether, gradually "decomposing" or eroding into an oddly shaped heap of minerals with a tiny living spark in the center. Many of the Discworld's mountains are actually very old trolls. Shown to be true when a troll warns a character about his grandfather, who is one of the mountains and is very annoyed when some adventurers light a campfire in his mouth.
* Discworld. A Rodinian witch with a more mystical streak uses the nested Matryoshka dolls to explain how it works: each successive layer in the doll represents another witch in the chain and you can go as far back as you like. She

looks at Bekki and with each successive doll, speaks the name of a Witch. Bekki understands as she gets to the familiar name of Irena Politek, then opens the doll and brings out the whole and unbreakable smallest doll inside it. The witch names this as "Rebecka Yohannavitchnya". Then the seemingly solid Bekki-object seperates in two and this reveals an even smaller doll inside - but just a shape in silver light. The mystic then tells Bekki "Who knows, Firebird?" and ends the illusion.
* Discworld as a result of hanging out with humans, and some even start having interspecies relationships.
* Discworld. Ask humans to imagine an animal god and they'll come up with someone in a really bad mask."
* Discworld, asking himself if he will live to enjoy a long and well-deserved retirement. He also notes that Vetinari has advanced his deputy to the social rank of Dame — an intermediate step to her being ennobled as a Lady.
* Discworld: A solid 5 in most of Europe and on this wiki, Stage 2 everywhere else.
* Discworld, Assassin Johanna Smith-Rhodes leads a full and active life right up until the birth of oldest daughter Rebecka. She effectively retires from the active Profession at this point to lead a generally blameless life as a working mother, focusing on teaching, running the City Zoo and looking for worthwhile investment opportunities. But her three daughters provide more than enough headaches and she remains a key background character while other people are doing the front-line work.
* Discworld, Assassin Miss Alice Band and a small party recapture a castle simply by observing that a small hitherto unregarded postern gate is used by the garrison as a convenient means of sneaking out to the nearby pub. to make it easier to get in after closing time, they leave the postern gate unlocked. Alice takes advantage of this to get her assault team inside the castle. Meanwhile another assassin with a fondness for explosives has hitched a lift in on the pillion of a witch's broomstick; airlifted in, assassin, witch and a satchel of handgrenades do their work from the other end.
* Discworld, Assassins' School teacher Miss Alice Band has a relationship of this sort with her student Jocasta Wiggs. Although severely tempted, Alice controlled herself and only initiated the relationship when Jocasta had graduated and was therefore an adult and professional equal. Jocasta did signal her willingness when she was still a pupil, though. Which caused her teacher some angst.
* Discworld, as shown by the page quote, a spill of turpentine is mistaken for blood.
* Discworld assures him, with complete truth, that he will ensure the Minister has complete control over selection of his office furniture.
* Discworld, as the days and weeks go by in Pasadena, visiting Discworlder Johanna wonders about how to explain her eventual return to Ankh-Morpork, in winter, only several apparent minutes after she departed - with a sudden overnight Californian suntan.
* Discworld. As the only news reporters in one of the most newsworthy cities in the world, they keep very busy.
* Discworld, as this is essentially the fate of the boy sourcerer, Coin — he decides at the end of the novel that his powers are too great for the world, and builds himself a pocket dimension where he may peacefully live.
* Discworld astrology has a sign called Astoria's Flame: this is a large single red star. People born under Astoria's Flame are said to be naturally drawn towards Seamstressing and negotiable affection.
* Discworld at room temperatures, but when locked in a freezer for a while, almost came up with a unified field theory. They also count in either base four or binary because of that.
* Discworld), a useless family liability who likes big game hunting is dispatched to get him out of the way, in the hope the wildlife here will prove to be far bigger game than he can handle. As the wildlife in Aceria goes up to and including yeti-like creatures with rather big feet...
* Discworld averts this trope twice. Firstly, nobody is actively looking on Earth for eight missing people, as they have all been seen to perish in such a massive

bomb explosion it is presumed to have vaporised them. However, several million-to-one chances have coincided to flip them into a different plane of reality, which turns out to be the Discworld. And because of HEX the supercomputer, time on the Discworld flows parallel to time on Roundworld (Earth). Leading character Philip Holtack thus gets to be a guest at his own funeral.
* Discworld, a young stealth archaeologist called Alice Band is outclassed by a peril she has never before encountered - Nac Mac Feegle. Whilst holding her immobile, one imprudent Feegle discovers human women have breasts. And goes bouncy-castle until restrained by the Big Yin.
* Discworld bad thunderstorm. The contract to inhume an entire building appeals to her; at the time of writing she is yet to come up with a working plan.
* Discworld, Balthazar Smith-Rhodes serves a prison sentence in his native Howondaland for actively breaking quite a few of his country's laws. Unrepentant, he is then exiled to the faraway Central Continent, where he becomes adventurer "Howondaland Smith". (His family employ an Assassin-trained ninja attack lawyer to get him to drop the "Rhodes" bit from the name; he is permitted to remain a Smith as this is considered acceptably generic). The story covers part of his life as a con-man and eventual return home to Howondaland.
* Discworld banned any religion other than the state one (Omnianism and Nugganism, respectively). Borogravia's neighbour and arch-rival Zlobenia banned the Nugganatic religion, which was probably for the best.
* Discworld, because he knows that even if the Clacks did collapse, he would still be able to make a massive profit selling the business to someone else, regardless of whether it was a total shambles. In fact the Board of Directors approved the full amount; Gilt pocketed the rest. Pony is able to avoid the eventual fallout (and aid the city's case against Gilt and the Board) thanks to a scrupulously maintained paper trail.
* Discworld been introduced to Ankh-Morpork than the cynical locals hit upon insurance fraud via arson.
* Discworld be expelled, if enough parts of them can be found to do so.
* Discworld begins with a wizard escaping death by binding his soul to his staff, which he continues to haunt, exerting a baleful influence on the staff's next owner.
* Discworld begins with the story of Edward d'Earth, a young man with some ideas about improving Ankh-Morpork who resorts to criminality to achieve them. Very early on in the story, he acquires a mysterious artifact, at which point the narration states that he is essentially dead from that point on. It's only at the climax we learn whatever was left of Edward as a being was murdered partway through.
* Discworld begin to join the Ankh-Morpork City Watch. They're treated largely in-line with this trope until eventually they're just treated as coppers.
* Discworld be incomprehensible, but some characters perfectly understand what he's saying. As time passes, more and more characters develop this comprehension, generally depending on how long they've known the Librarian.
* Discworld being born). In later books, this is more or less dropped, as wizards become either more concerned with their next meal or the Disc equivalent of computer geeks who have trouble relating to any non-wizard regardless of gender.
* Discworld below)—that some scholar told Carelinus that every star out there might be another world, and he cried because he realized he couldn't conquer them all in one lifetime. That becomes Cohen's real grievance—that there's so much to do no one, no matter how dedicated, could get it all done in one life.
* Discworld book. He was more worried about reputational damage than legal repercussions; it would have been easy to prove that he didn't steal ideas, but mud sticks.
* Discworld books, a good Dwarf brawl is described as having "100 participants, and 150 alliances."
* Discworld books are satires of government, religion, and other things, often with the assistance of parody and pastiche. Typically Horatian.
* Discworld books covering the Ankh-Morpork City Watch are largely an exception. Several characters get promoted throughout the series, but they often don't want

to, and it doesn't change their jobs all that much:
* Discworld books feature an entire subseries revolving around a police force. While mostly a humorous and sympathetic depiction, particularly since they're usually the viewpoint characters, this does come up a bit:
* Discworld books features a tree at the edge of a scene that's covered in these, all apparently created by Nanny Ogg for her various lovers.
* Discworld books, iconographs are externally just like cameras, but they have little imps inside that paint the pictures. This means that the imp can paint a photorealistic picture in a split-second. They may not do any running, but that's very fast indeed.
* Discworld books. Miss Tick considers being able to breathe underwater through a hollow reed after being tied up and thrown into a pond an essential survival skill for witches traveling through places where they aren't welcome.
* Discworld books. Of course, in his Verse, stars are balls of flaming rock only a few feet across, so it wasn't a particularly-destructive example.
* Discworld books were small, fantasy parodies. Now, the Discworld series is one of the biggest and most popular pieces of modern fantasy literature.
* Discworld book (though it was referring to gods, the spirit's the same), it's mentioned that if you ask someone to come up with an alien-looking being, it would basically be a man in an animal mask.
* Discworld bring it up will be met with the response "What duck?" It's mentioned that he used to be quite normal "before everyone else started seeing ducks".
* Discworld, but a glare, a snarl, or even a roar of rage is much more likely.
* Discworld, but based on earlier folklore): the eyes are the only part that cannot be disguised, and reveal the true nature of the being.
* Discworld, but in typical Pratchett fashion, quickly subverted soon after. The Ankh Morpork teen street gangs are mentioned to be ruthless and deadly... but find themselves helpless to resist Captain Carrot's good-natured effort to organize them all into a Cub Scout equivalent, camping trips and chanting all included.
* Discworld, but it symbolises the inanimate becoming malignant towards the living. And, of course, one of the rules the Auditors represent is entropy...)
* Discworld, but still evoke the trope in their interactions on a regular basis
* Discworld, but still funny) about a car mounted with JATO-rockets embedded in a cliff-face somewhere in Arizona.
* Discworld, but that's just part and parcel of being a parody of private detective stories.
* Discworld, but their non-specific ones are generally translated as "he", "him", etc.)
* Discworld. But the series did start out as a fantasy satire, so fair enough. Given the Discworld Laws of Narrative Causality, and that belief in a thing makes it real, it's not at all surprising that all of this exists at once.
* Discworld but they were born centuries apart. On different continents. It's a testament to the power of their love (which never happened) that people still remember...er, speak of it.
* Discworld by war-torn refugees and huddled masses who have washed up on the shores of Dawn...
* Discworld. Can A.E. Pessimal survive a trip to the Dungeon Dimensions with an unexploded head? He finesses the ordeal in a not-wholly-improbable way and comes back alive...
* Discworld can bring back a fresh or properly preserved person with the right equipment and a bolt of lightning, but even they admit the result isn't quite right (and they even routinely do this for each other). Fortunately, the main drawback is giving the resurrectee "The Love of Iron" (a.k.a. they become magnetized).
* Discworld can do this, but tend not to because it takes a lot of effort.
* Discworld can seem ordinary enough at first glance, until it's pointed out that, without heavy duty magic involved, a flat world on the back of a giant turtle that swims through space should be utterly impossible.
* Discworld Carcer is described as "the sort that joins up for the looting... the kind you have to end up hanging as an example to the men".

* Discworld, Carmine Zuigiber, the malevolent persona of War, is neutralised by making her a prisoner of the Happiness Fairy. It is truly Hell for Red.
* Discworld, carries a Holy Text knowing the God will direct any arrows into it rather than him. To make really sure, it's a pulpit "bible" which is three feet long and nine inches thick, which he wears like a breastplate.
* Discworld, Carrot Ironfounderson is an urbanized version, right down to the well-polished City Watch breastplate.
* Discworld carry bags marked SWAG as part of the uniform. Given the peculiar nature of theft in Ankh-Morpork, it's in their interest for official burglars to be identified as such, rather than random housebreakers.
* Discworld), Carter the Farter. Or as he later tries to rename himself, Fartmeister. Trev tells him he's not going to get anywhere with either.
* Discworld. Case in point: his "improved manicure device" is best used for peeling potatoes.
* Discworld causes the witch's identity to fade, until nothing is left but an unusually intelligent animal.
* Discworld, causing him to become the Discworld's first tour guide after meeting Twoflower. He's not the first to try to take advantage of Twoflower's willingness to part with gold, only the most successful because of his language skills.
* Discworld characters specialize in time manipulation and have become briefly Unstuck In Time as a result of stressful situations. Involuntary time travel has been seen in characters plummeting to their death or giving birth, for example.
* Discworld children, to prevent another sourceror, who can only be the eighth son of the eighth son of a Wizard.
* Discworld choose to stay, but instead decides that as long as he never chooses at all, he can stay as long as he likes.
* Discworld City Watch books, Detritus, a huge troll whose weapon is a siege bow, is sometimes ordered to open doors. To quote Vimes "When he opens a door it stays open if you get what I mean."
* Discworld City Watch books, where Vimes notes how hard it is to find something missing because said thing is, by definition, not there.
* Discworld City Watch, but under its current leadership, the force has become much more professional.
* Discworld claims that the collective noun for wizard is "a war"), and magical conflict is incredibly destructive. The widespread abuse of magic would quickly make the world stop making sense. It's analogized to nuclear weaponry, with talks about avoiding a "first use of magic" in war, and the ancient mage wars leaving behind high levels of residual magic (i.e. nuclear fallout) in the present day. The entire organizational structure of modern wizardry exists to keep them all in one place and encourage them to waste their energies either plotting against each other, immersing themselves in research, or enjoying their cushy academic position.
* Discworld (Clause 27 (iii) (c).) Quite clearly common law, being an untidy mass of unwritten verbal agreements, needed to be ratified within a legal framework. Thus, a vampire in Ankh-Morpork needs to sign a legal disclaimer before being invited into the premises. For instance, Sally von Humpeding has a "season ticket" for visiting Ramkin Manor. The thorny issue of a vampire policewoman not being able to enter a house to make arrests or perform a search, should the householder refuse to grant her permission, is being examined separately by Mr Slant as an urgent issue requiring much legal consideration.
* Discworld clean the privies". The second time she goes for a more general "all the dirty jobs", and when he comes up with much the same answer adds "I shall see to it there are dirtier ones".
* Discworld: C.M.O.T. Dibbler is like a rat, firmly convinced that just around the corner, there will be cheese, even though every corner turned has so far been cheeseless. Some of his schemes worked, but were unfortunately tied to the near-destruction of the world. So he always reverts to selling sausages on the street.
* Discworld collection of books into a Library of Babel, thusly: Knowledge = Power = Energy = Mass, which distorts time and space. "A good bookshop is just a genteel black hole that knows how to read." That said, it also has more specific examples.

* Discworld Companion it explains that Evil Harry Dread, a old-school Dark Lord does this, often to the point of including slides and maps. He laments to Cohen The Barbarian that "heroes" these days just take advantage of the moment, and Cohen agrees that no-one does heroics or villainy with style and decency any more.
* Discworld, con-artist Moist Von Lipwig displays a unsurprising familiarity with this trope, although it doesn't actually happen to him (this time.)
* Discworld concerns a plot by the Auditors of reality to unmake humanity. The Auditors loathe humans for being untidy but have long held an unsteady truce with Death. After a group of them cheats, he wipes them out. Though he could justify this by the fact that they had taken living forms, he uses this trope instead.
* Discworld connection to this trope (being bloodsuckers and all), and very often are literally this as well.
* Discworld convention, the convention chairman made a speech beginning: "My lord Patrician. Honoured Guild leaders. Ladies and gentlemen. Members of the Watch. Nobby. And Bernard Pearson."
* Discworld: Cori Celesti, the home of the gods, is also the source of the magic which it turns out allows the Disc to exist in the first place.
* Discworld, Corporal Carrot doesn't seem to grasp the concept of form letters as he leads the new Night Watch recruits in taking the oath:
* Discworld counterpart of Pallas Athena) carries a penguin with her — a side effect of an influential statue of her carved by an incompetent sculptor.
* Discworld countries on the Disc had an Empire at some point or another; Ankh-Morpork (who at the time of the novels are more or less the "good guys") had an ancient one based on the Roman Empire, with occasional hints of a more recent imperial past based on the British Empire.
* Discworld!" crops up a lot, for instance, but that's as close as it gets.
* Discworld. Crowds are overcome by the spirit of "Music with Rocks In", which apparently has no musical merit for objective listeners not themselves possessed by it. This causes them to behave like stereotypical groupies, as well as forming their own bands.
* Discworld cynicism, combined with a job Vetinari had purposely made irrelevant and pointless, is what drove him to drink.
* Discworld dark-haired and dark-eyed like Tiffany, not blonde and blue-eyed like the princesses.
* Discworld deals with the psychic side-effects of Igor transplant surgery. Cloning eyeballs to replace ones lost due to misadventure is a new Igor science on the Disc. Uniquely, bio-artificing new eyes from cells contributed by a living donor involves transplanting bodily parts from a donor who is still alive and well. And whose biomystical field can then heavily influence the recipient. Here a Student Assassin gets new eyes cloned from those of one of her teachers. Her teachers watch as she starts to manifest the behavioral traits and aptitudes of Madame Emmanuelle les Deux-Epées....
* Discworld, Death signs up at one point, under the nom-de-guerre Beau Nidle. It parodies the notion that soldiers enroll to forget: they have forgetten their troubles… and their identities… and their orders… and pretty much everything, really. Except sand. You won't ever forget about sand.
* Discworld, deconstructing the original character's archetype: Javert sees "justice" as punishing the guilty, while Vimes sees it as protecting the innocent.
* Discworld (deep-downers, or "those who do not get out in the fresh air enough") believe humans to be a kind of bad dream. This puts them at odds with the rest of the dwarfs, who are quite willing to deal with humans (their mythology even gives a shared origin for humans, dwarves and trolls).
* Discworld". Despite their tiny size, they're one of the most violent races on the Disc.
* Discworld, "Destiny is important, but people go wrong when they think it controls them. It's the other way around."
* Discworld Diary, the personal information section includes "Dominant hand" with the options "left", "right", and "sometimes".
* Discworld differs from the typical "grown-up" Discworld novels only in that the

swearing and sex references are translated into either Cat or Rat. The fully human Stupid-Looking Kid even swears in Rat, something that is instantly lampshaded.
* Discworld disclaimer, "Cori Celestic Games, Year of the Second Inception, Summer, Ankh-Morpork and Sport are all trademarks of the A-M Games Committee and may not be used without permission under penalty of big men with sticks."
* Discworld displeased to learn that their community leaders seem to think said underground city is outside his jurisdiction.
* Discworld. Don't call the Librarian a monkey. In fact, don't even say the word, or any combination of words that could sound like "monkey". It makes him displeased. Remember "Do not meddle in the affairs of wizards, especially simian ones. They aren't that subtle."
* Discworld don't get the reference either, and have no idea why they said it.
* Discworld" do the job as a stand-in, however, and can make "jy bliksem!" sound like a profession of undying love.
* Discworld - drew flak from Israeli and pro-Israeli readers of Pessimal's work.
* Discworld duking it out have actually severely bred out the capacity for imagination.
* Discworld dwarfs have a virtually religious attachment to their axes, usually owning or carrying a few different types. However, the traditional "Dwarf axe" shape is an utterly practical one. It has a pickaxe on one side, for digging up interesting minerals, and a regular axeblade on the other, for dealing with unreasonable people who want to take your interesting minerals. A dwarf with a proper dwarf axe can both dig interesting minerals and cut firewood. A dwarf with minerals and fire can make a forge and tools, and a dwarf with a forge and tools can make
* Discworld dwarfs. Most of them look male, but that doesn't mean they are.
* Discworld Dwarves take the "Females have beards" thing even further. All Dwarves are considered male unless otherwise specified. And they only specify otherwise to their spouse, and even then only after a lengthy courtship (as in decades). For Cheri to act and dress openly female on duty is like a human police officer turning up to work in lingerie. And even in her case, "act and dress openly female" mainly means putting rhinestones on her axe holster, wearing a sensible leather skirt and high-heeled iron boots, and grooming her beard differently.
* Discworld Emporium sold limited edition Discworld Scout Insignia cards for the 2007 Discworld Jamboree. These suggest that the Ankh-Morpork Scouting and Urban Survival Association offers merit badges in such skills as leech wrangling, corset lacing and barber-surgery.
* Discworld encryptions, but deliberately only uses the very, very difficult ones.
* Discworld end because a flat planet on four giant elephants on a giant turtle simply cannot exist without magic.
* Discworld ended up being called Your Finger You Fool (much like in Jokes above). An explorer pointed to the geographical feature he wanted the name of, got this response, and didn't realize what it actually meant.
* Discworld) ensues. This is not the only such scene, but is one of the stand-outs. In short, there is a whole chunk of Reaper Man devoted to this trope.
* Discworld: Even Though They Speak In Perfect Grammar, They Capitalize Every Letter And They Do Not Use Contractions.
* Discworld eventually had several maps made of it, as did the city of Ankh-Morpork within, even though Pterry said that he never envisioned a map of any kind when writing. (Some of the earlier publications even have quotes from him explicitly stating that "There are no maps. You can't map a sense of humor.")
* Discworld: Everything from the pot of glue through the art of beekeeping to the continual theft of stuff from Mrs. Cake's house.
* Discworld, examining Rincewind too many times causes him to temporarily steal the mouse cursor.
* Discworld example, it's later explained that "cheating" isn't allowed — you need to make a good faith effort at heroism for it to work.
* Discworld example — Igors are portrayed as a cross between a butler, a surgeon and Frankenstein's monster.

* Discworld explains that every young sci-fi/fantasy writer (presumably including himself) starts out carefully avoiding references to, e.g. "Toledo steel", but sooner or later throws their hands up and cries "What the hell?"
* Discworld exploits such incidental characters, such as Howondaland Smith, Alice Band, Miss Smith-Rhodes, Madame Deux-Epées, and many others.
* Discworld falling off the back of the World Turtle and re-impacting the Disc with some force. There is certainly enough ex-elephant underneath Überwald for there to still be a thriving mining industry capitalising on the bounty.
* Discworld fame is promoted to Commander of The Ankh-Morpork City Watch he proceeds to spend much time and effort resisting this trope. Sgt. Colon on the other hand is usually seen at his desk. Especially when it's raining, cold or dangerous outside, which is almost always the case in Ankh-Morpork.
* Discworld fanfic and fan-art revolves around the characters getting it together, and the obvious lesbian pairings are romanticised and glammed up. Two girls described in the text as half-starved and dishevelled escapees from an abusive orphanage/workhouse became lesbian icons in the eyes of many. Elsewhere, the austere and asexual Lord Vetinari suddenly became the focus of many fervently imagined homoerotic scenarios, often with the most unlikely partners.
* Discworld feel called to prayer, it could always pray to the Hogfather...
* Discworld Female Igors — Igorinas — are universally and conventionally beautiful, on the other hand, though they may sport the occasional very fine stitching here and there. It's implied that the reason why they are so beautiful is because Igor surgical skill extends to the field of cosmetic surgery.
* Discworld flying carpet up there that can act as a flying platform for broomsticks and conventional smaller carpets. The satellite flyers could leave the mother ship on missions then fly back and refuel on fresh magic.
* Discworld football shirts, Ponder Stibbons's shirt number was given as 1.618; the Golden Ratio.
* Discworld. For a sample, his Colossus of Ankh-Morpork is currently carried in the Museum Curator's pocket for when tourists ask to see it, and a matching set of salt and pepper shakers he designed is currently in use as a grain silo.
* Discworld. For a Wizard to do something, it takes as much energy to do something magically as it does physically, unless you can harness an outside force. Having no outside force makes the Wizard rely on the leverage of his mind, meaning if they try to do something too difficult, their brain flicks out their ears. Example: Galder Weatherwax makes a protrusion of stone on the University fall, allowing him to zoom upwards.
* Discworld. For instance Nanny Ogg will take one spoonful of sugar, put the rest of the contents of the sugar bowl into her tea, and then put the one spoonful back in the bowl.
* Discworld for three wishes. Demons, needless to say, give people "exactly what they asked for and exactly what they didn't want", although Eric doesn't really make it that difficult.
* Discworld for useful snippets about the Guild. The Times pays well for stories - and Nigella's cartoons - which is a useful addition to a student's spending power.
* Discworld: Foul Old Ron's body smell is so powerful it has become a separate entity from the man himself, acting separately from him.
* Discworld game. Rincewind tastes Counterwise wine but doesn't feel anything. Then the barman asks if he remembers last night. Surprised Rincewind admits that he can't remember anything. That's the way this wine works. Later Rincewind travels to yesterday night and finds himself passed out on a park bench. Yet he starts the game in his own bed at the Unseen University, which means he somehow got there from the park.
* Discworld games: an ad for "witness relocation program" offers relocating witnesses to the bottom of the river.
* Discworld gives us example of the Revenant (Reg Shoe, Windle Poons temporarily) and Voodoo (Baron Saturday) types, with many implications for but no examples of the Artificial type, mostly revolving around the Igors. There are also a few varieties of Revenant; Shoe and Poons are fully conscious, although they have the

problem that they now have to manually control all of their movements which takes time to relearn. There are also non-sentient ones that Shoe doesn't think should count as zombies at all, just "memories on legs" that hang around their crypts.
* Discworld gods, despite their reality-altering powers, cannot change their eyes. Said eyes always reveal something about their true nature.
* Discworld gods there are eight mysterious beings called the Old High Ones. Only one is known: Azrael, the Death of Universes.
* Discworld, golems are animated by a "chem" — a scroll inside the head — which can be accessed by opening the top of the head.
* Discworld. Golems don't have fingerprints, but they do have traces of where they usually hang out.
* Discworld good at Alchemy. He does, however, have the family tendency to mordant sarcasm.
* Discworld, Granny Weatherwax. After all, she tamed that unicorn... which really shocked her friend Nanny Ogg and the revelation made Ridcully, her one-time love interest, get rather soppy. Note that Granny's celibacy has nothing to do with magic, as witches aren't subject to the same prohibitions as wizards. Granny comes under the "Love is a distraction" heading, though; it's a distraction from the pursuit of magic, so in a way, her celibacy does have something to do with magic.
* Discworld, Granny Weatherwax confronts her sister Lily atop a high tower. When Lily threatens Granny's fellow witches, Granny grabs her old broom and jumps off the tower. Her broom is a rickety old model and will only fly if given a running start, but as it happens, Granny correctly judges that terminal velocity is more than fast enough to get the broom flying.
* Discworld). Granted, the latter incident was a student prank rather than a crime scene (and the corpse itself was long-dead, embalmed and a well-known feature of the university- possibly a parody of Jeremy Benthem, whose preserved corpse really is on public display- as per his own will- at University College, London).
* Discworld: Great A'Tuin himself (or possibly herself), the giant turtle with the Discworld on its back, where all the books are set. It even has a self defense system, based on actual turtles, where it spins around to avoid meteorites.
* Discworld: "Greebo could, in fact, commit sexual harassment simply by sitting very quietly in the next room." (Note that that line isn't a meme. It's a quote from one of the books.)
* Discworld ground defences capable of causing damage to air attackers. She is rather keen to be on the side that has them - and that the people operating them can tell friend from foe. Olga is also keen to know what form anti-air defence is likely to take so that she can start evolving counter-strategies.
* Discworld had a horror of his works being treated as Literature. He explicitly erased all his draft versions of the novels and any associated notes, to prevent any hopeful would-be PhD in English literature exhuming them and turning them into a doctoral thesis, or turning him into a course module in school or university. For this reason, all the hard drives from his computers were destroyed completely after his death (he had a steamroller run over them).
* Discworld had been breeding the royal family from behind the scenes for quite some time before they went missing. He takes a strong interest in Captain Carrot, who is almost certainly the long-lost scion of that bloodline.
* Discworld had the main characters accidentally burn down the city of Ankh-Morpork. Pratchett later talked about how this would be impossible to do subsequently, what with all the main characters, side-characters and even just general culture that sprang up in the forty-odd books since.
* Discworld has a few ninja, and some reflections on the art of stealth:
* Discworld has a footnote saying that when General Tacticus reached the edge of the Discworld with no more lands to conquer (seemingly) and a large and bored army with time on its hands, he sent back to Ankh-Morpork requesting $AM50,000 and the services of boat-builders, for the purpose of building landing craft so as to sweep across the Discworld's equivalent of the Pacific, mopping up all the small islands. (and by then having retrained his soldiers as Marines).
* Discworld has a scantily clad Amazon warrior who can only marry a man who defeats

her in armed combat. To the death.
* Discworld has a timespan of a few days; the game at the end of the book is within the same week as the wizards' discussion at the beginning.
* Discworld, has cause to reflect on this and is thankful his platoon sergeant has slipped with him. Holtack also muses on the various types of Universal Sergeants based on several familiar Discworld characters.
* Discworld has considered her own kind to be the only were-creatures still living on the Disc. But new arrivals from Darkest Howondaland prove her to be utterly wrong. The axiom about two kinds of creatures fighting like cat and dog is proven to be literally correct when Werewolf meets Wereleopard for the first time. Ankh-Morpork is suddenly a far more interesting — and dangerous — place to live in.
* Discworld has Count de Magpyr and his family, who are most definitely evil.
* Discworld, has created a time of relative peace under his rule, he has done so by playing increasingly small factions against each other, to the point where, although everyone is technically still fighting a civil war, no one can do enough damage or make enough money out of it to become a threat. The Night Watch books in particular utilize the concept.
* Discworld has fun with this. Vetinari usually arrives places well after the other characters -as it was usually him that maneuvered them there in the first place, so he can take his time if he feels like it. He never, ever slouches on the throne, though.
* Discworld has Leonard of Quirm, whose inventions are rarely what he initially intends because he gets distracted along the way.
* Discworld has many examples in the city of Ankh-Morpork. The Black Museum of the Guild of Assassins is given over to the contemplative study of inhumation, for instance, and celebrates the many and stylish ways in which clients have been eliminated. The museum of the Guild of Fools is built around the Hall of Faces. Every clown who ever was, and who currently is, has their unique face paint reproduced here on the surface of an egg — thousands upon thousands of them.
* Discworld has not one but two drawbacks to getting the Grand Trunk back online: "Do you want it fast or good or cheap, gentlemen?"
* Discworld has plenty of examples of abominations — the things from the Dungeon Dimensions, the Hiver, etc. But ultimately, none of them succeeds in causing permanent damage, and the heroes always win in the end. It helps that they're defined, somewhat; they're explicitly less "real" than everything else, which makes them simultaneously more magically and psychically potent, and much more vulnerable physically. Rincewind once took one out with camera flash, and held several off with a sock containing half a brick.
* Discworld has printed lifesized images of the front and back of the new banknotes, to aid people in recognition, and tells Drumknott "even now, honest citizens are cutting them out and gluing them together".
* Discworld has several of these, usually from Glenda, who gets very involved in her thoughts before reacting.
* Discworld has something of a Magic Franchise Mis-spelling in "pune, or play on words". Also "bugger", while an almost universally-known if not all that common minor swearword, is sometimes associated with Discworld since it gets used more often than pretty-much any other swear throughout the series.
* Discworld has stated that this is not the case. (Specifically, Pterry has said that they were both intended to be the same man, but one of them was written by a younger and less experienced author.)
* Discworld has the normal 4 seasons, but a Disc year is 800 days long so the season cycle happens twice over. Because the books still treat 'a year' as being similar in length to a normal Earth one, this was retconned as saying that only wizards and learned people use the 'true' year and most people consider a single cycle of seasons (400 days, close to our 365) to be a year.
* Discworld has this dialogue between Assassins Joan Sanderson-Reeves and Miss Alice Band. Joan has just finished demonstrating a fire-breathing act.
* Discworld has to deal with "the bloody vampire", before remembering that Angua

had been given the job of showing their differently-alive recruit around the place...
* Discworld has trouble revealing that Susan's grandfather is Death, going "Dah Dah Dah Dea" (as part of a dramatic build-up). At which point Susan assumes that he's bothering her to inform her that a grandfather that she's never knowingly met is DEAF.
* Discworld have actually cultivated the art of going to sleep in their feet, confident of not being detected behind the expressions of metal rage on their visors.
* Discworld have a unique system whereby the free ones collectively save up their wages to buy the one who are still owned their freedom. It started when Captain Carrot bought a golem named Dorfl and put the receipt, and proof of ownership, inside the golem's head. So it allowed the golem to "own" itself. Dorfl became a policeman and started working for pay. One became two. Two became three and so on and so on.
* Discworld), have been emerging as a third separate cultural group. There's also a small community in the mostly-human country of Llamedos who deal closely with humans (enough that intermarriage is fairly common) but haven't assimilated with them and are neutral between the main dwarf factions; the current Low King of all dwarves was selected from this group simply because the fewest people hated him.
* Discworld have these in abundance. The first game, in particular, has a couple of quick-fire conversations that absolutely epitomize this trope, cramming in an absolutely staggering number of puns, frequently all about the same thing.
* Discworld have worked out how to weaponise this. By performing a complex ritual, they're able to displace a training dummy's head by a split-second, resulting in it being blown off.
* Discworld he commonly used, "A lie can run around the world before the truth has got its boots on."
* Discworld he doesn't put up a fight, he simply states that he's not stupid.
* Discworld, he finally finds it: something that, while technically legal, is still horrible enough that he feels he has to act even though no written law justifies what he is going to do.
* Discworld. He gets a single sheet of paper with "Some of the sheep" written on it.
* Discworld, he holds an impromptu drum session, using pots, pans, and general kitchen tools. What follows is a food-pun fest that irritates Ridcully.
* Discworld. Heidi accepts that on Saturday afternoons and training sessions, the Springboeks come first. Danie is seen reflecting on the inconvenient fact that women, for reasons known only to themselves, have a distressing habit of scheduling weddings to happen on Saturdays. He is seen wondering if he can persuade her to have the wedding first thing in the morning, so as to have his afternoon free for the game. He considers this a wholly reasonable thing to ask for. Her reaction is not recorded.
* Discworld, he is knocked unconscious by his own men when he orders them to fire on civilians.
* Discworld, he outlines a grand if somewhat vague vision of the future of currency, and wonders if he should write it down so he can work out what he's talking about later. In both books the confidence with which he enters such things leads everyone else to conclude he had it all planned out.
* Discworld heroines, with less "a subtle touch of iron" and more "an extremely visible ton of iron".
* Discworld, herons and buzzards qualify as "giant flying steeds" if you're a gnome.
* Discworld: Her position as the leader of Ankh-Morpork's Guild of Beggars forces Queen Molly to be one of these. As it would be unseemly for her to beg simply for a few pennies, a pallet to sleep on, a crust of bread, or bottle of booze, Molly is compelled to ask for a million dollars, a mansion to sleep in, a full banquet, or bottles of fine champagne exclusively. Of course the Beggar's Guild is also one of the richest guilds in the city, so it's likely their Queen has a stipend to augment

her income.
* Discworld. He's also the most competent and benevolent patrician the city has ever had.
* Discworld: he's blissfully unaware of saying anything wrong about the University's mighty organ, which is a Johnson (that is, the University's giant pipe organ was made by Bergholt Stuttgart "Bloody Stupid" Johnson), and nobody wants to correct him as this would only lead to further embarrassment.
* Discworld, he's dismayed at Nobby's suggestion that the drill that allows his mini-sub to latch on to passing ships could be used to sink them instead with very little extra effort. Later, he finds that when he's sketching an enlarged submarine, his hand seems to, of its own accord, add weapons...
* Discworld. He sees that many people have died nearby, and assumes that the later ones saw the remains of the earlier ones, and tried stealth, and that didn't work. So he doesn't bother being stealthy.
* Discworld. He's killed several cops over the course of his career, including at least one who bumped into him by chance while off-duty and didn't even recognize him.
* Discworld he thinks everything the younger wizard says should be dismissed out of hand, and so on.
* Discworld higher up the magical hierarchy than thaumaturgists (more or less magical IT guys). It's also stated that conjurers are quite popular: people find tricks done with misdirection and sleight of hand to be more impressive than boring old magic.
* Discworld himself (in the stories primarily centered around his granddaughter, Susan).
* Discworld his nation sends to the School every year. Charles also has lots of friendly professional contacts in, for instance, his nation's armed forces. Lord Vetinari in Ankh-Morpork has even been heard to express approval of a kindred spirit in a former colony.
* Discworld hockey. A few years later, she cuts a deal with the owners of the PFW - a very large space where ice forms on a very large flat floor - to host a competitive sport there. Single-handedly, this Acerian brings ice hockey to Ankh-Morpork.
* Discworld home base of the Guild of Fools and Clowns was formerly a monastery occupied by a masochistic death cult worshipping a Cthulu-style deity. Prior to that it was a leprosy hospital and a plague pit. The Fools kind of think the ambience is wholly appropriate.
* Discworld Horst Lensen. She is noted to go very red and thoughtful when nursing him back to health after a near-Death experience when she is called upon to do things like, for instance, deliver bed-baths. She finds him abominable, based on seven years' prior experience. But she cannot help reflecting that he is also tall, blonde, attractive, and well-muscled.
* Discworld). If a wizard wants to hurl himself from the ground to the top of a tower, he has to cause a stone with an identical weight to his to fall from the top of the tower and magically link his ascent to the stone's descent.
* Discworld: "If it was a hundred years, my father wouldn't thrash me when I got home!"
* Discworld: Igors are pretty much biological transhumanists in hunchback form. They play with it themselves, but are kept isolated from the main plot; when a character in the Watch dies, Vimes refuses to let the local Igor try to bring the character back. Sort of like magic not ruling: there for color, but not to do anything transformative.
* Discworld II), Arch-Chancellor Ridcully sends Rincewind on a quest, and it's implied that if he doesn't, he will be transformed into a toad.
* Discworld II events. (Yes, continuity is... problematic.) Among other things we get to see a sheep skeleton working in clickies as Death's stunt double.
* Discworld II: Missing Presumed. While inside, you can witness the shopkeeper pulling a lever. Once you leave, you are in another part of Ankh-Morpork.
* Discworld II, Rincewind has to convince the mortician that he's dead and uses

some ice to lower his body temperature. Guess where the thermometer, and thus the ice, have to go...
* Discworld II: The wires are replaced with flasks on the bomb Rincewind finds in the Fools' Guild's donkey-cart park. He turns the wrong one and speeds up the timer. He and the Librarian get clear, but Death isn't so lucky. And thus the plot is kicked off by our favorite bonehead's disappearance.
* Discworld II uses a similar idea with a twist. Mrs. Cake, a seer, answers Rincewind's questions before he asks them. If the player replies to an answer with a wrong question, she says something like "make up your mind, young man" and the conversation has to be started over. A gag carried over from the books, where Mrs. Cake got terrible migraines if the other person deviated from the premonition.
* Discworld, I just tripped over the first old branch I came up to. Took me ages to find one, sometimes."
* Discworld. In fact, Lord Vetinari convinced the Ankh-Morpork Explorers' Society to change its name to the Trespassers' Society on the grounds that they could hardly be "discovering" territories already settled by people.
* Discworld information about someone, e.g. making a gangster look weak to his competitors by revealing his donations to charity.
* Discworld) in his newspaper, his business partner Sacharissa Cripslock focuses on more frivolous stories if they'll help sell the paper. They have a big argument about it but eventually decide to keep both.
* Discworld in nature, thus ensuring that a Discworld with him will be much better than a Discworld without him. However, he is also slowly taking the time to set up a proper police force and bureaucracy for the city, making sure that after he's gone, the city will still thrive.
* Discworld in pursuit of a mass murderer and kidnapped a member of the Watch to draw Vimes' attention to the true perpetrators of the case at hand), Ahmed mentions to Vimes that their situations are different. His beat is a city that you can walk in half an hour; Ahmed's beat contains two million square miles of desert and mountain where he is alone against bandits and murderers and thus must inspire dread by striking fast once since he won't get a second chance. Vimes eventually relents that the two of them simply has different views on how justice should be served.
* Discworld instead. Carrot Ironfoundersson of the City Watch plays it straight, being physically and morally strong, but he's not the central protagonist.
* Discworld instead of up — no one's sure why, but most agree it's not a good idea to be around when it hits zero.
* Discworld into a front-row seat in a stripclub. From then on, no patron that sits in it manages to stay for more than a few seconds.
* Discworld introduces "Déjà Fu", the martial art practiced by the History Monks, in which the practitioner travels in time as well as in space. The book give us as a "translation": "The feeling that you have been kicked in the head this way before."
* Discworld, inventing stamp collecting (and becoming incredibly dismissive about people who are "still" collecting pins).
* Discworld involved. Sure enough, when Vimes reads Colon's report, he sarcastically comments "All that's missing is the box of dates and the camel under the pillow!"
* Discworld) involving confusion between "geas" — a pact or commandment — and "geese".
* Discworld, in which a soon-to-be-married character accidentally purchases a how-to guide on martial arts....
* Discworld is about how wonderful she is for ending the cold. (Although the earlier "Fire and Ice" correctly portrays both the Summer Lady and the Wintersmith as neither good nor evil, just balanced.)
* Discworld is above the law, to the extent that he famously arrested the ruler of the city. While this obviously refers to Sam, during the time period of the novels, it's also a description of Suffer-Not-Injustice, some 300 years earlier.
* Discworld is a parody of this trope. We can't really be sure of his actual

record, since he is also a self-proclaimed Outrageous Liar.
* Discworld is around eleven when she has to rescue her brother from a river monster, armed only with a large cast-iron frying pan and a willingness to look the creature straight in the eyes for long enough to measure her swing. Then it escalates and over the course of four books she realises that if you're a Witch, age is just a number. The pointy hat knows no minimum age.
* Discworld is based on magic. The Discworld version of a camera or a digital organiser is just a specific kind of Imp living in a little box. The Unseen University has a whole group of the magical equivalent of 80s computer nerds, inventing Artificial Intelligence using a collection of enchanted stuff, like a sheep skull and a teddy bear that mysteriously appeared one Hogswatch-night. Their computer, "Hex", has bugs. Literally. Specifically, it's partly based on colonies of bees and ants - ants as the basis for computation, bees for long term memory via different kinds of honey.
* Discworld is engineered to go catastrophically wrong and the student has to rescue the situation quickly or die horribly.
* Discworld is essentially the same thing as an undercover officer and works under a temporary identity to investigate a specific crime, rather than lurking and spying indiscriminately.
* Discworld, is evil through and through, and almost certainly murdered his other sister.
* Discworld is explicitly described as this by a nearby (female) zoologist, who stands back to watch the fight from a professional viewpoint.
* Discworld is full of all kinds of Lords and Ladies, including evil ones; the antagonist of
* Discworld, is her use of two pistol crossbows held and deployed in the same manner in which Lara Croft holds her pistols. Alice, a barely-there canonical character, is developed much more in these stories as Assassin, adventuress, GayBlade and Stealth Archaeologist.
* Discworld is infamous for the negative genius he applied to his creations, to the point where one of his other nicknames is "Look, The Plans Were The Right Way Round When I Drew Them". We don't see what resulted in that particular epithet, but he's built things like salt-and-pepper shakers big enough to be used as family housing, a shower that dispenses acid rain, a mail-sorting machine that breaks the laws of physics by rounding down pi to 3, and a trout lake an inch wide.
* Discworld is kept in a deep-frozen room and should only be read if you are over the age of 80 and, if possible, dead.
* Discworld) is kept in a locked room in the Patrician's palace, regularly brought food, ink and drawing paper. He's not locked to keep him imprisoned but to keep people away (he designed the locks himself) and to prevent them from applying his inventions for evil purposes (Leonard just can't help himself from designing things like explosives that could remove mountains or submarines that can cut through hulls alongside flying machines and a more efficient tea stirrer).
* Discworld, is portrayed as holding - and presumably using - two pistol crossbows in the same manner in which Lara Croft holds her pistols.
* Discworld is pretty gross, to the point where behind a tree is a better option, even if it's snowing and you can hear wolves. The one at the Duchess isn't much better; Polly sloshes two buckets of water in every day while trying not to breathe, but that doesn't stop weird moss from growing on the floor.
* Discworld is set up to look like Andre might be the villain until he reveals that he is actually an undercover cop.
* Discworld" is that if something is an individual, it has an identity. If it has an identity, it is a person. If it is a person, it is alive. If it is alive, it will die someday. And from the point of view of the immortal Auditors, a mortal lifespan is so short that it might as well end instantaneously.
* Discworld is threatened with having their ashes thrown over the Rim into outer space.
* Discworld is to have descriptions include camera movements as different elements are shown/described.

* Discworld it adds that King Ludwig the Tree (who believed there should be a new kind of frog, and wore his underpants on his head) was "a little confused".
* Discworld. It also applies to fairy tale plots, which Nanny Ogg calls "rural myths" at one point.
* Discworld it at the same time. Over time the setting becomes increasingly distinct.
* Discworld), it just added to the interest... and the local economy. It helps even more that there's something with the roads that causes all traveling coaches to break a wheel as they near it.
* Discworld it mostly consists of the Citadel of Kom (i.e. Discworld Vatican) and some surrounding farmland.
* Discworld it's a common skill among dwarfs to be able to hide battle axes in one's beard.
* Discworld it's a scientific fact it's a disc on the back of four elephants standing on a giant turtle.
* Discworld, it's fully extended (or as fully extended as the wizards have managed so far) and looks like an enormous tree with an unusual amount of right angles. Collapsing it causes a partial vacuum.
* Discworld. It should be pointed out that the blue eyes in question are STARS and that in moments of "emotional" stress (Death can't really do emotions; no glands) they go supernova. Yes, you heard me, his eyes explode when he's angry.
* Discworld, it's mentioned that anyone wanting to pose the question "Your money or your life?" to a dwarf should pack a lunch and a long book.
* Discworld, it's revealed that a vampire has been selectively breeding the noble houses of Anhk-Morpork for centuries, by manipulating marriages through his role as leader of the Heralds. Not so much treating people as livestock as treating them as show-dogs, but still darn rude.
* Discworld, it's stated that this was a tradition in one barony in Uberwald, which is ruled by a werewolf pack. In the good old days, anyone could volunteer to be the quarry in "The Game", as it was known (participation was strictly voluntary) and was released into the woods unarmed but with a head start and told to get to town without getting killed. If the quarry survived (the odds weren't particularly good, but if you were in good physical shape, could think on your feet and knew your way around the woods it was definitely doable) he/she would be presented with a meal at the castle and enough money to start a small business, and it's mentioned that well over half the workshops and stores in the nearby town were founded using prize money from The Game. By the time of the novel, the current heir, Wolfgang, decided to pervert the rules of The Game, primarily by "volunteering" people who he didn't need or want around and sending advance parties into the woods to lie in wait. Then he decided to hunt Sam Vimes, which was one of the last mistakes he ever made.
* Discworld). It was boring and the Luggage kept itself entertained by fighting sharks.
* Discworld. It works. Placing trust in the goddess Anutrof brings unfailing good luck. Right up to the day when she manifests in person.
* Discworld.) Johanna obliges him and takes it off. Howard Wolowitz is rendered near-speechless.
* Discworld, Johanna reflects she is so going to go to Hell for this. But it will be worth every last moment.
* Discworld, Johanna Smith-Rhodes considers one of the depressingly few perks of being a mother of teenage girls is the ability to leave them mortified and embarrassed at fairly regular intervals. She aces this by going out minge-drinking with fellow mothers of her daughter's teenage friends. Much to their squirming mortification. Meanwhile Bekki's father, wizard Ponder Stibbons, is capable of getting absurdly over-protective and has a hard time adjusting to his little girl growing up.
* Discworld jolly well going to respond with lots and lots of lovely ph14. Acid plus alkali equals salt and water, Captain Carrot. Any organic material subjected to caustic potash is reduced to soap. SHE is going to be a puddle of salty soapy water in no seconds nothing!"

* Discworld) killed the former and the latter ran off to become a prize-winning shepherd dog.
* Discworld, known as the Rule of Universal Humour. That term appears once in the novels themselves, mentioned as the reason someone still had his hat on after being turned into a pumpkin.
* Discworld knows Carrot. Once Ankh-Morpork gets a newspaper, Vimes himself is a regular feature in it as well.
* Discworld leading the Morporkian army thought that they'd have a jolly good time teaching the Klatchians a lesson, that the enemy would run at the sight of their steel, and that they'd be home by Hogswatch. This despite the fact that they were badly armed, hopelessly outnumbered, and the Klatchians who actually saw their steel tended to start sniggering. Later in the book, one character bemoans that "We were going to sail into Klatch and be in Al-Khali by teatime, drinking sherbet with pliant young women in the Rhoxi," mirroring the confident statements of some WWII soldiers that "We'll be drinking coffee in Berlin by teatime."
* Discworld, Leonard of Quirm's spacesuit includes a fishbowl helmet, which his notes say are to allow him to observe as much as possible. (Carrot has a helmet based on his standard Watch armour with a faceplate added, and Rincewind has a leather helmet with two eyeholes.)
* Discworld lets players go back and forth between the past and the present. If you try to use an item that needs to be used at that place but in a different time, Rincewind will say "Try again later. Or earlier."
* Discworld ... like opening pickle jars, sorting out those funny noises in the attic, capturing spiders and putting them outside, and rewiring plugs.
* Discworld likes takeaway curries. Don't think about how he manages to swallow, or where the food goes next.
* Discworld line of humorous datebooks, but the quandry was resolved by saving Octeday for amusing anecdotes and character sketches.
* Discworld line of thought but concedes it could have explosive uses. Joan then gets hapless student Hermann Meier Wetterarscht, who opted for Dom Sci as an undemanding three hours in the warm, in a class which was almost all girls. Wetterarscht, while trying for brioche and ciabatta, ends up recreating something akin to Dwarf Bread, causing an oven to collapse under the weight and then implode. Joan was not pleased.
* Discworld lists a number of student traditions, all of which are basically pub crawls, and the page about the Junior Common Room states that the main purpose of this student organisation is "to get well and truly ratted".
* Discworld little girls under ten just build a blanket fort in the living room. Not a Keyboards Redoubt.
* Discworld little social embarrassments that are never, ever, talked about. What happens when two people of the same gender are forced by circumstances to share a bedroom - and during the night one feels a need to masturbate? Miss Alice Band is faced with this dilemma with her room-mate and turns over some possible reactions in her mind...
* Discworld living rock. It's just that their brains work better in cold temperatures, so if they leave their mountain homelands, they get stupid, and if it gets too hot, their brains shut down entirely and they go inert until nightfall.
* Discworld, Lord Magpyr refers to fairies and Igor as evolutionary cul-de-sacs, although he was probably just being arrogant and mean, rather than making any thoughtful judgments on their place in the world.
* Discworld, Lord Rust turns the Rats Chamber (the council room in the Patrician's Palace) into one. The meeting table has been covered in sand to form a kind of map, and since everyone knows Klatch is all desert, Lord Rust assumes it's a good one. Once they actually arrive in Klatch, he uses a big tent for the same purpose.
* Discworld. Lord Vetinari tries to bring order to the ancient sport of "foot-the-ball" in order to tame the football hooligans (and more importantly, the thuggish "Faces" that run the mobs of opposing teams) that have been causing trouble in the city.
* Discworld made an attempt at depicting a Winged Humanoid while also managing a

nod towards real-life physics: a flying banshee character has a slender light-weight frame, enormous flight muscles across his chest, and leathery wings that attach to his very long arms, rather than sprouting out of his back.
* Discworld, magic carpets originated when a Klatchian wizard was experimenting with flying spells, whilst taking long tokes from a hookah filled with the finest hashish. In an increasinlgy blissed-out state in a smoky enclosed room, the smoke and fumes - and the magic - impregnated the carpet he was standing on and the carpet had a freaky trip where it thought it could fly. The rest is history.
* Discworld, magic is weakening on the Discworld. This causes people to riot against wizards. Good thing Unseen University has some big, heavy doors. Too bad the only locks are magic spells, with no good, solid steel lock.
* Discworld, Magrat and Verence the Fool are kissing whilst Lancre is moved forwards 15 years in time, technically making it the longest kiss in history.
* Discworld, Magrat goes overboard on powder and mascara when going out to rescue Nanny Ogg from the Duke's dungeons, and is described as looking like "two flies that had crashed into a sugar bowl". She also leaves a guard tempted to make a sign to "ward off the evil eyeshadow".
* Discworld, Magrat is explaining the situation to Jason Ogg, all while swinging around an unregarded battle axe.
* Discworld make him a pretty good informant ("it was me that done it, not Coatface's boys like everyone says").
* Discworld manservant. Keeps up a haughty demeanor in general, but especially towards young folks.
* Discworld Mapp, this was the standard modus operandi of the great explorer Sir Roderick Purdeigh, who was of the firm opinion that people in distant lands that no-one wearing proper trousers had ever seen before were refusing to speak Morporkian out of stubbornness.
* Discworld mass panic about alien invasion. Two of the displaced British squaddies, having stolen civilian clothes, blend into a rally in Hide Park and, un-noticed in the crowd, gleefully watch Ankh-Morpork's homegrown UFO nuts demanding an end to Vetinari's clearly blatant cover-up of proof of alien visitation. Discreetly monitoring the speakers, there are indeed Men In Black - Lord Vetinari's Dark Clerks, assigned there to listen and take notes....
* Discworld meaning sets up one of these. Lord Vetinari is extremely serious and ascetic, not given to the sort of partying that characterized his predecessors. Hence "Lord Vetinari seldom had balls. There was a popular song about it, in fact."
* Discworld, meaning the excess life energy is piling up and things don't die properly. Cue compost piles coming to life and the dead rising up and being very cranky. One or two characters muse that the passing of the seasons is sort of the planet's "heartbeat", causing life energy to flow in and out of the ecosystem.
* Discworld mean that "the three rules of the Librarians of Time and Space are: 1) Silence; 2) Books must be returned no later than the last date shown; and 3) Do not interfere with the nature of causality."
* Discworld, mention is made of a kid with a penny-whistle whom the Musician's Guild "dealt with" for playing unlicensed music, who now plays a chord whenever he hiccups.
* Discworld mentions an incident in which King Harold the Rampant neglected to comply with his jester's suggestion that he adjust his chain mail. This negligence, together with the very good aim of a Pseudopolitan archer, is why the Battle of the Field of Cloth and Ants ended on such a remarkably-high note.
* Discworld. Merely passing out of the toughest school on the Disc is acheivement enough, and most will forge worthwhile careers in other areas. motivations vary: one student is there simply because the Assassins' music department is massively well resourced, with gifted teachers, and he wants a career in music. Being an Assassin is a sideline. The Guild's focus is also shifting: the "soft skills" that do not involve killing people are valued, as they create bomb disposal officers, zoologists, bodyguards, politicians, career civil servants, and of course Teachers. A new possibility is that really good shots who don't get airsick might make good aircrew and air-gunners for the Air Watch. Careful negotiations are proceeding.

* Discworld, Miss Alice Band becomes this when her girlfriend is stabbed and left for dead in the doorway of the Assassins' Guild. Other Assassins are expressly warned off the retributory contract as it is clearly understood this one has Alice's name on it. She is even warned not to let anger dictate her actions when she signs the contract. She then goes on to slay two of her lover's attackers with something verging on Extreme Prejudice, but is explicitly advised that one needs to be kept alive for just long enough to be interrogated as to who employed them and what their motives are. She reluctantly complies, accepting that his interrogation will be very unpleasant indeed. But is allowed to complete the contract afterwards - in cold blood, this time.
* Discworld, Moist passes by some fighters preparing for a bar-room brawl in the Mended Drum, one of whom recommends clapping a dwarf on the ears to stun them.
* Discworld, Moist von Lipwig realises that from a goblin's point of view, humans smell pretty ripely too.
* Discworld, Moist von Lipwig seems unable to put the metaphorical shovel down. The funniest point is probably that Vetinari didn’t even ask about the problem, Moist just assumed that this was the reason why his boss wanted to talk to him.
* Discworld moment, the trope withered and died in the face of Nobby Nobbs.
* Discworld moment when a reader's mother sent an irate letter to Terry Pratchett, complaining about the amount of swearing present in the books. As he said, some people will complain about anything.
* Discworld monstrosities, will make it clear they're a serious and disturbing threat and, at the same time, completely ridiculous, often making the point that a creature seemingly made of the bits left over once everything else was created is probably going to fall over a lot.
* Discworld, Mort and Ysabel have a lengthy slanging match with one another, including, at a few points, taking a moment out to clarify their meaning, before continuing.
* Discworld moves. Some doctors once tried to put it in a cupboard, but it got out.
* Discworld, movies were created using six imps triggered in succession, suggesting an imp can paint an image in only 1/4 of a second.
* Discworld. Mrs Bradshaw suggests that the chocolate machines in particular might be violating Thieves Guild demarcation rules.
* Discworld, Mrs. Cake literally does this with a glass of liquor for her spirit guide 'One-Man-Bucket'. Thus he gets the ghost of the drink after she kills it by setting it on fire.
* Discworld much to Rincewind's surprise, as they had spent a good length of time together without him ever mentioning it, despite Twoflower's insistence that he "MUST have done".
* Discworld MUD: There's a traveling shop which sells some very rare items, and is useful for getting to distant locations.
* Discworld, Musicians' Guild membership costs AM$25.00 (plus AM$15.00 compulsory voluntary pension fund contribution and AM$35.00 as a percentage of ... something). Without membership, a musician can't perform in Ankh-Morpork (at least, not for long), and without performing, there's no way the average musician can raise AM$75.00.
* Discworld, Mustrum Ridcully demonstrates this to Ponder Stibbons and a sceptical Matron Igorina using nothing more than a length of string and a piece of chalk. An entire hospital bed plus occupant has to be lifted inside a very big magical octogram; the reasoning is that Ruth N'Kweze would go inside the circle, but the Howondalandian magical entity possessing her could not enter and she would therefore be freed.
* Discworld, Nanny Ogg gets several of her sons to organize an angry mob to go after Count Magpyr and his family, who have moved into Lancre Castle with the intent of taking over the country. The Count is not impressed and simply steps out to criticize their "angry mob" form (like using large, unwieldy scythes instead of sickles) before siccing his personal army on the mob. But at the climax, a mob takes on the Count — much to the approval of the witches, as you have to kill your own monsters. (They had brought their children, which would teach the children

that monsters could be killed.)
* Discworld necessary, his own assassin skills) to keep himself alive. While still active in later books, Vetinari reduced their role with the introduction of Dark Clerks, unobtrusive, quiet, and efficient staff that just happens to be mostly drawn from the most promising graduates of the Assassins' Guild.
* Discworld Needless to say, it's the real thing, despite looking like an ordinary, slightly rusted sword.
* Discworld needs to be a flying Witch with magical talent. Aircrew selection calls for different skills.
* Discworld: Nobby Nobbs of the Ankh-Morpork City Watch is no longer allowed to deliver these after "that bet-you-a-dollar-you're-the-widow-Jackson nonsense." Carrot or Vimes usually handles it. (This is based on an urban legend that's probably as old as this trope.)
* Discworld, Nobby says he'll never wash his hankerchief again, then blows his nose ("It still bends, see?")
* Discworld Noir, a major clue early on is a matchbook from the Octarine Parrot.
* Discworld Noir being a private investigator means he has to wear a trenchcoat and fedora, but he's quite sure it does.
* Discworld Noir by hiding in a crate that's being taken on board, and later discovers that a killer snuck into the Patrician's Palace by hiding in a wine barrel that was delivered there.
* Discworld Noir (Good Doggies). The Watch classed his death as suicide.
* Discworld Noir; he doesn't know why being a private investigator means he has to wear a trenchcoat and fedora, but he's quite sure it does.
* Discworld Noir. Lewton finally finds the guy he's looking for when he's knocked unconscious from behind. When he comes to, the guy's dead and Vimes and Nobby are standing over him and telling him he's the prime suspect. Other characters are impressed by the way he knocked himself out to allay suspicion.
* Discworld Noir: Lewton tries to do this on Malaclypse - it works, after a fashion.
* Discworld Noir, Lewton will say "Thank you very much" with an Elvis accent when a wizard informs him that glamours are "an elvish thing".
* Discworld Noir the secret location he'd escaped through to close the case.
* Discworld Noir, with the usual Discworld insistence that metaphors have to be precise.
* Discworld. No one's operating it, but it keeps working anyway. He tries grabbing the handle (it snaps off), and then pulling out the salamanders that are its light source, but somehow the picture keeps being projected. Finally he grabs the film itself and rips it out of the projector, which does work.
* Discworld notes some of the things which men on horseback are and aren't suited for...such as how they fare in Urban Warfare against an enemy without a uniform.
* Discworld notes that Ankh-Morpork law has "a whole quiverful of offences available to a policeman who wishes to pass the time of day with a citizen, ranging from Loitering With Intent through Obstruction to Lingering While Being the Wrong Colour/Shape/Species/Sex".
* Discworld, not helped by the fact that it's a tricky birth. But given the cultural setting, the midwife is quite firm about keeping him well out of the way.
* Discworld). Not to mention the whole "the world is flat" thing, y'know?
* Discworld novel cites an incident where a witch caught a traveling peddler beating his exhausted, overloaded donkey. She grabbed the riding crop out of his hands and used it to strike him in the face twice, saying: "Hurts, doesn't it?"
* Discworld novel ever written parodies a common fantasy trope or six.
* Discworld novel: Ridcully is Archchancellor and supposedly an administrator, and "has always wanted a paperless office," but the Disc is just getting its Industrial Age underway and so paper is, of course, widely used. Ridcully gets rid of papers he doesn't feel like dealing with by locking them in a cabinet and throwing them out the window at night.
* Discworld novels. All that need be known (and is indeed given) is that the opening lines are 'The boy stood on the burning deck/His name was Henry Rollocks'

and that it starts out 'harmless enough'.
* Discworld novels. An exaggeration of Leonardo da Vinci, Leonard sometimes appears to be a one-man Industrial Revolution.
* Discworld novels: Angua absolutely forbids anyone to watch her while she is transforming from human to werewolf and vice-versa. Especially her lover Carrot, on the grounds that what he may see could put him off her for life. One man who did watch ran away, and went to sea to put the terrible sight behind him. However, it should be noted that it's not the least bit horrific or traumatic for Angua herself, as the transformation doesn't even feel uncomfortable. When describing it, she compares it to "a full-body sneeze".
* Discworld novels are enjoyable if somewhat generic fantasy-parodies. After that, Terry Prachett found his voice as an author, and the quality of the series continued to improve.
* Discworld novels doesn't understand how human things work, the towels in his bathroom are thick, white, and completely solid. His manservant Albert therefore uses one he's acquired with the logo of the Ankh-Morpork Young Men's Reformed Cultists of the Ichor God Bel-Shamaroth Association.
* Discworld novels often allude to a multiverse. Since all libraries, everywhere, in every space, universe and time are connected, you can reach this L-space in the Library of Unseen University. If the Librarian lets you in, of course.
* Discworld novels often include characters named after (and perhaps slightly based on) winners of charity auctions. Once they exist, they may appear in later books. Known examples include:
* Discworld novels. Savvy characters sometimes just outright give up/run away because they recognize the plot armor the other guys have.
* Discworld novels, the Boffo Joke and Novelty Shop is described as the favored establishment of people who think a whoopee cushion is the last word in comedy, "which in many respects it is".
* Discworld novels, the gods of Cori Celesti are engaged in an aeons-long feud with the Ice Giants, who play their radio too loud and have refused to return the lawnmower.
* Discworld novels, there are several off-hand remarks about vampires working at kosher slaughterhouses. Which is strange because there isn't an actual Judaism in that world. Presumably, there is a religion that has a similar edict about the consumption of blood.
* Discworld novels, Vimes wonders if Vetinari has an entire closet full of identical black robes, as he's never seen the Patrician dressed in any other way.
* Discworld novels, we have the Auditors. They crave an orderly universe, since they are the ones that must oversee what is essentially reality's paperwork down to the individual chemical reactions, and hence want to extinguish all life because life is unpredictable and is heaping no end of work upon them.
* Discworld novels where there is a reference to hanging someone up by their "figgin" or removing or roasting said figgin. Invariably accompanying these instances there is either a footnote revealing that a figgin is a raisin pastry or a moment where one of the characters is shown wondering why the prospect of those punishments would cause so much terror.
* Discworld number of clowns allowed to travel in a single coach or sedan chair.
* Discworld, of all people, steps in to take the Hogfather's place on Hogswatchnight.
* Discworld of an attack on a caravan in which the long-lost royal sword had been carefully hidden.
* Discworld of the "Kiss of Life" (especially from Nobby) is enough to revive the patient. Most of them haven't really suffered cardiac arrest, they've just fainted.
* Discworld of the series. Fred Colon and Nobby Nobbs are repeat offenders, too.
* Discworld of what he's seeing, but decides not to press the matter further.
* Discworld, of which he is arguably the chief god (or once was, real estate in Dunmanifestin moves around fairly quickly). He has eyes, but they don't spend any time in his head.
* Discworld - Om can't read minds because they're too chaotic, but he can get a

feel for the general shape of them.
* Discworld on a Derren Brown show, where he asked an experienced tightrope walker stuff like that, and repeatedly told him not to fall off. Guess what happened next.
* Discworld. Once, he says that he doesn't know whether he has a first name. (His Fourecks counterpart is named Bill Rincewind, suggesting that Rincewind is his surname.)
* Discworld once tricked a swan into singing its "swan song", a necessary prerequisite before it could die, using this trope:
* Discworld. One day he is challenged in a saloon by a local hard guy, who figures the tenderloin with the faggoty accent will be an easy pushover. Tim is sore that the girl he was unsuccessfully in love with is getting off with somebody else, and he is getting pissed in both senses of the word. He then demonstrates the Assassin fast draw. And brings a new skill to the Wild Widdershins of Aceria in the process.
* Discworld. One historical practitioner famously killed seventeen men with just a ladder and two buckets of paste.
* Discworld, one of Johanna Smith-Rhodes' teaching specialties at the Assassins' Guild School is Exothermic Alchemy. A related discipline is Deployment of Devices. Basically, she teaches young Assassins about the exciting world of explosives and incendiaries. Starred graduates of her courses have been responsible for some spectacular incidences of arson.
* Discworld: One paragraph describes why wizards and warriors don't get along. It essentially boils down to each side calling the other gay (warriors accuse wizards of wearing long robes and can't perform magic when a woman's around, wizards retort that warriors sure do spend a lot of time in gyms surrounded by muscular men wearing very little leather clothing).
* Discworld only a handful are left, the worst of the worst led by a drunkard. Captain Vimes' character arc is largely concerned with the redemption of the Night Watch into a powerful and functional force.
* Discworld on pink paper with pictures of mice on it, so that he'll think she's cute.
* Discworld, on the other hand, are clearly insane. And mostly very, very dead (it should be pointed out that there is a "Young Men's Reformed Cultists of the Ichor God Bel-Shamharoth Association", or "YMPA" in Ankh-Morpork, too).
* Discworld operation, and when his actions come to light (not just the desertion but his general conduct) he's put up on official charges himself.
* Discworld) or a pair of spiked knuckledusters that make his boss wince. Not to mention the time when Willikins left Vimes' service to fight in Klatch — biting a D'Reg's nose off at one point, and generally being Sergeant Badass.
* Discworld order of precidence at parties, "Someone who has brought a whole bottle of whisky with a name you recognise" is followed by "Someone who has brought a whole bottle of whisky with a name you recognise, but which, on closer inspection, is spelled wrong (this is definitely a sign you shouldn't spill any on the carpet)".
* Discworld or else they will soon learn what a B she is capable of being. Gaspode The Wonder Dog sails very close to the edge with his greeting to her of "Yo Bitch!"
* Discworld, Otto Chriek's suit becomes the same pattern as the carpet his remains were found on.
* Discworld, owl-shaped clocks in quiet country parlours create discomfiture in the leading characters. Death, temporarily rendered mortal, is reminded of the passage of time and his own impending mortality, whilst Sam Vimes decides he hates owl-shaped clocks on principle because of their sinister nature.
* Discworld parodies this occasionally, not only with the 'vampyres' mentioned above, but also with...
* Discworld parodies this with the Rite of Ashk'Ente, which summons Death - it's implied that this is supposed to require a human sacrifice, but magical refinements mean that it's now possible with only "4 cubic centimetres of mouse blood".
* Discworld. Particularly in Ankh-Morpork, which is inhabited by humans of many ethnicities, trolls, dwarves, gnomes, vampires, golems, small gods, the occasional talking dog ...

* Discworld parties are dead? In the coming chapters, the author may well raise the subject of Zombie sex.
* Discworld, Paul Kidby takes the reference to Venus figurines and gives her, in his own words, "a large rocky bust".
* Discworld; people put chunks of it in circles around places where the Faerie realm gets too close.
* Discworld people. You disbelieved people when they said they were innocent. Only guilty people were trustworthy."
* Discworld perform magic for every mundane purpose or using it to solve their problems, because the overuse of magic attracts the things from the Dungeon Dimensions, and if they break through, the effect is described as the ocean trying to warm itself around a candle.
* Discworld perspective however, she's experiencing exactly what the trope describes.
* Discworld, Pharoah Pteppic shakes a stonemason's hand in an attempt to be friendly. His ideas of kingship are a little different from those in his country, and he is shocked when the man backs away screaming and clutching his arm. It's explained to him that for the man to use his hand would be a blasphemy against the divine pharoah, which is probably punishable by death. The man's hand is amputated by the priests. When Pteppic protests this the high priest tells him that if he hadn't been restrained the man would have done it himself, with his chisel.
* Discworld place which is called in the local language That Place Where The Sun's Rays Do Not Reach. A Dwarf who falls through The Place Where The Sun Does Not Shine, near Slice in Lancre, resurfaces in the insanitary oasis of En-El-Sams-la-Raisa, three or four thousand miles away in Klatch, virtually instantaneously.
* Discworld plays with the trope (when doesn't it?) — wherefore see a partly overlapping discussion in the Literature folder under "Parodies and radically different versions" below — by having this as the traditional Dwarven image that most Dwarfs aspire to, but many were born and raised in cities and work in factories.
* Discworld police chief Sam Vimes. Even more bewildering, as canon strongly hints (without confirming) that Vetinari's long-standing romantic interest is definitively heterosexual - the vampire Lady Margalotta.
* Discworld. Ponder is mobbed by an admiring crowd. Who ring their friends to come along. Stuart is ecstatic: there have never been this many chicks in the store before.
* Discworld, Ponder Stibbons notices that the magical supercomputer Hex is starting to think for itself, and reflects "We should never have named you. A thing with a name is a bit more than a thing".
* Discworld Ponder Stibbons shoots down the idea, saying that mortals who claim to be gods are likely to come to the same bad ends on Earth as they would on Discworld.
* Discworld portrays the angel Sandalfoot, Guardian Of The High And Most Mystic Arcanum of the Caroc Cards, as a harassed junior bureaucrat tasked with keeping the costs down - especially the wages bill - by issuing redundancy notices to six out of the eight Virtues. Who, being strong-minded attitudinal ladies, give him a really hard time.
* Discworld possible to be legally liable for several hundred years worth of debts.
* Discworld. Pratchett, as a rule, is very, very fond of overanalysing idioms and taking things literally.
* Discworld. (Pratchett received a lot of fanmail to this effect, which often made for... difficult reading.)
* Discworld: Pratchett was in fact formerly a scientific journalist specializing in nuclear physics, so his books are full of in-jokes about the subject.
* Discworld ranks). One oddity, however, is the very junior rank of "Lance-Constable".
* Discworld; rather, it's their servants, the Igors (and Igorinas), though they can turn it off to be understood better. This varies from Igor to Igor. The hip young Igor who works for the City Watch has it intermittently (his relatives call it a

thpeech impediment), while another Igor was able to shut it off for a complex explanation. Given the nature of Igorhood this could have something to do with what dental surgery a particular Igor has dabbled in.
* Discworld readers as the "Holy Horns of Om", Om being the god honoured by the salute. Serves roughly the same purpose as a Christian crossing himself.
* Discworld really good at killing, not because their family had money).
* Discworld related to the Hunk of the Month still finds reasons to be alone with the magazine...
* Discworld. Renamed from "The Whore Pits" after much representation from said Guild.
* Discworld require octograms to be drawn on the floor. An example is the Rite of Ashk-Ente, which supposedly binds Death to the inside of the octogram... but he just stays in to be polite. Also, it is explained that most of the magical paraphernalia are used only for the look of the thing and are not really necessary, so it could be considered a subversion.
* Discworld resort to extreme politeness, observers should duck for a deep bomb-proof shelter.
* Discworld, returns to the Watch for the finale, as signalled by his demanding someone give him a helmet.
* Discworld reveals that it used to be much, much worse before Lord Vetinari became patrician. Later on, it actually started to become a decent city due in part to the progress of technology such as trains and c-mail.
* Discworld reveals there is a Golem Trust run by sympathetic humans who help the golems manage their finances, get hired as fairly-paid laborers, and locate others of their kind to emancipate.
* Discworld, Rincewind doesn't understand that he can just leave the growing wizard problems behind if he stops being a wizard, which would be easy for him since he can't do magic. Subverted later when he finally does get it, but says that he can't just stop being a wizard since it's more than just the ability to do magic.
* Discworld Rincewind drops a sandwich in a tide-pool and the narrator wonders what life would have been like with mustard rather than mayonnaise.
* Discworld Rincewind has come to recognise that any good fortune or material gain he gets will be lost in some sort of cruel and ironic way. By later books he has started to actively try and avoid rewards in an attempt to thwart this trope (needless to say it never works).
* Discworld. Rincewind (thanks to a quantum weather butterfly) gets a personal raincloud. Later on, this is upgraded to a personal snowstorm (right in the middle of an actual rain storm). Both cases sort of turn out to his advantage, though; the snow helps Cohen and the Horde find him, and the rain leads to him discovering the real Red Army.
* Discworld, Rincewind tries to blow it off — so it starts making it rain just over his head, which is enough to drop him. It also stings him with a very small lightning bolt.
* Discworld Role-Playing Game actually has rules for invoking this, including magic that lets you twist narrative tropes and even draw power from them, as well as a caution against taking too much for granted...
* Discworld Roleplaying Game and practiced his sinister smile, because that's what's expected. He views the whole thing as an unnecessary distraction from balancing the budget.
* Discworld Role-Playing Game, as well as a caution that just because you set yourself up as the Hero Who Saves the Town From the Evil Troll doesn't mean you're not actually One of the Dozen Hapless Characters Who Get Killed by the Troll Before the Hero Shows Up or, if the story is being told from a troll perspective, The Human That Gets Smooshed by the Troll. (Troll fairy stories aren't very subtle.)
* Discworld Role-Playing Game chapter "Going Shopping" says that some players see shopping as an essential part of the adventure "more fun than fighting princesses or rescuing monsters". It goes on to say that if this becomes a problem, the GM should remind them that the princesses aren't going to fight themselves, and maybe even have shopkeepers refuse to serve them until they've saved that poor monster

everyone in the town loves.
* Discworld Role-Playing Game ensures that villains who act this way are generally guaranteed to survive their many defeats, in an equally stereotyped way — and the game supports this too.
* Discworld Role-Playing Game explains the dwarven part of this from the dwarves' point of view, to help players with dwarf PCs. Dwarves find the human tendency to speak in metaphor to be both confusing and annoying. You ask a human how long until the explosion, and instead of a useful answer you get a little meditation about the beauty of flames and the fragility of life. Precise language is a useful survival trait in as dangerous a profession as mining. The game also provides a "Literal-Minded" disadvantage as an option when creating characters, dwarf or otherwise.
* Discworld Roleplaying Game (see above) to define a spell that triggers such realizations. If the target refuses to be frightened, this can rebound on the caster...
* Discworld Role-Playing Game supplement has a special character advantage to reflect this sort of thing: it usually gives you a bonus to creative work, but every time you try for something original, there's a chance you might actually come up with something revolutionary but unrelated.
* Discworld Role-Playing Game that he can be killed with his own scythe or sword, but neither confirms or denies it, simply pointing out that getting the weapons in the first place is far from easy.
* Discworld Roleplaying Game the actual owner is Dooli the Arranger, so named not just because he runs deals but because he also leads the house band. He's a combination of Rick Blaine and Sam (played by Dooley Wilson.)
* Discworld Roleplaying Game, the Sultan of Al-Ybi's extremely intelligent first wife makes very stupid suggestions that contain the basis of an idea he could develop himself.
* Discworld Roleplaying Game, when actually he's trying to make knockoff Burfies.
* Discworld runs into Rincewind and tells him they have an appointment in another city and asks Rincewind to please hurry and go there, even offering to lend him his horse. Rincewind refuses. Of course, it was the same city Rincewind was planning to run to in the first place, making it a sort of accidentally self-defeating prophecy.
* Discworld, rural Lancre witches who have no concept of how to behave in high society, dressing up this way and attending an opera performance. This goes about as well as could be expected given the witches concerned.
* Discworld. Ruth's nation is in a perpetual Cold War with Rimwards Howondaland, one which occassionally gets hot. At least partly because of apartheid. As all this is happening in faraway Ankh-Morpork, people around them collude to keep their secret, and their families accept it as one of those things. The rules are different in the Big City. But sooner or later both need to return to their respective homelands.
* Discworld: Samuel Vimes has several bear traps hidden in the shrubberies around his house to keep assassins from sneaking through them. This is one of the many painful and/or humiliating reasons why nowadays the only assassins to sneak into his home are students sent there by their teachers to learn humility.
* Discworld, Sam Vimes soaks a wooden tower in brandy and then leaves a trail of brandy leading away from it. He ignites the tower by dropping his cigar in the trail of brandy.
* Discworld says: "Ankh-Morpork boasts some of the most highly regarded and illustrious guilds on the Discworld. Incidentally, it's also home the Guild of Fools and Joculators and College of Clowns."
* Discworld says that if you leave them a saucer of milk, they will steal everything in the drinks cabinet.)
* Discworld says "There's something scary about scarecrows in any case. I know that's their job, but I mean scarier than that. They're not exactly people but they're not exactly just ... stuff. Or maybe it's those cut-out eyes." This is particularly the case with Unlucky Charlie, a target at the Witch Trials who has a habit of unexpectedly popping up in people's gardens. He doesn't appear to be

malevolent, but he's very creepy, and people who've stayed up to see how he actually moves have been very quiet ever since, especially around straw.
* Discworld says the Theocracy of Muntab uses a calendar that counts down instead of up. What happens after isn't specified, that it's probably not a good idea to hang around to see what all the fuss is about is.
* Discworld say this, although he prefers not to. Anyway, he has established legal precedent going thousands of years on his side, namely "Ego sic dico."
* Discworld School she attended for seven years, and after one unwary instructor in combat skills is taken away on a stretcher, training NCO's looking for volunteers in unarmed combat resolutely ignore her and always pick somebody else, however enthusiastically she raises her arm.
* Discworld's Commander Vimes is repeatedly proven to be a much better boss than his attitude suggests. Although he doesn't like anyone much, his men are willing to put up with his roughness because they know that when the chips are down, he's got their back; in fact, after most of them leave during Fred Colon's time as Acting Captain, the only way Carrot can convince them to come back is by telling them he and Commander Vimes are back.
* Discworld scoring 84%, every single time. At one point, his teachers catch on and attempt to give him a one question test: "What is your name?" He also takes the view that the physical tasks of life are much harder if you're physically limited, so he works out quite a bit. He ends up becoming the Victor Mature of the Discworld.
* Discworld's death; at first, this trope seems to be invoked with him responding to the Silver Horde's suggestions on how to honorably bury him, until Death finally approaches him and he realizes what happened.
* Discworld, secret identity, camouflage...), but not before determining, with the aid of Nobby, which ones would land his chance of success at exactly a million to one.
* Discworld. Seeing as he knows the corrupt government is not going to do a thing to protect ordinary people from the rioting, he seals off his still peaceful corner of the city. With massive barricades. Of course there is also the fact that he is living in his own past and seeing events he remembers— kind of (it's a bit complicated).
* Discworld (seen below). It turns out that HEX and Sheldon have interfered with the timeline, and when HEX fixes the timeline, only then do they find out that Frank and Marie would have crashed their own car through the wall anyway, a few minutes later. Hence the wall is a victim of the fate of Narrative Causality.
* Discworld sees racism against dwarves in everything. They don't have much time to protest anything, though, because they have to spend most of their time convincing the dwarves they're oppressed and being discriminated against. It should also be noted that the group is almost completely made up of humans.
* Discworld sells hourglasses. When Rincewind asks where he got them from, he replies "fell off the back of a donkey cart".
* Discworld sends up Ancient Egypt to way past eleven. Terry Pratchett creates a country where building pyramids is all and everything and which is up to 3,000 years behind the rest of the Discworld. It takes a gifted Assassin to bring it all crumbling down.
* Discworld series are so used to the Librarian's new form (an orangutan) that if someone were to mention an orangutan in the library they'd ask the Librarian if he'd seen it.
* Discworld series, Death's manservant Albert claims to be one of these: "It's no good thinking you can appeal to my better nature under this here crusty exterior, 'cos my interior's pretty damn crusty as well."
* Discworld series, deep dwarf culture has a whole bunch of taboos (their sages, the grags, often find the mere idea of seeing sunlight repulsive) but even modern dwarfs are opposed to dwarf women expressing their femininity. Not just dressing for it, but unnecessarily admitting to having a gender identity differing from the default "probably male" (dwarf courtship consists mainly of very tactfully discerning if the object of your affection is of a compatible gender). Lately the

dwarfs have undergone a sexual revolution of sorts, matching their chainmail with leather skirts, putting high heels on their iron boots, braiding their beards, and even making attempts at makeup.
* Discworld-series. Even the non-diamond parts of a troll can be broken up for rockeries and gravel.
* Discworld series features a constantly rotating cast of familiar characters and, after a run of some twenty-plus books, unsurprisingly they started receiving criticism from some fans and critics for trotting out the same jokes, character observations and traits. Whether in response to such criticisms or not, the series picked up again by introducing a new wave of regular characters and gradually retiring some of the older ones.
* Discworld series, from the outside it looks fairly normal, if a bit morbid, but inside... Death's study is reckoned to be about a mile square, and it apparently isn't the biggest room. This has as much to do with Death just not understanding physics as anything else. In the land his house occupies, the ominous mountains in the distance are actually fairly close to the house; they simply look far away because they're literally blurry, which is all Death really cares about.
* Discworld series have this as a major theme in general: Discworld is a world of stories. The world often conspires to get the people in the stories to play their roles, no matter what the consequences. The people often aren't happy with this. One book mentions the Unseen University Professor of Anthropics, who has created the Extreme Anthropic Principle: the theory that the universe is here solely for the Unseen University Professor of Anthropics. It is further mentioned that everyone, with a few changes of the Insert Name Here variety, secretly believes the same thing.
* Discworld series. He attempts to defy this trope, at least in the sense of striving to be sane and self-controlled. He's arguably Vetinari, minus Vetinari's redeeming feature of caring about his city. This being Discworld, Rincewind and Cohen lampshade the hell out of him.
* Discworld series ("I get it ... 'good cop, bad cop', right?" "Well, we're a little short-staffed, so if I give you a cup of coffee, would you mind kicking yourself in the teeth?") Then again, Carrot and Vimes are the quintessential pair of cops.
* Discworld series in regard to the Agatean Empire royalty—one has to be a murderous bastard to survive the court intrigues and as a result, some features get reinforced every generation.
* Discworld series is a mild version of this. He does consider himself well informed, but the only person he tries to impress this on is Nobby Nobbs, who he's aware may be winding him up. Such as when Colon identifies hieroglyphs as a type of mollusk, and is asked if they go lower they'll find loweroglyphs, and decides to go for broke - everyone knows you don't get loweroglyphs in these waters. It is said he had a broad education; he went to the school of 'my dad always said', the college of 'it stands to reason', and is now a post-graduate student at the university of 'what some bloke told me in the pub'.
* Discworld series is explicitly mentioned to be a little bit alive. It's the reason HEX seems to add or upgrade parts of its own accord, and part of the reason that not using magic is one of the most important skills a wizard can utilize.
* Discworld series is that survival is a learned skill — the longer you live, the longer you're able to keep living.
* Discworld series. Moist finds himself quite attracted to what she does with a cigarette. (Others smoke, of course. But the smoking isn't seen the same way.)
* Discworld series, Rincewind has survived any imaginable death (and a handful of unimaginable ones), including falling off the edge of the world. He is Lady Luck's favorite beneficiary, mainly because he refuses to believe in her. She and Fate have a bit of a rivalry going on, in fact, with Fate getting Rincewind into trouble and Luck getting him out of it.
* Discworld series's amusing digressions and attempts to be realistic about how people act and interact (even when it slows down the plot) where most fantasy series wouldn't, are some of its major selling points.

* Discworld series this happens a lot with Commander Vimes, although he usually tries to make it happen (e.g. someone dies but instead of sending another person, he goes and ends up missing appointments.)
* Discworld series. Vimes notes that their marriage is happy but childless. They do, however, adopt Brick later in Thud.
* Discworld series, Wee Mad Arthur is growing into this. Having discovered and embraced his Nac Mac Feegle heritage he remains as dangerous, if not more dangerous, than ever while calming his ever-present rage at the world. However, being raised by gnomes means that he has also acquired an appreciation for the finer things in life like a night out at the opera.
* Discworld series with Death and his servant Albert, with Death being the "kid" and Albert the one on the leash. In life, Albert was a malevolent wizard and, when he knew he was going to die, performed - in reverse - a ritual that was supposed to summon Death, on the logic that it would send Death away from him. Instead, it sent him to Death. Albert has "lived" for centuries in Death's Domain and can now only spend a limited time on earth before his remaining minutes of life are used up. While Albert is not a physical threat to Death, he is much more cynical than his master, and in several books evidences a willingness to betray his master and regain his status in life.
* Discworld-set only Feegle know. As she discovers, the problem with her Navigator, Wee Archie Aff The Midden, is that
* Discworld-set pilots gather on a high battlement at Lancre Castle, and sing a Cossack fighting song as a lament and as a vow of revenge against the Elves.
* Discworld's gnomes are also terrifyingly strong, despite being six inches tall, and able to knock a man out and break bones with a headbutt or otherwise — because they have the strength of a grown man, concentrated in a very small area. Said gnomes
* Discworld: she makes the tea, the Mother pours it (a play on the British phrase "I'll be mother") and the ... Other One ... drinks it.
* Discworld. She notes to herself, seeing the example of a compatriot, that marriage and pregnancy would be a heroic last-ditch exemption. By the end of the story there is, in fact, a potential husband.
* Discworld. She took an evening swim in what turned out to be a crocodile.
* Discworld short story 'Troll Bridge'' naturally features one of these. While Cohen originally was going to fight him, the two end up reminiscing together over how the world isn't as accommodating to heroes and monsters as it once was.
* Discworld show consideration, however: The bodies they use for this are exclusively from people put in permanent vegetative states or killed by head injuries that are donated to the Igors by their next-of-kin.
* Discworld shows us there's also nothing stopping biologically male dwarves from doing the same thing.
* Discworld, since their small and weak wings aren't very effective as lifting surfaces but do make rather good ailerons.
* Discworld's Lord Vetinari sometimes gets this. When the baddies hurt him or catch him unguarded and unprepared, you know it's serious. Although when you think about it, he probably gets hurt/poisoned/turned into a lizard/otherwise out of the baddies' way without a handy plan to save himself more often than not. But since both the characters and the readers are still left with the impression that he's a cool badass character who always has everything under control, you could say it works.
* Discworld's magic seems akin to theoretical physics. Pratchett also wrote extensively on how prolonged exposure to magic can affect a place or person, the general lesson being that the price of magic is usually never as small as it seems. A lot of this made sense when you realize he used to work as a Press Officer to three nuclear power plants, around the time of the Three Mile Island incident.
* Discworld). Snails were eating the mail. Frogs and toads were inserted to eat the snails. The frogs bred. Snakes were inserted to eat the frogs. Then mongeese needed to go into the boxes to deal with the snakes — one of whom turns out to be a Howondalandian Spitting Mamba and not a harmless Lancre Grass Snake. This

difficulty is dealt with by experienced hands. And then CMOT Dibbler takes it on himself to bring the joys of exotic wildlife to the city in the form of a Safari Park. A Dibbler disaster ensues and Howondaland's native animals escape...
* Discworld's name slapped on them for marketing reasons. According to Sir Terry and the co-writers, this was very much not the case. If a book credits him as the main writer, he was.
* Discworld, so most other characters believe that he stayed in the back as much as possible in the army as well.
* Discworld sort of joke or snark, and that's counting the cover and title page.
* Discworld. So the only guys who ask her out are either jerks who aren't afraid of rejection or losers (like Nobby) who are so used to rejection it doesn't scare them.
* Discworld, so this is sometimes ignored when something really needs to happen for plot reasons.
* Discworld's place on the scale can be summed up as "silly, but not from the characters' point of view".
* Discworld's Rincewind has had this happen to him enough times that now he expects it. It has now gotten to the point that if anything good happens to him he will more or less panic until the other shoe drops.
* Discworld's Sam Vimes may be the Commander of the City Watch and even a Duke, but despite the protests of both his wife and the Patrician of Ankh-Morpork, refuses to delegate the street jobs to his subordinates, being happiest when walking the streets in cardboard-soled boots in the rain or chasing a dangerous criminal. He abhors the politics he's forced to participate in, and still basically sees the world like a beat copper.
* Discworld's Tiffany Aching refers to her father's pun as The Joke. He's a farmer and he works hard. Do the math. "He was Aching when he woke, and he'll be Aching when he sleeps." They recognize that it's not a funny joke, but it's got sentimental value behind it, like an elderly aunt.
* Discworld stories, as well as a catalog marketing the witch's version: packaged cobwebs (with optional rubber spiders), icky bubbly goo for cauldrons, big ominous mirrors with a selection of frames, enough dopey Wicca-wannabee amulets to strangle a giraffe, etc. Boffo!
* Discworld stories, the Librarian of Unseen University is an orangutan who used to be a human wizard. He's very happy with the practical advantages of his current form, like the ability to climb shelves without a ladder or the ability to intimidate people into returning borrowed books on time and undamaged.
* Discworld's trolls and gargoyles are implied to have originated when rocks and statues respectively became animate. The Power Of Faith can also have this effect, as shown in
* Discworld students live on these. Don't they? Fortunately, Ponder's unfamiliarity with them is explained on the grounds that he's English, and they call them Pot Noodles over there... Ponder and Johanna reflect that being respectively "English" and "South African" in California excuses many unfamiliarities and eccentricities.
* Discworld style permanent theater was a new and iffy idea that had never been tried before when the city opera house across the street was already centuries old.
* Discworld such that a whole arc of stories were devoted to them. As Mr. Pratchett himself said:
* Discworld's usual method of taking things to the breaking point to make a joke.
* Discworld's view of Technology Levels is "There's no reason why worlds should develop the same way. The Greeks had all the necessary theoretical knowledge and technical ability to invent the wind-up gramophone. The steam-powered gramophone, come to that. They just never did."
* Discworld swamp dragons often suffer something called "blowback" which, like many dragon diseases, leads to bits of dragon being scattered over a very wide area.
* Discworld sword-for-hire-for-a-great-deal-of-money, a woman who is lethal with a long sabre and a shorter poignard, weapons to run away from very fast if they come in your direction.
* Discworld talks (albeit to herself) about how preposterous and formulaic her

romance novels are.
* Discworld, ++talks like this++And his speeches follow this orthographic convention++This is based on early computer print-outs to indicate that he is printing his responses, rather than speaking them++However, when HEX gets an actual voice, he still uses (++) as punctuation to indicate a full stop++
* Discworld tendencies by noticing that she doesn't even react when Agnes tells her "and my father was the Seriph of Klatch and my mother was a small tray of raspberry puddings."
* Discworld tends to keep his cat personality even when human, which leads to a somewhat ADD-esque behaviour pattern.
* Discworld tends to suffer from this a lot, although it's probably not surprising given the number of Vampires, Werewolves and Igors about, not to mention Zombies (only come back
* Discworld territory when the narrator says that the despair of people laughing at him even as he begged them to stop eventually drew him to commit suicide. His hanging corpse was somehow considered an avant-garde comedy act by those who found him. It so funny in fact, that it stayed on the noose for weeks afterward.
* Discworld than humans: dwarfs are tougher, stronger and live longer (though the stronger bit is more due to them working out by constant mining. Carrot is a human raised by dwarves and his strength is described as a dwarf scaled to 200%), trolls and golems are near indestructible and incredibly strong (and trolls are incredibly intelligent when in cooler temperatures), vampires have all their standard strengths and can even learn to replace their lust for blood, pictsies are unbelievably strong and ferocious (gnomes are described as being as strong as a human despite being half the size of a Barbie doll) and orcs can only be called superbeings.
* Discworld Thanks to their new Kelda, whose own original clan DOES have lawyers and reading, they're starting to get their own lawyers as well.
* Discworld that bad?" sequence. Vimes' internal monologue points out how stupid this is.
* Discworld that Carrot do this if she ever ends up becoming as monstrous as her brother Wolfgang.
* Discworld that he recognised him as a killer the moment he saw him - because he's used to seeing a killer's face every day in his own mirror.
* Discworld that people don't really believe that's what their gods are like in the first place, even though of course they'll say that. Really what you expect is more like your father after a long day at work.)
* Discworld that Pratchett's dwarfs are Jewish-ish (quiet, hard-working, thrifty, very respectful of ancient traditions that they don't feel they necessarily follow as closely as they're supposed to.
* Discworld that she is absolutely unable to resist a good chocolate and tries to sneakily eat one whenever the occasion presents itself.
* Discworld that shows their faces and the logo "WANTED! DEAD OR DEADER!"
* Discworld that you need which happens to be his belt buckle.So you'll have to lure him to the toilets by putting prunes in the caviar he's eating.
* Discworld, the Amazing Maurice is a perfectly normal feral tomcat. Until he forages on the dump where wizards have discarded centuries of old magic and eats a rat who has been living on that particular dump. The rat in question is a talking one, but due to a speech impediment, is unable to protest his fate. Maurice acquires its sapience and ability to speak Human as a sort of unwelcome magically-assisted indigestion. Life then begins getting complicated - and profitable - for a cat who has realized sapient rats are now off the menu.
* Discworld, The Ankh-Morpork Inquirer, publishes these sort of articles, most notably "Woman Gives Birth To Cobra." The Ankh Morpork Times, on the other hand, eventually manages to print an article with the headline, "Dog Bites Man".
* Discworld: The Assassins' Guild lives and breathes this trope. The Hogfather had a bounty of $3,000,000. Moist von Lipwig had a conditional $100,000 bounty on his head. Lord Vetinari and The Duke of Ankh, Sir Samuel Vimes had bounties, before being being taken off the lists.

* Discworld, the Assassins' Guild School has a Botany Department. It is run by a woman who became a late entrant to the Guild owing to her unparalleled knowledge and expertise concerning green growing things. In a later tale, her daughter exploits the fact a troublesome idiot does not know what a croton oil plant looks like, is not aware they should not be touched, and are in fact to be avoided, and therefore has no idea of the subsequent emetic and irritant effects.
* Discworld, the Assassins' Guild School teaches this skill as a course module, as part of its study course in Deniable Diplomacy. The course is taught by M. leBalouard, a man who likes his drinks shaken but not stirred.
* Discworld, the Assassins lock up the Gonne, it gets stolen, and the rest of the plot follows from there.
* Discworld: the Band with Rocks In is seemingly about to get eaten in the sinister town of Scrote, but avoids this fate by performing a rock concert.
* Discworld, the beggars are discussing a plan to rescue some dogs that have been thrown over a bridge by Pin and Tulip, and one of them says he used to mess about in boats. Another, being realistic about the consistency of the river Ankh, replies that they would actually "boat about in mess."
* Discworld: The book mentions that most composers have gone deaf by the time they die, this being the gods' idea of a joke. The joke is on the gods, of course. Deafness doesn't prevent a true composer from hearing the music; it prevents them from hearing the distractions.
* Discworld - the Borogravian citizens, living in a country where everything they read is propaganda written by the government, cannot figure out how newspapers (or anything written down, for that matter) can be trusted.
* Discworld, the Caltech gang are consternated to arrive in Ankh-Morpork and to discover the Discworld has not evolved two of the staples of life in the United States: guns and internal combustion engines. The most advanced projectile weapon is a repeating crossbow, and steam power has only just been devised. however, this doesn't mean the city is not a very violent and dangerous place...
* Discworld). The characters who dig them out assume the obvious explanation for them being off in a remote spot together, and Victor agrees that they've got it exactly right; when Ginger objects, he asks her if she'd rather tell them what she was really doing. This is also a turning of the tables on a previous scene; when Victor is waiting by Ginger's bedside to stop her, she reassures him that her landlady will just think they're having sex. (Said landlady later gives him a big grin and a complicated gesture he was sure little old ladies shouldn't know.)
* Discworld, the City-State of Ankh-Morpork has an Assassins' Guild which is not just tolerated but actively acknowledged by the government (the benevolent dictator of the city happens to be a former graduate).
* Discworld, the City Watch has Nobby Nobbs, who is shorter than most dwarves, unsavory, and ugly enough that he has a signed statement from Lord Vetinari confirming that he's human.
* Discworld, the city Watch was at the end of the supply and priority chain for just about everything, and tended to be issued with crossbows so defective that they fired backwards. This ended when Captain Carrot raided the city armoury so as to be able to control an obvious source of weaponry and deny it to rioters, then to issue his City Militia with reliable kit. Later on, Sam Vimes uses his new wealth as Duke of Ankh to ensure Watchmen get the best sidearms available.
* Discworld, the Dean mentions that Sir Roderick once got lost in his own wardrobe.
* Discworld; the deity that the protagonists are speaking with specifically manipulates the laws of chance so that the bottle just happens to be in the exact place and time to hit the guard and allow them to escape.)
* Discworld, the demon-god Quetzovercoatl is described as "half-man, half-chicken, half-jaguar, half-serpent, half-scorpion and half-mad".
* Discworld. The desert nomads who live there sail on ships that wouldn't look out of place in the Circle Sea. It's also briefly mentioned to be home to very strange fish.
* Discworld, the Dibbler name is attached to beauty products, patent medicines, spirits, shampoos, and adult magazines, as well as the famous pies and such

services as taking bets, offering loans and flyposting.
* Discworld The events and reveals near the end of the book rely heavily on the fact that they are extensions of the premise.
* Discworld, the framing story is of Vimes derailing it, replacing the farm animals with the sights and sounds of Ankh-Morpork.
* Discworld. The going theory in-universe is that he was a psychic who let in too many wandering spirits, and the spirits eventually crowded him out.
* Discworld, the Guild of Asassins does some creative thinking about how to dispose of werecreatures and terminally inhume them. A collaboration between Mr Mericet (Poisons and Poison Strategy) and Miss Smith-Rhodes (Exothermic Devices) sees the creation of a very specific type of hand-grenade. The inspiration is the knowledge that while chlorine gas kills, a compound of chlorine - phosgene - kills far more quickly and efficiently. Therefore if elemental silver slays werewolves, what can its compounds do? The result is the silver nitrate bomb. In which a small explosive charge inside a glass globe packed with silver nitrate powder, once detonated, puts up a choking cloud of a poison lethal to werecreatures.
* Discworld, the Guild of Assassins has more than one variation of this theme, usually set up as an instructive humbling of over-confident students.
* Discworld: The Hedgehog Song. It's an ear worm even though the words are never mentioned.
* Discworld, the heroes are attempting to escape from a doomed city in Klatch but cannot get the magic carpet they have stolen to start. Despite repeated and more urgent repetitions of the operating word "Up!" it refuses to do anything. Finally the Wizzard Rincewind comes out of his sulk, assesses the situation, and intones the command "Down!" At which the carpet takes off. When the others ask how he did it, Rincewind replies that he paid attention to the spatial co-ordinate logic of the situation.
* Discworld, the hero Samuel Vimes and the sociopath Carcer are both thrown into the past. Carcer assimilates more quickly, and gets a job in the local gestapo... but Vimes catches up rather spectacularly.
* Discworld the History Monk Sato believes in peace to all living things, UNLESS you touch his hair. Some very luckless (and now dead) individuals find this out at the end of the book.
* Discworld. The horses are golems — clay automatons — and the only one to ride them notes just how uncomfortable a terra cotta saddle is. And don't ask about the Igor horses built from spare parts...
* Discworld, the impending visitation of the elves causes crop circles to spontaneously generate in everything from an herb garden to a handful of seeds sprouting in a damp cloth and even Archchancellor Ridcully's "crop" of hair.
* Discworld, their creator Tak wrote himself before he could write the world and the laws.
* Discworld. Their main job is to ensure that history happens as intended, although with the number of people who've messed around with time manipulation one member describes their job as mostly being attempting to ensure that time holds together at all.
* Discworld the knowledge contained in a library, the easier it is to get to — meaning that a room with one book in it can be a major L-Space node, if the book leads to an entirely new science.
* Discworld, the leader of a rebellion in Ankh-Morpork reflects that due to the anti-weaponry laws, his makeshift army doesn't have much in the way of real weapons—a few heirlooms passed down by veteran ancestors—but then, when his army consists of stevedores, longshoremen, butchers, and blacksmiths you pretty much have all the heavy or sharp objects you need. And if he ordered them to turn around, they'd make hash of themselves.
* Discworld. The leader of the rival army, far from having a convenient excuse to raze Ankh-Morpork to the ground over Leshp, ends up looking like a complete fool for accepting Vetinari's surrender.
* Discworld, The Librarian at Unseen University catches a cold and turns into something new every time he sneezes, thanks to his "morphic field" being weakened

by his original transformation from a human into an orangutan.
* Discworld, the Librarian of Unseen University makes it perfectly clear that if you want to consult the books on flying and levitation spells, you've got to catch them first. He will lend you the very long stepladders, however, as they're generally to be found flying around in the roofspace somewhere.
* Discworld, the lifts also have very small gnomes who are moved to play soothing tunes on their elim whistles (a lot smaller than penny whistles).
* Discworld, the man admits he's actually one of several subcontractors who build universes from scratch while their own creator busies Himself with His own creation.
* Discworld. The man subsists on dry bread and water despite being the ruler of a major city.
* Discworld-themed believes in going higher than any other combat air witch, waiting up there for long enough, ideally putting the sun behind her and any perceived target - and then, wham.
* Discworld, the mummified King Teppicymon XXVII awakens as an undead, but can't see. He fumbles his way to the canopic jar that contains his eyes, so he can return them to their proper place; through the disembodied eyeballs, he sees his own hand reach into the jar to collect them.
* Discworld. Then after IC-6 (person of Klatchian or Hubwards Circle Sea appearance), the City Watch scale goes through IC-7 (Dwarf) up to IC-16 (Elf: touches iron). Incidents also have their codes: a Code 23 denotes any manifestation of the eldrich, paranormal, supernatural, or things appearing with too many tentacles. A 23 involving the presence of many IC-16's is something to dread. There is also an unofficial extra category IC-17, which is code for Nobby Nobbs.
* Discworld, then sit back and watch them obsessively devour all 30+ books.
* Discworld the one book that is actually all about bereavement, strangely.
* Discworld, the only individual Dark Clerk to have a notable speaking role.
* Discworld, the Opera Ghost wears a white mask which the narration consistently describes as "like the skull of an angel".
* Discworld, the original Assassins' Guild 3p stamp (the Thrupenny Dreadful), is very rare, at least gummed. The in-universe reason for this is that they were recalled due to unsubstantiated rumours that the Guild was using it to fulfill contracts.
* Discworld, there are a lot of superstitions around the number (some people insist on calling it "7a").
* Discworld. There are also The Auditors of Reality which are portrayed as embodiments of order, bureaucracy, and the mechanics of the universe, and are, instead of Death, portrayed as the opposite of life (which they hate). Unusually, these characters are referred to in the story as Anthropomorphic Personifications, and Pratchett is largely responsible for popularizing the phrase.
* Discworld. There are some hints in later books that he might have some goblin blood in him, and despite being repulsive to human women he's quite attractive to the goblin ladies, but it's never confirmed either way.
* Discworld, there is a growing Pan-Rodinian nationalism which is causing the rulers of Zlobenia, Mouldavia and Borogravia some concern and sleepless nights. Vetinari is forthright.
* Discworld, there is a mysterious informant known only to William De Worde as Deep Bone, who provides him some key information about the alleged attempted murder at the palace.
* Discworld, there is a reform school for girls known for being very abusive. Of the three characters we know came from there, one is always carrying matches around. In the book's epilogue we learn that the school mysteriously burned down.
* Discworld, there is a suspicion that at the age of fourteen, she pulls an act of blatant arson as a favour to a teacher she really likes and respects.
* Discworld, there's a master architect, Goldeneyes Silverhand Dactylos. His backstory consists of him inventing marvels for various royals, only for his employers to mutilate him so that he couldn't repeat the invention for anyone else. When his latest employer asks why he didn't just give it all up and try flower

arranging, he replies "I'm good at it."
* Discworld, there's something a bit off about someone who'd actually kill a king. (It's also mentioned that other Vimeses have been notable watchmen. Sam himself would probably say he has a Poor Bastards Too Bloody-Minded To Get Out of the Way Lineage.)
* Discworld. These are so powerful that anyone nearby is also drawn into them and, lacking the frame of reference, wonders what those insect-like metal things in the sky are that go "whokka-whokka-whokka". Maldict also talks of fragging the officers and uses other 1960's GI slang.
* Discworld. These monks are also constantly shunting time from places with too much to places with too little, so how long things take depends on how long they need to take.
* Discworld: The series takes place on a very slightly convex disc. It's also supported by four giant elephants on the back of an insanely vast turtle. It has a (spherical) tiny sun and a tiny moon, which travel in complex patterns to make seasons. (Sometimes, one of the elephants has to cock a leg to let them go by.)
* Discworld, the Sonky Rubber Goods Company's early pioneering in the world of contraceptives has resulted in condoms of any manufacture being referred to as "a packet of sonkies".
* Discworld: the Time Monks force Sam Vimes to do this to himself so they can tell him sensitive information without letting him remember it. Sam being who he is, he figures it out again anyway.
* Discworld: The tiny country of Lancre has a standing army, except for when he's sitting down.
* Discworld, the title character can make time flow faster or slower for himself relative to the world around him. He regularly uses this ability for mundane everyday schedule management.
* Discworld, the titular coven of witches leaves a baby (who is secretly the heir to the throne of Lancre, smuggled out of the palace after the king is murdered by his cousin) in the care of a band of travelling actors. When asked the boy's name, Granny Weatherwax and Nanny Ogg provide separate answers, "Tom" and "John", but settle on "Tomjon".
* Discworld, the town of Big Cabbage is the heart of the brassica-growing monoculture of the Sto Plains. Big Cabbage is so proud of its status that it hosts a theme park dedicated to cabbage in all its forms. There are at least two mascots, people forced to squirm all day in hideously uncomfortable costumes. Billy Brassica, the Cabbage Clown, and his sworn foe, Micky the Maggot.
* Discworld. The twist being that the mount didn't have to be so small (it had powers) so was only doing so to be pissy.
* Discworld: The Unseen University is saturated with sometimes dangerous levels of magic, which has given rise to some rather unusual pests and indoor fauna. These include .303 bookworms, which feed on dangerous magical tomes by burrowing through them at extremely high speeds and present a potentially significant danger for anyone in their path when they shoot out of a bookshelf's far end, ants intelligent enough to pull carts and use beetles as beasts of burden, cockroaches that can march by the billions with their steps perfectly in time, escaped demons in the cellars, rats capable of understanding or even using human speech, and "that very rare indoorovore, the Uncommon Sock Eater".
* Discworld. The Unseen University wizards are trying to contact another wizard with a crystal ball, but keep getting a fiery eyeball. This turns out to be the eye of that wizard, who'd developed a severe shrimp allergy. It also gave him a giant fiery nose.
* Discworld, the villain uses mirror magic, and when she loses control at the end, her reflection reaches out of a mirror and pulls her in.
* Discworld, the Watch pointed out there was no specific law that all players had to be human. therefore the core of its scrum was a Golem and two Trolls. And the University's edificeering side was centred on the Librarian...
* Discworld, the witch Miss Treason from the Tiffany Aching subseries cultivates a rumor that she only stays alive because she keeps a clunky iron clock wound up and

ticking. Because witches can predict their exact times of death, she sets the clock to run out at the exact right moment, fueling the myth.
* Discworld, the witch Nanny Ogg pulls this sort of thing frequently on her old friend Esmerelda Weatherwax. Mainly for the laughs, but also because she knows that without the grounding presented by frequent irritation and things to get annoyed with, Granny Weatherwax is such a potent witch that she is liable to lose all touch with reality and start cackling. "The Sea And Little Fishes'' is a short story about such a "that was totally worth it" that Nanny pulls on Granny.
* Discworld the wizards must visit Roundworld, and bring along the Librarian (who is a man who was transformed via magical accident into an orangutan). Hex explains that if they want to successfully blend into Elizabethan London, they must dress the Librarian in a dress and say he's Spanish. This works.
* Discworld, they all have personalities which are the exact opposite of their names. For example, Hope suffers from depression and a sense of the existential alienation and angst, Chastity is a uhh..."Seamstress" in Ankh-Morpork's seedier districts, while Anger is a calm and reasonable fellow and Bestiality is known for his kindness towards animals.
* Discworld. They can Stealth Hi/Bye on pure narrative-causality power.)
* Discworld They keep track of everything in the universe, from the spin of atoms to the orbits of planets and stars, and want to wipe out life because it's "untidy". The Auditors especially hate sentient life for coming up with abstract things that can't be measured or quantified, like "justice".
* Discworld, the young Assassin Jocasta Wiggs follows her memorable canonical appearance by ending up - in every tale where she features - being liberally smothered in crap. It's now the Wiggs trademark.
* Discworld (they're discussing the meaning of "drawn and quartered"):
* Discworld. They're no match for a proper army, as we see in Jingo, but they're extremely capable at dealing with ordinary criminals and lackeys when the heroes don't have the time.
* Discworld, they report that the entire family is currently spending all their time shearing the dog.
* Discworld they're stars, and the male lead is now working as an assistant horse holder.
* Discworld they were drugs, regardless of what effects such substances might actually have. He's been known to snort things like mothballs, for example.
* Discworld. The Zulu Empire is presented as having many positive qualities but is still a nepotistic monarchy in which members of the Royal House get the best of everything, as well as demanding submission from its own non-Zulu subject peoples that verges on a form of apartheid imposed by a dominant black tribe on other tribes.
* Discworld thing, was that everything happened at the other end of it, i.e. a long way off."
* Discworld thinks Miss Alice Band (History, Archaeology, Climbing, Traps and Concealment) is a pushover.
* Discworld, this happens to the academically minded educators and researchers Ponder Stibbons and Johanna Smith-Rhodes. He is a Professor of Magic. She attains a Doctorate in Zoological Science. A few years later they get a daughter who is at least equally bright.
* Discworld this is a key trait of many of the characters, usually because they do not wish people to know how little they know about a subject (either for reasons of pride or the hope that the person they are talking to will purposely draw the wrong conclusions), or that they feel the truth is just too boring; the latter a particular favourite of Nanny Ogg, who lists one of her hobbies as recreational lying.
* Discworld this is a traditional Troll occupation. It is extremely impolite to mention the Three Billy Goats Gruff.
* Discworld. This is in contradiction to earlier books, but Discworld is famously loose with its origin stories.
* Discworld This is not a bad portrayal of reality in Welsh regiments even today

(where it is still the case that a marching platoon may elect to sing a hymn in preference to any other available military ditty).
* Discworld. This is not entirely unexpected by witches. Nanny Ogg is still technically the Mother in a coven by reason of having a lot of (grown) children, not being young.
* Discworld: This principle is known, and mentioned occasionally by certain witches and wizards, but doesn't seem to have any real effect.
* Discworld. Though it's implied that by the strictly literal definition of pedophile he qualifies, after Om accuses him of being a pederast, it's mentioned that while he might occasionally have "disquieting thoughts" in his head, he makes sure they stay in his head rather than him acting on them "and he did not in any literal sense deserve to be called what the tortoise called him, which, had he heard it, he would have thought was something to do with feet". His name, after all, is on one level a reference to impotence...
* Discworld, though, where dwarfs live for centuries, trolls even longer, elves are immortal, and so forth. Again, the only races which appear to have shorter lives than humans are gnomes and pixies.
* Discworld. Throwing a rock (ideally a pretty rock) at someone's head is the Troll equivalent of blowing them a kiss.
* Discworld: Tiffany Aching is unable to ride a broomstick more than a few feet above the ground without getting an upset stomach. This is implies to be a side effect of her being mystically linked to the Chalk, hence uncomfortable if she's too far off the ground.
* Discworld, Tiffany and Granny Weatherwax develop something along these lines, though Granny would probably be hard-pressed to admit it.
* Discworld, Tiffany is told that the way to find the "witches' school" is to stand on a hill, open your eyes, and then open your eyes again. She realizes (eventually) that witches' school isn't a place, and just means seeing the world properly.
* Discworld, Tiffany picks the latter. Once she comes back to herself, she notes that it's very pretty but useless for a working witch.
* Discworld, to a trio of actors in witch costumes who were mistaken for Granny, Nanny, and Magrat and thrown in the dungeons.
* Discworld to be me, it's going to take a lot of work. Thirty damn years of being hammered on the anvil of life, you poor bastard. You've got it all to come."
* Discworld to be sent on the Vimes Run. Sam Vimes notes that she manages to get inside Ramkin Manor before the inevitable failure, and notes her as One To Watch.
* Discworld to come in second, because if you come in first, people are constantly trying to beat you and you're under pressure to keep coming in first. She likes coming second, because it's the runner-up that people pat on the back, and say "It was a good try," and buy drinks for.
* Discworld) to come play there. Most of the games involve fighting, with a little hockey in between. It certainly suits the paying customers in Ankh-Morpork in any event.
* Discworld to finance his Snipe Hunts. Trading as "Howondaland Smith, Balgrog Hunter", he makes a good living persuading other people that Balgrogs exist and getting them to pay his necessary hunting expenses.
* Discworld to go anywhere near its temple. After Bel-Shamharoth flees to the nether realms, the temple ages thousands of years in a matter of seconds.
* Discworld To Granny, this is almost as bad as denying Esme the choice in the first place.
* Discworld to have their socks darned. Eventually the Guild hired some non-euphemistic seamstresses to take care of that kind of request (plus it allows men to get their socks darned while they "get their socks darned").
* Discworld to load the siege weapons and to only charge the Barking Dogs with blank rounds. One conductor lamented the slaughter and destruction done to lots of expensive and hard-to-replace musical instruments during one early performance, when the technical problems of the production were still being ironed out.
* Discworld to London, is known for its "gumbo fog", which is like a pea-souper only thicker, fishier, and with things in it that you'd probably rather not know

about.
* Discworld: To quote Nanny Ogg's Cookbook: "How hard is it to invite her along, give her plenty of drink and a plate of ham rolls all to herself, and keep her out of the way of your posh auntie? Play your cards right and you could be ahead by an extra good wish."
* Discworld to some confused aliens mutilating corn and forming cows into a circle. "The truth may be out there, but lies are inside your head."
* Discworld to the other Wizards at Unseen University (at least the ones who don't work in the High Energy Magic building).
* Discworld, to the point where priests relay "revelations" that sound a hell of a lot like the plot of a soap opera.
* Discworld to turn everyone around you into frogs once you realize how easy it would be. Every time in history the wizards got off their collective asses and actually did stuff, horrible things happened, with frequent parallels being drawn between major magical conflicts and all-out nuclear war. The certifiably insane Bursar is probably the most extreme example, as he's still a member of the faculty even though he no longer has any significant control over his magic and is useless even for his nominal responsibility of keeping the University accounts (which is mostly done by Ponder Stibbons).
* Discworld tough troll criminals don't bother; they just beat you over the head with your own arm until you get the message rather than run the risk of inflaming dwarfs with no grounding in forensic anthropology unnecessarily.
* Discworld track a suspect through those. The one that does get her is the spice market.
* Discworld, trainee Assassin Jocasta Wiggs is sent on a mission to target Sam Vimes. She ends up treading what she hopes is mainly water in the Ramkin family cesspit, having been directed there by a cunning trap.
* Discworld trainee women Assassins are from disparate nationalities and backgrounds. Three are in their late teens or early twenties. The fourth is in her forties and the others soon realise she is the Team Mum, or at least the Team Slightly Crotchety Maiden Aunt, the glue who holds the four together. Over the fifteen months of the Mature Students' Course, Johanna, Emmanuelle and Alice realise they owe a lot to Joan and they each (although none would really openly admit it) consider her to be the best friend they have.
* Discworld transitioned slowly towards this as modern technologies and ideas found themselves homes on the Disc, especially in Ankh-Morpork.
* Discworld, trash and night-soil magnate Harry King does a favor for William de Worde and Mr. Goodmountain, but warns them to pay him back or they'll be "in deep... trouble, face-downwards."
* Discworld trolls as well. At least one couple got their start after a rock being thrown at a head. This is a traditional method of flirting amongst trolls. For reasons of romance it is often insisted that it be a
* Discworld: Trolls, being made of rock, often cultivate lichen on their heads.
* Discworld trolls tend to have this type of voice. Detritus, the troll that tends to show up the most, says "dis," "dat" and "der" instead of "this", "that", and "the." (He also sometimes replaces "th" with "f", for example "fink" instead of "think".)
* Discworld tropes. Might be just shorter to say it is simply awesome.
* Discworld trope (this is footnoted in the text itself). Official art of him fits the trope, depicting him as big-nosed, hunched-over, awkwardly skinny, and covered in blemishes.
* Discworld under the influence of the herbal drink Splot, which makes his speech sound like every syllable is attempting to escape his mouth at the same time.
* Discworld universe features the Auditors, mysterious, cosmic beings who balance the books of reality. They would prefer an existence devoid of life, which makes things untidy, and intelligent thought, which is even less tidy and predictable. They have repeatedly attempted to eliminate the Discworld in an attempt to tidy up their books.
* Discworld universe has been described as a "Cottage Industry" but that doesn't

mean that there isn't a shit load of weird merchandising. Like the Ankh-Morpork Stamp Collection.
* Discworld universe telling Vimes how much better things would be going if he'd gone to Klatch.)
* Discworld universe, the stars are actually balls of fire about a mile wide, so this happens gradually as A'Tuin swims through space, and the constellations change regularly. It would actually be possible for a time traveler to identify the era by what stars are visible.
* Discworld useless — wizards caught up in university politics, big meals and/or highly esoteric studies are wizards who are too busy to disturb the rest of the world.
* Discworld uses "splitting the thaum" as a fantastic version of splitting the atom, implying the thaum is actually a real distinct particle or entity rather than just an arbitrary measurement. Continuing the temperature parody theme, younger wizards use a "thaumometer" (sounds like "thermometer") to measure the strength of a magical field, while older wizards dismiss these modern gadgets and just lick their finger and hold it up — which causes it to sprout a colored aura which lets them judge the background magic strength.
* Discworld uses this trope repeatedly, usually to indicate an organization which has to prioritize practicality and availability over style and conformity.
* Discworld. vampires and trolls may walk free and unafraid under the mod-day sun because of the miracle which is barrier cream (sunblock).
* Discworld vampires are turned to ash if they're exposed to sunlight. They're reconstituted if exposed to blood.
* Discworld variations to the skull to modify said mental state and personality...)
* Discworld: Verence II of Lancre was beaten by his grandfather with a belt often when a child. Since said grandfather was a retired court jester, it was a belt with bells on, which made it more painful.
* Discworld Victor gets into Century of the Fruitbat Productions by pretending to be delivering a message, observing "No one with their sleeves rolled up who walks purposefully with a piece of paper held conspicuously in their hand is ever challenged."
* Discworld video game is "Did anyone get the number of that donkey cart?" This actually plays into a puzzle, as later on in the game you get a donkey arrested by giving a recently KOed assassin its registration.
* Discworld, Vimes can't go around arresting every troublemaker there, but learns that the Ankh-Morpork embassy counts as Ankh-Morpork territory, so Commander Vimes of the City Watch is well within his rights to chase after a murderer who committed his crime in the embassy.
* Discworld, Vimes' coach is accosted in a mountain pass where the sun has already gone down. Vimes gets out to talk to the robbers and takes the time to light his cigar. When "dark clerk" Inigo Skimmer chides him later for the grandstanding, Vimes' reply is "you mean when I closed my eyes and they had to look at a bright flame in the darkness?" In other words he destroyed their night vision, making them unable to see the crossbow-spring he used to kill the leader.
* Discworld Vimes' investigation, knowing it would make him try even harder. Each time, Vimes punches the wall of Vetinari's office on the way out. Except one time he doesn't, and Vetinari realizes later that it means he's finally found Vimes' limit.
* Discworld, Vimes remarks that even most Assassins think they're stupid and ineffective weapons.
* Discworld want to do this. They find life messy and unpredictable (they prefer a deterministic, Newtonian universe) and humans the worst of all.
* Discworld "was beginning, with encouragement, to read books in which nobody had a bowel movement at all. Which, when you came to think about it, was a mystery all by itself."
* Discworld was being used by anyone, and when he was told it wasn't, he declared that he'd stolen it.
* Discworld was once a walled city, but much like such cities in real life it

eventually overran its borders, and the walls were picked apart over the years by citizens in need of building materials. The remains of this earlier wall are to be found at intervals inside the City, rendered redundant when it began to overspill from its original boundaries and thus necessitating a second wall to be built. The second set of walls and towers are more or less intact, although the castle and keep on the Tump which would have been the strategic lynchpin of the system have long since fallen into ruin. "Today" the city is again demonstrating why walls become redundant, as its seemingly unstoppable growth has created suburbs which stretch a long way outside the walls. There appear to be no plans to build an even longer and far more expensive third wall. Lord Vetinari abhors un-necessary effort and expense. On top of that, Ankh-Morpork actually has a unique way to deal with invaders, one that does not need walls: If a barbarian horde were to besiege the city, the citizens would welcome them with open arms, and before the barbarians would realize, they had become part of the city life.
* Discworld was originally intended to be a deconstruction of this, though he eventually evolved into a reconstruction and one of the most fleshed out characters in the entire series.
* Discworld was quite interested in bees and their swarming behaviours.
* Discworld was suffering from Alzheimer's at the time, this is understandable.
* Discworld waste management consultant in Ankh-Morpork. William de Worde, by no means stupid and possibly the most well-read person in Ankh-Morpork outside of the Patrician, had the "uncomfortable moment when an educated man realizes the illiterate person sizing him up could probably out-think him three times over"
* Discworld was thrown together from clichés so Carrot would have someone to interact with after arriving in Ankh-Morpork. He ended up taking on a life of his own and becoming one of the most interesting and important characters in the series.
* Discworld was when a cat ate him while he was in bat form. Another vampire was threatened with being thrown off of the Disc into space, which would probably have done the job as well.
* Discworld, watch officer Nobby was in the military, and was infamous for stealing equipment from both sides, sometimes just to make profit and sometimes to make himself look like a member of whichever side was winning.
* Discworld wearing a huge magnifying lens. When he removes it the sight is slightly less terrifying.
* Discworld, we find the Abbot of the History Monks does this. He lives a normal life, and remembers each of his previous incarnations, but when he dies, he is immediately reborn somewhere in a village at the foot of the mountain. Lu Tze, on the other hand, has mastered circular aging, so he does not age.
* Discworld, we meet Catseye, an outlaw-for-hire famed for his night vision and comfort in the darkness... with the exception of one cellar from his childhood.
* Discworld were denied permission to pass themselves off as women to infiltrate an enemy base by their clueless officer, who didn't think they could pull off this deception as well as himself. When they tried it anyway and got captured, the enemy officers likewise thought their costumes were laughably bad ... until one of the Pollys lifted her skirts.
* Discworld we're talking about. How many children, by how many men, do you think she'd had at forty?
* Discworld, we're told that this was the reaction of a group of bandits who were given a stern talking-to by Lady Sybil's great-aunt.
* Discworld What many readers may not realise is that its name is a parody of the Invisible College, a group of like-minded scientists and natural philosophers in England formed around the mid-17th century.
* Discworld, when Colon suggests calling a doctor in for Lord Vetinari, Vimes replies "Are you mad? We want him to live!" (which is why they call a veterinarian instead, more competent because the local mafia gets very angry when a racehorse dies).
* Discworld. Whenever you have five centuries of combat experience distributed among half a dozen guys, expect a lot of this.

* Discworld when fired. It is very effective at removing the front door of a house. And the back door. At the same time. And both door frames. And a large portion of the surrounding walls.
* Discworld when he isn't fighting off quasi-demonic forces, foiling dastardly political conspiracies, or reading to his son, Sam Vimes Jr.
* Discworld, when Jeremy asks Lady Le Jean on a date, she declines. But as she walks away, she literally floats a few inches off the ground. Given what she is, it's justified in-universe.
* Discworld when Leonard of Quirm invents the Make Words With Tiles That Have Been All Mixed Up Game. Everyone's words are perfectly cromulent (except for Nobby's — they aren't made up, it's just that Colon, who considers Leonard and Lord V to be Polite Society, won't let him explain what they mean). (Of course, Vetinari wins.)
* Discworld, when Rincewind ends up on Fourecks, he runs into some natives who offer him a boomerang. Thinking it's yet another Call to Adventure, Rincewind throws it away in disgust and starts complaining that he's not going to do anymore heroics ever again, only for the book to end mid-sentence with Rincewind apparently being clonked on the head by the returning boomerang.
* Discworld, when the concept of paper money catches on to a even greater extent than Moist expected, he concludes "We're going to need some bigger notes."
* Discworld; when the Librarian's his normal peaceable self, they just add to his rather goofy look.
* Discworld. When they want to go through a door, one glances at it, and the door disintegrates. Ms. Le Jean observes this and says "Doorknob was simpler."
* Discworld when Tiffany first visits Miss Tick, who is currently working out of a tent that has no actual door:
* Discworld when tries to attack the nigh-omnipotent sourcerer Coin with a half-brick in a sock. Coin is so fascinated by the idea of someone trying to use a weapon that feeble against him that he defies his father's orders to kill him.
* Discworld when we see a former clown who ran away from the lifestyle as a boy, still retaining only the basics of the skills he'd been taught with. Eventually, he demonstrates EXACTLY why Ankh-Morporkians are right to feel nervous and creeped out by clowns, in a demonstration of Battle Clowning that would make the Joker green with envy.
* Discworld, wherein he gets promoted to Acting Captain, driving away most of the Watch in the process. It is to his incredible relief that he is given his old position of Sergeant and been denied promotion from that rank ever since.
* Discworld, where inter-species communication has always been difficult.
* Discworld, where much mirth is raised by recounting, in a Discworld context, all the things which Earth legends say are fatal to vampires. This ranges from the normal — garlic, and whatnot — to the more unorthodox — lemons, poppyseed, and carrots.
* Discworld where she accepted his proposal, and while she doesn't appreciate his attempts to pick up where they left off, she admits that the alternate version of her seems happy enough with him.
* Discworld, where Vetinari offers boons to the entire police force (all three of them) and they ask for a small raise, a replacement kettle and a new dartboard for the break room.
* Discworld, where Vimes is imprisoned by Dwarves and slipped some kind of particularly deadly assassin's weapon with which to take out his guards. It is a subversion, as he correctly reasons that the weapon was only provided so that he could be legitimately executed if he used it (plus, it's a single-shot weapon, and there's more than one guard), and thus he only knocks the guards unconscious when escaping.
* Discworld, where we hear of a lonely old demonologist who wanted to conjure up a succubus but only ever managed a Neuralgia, "A demon what comes and has a headache at you," as the talking parrot puts it.
* Discworld, where with Cheery noting about how hard it is to be openly female and a dwarf, Angua (a werewolf) muses internally that at least she doesn't feel like

she should be wearing three bras sometimes.
* Discworld, which depicts an attempted arsenic poisoning fairly accurately. Even then it wasn't to kill him either. It was to keep him from doing his normal duties.
* Discworld, which features several scenes of two officers discussing the situation in their tent while Vimes (and the rest of the Night Watch) are engaged in the real fighting.
* Discworld, which he thinks could be useful in civil engineering "when the mountains get in the way.") Lord Vetinari has him locked in a cell in the palace with a supply of art materials to keep him occupied.'
* Discworld, which means "chief mining engineer", but is usually translated into Morporkian as "king".
* Discworld, which reintroduced Twoflower and introduced Twoflower's daughters, Pretty Butterfly and Lotus Blossom. Rincewind insists that Twoflower hasn't mentioned having children and that the whole thing just came out of left field, but Twoflower keeps trying to play the whole thing off, insisting that he "must have mentioned it."
* Discworld, which seems able to invoke this trope at will. At least, anyone looking inside it will only find what they're looking for if its owner approves; non-owners will find nothing but clean underwear if they're lucky, or a mouthful of huge wooden teeth if they aren't.
* Discworld, while a photo of career killer Mr. Pin shows him with a large cloud of sinister, shadowy figures behind him. The latter picture also predicts a fire that breaks out near the end of the book.
* Discworld. While the series gradually became more sophisticated in terms of characterization and theme, Pratchett also began to riff on a wider variety of subjects. Thus, the humour and story elements moved more towards "what would be funny here?" rather than purely commenting on fantasy tropes.
* Discworld who are competent enough to live to 60 without being assassinated will most likely make it well past 100. The oldest wizard mentioned in the books, Windle Poons, makes it to 130.
* Discworld who genuinely wants all people to live in peace and harmony, but in truth there is a massive complexity behind his simpleness which a reader may only begin to understand by reading all of the watch books and the short story "Theater of Cruelty".
* Discworld, who had to crash-land when the power cut out on their broomsticks during an air battle, are appreciative of this.
* Discworld, who has become less naive and more savvy but has retained all of his purity since coming to Ankh-Morpork. (Apart from his ability to become so terrifying people fall down to get out of his way when he flips his lid over his girlfriend leaving him... but he doesn't seem to know he's doing that.)
* Discworld, who have previously had their version delivered by nuns, who are not really very good at it.
* Discworld. Who if she is so inclined may pass interesting information back.
* Discworld who isn't ready to say "goodbye" yet. Pupils at the Assassins' School observe this disbelievingly, note that neither teacher appears to have softened or mellowed out in the slightest, and agree that it's a very good thing both are too old to have children.
* Discworld, who recognizes the dangerous potential of his inventions and keeps them away from the populace.
* Discworld, whose glamour produces a crushing inferiority complex in others. Readily averted by cats, bees, and any character that thinks like a witch (that is: very, very hard). Also by dwarves and trolls, whose instinctive reaction on meeting an elf is to bash it with something hard, heavy and/or sharp.
* Discworld who serves as an informant for Vimes/Keel while he's stranded in the past.
* Discworld who travels around trying to survive the weird stuff happening around him.
* Discworld, who used to be a jockey who "made a lot of money not winning races".
* Discworld, who was already kind of creepy to begin with (he has tusks, his sleigh

is pulled by fierce, gigantic wild boars, and he hands out blood-stained bones to bad kids).
* Discworld William de Worde, and aspiring film star Victor Tugelbend. It's not uncommon for them to drop lines associated with their home genre, only to wonder where they got that from.
* Discworld William de Worde realizes would weigh about a third of a ton. Since Vetinari uses a walking stick due to having been shot in the leg, de Worde realizes he'd have a pretty hard time doing all that on his own, and runs an article pointing out the unlikelihood of this version of events.
* Discworld will inevitably show up with his tray of "sausages" if it lasts long enough.
* Discworld) will sometimes drop an actual hourglass from a spring in order to demonstrate that Hex is doing something. Of course, nobody really knows if he is or not, but they do wait patiently.
* Discworld will suffer brain death but have a body in good condition, and Igor will be back on someone's feet.
* Discworld, Windle Poons' storyline concerns his posthumous experiences as a zombie.
* Discworld witches in general tend to be this, especially compared to
* Discworld, with all the messiness and inefficiency such features entail.
* Discworld with his bad back and lack of teeth, but once he gets his back straightened out and a set of (diamond!) dentures, he returns to being a full-time badass.
* Discworld with obstruction for refusing to sign and present identification when picking up prisoners.
* Discworld with the Church of Om, formerly an imperialistic theocracy that has since descended into a schism every other week. Nailing one's theses to a church door is now the standard method of disagreeing with doctrine, to the point that there are waiting lists to do so.
* Discworld, with the Scone of Stone: revered seat "cushion" of the Low King of the dwarfs.
* Discworld Wizards occasionally duel, but due to the nature of magic on the disc, it is discouraged, as "There are still places where nothing grows" due to wizard duels, and the whole thing with the Dungeon Dimensions. There's a general analogy of "magic-as-nuclear-weaponry", with talk of standoffs, "First Use of magic", and mutually-assured destruction - "It's hard to tell which greasy smudge was the winner".
* Discworld working on them, which it takes an effort of will to resist.
* Discworld work of fiction, but features many characters from other Discworld novels, most notably Sir Harry King, whom Miss Felicity Beedle notes in the introduction was a great help in her research.
* Discworld worth communicating with, another being his habit of gratuitously murdering them.
* Discworld would be far more zoologically accurate as animal avatars.
* Discworld) writes his evil laugh down. With five exclamation marks. Sure sign of insanity.
* Discworld, Yob-Soddoth is called into the Discworld, as foot-the-ball becomes more popular in its new form. Pedestriana vanquishes him this time.
* Discworld, you are so far back in the closet that you can see the tail of the Coathanger Elk."
* Discworld. You just need to tease it out of the fictional stuff, for which Sir Terry recommended the public library.
* Discworld, young wizard Mustrum Ridcully scales Copperhead, the highest mountain in Lancre, to impress the young witch he's rather taken with. He does it the hard way, climbing up the outside, only to find she (Esme Weatherwax) has flown up there on her broomstick. This apparently illustrates something fundamental about the approach to life taken by wizards and witches. Apparently she flew him back down again, having made her point that there are easier ways to get to the summits of high mountains.

* Disease by Any Other Name: A disease which the characters don't know the name of but it's described in enough detail that the viewers/readers can figure out what the disease is.
* Disease by Any Other Name: The characters don't know what a sick character has, but the viewers can get a pretty good idea.
* disease of lycanthropy specifically to embody his domain, as those "blessed" by his gifts will be terrible monsters at night and then become hunted by their fellow mortals during the day.
* Disease, old age, and accidents take a tremendous toll from both economical and ethical standpoint, which is why we ought to alleviate as much of this suffering as we can.
* Disease-Prevention Aesop: An Aesop about avoiding getting sick or passing your illness to others.
* Disease-Prevention Aesop how to prevent getting and/or spreading diseases.
* Diseases, but once an infection/outbreak occurs, the attack will never stop until they are completely annihilated... or their victims are.
* Diseases can alter your behavior in ways to spread themselves, but you may not realize it. Malaria makes you too tired to fight off mosquitoes, for instance. Defensive reflexes designed to rid our bodies' airways of infection (coughing, sneezing) are also behaviors that tend to spread it to others.
* "Disease" similarly ends with the two being shot to death off-screen by a cow wielding a gun.
* diseases or pregnancies, and spends some time boning anything with a pulse. Sooner or later, she comes to the conclusion that men are pigs, has a short lesbian period until she realizes women are just as prone to farting in their sleep and tossing their used underwear around as her male partners, and then settles down and becomes a productive member of the Lodge.
* Disembodied Eyebrows: A characters eyebrows aren't attached to their face and float above their eyes.
* Disembodied Hitman situation - wherein the public found it difficult to decide who to believe - and so the killer's backstory is that his father's life was destroyed by false allegations, and he is now taking revenge on the seventeen people responsible.
* disembodied intellects and forced to battle for their gambling enjoyment. Three hundred quatloos on the human!
* disembodied tentacles which sits on a ledge and slaps Ecco with a tentacle as he tries to pass.
* Disenchantment a Dreamland shop can be seen selling ventriloquist dummies, with advertisements reading "Haunted!," "Creepy!" and "Unpleasant!"
* Disenchantment A health spa tries to cure drinking spoiled water by irritating the patient back to health, by having him tortured for twenty-four hours by a jerkass. Afterwards, the spa attendant admits that the cure could just be the passage of time.
* Disenchantment: A nonhuman example. The griffin, who appears masculine in her human parts (and has a male-sounding voice) is actually female. When questioned on this, she replies "Gender is a spectrum."
* Disenchantment, Bean temporarily serves as an apprentice to the official executioner (who is himself a fairly comical, punch-clock version, of the Professional) and realizes she is a "natural" at killing and torturing people even when she doesn't real mean to. Nevertheless, she seriously struggled with the job due to the sheer lack of actual investigation to determine if the woman in question was guilty, to the point she couldn't bring herself to execute her.
* Disenchantment. Both have huge fandoms and widespread recognition between both public and critics, so it's no wonder why some people felt underwhelmed by the new show.
* Disenchantment Cloyd and the Enchantress are able to watch the series' proceedings from the comfort of their dark chairs, through a magic fire. It's hinted that they're seeing Luci's point of view, since when he's asleep the fire only shows static, but on other occasions they've been able to change "channel" as

it were.
* Disenchantment, continuing to run on Netflix despite little critical fanfare and a generally tepid reaction from fans of the previous shows.
* Disenchantment, Elfo, Bean and Wade are attacked by one of these while on their way to the Ogre homeland. Elfo, of all people, is able to fight the plant off and get himself and Bean to safety.
* Disenchantment, gets his head impaled on a chair made of swords when trying to pick up the wedding ring that Bean threw away. He somehow survives for several months with the sword lodged in his head, only for his brain to fall out when he finally manages to remove it.
* Disenchantment had this stripped from him when he helped Bean and Elfo escape from Hell.
* Disenchantment, Hansel and Gretel are revealed to be the real cannibals. Shortly after the reveal, we see human heads hanging from the ceiling apparently to dry and cure alongside unidentified "meat", various candies and desserts made of human flesh, and at one point mummified corpses in cotton candy.
* Disenchantment has Luci and Elfo become roommates, with Luci being (unsurprisingly) a terrible person to live with. When Elfo demands some say in how the house is run due to being his roommate and Luci responds with "Then get out of my room, mate", Elfo can't help but admit it was a funny and clever response.
* Disenchantment: in "Love's Tender Rampage", Elfo lies about having a gigantess girlfriend when he's too embarrassed to admit he tried to kiss Bean when they were trapped in the plague pit. Bean believes him however and feels sorry for him, so she sends her knights to find this girlfriend and bring her to the castle. And they actually find a gigantess who matches the description Elfo gave Bean, forcing him to convince her to pose as his girlfriend in order to uphold the lie.
* Disenchantment: In this show's universe, Ogres have a reputation of being blood thirsty, man eating brutes. And while that's true for the majority of them, the season 2 episode "Our Bodies, Our Elves" reveals that The Ogre Queen is secretly not as blood thirsty as the other Ogres. She even helps Bean and Elfo to escape the Ogre Homeland with the Legendberries they came to collect there. She also apologizes for killing and eating Wade.
* Disenchantment) is one of the nicest and friendliest people in the entire kingdom.
* Disenchantment kingdom, this is apparently their preferred way of transporting outsiders they don't like (as well as disobedient princesses).
* Disenchantment On arriving at Elfland, Bean accidentally injures one of the elves at the gate. Her attempts to be helpful just manage to injure him further, and he insists she go away before she helps him to death.
* Disenchantment, Princess Bean, is hinted at throughout the first two seasons and firmly established in the third season to be bisexual. Her voice actress Abbi Jacobson is herself bisexual.
* Disenchantment, she spins her head around like an owl, then complains that her neck hurts.
* Disenchantment. Stan the Executioner cracks a beheading pun when he hires Bean, and tells her she'll hear all the executioner jokes in the first fifteen minutes of work. "Then it's basically just human tragedy."
* Disenchantment the dungeon in Dreamland's castle is equipped with conventional torture equipment such as thumb screws and racks, but also a particularly dreaded book of golf jokes.
* Disenchantment. The knights all know it's a Snipe Hunt, but figure they have to go anyway. Then they actually find someone matching Elfo's description.
* Disenchantment When Luci gets exorcised, and stuck in a bottle his first reaction is to demand his lawyer. Turns out he's a demon too (distinguished from all the others by a tie), and he's already been captured as well, advising Luci not to say anything.
* Disenchantment: When the elves move to Dreamland in the second season, they're housed in a seedy part of the city that's now called Elf Alley.
* Disenchantment who happens to fit the description Elfo gave. Elfo begs Tess to

maintain the lie through the upcoming royal ball.
* disfigured serial killer run around in the campy lighthearted era. Like the Joker Dennis O'Neil and Neal Adams brought Harvey back.
* Disgaea 2 added several DLC characters. Depending on when you acquire these extra characters, there will be bonus dialogue depending on who is available. Some examples:
* Disgaea 2, any character that gets transformed into a monster by the Dark Sun retains their original voice.
* Disgaea 2, as Adell applies this to Friday, the Dimensional Gatekeeper who harbors a massive crush on him. Adell, of course, is highly oblivious to this.
* Disgaea 2 breed of monsters are so obvious they didn't even get mentioned, with kitty ears, tail, and strategically-placed strips of fur, Felicia-style.
* Disgaea 2 But they don't count, nor are they turned into Demons by the Curse.
* Disgaea 2: Cursed Memories, Adell became so terrifying that he ran nearly every demon out of Veldime.
* Disgaea 2: Cursed Memories, Adell's adoptive father has a VERY large pimple with a face on it on his chest. Two thirds into the game, it starts talking about how much it loves boobies. Then the consciousness of both him and the pimple switch places, with the perverted pimple being in control of the man's body.
* Disgaea 2: Cursed Memories bonus missions, Prism Indigo mentions that he's part of the Prism Rangers only because of the salary and insurance benefits.
* Disgaea 2: Cursed Memories fall into this as well with their respective parties forming around them due to their dependability.
* Disgaea 2: Cursed Memories Hanako and Taro. And you hear all the splurchy nightmare-inducing noises.
* Disgaea 2: Cursed Memories has a news show with two anchors - one of whom is entirely mute, between each chapter of the game, talking about demon-interest pieces or actual plot relevant information. Inverted in one such "episode", where only the mute character is present; the entire episode is spent in silence, giving absolutely no information at all.
* Disgaea 2: Cursed Memories, he takes the time to strike a dramatic pose before the person in question inexplicably explodes.
* Disgaea 2: Cursed Memories: "I don't even wanna be a part of this stupid world. I wouldn't stay if you begged me! I’ll go find a better world, with heaps of food! And cookies!"
* Disgaea 2: Cursed Memories is blown up by a Prinny's bomb, covering her in ash.
* Disgaea 2: Cursed Memories: No one intended to summon Rozalin, but once they had she was bound to help them find Zenon. Not doing so, or stopping searching for Zenon altogether would kill either Rozalin or Adell respectively. Forced cooperation -> mutual understanding and goal -> love.
* Disgaea 2: Cursed Memories, Princess Rosalyn wears long gloves that stop after the wrist (so they cover the arms but not the hands) as part of her royal ensemble.
* Disgaea 2: Cursed Memories, yet probably the greatest, attack in the game.
* Disgaea 2: Dark Hero Days had Axel Mode, where he desperately tries to reclaim his stardom and get work to support his family.
* Disgaea 2: Dark Hero Days has Death Sabers which are more demonic looking varation. They appear in Disgaea 4 as DLC.
* Disgaea 2, Dragons, Aqua Demons, and Mystic Beasts are innately immune to fire, ice, and wind respectively, but if they're donning equipment with a Lover on it, they absorb a percentage of the damage they would've taken as HP instead.
* Disgaea 2 features an unlockable Dark World, all the regular stages are similar with much stronger enemies and a malevolent sun that screws with the players every few turns.
* Disgaea 2 features Axel again as well as Valvatorez, who has given up ham for "the power of SARDINES!"
* Disgaea 2 has no objections when the demon princess Rozalin labels him her "slave," and is stuck with the title of "Rozy's Slave" for the entirety of the game. Then again, she is pretty cute.
* Disgaea 2. He does eventually admit that Rozalin is the exception to the rule,

more or less making him Rozalin-sexual.
* Disgaea 2. He's sweet and more mature than one would expect and is absolutely adorable. He's not taken very seriously by anyone, though.
* Disgaea 2 in the end, but he's still a bit queasy around most women.
* Disgaea 2 is very easy for the fact that unlike any of the other final bosses in the series, he has no minions to deal with, meaning it's just a simple task of whittling down his less-than-impressive HP before he can defeat all 10 of your units.
* Disgaea 2 kept increasing as they traveled together, and it's implied that they eventually made the relationship official.
* Disgaea 2, other characters had variations — Sword users, Spear users, Adell, Rozalyn...
* Disgaea 2 out at the end of the game. How this turns out depends on the ending you get.
* Disgaea 2 she is the highest level opponent, at level 1000, the party will face (that isn't a bonus boss) aside from Laharl.
* Disgaea 2 so that you can win the whole thing in one turn. And the prinny that's set up to be the 'ball' is named '10-pounder'.
* Disgaea 2 that he is, can beat him up. After the summoning screws up and summons Rozalin, Zenon's daughter instead, Adell is forced into improvising plan after plan for the next six or so chapters as he cluelessly tries to track down Zenon on his own.
* Disgaea 2), the director is sure they can edit the footage into an epic scene...or could if the zombie cameraman hadn't left on the lens cap.
* Disgaea 2 to track the progression of Adell and Rozalin's relationship.
* Disgaea 2 warrants the response, "If it's not there in thirty minutes or less, just wait longer!"
* Disgaea 2 was one of these, but lost his fame before the game started.
* Disgaea 2, where a modified monster can add itself into the already magichanged monster, resulting in two transformations, possibly one right after the other.
* Disgaea 3: Absence of Justice a unique primary evility that makes her to copy the primary evility of a target she kills.
* Disgaea 3: Absence of Justice by the Panic Laser magichange attack, with the user pulling out a flower vase, washtub, fish, and a Mystic Beast puppy and throwing them on top of the target's head before finding their raygun and blowing it all up with a laser.
* Disgaea 3: Absence of Justice" Evility kicks in, doubling its stats.
* Disgaea 3: Absence of Justice had the downloadable Raspberyl Mode, where she makes an attempt to become a teacher at Evil Academy.
* Disgaea 3: Absence of Justice has the "Heart Vault" where one can lock away or (more difficult) unlock aspects of the personality. Ah...be careful, as any changes or things killed will have radically effects on the owner..
* Disgaea 3: Absence of Justice has them, and he's definitely messed up in the head.
* Disgaea 3: Absence of Justice has the Vato Bros, a trio of recolored Orcs that challenge Mao every few stages. Mao sees them as useless weaklings, and even dubs them 'Trio De Losers' due to their Spanish accents.
* Disgaea 3: Absence of Justice makes him prone to astonishingly bad decisions (no, actually, calling yourself a hero doesn't make you invincible) and easy to manipulate.
* Disgaea 3: Absence of Justice. Mao finds this all rather very silly.
* Disgaea 3: Absence of Justice. One instance in the main story had a teddy bear out in the middle of Team Mao's path. Almaz rushes out ahead of Sapphire to pick up the bear, only to get jabbed by the trap inside and subsequently cursed to die. The trap had her name on it, he knew it, and he went to intercept it anyway.
* Disgaea 3: Absence of Justice: Princess Sapphire. Although Almaz is certainly no slouch in combat ability, its clearly obvious that Sapphire is the stronger warrior. It should be noted however that Sapphire's primary affinity (based on stats and evilities) is towards ranged combat while Almaz is a close combat

fighter.
* Disgaea 3: Absence of Justice, Sapphire is a princess and a warrior, so while her gloves are fancy, they are also armored.
* Disgaea 3: Absence of Justice, there's a brief moment where Mao announces how long it'll be before Almaz completes his transformation into a demon.
* Disgaea 3: Absence of Justice will frequently boast about having a 1.8 million E.Q (Evil Quotient), but is utterly clueless about simple concepts like love, truth, and friendship.
* Disgaea 3 allows you to purchase and download additional sidequests during the post-game, almost all of which have new characters as rewards.
* Disgaea 3 DLC characters. You're prompted to fight them before they actually become playable, and while facing them as enemies, they sport very strong and rare weaponry, have the strongest weapon skills at their hand and have between 10.000 to 25.000 HP to boot. Once they become playable, they lose all their equipment, lose all of their weapon skills and their HP is cut down to an average of 3.000. Though as in the prior two games, once the character in question is yours, you can train the character back up and give them equipment that far outranks whatever they had as a boss. And when you eventually cycle back through the game and acquire them again, they'll be at the same level with all their gear.
* Disgaea 3 has an attack where you shoot the enemy with an energy ball, suck them into the gun, shake the gun around (doing damage in the process) and then shoot them back out. The attack is called 'Cocktail Shaker'. Yeah, it's that kind of game.
* Disgaea 3 However, the title soon affects Mao's mind, subtly making him more heroic.
* Disgaea 3 introduces a service that allows one to change a unit's color to that of any of their other creatable ranks for a fee, and 4 expands on it by introducing unique colors that aren't used by any of a class' ranks, and extends the palette swapping privileges to unique characters.
* Disgaea 3 is a much more modest fiery Kamehameha, without the absurd MP cost of Lion's Roar. The Nekomata monster class gets its own version of this: Cat Blast.
* Disgaea 3, leading the party into a panic. Almaz, however, notices that the trauma is plugged into a large socket, and pulls the plug. Subverted a few minutes later when we learn of the outright damaging effect unplugging the trauma had on Mao.
* Disgaea 3. Naturally they are thrilled, as this cements their reputation as legendary delinquents.
* Disgaea 3 Princess Sapphire threatens to open Mao's heart with a chainsaw to save Almaz from being turned into a demon.
* Disgaea 3 take this even further: Not only do they have the previously-mentioned Nekomata, thieves and Beastmasters, but they also have Catsabers, a type of monster that looks like a little kid wearing a cat costume.
* Disgaea 3, this is one of the things Mao theorizes Almaz wants to do with Princess Sapphire.
* Disgaea 3 when they start arguing over who gets to be Laharl's "wife" when they pretend to be Mao's parents.
* Disgaea 3, which had the user shoot the moon out of orbit and down onto their enemies.
* Disgaea 4: A Promise Unforgotten even admits that she played with them quite a lot in the testing labs.
* Disgaea 4: A Promise Unforgotten, fans had given Fenrich the nickname "Fenfen." So what happens when the game is brought over?
* Disgaea 4: A Promise Unforgotten, first just acting like him, but later sounding and looking like him. The protagonists do manage to turn everyone back.
* Disgaea 4: A Promise Unforgotten, Fuka decides that the recently defeated Valvatorez and Fenrich would look good in maid outfits.
* Disgaea 4: A Promise Unforgotten- Fuka worries about wetting her bed when she gets scared at one point.
* Disgaea 4: A Promise Unforgotten have the ability to fuse with another monster to

approximately triple them in size.
* Disgaea 4: A Promise Unforgotten, it's taken to an even higher level - he can get a passive ability to turn any enemy he defeats into an ally for the rest of the battle.
* Disgaea 4: A Promise Unforgotten lesser gods to kill them. The party's defeated a tenth of them so far.
* Disgaea 4: A Promise Unforgotten like this, he just got away with it because "I'm strong."
* Disgaea 4: A Promise Unforgotten starts with him slowly marching towards his frightened opponents before delivering a world of hurt on them. For added awesomeness, flames erupt from under his feet with each step.
* Disgaea 4: A Promise Unforgotten, who mainly attacks with the tentacled creature on her back. She can attack directly with them, shoot beams from them, or temporarily detach it from her in order to transform it and attack enemies with them.
* Disgaea 4: A Promise Unforgotten with Valvatorez and Fenrich. Apart from starting with a very high likelihood of initiating team attacks with each other, all three of Fenrich's passive abilities are based on Valvatorez's status or positioning (ie. getting a 30% stat boost for standing next to him).
* Disgaea 4 defied by the same person, when you talk with the thief in the Campaign Board.
* Disgaea 4 Des X is a palette swap of Desco. This being Disgaea, is pointed out and lampshaded.
* Disgaea 4 far larger than she appears, despite looking like a little girl in strange clothing who just happens to be able to grow tentacles.
* Disgaea 4, Fenrich loses any semblance of composure and spends the entire chapter in a frothing rage.
* Disgaea 4 for his father. People don't take him seriously at all, but that's more because he's terrible at his job than his age. He's also clearly being played for cute, thanks to his bow tie and shorts.
* Disgaea 4, Fuka isn't able to become a proper Prinny because Hades ran out of Prinny suits. Thus, they just gave her a Prinny jacket and hat from the gift shop.
* Disgaea 4 have some interesting encrypted files in their memory banks.
* Disgaea 4, he is still stronger than most of the enemies thrown his way. "Normal", in Hades, is still pretty badass.
* Disgaea 4 in question is revealed as a guy in front of "her" adoring fans. Said fans decide that they "don't mind a little trap action."
* Disgaea 4 is capable of wielding both a Magichange sword and a Magichange gun at the same time.
* Disgaea 4. Nemo accepts this as probably the best fate he can possibly hope for.
* Disgaea 4 of Valvatorez that Fuka wonders if he's gay for the vampire in question. He never says he isn't. This only increases with the Tyrant Valvetorz Flashback DLC.
* Disgaea 4 rolls around he's a shadow of his former self, serving as an instructor to lowly Prinnies. Valvatorez doesn't mind and carries himself with the same humility and honor he had as the Tyrant.
* Disgaea 4 spends very little time brooding over tragic events. He's even cheerful about his fall from Tyrant to the lowly position of Prinny Instructor.
* Disgaea 4: The Meteor Lancer spear skill has the user leap into outer space, gather some meteors into the shape of a gigantic lance, then throw it at the targets.
* Disgaea 4 titles under his belt, including Tyrant Valvatorez, the Bloodthirsty King of Fear, the Blood-soaked Valvatorez of Absolute Evil, and The King of Carnage and Atrocity.
* Disgaea 4, where both Archeangel Flonne and Fallen Angel Flonne have it as a move, with the same incantation. The former summons a normal dragon while the latter summons a zombie dragon.
* Disgaea 5: Alliance of Vengeance. According to their bio, they're not actually very good at housework due to their brains rotting, but many in-universe find them

endearing.
* Disgaea 5: Alliance of Vengeance anymore, and instead send you back to the base with no consequences (other than obtaining a trophy for getting a game over if you haven't already) For specific examples:
* Disgaea 5: Alliance of Vengeance, enabling the bestial transformation without the ill effects, and the first victim of this power is the very asshole who cursed her in the first place.
* Disgaea 5: Alliance of Vengeance has a Mystery Room in the Item World where a Fight Mistress will ask you if you want to use a pie. Say yes, and she'll use it to pie a Witch in the face (with animations ranging from using a whole stack of pies to one that explodes like a bomb!). Afterwards, the Fight Mistress will give the player a Pie (which counts as a Fist weapon; its Ambusher innocent ensures the target won't counter-attack the wearer).
* Disgaea 5: Alliance of Vengeance, Killia is introduced defeating dozens of the Lost soldiers on his own. By the time you start controlling him, he's at level 3 and nearly gets thrashed by three mooks using basic attacks in the tutorial.
* Disgaea 5: Alliance of Vengeance says this frequently to his superior who calls him frequently before various fights in the game.
* Disgaea 5: Alliance of Vengeance that never deactivates, so you can take infinite turns without letting the enemies act while all your skills' costs are reduced to 1.
* Disgaea 5: Alliance of Vengeance took this to a whole new level: every character can have their entire palette changed how you want it to look. This applies twice over to any character that has a transformation-style Overload skill, allowing you to custom color their alternate form.
* Disgaea 5: Alliance of Vengeance with her ability to make any man do whatever she wants with a single gaze. However, her ability has absolutely no effect on Killia, and because of that, plus his selflessness, she has fallen for him.
* Disgaea 5), and Killia deeply holds himself responsible for the event.
* Disgaea 5 break turns into this upon hearing her Prinnies got stomped fighting The Lost.
* Disgaea 5 brings us Seraphina, the Succubus Princess of Gorgeous. To that end, her Overload skill allows her to charm male enemies specifically.
* Disgaea 5 exhibits this as well, known across the Netherworlds as "Tyrant Overlord Killadia" before the events of the story. In the present, he's a drifter without an Overload ability.
* Disgaea 5 features a "Nether News" ticker that runs while you're in the home base. Its stories mainly consist of interviews with character class representatives, advertisements for the various base shops, and the occasional details on the Lost's advances and conquests.
* Disgaea 5 hands this role over to Seraphina. Incidentally, not only does Asagi comment on there being two gun-wielders in the party once she joins, she also heralds the unlocking of the Asagi class, all of whom share Asagi's aptitude for gun-wielding.
* Disgaea 5 has a carbon copy of the aforementioned PlayStation Trophy system built into the game itself due to the Switch not possessing an innate achievement system.
* Disgaea 5 has Liezerota, daughter of Great Demon Fist, Goldion (whom himself is a Lion Man reminiscent of Leomon). She has a lion tail.
* Disgaea 5 has Seraphina for Killia, who only sees her as a comrade and has feelings for Liezerota.
* Disgaea 5 in the description for the Bikini armor. (Like any piece of armor in the game, it doesn't provide a visual change)
* Disgaea 5, one of the questions you can ask regarding the Interrogation Room is if it's really okay (i.e. ethical). The NPC in charge simply says "Yes."
* Disgaea 5, one will hear a song played on endless loop. The song itself isn't bad, but the lyrics can be incredibly difficult to understand without seeing them, as the singer's Japanese accent shines through on many syllables. This makes certain sentences sound less like they're supposed to and more like something completely nonsensical ("I have forgotten" can sound like "Eye of a button" which

contextually makes no sense).
* Disgaea 5 that you just assume some form of time travel is happening.
* Disgaea 5 When the party does face Void Dark near the end of the game, he cycles through all the Overloads he stole throughout the story; when Alma Ice Sculpture is active, anyone he strikes will be unable to take their next action.
* Disgaea 5 which had only one major male party member, but in this game, the majority of the cast are buff martial artists.
* Disgaea 6: Defiance of Destiny, and Ivar decides to play (really) dumb:
* Disgaea 6: Defiance of Destiny is a 10,000-year old hag who uses the Staff of Transformation left by the Ancient Witch on a bid to defeat the God of Destruction. Unfortunately, the staff traps her in a body of a much younger, scantily clad magical girl, and she has to do the whole magical girl act to draw power from the staff, a humiliating process she has to learn to deal with.
* Disgaea 6: Defiance of Destiny) toy sales for years, to the point that there were some credible rumours back in 2019 that the franchise would be canned or at the very least put on hiatus if the situation didn't improve.
* Disgaea, a former war nurse ascends to become an angel after her death.
* Disgaea: Afternoon of Darkness had "Etna Mode", where she accidentally kills Laharl and tries to cover it up.
* Disgaea also counted the throwing of Prinnies (who explode, damaging anyone around them) as an ally kill. This despite the fact that the game outright encourages you to throw Prinnies by making them incredibly cheap (1 HL) to resurrect. Later games did not count Prinny-bombs as ally kills.
* Disgaea also has the Hyperdrive, which allows any character that equips it to teleport anywhere on the battlefield save for the Dimensional Gate in Item World maps. In the original, it was awarded for going through all 100 levels of an ultimate item and defeating the Item God 2 (which is level 6,933) on the 100th floor, while in the PSP and DS remakes, it is only awarded if all 100 levels are done in a row without exiting out in between. Note that the only way to revive a fallen party member is to exit out.
* Disgaea. Also in 3, the Holy Dragon can halve any magic damage it takes with its Mist Cloak ability (Which it can also teach to any other unit).
* Disgaea and even maces being grouped into this class as well. Though explicitly shown to be stronger than swords (attacks and skills even lower enemy defense), they suffer from low accuracy and a lack of multi-target skills. Both were remedied in the third game, though axes now lower speed as well, reducing your chance to dodge an attack. Some Item Worlding can remedy the negative accuracy and speed.
* Disgaea) are capable of this and many of the higher level skills have a very bad habit of destroying whatever unlucky planet(s) happens to be nearby.
* Disgaea are... sort of like this. Basically they're modified versions of the same stages from the story, but with higher level enemies, geo-block puzzles and occasionally other special conditions.
* Disgaea are still the most well-regarded even after several additional games in the series. Inverted with the gameplay, however, as subsequent games have improved on the formula and the first game feels very dated and barebones by comparison.
* Disgaea, as demons and angels generally lack such, but even most of the human characters aren't shown to have any surnames.
* Disgaea at least a little, it's not all that hard to lose on that level). Hence the double subversion.
* Disgaea at level 2000, Overlord Baal (the first round) at level 4000, and you still have quite a lot of others. The re-release (mentioned below) also added the DLC characters whom are easy to beat but all sit at 100, and three characters form Disgaea 3 starting at level 500 and ending at level 3500. Additionally, the final boss of Disgaea 2 is level 90 and has no geo effects on the field and is alone. The bonus bosses are often not that gracious, and may have backup, geo effects, and ridiculous levels.
* Disgaea bad. Also, the Good Ending ensures that all the important characters are alive and well so they can make cameo appearances in the following games.
* Disgaea, bombard him with happy and cheerful sayings, sapping his powers for the

duration of that battle.
* Disgaea brawler can punch her enemies into the sun: Because it's awesome looking.
* Disgaea carry a limited selection, but replenish in the three seconds it takes to leave the shop and re-enter.
* Disgaea D2: A Brighter Darkness makes use of this through its Likability mechanic. The higher two characters' Likability ratings are, the more often they will activate Cover (taking an attack for) and Support Attacks (follow-up attacks) with each other on the field. At maximum likability, one can even earn the other's passive ability. That said, there is the "Heart's Shadow" Innocent that gives a stat boost per person with Zero likability with the holder, and these ratings can be raised or lowered at the Dark Assembly.
* Disgaea D2 adds a lot of features that make the grind much more streamlined:
* Disgaea D2 adds a new class of weapons: Books. Books are Int-based weapons, but while Staves are used to enhance the range and area of spells, Books are better for straight-up damage and have weapon skills.
* Disgaea D2 has Likeability values, which can go up and down between units depending on actions like healing another character or ally kills. Higher likeability leads to better chances of initiating team attacks, support attacks, and protect abilities. Some endings can also be triggered depending on the likeability between certain characters.
* Disgaea D2 when it's revealed that she's been using brainwashing music to boost her popularity.
* Disgaea Dimension 2 accomplishes, via transforming itself into a chain that its partner uses to yank the moon out of orbit.
* Disgaea Dimension 2, Angel Scicily mailed herself from Celestia to the Netherworld in a box. She claims to have done this to avoid getting lost, which everyone except Flonne thinks is stupid.
* Disgaea Dimension 2 Etna's Elder Spear becomes this when Etna dies in one of the bad endings.
* Disgaea Dimension 2, Flonne mentions that she "can't imagine Etna doing anything that wouldn't make her money."
* Disgaea Dimension 2 Her outfit is very similar to the male version, except with longer pants (they're slightly ripped at the thighs instead of completely ripped off at the shins), slimmer shoes, and a bra covering what was the male version's bare chest.
* Disgaea Dimension 2. However, they don't seem to have a grasp on what made Krichevskoy a great and charismatic Overlord and for all their disrespect towards Laharl, Laharl shows throughout the game that he acts far closer to Krichevskoy than the very demons who worship him.
* Disgaea: Dimension 2, Laharl claims to have "Destroyed every star in the sky", as a testament to his position as Overlord. Etna disparages him by claiming that any demon worth their salt could easily do the same.
* Disgaea Dimension 2. This is a plot point, as Etna herself points out, she looks like she's "Player 2". All of her alternate unit palettes are also swapped.
* Disgaea Dimension 2. While she naturally plays the trope straight, she tries to really invoke it for all it's worth by playing up her cuteness and offering sweets to convince Laharl to give up the title of Overlord. It only serves to further piss him off.
* Disgaea, Etna asks the Hero Prinny to sell some games and the console she's playing them on, claiming they suck. Then Prinny points out that she pirated the games and hacked the console.
* Disgaea games can seem a bit this way, especially in new game plus. If your proposal gets denied, your insanely overpowered team can beat the senators into submission without breaking a sweat.
* Disgaea games, you can occasionally find friendly NPCs in Item World provide various services. If you talk to some of them too many times, they'll get annoyed and fight you, which may or may not let you reap some additional benefits by defeating them.
* Disgaea gave him the same poison when he was little and in her care.

* Disgaea gives you the "Digital Deluxe Dood Edition", which includes the soundtrack and an artbook.
* Disgaea goes whole-ham on this trope, as several skills show the user going amazingly quick.
* Disgaea has another example of this. characters are everywhere across the castle - Running the hospital, the shops, even the portal that takes you to the storyline maps. Now, you can't attack them in the castle.... or can you? (Here's a hint: You can.) All you have to do is call an assembly. If one of the characters shows up, you can happily beat the tar out of them. Then when you get back to the castle, you'll find a little gravestone where they were. Wait a minute.... you just killed the demon running the Hospital... how are you supposed to heal? Just save, reset, and they'll be back in their spots again.
* Disgaea has the Evility "Like a Boss", which nullifies Deathblows, prevents capture and greatly weakens the effects of certain status ailments. It usually has a cost of zero Evility slots, so boss-units tend to have it slapped on.
* Disgaea have higher class ranks that are palette swaps of their base class, each with slightly better stats than the last.
* Disgaea: Hour of Darkness, after Jennifer asks Laharl if demons molested him in chapter 9, Laharl asks in a rather offended voice what she thought demons were. Though this scene was supposed to be funny, it shows that Nippon-verse demons draw the line at molestation.
* Disgaea: Hour of Darkness apparently don't have the strength to last long in the Netherworld by themselves, so Flonne carries a pendant that allows her to stay. Naturally, it's stolen at one point, making it an artifact type.
* Disgaea: Hour of Darkness as bloated, hunchbacked shadows with large scythes, skeletal wings, and a cow skull for a face. They are responsible for ferrying dead souls to the afterlife.
* Disgaea: Hour of Darkness as much mana as their previous moves, often requiring mana-boosting equipment to use even once per fight when it is first acquired. When the attack is used, the character somersaults into the sky, pushing their back up against the lens of the isometric camera, and throws an enormous Kamehame Hadoken, killing everything within a large radius of their original position before falling gently to earth. Awesome.
* Disgaea: Hour of Darkness at the possibility of the photo being spread all over the Netherworld. We never know exactly what was in the picture.
* Disgaea: Hour of Darkness, attracting both young girls (such as Etna, Flonne, her younger sister Ozonne, Gordon's 13-year-old daughter Jane,) and Sakura, an adult woman.
* Disgaea: Hour of Darkness basically manipulated the entire plot of the first game.
* Disgaea: Hour of Darkness because Laharl and Etna are young demons and no demon in the series are interested in probing either them or Jennifer.
* Disgaea: Hour of Darkness could be considered one of these as it's one of the funniest episodes of the game place right after one of the series' biggest tear jerkers.
* Disgaea: Hour of Darkness created super-robot Thursday at the age of 5.
* Disgaea: Hour of Darkness, Flonne, is stated to be very much like his dead mother.
* Disgaea: Hour of Darkness, Flonne takes pity on Mid-Boss as he has no one to make his lunch for him, but he asks her to stop as "That sends a sharp pain to moi heart!"
* Disgaea: Hour of Darkness games, located in the Dark World. It corrupts main characters and powers up enemies and seems to be a symbol of worship, if one of Axel's comments are any indication.
* Disgaea: Hour of Darkness harbored a crush on King Krichevskoy after he, the first person to show her kindness, took her in. However, he later married, so she... didn't approve. She initially hated their son Laharl for existing because of that.
* Disgaea: Hour of Darkness has Captain Gordon asking for a Teriyaki Pizza from

"Pizza Shack" to be waiting for him when he returns.
* Disgaea: Hour of Darkness. If you do manage to beat him, he's so upset he destroys the world. Now that's sore!
* Disgaea: Hour of Darkness interrupts Etna's speech so many times, that in the end, out of annoyance, Etna proceeds to beat up, shoot and overall brutalize the guy.
* Disgaea: Hour of Darkness In-universe, however, people disregard him as a total moron who's slow to catch on.
* Disgaea: Hour of Darkness is a self-inflicted punishment for being healers.
* Disgaea: Hour of Darkness is pinkish-purple rather then blue like the generic Prinnies.
* Disgaea: Hour of Darkness is the product of the demon king's marriage to a human witch.
* Disgaea: Hour of Darkness just the way he wanted it. This, of course, motivates him further to capture Flonne.
* Disgaea: Hour of Darkness, males included. The archers are only kept decent by the camera angles.
* Disgaea: Hour of Darkness release—achievements, trading cards, badges and cloud saving.
* Disgaea: Hour of Darkness revealed that she would have become an angel upon her death because she had otherwise lived a virtuous life and it was a noble sacrifice, but she was pregnant at the time and willingly passed on that right to her unborn daughter.
* Disgaea: Hour of Darkness, robotic character Thursday can be poisoned and put to sleep just like anyone else (applies to zombies, vampires, and living puppets as well). On the plus side, you can heal and resurrect him just like anyone else as well (though he alone cannot reincarnate).
* Disgaea: Hour of Darkness's mission to the Netherworld, this conversation takes place:
* Disgaea: Hour of Darkness... somehow. Even Vulcanus wasn't quite sure how it was going to work out. Etna called this out much earlier.
* Disgaea: Hour of Darkness that gives a significant power boost while on the first playthrough.
* Disgaea: Hour of Darkness, the jacket he wears was made by her as well.
* Disgaea: Hour of Darkness, the robot Thursday joins the party along with Gordon and Jennifer.
* Disgaea: Hour of Darkness, this trope would largely sum up what their relationship would be like.
* Disgaea: Hour of Darkness were credited for their voice work in the game itself.
* Disgaea: Hour of Darkness, when a hologram appears, not only is the picture glitchy, but the first thing the hologram "says" is always "fffffffffff... ffffffff..."
* Disgaea: Hour of Darkness, who actually gets hurt by pretty, big-busted women. Though he shows no interest either way, romantically.
* Disgaea: Hour of Darkness: you're still forced to do the tutorial, but it's really one very quick level that you'll most likely finish with just one move.
* Disgaea, however, as now mages select an element from the base three they want to specialize in when you first recruit them and the levels now work like with other classes, with higher levels getting access to Star spells naturally.
* Disgaea, including the part where she's actually dead and supposed to be a Prinny.
* Disgaea Infinite has to be blackmailed by Etna into congratulating Flonne for becoming an Angel Trainee again. And when he does, the words barely come out of his mouth.
* Disgaea Infinite. He has to jump between the other character's bodies to solve the main plot of the game. The fun part of the watch is that not only can he see events from the eyes of the person he's possessed, he can also hear their thoughts, and can influence their decisions, making them do things totally out of character i.e. Laharl hugging a sleeping Prinny or Etna professing love to Laharl.

* Disgaea Infinite if he can't mind control Laharl to prevent him from eating the fake pudding.
* Disgaea Infinite, Jennifer offers to give this to Laharl, since he's "at such a complicated age." He freaks out and refuses, but the prinny can make mind-control him into accepting.
* Disgaea Infinite, Mao starts approaching Flonne while excitedly panting and sweating. His reaction to her calling him a pervert and fleeing?
* Disgaea Infinite, You can mind-control Laharl into glomping Jennifer. She makes a remark about him going through puberty after he regains control over himself and freaks out.
* Disgaea. In one chapter, a bunch of rogue Prinnies challenge Laharl and company to a baseball game out in Blair Forest, but Laharl and Etna have a different game plan on their minds (i.e. "kill 'em all"). This is made easy by the fact that prinnies explode when thrown, providing a quick match if you are underleveled.
* Disgaea. In the earliest levels, the "specialists" that you must kill to level up your weapon ignore everything until you attack them, at which point they may counter, but won't attack. Once you get deeper in, however, you see that their "NPC Ally" designation on your map screen isn't just for show, and you may have to pull off some tricky maneuvers to make sure your enemies don't kill them first if they start out too far away.
* Disgaea in the entire game, and he'll often net you something incredible like the Super Robo Suit... but you just literally beat the toughest boss in the game, so unless you feel like challenging yourself in the later titles by jacking the difficulty way up just to test your skills, there's no reason to bother using it at this point.
* Disgaea: In the second chapter, Flonne summons a dragon to attack you, announcing that because she has to use a special item, she can only do it once - thus, after she joins your party, there will be no dragon-summoning.
* Disgaea is warp, which teleports the character on the panel to a random panel of the same colour.
* Disgaea, it can be simpler to power level one of the main characters and stomp the rest of the game rather than try to balance levels across a party of ten characters. This is almost a requirement in the post-game, because leveling and appropriately equipping just one character takes an absurd amount of time, even if you aren't trying for perfection. This restricts the options to using one horribly overleveled character and nine decoys or abusing the base-panel combat mechanics and Enemy Level Up Geo-Effects to create a team of poorly equipped Lv. 9999 monsters.
* Disgaea knock-off full of friendless losers who are treated as the butt of the joke in every situation. They're also frequently killed in action and replaced by their producers.
* Disgaea, Laharl is literally allergic to large breasts and optimistic sayings. After a cutscene featuring an excess of both thanks to it being deliberately weaponized against him, his stats in the ensuing battle are cut in half until he gets earplugs.
* Disgaea: Laharl is subjected to one of these in the form of sexually attractive women spouting optimistic phrases. Given his aversion and (literal) allergy to the aforementioned, his stats are cut in half for the next fight. Flonne spouting "eternal love!" didn't help at all.
* Disgaea. Like all demons, they can be both good and evil, and work both for your party or against it.
* Disgaea not human(oids), though they seem to pieced together out of human's dead body parts. The game isn't too clear on the issue.
* Disgaea Novels Laharl accidentally walks in on Flonne while she is in a hot spring. He blushes and quickly walks out.
* Disgaea Novels sister, Ozonne believes in the power of money and rejects the concept of love.
* Disgaea on one instance, though it was presumably just to emphasize how badly they had gotten beaten up.

* Disgaea onwards with two improvements. First, you no longer take damage when carrying allies, and second, the tower itself can attack enemies within a short range (one hit for each person in the tower,) making the human ladder viable for more uses than simply quick transport across the map.
* Disgaea princess. There's also Rozalin (fake overlord's daughter), Adell (peasant hero). Laharl's dad (overlord) and his mom (unknown social status mage).
* Disgaea Priver Dance attack drops one of these on the target's head. Etna's Prinny Raid also drops a flaming one in addition to the expected Prinnies.
* Disgaea. Provided that it's really and truly genuine, and not merely emptily declared sentimentality. Other times it's a symbol of lust, like the hearts that appear when succubus characters strike the enemy.
* Disgaea series, characters are able to learn magic, weapon skills, and abilities from others on their team through different methods, depending on the game.
* Disgaea series has red hair and eyes. Though, interestingly, her hair was pink in the first game.
* Disgaea series of games features a number of differently colored versions of each class and monster (except unique characters), each with progressively better stats as you move up the chain. Subverted in that each class has its own color arrangement rather than all following the one pattern.
* Disgaea series predictably have wings, as do some of the humanoid demons, like Etna, Raspberyl, and the Succbus monsters. Only the angels are actually capable of flight in gameplay, though.
* Disgaea series tends to include some of these, like the Beam Javelin, Laser Axe, and Energy Blade.
* Disgaea series, the arrival of a crew of pirates in the Item World is preceded by the sound of klaxons and the screen flashing red a few times.
* Disgaea series, units with flight like the Mothman and Masked Hero can move through enemy units, and disregard the height of terrain, making them extremely useful for any map where you need to get a certain point to complete it, as both of those things will frequently pose problems for normal units.
* Disgaea series use this, and it gets progressively more ridiculous with each game. Examples include mushroom clouds visible from space, the moon exploding, the world exploding, the solar system getting disintegrated, and even the entire galaxy getting wiped out.
* Disgaea series you get free rewards from the Healer when you reach certain milestones of total damage healed. May only partially count because it encourages you to get hurt more so you can buy more healing, thus possibly resulting in a profit.
* Disgaea she's a news anchor but never speaks, instead letting her bunny/co-anchor/emergency food supply do the talking. At one point she's on the screen alone and proceeds to give the news in 30 seconds of silence.
* Disgaea should not even be capable of lifting the sword he is holding, much less be able to deal absurdly high amounts of damage or lift and throw ten significantly larger people at once.
* Disgaea start off with swords as their most effective weapons and definitely become this by the time you've learned all their moves.
* Disgaea starts bragging about how he'd like to beat Etna to a pulp, not realizing that she's standing right behind him. Her reaction?
* Disgaea team known as the Prism Rangers. Although minor to the point of only appearing for one level per game, they always manage to fully utilize what little time they have to get the protagonists to know them.
* Disgaea, the first special technique that zombies gain is "Zombie Puke", which can also poison the target.
* Disgaea, the Majin is unlocked post-game with poor stat-aptitudes across the board and growth to match. All of its Evilities are designed to hamper it in some way sans its final Evility "Violence,"which gives it a bit of a buff....at the cost of another handicap. Having incredible base stats doesn't matter when it can't even grow very far.
* Disgaea, they explode. Any prinnys caught in the explosion also explode.

* Disgaea titles, the Healer and Medic classes gain healing spells as they level up. Some storyline characters also naturally learn healing spells, but the games generally have a method to give any spell to any class, including reincarnation, apprentices, and item/character fusion.
* Disgaea units that learn to use guns gain the "Proximal Shot" ability which allows them to invoke this trope while using their firearm as an impromptu rocket engine.
* Disgaea uses them for the max level that Dark Assembly members can like you... and just to show how wicked the Netherworld is.
* Disgaea, very much so. Nearly any character with a name has some ability to fight and pull of some insane fancy attack that defies the laws of physics. And since demons solve nearly everything through fighting, Netherworlds quickly turn into this because of how their inhabitants keep trying to assert their dominance.
* Disgaea was asleep for two years people just assumed that he was dead or simply forgot about him. No one cares beyond that, except Etna who wanted to use him for her own gain, and one of his vassals who expressed disappointment that she didn't get to use the grave she dug for him. Granted, everyone are demons and thus clearly aligned Evil, it's only in their nature to abuse, backstab and use each other. Laharl doesn't even care for his own father aside from disappointment that he found out too late that his father died and thus the competition for his father's Overlord position had been going on for quite some time before he woke up.
* Disgaea when thrown. While they can be used as one-time weapons to clear out enemies, and it's funny as all hell to do so, you won't get most of the rewards you'd otherwise get if you use more conventional methods to defeat enemies; no unit EXP, no skill EXP, no weapon Mastery, no Bonus Gauge, etc. Also, since this kills the Prinny, and dead units count against the deployment limit, every Prinny tossed means one less unit on the field that can actually be doing something of value.
* Disgaea, where said monsters can be your school classmates or members of your political party, respectively.
* Disgaea, which plays on the title screen. If nothing else, it's a lot more serene than most of the music one normally hears in the games.
* Disgaea who constantly spout phrases like "world peace" and "eternal love". His attack power is cut in half in that level.
* Disgaea with time and effort. It is also possible to reskin a "normal" weapon to look like a joke weapon while retaining its function.
* Disgaea, you can use the Geo Effects to your advantage. The effects range from stat boosts to making evil clones of your team to kill every round to outright invulnerability. You can also destroy the Geo Effects, and doing so will change the colors of the squares they're on to match the destroyed Effect, or destroy the squares if it's a Null. Setting up a chain that destroys all the Geo Panels will injure every enemy onscreen and earn you a massive bonus at the fight's end.
* Disgaea you to keep using that cheat just to level up at the normal rate. Of course, by the time it figures it out (which varies from character to character), you could already have your characters' levels in the 4000s (usually, it figures it out by around 2300 or so).
* disgraced friends and brother and earning more sympathy from the crowd, while her loved ones only receive more disdain.
* disgraced heroes to tell them why no one else but Twilight cared about their disappearance, Shining Armor tells them straight out that Chrysalis claimed she fired them because they only wanted to meet royalty in the wedding. Utterly mortified that such lies were believed about them, one of them bursts into tears, and everyone else gets more angry with Shining Armor because of this.
* Disgraced Red Army personnel whose service earned them (back) the right to serve in the Army and avoid imprisonment. Their crimes included cowardice (all ranks) or gross incompetence (Officers and NCOs). Personnel who had not escaped enemy captivity of their own volition were regarded as suspect due to reports of up half a million Soviet POW defecting to serve the Germans as
* Disgraceland centers around the messy criminal acts of famous musicians.
* Disgrace, who are still friends and meet up with each other regularly.

* disguised as a billy goat. When Gwynn and Sainis were kicked out one infamous game when the Chicago Cubs faced the Detroit Tigers because Gywnn's goat disguise stank, he cursed the Chicago Cubs to not win the World Series and kept it up for many decades that came after.
* disguised as a recently-deceased). Monk has to find out who DePalma's intended target was, and save him from getting killed by the same crime family that hired the hitman in the first place.
* disguised herself as a man by the stones thrown at her by a mob of women.
* disguised him with various metal pieces to stop the army from finding out), Rogard is so angered by the apparent false alarm that he tells Mansley to step outside so he can chew him out big time:
* Disguised Hostage Gambit. Saying the S.W.A.T. officers don't cause much of a problem would be an understatement, however.
* Disguised Hostage Gambit: The villains disguise innocent hostages as their minions in hopes of getting them killed by their would-be rescuers.
* Disguised in Drag and it's stated that the boy is only attracted to Taichi because he is the only young female he's met.
* Disguised in Drag: Any scenario where a man dresses as a woman for purposes of disguise.
* Disguised in Drag arc of the story, but also because of elements such as his struggles with identity and wanting to be different from the other boys in his village.
* Disguised in Drag was cancelled after two episodes due to low ratings and protests from the GLBT community.
* Disguised in Drag: When men decide to crossdress like women, it's often used as a joke.
* Disguised in Drag (when the dude's dressing as a girl only for a specific reason)
* disguise her gender game confirmed. But the Netflix series, however, gives Sypha ginger-coloured hair instead.
* disguises himself as a woman and starts charging by the minute to talk to him.
* disguise themselves as human and habitat loss, some other monsters essentially consider them an endangered species.
* disguise themselves as others his disguises than Yellow Temperance's user Rubber Soul; while Rubber Soul blew his Kakyoin disguise by acting ridiculously out-of-character, Oingo is able to fool the Crusaders when disguising himself as Jotaro (even replicating a cigarette trick Jotaro liked to do).
* disguise themselves as Shinigamis Ishida starts to freak out, telling her to put them back on so they can each change in private.
* disguise the true shape of things. Including herself, so no one has ever seen her true form, and she has appeared different to everyone who's ever seen her.
* Disguising a premeditated murder by making it look as if the victim discovered a robbery in progress and the robber panicked.
* disguising himself as a skunk to scare the dogs away. It nearly works until he suddenly becomes the object of Pepe Le Pew's affection.
* disguising himself as his teenage daughter, using a silicone mask and appropriate clothing. It didn't work, but only because the guards found his nervousness suspicious and confronted him. If he had acted a bit more confident, he might have been able to walk right out of the front door without a problem.
* disguising Panther tanks as M10 Tank Destroyers. Although they failed due to an insufficient number of fluent English speakers, they did succeed in making the U.S. Army so paranoid about their presence and activities that many checkpoints were set up which slowed down the Allies.
* disgusted him so much that he'll distribute the cure for free worldwide, just to spite him. Since the doctor believes that the unwashed masses are unworthy of his work, he is horrified.
* disgusted watching Gerta, in the form of Henry, and Schwoz talking lovingly toward each other. He demands that she change back to her normal form if they are to continue.
* Disgusting McGrossface, the boy says, "Ever heard of toothpaste?!" when

commenting on Disgusting's bad breath.
* Disgusting Public Toilet. They get very unhappy if you try to leave without paying your bill, which you might forget to do given you're trying to cover up the aforementioned murder.
* Disgusting Vegetarian Food: Vegetarian and vegan cuisine is repulsive.
* "Disharmony" was originally to include a scene where Gunn and Cordelia are apparently discussing some bloodstained bodies, but they're actually complaining about Angel's
* Dish Dash: A character has to dash madly around a room catching stacks of falling breakable items before they hit the floor and smash.
* Dish Dash: There's a discredited variation of it; when someone is showing off their skills at keeping dishes balanced atop spinning sticks. It used to be popular in variety shows, but both the trope and the genre have disappeared for over 40 years.
* Dish detergents often do this, with stacks of dishes, grease cutting power of a single drop, scratched glass, etc.
* dishes so good in the culinary world... and a snake-based dish Soma describes as "legendarily bad." There was also a mention of the infamous sardines in strawberry jam. In both these cases, there is some justification, as both have cooking styles which rely heavily on "brute force"-experimentation to create new flavor combinations (rather than extrapolating from known recipes or using knowledge of food chemistry), so it's pretty inevitable some of their experiments would end like this. However, both father and son take a certain level of sadistic glee in watching people's reactions to their cordon bleugh experiments.
* Dishing Out Dirt will be used since it's loud and powerful raw energy.
* dishonest, etc, forcing the candidate to distance himself from the mess.
* Dishonored 2 and the 'Chain Hosts' upgrade. Without this upgrade you must return to human form to possess another host.
* Dishonored 2 continues with even more pseudo-magic clockwork machinery.
* Dishonored 2 Corvo Attano and their now-adult daughter and heir Empress Emily Kaldwin.
* Dishonored 2 has a much more classical example in Aramis Stilton, who started off as an immigrant miner, but his people skills and tech know-how got him so rich that he was eventually able to buy out the very mines he worked in. Despite his attempts to fit in with the rich and powerful of Karnaca, however, the high society has never accepted him (except the late Duke Theodanis, who was his secret lover).
* Dishonored 2 has a New Game+ added via a patch that lets you carry over collectibles and upgrades as well as use powers from both characters.
* Dishonored 2, it's possible the cultural influences and pressures associated with being gay are different or non-existent in the game's world.
* Dishonored 2, one of the missions takes place in a mansion where an occult ritual went terribly wrong and as a result the house is permanently in a nested time crunch with parts of it in the past and other parts showing the present while also preventing you from using any of your powers. The Outsider gives you a timepiece that lets you navigate the simultaneous timelines and also has a set of retractable glass shards that give you a view into one timeline while you're in the other.
* Dishonored 2: The Regenters are believers of the former Lord Regent Hiram Burrows from the first game and people that hates the Empress Emily Kaldwin, enough that they were alright at the idea of assassinating her and her friend when the former was just 14.
* Dishonored 2 universe is, the likelihood of these monsters existing is unsettlingly likely.
* Dishonored 2: Using incendiary attacks on a Clockwork soldier is useless due to its mechanical nature. However, thanks to its wooden components, it will be set on fire, so now there is a giant robot on fire trying to kill you. Strangely enough, you do not seem to be damaged by the flaming frame of the Clockwork soldier.
* Dishonored: All of Dunwall's technology is powered by whale oil, an incredibly efficient fuel. The Heart describes the whales as mystical creatures, which is why the oil rendered from their flesh has properties that cannot be adequately

explained by scientists. All of Dunwall runs on magic.
* Dishonored allows for stealth and/or all out combat and both allow you to open doors normally...or use explosives.
* Dishonored, also being the carriers of a terrible plague that's gripping the game's setting. The protagonist can weaponize rats as well, by magically summoning them to either attack the enemy or to make a quick escape by possessing one of them while the others deal with enemies. The number of rat swarms you encounter is directly proportional to how many people you kill in the game, since corpses attract rats. If you're trying not to kill people, you'll also have to hide them from the rats after knocking them out.
* Dishonored and that Emily is his daughter, but either try to talk around it or are somewhat unsure. The game treats these as mostly rumors until the sequel where they're flat-out confirmed.
* Dishonored, and whether Emily grows to become Bright or Dark changes according to how you play Corvo.
* Dishonored, any character empowered directly by the Outsider is largely immune to Bend Time, Possession, or Windblast. They also can't be killed by most otherwise one-hit-kill attacks, including fatalities, fire darts, or spring razor traps. You can still backstab them, though.
* Dishonored, as it for silent short-range teleportation whose only visual effects are a brief particle effect accompanying the user's disappearance, but not reappearance.
* Dishonored as the first ability given to Corvo by The Outsider. It's primary use is to help the player traverse the stages with relative ease. While is appears to be a teleport at first glance, you will impact any objects in your path when blinking. The Whalers (Assassins) have a similar ability, but with longer range.
* Dishonored authorized and hop across that way, and the other is to use the advanced version of Bend Time to literally stop time and cross without fear of being zapped.
* Dishonored, certain individuals are given magical powers by the mysterious Outsider, the closest thing the setting has to a God, if the Outsider thinks they will be "interesting". These people, like main character Corvo, are apparently allowed to do whatever they want with their powers, though the Outsider will pop in from time to time to comment on what they are doing.
* Dishonored: Corvo can gain the ability to summon a swarm of rats to attack enemies.
* Dishonored, Corvo is given a biomechanical Heart he can use to find Runes and Bone Charms.
* Dishonored, Corvo wears one that was constructed specifically to look as freaky as possible; it looks like a crudely-made metal skull with asymmetrical lens-eyes and wire strung jagged over the jaw-area. It's also lined with cloth to protect him against the deadly plague spreading through the city, and can be upgraded to add a miniature spyglass that allows him to zoom in on distant objects.
* Dishonored: Daud captures Corvo and keeps him inside a hole, trapped by a barrier of wood. Inside the hole however are rats that you can possess to escape, as well as about a dozen bricks that can be thrown at the wood to break out.
* Dishonored Dead: A deceased character is denied something (usually a proper funeral) due to dishonorable actions in their life.
* Dishonored: Death of the Outsider-equivalent Power is Displace, which places a silhouette that can be teleported to. If anyone is standing within the silhouette when you teleport, they will explode into pieces and you take some damage. There's a bonecharm which causes Displace to not cost Mana if you teleport next to a person, but causes you to get telefragged instead.
* Dishonored: Death of the Outsider: in the third mission you have to steal the Twin-bladed Knife (a powerful artifact) from the vault of a steampunk bank protected by guards, electric floors, security systems and robots.
* Dishonored: Death of the Outsider series, who died of cancer a month before the game was released.
* Dishonored. Despite the quarantine efforts, the death count is considerable. The

bodies of the dead are collected, taken by train to the abandoned and flooded Financial District, and unceremoniously dumped off the raised tracks, forming an enormous pile that the waters float corpses down throughout the rest of the district.
* Dishonored doing during this dire crisis? Throwing parties and hedonistically flaunting their wealth as if nothing is going on. Even as it becomes obvious that the plague is going to spread well past the city's lower class, the rich citizens are in complete denial about the situation.
* Dishonored fights off boredom by granting people incredible power for the sake of seeing what they choose to do with it, and the only thing holding off the end of the world is implied to be the whales — whales whose oil fuels an industrial revolution, and who are being harvested to the point of extinction.
* Dishonored games both begin with the leads escaping persecution. In the first game, Korvo is awaiting his execution after being wrongfully accused of killing the Empress. He must slip past guards and detonate a bomb at the security gate in order to escape.
* Dishonored gets some flak for taking around eight hours to complete at a normal pace. Some still consider it worth it due to feeling like a more advance "classical-style" stealth game, however.
* Dishonored had a full 78-card tarot deck as its bonus, with card artwork based on the game's characters and setting, plus instructions for a card game for 2-6 players using the deck.
* Dishonored has a shortsword and a pistol (or crossbow, if you like) as his primary weapons. Officer-type guards and DLC Player Character/Boss fight Daud are similarly equipped.
* Dishonored has Granny Rags, an old crone given the Mark of The Outsider who occasionally requests Corvo to help her with nefarious rituals.
* Dishonored has one when you're seen by enemies. Very disconcerting if you're trying to be sneaky.
* Dishonored has the Dark Vision ability, which highlights enemies through walls as well as showing their cone of vision.
* Dishonored has the Golden Cat, a pleasure establishment incorporating a brothel, bathhouse, and burlesque parlor, which is regularly visited by the aristocrats of Dunwall.
* Dishonored; however, if the target is in combat, it takes longer to knock them out than if they are relaxed. An upgrade allows near-instant knock out even in combat.
* Dishonored, if the player causes a lot of chaos (by killing indiscriminately).
* Dishonored if the player opts for a High Chaos playthrough in the second game.
* Dishonored is unwillingly hitched up to one while his "nurse" usurps his leadership. To stop anybody from ending his life he's hooked up to a kill switch that'll flood the building with a deadly toxin.
* Dishonored. Jessamine selected Corvo as her bodyguard when they were twelve and nineteen, respectively. They became lovers once Jessamine turned eighteen. The trope is somewhat subverted in that Jessamine, as Empress, had all of the power in the relationship despite the age difference.
* Dishonored — you either kill him on the spot or walk past him to the final objective. If you do fight him, he goes down in a couple blows.
* Dishonored music boxes that disrupt an individual's ability to use magic, and are known to treat even suspected witches with absolute ruthlessness.
* Dishonored option for neutralizing a target is knocking him unconscious, dumping him in a crate, nailing it shut, and shipping him to Tyvia, the most remote corner of the Empire. This is apparently a common enough means of getting people places that there's a special routine and method of preparation to ensure the crate's occupant survives the trip.
* Dishonored plays with this by having whales which are implied to be supernatural and are somehow associated with the mystic dimension The Outsider comes from (when you go there, a whale can be seen floating in the abyss).
* Dishonored power to get behind an enemy makes them wonder "where'd he go?", and

then you can strangle them unconscious, slit their throat, shoot them in the back, or feed them to a swarm of rats, and if you're good enough at sneaking about, you can do all that without them seeing much more than your terrifying visage and their life flashing before their eyes. That skull mask he's wearing is enough to reduce most bystanders to tears. And that's not even mentioning that you can use severed body parts as thrown weapons.
* Dishonored predict, and thus finds interesting, to see what they will do with their powers.
* Dishonored's Empire of the Isles is set on an archipelago off the coast of the mysterious Pandyssian Continent, its residents follow a Lovecraftian state religion based on the belief that "the universe is unknowably vast and swarming with all manner of dangerous spirits and forces, most of which are hostile to man's existence", and the capital city is named Dunwall.
* Dishonored's epilogue, if Emily was saved in the final mission, Corvo is buried next to Jessamine after dying of old age; the final scene is of an adult Empress Emily placing one of her childhood dolls at his grave. If Emily is killed, the Empire collapses into total anarchy and Corvo leaves by boat for an unknown destination; his mask and sword left on Emily's grave.
* Dishonored series has walls of lights, arc pylons and arc mines, which can turn people and animals into ash.
* Dishonored series is close with her father Corvo - even when him being her father was still a secret. In return, Corvo dotes on her and serves as her biggest role model, teaching her everything that he knows.
* Dishonored. Several events in the DLC do tie into the main game, however, like the security at Coldridge being tightened following Corvo's escape, or references made to the Boyle's party.
* Dishonored's fifth mission, one room in the abandoned apartment containing the Outsider Shrine has a corpse surrounded by candles with the graffiti "DREARY DREARY DREARY DREARY..." written on the wall, and "You wanted me to decide, you asked me to do it. There's a hole in the world." on the floor.
* Dishonored, spatter the card with his own blood, then burn it in the hearth of an ambitious and avaricious man. In other words, Daud places a symbol of his future/ultimate reward at the feet of a strange god, coats it in blood, then allows it to be destroyed by greedy flames. Incidentally, Daud killed the Empress and threw the city into chaos using powers given to him by the Outsider on the orders of a paranoid noble trying desperately to claim control while plague ravaged the population. You might say the whole thing's been on his mind since then.
* Dishonored that his fate is now up to him. The player can choose whether to slit his throat or grant him mercy.
* Dishonored, the Empress briefly mentions such a blockade being deployed around Dunwall.
* Dishonored the northernmost known country is the eternally frozen Tyvia. The London-esque Dunwall is further south. Even further south is Serkonos which is portrayed as rather warm and temperate. Pandyssia is portrayed as existing somewhere to the south-east of the Empire and is covered in tropical jungles.
* Dishonored: The Overseers are the militant faction of the Abbey of the Everyman. Their primary objective is to stand against the Outsider and basically anything that is supernatural. They are most notable for the creepy masks they wear, which are actually bulletproof, and the "music boxes" some of them carry, which repress any magical ability and damage anything supernatural.
* Dishonored, there's the Outsider, an ancient, possibly omnipotent, possibly omniscient, definitely non-human (though human-looking) entity who manifests every now and then to grant powerful magic abilities to certain pivotal individuals. He states that he gives gifts only to those he deems "interesting" - whether that individual will use them for good or evil explicitly doesn't enter into the matter, and he doesn't influence them either way. Just about everything else about him, his nature, what he represents, and the realm he inhabits is unknown.
* Dishonored. The room contains a rat sample that can be used to poison the bootleg elixir producer at the Whiskey Distillery, or in the Golden Cat mission a rune.

* Dishonored, the Royal Spymaster is bald. The High Overseer's head is shaved as well.
* Dishonored. The substance itself would be identical to diesel if it wasn't luminous blue or incredibly volatile.
* Dishonored", to summon a swarm of rats onto his target to devour them.
* Dishonored turns up and stabs the Empress in the chest (and kidnaps her daughter), there's a bit of cradling her as she dies and a group of dignitaries and guards turn up to point the finger at you. Justified by the fact that the (important) witnesses to the attack were in on it. Corvo returned home from a diplomatic mission early, so framing him was just an unfortunate addition.
* Dishonored wear masks. The masks are those of the Whalers and are in no short supply in the city of Dunwall.
* Dishonored, who gladly plays it for you. You even get the satisfaction of seeing Burrows led away by the guards afterwards.
* Dishonored who seeks to claim the throne of Dunwall and usurp Emily Kaldwin, she was thwarted in the DLC but the entirety of the sequel deals with her return and her origins, and it elevates her to big bad.
* Dishonored, widely known as a famous assassin's icon, though this will be seen as a flashy and provocative innocent costume.
* Dishonored, wind power seems to gradually phase out oil-based generators, at least in Karnaca).
* Dishonored, you can catch Piero peeking through the keyhole into a room where Callista is bathing. He'll get flustered and make excuses, before admitting to peeking and being "ungentlemanly".
* Dishonored You can find a book about whaling with the line "The silhouette of one of these creatures makes a moving site as it cruises to its final resting place."
* Dishonored. You can summon a rat horde, but be careful - they're neutral and will eagerly try to eat their summoner alive.
* Disinherited Child: A descendant of the deceased was specifically disinherited.
* disintegrate. Actually used as a funeral ceremony by the Tok'ra (since it has the advantage of leaving nothing for the Goa'uld to revive and/or interrogate).
* disintegrate, against main characters they only seem to have three: stun, knock back, and mildly scorch.
* Disintegrate spell being cast on a creature that fails its save against it (3.0 or older editions) or killed by the damage dealt (3.5 and later editions).
* disintegration can accomplish the same goal just as well while being more flexible (if perhaps also more obvious).
* Disintegration Chamber: A machine (usually in the form of a little room) used to zap people into nonexistence.
* Disintegration Chamber: A science fiction method of executing people by putting them in some kind of chamber where they are zapped into nonexistence.
* Disintegration he disintegrates, so against people it's either kill or do nothing. (He gets a bit better after managing to save some lives without having to kill anyone to do so during the Halloween attack of all times.)
* Disintegration single, "Lullaby". That song is well remembered by fans of the band, but hasn't nearly had the staying power that "Love Song" has.
* Disintegrator Rays) to the US Army. For obvious reasons, he has zero tolerance for any use of those weapons by unsanctioned users.
* Disintegrator Ray. Straight out of TOS, anything hit by it just sizzles and is no more, without even the slightest damage to the surroundings. Again, though, Federation phasers are capable of this on max setting.
* Disintegrator Ray that shoots bolts of green lightning that can break down the Weak Force that holds matter together, tearing its target apart at the molecular level. The catch? The ray has to be fired through a crystal with exact specifications, right down to the atom, so it's virtually impossible for any other race to emulate.
* Disintegrators are one of the earliest stock energy weapons introduced in
* Disir hit them with a spell you have no idea will work, then run like hell.
* Disjointed takes place primarily in a marijuana dispensary, this is only

inevitable. Pete, Dank, and Dabby are the most prominent examples.
* Disk-One Final Boss so he spends the last few months of his life hopping from body to body as they expire increasingly quickly.
* Dislikes the New Guy: I'd rather not have this new guy around, but everyone else is on board.
* Dislikes the New Guy: One character doesn't like the newcomer for some reason.
* Dislikes the New Guy: Someone dislikes the new member of a group for whatever reason.
* Dislikes the New Guy: You're new here, huh? Well, guess what? I don't like you, and you don't belong here! Now fuck off!
* dislocate and rearrange her bones at the joint. Logically, of course, this doesn't make any kind of sense, but hey, at least they took body differences into account too...
* dislocated lifted the Champions League title for the third time in the row, while Karius was seen in floods of tears, begging the forgiveness of the travelling Liverpool fans (who, to be fair, gave it to him with a rousing rendition of club anthem 'You'll Never Walk Alone').
* dislocating Tracer from time letting her travel forward and back in time for a few seconds.
* Dismaland in August of 2015, deliberately designed to look like a decaying, disturbing Dadaist Disneyland.
* dismantled and hid Chad's desk and proceeded to drag him around the Rooster Teeth offices with tacos for everyone.
* Dismantled MacGuffin, which effectively sucks it inside and traps it in a crystal bottle that the Being can't escape from.
* dismantling the System to fight even harder and triggers a devastating world war. All of it to amuse D.
* Dismemberment Is Cheap: Characters are able to regrow lost limbs or get prostheses that work perfectly.
* Dismemberment Is Cheap: Lost a limb? Just give them a new one and forget the whole thing ever happened.
* Dismemberment Is Cheap — Artificial limbs so effective that they might as well be real ones.
* Dismember more noticeable as they kept their famous buzzsaw-like guitar tone throughout the years.
* "Dismissal", which kicks extra-dimensional baddies out of the user's dimension ('porting them back home most of the time, to a random plane 1 out of 5 attempts. Sending a Devil to Heaven is not healthy for either)
* Dismissed Gender: Concepts and situations in a work that would be problematic or more acceptable if the genders involved were switched around.
* dismissed them, believing the twists involved were too outrageous to happen, only for every single one to come true over the ensuing airings.
* dismisses the claims of a giant monster being Godzilla "unlike her lesser educated colleagues" only for the President to show her a video of Godzilla fighting a giant monster and saying, "It's a 30 story lizard that breathes fire. That's Godzilla."
* dismissing SpongeBob's attempts to explain what Krabs said while Sandy was trying to instigate, singles out SpongeBob and fires him on the spot. He takes it back after Sandy explains the situation and agrees to give up karate as well.
* dismiss situation, and the ADA is outraged (and, of course, is found in contempt for arguing with the judge), but the judge gets away with it since the ADA's boss finds additional evidence against the witness and files charges over her head.
* Dismotivation: Wants to keep things as they are and actively avoids doing anything that might change their life for the better.
* Disney Acid Sequence. Why would the doomed appliances at the parts shop go to all that trouble to freak out the protagonists, who are already terrified at the prospect of being stripped for parts? Because of this trope, and also to meet the quota and expected variety of musical numbers.
* Disney adaptations not only expanded the universe but also enriched it with

clever satire, engaging storylines, memorable characters, and well-told moral life lessons.
* Disney Adventure by a space octopus, thereby putting the whole story of the movie to a grinding halt. Ouch.
* Disney Adventures afterward. In another issue, they planned to destroy all the cereal in the world so that their 1 million dollar cereal "Fang Flakes" would create a cereal monopoly. How did they plan to destroy all the cereal in the world? They forgot to figure out how.
* Disney Adventures also featured a short comic in which the magazine's writers and editors fought against a team of four villains designed by readers for a contest.
* Disney Adventures (alternately titled "The Super Scary Monster Show")
* Disney Adventures, but the hero, the titular Driver 10, had only his driving skills.
* Disney Adventures buying a "Brandexx" jacket, which becomes popular for a while until someone else starts wearing "Branday" which then becomes popular at "Brandexx"'s expense.
* Disney Adventures including a villain feature that highlighted the T-1000 (a liquid metal killer that brutally executes multiple people over the course of the film). In a magazine that's marketed to children and teenagers. What were they thinking?
* Disney Adventures, it was stated that he spent most of his childhood exploring in the sewers of Paris.
* Disney Adventures, the starring rodents are cornered by their nemesis, Maxwell Blowfish. The villainous fish has them cornered, until they question how he's breathing out of water. Immediately, Maxwell starts suffocating, allowing the two to escape.
* Disney Adventures would occasionally run a contest like this. Notable instances were the heroes and villains contest, the winner(s) of which got a comic devoted to their creation.
* Disney Adventure technology (heat sensitive walls, VR videogames, etc) features a boy from the present and a girl from the future. She uses entirely futuristic slang except for "cool", which will always be cool.
* Disney Afternoon seems to be completely uncensored, except for "Puffed Rangers" (which was heavily redubbed from its original airing to avoid Chinese stereotypes and jokes).
* Disney allegedly being a virulent racist and anti-Semite, as mentioned in places like
* Disney also has a trend of retiring short series after two seasons.
* Disney also maintained a five man staff solely to create insignia for every US or Allied unit that requested one. Units as diverse as the Flying Tigers, HMS Illustrious, and the Free French Pilots of the RAF all received Disney insignia, as did about half of the submarines of the US Pacific Fleet. Pugnacious Donald Duck, Disney's "designated draftee" showed up most often, appearing in 216 insignia. Mickey, by contrast, served mainly on the home front.
* Disney, and even then he would have failed miserably if the Three Fairies didn’t help him.
* Disney, and it only played in about 140 theaters and was quietly released on home video.
* Disney, and started helping him to become a better man… well, man-beast.
* Disney. And the reigning champion Susie competes against is a remarkably good sport no matter how well she's doing against him.
* Disney an example of this. Promotion centered on the fact that this was the first entirely CGI feature-length film. Some of the original trailers featured only the darkest sequences and an 'adult' score different from the movie's, and practically 'forgot' to tell the viewer that this is a family film about two toys wanting to return to their owner.
* Disney Animated Canon about this, with Herc's Muggle parents showing up at his school for a Parents' Day Thing rather than his godly ones.
* Disney Animated Canon, and this is mostly due to its entirely non-human cast.

* Disney Animated Canon: Animators often watch the footage of the voice actors recording so that they can give their mannerisms to the characters.
* Disney Animated Canon: Even though the movies have never used the name Prince Charming, this trope is still quite common.
* Disney Animated Canon examples, there are many characters who are never given real names:
* Disney Animated Canon film is explicitly framed as kid-friendly horror, several of them have noticeably more frightening characters and situations than others:
* Disney Animated Canon films are this due to their focus on animals, especially dogs and cats:
* Disney Animated Canon films saw a fair amount of tie in products since the very beginning, with varying degrees of success.
* Disney Animated Canon films were given their own TV shows in the 1990s and 2000s.
* Disney Animated Canon get to 4-5, but the lesser-known films of the canon have their fair share of defenders.
* Disney Animated Canon has Aaron Lohr sub in for Jason Marsden as Max's singing voice.
* Disney Animated Canon has more examples that you can shake a stick at. At many times it tries to maintain a semi-realism with animals being able to talk to humans.
* Disney Animated Canon in general has often been accused of promoting witchcraft, having all kinds of subliminal messages and occult symbolism. Plenty of times, the reason of these accusations is based in the mere inclusion of magic and supernatural beings on the films, nevermind that a lot of them are actually inspired by old fairy tales and traditional legends, which already included those magical elements.
* Disney Animated Canon; in the more "realistic" ones, humans exist but have limited roles. Some examples:
* Disney Animated Canon is a Canon Immigrant itself, as it was made as a separate project and wasn't considered Disney's 39th animated feature until several years after its release.
* Disney Animated Canon is a (if not the) prime example of internal consistency in a fantastic story where the background and the basic rules concerning the magic spell which transformed the prince to a beast (and his servants to house objects), and how it can be undone are disclosed in the opening narration.
* Disney Animated Canon is a large collection of "pencil tests" of scenes animated by him.
* Disney Animated Canon of the singing is done by the actors. However, the Disney Renaissance era did this frequently.
* Disney Animated Canon. Only hardcore animation fans know the names of the actual directors (Walt himself rarely directed cartoons and never directed any of the movies). It didn't help matters that when much of the early Disney animated films were released, they were generally made by a team of segment directors under the command of a supervising director, who was himself answerable to Walt. Under that system, each segment director would direct a single portion of the film, and then report back to the supervising director so he could edit all the portions into a single, cohesive film.
* Disney Animated Canon's heroines are often depicted with long, flowing hair - thanks to their use of fairy tales. There are a few notable exceptions however...
* Disney Animated Canon: Some of the movies feature heroic warriors fighting evil wizards or witches.
* Disney Animated Canon. Sometimes three to five years will pass between the initial announcement of a project and the theatrical release of the movie, thus occasionally having the final picture entering into a social or economic market for which it is ill prepared.
* Disney Animated Canon, the Disney Princesses who married into royalty (Cinderella, Belle and Tiana) all wear opera gloves as part of their signature outfits while the princesses who were born into royalty (the rest of the Disney Princesses except for Mulan, the only member of franchise who's technically not a

princess) don't.
* Disney Animated Canon. The resulting restructuring was what allowed Jeffrey Katzenberg to take the helm, and ultimately led into the Disney Renaissance.
* Disney Animated Canon together. The name comes from the main girls being seen as representing seasons: Rapunzel (or Anna) is spring, Anna (or Rapunzel) is summer, Merida is autumn, and Elsa is winter.
* Disney Animated Canon usually is clean without being too obvious about it, but does fall into the shiny end when the princesses are involved.
* Disney Animated Canon, who appears to be the Disney version of Satan.
* Disney animated shows in the '90s often had crisper and more fluid animation/art/shading for their first few episodes. Usually, the opening theme would prominently show clips from these episodes. The first episodes for many of these were also made for TV movies (see
* Disney animated shows, while many look like they are targeted for a specific audience (boys/girls, preschool-tween etc), but their success often lies in their ability to be enjoyed by others who might crossover from the vicinity:
* Disney animation often gets this treatment due to its influence and dominance in the animation world. Some, such as
* Disney animator Ward Kimball said his favorite film he animated on was
* Disney a Pixar movie - but it doesn't stop many people from mistakenly blaming Pixar for it.
* Disney are officially called "Cast Members" in order to give an extra level of show-biz imagery to the franchise. Similarly, specific to the parks:
* Disney asked its cast members not to say the iconic one-liner "Watch your children, or the crocodiles will!" (or any jokes about the gators and crocodiles) in the
* Disney began as "Disney MovieToons", while their final name was commonly stylized as "DisneyToon Studios".
* Disney being but a few titles now almost entirely unknown outside their Disney version.
* Disney Belle and Beast are cleaning up nicely. Belle's part in it is downplayed (since we've seen her in fancy gowns before) and the focus is on the Beast cleaning up for her.
* Disney Blu-Ray Discs have a feature called "Cine-Explore", which accompanies an audio commentary with behind-the-scenes pictures and videos playing over the movie.
* Disney. Both companies' respective cinematic universes are hot competition right now.
* Disney+ by name and the fact that they can stream this film. The version that plays during the credits omits this verse.
* Disney can be considered this, having bought out Pixar, Lucasfilm, Marvel, and most recently, Fox, whose shares give Disney control of Hulu. At this point, 40% of the box office is under its umbrella.
* Disney, carried by that network and several other large chains mainly bound to ABC affiliation, though the network is neutral on-air to its Disney ownership)
* Disney cartoon characters, used this ending incessantly in the 1950s and 1960s, particularly in hundreds of stories written by Carl Fallberg and/or Vic Lockman. Many Gold Key writers also worked on TV cartoons and sitcoms, suggesting a direct influence.
* Disney cartoon going in circles, only by then, he's created a circular trench around the rock.
* Disney cartoon's Heart Throb", Pluto and Butch vie for the affection of a female dachshund named Dinah.
* Disney cartoon short come into possession of an ostrich. The ostrich swallows a radio and begins playing music.
* Disney certainly aren't above marketing towards the community at least as this
* Disney certainly broke many ghettos: animated feature films are now seen as huge moneymakers, critical darlings worthy of Best Picture nods, and they're no problem with getting considerable star power for their voice acting.
* Disney Channel (1942-2014) with art of a tearful Roger holding Eddie's hat and

the caption on top that reads "So Long, Eddie!"
* Disney Channel 2: Calibar's Revenge", the villain put a spell on Halloweentown's denizens, making them gray and boring, and the only way to reverse it is to say the spell backwards. They can't find Aggie's spellbook, so they don't even know what the spell is, but Marnie accidentally figures it out when she was "trap a" in a sentence: the original spell was "apart".
* Disney Channel (a franchise that already could fall under this trope at times), which is essentially the same movie with emojis, filters, image macro-style text, and other Internet edits incorporated into several scenes.
* Disney Channel, a hologram named Loretta is created by a teenager to help his best friend's band. Loretta is thought to be human until the band's second performance, when she starts fading in and out. But, in a slight subversion, everyone loves the holographic lead singer.
* Disney Channel and creator Michael Jacobs to very vocally speak out against the issue of piracy of their show, even threatening that such piracy would adversely affect production of future episodes.
* Disney Channel are mentioned to exist in this 'verse, and they don't have any weakness to aluminum foil (although Supes has his own weakness). The bad guys definitely assume that all supers have this weakness, as, when Randy claims to have powers, they give him some foil to test it.
* Disney Channel attending a Halloween event called the Central Park Spooktacular. Each episode from each series featured two characters from a separate show, thus placing all seven episodes on the same exact day, with said series all set in the same universe.
* Disney Channel both had a treasure hunt episode where the protagonists search for buried treasure only to later find out that the map was a fake, thus driving them to give up the hunt, only for the treasure to be found after they leave.
* Disney Channel, both of whom managed to attract teen fans. The films are more G-rated than most films aimed at actual teens as well.
* Disney Channel. Broxi won, beating Manchester United's red devil in the final.
* Disney Channel cage. After the hero's dad (AKA Bronze Eagle) tells his father he's late, Grandpa admits he should've just taken a cab instead of flying.
* Disney Channel created by a band who needed a singer. She is, well, a perfect singer and dancer. Not to forget drop dead beautiful.
* Disney Channel, Disney XD, or Disney Junior in the age of the Watch apps or its 2017 successor DisneyNOW falls under this, as the episodes that premiere that day are added to the service in the early morning, before any of the new episodes can premiere linearly.
* Disney Channel (ESPN has since switched the Little League World Series to a more conventional, but still youthful intro package, sans Disney Channel cross-promotion).
* Disney Channel, even taking the opportunity to join one of the movie's dance numbers.
* Disney Channel films often restore the deleted scenes that have been released.
* Disney Channel, "Gotta Believe In Something", used the word "miscreant" in it.
* Disney Channel have been competing for the attention of a generation of preteen children, with higher-level digital networks following suit.
* Disney Channel, Heather and Heidi Burge never played against each other in the pro leagues.
* Disney Channel; heck, the show had a day-long marathon the day Toon Disney started airing it!
* Disney Channel, he started adopting a higher-pitched, more "cartoonish" sounding tone, which sounds nothing like his regular speaking voice. The last time he used his normal voice was in 2014, with the latter tone of voice being used since 2017. However, he still uses his normal voice as host of Sirius XM's country music format The Highway.
* Disney Channel, hoping to cash in on them as much as possible before they hit their twenties. Many of these singers cross-promoted other Disney shows and had a merchandise line of their own.

* Disney Channel!", In some cases, this trope is not only subverted, but played for laughs as well, where whatever happens is the joke, with the end result as the punchline.
* Disney Channel is all about 11-year-old child prodigies who are allowed to skip to high school. ANT stands for "Advanced Natural Talents".
* Disney Channel is a rare live-action example of this trope in action, specifically of the intro sequence variation: the intro uses very high-quality film techniques, impressive (for a TV show) computer effects and is shot in a single-camera format while the show itself is show in a multi-camera format with the same low-budget considerations as every other Disney Channel series.
* Disney Channel know each other ever since when they were on third grade.
* Disney Channel live-action series is given an almost entirely unknown child cast (as most of them are just starting their careers). The adults could be people who rose up the Kidcom ranks (i.e. Jerry Trainor, Beth Littleford, Brian Stepanek), D-list actors from obscure adult shows (i.e. Rosa Blasi, Steve Valentine, Hal Sparks), Black sitcom parents (i.e. Kadeem Hardison, Chico Benymon), people more known for voice acting (i.e. Daran Norris, Jack DeSena), or comedians (i.e. Chris Tallman, Stephen Glickman)
* Disney Channel Live-Action Universe, the following shows have been established, through numerous crossovers, to exist in the same universe:
* Disney Channel Live-Action Universe, when compared across the board, fall heavily in this trope (not surprising considering the Fleeting Demographic is considered especially in play).
* Disney Channel loves this trope, so much so that almost all of its live-action shows have at least one. Examples:
* Disney Channel loves this trope when they get a chance to use it for all its worth. To list:
* Disney Channel movie Susie Q uses this trope in a surprisingly dark moment early in the film. The title character Susie is returning home from a dance when she and her date and involved in a serious wreck with a drunk driver on a bridge. The accident causes the car to be half on the bridge and half off; inside the car the couple seems to be unconscious or dead until Susie's hand feels out and grabs hold her date's hand. Then the car slips off the bridge, flips and falls into the river below causing the pair to drown. Yes, this really is a Disney movie and no, they don't show anymore.
* Disney Channel. Not content with that, when Bob can't find the couch, she tells him she's sent it for cleaning, along with the one in the basement. When Bob says he'll sleep on the air mattress in the garage, she replies: "Popped it!" It takes seeing Bob sleeping on the patio furniture in the middle of a snowstorm for Amy to give in and admit she was at fault.
* Disney Channel of the original, with not much difference from the original plots.
* Disney Channel once a week during the morning hours as part of a weekly required signal test for the provider. This also causes a headache for doctors and dentists who show the station to entertain children. Here are just a few examples:
* Disney Channel Original Movie made these days will likely feature one, or more, or several stars from the channel's original series, and maybe similar directors or writers.
* Disney Channel Original Movies sit at Stage 2 at best, unless animated, which tend to fare better and reach Stage 4. There are a handful of live-action films that fared well.
* Disney Channel put out a sketch about a class clown named Oscar, who gets expelled, but returns disguised as "Olaf, the Fake Foreign Exchange Student."
* Disney Channel, released for the sole purpose of putting "Get A Clue" onto a CD.
* Disney Channel revolves around this, with main character Roscoe using holographic technology to create Loretta Modern, intended to be a multi-talented and seemingly "perfect" vocalist for his best friend's band, the Zettabytes.
* Disney Channel's Asian operations ended up being this too, starting with Singapore, and then the rest of the Southeast Asian feed after. Again, this was due to Disney+ about to arrive in the region. However, this left Filipinos, Thais and

Vietnamese with no means to watch Disney shows legally (At least outside some shows that air on local TV) as their Disney+ feeds has yet to launch in their respective countries.
* Disney Channel Scandinavia used to have in years 2006-2007 a popup with an elevator landing from top to the bottom right corner of the screen, then it opened revealing a picture of the character from whichever show was coming up next (i.e. Tarzan, Kim Possible, Jake Long, Fillmore). It would show up two minutes before the show's episode ended.
* Disney Channel's character is stated as being accepted by MIT), was shot in Montreal.
* Disney Channel, seem to be made with the idea that it's still the early Nineties.
* Disney Channel. She is easily identified through her monotone voice and short, dark hair and always seems to hate whatever she is doing for that episode.
* Disney Channel shows from the 2010s-2020s have relied on this trope.
* Disney Channel sitcoms have episodes that premiered on DVD, then aired on TV at least a few weeks later.
* Disney Channel, the dorky protagonist likes Marco Vega, the most popular and hot guy in school.
* Disney Channel then counters again with an entire episode dedicated to completely unsubtly criticise a certain network's new interpretation of kids' TV and their programming overhaul that ditched all of the 'good' children's TV shows in favor of lesser and more demeaning ones.
* Disney Channel. They tried to ban it a second time because Luz is bisexual. This failed, as the show was an enormous success with a humongous fanbase.
* Disney Channel, to name a few, make a good effort to use the laugh track button.
* Disney Channel. What other reason could there be for the sequel to a modern-day western to be about people getting shipwrecked?
* Disney Channel, who made us laugh." The dedication was adorned by a drawing of Genie created by head animator Eric Goldberg. The Blu-ray bonus features "The Genie Outtakes" and "Genie 101" were also dedicated to Williams.
* Disney Channel wins/beats their opponent/whatever, the antagonist suddenly becomes BFFs with them.
* Disney Channel wrapped up filming in April 2001, but it took over 2 years for the final season to air with the final episode airing in March of 2004, almost 3 years after wrapping production.
* Disney Chills book, while Ursula is a nasty villain you don't want to be making deals with, she rightly chastises Shelly for using the ocean as a dumping ground for trash, and Shelly reflects that she knew throwing a coffee cup in the ocean was bad but did it anyway.
* Disney Chills, is meant to be about how popularity isn't worth true friendship and it's better to be yourself than changing yourself to fit in. The climax having Ursula turn Shelly into a fish over a technicality creates another lesson—always get contracts in writing, and check them thoroughly for loopholes.
* Disney Chills series opens with Shelly being dragged before Ursula, then flashes back to show how it all happened.
* Disney comic had the Beagle Brothers (and their mom) travel back in time to take advantage of how much cheaper everything was then... and paying with present-day money. Naturally they get caught and accused of forgery, as all their bills have wrong yearmarks.
* Disney Comics characters too. But in-between, this series often brought sheer absurd gags which weren't commented or lampshaded: A royal guard driving a unicycle, a woman wearing a fried egg on her hat, a spaghetti salesman making his noodles dance, just like a snake charmer... Lots of it.
* Disney Comics ever since Carl Barks. Goofy and the ducks are especially prone to it.
* Disney comics ("Fraud José"). Thankfully, by the end of the decade, the Brazilian team of Disney artists had already expanded and was fully able to make brand-new stories starring José Carioca and other characters, without having

to resort to any type of adaptation. This allowed José to have his personality again and made way for the creation of his own universe in the comics, with new supporting characters and distinctive storylines.
* Disney Comics story with Donald Duck, Donald is making prank phone calls with his favorite victim being a Mister Upjohn. ("It's almost 11 o'clock. Are you Upjohn?") When Donald tries to get a job "making phone calls for a living", he discovers that his boss will be the aforementioned Mister Upjohn, who recognizes Donald's voice. He still gives Donald a job — taking calls in the complaints department.
* Disney comics, the Phantom Blot. In one particular story, they covered him with privileges in exchange for him promising not to escape, because they knew they couldn't possibly keep him in jail against his will.
* Disney comics. This is the foundation on which all of his later characterization is built.
* Disney comic story "Amelia e la grande svolta" has Magica de Spell interview potential candidates to work as her monster servants. All the monsters turn out to either be frightfully incompetent, or have absurd demands (such as a paid six-month leave every year.)
* Disney comics to Scrooge McDuck and is typically depicted as a villain. Often, he shows his villainy by cheating or otherwise using underhanded tactics. However, in some stories (such as "Zio Paperone e lo slogan invincibile") he competes with Scrooge while doing nothing particularly villainous (or at least, no more than Scrooge himself does in the story), yet the audience is still supposed to cheer at him losing and getting humiliated at the end, simply because he happens to be in competition with the hero and is a villain "by default".
* Disney comic technician mourn tearfully for his sandwiches after they're lost in a fire in the TV studio.
* Disney Creatures of the Farce: A scene that parodies the whole "animals love Disney princesses" thing.
* Disney" curse. She wasn't strong enough to negate it, but she could provide an out.
* Disney Dance Crew" into a rap and changed one of the lyrics to "Drink up me Gangstas Yo-Ho!"
* Disney Death: A character appears to die, but it is then revealed that they have actually survived.
* Disney Death: A character turns out to still be alive after initially appearing to die.
* Disney Death: A death later turns out to be a fake-out, but that doesn't make the moment where it was believed the character actually died any less sad.
* Disney Death and his Pokemon sobbing over him has been reused in at least three different films. At least once it's reversed, with Pikachu being the one to "die".
* Disney Death: Fake deaths are used in place of real deaths. Not always a sub-trope because this is only one of many reasons for a fake death.
* Disney Death, Frigga "suggests" that Sif and the Warriors Three volunteer for a decades long mission out of Asgard.
* Disney Death manner of the fall, with no witnesses (Watson had been called away by a trick of Moriarty's), showing signs of a struggle but no bodies, Holmes was able to appear in Watson's living room several years later, having roamed the world under various aliases in the meantime.
* Disney Death: The hero appears to have suffered a fatal wound during the final battle, only to get up a few moments later. VERY common in family action movies.
* Disney, despite being deliberately darker than a typical Disney movie, still imitates the usual Disney format by excluding swearing and sex and having regular musical numbers.
* Disney does not like talking about the way Africans were portrayed in their 1930's
* Disney Dog Fight: Two people want custody of a pet, so they let the pet decide.
* Disney Dreams: An Enchanted Classic gives Anne-Marie until the clock strikes 6 to find her own magic to believe in.
* Disney Ducks) are popular with many demographics. This is due to the way comic

book writing is handled there. Anyone could write for the comic series, with almost no rules as to what the content should be. This is why you could get some very traditional kiddy fare coupled with detective stories, romance, superhero stories and detailed metafictional stories about the economy in the same comic compilation (though the stories in general would have the same protagonist).
* Disney Ducks comic Gladstone Gander's birthday is the one day of every year when he's unlucky. Unfortunately for many readers, the story ends with the discovery that the titular magical symbol, which is what gives Gladstone all of his infamous luck, was flawed when created, and it's fixed, meaning this one chink in Gladstone's armor is gone. It's not a very popular story for that reason.
* Disney Ducks Comic Universe—with mouse-eared "Daddy Time" (i. e. Moses) being wise to the time loop, and a Phil-like character reliving a similar time loop in a movie on Donald's TV.
* Disney Ducks Comic Universe, a corrupt Indian chief brags that he learned about the power of "greed and avarice" while studying abroad. Donald quips "You became a lawyer?"
* Disney Ducks Comic Universe actually brings in money for Disney among their classic characters.
* Disney Ducks Comic Universe? After all, fancy tools or not, the Beagle Boys are the same greedy thugs they've always been. He defeats the Beagles by creating a knockout gas bomb disguised as a diamond, and simply waits for the Beagles to steal it.
* Disney Ducks Comic Universe, a Italy comic book series starring the life and childhood of Donald Duck and his friends in stories. Young Donald, lives in Quacktown, a country village on the outskirts of Duckburg located where there is the farm of Grandma Duck with the little goat Billy. This representation of childhood Donald is easily compatible with versions of other authors, in accordance with the genealogy of Don Rosa.
* Disney Ducks Comic Universe, and, being allowed to keep them afterwards, once his job is done for the day he lives like a billionaire, complete with his own robotic butler.
* Disney Ducks Comic Universe and Fethry, with assignments to reprogram, recalibrate, or sabotage machinery they interact with.
* Disney Ducks Comic Universe and his nephews who were disguised as Indians while trailing after Scrooge McDuck in a comic book story use their blankets as parachutes after Scrooge bails out of a commercial airplane owned by his company with a parachute.
* Disney Ducks Comic Universe and yet he's still effective, people tend to believe him.
* Disney Ducks Comic Universe are commonly portrayed as amusing flaws. Finally, their nephews (Huey, Dewey, and Louie) are usually seen as immature pranksters and troublemakers.
* Disney Ducks Comic Universe", as the gang is leaving the square-shape-obsessed land:
* Disney Ducks Comic Universe as the parrot keeps refusing to spill the beans and demanding increasingly expensive delicacies... in the middle of the desert, no less.
* Disney Ducks Comic Universe because he keeps throwing his name around (which just so happens to also be the name of a lemonade brand that Donald likes), who threatens to throw him into a pool filled with sharks.
* Disney Ducks Comic Universe blowing a massive alpenhorn, which temporarily deafens them both.
* Disney Ducks Comic Universe classic stories, he built the various super-gadgets for the Donald superhero alter-ego.
* Disney Ducks Comic Universe comic that had Scrooge finding an old IOU and being unable to make out the signature (it didn't help that he had broken his glasses). He starts tracking down people he thinks it could be, but finds that he owes each of them money. He eventually realizes that the signature is his own and it was an IOU he wrote to himself.

* Disney Ducks Comic Universe, Donald arrives on the island and grabs the first round, black object he sees and makes a wish, only to discover it is the head of a native who has been tarred and feathered. After he scares Donald off, the nephews help him and he explains that he was tribe's medicine man, but the tribe tarred and feathered after none of his medicine could summon any traders to the island, leaving them stuck with a huge glut of coconuts.
* Disney Ducks Comic Universe, Donald Duck took this job and became so good he could blow up a building without blowing down a house of cards in a nearby house, or spreading more than two tiny pebbles outside the perimeter of the building.
* Disney Ducks Comic Universe. Donald even lampshades it by the end when he points out that they've already been through every B-movie cliché.
* Disney Ducks Comic Universe (Donald's nephews, Daisy's nieces, Goldie's granddaughter...) Since acting like you're hiding something leads others to believe you have something to hide, fans are left to assume the worst.
* Disney Ducks Comic Universe do not explicitely state that Immortality is awesome, but they sometimes say that they're glad to have lived so long and are often quoting things they saw.
* Disney Ducks Comic Universe: Duckburg is surrounded by desert, prairie, mountains, forest and ocean. It has a spaceport, a cathedral and several other unique buildings, most of which are only seen once.
* Disney Ducks Comic Universe, elements that have been used to death and back again during the trillions of stories so far. For example:
* Disney Ducks Comic Universe equivalent of the default evil Artifact of Doom.
* Disney Ducks Comic Universe (even Scrooge had trouble believing it at first and thought he had been hallucinating from lack of sleep until he noticed the one who knocked himself out on his bed lamp).
* Disney Ducks Comic Universe get in this mindset. As this is still Disney, she doesn't try to harm him, but simply reminds him that she could be his most formidable economic rival if she only wanted by starting a business in direct competition with his latest project and giving him a desperate run for his money if not outright outselling it.
* Disney Ducks Comic Universe he got the Pi-kar which not only can fly, but it's ironclad, can repair itself, change form to be disguised and has too many features to be listed here.
* Disney Ducks Comic Universe. He had often paced so much in that room that he's in at least a few feet inside the floor. In one extreme case, only his hat was visible above the floor.
* Disney Ducks Comic Universe. He's a fairly competent inventor, but still provides plenty of funny moments.
* Disney Ducks Comic Universe, he yells at the narrator to shut up and finish the story.
* Disney Ducks Comic Universe: In an Uncle Scrooge story, the evil witch, Magica has this problem
* Disney Ducks Comic Universe in full effect, but there are a few characters that can be assumed dead from context.
* Disney Ducks Comic Universe: In his first incarnation, Paperinik (Donald Duck's superhero-avenger of himself alter ego) steals huge amounts at once.
* Disney Ducks Comic Universe: in "Journey through the center of the Earth", Gyro Gearloose blasted a tunnel through the Earth with a big laser drill, singeing the tail feathers of a tribal duck on the other side as the meter-wide laser shot out of the ground behind him. Donald Duck was the test pilot of a pod that was dropped into the hole, and he ended up going back and forth through the Earth like a pendulum a couple of times (upside down on the other side of course).
* Disney Ducks Comic Universe: In Scrooge and Flintheart's second confrontation for determining who's the world's richest duck, they convert all their holdings into silver dollars and will have the piles measured. Glomgold, worried he might lose, tries to cheat by purchasing a special liquid that can shrink things with the goal of using it to shrink Scrooge's pile of money. His plan is thwarted, and he ultimately loses... by the same amount of silver dollars that he spent to buy the

juice.
* Disney Ducks Comic Universe: In the 2003 Gyro Gearloose story "The Accidental Factor", a future telling device predicts a rampaging elephant ruining the mayor's parade. In order to prevent it, Gyro tracks the elephant down and tries to keep him in place with a large number of peanuts, but the animal goes crazy after the peanuts and causes the exact accident Gyro was trying to prevent.
* Disney Ducks Comic Universe into a single continuity, but it's far too much for one man, so the fans have to fill in the gaps.
* Disney Ducks Comic Universe is super rich and a Cool Old Guy, things keep going his way despite his cruelty to his nephews, and yet it's entertaining to see him mop the floor with his enemies.
* Disney Ducks Comic Universe knowing if they'll ever make any from marketing the glue, Scrooge used it to stick their money at their hands, which forced him to pay. Later on, taking advantage of the fact the glue only sticks things on people, spread some at Scrooge's money to catch the Beagle Boys.
* Disney Ducks Comic Universe launched by their rival clan the Whiskervilles involving a ghostly hound.
* Disney Ducks Comic Universe, leading to them fearing to cheat on their significant other with someone who is effectively their significant other.
* Disney Ducks Comic Universe: Magica Despell likes to do this with her trademark "foof-bombs".
* Disney Ducks Comic Universe: Magica De Spell was created by Carl Barks specifically to counteract the "ugly witch" stereotype. Among the people/characters that inspired her design were Morticia Adams and Sophia Loren.
* Disney Ducks Comic Universe — as a balloon buster (see below in the Real Life section) and lived to tell.
* Disney Ducks Comic Universe midget steals Scrooge's dime and makes him participate in a rally (in the Duckburg from past, present and future) against his opponents, and with the help of his friends and family, in order to take it back.
* Disney Ducks Comic Universe. Most of these characters debuted in the comic strips written by Ted Osborne and drawn by Al Taliaferro.
* Disney Ducks Comic Universe). Neither of them knows about the other masquerading as him and the two of them come quite close to finding out when they walk through a park.
* Disney Ducks Comic Universe of burying a treasure chest in the Spanish Main. When they dig the chest up, the treasure turns out to be "strange and wondrous vegetables"- potatoes.
* Disney Ducks Comic Universe often have Donald log onto "Ducknet". (Or "Anknet", or whatever the word is for "duck" in the language the comic is published in.) It's exactly like the real Internet, except for the name.
* Disney Ducks Comic Universe one. Her most frequent enterprise is a dating agency, and a rather successful one.
* Disney Ducks Comic Universe. One issues starts with Scrooges father and Uncle in Scotland reading a letter from Scrooge and reminiscing about all his adventures around the world when:
* Disney Ducks Comic Universe, or, in one case, their eyes were perfectly visible, while the rest of their face was covered in muck. The few cases of their eyes being shown without the masks can mostly be chalked up to inexperienced artists not being familiar with the taboo.
* Disney Ducks Comic Universe, producing items in pretty much every possible business save for weapons (at least we never see those) and owning almost all of Duckburg (at some point the only thing he didn't own in Duckburg was Grandma Duck's farm, but sold some lands and allowed smaller companies to be born). It's also a very benign one, as Scrooge is a fair and honest person (even if extremely greedy and tight-fisted) and respects the environment, and any executive trying to use one of the smaller companies for crimes or ruining the environment is liable to be personally exposed by Scrooge, fired and turned over to the authorities.
* Disney Ducks Comic Universe: Putting Donald Duck, Gladstone Gander, and Daisy Duck in the same story is a recipe for disaster... and humor. It's interesting to

note that in Daisy's eyes she is "officially" engaged to Donald, and the boys' attempts to impress her romantically either go unnoticed or frustrate her to no end. These stories also tend to play up Donald's bad luck and contrast it with Gladstone's legendary good luck, such that the former is desperately afraid of losing his girl while the latter is desperately trying to win the one thing his luck can't provide. Jealousy, envy, and wacky hijinks all around.
* Disney Ducks Comic Universe "Reginella" arc by Giorgio Cavazzano features Queen Reginella's planet where a second is worth a day on Earth. It makes its inhabitants getting old in a few minutes when they venture onto Earth.
* Disney Ducks Comic Universe saw the main antagonist getting turned to dust, and his dust quickly getting mingled with the sand.
* Disney Ducks Comic Universe: Scrooge McDuck did it with a horse. Twice.
* Disney Ducks Comic Universe), Scrooge McDuck has a run-in with miniature aliens seeking to trade for Earth goods.
* Disney Ducks Comic Universe: Scrooge McDuck has done this in a bid to save money while traveling. It's stated that all he saves is "a few cents", but you know what a miser he is.
* Disney Ducks Comic Universe: Scrooge McDuck has sometimes found himself in trouble because his impenetrable Money Bin with unbreakable walls and gates lacked a proper floor and/or foundations due to the owner's stinginess.
* Disney Ducks Comic Universe: Scrooge McDuck once goes to visit one of his hotels when the manager mentions a convention. Unfortunately, it is a Convention of Crime organized by the Beagle Boys and other criminals. They order a cake and Scrooge is told someone would come out of it. Scrooge orders whoever is in the cake to show up and he finds Madam Mim. When she asks about the outlaws she is supposed to present herself to, Scrooge tells her they were all arrested. Since she has already been paid, she leaves without caring. Scrooge and the hotel manager then get cop costumes and jump out of the cake, scaring the bad guys.
* Disney Ducks Comic Universe. She left Huey, Dewey and Louie with her brother Donald for what was supposed to be one afternoon and never came back. Turns out she went on a rocket flight and is oblivious to the fact that her sons have grown older during her 10-minute trip.
* Disney Ducks Comic Universe short "Trick or Treat" expands a bit on why Donald is so mean to his nephews (he hates Halloween because of trick-or-treaters interrupting his privacy), and adds a few extra gags (like Witch Hazel disguising herself as an attractive lady duck, and later summoning a monster to steal Donald's candy).
* Disney Ducks Comic Universe's nephews walking around with a lucky rabbit's foot charm that actually brings good luck. When Donald hears that a dangerous gorilla escaped, he decides to turn the giant ape in, believing that he will be protected by the nephews' lucky device. Since he unfairly snatches it from them for the purpose, it doesn't work.
* Disney Ducks Comic Universe's story "Attack of the Hideous Space Varmints" assume the ducks are mindless beasts because they're so ugly- white creatures with two eyes and orange growths on their faces.
* Disney Ducks Comic Universe standing up to his obnoxious son, who is always using his connections to get away with stupid stuff.
* Disney Ducks Comic Universe starts out as the nephews start with an old stub of a pencil, they end up with a holiday for them and Donald to India. In the end, Donald is captured and will be thrown into a tiger pit. The nephews find another old stub of a pencil, exclaiming they've found the thing that can save their uncle. Cut to "sometime later", when they trade something very valuable for a truckload of raw meat. They throw it over the wall of the tiger pit, feeding the tigers, thus making them not hungry anymore when Donald gets thrown in.
* Disney Ducks Comic Universe stories from Italy have more than a few:
* Disney Ducks Comic Universe stories to the Italian ones where Scrooge typically kidnaps his relatives to go along against their will to search for something bizarre like the key to time or the gigantic coins of the cyclopes.
* Disney Ducks Comic Universe stories where Scrooge McDuck takes his nephew(s) on a

trip - mostly with ships for a reason.
* Disney Ducks Comic Universe story, Donald and Gladstone get into a fistfight against Daisy's wishes. Gladstone excuses his black eye by saying he walked into a door, while Donald says he walked into the same door trying to save Gladstone. Daisy is less than convinced.
* Disney Ducks Comic Universe story "Gyro's First Invention", Donald and Scrooge explain the events of "Christmas for Shacktown" to Gyro and how it will take 272 years, 11 months, three weeks, and four days to get all of Scrooge's money out of the hole it's trapped in (all umpteen fantasticatillion, three multiplujillion, nine obsquatumatillion, six hundred and twenty-three dollars and sixteen cents of it), culminating with this exchange:
* Disney Ducks Comic Universe story "Oolated Luck". Donald and Gladstone entered a raffle and Donald's nephews had one entry ticket with Donald's name and the others for Gladstone. Donald won the first prize (a trip in a cruise ship) and Gladstone won the second prize (a lifetime supply of oolated squigs). It turned out Gladstone was lucky for not winning the trip since the ship got stuck in an iceberg. The lucky bastard didn't seem to be concerned for his cousin) And one of the squigs had swallowed a diamond.
* Disney Ducks Comic Universe story "The Black Knight Glorps Again", Gyro Gearloose hid the Black Knight armor — coated in a universal solvent that dissolves everything but diamonds — in a giant cube of concrete in one such location. While checking to see if it had been stolen, Gyro comments on the ease of finding an abandoned warehouse.
* Disney Ducks Comic Universe story "W.H.A.D.A.L.O.T.T.A.J.A.R.G.O.N.", Huey, Dewey, and Louie get trapped on one when they're wandering around a woodwork factory looking for the logs that used to make up the old Junior Woodchucks' fort clubhouse. Donald saves them in the nick of time by turning it off.
* Disney Ducks Comic Universe superheroes, namely Paperinik (alias Donald Duck) and the Red Bat (Fethry).
* Disney Ducks Comic Universe's version of Duckburg which has a distinct timeline where all the adventures take place in the 1960s, but thanks to Gyro Gearloose, all modern technology (and indeed, technology yet to be) can be represented.
* Disney Ducks Comic Universe that Donald was having. Also, in the former example, they said Donald could buy his way out of a ticket.
* Disney Ducks Comic Universe, that eats everything except diamonds), not knowing what it is. He stirs it with a spoon while drinking his tea and notices what it is. He proceeds to take a suit of armor he stole from the money bin, add a layer of diamond dust to it, and then coat it with the solvent.
* Disney Ducks Comic Universe that repeatedly feature the hero's transport catching on fire, be it a car, a speedboat, or even a horse. In a sci-fi version of that show, even the comet the hero is riding bursts into flame. Or possibly not, as, to use Donald's words "It's kinda hard to tell with comets."
* Disney Ducks Comic Universe The Beagle Boys' grandfather, founder and occasional leader who is about one hundred years.
* Disney Ducks Comic Universe, their queen Reginella is willing to summon Donald rather than let her people be enslaved or worse.
* Disney Ducks Comic Universe. The most successful instance, however, is pulled by Donald Duck's namesake great-grandfather during the Civil War: a Union soldier, he was supposed to deliver a wagon full of ammunition to the Union troops besieging Duckburg, but a fight with a Confederate officer led to the wagon entering the Confederate-held Fort Duckburg... While on fire. He was awarded the Medal of Honor for basically winning the battle by himself.
* Disney Ducks Comic Universe. The story ends with Donald calling Daisy from the aliens’ home planet, stating that he won but he’s not happy about it.
* Disney Ducks Comic Universe the translator changed it so that they only travelled back to the 1700s, though of course this leaves all the characters they meet with anachronistic clothes and names.
* Disney Ducks Comic Universe: This is pretty much guaranteed to happen to Scrooge McDuck whenever he opens his wallet or change purse, so as to indicate that,

because he's a miser, he opens his wallet very seldom. In one story, after the witch Magica DeSpell steals his purse and looks through it, a moth flutters out and thanks her for letting it free.
* Disney Ducks Comic Universe tries to make a huge twist by revealing at the end of the third episode that the main character Quacky is actually a young John Quackett (AKA Fantomius)...except it was obvious from the get go, since he clearly shares Lord Quackett's unique eye shape.
* Disney Ducks Comic Universe was in full swing and the idea of space travel was very popular.
* Disney Ducks Comic Universe: When bored, Magica De Spell spends her free time spying on Scrooge McDuck in her crystal ball. Scrooge too has detectives who keep Magica under surveillance.
* Disney Ducks Comic Universe), which is a serious crime, they escape across the border. Donald and the boys are unaffected, since they had only been within the radius for a few days, while Scrooge is aged back to normal. The denizens, on the other hand, have to halt the pursuit or risk crumbling into dust.
* Disney Ducks Comic Universe who never seems to learn when to leave well enough alone.
* Disney Ducks Comic Universe with Josè Carioca as the protagonist had him bet his girlfriend Rosita at a billiards match. Rosita, offended it's not a "real" duel, gets back at him and his rival by pretending to dump him for another guy, and when the fake boyfriend gets challenged he uses his right as the challenged to make it a swordfight-and he's a fencing champion.
* Disney Ducks Comic Universe, with people blaming Donald for her actions.
* Disney Ducks Comic Universe, wondering how he could have missed it all. In the original, Scrooge kidnapped Goldie and made her work in his gold claim for a month to pay off a debt. As the censors rightfully questioned, what did they do at night? Watch television?
* Disney Ducks Comic Universe works like this: There is no ongoing continuity, but occasionally one specific story will reference another specific story. There are comic books and pocket books, and each have their own continuity. There are many characters that only appear in the pocket books. In the pocket books, Uncle Scrooge's rival is named John Rockerduck, while in the comic books he has no rival except for Flintheart Glomgold, who appears very rarely. In the pocket books, Donald has a secret superhero identity by the name of Duck Avenger or Paperinik, but this is only ever mentioned in stories specifically about his adventures as Duck Avenger.
* Disney Emoji Blitz the final challenge for Halloween 2018 involved this. Bugs would perodically crawl across the screen, keeping you from swiping emojis or activating power-ups if the bug was on it.
* Disney ends with Donald Duck and Peter Pig, on realizing their laziness has come back to bite them, taking turns kicking each other in the rear.
* Disneyesque: Their child friendly style was imitated by many cartoons from this era.
* Disney experienced some international censorship due to the presence of a minor character who is openly lesbian. The movie was outright banned in Kuwait, Oman, Qatar, and Saudi Arabia, though it was still legally screened in several other Arab/Muslim countries, such as Malaysia, Singapore, and Indonesia. Meanwhile in Russia, the local dub altered the character's dialogue to remove any mention of homosexuality, due to a Russian law which prohibits any "pro-gay propaganda" in children's media.
* Disney, explaining the titular cat's name. It's hilarious that this mixup occurred with a cat who lived in a veterinarian's home.
* Disney Fairies and make her a member of the core group, unofficial second in command at that.
* Disney Fairies, are very affectionate and are literally compared to a pair of starcrossed lovers. Understandably, many ship them.
* Disney Fairies book, Bess, an art talent fairy, feels that her latest painting is missing something. Apparently that something was a whole mess of paint splattered

on it by a passing frog.
* Disney Fairies, due to the toy line not meeting Disney's expectations. Not helped that the studio that did them, Disneytoon Studios, went under not long after.
* Disney Fairies: Fairies come into being appearing to be young adults.
* Disney Fairies featured all the characters in bathing suits at a beach. The central conflict of the movie was caused by the fact that "winter fairies" cannot be in warm or sunny places, or they'll literally die, making a beach-themed playset featuring said fairies... rather morbid.
* Disney Fairies goes barefoot in her summer outfit as seen in "Great Fairy Rescue", the beginning of "Pixie Hollow Games", and several of the Pixie Previews. Vidia always wears shoes in the movies, but in the books she is a barefooter. A few fairies who have so far only been seen in the books are barefooters as well.
* Disney Fairies has this while Vidia is leading the other fairies to rescue Tinker Bell.
* Disney Fairies has Tink, Lizzie and the other fairies rescue Vidia from Dr. Griffins just before he could open the door to the museum and get her pinned to a display board.
* Disney Fairies her mistake. Since then, she had always been supporting Tink and the gang, if still a bit snarky and sassy.
* Disney Fairies is one of the examples that uses this just before the climax.
* Disney Fairies, much strange fairy slang is used. Including, but not limited to: "Who gives a pile of pebbles?", "Flitterific!", "Splinters!", "Teetering Teapots!", "By the second star!". And from the book: "Fly with you", "I'd fly backwards if I could" and the popular slur for humans: "Clumsies."
* Disney Fairies, nature-talent fairies commonly have names related to whatever aspect of nature they're associated with. Rosetta is a garden-talent fairy, Silvermist is a water-talent fairy, Fawn is an animal-talent fairy, Iridessa is a light-talent fairy, and so on.
* Disney Fairies, Never fairies refer to humans as "clumsies". This is because, compared to them, humans are unusually ungainly and clumsy.
* Disney Fairies of referring to everyone with terms like "darling" and "dear" despite being a jerk.
* Disney Fairies). One day, however, it does snow and all the fairies, including Vidia, enjoy playing in the snow. Rani points out to Vidia that she must appreciate another fairy's talent now, since the snow was all the work of the water fairies.
* Disney Fairies series has a few. Notably, Queen Clarion's design drastically changes from the books to the movies. She turns from wearing flower-petal dresses like everyone else into a taller fairy with a dress made of glitter and massive golden butterfly wings for no apparent reason.
* Disney Fairies: She mended pots and kettles, at least. The name really does come from her being a tinkerer.
* Disney Fairies: Silvermist was perfectly normal in the chapter books, being somewhat clever, hard-working and with her main character trait being a calm, unflappable demeanor. The movies turn her into a complete space-case who can't even tell irony or exaggeration from fact ("And she just exploded!" "*gasp!* She exploded!?").
* Disney Fairies Tinker Bell movies were extremely different from the books in that they got rid of most of the book characters altogether and completely changed the personalities of all those who were left (including the titular character). Examples include Clarion, who stopped going by a nickname and used her full name and title instead, and who stayed out of the majority of the action, unlike the books. Vidia became a main character and her major Jerkass moments were excluded, making her a much sweeter person. It also got rid of the plot of the books in favor of more family-friendly stories and gave Tinker Bell a much nicer personality, removing her snark, and a twin sister.
* Disney Fairies. Used in the dust mill to make a millipede run on a wheel to help with the dust sifting process.
* Disney Fairies Vidia, who is mortified to find that she instinctively thinks like a Tinker.

* Disney Fairies were hired to do scratch work for Bobble and Clank with the understanding that they'd be replaced with Hollywood celebrities. At one point during production, Paulsen overheard crew members talking about the difficulties they were having with Bobble's "official" actor (who lived in the UK and had a thick Scottish accent the crew couldn't understand). Paulsen innocently reminded them that it would be cheaper, easier, and probably produce a better vocal performance if they just kept him. He and Bennett were officially cast in the roles shortly thereafter.
* Disney Fairies weren't selling up to expectations, the film series was put on a permanent hiatus.
* Disney Fairies who doesn't realize at first just how determined her partner is to win.
* Disney fall under this; having no story whatsoever and just being there for the sake of a fun experience.
* Disney fans and outside observers share this viewpoint from time to time, particularly about Disney's
* Disney fans who are eagerly following future animated movies have started giving themselves fun nicknames:
* Disney features a pair of kids who talk a couple of honest, inept crooks into kidnapping them to pay off some not-so-honest crooks.
* Disney features a scene where Hercules' fangirls raid his mansion as he tries to leave it and trample him, forcing him to hide behind a curtain until Phil tricks them into leaving.
* Disneyfication: A work is made more kid-friendly by removing inappropriate things, making it more cartoony, making the endings happier, etc.
* Disneyfication between settlers and Native Americans in the Old West, Braeburn/Little Strongheart, introduced in "Over a Barrel" is a popular ship among fans.
* Disneyfication than its source work, with darker plot elements removed and some light-hearted comedy and/or musical elements added, to make it more suitable for younger audiences.
* Disney film adaptation, Travers stated that no one from the film production were to be involved with the making of the musical. This included any new songs by the Sherman Brothers, though she allowed some songs from the movie, cut or not, into the show.
* Disney film from the 90s and onward has novelizations and other merch coming out before the films.
* Disney, gross-out jokes aside, was more of a traditional slapstick gag comedy.
* Disney had also originally intended to use that spelling of the word for the title of
* Disney had an entire series of shorts devoted to the war effort beginning with
* Disney had a policy of not explicitly publicizing the actors behind
* Disney has gained a cult following but isn't anywhere near mainstream).
* Disney has made six package films, four of which were made during the war years. The company lacked the staff to make one big feature film, but still wanted to keep the animators busy and make movies, so they opted to release shorts. Disney's feature-length package films are:
* Disney has raised his son Jay to have. At several points in the movie, we see him unloading various trinkets he's nicked, including phones, jewelry, wallets, even an entire laptop. At one point, he steals the hood ornament off of a limousine. When asked about it, he says: "it's like buying everything I want... except it's free."
* Disney has released direct-to-video sequels to a significant portion of its animated canon, animated by the company's various television animation units. At first they were follow-ups to
* Disney has Skippy's sister remarking how handsome Robin is. Robin never addresses it and it was only brought up in that one scene.
* Disney has strict policies when it comes to voicing their most iconic characters. No matter what other characters sound like,
* Disney have announced a second adaptation of the original Artemis Fowl novel to

coincide with
* Disney have elephant herds led by a male. In real life, female elephants lead herds while males are solitary.
* Disney having a new antenna, and plenty of new characters and vehicles being added with each new film of the trilogy. Unfortunately, Lucas allowed that income street to dictate the artistic decisions of the franchise over the pleas of colleagues about where to take the story.
* Disney heel". He even goes to Achilles' statue and flicks the heel, which causes the entire statue to shatter into a pile of rubble.
* Disney High order drinks in a bar. Meg asks for two shots of tequila and Jane starts to protest that she doesn't even like tequila... only to cut herself off when Meg downs both shots right away.
* Disney High School, Ariel is far too shy to speak in front of her crush, Eric, but one day he hears her singing along in a classroom and is obviously smitten. Unfortunately, he still doesn't know who she is.
* Disney High School, he decides to follow Hans' advice of going after a "pretty little nerd" instead with the reasoning that an unpopular nerd would be grateful to get the attention of a guy like him. He chooses Belle as his "pretty little nerd"... who, contrary to his expectations, is just as repulsed by his advances as the more popular girls were.
* Disney High School says she doesn't ship the latter, but noticed its popularity and decided to include it.)
* Disney High, who shows more interest in Esmeralda and Tiana than he does Lottie.
* Disney Hollywood Studios has "Lights, Motors, Action!" feature a biker who gets shot off his bike and slides through a wall of flame.
* Disney in 1928. The studio later founded its own distribution company Buena Vista in 1953 after disagreements with its previous distributor RKO Radio Pictures.
* Disney in 2015 with only three games after producing more figures than what was demanded.
* Disney Infinity characters are playable - essentially living toy versions of living toys.
* Disney Infinity has ended production means that this twist in the game's plot likely won't be leading anywhere anytime soon.
* Disney Infinity has not been forgotten and that its legacy will live on, considering the fact that there's at least a modding community in which, they'll continue doing the support of this game.
* Disney Infinity is mostly notable for two things. It has Disney characters and sets you buy as figures, and it's a toy box you can make other games in.
* Disney Infinity. (It cost $40 just to get one of the three starter packs, for example.) This was almost immediately rectified after the pissed-off fanbase barraged the Steam Store page with complaints and negative reviews, with the total amount of the DLC becoming a considerably more reasonable $130. Since then, the PC version has been replaced with a "Gold Edition" that has all content and characters available from the get go for only $30.
* Disney Infinity. Sure enough, after this we cut to Syndrome and the rest of the baddies enjoying themselves on the beach in Bermuda.
* Disney in general even if they don't mind the rest of the madness. Among their targets have been:
* Disney in general usually avoids this trope and has been doing so from very early on:
* Disney+ internet streaming services put an end to this practice, however.
* Disney), in which employees discuss the bosses giving cast members lots of freedom to keep the guests happy. The bosses also threw the cast members impromptu parties with free food, even providing them benefits out of the blue. The turnover rate in the parks was once extremely low, and cast members were reported to be very happy with their jobs.
* Disney is about living clocks. They can't talk but they move when humans aren't around.
* Disney is a prequel to the Disney movie of the same name, showing Hercules during

his teen-age years.
* Disney is kidnapped by Martians. She eventually changes into a superheroine and defeats the Martians by giving them exploding cigars.
* Disney is nearly as tall as her film's leading man, John Smith, who, himself, stands tall above most of the other men in the movie.
* Disney itself often packages canon movies with their DTV sequels for Blu-Ray releases, often giving the sequel equal billing (much to the resentment of the fans). The trailers they upload for these "2-Movie Collections" however generally give the sequels about 10-15% of screentime.
* Disney itself. Thankfully, its spectacular and humiliating failure, as well as the growing amount of competition, convinced them to finally get their act together and make better movies.
* Disney Junior. Considering that Disney Junior is a preschool network, and no parent wants to be woken up in the middle of the night by their child crying about something scary they saw on TV, this is justified.
* Disney Junior Dance Party are two dance party-themed touring shows based on popular preschool blocks that are touring around the same time (however, the Disney show has seniority over the Nick once, premiering a year and a half before). While the first version of the Disney show was poorly received because most of the characters were just screen projections and not costumes and because most of the time was spent with the DJ hosts, the second version was seen as better in the eyes of most fans. As the Nick Jr. show has yet to open, it's unknown how well it will do.
* Disney Junior ended its run in the Netherlands on April Fools in 2019. Hungary's feed ended in 2018.
* Disney Junior Live On Stage! segment, the audience had to make alligator noises to scare Captain Hook. After the incident, the audience now claps to scare him.
* Disney Junior - Live on Stage! where Mickey Mouse and his friends plan a surprise birthday party for Minnie.
* Disney Junior sometimes uses "DJ" as a shortened nickname in its promotions (ex: the DJ Shuffle promotion). One of the live shows even has hosts named after this nickname (Dee and Jay).
* Disney Junior's when tumbling down a cliff, though there's another dragon named Sparkie who actually can't fly and has to be rescued.
* Disney Junior, Thumbelina builds one with Goldie and Bear when babysitting them. It's actually pretty posh.
* Disney Junior: "Where the magic begins." As Playhouse Disney it used "Where learning is powered by imagination."
* Disney Kingdoms comic "Figment" has a literal brainstorm, musical creatures imprisoning our heroes in the "bass-ment"...Blarion, as the Straight Man, groans at these, but the rest of his cast likes to make them.
* Disney Kingdoms: In "Big Thunder Mountain Railroad", Abigail disguises herself as a man to infiltrate the mine.
* Disney Kingdoms series. He struggles to get used to more advanced technology and with doubts about his relevance, which sets the main plot in motion.
* Disney Kingdoms shows Capri Harmony living with her single mother Jess, but no information is given as to why her father is out of the picture.
* Disney Kingdoms, the Nightmare Nation is this. It seems to be the anthropomorphic personification of despair, depression, and art block.
* Disneyland about making changes to an area in the park to improve guest flow. Apparently, after Disney refused, Nunis called him an asshole and tried to dramatically leave the room... only to accidentally walk into the closet.
* Disneyland. Also worthy of note are the 'umbrella ships' of the Mars Expedition Fleet, each topped with a huge round heat radiator for the atomic generator.
* Disneyland and Hong Kong Disneyland, over 50 Disney characters make cameos within the countries their stories originated and/or took place in.
* Disneyland and Walt Disney World have population signs above the railway station at the foot of Main Street, which gets amended whenever a guest milestone is achieved.

* Disneyland California evidently pays a fine every night for their fireworks performance(s).
* Disneyland Dad: A divorced parent who showers his/her children with lavish gifts and outings to win their love.
* Disneyland Dad: Non-custodial parents deliberately spoiling their kids, letting them do whatever they want when they visit, or not following through on restrictions or punishments that the custodial parent had instituted just to undermine the custodial parent falls under the mantle of "parental alienation". Judges are wise to it and very quick to tell you to knock it off and/or find you in contempt if you do not comply.
* Disneyland Dream, amateur filmmaker Robbins Barstow's sophisticated home movie of his family's visit to Disneyland in 1956, shows Disneyland as this.
* Disneyland Dream is a 1956 home movie by amateur filmmaker Robbins Barstow, documenting his family's trip from their hometown in Connecticut to the then-new Disneyland theme park. It is, among other things, a perfect record of the stereotypical all-American nuclear family with the mom, dad, and kids, in this case three.
* Disneyland had this during the scene about life in the 1960s, when the father of the household would start talking about the most recent technological advancements, only for his wife to start praising how easier life has become with modern technology.
* Disneyland in Hollywood while he was building it and 'Walt's Nightmare" in the press after a disastrous opening day. After said opening day, it has become one of the most successful theme parks in America, even acquiring many more theme parks around the world.
* Disneyland is set inside "Space Station 77", where the riders get launched into space from.
* Disneyland it generally serves the eastern U.S. states which are much more populous than the western states where Disneyland is closer.
* Disneyland Japan opened within months of each other, the latter of which is located less than an hour away from Nara Dreamland and basically ate up whatever's left of the park's visitors. Sales hit rock bottom, maintenance issues abounded due to the lack of visitors, and the park was abandoned in 2006.
* Disneyland: "Mars And Beyond" briefly mentions silicon based life in a segment about what life on Mars would look like. It suggests that it would take the form of crystalline structures that rise during the day, then shatter into oblivion in the cold Martian night.
* Disneyland, often describe one of their members as "the fastest speed fiddler in the entire… Frontierland area."
* Disneyland opens in an eerie swamp at night, presumably to justify placing the ride in the New Orleans Square section of the park.
* Disneyland; out of necessity, the other parks either had to improve their standards to entice new customers or risk going out of business.
* Disneyland Paris characters available for regular meet-and-greets, and of course a crapton more Stitch merchandise being sold over there.
* Disneyland Paris, features an animatronic dragon in a cave. It does not speak or demonstrate any breath weapon, but it otherwise follows the traditional Western template—huge, four-legged, winged, rugged, and ferocious.
* Disneyland Paris was initially despised by the French people, citing poor (by French standards, anyway) working conditions and seeing it as a sign of
* Disneyland ride. At one point, when your "Doom Buggy" (the car you ride in) descends into the graveyard scene, it rotates around and you are looking up at a raven with glowing red eyes, cawing menacingly down at you.
* Disneyland: Secrets, Stories and Magic came with a reproduction of an old Disneyland ticket book.
* Disneyland's original Tomorrowland was set in 1986, 31 years after the park's opening.
* Disneyland's Splash Mountain of "Laughing Place". In turn, the Walt Disney World and Tokyo Disneyland versions of the ride skips the vocal part of "Burrow's Lament"

and only uses the alternate instrumental version, when Bre'r Rabbit is being tortured on the final conveyor belt lift. The instrumental of "Sooner or Later" can still be heard in the queue.
* Disneyland's, where "kill" and "death" are spoken freely. Only the term "sleeping death" for the poisoned apple's effect was retained.
* Disneyland theme. Though it's an artificial mountain, it's still a challenge and the climbers have to be certified before they are allowed on it.
* Disneyland), whose business had pretty much the most commercials in the whole loop.
* Disney, led the baseball steroid investigation, was president of the international law firm DLA Piper, helped negotiate peace in Ireland, and was a board member of several companies including the Boston Red Sox, and held several diplomatic posts.
* Disney limited you to gaining Toon Tasks (quests) and fishing in the starting Playground and 3 surrounding Streets (though you can wander anywhere you want), a Jellybean jar that maxed out at 50 beans, 25 Gags (weapons/attacks), only able to learn one extra gag track (toon-up/sound), and unable to buy anything from the Cattlelog, or play any of the games other than the one in the central Playground. Basically, a free user got maybe two days of play out of what might actually have been a pretty decent MMORPG.
* Disney Magical Quest 3 Huey, Dewey and Louie are sucked into Storybook World by the evil "King Pete" after they open an old book in the attic and Donald (or Mickey) has to enter the book in order to get them out.
* Disney Magic Kingdoms, Mickey, Goofy, and Pluto finally defeat Pete by playing the trumpet, playing the tuba, and barking at him respectively.
* Disney Magic Kingdoms offers daily rewards for playing, including a character and attraction for 30 days. Luckily, missing a day doesn't completely reset the rewards counter, just missing out on the reward for that day (in this case, a day of Magic).
* Disney manner that sidesteps all the pissing matches between the old EU writers. For instance, a lot of Karen Traviss' ideas about Mandalorian culture are still canon, but with a number of changes. However, fans have noticed some contradiction already with Disney’s books and films, and one of the producers has been quoted as saying there is no firm canon.
* Disney "mediocre" and began a redesign that lasted from 2007 to 2012.
* Disney merchandise that he causes a brief eruption on the volcano he's in. This is seen from the background as the scene cuts to Hercules and a crowd some miles away, who all start looking around wondering where the sound of the blast came from.
* Disney Merlin describes the effects of malignalitaloptereosis to Madame Mim, who experiences this first-hand.
* Disney-MGM Studios (later renamed Disney's Hollywood Studios) opened on May 1st, 1989.
* Disney mini-series, Mike Fink becomes friends with Davy and Georgie after the beat him in a riverboat race.
* Disney: Miss Price has a black cat named Cosmic Creepers as her familiar.
* Disney Mouse and Duck Comics. After teaching Goofy chemistry Von Drake turns him loose in the lab to make a new compound and...
* Disney Mouse and Duck Comics alone are really big, and the long number of other supporting cast members...
* Disney Mouse and Duck Comics and crossed the line into annoying. In fact, some of their characters (Scrooge McDuck comes to mind!) never got over it.
* Disney Mouse and Duck Comics: A variation in the story "The Hooded Eagle" (1994) by writer John O' Conner. Mickey Mouse is hired to take part in the search for a rare, missing eagle. The search leads to an isolated location in the Arctic, and Mickey and his client are the only people around. Then the client turns out to be the Phantom Blot in disguise, and pulls out an ax. The search was a pretext to bring Mickey to an isolated location and kill him. The rest of the story is a battle for survival.

* Disney Mouse and Duck Comics, especially with the shorter characters:
* Disney Mouse and Duck Comics have this as a somewhat recurring plot:
* Disney Mouse and Duck Comics is involved in the story, plus puns related to other animals if the story setting needs it.
* Disney Mouse and Duck Comics. It's usually Mickey or Huey, Dewey, and Louie who figure out the way to escape. Often it's just the old "grind the rope against something" thing, but there are also more imaginative examples such as Mickey's "combining salpetre from cave walls with ground-up oxygen pills to make an explosive".
* Disney Mouse and Duck Comics luck as his his wont: He'd just make crude doodles and let his assistants make the brilliant designs they saw in them.) And so on.
* Disney Mouse and Duck Comics made in Italy, it seems that every 5-6 years or so they have to write a story where some character becomes a pro golfer, with the only purpose being to explain every single golf-related term to the readers via footnotes.
* Disney Mouse and Duck Comics: Played with in a story where Mickey Mouse and Goofy are tied up and about to be thrown overboard from a boat so that they will drown. Goofy comes out with the gem "But I can't swim". Later, he and Mickey (having escaped their bonds thanks to some plot-handy sharp coral) are treading water calmly discussing their next move when Goofy suddenly starts panicking and Mickey asks what's wrong.
* Disney Mouse and Duck Comics (sometimes it's hinted that they've actually guessed each other's identity multiple times, only to forget through sheer denial).
* Disney Mouse and Duck Comics story where Mickey happens to appear identical to a king who needs surgery and is afraid that the power vacuum caused by even his brief absence could inspire his enemies to overthrow him. He's a good and fair king, so Mickey agrees to take his place for a while and does a surprisingly good job at it.
* Disney Mouse and Duck Comics. While he takes a bit to adjust to the current time, when he does, he finds it not too bad. Conquering the world is a lot more tempting when the known world is so much larger, and with modern technology, he can pinpoint midnight much more accurately, as well as exploit timezones to get a second chance when the first ritual fails.
* Disney Mouse and Duck Comics, who usually stick fairly strictly to codes of thieves' honor. In general, this involves things like not stealing from "colleagues", only making one's living through "honest" thievery and not selling out other criminals to the cops.
* Disney movies, and often associated with (or at least more explicitly mentioned by) the villains:
* Disney movies are oftentimes both dramatic and silly. Typically there's an overall dramatic and emotional plot line, but almost all movies feature wacky sidekick characters providing lots of comedic scenes in-between. However, they do tend to vary in the comedy and drama ratio.
* Disney movies do this a lot, often with the song being played in full once and then in instrumental snippets over other romantic scenes.
* Disney Networks (including ABC, Freeform, ESPN, Hulu and A&E Networks)
* Disney. Not surprisingly, computer technology and graphics have taken a giant leap backward by 2088. The future looks like it was designed by the same engineers who built EPCOT Center's Future World, which itself is becoming dated.
* Disney often calls upon this trope, particularly when Belle is placed in danger.
* Disney on Ice) incorporated ice skating into the traditional three-ring show.
* Disney on Ice line, which has been a multi-billion per-year idea since.
* Disney on what awaits any who dares to continue their raids. Tarkin's tactic worked brilliantly, as piracy in the area decreased significantly after that ruthless show.
* Disney other "unauthorized" use of their characters, for that matter; woe be a fan artist who makes a similar character to one of theirs, or any day care centers who have unapproved murals of their characters on their walls, as they have been known to file lawsuits against such "offenders". The sheer amount of Disney Rule 34 that still exists without incident suggests that at some point they finally

realized it was a lost cause.
* Disney owned the intellectual property rights of all of Pixar's franchises from
* Disney Owns This Frog; they can use old Kermit scenes but new ones are more complicated.) Interestingly, back in the second season, there were plans to phase Kermit out, as a commercial character, in favour of Sesame-exclusive characters like Herbert Birdsfoot. (Who? Exactly.)
* Disney Owns This Trope: When a company has ownership of something so specific or unexpected that it can make one ask, "Really? They own that?"
* Disney Parks are now using licensing with Universal's primary theme park competitor, Disney.
* Disney Parks, while the ride vehicle travels up and down on the track, Tigger is heard to say "I almost bounced right out of the ride!"
* Disney plays with this. It's a water park with a ski resort theme, despite central Florida lacking both mountains and snow.
* Disney presents a lifestyle choice with the steady home-building Kocuom, choice of her father (the Gentleman), and the native-killing foreigner John Smith (the Scoundrel). She does not end up with either, as Kocoum dies and John Smith must go back to England, but her choice lies with John.
* Disney Princess actually goes quite in depth on how they got their hands on the license, as well as some history involving the franchise.
* Disney Princess and Jasmine's merchandise sold considerably less than the white princesses'. A redesign in 2013 controversially lightened the skin tones of all the princesses of colour too.
* Disney Princess and they think they promote them at the expense of their other movies.
* Disney Princess. Another costume company, Forum Novelties, has their own Elsa costume knockoff which they call "Princess Krystal."
* Disney Princess being the youngest at fourteen). During the times the stories were set, it was more acceptable to marry young. Most post-2000s princesses are at least eighteen if they are married.
* Disney Princess but it's not something she's used to. Belle ends up drinking with Aurora as they talk. Afterwards, Belle escorts Aurora to her room however this leads to them sleeping together due to Aurora's fears of sleeping alone.
* Disney Princess: Enchanted Journey, Cinderella's world is stuck in time just before midnight.
* Disney Princess: Enchanted Journey, Clockwork Bogs slow everything and turn the screen green.
* Disney Princess: Enchanted Journey, Genie Bogs' mirages shatter trust in Jasmine's world.
* Disney Princess: Enchanted Journey, in the first chapter of Snow White's world, the Bogs taking color from the land has made the Dwarfs unable to work as a team.
* Disney Princess: Enchanted Journey. She's older than the heroine and an ex-princess who uses her magic for evil.
* Disney Princess: Enchanted Journey, the Bogs are actually captured butterflies that were forced into evil, and return to their natural state once defeated.
* Disney Princess: Enchanted Journey, the Bogs stop time in Cinderella's world just before midnight.
* Disney Princess: Enchanted Journey, this happens after the final battle with Zara.
* Disney Princess: Enchanted Journey, Zara's hair is styled into two points like princess hats, and those points have her hair spiraling to the top, where they taper off into two lengths of hair per point.
* Disney Princess Enchanted Tales: Follow Your Dreams that, as a princess, she was taught many languages.
* Disney Princess episodes added a content warning for "dialogue about potentially sensitive sexual circumstances" due to their jokes about the underage player character being molested by her therapist.
* Disney Princesses' dresses have fur, in the merch, website, and magazines, such as a set of winter merchandise in 2005 and 2006 which showed the princesses in

dresses trimmed with white fur, and carrying white fur muffs.
* Disney Princess. Her dolls almost always feature her in the pink dress she wore for the Matchmaker at the beginning of the movie. However, Mulan herself was uncomfortable in it and it represented a lifestyle she did not want. It doesn't stop her from looking stunning when the makeover is complete though.
* Disney Princess is thrown in as well. Of course, there is no real continuity involved — it's just a marketing thing.
* Disney Princess revolves around the girls staying together in a cabin. It's apparently normal for princes and princesses to have gender-segregated vacations together in order to prepare to take up the throne when they're older. However, these retreats apparently cause romance between the people, even the married ones.
* Disney Princess. She spent the first sixteen years of her life being called "Briar Rose", so her real name is foreign to her.
* Disney Princess, which essentially portrays the Princesses as toddlers.
* Disney produced a CG/hand-drawn animated hybrid movie that served as the pilot to the TV series
* Disney produced training videos, such as "Stop that Tank," which depicted the use and operation of the Boys Anti-tank rifle, created for the Canadian government. While meant for training purposes, it depicted Hitler as a baffoon, German tanks as toylike, and massively oversold the usefulness of antitank rifles (by the beginning of the war anti-tank rifles could only deal damage to some older light tanks, armored cars, and tankettes),
* Disney properties often functions as hired muscle for a smarter villain, like Sylvester Shyster, Eli Squinch, or Agent Von Weasel. In service to all three, he's shown easy willingness to try killing Mickey Mouse and his friends, with any weapon from rifles to propellers to his own fists.
* Disney+ proshot was released on July 3, 2020, the day before Independence Day.
* Disney rejected a couple of episodes because the animation quality was not up to par, sending the episodes back to be redone at their expense.
* Disney retelling, the soldiers of the Sheriff of Nottingham prove to be an evil example. One of them even manages to get an arrow through ol' Rob's hat ("they're getting better, you know")!
* Disney returned to being a top-rated TV show and best-selling toyline.
* Disney right about now. Unusually for an episodic show, every episode ended with a tally showing the viewer how many lives the duo had left to save. Some episodes had them saving multiple lives, in others they didn't get any. It probably would have taken them about 5 years worth of episodes to get to 100... if the show hadn't been canned.
* Disney's Aladdin has Iago, who makes trouble for our heroes in stealing their posessions, decieving them with fake voices, and acting as a sort of sentry before the final conflict. He even gives Jafar ideas about how to proceed (like suggesting that he try and usurp the throne).
* Disney's America, a theme park built on actual Civil War battle sites, several American historians teamed together to denounce the project. Disney reached out to one of them, James Oliver Horton, and offered him a position as advisor. To the surprise of many, he accepted. As he explained, if you tell someone, "what you're doing is wrong", and they respond by saying, "teach us how to do it right", and you refuse, you come off as hypocritical. While Horton's input did bring some small improvements, the project itself was already too poisonous to go anywhere and it was shelved.
* Disney's Animal Kingdom, and lastly a dragon cave that can be viewed along the long boardwalk from Pandora to Africa.
* Disney's Animal Kingdom, the fourth theme park of Walt Disney World, opened on April 22, 1998.
* Disney's Animated Storybook, there is a mahjong mini-game which you can play against Yao, Ling, or Chien-Po. If you choose to play against Chien-Po, he is so polite when you win that it seems like he loses on purpose.
* Disney's attractions around the world. Several paintings depict seemingly innocent scenes - a woman reclining on a couch, a ship at sea, a knight on a horse,

to name a few - that change to horrific versions when lightning flashes outside nearby windows - the woman becomes a snarling tiger, the ship rides through a storm with tattered sails, and the knight and horse become skeletons. There are also a few that were originally installed at Walt Disney World that had eyes that would follow the riders, but the moving-eye effect (as well as most of the portraits) seems to have been removed during a 2007 overhaul of the ride, leaving the paintings static (although still suitably creepy in their design).
* Disney's Beauty and the Beast falls prey to this trope in its sequel,
* Disney's Believe, Sophia believes in magic and fairies, while Dr. Greenaway is more focused on science and fertilizers—though, as Sophia notes, love is the real magic.
* Disney's Believe's princess medley. Dr. Greenaway sees Sophia all grown up with a prince of her own and comments on how beautiful she is, lamenting that he missed out on her childhood.
* Disney scenes as well as a brief live-action segment where Brian and Stewie are played by an actual dog and baby with their voices dubbed over.
* Disney School of Acting and Mime: Realistic, but hammy, body language.
* Disney School of Acting and Mime: The trope was and still is heavily used (and in the wrong hands, abused), even with all the ups and downs of Disney's reputation and influence throughout the years and the reputation of it sometimes being considered cliche and corny, but the origins of it have often lost its context as well—the trope drew its ham-like acting and broad gestures from vaudeville (a medium that is all but forgotten now) and silent film, which feature broad styles of acting that have long fallen out of favor in live action films and TV shows since the 70s (unless you want to be seen as an amateurish or ham actor). Animators used it then and still use it today simply because its easier to convey gestures that way than trying to make them realistic or subtle, which is usually difficult or even impossible to do in animation.
* Disney's classic short of "The Brave Little Tailor" features Mickey defeating the giant in exactly this way.
* Disney's Deep Canvas technology took rendered computerized backgrounds and rotoscoped digital coloring over them, making them appear hand-drawn. The technology was developed for the film
* Disney's Doug, a company that makes all sorts of products which malfunction and fail on purpose just to annoy their users as much as possible.
* Disney's Doug), Doug is shown an "informative" film laced with these. Of course, they're just long enough to be noticed and read by the real-life audience; it even cuts to a separate music cue.
* Disney's early full-length movies started out as vague ideas. "Story Men" were then responsible for thinking up sequences that would fit into the narrative and direct storyboard artists to map out their ideas, throwing in the occasional twist, in advance of pitch meetings where
* Disney's EPCOT Center (you read that right) once had an attraction called
* Disney sequels that are obviously compilation films of never-made TV shows.
* Disney's Expedition Everest starts out as a fairly simple ride... until about 1 minute in and the track appears to be torn into tiny pieces. The ride then sends you spiraling down a pitch-black tunnel. Backwards! After another minute, you come across a 20 foot yeti that tries to tear your head off... before around 2007. The animatronic got damaged and can only use the strobe light, and the only way to repair it is to tear the whole ride down.
* Disney's Extreme Skate Adventure. Here's a few of Zurg's moves, word for word:
* Disney's Extreme Skate Adventure. While a lot of mechanics are toned down for younger players, the basic gameplay and level design remain more-or-less the same.
* Disney's first wartime cartoons were actually made before the US joined the war: four public service announcements for the National Film Board of Canada, making use of reused footage from Disney cartoons of the past. They are:
* Disney's Haunted Mansion ride includes a spooky séance presided by the ghostly medium Madame Leota. In
* Disney's Hollywood (ne MGM) Studios than the normal acceleration it would

experience in free-fall. Appropriately enough, many agree that this is one of Disney World's most intense thrill rides.
* Disney's Hollywood Studios films...who have green mesh over their face, probably not scaring any children at all.
* Disney short "All the Cats Join In", with its jazz soundtrack produced by Benny Goodman, features teens partying in a malt shop, doing swing dancing as a jukebox plays.
* Disney short "Mickey's Birthday Party", Minnie's oven goes all the way up to "volcano heat." Goofy uses the setting to speed up baking the cake with explosive results.
* Disney shorts aren't so well known for this kind of thing, but when they get weird, they get
* Disney+ short "The Last of the Chupacabras" tells the story of a chupacabra marionette belonging to an elderly Mexican woman coming to life and becoming her pet.
* Disney short to steal a large bone from a lion. He runs from habitat to habitat with the bone, getting into wacky hijinks with a mischievous kangaroo joey, a scary-looking but playful gorilla and a bunch of hungry crocodiles.
* Disney+ shows are the Disney+ productions with the biggest budgets as well as those with the most massive amounts of hype.
* Disney shows that she's a girl when her head wrap is pulled off to reveal... really short hair, but a suddenly more girlish face.
* Disney shows up to beat the brothers into submission when they voice a desire to live like normal teenagers.
* Disney side would be virtually indistinguishable from their respective beaus if it weren't for the lashes, hair bows, heels and skirts. In an interesting footnote, Minnie seemed to favor going topless, while Daisy's skirt barely covers her bare bottom. Not that there's anything there to hide, but...
* Disney Sing-Along Songs during random intervals, softening the mood of the song.
* Disney Sing-Along Songs videos were composed almost entirely of stock footage of mostly-forgotten shorts overdubbed with new voice work, up to and including the iconic opening theme.
* Disney's "It's A Small World" was and is an appeal to everyone's shared humanity. While the various stereotypical attributes (folk costume, etc.) of the animatronics in the ride haven't aged well (mostly because only the most traditional societies still wear such garb on an everyday basis), it's still
* Disney's library is huge, and almost all of their back catalogue was made available on the service day one. Other companies tried to copy this by dumping everything they could all at once, but none of them were nearly as big. That being said, however, said services also used other tactics to entice viewers into subscribing, such as Peacock being free with very little locked behind a paywall, or HBO Max being included with cable subscriptions to HBO.
* Disney's live-action remakes of animated films managed to provide justificacions for two of the cases in the "Animated" section:
* Disney's Magical Quest. He receives it from a blacksmith along with knight's armor and a shield.
* Disney's Magical Quest: In the first game, one of the outfits Mickey or Minnie obtains is a firefighter outfit, which uses the hose as a weapon, along with the utility of pushing blocks into better positions.
* Disney's Math Quest with Aladdin, the Wizard Pharaoh Very Ankh-Amman appears as a ghostly mummy head with a different color scheme each time you meet him.
* Disney Smee gets emotional, as he lifts up his shirt — and displays the "Mother" tattoo.
* Disney's moment where he contemplates killing the deformed baby Quasimodo. Sadly, he’s not around for the rest of the film where Frollo does things that are arguably even worse than that.
* Disney's most intriguing contrast comes from a studio under their own umbrella:
* Disney, so as soon as a Jewish character shows up, he is promptly ripped to shreds by everyone else present.

* Disney's One Saturday Morning was originally going to premiere on September 6, 1997, but due to ABC covering Princess Diana's funeral, the premiere date was moved to the following week.
* Disney Sorcerer's Arena animation in the character roster starts with him facing away from you, before his head does a sudden 180 degree spin to face you with a scare chord.
* Disney's Pinocchio. He takes great pleasure in turning innocent children, such as "The Stupid Little Boys" into donkeys, enjoying their pain with whipping them, and also selling them into slavery.
* Disney's Revival Era, and very little can be said about those characters without blatantly giving away the films' major plot twists.
* Disney's RocketMan are dancing. The Commander disengages the gravity, and they're shown dancing on a wall and on the ceiling, which isn't how weightlessness works.
* Disney's RocketMan: Fred meets Bud Nesbitt this way when he accidentally slams open a door into the latter carrying papers.
* Disney's RocketMan: In his first meeting with Julie, Fred can barely spit out his full name while awkwardly trying to introduce himself.
* Disney's RocketMan: Randall trades oxygen packs with Ulysses to give buy time for them to get back to the lander. Justified in that he just set a record for lung capacity, but he still nearly asphyxiates, and Overbeck lampshades the danger.
* Disney's takes this to the extreme, with a 70/30 blend of 18th-century ships combined with technology. It works quite well.
* Disney's Tarzan. This one's justified since male gorillas really are much bigger than the females.
* Disney's The Hunchback Of Notre Dame on his face after he sets fire to the platform Esmeralda is on when he tries to burn her at the stake. Also note his glee in witnessing a prisoner being tortured in the Palace of Justice.
* Disney's, the imps stole "the most sacred crock of cheese" from the Odiferians (cheese loving barbarians) and framed Agrabah for the theft. The angry Odiferians declared war on Agrabah and the imps made a fortune selling war machines to both sides until Aladdin and the gang uncovered the whole scheme.
* Disney's The Reboot, one of the potential reboots the show gets includes Chris married to Tricia Takanawa and living together. The "reboot" begins with the theme song, with only Chris, Joe and Bonnie making appearances and Chris singing his lines.
* Disney storybook "Goofy's Big Race" had Donald challenge Goofy to a race. While Donald has a spiffy sports car, he wastes his time doing other things as he thinks Goofy's old jalopy won't catch up. However Goofy ends up winning because he kept his focus on the race despite being the slow one.
* Disney storyman Winston Hibler became the narrator of the studio's
* Disney Sunday (consists of a Disney show paired with a short originally created for Disney Junior. Before it was named Disney Sunday, it was called Disney Time and aired on Tuesday mornings.)
* Disney's United Kingdom branch would follow New Zealand's lead and shut down
* Disney's Villains' Revenge fame) actually gets beheaded and you have to travel a maze to find her head.
* Disney's War — A Crossover Story has the Book of Legends, in which every single Disney story has been written down by Yen Sid. It's a cataclysm, of course, when the Horned King gets hold of it and decides to use this newly-acquired knowledge about worlds other than his to revive every villain and recruit them as his personal army.
* Disney's War — A Crossover Story he is, he convinced her everybody'd be better off if she willingly became a Madwoman In The Attic, so she jails herself in a cell hidden in her palace while Hans rules. What she doesn't know is that Hans took advantage of the situation to claim Elsa was dead and seize the throne, and that even if she wanted to escape Hans wouldn't allow it. Merida, however, finds Elsa and tells her the truth, and Elsa promptly frees herself (she could have anytime, she just didn't know there was a need to do so).
* Disney's War — A Crossover Story pretty much proves that the Master of

Worlds was not so well-intentioned.
* Disney's will focus on Mirabel, the only child in the Madrigal family who doesn't have magical powers.
* Disney's Wonderful World of Knowledge. As balloons were covered, one humorous illustration shows an anxious Pete begging a bird not to pop his hot-air balloon.
* Disney's Young People's Guide to Music: A Tune for a Toon asks to give conducting the orchestra a try, claiming he knows what to do — "wave the stick!". When he demonstrates (using a stick much larger than the conductor's baton), the orchestra deliberately responds with tuneless random noises. The real conductor then explains how it's done.
* Disney taught to children, Hitler is shown as a buffoonish fairy tale hero. Yes, this film is so grim, they can use Hitler as comedy relief.
* Disney Television Animation regained prominence when, after years of
* Disney that Ursula strings them on, the long pan down the hallway into Ursula's lair is horror.)
* Disney Theatricals has several blockbuster Broadway musicals to its credit, and they tend to do well internationally – but across
* Disney the fact that the audience is probably gone by now by wondering out loud if anybody's listening.
* Disney Theme Parks ABC Soundstage attraction "Sounds Dangerous" simulates Drew Carey getting one of these with audio.
* Disney Theme Parks. A film based on the Magic Kingdom by Jon Favreau is in the works as well.
* Disney Theme Parks), and Figment (Epcot's imagination-based pavillion).
* Disney Theme Parks and, more or less, stick with a Raygun Gothic aesthetic.
* Disney Theme Parks. An odd case, since the original version of the ride didn't have any story, as such.
* Disney Theme Parks are famous for going all-out with special seasonal entertainment, but year-round attractions getting Christmas-specific overlays include:
* Disney Theme Parks are not immune to attempting this. Just about every addition and/or change that Disney has ever made to the parks involving contemporary IPs (even if it's one of their own) has provoked accusations of this from hardcore old-school fans. Although they're not entirely wrong because there has indeed been more than a few times where they were guilty of this trope...
* Disney Theme Parks are painstakingly worked on to appear genuinely ancient or old. Like the Tower of Terror.
* Disney Theme Parks are probably the most popular vacation destination for Japanese tourists.
* Disney Theme Parks as a Frankenstein monster seem to be the most common.
* Disney Theme Parks at Disneyland were real (arguably adding to their creepiness if you knew this), as replica skeletons at the time were not advanced enough to look realistic and old. They were obtained from a medical center and later received burials, with replicas taking their place in the ride. Supposedly, one real human skull still exists in the ride (attached to the headboard, above the skeletal pirate captain, in the grotto sequence), but Disney will neither confirm nor deny this.
* Disney Theme Parks. At the entrance to Toontown in Disneyland, there's a population counter which is constantly cycling through numbers...and screws, stars, dumbbells, TNT, and various other random things.
* Disney Theme Parks doing the Macarena and dancing to "I Love Rock and Roll", among other things.
* Disney Theme Parks (even hiring designers who'd worked on them) to recreate Biblical times and places, primarily focusing on the ministry of Christ. Initially the main draws were live shows (passion plays, etc.) and opportunities to interact with performers who play Christ, his disciples, etc., but as of 2020 these were eliminated in favor of the established walk-through exhibits.
* Disney Theme Parks get warmer outfits in winter. The collars and cuffs are trimmed with white fur, and Belle wears a short white fur cape.

* Disney Theme Parks go down, though it likely was a lot worse when the park opened (think songs like "It's Fun to Be Free", "Making Memories", "Tomorrow's Child", etc.).
* Disney Theme Parks) has a backstory involving murder and even suicide, but it's still a pretty light-hearted family adventure movie.
* Disney Theme Parks has a mock-up of the Hollywood sign, as white letters spelling "Toon Town" are placed on the surrounding "hills".
* Disney Theme Parks has virtually nothing to do with the theme of the park section the ride is located in). Various online petitions attempted to avert the re-theme, but Disney simply ignored them and officially set its closure for January 2017.
* Disney Theme Parks have interesting anniversary promotions for whenever a park reaches the 10th, 25th, etc. anniversary of its opening day, usually debuting new attractions in the parks, new/updated shows and parades, and usually a large gimmick. Examples:
* Disney Theme Parks have labeled some attractions with a black and yellow exclamation point, indicating that they may be frightening for children.
* Disney Theme Parks, however, states that the ghosts there are trapped within the hotel permanently. Finally, the Phantom Manor contains a malevolent ghost tormenting a bride in old age. In one of the very few cases of ghosts appearing, Universal Orlando's Halloween Horror Nights 2010 features two houses involving ghosts: Legendary Truth: The Wyandot Estate, which is about ghost hunters purposely trying to gather the spirits murdered in a house in Ohio and getting more than they bargained for, and Psychoscarepy: Echos of Shadybrook, which has you traveling through the Shadybrook Asylum of past horror events 15 years after closing and facing the restless spirits of the patients.
* Disney Theme Parks in Main Street, USA - a small town based on Walt's childhood in Missouri).
* Disney Theme Parks in place so that immersion/story flow can continue without issue.
* Disney Theme Parks) or based on a Disney property. However, there are some exceptions:
* Disney Theme Parks playing one in the Tales of Terror sequence. In keeping with this scene's literature theme, it's not actually an organ, but rather an appropriately-themed giant typewriter or computer, which releases different letters and numbers when played.
* Disney Theme Parks premiered, at which point the attraction was renamed after the movie.
* Disney Theme Parks prior to being redesigned in 1995 (to better reflect with his animated counterpart).
* Disney Theme Parks rocket, originally designed back in the 50's as a vision of future Trans World Airlines (TWA) travel. It was later sponsored by Douglas before being removed for renovations in 1967, but there are three smaller scale models of it extant today-one at the national airline history museum, one on the old TWA building, and one in the Magic Kingdom's Tomorrowland now helping promote Coca-Cola.
* Disney Theme Parks Similar to the aforementioned Window of the World, there is Epcot's World Showcase, which features eleven pavilions, each representing the culture of one different country. And then there's Disney's California-themed park...in California. It was not well received.
* Disney Theme Parks sometimes get these — attractions that weren't the focus of giant marketing campaigns, but then the word-of-mouth kicked in.
* Disney Theme Parks start their Christmas festivities at the start of November and begin putting up Christmas decorations towards the end of October.
* Disney Theme Parks that entire books have been written on the subject of finding them all. The so-called Hidden Mickeys are inconspicuous images of Mickey Mouse or his silhouette placed in various unexpected locations around the parks. It is also very common, when one attraction is closed and replaced with another, for the Imagineers to include an unobtrusive tribute to the old attraction in the new one.
* Disney Theme Parks that were supposed to be the narrator. They also include

remnants of attractions that have long been demolished (the Magic Kingdom Skyway's terminals weren't demolished until over a decade after the ride closed, the Tomorrowland station was razed during Space Mountain's 2009 refurbishment and the Fantasyland station was used for stroller parking until it was razed for an expansion of Fantasyland).
* Disney Theme Parks. The fact that people can meet-and-greet some of the most evil Disney characters is mind-boggling to say the least.
* Disney Theme Parks, when not poking fun at themselves and their ride, will occasionally take shots at the rest of the park.
* Disney Theme Parks, where a real-life Cast Member plays the role of the poor fool who tries to take it.
* Disney Theme Parks, who apparently dies after being hit by a train during his escape from prison, and actually goes to Hell!
* Disney Theme Parks with another in development hell, a video game, multiple comic mini-series, and several books.
* Disney Theme Parks with a welding mask and a fluorescent tube as a lightsaber. After he knocks stuff over, the disclaimer reads "Use the Force responsibly."
* Disney. Then later, he tosses another of his pirates overboard, for speculating about "no splash?!" after Wendy walks the plank.
* Disney the Prince, is very confused. It's not quite clear if Cinderella is just throwing out excuses in order to get away before the spell breaks, or if she honestly doesn't realize she's been dancing with the Prince all night.
* Disney the whole time, to the point that this twist can become predictable after a while. Examples include:
* Disney, they had Club Disney during the 80's and 90's, while its rival Venevisión had El Club de Los Tigritos. Both shows were phased out around early 00's, though Venevisión still has cartoon hosts presenting cartoon hosts, but nothing else.
* Disney this entire story is replaced with one in which Rapunzel has magical hair derived from a flower that was given to her sick mother. There is no rampion whatsoever, and Rapunzel is just the really strange name that her birth parents give her.
* Disney to join the police in lieu of prison time, the judge's reasoning being that multiple prison sentences had failed to change his behaviour so it was time to try and make him experience how it was being on the other side of the law.
* DisneyToon Studios'. However, John Lasseter is the executive producer of the film and is responsible for the concept.
* Disneytoon Studios. They commend the studio for at least trying to expand the originals and stay hand-drawn animated instead of rehashing them in a different medium for a nostalgic cash-grab. And they were the last remnants of the hand-drawn animation that Walt Disney himself has built upon.
* Disneytoon Studios were a clear downgrade from the company's mainstream works, with almost television episode level quality and budget. As the studio was reworked and animation transitioned to digital however, a lot of projects became far more polished and better at replicating the original films.
* Disney to save his life, and then watched him dump her for another girl, leaving her to serve Hades for some number of years. She ends up following the "learn to love again" angle.
* Disney trailer. And the lyrics (or anything beyond the initial "bum-bum-bum, bum-bum-bum-ba-bum"s) are virtually forgotten.
* Disney tried to stop the release of a 1986 Filmation animated film,
* Disney TV series, Evil Manta used this trick and got released by Ariel. Another monster unsuccessfully tried this after making Triton a child.
* Disney Villain Death he explains that he saved her, as she was working for him at the time. The difference being that the original game had two different ways for Ada to "die", and the other one looked more survivable.
* Disney Villain Island responds by stating that "If the rat ain't eating it, I sure as Tartarus ain't eatin' it.
* Disney Villains. Most animated Disney films that failed at the box office will

inevitably become this.
* Disney villains, though it has also been given to some non-villanous characters.
* Disney war short sees through the boys' ruse of an attack, he rips off their chevrons and destroys their (wooden) swords. Then, when he (again falsely) believes he's under attack (and makes sure that it wasn't the boys this time), he sews the chevrons back on and gives them new swords. Near the end, as Donald orders the boys' to fire the cannon, not knowing it's pointing straight at him, one of the boys, knowing the inevitable, rips off his chevron himself before firing.
* Disney was very old-fashioned and conservative as in the case of his immediate successors, and thus, the studio was always a step or two behind the rest of Hollywood until the arrival of Michael Eisner.
* Disney when a de-powered Herc goes to take on the rampaging Titans by himself. Megara tells him he'll be killed; his despondent reply is to tell her: "There are worse things."
* Disney when Prince John enters the room. Hiss immediately starts singing lyrics praising PJ before the Sheriff corrects him ("... the sniveling, groveling —"). PJ throws a wine bottle at him.
* Disney) When the good guys ride it later on, they finish dressed in the definitely non-fitting outfits of the bad guys.
* Disney, where these powers were highly plot important, the Rangers would generally completely forget they had these powers for a dozen episodes at a time.
* Disney, which aired circa 1968 on "Walt Disney Presents", was banned because the government didn't like the portrayal of the Tory/Loyalist characters as complete villains. Ironically, Canada is the home of the series' star, Leslie Nielsen.
* Disney, which became a major threat for Disney's place in the Orlando theme park market in the years that followed.
* Disney+, which Disney acquired a 60% ownership in following their purchase of Fox), as it does not carry any R-rated content. It is averted internationally, however, as their Star section features R-rated content.
* Disney+, which due to a pandemic was relegated to the streaming service, with the added burden that few countries still had movie theaters open.
* Disney, which is otherwise considered to be one of Disney's more forgettable early films.
* Disney, which ran for 4 years on Broadway and is still running in London.
* Disney which while form-fitting, covered everything. Even came with a shawl. The iconic outfit she wore in the first movie was her summer outfit.
* Disney who gets into trouble (while Mickey and Goofy are portrayed as more collegial, in spite of similar blundering from Goofy), and he's often invoked as the sourpuss and unlikable one. Outside Disney's corporate brand image politics, however, Donald is easily more popular and beloved than Mickey Mouse and Goofy, a character who has been reinterpreted time and time again for multiple generations, and who still finds new audiences around the world. He's a far more consistent and in-demand moneymaker than Mickey and Goofy ever were.
* Disney who happens to be Walt Disney's earliest character before Mickey became his newest flagship, his main motivation in the game is to take out Mickey and take his place. By then Oswald's prominence resurged once again, and he is then featured in newer Disney works.
* Disneyworld in Florida is actually built above ground level. This is hidden by the terrain design. Underneath the park are passageways to allow employees to easily get from one part of the park to another more quickly than through the park itself. Contrary to rumor, Disneyland in California does not have underground tunnels, as the idea for them only occurred after construction of the park was finished, and tunneling underneath a theme park was deemed a very dumb idea. Knowing they wanted tunnels for their next park, but discovering the ground in Florida was water-logged to dig into, they built Disneyworld on the "second floor," with the tunnels actually being at ground level.
* Disney World kept guests at the hotels relatively calm and occupied in the aftermath.
* Disney World of War means even rooting for Disney protagonists is hard.

Fortunately, however, the personalities of the Disney characters saves this somewhat as they still can be the characters everyone knows and loves in the brief moments of levity.
* Disney would release their animated films in theaters every seven years (1937) in 1944. Walt Disney thought that after seven years, there would be a new crop of viewers who hadn't seen the earlier release. This way, Disney reasoned, it would refresh the movies to a new generation of viewers. This was considered such holy writ that, when then-CEO Michael Eisner looked to release Disney movies to the VHS market in a desperate attempt to save the company, there was more than the usual amount of teeth-gnashing and doomsaying over how he was selling the farm and no one would ever buy Disney products again.
* Disney) writing to his fiancée about where he's been, and why he missed their wedding. It closes with him finishing the letter.
* Disney XD Australia ended with a back-to-back airing of the entire
* Disney XD broadcast cuts them out (which is probably true for a lot of anime aired in countries with more commercial time per episode).
* Disney XD ceased to exist in Australia on January 6, 2019. In November of the same year, Foxtel Movies Disney was also ended due to a combination of low ratings (outside of Disney Channel's
* Disney XD" during the scene where Li'l Gideon has the Pines twins shrunk, making it look like Gideon shrunk Spider-Man.
* Disney XD, since both of those cartoons were already based on comic books.
* Disney XD. The series returned in 2020, but still with minuscule promotion before it was pulled once again in August of the same year.
* Disney XD, using the same voice cast as the regular Japanese version. It's a bilingual broadcast, meaning the viewer can switch to the English track if they want in an aid to help Japanese kids learn English.
* Disney XD was created as a male-targeted counterpart for Disney Channel. Of course, there's a cast of good looking male actors, such as Hutch Dano, Logan Miller, Billy Unger, and Spencer Boldman.
* Disney XD was quietly cancelled after a long hiatus due to Disney not being interested in it anymore.
* Disney XD, which outright tells you they're both extreme and 'wit it', as the XD part is an "extreme!" emoticon denoting extreme happiness.
* Disney XD, with the Scandinavian and Japanese feeds following suit in December 2020 and January 2021 respectively. Also of note is the African feed of Disney XD, which followed the UK's feed and shut down on 30 September 2020 at 23:59.
* Disobedience is about a London woman who returns home after she was shunned when she was younger for being attracted to a female friend.
* Disobey This Message: Don't believe the same dumbass things as everyone around you! Form your own, more intelligent beliefs that look more like ours!
* "Disorder in the Court" introduces a gun as evidence. Curly is told to try to pull the incredibly rusty trigger, after being told "
* disorganised mob the orc army uses formations and is shown acting under the control of officers. Gothmog in particular is good at forming an organized attack, opening with an artillery barrage to soften the defenses, aerial superiority in the Nazgul to neutralize the enemy artillery in short order, bringing up heavy siege equipment to breach the gate and towers to swarm the walls, forming a new line to meet a cavalry charge on his right flank, and calling in Haradrim reinforcements to meet the enemy cavalry while tactically retreating his orcs until Rohan's forces could be defeated. The only reason he lost the battle was an undead ghost army that he couldn't have reasonably seen coming.
* Disorganized Outline Speech..." "...and nice red uniforms — oh, bugger."
* Disorienuptials announcement - that there will be pudding at dinner.
* Disowned Adaptation: The creator of the original work dislikes the adaptaiton.
* Disowned Adaptation: The creator of the original work dislikes the adaptation.
* Disowned Adaptation: The creator of the original work does not like the adaptation.
* disowned. He also took part in the movie's promotion in China, its best-

performing market.
* Disparaging example phrasing: whenever they show up. Nobody is going to weep if you remove them.
* Dispatch/Courier Boat: Basically a shell wrapped around a hyperdrive, with a bridge, a few spare rooms, and not much else, these tiny ships are designed to get from point A to point B as quickly as possible and ride the upper limit of the "hyper bands" that allow FTL travel in the Honorverse. They are used by the navies of all major powers to coordinate their forces and, later on, to coordinate with each other's governments.
* Dispatches From Elsewhere, and he's not above trying to break the game's apparent "rules" in order to gain more information.
* Dispatches From Elsewhere fictionalizes a real ARG that took place in San Francisco from 2008 to 2011.
* Dispatches From Elsewhere: Simone is played by Eve Lindley, who's transgender like her.
* Dispatches, like trying to take the glamour out of sex. Oh man, trying to take the fucking glamour out of fucking war."
* Dispater, one of the Archdukes of Hell, is paranoid and cautious in the extreme. He never leaves his impenetrable fortress, has both halves of his court spying on each other, and even the way he fights is more defense then offense. The thing is, in Hell
* Dispater, the archdevil who rules the Second Layer of Hell, can even turn people to iron; he also has a power that instantly rusts metal, and likes to render his enemies
* Dispelled adventure path is mentioned to have undergone gender reassignment with the potion.
* dispels the hatred felt towards her with a highly remorseful apology speech during her failed execution.
* Dispepsi, but it's quite a good listen." This came as a relief to Negativland who were afraid that Pepsi would sue them as the album samples a lot of Pepsi commercials and constantly repeats the brands name.
* Displaced, Batman doesn't let it on, but he empathizes better with Spider-Man after being told that Spidey's father figure was gunned down by a crook.
* Displaced by European encroachment and incessant warfare with rival tribes, the allied Ngāti Mutunga and Ngāti Tama Maori invaded the Chatham Islands. There, they murdered hundreds of the native Moriori (who were pacifists and infamously refused to fight back), and enslaved the survivors. After decades of enslavement, the Moriori were so assimilated into the Maoris, that they ceased to be an independent ethnicity altogether.
* Displaced Origin: The original premise of a character or story is forgotten or modified into something completely different.
* Displaced so Klarion would steal the ring's power. So he takes it off and uses his pistol to fight him off.
* Displaced: Spider-Man's arrival in Gotham City and his meddling with a Joker's heist accidentally causes an unprecedented gang war all across Gotham.
* "Displaced": The crew is abducted one by one, forcing everyone else to pick up the slack. Suddenly a
* Displaced, the Joker pulls out a Tommy gun "from absolutely nowhere".
* Displacer beasts are six-legged panthers with tentacles on their shoulders.
* Displacer Glove, or Pushy if you're feeling ambitious. You'll get some nice scattering, and can easily uppercut someone's head off, or sometimes even reduce their whole body to so many meatballs travelling at high speeds towards the nearest wall.
* Displacer Shields (Imperial), which aren't quite shields in the usual sense; they attempt to detect incoming attacks and
* displays Italy's moe characters. No wonder Germany and Japan are head-over-heels for him.
* Disposable Fiancé (1937) is described as "a Park Avenue cluck with the longest yacht and the shortest chin ever christened."

* Disposable Fiancé character whose role is to get dumped by the lead.
* Disposable Fiancé = "fiancé" (engaged, to be married) is a French word originally
* Disposable Fiancé, who gets dumped to make way for the main character and love interest getting together.
* Disposable Heroes Of Hiphoprisy song, "Satanic Reverses" has a line:
* Disposable Intern: The intern is so unimportant killing them doesn't matter.
* Disposable Intern: The purpose of an intern is for the company to have someone they can risk losing.
* Disposable Love Interest: A character's established love interest disappears between the first movie and the sequel.
* Disposable Pilot: Passengers of a vehicle are imperiled when the driver gets killed. Especially bad when no one else has a license or is otherwise unable to drive.
* Disposable Sex Worker: Audience sympathy for a casualty victim is ruled out by making the victim a prostitute.
* Disposable Sex Worker: If you are a male prostitute, don't expect a happy ending.
* Disposable Sex Worker: prostitutes double as convenient murder victims.
* Disposable Superhero Maker: A freak accident that gives someone superpowers cannot be replicated.
* Disposable Vagrant: It's considered okay to kidnap or kill homeless people because no one would notice or care about them missing.
* Disposable Vagrant: Most people don't really notice or care about what happens to homeless people, which makes them easy targets for kidnappers and murderers.
* Disposable Vagrant: Not many people will notice or care what happens to homeless people, so it's considered okay to kidnap or kill them.
* disposable version of Power Copying, by stealing spells directly from other spellcasters' minds.
* Disposable Woman: Her only purpose is to be killed off, preferably in a gruesome manner, so a male character can avenge her to prove his manliness.
* Disposable Woman, though plain old bad writing is sometimes to blame.
* Disposing of a Body: Hiding the bodies of murder victims to avoid getting in trouble for their deaths.
* Disposing of a Body: The killer tries to avoid getting in trouble by getting rid of their victim's corpse.
* Disproportionate Celebration: Characters celebrate over minor achievements.
* Disproportionate Restitution: A means of apology doesn't come close to making up for what the person has done.
* Disproportionate Restitution: Compensation far less than what is deserved.
* Disproportionate Restitution: Compensation that's far less than what is deserved.
* Disproportionate Restitution: Here, I'm compensating you to make up for my past actions... what the hell do you mean, it's not enough? How ungrateful can you be?!
* Disproportionate Restitution: Someone tries to make up for their misdeeds, but their good deed doesn't even come close to making amends for what they did before.
* Disproportionate Retribution: According to Aristotle, the protagonist must be punished for an error, but with the punishment spectacularly exceeding the crime.
* Disproportionate Retribution and, while taking some decent shots at everyone, hits Snips and Snails with more than what she hits the rest of the town combined with.
* Disproportionate Retribution: An excessive punishment for a minor slight.
* Disproportionate Retribution: A punishment that exceeds the offense.
* Disproportionate Retribution, because reckless driving can be punished by a whole year in jail and a $5000 fine. This results in situations where people got into accidents that only involved their vehicle, were not their fault, and then went to jail for it and got a permanent criminal record.
* Disproportionate Retribution, becoming increasingly less sympathetic in the process. A later episode reveals that Calisto, who has time traveled to the day her parents died, is the one who killed her parents and left her younger self to die. Note that none of this reduces her hate for Xena, showing that she doesn't even

care at this point.
* Disproportionate Retribution, Clyde Shelton confesses to a murder because he wants to be imprisoned.
* Disproportionate Retribution either way) in the books, he did it to protect someone else, whereas in the show he's just putting his own happiness above keeping his word.
* Disproportionate Retribution, expressing any kind of sympathy for a convict will more than likely get you labelled as an apologist or a criminal yourself, even if you clearly say that they should still be punished and their crimes aren't excusable.
* Disproportionate Retribution: How dare you upset me with a minor mistake! I will get my vengeance on you for that!
* Disproportionate Retribution: I'm getting revenge on you over the pettiest shit!
* Disproportionate Retribution. In one issue, a woman who is otherwise portrayed as a kind and loving mother is shown taking a wooden spoon to her teenage daughters for joining Harley's gang. Subverted a few issues later when Harley advises a client against beating her rebellious daughter, reasoning that "a good old-fashioned beating" would only alienate her further in her current state.
* Disproportionate Retribution is understandably banned in many places, and his worshippers frequently end up working as torturers or executioners when it isn't.
* Disproportionate Retribution, Kai did have a legit reason to be angry with Nox.
* Disproportionate Retribution, one of the offenders is a woman who violates the express lane limit, along with other things such as arguing over coupons and sending her husband to retrieve an item she forgot.
* Disproportionate Retribution page or we'll put your fingers through a meat grinder.
* Disproportionate Retribution: Responding to a slight by retaliating in a way that's rather drastic in comparison to how bad the offense truly was.
* Disproportionate Retribution: Someone gets an overly harsh punishment for a minor slight.
* Disproportionate Retribution: Someone reacts to a slight with retaliation that comes off as harsh in comparison to how bad the offense truly was.
* Disproportionate Retribution thinking everything is about her and ties back to her. So even on a more general level, Cersei is truly incapable of placing anyone's interest before her own.
* Disproportionate Retribution: We have the right to hand out extreme punishments for the tiniest offense!
* Disproportionate Retribution: When King Gilgamesh declined to sleep with Inanna/Ishtar, the goddess sent the Bull of Heaven to terrorize a whole city of his innocent subjects.
* Disproportionate Retribution with them, but when other people criticize her she either ignores their accusations or takes offense.
* Disproportionate Retribution: You're going to suffer, and we don't care how insignificant your offense may be!
* Disproportionate Reward: A minor or major act of kindness is reacted to in this way.
* Disproportionate Reward: Being rewarded excessively for a minor act of kindness.
* Disproportionate Reward: Thanking someone in a much greater extent than needed.
* Disproportionate Reward: The reward is much greater than the action that the receiver did.
* disprove psychic surgery. Likewise, faith healers have been caught using stooges in the audience and similar simple trickery.
* disprove their theory (e.g ask "does 5/7/9 fit?") yet not one person involved thought to do this.
* Disputation of the Holy Sacrament represents the science of theology by showing the greatest Hebrew and Christian saints fondly regarding the clergy of the time debating around the Holy Eucharist.
* Disqualification-Induced Victory: HA! They got disqualified! That means I automatically win!

* Disqualification-Induced Victory: The person who actually won gets disqualified, which causes the next ranking participant to win by default.
* Disraeli might be busy with stuff like being the Prime Minister of the United Kingdom and running both that nation and the vast British Empire, but that doesn't mean that he doesn't have time to fix things after a young lady admirer of his rejects her boyfriends clumsy, hamhanded marriage proposal. His wife even calls him a matchmaker.
* Dis Raps For Hire in response to a quartet of people mocking a victim's dyslexia.
* Dis Raps For Hire targets Diamond, a school bully who was 16 years old at the time but still in K-8 school:
* disregarded his compatriot's calls for help and fled, while O'Mahoney pursued the third knife-wielding robber to his girlfriend's new car, which he had purchased just the day before. In order to prevent it from being stolen, he bashed in the driver's side window in with a crowbar, then began punching the still-armed robber in the face, all of which encouraged the crook to escape through the passenger side door. Then the neighbors came out to see what the ruckus was about, at which point L.Cpl O'Mahoney realized that he was also naked. O'Mahoney mentioned on the news that he slept naked, and hadn't thought to even throw on shorts during the whole ordeal, so chances are that none of the robbers wanted to deal with the terrifying notion of a screaming, angry, butt-naked soldier armed with a crowbar who'd already punched them in the face.
* Disregarded out of necessity in the Icelandic film Útlaginn, which is based on Gísla saga Súrssonar. A common complaint among foreign viewers is that the characters more or less look alike and bear similar names. "Just when you've distinguished one character from another, he gets killed."
* Disregard That Statement of these can lead to a successful appeal for allowing a jury to become unduly prejudiced, since asking or making an extremely loaded or leading question or statement simply cannot be unheard by a jury. As a rule, the sort of things that get said in fiction would get most lawyers in a world of hurt.
* Disrupting The Theater: Misbehaving in a theater to the chagrin of the other moviegoers.
* Disrupting The Theater: Screw you guys, I'm not staying quiet in the theater!
* Disruptive gimmick spells, such as casting invisibility on a player's uniform to make her appear nude (the affected player was angered rather than embarrassed, but still lost ground for her team when venting that anger incurred an unnecessary roughness penalty).
* Disruptive Mood Dysregulation Disorder, a controversial addition in which children are highly irritable and repeatedly have severe temper tantrums
* Dissected (and arguably deconstructed) by the Writerium (and its successor the Writer's Workshop).
* Dissension Remorse: Characters feel remorse for fighting with each other.
* Dissension Remorse: Friends feel remorse for fighting with each other.
* Dissension Remorse: Two or more characters feel bad over their in-fighting.
* Dissident intellectuals in 1922 are made to leave the Soviet Union for good, on pain of death if they ever return. Their only other choice is
* dissidents and Quark (who's helping them escape Cardassia), he does admit to Quark that he has to carry out the verdict of the Central Command even if it's against his better judgement to follow those orders. Subverted in that he eventually makes the decision to defy the Central Command and help the dissidents escape. Possibly double-subverted, as Garak's only explanation for doing this is that he 'loves Cardassia', framing even this act of defiance against the Central Command as in the service of the Cardassian people. In another episode, he's quite content with how his people treat orphans left behind on Bajor, rationalizing that it's just how one is supposed to act:
* Dissidia 012 Final Fantasy because they were summoned on opposing sides.
* Dissidia 012 Final Fantasy. Defeating him unlocks the game's true ending as well as the ability to play as him.
* Dissidia 012 Final Fantasy: He doesn't actually care whether Chaos' faction or Cosmos' faction wins the cycle of war, he just participated so he'd be able to

regain his memories.
* Dissidia 012 Final Fantasy, the bonus gameplay mode Labyrinth is set up as a series of interconnected rooms grouped into "cloisters", and each group has a gimmick on what types of treasures and enemies you encounter and what you need to do to unlock the door to the next room. However, once you hit Floor 50 the cloisters become longer, the enemies more difficult, and the final stretch to the boss from Floor 71 to Floor 96 is just one long string of powerful enemies. And, by the rules of the Labyrinth, if you die you lose all the equipment and items you won up to that point and have to start over from scratch. You're allowed to enter at checkpoints on deeper floors, and hypothetically can go right back to Floor 71, but will be deprived of all the equipment you will need to combat the high level enemies.
* Dissidia 012 Final Fantasy ticks off the Onion Knight, who's surprisingly mature and strong for his age.
* Dissidia 012 (if they can get it off, because Sephiroth is programmed to kill Aerith before anything else).
* Dissidia Final Fantasy 012: Duodecim Vaan's way of doing just that: Vaan never tries to stop him from fighting, after all.
* Dissidia Final Fantasy (2015). In the latter she will even do it multiple times in a single attack.
* Dissidia Final Fantasy (2015) plotline and cutscenes highlighting many characters in the series, even ones from older or more obscure titles. Although it still has points of contention (not least being a gachapon game), it's still going strong while the game it was meant to promote stopped updating in 2020.
* Dissidia Final Fantasy (2015) that they 'must have remade Cloud's face a hundred times' due to inability to get him to look like the character.
* Dissidia Final Fantasy (2015) (where it was more likely to get success as an esport) because it required three players per team rather than the traditional 1v1 format, which anyone remotely familiar with tournaments will realize would make it impossible for matches to happen on time even if enough people managed to find teams, while long time fans hated the changes since they removed the RPG mechanics, forced those who played for the story and characters to have to grind to unlock more of it, and also hated how barebones the game's content was, especially the barely-there story. It did not help that the games matchmaking was very laggy, meaning nobody wanted to play online despite being essential to get full enjoyment out of the very multiplayer-focused game.
* Dissidia Final Fantasy (2015) will result in everyone losing if the time runs out. While not exactly this trope in multiplayer, it is most certainly this in offline play as one loss in arcade mode sends you right back to the start.
* Dissidia Final Fantasy, almost every villain has at least one variation of this to cry upon their defeat, either when the final blow is dealt or when they collapse afterwards:
* Dissidia Final Fantasy). Almost to the point that you'll forget the origin stories given for them in their original games.
* Dissidia Final Fantasy and concludes that he was trying to fill the void left by his broken heart.
* Dissidia Final Fantasy", and when Cosmos appears before him he instantly replies "Today's not a good day for a date".
* Dissidia Final Fantasy. As he dies, he briefly begins to sob before it turns into a sorrow-filled laugh.
* Dissidia Final Fantasy as well as all of them having branching attacks that deplete HP. For the latter, Zidane hits slightly harder than Onion Knight and just as fast, but his strength lies in dominating at aerial combat, and he is very good at getting his opponent up in the air quickly to get pummeled by aerial combos.
* Dissidia Final Fantasy at the poor sap you just drove your gigantic, flaming sword through.
* Dissidia Final Fantasy both averts the trope and plays it straight — Gravity System, Float System and Sector Ray fire out continuous lasers that appear instantly, but Attack System fires out a barrage of small laser projectiles.

* Dissidia Final Fantasy, but the name makes absolutely no sense to people who don't have it explained to them.
* Dissidia Final Fantasy" by destiny is to pity Garland, explaining that being stuck in the cycle has driven the man to despair. Unfortunately, (as one might expect) Garland doesn't take this very well, and he yells a bit during his fight with the Warrior.
* Dissidia Final Fantasy can kill a level 99 character in a single blow, and are usually programmed to be aggressive, evasive, and use their best attacks.
* Dissidia Final Fantasy canon seems to fit this trope, with other characters going so far as to praise him for his calm and collected mindset. He also speaks relatively few words to the other Warriors of Cosmos, not to mention it seems like he's always in a perpetual contest with himself to see how he can express a thought in as few words as possible when he does speak.
* Dissidia Final Fantasy, Cosmos, the goddess of harmony in this game all have hair of similar length. The Onion Knight has a rat-tail mullet that reaches his knees.
* Dissidia Final Fantasy final battle in Shade Impulse, Cecil offers him the same thing, and this time, while he still turns away, Golbez acknowledges that there may be hope for him someday.
* Dissidia Final Fantasy following this trope, except Garland who loves the fact he gets to spend eternity fighting.
* Dissidia Final Fantasy has an infinite number of possible worlds in which the characters are always fighting each other. When one side wins, things just start over.
* Dissidia Final Fantasy has characters who take hundreds of blows from their enemy, yet they look perfectly fine.
* Dissidia Final Fantasy has the appealing option of using your personal least-favorite character as a punching bag.
* Dissidia Final Fantasy has three factions within the villains - those who want to rule the world, those who want to destroy it, and those who are doing their own thing and don't care about the other two factions. Though the heroes spend most of the time in the spotlight, we see hints of the various villains making plays for power against each other.
* Dissidia Final Fantasy, he has dark-based moves, such as Shadow Flare and Octaslash.
* Dissidia Final Fantasy, he looks small enough beside Golbez (helped along by their many scenes together) that people mistake him for being one of the smaller characters in the game. Chaos himself is this trope.
* Dissidia Final Fantasy His impressions are so good in fact, some wondered for a time if it was a distorted version of the original voice and didn't think it was actually him.
* Dissidia Final Fantasy. However, beating him opens an extra campaign whose final boss is a level 110 Chaos called Ultimate Chaos.
* Dissidia Final Fantasy is about parental themes this actually makes perfect sense.
* Dissidia Final Fantasy is generally pretty good about averting this. Characters fighting in cutscenes tend to use the same attacks that they use in gameplay. At the same time, there are quite a few instances of this, such as Terra casting teleport, Ultimecia and Cecil using what appear to be their respective EX Bursts without hassle, and Squall blocking most of Ultimecia's aforementioned EX Burst during his final confrontation with her in his storyline.
* Dissidia Final Fantasy It's a rare occurrence of this trope being absolutely dead serious.
* Dissidia Final Fantasy, it turns out that there have been numerous repetitions (or cycles) of the war between the Gods Cosmos and Chaos. This shows up in the title of the sequel, where the 012 specifically refers to the 12th cycle.
* Dissidia Final Fantasy names first, due to their game being the fan favorite; and then lists all the others in numerical order.
* Dissidia Final Fantasy NT one is debated in Rinoa's game of origin, but SeeDs in general are good people doing a highly necessary job. Rinoa knows this firsthand,

because it was SeeDs who saved her from the sorceress Ultimecia's possession.
* Dissidia Final Fantasy NT's playstyle is based around relentlessly chasing down his opponents. He can dash-cancel many of his attacks, and his EX Skill, JENOVA, slows down nearby opponents, making them easier to pursue.
* Dissidia Final Fantasy) on Cosmos's side, wears a full uniform. Cosmos herself is wearing a long white gown. Meanwhile, the Chaos side only has two women - and they're Ultimecia and the Cloud of Darkness.
* Dissidia Final Fantasy one kind of a seemingly deadly charging slash can wound, while another just discourages the enemy.
* Dissidia Final Fantasy: Opera Omnia. After this, she joins their ranks.
* Dissidia Final Fantasy: Opera Omnia five-star item, and some characters practically require their special weapon to be useful. Players can purchase "gem chests" of a few or several thousand... starting at around $25 USD.
* Dissidia Final Fantasy: Opera Omnia from across the series who make up the main party. The closest it comes is having the flirtatious characters universally being turned down.
* Dissidia Final Fantasy: Opera Omnia" from the party. This leads a number of them to start openly mistrusting him and seek answers on their own.
* Dissidia Final Fantasy: Opera Omnia has Golbez explain his refusal to join the party despite greatly aiding them (especially by helping Cecil regain his memory) by saying that his sins are unforgivable except by death. Galuf shoots back that he could do much more to make up for what he's done by living and working to do good, rather than simply dying.
* Dissidia Final Fantasy: Opera Omnia himself, is disgusted by the sheer purposelessness of Kefka's wanton destruction.
* Dissidia Final Fantasy: Opera Omnia in the party. Wakka outright calls him "pure" in one cutscene.
* Dissidia Final Fantasy: Opera Omnia. This is true in both serious discussions and lighthearted ones; at one point she teases Zack by announcing that his supposed arguing with Seifer is really to make sure Seifer doesn't feel alone.
* Dissidia Final Fantasy: Opera Omnia, Zidane confuses the others by flirting with "him" as much as he does with any of the female party members. Cloud speculates that Zidane has "switched sides" until Faris admits that she's a woman—which Zidane had already realized when he and Bartz were giving her first aid.
* Dissidia Final Fantasy (or "589"), and Exdeath/Cloud of Darkness (V and III).
* Dissidia Final Fantasy. Perform it perfectly, and he performs Entice, suspending the enemy in zero gravity as he continually blasts them with arc lighting from his hand, Emperor Palpatine style.
* Dissidia Final Fantasy "Real Men", there's a segment where Squall states, "Only a real man hangs out with the ladies." Cloud responds with, "You know that's a guy, right?" but Squall firmly states that it's a chick, until he finally decides to ask the man/lady in question, who is Bartz. Bartz replies, "Oh yes, I am male—I mean, FE-male." Squall's response?
* Dissidia Final Fantasy returns all the previous examples and adds Tifa, whose entire gimmick is that she can cancel out attacks to teleport behind the opponent and attack again, and Vaan's Katana. The game also adds the Assist Chase mechanic, which let you teleport near the opponent and attack after certain Assist attacks. In both games in the series, while all characters have a jump command, Golbez doesn't physically jump. Instead, he instantaneously teleports himself to approximately a meter above his previous position.
* Dissidia Final Fantasy. Right after literally shrugging off a sword-slice to the chest.
* Dissidia Final Fantasy series, having been assigned to rule over harmony and discord. The sequel explains their back-stories.
* Dissidia Final Fantasy specialize in magic, and Terra is the only warrior of Cosmos that does, many of her battles turn into this. Several of her comrades also use magic, but she's the only one who does so exclusively. Her cutscene battles with Ultimecia and Kefka also sorta count.
* Dissidia Final Fantasy, the God of Discord, Chaos, and the Goddess of Harmony,

Cosmos, continually war against each other in an endless fight. They do this by summoning characters from the FF series to fight for them.
* Dissidia Final Fantasy. The point at which his tail sticks out of his pants should really have been placed just slightly higher up in order to look like it was actually coming from the base of his spine; as it is, it looks far too much like he's pooping it out.
* Dissidia Final Fantasy: The Warrior of Light, a brave summoned hero dedicated to his goddess Cosmos.
* Dissidia Final Fantasy. They're failed bodies for the spirits found drifting in the Interdimensional Rift and speak with distorted voices. They're noted to be more dangerous because they'll attack relentlessly until their opponent's body is ruined to the point that it can't be repaired for the next cycle of battle (whereas the people, even the villains, tend to stop after they've landed the killing blow).
* Dissidia Final Fantasy. Though Chaos serves as the final boss for the heroes, Cosmos does not do the same for the Villains, but it's stated at the end that the forces will continue to exist even if they do not.
* Dissidia Final Fantasy. When anyone else beats him, he just stands back up and muses over his inability to die at their hands.
* Dissidia Final Fantasy, when he's threatened by Exdeath by being told that he'll wander forever in the void after being defeated, he calmly replies that that doesn't sound half bad, but then goes on to win anyway. He personifies the wind, after all, and the principle attribute of the wind is that it travels.
* Dissidia Final Fantasy, where Onion Knight's limit break is "Class Change," turning him into a sage when using magic attacks and a ninja while using physical attacks.
* Dissidia Final Fantasy which is based on her FFVI sprite shows it to be a really short dress.
* Dissidia Final Fantasy, which was developed just a little earlier - although this makes sense due to Cloud's powers being copied from Zack.
* Dissidia Final Fantasy, who are fairly restrained. Odd because Ultimecia was quite hammy in her respective game. ("KURSE YOU SEEDS!")
* Dissidia Final Fantasy will drop like a rock. No falling damage, though.
* Dissidia, Gabranth calls Shantotto "A wielder of magicks", whereas all the other characters use "magic".
* Dissidia in his original game (and Vader himself is under Film, above).
* Dissimile page is kinda like a dog that talks, only it's not a dog, doesn't talk, and is actually a trope.
* Dissociated Press is a way of generating reams of metaphorgotten prose.
* Dissociative Identity Disorder, with one of his personalities being that of his deceased father and hurt Reid, he would afterwards do his best to clean him up and try to stop his pain.
* dissolve regular mooks with a simple punch One of the muscle mass consume animations, in which Alex simply pulls someone in half, right down the middle.
* dissolves flesh and has pheromones that call more of the damn things to attack you, and they live in and around major cities like Tokyo?
* Dissolving Classroom's trademark deformities: bulging, starey eyes; a too-large grin; and an enormous tongue.
* , dissolving Congress and declaring martial law; in response, Knox forms a new government in Boston, which quickly gains the allegiance of the governments and National Guards of all the New England states, New York, Pennsylvania, California, Oregon, and Washington, along with several army divisions under Dwight Eisenhower. And in addition to all the regular military, hundreds of militias rise up across the country in support of either the Loyalists (MacArthur's regime) or the Constitutionalists (Knox's government), which also have backing from the Axis and Allies, respectfully.
* Dissonance, a mouse that really shouldn't be alive right now is referred to as "Lazarus," or "Lars" for short, because "the mouse formerly known as mangled carcass" was too long.
* Dissonance. Even the life form - a catlike creature that can walk on two legs -

is friendly and completely non hostile.
* Dissonance takes a relatively realistic approach to this—Pandora has traits of three different kinds of caniform, in addition to traits not typically found in that suborder, but it's definitely its own creature rather than a mix of the others. The protagonists are currently clueless as to what it could have evolved from (having dismissed genetic engineering, and only joked about aliens.)
* Dissonant Harmony in the dark; and they appear to forget to consult Lapis Lazuli at all.
* Dissonant Serenity, Data's calm demeanor can be downright nightmarish.
* Dissonant Serenity: Someone looks and/or acts serene despite something serious or crazy going on.
* Dissonant Serenity: The inverse of this trope in many ways; a serious wrong or something that is no laughing matter, such as murder, gets brushed off as a mild inconvenience at worst.
* diss track "No Vaseline," he actually entertained the thought of doing this to Eazy-E:
* Distaff Counterpart — Very similar to the original character, just the opposite gender. Often a rival or villain.
* Distaff Counterpart Amy, who doesn't quite understand that making weird pseudo lesbian comments about her "bestie" Penny is a tad bit uncomfortable for her, and Leonard's mother who is also just like Sheldon—the irony being that she's a psychologist and frequently calls out social problems in others.
* Distaff Counterpart and reveals to everyone who the bigger threat this season really is.
* Distaff Counterpart, but he generally comes off as less intelligent to the other characters.
* Distaff Counterpart by the next season, with all her kindness turning into complete jerkassery.
* Distaff Counterpart. Defenders simply reply that this is character development, and that while it may have only been 2 1/2 seasons on screen, the passage of time for Clara is somewhat greater (with an implied 2-3 year time jump between Series 7 and the 50th anniversary special).
* Distaff Counterpart, episode co-writer Joseph Calvelli also has a part as a police chief.
* Distaff Counterpart example occurs with Sirica in episode 60; she pursues Meta Knight under the suspicion that he abandoned her mother and let her get mauled by one of eNeMeE's monsters. It is only after Meta Knight's sword telepathically informs her that her mother willingly sacrificed her life because she couldn't wield it, thus giving the blade to him in her dying moment, that Sirica stops trying to kill him and accepts reality.
* Distaff Counterpart Firehawk, his Russian foe-turned-ally Pozhar, and several of his recurring villains.
* Distaff Counterpart holostars branch, lest they face backlash from very devoted fans. Not that it hasn't stopped Fubuki or Matsuri from collabs anyway.
* Distaff Counterpart included deities who seemed little more than female counterparts added to a much older god, such as Input (counterpart of Anubis, whose Egyptian name was closer to Inepu), Sobeket (counterpart of Sobek), and Sokaret (counterpart of Sokar). The four goddesses of the Ogdoad (Naunet, Amaunet, Hehet, and Keket) are Distaff Counterparts to Nun, Amun, Heh, and Kek.
* Distaff Counterpart in order to learn more about herself as a martial artist. Which has rubbed off on several of her friends.
* Distaff Counterpart in the games themselves, not helped that Square Enix once used her to model in a men's fashion magazine.
* Distaff Counterpart is male, though the remakes replace him with a Gallade.
* Distaff Counterpart is this trope too, possibly even more so than the Hulk.
* Distaff Counterpart)La Diabólica, Star Fire and Ludark Shaitan also gaining international attention.
* Distaff Counterpart Nova in the breasts. Cut to Marena and Blossom holding their breasts sympathetically, and Karen looking not too pleased either.

* Distaff Counterpart of Pepe Le Pew, this is Fifi Le Fume's entire gimmick. The female skunk chases after boys who might even find her attractive if not for her odor.
* Distaff Counterpart, she would naturally be this, and that as a wealthy couple, the payout would be larger than average.
* Distaff Counterpart shows many of the same symptoms, but is later given a twist that makes her further removed from being a female Sheldon. Some of her "oddity" stems from the show playing her demisexuality for laughs.
* Distaff Counterpart: The female equivalent of a pre-existing male character (the reverse of this would be a Spear Counterpart)
* Distaff Counterpart: The female equivalent of a pre-existing male character (the reverse of this would be called a Spear Counterpart).
* Distaff Counterpart, the most notable exception, is one of the few female characters who can maintain a long-running title.
* Distaff Counterpart. They are so powerful and influential that it's rumored that the company personally eliminates any competition from other male idols by forcing big music programs not to invite them onto their shows to promote, so much that other competing male idol groups have rebranded themselves as "dance and vocal units" to avoid clashing with the Johnny's.
* Distaff Counterpart titles in Austraila with Unsocial Jordan(you actually shows his face on his youtube channel), so the masks clearly didn't hurt.
* Distaff Counterpart to Pip, added in Battle Pass 3. Pepper comes from an alternate universe, and came into Pips Universe while he was experimenting in his workshop. While she is ostensibly just a very fancy skin for Pip, Pepper has unique character icons on related emotes and on the gameplay HUD, something no other character skin does. Because of this, the game treats the two as two separate characters.
* Distaff Counterpart to Slendy, her creation in fact pre-dates his by almost a full year.
* Distaff Counterpart William Topaz McGonagall), some of whose critics suggested that she was "semi-literate", responded thus: "The Editors that has spoken in a scandalous manner, have went beyond reason."
* Distaff Counterpart, with a spicy personality, as well as still being a fennec fox.
* Distanced from Current Events: A scene is altered or removed to avoid making it look like they're making light of a recent tragedy.
* Distanced from Current Events: A work gets censored, delayed, or canceled due to a then-recent Real Life tragic event or events.
* Distanced from Current Events: A work is conspicuously edited in order to avoid referencing a recent tragic event.
* Distanced from Current Events is similar, but only applies to past media that somehow "predicts" future bad events.
* Distanced from Current Events that the spelling/writing of Raiden's name was changed at the last minute from kana to kanji so that this would not transliterate his name into (bin) Laden, as the game was released shortly after September 11, 2001. Hideo Kojima was very nervous about this as the story (coincidentally) involved terrorists attacking New York.
* Distanced from Current Events: When media gets censored in order to avoid accidentally drawing parallels to controversial news stories from real life.
* distance, yet Tony is still unhurt and alert enough to call the armor to him right before he turns into sidewalk pancake.
* distancing from current events following the 7/7 London bombings), and a short scene where a very creepy image of a deranged hillbilly girl appears without warning (SpongeBob is even disturbed by this, and apologizes to Gary, as well as presumably the audience). Even today, these two episodes remain controversial and are very rarely shown on British television.
* distant, but he gets shipped with his relatives quite a bit. The Arya one is not helped by an initial draft of the books that had Arya and Jon falling in love with each other to their mutual horror (although, this same outline also included

Catelyn being killed by the Others, Tyrion falling in love with Arya as well, Benjen being Lord Commander of the Night's Watch, etc.).
* Distant Cousin Dangle has an incredibly long head and arms to match hanging off the side, much like fellow doppelganger Odeon. The latter are so long that he walks on his hands rather than his feet while the rest of his body
* Distant Duet sung by Pearl and Steven about what being strong means.
* Distant Epilogue, set fifteen centuries after the main story, describes the sometimes fuzzy division between historical truth and fiction:
* Distant Finale and exist as raw data. Isaac eventually grows weary of this existence and voluntarily ends it by downloading his memories into the mind of a brain-damaged young man in another universe (which appears to be a time-shifted version of the primary 'verse), hoping to change the fate of the man he admired.
* Distant Finale, and the female lead literally speaks some of the lyrics to the theme song, asking to 'know right now what will it be'.
* Distant Finale, and thus the script changes made the dialogue look like Tai had a longtime crush on Sora while making the friendly conversations between Yamato and Sora rather awkward and even hostile at times.
* Distant Finale behavior, the person in question makes no further effort to cover up their part in the tragedy. They're mostly just relieved that they've been freed of the burden of hiding their guilt without having to take the initiative and confess.
* Distant Finale, bringing his total to thirteen. It's a good thing most of them are willing to double up.
* Distant Finale eventually got married, we don't see any romance between them play out on the actual show.
* Distant Finale) family celebrating Mrs. March's birthday at Jo and Bhaer's Plumfield School.
* Distant Finale has Ginger doing a book reading for her book "As Told By Ginger" that seems to be the story of her life.
* Distant Finale. It also happens to be a Naruto/Sakura fic, so it's obvious how she's going to stop Boruto's birth.
* Distant Finale: It's very common for the last episode of a Korean drama to skip forward to tie up the story and show how things settled out for the characters.
* Distant Finale, Kouta's doctor wonders what Shima sees in a "blockhead" like him.
* Distant Finale last panel, where an aged Walky and Joyce watch the sun set... the mug can be seen at the edge of the panel.
* Distant Finale, New York City has been covered by glaciers, but the World Trade Center and the other recognizable buildings of downtown Manhattan are intact, sticking through the ice. (Glaciers, of course, move, and would flatten anything in their path.)
* Distant Finale, Pacey dug up some old tapes that Dawson had made and lo and behold, it was the opening credits of the first season (sans music and credits).
* Distant Finale port), which also are the first gay couple in the series.
* Distant Finale revealed the futures of the main cast. Fans hated almost all of them, feeling as though they came out of nowhere and/or flew in the face of character arcs.
* Distant Finale set many centuries in the future the UFP has unified the entire galaxy, and ships are now fast enough (using something called a "sidewarp" drive) that crossing it is trivial.
* Distant Finale. She instead tearfully congratulates Marika on graduating.
* Distant Finale, Shizuka is, as always, pulling the massive lever that powers on the firing mechanism of the Daiku Maryu's head, but this time she's doing it while breastfeeding a little baby. Given that Sakon is also carrying a baby on his back, the two hooked up in the end, surprising precisely nobody.
* Distant Finale showed the cast five years in the future. Puria and her cronies, Naoto, and Daiya are living happy lives on Earth, but Daiku Maryu's tentative forays into space are suddenly placed in peril when alien monsters attack. Daiya's Flame Gridder grows hot, signalling that the mechanical dragon is close, and it swoops down and plucks him from the ground, and together they return to fight the

monsters. Roll credits.
* Distant Finale shows her grown into Princess Celestia's proportions.
* Distant Finale shows Orel and Christina happily married with a boy and a baby girl. Also a dog that looks similar to Orel's deceased dog Bartholomew.
* Distant Finale "Sleeping In Light", an EarthForce officer indicates disdain for the Rangers, the paramilitary group that acts as the Interstellar Alliance's elite forces.
* Distant Finale, "Sleeping In Light", so he lives at least as long as Sheridan does - 20 years after Sheridan's trip to Z'Ha'Dum.
* Distant Finale, so the Batman Beyond setting might have doubled as a convenient setting for a distant finale.
* Distant Finale takes place in 2027, 25 years after the final battle with MaloMyotismon.
* Distant Finale "Thank You For Watching the Show", Dendy references the theme song's lyric "you fight 'till the end, you are my best friend" nearly word-for-word.
* Distant Finale. The beginning, based on the opening from the TV show, is filled with these moments where characters recoil in fear from the normally casual explosions, and various other goof-ups are made. The team is soon after criticized by the monsters they are fighting for not behaving like a true Sentai team.
* Distant Finale: The series' ending takes place many years in the future with the surviving characters much older.
* Distant Finale this by telling Daphne, "The retro-future trend was made for you."
* Distant Finale, to allow the fans to interpret the moments for themselves.
* Distant Finale (whether it's a montage within an episode or just a full episode or chapter)
* Distant Finale wife have a new baby, too. And Paraietta manages a whole orphanage full of kids, with Rodoreamon's financial backing.
* Distant Finale Zone and Mag through two episodes of apocalyptic madness, during which they survive all kinds of crazy madness, only to finally decide to part ways after their side has finally won. The two of them, having until then been too busy surviving to dwell on the past, decide to tell each other what they were doing before the end.
* Distant Lands. And since this is the end of Finn and Jake's story, leaving these problems unsolved resulted in a finale that's equally as unsatisfying and divisive as "Come Along With Me".
* Distant Prologue: A short introduction scene at the start of the story that takes place a long time before the main plot happens.
* Distant Prologue character is basically named "Árni, Reynir's son", while his present-day descendant is named "Reynir, Árni's son".
* Distant Prologue" joins the list of unforeseen complications of the disease in the main story.
* Distant PrologueThe introduction takes place significantly in the past
* Distant Prologue, towers over humans, elves, and orcs, although he's still not as big as a troll.
* distant relatives, such as mountain lions, rather than their closer relatives, such as the African wildcat.
* Distant Sequel, Tetsuya finally went down and found himself and his Great Mazinger grafted into the titular Mazinger Infinity which was stolen by Dr. Hell and had his battle data copied to Infinity to empower it. It took the majority of the movie for Kouji and his now grown-up little brother Shiro, who used to be powerless and more likely to be rescued by Tetsuya himself or Kouji back in the days, to bail him out and even after rescue, Tetsuya launched one Thunder Break (along with Shiro) against Dr. Hell for good measure.
* Distant Star: A weird non-film example. Wieder kills people and uses them as "inspiration" for his art. At one time he even organizes an photography exposition; all the photographs are of some of his victims.
* Distant Stars DLC introduces a specialized form of Gateways, the L-Gates, which form their own portal network, and unlike normal Gateways can't be closed off to

hostile fleets. Reactivating the L-Gates grants access to an extra-galactic cluster of systems, though you might find out that this particular portal network was shut down for a reason...
* Distant Voices Still Lives is divided into two parts: "Distant Voices", which revolves around the father's role in the family, and "Still Lives", which revolves around his children starting families of their own.
* Distant Worlds complete with an actual empire's colonization capacity and growth.
* Distant Worlds, the "Robotic Troop Foundry" allows an empire to manufacture robot armies.
* Distillery District. This looks fairly authentic, since most buildings in the Distillery District are from the Victorian Era... except for the inclusion of a very (North) American-style street clock on a pole.
* Distillum calls Jamie "blondie" or "cowboy", and Kavitha gets called "the anomaly", or just "you" when Sidney deigns to speak to her.
* Distinct Double Album — A two-disc album where each half has a distinct sound or theme.
* distinct enough to constitute a trope in its own right, just naming and linking to the separate page is fine.
* Distinction Without a Difference: A character insists that they're not X, they're just Y. It so happens that Y essentially means the same thing as X.
* Distinction Without a Difference: Character insists on a synonymous term.
* Distinction Without a Difference: You insist that you're not X, you're just Y, but Y is essentially the same thing as X.
* distinct - is supposedly very reserved, quiet and asocial his personal life, stating that there’s very few people he actually trusts.
* Distinctive artwork on the nose or tail.. If on the tail, expect distinctive (or even flashy) designs intended to easily identify the plane's unit.
* distinctive hat. Later, while he was preparing the fight against Rommel, he started using his distinctive beret, even if it went against the officers dress code. The highest rank command told him repeatedly to stick to the rules, to which he replied that they could go to hell, since he was well aware of having being recognized all over the army, and even the civilian population back in UK, specifically because 'the general wearing a beret' directly told everybody that it was him.
* distinctively contoured Coke bottle wouldn't fall over; the original designs were unstable). Notice that even the plastic two-liter bottles of Coca-Cola (and other Coke Company products) resemble the famous contour bottle, while every other brand's two-liter bottles look alike, particularly in having plain, straight edges.
* distinctive paint job of the FW-190Ds of Jagdverband 44, which were tasked with providing protection for Me-262 jet fighters during take-off and landing. As such they operated only in the close vicinity of their airfield and avoiding friendly fire from AA guns was more important than being difficult to see.
* distinctive paintjobs were a group of black airmen recruited and trained by the US Army Air Forces during WWII. The US armed forces were still racially segregated, so entire units were formed with black pilots, maintenance crews, and even medical staff. Besides the airmen's great desire to prove their ability, they were subjected to much more stringent training than white pilots. The result was a corps of dedicated pilots who were quite literally the best of the best. Once deployed overseas, they proved themselves highly capable, and the Red Tails would become famous for their bomber escort missions, with a reputation of never losing a bomber to enemy fighters (not true, but it proved to be a very successful bit of wartime propaganda), including one battle where they shot down three German jet fighters over Berlin. By the end of the war, they would accumulate 3 Distinguished Unit Citations and 96 Distinguished Flying Crosses.
* distinctive uniform; surprisingly, it was not confused with the black uniforms of the SS, probably due to differing styles and insignia.
* distinctly bleak worldview conveyed in his stories, however, Lovecraft put a notable spin on this trope: his aliens and space-gods are not interested in guiding humanity's development, nor (with a few exceptions, such as Dagon) in enslaving or

corrupting us. They rarely give us a second thought, as we were basically ants in comparison (perhaps even less).
* Distinguished Dragaerans' bodies are brought to Greymist Valley and sent over the Blood River waterfalls known as Deathgate (which is a
* Distinguished Gentleman's Pipe: The pipe that only the most esteemed of gentlemen smoke.
* Distorted Reality. He later gets called out on it. Though he hasn't killed anyone ... yet.
* Distorted Travesty, clicking on an enemy brings up an analysis screen.
* Distorted Travesty difficulty, which locks you into it for the rest of the game.
* Distorted Travesty. Even within the gates there is almost invariably a local portal system.
* Distorted Travesty. It sounds anticlimactic, but it is a fantastic way to blow off all the stress and frustration the previous level likely instilled in you. (And the very end ratchets up the difficulty again, so it's not entirely without challenge.)
* Distorted Travesty, the latter of which is slightly tougher. Jerry and Jeremy declare their opinions about how cheap and uncreative this is.
* Distorted Travesty, the main characters Jerry and Jeremy are based on (and named for) the developer's friends and roommates.
* Distorted View created to present interesting and disgusting things that happen in the news each day, has a special sound clip that plays whenever a news story occurs in Florida, "our most fucked-up state".
* Distortion Nuzlocke has Johnny's nameless bully, who he imagines as Blue Oak.
* Distortion Nuzlocke; he beats up the protagonist's abusive dad with a shovel.
* Distortions (Symphogear) about the recent events and how they feel like a fanfic to an anime.
* Distortions (Symphogear): Chris and Tsubasa are given nicknames of Megadeth (after the common theme of her attacks) and Samurai (due to acting similarly to one), respectively, by the American Soldiers that they end up saving. Neither of them are pleased by this development.
* Distortions (Symphogear) fighting force. Each of them have their own eccentricities and thier own personal reasons to fight against the Adaptors.
* Distortions (Symphogear), Qiao Cai mentions that there has been a lot of artwork of the Adaptors on the internet after their identities were leaked. When Shirabe shows interest, Tsubasa and Maria quickly warn the others that they will wind likely end up stumbling across a lot of porn of themselves if they try to search.
* Distortions (Symphogear), tell her that they know nothing about Hibiki and aren't what they say they are.
* Distortions (Symphogear) when Maria says out loud that maybe her need to protect someone might get it to work. Tsubasa agrees but is wonders who would work, after a moment of thinking they turn to Hibiki.
* Distortions (Symphogear), whom she holds responsible for her brother's death, that she doesn't care as long as he is avenged.
* Distortionverse). The result of the die is not shown and the scene fades out, leaving the reader unaware if they actually had sex or not.
* Distracted by My Own Sexy: Someone gets distracted by their own reflection.
* Distracted by My Own Sexy: Someone stops to admire their own reflection.
* Distracted by the Sexy as she is only wearing a fishnet top underneath. Jabberwokky drops him with a knee to the face and an embarrassed, "I can't believe I beat you with booby style."
* Distracted by the Sexy for George and he ends up having sex with her anyway.
* Distracted by the Sexy; In one episode, Leela gets plastic surgery to make it look like she has two eyes. While walking down the street, she ends up causing this trope to the Sons of Mom, who are Stooge expies.
* Distracted by the Sexy: Someone gets distracted by an attractive person.
* Distracted by the Sexy: Someone gets distracted by an attractive person coming their way.
* Distracted by the Sexy: Someone is distracted by sexual attraction vs. someone is

acting traditionally sexy but another person doesn't pay attention.
* Distracted by the Sexy: Someone is so beautiful it can be used to distract others.
* Distracted by the Sexy. What's better? Someone annoying they just want to get rid of.
* distracted by Vala and Sam in civilian clothes. The last of a great number of bruises he received over working at the SGC for 10 years.
* Distracted from Death - A character dies off screen in the few seconds or minutes that another character is distracted
* Distracted from Death: One character dies while the other is distracted, the other not yet noticing their friend is dead.
* distracting" Kramer while he was driving because she was wearing only a bra top. Jackie Chiles' remark that a bra has to fit "like a glove" is a reference to the O.J. Simpson trial. Kramer's stupidity was again the cause of losing this case since Jackie had it in the bag when he insisted on checking to see if the bra would fit her.
* Distracting the creature's electroreception becomes a plot element of
* Distraction is a standard quiz round, except the buzzers are replaced with shot glasses of hot sauce. To ring in, a contestant must drink and swallow the hot sauce in a shot glass, then answer the question.
* Distraction) with your hand. At least one contestant ended up with a broken finger.
* distract stuffed dogs (one for each of them) that they don't even care.
* distract Torg and Riff while she kidnaps them not to realize the effect she has on them.
* distrans universe is used to encode messages in the voices of bats and birds. It can be used on humans, but it is frowned upon. So naturally both the protagonists and antagonists make use of human distrans.
* Distress Ball: A character needs rescuing because they uncharacteristically put themself in danger.
* Distress Ball: A character's level of danger increases, but his odds of surviving it increase even more, to get him to the scripted rescue or resolution.
* Distress Ball: Character endangers themself by being uncharacteristically stupid.
* Distress Call: Emergency communications made by people in trouble, which may become especially worrisome if any potential rescuers find that they have arrived too late to help save anyone...
* Distress Call: You try to call for help but somehow this always fails.
* Distressed Damsel and being used against her loved ones and friends, snaps and physically assaults Evil!Falla.
* Distressed Damsel join the fight... but as Quirky Bard types (they're damn useful once you get the hang of their abilities, though).
* Distressed Damsel she’s proved be invaluable and supportive crewmate even when the Straw Hats have suffered a humiliating defeat such as in Water 7.
* Distressed Damsel wife were at first a source of considerable guilt, as she is almost half his age. His armor, by the way, like all knights of the Pandion order, is far from shining; it's enameled black.
* Distressed Dude: A male character who gets imperiled so the hero can rescue them.
* Distressed Dude, especially in cases where the man in distress is otherwise shown to be able to defend himself.
* Distressed Dude: It's not always a woman who needs to be rescued, sometimes the fellas need saving too.
* Distressed Dude: Men need rescuing as often as women, if not more so.
* Distressed Dude. This is a great opportunity for the hero to feel gratitude to the heroine, admiration for her pluckiness and general growing affection for her, for the heroine to treat any injuries he may have sustained, the heroine to realize how much she cares for him after she nearly lost him, and so forth.
* Distressed Woodchopping: A character who is angry or upset chops wood to relieve his anger, stress or anxiety.
* Distressingly, an attempt to revive the extinct Pyrenean Ibex succumbed to lung

problems (in this case shortly after birth) which is also what killed Dolly.
* Distress or merely animates their corpses, so the practice is being challenged on ethical grounds in-universe.
* Distress, the concept of someone being "traditionally" transgender has become a complete and utter non-issue; in addition, five entirely novel gender identities exist: ufem, ifem, asex, imasc, and umasc. Asex is what we would today refer to as gender-neutral, but the others refer to varying degrees of femininity or masculinity, ranging from "comically exaggerated gender-specific traits" for the u-genders to "extremely understated gender-specific traits" for the i-genders.
* Distress, the recreational drug of choice in future Earth is a synthetic compound that produces the fun effects of drunkenness with none of the unpleasant side-effects, is impossible to overdose on, and isn't addictive.
* (distributed only since 2003), a famous (real) steel company that was not sold to Russian investors till 2004 and many others.
* Distribution has moved entirely digital as well, as hard drives cost far less than printing thousands of reels of film. Theaters had to upgrade to digital projectors or close due to movies no longer being distributed on film reels.
* Distribution of transplant organs or slots in medical trials: Good Doc will usually try to steer them to poor, unconnected patients, while Bad Doc will give them to wealthy patients who could potentially afford alternative, but less pleasant/effective, treatments. Bad Doc will often justify this by detailing exactly what program their endowment will be funding.
* District 12 had 915 survivors out of ten thousand. The burned bodies of the dead are found along the main road.
* District 12 has a salute — touching the middle three fingers of the left hand to their lips and holding it out — that means thanks, adoration, and goodbye to someone you love.
* District 13 is designed to showcase the parkour skills of its protagonists, one of whom is actually the founder of the sport. The story is considerably more political than could be expected due to the social issues involved, dealing with a dystopia where the more dangerous neighborhoods around Paris were walled off by the government and left to fend for themselves.
* District 13 makes liberal use of Le Parkour. David Belle, a co-founder of Parkour, features in the co-main role.
* District 9. According to the director, it's actually a generation mining ship meant to be self-sufficient because its millions-strong population will often go on thousand-year long missions.
* District 9: Although Piet Smit is technically the main antagonist of the movie, Koobus Venter is the one who commands all the mercenary soldiers going after the main character.
* District 9 attempts to chop his arm off in the hope that it will stop the metamorphosis into a Prawn from spreading, but he only manages to get a finger off and stops due to the pain.
* District 9 both as way of a good will gesture, and to salvage all the work that had already been done. Many of the props used in the film were repurposed from their original intended use.
* District 9 can be. Yes, most of the stuff in the movie, such as the slum, the cannibalism, the deportation, that's all inspired by actual events.
* District 9 catches an RPG-7 rocket fired at Christopher's command ship. Then it explodes in his "hand". He survives though. The armor also has the ability to suspend incoming bullets in a force-field generated from one of its arms and then fire them back at the assailants.
* District 9. Christopher has to think up a plan on the spot to save both their butts.
* District 9 doesn't stop the Mercenary from putting all of his remaining weight on the pedal, resulting in Wikus getting knocked over by the speeding car.
* District 9. Employed by MNU, nothing would make his day more than getting to kill some aliens and considers himself lucky to even get paid to do so. He even says to Christopher that he loves watching them die.

* District 9 even though non-African viewers seemed to get the takeaway message that 'South Africans are terrible people'. Afrikaaners are just that damn thrilled to have a major film with a mostly S.A cast and crew.
* District 9, even though the ending itself was bittersweet enough, with Wikus losing what remaining humanity he has left, there is the possibility that once Christopher returns to his home planet the other Prawns won't be too pleased to know what happens to the others who are still held captive. Given the kind of technology they have, the human race will not only be facing a possible alien invasion but also suffer a similar fate, or something much worse than what they put the captive Prawns through.
* District 9 for the film, and also used them as part of the South African advertising campaign.
* District 9 had specific ideas for each scene and directed the actors with timing cues for when and where certain actions were to take place, but the actual dialogue and performance for the scene was entirely improvised. They would do several takes, usually without the cameras rolling and often with several different variations on the scene until Neill and the rest of the cast decided that they had a good approach to how the scene should specifically play out; they would then film it with that direction in mind. Neill and the rest of the actors commented in the DVD extras that Sharlto Copley (Wikus) was the undisputed master of this trope.
* District 9 has at least one guy losing his head to a snazzy special effects explosion.
* District 9 has experiments done on Wikus for the sake of weapons research.
* District 9, he becomes able to use the weapons — which results in both MNU and Nigerian gangsters chasing him so they can figure out how to access his power themselves.
* District 9 includes vox pops of South Africans speaking their opinions about the prawns. The filmmakers got realistic performances by asking real people about their opinions on immigrants.
* District 9 in the (initially) cowardly and weak-willed Wikus van de Merwe, who is put in charge of the relocation of several thousand fugitive aliens from one slum to another, even worse. He's something of a deconstruction, as he's a very realistic and complex character who shows that behind even the most obstructive of bureaucrats, there's still a human being — most likely an unhappy one in search of validation.
* District 9 is a detailed satellite overview of what is presumably Jo-Burg complete with highlighted "non-human zones," "Restricted Areas," and reports of possible non-human illegal activity across the city.
* District 9 is a massive flying saucer with a bunch of industrial-looking pipes and tanks attached to the bottom.
* District 9) is due to their need to be commanded by a member of their leader caste, which have all died out before the other Prawns could escape the downed vessel. This doesn't mean they're unintelligent, however, as the Prawns could be just as, if not more, intelligent than humans, it's just that the survivors are the drone caste members, and they don't have the drive to use their resources to liberate themselves from the humans.
* District 9 is recognized as his film. It helps that the film is set in and about Blomkamp's native South Africa, while Jackson is famously Kiwi.
* District 9 life, but it's doubtful cutting off the entire arm would have saved him anyway.
* District 9 Mockumentary/Satire/Social Statement, set in 2010 South Africa.
* District 9 of fantastically gory things to a body. It's horrifying at first, and then it's just awesome: they explode into tiny little pieces that litter the landscape. From a single shot from a man-portable small arm that can be held in one hand if need be. Which possibly doesn't need reloading. The first time you see one used, the recipient splatters across the main character's face. It's actually a funny spot, which is needed considering the darkness of the movie.
* District 9, one of the alien energy weapons can cause people to be destroyed whole, though instead of being vaporized, they just burst and splatter into a messy

pile of blood.
* District 9 only prawns can use the prawn superweapons. Thus human Wikus becomes of interest to the authorities when he is infected with alien prawn DNA.
* District 9 starts out as a mockumentary, with characters addressing the camera and performing talking-head interviews. Midway through the film, however, the format shifts to a traditional narrative, then returns to some additional talking-head interviews at the end.
* District 9: The aliens have two legs, one head and two eyes, but that's as much as they have in common with humans. They have four arms including the smaller, almost vestigial arms housed in their torso. They largely resemble seven-foot tall humanoid cockroaches, and even their vocal chords are too alien to try to mimic human speech.
* District 9, the protagonist decides to stay on the alien ship, intending to return to Earth in three years.
* District 9, there are no human attempts to hang ladders off it or tow it away. But we do see documentary-style flashbacks to the ship's arrival.
* District 9 there is a robot suit a la Iron Man made by the aliens. The aliens have relatively human like body structure so the robot itself isn't quite the Starfish, but it does look grasshoppery and it even has tentacle things on its "mouth", even though they probably serve no purpose at all.
* District 9 - The violent insectoid aliens seem at first to be mindless beasts. As the film develops we get to see how their circumstances are working against them. Through the character of Christopher and his child we gain a sympathetic viewpoint. It is an interesting exercise to view the film with and without subtitles: it shows how characters lacking a mammalian face are working uphill.
* District 9, this only serves to prevent the aliens using them. And then one day a gullible inspector finds a very painful way to use it - he gets gradually transformed into one of the aliens. Cue transition from documentary to action flick.
* District 9 Though it was actually a justified arrest: corporate espionage.
* District 9. Traditional documentary-style segments at the beginning ultimately give way to conventionally shot scenes, with an epilogue that contains talking-head interviews.
* District 9 versus the MNU Mercenaries versus the Nigerian Gangsters.
* District 9 was banned from theaters in Nigeria thanks to its unflattering depictions of Nigerian gangsters and scammers.
* District 9, was hired because he just happened to be hanging out where the director was filming footage for the effects test.
* District 9 were given their nickname because they resemble the small creatures. On top of that they are bottom-feeders and scavengers.
* District 9, which makes them even more listless and easier to exploit.
* District 9. Whilst they possess high levels of technology, it isn't clear that they developed it themselves and when found aboard their mothership are in a very poor state of health and hygiene. After (nominal) incorporation into human society, they rank very much as second-class citizens and barely above animals. This is the cause of much speculation in-universe, the leading idea being the leadership caste was wiped out.
* District 9, Wikus is losing several fingernails. Later, he cuts off a thumb with an axe.
* District 9: Wikus picks up Christopher Johnson with a massive mecha arm.
* District 9... with aliens who look like broadly-humanoid shellfish. The protagonist is falsely accused of having contracted an alien STD.
* District Five takes the ice in its first game wearing so-called "tape-to-your-shins"—a smattering of used or inappropriate pads (like a football helmet). Every league for kids mandates proper helmets with full face cages; they would
* Distrust, one of the requirements to compete on the season is that you have to be in high school. Yasuhiro Hagakure only gets to compete because of this trope.
* Disturbed artist Todd McFarlane) features a young girl with a bomb strapped to her body and a detonator in her hand, preparing to press the button as a gnarled

cleric spouts off rhetoric.
* Disturbed, asking for dollar donations to get the song. The proceeds go towards the defense fund of Damien Echols (he has since been released).
* Disturbed, as well as 'Indestructible', 'I'm Alive', and a few others.
* Disturbed, bringing him down with hooked ropes before The Guy climbs up himself to finish the job.
* Disturbed but still similar) with red cross-shaped make up. Who later paints a cross on top of a lamb and enjoys a bloody feast before sending her wolves in an attempt to kill the band.
* Disturbed cover of "Land Of Confusion" had an anime/Spawn styled animated video that was front-loaded with heavy metal and fascism cliches.
* Disturbed: Disturbed1s (pronounced "Disturbed Ones") or Disturbed Brothers and Sisters.
* Disturbed Doves. Both Kozue and Kyoko are watching, so it isn't clear, but it had the symbolism and feel of Airplane Of Love.
* Disturbed. Fire in question is Hell, and Satan tries to persuade a man grieving over his lover, who recently killed herself, to kill himself as well, so they can spend eternity together "inside the fire."
* Disturbed for the troops since the band's style is popular among soldiers. As a band, they're "For the troops, against the war" (respect the sacrifice, hate on the cause of the sacrifice).
* Disturbed guitarist Dan Donegan early in the band's career had hair ranging from brown to orange to blue to indigo. He's stopped doing this.
* Disturbed had the band stepping into stronger melodies, better writing and deeper, even introspective concepts.
* Disturbed has a recurring fish globe explode for no reason. Guitarist Dan Donegan mentions that they had a stunt-fish for different scenes.
* Disturbed has become known for being a band that still hangs out and talks after a show when other bands would've been sick of seeing each other. They've gotten to the point that each member knows exactly what kind of song they want to write or album they want to make without having to talk about it. Some of them have had each other's back during fights.
* Disturbed has the narrator trying to bring this out in someone, because it would be healthy/beneficial.
* Disturbed" has the oppressive, money-driven soldiers looking like this, going so far as to make their insignia a stylized dollar bill similar to a swastika.
* Disturbed in just the opposite manner: "Down with the Sickness" remains one of their heavier and most well-known songs, which has gone to undermine their slower, more melodic works in later albums. 11 million records, five number 1 albums and a Grammy nomination later, they're still seen in the public eye as that band that makes staccato monkey noises. "Down with the Sickness" was typical of Disturbed's style at the time. The slower, melodic, stuff came later as the band got more mature.
* Disturbed is about corrupt lawyers and the people they choose to defend for their own benefit.
* Disturbed is all about this. The narrator describes himself as a "terror to behold".
* Disturbed is written from the perspective of the victim...so now it's the criminal that is experiencing fear:
* Disturbed, just before the video starts, the lead singer warns the audience that the following song contains themes of suicide, advertising the national suicide prevention hotline as well. He probably did this by choice, especially considering that his girlfriend did kill herself.
* Disturbed-like on-stage execution of their "madman" lead singer for concert openings. He struggles like an animal, strapped into an electric chair, while a chilling voice reads out his absurdly long and unreal list of crimes.
* Disturbed: "Mother Earth will show her darker side and take her toll." The vengeance is metaphorical: by ravaging the world, people bring devastation on themselves.

* Disturbed often uses the same ending notes for their choruses. For example, "Decadence" and "Asylum" end their choruses with the exact same notes.
* Disturbedpedia including some very rare material that can't be found anywhere else.
* Disturbed's "Another Way to Die". It's not even the best known song off its parent album, despite it being the title track — that honor most likely goes to "So Far Away", which is an aversion on rock as it was the album's only #1.
* Disturbed's cover of "Land of Confusion" features the antagonists as a military force with soldiers wearing Waffen SS-style uniforms, and jet fighters bearing a Nazi flag-like roundel with a dollar sign in place of a swastika.
* Disturbed's "Down with the Sickness", though done symbolically - the "mother" in question represents society.
* Disturbed. The band's concerts sometimes contain sections in the set reserved for speeches by the lead-singer designed with this in mind (that and getting the crowd more pumped up).
* Disturbed universe is a better world. It's illegal to garden or share in this post-apocalyptic wasteland.
* Disturbed used to answer fan questions on message boards, spending the most of their time being badgered to prove who they were. The sad thing is, this was started by David Draiman with the other band members saying it wasn't worth trying till they eventually warmed up to the idea at David's urging. With the relationship soured, they'll probably never do this again.
* Disturbed", which peaked at #42 and went triple platinum. The cover is still well-known, but not to the extent as their debut signature "Down with the Sickness" (#104 on the Hot 100, #5 Alternative, and #8 Mainstream), nor is it their second (likely "Stricken") or third ("Indestructible") best-known song. Before "Silence" became the biggest "hit" in Disturbed's career, that honor went to "Prayer" (a #3 hit on both rock charts, and a #58 hit overall), which is nowhere near as well-known as "Silence", let alone their Top 3 songs.
* Disturbed will EVER end well. Might have to do with the band explicitly saying "We just play what we want and let the execs figure out which rack to put it on."
* Disturbia (2007), where the protagonist is confined to his house by a house-arrest legband.
* Disturbia, even leading to a copyright infringement lawsuit by the copyright holders of the original source material for Rear Window. While the film was never expressly marketed as a direct remake of Rear Window, in interviews executive producer Steven Spielberg and lead actor Shia LaBeouf admitted they both studied Rear Window extensively in preparation for the film.
* Disturbia first when Kale's friend Ronnie plays back a video he shot of the inside of his creepy neighbor's house and discovers a dead woman inside the vent, later when said neighbor pushes Kale into an underground pool he discovers several dead women inside.
* Disturbia, Kale watches Ashley from his bedroom, though rarely for things like undressing. He later tells her about all the little personal quirks and hobbies he knows about her from his spying, to prove that he understands her. They kiss right after this. Granted she does tell him that it's either "the creepiest or the most romantic thing [she] ever heard".
* Disturbia there was a sequence showing how the protagonist dealt with his being stuck alone at home due to house arrest. One scene starts with the camera panning across the room. Before it reaches the protagonist, a rhythmic noise made by furniture can be heard, along with moans and grunts of pleasure from the character. As the camera focuses on him it is revealed that he was trying to scratch the itch on his leg which was covered by the GPS bracelet put on him for his arrest, when all the time the audience were led to believe he was satisfying a different kind of itch.
* disturbing ad. While Lionel Richie's "Hello" played in the background, a young man attempts to show his romantic interest in a woman by having sculpted a bust of her out of Starburst. She is rather weirded out, but then completely freaked as the young man begins eating the face of the bust, complete with suggestive noises.

* Disturbing as it may be, one cannot help but feel at least a little pity for the two killers described in Truman Capote's
* disturbing couple. The song "The Chairman Dances" is dedicated to this trope.
* disturbing, harrowing commercials addiction: the new menace tearing apart suburban families.
* Disturbingly averted by the players who tested that level. Reportedly,
* disturbingly beautiful at worst. The ability of the artists and modelers to convey this, however, varies due to individual skill and decency laws.
* Disturbingly blurring male and female traits in the most horrific way possible, the extending "inner mouth" of the titular creature in
* Disturbingly, Nurgle the Chaos god of disease runs on a different kind of love: stuff like a mother desperate to save her child from sickness and
* disturbingly real , the inflammation of one of the membranes that surround and protect the central nervous system, generates chronic pain that often gets to debilitating levels.
* Disturbingly, the parents of the Columbine Killers had no idea what their boys were up to and were at a loss about what they did.
* disturbing — and apparently it's not that unlike actual child beauty pageants. The other little girls in the pageant were actual beauty pageant contestants and used their own costumes and routines.
* Disturbing Tha Peace bellows out this in gradual succession in the chorus of, well, "Move Bitch".
* disturbing, which takes place in Hell and features much sex and drug references.
* Dita Von Teese "Brian". His friends and bandmates are split as to whether they refer to him as Marilyn or Manson.
* Dita Von Teese - Burlesque dancer, famous too as Marilyn Manson's ex-wife.
* Ditch the Bodyguards: Bodyguards that can't keep track of their clients have to be real idiots.
* Ditch the Bodyguards: How else are you going to have a proper adventure?
* Ditch the Bodyguards, leading to exactly the kind of dangerous escapades everyone was trying to avoid in the first place.
* "ditch the crazy outfit" The human form is also the only form that doesn't aggro city guards, as it's the only form that doesn't carry a weapon and they're set to act violent when detecting weaponry to protect the city from Mavericks sneaking inside.
* Ditto above in the UK, except Aston is the company whose name turned into the generic term.
* Ditto Aliens: A species of aliens where all the individuals look the same.
* Ditto Aliens The simple, striking design of these small ships perfectly reflected the stagnant, conformist culture on the main character's home planet.
* Ditto a Philippine revolutionary group, though that is more commonly known by the last K (Katipunan) because the other alternative was an
* Ditto "Bait" from season 3. And better: the supposedly dead mother in the episode was
* Ditto bakeries that have display cakes, which generally consists of frosted Styrofoam. For example, if you watch
* Ditto can use the moves of whatever it transforms into for that battle. So can Mew and Smeargle (the latter only if it has sketched Transform).
* Ditto Caroline and Matt. They broke up after Matt realized Caroline was a vampire, and while he eventually got over it, she moved on to Tyler.
* Ditto Fighter: A fighting game character that copies the opponent's moveset.
* Ditto Flitter and Cloudchaser, the Pegasus twins from "Hurricane Fluttershy"; and Lightning Dust from "Wonderbolts Academy". "We
* Ditto for Amy, whose kissogram background hardly prepared her for, well, anything. Her boyfriend/husband Rory, though, is a nurse, who does occasionally have to make use of his medical knowledge.
* Ditto for Camp Quest, a summer camp organization founded in 1996 by Edwin Kagin, the head of the Free Inquiry Group of Greater Cincinnati and Northern Kentucky, and his wife Helen. Since Boy Scout camps did not permit non-religious children to

attend, they decided to start their own camp that would be more welcoming of them.
* Ditto for characters who fail their saving throw against the spell 'Disintegrate'; no matter how much health you had left, if you blow that roll, you (
* Ditto for digital cameras, that very often include options to take pictures in sepia and/or in black-and-white.
* Ditto for Finland during the Winter War, though the ineptitude of the Russian army command and the frighteningly lethal strategies of the Finns probably did more damage than the actual weather.
* Ditto for Goku's first-time Super Saiyan 1 and 3 transformations. Goku's transformation into SSJ3 however is more exhausting than painful though.
* Ditto for his girlfriend Dixie Kong, who is just as adorable if not more so. Her little sister Tiny Kong used to qualify for this, but after a redesign looks more mature and less cutesy.
* Ditto for its film version, which was originally going to be followed up with a straight sequel, titled
* Ditto for Japanese troops as well — as in Nazi Germany, there wasn't a lot for
* Ditto for Kenshin, who also looks significantly younger than his thirty, despite quite a turbulent life.
* Ditto for Max Immelman, who was a contemporary of Boelcke, was the first pilot to be awarded the Pour le Mérite, Germany's highest medal, (which was nicknamed the "Blue Max" in his honor during WWI) and was an inspiration to Richthofen. And having an aerobatic maneuver (in fact one of the basic ones) named after you doesn't hurt opinions, either. Immelman too was killed in action in 1916.
* Ditto for NXT Live Events. People without a set character will appear as a face or heel at random, only to debut on TV in the opposite role. Case in point: Divas Alexa Bliss and Becky Lynch worked live events as heels but debuted on NXT as faces.
* Ditto for Oishi snacks in the Philippines, who also gleefully bite huge chunks out of each other (and what's funnier is that the "victims" still look like they're having a great time!).
* Ditto for Red's grandmother. Far from being eaten by a wolf, this one stands guard all night with a crossbow and is able to shoot a gun out of someone's hand when her granddaughter is threatened.
* Ditto for Russian washing powder with the same name, if it's not the same company.
* Ditto for Sabo. He spent only a fraction of the amount of time Luffy and Ace did with Garp, but by the end of his first meeting with the old man, he was every bit as terrified of him as they were.
* Ditto for (some at least) cities, that as they have growth have absorbed close towns that have ended as districts on them. Despite this they tend to keep their former aspect (layout of the streets, low houses, a large church in the center
* Ditto for Spanish footballer Suso, whose name means "breasts" in Tagalog (the most used Filipino language), and Brazilian footballer Michel Bastos, whose surname translates to "rude" or "vulgar" in Tagalog. Filipino viewers of the 2018 World Cup had a chuckle when they learned that Brazil’s coach was named Tite (which sounds like the Tagalog slang for “penis”).
* Ditto for Surge: when asked, she confessed her blue hair "came from a bottle".
* Ditto for the comic books, which include among others Medic directly pouring blood from a bucket, back into Soldier's open chest cavity to heal him. You can see twigs in it.
* Ditto for the Ginger-vs-Mary-Ann cat fight commercial for "The Real Gilligan's Island" that even adds in the same gag as above, but with pies.
* Ditto for the Italian version of Boing, to the point that is one of the very few things they air that is not a Cartoon Network show.
* Ditto for the lesbian actress Tig Notaro playing the homosexual Cdr. Jett Reno.
* Ditto for the Nemoidians, the leaders of the Trade Federation. Viceroy Gunray pretty much embodying every single one of their traits: they're

* Ditto for the Russian Army, which has lead to the oft-asked question why they wear them at all, if they're not going to use them, even in the cases where this would be obviously useful, like for
* Ditto for the Struggle Bat Roxas uses in the virtual Twilight Town in
* Ditto for the Swedish title: Nyckeln till Frihet — "The Key to Freedom" (you know, hope.)
* Ditto for the Vedala in "Jihad", described as the oldest known space-faring race.
* Ditto Fortune, who lost her father, husband, and unborn child, and can't die herself because of her extreme luck (which was really due to a force field).
* Ditto Germany. Accompanied by massive overuse of the stuff in some households, to the degree that there's a joke along the lines of "the French use
* Ditto has gained, over the generations, abilities that allow it to instantly transform into an enemy. If it gets to make the first move, whatever Pokèmon your opponent was using is now yours to use.
* Ditto in France which is divided into two parts, namely Paris and the Province (as in outback).
* Ditto in parts of Lithuania that were also claimed by the Poles—e.g. around Vilnius.
* Ditto in the case of Leafpool and Crowfeather, except that Leafpool is also a medicine cat. Leafpool has to give her kits to her
* Ditto is a genderless Pokémon that can mate with any other fertile Pokémon regardless of gender. The offspring is never Ditto, but always the other Pokémon's species.
* Ditto, it got an ability which transforms it immediately upon entering the battle.
* Ditto jazz musician Mongo Santamaria, who is perhaps best known today as the punchline of a throwaway joke involving the character Mongo in
* Ditto many ancient Greek texts. Among scholars of the ancient world, it's more common to hear about "
* Ditto Marie, who's also given a love of punk rock (or rock in general) due to her choice of attire.
* Ditto "Megafail" among others for Megaupload - though despite being more active in moderating what you can upload, at least non-member files don't have a 10-download limit like on Rapidshit.
* Ditto Missouri, especially if you live anywhere within driving distance of the Mississippi River.
* Ditto most of the above for the Tau and Kroot of the Tau Empire. It helps their sexual dimorphism is much subtler than humans' anyway.
* Ditto possesses a telepathic ability to communicate among his duplicates that Echo Echo is noted in Beyond to explicitely not possess.
* Ditto Posthumans; this also includes when they appear in large numbers; the episodes set in the future make it clear that all Observers dress like this, not just the members of September's Scientific Team. This fashion sense is also present in their own "native" timeline even further in the future.
* Ditto showrunner I. Marlene King showing up in the last episode as one of the guests at Ezra and Aria's wedding.
* Ditto SMERSH, before their role was usurped by the completely-fictional
* "Ditto" Stiles, one of the High School teachers in the Nick Nolte/Ralph Macchio black comedy
* Ditto Tenshinhan, who permanently crippled his first on-screen opponent, nearly did the same to Yamcha, and stood toe-to-toe with Goku in their first fight (and technically won), yet was quickly banished to Jobberdom. Only stayed in the big leagues due to his Kikouhou/Tri-Beam, which literally sapped the life from him. (And even then, later on, it was only good enough to sucker-punch Super Buu, who swiftly - and apparently permanently - returned the favor.) In particular, he also seems to forget about a lot of his old moves, including limb duplication, the Dodonpa, Solar Flare/Taiyouken,
* Ditto the original Final Battle between the Critic and the Nerd. The lightsaber

scene alone was too ridiculous
* Ditto Twilight when she loses hope of getting her Element back before the
* Ditto when Three Dog refers to the Super Mutants as "Frankensteins."
* Ditto with Adriana Caselotti, whose sole feature film role was the titular princess in
* Ditto with Asuka's Mexican voice actress in the Mexican Spanish dub, the late Norma Echevarría. She even added German
* Ditto with British-American reggae singer Coolie Ranx, whose sole acting credit was Niko Bellic's close friend and accomplice Little Jacob in
* Ditto with Kevin Flynn, absent from the analog world for nearly 20 years. He just shows up earlier in the second film.
* Ditto with Oskar Schindler and Albert Goering, the latter being the younger brother of the Nazi Reichsmarschall, both of whom used their connections to save Jews and other victims of Nazism.
* Ditto with the book (minus the fighting fleets of airships and the like; at this point from the reader's perspective there's no evidence Howl is actually doing anything significant, so the trope applies less).
* Ditto with the Human Torch and Spider-Man. Johnny usually ends up the worse of the pair in these confrontations, thanks to Pete's
* Ditto with the Iranians, most of whom had no surname until Reza Shah laid the tradition as part of the Pahlavi dynasty's modernization program. Before then, Iranians were usually referred by their profession, familial link, or origin. Respected figures would be known with a nickname only, e.g. Jalal ad-Din Muhammad, more well-known by his epithet Rumi ("from Rome"
* Ditto with Trident Xtra-Care gum, which advertises calcium-based Recaldent to "remineralize" teeth. (Recaldent, of course, is just a combination of the prefix "re-", the word "calcium", and the French "dent", meaning tooth.)
* ditz who is a heck of a lot more kind-hearted, nice, and well-meaning than Quack.
* ditzy and is in many ways savvier about functioning in the real world than the guys.
* Ditzy Don't: Pinkie has this to say to Twilight after Ditzy accidentally food-poisons her:
* Ditzy Doo's Dismally Derpy Day , Big Macintosh says that if Ditzy were to die, "Ah might just have to break my own rule against Gran'pappy Moonshine's blastin' hooch. Don't think there's nothing else that could dull that hurt."
* Ditzy Genius: A character who is intelligent in regards to numbers and science, but is somehow oblivious of stuff that even complete idiots are aware of.
* Ditzy Genius: A character who is knowledgeable in numbers, science, and other brainy stuff, but lacks common sense that even certified morons possess.
* Ditzy Genius: A genius who's really bad at one thing vs. a ditz who is really good at one thing.
* Ditzy Genius: An generally intelligent character that has his/her idiotic moments in certain other aspects.
* Ditzy Genius: An intellect who nonetheless has areas in which they are inarticulate.
* Ditzy Genius at times and had much the same sense of humour as any 15-year-old boy. He could just do cooler stuff.
* Ditzy Genius, one of Plato's dialogues, has Socrates explaining that philosophers (which were equivalent to modern day polymaths) were considered "absent-minded" because they didn't care about mundane stuff like gossip or social fads.
* Ditzy Genius was interested. So unusual, and so much potential, that Aizen kidnapping her was enough for Soul Society to mobilize against him. It's been stated that the limit of her ability is defined by what she believes she can do with it.
* ditzy is very much a parody of the type; she exists simply to look pretty and have Graham Chapman's character explain the plot to her. He eventually becomes so frustrated with her stupidity that he knocks her out and explains the plot to himself instead.
* Ditzy Secretary: A bumbling secretary not competent enough for their job.

* Ditzy Secretary, and she'll even sometimes discuss this if you talk to her in her RV.
* Ditzy Secretary: How can someone as stupid as her have the job of a secretary?
* Ditzy's first season) had a slight Valley Girl accent in the very early season one episodes, despite her being a huge tomboy.
* Diurnal Nocturnal Animal: A nocturnal animal is somehow active during the daytime.
* Diurnal Nocturnal Animal: A nocturnal animal is somehow active in the daytime.
* Diva, Alba, a young lady, is shoplifting lp records in a store, sneaking them into a hidden compartment in a portfolio case. When a clerk asks to examine the case, he only finds several nude photos of her, and hands it back with embarrassed apologies.
* Diva Dirt, and would resist no opportunity to criticise Ashley's appearance and wrestling. Whenever fans complained that she was going too far, she would respond with variants of "it's my opinion and I'm entitled to it". She did however appear to realise her mistakes once the website's popularity grew, and the writing became significantly more professional.
* Diva Dirt Bobby when he was too busy with college work. This led to the less popular Jack taking control of a lot articles; he became infamous for jokes that weren't funny, getting the names of moves wrong and some oddly selective favoritism when it came to certain women. Then the rest of the site's writers left, and were replaced with people they'd found in the comments - giving it the feeling that it had gone from legitimate news site to blog with multiple contributors.
* Diva Dirt for example had loads of fans before she had even debuted on TV.
* Diva Dirt got in a fantastic one in one editorial (and note that the website doesn't have a policy against swearing):
* Diva Dirt was being cancelled. Cryssi seems to have embraced this attitude since around mid-2011.
* Diva does this too. Some by choice, some by force. None of them had any complaints.
* Diva Plavalaguna, though the character is noticeably taller than her actress Maïwenn Le Besco (who still happens to be 175 cm).
* Diva'ratrika, the matriarch and empress of the drow, was a ruthless commoner-hating, child-beating
* Divas are of noticeably different body shapes than the rest of the roster and so are not really pushed forward as the "sexy" divas. However, when they do clean up, the result is jaw dropping. Tamina especially considering what wonders straightened hair and figure flattering clothes can do:
* Diva's daughters are an even better example. When they emerge from their cocoons, they already have full heads of hair, as opposed to small tufts on their foreheads as Saya and Diva had, and after a moment or two of crying, they quickly shift to smiling and giggling.
* Divas In Hedonism' left nipple is visible in her open shirt at the start of her segment.
* Diva stalks an opera star, then finally meets her ... and she sleeps with him.
* Diva Starz toyline. She's also a DJ, having DJed at Michael Jordan's 50th Birthday Celebration and his 2013 wedding reception, as well as at Jay Leno's farewell party.
* Divatox badly for her, as one of them shot her in the tongue when she tried to snag them with it; the whole rest of the episode had them trying to avoid and hide from the very sore and pissed-off villainess as they tried to escape.)
* Diva was off-handedly implied to have had sexual relations with some of her chevaliers, although that was Amshel's initiative, not hers. At least one of her chevaliers, James, definitely holds some sort of affection for her.
* 'Divekick: 1v1 Jerma vs. STAR_ Curtain Showdown'), STAR_ tried to go for best out of 5 but seeing how the video ended right there, it did not work.
* Divekick because of how the backer's brother loved to always use random select in fighting games.
* Divekick concusses the opponent, making them lose all their special meter and

move slower the next round for a few seconds.
* Divekick, for a game that's very light on mechanics and very heavy on metagame.
* Divekick genre and the EVO pro-gaming scene. Instead of being a complicated fighting game with many buttons and combos, the game simply has two commands: Dive and Kick. The game became a huge hit in the EVO scene, because of its simple yet hard-to-master concept — creating many competitive matches. As a result, the creator of the game, in 2013, started heavily promoting it for release on the PlayStation Network and the PC, and it became a main tournament feature at the EVO Championships.
* Divekick, Kick's win pose has him pull a mic from his pocket and drop it on the ground.
* Divekick matches end in a draw, a giant blue foot comes down and crushes both combatants.
* Divekick Resident)" in reference to the site's 2012 Game of the Year video.
* Divekick tactic. The only controls? A button for diving and a button for kicking. It also originally had two characters, but the roster has since expanded.
* Dive Man has propellers in his feet, but no longer has a keel-shaped chest, nor does he fire Dive Missiles from it, instead firing them from a cannon on his left arm.
* Dive Quest's goal is to "become the Devil" and has no qualms about burning down peaceful villages and assassinating his rivals to get his way.
* Diver Dan, constantly retorts "Call me 'Baron' [epithet]!", only to have him respond "Sure, Baron [Epithet]."
* diverged). She also says just last year a woman also was burned in the Philippines, so it still hasn't gone away entirely (however, this may have been a lynching, not a legal penalty).
* Divergence Eve. After her father dies in battle she joins to find out what he found in the military.
* Divergence Eve, flipping back and forth between 3D and 2D animation every few seconds. And it is VERY conspicuous, owing to the terrible quality of the CGI.
* Divergence Eve. Granted, she is about as good a character as it gets, so maybe it's a subversion?
* Divergence Eve is the ending; the rest tell the story leading up to that point.
* Divergence Eve Luke Walker in English dialog as a chief petty officer, but his bio in the opening credits gives his rank as sergeant. Every other character uses naval-style ranks, and no, the Japanese words for the ranks aren't the same.
* Divergence Eve when Bernard and Misaki are sneaking around a guard checks them and Bernard kisses Misaki to give an explanation as to why they were there. She blushed and it was never mentioned again.
* Divergence Fic that does stealing the scroll, the Wave Country mission, or the Chuunin Exams with any amount of creativity.
* divergence point is Thomas Jefferson's early death in 1809, starting a series of events that results in New England (along with a disillusioned New York and New Jersey) seceding from the Union, with military help from Britain.
* Divergent along with the rest of the Dauntless. As the first film mainly focused on Tris and her three friends, we can assume they were there but we just didn't see them.
* Divergent, as Tris goes into a simulation designed to emulate her fears she is attacked by a large number of crows. These turn out to be representative of something else as Four points out that she isn't really afraid of crows.
* Divergent Character Evolution: An adaptation redesigns a group of two or more identical characters and gives them differing personalities and characterizations so that they are easier to tell apart and aren't just clones of each other.
* Divergent Character Evolution, and Kenny ended up being killed off instead as mentioned previously.
* Divergent Character Evolution, and thus is a nonstandard example of this trope.
* Divergent Character Evolution to separate him from his brother, Yun.
* Divergent Character Evolution: Two or more identical characters are redesigned and developed so that they're better distinguished.

* Divergent during the zipline scene. She's the first person to come through the door onto the roof.
* Divergent has an interesting case in which the fans refer to themselves by whichever faction in the books they identify themselves with. (Dauntless, Erudite, Amity, Abnegation, Candor). However, sometimes "Factionless" is used as a general term for all of them, based off the name of one of the fansites. The common overall term is "Initiates".
* Divergent, it is mentioned that Four and Christina fall in love, on account of their shared suffering.
* Divergent, it's very easy to tell who belongs to what faction based on their attire:
* Divergent mentions how sometimes her parents would withhold food from her as punishment.
* Divergent: On her deathbed, Lynn admits that she loves Marlene, who, at the the time of her death, was dating Uriah.
* divergent paths, as well as the life of Counter Guardian Shirou. After this, he takes Shiro's magical education seriously, with emphasis on the skills needed to survive the War and destroy the Grail. However, things have already diverged as a result, as the Magi now know Shirou exists and some of his capabilities.
* Divergent) sacrificing the narrative energy of the first two books for a lot of exposition which shouldn't really be necessary at that point.
* Divergent series actually cut out a chunk of information from the novels to focus more on others.
* Divergent series, the serum associated with the Candor faction is, of course, truth serum, used for trials, interrogations, and Candor initiation.
* Divergent shows that the Amity Faction practices some sort of naturalistic religion.
* Divergent that the initiates take their test when they're sixteen, and Four and Eric's generation are eighteen. In the films they are played by actors in their late twenties, so their ages are left deliberately vague as a result.
* Divergent: The third book briefly mentions the Purity War, a conflict fought between the genetically pure and the genetically damaged. The result was the quarantining of several GD-dominated test cities in the Midwest (including Chicago) as a way to produce more GP people.
* Divergent. To say that they are angry, horrified, and traumatized is an understatement.
* Divergent trilogy kills off Tris, the narrator of the first two books and co-narrator of the third. The rest of the book focuses on Four as he comes to terms with her death.
* Divergent was shot almost entirely on location in Chicago where the film is set.
* Divergent (while on a proper date with Four, no less) as one of the first things they did together.
* Divergent, with the main protagonist, Beatrice Prior, renaming herself "Tris".
* Diversifying a Cast: Changing the ethnicity of minor characters to prevent the entire production from being homogeneous.
* Diverted: when North American airspace closed after the 9/11 terrorist attacks, thousands of passengers on transatlantic flights found themselves stranded in the small town of Gander, Newfoundland, whose inhabitants did everything humanly possible to provide for their needs and make them feel welcome.
* Dive was filmed in 2017 and released in 2018, but became dated immediately after its first week. The reason? The plot deals with a champion swimmer who becomes pregnant. Abortion was illegal in Ireland since the signing of the 8th Amendment of the Constitution of Ireland, which gave the unborn fetus the same rights as a living human, thereby making abortion illegal, in September of 1983. That amendment was repealed exactly one week after the premiere of the film.
* Divide and Conquer novels (yes, they exist), subverts this. Lots of trouble ensues because Cobra was just as happy to have the huge bulky disintegration ray as they were to have the small portable version. Things went blooey just as well with either one. There was almost a mutiny when one of the Cobra lieutenants guarding

the device decides he wants to rule everything and will zap those who disagree.
* Divide and Conquer that this would always happen in some of the movies he would do. Grodd of course waves him away saying how there's no way it could happen...
* Divide and Conquer: When a villain gets his enemies fighting each other instead of him.
* Divided And Entwined, this is the reason Hermione finds herself wanted as a murderer: when two Aurors come to her home to interrogate her about Umbridge's disappearance one of them pulls out his wand, at which point Hermione, who had read on the papers of Aurors killing a number of Muggleborns in "self-defense", reacts with lethal force and then stuns the other.
* Divided for Adaptation: A long work has the adaptation divide it into two or more installments.
* Divided Rainbow, both Rarity and Twilight know healing magic. Other unicorns, such as Drs. Osteoblast and Osteoclast of Bramblewood Hospital, have mastered this power to such a degree, that their horn-healing can take the place of major surgery.
* Divided Rainbow is nothing short of merciless, uniting all his fellow animals against Rainbow Dash in a nonstop campaign of torment.
* Divided Rainbow: Lero runs into a giant ("as tall as a rhinoceros, and equally as wide") seven-legged spider (the eighth leg is just an infected-looking stump) in chapter 3, and names it Mr. 7. He very nearly gets killed by it until Rarity shows up to help.
* Divided Rainbow, Rarity's favorite pet name for Lero Michealides is 'my sweet prince.'
* Divided Rainbow, several of the Sicklefin gangsters were submitted by fans.
* Divided Rainbow, this is brought on Twilight's friends by the Swap, to ruinous effect.
* Divided Sky, Kittifox and Stryde are a good example of this trope, where the mute friend picks up on this and a blind angel says bluntly, "You love her."
* Divided States of America is averted, though its political situation can be made extremely unstable.
* Divided We Fall allies regard you as a greater threat than their (and your) enemies.
* Divided We Fall: Dissension between the heroes gets in the way stopping the villain.
* Divided We Fall, USA became splintered into several smaller factions, complete with Texas declaring its independence.
* Divide the typical Fallberg sidekick into Scooby AND Shaggy, and it becomes obvious how this trope took the path that it did.
* Divide, Yang seems to blame Ruby for their current situation. While Ruby's decision to lie to Ironwood was reckless and needed to be addressed, Yang also deserves blame since it was her and Blake's unilateral decision to go behind everyone's back and tell Robyn Hill about Amity Tower that destroyed Ironwood's faith in RWBY and their friends.
* Divine Bells are a mischievous masked pair who play pranks on their king.
* Divine Blood are capable of this even if it's not their normal choice. They are canonically capable of:
* Divine Blood. First was the tanar with the KT event being theorized by the silthine. Then it was the war between silthine and tanar that destroyed civilization a second time. Then humans develop and rename the two races Demons (tanar) and Gods (silthine). Current hopes include avoiding a third civilization ending event.
* Divine Blood has a branch of psychic ability referred to as "Death Seers". Death Seers are naturally able to see and speak to ghosts, see how and in what way people have encountered or interacted with death and also see ways to slow down or advance the rate at which someone dies. Of the two shown, one is a demi-Goddess trained by humans and the other is a Demoness with a well known name. The demi-Goddess is absolutely shocked to learn that the Demon hasn't learned practically anything about how to use her death seer powers and is afraid of ghosts to boot.

* Divine Blood: Keiichi and Belldandy, and this is the first official interspecies marriage between any of the humanoids, despite the existance of half-breeds. They quickly become Insatiable Newlyweds.
* Divine Blood, Lady Tinia refers to humans as "monkeys", Hel refers to Naiki as a "deep one", Naiki herself refers to smelling the presence of a "cuckoo" and is reminded that they prefer "changeling" and several people refer to untrained psychics as "akiras". Also, a killer who Mao eliminates in the first chapter is called a "Van Helsing" since he was killing non-humans after learning they existed.
* Divine Blood Novels. Each one of the races has the power to enchant magical artifacts, and magic is just a type of technology. And each race, happens to have a material that is easiest to enchant. Dwarves can use bronze, so all their magical artifacts are made of bronze. Gods can enhance trees, so all their technology is tree-oriented. Humans can enchant crystals, so human artifacts are crystal oriented. This leads to situations like a God having a wooden shield that works as a force field.
* Divine Blood Novels have recently looked into cloning, but the first known clone died at six years old after a long history of medical problems. Cloning people has been banned until the reasons behind this have been determined.
* Divine Blood Novels on the characters and make it into its own novel.
* Divine Blood targeted at anybody with mental powers or borrowing mental powers via a spell. She mostly targets her own mass-produced biological daughters early on.
* Divine-Class Materials, they gain the privilege of summoning the Unexplored-Class Materials. However, a given summoning ceremony only lasts for ten minutes (barring certain exceptions), so they rarely progress to this level.
* Divine Comedy. Dante gives her the full blame for the Trojan War, as if she got herself kidnapped by the Trojan prince on purpose in order to give her own nation an excuse to invade Troy.
* Divine Comedy. Frasier and Niles console themselves by claiming that the critics would have picked up on the Dante allegory and torn the novel apart.
* Divine Comedy when commenting on the two pirates' "fortunes". Also, he's said to have learned his swordsmanship from an Italian master, and so knows the classical nuances of fencing (thus his commentary to Will Turner during their duel).
* Divine Divinity. Except a lot of them are wrong, sometimes dangerously so. (One claims that Othar will gladly let you kill his pigs, when he actually responds violently if you do so.) Fittingly, one tip is "Don't trust everything you hear!"
* Divine Divinity having a discussion. One explains how they don't eat because they have no stomachs, which leads to the other one questioning how they can talk without vocal cords. The first one agrees and says that, thinking about it, they shouldn't even be able to hold themselves together without muscle and skin. One of them remarks that realizing the truth would be quite unpleasant and the other agrees to drop the issue. Still, the seeds have been planted and they both collapse immediately after.
* Divine Divinity is a perfect example of this. Long, linear dungeon crawl to begin with, takes at least several hours to get through before you get to the heavily nonlinear and somewhat less combat-intensive main part of the game, which has heaps of interesting quests and whatnot. Technically it's possible to skip the dungeon but it makes it difficult somewhat because every other enemy around is well too tough at level 1.
* Divine Divinity, magic is unusable in the prison where Zandalor and the third Marked One is kept. There's also a death knight and substantial number of orcs between you and them. If you're playing a wizard, you're out of luck. (Although you can sneak by them using invisibility potions.)
* Divine Divinity mentions that she is pregnant, but she's only in her tenth month, so she's not showing any visible signs yet.
* Divine Divinity, most of which are highly entertaining short stories and at least two longer series, one about an Ork pirate and his adventures. Others show spells and demon summoning or are about the ingame world, describing plants, animals and monsters.

* Divine Divinity of their design, like how they really shouldn't be able to speak, walk, or even stay assembled without any muscle mass, skin, tendons, or internal organs. It eventually causes them to fall to pieces.
* Divine Divinity's final area, the desert of Yuthul Gor and its Black Lake dungeon fit this trope. The developers didn't have time to finish the area and were intending on cutting it from the game, but their publisher wanted an orange area for the back of the box, so it went in unfinished. You have to wade through hundreds upon hundreds of mobs of imps, spiders, and gargoyles to get to the final dungeon. Attempting to clear the map is an exercise in futility even for high level characters. Even when you do get to the dungeon, you then have to travel through dozens of copy-pasted winding corridors to fight the five evil wizards you fought earlier in the game again. Following that, you get a disappointingly easy final battle and a short and confusing cutscene to end the game. A shameful way to end an otherwise excellent hack-and-slash RPG.
* Divine Divinity then went on to spark an even bigger influx of newcomers to the series).
* Divine Divinity there is a brothel where a player of any gender can sleep with both male and female escorts.
* Divine Divinity with Kroxy, the orc warrior you need to recruit for the Council. He's the only orc in the game who isn't an enemy. Predictably, you find him locked up by his brethren and awaiting execution for disagreeing with their warlike ways.
* Divine Enforcer, which converts all inhabitants of a planet to spiritualism. Since robots and hive-minds can't be spiritualists, they will all be killed instead, leaving the planet empty.
* divine figurehead empress so they can rule in her name. They have no empathy for their people, seeing them as ants and toilet paper, and are willing to sacrifice all of China and its territories just for their personal gain.
* Divine Intervention: A god directly gets involved in mortal affairs.
* "Divine Intervention" caused a minor scuffle, dragging even a bodyguard hired by Sarah's family (whom Matteo allegedly punched) into the mess that eventually made national headlines.
* Divine Intervention have taken the batteries out of the remote, or gotten them from somewhere else.
* Divine Intervention" in season 1 episode 16 derails when the god shoots down Ruel's expectations.
* Divine Intervention, the little girl comes with a pair of knives and will stab you to death if she can.
* Divine Intervention: The zombie outbreak is caused by a Satanic ritual gone wrong, and at the end of the stage the player fights a chubby Satan-like demon as the final boss.
* Divine ki is noted to be denser and harder to control than mortal ki, but exponentially more powerful. It also requires specific methods of training or ritual in order to access, although it becomes substantially easier to do so once the user has activated it once.
* divine Knight of the Cross Michael. Conversely Harry's pentacle charm (a symbol of magic) will work for him, but not for Michael. Michael's faith in particular is strong enough that it's even able to cause a Red Court vampire (who is not particularly weak to symbols of faith) to instantly burst into flames on contact.
* Divine Lords of Tat'. While vulnerable to both regular and magical harm, their power levels and personal brands of
* Divinely Appearing Demons: An inhabitant of Hell being superficially similar to an angel or other Heavenly being
* Divinely Appearing Demons: Demons with a physical appearance similar to angels or gods.
* Divine Misfortune and several completely fictional ones but no mention of any version of the Abrahamic god is made.
* Divine Misfortune has at least walk ons by every Non-Abrahamic deity you could imagine including several entirely fictional ones.
* Divine Parentage: Imhotep, supposedly son of the god Ptah; the Egyptian kings who

claimed that gods fathered them; and whatever god(s) was/were responsible for Gilgamesh being 2/3 divine.
* Divine Pulse. In gameplay, your units can be seconds away from defeating the boss after an hour-long battle, and you are capable of Divine Pulsing all the way back to the beginning of the battle with no issue.
* Divine Race Lift: A deity is depicted with a different ethnicity than they are usually depicted as.
* Divine Race Lift: A deity's physical appearance is depicted differently depending on the adaptation.
* Divine Ranks: All the deities in a pantheon are classified into a hierarchy.
* Divine ranks do feature in 4e, they just aren't as prominent. In the core, there are two main divine ranks: Gods and Exarchs, or demigods. In the
* Divine Right of Kings: The monarchy exists because the gods chose someone to rule.
* Divine Right of Kings: When monarchs claim that their political power is justified by God's will.
* Diviner Maros of the Circle of Thorns exists at all points over a 14,000 year period simultaneously. Your conversations with him can be very confusing, even to him.
* Divine Shield which they can cast on their fellow party members, which makes them immune to physical damage for 8 seconds (but does not prevent magic damage).
* diving board plane with Dick Dastardly on it, so when he is directly above the pigeon, he will dive, catch the pigeon and land on a plane carrying a huge tank of water. Before the squadron takes off, Dastardly remarks, "OK... but I still think we're forgetting something." Remarkably, Dastardly actually catches the pigeon, but suddenly says, "Uh oh! Now I remember! I CAN'T SWIM!", sinks beneath the water, lets go of the pigeon and once again begs for Muttley to rescue him.
* Diving deep into the heroines' Cosmos Spheres series reveals their "true" personalities, thoughts, and desires under the masks of being pure, shy, cute, bossy, hotheaded, or whatever in the real world. Given how they present the games, Those heroines have... a lot of unhealthy suggestive things in their minds.
* Diving inside the Reyvateil's Cosmosphere, which consists of entering these worlds to solve their inner problems and find the feelings they can use to craft more powerful song magic.
* diving into an empty pool, the Critic ponders if this happened while the ad cuts away from the woman.
* Diving Officer: Lt. Emily Lake, though she later takes on the role of
* diving off of the wall after her that Suzaku would catch him—if not for his sake, then for Shirley's.
* Diving Save. As Kate is a lesbian, she just finds this annoying. Later when Kate saves the life of Parker Torres, Kate makes a point of establishing clear boundaries as her mentor so she won't have a smitten schoolgirl on her hands.
* Divining Rods and Dowsing more recently known as Radiesthesia. Divination using a forked stick, rods and pendulums for the discovery of hidden water and other metals, minerals, objects or missing persons.
* Divinity. Despite all this, regular magic has never had such problems.
* Divinity: Dragon Commander who will object to motions such as legally enforcing equal wages or recognizing gay marriage.
* Divinity II: Ego Draconis), but they have been hard at work preventing Damian from destroying the world ever since then, a task not made easier by having an organization dedicated specifically to their personal annihilation.
* Divinity II: The Dragon Knight Saga allows you to pick up a fully understandable sentence, which is always the same no matter when you do it.
* Divinity: Original Sin blinks a target (an item, ally or enemy) some distance away from the caster and into the air, causing damage when they hit the ground.
* Divinity: Original Sin, but fortunately you don't have to waste most of your AP moving. Even if it's a small click moving yourself a few pixels over, it does not drain your AP.
* Divinity: Original Sin has the Seven Gods who each created one of the six races

(humans, dwarves, elves, lizards, orcs, and imps) with the exception of Amadia, who serves as the patron god of wizards.
* Divinity: Original Sin has this with the two customizable protagonists that can be of any gender.
* Divinity: Original Sin if you make both of your player characters women and bring along Madora and Bairdotr in your other two party slots.
* Divinity: Original Sin II after being defeated, leaving the player to decide his fate.
* Divinity: Original Sin II; and at least one other assassin, who is trying to kill The Red Prince.
* Divinity: Original Sin II and make his followers suffer like they did.
* Divinity: Original Sin II buys from him, he'll cheerfully state that the burgeoning war might soon put them on opposing sides... in which case his prices will go up.
* Divinity: Original Sin II determined to rub Source magic off the face of Rivellon. They blame the recent Voidwoken attacks on it. Mundane magic spells don't bother them though.
* Divinity: Original Sin II, ghostly hands that do the same to any enemy standing in blood, and a spell that heals the target by absorbing nearby blood.
* Divinity: Original Sin II has been spoken in the Lizard Empire for centuries. In his defense, he's spent those centuries entombed underground as an undead, yet still apologizes for the misstep.
* Divinity: Original Sin II incident killing off a huge portion of their population, meaning it's going to take a long time to get back to the numbers they had before they were nearly wiped out, if they even can. This is a major issue that the elven leaders you speak to talk a lot about.
* Divinity: Original Sin II. In fact two of your selectable origins/potential party members (Sebille and Ifan) are both assassins, and the latter works for an organization of assassins (the Lone Wolves). You also encounter a few assassins trying to kill one of your party members, and the most common target, by far, is The Red Prince.
* Divinity: Original Sin II instantly kills anyone who enters a cloud of it, making it a deadly obstacle and potent weapon. It's also apparently mass manufactured, and stored in crates and barrels, and someone has stolen a very large shipment of it...
* Divinity: Original Sin II involves defrosting a family who were frozen to the spot by a surge of icy water by lighting torches nearby.
* Divinity: Original Sin II is overjoyed to be able to feel water on her face for the first time in centuries.
* Divinity: Original Sin II language communicate their meaning to the mind of anyone who tries to read them.
* Divinity: Original Sin II loft when you kill him). Some just have short statements they make, with no real way to help them move on.
* Divinity: Original Sin II minions who web them up and drop them into different cells. However, it's possible to bypass this part of the quest entirely by abusing the Teleport spell.
* Divinity: Original Sin II of its inhabitants and ravaged the landscape, making the Marshes what they are.
* Divinity: Original Sin II of quality-of-life improvements from the previous installment. Among these:
* Divinity: Original Sin II (or boy), whose gender is determined by the PC's stated preference.
* Divinity: Original Sin II's chief lieutenants. It's undermined slightly when the narrator nicknames him "Sallow".
* Divinity: Original Sin II system). It puts out fires like the regular Rain spell, but will also cause anyone in the area without physical armor to begin bleeding.
* Divinity: Original Sin II that prevents the target from using weapons.
* Divinity: Original Sin II that the bridge clearly hasn't been maintained at all by the State and is open to adverse possession.
* Divinity: Original Sin II, the lizards rule an ancient empire constantly at odds

with the other polities, and the dwarves are, unusually, gifted seamen and magicians. There are other races in the setting, most notably imps, orcs, and demons, but they're mostly in the background.
* Divinity: Original Sin II, there's a Pro-Royalist song about Beast, a disgraced noble-turned-pirate, falling out with his cousin Queen Justinia and being kicked out of her court. When Beast hears the song himself, he thinks it has some clever lyrics and that overall it's too funny to get mad at.
* Divinity: Original Sin II, they wouldn't be doing much talking anyway.
* Divinity: Original Sin II, well, her anger at her former master goes through the roof.
* Divinity: Original Sin II, which is another reason why it's taboo in certain circles. There's traditional magic, spells, and abilities, but stronger ones require Source for use.
* Divinity: Original Sin II, which requires you to smuggle the man out of town to keep him alive.
* Divinity: Original Sin II while Almira is in Magister custody. They deserted their respective factions and ran away to be together.
* Divinity: Original Sin II who forged a tyrannical regime in Rivellon, now merely part of an ancient ruin.
* Divinity: Original Sin II, you encounter Bishop Alexandar, Magister Dallis, and Dallis' two pets interrogating another magister before killing her. You're obviously not supposed to be able to kill any of the four, as they're level eight and you're level one or two at this point. However, clever players have found a way to kill three of the four (Dallis can't be killed with this method for plot reasons). On the ship you start out on, quickly grab a deathfog crate or barrel from the bow room before the Kraken destroys all of them, then drop it on top of Alexandar when you reach him. As deathfog is an instant kill on the living regardless of level or stats, this will kill him and Dallis' pets, though, as noted, will leave Dallis alive.
* Divinity: Original Sin II you investigate the disappearance of Arhu, you'll be caught by a dozen or so guards and the leader of the paladins... in his ransacked rooms, going through his stuff, while he's nowhere to be found. While this paints a pretty damning picture, you can actually talk your way out of it. At least, you can if your Persuasion stat is high enough. Then it's back to solving the case!
* Divinity: Original Sin). Later on, this is subverted when you discover a way to disable their invulnerability, after which they become a regular, if tough enemies.
* Divinity: Original Sin, player and enemies are all affected by terrain. Be it via a spell (like Midnight Oil) or natural, its effects will affect every unit. Both can also interact with the terrain condition using spells or scrolls. A puddle of water could be turned into a static cloud if one were to use a lightning spell on it, whereas using a fire spell on an oil puddle will set it ablaze, damaging units that stand in the fire.
* Divinity series; regular magic and Source magic. Regular magic is the usual fantasy magic, with fireball and polymorph and the like. Source magic tends more towards esoteric powers, like blessing people or producing orbs that can heal any ailment.
* Divinity world, while the robots and androids break pretty much every established rule for how constructs work in the setting.
* Divinyls' hit "I Touch Myself". Singer Christina Amphlett was trying to conceal her true age (she was about 32 at the time, probably more than a decade older than most Top 40 female pop singers).
* Divisibility is an illusion. All things are one. It is more true that we are a piece of the universe than we are individuals.
* Divisional Champions", a combination of an insult and a reference to the Cowboys' years of being this trope in the 60s.
* Division by Zero. In a multiverse abandoned by God, its denizens are condemned to be free. Cast into an unsympathetic existence, two planets wage war that spans eons and spares none, sweeping Kohana Outtaike, a 15-year-old girl from Earth, into its chaos. Guided by Hiroyuki D’Accardi, her Spectrian Advisor, she becomes a

general in a conflict upon which the fate of the multiverse hinges. Allied with 7 others like her subjected to the same fate, Kohana must confront God, who created the multiverse out of nothingness, and its creations, who create nothingness out of the multiverse.
* Division by Zero they ever recover? It does not shy away from suicide and we are walked through it, thoughts and all, attempt after attempt, each time raw and visceral. It is both profound and unnerving all at once, children mercilessly thrown into a cosmic war they have no business fighting—they can barely take care of themselves. It promises the gritty details into an inevitable descent into insanity (or several), and the plummeting feeling of jumping from gut-wrenching heights, and that is to say nothing of the Eldritch Horror of it all.
* Division by Zero. We live in infinite and absolute freedom, because we were not created like the knife, with a purpose and explicit meaning in mind. There is no higher reality to be accountable to, or dependent on. No one can hear our screams, pleas or weeping. a/0 explores the horrific terror of existence without a creator, and how its characters—be they human, gods, or the inexplicable—are inevitably doomed to death. The story itself follows characters trying to navigate this existence, with most unaware of the immutable Crapsack Multiverse they are in.
* divisions. If a division was commanded by a colonel, they didn't even bother to promote him.
* Divisions of Mithril. Intelligence and operatives in particular. That was probably the main reason why Sōsuke was reluctant to leave Kaname protected by Wraith (who was from Intelligence).
* Division, the villains of the first two seasons. They're supposed to be a U.S. government intelligence agency, but in practice they're in the business of carrying out assassinations and terrorist attacks for money, with a side of arms dealing, drug trafficking, and money laundering. In Season 2, their leader goes full Blofeld and hijacks a
* divisive and was only rivaled by Rose Tyler, with Amy being loved for being one of the most complex companions and having very compelling chemistry with the Doctor.
* divisive have been better received. Same with the inclusion and casting of fan favorites Casey, Bebop and Rocksteady.
* divisive, with those that use the "wrong" terminology on purpose due to their preference for them.
* Divocí a zlí), the protagonist (who in the backstory comes from a post-apocalyptic future, and yet understands modern Czech) ends up helping Alfred the Great fight off some Danes and Swedes. And has no problem understanding and communicating with the locals. To put into perspective, Beowulf was written somewhere around that time.
* Divorce Assets Conflict: A divorcing couple demand they split up their possessions between each other, which leads to them going at each other's throats.
* Divorce Assets Conflict, and therefore much less realistic without some explanation as to why there was no prenup.
* Divorce Assets Conflict: Two characters decide to get a divorce, but deciding who gets what part of the property is a big hassle.
* Divorce Court. All stories were said to be "based on actual cases," but with the names changed.
* Divorce Court: In the mid-1980s dramatized version, a woman fed up with her husband and boorish beer-drinking friends fixes chili con carne, not telling them until afterward that she had substituted dog food for the hamburger. (Fortunately, nobody got sick.)
* Divorce Court — at least with the scripted 1957-1969 version, likely early in the series' run, this was used as a plotline at least once. Whether it was just a standard case of a woman looking for more excitement, thinking she could get away with it, or it rose to a more serious issue with the husband's health will likely never be known as many of the 1950s-1960s run have been erased.
* Divorce Court: Several episodes of both the 1960s and 1980s versions used this as the plot's backbone, invariably following the formula of a woman really wanting to

change an alcoholic/drug addict, abuser, criminal etc. of his ways, but he not only refuses to change he becomes worse. The judge would always deliver the message to the wife after finding in her favor: The man she wanted to reform needs professional help and likely will never change even with repeated counseling.
* Divorced: After 7-year old Mina walks in on her parents naked in bed, she asks them why they're naked. Much to Zelda's embarrassment, Ganondorf explains to her about sex. Gerudos and Hylians have different standards on when it's appropriate for kids to learn about reproduction.
* Divorced: Catherine of Aragon and Anne of Cleves, the two wives that Henry divorced, were the only two wives who had titles of their own anyway, and both eventually died of cancer. Also, they lived to the oldest ages out of the six; Catherine was 50, and Anne was 41 when they died. Making the similarity even more bizarre, both spent the final years of their lives with Henry classifying them as sisters of a sort; Catherine had been married to Henry's brother Arthur before Arthur's death, so Henry classified her as his widowed sister-in-law, and Anne was treated as an honorary sister due to the agreement she had made with Henry when the marriage was dissolved (though the latter lived out her days in better conditions due to her acceptance of the separation).
* Divorced: Ganondorf is jealous of his wife Zelda's relationship with Link. Despite being bearers of the Triforce, Zelda and Link are just friends. Link already has a kid with Illia anyway.
* Divorced Installment: A work originally planned as part of a specific franchise ends up retooled into being its own thing.
* Divorced Installment: A work was originally intended to be part of a specific franchise, but instead gets retooled into its own thing.
* Divorcees may, to celebrate the final dissolution of the marriage, smash their wedding ring with a sledgehammer.
* Divorce in Reno: Necessary in the days when non-consensual divorce outside Nevada was a tricky deal in America, not so much now.
* Divorce in Reno: Reno, Nevada is the best place for couples to get divorced.
* Divorce Is Temporary: When a married couple will not be separated forever.
* "Divorce Italian Style" (after which the movie mentioned above is named) was Italian slang for "man wants to get rid of his wife, so he arranges for her to sleep with a friend, catches them in the act, murders her and gets away with a slap on the wrist". The action stopped being committed after the Italian law permitted divorce (and an attempt to get the law abrogated by referendum
* Divorce Italian Style specifically mentioned in the Penal Code until 1981.
* Divorce Requires Death: A person ends their marriage by killing their spouse.
* Divorce Requires Death: A person (usually the bride) ends their marriage by killing their spouse.
* Divorce Requires Death: One half of a married couple must be put to death if they want to divorce.
* Divorce Requires Death: Wanting to leave your spouse means one of you will have to die.
* Divorce Requires Death: When getting a divorce requires one half of the couple to die.
* Divorcing Jack, the protagonist cheats on his wife and she melts his prize records in retaliation.
* Divs who force people into worshipping them through oppression. These figures are much more closer to people than they are to the cosmic twins, and many beasts and even some people can rise to their ranks. All of them are bound by the powers of the side they choose.
* div This five minute skit uses it twice! (Pay attention to the chaos that effects 2 characters...)
* "Dixie Boy" by April Smith and the Great Picture Show is about a woman who threatens to fight anyone who flirts with her man.
* Dixie Carter responded negatively on Twitter to a negative review of
* Dixie Chicks (although Ty England also recorded it in between). Bruce's sister-in-law, Emily Robison, happens to be one-third of the Dixie Chicks.

* Dixie Chicks" features a kid stomping a milk carton with Earl's face on the side.
* Dixie Chicks' "Goodbye Earl", about a woman who, with the help of a high-school friend, kills her abusive husband Earl. In the video, the whole town celebrates Earl's death.
* Dixie Chicks "Goodbye Earl" uses a tarp and a remote, rural lake to get rid of Wanda's abusive ex-husband.
* Dixie Chicks includes a brief track titled "Ain't No Thang But A Chickin' Wang", which consists of silence. Apparently, on promo discs, this spot is taken by an actual song - the otherwise unreleased "Wherever You Are." This track was a duet with an artist named Deryl Dodd, who wanted to re-record his contribution for the final album, but fell ill before doing so.
* Dixie Chicks is about a woman and her friend murdering another friend's abusive ex-husband.
* Dixie Chicks is about a woman who gets together with her best friend to kill her abusive husband.
* Dixie Chicks lampshaded the stereotypes of their people in their humorous song "White Trash Wedding," with the refrain "I shouldn't be wearin' white and you can't afford no ring" concluding with "Say 'I do' and kiss me quick, baby's on its way!"
* Dixie Chicks of this trope since the song is actually about falling in love as opposed to dying.
* Dixie Chicks' video for "Landslide", Emily Robison was clearly pregnant and not hiding it during the video shoot.
* Dixie Chicks, who also released a song critical of the Iraq war, and said that he thought that attacking the Dixie Chicks for exercising their right to free speech was "an insult for all the men and women who fought and died in past wars".
* Dixieland Droopy as well, most noticeably as "John" runs through goopy tar and the flea band slows down, strains, then returns to normal when he extricates himself.
* Dixieland Droopy at the midpoint. Once free of the tar, John resumes running at full tilt as his fleas play furiously fast.
* Dixon of Dock Green saw Dixon collaring a corrupt colleague, demanding that the corrupt copper remove his uniform (jacket only — this is a family show) so that Dixon could arrest him.
* Dix pour cent, everyone in the conference room gasps when Hicham throws a pencil at Andréa as though they're both high schoolers again.
* Dix pour cent) getting stuck in-character as a World War I deserter, resulting him building a shelter out of sticks and continuing to hunt rabbits, not shaving or showering, in his own yard. The other agents reference Daniel Day-Lewis and how he got out of it by learning Italian shoemaking—or the cheaper, more efficient method of getting him drunk. Andréa and Dujardin's wife opt for the latter.
* D.I.Y. Disaster: Someone decides to perform a construction work by himself to save himself some money or bolster his sense of pride, only to prove so colossally awful at handiwork that repairs (or replacing) will have to be made.
* D.I.Y. Showcase, revolves around a nose-shaped alien ship and missile fingers.
* dizi), and later starts taking MMA classes, something that has the added benefit of helping her with her anger management issues by allowing her to vent on something.
* Dizzy: a game character and series based around the idea of rotation.
* Dizzy Doctors. Subverted in that the third dog’s name is Mae instead of Florabell.
* Dizzy from the 8-bit games. Though they don't exactly look like ones, there is a textbox in the third game that proves that yes, he is indeed wearing boxing gloves.
* Dizzy game made use of an engine for rotating sprites in real time, allowing the hero to roll and tumble. However, the engine worked best on simple shapes, such as circles - and thus, Dizzy became an egg.
* Dizzy Gillespie's face with the bulbous lips when he played the trumpet is more iconic than the number of people who can identify his name, let alone one track by him.
* "Dizzy with a dame" - crazy in love, sometimes risky if she's a moll

* DJ’s flaw is cowardice. In seasons 1 and 3, he let his fears get the better of him, and was disqualified as a result.
* DJ and Geoff. While sports isn't as much of a defining characteristic for them compared to Tyler, they're both described by their official bios as being star players on their high schools' football team and are very much
* Django, bandits ride over Django's hands with horses in retaliation for stealing gold from them.
* Django gets his fingers trampled by a dozen horses as a punishment for stealing gold from the gang of Mexicans after having helped them steal it from the army in the first place.
* Django series. 2 official films and over 30 unofficial ones since 1966.
* Django, the titular hero nearly downs in one after the gold-loaded coffin he drags behind him slips from his grasp. There's a bit of foreshadowing at the start of the film; Django kills a handful of mooks, the last mook falls into the quicksand and is instantly swallowed.
* Django Unchained (2012), a revenge story about an ex-slave out to rescue his wife.
* Django Unchained, a classic of the latter genre, and it even features a cameo by that film's star, Franco Nero.
* Django Unchained, and also explains why Calvin Candie has a bandage around his hand for the remainder of his scenes.
* Django Unchained as a Black ex-slave and was both a critical and commercial success.
* Django Unchained, certainly thinks himself a wise and cultured man, particularly with his love of French culture. However, he doesn't speak the language (guests are specifically advised not to speak French around him so as not to embarrass him), doesn't know his favorite French author Alexandre Dumas was black, and justifies his beliefs in racial superiority with pseudo-scientific phrenology (already discredited among scientists even at the time).
* Django Unchained delves into this and leads to a funny moment when Dr. Schultz barks "STOP PLAYING BEETHOVEN!"
* Django Unchained: Dr. King Schultz shoots Sheriff Bill Sharp to death in front of a large number of the latter's townsfolk, resulting in a tense exchange between 100 armed individuals including US Marshal Gil Tatum. Schultz manages to defuse the situation by revealing Sharp's past as an outlaw, and the $200 bounty on his head.
* Django Unchained, Dr. King Schultz speaks English, German, and French. Not surprising since, as mentioned below, Christoph Waltz, who plays him, speaks all three languages.
* Django Unchained: Dr. Schultz does most emphatically not approve of slavery, but initially seems to be more offended by it on an intellectual level, i.e. "How can you people be so stupid that you think basing your entire economy on slave labour is a good idea?". However, it quickly becomes apparent that he sees slaves as people, and his facade cracks at inopportune moments.
* Django Unchained. Franco Nero, who played the original Django, makes a brief appearance and discusses the pronunciation of the main character's name.
* Django Unchained has a nearly three-minute argument over the practicality of the bags they are wearing on their heads, since apparently the eye holes were misplaced.
* Django Unchained. His German allows him to have a conversation with Broomhilda without the others listening in, and his French is used to highlight that Calvin Candie is nowhere near as intelligent or educated as he affects himself to be.
* Django Unchained is stated to be a francophile who prefers to be addressed as Monsieur Candie. He also doesn't speak a word of French and is shown to be fairly dim and repugnant as a person.
* Django Unchained is the one who first notices Hildy's tension with Django, and it's her lighthearted jest about it that draws Stephen's attention to them enough for him to work out the rest. It's possible that the plan would have gone off without a hitch had she not noticed or not chosen to joke about it.
* Django Unchained, only for Candie to demand he shake his hand like a partner lest

everything be undone. Schultz, despite being in the room with an armed mook, instead opts to draw his gun, kill Candie, and shrug:
* Django Unchained on the plantation owned by the sadistic Calvin Candie. It's a metal enclosure in the ground exposed to the humid Southern heat, which was used on Django's wife Broomhilda as punishment for trying to escape Candyland.
* Django Unchained on two mooks, who reflexively then blast each other again for good measure.
* Django Unchained revolves around an escaped slave named Django, who was rescued by the bounty hunter Schultz after killing some slave traders, because Django can identify several men he's trying to track down for a large bounty. After working together to collect on some of his former tormentors, Django and Schultz go off on a quest to free the former's wife Broomhilda from a distant plantation. At first they try to legally (but deceptively) buy her freedom, but after that plan gets scuttled to hell thanks to the machinations of Stephen, Candie's head house slave, Candie extorts a huge sum from them for her. They're willing to pay the price regardless, but Schultz' disgust with Candie gets the better of him as they are about to close the deal, with deadly consequences for many of the people involved. In the end, Django is left with no option but to save Broomhilda by force.
* Django Unchained tends to bang on whatever hard surface is in front of him (or clap if there isn't one) for emphasis when speaking.
* Django Unchained, their leader, Big John, is about to whip another slave for breaking eggs. After shooting and killing Big John, Django takes the slave-driver's whip to Roger, the one who whipped Broomhilda, in an awesome act of vengeance before killing him with his own gun.
* Django Unchained, the plantation of a particularly sadistic slaveowner, Calvin Candie, is called "Candyland".
* Django Unchained, the titular character shoots Billy Crash non-fatally, and he writhes around on the ground screaming; then Django shoots him in the groin and the screaming instantly climbs an octave.
* Django Unchained, this is pretty frequent. For example, Calvin Candie pulls out the old Phrenology justification for why he thinks whites are superior.
* Django Unchained. To that effect, there is an extended scene where corpses are gorily pulverized by multiple hits while Django takes cover behind them. This, like many other entries here, is sort of reasonable in context: black-powder revolvers and rifles of the era had rather anemic muzzle velocities and fired heavy, soft lead bullets that tended to stop inside the body rather then overpenetrate.
* Django Unchained were bound to cause controversy in certain parts of the United States (along with the film's graphic violence) but it hasn't stopped the film from being a critical and financial success.
* Django Unchained when Django showed up. He killed John, then used the whip on Roger Brittle before killing him.
* Django Unchained, where action figures were pulled after only a couple of days on sale after protests from African-Americans that the toys were making light of slavery. (Inevitably, those that did get sold are now going for stupid prices on auction sites.)
* Django Unchained, where Stephen mentions that "one word of sass" from the slaves at the LeQuint Dickey Mining Company gets their tongues cut out. They're good at it, too, so the poor saps don't even get the mercy of bleeding out.
* Django Unchained, which went to hell due to Stephen, Candie's head house slave, twigging to the real reason the two were there. It was also how Django himself was originally freed at the beginning of the movie, though the two brothers transporting him and other slaves died soon after Schultz "bought" Django.
* Django Unchained wields a hammer threateningly when he figures out Django and Schultz's real motives for dealing with him.
* Django Unchained with hints of Vaporizer during the bounty hunting montage.
* DJ Assault takes it to a new level by not only including the listener's mom, but the entire family, in
* D. J. briefly had a bossy girlfriend eerily reminiscent of his mother. It forced Roseanne to wonder if the way she treated Dan was having a negative effect on him

(though of course,
* DJ Earworm, it's possible to take a song lyric and recontextualize it entirely in a mashup, sometimes reversing its meaning, something he does in several of his own mashups.
* Djelibeybi of Egypt, all myths are true concerning their gods, which have been evolving and developing for seven thousand years. The priests are said to "never throw away a god in case they turn out to be useful" and to be able to "give headroom to a collection of ideas that would have made a theoretical physicist give in and hand in his badge" (paraphrased).
* Djel Sanes claims that all the torturing and murdering done by the
* DJ ends up trying to get eliminated. By "Newf Kids on the Block", he's the last member of his team and plans to get eliminated by refusing to sing during the song, which would get him kicked out. However, Heather is attempting to get him on her side, and tries to make him sing during "Sea Shanty". After spending most of the song in silence, he finally breaks down:
* DJ Gappa of Baron Omatsuri's crew, possessed by Lily, broadcasts on the SBS to invite them to come to their island
* DJ Hero, and repeat. Needless to say, doing this many times in quick succession can be physically painful.
* DJ Hero, unlike the other "Hero" games, never featured a meter showing the general quality of your performance, making failing a song impossible.
* DJ Icey's remix more or less completely recreates the track from the ground up.
* Djimon Hounsou was nominated as Lead), despite the fact that the entire story revolves around Hounsou's Solomon Vandy going on a quest to rescue his son.
* Djinn after Jade's disappearance and before his inevitable overthrow by Enver Pasha.
* Djinn are usually tied to Blue mana; they are usually associated with either air or water, more commonly the former. They often have powerful abilities, such as
* Djinn: Kim Nelson looks just like her grandmother Jade, the key difference is that the former has straight hair while the former is curly.
* Djinn, No Chaser": In this 1982 story, shopkeeper Mohanadus Mukhar tells the shoppers outright that his shop will only be there for "...how long I do not know."
* Djinn of Infinite Deceits; modern ones resemble blue-skinned, pointy-eared humans instead. The ones from the plane of Tarkir also have horns.
* Djinn rolls her eyes, says "for God's sakes," hauls off, and punches him across the face.
* Djinn Rummy, an immortal genie falls in love with his human female master, although it's because of a love potion.
* Djinn Rummy misinterpreting every wish in a way that lets him try to destroy the world...
* Djinn Rummy: when the genies get together of an evening at their local pub, they like to reminisce about the mortals they've tricked this way (or, at least, some of them do).
* Djinn takes place in the eve of World War II, but it takes a lot of liberties:
* ''Djinn: The Binding''. Let's just say that his version of what happened is different.
* Djinn: The main protagonist Kim Nelson is British, but she has a noticeably tanned skin due to Turkish descent from her grandmother Jade, with whom Kim is the spitting image with the exception of having straight hair instead of curly.
* Djinn. While they may mess with humans, especially when provoked, the general rule is that they will leave you alone if you leave them alone.
* DJ Jazzy Jeff & The Fresh Prince, Fresh Prince's night is going well until his companion unbuttons her shirt. Due to this, he fails to notice a police car and gets pulled over for speeding. This leads to an arrest and no doubt severe punishment from his parents.
* DJ Jazzy Jeff & The Fresh Prince: "Just One of Those Days" has a scenario where Fresh Prince is on the verge of being late for work, and gets increasingly desperate to get there on time:
* DJ Jazzy Jeff & The Fresh Prince. The 1988 re-recording tones this down to a

simple shove to make Prince more sympathetic.
* DJ Jazzy Jeff & The Fresh Prince titled "Who Stole the D.J?" The song casts Fresh Prince as a police detective assigned to find a kidnapped nightclub disc jockey.
* DJ Jazzy Jeff & The Fresh Prince was only launched into superstardom (first as a rapper, and later as a film star) after going solo.
* DJ Jimi's "Where They At": "It must be your pussy cuz it ain't your face."
* DJ Juanito. The expansion pack even gives you an option to shoot him.
* DJ Kenny Everett claimed to have exploited this trope in the 1960s when he was looking for a job at
* DJ Khaled episode "The 87 Cent Solution!" was originally just a temp track for the episode's animatic, but the crew loved it so much that they eventually pushed to get the rights to use the song in the actual episode.
* DJ Khaled has had three top 10 hits (including the #1 "I'm the One"), but "All I Do Is Win" petered out at #24. Also, his two biggest hits, "I'm the One" and "Wild Thoughts", are often primarily associated with
* DJ Krush; after discovering that it had belonged to his best friend, he decided to leave.
* DJMAX, if you hit the wrong key for a note, you will still get the full percentage for it, but only get 80% of the points. The inclusion of this has proven very controversial among fans, because now you can full-combo or get 100% on a song without even hitting the right buttons at all.
* DJMAX, in which multiple players line up and take turns on the machine on a per-swipe basis.
* DJMAX Online had free songs, but also premium songs that cost 1 credit per play, and credits must be bought with real money.
* DJMAX Portable's 4 Button mode. It doesn't help that players who use 4B get used to it, and thus have much trouble progressing to any of the more difficult button modes.
* DJMAX-specific controllers anyway, for those who still wanna go the extra mile).
* DJMAX's touch screen handles touches, you can do tap notes by dragging your finger across them, and conversely, you can do chain notes by individually tapping each individual segment. Whether this is a legitimate way of playing the game is a matter of debate.
* DJMAX such as "Blythe" and "NB Ranger", and gives them new, usually-easier charts. Fans complained about the new charts.
* DJMAX Technical courses have you select three songs, do those songs, then face a boss song (that is not revealed until you get to it). However, clearing the first two stages with at least 95% of your hits being rated "MAX" will bring up an alternate fourth song. For example, the Customizer course's normal final boss is "Son of Sun," and the TFB is "Sin."
* DJMAX Trilogy Maniac" by playing songs whose background animations star glasses-wearing characters a combined total of 100 times.
* DJMAX where you gain unlocks by simply going onto the Platinum Crew website and purchasing the unlocks once using your in-game currency. The one flipside to this is that unlocks are fairly expensive, especially for the more difficult songs.
* DJ Phantasmagloria, a DJ Boss Ghost, does a few dances moves once she realizes she can't escape her capture.
* DJ Pon-3, Octavia, Davenport, Lyra Heartstrings, and Lyrica Lilac are all referred to as such in
* DJ Shadow's early works were heavily trip-hop influenced while his last album encompasses indie rock and 'hyphy' influences.
* D.J.'s problem in "You Pet It, You Bought It" comes with her being allergic to a Donkey Michelle brings home that stays in the night a day before her own Picture Day. Come the next morning, she has a stuffy nose and blood-shot eyes due to said allergic reaction.
* D.J.'s punishment for grand theft auto was equally bad, if not worse. Roseanne would bring him to school, except
* DJ Subatomic Supernova after his defeat at the hands of Bunk Bed Junction.

Appropriate, given his whole cosmic/space theme...
* DJ Subatomic Supernova inverts this during the transition from his third phase to his final phase in
* D.J. walks in; just as Darlene is about to say something, Roseanne tells her to shut up.
* DJ YOSHITAKA. While there are other BEMANI musicians who use this tempo and Yoshitaka makes songs with other tempos, he's associated with 185 BPM more than other musicians.
* DK and Diddy do this in the reveal trailer for King K. Rool when Dedede removes his disguise.
* DKC, just about everyone in the extended Mario universe seems to do that (presumably he built his own karts.)
* D'Ken, and wipes out the Grey family bloodline to boot. He gets killed by Gladiator for his trouble.
* DK: Jungle Climber is a perfectly pleasant banana-shaped alien who only wants to get his stolen crystal bananas back from King K. Rool.
* DK Rap was released on the Wii U Virtual Console, it stayed rated E despite the lyrics being unchanged.
* Dlanor A. Knox killed her own father after he violated the Knox Decalogue. Afterward, she
* DLC character Sebastian is the least self-flagellating, possibly because he
* DLC character she came from), his father, or even his half-brother otherwise.
* DLC "Feastday Pranks" has the Butterfly Sword, with the special properties "Rainbow Power" and "Attracts Butterflies". It happens to be a decently powerful blade for the early stages of the game. If you happen to use greatswords or don't mind the -50 approval hit that Sten, the intended recipient of the blade, will take, it's actually useful.
* DLC, if you pursued a romance with Merrill and take her and Anders with you, Anders might note how he saw her poking around his books the other day. She explains that she wanted to find some "dirty spells". Before the conversation escalates, Hawke stops it with a "Please, stop talking."
* DLC, it reveals that he's robotic underneath but amusingly is called "N0t C4n0n".
* DLC, Lair of the Shadow Broker, there's Tela Vasir. She gets tackled by Shepard out of a four story window, gets in a really nasty car wreck, loses an enormous amount of blood, gets slammed in the face by a flying table yet she still provides one of the toughest (and most awesome) fights in the entire series.
* DLC Quest; buying it has no in-game effect. Except you need it to complete the game; your horse tries to rescue you in the final battle, and if you didn't buy the armor, the final boss will kill it and you in a single hit.
* DLC Quest where everything has to be bought from the ability to move to the left to the ending of the game. Fortunately, you have to pay with in-game money.
* DLC; some of the information he gives, such as how he's the person to inform you when your spouse has been kidnapped by vampires, he couldn't have known any other way...
* DLC's playable characters, though this was probably not intentional.
* DLC, while the real ones are interrogating a Hyperion prisoner. Brick plays Maya for example.
* DLC will find it a waste of effort, and support cutting it down and giving it to the wolves or leaving it there.
* D. L. Hawkins has this as his special power. He can use it selectively, allowing him to touch one object while phasing through another, thus providing a handy rationale for the "floor problem". He can also use it in a lethal fashion, such as
* D'LIRIUM crawling with demons. Only the occasional holiday tree and present box, or a series of lights hanging limply from the ceiling juxtaposed against bloody sigils and mutilated bodies remind the player of what the holiday they were supposed to be celebrating was before it all went to hell. To hammer the point home, if you get a game over, you get a shot of the corpse of the player character hung from holiday lights.
* D-Live. The company the protagonist works for when not in school gives him

vehicles and he bonds deeply with them and does impossible, incredible things. Even if he's never driven one of these before. Then they cite something that they didn't like, like he crashed whatever-it-was or got seen on the job, and screw him out of his pay. He never seems to catch on.
* D-Man's cards tells the tale of the Princess Mach urban legend. If Ban is alive at the end of the game, then his epilogue scene mentions that he's investigating the very same spirit.
* D-Man's collectable cards either exposit on various ghostly tales, or summarise information that Akira has gleaned about Kakuya and his general situation.
* DMC3 definitely fits this mold being a massive brutish demon lacking the charm of most of the other bosses in the game due to having previously been beaten by Sparda. Naturally, Beowulf extends his hatred of Sparda to his two sons.
* DMC3 guitar, etc.). He also gains the Quicksilver style to slow time down after being on the receiving end of time-stops from Geryon.
* DMC3: Sparda sealed Temen-ni-gru, Dante fights demons there but the tower's fate is never gone into.
* DMC4 in contrast the other bosses are unintelligent being big smelly frogs who unsuccessfully try and lure and eat Nero and Dante.
* DMC 4. It's like everything dies just by being in the same room as this sword. In game, it's not any better than the default sword, and some experts consider it to be worse.
* DmC (after the credits) has Dante waking up with a hangover in just a tanktop. He answers a knock on his door in a surly mood without bothering to dress, to the mild shock of the female guest. They have a brief conversation, and then Dante gets attacked by a demon, leading to a lengthy sequence where he tries to find his clothes and guns without getting himself killed while his environment is torn to pieces around him. The scene's absurdity is made perfect by Dante's total indifference to being naked and the ridiculous acrobatics he has to pull just to get his pants on.
* DMC against most enemies (hardly useless, but killing an enemy with just gunfire is going to require dozens of shots). In cutscenes, Dante can easily take down enemies in just a shot or two from those guns.
* Dm C Devil May Cry, Bob Barbas' true form is a giant holographic head seemingly made of data.
* DmC: Devil May Cry, Dante barges into a night club owned by a demonic mistress of Mundus, who is heavily pregnant with their child. At the beginning of the boss battle, the child sprouts out of the mother's body, sucking her insides itself and transforming into a huge demon baby. After defeating it, its forced back into the womb.
* DmC: Devil May Cry has been panned as the worst thing to ever happen to the franchise. Despite the numerous contentious changes, it's still a solid game with nice gameplay.
* DmC: Devil May Cry has this little gem during the raid on Mundus' HQ:
* DmC: Devil May Cry, he easily demonstrates his raw fighting prowess by beating Dante in a straight half-demon to half-demon fight).
* Dm C Devil May Cry, in which Dante brashly approaches Lilith's Club and gets stopped by the bouncer, who rejects him because he's actually not on the list. Dante's response? Uppercut the bouncer, knocking him unconscious, then add insult to injury by writing "Fuck you" on the bouncer's list and jokingly saying "I am now!" and barging into the club uninvited.
* Dm C Devil May Cry is the propaganda arm of Mundus' demonic empire, used to keep the human population docile through a mix of lies, banality and outright brainwashing as well as slandering any threats to their control, such as Dante.
* DmC: Devil May Cry it happen without being able to do anything about it.
* Dm C Devil May Cry managed to match its numbers in a couple of weeks.
* Dm C Devil May Cry minions who specifically spews propaganda that put their enemies (such as Dante) in a bad light.
* DmC: Devil May Cry mop-top, his build is much less muscular, and his red jacket is in a completely different style.

* DmC: Devil May Cry position to rule humanity. Despite this, however, demons have now been outed and the world is in a state of confusion and chaos with it being uncertain how things will turn out. If that wasn't bad enough, the DLC for Virgil shows him casting his empathy aside and amassing an army of demons for his own conquest. What happens next? No clue, as there's no word from Capcom on if they'll continue this continuity or not.
* Dm C Devil May Cry rebooted Dante into being a half-angel half-demon. The story tells us that at many points in Earth's history demons and angels went to war against each other, and Mundus' has a pathological hatred for angels as a result of this rivalry. Sparda's decision to mate with Eva (who is an angel in this universe) made Mundus angry enough to exhile Sparda to his eternal torment. Also, we're told that nephilim, a hybrid subspecies born of demons and angels, were so powerful that they endangered the supremacy of both sides — this being the one exception where demons and angels actually fought together against a common enemy. As for where God is in this picture is unclear, nor are we told why the angels seem okay with Mundus ruling over the Earth as an emperor in the shadows.
* DmC: Devil May Cry's Dante does this before his infamous showdown with Bob Barbas.
* Dm C Devil May Cry was accused of this as well, especially in regards to how the revamped style meter makes it painfully easy to go from D to SSS with just a few of the right moves. The boss fights in general have been criticized for being much less difficult than those of past games as well.
* DmC: Devil May Cry, while undercover, knocks a can of evil soda of doom out of a little girl's hands, leading to his detection. Of course, to those unaware of the soda being evil this is a vile thing to do, and her parents would just buy her another can leading to twice the profits for the demons...
* DM.exe has crashed! || Attack at the school, an idiotic samurai player tries to calm down a bunch of frightened students by firing a pistol, which of course has the exact opposite effect and ends with him in a confrontation with the police which he keeps on making worse with one bad decision after another, eventually resulting in him getting thrown in prison.
* DMFA, Abel learns that another character's mother and father left him/died. Abel begins to say something along the lines of 'Sorry, I didn't know.' when he is cut off by the other person who complains that he wasted enough time pitying himself and wanted no more.
* DMFA, after killing Dark Pegasus for the third time, Dan is seen enacting a sealing ritual: "No come back to life! No cookie!" (A much later comic cuts to his grave... and spends three motionless panels indicating that he's still dead.)
* DMFA frequently uses the phrase "Wall of Text" during big exposition parts. Occasionally, you need to wear construction helmets.
* DMFA often believe that their increased physical strength and magic gives them the right to do whatever they like to 'Beings', who are weaker and usually have no magic.
* DMFA online chat/roleplaying client, which would technically make it a fanfic. Early strips have a lot of reference to Roleplaying-terms, internet fads, etc.
* DMFA says that he was disgusted by the idea of zombie children or infants and locked them out of the spell.
* DMFA, this is the backstory of the Insectis character Chiki: She was on a scouting mission aboveground when her hive was exterminated by a stronger one.
* DM goes through this during "The Good, The Bad and the Motionless" when he meets his evil self at Stonehenge.
* DM himself has cotton in his ears while Penfold practices the saxophone in "Who Stole The Bagpipes?". In another episode when a Welsh Witches' Broom refers to Penfold's "Land of Our Fathers" bringing a tear to its eye, he agrees that Penfold's singing brings tears to his eyes.
* Dmitri Furmanov, the commissar attached to Chapaev's troops, became the epitome of the benevolent commissar after the release of
* Dmitri Hvorostovsky, a Russian baritone, was raised by his grandmother and step-grandfather for most of his childhood since his parents had very busy schedules. At

first, he went from being involved with street gangs and drinking vodka to studying music at the conservatory in his hometown of Krasnoyarsk, then went on to win the Concours International de Chant competition in Toulouse in 1988. And while he suffered from alcoholism in the 1990s, he quit in 2001, which allowed his career to be revived in 2003, when he performed as Giorgio Germont in the Met's production of
* Dmitri Mendeleev's Periodic Table was a product of him falling asleep while music was playing in another room.
* Dmitri Shostakovich composer who refused to become a propagandistic servant to the totalitarian state he lived in until the end.
* Dmitri Shostakovich: One of the composers who struggled under the Soviet Union. He was criticized, even censured, but was still able to express what was "inexpressible" through his music.
* DM of the Rings, a LOTR parody, in which Gandalf is made to be Mr Exposition in every way, even more than he is in the books and films. He is even referred to as Mr Exposition on a number of occasions.
* DM of the Rings as an original D&D campaign, Orcs are pretty much the only enemy encountered.
* DM of the Rings, as earlier the DM had made a mental note to send Aragorn off a cliff.
* DM of the Rings, author Shamus Young started preemptively posting "first" in various snarky ways (e.g. an image of Steven Furst).
* DM of the Rings backstory and NPC monologues, they weren't listening anyway.
* DM of the Rings campaigns, and both comprise screen captures from their respective films strung together in sequence.
* DM of the Rings descended from a Gróin, who is his grandfather.
* DM of the Rings during the scene from The Two Towers where the guard at Theoden's hall is telling everyone to leave their weapons, after Gandalf gets to carry in his staff, Aragorn, Legolas and Gimli try to justify their own weapons as "walking sticks". Including the bow and arrows.
* DM of the Rings edition should have the option to punish players for quoting the movie.
* DM of the Rings, Gimli brings up the characteristics of dwarves. Aragorn, Legolas, and the DM mention a handful of other things than what he meant.
* DM of the Rings. Gimli points out that Legolas has a head start being able to pick off targets at range but will be forced to resort to daggers once he runs out of arrows, at which point Gimli will pwn him.
* D Mof The Rings, i.e. a webcomic that describes (and parodies) a movie as if it were a tabletop roleplaying game.
* DM of the Rings respectively) are mercifully (relatively) short and now complete, making an archive binge relatively painless, meaning the elimination of merely hours of productive time rather than days or weeks.
* DM of the Rings, Théoden is Theogan, and the Nazgûl are Margazoids.
* DM of the Rings, the players decide they've had enough of these stupid Elves and their stupid trees and stupid songs and stupid... dirt.
* DM of the Rings to meet a craggy old tree with a bearded face instead.
* DM of the Rings. When a massive troll attacks the group, they gleefully rush to finally kill something besides orcs.
* DM of the Rings when he can help it. Only twice do the players pull it off.
* DM of the Rings where Aragorn, Gimli and Legolas are nearly buried under an avalanche of Nothing But Skulls.
* DMs in any Pen-and-Paper RPG experience this happening way too frequently. In fact, the more the DM tries to prevent this from happening by being over-prepared, the more intent the players will be on making this happen.
* DM stops the out-of-control Orient Express just before it reaches the Paris terminus in a calm, devil-may-care style while Penfold is going postal.
* DMV are incredibly slow just to screw with people. Flash was on the track team in high school with Nick and Nick notes that if Flash "slips up" he'll get a response to his text in a few seconds rather than hours.
* DMX" If you listen closely, in the first song, Damien's voice sometimes even has

a deep reverb to it.
* DMZ, a second American Civil War has the Midwest fighting against both coasts, to the point where New Jersey and New York are on opposite sides and the title location (the Demilitarized Zone) is Manhattan Island, where an uneasy cease-fire has formed. DMZ says the free state movement was more of an idea than a territorial location, making it more in line with modern 4th generation warfare.
* DMZ between the two sides. Imagine that the island of Manhattan is the line between the two sides, a No Man's Land that neither side can take, neither side will give up, and where the locals hate both sides and are trying to continue living as best they can. Now imagine a naive photographer who has just graduated college with little interest in politics or history, got himself an internship with a news corporation, and within a week wound up stranded and alone in Manhattan when the story he was going to be part of went terribly wrong. Good luck, Matty.
* DMZ, but she generally has narrow eyes, naturally black hair and a freckled skin tone, suggested some combination of white and Asian. Her last name is Hernandez, indicating some Hispanic or Latino ancestry.
* DMZ decide to say screw fighting, get together to party, then both sides return to their bases, lie in all their reports about what is going on, and keep their superiors clueless.
* DMZ has a company that is mix of Haliburton and Blackwater called Trustwell. Their private army is ruthless, amoral and brutal.
* DMZ situation, who intended to defect from the rebels back over to US army. On the way to do so, he got an infection, had a vision, and decided to enjoy the freedom of being on neither side instead. By the time the story begins, he has an entire squad of soldiers who have joined him.
* DMZ than a territorial location, making it more in line with modern 4th generation warfare.
* DMZ, the US is in the midst of second civil war, and while the lines of territory aren't very clear, (as the rebellious "Free States of America" is much closer to an insurgency than a nation state) the territory that is firmly controlled by the original US Government is kept under martial law, the government has essentially taken over the media and turned it all into propaganda, and it has few if any qualms about murdering or ruining the lives of innocent civilians, especially if it somehow gives them an edge against the Free States.
* DNA2 he became a playboy and fathers any children. Which starts up the plot.
* DNA2 with her boyfriend since she had seen the two leave the redlight district the evening before. Since Kotomi stands up to her and asks if Mako has any proof, everyone immediately knows that Mako was lying.
* DNA, although what species they are based on is unknown which has lead to many readers trying to guess what they are. The author has confirmed that they are not bats, or lemurs, or dogs, or cats, or koalas, or wolves, or mice. Since they were genetically engineered, they may be based on multiple animals.
* DNA analysis has recently suggested that not one but four or five African and Indian groups may be (as they claim) Lost Tribes of Israel. Besides the famous Ethiopian and Ugandan Jews who got airlifted by Israel in the 70s, a full-blown tribe in Tanzania recently got themselves tested to prove their claim that the tribe itself were a lost tribe of Hebrews, since the Roman era. (Being cut off, they didn't know any other Jews existed, so they adopted local language and customs.)
* DNA are a group of genetically engineered furry humanoid children, known as Species X. Most of them have super powers.
* D.N. Ace has Huxley, a squirrel with the ability to speak the English language.
* D.N.A.: Dark Native Apostle grants the player certain abilities, and a combo of an HP Chip, EP Chip and a Jump Chip nets you a smoke bomb, which then confuses organic opponents. Replacing a Jump chip with a Weight chip in that combo makes for a longer-lasting version.
* DNAgents can be any human form, but he doesn't transform his clothing.
* DNA have mouths full of sharp teeth but only one of them, named Orion, talks like this, and he gets picked on for it. His teeth stick out noticeably more than the

rest of the Xs'.
* DNA: John Tate's introduction shows him bullying his way into a position of power among the group. Richard's entrance a few minutes later disrupts John's efforts, but it's Phil who establishes himself as the one in charge when he arrives on the scene.
* D.N.Angel anime, both Risa and Riku are in love with Niwa. (With the added complication of Dark being in love with... One of them. It's complicated.)
* D.N.Angel, anyone? His blonde ponytail is easily longer than he is-this is noticeable when he flies and his hair has to catch up with him. It's also very, very pretty...
* D.N.Angel as them jumping, which they could have easily done by having a nearby character comment "what a jump!" or something.
* D.N.Angel. Black and feathery ones. But they actually are his shape-changing pet, With. (Conveniently explaining why they're not always there.)
* D.N.Angel convincing girl with just a wig and dress. On one occasion, one of his friends comments on how girly he looks.
* D.N.Angel. Daisuke fell ill at school and Satoshi carried him to the infirmary. And Dark generally does this to the girls that he rescues.
* D.N.Angel Dark. This leads to Daisuke constantly running away from the girl he has a crush on.
* D.N.Angel feel, although occasionally there's hints of darker mysteries and backstories lurking in the shadows.
* D.N.Angel has an epic opening sequence drawn mostly from scenes from the final two episodes of the series, with some images from other parts of the series, and yet since the series is more of a ROMANCE COMEDY than an action-packed battle between two angels… most of the series is a lot less low key. There are episodes with that level of action, and other episodes devoted solely to romance or developing the characters, and thus falling far behind the opening in the action department.
* D.N.Angel has twin sisters Risa and Riku Harada pulling this off, and almost being found out.
* D.N.Angel have been captured and handcuffed because Dark surrendered the moment they were confronted. Riku is furious and begins yelling at Dark, at which point he reveals he has easily escaped. "You were saying...something about handcuffs?"
* D.N.Angel: In episode 23 Kael to Elliot so that he can have Freedert for himself.
* D.N.Angel. In one episode, the eyecatch is used to transition between scenes instead of cut to commercial. This causes it to pop up about once every three minutes. Eventually the characters get sick of it and scream "Knock it off!" when the eyecatch appears.
* D.N.Angel Mio Hio tries to win Daisuke over by cooking for him. Risa also suggests that Riku should cook for Daisuke to win him over.
* D.N.Angel: Occurs at the end of episode 20 when Mio Hio worriedly watches as Daisuke tries to put his key shaped pendant through Riku's heart shaped pendant so that they'll be bonded forever. Also occurs in episode 26 as Dark and Krad are fighting.
* D.N.Angel: On one of his many heists, the notorious phantom thief Dark encounters a hot policewoman who succeeds in distracting and capturing him. "She" turns out to be Satoshi Hiwatori — male classmate of Dark's alter ego and the police commander in charge of capturing Dark.
* D.N.Angel Saehara acts like one of these for Mio Hio. And in episode 23, Kael acts like one for Freedert.
* D.N.Angel, Sandalphon). (This has nothing to do with sexual orientation.)
* D.N.Angel's first chapter, Daisuke gives Risa a love letter, but she turns him down.
* D.N.Angel, so while he can see fine without them this is still a problem.
* D.N.Angel, the Niwa family possess a genetic curse that affects the oldest male of each generation. The curse causes the host to transform into the phantom thief Dark Mousy, and vice-versa, whenever they feel unrequited love. The only way for the host to be released is for him to find true love, his "Sacred Maiden", and for

that true love to love him back, demonstrating that love in some way. However, the "Sacred Maiden" must also learn that the host is sharing his body with Dark and still love him regardless of that.
* D.N.Angel: There's some Daisuke/Dark interpretations in fanfics and Daisuke/Satoshi shows up in canon and fanfiction as well.
* D.N.Angel this happens to Daisuke when he tries to confess his love for Risa in the first anime episode. (In the manga he managed to tell her, but she flat-out rejected him.)
* D.N.Angel to her, heavily emphasizing the word friend. The look on Daisuke's face made it look like it would have hurt less if he was just kicked between the legs.
* D.N.Angel when 3/4 into it Daisuke starts a relationship with Riku, but it takes time for them to adapt and strengthen their love.
* DNA Productions, which got extremely negative reviews from critics and fans who called it nonsensical, stupid, and very loosely connected to its parent show. As such, it only lasted for one season with a total of 26 episodes. Since its cancellation, Omation and its parent company have remained dormant.
* DNA shows the grinning face of Sirius, with a bloody nose and mouth, a missing tooth, and a huge facial bruise. The original version of the cover had an even more pronounced grin, which the artist changed because it made him look too crazy.
* DNA, Species X can have their powers disabled by getting them wet, especially on the hands, so they can easily be disarmed with squirt guns or sprinklers, although just getting a little mud on their hands doesn't seem to affect them.
* DNA² has to return and actually fixes the cirumcstances, so that Junta will end up with Ami.
* DNA² have taken place anyway): Junta's mother Chiyo found Karin unconscious, took her into the Momonari household, and replaced her clothes with the shirt to get them cleaned up.
* DNA², Karen gets sent from the future to 20th-century Japan. It's unclear how far along from the future she is, but science has evolved far enough that a person's DNA can be altered through medication. She was sent to this point in time to change the DNA of the legendary Mega Playboy that had 100 children with 100 different women, which caused quite a problem due to the overpopulation in the future.
* DNA² never actually aired on television; they have only been part of the full continuity since the original video release.
* DNA² when Karin, using her own telekinetic abilities, tries to sense where the two are and is shown to repeatedly ambush couples outside of various love hotels in failed attempts to catch the two before anything happens.
* DNA² (who hails from the future as Karin) does against her was to spray her with a fluid that melts the material it's made of.
* DnA, the Nova Corps started to be built up again. All of the new recruits were interesting characters and had a lot of potential, but perhaps none more so than Zan Philo. A Skrull member of the Nova Corps who had been trapped in the Fault for over thirty years, he seemed to know several things about the Nova Force which even Richard didn't, and served as a drill instructor for several issues. Between the fact that he was a heroic Skrull, was a very competent character, and had a lot of unanswered questions in his backstory (why does he have two artificial arms and one regular one?), Zan Philo was just full of potential.
* Dn D, any campaign final boss can be like this. It all depends on how well the DM designed the encounter, and whether the players pull off some crazy dumb instawin strategy.
* DNMC fire (Ex.: A fireball he shot from a nick on his cheek cauterized it shut afterwards.)
* DNMC) to whatever fate the Atlesian Army has in store for her. He chooses to enroll.
* DOA 4. Most competitive players hate the game and blame it for the stigma attached to competitive DOA. On the other hand, the more casual fans love it due to its unique online mode and flashy aesthetics.
* DOA 5: Last Round, such as the "Aloha Set" which was offered as an incentive for

pre-ordering the game.
* "do a barrel roll" or "Z or R twice" (They both give the same result). Just do it.
* do actually retain location-specific names, such as the Four Kingdoms being known as Smyrno, Konom, Daribow, and Anacreon.
* DOA: Dead or Alive and wants Tina to do the same. After Bass leaves, Tina kicks Christie out of the bed (literally), and the latter is not nude.
* DOA: Dead or Alive, an early fight between Kasumi and Ayane comes to a standstill to have Kasumi's discarded kimono fall on Ayane's katana, splitting it clean in half.
* DOA: Dead or Alive, Christie and Max are in bed shortly after doing the deed. Suddenly, she says that the earth moved. Max, of course, takes credit, until Kasumi and Leon crash through the wall from Kasumi's room, as it is their turn to fight. Also, all fights are televised throughout the island.
* DOA: Dead or Alive games are best known for being about sexy women in martial arts fights, and the movie is mostly about sexy women in martial arts fights. It's a dumb movie, but it knows exactly what its audience wants and delivers on its premise (and after the other fighting game movies he did that month, one can see how important that is).
* DOA: Dead or Alive movie, the police enter Christy's hotel room while she is showering to arrest her. She flirts and flaunts her body to make them drop their guard, then kicks their asses.
* DOA: Dead or Alive personally tells her that, after his fight with Leon, Hayate fell off a cliff, and his body was never recovered. Naturally, Kasumi assumes Donovan is lying, especially after fighting Leon and finding out he's a mediocre fighter at best (i.e. no match for Hayate).
* DOA: Dead or Alive, when being caught by enemies immediately after taking a shower, managed to pull this trick with her bra. And she not only caught it on its way down, but also put it on.
* DOA have both gone on record, saying the couple were responsible for a lot of the misery the actors endured making this movie, with Hoskins even saying the couple's, "Arrogance was mistaken for talent.")
* do a huge elaborate drama in which he summoned the Third Hokage's own teachers to kill him, resulting in Orochimaru losing the use of his arms.
* Doakes and Dexter sharing a few deep, emotional conversations, and bonding a bit, while Doakes is Dexter's prisoner at the cabin.
* Doakes cites something similar to this after looking into Dexter's background. He believes that no one's record is that clean unless they've done some scrubbing. He's right, although Dexter's late father/mentor Harry is more responsible for that than Dexter himself.
* do, and consequently, when you say, for example, "Sarda" to someone, they're much more likely to think of the Clevinger version.
* do, and in amounts that sometimes give the doubts of whether it's really worth the effort. The semiconductor industry that creates the solar panels is notorious for its adverse environmental impact and the wind farms are the whole another can of worms: they use advanced ultracompact generators, which utilize high-power magnets and specialist oils that needs yet another industry to produce (with its own pollution), not to mention that they create noise, change weather patterns and are a hazard to the migrating birds. In the end, solar and wind power simply shift the environmental impact to an another place (often to China, where much of their components are produced), and with the wind generators even that is doubtful.
* Do Androids Dream of Electric Sheep?, also features the Voight-Kampff test, which is explicitly designed to detect empathy by measuring involuntary responses. Deckard is only able to identify Rachel as inhuman by noticing that she took a fraction of a second too long to be squicked when he claims his wallet was "pure baby-hide".
* Do Androids Dream of Electric Sheep? an android, and the Rosens were trying to set him up to blackmail him into dropping his investigation.
* Do Androids Dream of Electric Sheep? how the movie approached the subject.

* Do Androids Dream of Electric Sheep? In the aftermath of World War Terminus, many species are completely extinct, like frogs. Even the animals still alive, like sheep and goats, are rare enough that owning one is a major status symbol.
* Do Androids Dream of Electric Sheep? is set in the aftermath of World War Terminus, an apocalyptic war that left civilization clinging to life in overcrowded pockets.
* Do Androids Dream of Electric Sheep?. Many characters express distaste for bounty hunters and their role in society. Unlike in the movie, they are known simply as "bounty hunters", rather than "blade runners".
* Do Androids Dream of Electric Sheep?? Reams of text have been written supporting either interpretation.
* Do Androids Dream of Electric Sheep?, the religion of Earth worships Wilbur Mercer, who is later revealed to be a mental simulacrum of a character actor recorded decades ago.
* Do Androids Dream of Electric Sheep?. They are artificial people and have no empathy. Testing a person's empathy is in fact how bounty hunters distinguish real humans from replicants. However, the story also shows that humanity is losing its own empathy and becoming more like machines. Deckard's wife, like many other people, uses a machine to give her artificial emotions. The replicants are a chilling indication of where humanity itself might be headed.
* Do Androids Dream of Electric Sheep? when submitted to the Voight-Kampff test, a minimal delay in emotional response is enough to incriminate them.
* do, and tend to handle lower-quality analog video signals much more cleanly, the latter of which was key in making a number of visual effects work with limited graphical capabilities (most notably with the use of dithering to fake gradient shading and translucency over muddy RF and composite signals).
* do And then the surviving fairies, whom you save from dwarven imperialism, will blame human greed for the whole fiasco.
* do and the personnel handing you the contract are usually quite loathe to bring up the topic for some reason...
* do anything but use this until the effect has passed.), which actually ends up being particularly handy in certain late-game maps.
* do anything, calling them things like "The Powers That Sit On Their Be-hinds" and "The Powers That Screw You."
* do anything evil, apart from opportunistically grab the crown and then put it down and run for his life. He's a parody of stock evil vizier traits, but without the actual villainy. The princess even keeps him around.
* Do-Anything Robot: A robot is equipped with every gadget and tool they could possibly need for any conceivable situation.
* Do-Anything Robot: A robot is equipped with gadgets for every situation.
* Do-Anything Robot capable of doing nearly anything escept water damage.
* Do-Anything Soldiers not only fly space fighters, but also perform ground missions as infantry. Though infantry units are made up predominantly of enlisted men, no member of the squadron is below the rank of 2nd Lieutenant.
* Do-Anything Soldier to do a commando's job: they're entirely different skillsets with entirely different, long, and expensive training programs.
* Do Anything Species-if you have a need to be met, a Cirbozoid can probably use some highly specialized reproductive processes and give you a temporary to cover for you until the permanent replacement arrives.
* "Do anything you want to the girl (Just don't hurt me)" by Otis Lee Crenshaw is about a guy who professes to love his girlfriend, but bails on her when they get attacked by a mugger while on a romantic walk and leaves her at the robber's mercy.
* D.O.A. opens with a scene towards the end of the story and then has the hero tell how he got there.
* do) are turned into parallel dimensions that don't affect the "main" universe.
* Do a search by interest on any popular blog site for monkey and another word. Hit counts are highest for "mad monkey sex" or "mad monkey love" or "crazy monkey sex" or "crazy monkey love".
* Do a soft plunge at launch to hit the standup targets beneath the middle

playfield ramp.
* do as they are not even canines (they belong to their own group, which is slightly more related to cat family compared to the dog family.) These are both common mistakes.
* do at one point even going out of his way to comfort a civilian stranger who just lost her father.
* Do a web search for a picture of a Sea Hare and decide for yourself if it looks anything like a relative of the bunny rabbit.
* Dobber Beverly was a longtime figure in the Texas death and black metal scenes and more generally underground extreme metal, but for most of his career, the grindcore band Insect Warfare was his biggest success, and even that was a moderate-at-best success. Around the beginning of the 2010s, he started a new progressive/gothic metal project to explore a different and more eclectic side of his influences, with no real expectation of anything beyond minor underground success. Oceans of Slumber instead became his biggest band by a long shot, and began to steadily pick up a bigger and bigger fanbase by the end of the 2010s that eventually made them into a solid name in progressive metal.
* Dobby and Harry's twin brother Max get into a "Must!"/"Can't!" exchange when Dobby asks Max to promise that he won't go back to Hogwarts.
* Dobby comments that Remus and Sirius are still in bed and Harry interprets this as their being asleep.
* Dobby's death saving the trio along with Olivander, Luna, Dean and Griphook convinces Harry to focus on the Horcruxes over the Hallows.
* do, because that is the proper reaction to being told that you've got brain damage."
* do be informed of this until you actually get the bill in the mail, and wonder why in the world you're being charged $5000 for a few blood and urine tests and a dose of Tylenol.)
* do being that using a bio-weapon was the concept the scientists had come up with and which just might have worked!
* Doberman 1996 campaign from the Spanish Socialist Party, which had been ruling for 14 straight years by then. To the point that, decades later, scare campaigns are still known in Spain as "Doberman Campaigns". It did work, somewhat; the Socialists recovered from a 15-point deficit and lost by barely 300,000 votes.
* Dobermann: After Joe stops him from snorting cocaine, Manu has a sudden urgent need to take a shit, Joe tells him the bathroom is occupied and sends him outside to to a crap in the river.
* Dobermann: Director Jan Kounen is the man trapped in the bank doors.
* Dobermann, Dobermann and Nat knock over an amoured car on a remote country road.
* Dobermann, Dobermann and Nat terrify the armoured car guard to the point that he wets himself.
* Dobermann, Mosquito never shuts up. The source of his nickname appears to be his constant annoying buzzing.
* Dobermann: Most of the female patrons at Joe Hell are dressed in either fetish wear or lingerie. It's that kind of club.
* Dobermann, Nat the Gypsy uses a FN Minimi Paratrooper with an M203 Grenade Launcher (which is squad automatic weapon, or SAW, for those playing along at home) to blast her way into the bank.
* Dobermann, one of the dancers in Joe's club complains that Manu is jerking off while watching her and holding a gun in his other hand. Joe gives him a stern talking to and almost throws him out of the club.
* Dobermann: The Abbot is a member of Dobermann's who dresses as a priest. There is no evidence he actually is ordained, although he tries to act like a priest.
* Dobermann, the Abbot shoves a grenade inside the crash helmet of the police officer who killed Pitbull's dog. He and then Leo then shove the unfortunate officer out of the car, where he struggles in vain to remove the helmet before his head explodes.
* Dobermann to rest, then climbing into their cabriolet and driving off; presumably on the way to their next big score. But then the camera pulls slowly back till it

is above the trees. The sound of a helicopter fades in, and crosshairs appear on the screen, slowly focussing in on the car. Roll credits.
* Dobermann: When the Abbot shoves his grenade inside the policeman's crash helmet, he uses his teeth to pull out the pin.
* Doberman pinschers were bred by a Prussian tax collector, Karl Doberman, to protect himself from muggers (since his job required him to go into sketchy areas of town carrying money).
* Do Black Patent Leather Shoes Really Reflect Up: The main character is at a "mixer" dance and he approaches a girl with a nice butt, shapely legs, and long shiny hair. Then she turns around... The MC comments (in the narrative) that she'd do the world a favour by going around with her back to it.
* Doblaje Wiki: A wiki about the whole dubbing business of Latin America in Spanish.
* D.O. blames himself for only talking about himself and not realizing anything was wrong when Suho calls him after
* do blush whenever Princess Peach kisses them in gratitude for saving her.
* Dobro (resonator guitar, especially the single-inverted-cone variety)
* Dobson is holding River at gunpoint, threatening to kill her if her brother doesn't drop his weapon…at which point Mal casually walks into the room and shoots Dobson in the eye without blinking. Or even slowing down.
* do but is unable to dodge those fish; he realizes they're not actually being shot from a long distance because of that.
* do, but you can only be said to agree to what you understood the contract to mean);
* do call for a taxi, but it fails to pick them up due to confusion over their exact location, or if there are more than one person waiting for a cab at the same landmark, not all of whom may have called ahead for one.
* Doc and Clara introduce their two boys, Jules and Verne, at the end of
* Doc. As soon as they leave the room, the audience is treated to a shot of his seemingly dead body... and then his eyes open.
* Doc Brock! with Ash and Dawn (although this time Brock isn't sick, he left on an errand). They fared a little better, but when Pachirisu gets sick, they had to send for Staravia (and Gliscor) to fetch Brock faster.
* Doc Brown does a lot of this too, but he's so damn entertaining to watch ("ONE POINT TWENTY ONE GIGAWATTS!!??") that you don't even notice you're being infodumped.
* Doc Brown gives Marty $50 to buy a Pepsi with in the year 2015. Similarly, Marty is asked by a charity collector to contribute $100 for the town hall clock, presumably out of pocket change. Contrast this with the 1985 version of the scene, in which Marty gave a solicitor a quarter — a pittance of pocket change even then, and definitely less than a Pepsi would have cost in a restaurant.
* Doc Brown had the idea for the flux capacitor (the device that allows time travel) after hitting his head when he fell while hanging a wall clock. He may have fallen due to being distracted by Marty (having traveled from 1985 to 1955) calling him on the phone. Therefore, to preserve the timeline, Doc Brown must become friends with Marty, so Marty will film the testing of the time machine, go back to 1955, and enable the invention of the time machine. Ever wonder why a mad scientist obsessed with time travel and clocks converted one wall of his house into a huge guitar amp? Because he knew it would make Marty want to come over to his house repeatedly. And he had all of it planned out years before Marty was born, based on watching a video of himself describing inventing the time machine and a letter describing its first use, given to him by . . . Marty.
* Doc Brown seems to play the scientist version of this to a degree in
* Doc Brown sent in 1885 to Marty. The idea that anyone would follow through with instructions to send a letter to someone 70 years in the future with exact location and time is a little tough to swallow; the guy just explains that they were taking bets down at the Western Union whether Marty would be there or not.
* Doc Brown's prototype flux capacitor is called a temporal field capacitor, which was the original name of the flux capacitor in early script drafts of the first

* Doc Brown was supposed to be shot in the back by Buford Tannen over a matter of eighty dollars in
* Doc Daneeka wants no part of the war, and even falsifies his records to get out of the training ridealong flights. This bites him back when one of those flights crashes and he's declared dead.
* Docetism, an early splinter doctrine of Christianity, teaches that the form Jesus took during his time on Earth wasn't truly human, but merely appeared as such for the purpose of interacting with mortals.
* Doc Hammer and Jackson Publick provide voices for a number of characters in
* Dochamon Junior has Okutowing, a bird who has octopus tentacles as his wings.
* Doc. He started out as a conscientious objector but had no true defining behavioral quirks. Quickly he became a useless wimp (to the point that he reveals he ran track in high school because it was the least competitive sport he could find) and pacifist, serving as a hilarious counter-balance to
* Do Chokkyuu Kareshi x Kanojo protagonist Shinichiro Honda saying what's on his mind.
* "Doc" Holliday, a dentist turned infamous gunfighter and gambler of the old West is a perfect real-life example of this trope. Diagnosed with tuberculosis in his early twenties Doc Holliday went out west, hoping the drier climate would ease his ailment. However, his hot temper and belief that death by gun or knife was far better than by tuberculosis, led him to a life of adventure, taking part in many shootouts including the famed OK Corral and Wyatt Earp's Vendetta Ride. Despite this lifestyle, his extreme skill, and more so his reputation of extreme speed, with a revolver kept him alive, he eventually died of his illness at age 36 in the bed of a sanitarium. His supposed famous last words, upon looking at his bare feet in bed, were "
* Doc Holliday and Big-Nosed Kate famously had such a relationship, characterised by living together for a while, having a fight, one or the other storming out of town, and then the taking back up together next time they were in town. Fictional portrayals usually retain this.
* Doc Hopper tries to brainwash Kermit into shilling for his restaurant with the help of Professor Krassman, "the world's leading expert in mind control on frogs".
* Doc Hudson also gets this to a degree. He tends to get humanized as a visibly old but
* docile, but it does cause serious logistics problems for rebel Jaffa.
* Doc is directing Brock as he drives a vehicle with a drill on the front, which is concealed until we see Doc giggling at his own double entendres.
* Dockers Guild, but rather against the fanaticism generated by the religions rather than the religions themselves.
* Doc knew he was planning to turn on him once everything was in place. So he beat him to the punch by giving him a fake antidote, then shot Gordeau while he was suffering from the toxin.
* Doc Louis's Punch-Out!!, Doc will sometimes take a break in the middle of a fight to eat one of his beloved chocolate bars, healing himself back up. Upon taking a bite, he proclaims that the bar is "choctastic" or "choclicious".
* Doc Manhattan is there waiting when Neil Armstrong steps out of the lunar lander. And the famous Victory Kiss photograph after
* Doc Martin, a fellow doctor, and similarly unimpressed with most of humankind. However, despite being more personable on the outside, she has far less empathy and concern for her patients, so he leaves her.
* Doc Martin, and it's later revealed that he's grieving for his dead mother...
* Doc Martin: Aunt Joan was killed off after Stephanie Cole chose not to return for Series 5. The character was a fixture in the setting and Martin's life, so killing her off was probably the most plausible explanation for her sudden disappearance. It was for drama, as Cole has a personal preference for not staying with any show for more than four series.
* Doc Martin calls in and lets them have it for playing an infantile prank that wasted his time and could have interfered with actual emergency cases.
* Doc Martin: Dr. Martin Ellingham, a top surgeon, is forced to leave his job and

become a humble GP after developing a crippling fear of blood.
* Doc Martin: Ellingham and Louisa had a difficult on-again-off-again relationship, conceived a baby, almost married, and reconciled in the final episode of season 4.
* Doc Martin episode "Education, Education, Education", the student selected to be Pluto in an outdoors roleplaying of the Solar System ends up losing consciousness to Kawasaki Disease, sustained from an infection, and has to be rushed to hospital to save her life.
* Doc Martin episode "To the Lighthouse", Penhale, while piloting a boat on an emergency call out, confidently boasts that the rocks are nothing to worry about because he "know[s] these waters like the back of my hand" and less than five seconds later smashes the boat right into them.
* Doc Martin for comedy, as the two struggle to get one another out of what are in fact incredibly painful, but not lethal to humans, traps.
* Doc Martin from this and Martin has a tough time treating her injuries to keep her alive long enough for an ambulance to arrive and get her to the hospital.
* Doc Martin. Further variant in that the character's surname is an anagram of series creator Dominic Minghella.
* Doc Martin is for a child in the village to display either symptoms or strange behavior, while the adults (parents or teachers or other minders) brush it off as a minor matter or simple misbehaving. This progresses until it becomes a serious emergency and Martin has to make a mad dash across the village or beyond.
* Doc Martin keep him from attending to patients that actually needed his help.
* Doc Martin: Martin and Louisa basically cover every trope in this section at some point.
* Doc Martin: Martin himself. He might be uptight, a stick-in-the-mud, and unexpressive in every other aspect of his life, but his gastronomic creations show a singular passion and creativity. Notable that even during his relationship with Louisa he still insisted on doing the cooking for both of them. Though his obsessive commitment to health means that he only ever cooks fish and steamed vegetables.
* Doc Martin: Martin invokes this when he walks in on Joan having sex with a man, 50 years her junior, on the kitchen table.
* Doc Martin: Martin, is almost a caricature of the emotionally repressed Brit. From his stiff as a board posture, to his constant inability to handle emotions (well, positive emotions anyway, he has a better handle on the negative ones).
* Doc Martin). Martin is forced to perform surgery in the farmer's non-too-clean farmhouse using nothing but fishing line, a fish hook, and a bottle of whiskey to sterilize his hands as best he can.
* Doc Martin: Martin's replacement at the end of season 4 is so stunningly incompetent he feels he has to take over again.
* Doc Martin: Morwena manages to revive her grandfather with a good minute and a half worth of this.
* Doc Martin. Never treated as anything but a hazard, particularly when a girl crashes through a glass doorway and ends up unconscious and nearly bleeding to death.
* Doc Martin out of town despite not being able to demonstrate that the man has been committing crimes by threatening to give the van he runs his business out of a very thorough vehicle inspection.
* Doc Martin: The fictional Portwenn is played by Cornish village Port Isaac.
* Doc Martin, the patient assumes it is a literal description fearing this trope.
* Doc Martin were so attached to her that the one time Ellingham tried to fire her, he ended up having to rehire her to make the townsfolk stop shunning him.
* Doc Martin when the resident idiot-cop Joe gets one to supplement his police equipment and spends the episode pretending he is a cowboy, always whipping it out and pointing at people and things. Needless to say that he eventually manages to taser a complete bystander when he panics during a mild altercation.
* Doc McCoy aft, and generally act in a lovably codger-y manner, even ascribing him Cool Old Guy traits such as extreme shrewdness and a wrathfully protective nature regarding his crewmates (the young twins Sunstreaker and Sideswipe tend to be at

the receiving end of his lectures and fists, more often than not).
* Doc McStuffins aired on April 18, 2020, which is the birthday of series creator Chris Nee.
* Doc McStuffins, almost inevitably, any "hero" toy that is made to rest by the Doc after getting injured will ignore doctor's orders if they see another toy in trouble. This will then lead to them getting injured again and Doc having to fix them again, followed by what passes from her as a stern talking-to about obeying doctor's orders.
* Doc McStuffins: Although Doc's assistant Hallie the Stuffed Hippo is referred to as a nurse, her outfit more closely resembles that of a Candy Striper — Hallie wears a red-and-white striped apron over a white blouse.
* Doc McStuffins as well when she meets Piglet, squeezing his face and calling him a cutie-patootie. Hallie also has a fangirl reaction to Pooh.
* Doc McStuffins "A Very McStuffins Christmas," the elf spends most of the episode avoiding Santa because he is worried about what he'll think of him. Santa, however, likes his work and gives him a promotion. He also reveals that he has been following Doc McStuffins' career with considerable interest and offers her a job, but she declines.
* Doc McStuffins: Basically the entire show is about a titular "Healer of Moe-toys".
* Doc McStuffins because he told her to stop, but she didn't, thinking he didn't really mean it.
* Doc McStuffins, causing him to feel pain too and decide that what's happening must therefore be real.
* Doc Mcstuffins: Doc is generally happy, she likes to sing songs and play games with her family while they playfully tease each other.
* Doc McStuffins do what Stuffy calls a "skiing show" in the sand, but what is really basically just this.
* Doc McStuffins DVDs (starting from Mobile Clinic onwards) were only released in the EzyDVD format in South-East Asia. This format is an atrocity, not only is there no language choice, the subtitles are "burnt in" hard subtitles which are unnecessary with DVDs, that they might just have released them on Video CD instead.
* Doc Mcstuffins episode “Training Army Al,” nurse Hallie gleefully exclaims that Al was made to look good in a uniform. She compliments him again not much later.
* Doc McStuffins episode "Camp Fancy; Nancy's Vanity D'Art", both of which were delayed due to hurricanes, were available on Disney NOW before they actually premiered on TV.
* Doc McStuffins episode "Chilly Gets Chilly", Lambie holds onto Doc's leg. Doc thinks Lambie is hugging her, but really she's just trying to stay warm.
* Doc McStuffins, Hallie was absent in 6 episodes, and Chilly was absent in 13 episodes.
* Doc McStuffins. However, there have been a couple of instances where there was something preventing actual cuddling, so she gave an "air cuddle" instead.
* Doc McStuffins, rescuing her stuffed dragon from a puppy: "Sorry, Rudy, but Stuffy's not a toy. *beat* Well, not a dog toy."
* Doc McStuffins revolves around a toy who doesn't want to be taken to the toy hospital because she's afraid she'll get sick there. The other toys reassure her that she has nothing to worry about, as a hospital is a place to help you get better, not someplace where you'll get sick. However, in the real world there's been a deepening public health crisis involving antibiotic-resistant infections people have picked up while staying in hospitals, and the Center for Disease Control estimates there are as many as 90,000 deaths a year from diseases acquired in hospitals. Given this, adult viewers in the know could easily see this toy's concern as being legitimate, especially given that they're taking her to a hospital she hasn't been able to personally check into to see if it's up to standard.
* Doc McStuffins, Ruby the rock star toy has quit singing because her microphone is broken and asks Doc to give her another job. She makes Ruby her office assistant and gives her a large stack of papers to file while everyone else sings and plays

music until she can't take it anymore.
* Doc McStuffins: School of Medicine, This time, the line censored was "Something must be wrong!", with the word "wrong" bleeped.
* Doc McStuffins, Stuffy asks this as he and Lambie travel with Doc to a neighboring house to help a toy stuck in a tree. The first two times he asks the question, the answer from Lambie is "no." The third time, the answer is "yes." The fourth time, Stuffy starts to ask the question, only to stop when he realizes he got a "yes" to the last one.
* Doc McStuffins: "Tea Party Tantrum" has the pretend tea party, and a cranky doll, rather than person, who ends up being Doc's patient.
* Doc McStuffins. The guide dog Mountie navigates Hil the toy mole around one.
* Doc McStuffins: the sword of an action figure in the show is shown to be sharp enough to rip through a plush toy when said plush is swung into the sword in error in the same episode. Given that plush fabric is usually pretty strong material, the sword couldn't have been made of plastic.
* Doc McStuffins: The whole clinic staff uttered this exact phrase to an uneasy Niles while trying to get his bandages off. Of course, Niles was expecting it to hurt. Inverted in that they proceeded to carefully take off most of the bandages while Niles wasn't paying attention, so he naturally felt nothing when Doc told him it was time to take them off and pulled a little piece of bandage still on him.
* Doc McStuffins, this is the reason why Pooh is floating in the air, per usual of trying to float up to get honey from bees.
* Doc McStuffins: "Toy Hospital: Mole Money, Mole Problems," the final test for a guide pet is the "distracted pedestrian of doom."
* Doc McStuffins, when Frida starts trying to fly even though her wing is ripped, Doc calls out to duck and Chilly is confused because he thought she was a fairy, not a duck.
* Doc McStuffins which allows toys to create designer pets. When the McStuffins Pet Rescue Team has to break in at night to rescue Bob, a non-designer pet toy dog that Hallie has decided to adopt, they end up accidentally creating a designer pet as well. It has a rubber duck head, a squirrel tail, rabbit and cat ears and parts from various other animals. The Wicked King itself ends up adopting it.
* Doc McStuffins, which also came out in 2012, would be so hugely popular. Once again, people were proven wrong, and it has the honor of being the first Disney show to get a 5th season.
* Doc McStuffins with the McStuffins Toy Hospital world. When Grandma McStuffins tells Doc that she'll probably be spending a lot of time there, Doc wonders about her parents worrying about where she is. As Grandma explains...
* Doc nearly lost his own life to a silver bullet, fired from the very pistol with which Hitler committed suicide. The shooter was a
* Doc Ock saga, he comes to the conclusion that the only reason he would do such a thing is that Peter's brain couldn't handle his genius and it affected him.
* D'Ocon Films Productions; D'Ocon Films co-producing that cartoon with French company Ellipsanime may have something to do with it.
* D'Ocon Films Productions, which D'Ocon Films co-produced with French company Ellipsanime.
* Doc Rat before finalizing a commitment. They would finally make love after officially becoming engaged, and eventually married and had children.
* Doc Rat featured Mr Pigg complaining to the chemist that the tonic he'd purchased which promised to "add body to your hair" had caused him to sprout hair everywhere. Turned out he'd read the label upside down; it actually said "adds hair to your body".
* Doc Rat initially dodged the question of what carnivores eat. But it eventually came to envelop the rest of the comic with a wolf character who married a rabbit and is attempting to start an anti-predation movement.
* Doc Rat, the carnivores regard their eating intelligent herbivores as morally unproblematic, and any objections from the prey are the problem. One indeed got indignant after her fox husband brought home baby rabbits, and the rabbits' father came by to beat him up.

* Doc Rat The label said that the heated contents would be hot, but he thought it was ironic.
* Doc Reid's Rangers, from the sourcebook on the Vampire Kingdoms of Mexico. There's a lot wrong with most of the Rangers, especially Doc Reid himself, but when it comes down to the "Nazi concentration camp like" experiments on vampires, it's kind of hard to not see them as
* Doc reveals that when he was young, his little brother Deke fell into a river and drowned. Doc tried to save him, but he didn't know CPR, so Deke died. Doc became a medic so that a tragedy like that would never happen again.
* Doc Robot is supposed to come from the Japanese word "dokuro", which means "skull". Granted, part of the blame lies on the game's localization team, as a more accurate translation of his Japanese name would have been "Skull Robot".
* Doc Samson manages to come back to life from his most recent death a few issues prior, in Walt's body, but he notes Walt's apparent absence meant he could
* Doc Samson miniseries, Tina Punnett is trapped in a VR game that's been modified to cause psychosomatic damage to the player. To get out, she runs herself through with a sword, causing lots of pain but also causing the game to end.
* Doc Samson transformed himself using stored energy siphoned from the Hulk in an attempt to turn the Hulk back into Bruce Banner permanently. Considering that it changed him from a somewhat nebbishy scientist into someone with the physique of a Greek god, the fact that it also made his hair longer and
* Doc Savage — was an unsold non-Doc Savage story Murray rewrote to star Doc and his aides.
* Doc Savage, a chemist Doc has brought out of the emotionless trance is shot through the head just as he is about to tell Doc who hired him.
* Doc Savage and his men fired sleep-inducing "mercy bullets," hollow projectiles which "flattened under the skin," releasing a powerful anesthetic. One of his crew carried a sword cane with the tip dipped in the substance, to render bad guys unconscious in seconds. The entire team also carried hollow glass balls with anesthetic gas which could be thrown grenade-style, putting large groups of villans to sleep in moments.
* Doc Savage, as used by Philip Jose Farmer in his "biography" of Doc Savage, has them enlisting in other nations armies at the start of the war and transferring to the US Army when the US joined. Even then, Ham's Brigadier Generalship is stretching credibility.
* Doc Savage by grabbing a rafter with one hand and punching a hole in it with the other.
* Doc Savage could operate any vehicle that existed in the 1930s: car, plane, autogyro, airship, submarine, etc.
* DocSavage Doc has occasionally used truth serum, but usually as a last resort because he's well aware of its' limitations. It does not magically make someone tell the truth, it just makes them so groggy and confused that they can't concentrate enough to think up a lie, but it's still hard to get useful information from anyone. He also has to watch the dose very carefully, as the amount needed to make it nearly impossible for them to think up a lie is uncomfortably close to the dose that will either render them unconscious or kill them outright.
* Doc Savage. Due to the mediocre response to the movie by both critics and audience, he didn't.
* Doc Savage had his headquarters in the Empire State Building, and most of his stories had a large section in NYC before heading off to more exotic locales.
* Doc Savage has bronze-flecked eyes to match his bronze-flecked hair and skin — hence the "Man of Bronze" moniker.
* Doc Savage has Doc clashing with someone who might have a demon and visiting somewhere that might have been Hell.
* Doc Savage: In early stories, criminals captured by Doc received "a delicate brain operation" to cure their criminal tendencies. The criminals returned to society fully productive and unaware of their criminal past.
* Doc Savage in newspapers of the time. People were fascinated by the travel plans of celebrities, and if they were intending to travel they'd pick a ship based more

on who they were sailing with than on the safety or comforts of the vessel in question.
* Doc Savage is determinedly uninterested in romance. It is remarked in the first book that "He had long ago made up his mind that women were to play no part in his career" and spends every interaction with Monaja (the most beautiful woman he ever met) trying to get her to lose interest. He's smart enough to foist interaction with women on his companions for the most part but seems profoundly uncomfortable when this is not possible.
* Doc Savage is over 90 years old and morbidly obese. Doc dons a fat suit to impersonate the king and lead his people into battle.
* Doc Savage kingdom of Subterranea uses gold for a huge variety of uses as it is the most abdundant and ductile metal available.
* Doc Savage, Leo tortures Sidney Lorrey: starting by pulling fingernails out with pliers, and then moving on to whittling his fingers down to the bone with a sharp knife.
* Doc Savage, Lurgent and his men pull this trick to gain access to Doc's HQ and capture Renny, Long Tom and Pat.
* Doc Savage novel, criminals strike at Doc by renting the office next to his and attacking the wall. (This causes a few continuity problems for fans as most Doc Savage stories state that he rents the entire floor of the skyscraper.)
* Doc Savage novels begin this way outside Doc's reception room. The cleaning costs must be enormous...
* Doc Savage novels, there are a couple of references to Monk and/or Patricia writing up details of Doc's adventures and passing them on to the man who writes the novels (i.e. Lester Dent a.k.a. 'Kenneth Robeson'). Doc himself is not very impressed by Dent's literary style.
* Doc Savage Pat Savage has to restrain herself from flinching when several field rats scamper out of the jungle.
* Doc Savage routine from birth initiated by his father. "Doc Savage Magazine" discussed the training routine, in 23 articles published from July 1935 to May 1937.
* Doc Savage's favorite way to get around NYC is to let one of his buddies drive while he stands on the running board.
* Doc Savage sidekick Monk Mayfair actually recognizes a disguised villainess by her legs.
* Doc Savage: The Man of Bronze. Death (murder) of Doc's father → a plot to steal Indian land in Central America that contains a giant pool of gold.
* Doc Savage: The Man of Bronze, in the middle of a hidden valley where a lake of molten gold is erupting, dancing in glee, and trying to catch the superheated metal in his pockets. Amazingly, he does not die from this or even get burned as liquid gold splatters across him. However, when the hero and his allies leave the cave they took shelter in, they find him nothing but a statue, completely encased in gold.
* Doc Savage: The Man of Bronze that he uses to shoot out the chandelier, plunging the room into darkness so they can turn on their assassins.
* Doc Savage: The Man of Bronze to take him there, but it turns out to be a tiny rocket he uses for ice fishing that launches into the air when a fish takes the bait, pulling the fish out of the water while simultaneously ringing a bell to let Doc know dinner's ready.
* Doc Savage: The Man of Bronze, with Doc pointing dramatically as he stands on the running board (in the rain no less) as the Fabulous Five drive off to take on the villains who've killed Doc's father.
* Doc Savage underneath it to move it occasionally and emit moaning sounds.
* Doc Savage, was willing to bet that he could identify any tongue spoken on Earth; he was fluent in fifty languages and passable in another hundred — in other words, virtually all of the "living languages" (those still native to and spoken by a significant number of people in daily life). Those few he doesn't know he picks up freakishly fast.
* Doc Savage, when Doc gets his shirt torn in a similar fashion during hand-to-hand

combat with Captain Seas.
* Doc Savage, which is pretty amazing when you consider his extraordinary physical appearance — roughly 6'6" (2 meters) tall, perfectly muscled, bronze skin and eyes, and yet he frequently fools his closest associates.
* Doc Savage) who traveled the world with his friends, seeking adventure and righting wrongs. He also carried a commission from the NYPD enabling him to act with official police authority.
* Doc's counterpart "The Captain" in the UK adaptation of the show was only featured in the first two seasons of the show because of Fulton MacKay's unfortunate death. The Captain's nephew, P.K. ("Principal Keeper"), took over the lighthouse in season 3 as a result.
* Doc Scratch has no facial features whatsoever, what with his head being a gigantic cueball.
* Doc Scratch interested in actually roleplaying. The more he did, the more people began roleplaying.
* Doc Scratch is always polite and composed, be it when serving guests, beating them up, narrating,
* Doc Scratch is a sharply dressed god-like entity with a large cueball for a head and no actual biological gender, but close enough.
* Doc Scratch keeps what seems to be a Schofield revolver as his sidearm in
* Doc Sidhe, Duncan Blackletter's construct Adonis turns out to be composed (and animated) by a bunch of worms over an oversized humanoid skeleton.
* Doc Sidhe is a world-class surgeon who has no problems being on the frontline of Doc's fight against evil. As he explains, the Fair World's equivalent of the Hippocratic Oath only applies to patients, and the people he fights don't become his patients until after he shoots them.
* Doc Sidhe, Noriko carries a katana as he primary weapon while her teammates are armed with modern firearms and explosives. Somewhat justified as it has a pure steel blade with is very effective against anyone with fae blood, but she still receives a lot of ribbing for it from the rest of team; especially her boyfriend Jean-Pierre.
* Doc Sidhe spikes welded to it. When Powrie attempts to knee Harris in the groin, he ends up in a world of pain.
* Doc Spectrum's crystal once took control of him at night and had him confront one of his government superiors naked, because he
* Doc starring Billy Ray Cyrus as Dr. Clint Cassidy, every episode went out of its way to tell the audience how good-looking Dr. Cassidy was: female patients would become giddy in his presence; female background characters, including extras with non-speaking roles, would frequently look at him with lust in their eyes; any female character he met for the first time would almost always make some flattering remark about his appearance; he even had a gay guy hitting on him in one episode.
* Doc Tari of “The Terrible Thunderlizards” from ‘’
* Docteur Omega, including a strong innuendo that Dr. Omega actually was the First Doctor using a pseudonym.
* DOC to promote Bellator and he was pulled out by Bellator before he could do anything.
* Doctor/, after the Doctor regenerates into a woman, and to have them kiss in the main series story "Dead Water"/"Death In Heaven" after the Master regenerates into a woman.
* Doctor Aphra: Rur was part of an immortality-seeking Jedi sect who tried to upload himself into a droid. Unfotunately, all he did was copy his mind into the machine, which then believed itself the real Rur and killed the imposter. It's later found and reactivated, even getting into a fight with Darth Vader being being unceremoniously removed and put into storage.
* Doctor at Large as an expectant father whose medical knowledge has given him a laundry list of reasons to worry about the birth itself. After getting into a shouting match with a whole waiting room of panicky expectant fathers, he is wheeled into the delivery room on a gurney—and faints immediately and has to be wheeled back out.

* Doctor at Large episode "Change Your Partners" switches to panels from a soap operatic comic book for a confrontation between Mike Upton and Dick Stuart-Clark over the latter's romantic interest in the former's employer's daughter.
* Doctor at Large episode "Mother and Father Doing Well", a loud argument breaks out in the waiting room of a maternity ward among the expectant fathers and several of the doctors on staff. One of the doctors, Dick Stuart-Clark, finally bellows "SHUT UP!" at the top of his lungs - and is amazed when it actually restores order.
* Doctor Baldhead from the first game was far less pleasant. After accidentally killing a patient, he went insane and became a serial killer, murdering under the delusion of healing. Then he met the ghost of his patient and learned it wasn't his fault. He hid his face under a paper bag, became
* Doctor Bartholomew Oobleck has an untidy look (mismatched shoes, untucked shirt, unfastened tie,
* Doctor, because the entire medical crew died in the accident that stranded Voyager.
* Doctor Blowhole has a very functional cybernetic one on his missing right eye. He has a laser in it and once uses it as a remote control to his
* Doctor Bunnigus wonders if a group of immortals that murdered someone should be brought to justice. Petey points out that it happened
* Doctor Corenthal's reports, which are left in bags for viewers to find.
* Doctor Cox (Good Doc) and and Doctor Kelso (Bad Doc) fought regularly, often trying to draw J.D. to support their point of view. Played with in that although he was the Bad Doc (in more ways than one), Kelso's point of view isn't always entirely the wrong one, being Type 1 as much as Type 2.
* Doctor Demento) at one point observes how after a man and a woman get married, she sets about changing all his bad habits... and then complains that he's "not the man she married anymore".
* Doctor Dethridge, who lived in the Renaissance and was the first Stravagator, regularly gets visits from Stravaganti from modern-day England because time has flown by more quickly in England.
* Doctor Detroit pretends to be an example of this trope in order to curry favor with a judge who is an actual example.
* Doctor Dire novels by Andrew Sieple have WEB (the World Evolutionary Brigade), a worldwide network of science terrorists.
* Doctor Dmitri Vapnoople who believes humanity should be regularly scoured by bigger, badder, more dangerous monsters every time so that the survivors will be sharper and sharper, and the weak will be cleaned out each time. And the second he's had a moment to gather his wits and creations he intends to get started with scouring the land with the best monsters he has.
* Doctor Doctor, Colorado. This explains why you could occasionally see the Rocky Mountains in the background; the highest point in the actual state of Rhode Island is only 812 feet above sea level.
* Doctor, Doctor, Doctor: Several people of similar professional rank greet each other with their titles.
* Doctor Dolittle, and gather a force of local mice who scares them away.
* Doctor Dolittle books, it is explained that animals communicate not only by sound, but by movements of noses, ears, tails etc. The film adaptation sadly shied away from showing us the good doctor faithfully reproducing animal-speak in this fashion.
* Doctor Dolittle. Emma calls him "very rude" because of what he said about her uncle, but she follows up with "Of course, I wouldn't mind so much except everything he said was true."
* Doctor Dolittle got a call from the Audubon Society one day, asking him to explain strange vulture behavior; a man had died and the vultures, instead of eating the body, were giving it a decent burial. Doctor Dolittle arrived and saw that it was true. He asked one of the vultures what was going on. "It's professional courtesy," said the vulture. "He was a lawyer."
* Doctor Dolittle. He's excited to learn that they are going to be sailing into a terrible storm and cheerfully suggests that the Sea Star Island natives might kill

them. Then, when they really are going to be executed, all he can do is anticipate how the natives are going to do it. The others find his enthusiasm a little disturbing.
* Doctor Dolittle in 1967 and merchandising for a feature film didn't seem worth the bother in 1977.
* Doctor Dolittle's Post Office, we eventually get to hear the Mudface's story of the Great Flood which is alluded to, but not presented, in the earlier volume.
* Doctor Dolittle's Return, Dr. Dolittle tries in vain to get himself thrown into jail, so that he can write his book in peace and quiet. When he finally succeeds, the animals break him out and he has to start over again.
* Doctor Dolittle starring Rex Harrison: He just asks mice to chew through the ropes.
* Doctor Dolittle, where the Doctor flies to the moon on the back of a giant moth.
* Doctor Dolittle. Whole books have been written about the horror stories of over 1200 animals refusing to obey directions, including ducks forgetting how to swim and needing to be rescued, a goat that ate a script, a parrot yelling "Cut!", a squirrel that refused to sit still until it was rendered drunk and a piglet that had to be replaced multiple times due to outgrowing its own role.
* Doctor Doofenschmirtz claims the machine he made to make a game of golf go by faster has a chance of destroying the Universe. He says, "But a game of golf? Totally worth it".
* Doctor Doofenshmirtz's daughter, Vanessa, attempts to show her mom (and his Ex-Wife), that Doofenshmirtz is an evil genius, but the evidence disappears. Ironically enough, it's shown that Doofenshmirtz's scheme (usually the B-Plot) is often what does away with Phineas and Ferb's thing, and when his scheme is the A-Plot, Phineas and Ferb do away with it.
* Doctor Doofenshmirtz's, he did not tighten the restraints properly and Perry escapes.
* Doctor Doom, all programmed to act as if they were him, unless a) there's more than one of them in the room, or b) the real Doom is present.
* Doctor Doom and kill everyone Reed loves isn't just a tad disappointing to Doom — it would be completely antithetical to Doom's entire purpose in being evil.
* Doctor Doom, and makes many other geek-culture references along the way.
* Doctor Doom (and pretty much every other hero in the Marvel Universe).
* Doctor Doom As head of state, he enjoys diplomatic immunity during his official visits to the States. On his "unofficial" visits, however...
* Doctor Doom as the focus of the story with the Fantastic Four seen only in flashbacks if seen at all.
* Doctor Doom at an invitation to discuss something; he's a pariah on the international stage. All because of his swollen ego.
* Doctor Doom before ever gaining their powers. Naturally, they beat him.
* Doctor Doom but before Ghost Rider could finish Voodoo, Doom came in and took Ghost Rider out with one punch. This is a highly dubious feat considering Ghost Rider has been shown to be able to fight toe to toe with Dr. Strange before, take some of his best attacks, and even defeat the Sorcerer Supreme after a brutal mystical fight. And of course, Doom's powers are only second best compared to Strange. Apparently, the message that the writers want to drive home is that one punch from Doom is greater than the sum of two Sorcerer Supremes put together.
* Doctor Doom Doombots and the more straightforward purple-and-gray Mecha-Mook Doombots. Oddly, the two designs rarely appear together in a story.
* Doctor Doom). Due to the sliding timescale, it got retconned as him travelling to the past in order to learn Nazi secrets.
* Doctor Doom, even when not trying to court Sue to spite Reed, Doom still lauded her as most powerful of the four.
* Doctor Doom has influenced history both in the present and in the past.
* Doctor Doom has pulled it more than once, as in his eyes, everyone who isn't Doom is an imbecile...
* Doctor Doom has these in his castle in Latveria, which he uses to execute anyone who violates Doom's law or irritates their liege. A throwaway line mentions these

actually replaced the iron maiden that formerly did the same job for Doom's predecessors.
* Doctor Doom. He dare not sleep otherwise his thoughts will alter reality. When he does eventually fall asleep, he subconsciously resurrects the heroes he just killed.
* Doctor Doom invariably returns to his position as dictator of Latveria because his successors always turn out to be as bad or worse than he is and the country falls apart in his absence.
* Doctor Doom, is the son of a folk healer father and a Romani witch mother. Upon perusing his slain mother's heirlooms, young Victor von Doom discovered his heritage, and fervently studied the arcane arts to the point where Doom has the esteem of Doctor Strange.
* Doctor Doom is told by Boris, the faithful servant of the Von Doom family who served as surrogate father to young Victor Von Doom after his family was slain by an arrogant aristocrat. Boris sees Doom as the champion of Baltic gypsies, after turning medieval Latveria into a showpiece of Europe. Latverians are shown heartily supporting Doom as well.
* Doctor Doom is with them — if only the other three are in danger, he couldn't care less.
* Doctor Doom, king of Latveria, holds a lock on this position in the Marvel Universe. However he is actually a decent ruler to his people, having overthrown the corrupt tyrant who previously ruled Latveria, and seems to genuinely believe him ruling the world would make it a better place.
* Doctor Doom messing his face up. He was unable to even admit to himself of his mistake in either instance. His supervillain-sized lust for power is rooted in his belief that he should be second to no one, particularly Richards. This is also why he always rebuffs others' attempts to rehabilitate him. He just can't accept the pity and sympathy of others.
* Doctor Doom might be this - no one's quite sure if he actually uses dark magic or not, but the aforementioned Mordo is his teacher...
* Doctor Doom qualities. For example, he sold a device that he claimed was a violin that played amazing music regardless of the player's skill, but was actually a remote-controlled radio.
* Doctor Doom rather than a cloak, and that the hood is not in fact part of it.
* Doctor Doom ruler of the Eastern European country of Latveria, will not let legal technicalities get in the way of his regime. After all, isn't it the duty of a ruler to know when to set aside the rules?
* Doctor Doom's ability to generate forcefields, allowing the FF to survive the building exploding in space and return to Earth.
* Doctor Doom's death traps for Reed, a simple corridor that keeps getting narrower and narrower, doors progressively sealing the way back. Reed is forced to push his stretching abilities to their limits in order to keep going... only to find a dead end.
* Doctor Doom's Fearfall features a propaganda film, titled, "Latveria: Land of Enchantment", which portrays Doom as a glorious leader who's attempts at making the world a better place are always being foiled by the Fantastic Four.
* Doctor Doom's Fearfall focuses on none other than the Fantastic Four's arch-nemesis, Doctor Doom, and his attempts to recruit guests into fueling his "Fusion Dynamo" device that he will use to destroy the quartet.
* Doctor Doom's Fearfall, the location of the "Tower of Doom" is made very blatant due to the ride's name being displayed in big letters on a massive sign that can be seen from quite afar.
* Doctor Doom's Hologram Projector consist of a projector and a transmitter. It can project images derived from a signal from the transmitter. He often attaches the transmitter to one of his Doombots or other minions and watches the image from a safe location.
* Doctor Doom shot the Baxter Building into space in his second appearance in comics. A Doom imposter later succeeded.
* Doctor Doom's Latveria fits this trope pretty well, especially in some of the

earliest comic books. Doom's
* Doctor Doom). The literal bonafide Truth smacked Doom in the face...and he refused to accept it. That's either impressive or sad. Maybe both.
* Doctor Doom; though he broke free, he was badly injured. His lab assistant Lysette kept him alive while urging them to fly the faster to the hospital.
* Doctor Doom/Thunderbolts unwittingly saved Doom during an unrelated time travel adventure, and he merely hijacked their time machine to get back to the present.
* Doctor Doom tooth and nail trying to get to Mjolnir and claim it, eventually beating them, grasping the handle and, predictably, being unable to budge it. Rather than rage at his failure or try to take it out on anyone nearby, he simply shrugs and goes home.
* Doctor Doom ultimately shows Doom's face, hideously mutilated and the only thing he couldn't fix.
* Doctor Doom: Victor Von Doom! of the Marvelverse is renowned for his villainous arrogance. His original enmity with Reed Richards came about because he refused to consider the possibility that he could make an error, then, when the machine blew up in his face (literally), he concluded that Richards had sabotaged it.
* Doctor Doom. When they were in university, Reed Richards perused Doom's notes for his grand experiment and tried to warn him that some of his calculations were off, which threatened disaster. Doom refused to listen, and when the experiment blew up in his face, as Reed warned, Doom could not accept that he made a mistake and irrationally accused Reed of sabotage, starting their lifelong enmity.
* Doctor Dreadful line of toys features the eponymous doctor as its mascot, and encourages kids to become one too by using his lab toys to make the various gross food creations.
* "Doctor, drop what you're doing and come with me!" breach of a patient's privacy, and if it's the operating room would also compromise the procedure's sterility.
* Doctor Evil "Preparation H", as preparations A-G were complete failures. Of course, this is all to set up yet another joke for Scott to laugh at.
* Doctor Fate, also became Doctor Fate. And he also has a sort-of-relationship with a woman called Inza, which isn't exactly a common name.
* Doctor Fate a misled Osiris attacks Doctor Fate and uses his scales as a weapon against him.
* Doctor Fate. Both Fate and Strange's capes are often shown billowing about as though they're enchanted to fluctuate in size and length, which is likely for both characters.
* Doctor Fate involving a vampire who believed he could turn back into a human by drinking Jesus's blood from the Holy Grail.
* Doctor Fate's villains is a man named Ian Karkull who can control shadow magic.
* Doctor Fate the wearer varies depending on the writer; in some cases it's an actual partnership that can be broken by the human host at will, and in some cases once the host decides to put the helm on it's the last decision they get to make until the helm decides to remove itself.
* Doctor Fate, who wants the Helmet of Nabu for himself. He just can't catch a break!
* Doctor Faustus, amusing the Emperor's court, and eventually just dying alone, realizing how badly he wasted his potential.
* Doctor Faustus, and who dryly notes that his own person rather proves the reality of those things.
* Doctor Faustus. He always convinces himself that he's too far gone to repent, so there is no point. He is eventually more repentant when on the brink of death, but this is too late for Marlowe's God. Although Faustus was aware of religion, he chose to defy it.
* Doctor Faustus sells his soul to the devil for diabolical powers that he uses for selfish and often petty goals.
* Doctor Faustus when Robin takes on his friend Dick as his own servant...
* Doctor Faustus: You might think a so-called genius like Faustus would be able to accomplish a lot with his demonic powers, but instead he squanders them on childish pranks.

* Doctor Filbert R. Z. Quintain, M.S., Ph.D., F.A.A.S., the expert on mutant powers at
* Doctor Finitevus' first use of his Chaos Siphon suit turned him into a
* Doctor Forrester's first appearance in any episode is usually announced with some variation on "Hello, booby," or another insulting nickname for Joel or Mike.
* Doctor Forrester's is specifically designed to fail and trap the user within a lethal "simulation", so that he can use it to take over the world.
* Doctor Fractured Tibia, more commonly called Tibbs. He'll often threaten other characters, including his so called allies, with painful death or torture, and has gone through with his threats on several occasions.
* Doctor Franklin (and his father) are (apparently) African Americans.
* Doctor Franklin's dream is to create useful animal-human hybrids. When this trope comes up he sneers and claims that starting from a scratch just won't do for what he wants.
* Doctor. German name. German accent. And a Nazi attitude to people in the way of his plans.
* Doctor Ghemor, I Presume? wrong in the Bashir family if Julian is so eager to jump ship.
* Doctor Gonzo in an elevator, in a haze of drug-fueled paranoia. (Everyone else tries to ignore him.) Comes complete with the doors opening, a horrified couple staring at the knife-wielding Gonzo, and the doors closing again.
* Doctor Grordbort's Contrapulatronic Dingus Directory, is written entirely in this style.
* Doctor Harleen Quinzel fell for the Joker while she was treating him at Arkham. She helped him escape, and he repaid her with electroshock therapy. Once her brain was broken, she cheerfully jumped into a bath of chemicals in order to receive the same transformation he did.
* Doctor Henry Jekyll) originally created his famous serum to separate people from their vices, as in the story he came from. While Hyde still acts on Jekyll's repressed emotions, Jekyll never once uses his alternate form to indulge in his darker desires before the murders start. Ultimately, while in the novella Hyde is the one that does them both in out of fear of getting caught, Jekyll is the one to kill them here to stop him from taking over.
* Doctor Horrible's Commentary! The Musical has several songs about the song. Most notably "Ten dollar solo."
* Doctor Horrible's Sing-along Blog. Then you hit the point where the "evil scheme" starts to unfurl, and things start happening.
* Doctor: "I have some bad news and some very bad news. The bad news is that you have cancer." Patient: "What's the very bad news?" Doctor: "You also have short-term memory loss." Patient: "Oh, thank goodness! I thought you were gonna say I had cancer!"
* Doctor Impossible, and according both his and The Champions' stories, not nearly for the first time.
* Doctor in Charge episode "There's No Fire Without Smoke", the climax in which the doctors of St. Swithin's hospital rush in comically inept style to a fire (which one of them assumes is just a drill) is done in the style of a silent film comedy, complete with title cards for dialogue and lively piano accompaniment.
* "Doctor in Distress" regulars and a bunch of other celebrities. Unfortunately, it was so poorly received that even the BBC itself refused to air it on its radio stations.
* Doctor in the House, a character tries to deliberately fail his final medical exam. (If he passes, he will be obligated to marry a woman he no longer loves.) He attempts to deliberately fail the written exam but, never having failed a test in his life, finds he is unable to deliberately write down wrong answers. He gets drunk before his final oral exam and refuses to answer one of the questions. The examiner then realises that he has been using that diagnostic example too much and thanks the student for drawing it to his attention. At this point, he might still have passed if he had not then thrown up on the examiner.
* Doctor in the House. Drs. Stuart-Clark and Collier put Dr. Bingham's leg in

plaster as a prank before he leaves on his honeymoon, and Dr. Waring is forced to drive Bingham and his wife to their honeymoon hotel in a hired car and then stay the night; when the prank is revealed, he forces Collier to come to the hotel with a set of plaster cutters. Collier nearly misses the turn for the hotel, and reverses his car into a ditch as he tries to correct his mistake. As he forgets the plaster cutters in the car, the other doctors try to pull it out with Bingham driving the hired car, but his plastered foot gets stuck on the accelerator, dragging both cars on a wild ride down country roads and stopping on a level crossing — just as the barriers lower for an oncoming train. A mad scramble ensues to get the cars off the crossing in time, but then the still plaster-encased Bingham gets his foot stuck under the rails... fortunately, the train is going in the other direction and he is unharmed. (Collier's car gets front-ended by the other car, however, and his leg really does get broken in the impact.)
* Doctor in theHouse Richard Gordon, who wrote the book series, has a cameo as an anesthetist.
* Doctor in the House took over writing fresh scripts with new scenarios for renamed or composite versions of Gordon's characters.
* Doctor in the Underworld series, vampire historian Tanis observes that Selene’s new ‘team’ of herself, servant vampire Erika (really an amnesic Madame de Pompadour), vampire/lycan hybrid Michael Corvin, and the alien Doctor is basically this, explicitly asking when Selene started to work with a ‘freak squad’; Michael responds with the observation that all they need is a theme song.
* Doctor in the Underworld, when the Doctor infiltrates Ordghaz Manor to learn more about the vampire/lycan war, Selene gives him a coat belonging to one of her deceased Death Dealer allies so that he can accompany her to the library, but acknowledges that he will only pass for a Death Dealer under casual inspection.
* Doctor in the Underworld, while the Doctor expresses his disapproval of Viktor after learning about his role in starting the war as he decides to try and end the vampire/lycan conflict, it is unclear if Viktor was ever even aware of the Doctor’s existence, as he never mentions him when talking with Selene about her ‘crimes’, Selene speculating that her memories may have been so jumbled that Viktor didn’t ‘remember’ the Doctor.
* Doctor Jekyll and Sister Hyde, Dr. Jekyll attempts to escape from the police over the rooftops. He slips and falls and winds up hanging from the fingers from the gutters.
* Doctor Jekyll and Sister Hyde, Jekyll explains that the woman seen in his flat the previous night (actually him transformed into a woman) was his sister. When Susan asks her name, Jekyll glances at the newspaper in his hand and sees the headline "Murder in Hyde Park", and replies:
* Doctor Kureha also uses these methods to keep patients from doing anything that will worsen their condition or even make them incurable. She violently floored Sanji to keep him from further injuring his back and paralyzing himself.
* Doctor Kureha Shinogi is a subversion to this, to an extent. He has no fighting technique, and has an Olympian-level body in everything, having a scientifically-perfect body, but he also makes up for his lack of fight experience with his medical knowledge giving him a good grasp of the human body's weak points.
* DoctorLalve. Amazingly, YouTube commenters have managed to decipher them.
* Doctor Lautrec and the Forgotten Knights: Completing every quest including the ones after the main story unlocks a last dungeon to encounter a Treasure Animatus that's on par with the last form of the final boss.
* Doctor Lautrec and the Forgotten Knights has the Phantom as the leader of a faction of iron - masked knights.
* Doctor Light horrifically murders a surviving prison guard in a painful fashion, seemingly out of sheer sadism.
* Doctor Locklear series. He uses his surgical knowledge to torture and then kill people accused of crimes who were released or ruled not guilty. He also used it to kill the night nurse checking on him in Good Doctor Locklear.
* Doctor Lollipop — Doctor Lollipop is obviously reluctant to call in Doctor

Woodsman despite needing his help, and it initially seems to be because Doctor Woodsman is this for him. It turns out that it's because Doctor Woodsman is a squeamish dullard who's too concerned with the risk of hurting cute animals to actually do his job.
* Doctor Manhattan if you try to think about how it should really work. It helps that he's so absolutely neutral he's not really motivated to change the future anyway.
* Doctor Manhattan is a subversion, he seems stoic to the point of alienation which makes the moment where he is angry or happy stick out but Ozymandias says to someone experienced in reading body language or psychology Jon was continuously sad, he just couldn't weep like a human does.
* Doctor Marcoh sheds tears while destroying the Philosopher's Stone inside
* Doctor Milliner's Marvellous Musical Flying Machine," by modern composer Eric M. Pazdziora.
* Doctor Mordin Solus is a weird case, in that he admits to having a negligible personal interest in cultural studies, but he did some
* Doctor Mordrid had optioned the right to adapt the comic into film, but the rights expired during pre-production. Rather than cancel the project, they just changed the characters' names.
* Doctor Mordrid. Mordrid naturally refuses, pointing out that wizards have no right to rule humanity.
* Doctor Mordrid movie, but the script was changed after the rights expired and returned to Marvel.
* Doctor Mordrid skeleton and have it attack random people to make Mordrid back off.
* Doctor Moreau, probably one of the best well-known Mad Scientists in pop culture, appears in several films, most notably
* Doctor: "Mrs. Jones, I have some good news for you." "It's Miss Jones." "Miss Jones, I have some bad news for you."
* Doctor Octogonapus did this once somehow when he burst out of some superhero.
* Doctor Octopus also had, at one point, a fear of spiders. He needed psychiatric counseling to overcome it.
* Doctor Octopus around Peter's age or slightly older rather than adults as in other versions.
* Doctor Octopus. As it turned out, however, Stunner was actually a virtual avatar of a woman named Angelina Brancale, created using Ock's technology, and in truth, her true body wasn't very attractive at all. (Stunner seemed to be a fantasy that the VR machine was letting her live out.)
* Doctor Octopus briefly traded in his green and orange tights for nice suits.
* Doctor Octopus by saving New York from the Goblin King at the cost of being erased.
* Doctor Octopus comics. He has been shown time again to wanting to be left alone but also craving the closeness of others. Even after the "The Superior Spider-Man" run, Octavius still had the inkling to help others.
* Doctor Octopus (eschewing the usual goggles derived from the comics).
* Doctor Octopus. For no obvious reason, even his original set of tentacles are fast enough to deflect bullets and strong enough to throw around forklifts.
* Doctor Octopus, he considers himself and Spider-Man to be twins of their "mother", nuclear power. Ock generally seems to take this trope's title literally.
* Doctor Octopus severely injured the Black Cat, Spider-Man gives the villain the beating of his life. Doc Ock loses his confidence as a result, becoming a cowardly shell of his former self, unable to fight, with a bad case of arachnophobia. Eventually, Octopus tries to kill his foe indirectly, sabotaging a nuclear reactor — which would kill everyone in New York, unfortunately. But after his out-of-control tentacles let him defeat the hero — by accident — Spidey convinces him to shut the reactor down so that there'd be witnesses to know of his "great triumph". And it works. Ock gains his confidence back, thinking he is letting the hero live with the humiliation by sparing him. (To Spider-Man, pride isn't an issue when the whole city is at stake.)

* Doctor Octopus's old schemes was a variation. During his feud with the mobster Hammerhead, he actually proposed to Peter's Aunt May, not because she was wealthy (which she wasn't) but because she had unknowingly inherited an atomic plant that he wanted. Of course, Spider-Man got involved, the scheme culminating in a three-way fight between him, Doc Ock, and Hammerhead, the plant's destruction, and Ock becoming a destitute vagrant for a while.
* Doctor Octopus's problems started apparently when he added four arms of questionable morality to his spine...
* Doctor Octopus's tentacles dedicated drills or drill-like rotation of the claws.
* Doctor Octopus, the first time he ever stood up to his mother, and things got so heated that she died from a heart attack.
* Doctor Octopus was almost always seen in a white suit in the early-mid 90s.
* Doctor Octopus while suffering from the flu. He is easily defeated and unmasked, with Ock beating him down with his bare hands... and his poor showing convinces Doc Ock, the hostage, and the other witnesses that he isn't Spider-Man but just Peter Parker making a brave but very foolish effort to save her.
* Doctor on the Go comes from a wealthy family, and though he is a competent doctor and occasionally willing to join in the schemes of the other doctors, he is more usually portrayed as a pompous buffoon who is more likely to be on the receiving end of pranks.
* Doctor on the Go features a gender-inverted version in the episode "For Your Own Good". Dr. James Gascoigne's father has been admitted to St. Swithin's Hospital with a head injury, and Mrs. Gascoigne turns out to be an old flame of the Professor of Surgery, Sir Geoffrey Loftus. The elder Gascoigne seduced his future wife away from Loftus while the latter was away on holiday several decades earlier; Loftus and Mrs. Gascoigne have a chance encounter in the corridors of the hospital, their first meeting since their relationship ended.
* Doctor Oobleck is Beacon Academy's history teacher. He has a shaggy, unkempt mane of vivid green hair.
* Doctor Orpheus uses Astral Projection to talk to his vampire hunter and alchemist buddies and gets the lines crossed.
* Doctor Otto Octavius, thanks to not becoming Dr. Octopus until later in the game. This version, unlike his megalomaniacal comics counterpart who had to deal with Abusive Parents
* Doctor Pepper 10's wilderness ads show a manly pioneer being so manly, he can whistle and cause an eagle to dive into the lake and get him a Doctor Pepper, can make a bear paddle his canoe for him, and can carry a massive tree trunk under one arm. This was intentionally comedic. In another ad, the characters talk about how manly Doctor Pepper 10 is while escaping from a pastiche of 80's action movie bad guys. Though intended to be funny, it came off as sexist when the manly man said it wasn't a drink for women, as did the text at the end of the commercial.
* Doctor Phage believes that he is the ultimate concept of medical treatment, and therefore the expert on treating Fern's son. Everything he has done, he genuinely believes is in the best interest of his patients.
* Doctor Phil has said that he played linebacker for Tulsa in the game, but confirmation for this has been elusive.
* Doctor Phil has this trope every few episodes, usually focusing on 1) Children who are kidnapped by some stranger they met on the internet and 2) Children who spend too much time on the internet or texting.
* Doctor Pierre Chang shares the same French-first-name Chinese-last-name formula as his actor, François Chau.
* Doctor Rabbit. Eventually, Colgate just gave up and stopped bothering to stop the Poop.
* Doctor Rabbit has the titular dentist pick up kids from various countries to teach them about proper dental care.
* Doctors and alchemists in older times often examined stuff by taste and smell — they didn't have much choice, as most of the more sophisticated methods didn't exist yet. This is probably one reason why people who dabbled in alchemy tended to get rather strange later in their lives. Traditional alchemy is

absolutely fascinated with mercury, whose fumes are highly toxic and not good for the brain.
* Doctors are experimenting with using a special type of virus to treat patients with antibiotic resistant bacteria. These viruses, called bacteriophages, are specialized for infecting specific kinds of bacteria and are harmless to eukaryotic organisms like us. Bacteria can adapt resistances to these viruses, but by doing so
* Doctors, as Laura and Barney desperately try to decide what to do about her unwanted pregnancy, she cites a classmate who was able to sneak away to another country to have an abortion and that the trip was simply explained away as her summer vacation. When they finally do get the name of a reputable abortionist (the book is set pre-Roe vs. Wade), they plan to sneak off by telling their respective families that they are taking a day trip to the countryside.
* Doctors Cameron and Chase, members of House's team. They slept together once when Cameron was high on drugs, and later decided to start a
* Doctors: Cherry, particularly in her early appearances. When she first started work at the Mill, Michelle got her to put away all the medicine that had been left out, expecting to have to sort it out herself later. Not only did Cherry get it done in record time, while she was at it, she alphabetized all the cabinets to make things easier to find.
* Doctors had this discussion, despite a 30-something year friendship that began when they were in kindergarten. When they finally do realize and admit that they love each other, the narration sums it up:
* Doctor's insistence with magic not existing. His race literally booted it and their followers out. And if it does exist, it means they could be back... and probably be very
* Doctor Sivana doesn't bat an eye when his head researcher gets disintegrated in front of him, only caring that he finally found what he was searching for his entire life.
* Doctor Sleep but coming back after he gets clean. The book also introduces a new psychic child in Abra Stone, a young girl with "shining" powers similar to Danny's.
* Doctor Sleep: Dan notes at one point that "AA has no rules, but many unbreakable traditions". A minor character is also described by Dan as only having two emotions: "Angry" and "Severely Pissed-Off".
* Doctor Sleep, Dan Torrance goes through great lenghts to avert this trope when he meets up with Abra. Still, Abra's father is quite suspicious of him when they first meet.
* Doctor Sleep: Discussed. When Abra tracks down Dan, he points out that people might get the wrong idea about a teenage girl meeting a stranger in a park. She tells him that if anyone asks, she'll say he's her uncle. Later, after Abra tries to tell her father about everything that's happened, he just thinks that "Uncle Dan" groomed and molested her. She has to psychically force the information into his mind to convince him.
* Doctor Sleep, even hypothesizes about their condition, believing them to still have DNA but to have a changed nervous system, the latter of which causes the True Knot to react badly to flying (necessitating them to travel in a convoy of RVs).
* Doctor Sleep, Grandpa Flick adjusts what war he claims to be a veteran of periodically to match his apparent age. Being a military history buff, he manages to be reasonably convincing.
* Doctor Sleep, Rose the Hat shifts from killing Abra Stone as vengeance and wiping out her town to merging with the Overlook Hotel and leveling other towns until, as she put it, "Nothing remained."
* Doctor Sleep, such as by providing crucial links between characters.
* Doctor Sleep (the "essence" of the Shine) when killed, with their bodies violently "cycling" between being in a state of non-existence and rapid decomposition beforehand.
* Doctor Sleep. This was a question King had often asked himself as well as what would have happened to Jack Torrance had he found AA. King started thinking about how old Danny was and where Wendy was now, and decided to find the answers with a sequel, but it was a tall order.

* Doctor Slump, along with her reckless, childlike behavior and lack of common sense.
* Doctor Slump, and the chapter ends with the Biker Boy and the female racer becoming married.
* Doctor Slump, and the reason he didn't shake hands with Akane is that he suffers from the same problem as Tsukutsun and transforms into a dragon every time a girl touches him.
* Doctor Slump, appears to have a penis, as seen when Senbei attached Arale's head on Obatchaman's body. Peasuke ends up walking in on Arale changing clothes, leading him to temporarily believe Arale was transgender. In the remake Arale shows it to Senbe while her body and Obotchaman's were swapped for a repairing purpose.
* Doctor Slump: Arale and Gatchan (who are adoptive sisters) being two completely innocent children, they don't have a clear concept of what love or romantic relationships are, so they often play to have a date or get married together.
* Doctor Slump: Arale can punch so hard, the Earth cracks and splits in half.
* Doctor Slump Arale finds a young girl who is putting her sheets to dry after such an incident. Fascinated by the whole thing she attempts to wet her own bed by various methods, not realizing that she can't wet the bed on account of being a robot.
* Doctor Slump, even enters the strip himself and meets the characters!
* Doctor Slump has Nonko and Anko, two girls (from the city) that look like Akane and Arale (Nonko has a different hairstyle while Anko is a brunette). When Anko loses her lens (after being shocked seeing a living poop), she is obliged to put her glasses and is mistaken for Arale by Senbei that takes her to the Norimaki Residence. While searching for her friend, Nonko meets Arale and mistakes her for Anko. Nonko realizes that Arale is not Anko only when in the plane back to their home.
* Doctor Slump in an episode of the 80s anime. In the episode the Prince Monster had asked his servants to look for a human girl to be his girlfriend, they went to the Penguin Village and found Arale, whom they took to the castle of the Prince Monster, who ended up liking him a lot. But unfortunately Arale did not meet the ideal qualities that he had of a human girl, such as her beautiful song. In the end, he likes her even though Arale destroyed the castle with his N'cha cannon, causing Prince Monster to break up with her, but they seem to be on good terms as he gives Arale his autograph.
* Doctor Slump). In the final episode of the remake there is the same scene (with their baby ten years in the future), except that the moment is shown in the epilogue rather than as a result of time travel. Also, the same episode ends with the birth of Turbo, Senbei and Midori's son, and the epilogue shows they will have other children.
* Doctor Slump involves author Akira Toriyama getting disgusted with the regulars and attempting to reboot the anime as "Toriyama in Babeland". He enlists the help of the lecherous Senbei Norimaki (Dr Slump), promising that the new show will be "Dr Slump in Babeland". Dr Slump rebels when he realises Toriyama plans for wholesale destruction of Penguin Village, hence foiling the author's scheme.
* Doctor Slump is a definite example. But any setting with characters like Arale is going to be on a different field of sense.
* Doctor Slump named Renault Citroëen who shares the same design and fighting style. She easily beats Senbei with her looks alone, but not Arale (as she is a female robot) and she quickly gives up.
* Doctor Slump, Obotchaman considers himself to be the knight for his "lady" Arale. This is often downplayed or subverted because Arale is an android strong enough to face anyone alone, however Obotchaman will always be ready to protect her when necessary and he won't hesitate to defend Arale if he sees someone hurt her. They are also represented like this in one of the endings of the original anime and in the remake Obotchaman after leaving Dr. Mashirito, proclaims to become "the knight of love" for Arale's bright lady.
* Doctor Slump), or have trouble against a opponent that she should be able to destroy easily.

* Doctor Slump. Played straight when ordinary humans are involved, though.
* Doctor Slump, Senbei accidentally turns himself into a baby. Ms. Yamabuki doesn't know who the baby is, so he uses the occasion to watch her in her undies, and see her naked when she bathes him. He turns back into a adult just when she is about to let him sleep with her. He end up with a axe on the head for it all.
* Doctor Slump; therefore, they retain the same appearances they always had despite becoming parents.
* Doctor Slump ties a thread of her dress to a car which took off and unraveled her dress in front of him causing her to get embarrassed and slap Kurikinton.
* Doctor Slump titled "Gatchan You're Great", Obotchaman falls in Tsuntsunodanoteiyugo's bath.
* Doctor Slump Tsururin has psychic powers and is able to use telekinesis on herself and objects.
* Doctor Slump when a bear being returned to the wild is shot. Before administering any other help or considering any other options, Senbei declares "I might still be able to make him a cyborg!" He succeeds at this.
* Doctor Slump when he's accidentally killed, then resurrected, by aliens who don't quite grok human biology.
* Doctor Snuggles: In "The Sensational Balloon Race", this is how the Doctor's balloon racer flies. He and his assistants blow up several party balloons by mouth which is able to lift their gondola up into the air.
* Doctor Snuggles leans more towards the fantasy element. While there are science elements involving the Doctor and his machinery, there is plenty of magic and fantasy in the setting. We have talking animals, sentient trees and characters wielding magic spells such as Winnie Vinegar Bottle and Professor Emerald.
* Doctor Snuggles. When Snuggles explains that the plants and animals on Earth need the water, the aliens promptly agree to give it back.
* Doctors of psychology (between four and ten years of studying nothing but the human brain and human behavior) really,
* Doctors Orders, features the Enterprise (under the command of McCoy) being forced to go into silent running mode to avoid detection by an overpowered Orion ship.
* Doctors played a character who exclaimed: "I killed a man... with THESE!".
* Doctor Steel, a general guideline for uniforms, he also encouraged incorporating individual expression into them, resulting in myriad interpretations on the theme.
* Doctor Steel and had his sights set on world domination, he was rather small of stature in real life.
* Doctor Steel as their new Emperor. There's even a division in his fan club for the over 35 crowd now!
* Doctor Steel, as they are a deliberate parody of evil organizations. (Since the Doctor's retirement, use of red has been diminished.)
* Doctor Steel believed that robots would eventually evolve to the point where they would replace man, who by that time would have polluted the world so much that only his machine creations would be able to survive anyway. (He even published a paper on the subject.)
* Doctor Steel believed we were all being intentionally manipulated by the media, especially by television. In his song "Back and Forth", he throws in this gem of irony:
* Doctor Steel believes (whether in actuality or whether it's part of the crazy act is anyone's guess) that the world is controlled by a cabal of alien "Illuminati".
* Doctor Steel - "Build the Robots". Dr. Steel wants to build a giant robot army as one of his backup plans for world domination in case the whole musical brainwashing idea doesn't pan out.
* Doctor Steel can be heard engaging in a mad laugh near the end of his self-titled song, "Dr. Steel."
* Doctor Steel can be heard engaging in one near the end of his self-titled song, "Dr. Steel."
* Doctor Steel, creating an army of giant robots, and having a robot band. And a lot of robot toys.
* Doctor Steel, Dr. Steel breathes on a creepy toy and brings it to life; it

subsequently brings all the other creepy toys to life.
* Doctor Steel: Dr. Steel for World Emperor!. Toward a Utopian Playland!
* Doctor Steel. Dr. Steel is a master of propaganda, with recruitment posters, web videos, catchy music, and viral marketing through his growing fanbase army.
* Doctor Steel financed his giant robot construction, according to his song, "Build the Robots".
* Doctor Steel fully admits that he's a mad scientist bent on ruling the world, and puts the label "Propaganda" on all his media. People are willing to support him anyway, because what he plans to do with the world once he's ruling it is awesome.
* Doctor Steel had a page where you could animate him doing loops of various dance moves (the monkey, the sprinkler, the cabbage patch, the robot, etc.) by pressing buttons underneath him.
* Doctor Steel has a large and growing fanbase, but only released five albums (three of those via digital download) and never charted.
* Doctor Steel has one, seen on his website and in his videos, located on a mysterious secret island in the Pacific.
* Doctor Steel; he played the accordion and was pretty damn cool. Although definitely quirky.
* Doctor Steel is bald, and wants to take over the world. (On the other hand he just wants to promote fun, and loves children.)
* Doctor Steel - or his fans - do is done consciously and conspicuously over the top.
* Doctor Steel plays with this aesthetic in his music and interactive Fandom community.
* Doctor Steel's backup plan for world domination, if the whole "domination through entertainment" idea doesn't pan out.
* Doctor Steel seems to order some of his supplies from them; he can produce a large hammer or lit stick of dynamite at will...
* Doctor Steel sees a ghostly vision of a magical transforming toy ("Winky") hovering about his lab, but it disappears into an air duct before he can get a Polaroid snapshot of it. Slightly inverted as he was more awed by it than scared.
* Doctor Steel's goals are really very positive and even kid-friendly. He just wants to make the world a better place (for himself).
* Doctor Steel's most popular toy line was the Buzzsaw Baby, a kewpie doll with rotating saw blades for hands.
* Doctor Steel's music video for "Childhood Don't A-Go-Go", Steel breathes on his creeptastic dolls... which begin to come to life and follow him about his laboratory.
* Doctor Steel sports a 47-style barcode tattoo on the back of his neck.
* Doctor Steel's propaganda video, "Building a Utopian Playland", Dr. Steel talks about his plans for world domination, then distracts his audience with a monkey puppet, saying, "Now... who wants to see the dancing monkey!"
* Doctor Steel's song "Atomic Superstar", featuring the original Kaiju, Godzilla.
* Doctor Steel's song, "Greedy", starts out with a news bulletin about three escaped prisoners of an insane asylum (one of them, we gather, is Dr. Steel).
* Doctor Steel's song, "Lament for a Toy Factory", Steel goes insane after being fired by a toy factory. He invades the factory with an army of toys and gasoline-filled Super Soakers.
* Doctor Steel's songs "Lament for a Toy Factory", "Dr. Steel", and "The Dr. Steel Show"
* Doctor Steel's videos will have momentary words flashed on the screen such as "Dr. Steel Loves You." The multimedia displays during his stage shows also contained such subliminal messages.
* Doctor Steel wants to remake the world into a Utopian Playland — by force with the aid of giant robots, if necessary.
* Doctor Steel was a firm believer in Zechariah Sitchin's theory that humanity was created by aliens that posed as gods to the ancient Sumerians, and also believed there was a secret alien illuminati still in control of world affairs. Several of his songs and videos reflect this belief.

* Doctor Steel was never seen without his goggles, regardless of his attire. Somewhat justified, as he was a roboticist and was seen in one video welding.
* Doctor Steel, was this. All we know about his true identity is his real name, and after he retired his Doctor Steel persona, he vanished off the face of the earth for quite some time.
* Doctor Steel wore platform boots. On one occasion, they had lights in the soles.
* Doctor Stein has the battle cry of "I am going to dissect you!" before he starts to fight. It's not just based for his fights alone, though he has said it to Crona and Medusa, and in the anime, Marie, he has also dissected his best friend repeatedly for years without him noticing, and wants to dissect the boss's son. He also dissected an endangered bird in his homeroom class. For his own amusement. All of this seems to have even caused a
* Doctor Strange (2016): a passenger in a bus that Mordo and Doctor Strange land on top/on the side of. He doesn't notice, given that the two are in the Mirror Dimension.
* Doctor Strange (2016) by the Ancient One, he looks up at her from his knees and quietly begs her "Teach me." Just as quietly she looks down on him and replies "No", before having him chucked out of Kamar-Taj.
* Doctor Strange (2016) crashed his car at the beginning of the film, leading to nerve damage that caused his hands to shake uncontrollably. Strange was a neurosurgeon before the crash, meaning it was impossible for him to continue working without putting every single one of his patients at enormous risk. It is pointed out that he could still have a long and fulfilling career as a doctor and would be an invaluable resource as a consultant for other neurosurgeons. However, for Strange, medicine holds no interest if he cannot be a surgeon so he wrecks his life looking for a cure for his condition.
* Doctor Strange (2016) from male to female, but that's beside the point.) The film also features non-white sorcerers such as Mordo (black) and Wong (Asian), with the overall effect that magic is unrelated to race.
* Doctor Strange (2016) has the mages display magical displays of their power, with the Ancient One comparing it to a program or source code. There is also a relic, the Orb of Agamotto, a model of the Earth that projects magical displays to monitor any threats from other dimensions.
* Doctor Strange (2016) has the sequence of Strange and Mordo being chased through New York by Kaecilius and his Zealots in the Mirror Dimension.
* Doctor Strange (2016): He strives for a world without suffering, death, destruction, or hardship. What he really means is that he wants Dormammu to incorporate Earth into his dimension—as time doesn't exist in Dormammu's dimension, time suddenly stopping is how it would appear to an observer on Earth. Well, one immune to Dormammu's effects anyway.
* Doctor Strange (2016), he walks past Lucian's corpse and checks for a pulse. Later, he rebuffs the Ancient One's praises by telling her he became a doctor to save lives, not take them.
* Doctor Strange (2016) in order to slow Strange down and tip him off balance.
* Doctor Strange (2016) in the film. It may be the only badass cape more badass than its wearer.
* Doctor Strange (2016) introduces actual magic to the MCU and Stephen Strange's character arc shows him learning that there are countless realities beyond the rational scientific one he initially believes in and that magic and science can co-exist.
* Doctor Strange (2016), it's clear that physical might is irrelevant when defending against this move.
* Doctor Strange (2016): Not so much a battle than a confrontation with Dormammu and trying to "bargain" with him through some creative use of magic.
* Doctor Strange (2016), Stephen and Christine work together and used to be lovers prior to the start of the film, leading Christine to now follow "The Strange Rule" and not date colleagues, but the two still clearly have feelings for each other and she attempts to help him through his depression after a car accident leaves him unable to use his hands to perform surgery, at least until he pushes her away in an

angry outburst and goes off to Nepal searching for a cure. Once they're reunited, she gives him a kiss on the lips when he says he has to leave for good and both are clearly torn by his having to go, but the damage has been done already and they don't end up back together.
* Doctor Strange (2016), Stephen steals books on astral projection from Kamar-Taj's library using his sling-ring (something he is not allowed to do). Wong (the librarian) tells the Ancient One who, rather than punishing him for this, instead introduces him to the Mirror Dimension so that he can practice more advanced magic without destroying anything.
* Doctor Strange (2016), Strange uses it to rewind the destruction of the Hong Kong sanctum and surrounding area while Mordo and Wong fight Kaecilis' zealots. The sorcerers use this to their advantage, trapping the zealots in structures as they're being un-destroyed.
* Doctor Strange (2016) suggested the idea to the producer, who burst out laughing and liked it so much he directed the special effects crew to make it happen.
* Doctor Strange (2016), the villain Dormammu is trapped in the Dark Dimension so that he cannot harm the main universe.
* Doctor Strange (2016), wherein it's shown that not only is magic a real force, but it specifically doesn't need to follow the rules of scientific law.
* Doctor Strange admit to being second at anything, even with a being as out of his league as Shuma-Gorath.
* Doctor Strange, after being led into the presence of "The Ancient One," Strange keeps thanking the older man in robes, while receiving tea from younger-looking woman in yellow. As the robed man leaves, Strange voice trails off, "Thank you Ancient One, for seeing me." Just then, the tea server says, "You're very welcome." Cue astonished look on Strange's face.
* Doctor Strange after getting the villains hoisted by their own petard Strange repeats a line he said earlier when caught trying a spell from a restricted tome.
* Doctor Strange, alienated everyone, and eventually lost his license due to a malpractice suit.
* Doctor Strange also tends to make his eyes glow white when he's doing something serious - though he mostly seems to do it for dramatic effect and/or to screw with people, because he's
* Doctor Strange and Clea. He was Sorcerer Supreme of his dimension and she was a member of the royal house in hers — they never did find a way to solve the problem and eventually separated to their own worlds.
* Doctor Strange, and escapes to Heaven without any chance of reconciliation. Strange, moved by pity, reaches out to Doom, but Doom coldly rebuffs him.
* Doctor Strange and half-niece of Baron Mordo, as well one of the most powerful witches in Europe.
* Doctor Strange and his physical body. The former is intangible, and even could go right through the core of the planet Earth as a shortcut around the surface.
* Doctor Strange, and people often come directly to him to deal with their supernatural problems. And since he's the Sorcerer Supreme, it's pretty much in his job description. Or Brother Voodoo or Magik if Strange isn't around.
* Doctor Strange and says "Strange Smash", a nod to Hulk's famous line "Hulk Smash".
* Doctor Strange and Strange's attempt to effect a cure through magical means. The primary antagonist is another mage/doctor who was bought by the company and acts as if he half-believes their official line that medical research must proceed at its own "natural pace".
* Doctor Strange and the other Many-Angled Ones were some of the first creatures to ever exist in the multiverse.
* Doctor Strange and the Sorcerers Supreme involves a macguffin known as the Word of God that appears to be a spellbook of unimaginable power. Turns out the spellbook is actually advanced technology from an extradimensional alien being that magic users just happen to have an affinity for. Using its spells draws the owner to the dimension it resides it.
* Doctor Strange and was still in reasonably good physical and mental health when

he died.
* Doctor Strange animated movie, the Sanctum Sanctorum contained a gate to Dormammu's realm.
* Doctor Strange. Back when he had his own title, he once modified the Cloak of Levitation into a flowing red trenchcoat with a broad collar.
* Doctor Strange believe that he had died years ago, and that the physical man they saw was a harmless occult expert named "Stephen Sanders."
* Doctor Strange, but he has this to say about his story (being orphaned by Shuma-Gorath followers):
* Doctor Strange, but he's also a physically-ordinary human being, so compared to heroes with super-strength or unbreakable skin, he's pretty darn squishy. As with Wiccan and the Scarlet Witch, he's prone to being laid out early by a blow a superhuman could shrug off, just to preserve the drama.
* Doctor Strange, but the most notable one occurs when Strange and Mordo are being chased around New York by Kaecilius and his henchmen while within the Mirror Dimension. As they're trapped there, they must dodge and run through the scenery as it changes constantly around them, until the Ancient One steps in to join the fight.
* Doctor Strange), but this doesn't mean there can't be even unexpected stuff in it as magical accidents do regularly happen around this much magic.
* Doctor Strange, Christine gets a face full of the supernatural as she attempts to keep Strange alive while he battles a villain in the Astral Plane. After ghosts, poltergeist-like disruptions, and a magical portal in front of her very eyes, she's scared witless by a broom falling to the floor.
* Doctor Strange does this a lot, although it could just be part of the spell casting process. If he is unable to use his voice, he is unable to use most if not all of his magic.
* Doctor Strange. Each contains spells or information to perfectly counter something in the other.
* Doctor Strange Eoffren. He is shown forging a magical sword capable of cutting through dimensions, a sword he dubs the Scalpel of Strange. This is notably the very first magical artifact that bears Strange's own name, signifying his growth as a Sorcerer Supreme.
* Doctor Strange features multiple heroes and villains who have the same powers as the main character. Justified in that the movie revolves around wizards who all studied the same mystic arts, including Dr. Strange himself.
* Doctor Strange foe Silver Dagger not only wields his namesake knives as weapons but also commands a group of zealot commandos armed with automatic weapons loaded with silver bullets.
* Doctor Strange found himself in a dilemma between his magical disciple Clea (a native of the Dark Dimension) and Earth-bound journalist and writer Morgana Blessing.
* Doctor Strange frequently goes to cases without much preparation, expecting that he'll be quick-witted enough (or have the right amulet, or know the right spell) to deal with the situation as it develops.
* Doctor Strange. Granted, half the words he uses ARE made-up, but it's still fun trying to follow him through a convoluted explanation of his spellwork.
* Doctor Strange had one for a while as part of a retool into a 'darker' character.
* Doctor Strange has accrued many of these, including 'the Sorcerer Supreme',
* Doctor Strange has participated in many wizard's duels, considering that he is Sorcerer Supreme and the majority of his enemies are either rival wizards like Baron Mordo (as pictured in the page image) or extradimensional wizard-gods like the Dread Dormammu and Nightmare.
* Doctor Strange. He has a number of artifacts which make this much easier, particularly the Eye of Agamotto.
* Doctor Strange. He is a sorcerer, but his final scene reveals he wants to kill all other sorcerers in the belief that all magic-users violate “natural law.”
* Doctor Strange. He is told that, as a result, "death may only come from without,

in battle — and not from within."
* Doctor Strange), he shows Strange how the Universe was created. Strange quickly averts his eyes, paraphrasing this trope.
* Doctor Strange. He's skilled in the martial arts of Kamar-Taj, and also has rudimentary knowledge of magic.
* Doctor Strange, he tries to make sure that someone (usually his manservant Wong) will be present to watch over his body to make sure nothing happens to him while he's "gone." Occasionally, however, a threat comes up which is too much for Wong, and this trope plays out straight.
* Doctor Strange, hops between dimensions and planets to purge them of magic and murder their sorcerers. The Imperator successfully cripples Earth's magic sources, but Strange and his fellow sorcerers manage to escape and seek out the world's last remaining artifacts in hopes of mounting a counterattack.
* Doctor Strange in a 2017 issue, mystical locations in the past existed in multiple places at once. As time went by they settled on a static location, leading to an ancient temple ending up buried under Queens.
* Doctor Strange, in keeping with his all knowing mysterious figure role (and
* Doctor Strange is also ruthlessly manipulative, coldly moving people around like chess pieces, and continually calculating the cost-benefit balance of each action in human and superhuman lives via his
* Doctor Strange is, among other things, a qualified medical doctor (and actually uses those skills more often than his canon counterpart), and is also incredibly and creatively lethal when the mood takes him.
* Doctor Strange is on a first-name basis with a lot of powerful entities, from the Vishanti to Eternity and even the Living Tribunal. They seldom go to him, though he has paid a house call on Agamotto once or twice.
* Doctor Strange is protected by a mystical shield that can withstand attacks from beings like Galactus, Dormammu and Shuma Gorath. Depending on the Writer, it either functions automatically or he has to summon it. He can also call up the "Shields of the Seraphim" for added protection.
* Doctor Strange is renowned for being cryptic and enigmatic, but when he's being clever/actually deigning to tell people what he's been up to for once (something which usually coincides with his being less sane than usual) this is the result.
* Doctor Strange). It is significant since both movies involve time loops.
* Doctor Strange. Justifed in the cases of Dormammu, Umar, Rintrah, and Clea, who all come from other dimensions; not so much with Strange's faithful servant and long-time friend Wong.
* Doctor Strange: Kaecilius and his Zealots attacks all three Sanctums that the Masters of the Mystic Arts are sworn to protect. The London and Hong Kong Sanctums quickly fall to his assault, and the New York Sanctum is heavily damaged. Doctor Strange uses the Time Stone to reverse the damage done in Hong Kong.
* Doctor Strange, largely by outthinking them or maneuvering them into a position where he has a fighting chance.
* Doctor Strange. Later scenes involve him sparring with Mordo (played by the very handsome Chiwetel Ejiofor) in sleeveless tops that do an excellent job showing off their upper arms.
* Doctor Strange, like Mephisto (who looks like a human with unnaturally red skin).
* Doctor Strange. Likewise, Ben Urich, a middle-aged man in the classic Marvel Universe appears to only be in his 30s.
* Doctor Strange looks about 40 odd, and has for at least 1500 years. The sequel later notes that he's actually
* Doctor Strangelove the bomber crews only unseal their targeting orders after the attack command is given. In the latter, they consist of one word- "MOSCOW".
* Doctor Strangelove, which asides from a plane en route to the USSR, is split between the War Room in DC and a base somewhere in the continental US.
* Doctor Strangelove: "Wing Attack Plan R? R for Romeo?" The plan is to nuke the borscht out of Russia, should the normal chain of command have broken down (e.g., from a Soviet nuclear first-strike).
* Doctor Strange magic is powered by the energy of other realities with different

laws of physics. This contrasts with the comics where the energy comes from beings from other dimensions.
* Doctor Strange — the CPR just keeps him slightly alive so that the potion can heal him.
* Doctor Strange, moustached "Master of the Mystic (and Martial) Arts". The style varies, and he sometimes pairs it with a goatee, but he always has the 'stache.
* Doctor Strange name, a sword capable of cutting through dimensions. When his forging mentor Eoffren dubs it the Sword of Strange, Stephen instead calls it a scalpel: the Scalpel of Strange.
* Doctor Strange, Night Nurse is along for the adventure at her own insistence (Strange has been wounded and she is a physician). Strange's assistant Wong is also present as a sort of minor Holmes/experienced Watson, answering some questions and asking others.
* Doctor Strange occasionally refers to 'magick,' though as Master of the Mystic Arts he can usually go into more details about what he's doing.
* Doctor Strange once was turned into a vampire by Dracula, who boasted that since Dracula rules over all vampires, Strange was unable to attack him. Indeed, try as he might, Strange could no longer call upon his usual sources for spells: Aggamotto, Cyttorak, Watoomb, etc. In desperation, and with effort that nearly killed him, Strange called out the name of God.
* Doctor Strange origin show Stephen Strange hitting the bottle and the skids between the accident that ends his surgical career and his tutelage under the Ancient One.
* Doctor Strange. Played with somewhat in that the public rarely takes him seriously — they tend to see him as just another bit of Greenwich Village color.
* Doctor Strange routinely scares the living daylights out of everyone, partly because of his well-earned (and carefully constructed) reputation for omniscience and manipulating the hell out of everyone via
* Doctor Strange's disciple/lover traditionally has two curling locks of hair that meet over her forehead in a way Aqua Net can only dream of achieving.
* Doctor Strange seems to work like this, and the mages have ways of quickly drawing circles in the air. In this case though, the shapes themselves aren't of as rudimentary value, as it is moving the hands through the air in the right way to control the energy that they will emanate.
* Doctor Strange sends Harry and his friends in to rescue Steve, Tony, and Bruce.
* Doctor Strange series in the 1990s, Doctor Strange spent 5000 years fighting the War of the Seven Spheres in another dimension. Given any reasonable age for him, that means at least 98% of his entire life was spent in this one plot. From a look at him today, you'd never know it.
* Doctor Strange's foes, is essentially a Type 1 imagining himself to be a Type 2. He once mortally injured Strange and abducted his lover Clea with the intent to "save her soul" from corruption by Strange's dark magic. (Silver Dagger is a darker sorcerer than Strange himself, but the irony is lost on him).
* Doctor Strange's library is hinted to be the most impressive, since as
* Doctor Strange slips and falls from the roof of a New York skyscraper. If he hadn't suspended Strange's ability to use magic three minutes earlier, he would have lived.
* Doctor Strange's mentor, became one with the universe after his death, though he was still available for an occasional consultation.
* Doctor Strange's mystic artifacts are treasures given by various entities, particularly the Eye of Agamotto. Interestingly, they belong to the office of Sorcerer Supreme, not to him personally, and are passed from holder to holder.
* Doctor Strange, so there's a fair bit of overlap between sci-fi and fantasy.
* Doctor Strange's personal weapon. The shooter wasn't a sorcerer, but he figured that a pistol with that kind of history would have enough Bad Mojo around it to blow right through Doc's protective spells.
* Doctor Strange's Sanctum Sanctorum in Greenwich Village is built on the site of an ancient altar devoted to human sacrifice. This gives the area a certain bad

juju, and it's implied that he either takes advantage of the residual magic or he put his house there to suppress it.
* Doctor Strange's Sanctum Sanctorum is a New York brownstone in Greenwich Village built on the site of various ritual sacrifices and prone to supernatural occurrences. To him, that's a plus point.
* Doctor Strange's Sanctum Sanctorum is similarly imperiled on a regular basis (once while it was serving as the headquarters of the New Avengers). He always comes back to it.
* Doctor Strange: Stephen Strange first asked the Ancient One to teach him magic after learning that the Ancient One's disciple Baron Mordo was plotting to murder his master. Accepting Strange as his new disciple, the Ancient One revealed that he was fully aware of Mordo's actions for some time; "The student can have no secrets from his master." He kept Mordo around so he could keep a close watch on him.
* Doctor Strange: Stephen Strange was a gifted surgeon who lost the dexterity in his hands in a car accident. His quest for a cure eventually led him to the Ancient One, who taught him the mystic arts.
* Doctor Strange. Still worse, Wong notes that even though that kind of food is the only kind Strange's body can accept, eating it will still eventually kill him.
* Doctor Strange, Strange made the mistake of taking the battle into Nabu's realm and for that, gets his very soul obliterated by Kent, Inza and Nabu.
* Doctor Strange teamed up with Doom in his final (and successful) attempt to rescue his mother's soul from Hell. Though it was a reluctant partnership at best (Strange had just beaten Doom for the position of Sorcerer Supreme and tradition mandates that the winner owes the runner-up a favor), they walked away with a grudging respect for each other.
* Doctor Strange, the Ancient One strands Strange on Mount Everest to force him to figure out how to open a portal to get back. He nearly freezes to death before he manages it. Mordo's reaction shows this isn't the first time she's done this.
* Doctor Strange, the eponymous character gets into a major car accident in the beginning of the movie that cripples his hands and leaves very noticeable scars on his fingers which never fully heal and hand tremors that never fully go away, which ruins his career as a neurosurgeon. He also gets splints drilled into his hands to immobilize them.
* Doctor Strange, the eponymous surgeon and Master of the Mystic Arts possesses his Cloak of Levitation, a red, gold-trimmed cape that flows down past his knees and allows him to fly.
* Doctor Strange, the final creature that appears before Dormammu's return is the Wing Mouth, a massive flock of small creatures with huge fangs and tiny wings. Individually, they're easy to destroy, but together, they can skeletonize a full-grown human within seconds. They devour several civilians and sorcerers before being defeated.
* Doctor Strange: The Oath, Strange reveals that Wong has been his tutor in the martial arts over the years:
* Doctor Strange: The Oath the main antagonist manages to linger a few minutes after dying to give a conflicted Strange some counsel.
* Doctor Strange. This is quite a plot hole: how can no one in the Marvel universe fix a bullet wound other than Mephisto? Doctor Strange can grant Peter omnipresence with a flick of his wrist, but he couldn't heal a bullet wound? Doctor Strange himself is a surgeon; is using magic to help Peter really so much less intensive than just doing surgery?
* Doctor Strange. This movie pulls no punches drawing a hard line between magic and science, and never attempts to explain the sorcerers as anything else.
* Doctor Strange, though Strange somehow made them usable again in later series. Currently, they're damaged again, though he still has a limited range of motion.
* Doctor Strange threw himself through a glass window — but he put his striking hand and as much of his body as possible behind his unbreakable Cloak of Levitation.
* Doctor Strange to a draw on one occasion, and the main reason he didn't win is because he knew their fight would have leveled Manhattan.

* Doctor Strange, trying to include him in his stories whenever he can.
* Doctor Strange until he finally gets sick of the stalemate and agrees to a bargain.
* Doctor Strange usually takes this approach, preferring to be cryptic and do little more than nudge someone in the right direction, before letting them figure it out. However, if the situation is serious enough, he will outright inform people of
* Doctor Strange wears the famous Cloak of Levitation which, combined with his
* Doctor Strange. When Dr. Stephen Strange was staying at the Ancient One's retreat, he discovered that the Ancient One's disciple Baron Mordo was trying to kill his master. Mordo found out and placed a spell on Strange, magically gagging him whenever he tried to warn Mordo's master. Recognizing Mordo's evil and the need to counter it, Strange offered himself as the Ancient One's new disciple. The first thing the Ancient One did was remove Mordo's enchantment from Strange, which he knew about all along ("A student can have no secrets from his master.")
* Doctor Strange, which ended only when he started to care about people other than himself. He's come a long way since, but the temptation to backslide is still there.
* Doctor Strange while he tries to assimilate universes into his Dark Dimension.
* Doctor Strange will do whatever is necessary to protect the Earth and his loved ones. He'll agonize about it afterward, but he'll still do it.
* Doctor Strange with a reach spanning numerous realities, is somehow able to erase magic wherever they invade.
* Doctor Strange: Years of spellcasting has changed Stephen Strange's internal anatomy so much he can only eat dishes with a lot of tentacles and eyes that may not be native to Earth's plane of existence.
* Doctor Sun keeps Selnikov's head in a jar, preserved and conscious for interrogation.
* Doctor Susie", Susie decides to become a doctor for toys after Lucy teaches her how to be a doctor. When Dil breaks Angelica's Cynthia doll, Susie decides that she'll need the babies' help to fix her. When she dresses the babies as surgeons, she has them wear diapers on their heads, which act as surgical caps.
* Doctor Syn ("The Scarecrow") and hangs the traitor. Or so it appears; in reality Scarecrow fakes it and then tells the man to flee the county because he'll surely be killed if discovered alive.
* Doctor Syn ("The Scarecrow") be subjected to that—even if it happened by mistake, it would certainly be rectified before four years passed.)
* Doctor Syn ("The Scarecrow") book "The Amazing Quest of Doctor Syn" involves one member of a tontine trying to wipe the others out.
* Doctor Syn ("The Scarecrow"): Convicted for murder, Black Nick Tappitt goes to the gallows unrepentant and swearing.
* Doctor Syn ("The Scarecrow") General Pugh started as a soldier in the ranks rather than buying a commission in the officer corps (which was the usual way to become an Army officer, silly as it sounds) and he makes his disdain for the aristocratic Lieutenant Brackenbury clear. It actually makes Pugh more villainous because he has no time for "gentlemanly" conduct like not terrorizing civilians or torturing prisoners, and considers the ends to justify any means.
* Doctor Syn ("The Scarecrow") is a mild-mannered 18th century country vicar by day, a ruthless masked smuggler gang leader by night.
* Doctor Syn ("The Scarecrow"), not brandy, knowing that Ransley will try to sell them for his own profit so he can flee. Then when Ransley is arrested, Syn brings out this fact in court by asking that the brandy be examined and saves Ransley (and more to the point, his sons) from hanging.
* Doctor Syn ("The Scarecrow") to disguise himself with. It was a bonus that the costume made him look intimidating and he's kept it ever since.
* Doctor Thirteen - ol' Doc is in denial of reality. When I, Vampire offhandedly mentions Dr. Fate, Thirteen calls him a cut-rate huckster who uses hypnosis to simulate the supernatural.
* Doctor Tsubasa can be considered this for being the one to tell Midoriya that he

doesn't have a quirk, and thus drastically affect Midoriya's life, views, and relationships from that point onward. 'Can be' being the key word, as a doctor looking very much like him was shown
* Doctor Tzin-Tzin in the classic story "The House That Haunted Batman." He fails.
* Doctor Tzin-Tzin is a Fu Manchu-inspired Asian-looking (but actually a
* Doctor von Knowalot's laboratory in the City Observatory has a Data Collector marked "Data Collector".
* doctor when defending his village, and became a mad killer of his own free will. The purifying effect of the mountain the story takes place on lets him revert to the decent man he'd once been.
* Doctor, while not quite as extreme an example, also fit the bill, seemingly at least in his late fifties.
* Doctor Who (10 was embarrassed, Reinette's smirk says she absolutely wasn't), and introduced the idea that even a non-psychic on the receiving end could enter the other partner's mind - "a door once opened can be walked through in any direction." As a result, there are legions of Rose/9 and Rose/10 fics in which this is the case.
* Doctor Who”; after Evelyn Smythe has been enjoying the company of the elderly but distinguished ‘Doctor John Smith’ while his granddaughter and the Doctor are locked in a prison camp, after the camps are released, Evelyn is disturbed when the Doctor reveals that ‘John Smith’ was his own first incarnation, considering her more platonic relationship with the Sixth Doctor.
* Doctor Who” uses a different approach than other animated reconstructions. Whereas all previous animated projects simply took notes from existing footage and stage directions, the animators of this episode decided instead to essentially show what it would look like with the comparably higher budget the new series has.
* Doctor Who — the Doctor is sort of an intergalactic Crocodile Hunter.
* Doctor Who — they will always remember events in the same order, even if the number of years in between may differ. But there are always Timey-Wimey complications and exceptions:
* Doctor Who (2005) appeared at the beginning, reciting the opening spiel before the real Anne unplugged it.
* Doctor Who 50th anniversary episode "The Day of the Doctor", the weapon used to destroy Gallifrey by the War Doctor, The Moment, was said to have an operating system so sophisticated it developed a conscience. Since it had conversations with the War Doctor using a telepathic interface, it clearly did.
* Doctor Who about a possible reference to Jesus goes over one panelist's head, despite the character in the book being crucified, leading the host to say, "But that's just it... that kinda nails it down..." before falling apart in a fit of giggles.
* Doctor Who about Fitz's name, and it's so bad that everyone just looks upward and whistles.
* Doctor Who about how he now has a pocket-sized version of Professor Lazarus's age-altering machine.
* Doctor Who about things like aliens that want to eat his face. The more nervous he gets, the worse the jokes.
* Doctor Who above the budget of the whole BBC in a year). Needless to say, this means the Eighth Doctor has some fanfiction about this occasion.
* Doctor Who accidentally showed Rose papers that said he was single and worked out.
* Doctor Who accompanying her ends up sacrificing himself to get her out.
* Doctor Who: A character is typing on his laptop in his bedroom when the Doctor, needing to get on the Internet, bursts in and grabs the laptop for himself. Having seen what is on the computer screen, the Doctor turns to him and says, scornfully, "Get a girlfriend!"
* Doctor Who, a character trying to learn about the Doctor sets up a "chance" meeting with Jackie Tyler at the laundromat, or a laundrette as they are called in the UK.
* Doctor Who acknowledging that placing it where he does doesn't actually work, and

the entries referring to a villainous contemporary of the Doctor's father named Marnel, whose son visited him on Earth in the seventies, pointedly not speculating on who said son might be (although he does place the visit in the UNIT era, immediately following a mention of the Master, without further comment).
* Doctor Who, a "code 9" signifies that the Doctor has been seen in the area.
* Doctor Who, a diary of her adventures recorded on her own, combined with eyewitness accounts of the Doctor through the ages, as seen in "Closing Time".
* Doctor Who, a dinky blaster built into his nose and a printer output for a tongue, but other than that seemed pretty useless. Among his "features" were a keyboard on his back that nobody ever used, a screen on his side that never showed anything, let alone anything useful, and tiny, tiny wheels that required a perfectly smooth surface to work. Most of this was related to the cheapness and unreliability of the prop.
* Doctor Who Adventures In Time And Space on a good roll, deflectable by spending Story Points.
* Doctor Who Adventures's miniturisation ray. And on a totally unrelated note, he himself appears to be shrunk, so send help and a tiny fez.
* Doctor Who, after accidentally setting off a sonic mine in a junkyard, the next thing the Doctor and her companions know, they're waking up in a medical facility.
* Doctor Who, after Captain Jack teleports out of the room the heroes are trapped in, vanishing into thin air, this exchange occurs:
* Doctor Who, after Jackie reports the Doctor to the alien helpline, the military swoops in on the Powell Estate … not to arrest him, but to escort him and Rose to 10 Downing Street because the government needs his help with the current crisis. Rose is even initially surprised that "getting arrested" is that posh.
* Doctor Who". After picking up a call, the Doctor and Clara wake up in a dark room with two strangers and a recording, which explains that they haven't teleported through a phone but willingfully erased their own memory of what happened after they picked it up.
* Doctor Who. After that, though, the series have gone back and forth in terms of seriousness.
* Doctor Who; after they die, they loop around back to the start and remember exactly how they screwed up. Because everybody has it, they're not limited to fixing the errors of a single day, or a single lifetime: they can adjust the course of their entire history. (If fixing a screw-up requires action more than one lifetime ago, a message can be passed back by a newborn child telling an adult, who waits to be reborn then passes the message on in the same way.) Fortunately for everyone else, they're not interested in using their abilities to conquer other planets, or anything petty like that; the messages that have been passed back from the end of their history have given them something far more important to worry about.
* Doctor Who) against armies and empires. Result? Almost every time, the Doctor wins.
* Doctor Who, a girl has the ability to convert people into crayon drawings.
* Doctor Who, a good portion of the Doctor's adventures begin with him just kicking around in the TARDIS tinkering with things or trying to find a cool place to go on holiday (Blackpool or Brighton seem to be popular choices) before being somehow diverted to the location of the adventure of the week.
* Doctor Who," a group of neo-Nazis led by a Third Reich Nazi exile, plots to take over the titular statue in order to use it to establish the Fourth Reich.
* Doctor Who", alien hunter Tzim-Sha takes a tooth from each of his victims as a trophy, which he then embeds in his face.
* Doctor Who all complained about. She ended up wearing clothes exactly like those worn by the Doctor, but pink and white.
* Doctor Who allows the player to collect and select from the seven Doctors in the game; each one changes the rules in a different manner.
* Doctor Who all spent centuries training at the Time Lord Academy, learning Stellar Engineering and Spacial Cartography alongside several non-space subjects.
* Doctor Who all the time to avoid being murdered. Eventually, the Doctor

disconnects the robots but doesn't find it humane to destroy them, and so tells the new humans to negotiate with them. However, the robots are self-learning, and so it's almost guaranteed that they'll develop the same pattern of "literally destroy sadness" again.
* Doctor Who, almost always between the Doctor and characters who pose an immediate, physical threat to him. Looks like there's a bit of a sadomasochism kink there.
* Doctor Who also an alien. The fact that Time Lords don't always stay the same sex when they regenerate (such as with the typically male Doctor's own regeneration into a woman at the conclusion of the show's 36th season) probably helps broaden their standards; the Twelfth Doctor even implies that Time Lords are gender-blind as a result of their capacity for cross-gender regenerations.
* Doctor Who (also both under RTD) occasionally veered into this, particularly in Torchwood such as in the Children of Earth miniseries where they were depicted rounding up children to be fed to alien drug dealers. The level of demonisation was usually tied with the level of Anvilicious political messages. However, in most of their appearances the British (and UNIT) military forces are depicted fairly positively either aiding the Doctor or combating the various alien incursions. It's implied that the Doctor has grown to hate soldiers due to his own actions during the Time War, and he is proven wrong about soldiers more than he is proven right.
* Doctor Who also had the Key to Time, which when assembled looked like a metal cube.
* Doctor Who Also his former companion Sarah-Jane Smith, who complains about how hard it was just waking up every day and knowing she'd never see the grandeur of space again.
* Doctor Who", although he was credited for playing the role of the "Commentator". (Six years later, Huw Edwards did indeed commentate on the London Olympics opening ceremony.)
* Doctor Who. Although it's the first time we see the baby, the previous episode ended just before the birth, and the opening scene appears at first to be just-post-birth, a throwaway line of dialogue near the beginning of the episode establishes that it's been a month since the baby was actually born, accounting for this trope.
* Doctor Who. Although no counterpart good entities appear, the Beast makes references to God, and a group called the Disciples of the Light who were responsible for imprisoning him in the first place.
* Doctor Who a man in a costume, it managed to take people by surprise.
* Doctor Who, among them Derek Acorah, Paul O'Grady and Alistair Appleton.
* Doctor Who, Amy and River discuss the Doctor, while he scans the room with an electronic gadget. River accuses the Doctor of eavesdropping, he protests his innocence, and she points out that he's holding the gadget upside down.
* Doctor Who Amy and Rory are a pretty good example of this trope since they (presumably) weren't trying to have kids when Amy got pregnant with Melody, but now, thanks to the events on Demon's Run, they wouldn't be able to have kids even if they wanted to (as Rory apparently does).
* Doctor Who", Amy and the Doctor encounter a Cyberman who has his head and arm removed and all three parts are capable of acting independently.
* Doctor Who Amy between childhood friend and eternally devoted Rory (Gentleman) and the adventurous Doctor (Scoundrel).
* Doctor Who", Amy hallucinates a group of strangers pirouetting... before the illusion breaks and they are revealed to be murderous Daleks.
* Doctor Who, Amy, having gone through a near-death experience that's led her to put her view on her upcoming marriage in perspective, tries to hint to the Doctor about "who" she wants, but he doesn't get it. So she tries to outright jump him. This leads him to decide that grabbing her fiancé and making him come along is absolutely necessary.
* Doctor Who, Amy Pond seems to have a different job in each episode it comes up. In order, she is presented as: a kissogram, a model, a travel writer and, finally, a children's and mystery author. She also at one point has her own brand of

perfume. While she may simply embark on each of these endeavors as they come, no mention is made of how she came to be in these roles. A less extreme example than many on this page, since from her perspective the episodes where she has these jobs are years apart, and besides the one jump from "pretty face" jobs to writing they share some continuity.
* Doctor Who: "Amy's Escapade" and "Rory's Adventure". The Ponds split up at a space mall and both contribute to defeating an invasion without ever realising the other's involvement.
* Doctor Who, an act that threatens to destroy the space-time continuum.
* Doctor Who, and a fierce dedication to protecting this little blue globe and its inhabitants. In fact, it's mentioned several times that the Doctor never officially tendered his resignation, meaning that after a few decades, he's still technically on the payroll and under UNIT's nominal command.
* Doctor Who, and a line of expository dialogue was required in the first new episode to explain the TARDIS's appearance. Indeed, the TARDIS is usually the first thing anyone thinks of upon seeing a picture of a police box.
* Doctor Who" and became the longest-serving companion in the show's history by episode count. Hines' mother was Scottish, which helped him to get the accent right.
* Doctor Who and being half-human and the Master being able to spit corrosive slime for no apparent reason, while the former were confused about what the "Eye of Harmony" was supposed to be and why the central character turned into a completely different person thirty minutes in.
* Doctor Who and children who perform poorly in school are fed to the titular beast. It doesn't eat the children, though.
* Doctor Who and cries about it in the final panel. It's pretty grim for a strip aimed at eight-year-olds.
* Doctor Who and decide to go with a budget and production values similar to what Americans were used to in their TV sci-fi. And when the new series kicked in, they continued with the higher-end budget and production.
* Doctor Who and devoting themselves to converting others into being like them. Essentially, it's a case of a technological singularity being forced upon them rather than being optional. The new series updates this by setting the origin story on a parallel Earth and introducing more of a consumerist metaphor into the proceedings. It was later established that both were true, and in fact they'd been created many times when humans with the tech were desperate enough.
* Doctor Who and ducks at the last minute unwittingly letting the umbrella swing harmlessly over his head.
* Doctor Who and experience Fan Disillusionment upon discovering his loud and bawdy behavior, more akin to a frat boy than a literary legend. Martha remarks, "You should never meet your heroes." However, they eventually grow to like him.
* Doctor Who, and generally engages in other activities that the United Nations tends to frown upon.
* Doctor Who, and has intentionally left a blank space the scripts every once in a while, to allow Tom to improvise.
* Doctor Who), and has the Doctor dying when he uses Time Lord powers that only appear in this story to kill a rogue Time Lord and save Ace, and claims that the age of the Time Lords is over. It is used by some fans to de-canonize the TV Movie and the New Series. However, the majority of fans don't hold this view, and it is widely believed to be non-canon, largely because of how unlike DW a lot of it feels, the audio drama "Zagreus" implying it takes place in an alternate reality.
* Doctor Who, and he and Sarah commit genocide against them without showing any remorse.
* Doctor Who. And her lover Jenny is certainly no slouch in this department either.
* Doctor Who and his ancestor Quintus Caecillus. The others are less clear, but architecture could be derived from Lobus Caecillus being a marble dealer with a taste for artwork, a writing career from Evelina's powers of prophecy, and the police possibly from Metella's worship of a police box as a household god.
* Doctor Who and human female husband and wife, who have a litter of kitten

offspring.
* Doctor Who. (And indeed the owner of the house on Allen Road is an alien, although it's never really explained who kept vandalizing the street sign or how they knew.)
* Doctor Who, and individual episode, but it's evident that they're largely unique in the universe and would defy diagnosis anyway.
* Doctor Who, and is greatly invested in how various extremely lame things make him cool.
* Doctor Who and is not coming back for her, she tries to grieve for the Doctor's loss and finds she can't cry.
* Doctor Who, and it generally only takes him a couple weeks to go back to disbelieving.
* Doctor Who, and its fandom not only coined the term "fan wank", but it wholeheartedly embraces its tendency to this. Specifically:
* Doctor Who, and it's implied that, thanks in part to him forgetting the specifics of the event because there was more than one of him around, he never returned.
* Doctor Who, and it's regarded as one of the eeriest episodes in the new series because of it.
* Doctor Who and its spin-offs. The most obvious example being the use of morphic fields in several novels, and in Torchwood series 4.
* Doctor Who and its spinoffs, whenever footage from BBC News or the fictional AMNN news channels appear.
* Doctor Who, and Jenny is younger and acts as her "squire" and back-up fighter, as well as her maid as far as the general public are concerned.
* Doctor Who and listen to a gramophone record. The record starts skipping, so he abandons this. At the end of the movie, the Eighth Doctor settles in the same chair with the same book and music. When the record starts to skip he says "Not again!"
* Doctor Who and made sure that a) UNIT had what it needed to manage on its own and b) that they had a means of contacting him should the worst arise. He shows the Doctor their specially-developed anti-Dalek bullets and adds:
* Doctor Who and minor characters names, simply because it looks better on the actors' CVs.
* Doctor Who, and mockingly tells him that Halloween is next month, while throwing pieces of food at him. He doesn't live long enough to tell any more jokes.
* Doctor Who, and more aware of how his definition of "justice" affects other people. He even develops a sense of humour.
* Doctor Who and newspaper reviews declaring the series to have run its course and have no further life when:
* Doctor Who, and one "room" contains AN ENTIRE STAR. A massive star frozen in time at the moment it collapses into a black hole. And the TARDIS uses that as a power source. That's what the Eye of Harmony is.
* Doctor Who and on numerous occasions made disparaging remarks about his species, particularly about how boring they were.
* Doctor Who and pop culture phenomenon in Britain, generated a lot of misconceptions of how things typically went:
* Doctor Who. And preferably watched some of the less-regarded episodes of the series, possibly while taking notes of every throwaway line that mentions an alien race.
* Doctor Who, and ramp up the subtext to the point that it's barely subtext anymore.
* Doctor Who and reminds him that however much death and destruction he leaves in his wake, he's still a hero, and his life is worth something.
* Doctor Who, and so they did - overtly political stories like "The Sunmakers" and "The Invasion of Time" being fan favourites.
* Doctor Who, and subsequently manipulated his fellows into giving up their own lives so that he could work out how long he himself would live. However, he eventually realised that this was pointless because they all have a different amount of regenerations, ranging from two to nine, and therefore there was no way to know how many lives he might have himself.

* Doctor Who and Terry Molloy return as the Seventh Doctor and Davros, respectively.
* Doctor Who. And that's not even touching on things like character tropes.
* Doctor Who. And that was before the Doctor turned up, Cosmic Horror-Show in tow. The school was fairly representative of similar British schools at the time.
* Doctor Who and the 11th Doctor against a super-villain alliance between the Borg and Cybermen.
* Doctor Who and the Doctor steps out, intent on saving the world as usual.
* Doctor Who, and the Gomez Mistress created an army of zombie Cybermen driven by the minds / souls of the dead. Contrast with the Doctor, who's been explicitly compared to Merlin or a general "good wizard".
* Doctor Who and the Pescatons guilt-free at all, and he was unable to go through with it.
* Doctor Who and the Pescatons", on the grounds that the children the drama is aimed at would have been about two or three when the story was aired.
* Doctor Who and the Pirates's Sixth Doctor up against Bill Oddie's pirate king Red Jasper (heavily based on Long John Silver).
* Doctor Who and the Rambaldi Enigma, despite his inventions having defined and ruined her life for years in her present she finds that Rambaldi himself is actually a somewhat shy figure who appears legitimately ignorant of the potential damage his creations could do, although her perspective shifts when she learns about his alien nature.
* Doctor Who and the Rambaldi Enigma, the Third Doctor and Sydney Bristow learn that Milo Rambaldi’s genius is due to him being linked to an alien life form.
* Doctor Who and the rest into protein as the Galaxy is facing starvation. Which leads to these words when he meets the Doctor:
* Doctor Who and the right to pass judgment on anyone who actually uses it. The Moment will try to dissuade any potential user. Despite the awesome scale of the Time War, the Time Lords were scared to dust off The Moment and use it for fear of what it would do to them as punishment.
* Doctor Who and the shift away from foot patrols made them largely redundant.
* Doctor Who and the Silurians" because he knows the only way out of it would be to commit a genocide against both sides.
* ''Doctor Who and the Silurians'': The Silurians have been in suspended animation for tens of millions of years, and other than losing their power source, their equipment seems to be perfectly functional.
* Doctor Who and the Silurians tricks and still working for the Brigadier like nothing has happened, with the exception of one throwaway barbed comment about the Brigadier being bored because he can't find more Silurians to shoot.
* Doctor Who and the Space War" start with the Doctor near-fatally wounded.
* Doctor Who and the storyline of the book itself unresolved (but with a resolution in place, once they have the chance to use it), and the Doctor and his companions leaping into danger.
* Doctor Who, and they have no intention of giving it up. Most iconic must be the TARDIS exterior "disguise" as an old police telephone box of the sort which has long since become obsolete now the police use two-way radios or mobile phones to communicate, though it was at times justified by the "chameleon circuit" used to generate a disguise getting stuck. The box has now become more synonymous with the show than its original usage.
* Doctor Who and twice as epic as normal episodes, second only to season finales in terms of how they'll go all-out.
* Doctor Who and usually have better understanding of human social norms (since they're usually human).
* Doctor Who, and very angry with the living Daleks who put them there.
* Doctor Who, and was worried that nobody would listen to his warnings. So he invented the Cybermen, as a chilling tale of things to come. When Earth's twin planet Mondas drifts away from the Sun, the people turn to cyber-augmentation as a desperation move, he only way to save their race. But it doesn't matter why they did it; a sin against the natural order can only have one result. So they

inevitably became soulless, emotionless automatons. Of course this didn't come across in most stories; they were just scary, hard-to-kill bad guys who came up with insanely complicated and devious plots to convert everyone else into more Cybermen.
* Doctor Who, and who have secretly controlled humans since humanity first existed.
* Doctor Who, and will teleport them onto Paltraki's ship, piece by piece, unless Paltraki cooperates.
* Doctor Who), and yet we've never encountered a Rutan and Sontaran together on TV once.
* Doctor Who, a network that, until quite recently, huge chunks of the country didn't even get unless they had digital cable or satellite.
* Doctor Who animated special "The Infinite Quest" is mostly flash animated, but pretty much all the spaceship models are animated using painfully obvious CGI.
* Doctor Who animation "Dreamland". When his alien companion asks how he knows where he's going, he explains he counted his steps.
* Doctor Who, an MI6 agent on an airplane, after photographing a piece of paper with a secret message she was just passed, eats the message... just before she is attacked by an alien entity.
* Doctor Who answers, allowing her to break in with the following exchange:
* Doctor Who Answers wiki, which is a place for users to ask/answer questions about the series and related media.
* Doctor Who: A number of force fields turn up, most spectacularly around individual Daleks in the new series.
* Doctor Who, any exotic technology that fixes Earth's big problems by solving energy crises, eliminating air pollution, or giving us an effective non-Doctor defense against aliens is an alien plot to destroy us.
* Doctor Who: Any species with interstellar flight capacity can, it is implied, travel between as many galaxies as they like.
* Doctor Who. A P.O.'d Rose jabs her finger into an alien captor's chest a few times to emphasize her ranting and the captor immediately lets them go. To Rose's horror, the Doctor explains that that particular species keep their genitals in their chests...
* Doctor Who, a race of cybernetically "upgraded" humans cut off from all feeling and emotion (because the upgrade is otherwise unbearably painful). They exist without hate, fear, suffering, disease, etc. and see this as preferable to the natural state of humanity, so logically they seek to upgrade everybody else so that we can all enjoy the benefits. Those who resist conversion/upgrade are dismissed as having their judgement clouded by their pointless emotions.
* Doctor Who arch-villain Davros gets his right hand (his only unparalysed limb) shot off. In the following story, he's only seen from the neck up due to heavily upgrading his wheelchair, but when he returns in "The Stolen Earth"/"Journey's End" he has a rather Freddy Krueger-esque metal hand with clawed fingertips. He has the talent to make something more realistic, so one can only assume he thinks it looks cool.
* Doctor Who are able to control soil, and suffuse the bodies of the living and dead with it in order to control them.
* Doctor Who are a entire cloned species of War Hawks, with most of them desiring only to wage war against other species.
* Doctor Who are a family of short-lived body-snatching aliens. When they start hunting The Doctor, he decides to hide in human form for a few months on Earth in hopes of waiting out their lifespan. This fails to stall them quite long enough.
* Doctor Who are artificially-intelligent spacesuits which kill anyone they can get their gloves on. Bill Potts gives a bitter laugh on seeing a poster: LOOK AFTER YOUR SMARTSUIT AND IT WILL LOOK AFTER YOU.
* Doctor Who are erased from history (long story), creating an alternate reality that consists of Earth alone in the void. In this universe, stars are a loony belief held by fringe "Star Cults", for which Richard Dawkins is a spokesman or other important figure.
* Doctor Who are extradimensional aliens capable of passing through walls with

ease, as well as just emerging from the walls. When they pass through or emerge from something, they take on the appearance of wherever they emerged from for a brief time.
* Doctor Who are unable to devour a centuries-old church, and when they get in thanks to a paradox they immediately are drawn to the Doctor due to being even older than the church.
* Doctor Who "Army of Ghosts/Doomsday" two parter. While the Cybermen and Daleks don't team up, the Doctor still has to deal with both threats simultaneously.
* Doctor Who arrival during the Daleks' siege of Gallifrey with equal parts disdain and contempt.
* Doctor Who as a character, the butler at one point quips that "Well, at least we know the butler didn't do it."
* Doctor Who as a dormant ability set to develop in humanity's future, and which may potentially emerge now.
* Doctor Who, as a stock premise of stories right from the early days is "just drop the Doctor into [Genre] and see how he responds". A handful of examples:
* Doctor Who as a yardstick, given his more distinctive Doctor appearance).
* Doctor Who, as Earth is his "favorite/pet planet" so to speak, but will turn around and ridicule humans about their shortcomings should the situation be extreme enough.
* Doctor Who a secret organization, even little old ladies respond to a car chase involving a fish-man with "Bloody Torchwood".
* Doctor Who as grotesque as that word makes it sound, though it's pretty close; they're more ruthlessly logical than brutal. It's a cultural thing amongst them that when they encounter something new, the one who makes the discovery gets to keep a piece of that something... like a young girl's eyes, for example.
* Doctor Who (as occurred with the female Time Lord known as the General who spent one incarnation as a man). This finally happened to the Doctor directly, with their thirteenth incarnation being a woman.
* Doctor Who: As odd as it seems in retrospect, this show started out as edutainment. The show was originally meant to alternate between stories set in the past that would teach kids history, and those set in the future, or on other planets, that would teach science (hence the first two companions being a history teacher and a science teacher). Then the Daleks showed up, became massively popular, and changed the emphasis of the show to pure sci-fi and scary monsters rather than education.
* Doctor Who as of the 100th episode. The episode implies Doctor Whooves is the Doctor and he is friends with Derpy Hooves.
* Doctor Who, as other stories have shown the Doctor to be very good at deducing things.
* Doctor Who As River tells him, "happy ever after" isn't about forever, it's just about spending the rest of the time you have with the one you love. The closing shot shows the words:
* Doctor Who as the hiatus was instigated by an executive who hated the show.
* Doctor Who as the soon-to-be Third Doctor. It was his last acting role.
* Doctor Who as this, which is bad news for the Doctor's genetically enhanced companion Zoë Herriot.
* Doctor Whoa strip speculated that the reason for the Tenth Doctor's regeneration would be having his face worn away from too much kissing.
* Doctor Who. As you may have guessed from the title, they find out upon investigating that the Daleks are behind it.
* Doctor Who", at first, it appears that the blonde woman is sending a cry for help from the torture Zellin is inflicting. Then it turns out he's actually giving her the fears of humans which keeps her sane while imprisoned.
* Doctor Who at their mercy, they both decide not to kill him, with Graham saying the trope name word-for-word.
* Doctor Who. At the time, she was known not for Rose Tyler, but being a former teen pop star once touted as the British answer to Britney Spears. In fairness, though, this was primarily due to the fact that she was a teenager and Chris Evans

was in his mid-thirties, and when they got married, they'd only been dating for six months. Since Piper was in a period of limbo where her pop career had pretty much died (and her acting one was yet to take off) when she started dating Evans, and since he was an extremely wealthy radio and television presenter (worth an estimated £30million), it was as much about the unseemliness of the apparent "golddigger/dirty old man" dynamic as much as Piper being a role model for teenagers. Much was made in the press, for example, of Chris buying her a pricey sports car for her birthday when she hadn't even passed her driving test yet. By the time of their divorce six years later, Piper was in her mid-twenties and the 16 year age gap between them seemed less important. Whatever the case, she seems to get a lot more of the flak from the relationship than he does. Although it's most likely partly down to good old misogyny (she must be a gold-digging whore, he's a man who couldn't be expected to resist a young hottie), it seems like her contractual purity plays a part too.
* Doctor Who audio adventure "The Three Companions", the Doctor, Polly, Ben and Jamie are trapped on a doomed world that is scheduled for cremation.
* Doctor Who audiobooks, featuring Doctor sound bites and the screen names of people who provide reviews for the show on iTunes.
* Doctor Who audio titled "An Earthly Child" features Paul McGann's real-life son as the Doctor's great-grandson (i.e. Susan's son).
* Doctor Who averts it by correctly using DEFCON 1 when UNIT is preparing to launch a nuclear strike at the Sontaran ship. (Although arguably, British UN troops shouldn't be using DEFCON at all.)
* Doctor Who averts this with Amy and Rory; after their wedding at the end of Season 5 they still have just as much continuing development as before, and they're still just as much fun to watch.
* Doctor Who", a young boy's fears are starting to manifest in reality and one of them is that he finds his dollhouse scary. The Doctor and his companions end up shrinking and going into the dollhouse, while dolls try to kill them and sing a creepy song called "Tick Tock Goes the Clock".
* Doctor Who backwards, and his hand once again takes a quick trip south to make sure everything's fine.
* Doctor Who badass character would be a tin dog, and even he wields a built in gun.
* Doctor Who", Barbara hits Ian over the head with an urn while trying to attack the intruders in the villa.
* Doctor Who "Base Under Siege" (like "The Ice Warriors" and "Fury From the Deep" for just a couple of examples).
* Doctor Who, because it was a year ago and there wasn't any way of seeing it again.
* Doctor Who because New New York bears absolutely no resemblance to it's namesake. Rather, it seems to be exceedingly British (despite this supposedly being an alien planet: but then again, this is normal for the show). In particular, the city resembles London following the Second World War.
* Doctor Who because she knew that was important to Rory. It was, but not as important as she was.
* Doctor Who be female when the Thirteenth Doctor offers to talk with them "woman to woman".
* Doctor Who before he can start his fire, but the coverup technically still happens because the Doctor blows up the plastic-infested building later that night.
* Doctor Who begins to fall, and the Doctor has to keep it from destroying the Inconveniently Occupied Buildings.
* Doctor Who begins with Amelia "Amy" Pond as a child, praying to Santa to fix a crack in her bedroom wall.
* Doctor Who begins with the Doctor basically kidnapping Barbara and Ian.
* Doctor Who behind her. (Later episodes show Daleks flying at high speed, but this one never displays such an ability on-screen.)
* Doctor Who, being a show that has relied heavily on monsters since the very first season while simultaneously not typically having a very large budget with which to

realise them, has many examples.
* Doctor Who being "Doctor Who" and him being a human "mad inventor" with no control over the TARDIS instead of a long-lived alien from Gallifrey. (While the words "Time Lord" and "Gallifrey" would not appear for many years, the TV Doctor establishes himself to be an alien in the first story, when he says "Susan and I are cut off from our own planet".)
* Doctor Who, being that he was a body selected by the Eighth Doctor to be 'a warrior'. He has a young appearance upon first regenerating, but by the time he gets involved in the main series' plot he appears very old, being sick of the Time War.
* Doctor Who bemoaning the pointlessness with the comment "you should have died in bed." Obviously, he got better, gave the Doctor a tart retort "Really Doctor. Do you think I'd have been so stupid as to have stayed inside?" and went back to his gardening. As for his eventual fate (according to the expanded universe) - yeah, the Doctor was right. In bed. Aged roughly 125 (after being rejuvenated by accident, and becoming a lord in the Human Dreaming (kind of like Avalon in the Marvel Universe).
* Doctor Who be patentable, like a Time Lord's dual cardio-vascular system.
* Doctor Who" betting that she can get Queen Victoria to say "We are not amused," making every effort possible to get her to say it.
* Doctor Who between the Doctor and the Master up to full-blown text, with the strong implication that part of the reason why the Doctor fell for River so hard was that she reminded him of the Master while being actually redeemable.
* Doctor Who between the Sontarans and the Rutans, leading to anything from a scout to an invasion plan by one side or the other in various episodes. However, the two sides have never actually squared off on Earth, which is a long way from the main battlegrounds and remote enough that by the time one side takes an interest in it the other is long gone.
* Doctor Who. Billions of years in the future, Earth is a cultural and historical center.
* Doctor Who, Blon Slitheen, aka Margaret Blaine, tries to tries to block a camera pointing at her face with her hand during a press conference and scolds the photographer "No photographs! What did I say? Take pictures of the project, by all means, but not me thank you," the implication being she's been avoiding the cameras so her enemies don't know she's still alive. The newspaper photographers still catch her face, which is then published on the front of a newspaper the Doctor sees, allowing him to thwart her plans.
* Doctor Who both plays this straight AND subverts it in "Victory of the Daleks". World War 2 aircraft (Spitfires actually) are given air-containing force fields and engine modifications that actually allow them to fly into space and attack the Dalek mothership (the air inside the force field allowing the propeller to function and perform the usual airplane banks and rolls). The whole thing is hand waved by saying the force field generators and engine modifications were made with Dalek technology.
* Doctor Who". Breathing in the special hot spring vapors would activate a person's latent psychic powers, and with time and repetition, turn them into a giant creature made of rock — though this is implied to be more a case of them being infected and overwritten.
* Doctor Who briefly, but let's not forget John Hart. Jack's ex-partner "in every way", 51th century too, and behaving consequently. Only the 51st century would think to develop lipstick as a weapon... for men, too. Actually, it was Jack Harkness who introduced it to John.
* Doctor Who - Brigadier Lethbridge-Stewart often carried a Swagger stick with him.
* Doctor Who brought back the red Supreme Dalek, by which time the unpopular Paradigms had been quietly shooed off of the show.
* Doctor Who, but all it ended up amounting to were a few Dalek comic books.
* Doctor Who, but as he's an AI Interface, it could be argued he was just "made" that way.
* Doctor Who, but elsewhere in the episode, even the sun makes noise. Stars have an

atmosphere, and if you could enter it without being burnt to a crisp, it would sound very loud indeed.
* Doctor Who. But especially by the way the Tardis Team doesn't seem overly impressed by him:
* Doctor Who, but instead stowed away on the ship carrying the children and old folk to Paradise Towers. He is universally reviled by all of the inhabitants of the Towers.
* Doctor Who, by introducing us to so many good-natured, likable, honest folks, and then killing them in cold blood.
* Doctor Who by Largdens, and she manages to cut herself free with a knife she hid in her shoe. However, the text points out she cuts her hands in the process.
* Doctor Who by the end. And they did have their betters, the Eternals, but those guys rarely actually got involved in anything.
* Doctor Who by the titular Faction are mockeries of technology powered by voodoo. The Homeworld and the Faction are still sitting to see if they can get a coherent opinion.
* Doctor Who by yelling at observers, "It's your fault! All of you! You voted Saxon! You did this!"
* Doctor Who called the Ancient Lights from the previous universe that derived their powers from astrology contrary to the physical laws of the Doctor Who Universe. The characters finally admit the Ancient Lights violate the laws of the universe, but not once do they call it magic despite violating the natural laws of the universe being one of the more commonly accepted definitions.
* Doctor Who can be like this. She once forced the Doctor to pose as her boyfriend to her family at Christmas. He had little choice but to obey. Later, there was this gem of a conversation:
* Doctor Who can detach his fingers and send them after his victims, using the fingers as a medium to drain their nightmares. He can also regrow the fingers at will, so he can do this as many times as he wants.
* Doctor Who, can easily carry a grown man around, has threatened one of his companions with the fact he could break any bone in said companion's body (he was really stressed out at the time), and once stabbed a guy with his thumb. He's 5'8", "slight", and "bony".
* Doctor Who can take care of that. Knowing the Master, he sees having a reason to kill more people as a bonus.
* Doctor Who, Captain Adelaide Brooke is the commanding officer of the first human outpost on Mars. The Doctor tells her that her granddaughter is destined to follow in her footsteps by piloting the first human ship to Alpha Centauri.
* Doctor Who Captain June Harper’s superhuman speed, strength, and hand-eye coordination are described as her simply being from the 51st Century rather than from any kind of technological augmentation
* Doctor Who: Cassandra has taken this trope so far that there is nothing left but her face, (stretched over a frame to continue to simulate the illusion of youth) and the intelligence behind it, demanding, "Moisturize me!"
* Doctor Who", Castellan Spandrell (good cop) and Commander Hilred (bad cop) use what the Doctor calls the "hot and cold technique" on him.
* Doctor Who casually tipping his hat as he passes, on his way to his own final confrontation with Morgaine. Mordred and Ancelyn stare after him for a moment before remembering that they were in the middle of fighting to the death.
* Doctor Who", Chameleon Tours is a front for faceless aliens who are abducting young British tourists and stealing their identities as the first step in their conquest of the Earth.
* Doctor Who channel changed the title of the clip where this happens to "London 1965".
* Doctor Who channel in October 2019, granting it semi-official status.
* Doctor Who characters led to Mel, who was played up as if she was a 'retro' companion despite no character like her ever being in the show before.
* Doctor Who characters who actually have names but they're never mentioned in the story itself for various reasons (short screen time, situation means it never comes

up, etc.). They're named in the credits though.
* Doctor Who. Chosen by the Doctor as being the living personification of Sloth.
* Doctor Who, Cinder can't tell most Time Lord technology apart from magic.
* Doctor Who civilization in the universe, play this trope straight, as seen in their battle with the Daleks in "Day of the Doctor".
* Doctor Who, Clara is trying to sneak Merry back to the TARDIS. Along the way, Merry ducks to hide behind an obstacle while Clara leans on it and waves at a passerby while whistling.
* Doctor Who, Clara Oswald delivers an epic one on the Twelfth Doctor (with both her feet off the ground, yet!) at the end of the storyline "Clara Oswald and the School of Death".
* Doctor Who, Cline exclaims that Rose is the "Great One" from Messaline's creation myth.
* Doctor Who", clockwork androids from the future use the hyperspace drive of a spaceship to create temporal gates disguised as mirrors, tapestries and fireplaces to stalk Madame de Pompadour's lifespan, finding the proper moment in her life to take her.
* Doctor Who combines this with several other tropes but the cult of Saxon is dedicated to resurrect their former prime-minister through human sacrifices.
* Doctor Who comes from a species where pregnancies only last a week (the male ones, anyway). At one point, he shows Ryan and Yasmin a serious of sonograms taken only hours or days apart.
* Doctor Who come to or near this point twice, but also reconstructed the trope in both cases.
* Doctor Who comic, a mental construct who's nigh-indestructible, able to travel anywhere in space and time, and kills his enemies with psychic weaponry. Fortunately, he's on the Doctor's side.
* Doctor Who comics: In "The Silvering", the Eighth Doctor has to deal with evil duplicates from a world behind a mirror. They can be identified by having no reflection of their own.
* Doctor Who comics, the Sixth Doctor's companion Frobisher is drawn to look like this kind of character, though he's technically a shapeshifter who chooses to take the form of a funny anthropomorphic penguin most of the time.
* Doctor Who comic strip. Destrii, her successor, is an alien who fangirls Earth sci-fi and westerns.
* Doctor Who, commenting that his was nice too. In a notable subversion of the trope, he's extremely committed when he's actually dating someone who's monogamous. He also refuses to do anyone with anyone else who's in a monogamous relationship — although all his friends keep randomly kissing him.
* Doctor Who, commit suicide by exposing himself to strong sunlight, causing him to melt. Probably one of the most gruesome sequences in the history of the show (you see his face drip off his skull), and astonishing when you think it got broadcast in an early-evening family show.
* Doctor Who companions Barbara Chesterton and Ben Jackson were both still alive, despite the actors who played them having died in the 1990s.
* Doctor Who companions seem to end up like this, so caught up with time travel they don't want to go back to their own time.
* Doctor Who companion, Victoria, had a notoriously powerful scream. In one episode, they're on an oil rig being attacked by killer seaweed, so the Doctor hooks a microphone up to a sonic gun and has Victoria scream into it. This kills it.
* Doctor Who, compare the sterile and minimalist console room from the old series with Ninth and Tenth's dilapidated techno-organic console, or Eleventh's cobbled-together steampunk decor.
* Doctor Who confirms that he still has the memories of that time after the universe was restored, but he can shut them away, so he doesn't always have them.
* Doctor Who continuity for much of its original run as well. Because the 1963-1989 and 2005-present iterations of the series differ quite vastly in tone, format, and style, not to mention the 16-year gap, fans and this wiki have come to describing

the show's first 26 seasons (plus the TV movie) the "Classic Series"/"Classic Who" and the 2005 revival the "Revival Series"/"New Series"/"New Who".
* Doctor Who create the impression he's a prostitute himself who recently had a very satisfying night with the aforementioned priest.
* Doctor Who crew commandeer the sick-bay. He then takes up arms when June Harper convinces him to join the escape plan, and reveals that before he came to work at the super-soldier facility, his home-world had been caught in the middle of the Dalek Civil War and he had fought against the Imperials and the Renegades alike
* Doctor Who customarily scream "EX-TER-MIN-ATE!" before and during attacks on any living thing they perceive.
* Doctor Who Cyberman trampling through 19th century London. Later on, a reason is given why it wasn't in the history books.
* Doctor Who, Daleks use "rels" to indicate a short period of time, which varies between about one and two seconds from one episode to another.
* Doctor Who dances around this trope in episodes set in the future. One future setting will have weapons identical to modern day ones, yet another future episode, sometimes even set before a "kinetic" episode will have highly advanced energy weapons. Could be justified with the Human Empire rising and falling repeatedly, which could result in a loss of technology with every fall.
* Doctor Who, Daniel Barton, one of the villains, is said to have gone from growing up on a council estate in Britain to the head of one of the world's largest mega-corps. It turns out that still isn't enough for him.
* Doctor Who, Davros does this to his staff to sort out the dissenters from his loyal supporters. After the ones who are with him come over to stand beside him, he has the Daleks do what they do best to the ones still on the other side of the imaginary line. Subverted when they then kill off the others too, then Davros.
* Doctor Who, denied the chance to explore the universe with the Doctor.
* Doctor Who: Depending on which regeneration we're talking about, the Doctor comes off this way from time to time.
* Doctor Who, deriving the prize of Enlightenment from the Tree of Knowledge in the Book Of Genesis. Finally, Clegg seized upon the image of solar winds — actually streams of charged particles ejected from the Sun — to develop the premise of the Eternals racing through the solar system.
* Doctor Who, desiccated bodies of several victims are kept in trunks in the basement.
* Doctor Who". Designed to be consumed by audiences in 8-minute segments over a matter of weeks, the show fuses together into a roughly 45-minute filmette which, mainly due to having the characters summarize the plot every 8 minutes, has serious pacing issues.
* Doctor Who despite being a little bit on fire because he knew they weren't going to get another shot.
* Doctor Who. Despite being delivered in the tone of this trope, both characters are making true statements.
* Doctor Who, despite regaining a set of regenerations, the John Simm version of the Master forces himself not to, storing his essence inside a ring to revive himself later.
* Doctor Who. Despite the time differential (it aired two years after the revival premiered), can be seen as Classic Who passing the torch to New Who.
* Doctor Who did this with the eleventh Doctor's introductory episode "The Eleventh Hour". After the Doctor helps the Atraxi to capture Prisoner Zero, he then orders them back to berate them for threatening to destroy Earth if they hadn't found him. After making them review many of his exploits throughout the years, the Doctor steps through the hologram and introduces himself. He then sends the entire force running with just a single word, "run".
* Doctor Who: Doctor (and later Colonel) Elizabeth Klein from the audios "Colditz", "A Thousand Tiny Wings", "Klein's Story", "Survival of the Fittest" and "Architects of History". She's from a parallel universe where because of something Ace did the Nazis won. She's not naive, she knows the Nazis have done terrible things, but she does believe in the "survival of the fittest" ideology of the Nazis. She is a

medical doctor and as compassionate as the Doctor, but she's also cold-blooded enough to abandon the Doctor, steal the TARDIS and edit history to the point where the Nazis have a Moonbase and have beaten the Daleks (think about that for a second).
* Doctor Who Doctor falls in love with a widowed nurse working at the school where he teaches. She remarks at some point that it's not fair how the world expects widows to just disappear after their husbands die.
* Doctor Who does not carry a gun (though he has used them on occasion), and often cooks up homebrew supertech.
* Doctor Who does this several times. It's written like a recording rescued from a sunken ship, complete with out of tune, too-slow voices and frequent staccato bursts of sound and creepy record screechings.
* Doctor Who doing a narration instead. Tipple's involvement with the film was reduced to a single scene where he had no dialogue, his face was totally obscured by shadows and his version of the Master was promptly killed off, making his discernible presence in the film next to nonexistent.
* Doctor Who doing this with a chunk of "cheese" he found in his friend Anji's flat, which had been abandoned for months anyway. She says she didn't have any cheese, and he is understandably perturbed.
* Doctor Who, done this on multiple occasions. Due to advances in CGI and special effects, they turn up more often on the new series.
* Doctor Who, Donna Noble accuses the Doctor of making stuff up when she finds herself snatched from her wedding.
* Doctor Who, Donna Noble discovers that her fiancé Lance only offered her coffee to begin with so he could dose her with huon particles to benefit the evil alien empress he was secretly working for. He only accepted her marriage proposal because he couldn't risk her running off.
* Doctor Who, Donna Noble helps herself to some office equipment after being fired. Loudly, in an effort to draw attention to herself.
* Doctor Who, Donna Noble tries to hail a cab in her wedding dress, without success.
* Doctor Who, Donna uses her Magical Temp skills to deduce that no one in the factory has ever been sick, which becomes the first sign that something is quite wrong.
* Doctor Who, Dr. Black — Bill Nighy's character — who is an art expert, explains in Van Gogh's presence how the latter managed to "transform the pain of his tormented life into ecstatic beauty" and "use [his] passion and pain to portray the joy and ecstasy and magnificence of our world". And this is why he is the greatest artist who ever lived.
* Doctor Who: Due to their relationship with the Doctor, most companions find themselves in this position to some degree, however Clara Oswald takes it to another level by explicitly being recognized — by the paramilitary organization UNIT and the prime minister of Great Britain, no less — as acting on the Doctor's behalf in his absence on several occasions.
* Doctor Who, during a brief interim between Sarah Jane and Leela where he has no companion and talks to himself instead:
* Doctor Who, during the climax, the Thirteenth Doctor proudly announces that she has "skillz. With a zed."
* Doctor Who During the first series of the revival, no episode was set outside the Solar System.
* Doctor Who: During "The Monster of Peladon," the ambassador from Alpha Centauri threatens to make their displeasure known by sending an official communication to the Galatic Federation. This is during the middle of an armed uprising against the government.
* Doctor Who during Twelve's tenure showed that his father tried to encourage him to join the military, not thinking he was smart enough for college.
* Doctor Who": During WWII, British Commander Millington has a room in his HQ that looks just like Hitler's office, so he can think like he thinks. (Millington is pretty unstable — though not a Nazi.)

* Doctor Who: Earth Conquest-era episodes, and a bonus-content laden retrospective of particularly acclaimed/important episodes that ran on Saturday nights in the weeks leading up to the Series 9 premiere.
* Doctor Who Earth has occasionally (such as in "Last of the Time Lords") been identified as "Sol 3" from outside sources.
* Doctor Who", Earth's population in the 25th century is said to be one hundred thousand million (or one hundred billion).
* Doctor Who (e.g. long scarf; velvet smoking jacket; cricketing garb; etc.) The TARDIS' interior demonstrated this as well, with a console made of junk and a moodily-lit, minimalist interior instead of the usual clean, white interior of the old series or the Jules Verne aesthetic of the TV Movie.
* Doctor Who: Eleven is doing this charming flaily sort of thing with his hands over his head at Amy Pond's wedding. It catches on with the kids, and then with everyone else. Official material would later name the dance as "The Drunk Giraffe."
* Doctor Who: Eleven mentions having competed in the Anti-Gravity Olympics in "The Bells of St. John".
* Doctor Who ended up becoming its own genus again. Being a time traveler, the Doctor could have already known the name would change when he called the animal that.
* Doctor Who, ended up resorting to this on occasion - great examples are David from "The Dalek Invasion of Earth", who is just there for a romance with Susan, and Troilus from "The Myth Makers", who does not have a single line of dialogue which is not about how much he loves Vicki, how happy he is loving Vicki or about how angry he is when people try to hurt Vicki.
* Doctor Who ends with future-Amy narrating all the adventures she had over a shot of kid-Amy from her first appearance. It turns pastel-colored in the last few seconds.
* Doctor Who engineered to show no emotions other than hate, we're talking about here.
* Doctor Who enjoy killing him, in which case this ends up happening every few minutes or so.
* Doctor Who entitled, appropriately enough, "Exterminate Annihilate Destroy."
* Doctor Who entry, which would specify "part X of a Y-part story"). On the other hand, it was not until the end of the half hour that you could wonder whether it was a cliffhanger or an ending. In addition, the Doctor's deaths would usually (but not always) end up at season finales.
* Doctor Who episode "Battlefield", the Brigadier needs to know if the UNIT armory includes silver bullets. It does and he uses them to destroy the Monster of the Week.
* Doctor Who episode "Boom Town": The Doctor finally notices that the words "Bad Wolf" appear to be following him everywhere he goes... and then dismisses it as "like when you hear a word on the radio, and then keep hearing it all day."
* Doctor Who episode "Dalek", it was revealed that billionaire Henry van Statten "owned the Internet".
* Doctor Who episode for "The Impossible Planet" it's commented by the producer that practically every shot has steam rising from somewhere.
* Doctor Who episode "Mawdryn Undead" is a brilliant example. Stealing Time Lord regeneration technology to extend their lives leads to them constantly regenerating and mutating horribly, so they beg the Fifth Doctor to release them from their karmic hell.
* Doctor Who episode "Midnight", in which the Doctor and a bunch of tourists are trapped in a train car with a mysterious and probably malevolent alien.
* Doctor Who episode "Nightmare In Silver" has a "solid-state sub-ether Ansible-class communicator".
* Doctor Who episode "Silence in the Library/Forest of the Dead". Likewise in "Oxygen".
* Doctor Who episode "Smile", Bill asks about the communication units:
* Doctor Who episode, such as "Hunks 1, 2, and 3" for the Thals of "The Daleks." This extends to cast members as well, such as calling Barbara "Barb Wire" during

"The Dalek Invasion of Earth", or referring to companions Barbara, Ian, and Vicki as "Notorious B.I.V." in "The Space Museum."
* Doctor Who episode "The Christmas Invasion" after his hand grows back from the remaining post-regeneration energy.
* Doctor Who episode "The Doctor Dances," when Captain Jack Harkness first enters the TARDIS:
* Doctor Who episode "The End of the World," Cassandra intends to destroy the space station so she can claim everyone's insurance money.
* Doctor Who episode "The Family of Blood", the Doctor (who is currently a human) is given the option of remaining human and living an ordinary, happy life. He even gets a vision of a wife, children, and a quiet death in old age, all things the Doctor can't have or has lost. Kind of an odd situation as he isn't the Doctor at the time, but does have some idea of what the Doctor's life is like. He chooses to revert to his Time Lord self and save the day (and innocent civilians).
* Doctor Who episode "The Girl In The Fireplace" features the repair robots of a damaged starship repairing its systems with the organs of the crew - an eye as the lens of a camera, and a beating heart as a pump wired into the pipes.
* Doctor Who episode "The Impossible Astronaut," River Song uses a six-shooter to shoot the Stetson off The Eleventh Doctor's head, blowing off the barrel as she re-holsters it. "Hello sweetie!"
* Doctor Who episode "The Impossible Astronaut", The Doctor winds up in the Oval Office, where he agrees (at gunpoint, which happened a lot in that episode) to help Richard Nixon find someone, he then proceeds to say (with dramatic music) "I'm going to need a SWAT team ready to mobilize, street-level maps covering all of Florida, a pot of coffee, 12 jammy dodgers, and a fez." All he really needed (and got) were the maps.
* Doctor Who episode "The Lodger", this is actually used to save the day.
* Doctor Who episode "The Pandorica Opens", The Doctor has a revived, Roman robot Rory backing him up. And it works.
* Doctor Who episode "The Sound of Drums", the Master sends the Toclafane from the end of the universe to shred apart tenth of the Earth's population.
* Doctor Who episode "The Sun Makers", in which the last of humanity in a resource-strapped Solar System are relocated to Pluto, which now has six artificial suns. In the episode's defense, it was broadcast less than ten months before the discovery of Pluto's moon Charon, which revealed how ridiculously small Pluto really was. No excuse for the atrocious grasp of Newtonian mechanics, however.
* Doctor Who episode "The Time of the Doctor", Clara accidentally told her relatives that she had a boyfriend, leading her to call the Doctor in a blind panic.
* Doctor Who episode "The Woman Who Lived" devotes a good deal of time to discussing the Aesop that "Just because you're immortal doesn't mean you should stop caring about mortals."
* Doctor Who episode "Time and the Rani" the Doctor trades the Rani for his companion Mel in this way.
* Doctor Who episode "Turn Left", Donna's decision whether to turn left or right at a road intersection determines the path her whole life will take and eventually affects the fate of the entire universe.
* Doctor Who era. This got very elaborate for Series Two, with multiple connections between the sites, before being abandoned in Series Three (there were a couple of sites, but no related game).
* Doctor Who, especially with the Fourth Doctor — the villains have no sense of humour; the Doctor does. The Master is an occasional exception, depending on the incarnation.
* Doctor Who established canon that magic did once exist, before it was banished by the Time Lords in favour of rationality, and bits of it are still floating around.
* Doctor Who, etc — and blame absolutely everything they don't like on that figure, regardless of whether they can be reasonably blamed or not.
* Doctor Who even if it's just a pile of rocks (because, "Look! Rocks!"), and while bow ties and enormous scarfs are cool, pears are absolutely rubbish. And do shut

up, K9.
* Doctor Who even praising Matt Smith the 'oldest one of us all' in the 50th Anniversary panel).
* Doctor Who, even though a huge chunk of it was made in the 60s and 70s, because the cast and crew were worried about setting a bad influence to children. The ubiquity of smoking at the time is still visible in the set designs occasionally; note the pub in "The Android Invasion", where the Doctor starts picking through ashtrays to examine the cigarette butts.
* Doctor Who, even though Karlax tried to kill him, when his TARDIS is wrecked by the Daleks the Doctor saves him. Subverted later. After Karlax kills Cinder, the Doctor dematerialises the TARDIS around him, leaving Karlax surrounded by Daleks. He is quickly exterminated.
* Doctor Who, even though they are the most fondly appreciated physical features of the character. On the other hand, a lot of other artists exaggerate the physical quirks of the Doctors, though these ones are usually not doing it for shippy reasons.
* Doctor Who. Eventually revealed that he does still have them, he's just rarely seen opening them.
* Doctor Who, even when they're using real guns. It is for children, after all.
* Doctor Who everyone's heart, essentially Magically Defibrillating a third of the population of the planet by remote control. The victims have all been out for far too long to be revived, too, but the Doctor's magic takes care of that as well.
* Doctor Who evolution, as the latter episode shows humans and human-descendants (and a younger version of Cassandra) who look perfectly normal.
* Doctor Who example above, one side is more dependent than the other. A Trill symbiote can't generally survive outside its host, but a potential host can survive without one. Likewise, a Time Lord can survive without a TARDIS, but a TARDIS generally needs someone to keep it in working order.
* Doctor Who example: Ace gets trapped in a room full of this, and freaks out, during "Ghost Light."
* Doctor Who example of this trope, he once indulged on it to the point of calling himself "Harcourt De'ath".
* Doctor Who exists is to scare the Krotons out of children. A few examples:
* Doctor Who Expanded Universe, a former TARDIS which got caught in a black hole and became an object a light-year across with one end sticking out of said black hole, on which people eventually took up living. There's also the Artefact, a giant traveling ecosystem of parasitic lifeforms from the novel "Parasite."
* Doctor Who Expanded Universe agents. It's a Faction Paradox thing — they embrace and celebrate death instead of fearing it.
* Doctor Who Expanded Universe, Alison does this to herself to make better sense of what the Doctor's saying, to his annoyance.
* Doctor Who Expanded Universe and all my wife got me was this lousy T-shirt".
* Doctor Who Expanded Universe articles about an entirely fictional six-part First Doctor serial in which Robin Hood turns out to look exactly like Ian Chesterton, and the cast list credits "Ian Chesterton/Robin Hood - William Russell". The cast list also notes that Maid Marion is played by Anette Wilkes, who would go on to play Polly the year after "Thief of Sherwood" was suposedly broadcast. The final story, "That Time I Almost Destroyed The World While Looking For A Dress" had Polly wander through the previous stories in the collection, and sure enough, she looks exactly like Maid Marion.
* Doctor Who Expanded Universe, as by Cyberman norm, it's a corpse laden with cybernetics.
* Doctor Who Expanded Universe by A.L. Kennedy. The Doctor thinks to himself that his tendency to run off and think in strange places annoyed Einstein, Feynman, Leonardo and Zogg the Remarkable. Later Putta's plan to help the Doctor is described as not the kind of plan Napoleon, Genghis Khan or Thraxtic would have thought of.
* Doctor Who Expanded Universe by Mike Morris are ten feet tall with pale, fleshy, lipless heads that somewhat resemble a jack o'lantern. In fact, in the Whoniverse,

jack o'lanterns are the result of human race memory of the Hervoken.
* Doctor Who Expanded Universe" by Third Eye), and Cyberman blues ("Tears of Rust" by Cyberblind).
* Doctor Who Expanded Universe comic "Tesseract", the Tenth Doctor refuses to believe that his new companion Emily has encountered beings called the Tef'Aree that live in the Time Vortex, because they're the subject of Gallifreyan fairytales. His rationalization that she heard the word somewhere is particularly flimsy — WHERE would she have heard it?
* Doctor Who Expanded Universe) cover features a cartoon of the Doctor, so it's not clear exactly what is going on.
* Doctor Who Expanded Universe emotions. In the last panel, he chuckles to himself, "Well, I'm sure they'll grow out of it!"
* Doctor Who Expanded Universe encountering the Haddron Republic, which are essentially a giant, "What if Caesar had crossed the Rubicon unsuccessfully?" IN SPACE!
* Doctor Who Expanded Universe exorcised magic and irrationality from the universe.
* Doctor Who Expanded Universe' Fitz Kreiner doesn't stop at casually coming out to the reader as bisexual, he also makes what seems like a semi-sincere crack implying this trope:
* Doctor Who Expanded Universe has been infertile for hundreds of thousands of years, and reproduces artificially through "Looms".
* Doctor Who Expanded Universe has spent the past few years of the new series finding subtle ways to dance all over this trope with hobnailed boots.
* Doctor Who Expanded Universe humans, just harvest our toes as party snacks. And they're horrified when they realise that, unlike their own, human toes don't grow back.
* Doctor Who Expanded Universe in a way that skips vowels and uses numbers instead of homonymous words. Yes, the texting generation is an evil alien plot! (Author Lance Parkin may have had his tongue firmly in cheek.)
* Doctor Who Expanded Universe. Indeed, he's basically unchanged except for the fact his dreams are excessively normal and he has a new knack for anagrams and crossword puzzles, and is entirely indistinguishable from a normal human.
* Doctor Who Expanded Universe in the Emperor's Gardens who takes the form of a moga. The Doctor has to break it to her that it's 1990, and "modern girls" in Tokyo are wearing tracksuits.
* Doctor Who Expanded Universe, in which very busy people are given watches that allow them to literally borrow time so they can fit more things into the day. The problems come when they're expected to pay it back. With compound interest.
* Doctor Who Expanded Universe" is told; by Barbara to the First Doctor, by the Ninth to Rose, and by the Eighth to Brian the Ood. In Eight's version, Death's godchild is a girl. (The princess remains a princess.)
* Doctor Who Expanded Universe. Lor Wilson, who played Sister of Mine in "Human Nature"/"The Family of Blood", reprised the role in a 2020 official web audio called "The Shadow in the Mirror".
* Doctor Who Expanded Universe— who meet bad ends, too), and who enforces this trope upon himself by preferring traveling with the Doctor to staying with anyone. Seriously, fuck either of them and you'd better hope they just lose interest before they jinx you to death.
* Doctor Who Expanded Universe novel features a Cyberman-obsessed researcher recording her experiences for future references as she is gradually converted into a Cyberman. Unusual, in that no one gets to discover it — once she's converted, her original personality is wiped away and she no longer recognises the logic in recording it, and so destroys the recording.
* Doctor Who Expanded Universe novel has a character being dubbed "code-boy" by another because he spends a lot of time doing computer programming. You know, writing code. He loses his real name and ends up known as Kode, likely because of this trope.
* Doctor Who Expanded Universe requires a VR space battle in the first place. Apparently, that's just how VR works.

* Doctor Who Expanded Universe series set prior to the TARDIS landing in Totter's Lane.
* Doctor Who Expanded Universe set tasks for her suitors to avoid marrying any of them since she believes that King Reynart is still alive.
* Doctor Who Expanded Universe's "glamour implants" to his companion "A subtle combination of exotic pheromones, AI wetware wit-routines, genetically-enlarged pupils, and a spray-on tan."
* Doctor Who Expanded Universe short story "The Andrew Invasion", the titular Andrew is mistaken for the Doctor on three occasions (admittedly by some very stupid aliens): Once on his way back from playing in a cricket match (Fifth Doctor costume); once on the way back from his cousin's wedding, where he was an usher, and the colour scheme was green and gold (Eighth Doctor costume); and once in tartan pyjamas with a cat motif, and with a red and yellow patchwork quilt around his shoulders (Sixth Doctor costume).
* Doctor Who Expanded Universe, so it's also possible he's heavily altering the story to make it more romantic and genre-appropriate.
* Doctor Who Expanded Universe, the Doctor and Rose run into a silicon-based species called the Chalderans.
* Doctor Who Expanded Universe, the Doctor claims Cleopatra was not the most beautiful woman in the world, but might have been the most beautiful woman in her bedchamber, if the handmaidens had the day off.
* Doctor Who Expanded Universe. The Doctor lived to have nightmares about it.
* Doctor Who Expanded Universe, the Doctor, posing as a master con-artist, claims to have sold the Sydney Opera House to five different people. The actual con-artist he's talking to doesn't believe a word of it.
* Doctor Who Expanded Universe, the Doctor visits a planet where most of the population was wiped out in an incomprehensible catastrophe. Professor Jeffip does his best to fill the Sole Surviving Scientist role.
* Doctor Who Expanded Universe there's a Doctor Trap, the Doctor has the upper hand.
* Doctor Who Expanded Universe, the Thirteenth Doctor says "Wicked!" when the former Ace agrees to team up with her.
* Doctor Who Expanded Universe, though. One novel features this scene, which gives one the impression he's an intentional example of this trope:
* Doctor Who Expanded Universe throws the TARDIS into a temporal limbo, where he spends nearly a month working on a way to cure himself. Upon curing himself and returning, his companion Sharon marvels that he did it within a few minutes.
* Doctor Who Expanded Universe to be utterly eliminated. The Timelords won.
* Doctor Who Expanded Universe, Trevor Baxendale explains that he wanted the Dalek Inquisitor General to have a suitably menacing name, and while he was trying to think of one, he referred to it as "Dalek X". It wasn't long before he realised the perfect name was...
* Doctor Who Expanded Universe universe who appears to do the same thing through sigils.
* Doctor Who Expanded Universe, when the TARDIS crew arrive in 18th century Edinburgh, Nardole is wearing a kilt and tam o'shanter, claiming to be a member of "the Clan McNardole". The Doctor says "You'll get us all punched in the face" and starts shouting at the tenements "He's no with us! We're no with him! Honestly just met! Don't even like him much either!"
* Doctor Who Expanded Universe when they finally realise human toes don't.
* Doctor Who Expanded Universe) when "totally crukked" apparently comes from a kids TV show and just means "tired". The Doctor warns someone who uses it that this will change by the 25th century.
* Doctor Who Expanded Universe with religous undertones) are Squire, Adjudicator, Adjudicator Secular, Adjudicator Spiritual, Provost-General, Adjudicator In Extremis, and Pontifex Saecularis.
* Doctor Who Expanded Universe you can cheat Death (it worked the first time, after all), but you have to keep moving and always have a back-up plan in case he catches up with you.

* Doctor Who explains this as destroying bits of Atlantis, (the city, the under city and the island) one after the other.
* Doctor Who face before gravity takes over and she plummets to her doom.
* Doctor Who fandom is March 26th, the date the series came back in 2005 after more than a decade of being cancelled, becoming the "New Who Day" for some fans.
* Doctor Who. Fanfic tends to emphasize the more alien, aloof, scholastic side of Gallifreyan culture. Regardless, the names of the Doctor and the Master deliberately evoked higher learning. but only those two characters are really active outside Gallifrey. Then the Time War happened...
* Doctor Who Fanfilm Wiki Fanfilms. Mostly a community wiki edited by the makers of the films themselves, although there are a few ‘fan’ users.
* Doctor Who, fangirled out over meeting Nero in ancient Rome and was generally cute as a button.
* Doctor Who fanzine Time Log that paired the sixth Doctor and Peri with the Ghostbusters. They're both investigating strange goings on in Arkham, Massachussetts, although the Doctor resolutely refuses to believe in ghosts.
* Doctor Who fashion, harnesses it to a flying sleigh and goes for a joyride.
* Doctor Who featured monsters and evil robots on stage and the Eleventh Doctor in specially-recorded film footage. It even used the concept of classic serial "Carnival of Monsters" as its framework!
* Doctor Who featured several two-part stories that followed this structure, while its three-part finale went with Rise and Fall instead (see above).
* Doctor Who features a character who introduces herself as "Hyphen with a three". She later clarifies that her name is spelled "Hyph3n".
* Doctor Who features a face-off section. No, it's not a section comparing how well two different people carry off the same outfit, it's when they move from clothes into plastic surgery.
* Doctor Who features a genius teenager as an antagonist whose motivations can be boiled down to being a teenager. However, he came around in the end, sort of. Also, he had gathered a large number of other genius teenagers to him who, on hearing his real plan, were appalled and immediately abandoned him. It implied that his plans were less about his age and more that he was somewhat unstable anyway.
* Doctor Who, features a literal urban jungle created in London, not to mention the rest of the world, when trees appear out of nowhere.
* Doctor Who features an appearance by the Twelfth Doctor, giving the main characters some advice on defending Earth from alien invaders.
* Doctor Who features an example where the statement more closely resembles the disclaimers found on competition forms and essentially means you have no rights at all.
* Doctor Who features a shapeshifting Rutan called Lady Winters, who when in human and cat form has bright green glowing eyes.
* Doctor Who features a Voracious Craw, a giant worm-like creature which devours everything it can on the planets it comes across, leaving behind only bare rock.
* Doctor Who features the Doctor employ a series of puns about him possibly being eaten by lions in the arena if Nero has his way (he's not there at the time)- "Go down well", "palatable", "roaring performance".
* Doctor Who features the establishment of the Armageddon Convention, mentioned below. The Doctor was supposed to chair it, but due to the hoopla of the day, a 15th century Venetian Cardinal entered in his stead - and, thinking he had been summoned to mediate in a war in Heaven between different angelic factions, he arguably did as good a job as the Doctor himself.
* Doctor Who" features "The Harmony and Redemption", a space pleasure cruiser exclusively for use by the galaxy's worst dictators and criminals. The provable murder of multiple innocent lives is one of the minimum requirements of boarding, and even the staff are required to have "a verifiable history of indiscriminate slaughter" in order to work there.
* Doctor Who features the Tractators, who create meteor showers to try to rid the eponymous planet of its human inhabitants, although this is more of a "Colony Pull", as the Tractators are already on the planet underground and are using their

gravity-controlling abilities to pull the asteroids down.
* Doctor Who features this a lot, with the Doctor stopping the reemergence of evils on all levels of the scale. Plus, in the expanded canon of the novels and audio stories the ancient Gallifreyans were a race of monster-slayers who tamed the chaotic early universe.
* Doctor Who features this heavily. Fitz is quizzed on 20th-century history by someone in the far future, featuring questions such as, "Which English politician was well-known for his seaside boxing matches?" and decides to set the record straight:
* Doctor Who" features this with the Drahvins. We only ever meet the females and their leader, Maaga, is initially confused when the Doctor's companion Steven asks about their men. When she does understand her response is an offhand remark that they keep as many males as they need and simply kill the rest.
* Doctor Who featuring aliens asking things like "What is this thing you call 'a nice spot of how's-your-father'?"
* Doctor Who, featuring the Seventh Doctor, the event turns out to have been caused by a TARDIS exploding.
* Doctor Who: Fezzes are funny rather than cool, and the Eleventh Doctor finding fezzes cool is funny to the other characters.
* Doctor Who fighting the Cybermen in London alongside the Second Doctor. By the time the Third Doctor is exiled to Earth and goes to work with them at UNIT, Benton has been promoted to Sergeant (completely normal), and remains at this rank for the next 4 years. At the time of the Doctor regenerating again, in the serial "Robot", Benton suddenly appears onscreen wearing the rank insignia of Warrant Officer Class 1, (a 3-rank promotion) to fill a gap in the Brigadier's staff; he should have a captain and a major under him, but can't due to financial constraints imposed on UNIT; instead, Benton is appointed as Regimental Sergeant Major, the highest non-commissioned rank there is. This all in the space of (apparently) some 7 or so years.
* Doctor Who finale. (It should be mentioned that Doctor Who series only have 13-14 episodes per season, so this may not belong in this section.)
* Doctor Who finds them, they're in the middle of a ceremony to honour their enemy's dead; he agrees to a truce until the ceremony is over.
* Doctor Who first appeared as a fossilized hand, then having absorbed some nuclear radiation, turned into a walking hand. Eventually it regenerated into an entire person.
* Doctor Who Fitz deal with one of these as a coworker at a pub: a much older woman, who also has a "flat, predatory face" and a mouth so big as to scare him, who wears tacky, revealing clothing which wouldn't even really suit a younger woman. She has a crush on him, to the point of touching his arse on the sly and getting jealous when he chats up an attractive customer around his age. However, this trope is subverted in that he's obviously trying to make an effort to be nice to her as a coworker, and she's just "an ageing and lonely woman".
* Doctor Who, Fitz has assembled a collection of parallel universe Beatles records, including "Feel the Love", their Live Aid song.
* Doctor Who flips back and forth on this. The Doctor is almost always adamant that magic is not real and everything is at worst some sort of unexplained science. Yet several adventures feature stories that match the definitions/descriptions of magic within the story:
* Doctor Who. For added fun, the Doctor also once kissed River's father Rory.
* Doctor Who for children, Zaphod's sexy, clever Earth girl companion is specifically noted to be a hot girl he picked up at a party for her looks.
* Doctor Who for decades, and some writers have let their feelings show:
* Doctor Who for lasers and ray guns meant that whenever a character was about to shoot their gun in a shot, they'd be surrounded by the mystical aura.
* Doctor Who form of laryngitis explains a change of voice actor later.)
* Doctor Who for several minutes, Amy asks River how she can fly the TARDIS:
* Doctor Who for the new series. Gallifrey is clearly a very unlucky planet.
* Doctor Who for years. You can actually see a gradual process of treating it as a

simple "capsule" to the Doctor's longest, truest companion over the length of the series. Then, finally, we got to meet her.
* Doctor Who, found his lordship amongst the flower beds and assumed he was the gardener.
* Doctor Who frequently leads his men in battles against this week's alien menace.
* Doctor Who from entering the room, only to get pinned up against the wall.
* Doctor Who from the original title would still work in Czech, it's just that the pre-2005 version of the show was not well-known outside of the country's SF fandom, so for the sake of other viewers, a more generic title was chosen.
* Doctor Who. Furthermore, Time Lords in particular refer to the upper class rather than the entire Gallifreyan race in certain contexts. Other times, The Doctor does seem to miss more Gallifrey itself at time.
* Doctor Who gadgets are treated as singular artifacts and nobody every seems to consider reproducing any of these things, or modifying them if necessary.
* Doctor Who. Georgia Moffett (the real-life daughter of Peter Davison, the Fifth Doctor) was cast as Jenny, the genetic daughter of the Doctor (played by David Tennant) in "The Doctor's Daughter". Tennant and Moffett later got married.
* Doctor Who, get short stories known as "audio dramas" (which, despite their name, are predominantly comedies).
* Doctor Who gets involved, and the articles are primarily written in an in-universe style. As a result, blatantly contradictory information about a subject will be written about framed in such a way to talk about differing "accounts".
* Doctor Who girlfriend Xana were supposedly this in the back-story. She killed herself and he was exiled to Iceworld.
* Doctor Who: Given respective ages, almost any female (and at least one male) companion for the Doctor. In the literal sense, Amelia Pond and Mels for the Doctor.
* Doctor Who, given the fact that it manifests in other ways than simply inattention (such as difficulty engaging in social interactions, impatience, overlooking things that seem obvious to others, and becoming bored easily, but maintaining excellent focus when he knows what he's doing or he's emotionally invested in something). Given his flamboyant personality, some of the "ADD... Ooh, Shiny" reactions could be intentional exaggerations. In the prequel minisode to (New Who) Series 9 "The Doctor's Meditation", the Doctor remarks that Clara keeps telling him he has "attention deficit, uh, something-or-other."
* Doctor Who gives us Amy Pond post-pregnancy, and earlier, after a Jackie Tyler went from annoying shrew to woman who kicks Dalek ass.
* Doctor Who gives us Zygons, Krotons, planet Skaro, planet Karn, Gavrok the Bannerman, and Izlyr the Ice Warrior (though Izlyr was a good guy).
* Doctor Who global warming, but the Doctor points out that's not likely in 1190.
* Doctor Who goes through a succession of progressively bigger empires in the future, many covering multiple galaxies before eventually encompassing most of the universe.
* Doctor Who going crazy while being tortured and writing on the floor in his own blood.
* Doctor Who going to mention something completely incidental which has no purpose to the plot? A lot.
* Doctor Who go through different evolutionary forms, they always seem to return to their basic form eventually.)
* Doctor Who government they answer to. The "United Nations" part of the name implies that they work for the UN, but there are many examples of the wishes of the UK government taking precedence, without a very clear sense of whether this is by the organization's design or a side-effect of UNIT's officers also being members of the British army.
* Doctor Who, Graham had to collect six coupons in order for the team to earn an all-inclusive vacation at Tranquillity Spa.
* Doctor Who, guiding the Doctor and his companions on a quest to get the Key to Time, while the Black Guardian tried to trick and corrupt them. However at the end the Doctor realized the Black Guardian had been impersonating the White Guardian

all along.
* Doctor Who had a pilot episode (actually several, since they re-made it several times, using the same script) which, despite being a British show from 1963, survived. It was similar to the first episode, but with different costumes, a scene with Susan drawing a bizarre inkblot, and a statement that the Doctor and Susan come from the 49th Century. Because it was produced after the series was accepted rather than to sell the series, it may not technically be a pilot by some definitions.
* Doctor Who had a story entitled "TV Action!", where the Eighth Doctor and Izzy travelled to our reality. Tom Baker, who had played the Fourth Doctor, defeats that month's alien by merely talking to him and rambling endlessly.
* Doctor Who had different ideas of how the various lines fitted together. Mostly this didn't affect the stories themselves.
* Doctor Who had K-9, a robot dog who joined the Doctor in the year 5000.
* Doctor Who had Martha and Mickey unexpectedly start a relationship somewhere between "The Stolen Earth"/"Journeys' End" and "The End of Time", even though Martha had previously been depicted as being engaged to a different man.
* Doctor Who had one of these, in the episode "The Caves of Androzani". It was over spectrox, "the most valuable substance in the universe."
* Doctor Who had #SaveTheDay for the 50th anniversary, the Day of the Doctor. This didn't really amount to anything, and actually ended up backfiring as the same hashtag was already being used to promote several unrelated ventures, including a Selena Gomez song.
* Doctor Who" had this happen between the Doctor and his sidekick — she didn't realise he was the Doctor because she hadn't seen him since the regeneration, and the last time he'd seen "her" it had been the villain in disguise.
* Doctor Who had this in certain stories, especially in the late sixties:
* Doctor Who had to be heavily rewritten by script editor Donald Tosh from John Lucarotti's original scripts, so much so that Lucarotti actually asked to have his name taken off the screened episodes. When he came to write the novelisation, Lucarotti took the opportunity to tell the story he'd wanted to tell in the first place, rather than the one that was aired. It has only a passing resemblance to the TV story.
* Doctor Who hand that set it all in motion. He would be the one who killed the universe.
* Doctor Who. Hardly an episode goes by without some innocent being disintegrated or otherwise killed by a bad guy, usually with some type of energy weapon.
* Doctor Who, Harry Sullivan spent most of his short time as a companion being picked on, insulted and belittled by the Fourth Doctor. To the point that the Doctor felt justified in shouting "HARRY SULLIVAN IS AN IMBECILE!" to the sky over a misjudgement (which, granted, would have blown up both Harry and the Doctor). He returned to his regular job very quickly and never looked back.
* Doctor Who has a cape to go with his ensemble and is the most agile and action oriented incarnation.
* Doctor Who" has a chase scene through a playground, with the quarry going over and through the rides in an attempt to shake off the pursuer.
* Doctor Who has a difficult relationship with this trope; while there's a largely unspoken, unofficial decision on the part of the creators not to give the Doctor an origin, there's nothing to actually prevent them from doing so aside from the honour system.
* Doctor Who has a few, used for combo DVD sets, when a clear follow-on is present.
* Doctor Who has a fraught relationship with this trope due to being heavily associated with it in the 1970s. While not doing it as often as some make out, "she's not just a screaming girlie" has to be emphasized whenever any new companion is created, especially in the new series.
* Doctor Who has a huge headline proclaiming that the meteor that kicks off the plot is returning to Earth. Ace, however, is more interested in the football results at the bottom of the back page, and the Doctor doesn't notice.

* Doctor Who has a large number of rewrites of specific seasons, most of which follow this trope.
* Doctor Who has a long and colourful history of people getting killed by ridiculous crap:
* Doctor Who has a non-pregnancy-related example: the Eleventh Doctor spends a good ten minutes after his regeneration trying to figure out exactly what it is he's craving, working his way through most of the contents of Amelia's kitchen before eventually settling on fish fingers and custard.
* Doctor Who has a number of examples in the modern era of the series.
* Doctor Who has a number of these, many from the period between 1989 and 2005 fans have nicknamed the Wilderness Years.
* Doctor Who has a religious order of Clerics, who judging by the titles they hold appear to be members of a variant of Anglicanism. Refreshingly for a warrior monk order from the far future, they wear practical camouflage combat gear instead of anything overtly religious or ornate.
* Doctor Who has a time-delayed version. The Doctor kisses Martha before running away so that some of his non-human DNA will register on her, and the aliens hunting for it will be held up double-checking that Martha is human, buying him some time.
* Doctor Who has at times not sent a DVD to reviewers, or omitted closing scenes, all cases being to avoid spoilers from leaking out.
* Doctor Who" has a very mild example — Donna threatens to sue a cab driver who refuses to take her to her wedding in Chiswick...because neither she nor the Doctor is carrying any means of paying the fare.
* Doctor Who, has become known as a master troll within many online communities.
* Doctor Who has been like this since the '70s. A well-written Master has the exact same wit and charisma as the Doctor — while regularly killing people for fun.
* Doctor Who has been on the air more or less continuously for half a century and has been one of the consistently most popular shows in Britain for that entire time (minus a decade or so), pretty much the only way to avoid having fans running the show is to deliberately select people who hate the show. Or who have spent the last fifty years in a barn.
* Doctor Who has done this several times, often using viewers' knowledge of the show before it was brought back.
* Doctor Who has every villain of the week trying to out-ham the last, with the Doctor himself out-hamming them all.
* Doctor Who has featured invasions from such things as shop dummies to satellite navigation systems. The series also inverts this tropes in many future-based stories, humans are themselves the invaders. They're usually not outright malicious, but often quite destructive to native species, paralleling historical imperialism and colonization. Notable invasion-themed serials:
* Doctor Who has had many over the decades, often coinciding with a change in showrunners and/or Doctors.
* Doctor Who has incorporated a lot of their own personality quirks and idiosyncrasies into the role, although some more than others.
* Doctor Who has involved an Epic Hail in the finale (all examples spoilered for obvious reasons):
* Doctor Who has it happen so many times, it's practically a drinking game at show marathons.
* Doctor Who has it that traumatic regenerations such as the Doctor's cannot be controlled; because after all, when you've been submitted to radiation poisoning/a fall from a great height or another blunt trauma/cellular degeneration your least worry is whether your next incarnation will have any dress sense.
* Doctor Who has large amounts of props and costumes in storage, so the original series has quite a few examples of prop recycling, both in show, and across other BBC series.
* Doctor Who has Leela, a member of the Sevateem, which is a corruption of "Survey Team". The Sevateem were at war with the Tesh (the Technicians).
* Doctor Who has Madam Kovarian utter a variation on this: "The flirting, do I have to watch this?".

* Doctor Who has never played this absolutely straight, but three individual stories have shown elements of it:
* Doctor Who has numerous instances of this technology, the Daleks having one of the more frequently used.
* Doctor Who has occasionally dipped into this territory with the Daleks:
* Doctor Who has occasionally portrayed the future of humanity this way. "Utopia," set at nearly the end of the universe, has ordinary humans plagued by the "futurekind," tattooed cannibals (or maybe technically not) with sharpened teeth, who seem barely capable of speech.
* Doctor Who has one, started deliberately by Rose to create a distraction. Rose credits a former boyfriend with teaching her the proper technique for starting a Food Fight: apparently, there's an art to it.
* Doctor Who has played around with this since 1970. The title sequence used between 1970 and 1973 featured the serial's title flying towards the camera each episode, the slit-scan title sequence used between 1974 and 1980 used this for the title logo, the "space" title sequence used between 1980 and 1986 featured this effect for the Doctor's head and the show's logo, and the "galaxy" title sequence used between 1987 and 1989 featured the title logo flying towards, past, and away from the camera via CGI. From the 1996 telemovie onwards, the "towards the camera" variation of this trope would be standardized for the actor names and title logo in the opening credits.
* Doctor Who has plenty of good aliens, most notably the Doctor himself. However, the Doctor fights all manner of sundry horrors bent on our demise every other episode.
* Doctor Who has presented us with several examples. Recent ones include:
* Doctor Who has River Song, who likes energy handguns, and once used them to threaten the Roman Army into helping her. Liz 10 also carries two Steampunk laser pistols.
* Doctor Who has several episodes that take place entirely on space stations.
* Doctor Who has several examples, including the Kastrians from "The Hand of Fear" and the Ogri from "The Stones of Blood".
* Doctor Who has The Doctor defeating the More by making a video of them and editing silly music onto it and threatening to upload it to the Galactic Hub if they don't leave Earth alone. This is presumably some alien internet as the episode's set in the 9th century.
* Doctor Who" has the drug Vraoxin, an organic substance whose origin are unknown but whose properties are ultimately lethal.
* Doctor Who has this as a staple of the vast majority of its stories.
* Doctor Who, has this happen to her a lot. Apparently, the Gallifreyian superior physiology doesn't include the ankles.
* Doctor Who" has troubled little girl Maebh Arden waving away creatures only she can sense.
* Doctor Who has undergone this numerous times in its 50-plus year history.
* Doctor Who has used it in the show consistently since the 2005 revival, often with someone getting killed by a monster before the cliffhanger "scream" of the theme music.
* Doctor Who have a few days they celebrate, such as "Black Spot Day" on May 7th (the date on which "The Curse of the Black Spot" takes place in-universe), "Silence Day" on April 23rd (in which Whovians are encouraged to draw tally marks on their skin), TARDIS Day on November 23rd (the anniversary of the show's release), and Dalek Remembrance Day on December 21st (the day on which the Daleks first appeared back in 1963).
* Doctor Who have opted to leave the TARDIS with the desire to go home or pursue new opportunities. A few notable cases:
* Doctor Who have since co-opted the latter term to refer to non-fans.
* Doctor Who?) have started trying to reassemble a device the Doctor dropped in surprise when said daughter showed up, while the Doctor's granddaughter watches, and only one other person understood what the heck Sabbath was even talking about anyway. Since he apparently needs a page or so to recharge his vocal chords,

Sabbath lets them puzzle it out on their own.
* Doctor Who have turned humanity into if it hadn't gone the "two arms and legs, ten fingers and toes" route — lying dormant within Lazarus' genes.
* Doctor Who: he always seems to end up somewhere with something interesting happening, although it's implied he and his companion(s) go other places offscreen.
* Doctor Who he'd collected, and mentions that he's written up a breeding program. They are appropriately appalled.
* Doctor Who. He failed to get a writing job on the revived series, but still has a devoted following online despite his extremely negative views on much of the 21st-century show.
* Doctor Who. He grabs a kid's cricket ball and sets off a chain reaction that stops the mother seconds before the piano falls. "Lucky."
* Doctor Who he had at school. His real name is unknown, and it's said to be dangerous if a human were to find out.
* Doctor Who, he has to alter history in minor ways, and the Doctor and her friends have to try and undo the effects. The one weapon the villain has in his possession is one which simply displaces its targets in time, as well.
* Doctor Who. He is brought back to his best self in the end, but he suffers greatly in the process, and the ending is extremely bittersweet. While this is truly a three-part story, "Face the Raven" (rise) is often listed as a standalone episode and "Heaven Sent" and "Hell Bent" (fall) a two-parter, which makes this structure more apparent.
* Doctor Who held an open "single contribution" category in its 50th anniversary poll, she was the clear winner some 48 years after she stepped down from the role.
* Doctor Who) he literally cuts and pastes large sections from a previous novel.
* Doctor Who. He looks around first, clearly expecting the solution to be a bit more dramatic, then does it anyway. Because sixty-odd computers are plugged into a single socket, it unexpectedly sparks back at him.
* Doctor Who, he manages to assemble a satisfying enough omelette for two from some eggs, stray cheeses, and salad dressing. Seems that living as a bachelor for most of a thousand years makes you pick up a few things.
* Doctor Who", Henry van Statten, scavenger of alien tech, claims to have found the cure for the common cold in "the Russian crater".
* Doctor Who her feed turns to static. Justified in that there was a psychic link driving the video-conference.
* Doctor Who, her mind/soul ends up in a human body for an episode, and the way they interact basically makes all the "TARDIS = wife, companions = bit on the side" speculation canon.
* Doctor Who Her voice over the intercom was enough for her to impress him with her intelligence and willpower, and do lots of flirting. This is also why he doesn't immediately recognize the next version of her that he comes across; by the time he realized that they are basically the same person, they had already kissed.
* Doctor Who. He's confused as to how she ended up like this. The novelization of "Rose" has a cutaway showing how she missed out on the Auton massacre as well.
* Doctor Who he shows a liking for speaking Latin and Wagner's Operas.
* Doctor Who. He still talks like a British rogue (e.g. "sorry, ol' chap").
* Doctor Who), he was hiding up the tree dropping apples on Newton's head. Newton was more annoyed than inspired, so the Doctor explained gravity to him over dinner instead.
* Doctor Who himself have been played by actors who first showed up in one-shot roles.
* Doctor Who, his companion Bill mentions that he does this almost every lecture and the university doesn't care.
* Doctor Who his scuzzy little flat were like this. He just has a "sleazily red" lightbulb in his bedroom, which Sam (whom he's on a bit of a date with at the time) makes fun of him for. He says it's his "relaxation bulb" and swaps it out for a normal one.
* Doctor Who history of the characters in question, some of her behaviour might just be trolling an old frenemy.

* Doctor Who horror story. The Kaled people were being mutated by a millennium-long nuclear/biological/chemical war. One of their scientists, Davros, came up with (or stole) the brilliant idea of accelerating the mutations to see where they would finally end up. And, while at it, he couldn't pass up the opportunity to improve on his creations, making them stronger and more determined. In one version of the story, he was explicitly trying to turn the Kaled race into gods, based on a prophecy he'd read. In all versions, the result was the Daleks, whose sole motivation was to exterminate any lesser (i.e., non-Dalek) forms of life. Starting with Davros himself.
* Doctor Who, however, are almost invariably traditionally beautiful, with their beauty often being the main indication that the Doctor is going to pick them up.
* Doctor Who. However, it only seems to work when the Time Lord is actively paying attention.
* Doctor Who. However, it's clear that things won't go beyond flirting where Jack is concerned, and the Doctor tends to flirt back at him, making this an oddly chaste and playful 8.
* Doctor Who. How much chemistry they have in-universe is up for the viewer to decide.
* Doctor Who, Hugh has this—a young knight valiant in his defense of his father.
* Doctor Who human. He frequently refers to his "episodes", which are in fact psychotic episodes, the content of which is quite a bit like episodes of the TV series. The whole book is just very, very meta.
* Doctor Who, humanity's ability to survive and adapt is what draws the Daleks to repeatedly try to conquer Earth.
* Doctor Who humans and the Hath have been in a endless struggle for control of a colony for generations. The war has gone on so long neither side remembers what started it, but they're both hell-bent on fighting until the other side is wiped out. The plot twist is that the war has been going on for only seven days. They're all artificially gestated in machines (an army can be cranked out in a couple hours) with such high casualty rates that nobody from the original "generations" has lived through the entire war. Both sides were on the original colonization ship together, built the colony, and later squabbled over what to do after their commander died which turned into an armed conflict.
* Doctor Who", if his line over the Brig's unconscious (assumed dead) body is any indication.
* Doctor Who. If the Doctor can be considered to have a weapon, it's this trope when he visits his own grave and finds the TARDIS is the grave marker.
* Doctor Who. If the Kaleds knew there was a tunnel between the two cities, why didn't they use it to smuggle normal troops into the Thal city and end the war years ago?
* Doctor Who if you're not careful, with him admitting that he tries to keep her away from "major plot developments" of the future.
* Doctor Who I know about them. I've been to their Memorial Theatre in Liverpool. But I never knew they played classical music!" The idea of a memorial concert hall doesn't seem so silly in the 21st century.
* Doctor Who: Implied when the Ninth Doctor says "Lots of planets have a north." The only planets that don't have a north are tidally locked and don't have a magnetic pole.
* Doctor Who imply that the Guardians and/ or the Eternals are the last survivors of the Universe before the Whoniverse. The new series also has the Beast from "The Impossible Planet", who is said to come from before time and matter itself.
* Doctor Who included a village of apparently literal Space Amish just outside the capitol who the Doctor stays with for a while.
* Doctor Who includes a scene where the First and Twelfth Doctors exit their TARDISes, which are parked side-by-side, at the same time. Naturally, this is nowhere to be found in the episode itself.
* Doctor Who, inconsistencies can be chalked up to her own personal eccentricities and whims.

* Doctor Who), in contrast to his clean-shaven Prime Universe counterpart.
* Doctor Who: In "Death in Heaven", Missy not only uncuffs herself without her captors noticing, she sneaks the cuffs into Osgood's pocket for the sake of a joke.
* Doctor Who: In "Deep Breath", the newborn Twelfth Doctor suggests that his previous selves were getting close to his human companions in the wrong way, compromising his judgment. Hence his decision to regenerate into someone older, darker, meaner, and more detached, who could look more big picture but still not hold personal grudges.
* Doctor Who in "Earthonomics" is from a diploma mill (that also operates as a dry cleaner). He lied about his qualifications to get the cushy job travelling the universe and gets away with it because his employers and customers know even less about Earth than he does.
* Doctor Who. In "Face the Raven", it's revealed that trap streets (fake streets placed in maps as copyright protection) are actually this trope, protected by "misdirection circuits". It's possible to stumble into them accidentally (for instance if you're talking on your mobile phone) but those deliberately looking will pass them by without notice.
* Doctor Who. In fact, all the major characters resembled their voice actors; the hope was that the webisode would get enough support to start up the TV show again with that cast, so making the characters look like the actors would make it possible to use the webisode as part of continuity for the new series. As it turns out, that plan fell over, as the renewal of the show had already been announced before it aired.
* Doctor Who influenced TARDIS interior and weighty-looking, almost industrial Daleks - the sonic screwdrivers are still knowingly designed to follow this aesthetic, perhaps because in the Ninth Doctor's tenure it's revealed that the screwdriver is laughably low-quality, dated technology.
* Doctor Who in "Genesis of the Daleks" in the 1970s. Although given the appearance of the pepper pots, this may simply apply to the Thal mutated Daleks (Laths?) and come after the Kaled-Daleks.
* Doctor Who: In "Heaven Sent", the Doctor is stalked through a shifting castle by "the Veil" — what appears to be a walking corpse swathed in rags and surrounded by flies. It reflects one of his earliest nightmares: when he was young, he was at the funeral of an old woman. They covered her up, but couldn't keep the flies away.
* Doctor Who (inherent in the series) of the TARDIS always turning up at the right time and place for the Doctor to help people.
* Doctor Who in linear time because it is fought throughout all history and at the meta levels of reality. Many of the battles themselves are time looped and repeat endlessly.
* Doctor Who: In many ways, the Doctor qualifies as a superhero. You mean his possessing two hearts, superhuman intelligence, the ability to regenerate his entire physical being and numerous other far-out abilities demonstrated throughout the series aren't superpowers? The main character even has a code name that he goes by in lieu of a 'proper' name.
* Doctor Who. In other cases, the Time Lords have redirected his TARDIS to places they wanted to be fixed by him without admitting their involvement.
* Doctor Who: In "Paradise Towers", the Doctor escapes the rules-obsessed Caretakers by citing various 'rules' that he has just made-up. None of the Caretakers are willing to admit that they are so unfamiliar with the rulebook that they don't recognise these 'rules'.
* Doctor Who: In "Robot", a tank is rolled out in an attempt to stop the eponymous robot, but is quickly destroyed by it instead.
* Doctor Who in "Silence in the Library" as the theme for the library and the alternate world, doubling the WTF factor and giving the episode Moffat's trademark 'dark fairytale' overtone.
* Doctor Who in some way that convinces him to destroy them instead. To whit:
* Doctor Who. In the audio version, he's played by an elderly, lisping Andrew Sachs and depicted in the artwork as wearing a much plainer white outfit - contrasting

with the Eighth Doctor's conventionally-attractive look.
* Doctor Who in "The Claws of Axos". Britain's Ministry of Security wanted to control UNIT, and the Brigadier spends the episode battling bureaucrat Horatio Chinn over the issue.
* Doctor Who: In "The Doctor's Wife" the Doctor tries to build a TARDIS out of old ones.
* Doctor Who. In the episode, Sally Sparrow explores the house and discovers a message from 40 years earlier warning her to duck as well as an infestation of Weeping Angels.
* Doctor Who in the form of a slug-like creature crawls into the mouth of a sleeping paramedic to take control of his body.
* Doctor Who, in the form of the Doctor's (usually human) companions meeting aliens on their homeworld before they save them from other, less well-intentioned aliens.
* Doctor Who: In "the Greatest Show in the Galaxy", Captain Cook doesn't mind being called a scoundrel or a meddling fool, but "crushing bore" cuts him to the quick.
* Doctor Who in the issue after its transmission) meant the arrest could potentially be invalidated. Made moot by the fact the Doctor frees her.
* Doctor Who: In "The Pirate Planet" the Captain's henchmen make use of corridors that cancel out inertia, allowing them to travel long distances very fast and then stop suddenly without any injury. At one point the Doctor and Romana utilize one corridor, with the Captain's mooks on their heels. When they reach the end of the corridor, the Doctor sabotages the inertia neutralizer, sending their pursuers shooting out of the corridor where they land against a far wall hard enough to lose consciousness.
* Doctor Who in the Poacher's stores, leading to one of the best Doctor/Companion exchanges in the show's history:
* Doctor Who: In "The Romans", the heroes are separated while visiting Nero's Rome, and Ian ends up enslaved and working a galley.
* Doctor Who, in the same series, similarly refers to the "predators" from Planet 5, rather than the Fendahl.
* Doctor Who: In the serial "Image of the Fendahl", the Doctor says the Fendahl were responsible for Mars becoming a dead planet.
* Doctor Who in the show's 50+ year history to back it up. And that's not even counting the colossal expanded universe.
* Doctor Who: In the story "Terror of the Autons", the Master — having taken over a plastics factory — tests a prototype for an inflatable plastic armchair on a rather troublesome employee. The armchair traps him in its cold, clammy surface and suffocates him.
* Doctor Who in the traditional Fourth Doctor-era time slot of 5:15PM on Saturday.
* Doctor Who in the wake of a "Great Catastrophe", not solely a political alliance.
* Doctor Who: In "The Witch's Familiar", Missy attempts to trick the Doctor into shooting Clara by placing her in a Dalek casing.
* Doctor Who". In this case he's standing on a plank over a pit of nasty biting creatures, holding a crossbow with only one quarrel. The rope is attached to a weight, pulling machinery that's opening the pit beneath him. The rope gets thinner the longer you wait (making it easier to cut) but the weight moves faster.
* Doctor Who". In this case, the mutations turn out to be universal, and the effect of the planet in question moving into Summer.
* Doctor Who into becoming two enemy tribes; the Sevateem (a corruption of "survey team") and the Tesh ("technicians"). Leela, a Sevateem warrior, became the Doctor's companion for a time.
* Doctor Who into being terrified of things like the figurehead of a Viking longship, then threaten to post it to, basically, Space YouTube to completely ruin the aliens' reputation as badass warriors unless they go away.
* Doctor Who into the earth was so great that not only were monsters called forth and the guilty scientist punished, but the world itself was destroyed (in a parallel reality). There's no reason for this other than that scientists dared tamper with what men should not have disturbed—and this from the incarnation of the Doctor that steadfastly rejected all nonscientific explanations for observed

phenomena in every other story.
* Doctor Who'' introduce a video game to Earth and kidnap the best players to be soldiers.
* Doctor Who" introduced the Time Lords in its final episode than can describe the plot of the first nine episodes of the story leading up to it.
* Doctor Who). In two of the episodes, she handcuffs him to prevent him from ruining her plans, and when he asks about her reasons for doing so, she again replies "Spoilers". Also there was that time she tried to kill him...
* Doctor Who invades the TARDIS and everyone has to flee it until the Doctor figures out how to defeat it." New series examples include:
* Doctor Who, involved a planet where someone had to sit in a control chair to keep the planet running smoothly.
* Doctor Who (in which case all the previous episodes of the season run in a row), Halloween, and Christmas.
* Doctor Who", in which Spock scans the Fourth Doctor, detects how many, many things he's got in his coat pockets, and concludes that it'd be easier to simply confiscate the entire coat than unload them.
* Doctor Who, in which the Doctor places Easter eggs on each DVD owned by Sally Sparrow in order to warn her about the Weeping Angels.
* Doctor Who, is a bit confused. He later adopts a young girl named Miranda, who ages rather normally, so he looks about forty (and claims to be thirty-six) when she's sixteen, which other characters see as slightly unusual. But after she leaves to have her own life and they're later reunited, several decades have passed since the last time they met, so she actually looks older than he does.
* Doctor Who is about the two most notable sci-fi versions of this, the Borg and Cybermen, joining forces to do this.
* Doctor Who is a frequent invoker of this trope (see also under "Literature"):
* Doctor Who is an "enemy of humanity" who must be killed to protect the interests of the human race.
* Doctor Who is an example of a show that has gone through the cycle more than once. In its original run, it reached Stage 5 at some point during the 1970s (during Jon Pertwee and especially Tom Baker's tenure as the Doctor) and stayed there until the early 1980s, before gradually entering Stage 6 during the mid-late 1980s and settling at Stage 6b after it was cancelled in 1989 — while it lost a lot of popularity, a lot of the key elements of the show remained iconic within British culture and it maintained a passionate cult fanbase. Then, after it was revived and retooled in 2005, the modern show very quickly went re-entered Stage 5 again (especially after David Tennant took over the role), with the classic series entering Stage X as a result of the revival's popularity.
* Doctor Who is an extremely large scale example, as it went on for so long that both sides began running out of resources to power their more advanced weapons and resorted to using gunpowder-based weapons, bows and arrows, etc.
* Doctor Who" is another example. Adric, having been humiliated by Tegan and Nyssa decides to get his own back on the pair, which he does by having them sit under a pipe and "showering" them with things such as custard and baked beans.
* Doctor Who is a right-wing politician with an anti-immigration philosophy who spends much of the story being needlessly suspicious of the Doctor for being what can euphemistically be described as 'foreign'. By "In The Forest of the Night" he openly regards the Earth as his real home.
* Doctor Who is a sexy jungle warrior woman, who is a member of an interstellar human colony that returned to a pre-technological lifestyle because of a mad computer.
* Doctor Who is a very uncommon fetish, or more disturbing in reality than people expect.
* Doctor Who is by making the Queen's vote capable of ending the situation, and thus potentially destroying the Kingdom, all on its own.
* Doctor Who is compared to Time Lord regeneration, which provides the sole hook for combining the two series. It's very weird.
* Doctor Who is fairly dark but still an idealistic children's show. Some parts of

it are unexpectedly horrible:
* Doctor Who, is from the region where the real Tesla was born (current-day Croatia) and emigrated to the United States at roughly the same age Tesla did.
* Doctor Who is implied to have had many names. Jack Harkness isn't even his real name. In one episode he goes by Captain James Harper. In another, he goes by former team member Owen Harper.
* Doctor Who" is in his thirteenth body and looks like death warmed over; Geoffrey Beevers remarked that this is what the Master is like without his smooth looks and charm: as he put it, "the essence of the creature". This seems to be a running theme with this Master. The first Crispy Master is the ugliest and cruellest of all, while the second Crispy seems to have "healed" a little and is a step back towards Delgado behaviour (how much of the "healed" appearance is intentional and how much of it is due to the limitations of Beevers' makeup compared to Pratt's mask is unknown).
* Doctor Who is left standing when his or her player logs off and becomes an easy prey for the mantises. Oh, and Rose ends up becoming one of the PCs, the Doctor being forced to "play" her to the end.
* Doctor Who is moving through space despite the engines not running. Which is obviously impossible.
* Doctor Who is not going to feel good. (Of course, if you're not that kind of person, this may not be the kind of wiki for you either.)
* Doctor Who is not Space Opera in itself, some individual stories make use of the subgenere.
* Doctor Who isn't known for featuring music or TV shows of the day (with a few present-day exceptions), but in the serial "Remembrance of the Daleks" (set at the time that the very first Doctor Who story aired IRL), Ace leaves a room and the camera cuts to the next scene just as the TV announcer is introducing "a brand new science-fiction show called Doctor..." *click*
* Doctor Who is on record as describing the relationship between the Twelfth Doctor and Clara Oswald as "an old-fashioned romance". Love is unambiguous in their relationship, with Clara at one point even challenging the Doctor into action with the words "If you love me in any way, you'll come back" and revealing an intimate knowledge of the Doctor that most prior companions have not possessed. The Doctor has also expressed (in his own way) devotion to Clara. At one point (in the episode "Last Christmas") Clara directly states that the Doctor is the only man she'd imagine marrying. And the finale trilogy of Series 9 strips away any illusions that Clara and the Doctor aren't in love with each other (to the degree that the entire universe is threatened by it). Yet nothing sexual has ever been implied in the series, pushing against the trope that suggests love and romance (implied or direct) must involve sex. Instead, as shown several times in both Series 8 and 9, Clara and the Doctor substitute action (saving the world, being chased by Daleks, the adrenaline rush of near-death experiences) for physical intimacy.
* Doctor Who is on the hunt for a mushroom that tastes like meat, with the implication that it would eliminate the need for meat, and therefore meat-eating altogether.
* Doctor Who is on the tour and starts interacting with the regulars, looking for all the world like he might board the TARDIS and join them in their adventures. (He does, in a way, in that his actor plays a second character later in the story and becomes the next new companion.)
* Doctor Who is perfectly willing to go through with all this, whereas Delta is reluctant — aside from Billy's sacrifice, the transformation is not entirely safe, and, as the Doctor points out, even in his new form, inter-species breeding could result in "the most terrible mutations".
* Doctor Who is probably the live-action TV king of this trope, as the Doctor namedrops historical figures only slightly more often than they actually appear on screen. Hell, other people are even doing it for him now:
* Doctor Who is seen as this by John Smith, his temporary human self in "Human Nature/The Family of Blood".
* Doctor Who" is set in Cardiff, and features the TARDIS parked in front of a

recognizable Cardiff landmark with another in the background.
* Doctor Who" is set in New York City in November 1930, with the Daleks recruiting a labor force by abducting homeless from the Central Park Hooverville.
* Doctor Who is the head of the Torchwood Institute, an imperialist, speciesist secret organization that steals alien tech and wants to control the Earth. Despite this, Yvonne makes a point of knowing all of her underlings by name and has no objection to "secret" office romances.
* Doctor Who is the property of... actually, I don't even know any more."
* Doctor Who", is this to Magnus Greel, reminding him some things are not workable.
* Doctor Who, is used to drown out a young woman's screams, and is just catchy enough to stay in your head...
* Doctor Who is usually contending with low budgets and was, for much of its history, done for desperately small amounts of money. So this tends to come up a lot:
* Doctor Who: It’s easier for the Daleks to change the past than it is for anybody else, so the military is trying to create super-soldiers that can change the timeline as easily as the Daleks can.
* Doctor Who. It became a running gag that the Doctor would torpedo Jack to avoid the relationships between companions, ex companions, etc and Jack.
* Doctor Who, it demands that Rose command it; when she does, it chokes out a heartbreaking set of last words:
* Doctor Who. It doesn't work out, partially because the side effects of the act threaten to destroy the entire universe.
* Doctor Who it has in its possession. The book was recently translated, and all who worked on the translation killed themselves. As Cardinal Angelo notes, all of the translators were devout Catholics aware that suicide would be considered a mortal sin — and yet they did it anyway.
* Doctor Who it is explained, after many decades apparently, that 8-year-olds on Gallifrey must go to look into the heart of the Singularity that gives their people their power. Some turn and run and keep running (like The Doctor) while others go mad (like The Master).
* Doctor Who it is often difficult to tell for certain the level of the Doctor's feelings towards certain characters.
* Doctor Who it's defended by, they hightail it out of there immediately.
* Doctor Who, it's revealed that the TARDIS views the Doctor as this. She points out it's mutual, as she's his sentient starship/time machine (which he boosted from a Gallifreyan museum), but he hadn't thought about it in quite that way before:
* Doctor Who, it's revealed that the Wirrn larvae resulting from this conversion process will eventually pupate into even more dangerous adults. Worse still, this also marks the point when they cease to require oxygen - leaving the Doctor and the others in serious danger when the Wirrn switch off life support.
* Doctor Who, it would have succeeded in killing the Doctor. In its one appearance, it evokes the same fear from the Doctor that the Doctor usually inspires in other alien menaces, such as the Daleks.
* Doctor Who Jabe that he and Rose aren't married, she assumes that Rose is a prostitute. Rose is not amused.
* Doctor Who, Jackie Tyler does this to the recently-regenerated Doctor while trying to guess what he needs, and due to a nasty bout of regeneration sickness he can barely get a word in edgewise.
* Doctor Who, Jade has a map showing all of the strange spider activity occurring in Sheffield. The Doctor starts drawing lines connecting them and, when she's finished, she has what looks like a spiderweb with Robertson's hotel at the center.
* Doctor Who). Jo Grant responds by producing an impressive collection of skeleton keys (she was trained in espionage techniques, including escapology).
* Doctor Who: Just about all of the Doctor's companions, but especially Ian Chesterton and Barbara Wright in the original show, and Rose Tyler in the current revival. In those case we get introduced to the Doctor through their eyes, whereas in other companion introductions we already know the Doctor when we see him meet them.

* Doctor Who, just as the Doctor has convinced Grace that the only way to save the planet is to gain an atomic clock from somewhere, the news reports that one is being unveiled at a nearby university.
* Doctor Who K-9 what tennis is, and then, deciding it's not important, tells him to forget it. K-9 proceeds to erase all information about tennis from his data banks.
* Doctor Who", Karl is a tower crane operator who is afraid of heights. While a common fear, it makes it nearly impossible for him to do his job.
* Doctor Who", Karl, who operates a tower crane for a living, is — by his own admission — "not very good with heights".
* Doctor Who: Lady Cassandra is a villainous example. When she was younger, she took the lives of many of her lovers in order to get away with their money. When she possesses Rose in "New Earth", despite showing some differences of personality with her, she actually does fool The Doctor into thinking she really is her by giving him a passionate kiss and even helps him find out the secrets of the hospital before turning on him like in the classic, film Noir fashion.
* Doctor Who later admitted that he didn't know what the term actually meant, and had assumed it to be a longer ceremonial title of the US President.
* Doctor Who later doubles as the theme for Rose and the love theme for her and the Doctor.
* Doctor Who Later, in the Season 18 serial "State of Decay", the Doctor meets vampires who play the stereotype straight, though a more medieval version (fitting the setting) and without the accents.
* Doctor Who later said that Christopher Eccleston was only given a one-season contract because they genuinely had no idea if they would even get another season. Davies also told the crew that even if the revival failed, at least they'd have the DVD boxset to show for it. Sixteen years and twelve seasons later and it's still going.
* Doctor Who Later stories, however, seem to ignore this, with most people still refusing to believe in the existence of aliens.
* Doctor Who", Leela is sentenced to die in a public execution by steaming. The Controller is disappointed at the turnout. Dialogue indicates that public executions are a semi-regular occurrence on Pluto.
* Doctor Who: Leela. Who turns up to support Tom Baker's Doctor dressed in one-and-a-half chamois leathers held together with a bootlace.
* Doctor Who Legacy. This may have been an attempt to distinguish him visually more from the Tenth.
* Doctor Who" Lesterson soon becomes confused as to whether he actually did witness the Dalek factory, and the other colonists all decide that he's insane, refusing to take anything he says seriously.
* Doctor Who. Let's just say that 1200-odd years of constant victories of one man vs. the Universe has given him a bit of an ego, and he needs a human by his side to keep it in check.
* Doctor Who levels. Once Harry left and Sarah Jane was the sole companion, she returned closer to her original characterisation again, finding a kind of middle ground of badass and added romantic dimension (not to mention respectful treatment from her Doctor) that many fans feel is the most entertaining version of her character.
* Doctor Who-like show called "Dr. Spacetime and The Continuums" with the nerds.
* Doctor Who, Lorna Bucket reveals she only joined the Clerics, who want to kill the Doctor, so she could meet him again after being drawn into an adventure with him as a child.
* Doctor Who", made in 1984, was set in 2084, complete with a future cold war). However, there are exceptions.
* Doctor Who Magazine always inculdes a joke or odd statement buried in the print indicia. This is a tradition that has come and gone over the years depending on editorial whim. (On one occasion, after it had lain fallow for some time, it suddenly said "I don't know why you're looking down here, we haven't had a joke here for ages".)

* Doctor Who Magazine, and challenging others to identify which bits were genuine.
* Doctor Who Magazine and decides to stop lying to herself because of that. After which she immediately has a nice proper snog with Fey.
* Doctor Who Magazine, and had begun researching it in hopes of introducing regenerative capabilities on humans. Unfortunately, at that point in time the Master was actually possessing an alien creature, and only his strong will kept his body's urges and the influence of the other mind he consumed in line. The arrogant scientist who gained control of the project lacked the Master's will and experience with mind control, so he rapidly decayed into a lumbering mass of protoplasm, tormented by the dozens of minds he'd consumed, until the Doctor mercifully blew him up.
* Doctor Who Magazine, and information about a spin-off novel being released prior to a certain character's reveal (Ashildr) on the series, blowing the mystery of her identify after months of keeping it quiet.
* Doctor Who Magazine, and then mistook that for actually being in love.
* Doctor Who Magazine annuals of the seventies; aimed at very young kids, and apparently written by people who'd once had the series described to them). Amongst the features listed were "Where's Owen?"; "Gwen's Spacey Space Quiz"; and "Jack and Ianto's Stopwatch Game".
* Doctor Who Magazine arc about new villains the Threshold attacking the Doctor at different periods in his timeline, and climaxed with the death of Ace, clearly depicted as dying soon after "Survival", aggressively cutting the New Adventures out of the strip's continuity. The Threshold story then continued into the first major story arc of the Eighth Doctor comics, which began at that point. Trouble is, more recent writers can't resist throwing in continuity references to both the "New Adventures shared continuity" Seventh Doctor strips and the Eighth Doctor strips, despite their canon incompatibility.
* Doctor Who Magazine article referred to "the charming habit human colonists have in Terry Nation stories of naming planets after what's going to happen to them."
* Doctor Who Magazine, a ruthless bounty hunter is attempting to kill the Doctor on orders from an evil industrialist. Things backfire somewhat, and he accidentally succeeds in badly wounding himself and mortally wounding the Doctor's companion, Gus. Tears in his eyes and a murderous expression on his face, the Doctor picks up the bounty hunter's gun, shoots several times...and we then find that he simply shot the hunter's helmet, whose headphones were ironically playing "We'll Meet Again". However, this is then promptly subverted as the industrialist's slimy henchman visits the hunter in hospital, calmly trashes his life-support systems ("No loose ends"), and walks out as the hunter chokes his last.
* Doctor Who Magazine, as her creator, to provide a name. He came up with "Kenossium", derived from "Ken" + "ossium", the Latin word for "bones".
* Doctor Who Magazine, but then it was decided that the Ninth Doctor comics would be strictly tied into TV continuity.)
* Doctor Who Magazine comics series had Danny Fisher, an apparently heroic human space-secret-agent who was actually a sadistic, psychopathic speciesist who plotted to steal the Doctor's TARDIS and use it to spread a virus that would have killed every non-Terran lifeform in the universe, throughout history.
* Doctor Who Magazine comics, the Fourth Doctor encountered a guy called "The Collector," who captured people from different points in time and space to study them. He was otherwise an all-right kind of guy, though: "I know it's wrong to kidnap, but study keeps me sane."
* Doctor Who Magazine comic story "A Wing and a Prayer", the Doctor traps an alien insect in his fez and learns it's a police officer tracking another of its kind. When the Doctor encounters the other alien, and finds that it's managed to bulk up to about five times the size of a human, he says "I'm going to need a bigger fez".
* Doctor Who Magazine comic strip, in which a group of minor villains that the Doctor has previously defeated gather together in a deserted space-station to plan a final attack that will finish him once and for all. One of them dies horribly, and as the others begin dying one by one afterward, it seems (to them, anyway) as if the Doctor has infiltrated their midst in disguise and is picking them off one

by one. Finally, the last couple—paranoid that either one of them could be the Doctor in disguise—kill each other...and at that point, the Doctor arrives, not recognizing any of them. Turns out the first death was just an accident with a faulty machine and the other deaths were just everyone picking each other off out of sheer paranoia.
* Doctor Who Magazine comic strip once escaped an uncomfortable situation by claiming he wanted to go get some fresh air. Being a Cyberman (although a friendly and easygoing one), he left muttering to himself, "Brilliant excuse, Kroton… since when did you start breathing?"
* Doctor Who Magazine comic strip, the Threshold were first introduced during the mid-90s run of past Doctor strips, with Peri, Susan and Sarah Jane having run-ins with them, before they finally faced off against the Seventh Doctor in "Ground Zero".
* Doctor Who Magazine comic "The Blood of Azrael", the Doctor is sulking over having lost the TARDIS in the previous story, and refuses to engage with the problem, even though Clara is doing her best to help. Halfway through part two, they end up at a hospital where the Doctor gets roused enough to stop an alien child getting inappropriate treatment. The child gives him a hug and says "You're a good doctor", and the next panel has him bounding towards Clara, talking nineteen-to-the-dozen about their next move.
* Doctor Who Magazine, has the Doctor attempt to do something about this by taking a quiet moment to sort through his pockets and put everything into two piles: useful and useless. Inevitably, everything ends up in the useful pile, and he puts it all back into his pockets.
* Doctor Who Magazine. In 1995, the publishing rights for DWM were sold to Italian-based Panini (which continues to publish the magazine as of 2016), and the Marvel connections ended.
* Doctor Who Magazine: In "Bloodsport", a pair of alien hunters arrive on earth in search of sentient prey to hunt because the practice has been outlawed on their home world.
* Doctor Who Magazine: In "The Cornucopia Caper", the planet Cornucopia is ruled by an alliance of criminal guilds, each one responsible for a different area of criminal activity: thievery, kidnapping, blackmail, hijacking, etc.
* Doctor Who Magazine: In "The Parliament of Fear", the Doctor and Bass Reaves come charging in on horseback to the camp where Bill has been taken. Bass uses the a rifle to shoot the rope that is holding Bill trussed to a totem pole; while still mounted and at the gallop.
* Doctor Who Magazine: In "Welcome to Tickle Town", the Doctor and Clara arrive in the Tickle Town amusement park 300 hundred years in the future. Clara comments on the size of most the attendees, hoping that the entire human race doesn't evolve into size XXX-L. It turns out everyone is trapped in the park, unable to leave. "Lifers" are those who have given up hope, eat the munchies (laced with sedatives) and ride the rides all day, becoming obese blobs.
* Doctor Who Magazine in which a group of minor villains that the Doctor has previously defeated gather together in a deserted space-station to plan a final attack that will finish him once and for all. One of them dies horribly, and as the others begin dying one by one afterward, it seems (to them, anyway) as if the Doctor has infiltrated their midst in disguise and is picking them off one by one. Finally, the last couple — paranoid that either one of them could be the Doctor in disguise — kill each other... and at that point, the Doctor arrives, not recognising any of them. Turns out the first death was just an accident with a faulty machine and the other deaths were just everyone picking each other off out of sheer paranoia.
* Doctor Who Magazine is a bloodthirsty alien warlord who looks absolutely adorable. When around people who haven't heard of him he plays up his cuteness in order to manipulate them.
* Doctor Who Magazine, is in place to give them the fight they crave...
* Doctor Who Magazine issue 500 is a remake of its first issue's cover.
* Doctor Who Magazine issue cover was seen on one of the pages. The price "300

Euros" can be made out on the side.
* Doctor Who Magazine of Santa and a member of the Trickster's Brigade, and he looks like a black-bearded Santa in a colour-reversed white suit with red fur trimming.
* Doctor Who Magazine of sorts, as both characters were played by Timothy Craven.
* Doctor Who Magazine put it, what this means is that there are black people on Gallifrey, but none of them had done anything remotely interesting before. The new series has included more diversity amongst Gallifreyans.
* Doctor Who Magazine) remained in business for the more than a decade that the show was off the air, or what it found to publish in that time.
* Doctor Who Magazine Ruckford uses a cyanide pill to commit suicide when he is captured by the Paternoster Street Gang after they foil his attempt to blow up Buckingham Palace in "The Crystal Throne".
* Doctor Who Magazine strip "A Life of Matter and Death", the TARDIS manifests a mental projection of herself in the form of a veiled grey lady.
* Doctor Who Magazine strip gives us Josiah Dogbolter, head of intergalactic corporation Intra-Venus Inc., who attempts to buy the TARDIS from the Doctor.
* Doctor Who Magazine strip gives us Shayde, whose head is a featureless black sphere.
* Doctor Who Magazine summarized an imaginary scene of his Doctor shaving, getting dressed, pulling one of the Third Doctor's frilly shirts off the rack, looking at it for a second, and then tossing it to the floor in total disgust. Coincidentally, this is quite similar to a scene in the Target novelization of the Fourth Doctor's regeneration story, "Robot", where the Doctor has just woken up out of a post-regeneration coma to find UNIT has prepared a change of clothes for him ("a velvet jacket, checked trousers, and a frilly shirt") which he refuses to wear, commenting in his internal monologue that they are far too fancy — "What sort of a chap would go around dressed up like that?".
* Doctor Who Magazine, the Black Guardian creates an alternate timeline where the Doctor never left Gallifrey, meaning Earth has been invaded many times by various aliens. The 7th Doctor, while travelling back through his timestream to find the means to stop this, meets the 6th Doctor who wonders whether it is worthwhile leaving Gallifrey.
* Doctor Who Magazine the Doctor's faced, but there have been a few that fit this trope better, including several for strip-original characters, several for the Time Lords, one for Sarah Jane Smith and K9, one for K9 solo, one for young Amy and Rory, and one for the Paternoster Gang.
* Doctor Who Magazine. The first one is when and where Ian and Barbara arrive, and the answer is given in the following issue as "London, 1965!"
* Doctor Who Magazine, the tunic was indeed the same one worn by King Richard, which someone in Jaffa had ended up with, and then passed down over the generations, until Polo bought it on his own visit to the Holy Land. And Polo must have been provided with his Chinese robe by Kublai Khan, who is known to enjoy gambling over a game of backgammon, and therefore could easily have subsequently lost it to the ultimate gamesman.
* Doctor Who Magazine: Tickle Town in "Welcome to Tickle Town". Founder Tobias Tickle thought a nuclear war was inevitable and so sealed off his amusement park on its opening day - trapping the patrons - and teleported it deep underground. However, the war never happened.
* Doctor Who Magazine to turn up as the final villain in the Twelfth Doctor's "Seventies Earth vacation" arc, let alone get killed off at the end of it.
* Doctor Who Magazine) until you try to leave, and the holomatronic cartoon characters stop you. If you persist, you're put on a horrifying ride that supposedly shows you how terrible the world outside is, to a parody of "It's a Small World After All":
* Doctor Who Magazine". When Medok first tries to tell the Pilot about the strange crab-like giant insects, and the Pilot snaps "There is no such thing as the Macra!", a confused Medok replies "They're called the Macra!?"
* Doctor Who Magazine. White? Check. Rounded, streamlined surfaces? Check. Glowy

blue bits? Check.
* Doctor Who", Magnus Greel is a disfigured genius dwelling the cellars of a theatre; his mangled face concealed by a mask. Occasional sightings of him by the theatre staff give rise to a belief that the theatre is haunted.
* Doctor Who", mainly because he hadn't gotten used to his new body so soon after regenerating.
* Doctor Who, maintaining the spookiness factor, and then we see him looking confused and clutching his shroud tightly around himself and flinching when the morgue attendant screams and faints when he sees him.
* Doctor Who) makes much of it seem quite redundant. This becomes especially true for the five interstadial episodes between seasons three and four, as all of them are recaps; the fact that one of them focuses on the fairly recent Souther arc just adds to the repetitiveness.
* Doctor Who, Manish, the youngest of three brothers, who became radicalized while his two older brothers were fighting in World War II, says he wishes Prem, the brother who survived, had died instead of the oldest one, Kunal, because Manish thinks that Kunal would have taken his side over his hatred of Prem marrying a Muslim woman.
* Doctor Who: many incarnations of the Doctor are fond of prestidigitation and stage tricks, even comparatively serious ones like Three. And he's been called a wizard by countless cultures through time and space. His only "magic" may come from advanced technology and his wits, but that still proves more effective than the real deal sometimes.
* Doctor Who Many of the present-day events from earlier in the season and the previous season are revisited with very different outcomes, usually involving a much higher body count.
* Doctor Who, many of which are apparently past incarnations of it that came with each regeneration. The swimming pool was also seen in the Fourth Doctor's era, when the Doctor and co are chased through the ship by Sontarans.
* Doctor Who, Martha does this to ensure the Master finds her, making sure the mole knows where she intends to stop for the night on her journey.
* Doctor Who, Martha gets kissed by the Doctor. It's for plot reasons (he has to transfer some of his DNA to throw off the aliens chasing him) but she does develop a crush on the Doctor...
* Doctor Who, Martha Jones confesses her love for the Doctor twice. The first time is in "The Family of Blood" to an amnesiac version of himself:
* Doctor Who, Martha Jones is separated from the Doctor and Donna by a tunnel collapse near the beginning of the episode and meets up with them again near the end.
* Doctor Who — and not about his own sexual exploits, but those of Rory and Amy. You'd think after nine-hundred-odd years he'd know about it, and he certainly seems to understand the general idea, but it sure takes him a long time to realise what Madame Vastra is talking about.
* Doctor Who — but especially Four — the Doctor does an awful lot of running. It eventually gets lampshaded by the Companions who are forced to run along with him. "There's an awful lot of running involved."
* Doctor Who"—the Doctor and his companions find themselves trapped on a planet along with the beautiful female Drahvins and the hideous Rills.
* Doctor Who — they had just learned that it was significant information.
* Doctor Who, meaning all the surgeon does is cut the cord that attaches the external brain to the internal brain. Since the external brain contains an Ood's memory, emotions, and individuality, removing it turns the Ood into a docile, mindless slave. To make the Ood even more docile, the slavers also created a force field to cut off the Ood's mental access to the gigantic disembodied brain that would otherwise link them together in a psychic network.
* Doctor Who means that Blackwood Falls has some serious Lovecraftian goings on. Bonus points for taking place around Halloween.
* Doctor Who Meets Scratchman. But the only person he finds is a nasty, suspicious postmistress, who won't listen to him. So he uses the phone box outside to call his

companions at the church, and "remind" them that this safe haven is only for VIPs, secure in the knowledge the postmistress will be listening in, and will shortly be rallying the villagers to march on the church and demand entry.
* Doctor Who Meets Scratchman, the Doctor thinks the hell dimension looks like a quarry, and calls Uxarieus a "chalk-pit of a world".
* Doctor Who", Mel and Ace play this when bored, in an ice cavern. The word of course is "ice". By the time the Doctor returns, Ace has spotted something beginning with 'M'. We don't find out what it is, but it's probably "more ice" (or possibly "Mel").
* Doctor Who. Menaces such as the Slitheen, the Daleks, the Cybermen, the Master, etc. are constantly trying to bring about the end of the world.
* Doctor Who. Mickey sums it up: "It's like Stephen Hawking meets the speaking clock."
* Doctor Who mid-series finale, Rory can be seen dual-wielding a gladius and pulse pistol combo.
* Doctor Who Missing Adventures, as a semi-standard military tactic used to cripple starships (e.g., by teleporting someone or something into the location where a ship's pilot is sitting) without actually damaging the ship itself — and yes, the technique was actually referred to as "telefragging".
* Doctor Who Missing Adventures as a source of suckers who would bail him out when he finally got himself into real trouble.
* Doctor Who Missing Adventures, a soap that saves its budget by being mostly set in and around a TV studio...
* Doctor Who Missing Adventures disarming them. Which means the bombs are live when sent to their target.
* Doctor Who Missing Adventures features a race of alien cyborgs from a planet where an AI took over. When the Doctor attempts to appeal to their buried human natures, their leader explains that they don't have any: they're not people with robot bits grafted on to keep them in line, they're robots with people bits grafted on to gain advantages they couldn't get with fully mechanical bodies.
* Doctor Who Missing Adventures, it's revealed that the parallel Earth the Doctor and Peri have spent the book exploring was created when, during a visit to Ptolemaic Egypt, the Rani bullied a cosmic entity into copying the TARDIS console. Due to her terrible wording, the entity didn't stop with the console, but a large portion of its surroundings — i.e., Earth.
* Doctor Who Missing Adventures, it turns out the Venusians have a particular variant, both horridly grisly and somewhat heartwarming - in funerals, it's customary to serve the deceased's brain as part of the funeral food. This is because the Venusians have the ability to acquire others' memories by consuming their brains, though as Barbara discovers when she accidentally samples the food, it can overwhelm humans to the point of actually reliving the consumed memories.
* Doctor Who Missing Adventures on the JNT era (except Roberts says it wasn't), or possibly pre-emptive Semi-Canon Discontinuity on the upcoming BBC Books.
* Doctor Who Missing Adventures. The book ends as he pulls the switch.
* Doctor Who Missing Adventures: the Doctor is taken to a quarry, and compares it to the landscapes of Gallifrey and Skaro.
* Doctor Who Missing Adventures the Venusians have a lot of odd biology, including five tentacle-like arms and five tentacle-like legs.
* Doctor Who: Monarch, the Urbankan from "Four to Doomsday". He keeps normal frogs and has two android servants made to look like Urbankans.
* Doctor Who monsters (and the Cyberons) are fought by Sylvester McCoy as ... the Chiropodist.
* Doctor Who monsters, the Big Two remained exceptions. They never attempted fake-Daleks, but the Cyberons are, well, Cybermen.
* Doctor Who more blatant and (after a few dozen books) turned into snogging, naughty dreams, and Fitz' inner monologues about how he wanted to get laid by the Doctor.
* Doctor Who, more plain-looking, the Doctor is still surprised when he turns out to be the beautiful Amy's fiancé, and not a much more attractive man he'd

already met. Rory is clearly insecure about the appearance gap in their relationship. Several times, it appears that Amy gets cold feet about their impending marriage and seems to transfer her affections onto others, but she really does love him above all.
* Doctor Who. More transparent examples of this have occasionally caused controversy and dips in the show's quality:
* Doctor Who", Morgaine initially regards the people of Earth as insignificant savages, but upgrades them to honorable opponents after encountering a memorial to the dead of the World Wars. When Brigadier Lethbridge-Stewart happens along she and her men are paying tribute to the dead, she invites him to take part and then lets him go unmolested rather than break the moment with fresh fighting.
* Doctor Who, most overtly in "Carnival of Monsters" and "The Two Doctors".
* Doctor Who, most states that have the name of Empire are antagonistic. For instance, the Dalek Empire seeks to exterminate all life besides the Daleks, while the Sontaran Empire is a militaristic race of clones whose whole society depends on waging perpetual war. However the Draconian Empire, a vast spacefaring feudal civilisation with a society stratifed along class and gender lines, can be honorable and reasonable in its dealings with others. The portrayal of the Earth Empire varies.
* Doctor Who: Most viewers nowadays are more likely to have seen the 2005 relaunch than the original series. Memories of the Classic Series are dominated by the third and fourth Doctor eras, when the show was at the height of its popularity. (With the Third Doctor era onward the program also shifted to color and was fully preserved in the archives, unlike the first two eras.)
* Doctor Who movies, as floors and ceilings aboard the Death Star, the Millennium Falcon, Vader's Star Destroyer, Cloud City, the Endor Bunker and many other places.
* Doctor Who, much of the Last Great Time War between the Time Lords and the Daleks has only been explained through dialogue by the Doctor himself. However, we do have a definite shocking defeat that was said on the show: the Fall of the Cruciform, which was so shocking that it made the Master himself flee to the end of the universe.
* Doctor Who muggles. Anyone who's smart or brave can help the world. This is why 90% of the Doctor's companions are otherwise normal people whose meeting and travels with the Time Lord lets them achieve extraordinary things, even after they've parted company. On the whole, there are far less muggles, in the sense of people with no-idea what's going on, after the masquerade officially broke. Now aliens existing is just a fact of life for planet Earth.
* Doctor Who murder mystery, steampunk, disaster film and horror, all mixed with sci-fi and fantasy fairy-tale elements.
* Doctor Who, named Mr. Dread, Mr. Fear, Mr. Terror and Mr. Apprehension.
* Doctor Who, Nancy carries around a burlap sack to hold the food she's stolen from peoples' houses while they're hiding in their bomb shelters.
* Doctor Who nearly crashing into present day London and two different versions of the Loch Ness Monster.
* Doctor Who New Adventures all of extremely unusual shape. Possibly the most normal is Prometheus, a desert planet shaped like a large bowl. The water world Elysium is actually a globe, but it's also a vast blob of water with no actual planet beneath it. Aneas is a jungle planet shaped like a giant tree, and Reklon is an ice planet shaped like a snowman, complete with pipe and silly hat.
* Doctor Who New Adventures and sex simply isn't part of their culture.
* Doctor Who New Adventures and the museum curator is an elderly eccentric. And there's apparently no mention of the Doctor's involvement either.
* Doctor Who New Adventures another police officer, and various quirks it displayed through the novel were attempts by this personality to communicate beyond the limited repertoire of gun-related information the gun's systems were designed to permit.
* Doctor Who New Adventures based on jokes, but makes it clear that it's not funny if it actually happens to you.
* Doctor Who New Adventures Benny Summerfield wakes up with a hangover and declares

"Y'know, I'm positive there was alcohol in that scotch last night."
* Doctor Who New Adventures books, Ace (the companion from the eighties) steals Bernice's (archaeologist from the future, specializing in the late 20th century) notebook and spends the day laughing herself silly.
* Doctor Who New Adventures cartoons that used the words "Apollonian" and "Dionysian" 327 times, pointed out the significance of the supposedly primitive wolf being the tool user, and portrayed Sam as the unwitting dupe of a culture that killed and killed again, hypocritically "defending" its victims from outsiders, before concluding that everything ended in misery and death and she was glad she didn't have a boyfriend or girlfriend because they were all wilfully uninterested in the important truths behind these so-called jokes.
* Doctor Who New Adventures Cats Cradle Times Crucible, a prototype Gallifreyan time capsule is powered by the psychic energies of its crew. "Battery" is an official title of one of the crew.
* Doctor Who New Adventures crossword in the Silent Room of the Diogenes Club (the crossword hasn't been invented yet, but he's got a newspaper from the future). The Seventh Doctor holds up a sign with one of the answers on it, causing Third to exclaim in annoyance and be ejected.
* Doctor Who New Adventures discovering his plan, but not only has he forgotten the plan, he's also forgotten what the mnemonic trigger that would restore it was. He tells her "I've completely lost my marbles", and she remembers that earlier, he gave her a bag of marbles...
* Doctor Who New Adventures expanded and changed quite a bit and made it into his first novel.
* Doctor Who New Adventures features gynoids. What makes them "female" is not simply that they have a female form; according to the novel, an android is "male" because it was built to fulfil a purpose, while gynoids simply are.
* Doctor Who New Adventures he's visiting, so they aren't tempted to reverse-engineer it.
* Doctor Who New Adventures. His motivation is largely that he's fed up with belonging to a species that nobody takes seriously; the Navarinos are seen as so harmless that the Time Lords never even bothered to stop them having time travel.
* Doctor Who New Adventures in "Blood Heat", the Silurians are doing this since emerging from hibernation. They've brought back extinct plants and animals which now coexist alongside their modern counterparts in new ecosystems, mutated fruit which is inedible to humans grows now, they're heating up certain parts of the planet, and they're converting deserts into rainforests. Unusually for this trope, the Silurians aren't introducing an alien ecosystem to Earth but rather are reverting the landscape partly to what it was like in prehistoric times, although the conditions are still very much hostile to humans.
* Doctor Who New Adventures. Includes a few "that's not how I remember it happening" moments, as well as letting the author state that "Sherlock Holmes" and "John Watson" are pseudonyms invented to protect the privacy of the real Holmes and Watson without having to say what their real names were.
* Doctor Who New Adventures in India, and picks her up again two months later:
* Doctor Who New Adventures, in which the Doctor and another character play a game of Scrabble in which every word is significant—and the Doctor immediately points to this as a sign that their actions are being controlled by an outside force. Especially when his opponent makes an impossible move and the Doctor points out the continuity error.
* Doctor Who New Adventures is a rather Christianity-like faith, preaching peace and humility, and with a monastic structure (although mixed gender and without the celibacy). When the Doctor points out that the real Osirian Horus was arrogant and vengeful, and wouldn't have said any of the aphorisms the Order attribute to him, the Abbot replies that he knows that, but that doesn't make the aphorisms themselves wrong.
* Doctor Who New Adventures, is largely set in a New Age bookshop/café called The Pyramid.)
* Doctor Who New Adventures is not only black but comes from a family very proud of

their pure African heritage. But it appears that society is on its way to this, more or less.
* Doctor Who New Adventures it will be located on an asteroid as part of the Braxiatel Collection, which stores texts for which many worlds are not ready. In principle, it's an aversion of the usual some-things-man-should-not-know corollary: the founder believed that all knowledge is useful if handled carefully, and potential researchers are vetted very carefully before being offered access to the collection. (The Doctor, of course, holds the first ticket the Library ever issued.) In practice, though, pretty much every time it's appeared in a story it's because somebody's found a way to use information from the Library to cause trouble.
* Doctor Who New Adventures mostly consists of arriving at historically significant locations just as a mysterious blue box is dematerialising.
* Doctor Who New Adventures novels claimed that Time Lords have lost their ability to reproduce naturally, so new Time Lords are made by genetic engineering and emerge fully-grown. This doesn't seem to have held in the TV series.
* Doctor Who New Adventures novel "So Vile a Sin", many iconic animal species are extinct. Specific mention is made of a project to resurrect the African elephant through genetic engineering.
* Doctor Who New Adventures novels suggest that Time Lords are all sterile and are "born" from a "Loom", a machine in their giant sentient semi-organic family Houses. Each Loom weaves Family members according to a common template, ensuring that they're related; every Family member is a genetically a cousin to each other.
* Doctor Who New Adventures novels, which continued to tell similar sci-fi adventure stories using characters and worldbuilding elements that had been created for the New Adventures (and which Virgin consequently retained rights to) or which could be licensed separately from the writers that had created them.
* Doctor Who New Adventures, of course, with the Stunnel as a scaled-up version of the Channel Tunnel.
* Doctor Who New Adventures, published in 1997 but set in 2003, features Iran and Iraq soldiers competing to acquire an alien artifact. No one could have foreseen that in 2003 Iraq would be occupied by the US-led coalition.
* Doctor Who New Adventures rule — is "No-one deserves to be sacrificed".
* Doctor Who New Adventures spin-off novels, the companions Chris Cwej and Roz Forrester have no appendices. They're from the 30th Century.
* Doctor Who New Adventures splits them up so that Benny will be single as a main character.
* Doctor Who New Adventures's story ended up getting contradicted by later TV episodes.
* Doctor Who New Adventures that one person was killed in an accidental fire when he was somewhere else.
* Doctor Who New Adventures: The Doctor and Benny instigate a headbutt of love mutually in "SLEEPY" during a point where they're both busy worrying about each other, and it's almost too adorable for words.
* Doctor Who New Adventures, the Doctor comments that Earth is special because he has been to countless other planets, and most of them look like gravel pits.
* Doctor Who New Adventures, the Doctor — five minutes above London, downward bound and accelerating — builds a parachute out of a helium tank and the contents of his pockets.
* Doctor Who New Adventures, the Doctor's cousin Innocet has resolved not to cut her hair until she sees daylight again. This results in her having to walk about with 673 years' worth of hair in a colossal plait.
* Doctor Who New Adventures the Monk from the television series had served as Death's Companion in the New Adventures.
* Doctor Who New Adventures the same place at the same time. They ended up merged together. And so did everyone on board.
* Doctor Who New Adventures the same time period, and cynical twentysomething mercenary Ace rejoins the TARDIS crew.
* Doctor Who New Adventures, the Seventh Doctor finds himself in a universe where

Earth is ruled by Earth Reptiles, and learns it all started when the Third Doctor was killed during "Doctor Who and the Silurians".
* Doctor Who New Adventures, the villain is an immortal searching for the TARDIS. At various points in time he was Thomas the Rhymer, John Dee and the Count of Cagliostro.
* Doctor Who New Adventures, Time Lords are constructed by machines and so lack navels. The Doctor is an exception.
* Doctor Who New Adventures to the Time Lords, spun off into its own sub-universe of audio plays, comics and novels. They began in novels.
* Doctor Who New Adventures Transit that extends through hyperspace and has stops on every planet in the solar system. Partway through the novel, the protagonists learn that the system has become so complex that it's developed sapience.
* Doctor Who New Adventures, when Benny wants a drink to fortify her against the cold, the Doctor offers her something called Bartle and Critchlowe's Patented And Very Efficacious Horse Oil Lineament, made from genuine horses. She declines.
* Doctor Who New Adventures, wherein it is revealed that among the many sobriquets that the Doctor has picked up throughout his many years of travelling is "The Man Who Gives Monsters Nightmares". Let's just say that there's a reason.
* Doctor Who New Adventures, which even replaced the usual blurb with:
* Doctor Who New Adventures, while not being as physically active as his older counterpart, is often described as having an uncanny strength, and the grip of a bear, when need be. He's 5'6" and of a small build.
* Doctor Who New Adventures who has built a telepathic AI insists that neural nets are completely unnecessary. Apparently one of his rivals tried to create an intelligent computer by hooking a cat's brain to a mainframe, and got "a computer that wants to play with string and sit on your newspaper".
* Doctor Who New Adventures who just doesn't seem to "get" sex and romance as concepts.)
* Doctor Who New Adventures would call "reality" as a whole — is an artificial construct created by the Seven Founders to make sense of physics.
* Doctor Who New Adventures you), and strongly imply that the same applies to the Doctor himself.
* Doctor Who, no strings attached. Director's commentary is "It was in, it was out, it was in, it was out."
* Doctor Who. Notably, they have the exact same shape every time they appear. As is usually the case with the show, the most recognisable feature of the season again acts as foreshadowing.
* Doctor Who novel). Also, the anthology collections A Universe of Terrors and Tales of Terror.
* Doctor Who Novelisations", a scientist uses this excuse to keep quiet about the Silurians, rather than go public and find his place in history obscured by journalists and politicians, by mentioning the controversy over who invented the radio (it wasn't Marconi).
* Doctor Who Novelisations for the purpose of a scene which called for the Doctor to observe him setting a bomb—the audience had to know the character was Butler, but the Doctor hadn't met him yet and didn't know who he was. Giving him a scar gave him something striking that the Doctor could describe him by.
* Doctor Who Novelisations of the trade dress, but with the Wittaker logo.
* Doctor Who Novelisations). Target's official numbering order wasn't much help; it listed the first 73 novelisations in alphabetical order (that is, all the ones up until the institution of the numbering system), then all subsequent releases in intended release order, which didn't always work out as planned.
* Doctor Who Novelisations that she sees McGillop as anything other than a work colleague, while at the same time assuming that his complimenting her intelligence is probably sarcastic in some way she hasn't worked out. Then she's given a snippet of his memory and learns that he thinks of her as a princess (and keeps looking at her bottom). Her reaction to this is to get over her crush because he hasn't seen her for who she really is at all.
* Doctor Who Novelisations", the potion the Sisterhood of Karn gave Eighth was

actually lemonade and dry ice.
* Doctor Who novels had an open submissions policy, meaning that anybody could submit a novel proposal. As a result the vast majority of books before the series came back were written by fans.
* Doctor Who novels involves a time-misplaced Neanderthal. The Doctor and Rose abandon Jack Harkness with him in Essex to teach him how to live in the present while they go to have adventures in his time. He ends up marrying a girl who's considered ugly by human standards and living happily ever after.
* Doctor Who novels. The Sixth Doctor, when confronted with a choice between fending off the villains with rifles or frocks, sides with frocks. The Doctor will always win in the most outlandish, silly way possible, because the alternative would be to resort to violence, which is against the franchise's philosophy.
* Doctor Who novel. The character is mentioned as having fought in a war and been good at it, but came home to peace and found himself unable to adjust. He ends up betraying the heroes at a critical moment.
* Doctor Who of Doctor Who, Marvel Comics are entirely fictional in the Whoniverse.
* Doctor Who of him discussing the main, defining Character Tic of each Doctor for the amusement of David Tennant. (In his words, and in order starting with the Second Doctor and skipping the Eighth: "a scowl", "very sharp" mannerisms, "eyes and teeth and the alien-ness", "hands in his pockets, must dash!!", "tends to enunciate... Hmm! Howveryinteresting!! Mmm!", "fingers and thumbs", "with his swagger and the jacket on", "another kind of eyes and teeth".)
* Doctor Who (of Rassilon) made sure (until clarity [of Rassilon] became compromised) that every trope (of Rassilon) was a Trope of Rassilon. Now the tradition (of Rassilon) and gag (of Rassilon) has been moved to the article (of Rassilon).
* Doctor Who often lists double entendres for each story. Many of them betray a dirty, dirty mind:
* Doctor Who of the universe has been disintegrated, meaning that the Master's single biggest atrocity (if not the biggest by anyone, ever) ended up being caused entirely by accident.
* Doctor Who of the universe, this should actually make you worry a bit, as it can blow up spectacularly in his face. And, everybody else's. Still... he does manage to gaffer-tape up the worst of any mess you stick him near in imaginative, and often, innovative ways. Even if he caused the mess in the first place.
* Doctor Who of which one race, Chelonians, have been mentioned in the new series...
* Doctor Who on a number of worlds to make sure that no-one believes he really exists.
* Doctor Who: On a whole, the show is able to avoid this trope thanks to having a ship which teleports and time-travels.
* Doctor Who) once again became popular around the world during David Cameron's premiership, particularly among young Americans (with quintessentially British words such as "posh" and "queue" briefly entering the American lexicon during the early-middle years of the decade), although this seemed to vanish as Britain's general fortunes tanked after the 2016 Brexit referendum.
* Doctor Who, once placed second in a K-9 sound-alike contest he entered under an assumed name.
* Doctor Who once you've read it. Reading ahead would seal their fate, with no way to know if it would be for better or for worse. As a balance between the two, they read the chapter headings.
* Doctor Who. One of his hearts was a link to Gallifrey, which he'd destroyed in "The Ancestor Cell" (different Time War—this one was against Faction Paradox).
* Doctor Who, one of the candidates-in-waiting for the Presidency, and he turns out to be the real assassin.
* Doctor Who one unless he knows he's going to need one) and Leela to a key part of the Doctor's characterization:
* Doctor Who: On first glance the Sontarans' weapons look like the sort of sleek,

futuristic weapons you would expect them to have. Except if you play laser tag, you'll recognize the "gun" when it gets a close up . . .
* Doctor Who; only on two occasions has he been shown without a companion or a companion surrogate for an extended period of time, and in both cases, it resulted in a more unhinged and dangerous Doctor.
* Doctor Who (on New Earth). In the "fast lane" you can reach speeds of up to thirty miles per hour! (Usually taking six years to get to Brooklyn from Queens!) However, this comes with a risk: the potential of being sliced and mauled by the Macra. What's even scarier is that you only really get to see these claws above the fumes.
* Doctor Who on reality, meaning the Cracks never existed and the Gendercide of the Saturnynians never happened.
* Doctor Who on their own shows but, as soon as they're thrown into an alternate timeline, the writers can't help but kill off those entire casts.
* Doctor Who on them, grabbing the gun of a downed one and running out to attack, shooting three of them... only for the three robots to stand right back up again, and Ryan realizes he doesn't know how to reload, sending him running back for cover. The Doctor is none too impressed.
* Doctor Who. On the other hand, some of the villains can be genuinely scary even to adults.
* Doctor Who on the run from the Time Agency that she used to work for.
* Doctor Who on the side of the angels and saves the day, in the classic series at least he generally tends to get a bit more respect and gratitude.
* Doctor Who" opens with Lilith being serenaded from her balcony by a lute-playing swain on the street. She beckons him in, where she and her witch accomplices proceed to feast on him.
* Doctor Who, or Pete's World from "Rise of the Cybermen"/"The Age of Steel"; post-the Last Great Time War, it's potentially multiverse-destabilising for a TARDIS to hop between such universes. There are also pocket dimensions linked to the main universe, such as E-Space or the Land of Fiction.
* Doctor Who, out of curiosity, pushed a button which he found out too late activated an emergency shower. Capaldi claims he thought it was a door-opener.
* Doctor Who, outside of some story-needed idiots, seeing as grannies know who Torchwood are). Entire episodes, season endings, and even seasons, are all tied around his past, and there's plenty of angst regarding the source of his immortality.
* Doctor Who overestimating the value of secretaries as the world goes to hell.
* Doctor Whooves – The Series and Renaissance artist Leonard DiHoovsie fall in love.
* Doctor Whooves – The Series to wrap up the cliffhanger and current story arc. Loyal returned to working on them in 2021.
* Doctor Whooves Adventures, during the ending credits, usually for the humorous asides and general funnyness.
* Doctor Whooves and Assistant. For example, while the mane cast was heading off to fight Nightmare Moon, the Doctor and Ditzy went that way before them and fought the Manticore first. The mane cast is seen at some points, but only from the view of the Doctor and Ditzy.
* Doctor Who. Particularly of note is the Doctor's home world of Gallifrey, and the species seen in "Voyage of the Damned"; for a group coming to visit Earth's "strange and foreign culture" they certainly seemed like the British upper class. The original series is rich in examples of cultures who are impossible to distinguish from humans but don't appear to be actually descended from Earthlings.
* Doctor Who performed the stunt where Captain Jack runs and jumps onto the TARDIS on his birthday.
* Doctor Who" period when what had until then been fairly tame titles suddenly had 'of Evil', 'of Doom', 'of Death', 'of Blood', 'of Terror', etcetera appended to everything, with the most laughably redundant title being "The Deadly Assassin".
* Doctor Who: Physical trauma (especially post-regenerative stress) often causes the Doctor to get mixed up and refer to former companions and adventures.

* Doctor Who pinball game has the player "collecting" (so to speak) the seven Doctors. It may not have been intentional, since there were only seven of them when the game was made in 1992, but it still counts.
* Doctor Who pinball got custom speech from Sylvester McCoy (the seventh Doctor, incumbent at the time of its release) and Anthony Ainley (The Master).
* Doctor Who plan actually working. He tells her that 74,384,338 is his lucky number. (The plan works, of course.)
* Doctor Who Player service and was only available on BBC First up until three weeks later, with little cuts here and there. This was not the fault of the BBC, as Malaysia and Singapore have blue-nosed censorship boards that have very strict codes on the portrayal of LGBT characters on TV and in cinemas, but are more relaxed with online streaming services.
* Doctor Who plot. And the claim about four Daleks being deadlier than five million Cybermen isn't an exaggeration, either.
* Doctor Who plot. In the next episode the same thing happens, and of course this time the Doctor gets it right, restoring Jamie's original appearance.
* Doctor Who plot is solved, and no one will remember a thing. Which doesn't stop the War Doctor from trying to save Cinder regardless.)
* Doctor Who plots here and there. The basic premise of the show remains the same, but actors switch out.
* Doctor Who" plots. The only existing episode was part 3, a slow middle episode and one which didn't give an accurate picture of the entire serial. But that was all fans had to go on. Now, with all six episodes recovered, there has been a major fan reevaluation, and the story is considered fresh for its time in integrating political intrigue with Doctor Who.
* Doctor Who points in time; history "wants" these mysteries to remain unsolved, and the timeline is therefore extremely mutable around them, just as long as they happen.
* Doctor Who police box, the last of its kind to be removed in Britain.
* Doctor Who", pop star Nicky Newman is revealed to have had a tiny bomb slipped to him, disguised as an asprin, but capable of going off with enough force to blow up an entire space station; the Doctor and Mel have to render Nicky unconscious and stop him performing in the Intergalactic Song Contest in case his stage fright causes enough internal shifts to set the bomb off.
* Doctor Who", possess very low-level psychic abilities, allowing her to occasionally see glimpses of the future. Her powers are not advanced enough to be used proactively and mostly exist outside her control. However, she is able to use them to win ten pounds on the lottery, specifically every single lottery she enters. She and her husband play twice a week.
* Doctor Who. Possible justification, as her race ("From the Forest of Cheem, we have... trees!"), may be half-human (one of the "mongrels" referred to by Lady Cassandra). The only stated fact of their evolution is that they are descendants of tropical rainforests transplanted from Earth five billion years earlier.
* Doctor Who. Possibly in the spirit of equal opportunity, they also put Arthur Darvill back in his Roman Soldier get-up. Why? Um, they were in the honeymoon suite...
* Doctor Who. "Power of the Daleks" shows them posing as workers (specifically, miners, whose left-wing union activities were hugely significant in 1960s-70s Britain), and "Day of the Daleks" shows them running Stalinist gulags and state factories.
* Doctor Who. Prior to the end of the Last Great Time War, nothing has been able to breach even two sky trenches. Then a large Dalek force manages to break through all 400 sky trenches over Arcadia and ravages the city. On the other hand, despite having fewer sky trenches, the Capitol's defenses are never breached.
* Doctor Who prison governor deliver a list of The Doctor's known outstanding crimes to Martha.
* Doctor Who professional time-travelers who make sure that the timeline doesn't get too screwed-up.
* Doctor Who promotion for Walls' Sky Ray ice lollies meant you got printed cards

featuring stories about the Doctor on them. The company didn't have the rights to use the likenesses of either of the actors who had played the character at that point, and so the artwork featured a Doctor based on a fusion between William Hartnell and Patrick Troughton.
* Doctor Who provides an age-gap version of this trope all by itself; there are passionate fans of the series who either had (or continue to have) no idea that there was a show before 2005 and/or have no interest in watching any of the old series.
* Doctor Who", PR rep Solana claims this is the case with the abusive treatment of the enslaved Ood.
* Doctor Who, Psi is an "augmented human" with visible computer chips embedded in his head, recruited for a bank heist due to his hacking skills.
* Doctor Who: Pting are a small bipedal species. Although vicious, they are strictly non-carnivorous and cannot consume organic matter. They can consume, however, any inorganic material, including the Thirteenth Doctor's sonic screwdriver, which makes it virtually impossible to contain or confine them.
* Doctor Who" pursue prey from their own swampland habitat to the Miniscope's interior circuitry, the interior of the Earth habitat's ship, and all the way out of the Miniscope's compression field.
* Doctor Who put it, the one constant of the show is the triumph of "intellect and romance over brute force and cynicism".
* Doctor Who puts it best: "Everything can't be all right in a society where everyone's either a god, a slave, or an assassin."
* Doctor Who Putta that 'she loves you'. Putta is ecstatic until it adds 'she loves the Doctor'.
* Doctor Who quickly, leaving a flat and a luxury hotel covered in webs.
* Doctor Who. Quoth Castellan Spandrell (basically a police commissioner):
* Doctor Who, ranges through the entirety of time and space. After 50+ years of stories, that's a lot of sci-fi ideas - you've got high-tech military forces battling witches and ancient astral demons, mixed in with genocidal robots and sentient nano swarms.
* Doctor Who: Rassilon was able to harness the power of a Black Hole in an "Eye of Harmony", which sits under the Panopticon in the center of the Time Lord Citadel.
* Doctor Who reading "The 1980s called. They said you can keep their bloody title card."
* Doctor Who, really doesn't need to worry about food, shelter, or expenses.
* Doctor Who real you generally just know - so the pinching is unnecessary.
* Doctor Who recording a commercial for a company named Symphony Furniture. The seven-minute recording features Tom berating the other poor individuals in the studio without mercy, saying (among other hilarious quips) that the commercial should've been marketed as a sleep aid, read like a translation from early Serbo-Croat (or "fucking Albanian"), seemed to have been written by a "fucking infant teacher," and was powerful enough in its sheer emotion to give him an erection.
* Doctor Who referred to this as the James Kirk School of Computer Repair. (With explanations that, in this case, it won't work.)
* Doctor Who refers to the Doctor as the "handsome hero" in comparison to Rory. Later, however, the TARDIS refers to Rory as "the pretty one," to the Doctor's shock. Amy also calls him "the most beautiful man in the world," though she seems to be talking about him as a person.
* Doctor Who refer to damn near everything they own as a "Cyber[XXXX]".
* Doctor Who, regards Doc Holliday as a barbarian. When Holliday offers him liquid anesthetic:
* Doctor Who Regenerated, really wants to meet Howard Carter, but when she gets the chance, he's seventeen and dorky. Not that she has a problem with it.
* Doctor Who returning to TV and was in fact intended as a long-term replacement. When the TV revival was announced, all future animations featuring the so-called "Shalka Doctor" were cancelled.)
* Doctor Who: Return to Earth, Asylum are "people who hate games, sci-fi, and everything decent about humanity". Ouch.

* Doctor Who reveals that the main "baby actors" in the episode are female twins.
* Doctor Who Revival Series 2 episode "The Idiot's Lantern" in which, after defeating an electricity elemental known as the Wire by trapping it within a video cassette recording, he plans to prevent it from ever resurfacing by recording something else over it.
* Doctor Who right after they've switched back. Amy doesn't seem to mind.
* Doctor Who roleplaying game included the rule "Disintegrated characters cannot regenerate". However this is normally not needed as Time Lords, despite being physically superior to humans in nearly every way, can still be permanently killed by the ol' double tap.
* Doctor Who Romanadvoratrelundar, but he continues to use the first one anyway:
* Doctor Who, Rory is the village doctor. And the Doctor suggests that as evidence that the village is the dream scenario since he assumes Rory always dreamed of being more than "just" a nurse. Later episodes demonstrate this isn't necessarily true: Rory is shown and described to be an amazing nurse, and quite proud of the work he does.
* Doctor Who, Rory Williams' dad Brian ends up having a Triceratops sniffing at him, so the Doctor asks him why:
* Doctor Who, Rose accidentally hitches a lift on a barrage balloon, which were used during World War II to snag low-flying aircraft with their cables.
* Doctor Who, Rose says that the Doctor is "so gay." Russell wrote the episode in question ("Aliens of London") himself.
* Doctor Who", Rose's father Pete (who is encountered long in the past, while his daughter is still a baby,) unknowingly invokes it in a hypothetical remark of "if I was going out with you" with the time-travelling adult Rose and is confused about her emphatic, repeated protests.
* Doctor Who Rose (so the real one will remain undetected), and that the Time Vortex aged her.
* Doctor Who", Rose starts cuddling Beast Boy when he turns into a kitten and only realises that she's holding a teenage boy against her after the fact, but Beast Boy is genuinely clueless about why Rose is angry at him.
* Doctor Who, Rose Tyler is the companion of the last surviving Time Lord, and became trapped on a parallel Earth with no means to get back to him.
* Doctor Who rules of the television show when The Thirteenth Doctor, in a moment of vulnerability, finds solace in her companion Graham's arms. The concluding chapter of the strip adventure sees The Doctor almost sacrifice herself to defeat The Herald and The Sanity (two unhinged halves of herself) in the dimension known as The Castastrophea, and it describes Graham's fears for her safety as a "great weight pressing against his heart", when The Doctor and Graham choose to depart The Catastrophea, they do so whilst holding hands!!
* Doctor Who Ryan, who works in a warehouse back in Sheffield, initially dismisses the message as a prank, implying that he and his co-workers used to do similar things as pranks at work.
* Doctor Who S32 E3 "The Curse of the Black Spot" what the fireball is for and how to deflect it away from him before she launches it.
* Doctor Who Sabbath to save his life after it apparently begins poisoning him while trying to keep the Doctor linked to his destroyed home planet. Without his second heart, the Doctor notes that sometimes his remaining heart beats worryingly fast as though trying to compensate for the loss of the other, and the Doctor himself loses some of his old advantages such as his respiratory bypass system or ability to rapidly metabolise toxins.
* Doctor Who said deaths every time he tries to approach her in a romantic or even semi-friendly manner, played for black comedy.
* Doctor Who's aliens chose to invade Earth during the late 20th century, and inevitably the army would find that bullets/bombs/missiles/tanks barely scratched the surface.
* Doctor Who sang Ring-a-Ring-o-Roses in the background. It wasn't clear if he could hear or not. The new series used it in the Series 6 episodes "Night Terrors", "Closing Time", and 'The Wedding of River Song".

* Doctor Who, Sarah Jane stumbles upon the Doctor's "boot cupboard", a massive room which has one pair of boots in it. When Sarah points out how absurdly large it is, the Doctor replies, "I've seen bigger boot cupboards."
* Doctor Who (saying he even has the voice down), and one of the people he's attending the con with suggests he enter the Cosplay Contest. Cut to a similar-looking but earring-wearing cosplayer holding a First Place trophy while the real Doctor holds a Second Place one. His friend suggests it's because the other guy did more, whereas the real Doctor just stood there and pointed at himself for a few minutes, assuming that was all it needed.
* Doctor Who scenario between two armies united by their desire to kill him. The leader avoids this by having his men unload their weapons... at which point the Doctor's backup decloaks and it turns out they are surrounded by an army of the Doctor's allies.
* Doctor Who science-fiction - Challengers, as main battle tanks, are not exactly optimised for anti-aircraft duties.
* Doctor Who's disinterest in writing active villains (preferring malfunctioning machines or time loops gone wrong) and background in romantic comedy meant that his promotion to showrunner made the romance elements even more prominent:
* Doctor Who's early-to-mid tenure (see "The Brain of Morbius", "Pyramids of Mars", "Horror of Fang Rock" and "Image of the Fendahl" for just the more obvious ones), though some show up earlier and later than that - see the Second Doctor's "The Evil of the Daleks" and the late Fourth Doctor "State of Decay".
* Doctor Who seeing the volcano erupt, but one of them still faints when she is able to see that the Doctor is "a Lord, sir... a Lord... of Time."
* Doctor Who. See, it's a bit of big timey wimey, wibbly wobbly ball....
* Doctor Who seem to be following this trend: Jackson Lake, Adelaide Brook, River Song, Amy Pond... It might be symbolic, or then again, it might just be a coincidence.
* Doctor Who sees the creation of the Doctor's daughter Jenny. His DNA was taken at gunpoint and recombined to form a new person of which he is genetically both mother and father. Everyone on the planet Messaline was made that same way.
* Doctor Who sees the Fifth Doctor — the most pacifist Doctor of them all — faced with a threat so great that he and his companions Turlough and Kamelion travel to an alien base specifically to retrieve advanced weaponry to stop the current threat, rather than the Doctor's usual approach to simply contain their enemy.
* Doctor Who sees the gang take refuge in a church...magically shielded not by any holy powers, but simply because the monsters of the day were agents of time. Older things have more history and thus take more time for the creatures to penetrate, and the centuries-old church was the oldest thing around.
* Doctor Who's Empty Child. He's a differently-alive child who spreads a sickness that turns victims into duplicates of himself, like a seriously postmodern zombie. But mostly, he's just a lonely little boy.
* Doctor Who serial "Castrovalva" features a variation on this, where the entire town (a town called Castrovalva) had been warped in on itself. One of the cliff-hangers had a hilarious line from the Fifth Doctor.
* Doctor Who serial "Dragonfire"; when Ace boards the TARDIS at the end, she's miserable because she assumes the Doctor is going to take her straight home to Perivale on Earth, a place she loathes. The Doctor, however, has decided she'd make a good companion and offers to take her home via the 'scenic route' — which he outright promises is going to be much longer and more dangerous, but infinitely more interesting.
* Doctor Who serial "Robot". The Doctor tosses ball bearings into the path of the title robot, only for it to squash them flat.
* Doctor Who serials: "The Masque of Mandragora", "Four to Doomsday" and "The Visitation".
* Doctor Who serial 'Terror of the Zygons', the Fourth Doctor and his current companions arrive in Scotland and trace an alien signal to Loch Ness, where strange things have been happening recently. Don't worry, it's not Nessie... it's just a

giant plesiosaur-shaped cyborg that provides food for the Zygons. Much more sensible.
* Doctor Who serial "The Ambassadors of Death", a scientist called Lennox runs away from where he's been held and forced to do alien experiments and turns himself in to UNIT. His superiors are quick to find out where he is and murder him by putting a radioactive isotope in his cell.
* Doctor Who serial "The Aztecs". (Sister Monica Joan finds it greatly exciting, the others seem more uncertain.)
* Doctor Who serial "The Caves of Androzani" featured a textbook example ("spectrox", a life-prolonging substance), with the added twist that the unrefined stuff was extremely toxic.
* Doctor Who serial "The Gunfighters" plays off "Doctor Holliday" and "the Doctor's holiday" in order to fuel some of the misunderstandings that power the plot. The British English use of the word 'holiday' means taking a trip somewhere, or time off. In American English, a 'holiday' refers to special dates like Christmas or New Year and time off would usually be called a 'vacation'. Possibly justified as the only British English speakers in the story are the Doctor and his companions, explaining why the Americans begin to assume the Doctor is Doc Holliday.
* Doctor Who serial "The Mind Robber", the Doctor deals with the various monsters this way. If everyone stops believing in them, they just vanish.
* Doctor Who serial "The Romans", Nero hires arsonists to set the fire so he has an excuse to embark on some major building works he has planned. He gets the idea when the Doctor accidentally sets fire to a map of Rome by focusing sunlight through his reading glasses.
* Doctor Who serial "The Sontaran Experiment", only now Earth (or at least the greater London area) looks like the Devonshire moors.
* Doctor Who serial "The Visitation" ends with the Great Fire of London being accidentally started during a showdown with aliens planning to wipe out humanity.
* Doctor Who serial "The War Games": The War Lord, aided by the War Chief, is recruiting his warriors from conflicts in Earth's past because of humanity's talent for war.
* Doctor Who series can suffer from this, too — numerous celebrity cameos and pop-culture references are scattered across multiple episodes but can leave them feeling very dated in a short space of time.
* Doctor Who series had a Day of Reckoning at the end of every season. Of particular note are the episodes "The Sound of Drums"/"The Last of the Time Lords", "The Stolen Earth"/"Journey's End", and "The End of Time".
* Doctor Who series, psychic paper has whatever you're expecting written on it. This apparently works even on electronic locks.
* Doctor Who, several space whale and space whale-like specimens have been introduced.
* Doctor Who several times in the series, in moments where they've been just as surprised as everyone else that a plan of theirs has actually worked, or worked for the wrong reason. Being able to intuitively perceive all the possibilities of time and space probably gives them a particular advantage at this game.
* Doctor Who. Sexual attraction only played a minor role, at least from the Doctor's point of view, but the Doctor did take on a mentor role and guided Jack on a better path in life.
* Doctor Who's half of the sourcebook showed the far more horrible truth.
* Doctor Who, Sharaz Jek threatens to have the Doctor's arms slowly ripped out by androids if he doesn't tell him what he wants to know. Unusually for this trope, the androids start making good on this threat before the Doctor gives in.
* Doctor Who", Shears, the Army officer that has to judge the looters, seems more annoyed with his job than anything else, so he spends about ten seconds on each case and finds everybody guilty.
* Doctor Who (She flattens the Doctor, but he's had heavier things land on him.)
* Doctor Who, she has a pile of suitcases, including a hatbox. The Doctor is particularly bewildered by the hatbox. (Arguably, this is more sensible than what most companions do, which is set off in an erratic time machine with a semi-

qualified pilot in just the clothes on their backs. Although it does have an extensive wardrobe anyway.)
* Doctor Who, she is completely useless and utterly fails to realize that there is, in fact, a very real and extremely serious situation going on.
* Doctor Who she's being kicked out of the country long before she's been born) and orders the creation of the Torchwood Institute to deal with the Doctor if/when he ever appears again.
* Doctor Who (she was incapable of having the children she knew he wanted, and chose to leave him so he could find someone who could make him a father). By the end of the episode, Amy and Rory were together again, the divorce quietly forgotten.
* Doctor Who shift, but were simply moved back to maintain "classic" Earth.
* Doctor Who short story, a skeleton grabs the Tenth Doctor by the ankle as it claws its way out of the earth. The Doctor, not taking his eyes off Rose, asks if he should look. She shakes her head.
* Doctor Who show one of these to the Doctor. It consisted of the US marked in blue, and the USSR in bright red with a giant hammer and sickle on it and the rest of the world in grey.
* Doctor Who's hundredth birthday, and massively improved the animation.
* Doctor Who, "Silver Nemesis": The Doctor double-crosses the villainess and when informed that that will cost him his life answers "Worth it." Ace saves him.
* Doctor Who" similarly had the main character flash to clips, including one of Elton John.
* Doctor Who: Since 2010, DVD and Blu-ray "complete season" releases of the series have included at least two direct-to-video "mini-episodes" or "minisodes" in addition to any that might have been broadcast or circulated online.
* Doctor Who since it might encourage kids to watch a show they most definitely shouldn't.
* Doctor Who since the get-go: convincing ordinary people to be extraordinary and save their world.
* Doctor Who, since the UK, beset by other alien invaders, was looking to America for much-needed aid.
* Doctor Who's intro makes you think there's a fourth wall, shatters that perception 30 seconds in and never rebuilds it. The entire game has The Master and the first seven Doctors (as well as Brigadier Lethbridge-Stewart) talking to you.
* Doctor Who Sir Alastair Gordon Lethbridge-Stewart of the United Nations Intelligence Taskforce (later renamed the Unified Intelligence Taskforce).
* Doctor Who, slave overseer Mr. Kess takes a disturbing pleasure in trying to kill the Doctor with the warehouse's robotic crane arm.
* Doctor Who slowly escaping the pull of a black hole. Because of the increased gravity near the black hole's event horizon and the length of the ship, time passes much more slowly in the ship's command center than in the lower decks. This is bad news, as said decks are now inhabited by malevolent creatures who have years to plan attacks while only days or minutes pass in the higher-level decks.
* Doctor Who, smuggles Amy and Rory into Area 51, where the Doctor is being held, this way.
* Doctor Who. So having the Doctor accidentally jump 12 years into the future means that we can now have an all grown up Amy travel with him.
* Doctor Who, so later on the "W" was removed from his name, which was good enough, it seems. The credits for the episode "Slice of Life" credits him as simply "Doctor." Some of the merchandise, most notably the figurines from Funko, still calls him "Doctor Whooves" on the packaging, however.
* Doctor Who Solitaire Story Game, a free fan-produced game successful enough to have two editions.
* Doctor Who (sometimes called Venusian Karate), which was mainly practiced by the Third Doctor, but has occasionally been used by later Doctors. According to some Expanded Universe novels, it was hard for two-armed beings to learn because Venusians have six arms, the Doctor being one of the few to succeed.
* Doctor Who. Sometimes, even if you lock the door and wait for everyone else to go

to sleep, you still just can't win...
* Doctor Who sometimes has this dynamic with current and previous companions.
* Doctor Who so they always seem to pop out of nowhere. The similarities to Slender Man might have been coincidental, but they are definitely there.
* Doctor Who, so they don't have to pretend that recognizable landmarks are actually somewhere else.
* Doctor Who space colony whose regime, among other charming habits, sells recordings of the public torture and execution of dissidents to underground perverts on other planets as snuff movies.
* Doctor Who special "Music of the Spheres", the Doctor tries composing a symphony inspired by planetary rotation synthesized into music through the TARDIS harmonics filters. Let's just say the universe makes better music than Ten. But at least we get the image of him conducting an orchestra with the sonic screwdriver.
* Doctor Who special "The Five Doctors", the BBC created some publicity shots of all five Doctors by having the actors playing the other four Doctors pose with a waxwork of Tom Baker as the Fourth Doctor.
* Doctor Who speech between young lovers that turns out to be a soap opera being shown on a war ravaged world.
* Doctor Who spent her days in Stormcage Containment Facility (her nights, well, that's between her and the Doctor). She even lampshades it while returning one morning, telling the staff to shut off the alarm because, "I'm breaking in, not out!" and that she'll take breakfast "at the usual hour".
* Doctor Who spin-off audio adventure, the villain (who desires to remove non-British from Britain) uses mind control to get people to blow themselves up shouting "THIS IS FOR MY PEOPLE!" Regardless of the nationality, he gets the press to cover it as a Muslim extremist (in the first instance, a Scot blew himself up, and was said on the news to be a Muslim student) or other non-British to cause riots and swell public support for his anti-foreigner agenda.
* Doctor Who spin-off fiction is a male-to-gender-neutral market, so the gender of the pseudonym isn't particularly relevant. It does, however, indicate the work is going to be more "psychological" than works under Cole's own name.
* Doctor Who-spreading monsters, repelled by faith [a "psychic barrier"] or garlic [or "garil", which is space-garlic], and only killable by driving a stake through the heart. But they're still from space or the future, so that's okay.)
* Doctor Who's Romanadvoratrelundar (Romana for short) fits quite well, although her full name is rarely used on screen.
* Doctor Who's rules forbade staff from taking a second credit on a show, e.g. for writing), although Sloman once claimed it was because he had another writing partner at the time and didn't want people to think they'd fallen out.
* Doctor Who's run, something happens that makes it clear that the Daleks who show up are the absolute final last Daleks in all of the universe and then, when the Doctor defeats them, makes it equally clear that the Daleks have been Destroyed For Good This Time... until the next time they show up, a year or so later, at which point we go through it all again.
* Doctor Who's Sixth Doctor, including the wide gamut of friends, companions, and enemies he encountered throughout his tenure.
* Doctor Who stage magician Li H'sen Chang has an accent, but he plays it up during his stage performances because his Victorian audience would otherwise doubt that he's actually Chinese.
* Doctor Who started doing this at the ends of multiparters with the beginning of the second season of the revival.
* Doctor Who started setting stories in exotic locations purely because they had the budget to go there for location shoots.
* Doctor Who, started with short hair, and subsequently seems to have grown it out to about bob length.
* Doctor Who, "stellar destructors" that blow up stars are standard weapons.
* Doctor Who stopped trying to be family friendly with the special effects... Though the fact that the ray can be conducted through water suggests it's actually some kind of electron particle beam.

* Doctor Who stories have fit this genre, particularly in the early years when the show was more heavily influenced by Burroughs-like fiction:
* Doctor Who stories seem to cast aliens as the inspiration for Earth myths, with the Doctor as their foil.
* Doctor Who stories, the Doctor arrives in an environment (e.g. research base, spaceship, space station) shortly after sinister events have begun occurring, usually including deaths. The person in charge (e.g. commander, director of research) assumes the Doctor and companion/s did it. (Admittedly, under the circumstances, that's often not so unreasonable.) Then the Doctor and companion/s are opposed by the people they're trying to help, as well as the actual villain/s.
* Doctor Who story featuring a military force that isn't outright evil will use this to create conflict at some point between them and the Doctor. The Third Doctor and Brigadier Alistair Lethbridge-Stewart have this kind of relationship in spades. The Doctor tries to save the day with science while the Brig just wants to send in men guns a-blazing.
* Doctor Who story "Mindwarp" opens with the TARDIS landing on the beach on a planet where the ocean is bright pink.
* Doctor Who story "Revenge of the Cybermen", the Doctor is knocked unconscious in a rockfall and Harry attempts to undo the bomb strapped to his back, not knowing that doing so will cause the bomb to go off. Then the Doctor wakes up:
* Doctor Who story, "The Crimson Horror'' after The Doctor is cured from the walking death state he is in, he spontaneously hugs and kisses his rescuer. Unfortunately for him, it turns out to be Jenny, his lesbian friend, who promptly wallops him across the chops.
* Doctor Who story "The Daemons", which shows the production of a TV broadcast from an archaeological dig.
* Doctor Who story "The Dalek Invasion of Earth", an old woman reports the main characters to the Daleks and is rewarded with food, including an orange. "I haven't tasted an orange in years..."
* Doctor Who story "The End of Time" has the Doctor point this out. In the show's 47-year history up to this point, the Doctor has saved Earth, other planets, and the universe as a whole countless times, making sacrifice after sacrifice. Every friend he ever makes will die, while he is nearly immortal. He has destroyed his race to save the rest of the universe, making him the last of his kind. He's completely alone in the universe. His reward? None.
* Doctor Who story The Face of Evil concerns two tribes, the Sevateem and the Tesh, who worship a god called Xoanon. It turns out that they are descendants of the crew of a spaceship that crashed centuries before and that Xoanon was the ship's computer. It also turns out the Doctor had happened by after the crash, tried his hand at fixing Xoanon, and accidentally sent Xoanon insane, creating the whole situation in the first place. The story's working title was The Day God Went Mad.
* Doctor Who story "The Rescue", the relationship between 20th century companion Barbara and 25th-century companion Vicki starts off badly when Barbara "rescues" Vicki from being "attacked" by a 6-foot-long, tooth-baring (vegetarian) lobster-monster... by shooting it in the face with a flare gun.
* Doctor Who story "The Talons of Weng-Chiang" has Jago and Litefoot attempting to use a dumbwaiter to escape from Magnus Greel and his followers.
* Doctor Who story "The Talons of Weng-Chiang", theatre manager Henry Gordon Jago mistakes pathologist George Litefoot for a servant when they first meet. In this case, the misunderstanding arises because Jago arrives at Litefoot's house and sees him with a dustpan and brush in his hands. However, Litefoot is quick to correct him.
* Doctor Who Story "The Tomb of the Cybermen (Part 1)", The Second Doctor and his companions, Jamie and Victoria make their way into a foreboding doorway. The Doctor and Jamie both reach back to take Victoria's hand, but instead grab each others by mistake.
* Doctor Who succeeded in pitching a new format for the series to the BBC when it had given up on a family demographic. He immediately got support to start the revived series, and restored not just a whole culture from where it had left off,

but on top of that, restored the family audience.
* Doctor Who: Supremacy of the Cybermen for the "Age of Steel" versions.
* Doctor Who: Supremacy of the Cybermen: The Seventh Doctor's reaction when he realises that a Cyberman that has spotted him is revealed to be Ace, his companion.
* Doctor Who survive thanks to audio recordings made by fans from the original broadcast, which were later returned to the BBC archives. Uniquely, the only colour copy of episodes 2-7 of "The Ambassadors of Death" is an early home video recording made from the story's original US broadcast by a Canadian fan, which is of low quality but was used in the story's DVD reconstruction.
* Doctor Who, Sydney Bristow comes across as this in contrast to the Third Doctor, who still has a relatively upbeat view of life and the universe despite his current exile where Sydney is bitter and frustrated at how many lives have been ruined through obsession with Milo Rambaldi's work in the future.
* Doctor Who, takes place on Janus Prime, which is in a state of perpetual solar eclipse, blocking enough sunlight that the planet is always in darkness.
* Doctor Who" takes place on the planet Chloris, which has an over-abundance of plant life and virtually no metal; the local dictator's power comes from having control of the only mine.
* Doctor Who" takes place partly in Australia, and while a couple of the Australian characters are played by real Aussie actors, the major part of Donald Bruce is played by English actor Donald Bruce.
* Doctor Who, taking place in a virtual reality world which relies on the human brain mentally filling in the extra time to avoid confronting the constant disorientation.
* Doctor Who tall, but in this book he's implied to be shorter than the 173 cm Doctor. They're both skinny, though.
* Doctor Who Target Book Club Podcast videos of the podcast also feature a Morphoton brain from Keys of Marinus with a different caption directed to the readers.
* Doctor Who team at the time were reportedly extremely angry that no permission had been requested (and also wouldn't have granted it).
* Doctor Who, teenager Jethro gets dismissed as "just a boy" by his mother the second his opinion on the situation differs from her own. This is especially patronizing because he's at least seventeen, not to mention that he proves to be much more rational then either of his parents in the situation, when he's not nervously giving in to the pressure they're putting on him to go along with their opinions.
* Doctor Who tell middle-class couple Morvin and Foon (who won their tickets in a contest) that the formal-attire dinner was fancy dress. The two end up sitting at a table dressed in ridiculous, purple polyester cowboy/girl outfits while the snobs laugh it up at their expense. The Doctor gets revenge on their behalf by sonicing a bottle of champagne, spraying the snobs.
* Doctor Who tells his mates a joke. The joke is "Here, know why a pig can never become a sailor? 'Cos he can't look aloft!" The crew all find this hilarious. Admittedly, they're all Edwardian seamen who've been drugged into accepting they're on a space yacht, so they aren't exactly thinking straight, but still.
* Doctor Who terms) all of the earlier stories still being in continuity.
* Doctor Who") than it previously was, with the whole 'adventures in time and space' which was (and is, it just has relationships on top of it) primarily the central focus downplayed. Considering that the show prior to 2005 was regarded as a creaky, slightly irrelevant old relic and post-2005 is now a internationally famous media juggernaut seemingly beloved by all — most especially critics — something obviously worked.
* Doctor Who. Thanks to an encounter with a pool of quicksand-like mud, she is filthy by the time she gets there.
* Doctor Who thanks to Donna, who hasn't quite caught on and keeps accusing the wrong person.
* Doctor Who) that crashed there thousands of years ago. The humans are the descendants of the surviving crewmembers, having regressed into savagery. They

worship Gobo, the clown mascot of Gobocorp proudly painted on the side of the ship, as their deity, believing him to have created them on Earth and who will eventually take them away to the mythical land of El Paso. The latter they got from a broken projector showing westerns with no sound, or as they call them "Stories". It helps that Westerns usually have clearly-defined good guys and bad guys, allowing the humans to interpret the good guys as Gobo's children/apostles and the bad guys as the Bad, the enemy of Gobo. Anyone who disagrees with the teachings or claiming that the junkyard is not Earth is considered a heretic and put to death, as they must be the servants of the Bad. Being a holy shrine to them, the Tower is off-limits to all. Only once does the current leader send a "word-slinger" (the only person per generation who knows how to read) inside. The latter quickly loses his faith after discovering the ship logs.
* Doctor Who that episode, until Rose reminds him that Jack was still trapped on a spaceship that was about to explode. They saved him, though.
* Doctor Who that ever existed, it is humanity, out of all the billions of species in the universe, that has made it to the end. The tenacity is acknowledged by at least one Dalek who, in the face of its hateful xenophobic peers, asked "If we Daleks are so superior, why are we on the very edge of extinction while humans thrive?"
* Doctor Who that had been prepared for when says something insensitive word for word.
* Doctor Who" that he requested that his name be taken off it. When Holmes asked what pseudoym he wanted, Dicks replied that any bland one will do. He was greatly amused to read that the story was credited to Robin Bland.
* Doctor Who that it is still iconic for it, and defined how this trope is used on British television. In the modern series:
* Doctor Who that modern, post-Time War Daleks have, which provide a glaring weak point for enemies to exploit.
* Doctor Who, that obliterate people and things from the timeline when exposed to them. In "The Pandorica Opens", it's revealed that these cracks were formed from the TARDIS exploding after hitting a burst of time energy and overheating, but what caused the burst in the first place is never directly explained.
* Doctor Who that one of them was actually watching the movie when the dreamcrabs put them into the dream.
* Doctor Who that River Song is imprisoned in the Stormcage Containment Facility for the murder of an unidentified individual, possibly the Doctor himself. When she needs to (normally to go off on some adventure with the Doctor), she will happily escape and even let the guards see her packing her bags and inform them of her plans, and then return to her cell willingly when the adventure is done. Why she does this instead of just leaving for good is not clear, although it is possible that, in her ridiculously convoluted time-travel relationship with the Doctor, she needs somewhere where she can reliably be expected to be.
* Doctor Who. That said, the official number of alien planets that look like Earth quarries is 29. It's a trope very commonly associated with the series in the popular imagination.
* Doctor Who) that she'll remove the organs of the next person who calls her by name — in alphabetical order. Prompting the Doctor to asks, "Which alphabet?"
* Doctor Who that Starship UK has instead of an engine, and who is seen in full at the end of the episode.
* Doctor Who that suffer from being critically maligned. This also applies to fan opinion, however; it is quite common for stories and eras previously negatively viewed to receive positive reappraisal thanks to the passage of time. The Sixth and Seventh Doctor eras are rife with examples, as is the Second Doctor era, the latter due to mostly more stories from Patrick Troughton's time being recovered.
* Doctor Who that the book was written in the belief that Virgin will publish "any old crap with the programme's name on it".
* Doctor Who that the character Amelia Jessica "Amy" Pond was responsible.
* Doctor Who that the phone calls are routed through the TARDIS, which may help to explain why it's feasible.

* Doctor Who) that they've decided that in the event of a global emergency, they can elect a President of Earth who has full authority over the entire human race.
* Doctor Who that were like giant homicidal rotting broccoli stalks. The pods also made other plants turn against people.
* Doctor Who: The 6th Doctor episode "The Twin Dilemma" featured the Gastropods, a race of nearly indestructible creatures who devastated entire planets, but whose eggs couldn't hatch unless seared by a supernova first, limiting their spread.
* Doctor Who", the alien Terileptils disguise their robot as the Grim Reaper to terrorize the local villagers.
* Doctor Who: The amount of times that the Doctor has managed to wander into some top secret laboratory armed only with a smile and immediately start ordering people around belongs here.
* Doctor Who, the antagonist is an alien participating in a ritual hunt in order to be made the leader of his species, the Stenza, by tracking down and capturing a randomly designated human as a trophy. The trophies are kept preserved on the Stenza homeworld in a state between life and death.
* Doctor Who, the antagonist, Tzim-Sha, is participating in a ritual hunt in order for him to be named the next leader of his species. He's not supposed to have any weapons or equipment, but he smuggles in a data coil to help him locate his target, as well as a short-range teleporter.
* Doctor Who, the Autons are robots made out of living plastic (such as shop window dummies), animated by the Nestene Consciousness.
* Doctor Who", the Carrionites are aliens who use word-based "science" which is basically magic by any other name. The Doctor is able to use its principles against them, banishing one temporarily by announcing their name.
* Doctor Who the cast argue over how much sympathy the character should get.)
* Doctor Who). The character as seen on screen is white and British, presumably because of the lack of access to Haitian actresses in the BBC's low-budget programming in 1975.
* Doctor Who: The classic series was a repeat offender, but the new series has mostly avoided silvery spandex.
* Doctor Who (the classic series, with the exception of Season 22 in 1985, where the format was briefly changed to 45 minutes)
* Doctor Who, the Colony of Sarff consists of a group of smaller snakes which form Sarff, which interacts with the Doctor as a single entity.
* Doctor Who", the controls of the alien spaceship only respond to two pilots who are genetically linked. (How lucky that Rory's dad got dragged along on this adventure...)
* Doctor Who. The Court acknowledges the overwhelmingly positive difference the rogue denominated "The Doctor" has come to make in the grand scheme of things, but wishes to examine much more closely the society he hails from:
* Doctor Who, the creatures sent to deal with the paradox, who were never named on screen but called "Reapers" only had mouths on their stomachs, and claws which they used to shove victims down their throats.
* Doctor Who: The Curse of Fatal Death parodied this with the phrase "Dalek seconds".
* Doctor Who the Daleks measure time in "rels". One rel is slightly longer than a second, close enough to do the trick.
* Doctor Who, the Daleks' multi-purpose "plunger arm" has this as one of its functions.
* Doctor Who, the distinctly reptilian Draconians are referred to by their human enemies as "dragons", usually said with either contempt or fear.
* Doctor Who, the Doctor acknowledges that he has a time limit even before Wesker sets up his plans, as he has to get the TARDIS back to his universe before the recharging ship overloads and explodes.
* Doctor Who. The Doctor addresses the lack of foresight such a name shows.
* Doctor Who, the Doctor always has a traveling companion from modern Earth who would be in the dark if the Doctor didn't explain everything. That seems to be the main function of the cohort, a "Watson" to his "Sherlock".

* Doctor Who, the Doctor and companions wind up on an ambulance spaceship after falling afoul of a sonic mine. The Doctor, still recovering for most of the episode, mentions her "ecto-spleen" is hurting.
* Doctor Who, the Doctor and company, while in 1955 Alabama, are forced to get a motel room because the antagonist knows where the TARDIS is parked. As the motel is "whites only", Ryan and Yaz have to be smuggled in through the bathroom window.
* Doctor Who: The Doctor and Grace pull off a dramatic escape from the Institute while being chased by the Master and his minion. The janitor fails to notice.
* Doctor Who, the Doctor and her companions attempt to escape from the SniperBots by ducking inside the ruins, only to discover that the area they come out into is the SniperBots' practice range, and that everything inside the zone is considered a target. And the actual targets, as Graham points out, are human-shaped.
* Doctor Who. The Doctor and his companions can also attempt to perform these on occasion, although they (usually) tend to be averted.
* Doctor Who. The Doctor and Leela have killed the alien Rutan that was threatening a lighthouse and destroyed its mother ship. They leave safely in the TARDIS, but the Rutan managed to kill all the other characters first.
* Doctor Who", the Doctor and River trade flirtatious quips while Amy Pond is held prisoner feet away, and the Silence trying to manipulate the '69 Apollo moon shot. Amy ends up snapping them out of it with a barbed remark.
* Doctor Who", the Doctor and Tegan discuss this trope as it applies to "a treeful of monkeys".
* Doctor Who, the Doctor claims that the year to which they've traveled is "5.5/apple/26, five billion years in your future".
* Doctor Who, the Doctor definitely has his moments of this in the new series. He's done it to both Martha and Amy — even claiming to the latter he's like a Space Gandalf — but whether it's because of repressed feelings or him just being clueless is up for debate. It's probably a mixture of both. Noteworthy exchange between the 12th Doctor and Clara Oswin Oswald:
* Doctor Who the Doctor delivers to Craig appears like this. There are actually two of them, one chronicling the general history of the entire series up to that point, and one summarizing the events of the episode itself. In the first blipvert, Doctors One through Four and Eight through Ten, Rose Tyler, the Cybermen, the Ood and a Weeping Angel all appear briefly.
* Doctor Who, the Doctor does a one-sided version of this while descending into the pit, almost asking Ida Scott to tell Rose something:
* Doctor Who, the Doctor does this after Solomon kills the fetch-playing triceratops.
* Doctor Who: The Doctor does this occasionally. He travels through time and space in the TARDIS dealing with various disasters of all sorts though.
* Doctor Who: The Doctor does this quite a lot, especially in his fourth and tenth incarnations. However, this is quite often a highly calculated move on his part, as a way of distracting the person he is talking to.
* Doctor Who": The Doctor easily convinces Palmer he's with Military Intelligence as he knows top secret information about Palmer's service in SOE. How the Doctor handwaves his sonic screwdriver.
* Doctor Who, the Doctor explains that empaths tend to be both extremely compassionate and extremely lonely.
* Doctor Who: The Doctor finds himself in this situation quite often, what with being both highly intelligent and highly eccentric.
* Doctor Who, the Doctor gets rid of a mysterious figure chasing her, her companions, Nikola Tesla and his assistant on a train after separating him from his weapon, by pulling the bolt out of a coupling, leaving the attacker on the back half of the train as the rest speeds on to New York.
* Doctor Who, the Doctor gives explanations for various things, only to immediately say that the explanation is wrong, since a lot of the time, he doesn't seem to have an answer or he thinks his companions need it dumbed down for them. The Eleventh Doctor is especially prone to discarded analogies.
* Doctor Who: The Doctor goes up against shady corporations a fair bit. Sometimes

they're fronts for alien invasions, sometimes they're just destructively greedy.
* Doctor Who". The Doctor had evidently pleaded that he be made very comfortable in captivity, as he meant for him to be there rather a long time.
* Doctor Who: The Doctor has a knack for this across many of their regenerations.
* Doctor Who: The Doctor has always been pretty good with a sword. His skills have been called on in:
* Doctor Who, the Doctor has been poisoned with cyanide, but can cleanse his system with only a few ingredients. Unfortunately, his mouth is full when he needs to tell Donna what he needs and a hilarious game of charades ensues:
* Doctor Who: The Doctor has been travelling through space and time for a long time now, and he's a total magnet for adventure, so it's no surprise that not everyone's happy to see him:
* Doctor Who." The Doctor has control of Davros' life support system and tells him to give the order to destroy the proto-Daleks or else he'll turn it off.
* Doctor Who: The Doctor has made all sorts of short-sighted fashion decisions over the years, making this a frequent theme whenever they recall past behavior or two incarnations meet:
* Doctor Who: The Doctor himself has done this on many occasions, especially post-Time War when he is the only living Time Lord. Some examples:
* Doctor Who, the Doctor, Ian, Barbara and Vicki amusingly have this reaction to being invited into a lift by a Mechanoid, a round robot the size of a garden shed.
* Doctor Who, the Doctor instinctively sees her as the same age as himself.
* Doctor Who: The Doctor is both a charismatic and levelheaded leader, and occasionally a mastermind.
* Doctor Who the Doctor is even better, as they think that would be an utterly glorious death.
* Doctor Who: The Doctor is occasionally shown to have this ability. The Fourth Doctor once karate-chopped a brick in half, and the Eighth dented a heavy steel door in the process of knocking it off its hinges. This is because Gallifreyans are optimized to balanced perfection via genetic engineering as an entire race, meaning they are the perfect beings you can be while also being jack-of-all-trades, and fitting in among the other species, most of which are humanoids. Hence they have genetically optimized muscles, which are way more compact than humans have, enabling them to even lift androids made out of different alloys off the floor by their neck, singlehandedly.
* Doctor Who" the Doctor is sentenced to disintegration by the Time Lords. In the event, the execution is rigged so he survives.
* Doctor Who, the Doctor is taken to a planet where the galaxy's greatest hunters (the Endangered Dangerous Species Society) are in competition to kill him.
* Doctor Who", the Doctor makes a phone call and pretends to be informing the Monks that Bill has arrived. He has actually phoned the kitchen. He sends one of the rebels down to apologise to them because they are going to be very confused.
* Doctor Who, the Doctor, Martha and Jack hide from the Master in an abandoned warehouse and discuss backstory.
* Doctor Who, the Doctor, Martha, and Martha's family see the presumably killed Lazarus being loaded into an ambulance, which drives away. After this, the Doctor is slapped by Martha's mom. Suddenly, there is a loud crash. The Doctor, Martha and Tish run over and find the ambulance has run off the road into a lamppost. They also discover that not-dead-Lazarus has killed the paramedics by draining their life force.
* Doctor Who, the Doctor mentions that a "New Roman Empire" exists on Earth in the year 12,005. Given all the countless stories showing humans in space in the future, this New Roman Empire is almost certainly a space-faring civilization.
* Doctor Who, the Doctor never shows any signs of this, but a great many of the Doctor's companions Go Back Home when they've had enough of the adventures. (Or have found a new home.)
* Doctor Who", The Doctor observes that, "Your race has an amazing gift for self-deception, matched only by its ingenuity when trying to destroy itself."
* Doctor Who the Doctor points out that while it's effective in a ruthless sort of

way, it's effective one time only — who's the surviving friend going to outrun when the next lion shows up?
* Doctor Who, the Doctor realizes Starship UK is this when he sees a girl sitting on a bench silently crying but none of the adults passing by are stopping to console her, suggesting that they know why she's crying and don't want to acknowledge the cause.
* Doctor Who, the Doctor rubs his wrists after he and Robin get out of their shackles.
* Doctor Who, the Doctor saves the Earth yet again and says, "Who da man?", which is promptly followed by a beat of silence from his companions Amy and Rory, which leads to the Doctor saying, "I'm never saying that again."
* Doctor Who'', the Doctor says that the "pilot fish" could run their batteries off his excess regeneration energy for "a couple of years".
* Doctor Who, the Doctor says to Cinder he's not good with long term plans and prefers "Winging it".
* Doctor Who, the Doctor's consciousness and Time Lord nature are stored inside a device called a Chameleon Arch which looks like a pocket watch.
* Doctor Who. The Doctor seems to have a thing for picking up random humans from Earth.
* Doctor Who The Doctor. Some love him, some hate him but he's known throughout the universe. River mentions that he can make an army turn and run at the mere mention of his name and it has been shown that she was not exaggerating.
* Doctor Who: The Doctor's psychic paper, which (usually) appears to the viewer as whatever kind of ID will get him past them, has been used to pull off impersonations of police, as well as other authority figures.
* Doctor Who: The Doctor's relationship with his companions often starts from here; whether it be platonic or romantic, most of the people he travels with are loners, and many are explicitly depicted as lonely. As for the Doctor: there is a reason why one character refers to him as the Lonely Angel.
* Doctor Who. The Doctor's sonic screwdriver "doesn't do wood" and the monsters of this episode are tree people.
* Doctor Who, the Doctor's sonic screwdriver — normally an all-purpose lockpick — is unable to affect anything that's been secured with a "deadlock seal", which seems to pop up arbitrarily in all places and historical eras (though when it shows up on modern Earth it's always of alien origin). Ten also reveals that the sonic doesn't "do wood" and that it can be blocked by certain types of hair-dryers—though he is trying to fix the latter.
* Doctor Who, the Doctor states that the Sonic Screwdriver doesn't work in Omega's world as the only "natural" law is the law imposed on this dimension by Omega's will.
* Doctor Who, the Doctor's trial is rushed so that he can be executed before the new President is installed, which is traditionally celebrated with pardons for criminals. The new President would not, then, face the choice between letting his predecessor's murderer go and thwarting tradition.
* Doctor Who, the Doctor stumbles into one of these, which quickly gets rerouted to the bomb shelter as another air raid starts.
* Doctor Who, the Doctor tells a joke that ends with the line "Never trust a Venusian shanghorn with your perigosto stick."
* Doctor Who, the Doctor temporarily gains an upgrade when all of the mental power of humanity is focused on him through the Archangel network. During the few minutes he has it, he can float in mid-air and use telekinesis.
* Doctor Who: The Doctor tends to avoid becoming too close to his companions because of this, due to what he calls "the curse of the Time Lords" — a companion could spend their whole life with him, but he couldn't spend his whole life with them (see quote), being "immortal, barring accidents".
* Doctor Who The Doctor then says a cheerful "Goodbye!" and the tape immediately cuts to a distorted portion of blaring music which clicks into static. The story ends with the sound of a tape running out...
* Doctor Who, the Doctor uses a pair of night-vision sunglasses to identify the

mysterious subterranean attackers.
* Doctor Who, the Doctor, while building a new sonic screwdriver, assures Graham and Grace of her good intentions while gesticulating with a large hammer, causing the two humans to back away slowly.
* Doctor Who: The Doctor will occasionally wax poetic about various elements of human nature he likes. He did a fairly long one on edible ball bearings (metallic, spherical cake decorations, properly called dragees) in "Fear Her".
* Doctor Who: The Doctor would, in a perfect world, talk all his enemies down to a negotiation table and hammer out a ceasefire and trade agreement over tea and biscuits. But if that fails, he has this.
* Doctor Who, the Doctor would often dress up his female companions in men's clothes out of concern for their safety:
* Doctor Who, the Eleventh Doctor gained one between "The Impossible Astronaut" and "Day of the Moon" and shaves it off later.
* Doctor Who", the Eleventh Doctor is drawn to the Twelfth Doctor's TARDIS, the Twelfth revealing that he's become a twisted, corrupted version of himself and asking his past self to form a closer bond with Clara in the Eleventh's present so that this relationship can save him from his own darker impulses.
* Doctor Who, the Eleventh Doctor jumps out of a cake at Rory's bachelor party.
* Doctor Who, "The End of the Earth", the space station instantly cools off after The Doctor throws the emergency switch. The glass even self repairs after being hit with the Earth's sun going nova.
* Doctor Who", the eponymous museum is labyrinthine enough that Ian unwinds Barbara's cardigan in order to use the wool à la Theseus. To be fair, he is shown to have some trouble starting the sweater's disassembly, and Barbara has to take it from him and pick open a starting point; but after that it's just treated as a ball of yarn with a long single thread (which, as usual with string in a labyrinth, runs out too soon).
* Doctor Who", the eponymous world is revealed as such when the pharmacist is asked to draw a map of the city, and marks his pharmacy as being at the top, and the bottom, and to the west, and to the east, although there is only one shop.
* Doctor Who. The exceptions are the Second, Fifth and Eighth Doctors, who need to deal with the Daleks and the Master (twice) respectively, justified as the Fourth and Seventh Doctors regenerated because of the Master's efforts and the producers wanted the Second (as the first regeneration) to face a familiar threat to assure fans that the show hadn't changed.
* Doctor Who, the Fifth and Tenth Doctors accidentally meet. Ten, delighted, immediately recognizes his former self, but Five takes him for an obsessive fan and is most annoyed.
* Doctor Who", the Fifth Doctor threw a cricket ball in order to move himself away from one ship and toward his TARDIS. He even managed to catch the ball after it bounced off the other ship for a further speed boost.
* Doctor Who, the Foamasi are chameleons and are immune from radiation and can compress themselves into human suits.
* Doctor Who - the Fourth Doctor's character is very much defined by the eccentric ways he moves and goes about doing things, which is easy to represent on television, but in a book, his actions have to be relayed through a witness who understands him as little as we do.
* Doctor Who", the Gargan is a predator that ignores you unless you enter its territory (which it thoughtfully marks with rocks). If you do pass the rocks, it pursues you until it has eaten you.
* Doctor Who, the Globe Theatre's 14-sided design amplifies the Carrionites' abilities so as to allow them access into our world as they come from a star system with fourteen stars.
* Doctor Who, the Graak starts with 9999 hit points, but any exertion reduces that. Fortunately, there are enough restorative crystals for it to gain enough hit points to finish restoring the Doctor's incarnations.
* Doctor Who, the House of Calvierri, led by Signora Rosanna, are secretly aliens who are forcibly converting young women into more of their kind and plot to sink

Venice so they can live there.
* Doctor Who, "The Idiot's Lantern": The Doctor defeats The Wire (an alien energy being) this way, by recording its consciousness to a VHS cassette tape, and then (strongly implied to have) recorded over it.
* Doctor Who "The Infinite Quest" lands the Doctor and Martha in a maximum security space prison where a background scan find the Doctor guilty of 3,005 "outstanding convictions" including 1,400 minor traffic violations, 250 evasions of library fines, and 18 planetary demolitions.
* Doctor Who; the initials of the show angled to look like a stylised police box. A silhouette of the police box front itself has also been used to represent the series.
* Doctor Who, the insides of the TARDIS walls often have a hexagonal pattern on them, and the TARDIS console is hexagonal.
* Doctor Who their crimes). They realize they've arrived too soon in Hitler's personal timeline, and find a bigger fish: The woman who killed the Doctor. Except that she hadn't done that yet, either.
* Doctor Who. Their older selves both still love each other, but neither is the person the other had fallen in love with any more (literally, in the case of the Doctor), making it extremely bittersweet.
* Doctor Who, the Jagaroth ship is destroyed because it tries to use its warp thrust to take off from Earth.
* Doctor Who" - the justification UNIT gives for keeping Jack's time machine locked away from the Americans is, "Americans with the ability to change history? You've seen their movies."
* Doctor Who the Krillitanes used to have extremely long necks, but due to the fact they constantly take on other species' traits, they now look like giant bats.
* Doctor Who", the Krotons' Teaching Machines reward correct answers by inducing feelings of pleasure in the user.
* Doctor Who. The ladder falls in, as does the Doctor, and his companion claps sarcastically.
* Doctor Who; the last before the series was cancelled was Ace, a punk-rock teen who loved explosives and was willing to rush at a Dalek with a baseball bat if she saw one. They still fulfill the Watson role, though, since the Doctor is usually the smartest one in the room with loads more experience than everyone else.
* Doctor Who. The later episode "When a Good Man Goes to War" has the exact same Spitfires returning to help the Doctor take control of a space station called Demons Run.
* Doctor Who". The latter can turn even nice houseplants into vicious killers.
* Doctor Who. The listener is led to believe throughout the audio that the Doctor, Charley, and C'rizz have had their memories wiped and are trapped by the city using the roles they are placed in, the Editor, the Nurse and Conscience #1, respectively. However, at the end of the audio, when the Editor sees the memory of the Doctor and companions visiting Light City and the Doctor having to give up the group's memories to the city, he finds out the memories were only copied. The group only was in Light City for a day and the characters seen were created using their memories, revealed to the listener when the Editor mentions he has eight legs.
* Doctor Who: The Lost Dimension newscaster from the Davies era, gets possessed by white hole energy while delivering a report on people worldwide getting possessed by white hole energy.
* Doctor Who: The Master does this to delay the Doctor's journey to the town of Devil's End in "The Daemons".
* Doctor Who: The Master has always used both simple booby traps and elaborate deathtraps against the Doctor and his companions.
* Doctor Who: the Master in all his incarnations drifts inscrutably between sides, when he isn't a side unto himself.
* Doctor Who, the Master is the sole ruler of Earth after the attack of his minions, the Toclafane.
* Doctor Who, the Master's TARDIS takes the form of a black classical column that is only just wide enough for him to stand behind unseen, and too narrow to include

any kind of normal door.
* Doctor Who: The Master turns the entire human population into clones of himself, resulting in various disturbingly gorgeous Drag!Masters. The original script even had a cut scene where the original Master flirted with Abigail!Master.
* Doctor Who. The Master, whose attitude towards women has always been somewhat disdainful, embraces their new persona Missy with gusto.
* Doctor Who theme actually does contain backmasked lyrics. Played forward, they sound like nonsensical chanting. Played backward, they contain spoilers, such as a mention of hearing drums.
* Doctor Who the military want to create super-soldiers that can fight at the Daleks' level, and they will kidnap as many innocent victims for as many horrifying genetic experiments as it takes to do so.
* Doctor Who: The Movie, the Doctor and Lucy spend most of the movie arriving just too late, defeating the monster left behind in this or that timezone by the Master only to realize that he has already moved on to the next one. Since two or three of the locations are in fact castles, the Doctor even gets to say "According to my time readings, he's in another castle", thus not only playing this trope straight, but even almost verbatim!
* Doctor Who, the newly-regenerated Doctor takes a single bite of bread and butter, then emphatically rejects the meal by Frisbee flinging the entire plate, bread and all, out of the front door, cuing off-screen shattering sounds and a cat yowling in protest.
* Doctor Who: The new series has numerous references to Time Lords shifting genders during regeneration, and the Time Lords themselves do not care.
* Doctor Who: The Next Life ends seemingly happily: The Doctor, Charley and C'rizz are back in the main universe (or in it for the first time in C'rizz's case), acting like friends again and ready to go on adventures. Rassilon and Kro'ka got their comeuppance, and it seems everything worked out for the best. Except for the fact that the Divergent Universe is doomed to reset over and over again. All of the stories set within the Divergent Universe will repeat again and again, but without the Doctor, many of them will have a much less happy ending for those involved, to say nothing of what will happen to the Eutermesans without C'rizz around. And even beyond that, Zagreus and Keep have decided to team up to terrorise this universe, so who knows what havoc and misery they will sow. The TARDIS team may have achieved their happy ending, but for the residents of the Divergent Universe, the horror is only just beginning...
* Doctor Who? The Ninth Doctor had an amazing passion for his black leather jacket, and the Tenth Doctor was very attached to the coat he got from Janis Joplin, always making sure to tell people not to "hurt" it, since well it was a present.
* Doctor Who. The Ninth Doctor occasionally called humans "stupid apes" and Twelve declared Earth to be the "Planet of the pudding brains".
* Doctor Who", the Ninth Doctor posits that Simon and River were both given some genetic "adjustments" (more so in River's case).
* Doctor Who. The only time we see her home city, it fits this trope (and, indeed, the original script suggested Brasília as a model).
* Doctor Who, the only way [known to the culture featured in the story] to navigate in trackless and non-linear hyperspace is to have a navigator with precognitive powers who can foresee what path the ship needs to take to arrive safely.
* Doctor Who". The original scriptwriter disliked the changes made to his story in development, and years later novelised his first-draft scripts.
* Doctor Who", the people of Tigella live in a city where everything is powered by a single alien artifact, which gets destroyed at the story's climax; although they're initially horrified by having to manage without it, it's presented as ultimately being an opportunity rather than a disaster.
* Doctor Who) the planet Aridus is a desert world and the planet Mechanus is inhabited by robots.
* Doctor Who, the plan to defeat the Daleks revolves around trying to unplug their city’s electricity supply. It works because the original Daleks drew their power from the floors of their city and had no internal power supply.

* Doctor Who, the plasmavore already looks human, but has to drink human blood in order to scan as human.
* Doctor Who. The psychotic Sharaz Jek plunges the Androzani system into a costly war for the sole purpose of getting revenge on the business partner who betrayed and permanently disfigured him. General Chellak, on the other hand, is willing to sacrifice virtually his entire force in a suicidal frontal assault against Jek's killer androids in order to kill Jek.
* Doctor Who: The Raston Warrior Robot in "The Five Doctors". Built as the ultimate killing machine, a single one is able to destroy an entire squad of Cyberman without taking a scratch in return.
* Doctor Who There are so many works devoted to relations between the tenth Doctor and the copy regenerated from his preserved hand that they have their own trope name: Tencest.
* Doctor Who there's an aristocratic, arrogant, and conceited swashbuckling hero, Miles Dashwood, who goes by the alias Miles Dashing of Dashwood. (Not improvised on the spur of the moment, so he doesn't have that excuse.)
* Doctor Who", there's an eerie hotel in which each room contains the worst fear of someone who has once been trapped in it. Finding the door meant for you means a perversion of your particular faith and subsequent death. There is no door out unless you have no faith in the first place.
* Doctor Who", there's one of the wi-fi network, made up of blue lines with red patches spreading to show the Great Intelligence's takeover.
* Doctor Who. The result is generally considered to be one of the creepiest, saddest, yet ultimately, most heart-warming episodes in the show's history.
* Doctor Who "The Satan Pit" features seat belts in the rocket (they're even plot relevant...). Mind you, they're not the kind of seatbelts you'd usually find in a spaceship (this was a production oversight).
* Doctor Who". The Scoobies are not impressed. But then the Initiative are military. If they don't have a multiple-word phrase they can abbreviate, they wither and die.
* Doctor Who, the section that covers series 2. This is a "series 3 and 4 with Rose" story. In the fics covering those seasons, the Doctor still takes on Martha and Donna as companions respectively, but they are now tritagonists instead of deuteragonists.
* Doctor Who, these elements are discarded in favour of just a neverending story full of aliens.
* Doctor Who the show- but it serves the same purpose of catching fast-forwarders off guard.
* Doctor Who the show, but the fights are still going on. Increasing the effect was that whether the Doctor was romantically interested in Rose varied hugely, depending on who had written any given episode. It got even worse from Rose's brief return in Series 4. Her haters hated her appearing again, while many of her fans felt it negated one of the best companion departures.
* Doctor Who, the shows were so degraded it was like watching it through a snow storm.
* Doctor Who - The Sixth Doctor: The Last Adventure, the Wolverines are a race of wolf-like humanoids who transform into hulking, hairless proto-humans when exposed to sunlight. Most of the race abhor their animalistic alter-egos and avoid sunlight at all costs, but a small band of rebels feel they should embrace their human side and hold secret transformation parties.
* Doctor Who", the Stenza species hold ritual hunts on other planets, in this case Earth, and they must be given permission before their travel pods can be teleported to their destination. Unfortunately, the permission takes the form of a glowing button with no instructions, so all it takes is a human ignorantly pressing it to give consent.
* Doctor Who. The story seems to imply she's not entirely wrong to do so.
* Doctor Who, the Sycorax use samples of A Positive that they took out of a satellite to control everyone in the world of that blood type.
* Doctor Who: The TARDIS appears to be technological, but at least some of it is

"grown". And it certainly has sentience, though it cannot speak and only occasionally directly affects a story of its own volition.
* Doctor Who: The TARDIS has gotten this impression on more than one occasion.
* Doctor Who, the TARDIS's soul is forcibly ripped out and placed in a human body. When the TARDIS next bumps into the Doctor, she kisses him and then gets the idea to bite him, gleefully declaring "It's like kissing, only there's a winner!"
* Doctor Who: the television itself is just a frame in front of a set of green miniblinds, and "turning the television on" is done by closing the blinds.
* Doctor Who), the template of "alien-fighting institute founded by a past monarch" makes it to Russia and Germany.
* Doctor Who, the Tenth Doctor initially regards the discovery of the war as just another crisis for him to resolve, but acknowledges that it’s become personal when he recognises the vampire servant girl Erika as none other than Reinette Poisson, Madame de Pompadour, his own former lover.
* Doctor Who", the Tenth Doctor refers to the "ripe old smell of humans" while inside the bunker.
* Doctor Who the Third Doctor spent much of his time on Earth driving around in 'Bessie', an antiquated canary-yellow roadster which on first glance would look the furthest thing from 'cool' you could think of. It's quickly revealed, however, that the Doctor's constant tinkering and playing around have made it a super-powered car that anyone would kill to drive.
* Doctor Who: The Thirteenth Doctor is loud, socially awkward, and extremely excitable, to the point of jumping up and down like a child when she gets a package delivered to her by a robot.
* Doctor Who, the Time Lords were one of the earliest races to evolve, and they either seeded the universe with their genetic material or affected the fundamental properties of the universe itself, so it's not that Time Lords are humanoid, but humans are "Time Lord-oid."
* Doctor Who: The title character has dozens of nicknames, many of which fall under this trope, including "Fate's Accomplice", "The Vessel of the Final Darkness", "The Evil One", "The Great Scourge", "Shadow-thief", and "The Beast".
* Doctor Who", the titular beings are initially thought to be non-sentient—but the human scientist points out that their necklaces look remarkably like DNA double-helices.
* Doctor Who. The "treacherous" counselor is actually innocent and has been set up to take the fall by the President himself.
* Doctor Who the Twelfth Doctor. Not long afterward, in anticipation of the 50th anniversary special "The Day of the Doctor" more marathons were run, this time including serials from the classic series.
* Doctor Who: The use of this for communication purposes is quite commonplace. Even the TARDIS does it.
* Doctor Who, the villains don't bother to gag her as no one hears her over the sounds of the fair.
* Doctor Who: The war between the Daleks and the Mechanoids in "The Chase" is full of these.
* Doctor Who, the War-Feeder has red eyes. This also happens to the bodies he possesses.
* Doctor Who: The war that led to the creation of the Daleks was not fought with nuclear missiles but in fact "neutronic missiles". Presumably this was done because it gave them more creative freedom over what they could say the weapons do/did; for example, real nuclear missiles would just burn or vaporize a jungle rather than petrifying it.
* Doctor Who the way the witches want it. The landlady is subsequently killed due to her bad timing.
* Doctor Who: The whole concept of the oft-mentioned Time War in the new series, with the Time Lords themselves waging war against a galaxy-spanning Imperial Dalek fleet. The war was so big, most other species were too technologically underdeveloped to even notice.
* Doctor Who, the woman who rebuffs the Doctor's warning by stating that the

biggest danger at the party is choking on an olive is one of the first people the mutated Lazarus kills just moments later.
* Doctor Who the Worm Kings can heal themselves by consuming other life forms. The title villain, King Wurzin, was wounded by time travel and so needs to keep eating people.
* Doctor Who", the writer Ian Briggs intended the little girl to represent innocence but was dismayed by the choice to put her in a Mini Pops-Esque dress which caused controversy in both fan and media reviews.
* Doctor Who, the writer originally wanted to play the trope straight, but the lack of budget prompted her to lampoon the trope instead.
* Doctor Who: they bare their teeth and your brain puts it in above the human face that it's also generating, hence fangs; your brain doesn't know what to add for the sides of them you're not seeing, so they appear to have no reflections.
* Doctor Who (they exist and are technically legal tender, but are only made in small runs as collector's items) and the price is actually not far off what you'd expect to pay for that drink order in a British pub in 2013.
* Doctor Who, they knew to expect a ratings spike whenever it happened.
* Doctor Who. They realize this when it finally dawns on them that the statues only have one head each, and the planet they're on used to be inhabited by a two-headed race.
* Doctor Who they were being "helpful", trying to restore their beloved show to its former glory. Unfortunately, Michael Grade (who, so the legend goes, was looking for an excuse to can the show anyway) interpreted the complaints as demands to cancel the series. So he did.
* Doctor Who, they were the mutated descendants of a people exposed to too much radiation (hiding inside pepper-shaker shaped travel machines). Turns out, they didn't need to worry about the radiation and would actually die if the rads were turned off. This dependence on radiation was retconned or ignored entirely in every subsequent appearance by them.
* Doctor Who: This almost seems to be a job requirement for New Series showrunners.
* Doctor Who, this effect happened to the Doctor just after his regeneration scene.
* Doctor Who: This happens in a great deal of stories, classic and new series alike.
* Doctor Who, this happens to Ian. He discovers the key in a display case, with a dead man lying on the floor nearby. Soon Ian himself is knocked out by a man who steals the key. Before he leaves, the man frames Ian for the murder of the mutilated body by placing the bludgeon in his hand.
* Doctor Who", this happens to Osgood when the anti-heat-barrier machine explodes.
* Doctor Who: This happens to the Doctor a lot, usually when trying to convey concepts far beyond their companions' understanding.
* Doctor Who. This has no impact on her attractiveness; in fact, it is stated that due to her new state, she will never age, therefore remaining as a beautiful woman in her late 20s effectively forever.
* Doctor Who: This has, unsurprisingly, come up several times, though the Doctor's had no trouble (usually) meeting past versions of himself.
* Doctor Who (This is mostly an irrational phobia, though. The pre-1989 show very rarely did long-term plot arcs, and they lasted a season at most. Even the post-2005 show tends to wrap up all its arcs and start completely new ones whenever there's a change of showrunner.)
* Doctor Who, this is Ryan, Graham and Angstrom's response to a spaceship crashing in their direction.
* Doctor Who this results in a large number of TARDISes-within-TARDISes, with the "innermost" one opening to a hitherto-nonexistent back door on the original TARDIS.
* Doctor Who: This show is notable for its extensive use of Plot Armor throughout its long run.
* Doctor Who", this trope is invoked with animatronic bats in the haunted house.
* Doctor Who, this trope is reconstructed with a woman keeping a number of deformed and disabled people away from society. But in a bit of a twist, she's quite nice to them, treating them almost like family, and refers to them affectionately as

"mooncalves". The story takes place in a Dystopia where they wouldn't be safe anywhere else.
* Doctor Who: This trope is used to good effect with the Weeping Angels, angelic statues that animate when no one's looking at them (or in darkness). So when the lights are flickering, you see their slow transformation into horrific monsters getting closer... and closer... and closer...
* Doctor Who: This trope runs through the series, even from the beginning. A lot of the time, the Doctor's role in a story is to bring up the proverbial elephant that locals won't discuss.
* Doctor Who (though it is used for humour in the Big Finish universe). In the 2015 Christmas special the Twelfth Doctor took the chance to deliver how the standard shock to seeing the inside of the TARDIS should be done in this manner, this was at a time when River Song didn't know his identity and was borrowing the TARDIS.
* Doctor Who... though the Doctor can catch one in his hand without any apparent ill-effects.
* Doctor Who, though the latter is at first upset when she left him to go with the Doctor but they maintain a friendly relationship afterward.
* Doctor Who, though we never saw any of his family aside from his granddaughter, it's heavily implied that the Doctor was one of these, due to most of his incarnations being wonderfully eccentric.
* Doctor Who threaten execution for murder, physical assault, obstruction of justice, and playing music too loudly.
* Doctor Who, three newspaper front pages telling about Agatha Christie's disappearance are shown in this manner.
* Doctor Who Time Lady, Patience is unable to regenerate after being shot through her brain.
* Doctor Who, Tish sees the hospital Martha works at has its own personal raincloud and references the trope. It turns out to be a side-effect of Judoon teleportation.
* Doctor Who (Titan) after he impersonates her dead mother in an attempt to manipulate her.
* Doctor Who (Titan) a nanobot swarm attempting to take her over, and is surprised to discover that she has no inner darkness whatsoever.
* Doctor Who (Titan) between two species that is constantly moving throughout the universe. One page shows a long line of coffins floating away from the space station into the local sun.
* Doctor Who (Titan) comics, it is strongly implied that the Doctor's contemporary-origin companion Cindy Wu is descended from one of the clones that the Paranestene created from her in ancient China.
* Doctor Who (Titan) comics, the TARDIS deliberately incapacitates Abslom Daak, driving him to a violent meltdown, by telepathically bringing up a memory of his wife's death at the gunsticks of the Daleks. It's later revealed that the mere mention of the word "exterminate" has the same effect on him.
* Doctor Who (Titan) cool to be a giantess for a while, and that she'd have an easier time keeping her students in line if she were always that big.
* Doctor Who (Titan) is a series of short stories, one for each Doctor from 1 to 12, which each involve the number 13 in some way. In some cases this is deeply hidden, such as an alien race whose biology is based on aluminium (which, not mentioned in the story, is atomic number of 13) but it's always there.
* Doctor Who (Titan) kind of cool when it's all over and she's returned to normal.
* Doctor Who (Titan)-powered alien, by deliberately crashing an orbiting space colony into the city of Mumbai.
* Doctor Who (Titan) Third Doctor miniseries... although in keeping with the seventies setting (and the Doctor's avoidance of providing too much future knowledge to UNIT) the word itself is never used, the closest being "micro machines".
* Doctor Who (Titan) Thirteenth Doctor Christmas Special story has the Thirteenth Doctor and fam fight another completely different Krampus, who uses the pseudonym "Mr. Henderson" despite being apparently female. She is an entity that feeds on fear and an enemy of Santa. She was plotting to send out brainwashed alien "Santas"

to terrorise Earth, in order to nourish herself and discredit Christmas for a generation.
* Doctor Who (Titan): Twelfth Doctor ends with the unnamed protagonist going to a cafe and the final panel is from this angle.
* Doctor Who (Titan). When the Doctor destroys the prison that contained the souls, Kali loses her power and Clara is restored to normal.
* Doctor Who, to an extent. The Doctor is on an endless thrill-seeking journey in time and space, and tends to pick up similarly adventurous people they meet along the way. When the current companion leaves - usually after a particularly big adventure, at least in the revival - the process starts all over again.
* Doctor Who to check a toiletry bag containing a message from an informant, and is just finishing up when a creature emerges from the wall. As the head of MI6 explains to the Doctor and her companions later, she was later found unconscious in the bathroom. The Doctor discovers that the agent's DNA has been corrupted and rewritten, making her effectively a shell with a human appearance.
* Doctor Who to fall into this category, rather than "Pop Between Realities"). During the hiatus, when books and audios become the main storyline, they stop being "Expecting Someone Else", and get a new convention where they're titled by a relevant quote from the series by someone other than the Doctor.
* Doctor Who to falsify evidence in order to secure the Sixth Doctor's conviction.
* Doctor Who to insult him, but the Doctor assumes he's talking about his escort instead:
* Doctor Who took over as showrunner, but the soap influences never really went away.
* Doctor Who" took place on a space station featuring a multinational crew, nearly all of whom were played by British actors adopting fake accents. One such crewmember was the Irish Sean Flannigan, played by English actor James Mellor.
* Doctor Who to reprise his role as the 3rd Doctor, in what was possibly his last filmed performance.)
* Doctor Who torments a group of humans on the planet where it's imprisoned by seemingly identifying their darkest secrets ("The captain, so scared of command.. the soldier, still haunted by the eyes of his wife..."). The Doctor, who is naturally a bit sceptical of this "the actual Devil" thing, then points out that for all its seeming omnipotence, the Beast is actually just playing on very common fears and bringing up incredibly vague statements that could refer to anything.
* Doctor Who to the Eleventh Doctor while he's still wearing Ten's outfit, including locking it in a car door to get information out of him. This is one of the many reasons the Doctor switches to a bowtie.
* Doctor Who to the New Who series) are set in the small Welsh hamlet of Cwmtaff in 2020.
* Doctor Who, touching any of the Doctor's companions is a bad idea of suicidal proportions. The Doctor also considers himself the protector of Earth.
* Doctor Who towards the boyfriend of his current companion. We're meant to believe this is down to jealousy, but the boyfriend realises it's because the Doctor is worried he's not good enough for her. He helps to save the world by the end of the episode, so the Doctor grudgingly accepts he's good enough.
* Doctor Who, transhumanism appears in good and bad lights. Don’t think that it’s a coincidence that most of the transhumanism-is-good examples come from the new series.
* Doctor Who trap their victims in a dream state while they slowly liquefy and consume their brains.
* Doctor Who travelling back in time to the beginning of the Universe and self-destructing.
* Doctor Who tricks, although many of the bad guys are genuinely terrified of him.
* Doctor Who tries to pickpocket the Doctor's TARDIS key. The Doctor doesn't notice, but his companion Amy does and asks for the key back.
* Doctor Who trying to comfort the Doctor and at one point he begins to say something to her which she interrupts with a hug and "Everything you're about to say, I already know. Don't do it now; we've already had enough bad timing." Rather

than saying anything herself along these lines (having made a promise to her now-deceased boyfriend in the previous season never to say "I love you" to anyone else again), she strokes the Doctor's face instead.
* Doctor Who, turning into each of the Tenth Doctor's companions in turn:
* Doctor Who TV listings by feeding the then-BBC-sponsored publication false actor names for its listings, most notably crediting actor Anthony Ainley under pseudonyms so that the return of villain the Master could be kept a surprise. The producers went so far as to arrange for an actor who played a recently killed-off character to make a cameo in the next episode so they could get him listed in the credits and maintain the surprise of his death.
* Doctor Who TV Movie were licensed replicas of the classic series' TARDIS key in production at the time, which the production team bought from an American scifi memorabilia catalog.
* Doctor Who Twitch marathon spawned a meme from Ian Chesterton's excited reaction to returning home to "London 1965!"
* Doctor Who. Understandable, as he was the one to push the metaphorical button that ended the time war and destroyed Gallifrey.
* Doctor Who). Unfortunately, the Cybermen have already determined them to be dangerous elements that are to be deleted immediately, despite the Doctor's protests that they surrendered willingly. Fortunately, they manage to escape before they could be executed.
* Doctor Who. Unfortunately, the next person to come that way is the Doctor.
* Doctor Who" uniquely have guns mounted in their heads, in the "third eye" position.
* Doctor Who, UNIT is at first routed because the Sontarans have rendered their weapons inoperable. They return the favour after bringing in new bullets unaffected by their technology.
* Doctor Who", UNIT sends a helicopter to pick the TARDIS up from Trafalgar Square and deliver it to the Tower of London. What they didn't know was that the Doctor and Clara were still inside it at the time.
* Doctor Who universe — Anathema, Arcadia, Heaven, Hell, Eden, Oblivion, Sheol.
* Doctor Who until 2005. It has since become one of the most successful works of fiction on British television.
* Doctor Who, until the Doctor shows up. The sole scientist at the end of the universe trying to get a rocket ship to work, so he can send everyone to Utopia.
* Doctor Who (upon seeing a photo of the miniskirted Amy), "My God, that woman is made of legs!"
* Doctor Who (used throughout the 1963-1989 Classic Series; dropped in the 1996 telemovie and the 2005-present revival series, save for 2009's "The End of Time")
* Doctor Who used to encourage its writers to do this from time to time:
* Doctor Who uses Bank Gothic in its Regular and Bold Extended versions.
* Doctor Who uses the latex mask routine several times in the Third Doctor era — totally convincing while he's wearing it, the mask suddenly becomes an obvious lump of rubber when he takes it off. In one episode, the disguise also seemed to involve being nearly a foot shorter while wearing the mask.
* Doctor Who: Usually, only a small part of any given world is shown, so it is not possible to generalize about the entire planet. However, there are a few cases where a world is explicitly stated as being a Single-Biome Planet:
* Doctor Who usually only has the Doctor and 1 companion (2 in series 6), not including brief guests, as most plots are finished in a single episode.
* Doctor Who, Varan decides to turn on the Overlords as soon as he realizes he's been played for a fool — forget his people!
* Doctor Who version of Jackie Tyler, Rose's mother, who chews out her secretly-estranged husband for petty details, flaunts diamond-studded accessories and withholds wages from well-meaning employees if they accidentally offend her. And since this is Jackie, she offends easily.
* Doctor Who version of this. The Doctor is a monster-fighting alien genius with a machine that can go anywhere in time and space, although Earth tends to feature

heavily.
* Doctor Who version, when Amy finds out that the worst day of her life was, apparently, the day when she dropped an ice cream she was going to eat. The Doctor takes her back to buy herself a new one.
* Doctor Who was created as a possible pilot for a revival. It didn't pan out, but it gave the writers of spin-off media a new canon Doctor to play with until the show was revived for real in 2005.
* Doctor Who was given a supernatural explanation in "The Unicorn and the Wasp".
* Doctor Who, was influenced by a trio of aliens to serve as a summoning ritual for their species.
* Doctor Who was intended to be — chiefly most of the historical stories (e.g. "Marco Polo," in which our heroes meet Marco Polo in the Pamirs and travel all the way to Peking with him).
* Doctor Who was intentionally written with an anti-pacifist message. However, it's also possible to read it as encouraging student meddlers to fight for justice, rejecting rote learning and irrational laws.
* Doctor Who was present for the filming of a scene involving The Girl and read in his lines.
* Doctor Who was repackaged in the US (and other places too?) as "movies" with a full story - or leastwise four or five episodes - all put together in one presentation, cutting out the opening/closing credits for all but the opening of the first and closing of the last episode. So the cliffhanger of any given episode tends to be resolved immediately.
* Doctor Who was so mysterious that not even the Doctor knew what it was, where it came from, or what its goals were.
* Doctor Who was stranded on Earth, his benefactors at UNIT became harried by alien visitors, too. It later went out of style until the reboot.
* Doctor Who was that he'd be played by a conventionally handsome, charming individual, to contrast with the Doctor's more funny-looking appearance. As a result, this dynamic is very apparent in the first Doctor/Master matchup — the Third Doctor and Roger Delgado. Later the trope finds itself ignored as much as it's played straight, with there not being a significant gulf in looks between John Simm and David Tennant, and with the odd-looking-but-healthy-and-attractive Tom Baker being pitted against a rotting, hissing undead corpse version of the Master.
* Doctor Who", was that Sontarans are actually biologically female. The New Series introduced Strax, a Sontaran whose misogyny is compounded by the fact that he has no understanding of gender at all and frequently misgenders everyone around him. Also, his two best friends are both women. And he can produce 'enormous quantities of lactic fluid'.
* Doctor Who was the 7th episode in its series, and the 777th in the show's nearly fifty-year run. Three days after it aired, on June 7, the BBC officially announced Series 7.
* Doctor Who, was thrown out into the killing rays of Midnight's sun, the entity itself could clearly already survive on the surface somehow, so it's unclear if this actually destroyed it. Even the Doctor isn't sure, and taking no chances, he convinces the authorities to seal the entire planet off to prevent anything like this from happening again.
* Doctor Who wax lyrical about its brilliance as a comment on modern life. Seeing three people and a robot dog pile into it before it de-materialises in front of them doesn't change their mind.
* Doctor Who way for the Doctor's toolkit and several of the Doctor's enemies, including every iteration of the Cybermen up to "Revenge of the Cybermen."
* Doctor Who way. Many of their more notable pieces of technology, especially anything created by Rassilon or Omega, are magical items in all discernible respects and some are capable of potentially universal effects.
* Doctor Who) wears a great-looking off-white trenchcoat, in contrast with the run-down appearance of all the other humans.
* Doctor Who went through such periods when he'd have a companion or companions who didn't actually want to travel with him. This was actually the show's original

premise with Ian and Barbara. Later, attempts to get Tegan back to Heathrow and her flight attendant job failed for quite a bit. When they finally dropped her off, it was found out in the next story she'd been fired and she willingly joined the crew.
* Doctor Who were filmed under a different name to the one they were broadcast under.
* Doctor Who were food-related. In order: "Are you willing to eat absolutely anything?" "Do you ask what it is first?" "Would the answer dissuade you?"
* Doctor Who were made by the same people and shared several actors, sets, and locations, so B7 became the original adult sister show to Doctor Who. Most B7 fans are also avid Doctor Who fans.
* Doctor Who were sometimes treated as Space Commies compared to the Daleks as Space Nazis. They want to conquer and assimilate humanity because (at times) they sincerely believe that they're the perfect society and have the obligation to bring its blessings to everyone else, they're unemotional, they lack individuality and their plans are often based (at least initially) on infiltration rather than all-out force.
* Doctor Who we're told she was once stuck as a 1960s policewoman). The Doctor's cyborg companion Compassion later takes on characteristics of the TARDIS and became the prototype for the class.
* Doctor Who: Whatever may have happened in the old days, "The Christmas Invasion" raised some loud arguments in fandom because the Sycorax and "Pilotfish" used the same visual effect for their teleports. The plot thickened somewhat when the "pilotfish" returned for "The Runaway Bride" and were revealed to have nothing whatever to do with the Sycorax.
* Doctor Who: When a military dictator seizes control of Britain, he renames it New Britain. In 3350, Britain on the recolonized Earth was also named New Britain, ruled by a supercomputer from the city of New London.
* Doctor Who, when Amy was abducted by the Silence and forced to give birth in their custody for the exact reason that she was pregnant. Specifically, her baby was conceived in the Time Vortex and thus has the ability to regenerate like a Time Lord.
* Doctor Who" when a soldier attempts to stop Grun, the King's Champion. He punches Grun several times to no effect.
* Doctor Who. When Casmus tells her about the importance and significance of dreams, she fires back by mentioning that hers are basically useless.
* Doctor Who, when Donna steps out of the TARDIS and sees the awesome snowy vistas of the Oodsphere, her first impression is that it's bloody freezing. The Doctor encourages her to see the wider picture, appreciate the incredible views, consider how amazing it is that an average woman from Chiswick who was getting up, working, coming home, watching telly and going to bed is now travelling across space and time to land on alien worlds... and finds she's gone back into the TARDIS to get a coat.
* Doctor Who when he and Ace are hiding from a Dalek in "Remembrance of the Daleks".
* Doctor Who when he reveals this plan (amongst other equally frightening suggestions...).
* Doctor Who. When he tells her his name, Tracer naturally responds with "Doctor Who?" Cut to the scriptwriter looking at the gag he's just written, and shaking his head in disgust.
* Doctor Who when his bonus (obtained by draining the ball in a specific spot) is awarded.
* Doctor Who when his equipment blows up, producing copious amounts of smoke. Jo grabs a fire extinguisher and douses the laboratory bench, only to get shouted at by the Doctor for ruining three months of work.
* Doctor Who when his programming as an Auton takes over; fortunately, both of them get better in time to help the Doctor save the universe.
* Doctor Who when it aired in Hong Kong, South Korea, Taiwan, Thailand, Indonesia, Malaysia and Singapore. The hot air balloon made of human skin in the same episode was apparently just fine, though.

* Doctor Who. When Jo points out the Thals can escape using the Dalek ship, the Thal she talks to is afraid that will make them hesitate when they are needed.
* Doctor Who" when just about every companion of the last five years comes together in a united plan to contact him.
* Doctor Who". When making telepathic contact with Jo Grant, at first she hears a cacophony of voices. But the Doctor gets her to concentrate on the "main" one and we get a clear conversation about how to save the day.
* Doctor Who, when science officer Ida is hesitant about coming up from the underground ruins, acting captain Zach retorts "Okay, that was an order."
* Doctor Who. When she gets lost, the Doctor sends her a plot trinket to keep her sane until he can find her in there and pull her out, rescuing her.
* Doctor Who. When she tells him her husband is dying, he adds "I'm going to need a bigger flowchart." (As the title suggests, it's not him.)
* Doctor Who when the Doctor experiences sharp pains and is eventually incapacitated because his previous regenerations are being taken out of time.
* Doctor Who when the Doctor goes through van Statten's collection of alien weaponry tossing them aside with comments like "broken - broken - hairdryer". When he finds one that he thinks is suitable, he says "Lock and load!" just in case we missed the point.
* Doctor Who when the Doctor hijacks their spacecraft. The Doctor points out that it's not much of a threat to someone who's dying anyway (the Doctor having been infected with a fatal disease earlier).
* Doctor Who, when the Doctor meets up with the amnesiac Brigadier, teaching at a boys' school, the Brigadier's attitude undergoes an abrupt change when the Doctor mentions UNIT — he still doesn't know him, but anyone with sufficient secret clearance to mention it ought to know better than to talk like that.
* Doctor Who when the Doctor remarks that it's a tired old trick, but there had to be a time when it was new enough to work.
* Doctor Who"; when the Eleventh Doctor turns himself into a human to escape his latest enemies, his new identity's history interprets his 'marriage' to River Song as an affair as that is the closest context their relationship has from the perspective of a 1940s culture.
* Doctor Who, when the episode aired months before the book was released.
* Doctor Who, when the heads of all of the Fifth Doctor's companions (including the short-lived Kamelion and, most notably, the deceased Adric) appeared to beg him to go on living, but only when his nemesis the Master appeared calling on him to die did he finally regenerate.
* Doctor Who - When the Tenth Doctor appears before Rose who's trapped in an alternate universe to say goodbye he has to make clear that they can't touch, he's just an image.
* Doctor Who: When the Terileptil leader destroys his sonic screwdriver in "The Visitation", the Fifth Doctor's response is to say:
* Doctor Who" when Wilf asks to come along with the Doctor to escape his overbearing daughter Sylvia:
* Doctor Who. When Wilf first enters the TARDIS, he says that he expected it to be cleaner. The Doctor is immediately offended.
* Doctor Who where a major character is taken out like a third-rate extra.
* Doctor Who where a stray electromagnetic blast from an alien war in a distant solar system has hit a future Earth and long term disabled all electronics.
* Doctor Who", where crows are actually helping the protagonists and the Picts, warning them of danger. At the end of the episode, one of the Picts asks the crows to remember a fallen friend named Kar. They have, ever since word they say since then ("caw") sounds very much like her name.
* Doctor Who where Donna Noble never met the Doctor, because she took a right turn instead of a left.
* Doctor Who, where he turned to his friend and shouted: "I knew we should have turned left!"
* Doctor Who wherein a character asks for permission to make a statement in such detail that it renders actually making the statement completely redundant.

* Doctor Who where the Doctor made the main reactor of the weapons factories of Villengard go critical is mentioned. This caused the factories to be vapourized.
* Doctor Who, where the Doctor once pointed out the fact that humans are the only species in the universe that has invented edible ball bearings.
* Doctor Who, where the Doctor travels into a surreal virtual world inside a computer matrix.
* Doctor Who", where the Führer gets locked in a storage cupboard early in the episode, and is still there when it ends.
* Doctor Who, where the natives of one planet VERY eagerly collect and cast off religions like they were baseball cards.
* Doctor Who, where the TARDIS never seems to land on the opposite side of the planet from wherever the local intrigue is going on. The episode "The Doctor's Wife" tells us that the TARDIS is doing it on purpose, even in the early seasons when the ship's flights were entirely random. For example, despite having an entire planet to argue over, the Thals and the Kaleds apparently live within walking (or gliding) distance of each other in "Genesis of the Daleks".
* Doctor Who, where the Tenth Doctor defeats a ridiculous slug-like creature by throwing "sodium chloride" at it after spouting off lines of obvious expospeak.
* Doctor Who where they've been chained up in the desert to die on an alien planet. A large Vasquez Rocks-like formation is in the background.
* Doctor Who, which can collapse anything into a single compressed gravitational singularity.
* Doctor Who which, despite being scheduled for 9 p.m. and touching on topics such as sex, manages to do so without going beyond a PG (or 12) rating.
* Doctor Who, which featured a character actually called "Baby Grandfather.")
* Doctor Who, which gives him self-esteem issues as a result. He tells the Doctor it's his dad's company.
* Doctor Who which goes into its effect on the fandom). On top of that, some serials (such as "The Ark in Space") were edited into a film and broadcast around Christmas.
* Doctor Who- which has been written featuring both Christopher Eccleston's Ninth Doctor and a fan-created Tenth Doctor played by Billy Connelly- features the Doctor investigating assassination attempts against his old ally, Ice Lord Ixlyr, eventually exposing the culprit when they confront the suspects and one of them mentions that poison was the first method used to try and assassinate Ixylr before any of the Doctor's allies brought it up.
* Doctor Who, which is set 20,000 years in the future, implying that it happens more than once.
* Doctor Who. Which is why both their servants, and those fighting them (like Amy's group) wear them.
* Doctor Who, which made it very difficult for casual players to learn the game.
* Doctor Who, which made it very difficult for some players to learn the game.
* Doctor Who which retain their memories and skills after the regeneration (not without suffering secondary effects).
* Doctor Who". While Ben pokes fun at her for it, she never really bothers to correct the mistake.
* Doctor Who", while hanging on to the out-of-control TARDIS for dear life at the beginning, the Doctor very narrowly avoids the spire of Big Ben passing between his legs.
* Doctor Who: While it isn't mentioned too often, the Doctor himself apparently had a very lonely and miserable childhood. He once remarks on the unpleasantness of being "the only kid left outside", and when asked if he knows what that's like emphatically replies that he does. In fact, all indications suggest that he had a grand total of one friend his own age growing up, and that was the Master.
* Doctor Who while sitting against the wall, holding their faces in pain.
* Doctor Who", while the Doctor and Clara are investigating the mess hall, she makes a comment and holds out her hand for a high five. He gives her a look and walks out of the room.
* Doctor Who, who is only five feet tall. This is fully played up in one scene when

Astrid literally pulls up a box and stands on it to give the Doctor a goodbye kiss.
* Doctor Who, who played the First Doctor, before the series had quite settled into its format.
* Doctor WhoWho's Afraid of the Big Bad Wolf," Rose does this to Mickey when he suggests that the Doctor has abandoned them. (Technically, he has, but through no fault of his own.)
* Doctor Who, who tried for sixteen years to get it back on the air. Say what you want about his storytelling, but he really loved the show.
* Doctor Who who wants to avoid hurting innocent civilians, he paints the alien's birthmark onto the foreheads of several humans and has them run through the assassin's line of sight, confusing him and forcing him to disable his auto-targeting software.
* Doctor Who who were rendered sterile by radiation in the aftermath of the twenty minute war they fought with the Foamasi.
* Doctor Who) will be shown explaining the situation and worldwide reaction to the event.
* Doctor Who, with all the time travel, alternate dimensions and clones the show's got going on. It's also meant that fans have had to come up with ways of keeping things straight.
* Doctor Who with Morgaine occurs before he ever travels to Camelot in the first place.
* Doctor Who, with some humans suffering a mental breakdown after confronting them.
* Doctor Who with the Doctor, and the combined efforts of the two of them eventually get the entropy field under control again, but the Master quickly realizes that he can do rather sinister things with that control, and as soon as the danger is seemingly over, he broadcasts a message across the universe, demanding that the all various races of the universe submit to him or he will unleash the destructive forces of the field again.
* Doctor Who, with the Doctor comparing a pig that was implanted with alien technology to serve as a decoy alien to "mermaids" made by Victorian sailors by stitching cat heads to fish.
* Doctor Who with the Doctor, she continues to adventure with the Doctor in secret, with Danny unaware of this. It does not end well.
* Doctor Who, with the only constant element being Matt Smith himself as the Eleventh Doctor.
* Doctor Who, with the same fate ready to befall Earth if the Doctor can't find a way to stop it.
* Doctor Who, with the Slitheen home planet called Raxicoricofallapatorius. It takes Rose an entire episode to pronounce it right. It also has a twin planet called Clom, home to a lesser race called the Abzorbaloff.
* Doctor Who witnesses to be certain of the truth. They frequently converse with each other during the trial in machine code and regard the involvement of actual organics in the judicial process as a tedious necessity.
* Doctor Who worthy elements with a childhood-like imagination and fantasy ethos.
* Doctor Who" (written during Uri Geller's heyday), when the Doctor needs to maintain a distinctive mental image so that a psychic ally can keep track of his location, and chooses the image of a bent fork.
* Doctor Who wrong, along with making up fictional family members for the real-life participants.
* Doctor Who wrote the scripts, why didn't they leave well alone, etc., etc.
* Doctor Who, Yasmin Khan is a second-year probationary police constable who wants to do something more challenging than resolving parking disputes. Her superiors mostly dismiss her out of hand when she asks to handle bigger things.
* doctor, you'd never know it!" in response to every accusation Niles makes towards him.
* Doctor Zhivago also stars Egyptian-born Omar Sharif as the title character.
* Doctor Zhivago. However, the novel version is quite personable when Yuri meets him, and gets humanizing moments like making sure that a wounded POW gets medical care and privately wishing he could sneak off from the war even for a little while

to see his family. In David Lean's film, Strelnikov is cold and hostile in person, claims "the private life is dead in Russia" with regards to his family, and the hints at his humanity are so subtle that it's easy to perceive him as being genuinely dead inside.
* Doctor Zhivago Subverted in that she slapped him first with her bare hand.
* Doctor Zhivago under threat of him and his loved ones getting deported or worse.
* Doctor Zhivago was already banned in the Soviet Union, but maybe they wanted to be sure.
* Doctrina Cristiana (c 1590s; one of the first known printed books in the islands—a Catholic catechism and prayer book, printed in woodblock)
* Doctrine of Labyrinths a lot more than it bothers Felix, who doesn't seem to have an issue with incest.
* Doctrine of Labyrinths apologising in a meaningful way and making a genuine effort to be more kind and supportive.
* Doctrine of Labyrinths are accomplished practitioners. They have been using this to keep themselves young and vital for who knows how many years. One of Vey's many epithets is "Queen Blood."
* Doctrine of Labyrinths by Sarah Monette. One of the main characters, Mildmay, was, in his teens, the most feared and competent assassin in the entire city. However, he didn't even get money for his jobs — it all went to his Keeper (a woman he was totally subservient to and abused by). And the after-effects of his past continue to haunt him, though he says he "doesn't feel guilty".
* Doctrine of Labyrinths: Damaging Mélusine's massive, 700-year-old walls qualifies as treason, which is odd, since they don't seem to serve much purpose beyond looking cool. Assaults are much likelier to come through magic than a physical invasion.
* Doctrine of Labyrinths due to a large, disfiguring facial scar from a knife fight.
* Doctrine of Labyrinths. Even when he isn't deliberately engaging with the dead, their presence makes him tired and nervous.
* Doctrine of Labyrinths for murder and treason, exile, and the horrible deaths of various people close to him.
* Doctrine of Labyrinths, he hasn't really done anything wrong, but the people in charge want him out of the way where he can't cause any trouble.)
* Doctrine of Labyrinths includes mention of necromancy, hydromancy, oneiromancy (dream magic), and geomancy (earth magic).
* Doctrine of Labyrinths is quite intelligent, he's also functionally illiterate.
* Doctrine of Labyrinths, it's actually sort of impressive he isn't more unstable.
* Doctrine of Labyrinths, Kay is put on display in public after he's blinded and forced to surrender his army.
* Doctrine of Labyrinths. Less squickily, a girl they meet on a journey develops a crush on Felix and decides it's true love; he has to explain to her that no, he's not interested.
* Doctrine of Labyrinths: Malkar is this to Felix. He really screws that boy up.
* Doctrine of Labyrinths Mildmay about his feelings, let alone acting on them - is understandably humiliated. Much awkwardness ensues.
* Doctrine of Labyrinths seem to be run this way, ranging from more or less benevolent to downright oppressive. Melusine in particular is jointly ruled by an annemer (nonwizard) Lord Protector and the Curia, a council of the most influential wizards.
* Doctrine of Labyrinths series by Sarah Monette is about a former child prostitute dealing with heavy trauma and receiving huge amounts more of psychological and sexual trauma even as an adult, including going completely insane and being forced into a Edwardian-esque sanitorium for quite some time.
* Doctrine of Labyrinths series is about a gay man, Felix, his brother, and their adventures. Felix is not the only gay character, either, and sexuality is heavily explored.
* Doctrine of Labyrinths she wanted to make it clear that the story didn't end with the narrative, and she definitely did.

* Doctrine of Labyrinths. The author has said that everyone in that world, even the ones with no magical powers, has prophetic dreams.
* Doctrine of Labyrinths, the Grevillian wizards created a space called the Nullity where magic doesn't work.
* Doctrine of Labyrinths thugs. Luckily, a real prostitute smoothes things over for him.
* Doctrine of Labyrinths. Vincent looks remarkably like her and has an unsettling tendency to get distracted by ghosts in the middle of conversations.
* Doctrine of Labyrinths wizard in the country, there's not much stopping him.
* Doctrine of Labyrinths would've created a bias against him regardless.
* Docudrama: Actual events are depicted with Artistic License filling in gaps and spicing things up
* Docudrama: Typically regarding whatever missing or dead woman is in the news this week (the movie about Natalee Holloway, the movie about Amanda Knox, the movie about the Craigslist killer, etc.), as well as recent scandals (the 2019 college admissions bribery fiasco and the NXIVM cult both got quick-turnaround movies). Also often adapts true stories about mothers trying to get justice for their sick/mentally ill/LGBT child.
* docudrama, where Hartnell is depicted as distractedly calling his new producer by his original producer's name.
* documentaries tourism has also rubbed off on neighboring towns, most notably La Push (home of Jacob Black and the Quileute tribe) and Port Angeles (the main town on the Olympic Peninsula, and where several scenes from the book took place).
* Documentary: An educational film about a real-life person or event where people familiar with the person or event are interviewed.
* Documentary come across like this. The most prominent example is Sam Harvey, a former bowling operator who lives alone and spends his days working on his collection of 400 pinball machines, complete with meticulous logs of owners' histories.
* Documentary features Rick Stetta, the 1991 Pinball World Champion who struggles to cope with his place in a world where pinball is no longer a major cultural influence.
* documentary. Mulder and Scully aren't playing fictional characters, they're being filmed as Mulder and Scully. It's as if there was an X-Files episode where they appeared on a talk show—we wouldn't call that a show within a show (even though it is) or breaking the fourth wall (even if they're smiling for the camera).
* documentary of the '70s, for instance, were likely connected to an ill-advised experiment in "nuclear fracking".) Of course, this film could be just another layer of the cover-up...
* document characters are and are not allowed to be depicted nude or in porn. He eventually gave up trying.
* documented by photographer Shannon Taggert tells the story of the oldest Spiritualist camp town.
* document on Macs (Command-Left/Right goes to the start/end of a line.) This is just one of many keyboard differences that trip up longtime users of either platform.
* documents the real-life (and pathetic) Mad Love between Linda Riss and Burt Pugach. After Riss ended her affair with him, Paguch hired men to throw lye in her face — blinding her permanently. He went to jail, but Riss dumped her fiance (who still wanted to be with her after the attack) and married Paguch after he got out. Certainly brings new meaning to the phrase "severe co-dependence".
* document (the Rig Veda) is roughly 3,400 years old. Sanskrit as a language didn't even exist 6,000 years ago; the precursor language Proto-Indo-European did, but it would be just as accurate to call that language "Old English" or "Latin" or "Bulgarian" as "Sanskrit" - they're all about equally removed from it in the family tree.
* Docu Soap: Follows the lives of real people, but may exaggerate or invent drama to keep things interesting
* Doc was originally introduced to lampshade how absolutely bizarre the Reds and

Blues were. Then his
* Doc, while being more patient, will not tolerate anyone messing with his present/future wife Clara or his best friend Marty. When Buford makes a rape threat against her and then shoves her to the ground when she kicks him, Doc ferociously struggles with and then breaks free of Buford's gang. Later, he stays on a moving locomotive to coax her safely into the DeLorean. His
* Doc Wilde parody, brings his kids with him on his adventures. He's been raising them to be just like him.
* Doc Wilde, when one of the adults becomes possessed and wanders from the camp, Doc's son is the only one to witness it, and tries to follow him, leaving him separated from the rest of the group.
* do deep down) that they don't butt heads over their differences like most other couples/pairings from the series do, but instead accept or even appreciate them.
* Dodenrit ("How about Natasha?" "But she's doing so well in school!"). The final lines of the song have the narrator himself, while celebrating that he can see Omsk, slip and be devoured, observing that "Omsk is a lovely town, but just a little too remote."
* Dodes'ka-den, two of the wives in the neighborhood amuse themselves by swapping husbands from time to time. The drunken husbands barely notice.
* DodgeBall: A True Underdog Story, a botched package delivery mixes up the uniforms of Average Joe's and some bondage enthusiasts. Due to the strict rules, Average Joe's is forced to play their first match in S&M gear, and as soon as they enter the arena, a mother in the audience covers her child's eyes.
* DodgeBall: A True Underdog Story and choosing not to respond to Pepper's more... outlandish comments.
* DodgeBall: A True Underdog Story and makes it appear as if dodgeball is hell. The actual sport is pretty childish, which is the point of the film.
* DodgeBall: A True Underdog Story, and that he's still bitter about it. Some people (including on this very site) actually took this seriously.
* DodgeBall: A True Underdog Story. Before the team's first championship game, their manager tells them he ordered everyone uniforms. However, when he opens the box, he finds BDSM leather-and-chain outfits (the uniforms end up going to a BDSM club). When the team refuses to put them on, the rule-savvy one points out that they're required to wear matching clothes. They end up wearing the leather for the game, much to everyone's shock, but get their real uniforms, when the BDSM club members show up with them.
* DodgeBall: A True Underdog Story dodgeball team, screaming that the team's loss shames Germany, their families, and David Hasselhoff!
* DodgeBall: A True Underdog Story DVD. The second (serious) one is an Easter Egg.
* DodgeBall: A True Underdog Story for Average Joes to win at the end, even if the details changed in different versions of the script.
* DodgeBall: A True Underdog Story Fran Stalinovskovichdavidovitchsky hails form the country of Romanovia, where Dodgeball is the national sport.
* DodgeBall: A True Underdog Story. He's back following an enlightening celebrity cameo.
* DodgeBall: A True Underdog Story: "I don't think they make a 'Sorry Your Dodgeball Coach just got crushed by two tons of irony' Hallmark card."
* DodgeBall: A True Underdog Story in every other line of dialogue, usually disguised as punchlines or throwaway gags.
* DodgeBall: A True Underdog Story is a cheerleader but is kind and sweet, in contrast to her rather nasty boyfriend.
* DodgeBall: A True Underdog Story, is one of these, contrasted with his antagonist White, who takes "you should not be satisfied with yourself" to unhealthy extremes.
* DodgeBall: A True Underdog Story is opened to reveal a single, lonely stack of bills. Even funnier is the fact that the man offering says that it's $100,000, which is more money than is shown. $100,000 would require ten 100-deep stacks of $100 bills.
* DodgeBall: A True Underdog Story: "Nobody makes me bleed my own blood!"
* DodgeBall: A True Underdog Story of them was busted for using steroids...and a

beaver tranquilizer...at the end of the match. Whether the others were using them also is up for debate.
* DodgeBall: A True Underdog Story, Owen proposes that they pay the mortgage off in Canadian dollars, presumably thinking they're worth less. Peter corrects him, and Owen then thinks they have to pay $120,000 (Gordon tells him he didn't need to add the numbers together).
* DodgeBall: A True Underdog Story, Owen sees his crush heading towards the bar just as the rest of the team is turning in for the night. He excuses himself by saying, "I gotta have a bathroom ...I mean...go to the—drink. ...in the bathroom." Dwight gives him a look and replies, "Whatever you do, wash your hands."
* DodgeBall: A True Underdog Story parodies this trope though still plays it mostly straight.
* DodgeBall: A True Underdog Story, Patches O'Houlihan uses a few exotic methods to improve the Average Joes' dodging skill, including crossing a busy street, and throwing wrenches at them.
* DodgeBall: A True Underdog Story: Patton Oswalt voices two different characters over the phone in different scenes of the same film. Since Oswalt was not as widely known in 2004, audiences were probably expected not to notice.
* DodgeBall: A True Underdog Story served this role: Assembled by the rich owner of Globo Gym solely for the purpose of defeating the group of poor misfits trying to save Average Joe's Gym via the Dodgeball Championship's $50,000 winner's prize.
* DodgeBall: A True Underdog Story. The film climaxes its over the top sermon on individuality vs. collective thinking and sports fixing by having the hero's team deliberately killed off all around him, until the quiet rebel in said hero snaps and he brutally destroys the entire opposing team by himself before scoring a goal nice and slow to drive the point home.
* DodgeBall: A True Underdog Story: The Purple Cobras are able to enter the big Las Vegas dodgeball tournament without a regional qualifying match because the dodgeball chancellor is a friend of White's.
* DodgeBall: A True Underdog Story: the teenage member of the gym is in love with a cheerleader at his school - however, his response to try and win her over is to join the cheerleading team himself. It's subverted, however, that the cheerleader is clearly in love with him as well, but he's a little too geeky to actually realize this.
* DodgeBall: A True Underdog Story throws in a love triangle in the last 2 minutes—and promptly goes with this solution.
* DodgeBall: A True Underdog Story training film includes a Little Jimmy character, who is visibly shocked when the Narrator addresses him in the beginning of the film.
* DodgeBall: A True Underdog Story, when the fat chick squashes Justin Long's character.
* DodgeBall: A True Underdog Story who falls in love with one of the Average Joes.
* DodgeBall: A True Underdog Story, who White Goodman calls his "fitness consigliere".
* Dodgeball's mockery of its channels, ESPN actually rebranded their college-focused ESPNU as ESPN 8: The Ocho for twenty-four hours on August 8th (yeah, 8/8) 2017, dedicating the day to esoteric (kabaddi), unpopular (darts) or barely-qualifying-as (the moxie games?!) sports. It was so successful they've repeated the stunt every year since (on ESPN 2).
* Dodgebrawl", Harold has kept the Killer Bass up all night with his snoring and that's after they already didn't get any sleep for a multi-day challenge. In retaliation, someone, almost certainly Duncan, pranks him by drawing a mustache on his face. It backfires because, even though everyone laughs at him, Harold actually likes the look.
* dodge bullets is never replicated to dodging much slower punches and kicks. This is due to Rule Of Cool, because if they did the fights would last all of five seconds.
* dodged the draft counterpart, who went to war, and sees his memories of fighting.
* Dodge FDA regulations in the United States by making no specific claims to treat

any organic disease. Make broad, ambiguous, science-like claims such as your product "Boosts immunity," or some such nonsense. You no longer need to prove your product has an effect, have no obligation to disclose any side-effects, and can't be sued should problems occur since you aren't stepping into the world of medicine
* dodge lasers and when he watches the Shrike fight it still moves too quickly for Kassad to notice even a blur.
* dodge like hell with their attacks, causing the bullets to fall harmlessly to the ground.
* Dodge. Missiles simply fly towards the player, and you get to hit the enemy with them.
* Dodge once did an ad for one of their vehicles...which also somehow became an ad for two different video games and several other things (I seem to also remember an MP3 player, a computer and a TV).
* Dodger, after Dodger beats up a man who was threatening his life, breaking his nose so he can't speak intelligibly, and drags him away to leave him on the street, he says: "You are a very lucky man. And if I ever see your face around here again you will have what we in the business call a very close shave. Understand? I will assume that was a yes."
* Dodger Although he survives the experience (and becomes a hero in the process), the peelers find a cellar full of the corpses of earlier customers who were not so lucky.
* Dodge ran a series of ads highlighting their history, culminating in a
* Dodger and Rita also fit this trope as Rita is clearly taller than Dodger.
* Dodger. But the novel itself is a pretty good guide to Victorian London.
* Dodger embarrassed about this, partly because it draws attention to the fact he got the suit cheap, and partly because it's never a good idea to attract a Peeler's attention, and Sir Robert is King of the Peelers.
* Dodger: he can't propose to Simplicity while he's a tosher (a job involving scrounging for lost valuables in storm drains and sewers, which has a decidedly irregular income and low life expectancy). Fortunately, by the time he makes this decision, he'd also acquired the contacts necessary to find a more respectable (and better paying) career for himself.
* Dodger, Mrs. Mayhew describes Dodger as an astute young man. He apologizes and says his best trousers are in the wash.
* Dodger turns out to be the father of his own twin sister's daughter - they had been separated as children, then met again and slept together as teenagers without being aware of each other's identity.
* Dodge's sister make Jeep plays up the fact that its vehicles are featured in
* Dodge the Bullet: Using fancy footwork and incredible reflexes to just dodge the shots entirely.
* dodge the final boss: just hop around like an idiot swinging the sword and you'll recover more HP than he deals.
* Dodge The Prank in Stages such as 5, 8, and 16 the crowd is just a bunch of silhouettes.
* Dodge This! on one of the agents who is about to shoot Neo from close range.
* Dodgy Toupee: It's obvious that this bald character is wearing a wig to cover up their baldness.
* Dodgy Toupee: Someone covers their baldness with a very obvious wig.
* Dodie Smith's Novels have Pongo married to Missus, Perdita married to Prince, Cruella being married, the Dearly’s having Two Nannies, and the two Badduns being Saul & Jasper.
* do different experience, considering they know their very lives are at risk.
* do directly apply the medication to the affected area; it's a local anesthetic.)
* do discovered it while hacking around their network) and/or beings that look innocuous, but are more than capable of stopping most troubles into which students could possibly get.
* Dod Kalm" explained rapid aging and ghost ships as side effects of bacterian activity.
* Dodongo's Cavern: it's explained that the place had become very dangerous with

the sudden resurgence of Dodongos and other monsters, and that Link was a hero for vanquishing them so the Gorons could mine the place in peace, and yet all the Dodongos and other monsters are still every bit as prevalent in the cave, even if you come back as an adult seven years later. The only one that stays dead is King Dodongo, and he hung out in the lowest basement of the cave which was accessed by a hole high up on the ceiling and was impossible to get out of.
* DoDonPachi comes with descriptions of Bomb Style, Power Style, and Strong Style on the Style select screen. Strong Style's description is juxtaposed with a difficulty warning every few seconds:
* Dodonpachi Dai-Fukkatsu enters with a lively cry of "Mateeeeeeeeeeeeee~!" as she prepares to engage the players. And she's very loud as well throughout the fight.
* DoDonPachi DaiFukkatsu, particularly version 1.5. The over-the-topness of the gameplay is either a fun diversion from past games' strictness, or a mockery of its own series.
* DoDonPachi Daifukkatsu right before your carrier gets shot down and you fight Hibachi.
* DoDonPachi Dai-Fukkatsu (Suzaku, Senkou, Kakou, Raikou, Rankou and Ryuukou) as bonus mid-bosses, triggered by fulfilling certain conditions.
* DoDonPachi Daifukkatsu uses these both as high-tech and as part of the bee motif of the series. They're all over the ship select screen, and each cutscene starts with a bunch of hexagons flying onto the screen and attaching to each other to form a screen. The "Expert Items" in the Xbox 360 port's Arrange B mode are also hexagonal and appear in sets of six arranged in a hexagon.
* DoDonPachi Saidaioujou by putting hexagons everywhere — the golden star medals dropped by defeated enemies are now 6-pointed stars on a hexagonal background, the level results screen has hexagons everywhere, the bee items now appear on hexagonal stands, the Type-B helicopter now has 6 propeller blades connected in the middle by a hexagon, and the list goes on.
* Dodon Ray Tao's Super Dodon Ray fails to even singe Tien, this attack is never seen again.
* Dodoria showcases himself as The Brute when he brutally massacres numerous peaceful Namekians and
* Dodsworth, Fran, a middle-aged woman who is trying to hang on to her youth, is happy enough that her daughter has given birth—until her husband calls her a grandmother. She's horrified, and after that she doesn't even want to tell anyone about the baby.
* Dodsworth, where the female lead bids the male lead goodbye after telling him she wants a divorce.
* Dodsworth who flat out disapproves of the marriage between her son and Fran for concerns about Fran's reproductive capabilities.
* Do DT, a tabletop RPG from Sweden, mages can become unimaginably powerful later into the game, once they've spent a large amount of experience points in magic. The way magic works, they have few direct damage spells, but the effects and usefulness of the spells more than makes up for it. That warrior who specced enough to one-hit a smaller dragon is giving you trouble? Mind-flay him to death, scare him to madness or maybe turn him into a plant and then set it on fire? Easily done. In fact, since the amount of magic is determined by a dice-roll with a set chance for an extra roll, you can in theory have a mage with an arbitrary amount of magic.
* Doduo is stated to be a poor flyer that makes up for it with its fast ground speed. Nothing impedes it from learning Fly, and using that move to travel from one side of the map to the other while carrying a ten-year-old that weighs as much as it does. Vullaby is even worse, being explicitly flightless and still able to learn the move. Meanwhile, there's a lot of Flying-types that seem like they should be able to fly around while carrying a person, but can't learn Fly (Noivern, Gyarados, Scyther, Togekiss, and especially Yanmega, which has has a dex entry claiming it can carry people while flying).
* do eat meat but don't eat pork (those who keep kosher or halal dietary laws, for example).
* Doedicurus clavicaudatus look like if someone took an ankylosaurus and an

armadillo (already two awesome animals by themselves) and combined them into an even more awesome one.
* "Doe in the Woods", the prince Guerrier (Warrior) falls for Princess's Desiree picture. Later on, Desiree's evil and ugly maidservant came to Guerrier home pretending to be the princess. Poor prince believes at first he's in love with an inaccurate painting.
* Doe Maar about a man who was adulterous and lost his partner as a result.
* Doe Maar is about somebody who feels anxious and frightened of all kinds of things but is unsure why.
* Doe Of Deadwood is the tale of a sickly doe who becomes indebted to a demon tree. The cast consists entirely of animals, as do the author's many other works, though the settings for each are unique.
* Does a Bee Care? for eight hundred years, without appearing to age beyond a young adult. They are never actually identified as immortal, but they don't know enough about their species to say how long they actually live.
* Does a Bee Care?": The story, written in 1957, concerns a rocket built for a Lunar flyby by a private corporation.
* does a bit more digging and finds out that Harriett Potter was definitely born female and lives as a female when at home. Rather than reveal the deception and put the real Harry in danger, he covers by telling Hermione that he identifies.
* does actually appear in the game - he says it during the second battle with Armored Controller Xemnas, if you fail the Meteor Rain Reaction Command.
* does admit at one point that, in some respects, Eli is smarter than him, although he immediately asks that Col. Young keep this to himself.
* does" After almost getting killed by the first hail of gunfire, he runs back to the weapons cache shouting, "Clumsy and random's got my name all over it!"
* does allow it to point out that there are numerous other suits around with the information which could be forced to reveal it using a drill.
* does allow you to teleport, but the time required to aim and cast the ability is far more cumbersome than it is outside of gameplay.
* does and convinces everyone that he still finds Nancy gorgeous. Ironically, he was suing to get money for Nancy so she could get cosmetic surgery.
* does and gives him new coat in the ending, but it's still left in the air whether or not they're a couple.
* does), and Rinne (who was on the verge of an emotional breakdown at the time).
* Does anyone notice that the second opening song that accompanies "Bella Notte" in the intro to
* does apply himself academically, and manages to do quite well for himself. He has also proven himself to be an excellent polyglot, speaking fluent French in two months, and Spanish and Japanese in a matter of hours.
* does ask. Sir Humphrey goes out of his way to avoid giving a straight answer.
* does (as well as the originals), and the difference in quality is very evident.
* does a version with a guy that's trying to rent movies. is the video version of it.
* does avert this consistently is Gaara, whose sand manipulation powers rely on a supply of sand that he carries in a huge gourd on his back. If that's not enough, he'll just make more sand by grinding up nearby rocks (though sand made this way isn't as useful pound-for-pound as the sand he carries around because he hasn't put as much chakra into it).
* does bleed and gets injuries, from time to time. What does it mean? The story's gonna take a turn for the worse.
* does Books in-universe make an explicit note that Ara Fell is drying up, and will eventually run out of water, unable to support life. This isn't even a plot twist; it's openly stated in teh first town. While Ara Fell does get some water replenishment from falling snow (which melts on touching the land), it's not nearly enough, given how much they lose each year.
* does breach the wall by having his troops dig a tunnel beneath it and then set off a bomb. Much to his chagrin, British and Ottoman reinforcements arrive in time to repel the attack, and Napoleon is later forced to lift the siege.

* does briefly remove it, the entire time it is off he is screaming in horrible agony.
* does burn it down, and you get a special cutscene of Fizdis crying out for her parents.
* does but simply can't bring himself to do it. Thus, Superman is good out of a desire to be good, while Batman is good because he is unable to be anything else, which makes him the incorruptible one.
* does carry gold on him. Not only that, but he carries a bag of fake gold to keep the real bag of gold safe, just like all Jews do, apparently. When Cartman calls him out on this, Kyle looks like he's about to surrender the real gold... only for him to toss it away into the fire, making sure Cartman can never have it.
* does caused by the limits of the engine, and it certainly doesn't compare to sending thugs with knives into a boxing match.
* does-class that was trying to capture it), and its high maneuverability can even give it a fair chance against enemy Dreadnaughts. And it's only got four decks and a crew of about fifty people. Of course, it was designed as a next-generation Borg-buster, filled with cutting edge technology — imagine what Starfleet could do if they tried to build a battleship at these specs.
* does come up for Buffy/Spike in the comics, when they are actually dating rather than just sleeping together. Spike tries to break it off partially because of this issue until Buffy tells him off for it and they decide to stay together.
* does consider it to be a significant rivalry, it plays second fiddle to Michigan's intense rivalry with Ohio State, stemming from the state border dispute over the ownership of the Toledo Strip. In fact, Michigan fans will root for MSU if they are playing Ohio State because they hate them that much.
* does decide to comment on the situation, the rest of the cast freaks out.
* does decide to materialize around someone or something, they get deposited safely inside the console room.
* does. Despite the fact that it averages 89 mph, Petit's fastball is especially deceptive because his hand (and thus, the ball) goes from above his head, to behind his head, then back out from behind his shoulder during the course of his pitching motion (from the batter's perspective). Thus, it becomes what's colloquially known as an "invisiball", a fastball that seems to just "appear" at the pitcher release point, rather than allowing the batter to follow it through the pitcher's delivery. Combined with his excellent slider and curveball (and a decent changeup), batters can't really find a comfortable or easy pitch to swing at.
* does end up becoming evil, so maybe his brother was on to something. (Although Illidan's problems go far beyond the artifact he absorbed, and it's not been directly confirmed that the Skull sent him over the edge.)
* does erupt, there won't be much prior seismic activity to give an advance warning.
* does eventually end up seeking a sun, but she's called Sunseeker long before this would be apparent in-universe.
* does exist, but it's teeny-tiny. They're actually staying in tents in the middle of nowhere, with the "four-star" part coming from a group of four stars in the night sky.
* does. Fajo only survived because the unsuspecting Enterprise crew beamed Data to safety just as he begins to pull the trigger.
* does fall for him in this life, Venus apparently didn't even know he existed (so Adonis claims), or at least that he loved her (implied by Artemis recognizing him).
* does feature a pretty whimsical part about "German women, German wine and German songs". It's just isn't sung nowadays, just like the part about the "Germany above all", though for the different reason.
* does feel that they know the character, but this can be difficult to achieve, and depends partly on the reader being able to make this connection in the first place. Characters whose tragic circumstances are introduced before we get to know them at all are especially prone to this.
* does fit the stereotypical cheerleader image—she's thin, athletic and hot. It was only her attitude and tomboyish nature that turned them off.

* does fix his life), but unintentionally on Facilier's part, as when he spoke them, he intended them as a lie.
* does forgive him and offers to let him back on the team, but Wesley responds coldly and still stays the hell away for a while. When he does eventually rejoin Angel Investigations, it's more out of mutual necessity than anything else, and there's still a lot of tension between him and the rest of the group (namely Gunn).
* does for Haruhi. Kyon also comments on it, and also says that they could "rival each other [in looks] right now". Then he later remarks that that's because her mouth was shut, and she wasn't being her bossy self. This also happens in the second season of the anime in the second part of "Endless Eight".
* does get it back (after first sacrificing himself, causing May to believe he died), he's very emaciated and sickly-looking (due to the time his body was on the Gate), not at all how May imagined him. Nonetheless, she still tearfully hugs him, overjoyed that he's alive.
* does get its windshield blown out in a gunfight, Chuck is able to run down a Fulcrum agent with no visual damage, and any return fire that hits the grill and chassis just plinks off.
* does get revenge on her killer (in fact the whole first game seems to be just her trying to get payback)
* does get the world to sit up and take notice of them, it goes in all the wrong directions, making the world even more determined to wipe the terrorists out.
* does get to continue the song, the music turns out to be coming from the wedding band!
* does get very foggy and is in a heavily wooded area. The "degenerate, decaying town" part is also very much true with Athol, as it is notoriously economically depressed, heavily isolated (even with an exit from Route 2, the nearest major economic centers are close to an hour away), and has rates of domestic violence, teen pregnancy, drug and alcohol addiction, and child abuse that are well above average for the Commonwealth of Massachusetts.
* does go on in at least some single-sex schools in the US. Girls develop very close — even obsessive — friendships, hug and kiss each other, and so on — without anyone assuming that it means they're actually lesbians, but instead "just a phase" that they're likely to "grow out of". This isn't unheard of in mixed sex schools, either. Friendships between little girls can be very intense.
* does go to horribly creepy levels before he lets go, such as raping Masataka and then blackmailing him to have sex with him. It's only after his suicide attempt, which is triggered by Masataka actually snapping on him due to his abuse, that he shows Masataka how much he really cares for him and their relationship stabilizes.
* does go up a hill wet, then down a hill dry?" ...at which point the blonde takes out another dollar and hands it to him with a wink.
* does grant her permission to go to prom, but only with a boy of her own choosing. She dismisses Dave out of hand because he isn't Korean.
* does guilty, he's just so damn good at jury nullification that they get off anyway.
* Does Handbanana count as a memetic molester when his canon motivation
* does hate America. Naturally, this gets the family in a bigger mess.
* does have a Being Bloody Stupid Act, though it's rarely enforced, probably because, as mentioned above, the Watch doesn't have enough time or available cells to arrest everyone who violates it.
* does have a make-infantry-appear ability, but it doesn't involve planes.
* does have a plan, it usually amounts to "let's beat up the bad guy!" Anything else, he makes up as he goes (or has to be planned by a subordinate, usually Robin or Nami, or occasionally Usopp.)
* does have command authority over a Major so he was the one calling the shots over that operation. His argument does kind of fall apart when you consider that he is a villain who just got through killing a brilliant scientist who created Metal Gear, the titular mecha of the series, when he had no solid evidence that he was a spy and tortured him to death on a whim. Not to mention wanting to start a war with the United States and toppling the current Russian Government, he may have been the one

making the rules but those rules were still corrupt.
* does have guys in gorilla suits in the video for "The Lazy Song," though.
* does have incredible power and apparently receives a portion of God's worship, though.
* does have is in regards to Mercenaries. It doesn't matter who actually killed the Mercenary, all that matters is you claim the kill by standing in the activation circle. This means you can get royally screwed by taking a mercenary camp, get forced off by an attacking enemy team overpowering or killing you, and then said team just nonchalantly takes the mercenaries despite doing none of the work.
* does have legit samurai ancestry (those swords were his great-great-grandfather's!), but it might be on his mother's side; his surname isnt Japanese at all.
* does have much more resistance to heat (being able to hold white-hot metal barehanded) and is able to manipulate already existing flame and heat, but not produce them from nothing. Also, the fire itself has to have fuel to stay lit, forcing her to add coal to the forge just like any smith.
* does have one line ("Kept you waiting, huh?") when he first appears, and is also a regular chatterbox in the normal modes if you activate his Codec.
* does have some basis in reality. She was the victim of long-term physical and psychological abuse, and probably believed her husband would kill her and/or her family if she told anyone. Her swim partners would be obligated to call the police, and see the previous sentence for the result if she told. Hence the reason most women don't report abuse.
* does have some... effects on Manny, but apart from that puzzle making him drunk it's pretty useless (though amusing).
* does have some flaws like regular people. Helen herself as mentioned that not even Daria is able to live up to the high standards she has.
* does have the mechanics to avoid this — there are scripting commands to raise or lower an NPC's rank in a faction — it just never uses them.
* does), he is just too out-of-shape and uncoordinated to pull it off and tries to jump directly into advanced forms.
* does him into marrying her. This raises the questions of 1) why Sunset would want to marry someone like Felix in the first place and 2) what sort of crime Felix had committed that he would prefer being stuck with Sunset over going to prison.)
* does himself in unstoppable. Then he tries to imagine that he was strong enough to beat Kenpachi, who he had already imagined to be unbeatable. The paradox of trying to be stronger than infinity causes him to explode.
* does hint at the fact that people might think that Harry did kill Cedric. As Hermione put it, nobody knows what went on during the third task and all of a sudden, Harry teleports in front of everybody, clutching Cedric's dead body. It helped that the Prophet and rest of the Wizarding World was basically calling him a liar.
* does hit them are called strikes (or rather, "Hiiii-reeeeee-ah!") When Mike rushes the mound to attack Servo, Crow starts shouting, "Order in the court! Order in the court! Order in the court!"
* does, however, contain a tiny amount of ammonium ferric citrate.) The label currently declares that it's "Bru'd" in Scotland. The highly caffeinated, fluorescent orange drink tastes quite a bit like iron...or possibly blood.
* does. However, it's unknown if Naruto ever went there, considering his pariah status.
* does. If you go inside you'll find semi-transparent pig carcasses hanging around, waiting to become real. This is inspired by real-life futures trading, where someone agrees to buy something at a set price at a specific time in the future to try to avoid market fluctuations.
* does in fact take naps that last decades, so it would make sense he wouldn't be around in important points in history. He still qualifies in some way because when Frieza is resurrected, he mentions him (as well as Majin Buu), even though he was completely unaware of what happened to them. There'd be no reason he'd suddenly mention them other than this trope.

* does intend to take Dipper and Mabel to Child Protective Services (though he doesn't see to realize that the twins have two loving parents). It's only because the agents are mind-wiped by the memory gun that the twins got to stay with Stan.
* does. In the case of the horses, they were deliberately transported to the edges of the exclusion zone as a sort of nature reserve, and so far seem to be doing reasonably well.
* does involve one of the characters connecting the VR headset wrong and having their mind messed up as a result).
* does is so routine, the heroes have actually recommended imprisonment over execution for a recurring villain because they figured his eventual resurrection was more likely than his escape from jail.
* does it again. In this case it works out because they're technically fighting against the citizens, so it's kinda a good thing for them to be demoralized.
* does it again when he gets actual confirmation that Casca can be cured.
* does it to Jon to show Odie how the pipes in the house are all connected.
* does kill the Finisher (inadvertently and in self-defense, but without any tears), the Skull's agent who actually did the deed. The Finisher's dying confession proves that Peter's parents weren't traitors after all, which was what he really wanted.
* Does Klarth from Tales of Phantasia fall under any of the traditional RPG tropes? You'd think the party's resident summoner and professional scholar would be a
* does know how to spell the word... but deliberately misspells it, in order to defy her father and step out of Olga's shadow.
* does known as a Koolvord Starburst. Forbidden because the last time it was attempted at the Academy, all five cadets were killed.
* does know Rachel's pregnant, her lying skills go straight down the toilet and the secret is out in no time.
* Does language leave you a-mazed, con-founded or a-stonished? Thank John Milton, the English language's second (or third) most prolific word-maker/codifier after Chaucer.
* does like in bed, and proceeds to send her into a state of blissful delirium.
* does love ballad that sounds nearly nothing like the rest of his career as far as melody or lyrics.
* does love Bingley. On the other hand, Bingley's sisters rudely rebuff Jane when she tries to visit them in London and participate in the sabotage because they look down on the Bennets and because Caroline wants to marry Darcy and thinks that will be more likely to happen if Bingley were to marry Darcy's sister Georgiana.
* does make fun of this outfit, so it's possible it's meant to be this in-universe.
* does make the joke upon being introduced to her, she gives him a pass on the grounds that he's new to puns (and humor in general). She does warn him that it's only Funny Once, though.
* does), making it more of an anti-tank weapon than anything else. Even in the post-war era, human laser weapons are still rare and expensive.
* Does Marge have friends? implies that Marge is feeling this way towards her husband Homer. She feels lonely, which allows a romance to bloom between her and her next-door neighbor Maude.
* Does Marge have friends? revolves around Marge being a lonely housewife with no friends. Her closest thing to a friend was her neighbor and acquaintance Maude, who died prior to the poem.
* does marry Buttercup. Westley steals her away anyway. (His reasoning goes along the lines of "you won't be married if you're a widow".)
* Does — is having none of it, manages to gain control of the symbiote, and informs it that if it ever tries to make him hurt an innocent again, he'll kill them both.
* does mean something. When she hands out her flowers, each one is symbolic of various things. For example, violets were symbolic of innocence and she explains that they all vanished when her father died.
* does need the money, "But, too, sir, the man I am about to murder needs his

life."
* does not allow any vice to distract him from his fight against oppression. His beauty and courage in the face of certain death make enemy soldiers hesitate to kill him, but not for long.
* does not appear in the menu. It also removed the separate lock button.
* Does not apply to the increasing number of hospitals that are standardizing their dress codes, such that all employees of a certain professional branch (RNs, CNAs, ancillary staff, etc) must wear scrubs of a solid mandated color (frequently either navy or ciel blue). Also does not apply to the OR, where everyone wears the same hospital-issued surgical greens.
* does note that it's impossible for them to moan if they lack a torso, although it has been suggested the moaning is psychosomatic; it's expected, so it's fervently imagined to happen).
* does not have a minimum level, so if you pick up too many health-reducing items, you will die.
* does not have any weakness directly associated with his powers(at least none that have been shown), but has a tree nut allergy. Queen Mauve is able to subdue him by force feeding him an Almond Joy.
* Does not, however, apply to nursing students in a hospital. They tend to wear whatever uniform clothes the school requires, usually white.
* does noting a specific absence of the kind of negative spirit energy that would be expected from an ancient battlefield like what they're passing by. The Beast Realm is also apparently conected to Equestria, but where that fits in is anyone's guess right now.
* Does Not Know His Own Strength can cause problems if you can't control it.
* Does Not Know His Own Strength: Has trouble gauging just how much of their considerable strength to apply to a specific task.
* Does Not Know His Own Strength: When you can't judge how much power you're using.
* Does Not Know His Own Strength) who is a cheery, childlike person. However, he's doing this for Lennie's protection, since the latter is incapable of realizing the damage he causes. George also denies being very smart, saying if he was, he wouldn't be working as an unskilled farmworker.
* Does Not Know How to Say "Thanks": A character has no idea how to respond to the character's act of kindness.
* Does Not Know How to Say "Thanks": Doesn't know how to express gratitude.
* Does Not Know How to Say "Thanks": When a character tries to express their gratitude to someone but has no idea how to go about it.
* Does Not Like Guns need to reload - and in that particular one, he would have instantly known the gun was empty due to its weight.
* Does Not Like Men: Fuck all men! (No, I don't mean that way, you perverts!) You're the worst this world has to offer!
* Does Not Like Men: Someone who has a negative attitude about the male gender.
* Does Not Like Men: Women who dislike men are portrayed more sympathetically than men who dislike women.
* Does Not Like Shoes: despite not being such a usual occurrence in the text quiet often found on illustrations and in adaptations. The characters with this trait, notably, tend to be female.
* Does Not Like ShoesHippies are likely to go barefoot, or at most wearing sandals, the better to commune with nature.
* Does Not Like Shoes: Though many Girly Girls are like this, many tomboy characters also have a tendency to prefer going barefoot.
* Does Not Like Shoes). Throw in a few cases of visions or demonic possession, and this place probably qualifies.
* Does Not Like Spam: A particular kind of food that the character despises.
* Does Not Like Spam: Possesses an immense dislike for a particular food.
* does not operate in Skyrim due to the presence of the Companions, the Companions fill this void instead.
* Does Not Play Well With Others a total monster, despite regularly drinking human victims to death.

* Does Not Play Well With Others. Nikki the vampire is also implied to do this, at least sometimes.
* Does Not Play Well With Others taste almost exactly like a rare delicacy from their homeworld.
* Does Not Speak Common: A character mostly speaks in a different language from the rest of the cast.
* does not. (The kind where you have to dial 9 and then the number to place an outgoing call. If you do that on a home or cell phone, you'll most likely just get a fast busy signal.) The caller would ask to be transferred to an extension beginning with 9 or 900, and then the business would rack up collect, international, and long-distance charges.
* does not want her to get hurt route where she is his primary love interest that he displays this behavior.
* does not when Buffy might be gay or bi and threatens to kill her, and she makes a move to drive off Satsu, ostensibly because Kennedy realizes Buffy is not gay and Satsu wants her to be, but she and Willow talked about homosexuality and if Kennedy was that bad about Tara...
* Does not work as planed: some Y-Wings launch late and miss the frigate as it broke in half from the impacts (CMOA?) and come after Corran for real. He is lucky that his astromech shuts down the homing beacon.
* doesn't actually exist, that many fans seem to assume are standard issue.
* doesn't, and Fenris has no problems with it. It's only being in love that triggers the issue, and it takes him a few years to get past it.
* doesn't and reviled for his actions. And it also shows that captains who try to escape first tend not to be very competent at other captain things either.
* doesn't appear to fall into this trope. It gets so bad she begins to worry about whether there's something disfiguring about the back of her head that he can see but she can't. Frasier points out that he might be married, gay, or — inconceivably — attending a basketball game to actually watch the game and not trying to score with women.
* doesn't are exactly the sort of characters who might be expected to look implausibly perfect regardless of circumstances.
* doesn't, as most of the time the person's peers look on with looks of bewilderment and/or disgust as they lick the foreign object.
* doesn't At least if they're mapped to F5-F8 or the like, you won't accidentally overwrite states that you really didn't want to overwrite.
* doesn't automatically object to the situation on principle. Bonus points because the alien was voiced by Nichelle Nichols (Uhura).
* doesn't, Britain's equivalent of Area 51 with a well-earned reputation for sometimes less than ethical human experimentation and previously admitted lack of governmental oversight, this is almost calculated to be ominous.
* doesn't, but he makes it far enough through the blockade mines to launch Marcus' shuttle so that he can get through to get help.
* doesn't, but it does happen to an entire unit of Inquisition soldiers. Word comes from a soggy location called the Fallow Mire that an Avvar chieftain's son has taken the soldiers hostage because he wants to fight the Inquisitor. One of the other Avvar, a friendly one who wants no quarrel with the Inquisition, observes that the soldiers put up an extremely skillful fight before they were taken.
* doesn't come to his aid, whom she openly treats with disdain until the third season.
* doesn't deny Ilia's point going to make things better for the Faunus in the long run unless they stop Adam from razing Haven Academy.
* doesn't deserve all the hate that is thrown at him if you will. This seems to be more the case in the pre-Christian tradition. Which would hold his original Hebrew name, "Ha-Satan", "the accuser."
* doesn't didn't consider it relevant. Technically, it wasn't, but modern fans enjoy that sort of thing. Thus the Pevensies come from Finchley since it's nice to narrow it down from "England".
* doesn't do something, fans are often quick to suggest it was a fixed point in

time.
* doesn't do this. She's gotten in trouble for asking others why they're at the school.
* doesn't echo, tested that one too, and they found the echo. So it's on national TV as well.
* doesn't end with an explosion of the most unpleasant kind, if only figuratively.
* doesn't enjoy the fact that a harem had been forced upon him since the girls wouldn't be connected to his life had it not been for the World Rejecter that was suddenly given to him.
* Doesn't enter the above category for being a group instead of a race:
* doesn't exist largely boiled down to the fact that Derrick Wyatt, the art director and lead character designer, didn't really like him that much.
* doesn't experience sexual attraction (and, in some cases, even if you are), we're all guilty of doing this at least once.
* doesn't feign affection". The Templars wrote the history books and manipulated information and society both through subtle means and by blatant means like the piece of Eden, whereas Samuel Adams himself says that since nobody knew who fired the first shot that started the war he was going to spin it to look like self-defense rather than treason for the greater good, just like the Templars do.
* doesn't figure out how to rig a remote piloting systems into Battlemechs, but their performance was markedly inferior to traditionally manned mechs. And if the control signal got jammed, they went berserk and started shooting randomly.
* doesn't get angry and placidly goes along with anything suggested to them — in this case answering questions about his mission and the resistance cell he's a part of.
* doesn't get enough dialogue to be sure indeed. For a sense of perspective, there are five or six men Jaime Lannister thinks possess at least as much killing ability as him. The list includes Barristan Selmy, Loras Tyrell, Sandor, and Gregor.
* doesn't get one, it might be assumed the lack of sequels is due to the first installment being a flop rather than any of the production difficulties or bad timing that might prevent a sequel from being made.
* doesn't give normal kill notifications and spoofs various other effects, so keep a close eye on that Medic of yours.
* doesn't, given what happened to the previous Starks who died traveling to the South).
* doesn't handle the deletion of the root element very well, like a real AVL tree.
* Doesn't happen onscreen, but Graham Spector's first reaction to hearing that some other gang of thieves might beat his own to looting Millionaire Row is to order his gang to start dismantling
* doesn't has done this to a student once, resulting in her wondering who re-painted her car, while her friends look at her in confusion.
* doesn't have actual magic like he's shrugging off everything Wicked Witches West and East can throw at him and manages to scare them both off. Evanora (Wicked Witch of the East) retreats to her throne room, where...
* doesn't have a head and thus, a sense of taste. Her roommate Shinra tried to eat it... but he started crying.
* Doesn't have a story in the main game when you take your creature from the five game modes, and there will be no conflict that can build up as a plot (well, things do happen in the creature stage and you can fight with animals, tribes, cities and empires but it still doesn't add anything to it).
* doesn't have a sufficient supply of oxygen and nutrients, such as a freshly-harvested transplant organ, will diligently keep contracting until it's either hooked up to a recipient's vascular network, is chilled down in ice/water slurry to slow its functions to a crawl, or works itself to death via tissue infarction.
* doesn't have a surname and only goes by Ragna. When he partners up with Ruby, it gets lampshaded.
* doesn't have infinite magical wealth at his fingertips, as shown in one episode where he wishes for a large sum of money so he can get tickets to a concert, only to find out that it's against the rules; fairies can't grant any wishes that break

the law, and magically creating money would require either stealing or counterfeiting.
* doesn't have one since the Black Bayard is currently in Zarkon's possession.
* doesn't have the shortcomings of the Saiyans and Frieza. He can sense ki like the heroes, suppress his power down to almost nonexistent, can think on his feet in the heat of battle, and does not rely on pure brute strength to get ahead. He shows more battle experience and understanding of fighting than Trunks and Gohan and actually rivals Goku and Piccolo in fighting instincts. This is mostly thanks to his genetics which gives him the power and experience of the universe's greatest fighters. About the only flaw he does have is the Saiyan love of a good fight, which ultimately results in his downfall after he forces Gohan to go Super Saiyan 2.
* doesn't have to be a decent person, so long as they get fans to cheer them. A common cited example of this is Kaientai during their "face" run, although they were buried and sent back to Puerto Rico for getting too popular. A Kaientai Dojo did eventually surface in Japan despite.
* doesn't help matters when he tells everyone "it's not what you think; I'm talking to an 11 year old boy".
* Doesn't help that Kyo, being from Kyoto, speaks a markedly different dialect of Japanese.
* Doesn't help that she is a government spy, a.k.a. rogue. Who wears some crazy facial makeup, a.k.a. rouge.
* Doesn't help that Shepherd doesn't seem to have the concept of "danger close" down pat...
* Doesn't help the case any when this troper's seen full-body steel cars BOUNCE instead of denting...
* doesn't hit you, large meteorites can sell for a tremendous amount of money. One woman in the 1970s had her car totaled when a watermelon-sized meteorite caved in its roof. She sold it, and was able to buy a new car, and still have a fair amount of money left over.
* doesn't; however witches can cast magical wards around a property that prevent a vampire from entering without the occupant's permission.
* Doesn't involve an animal rescue, but in "Radio Bart," Bart puts a radio down a well and, using his microphone, claims to be a boy named Timmy O'Toole. Eventually, Bart himself ends up trapped in the same well.
* doesn't involve complex seals or jutsu for preserving and transporting food. Instead, he introduces them to the humble potato and tofu, delicious and nutritious foods that can be stored for months without perishing.
* doesn't is all about this. It has two protagonists, Alice Chenery and Gil Raymond, who the audience knows would perfect for each other were it not for the small issue that they've never met. The situation is mined for all the near-misses and coincidences it can.
* doesn't know is that that very ship secretly contained half his boss' fortune...
* Doesn't Like Guns: A character who has an aversion towards using firearms.
* Doesn't Like Guns when showing off to Wyatt Earp (who suggests that doing it is a bad idea).
* doesn't, like one scene where Aang has a twelve year old's face, a teenager's body, and elongated limbs.
* Doesn't matter how long their spells take to cast, they do an upwards of at least 700% of their spellpower, and even if it does cost a lot of MP, at this point they're able to use a skill that converts a portion of their HP into MP, as opposed to healers healing HP at the expense of MP. Some spells are
* Doesn't matter in the end, as he ends up dying from blood loss if you cut off his leg.
* doesn't matter much, since Kiria is also the only party member with no physical skills.
* Doesn't mean he can't order someone to commit it for him and plant evidence pointing back to him.
* doesn't mean he no longer stops causing problems for the cast. Season 2 has a

subplot where Misty has to deal with the fallout from Scarfe's corruption. Some of it is in the form of ostracization from her colleagues (who are also mocking her amputated right arm). On top of that, a bunch of cases she worked on with Scarfe were found to be tainted. It turns out that as a patrol officer, he destroyed evidence that would've implicated Cottonmouth in the murder of his uncle Pete on Mama Mabel's orders, which proves problematic when Misty finds that the gun from that murder was also used by Shades to kill Candace and by Mariah to kill Bushmaster's uncle. It also turns out that he planted a gun to ensure the arrest of a domestic abuser and dice game runner named Dontrell "Cockroach" Hamilton, a conviction Cockroach has just gotten overturned on appeal prior to the beginning of the season.
* doesn't mean they're as much as polite with each other. Now that Susan's secret is out, she's even opening up to her.
* doesn't outlaw bioweapons; those are covered by a different set of treaties (the 1925 Geneva Protocol prohibits their use but not their creation, while the 1972 Biological Weapons Convention outlaws them altogether). However, Burnham also cites a fictional 22nd-century version of the Conventions under which these are apparently covered.
* doesn't quite express that well enough, leading Zuko to temporarily rekindle his relationship with Mai.
* doesn't realise that Ned was being so rude because he's stupid or he did realise but was just glad he wasn't yelled at.
* Doesn't really help that, depending on which of the Abrahamic Religions you believe in, The Devil's role can change entirely and the context for why he's doing things changes along with it. For example, Muslims seem to lean towards him being DELIBERATELY placed in his position and is actually a loyal servant (in that his job is to tempt humans and punish the wicked, and he obeys this, and thus is obeying the laws set down by God), and the Bible is full of parts where the Jews themselves had BAD short-term attention spans when it came down to worshipping God - despite everything - and would often go off and worship some other pagan deity instead, the most infamous case of this being Moses (he was only gone for A SINGLE DAY on the mountain before the rampant paganism over the golden bull started spreading).
* doesn't really like labels but can find both men and women attractive.
* doesn't. Saki dearly loves the protagonist, but doesn't see why being embarrassed about it - or indeed, why calmly confessing in the middle of the classroom when everyone is having lunch - is likely to give Kei a heart attack.
* Doesn't Satan have better things to do than take the form of a random six-year-old girl to be a pain in the neck to an equally-random eleven-year-old boy?
* doesn't see Dumbledore as his headmaster but as Albus and the two regularly chat in his office over various things. To a lesser extent, Harry and Tonks who's in her final year of Hogwarts while he's in his first.
* doesn't see in him— he's smart, kind, humble, and incredibly handsome. (Yanagi is a bit too perfect in Yuki's eyes. She wants someone normal. And it's a smart decision for Yuki too, since Yanagi is socially inept that he has hard time relating to others on their level, which spells doom to any relationship.)
* doesn't sell and Sindy, respectively. Both are preteens or early teenagers (Licca being explicitly eleven while Sindy is ambiguously 11 to 14). Little girls prefer them over the more mature American Barbie dolls. When Sindy was revamped as a teenager in the 1970s, her sales tanked and this gave wiggle room for Barbie to surpass her in British sales.
* doesn't so much heal as it resets his body to where he's fully healthy and rested. As a result, Lelouch is inexhaustible during sex as his healing factor simply deals with any fatigue or soreness.
* Doesn't stop a multitude of fanfics about it, of course. And even more about her getting a period.
* doesn't sugarcoat the truth", when she convinced a vampire she was Faith the Vampire Slayer.
* doesn't take anything seriously this trope when he breaks into Moloch's apartment

and delivers a teary-eyed confession.
* doesn't take it well, and tells Lily to stay away from Asuka, much to the latter's befuddlement.
* doesn't take it well. Of course, knowing Jack, he probably said it just to get Negi to fight harder.
* doesn't take responsibility for an attack, especially since they have a tendency to take responsibility for attacks that they weren't involved with, to begin with. Unsurprisingly, people usually attribute these attacks to them anyways.
* doesn't take the hint. Or, he might only stop and wonder if "I take it by your silence that you agree with what I'm saying?"
* doesn't tell Jotaro he's his father, since he doesn't want to disturb Jotaro's relationship with his father, who's also The Rival
* doesn't the heroin as much as usual) or on the side of the consumer (someone thinks they need to take more of a laxative or sleeping pill to make it work faster, someone drinks over their limit, someone assumes the pharma company or drug dealer to be trustworthy).
* doesn't. The rights in the latter cases are based in the same premises as Miranda rights, but these are not the rights that were in question in the eponymous case.
* doesn't to believe that the supernatural doesn't exist, the various masquerades are a lot more successful in keeping everything under wraps.
* doesn't trigger a world war. That said, the U.S still gets its land war in Asia-against China this time.
* doesn't trigger it, whether the original victim drowned to death or was merely submerged (thanks to an early translation error and the Guide's insistence that the stories are all "tragic"), whether the springs confer any aspect of the original creature's personality, and whether the curses are age-specific.
* doesn't use any weapons anyway with the built-in laser beams or your magically-gifted party members cannot do the same.
* doesn't use it. Almost every game has at least one plot-relevant event that is referred to in terms of how many years before the game it took place.
* doesn't use it for his trysts is Mayor Jim Bob, who takes his girlfriends to Farberville's No-Tell Motel to be farther from his wife.
* doesn't want all these dead things following her around like lovesick puppies whenever she comes near a graveyard.
* (doesn't want the power of darkness because he thinks Dark Is Evil, but the Frozen Flame is also said to be able to speak not only about the past but also the future.
* doesn't want to break stuff, he can sit back and send in his little buddies. These guys' status as fully sentient characters vs. remote-controlled tools changes between incarnations.
* doesn't want to just say whatever's on their mind, get whatever they want, afford to be picky about what work they take on, subsist on sweets and stay thin, and count putting on ratty old sneakers as "getting dressed up?" Not to mention he's a genius detective, and is implied to be incredibly rich.
* doesn't wear off even when you die, often resulting in five or six quick deaths before the effect finally wears off.
* doesn't wear them but on her personal time, she wears large-rimmed glasses that suit her cheerful and quirky personality. Kaneki explains that she is known as a great beauty, with many fans more interested in her looks than her novels.
* doesn't, which has a right-justified map. This is because it's even more blatantly Western Europe than usual, but flipped upside down.
* doesn't while the latter two were doing an evil pinup modle gimmick.
* doesn't, who has a PhD in physics and superhuman abilities he owes to his nation's Panther God. His ability to combine science and mysticism has let him take down Mephisto.
* doesn't win, she promises him a box of donuts. That's the offer that gets his attention.
* doesn't work because the man in question was born on Mars, so he asks "What's rain" instead.

* doesn't work for them in real life. They once tried it for laughs (faking the mole with mascara) and all their friends immediately recognized them.
* Doesn't work on the police, so don't bother trying. (They'll just beat you to a pulp, lawsuits be damned.)
* Doesn't work out so well for her in Amonkhet when she tries it against Nicol Bolas. Bolas calls her an idiot for trying to use fire against a
* does often lose sleep over it, to the point where a story arc had him experiencing PTSD as the number of people he's had to end in the line of duty comes back to haunt him, big time.
* does open with that scene of a gang of outlaws shooting (half)a saloon to pieces with nothing but assault rifle fire.
* does (perhaps unintentionally) illustrate the reason formations were so necessary to the Romans in the first place- in the morass of single combats that followed, the huge Germanic chieftain is almost unstoppable until he's brought down by sheer weight of numbers, demonstrative of the manner in which the powerful but undisciplined barbarians made war. There is a reason why the Romans had a (paraphrased) saying: "The Gauls will break in five minutes against a Legion shieldwall, but that wall needs to hold against the Gauls for five minutes."
* does prove decisive, in that battle and in others down the road. It saves the characters more than once, in situations where other weapons would obviously fail (soul-trading demons in the spirit world, for example).
* does reach full maturity, he'll be taller than the rest of the Brotherhood. This, incidentally, has not gone unnoticed by Amalia.
* does rely on paper checks: the government, and just check the rest of this page to determine how good they are at quickly updating their technology.
* does require the Big Surf Island DLC is the Jansen P12 Diamond car, which is awarded for clearing out all 500 Freeburn challenges in the game. Its stats are nothing special (better than the stock P12 but otherwise unremarkable).
* does rescind it, giving him it back before he has completed his promised portion. Gothel intervenes to make her think that he abandoned her immediately.
* does result in Elizabeth having a horrified reaction at how many people Booker kills in self-defense, and it's touched on again in a FEW of the later firefights, but overall goes unmentioned. It's almost like the story was written as a movie where only those few action scenes were present, and the bulk of the shooting galleries in the game weren't written to connect to the overall story.
* does reveal who Beatrice was, although most readers will probably have figured it out already.
* does romance him - Garrus is apparently itching, deep-down, to overhaul an apartment into a trap-encrusted no-man's-land - but if there is a romance taking place, you get variant dialogue where Garrus begs you to indulge your crazy boyfriend and let him continue attaching microfilament explosives to your decor.
* does, saving Luke's life on Hoth. He also uses it in his first duel with Darth Vader.
* does's books describes his horse-expert boss doing it to a pony suffering from severe acute laminitis, to the astonished horror of both Herriot himself and the Roma who owned the pony. It worked.
* does something evil, which doesn't happen a lot), though it is lampshaded when Buffy talks of how difficult it is to stake vampires when you're having fuzzy feelings for one.
* does speak in the actual game, fanon explains his silent nature as when he actually does speak, something especially horrible will happen.
* does stage Smashville — which is almost the same as Final Destination except for a single platform that floats back and forth — was so popular that it even relegated Final Destination to counterpick status for some tournaments.
* does still have it, and that his Omnitrix-looking device is merely a stabilizer to help him maintain his transformations longer.
* does support flagging NPCs as unkillable — though any NPC flagged as such is in a place where weapons are disabled, with one obscure exception, so most players will not notice. Why Billie is not flagged this way is unclear.

* does survive the tempting fate line about being Secret Service. Afterwards, when he's safe, he jokes to the clerk that he hates to be a problem customer, but if he doesn't get a Milky Way bar pretty soo—
* does take on a wilder, more extroverted "wild" persona live, though, especially when wearing outrageous costumes and wardrobes.
* does tell her exactly where to go, but since he's a ghost, she only hears him subconsciously, and thinks "Maybe I should go this way..."
* does. That doesn't end well either, but it ended badly in a way that was actually ending well in disguise. On the other hand, trusting Karkat, WV, and the Consorts turn out to be pretty smart moves.
* does The authors were pretty unhappy with the way the material was directed, saying that it made the film seem like it had many unforgivable plot holes even though there weren't any.
* does the exact same thing, pushing 9 down as the Fabrication machine initially powers up.
* Does the game halt your progress and require you to solve a bizarre, irrelevant puzzle that can be reasoned about? You might need to
* Does the game only inform you what to do in a single textbox that doesn't pop up again? Well, you just need to take a right and...wait,
* Does the game provide enough information to solve a puzzle, but the information requires unconventional or obtuse logic to figure out? You might be dealing with a
* Does the magic department offer introductory classes for people with no previous magical ability? In one story, a magically inclined member of the school board (who, presumably, would know) explicitly says no. And yet, Ayla will be studying magic for the first time in the spring. A partial answer now exists: You need to be able to gather the energies of Magic in some way to take the courses in Magic (and it's explicitly noted that there are (inefficient) ways a normal human can do so).
* Does the old galdr that Thor recites really have supernatural power that helps him to
* Does the question inserted here have an obvious answer?" One of his ads even references the still-pissed-off Neanderthals.
* does). There are practical benefits as well. An autoloader that is damaged in combat will probably not be brought back online soon enough to continue the fight, but if a work gang is killed off the rubble can be cleared and the workers replaced in a matter of minutes.
* does). There's also the affordable tonic the doctor offers Homer because he can't afford the 1000$ dimoxonil, which the doctor even states that any hair growth Homer would experience while using it would be purely coincidental.
* does the same thing by subjecting her to the same transformation that befell her sister.
* Does the tendency for Namco (Bandai) US to remove the J-Pop/J-Rock main themes out of
* does this annually. Though it is explained that Christianity spread to dragons when American dragons started trading with certain Americans.
* does this, bouncing a bullet off one mook's gun into another's forehead. Her computation is aided by nanites in her brain.
* "Does This Duckbill Make Me Look Fat?" was a switch-a-roo episode on
* does. This is not so much satanic as people having forgotten what the symbolism originally meant.
* Does this look like the ass of someone who knows if Jiffy Lube is open on Sundays?
* does this on purpose to elicit groans from hiding thieves and give away their position.
* does this place. Yeah, the Justice Lords have created a world where it's less likely for another kid to have his parents killed by a random mugger. Instead of worrying about that, he can worry about watching his parents get dragged away to life in prison for doing something as harmless as argue against being overly charged for their meal.
* Does This Remind You of Anything?" a redesign was hastily commissioned.

* Does This Remind You of Anything? around each other, and Naruto angsts/thinks quite a bit about Sasuke in Part II.
* Does This School Have Capital Punishment?. When Sam, the main character, is nearly expelled from school for possession of marijuana, and he tells his parents it wasn't his, they don't get angry at him because they know he's telling the truth. When he wonders why they get angry at him at other times (such as when he wandered out in the middle of the road), his mother explains that it's protective anger, and they get angry at him because they get worried, but if they didn't trust him, that would be worse.
* does this to himself when Mao holds Nunnally hostage; in order to stop him reading his mind and finding out his plan to save her, he tells Suzaku what to do, then mindwipes himself before heading up to face Mao. It works.
* does this to Summer Lane, turning her into an abusive drug addict who has sex for money and possibly drugs and used sex to pay off a CPS agent who came to investigate her. She's apparently so terrible her kids are perfectly fine leaving her to die of a overdose and nobody in her family thinks to pay for a burial or funeral, leaving her to be forgotten in an unmarked grave.
* Does this trope exist? It would apply to something that is described as being awesome, but one or more characters say they're actually afraid to use it. One example I can think of is the Charger from
* does this when trying to win back Estelle. And for some reason plays "Escape (The Pina Colada Song)".
* does this with Joe Masseria's assassination. Lucky Luciano gets up from the table and excuses himself to the bathroom. As he closes the door, his hitmen Tonino Sandrelli and Bugsy Siegel enter the restaurant. Inside the bathroom, Luciano listens as the two assassins empty their guns into Masseria, emerging once the gunfire ceases.
* does to his victims in the DLC, on the other hand, is a different type of terrifying.
* does trope, Aku generally just breezes by any direct confrontation without putting any real effort into things. Since he's almost impossible to actually hurt, there's no reason for him to do more than the bare minimum in combat unless he's fighting Jack.
* does try to tell Snape by coded message, but take's Snape's reaction (or lack of reaction) as a sign that he didn't get it. It never occurs to him that for the same reason Harry is talking in code in the first place, Snape could hardly acknowledge that he understood the message even if he did (which, as it turns out, he did).
* Does Tsarichina really contain a powerful, inhuman force? Or did the stressed minds of the already on-edge soldiers stationed there interpret every accident as the work of the paranormal?
* does use them to replace the forensics kit he left outside and complete the processing of the crime scene.
* does usually feel the same about its sequel for following on from such.
* does want to be one but is ignored. Olga, although she is a cousin rather than a sibling of theirs, likewise fits the trope for Ingrid because of her competitive streak.
* does want to feel that all her past conquests still love her; she just doesn't know how to handle the associated complications.
* does wear an enemy uniform to escape France with Bush and Brown; his French hosts whip up three merchant marine uniforms for them to wear, and since Hornblower already knows French (and Brown becomes fluent in their extended stay), they pass easily.
* does wear his goggles properly as part of his "Mechanic Baird" multiplayer skin. They still don't do anything, but at least it makes sense now.
* does. What do they know about cars? Do they sell them? Fix them? Later commercials cleared up the mystery.
* does. When Lucy comes by and asks how that's possible, he says, "There are always ways of working things out."
* does which go right over the heads of readers who don't have Tolkien's level of

expertise.
* does, which implicitly has stronger effects on living beings. In game, Sacrifice also allows Micaiah to heal status effects. Whether or not she can do this for a character at full HP, though, she's never been shown using Sacrifice in this manner in the story, however.
* does, which makes sense when one remembers that Hermione is largely based on Rowling as a child.
* does, while you can find restaurants and bistros for most any other food style.
* does who prefers toying with his opponents rather than plain killing them.
* does, wise up, and get rid of the black suit. He later goes to thank Flash who in return, is quite polite (well, for Flash anyway).
* does work, but not nearly to the extent that she expected (or would have liked).
* Does work on occasion though. Miu nearly loses a poolside fight when she almost loses her top (Kenichi ends up stepping in for her), and Renka unintentionally ends up turning it against Rachel (of all people) in their fight, getting away from her at a few points by accidentally removing her top and shorts.
* does work wonders on the Turtles, Bebop and Rocksteady, and Shredder himself. Krang, although not totally immune, is less affected.
* does; you don't have a guy as a decently recurring enemy for years without remembering him. He just regards him as little more than an occasional nuisance.
* Does your culture/nation/society/whatever have family name first and given name last or vice versa? Either way, if you go somewhere that has it the other way around,
* do, even if the sensor is not the same. While people who come from cellphone cams / webcams and other "soapboxes" with pinprick aperture didn't see the differences obvious with any halfway good lenses and usually need a lot of experiments to "feel" the optics.
* do every time he tried to punish him. One of the funniest scenes ever.
* do exist but are fairly rare in reality (along with other colors like blue), and they most commonly have a muddy black/brown coloration. Red lobsters appear in fiction because people are used to mainly seeing them prepared as food, where the heat from cooking turns their exoskeleton a bright red.
* do fall faster than the others - the terminal velocity is actually dependent on the body mass/body surface ratio, as the drag coefficient is dependent of the surface area. They are known as "fast descenders" When doing formation skydiving, other skydivers may need to take on lead weights to keep on with their free fall velocity.
* do find a dress that fits and is flattering in cut and colour, Brienne is still not better-looking than plain.
* do find out that the Legion of superheroes have been going around and saving/recruiting people...
* do fit at least one of those indexes, but contain a special focus on social structure... or lack thereof.
* Doflamingo and even said they did the best they could. However, he only treats his closest crew members like this and as long as they don't betray him.
* Doflamingo as well. He is similar to Crocodile, terrorized Dressrosa for years without anyone even noticing, plus he is one of the few villains who are
* Doflamingo causes the Birdcage he has set over the country to shrink, leaving Luffy only one hour to kick his ass, or else the entire country will be slaughtered.
* Doflamingo Cross was that desperate to discredit the Marines and show the world just how hypocritical they are.
* Doflamingo did this to King Riku when he took over Dressrosa. Claiming to Riku he'll leave the country be if Riku gets a large sum of money to pay him off. Since the people of the island trust the king, they willingly give it up. Only once they nearly had the money, Doflamingo used his string powers to take control of Riku and his soldiers and attack the kingdom, making it seem like he had gone mad until Doflamingo comes in and "stops the villainous king", gaining the people's favor and taking the throne.

* Doflamingo is able to fake quitting the Seven Warlords because he is a former World Noble. According to him, he isn't considered one anymore by the others, but he still holds clout as a descendant of one of the World Government's founding families. And apparently knows something that allows him to blackmail the World Government.
* Doflamingo's crew is just as diverse as Crocodile's. There are people of all ages, any gender and all levels of weirdness.
* Doflamingo's father was a Tenryuubito until he decided to renounce the title to "live like real people". Note that his son did not take after him. Also note that the family outright went to hell after the defection.
* Doflamingo's manipulation throughout the Sabaody Revolution and Ace's capture and execution being announced by Kizaru, Luffy comes to the conclusion that his crew isn't ready for the New World on his own, and while not happy with it, he accepts that the crew has to split up and train if they want to survive, let alone reach the One Piece.
* Doflamingo took their family away from that life to lives as commoners. Even after killing his own father and presenting his head to the World Nobles, they refused to reinstate his status because he was from a "family of traitors". All of his villainy is done out of petty resentment at the world for taking away the privileges he feels entitled to have, which you can more or less relate to him having a temper tantrum.
* Doflamingo who enjoys torturing people in much the same way as Crocodile. After he forcibly takes over a country, he has people fight until they're maimed in gladiator battles and turn others into toys to serve as his slaves. He also delights using his powers to control people's bodies and make them attack their own love ones and allies.
* Dofus and other such cruel torments. The Demon King was ashamed to see that humans could outdo his own kind in the ways of Evil, and ordered the brothers to train his people.
* Dofus, complimented by a green dress showing off both her cleavage and her sideboobs.
* Dofus from the game), which will never be sold again in the future. And that's not even counting some in-game advantages, like a complete exclusive panoply. For all the hardcore fans, it was US$30 very well spent!
* Dofus gets different powers from wearing different masks. They wear their default "Classic" mask all the time, even outside of combat, which gives them health-stealing attacks and an area-of-affect shielding spell. Their other masks give them powerful close-range attacks (Psychopath Mask) and long-range attacks and escape abilities (Cowardly Mask).
* Dofus: Kerub's Bazaar attempts to do this to the heroes towards the end of the episode.
* Dofus: Kerub's Bazaar has expies for Dastardly and Muttley, named Sanata and Dialobo, who of course do this trope and end up in 9th place.
* Dofus: Kerub's Bazaar has this as a literal disorder. He is incapable of not betraying anyone he works with even when it harms him too. He does not mean it, and apologizes afterwards, which is probably why Croc's friends do not hold it against him. Also, his betrayals often end up helping his friends inadvertently in the end.
* Dofus: Kerub's Bazaar. The first game resulted in 3s over 10s, Jacks over Kings, 4 Queens, and 4 Aces, the later drawn purely by luck on the last round. In the second game, a J-7 straight is beaten by an A-10 straight. Justified in that they were being manipulated by the god of luck.
* Dofus requires a monthly fee for much of its content. Long-term subscribers are eligible for a discount.
* Dofus, this is an explicit power of the Xelor class. It even calls the ability "Tele frag". (It's not an instant kill, however, but a debuff that makes other Xelor spells more powerful when used on a Telefragged target)
* Dog Act is a post-apocalyptic comedic play about a traveling performer named Zetta Stone who journeys throughout the wasted United States. The other half of her act is a man who has decided to become "species demoted" to a dog (he is aptly

named Dog).
* Dog & Scissors, an extended scene featuring Maxi has a US Liberty coin behind her. Unfortunately, it's misspelled as "Riberty".
* Dog & Scissors: Both Kirihime and Madoka have the hots for Kazuhito. Subverted, because Madoka calms down after Kirihime scolds and defeats her.
* Dog & Scissors - Given a relatively early sub-only DVD release before being dubbed for Blu-ray in January 2015.
* Dog & Scissors Kirihime then uses this on Kazuhito for comedic effect. After reading her latest work, his front paws start moving on their own towards her, despite his attempt to resist it.
* Dog and cat foods get advertised frequently, but foods for other pets almost never get ads (especially televised ads). Most rodent, rabbit, bird, etc foods are either discussed through word-of-mouth or, at best, they have internet ads.
* Dog and cat Pokemon such as the Meowth line, Growlithe line, Houndour line, Absol, Glameow, and Zeraora are amongst the most popular Pokemon in fan-works.
* Dog and Dragon a kingdom has been in a state of war for a few generations and even the ruler's castle faces food shortages. In order to keep up appearances, feasts would be prepared out of stale bread and then the royal mage would cast a spell that would make the food look and taste like a sumptuous meal fit for royalty. Only another magic user would be able to see through the ruse.
* Dog and God just want to control the body that both personalities inhabit.
* Dog and Jess the border collies from "Footrot Flats: A Dog's Tale" have a litter of puppies at the end that resemble themselves as puppies as seen at the beginning of the film.
* Dog And Spider Private Investigations does not heal these wounds. It does, however, prompt her to seek therapy.
* Dog And Spider Private Investigations, was the only one who wrote anything of note. At the encouragement of the group, he took that short story and turned it into an entire series. Jessica Dombrowski's origin story and dialogue in the first 30 pages or so of book one become more obvious if you know this, though the series diverged heavily thereafter.
* Dogbert at one time operated his own tech-support helpline, which invariably recommended a reboot.
* Dogbert does this a lot. At one point he ran an investment firm, and promised clients that if they let him manage their investments, they could one day own "this", said while holding up a photo of a mansion.
* Dogbert is acting as a shady, bribe-collecting movie critic, and a customer wants to know how much the review "Best movie so far this year" will cost for a film released on New Year's Day.
* Dogbert once becomes a driver's ed instructor and shows a student horrific car crash videos to supposedly scare him into learning to drive safely. The kid watches it while eating popcorn and responds, "Really? This is supposed to shock people?"
* Dogbert once sold "value-priced lottery tickets;" half price, odds of winning only one in ten million less.
* Dogbert once taught classes about how to deliver bad news with humor. Here's one example:
* Dogbert's Clues for the Clueless, Dogbert examines the conundrum of being seated in public next to a man who spreads his legs too much. Dogbert recommends "accidentally" spilling a drink in the offender's lap. "Oops! Something bumped my leg."
* Dogbert's Clues for the Clueless Illustrated by a little old lady slamming a guy off the road as he tries to cut her off. The little old lady then flips the bird, which is censored by Dogbert who says that it's still considered rude to make the "I'm Number One" gesture afterwards.
* Dogbert's Clues for the Clueless shows how to torment friends by giving them home-made gifts and how to treat people who give bad gifts.
* Dogbert's Clues for the Clueless shows that a mummy ought to be dressed in bandages from head to toe, a woman can wear just a skimpy thong bikini at the beach. The final panel, under the caption, "However, a mummy should never wear a

bikini," shows the mummy wearing a bikini over bandages, thinking, "Looking good..."
* Dogbert's Clues for the Clueless, the advice given to women who wish to turn down requests for dates is to give excuses whose implausibility and specificity should be relative to the guy's normalcy — that is to say, "nearly normal" guys should be given vague yet plausible lines such as "I have 'plans,'" whereas "loser-type" guys should be dismissed with specific yet implausible excuses such as "I need to wax my cat."
* Dogbert's Clues for the Clueless when it is acceptable to ask someone about their disability. Disabilities you should not ask about are awareness-impairment and attractiveness-impairment.
* Dogbert's Rules of Etiquette has a page on how to handle handshakes. Dilbert denying a handshake because he just sneezed is labeled "polite"; another character snarking after shaking with a sneezed hand is "rude"; Dogbert lying and saying it's wet because he just washed it is labeled "playful".
* Dogbert was originally just an actual pet (albeit able to talk and hyper-intelligent), even in one strip as having a leash and being taken for a walk. Nowadays, he is almost human-like and interacts with everyone on a human level (although he is still willing to take advantage of the legal implications of being a dog if it suits him).
* Dog Bite Dog, an excruciatingly violent Hong Kong movie, ends with the main character performing an impromptu C-section on his pregnant wife as she is dying from a fatal injury, in a last-ditch attempt to save the baby.
* Dog Bite Dog, his hand is shown to be excessively bloody from the struggle, and after his breakout, he spends much of his next scene nursing his bloody hand.
* Dogby Walks Alone is what happens when badasses have to wear a Goofy Suit.
* Dog City, Ace finds Dog City suffering a massive crime wave. He finds a newspaper with the headlines "DOG CITY GOES COPLESS. ENTIRE POLICE DEPT. DOGNAPPED"
* Dog City, Ace Hart jumps onto a newly drawn fire hydrant that shoots up into the air from the immense water pressure in order to escape from Bugsy Vile and his goons.
* Dog City episode "Disobedience School" had Bugsy Vile taking over the school and trying to turn the students into delinquents. After the climax, all students in his class turned out to be infiltrators from various police agencies.
* Dog City episode "The Great Dane Curse", Candice Dane hired Ace to find out who's trying to kill her, and then disappeared, leaving Ace as the prime suspect in her murder. It eventually transpires that she faked her death to escape her controlling father.
* Dog City had Ace Hart based on his creator, Elliot Shag, and the supporting cast based on those in Elliot's life.
* Dog City: In one episode, Bugsy enters a series of games and has his henchmen get rid of his adversaries so he'll win by default. When one henchman points out that the adversaries are too unfit to challenge him anyway, he explains that he doesn't want to sweat. Ace foils the plan by entering the competition.
* Dog City in the episode, "Of Mutts and Mayors", which starts off with Ace and Rosie on the run. Ace has no idea how they wound up in this predicament, which prompts Eliot to explain that they would be starting off near the end, where things are really bad, and then they'd show everyone how they got there.
* Dog City, just as Meat the Butcher is about to run Ace Hart over with a truck, Eliot quickly draws a traffic light turning red to stop him. After Ace walks off none the wiser, Meat is furiously bashing the traffic signal while complaining that the lessons he learned in traffic school "never leave you" which compelled him to stop.
* Dog City, the cartoonist drawing Ace's story was fighting with another cartoonist on whether or not to reveal the villain's plan to the viewer. They re-painted over the scene a few times.
* Dog City, the villain Mad Dog (who typically spoke in Tazmanian Devil-style grunts and slobbers) would suddenly begin reciting poetry in a refined voice after any head injuries. In one episode this was even a plot point, as Mad Dog had a

tendency to include coded hints about the villain's plans in his recitations.
* Dog City villain to a "Senseless Showdown" to determine who would take the title of Dog City's crime boss. Running with scissors was one of the regular's "senseless" moves.
* Dog City (which was a co-production with Sabella Dern), are the only Jim Henson-related works to fall under this trope as far as actors are concerned.
* Dog Collared, when Porky finally escapes the big dog that's been pestering him throughout the picture, he turns on his TV set and hears a news report about that very dog:
* Dog Day Afternoon. He needed the money to pay for his girlfriend's sex-change operation.
* Dog Day Afternoon. He robs a bank in broad daylight and waits until after the money shipment has left the bank (to be fair to him, it's indicated that he was mistaken about the time this was supposed to happen), doesn't wear a mask or gloves, only thinks to paint over the cameras part-way through (and is too short to reach most of them, anyway), announces to his hostages that he served in Vietnam and was a bank teller at one point in his life and uses his and his partners' real names (so even if it had gone as planned they would have been caught immediately), burns the traveler's cheque registry which alerts the bank's neighbors to something happening inside, doesn't take into account one of his partners' mental stability or the possibility of his other partner getting cold feet and leaving short-handed, doesn't look into the bank's floor plan and doesn't consider the possibility of a hostage situation or a stand-off with police. In fact, if he had arrived before the shipment left, he likely would have been shot by the armored car guards.
* Dog Day Afternoon (main character is a male bisexual in a relationship with a transgender supporting character)
* Dog Day Afternoon, Sonny tries to blind the bank's security cameras with spray paint, but he's too short to reach the lenses. He has to stand on a chair to get to them.
* Dog Day Afternoon takes place during a single afternoon and evening.
* Dog Day Afternoon tries to keep the police from storming the bank by saying that he and his cohort were in the Army in Vietnam and have no problem getting violent with the hostages. While at the time it seems like a desperate bluff, later on, he is seen showing some of the hostages how he learned to march and handle a gun during training. His relationship with the hostages makes it pretty clear he doesn't intend to hurt them, however.
* Dog Days (2018), Amelia dresses herself and the pug Mabel in blue dresses with wings. When Grace asks why they're dressed as fairies, Amelia says, "Not fairies. As fairy dinosaur princess."
* Dog Days (2018) Charlie on Dax, despite the fact that he lives in a pet-free building. He's forced to smuggle Charlie in and out of the building in a box on wheels with airholes for his morning walks.
* Dog Days (2018) is a big, shaggy, and very needy dog. He sandwiches himself between Ruth's legs at her baby shower, to her annoyance. Later, when Dax is hoping to get laid, Charlie jumps between him and his girlfriend because he can't stand the thought of anyone other than himself getting attention, causing the girlfriend to leave.
* Dog Days (2018), Jimmy and Liz's kiss on the beach is interrupted by a bird pooping on Jimmy's back.
* Dog Days (2018): When Liz comes home, her dog Sam trots up to her carrying a red bra that's not hers. Confused, she walks towards the bedroom, where she hears her boyfriend Peter with another woman. She kicks them both out.
* Dog Days, and Couvre at one point says that if she were a man she'd have already proposed to Rebecca (though in Couvre's case it's more like sisterly infatuation).
* Dog Days, and how well he fits in with the citizens of Biscotti. And his cousin and his friend from Earth are also both too right to Flonyard, so the same applies to them.
* Dog Days, and overall training in case of actual demonic outbreaks that happen occasionally.

* Dog Days and skilled enough to avoid getting mortally wounded. People can still die if they get attacked by demons or wild beasts outside of a battlefield, and the protective fields can get deactivated by a demon.
* Dog Days, Cinque walks into the girl's bath because he can't read the native language. Later, he learns the language, but someone cleans the hall and accidentally switches the signs, so he walks into the girl's bath again.
* Dog Days comes from a race of squirrel people and has a human ancestor several generations back. As a result, she has a second pair of human ears hidden under her hair.
* Dog Days dealings they handle. They are polite and make gestures at helping the main characters, but it's clear they normally deal with things on a totally different level, and aren't nearly using their full abilities at the games the rest of the cast are playing.
* Dog Days, everyone has to get the hang of each other's bodies and techniques.
* Dog Days. Gaul and Cinque both start freaking out when one of the former's attacks actually makes the latter bleed (since they're from Earth and not under the gods' protection). Demon attacks also cancel out the protective fields, leading to quite a bit of blood near the end of the first season.
* Dog Days has cellkulls, who are about as close to chocobos as you can get without violating copyright. They normally can't fly, but can be granted that ability through the use of seal spells.
* Dog Days has this by default thanks to the setting's Crest Magic, which makes it so any spells or special attacks are preceded by a giant manifestation of the user's nation's emblem appearing behind them.
* Dog Days in a one-on-one duel despite being several years her junior and lacking access to a Holy Sword.
* Dog Days is to make sure that the various kingdoms always have an army ready in the event of a massive demon attack.
* Dog Days. Millhiore had specifically chosen Cinque to be her country's hero due to his athletic skills (she was even shown writing him a formal invitation in the manga prequel, but never sent it due to realizing that he couldn't read their language). Averted with Nanami and Rebecca, who were just summoned as guests, plus Rebecca wasn't even summoned by the kingdom that she became a hero for. Adelaide on the other hand played it completely straight in the backstory.
* Dog Days). Of course this becomes a plot point later on as wild monsters are not subject to this rule.
* Dog Days on Kayfabe. Battles are non-lethal, thanks to the locations in which they are held, and the various warriors and important characters are treated like idols, getting interviews and giving concerts on television. No ill-will tends to arise between nations who hold battles.
* Dog Days show complete with lasers, fog machines, and glowsticks. They do go into the specifics a little bit in a third season episode that explains that the tech is "Crystal Magic", based around naturally-occuring magical crystals which have many uses, including functioning like circuit boards. Technology does seemingly advance a bit over the course of the show, as in the third season Nanami and Leonmichelli use tablet-like devices to communicate with each other.
* Dog Days. Since the setting is full of actual horrible monsters, the war games serve to keep the soldiers in fighting shape should a serious threat arise, and it fosters friendly relations between the different countries so they can aid each other at a moment's notice.
* Dog Days, since you can't kill your opponents during the war games, destroying their clothes to force them to surrender is a valid tactic. Notably, when Nanami gets stripped to her underwear by an attack, she keeps fighting, saying she doesn't mind being seen in her underwear. A second attack destroys her underwear, causing her to finally freak out and cover herself.
* Dog Days tells of how the French view his Dog Trilogy as a metaphor for George Bush, even though that wasn't his intent, nor does he even like to make political cartoons.
* Dog Days to ask for help, since their neighbors are most likely already on the

way.
* "Dog Day Sunrise" was not originally a song created by the band for their
* Dog Days. While Cinque is able to get cell reception in Flonyard, it's only while he's in a specific area (the place where the portal from Earth is located) and while using a special device Rico made to boost the signal.
* Dog Days with the latter two being the bonus discs with all the pervy extra content.
* Dog Days. You still have to woo her the old-fashioned way afterward). Since Leo has proven to be pretty much unstoppable in past seasons, this goes about as well as you'd expect. Indeed, the day is kind of a national holiday, where the people of the Dominion have a fair and enjoy watching their princess beat the crap out of several men for half a day.
* dog/deer, wields at least four swords at once, holding a pair in a claw-like grip in each hand. He's murderously proficient with this style.
* Dog-ear by Sam Nolting, has Scriptreader (a narrator) who reads some of the stage directions. At the end of the play, the protagonists discover her, and promptly steal her script.
* Dogen Boole wears a special tinfoil hat to prevent him from accidentally exploding people's heads. "Please keep your hat on" indeed.
* Dogengers, Yamashiron is the more obvious example of this, who represents Yamashiro Gas Co. Ltd from Saga Prefecture. Same goes for Ohgaman, Ohga Pharmacy's company hero.
* do get to triple-point scoring, it's mainly to just wrap up the game.
* Dogeza (土下座), which is reserved for when you've really fucked up, because by doing that act you saying you are worth nothing and purposefully and willingly putting shame and humiliation on yourself.
* Dog Fancy magazine Bolt uses as a TV show prop ends up in his trailer for self-stimulation purposes. The dog in the centerfold is even named Rosie.
* Dogfight engaging in martial arts for the sake and meaning of justice. Pretty much most of the protagonists are martial artists with well-choreographed fight scenes that take advantage of their animal anatomy and psychology.
* Dogfight has Baskerville acting as a professional assassin in the protagonist's first mission.
* dogfighting inside the canyon itself) to avoid the AA. Fly out of the canyon and you get hit by a swarm of missiles from all directions.
* Dog fights are pretty much illegal all over the world, however in some countries like Russia and Japan there's a legal variant which involve dogs trained to not bite each other, with a veterinarian on site and heavy supervision, where the dog wins by showing dominance and supremacy over the other. Still considered questionable to some people but certainly much more humane.
* Dogfights engaging against surface ships of the RN and USN, respectively. Both do not end well for them to differing degrees.
* Dogfights segments, American pilots are forced into going back to doing this, thanks in part to the flaws of early missile technology.
* Dogfight: This is a common trademark during fight scenes, which only serves to make them more epic and to highlight that the fighters are getting more serious in their performances.
* Dogfight, with American pilots battling Germans in World War I. Many others have been published since then, covering every period from that war through the current day, plus sets of miniatures rules. Most go into at least some detail to distinguish different plane types.
* Dog Food Diet: Someone eats pet food, because people food is too expensive.
* dog food. They drew the line at showing a Pot Noodle, though. When Lister discovered the universe's only edible Pot Noodle, the pot is actually of something called "Lot o' Noodles".
* Dog Fort pseudo-military operation, all connected through a central command unit which consists of a golden retriever in a pillow fort, reporting as the eponymous Dog Fort.
* Dogged Nice Guy: A character who hopelessly pines after someone who made it clear

that they don't like them romantically.
* Dogged Nice Guy? Both? Neither? It depends on the writer, and what the prevailing views of sexuality and relationships, and gender roles, happen to be in a particular time and place.
* Dogged Nice Guy by showing the dark underbelly of this kind of thinking.
* Dogged Nice Guy: He/she just can't take a hint that the recipient of their love is just not interested.
* Dogged Nice Guy: "If I keep telling her how awesome she is, buy her things, hold the door for her, listen to her problems, et cetera, she'll see how awesome I am and become my girlfriend!"
* Dogged Nice Guy: I'm so nice to the girl/guy of my dreams. Why isn't she/he interested in me?
* Dogged Nice Guy Marley was supposed to echo the popular Finchel/Puckleberry triangle from season 1.
* Dogged Nice Guy - Persistent friendliness used in the hopes of making the object of a character's affections fall in love with them.
* Dogged Nice Guy than as being genuinely nice or worthy of a relationship with their crush.
* Dogged Nice Guy, the latter which bares no relevance to the comic or series.
* Dogged Nice Guy. This also leads to a bit of drama during the Culture Festival arc, since both of them feared that the other only loved the persona that they had created.
* Doggerbank, a formerly British merchant ship used by the German navy for covert operations, was sunk by a U-boat mistaking it for a British ship, with the loss of all but one of the crew.
* Dogger Bank, a huge sandbank in the middle of the North Sea, portions of which can be stood upon at low tide.
* Doggerland (which is discussed below) is shown as lying underwater bored to death while he plays with fish. A flashback shows he literally drowned as Denmark and England watched.
* Doggett. Doggett simply proclaims things impossible and refuses to discuss it further, in spite of all evidence.
* Doggie Daddy and his helicopter parenting tactics with Augie Doggie.
* Doggie Dash has Rocky the dog and Wendy the cat, who offer a hurricane of bad animal-themed puns while serving as narrators and guides.
* Doggie Doo, in which you push on an air pump to make a plastic dog poop yellow play-doh; see it in its glory
* Dog Gone South go!" And gets booted off the property, not for the last time.
* Dog Got Sent to a Farm: Spot didn't die, we just sent him to a wonderful farm where he'll be very happy.
* Dog Got Sent to a Farm: Telling a child someone has gone somewhere else when they've really died.
* Dogg's Hamlet, Cahoot's Macbeth, and illustrated with a hypothetical conversation that gets reprised in the first act of the play.
* Doggy Doo On My Shoe is all about people stepping in dog poop and wondering if they should teach dogs to pick up their own "doo", make rules about where they should poop, or even put nappies on them.
* doggy lipstick. His thinking is that if Mittens enjoys doggy lipstick, she'll like him even better if he's wearing several other kinds of makeup as well.
* Doggy Poo, an absurd little piece of Korean junior existentialism about a sentient doggy poo searching for the meaning of his own existence.
* dog-headed giant. However, there's a disagreement whether he comes from a tribe of cynocephals, or was transformed as an adult.
* Dog In A Manger by Lope de Vega the two main characters (a countess and her secretary) exchange letters supposedly meant for the countess' friend to express their feelings for each other.
* Dog In A Manger", where she outright states that she "loves because she is jealous" (in that precise order). Theodoro then writes an answer to that letter in which he hints that he loves her too, and which pushes her to (sort of) confess her

love, thus further encouraging him.
* Dog-Kicking Excuse: Damn it, I'm trying to be a jerk, stop making me like you so much!
* Dog-Kicking Excuse: Deliberately targeting bad people just because it presents a good excuse for doing something heinous to them is still as crossing it because, at the end of the day, they really only cared about inflicting serious or fatal harm on someone and just needed a good excuse for doing it.
* Dog-Kicking Excuse: Someone can't bring themselves to be mean, so they try to look for some excuse to be mean to the person or animal they're being mean to, often a reason to be angry.
* Doglands: At the start, Furgul and his sisters have to escape a cardboard box or they'll be killed. When the Gambler tries to push Furgul back into the box, Furgul bites off his thumb.
* Doglands. Dedbone's Hole, a racing greyhound compound run by an abusive man comparable to a slaver, burns to the ground.
* Doglands, Furgul's male owner Gerry acts sympathetic when he's due to get neutered.
* Doglands. Humans think that nature was made for them to exploit. Argal also states that, though humans treat dogs as they do, humans actually treat each other worse than they treat dogs.
* Doglands is a teen-aimed book about a lurcher (greyhound/wolfhound mix) named Furgul who is raised in an abusive racing greyhound compound. After escaping being culled as a puppy, Furgul must find his way back to his mother and save the greyhounds. Furgul predominantly doesn't understand humans and regards them as bizarre, especially due to upbringing with minimal human contact. The other dogs understand them more, but most of them still reject their human-given names and still confused by how odd and cruel humans can be.
* Doglands says that most dogs hate how humans smell (which is saying something because Furgul loves the smell of dog poop). Pets get used to it over time, but humans still stink to them.
* Doglands tell of Furgul's life as a puppy and shows how he escaped Dedbone's Hole. Part II tells of his temporary life as a pet dog and spans several months.
* Dog Latin, actually. Harry's actual Latin is pretty shabby, but it's still the language the White Council uses at meetings. Can't have some idiot blowing up the Merlin by accident. Elaine uses Dog Egyptian, and other wizards use Dog Sumerian. One imagines that Esperanto might be a good candidate for casting in a real language.
* Dog Logan, half-brother of Wolverine. It's established that Wolverine's x-gene comes from his father's side, as his father had demonstrated bone claws (albeit off-screen and implied), although no healing. Dog possesses neither ability.
* Dogma after the Exodus. That a replacement had not been appointed in the 3500 years since suggests to Loki that his talents were not adequately appreciated.
* Dogma, after the Metatron admits that God is missing and no one seems to know how to stop Bartleby and Loki from ending existence.
* Dogma, after they get drunk and tell Him off, God kicked the angels Bartleby and Loki from Heaven, setting in motion the events of the movie.
* Dogma, an angel, Bartleby, has his wings shot off. He touches the stump of one of his wings, licks the blood from his fingers, and breaks into hysterics, wavering between laughing and sobbing.
* Dogma, Azrael asks the barkeep for a "holy bartender" and then pumps him full of bullets when he asks how it's made. It takes Jay a while to get the joke that he really asked for a "hole-y bartender".
* Dogma, Azrael croaks out "But... I'm a fucking demon..." after Silent Bob collapses his chest with a blessed golf club.
* Dogma. Bartleby stops him at the last moment, but only because he's tired of waiting.
* Dogma: "Behold the Metatron, herald of the Almighty, and the voice of the one true God!"
* Dogma, but he isn't responsible for sending Bartleby and Loki on their quest-

after all, if they succeeded, he'd also be wiped out of existence; hence, Metatron dismisses Rufus' idea that this was his plot. It turns out another fallen angel, Azrael, is behind it all.
* Dogma. By the end of the film, Bartleby figures out Azrael's plan, but decides to go along with it anyway in order to get revenge on God and humanity.
* Dogma could explain the platypus, really? He then makes a disclaimer apologizing to all lovers of platypuses.
* Dogma. Even though Bartleby and Loki have been roaming Wisconsin since ancient times, they don't need food, clothing, shelter, sex, or society, and can comfortably exist outside of the system.
* Dogma for a fact there is a God, that Loki has stood in His presence, and He has spoken to Loki personally, yet Loki just claimed to be an atheist. Loki replies he just likes fucking with the clergy.
* Dogma, God herself does this. After the heroes save God, the day, and the universe, the main character asks to be told the meaning of life. God, played by Alanis Morissette, simply smiles.
* Dogma got hitched with his wife Jennifer Schwalbach, who was then eight months pregnant with their daughter.
* Dogma got tired of giving everyone else ideas, and asked God to grant her a little vacation on Earth, so she could create herself. Much to her annoyance, she found herself with an annoying case of writer's block. Apparently she's not allowed to keep any of the ideas she gives out for herself.
* Dogma has Cardinal Glick place an odd emphasis on God being male, considering the final cut has nobody telling him otherwise.
* Dogma has one of these near the end; Jay tells Bethany (while trying to get it on, because the world's about to end) about a boardwalk he once took a girl to on a date. Bethany, after learning that the boardwalk has Skeeball, realizes that "John Doe Jersey," of whom her minister was sermonizing about earlier, is God, trapped in a comatose mortal body. Hey, Jay was a prophet (or is that profit?), after all.
* Dogma has the Golgothan Excremental, a.k.a. the Shit Demon. Supposedly made of the voided bowels of crucifixion victims.
* Dogma, If they have their wings cut off, it transforms them into humans (which apparently doesn't work for demons or fallen angels), and they can't drink alcohol (although that was mainly a restriction put on them after one angel had a few too many and insulted The Big Man). Metatron is said to have 36 wings with eyes and mouths all over his body, each mouth said to speak a different language, but in the movie, he only had 2 wings, even though he did first manifest as a torrent of flame. The other two angels of the film, although disgraced, seem to have powers retaining to their old posts, with Bartleby, a Grigori, knowing everyone's personal history by looking at them, and Loki, the angel of death, mentioned to be able to "rain sulfur" (although he doesn't seem to enjoy doing so). When in battle, both are (nearly) invulnerable to our mortal protagonists.
* Dogma in a silver tutu, and is fond of doing handstands. It's also mentioned that God is a Skee-Ball addict. Although it's implied that God's appearance as Alanis is because that was the form the protagonist needed to see most. It is also implied that God was once as vengeful and wrathful as He/She was portrayed as in the Old Testament (Sodom and Gomorrah, the ten plagues, etc), but became less so as time passed. He/She no longer keeps an angel employed to fulfill His/Her wrath and gives His/Her Skee-Ball tickets to neighborhood children.
* Dogma in his attempt to get back into heaven. He starts laughing hysterically after his wings are shot off by Jay.
* Dogma is a stand-in for both McDonald's (Egg-a-Mooby-Muffin) and Disney (bi-coastal theme parks).
* Dogma is his character's least invasive role, where he utters maybe five words the entire movie, though he does still help out with Jay a fair bit.
* Dogma Jay propositions Bethany, and she turns him down. So he says, "What if the world was about to end?" and she agrees so he'll shut up. Fast forward all the way to the end of the movie, when Bartleby is close to unmaking reality, and Jay tries to make good on their "deal."

* Dogma: Jay says "Guys like us don't just fall out of the fuckin' sky, you know!" When Rufus does in fact fall from the sky right in front of them, he adds, "Beautiful, naked, big-tittied women just don't fall out of the sky, you know!"
* Dogma. Jesus is said to have also been like this for some years — the ones not recounted in the Bible.
* Dogma: Loki and Bartleby explicitly discuss Loki's past career, including the destruction of Sodom and Gomorrah whilst buying guns and have long argument about the creation of Man and the actions of Lucifer that precipitated his Fall from Heaven. The guy they're buying the guns from is suitably weirded out.
* Dogma, Loki's first appearance has him convincing a nun that her service to some "father figure saying 'Don't do it, or I'll spank you!'" is misguided and there isn't really any proof of God. The trick is, Loki's a fallen angel, who's not only stood in the presence of the Almighty but has spoken to Him personally. He just acts like an atheist because he loves to "fuck with the clergy, man; I love keepin' them on their toes."
* Dogma makes it impossible to rape the main character when she thinks he might. Despite being a stripper, the muse Serendipity shows the same form of anatomical incompatibility. Rufus, though, IS a human and apparently has a full set of anatomical equipment when he falls naked out of the sky onto the protagonists.
* Dogma. Many of the concepts in the film about organized religion and the nature of spirituality are worth serious consideration but filtered through 90's humor, a wild plot, and enough curse words to make a sailor wince.
* Dog Man books was created when a police officer and his police dog were injured in an accident, and the doctors saved them by putting the dog's head on the man's body.
* Dog Man (Dav Pilkey): When the body of Greg the dog and the head of Knight the human police officer are dying, doctors sew Greg's head onto Knight's body, creating Dog Man.
* Dog Man, licks it up, and slobbers the brainwashed policemen with it.
* Dogma. Notably, in this film, cutting an angel's wings off turns him into a mortal human, subject to things like death and plenary indulgence...
* Dogma, not only does Jay not know how to drive stick, but he doesn't even understand what it is. This leads to:
* Dogma plays a gun clerk who is very puzzled when the two angel antagonists are at his counter discussing the virtues of individual handguns and how they don't just invoke divine wrath like flaming swords used to.
* Dogma plays the trope for laughs by introducing a thirteenth apostle of Jesus, who was left out of the Bible because he's black.
* Dogma plays with the trope when the Golgothan throws down with a crew of gang-bangers in such a way that the heroic onlookers tilt their heads as if trying to understand the combat.
* Dogma, reality as we know it hinges on God being infallible. In short, you can't prove God wrong because doing so would end the world. Which becomes a driving force in the plot when fallen angels plan to use a loophole in Catholic dogma to overturn their banishment.
* Dogma, Rufus knew Jesus Christ. See the quote above. He also claimed to be the 13th Apostle, who was left out of the records. 'Coz he was BLACK.
* Dogma, Rufus the Apostle attempts to prove to Jay and Bob that he's really from heaven:
* Dogma's brother's bloodline (through a sibling of the "ancestor" instead of the "ancestor" himself).
* Dogma, since living humans would die instantly if they ever heard her speak out loud; the Metatron has to speak for her. (Bob also says "Thanks" to her near the end.)
* dog mask that makes him look more like McGruff the Crime Dog instead of a reporter from the press.
* Dogma slides herself down the length of the bar in order to reach the sink, which she's been ordered to bless.
* Dogma. So in this case the "Make Up Barely Meaningful Titles For Kevin Smith"

trope was averted.
* Dogma suffers this fate. According to Metatron, "We went through five Adams before we figured that one out," resulting in an angel getting the job of speaking to humans for God. The Metatron later notes a human is immune if the human is already dead.
* Dogma that inevitably come at an airport, but one show is as good as another.
* Dogma. The characters, including Jay and Silent Bob, get teleported by an angel from the middle of the woods to a fancy restaurant. Jay looks at the joint he had been smoking and says, "Damn, I think this shit just kicked in!" and continues puffing away.
* Dogma: The Golgothan is Hell's top assassin, a hulking monster who's composed of the poop of every criminal who died at Golgotha. He is defeated quite comically.
* Dogma, the Last Scion becomes the Next to Last Scion after God makes her pregnant in return for successfully saving the world.
* Dogma" The security guard doesn't heed the warning, and a few seconds later is on the receiving end of a one-handed version of this trope.
* Dogma: This claim is put forth by Loki, the exiled Angel of Death, in his attempt to convince a nun that God does not exist. He wins and tells her to buy herself a nice dress and go find a man...or woman.
* Dogmatix (Idefix), while one of the main characters in the books, only makes a few brief appearances in
* Dogma when one of the Mooby's boardmembers apparently got his girlfriend drunk at a party and arranged for another guy to sleep with her, just so he could dump her without himself looking bad for it. She ended up committing suicide over her "betrayal of trust".
* Dogma, when Rufus, Bethany, Jay, and Silent Bob are eating at a breakfast place, Rufus talks about being dead (although it's not really a power).
* Dogma when she is attacked by the minions and drops her car keys, which the minions promptly knock underneath the car.
* Dogma, where Rufus comments that "ideas" are malleable and can change and possibly even die out. "Beliefs," which are strengthened ideas, are much harder to even change, let alone kill. It also places a spin on it in that the fact that a belief is hard to 'kill' is not necessarily a good thing if the belief is not a good one, or if the belief has become an overly rigid dogma.
* Dogma, where the protagonist agrees to have sex with Jay if the world is about to end to get him to work with her, but when the world IS about to end, she refuses anyway.
* Dogma, while not specifically stated, it is suggested by the following exchange:
* Dog Mr Peanutbutter is an open-hearted, perpetually optimistic goofball who is full of excitement about the most trivial things, and deeply loyal. He also has no common sense at all.
* Dog of Death", Grampa Simpson tells the rest of the family that Santa's Little Helper is dead, and the show goes into a commercial break over a shot of the dog's motionless body as sad music plays. The episode resumes with the exact same shot, except the dog is now breathing and the Simpsons are admonishing Grampa for declaring him dead (though he continues to insist that the dog's dead).
* "Dog of Death": SLH is revived by CPR during his stomach operation after SLH dreams of going to heaven.
* do go gibbering mad from witnessing the sheer frailty of humanity compared to these forces, the only reason the world has held together so far is humanity's own actions. Many countries have secret agencies to counter supernatural threats, one of them being the titular Laundry. No matter the threat, it usually drives the protagonists to greater determination and ingenuity in holding the line, instead of madness and despair (and, of course, the little detail that said determination tends to win them at least temporary victories).
* Dogora: So much that simply blowing Dogora up would make more of them!
* Dog Pile of Doom: Where large numbers of mooks bring you down by jumping on top of you and physically dragging you to the ground.
* do grades, and are rewarded by their parents. Ben's father is forced to concede

that, in reality, cheaters prosper and win very often (saying that "in some cases, they even win the White House", an obvious reference to Watergate), although he does say that being honest can be far more rewarding in the long run.
* Dogs (and cats) have been known to react in the alleged presence of the supernatural.
* Dogs and cats in the games are treated like infants/children or infants, toddlers, and children depending on what version you are playing (apparently Child Services doesn't care about teens), but fish and other small animals can be starved if you forget to feed them.
* Dogs and rats have been trained to detect land mines or gas leaks by smell.
* Dogs are also incredibly attuned to body language, since the bulk of their communication is by that method. Since dogs and people share a number of signals, they can easily pick on things we'd miss since we tend to focus on tone of voice.
* Dogs are being trained to detect Covid-19 infections by smell. If this proves to be a reliable screening method, it will
* Dogs are depicted as monogamous, unlike real dogs. This is accurate for the wolf characters, however dogs aren't monogamous like Grey Wolves are.
* Dogs bark, horses rear, and cats snarl at the mysterious woman in 1955's
* Dogsbody is unclear, as they can breed amongst themselves and apparently die.
* Dogs: Bullets & Carnage manga. There is a catgirl... only she's at least seventy, and looks every year.
* Dogs: Bullets & Carnage. The only females in the cast he can handle being around are Nill, a very cute, meek, unimposing mute girl he helped to rescue, and Naoto, but only from a distance.
* Dogs can tell Jeog is evil and drive her off with their barking, as she cannot stand the sound of barking.
* Dogs, cats and horses can become ghosts in the same manner as Sims.
* Dogs Don't Talk and told her mother during a particularly nasty argument about abortion, "You were never a mother to me!" As an adult, she's never invited to any family gatherings besides funerals, and she's the only one of Keith's five siblings Ben hasn't met.
* Dogs Don't Talk, Blake Barker, and beats him up. Then Ben's mom and their two dogs show up, and the dogs climb all over Blake. A girl films it and uploads it to Facebook, resulting in comments like "Blake likes it doggy style!" Even months later, a total stranger recognizes Ben's dog as the one that humped Blake. The video is a problem for Ben, too, as he and Blake both get in trouble for fighting, but at least his wrestling teammates respect him more.
* Dogs Don't Talk Emily, her family is moved. The two attempt a long-distance relationship for a few months, but in the end Emily breaks it off, saying they need to move on without each other.
* Dogs Don't Talk grunts, flaps his arms, rocks back and forth to music, and jumps when he's happy.
* Dogs Don't Talk is two years younger than Ben and tattles on him at every opportunity.
* Dogs Don't Tell Jokes during his comedy routine at the climax of the book, but the audience and Miss Langley take it as a joke.)
* Dogs Don't Tell Jokes is about Gary Boone, a kid who wants to be a stand-up comedian, but is considered unpopular and weird by his classmates. Gary finally gets his chance to prove himself during the school talent show, comes on stage wearing a hat, and launches into a long rambling story about how he bought some shampoo that was too strong. He punctuates this story with many other unrelated jokes, and actually manages to get laughs from his peers. Finally he reaches the end of the story, where he reveals that he left the shampoo in his hair for too long and removes his hat, revealing that he's shaved his head bald from the ears up. This gets a huge laugh from the crowd.
* Dogs Dont Tell Jokes variant which he somehow found uproariously funny despite not knowing the original.
* Dog Sees God comic strip, though the characters are CB, CB's Sister, Van, Van's Sister, Beethoven...

* Dog Sees God: "Do you ever feel like you're not a real person? That you're the product of someone's imagination and you can't think for yourself because you're really just like some creation and that somewhere there's people laughing every time you fall?"
* Dogs; if you own two or more, you'll often see them badgering each other, swiping their toys, chasing one another around, and generally harassing one another back and forth. But if one is sick or injured, the others will stick by him or her and comfort them until they get better.
* Dogs in the Vineyard, a Badass Longcoat is standard issue to every player character. Depending on how the GM decides to run the game, they can even deflect bullets.
* Dogs in the Vineyard, although its version of the time period is a lot less Wild, so to speak.
* Dogs in the Vineyard by any means necessary before it falls into full-blown demon-fueled Hate and Murder.
* Dogs in the Vineyard — as they are commanded to represent the word of the Book of Life, they basically interpret what it means and enforce it as they see fit. Often with guns.
* Dogs in the Vineyard never specifically mentions any real-world locations or dates, but it takes place in an area similar to the pre-Civil War American west, in the lands of the Faith (analogous to the Mormon nation of Deseret). The Terrestrial Authority of the East is analogous to the US government and the east coast states. Though in this setting, the lands of the Faith are technically still part of the Terrestrial Authority, they give little regard to it.
* dog-sized beetle, a hoofed, humped dinosaur, and a beanbag with a beak and talons on the end of tentacles.
* Dog's Life has the cat food machine, complete with flamethrowers, smashing hallway traps of doom, and buzzsaws.
* Dog's Life: The protagonist is a foxhound named Jake who is on a cross-country mission to rescue his crush Daisy. In the game you can temporarily take control over other dogs as well. To complete the game, you must use Jake's nose to sniff out certain scents to progress.
* Dogs Love Fire Hydrants: Dogs are depicted as being obsessed with fire hydrants.
* Dogs of either gender tend to act like this, particularly as puppies. Typically when their owner walks into the room they will run around excitedly jumping on things (including the person).
* Dogs of the Drowned City) forced to live together and endure a hurricane battering their homes in Miami, Florida. The hero of the trilogy, Shep the German shepherd, tries holding the pack together as well as struggling to overcome his prejudices to smaller dogs. This is a downplayed trope, however, for the humans do come back in the third book and eventually reclaim their pets as well as rebuild the wrecked buildings from the hurricane.
* Dogs of the Drowned City trilogy stars a German Shepherd named Shep whose owners evacuate their city after a hurricane. He, and several other dogs, must survive on their own.
* Dogs of War all wear different gear over a standard unifrom. This is passed off due to their status as mercenaries who hand-pick their equipment and weapons.
* Dogs of War (essentially a lot of mercenary companies scraped together into an army) don't much care about their general... but if the Paymaster is killed and his treasure chest captured,
* Dog Soldier has 7-year-old Morita Asao: Has Hiba and Fudo to save his father, parachutes out of the plane, then, after his father is killed in front of him, sneaks a grenade into the prison, and walks THROUGH fire to stop Gaddafi's ICBM.
* Dog Soldiers against a werewolf as he mercilessly beats the damn thing with his bare hands...and whatever else he thinks of at the time.
* Dog Soldiers. An early scene seems to demonstrate that he has a strong moral code, and he takes on leadership when his troop gets attacked by vicious werewolves. And, in the end, he is the only survivor left to take down one particular werewolf that has an personal ax to grind against him.

* Dog Soldiers as they don't outright kill them while they're transforming but they do get their weapons ready. Understandable because they were under a table and nobody really wanted to get that close to a werewolf.
* Dog Soldiers. Being something of a black comedy, a friendly Sheltie decides that his guts would make a nice plaything as he's hastily trying to reassemble himself.
* Dog Soldiers does this by necessity, considering the budget limitations on showing the werewolves too often, but actually makes the squaddies pretty likeable. It helps that "badass group of British soldiers out on a mission somewhere" is inherently more interesting to watch than a bunch of horny teenage morons being awful to one another.
* Dog Soldiers example: The main characters need a distraction to divert the werewolves.
* Dog Soldiers featured Luxembourg doubling for the Highlands of Scotland.
* Dog Soldiers features this with the silver item that a man gave to his girlfriend before their deaths.
* Dog Soldiers fistfight with a werewolf, Spoon is defeated and shouts, "I hope I give ya the shits, you fucking wimp!"
* Dog Soldiers, in the upstairs bedroom, when they're stitching Sarge up:
* Dog Soldiers, one of the troopers washes out of training as a commando because he refused to kill the tracker dog sent to pursue him in a field operation. Not an infiltration, but a similar moral quandary that his commander berates him for shying away from.
* Dog Soldiers: The house is surrounded by werewolves and their vehicle is damaged.
* Dog Soldiers: The Sarge, absolutely. His men adore him and he even chastises Ryan for 'scaring my lads' before dusk hits and the werewolves return. His actor jokes that he's like a mother hen to his group.
* Dog Soldiers: The screen shows an article depicting the events of the film, only to quickly pan out, revealing it as a secondary story to the main headline (the result of an International Football match). The secondary story is about the only survivor of a British soldier unit who were attacked by Werewolves.
* Dog Soldiers, the transformation into a werewolf is apparently very painful, as the unfortunate lycanthrope-to-come begins screaming and grunting as they stagger around the room, tripping over random objects, as fur begins to grow and they generally display more wolf-like characteristics as the change continues, growling instead of crying for example.
* Dog Soldiers, two campers are preparing to make love until a werewolf interrupts and kills them both.
* Dog Soldiers: "We need a diversion... something fast and loud." Cue them looking at Spoon, who is both, plus a heavy dose of crazy.
* Dog Soldiers when the soldiers are investigating a potentially hazardous closet. By all appearances, the border collie who startles Cooper must have been sitting on one of the closet shelves waiting for the chance to jump straight forward.
* Dog Soldiers: Wisecracking Spoon at one point does the two-fingered variant.
* dogs) or get extra food from sedentary societies through trade. If true, this would mean hunter-gatherers actually didn't colonize the jungles until a few thousand years back. Sadly, rainforests are as bad for remains conservation as they are for working archaeological digs.
* Dogs (particularly English Springer and English Cocker Spaniels) can have something called "Rage Syndrome" which does resemble Hate Plague. Fortunately, it's rare and it only lasts a few minutes, and can, in most cases, be controlled with medication.
* Dogs Playing Poker. It's a series of paintings of dogs that are playing poker.
* Dogs Playing Poker paintings by Cassius Marcellus Coolidge, being a popular stock art reference. Not as many people are aware that all but two of the paintings (all but the first and last) were commissioned to sell cigars.
* Dog Spray Afternoon", after Molly discovers where the tagger will make his next tag and Owen informs his crew their next move:
* Dog Spray Afternoon at Shampagne while the door closes, but Shampagne wasn't even paying attention to her.

* Dog Spray Afternoon", both Birdie and the audience know what Bitsy is up to, but Birdie explains he cannot tell Owen or Paige because there are rules to being a narrator. He, however, gets impatient and blurts out to Paige that Bitsy is the one money laundering for the mayor, breaking the rule of revealing too much to the main characters. He tries to cover it up by saying as a busker he overhears business talk in the park all the time.
* "dogs" (quadripedal robots). Given the complete lack of animals or other humans that we see, it's implied the robots have become the “apex predator” of the entire ecosystem and wiped out all life.
* Dogstar. Amongst other things, he once constructed a functioning radio telescope out of an old satellite and a toaster.
* Dogstar. Any time he asks where she is, it can be almost guaranteed that she will be standing right behind him.
* Dogstar, Bob Santino blows up Pluto in order to demonstrate the power of the Santino Laser Cannon. He then offers r to blow up Mars so the sound will reach Earth sooner but is stopped from doing so by Fenwick.
* Dogstar: Carried by the angry mob when they storm the television studio in an attempt to lynch Ramon Ridley. Especially odd as it is set in a futuristic mega-city and they have no reason to have either flaming torches or pitchforks.
* Dogstar episode "Pedigree", Lincoln Clark creates a 'voice-box' for dog-scent sniffer-cat Boombah. They quickly discover that Boombah has nothing interesting to say, and that Simone has been lying about being able to talk to the cat.
* Dogstar. Her 'traditional' recipe for hotdogs involves snail glue and tripe.
* Dogstar. His mind so focused on higher matters that he will teleport places without putting his trousers on.
* Dogstar inadvertently destroys it, and they have to migrate back to the newly repaired Earth.
* Dogstar: In "Mensamania", Fenwick creates a stupidity virus that Bob Santino unleashes on Mensa, the most intelligent planet in the galaxy, as a test run. If it works there, he intends to use it on Earth to make the population stupid enough to buy his latest product.
* Dogstar: In "Persuasion", Bob Santino plants subliminal messages in his robog ads to cause people to regard the Dogstar as a threat and try to destroy it.
* Dogstar: In "The Greening of Gavin", Lincoln instructs Fenwick on how to disarm the Tesla cannon and tells her to cut the red wire. Fenwick then points out that both wires are red and asks what idiot would do that. Lincoln looks embarrassed.
* Dogstar: In "The Quick and the Dog", Zeke attempts to fix the food synthesizer. It results in him and Alice being drenched in dog food.
* Dogstar in the "Titanium Chef" episode but Glenn can't quite come up with anything.
* Dogstar: In "Twice the Excitement", Simone is trapped outside and drifting away from the Valiant. Gemma throws a rock that opens the valve on Simone's oxygen tank, propelling her back to the ship.
* Dogstar: The Primes attempt to flush Alice and Zeke out of an airlock in "Titanium Chef". Their plan backfires and they end up being cast into space instead.
* Dogstar: The Valiant is halted by one in "The Quick and the Dog", where the asteroids are no more than a few feet apart.
* Dogstar, who constantly manages to paint himself as humanity's saviour, despite being responsible for many of its catastrophes.
* Dogs tend to worship humans as the "First Ones". Rheun is understandably reluctant to tell dogs that they were human in prior lives, and octopi before that.
* Dog Stereotype later explained in an interview that he had no idea this was an issue but was happy they were able to raise awareness of it.
* dogs that looked cute if they evoked the same response as children However, they lack the distinctive "meow" vocalization of the domestic cat, which is known to drive humans mad with cuteness.
* Dogtanian and the Three Muskehounds was condensed (with a new redub and script) into a 90-minute TV movie.

* Dogtanian, has an elderly yellow horse, this one called Sandy. (Although Sandy is a far better horse than he looks.)
* Dogtato that causes it to bite all the veggie-hybrids, turning them into apples that roll up and gather together in the branches of a nearby apple tree where the bat holds residence. They return to normal in the morning.
* Dog the Bounty Hunter, even those with myriad felony charges against them, will often become emotional when family members or loved ones are mentioned when talking to them en-route to jail. Some will even take the opportunity to call them to apologize for their actions before being taken to jail.
* Dog the Bounty Hunter has the team gather for these before going after bail jumpers to review the relevant information on them.
* Dog the Bounty Hunter have made him something of a controversial figure.
* Dog the Bounty Hunter the Coon, and decides to take the law into his own hands, such as scratching a guy for making out with his girlfriend. Cartman thought he was stopping an attempted rape, despite the girl very loudly screaming "Yes!"
* Dog the Bounty Hunter, with his own crew and big-breasted wife, Beth. Dog loved the episode, and the real Beth said they should've made her boobs bigger.
* Dogtooth: a Greek film in which a couple keeps their children imprisoned in their home to adulthood, teaching them that the outside world is incredibly dangerous while trying to maintain a completely different world inside, ranging from different vocabulary to incest. Features lesbian incest, passionless sex scenes, long stretches without dialogue and no real ending.
* Dogtooth has stated that he prefers working with amateurs, as he finds their performances more pure.
* Dog Town, a crime-noir RPG where player characters commit all kinds of criminal acts, has rape, sodomy and doing bad things to children listed under "Perv Crimes," the lowest-of-the-low stuff that's enough to make any "decent respectable criminal" want to vomit, or at the very least "shorten the lives" of the "miserable fuckers" who do these things.
* dog treats laced with poison or sharp objects littered around dog parks, but more cases are reported than found true, and often it's the result of dogs eating poisoned bait set for vermin animals or small animals that were killed by the bait. This has led to increased regulations regarding the use of poisoned bait for pest control.
* dog. Two kids are tied up in a cage, and a dog is in another cage. He bites through the ropes on the kids' hands.
* Dogville - A Danish/British/Swedish/French/German/Dutch/Norwegian/Finnish/Italian co-production.
* Dogville, Nicole Kidman's character takes the name of this trope literally and indeed sends her goons to kill the entire village, except the dog.
* Dogville to America, but that shouldn't stop him from being able to portray it as hateful and evil, right?
* Dogville was filmed in a similar style, though with slightly more scenery.
* Dog Warrior, and he shuns his newfound family and works against them. Meanwhile, Ukiah sees that his long-lost brother seems to be a ruthless drug dealer, and suspicion leads the Pack to put Atticus through a harsh initiation, confirming their criminality and enmity in his mind.
* Dogwelder deserves special mention. Garth Ennis and his friends were in a bar one night and decided to come up with the worst possible superhero. Dogwelder was the first suggestion, and nobody could top it.
* Dog Whisperer. He even sincerely thanks Matt Stone and Trey Parker for the work they did, for promoting him and his show, and even offers his services if they ever find themselves with an out-of-control dog.
* Dog with a Blog: Avery suffers a horrible case of this trope. Whenever she is told a secret, she will panic and start hyperventilating before finally blurting it out.
* Dog with a Blog episode "A New Baby?" has the kids misinterpret Bennett discussing getting a promotion of getting a boat for their parents having another baby.

* Dog with a Blog has Tyler go around drawing moustaches on pictures. At the end of the episode, Bennett and Elen draw a moustache on him in retaliation.
* Dog with a Blog: In the episode where Stan's puppies demonstrate the ability to talk, Stan and the kids celebrate, right up until Chloe points out the obvious issue: how do they keep them from talking around the parents? Cue record scratch and Stan telling Freddie to get off the turntable.
* Dog with a Blog: Karl and Avery pinch other to detect if they are in one of Avery's kissing dreams.
* Dog with a Blog, Nikki and Tyler play Cyrano for Avery to pretend to know Spanish to "tutor" her crush. Unfortunately, it just happens that Nikki has a crush on Tyler and is jealous of his new girlfriend. This escalates into a massive argument between Tyler and Nikki that results in them abandoning Avery on the spot.
* Dog with a Blog, possibly to match her mom's blonde hair, who was a redhead in a flashback.
* Dog with a Blog, Stan the dog slides down the banister during a family photo, essentially ruining it for everyone.
* Dog with a Blog that Bennett and Ellen unknowingly met when they bumped into each other while strolling their children at the park. The reason they didn't recognize each other is because back then Bennett had a long grey beard and Ellen had red hair.
* Dog with a Blog the family is discussing what to do about Ellen's new pet parrot:
* Dog with a Blog: Tyler has to pretend to be a dog whisperer so that Nikki doesn't find out Stan's secret. He can't figure out what's wrong with Nikki's dog, Evita, but Stan sees that she has a bur in her paw and must tell Tyler without alerting Nikki. He gesticulates his paw but Tyler gets it wrong. Stan then writes it on the wall, but since he's a dog he doesn't know how to write. Finally, Stan calls Tyler.
* Dog with a Blog, Tyler tries to find out why Chloe's friend doesn't like him and does all sorts of things to win her over. Even after he learns the lesson, he finds out that she really does like him and was pretending not to so he would keep doing favors for her and Chloe. He then celebrates the fact that he's learnt that not everyone has to like him and that everyone does like him.
* Dog with a Blog when Tyler's crush is helping him make burgers, even with romantic music in the background. Then her mom walks in and tells her she's doing it wrong, she then proceeds to help him in the same way, complete with the same romantic music and Tyler's disgusted reaction
* dog) with dark blue snuggies. The grandmother, mother and daughter had pink snuggies.
* Dog with his men saying that them getting robbed of their own ill-gotten drugs and money is "a problem."
* Dogyuun has many scorpion mechas in stage 4. The boss of that stage is a giant robot scorpion that shoots homing balls from its tail, and tries to massacre you with its claws.
* Dogyuun, it gets screentime in the intro... and it's only the second of ten bosses.
* Dogz Don't Kill People (Wabbitz Do)" — courtesy of Mouldie Lookin' Stain, a.k.a. Chris Moyles.
* do has Professor Xavier asking characters no more than once if they would like to join up, then leaving them completely alone, even when they've fought alongside them in the past (Dazzler is a good example). He only seems to insist that they stick around if they've actually been official members of the team for some time (such as Beast). In the X-Men's second incarnation, Professor Xavier is seen offering several characters a chance to join up (including Colossus, Nightcrawler, and Wolverine), and although they all accept, nothing indicates he would have pestered them had they not done so. (In the case of Nightcrawler, for example, he isn't even physically present).
* do have a detriment — all the property he destroys is paid for by the agency, and they dock his pay in return. Seeing as Shizuo really can't get a job anywhere else and that his little brother is an idol who is undoubtedly filthy rich, he doesn't really care. If anything, he's more surprised that he's paid at

all.
* do have a fair bit of influence. It is very possible for commoners to rise to power by working their way up in the civil service, distinguishing themselves in battle or taking advisory positions with powerful people.
* do have a language of sorts, that can be both written and telepathically "vocalized".
* do have concrete goals in mind (usually some sort of money-making scheme), the organization as a whole, particularly its management, falls under this.
* do have dots tattooed for use by radiologists to line up and aim the beams for radiation therapy to kill tumors.
* do have human(oid) holograms. This was done intentionally to prevent the crew from empathizing too much with a potentially dangerous AI.
* do have jurisdiction as crimes involving the postal service are federal offenses). Stottlemeyer does show contempt for Special Agent Josh Grooms, the agent in charge.
* do have just a pair (or lower), it's because a point is being made of how bad/unlucky the player is, how good they are at bluffing, or how lame the game is.
* do have names and even personalities, it's said the protagonists shouldn't bother to learn them because of this.
* do have perfect spelling, and what it means, because if there were no standards, the modern standard would just be another convention among the rest. The Watch books in particular mention that school cost a penny a day to send kids to, which most of the poorer families can't afford and even middle-class ones can only afford for part of their child's life. Vimes, a product of one such school, provides evidence that there are competing standards, as his handwriting is neat and consistent but sprinkled with extraneous "e"s consistent with spelling habits in the 19th century.
* do have significance, but only so that there are exactly 4000 years separating creation from the Babylonian exile.)
* do have that reaction to it... probably shouldn't be letting something that causes swelling anywhere near their throat.
* do have the right to collect royalties from any work that uses the character in the UK.
* do he's occasionally scolded (and spanked once) by his mother over his misdeeds and at the end is punished by his parents for riding his bike to town without telling anyone.
* D'oh-in in the Wind", when Homer, who is taking up a hippie lifestyle, leans his arm against a tree and decides to "feel the good vibrations". The view then pans back to reveal that the "good vibrations" he's feeling is his hand inside of an active bee's nest. His only reaction is drawn-out (yet relaxed-sounding) "Ouch."
* "Do I Creep You Out" uses JibJab's standard cutout animation method. "CNR" also did this, but mixed it up with live-action heads on animated bodies and vice versa.
* "Do I Creep You Out?" Which opens up as a sweet love song and keeps to the sweet tune while the singer confesses all the creepy, stalkerish things he has done to the subject of his affections (Taking her gum out of the garbage, following her home from work).
* Doi has a crush on Yuki for a few chapters and gets Nitori to let him meet her. The crush goes away
* Doing a barrel roll in a fighter, where maneuverability is an essential component of design, is not very exceptional in and of itself. Barrel-rolling a prototype four-engine commercial jet is something else entirely. While it was actually quite safe for the pilot and plane,
* Doing a strenuous activity with additional weights bound to the trainee
* Doing certain things or taking damage from specific sources repeatedly can cause the game to offer you a
* Doing enough public events (or doing the same public event enough times) on a planet will result in new starting dialogue between your Ghost and the planetary vendor, lampshading your grinding/farming.
* Doing In the Scientist: Explaining away scientific stuff as actually being the

result of magic.
* Doing In the Scientist, or that in fully comprehending reality, there are limits to what we can rationally explain.
* Doing In the Scientist: Retconning something that had a scientific explanation into having a magical one vs. retconning something that had a magical explanation into having a scientific one.
* Doing In the Wizard: Every event has a cause that can be explained by the interaction of fundamental laws of the universe, even if it seems "magical" because we don't know what all those laws or interactions are.
* Doing In the Wizard: Explaining away magical stuff as actually being the result of science.
* Doing In the Wizard is actually bleeding out its vagina, not its ass.
* Doing In the Wizard: Replacing a magic thing with a similar, more mundane thing.
* Doing It, by Melvin Burgess, one of the boys calls his "Mr. Knobby Knobster."
* Doing It by Melvin Burgess subverts the hell out of this trope by showing just how psychologically messed up a teacher would have to be to want to have sex with her student and why, in the long run, this sort of relationship would be damaging to the student in question.
* Doing It for the Art once when Deadshot asked him why, if he was classically trained and had a genuine Strad violin, why he called himself the Fiddler, like "...an inbred hick".
* Doing It for the Art: The creator makes the work for artistic merit rather than profit.
* Doing It for the Art: The people behind the work do it for artistic merit rather than profit.
* doing it herself; how immortality would affect somebody who's already a ghost is unclear).
* Doing It Right This Time “the Angel of Gundamjacking” (former trope name).
* Doing It Right This Time about Ritsuko and Commander Ikari's sex life.
* Doing It Right This Time a 'disaffected member of Generation X' the rule doesn't apply to him.
* Doing It Right This Time; after all, he can hardly monologue to the Evangelion her soul resides in.
* Doing It Right This Time: After a shopping trip in chapter 2 Asuka realizes she not only likes Shinji but also Rei.
* Doing It Right This Time: After returning to the past the three pilots talk about how they are so socially inept that they run away from other people (Shinji), push them away (Asuka) or don't know how interacting with other persons (Rei). However they agree to try to get better at socializing.
* Doing It Right This Time and all worry, angst, and heartbreak that go hand in hand with them that they opt to share.
* Doing It Right This Time, and attempts to give her a bit more of a developed character than canon.
* Doing It Right This Time: As Asuka notes, Shinji blames himself for all what happened in the original timeline, including messes were not his doing or he had no control about.
* Doing It Right This Time: Asuka blushes when she sees Shinji and Rei trying new clothes. She is particularly flustered when she stares at Rei because she had never been drawn to a girl until then.
* Doing It Right This Time, Asuka casually states -after the initial shock-:
* Doing It Right This Time Asuka ran into this trouble while talking to Shinji about the events of the original timeline:
* Doing It Right This Time: Asuka travels to Tokyo-3 early to help with Shinji and Rei's training. When Shinji asks if she is right with them getting kills while she remains benched, Asuka replies she is rationalizing that it will be thanks to her training. Shinji replies it is not a rationalization because she was the best pilot and he was just lucky.
* Doing It Right This Time: Asuka walks into the sea together with Shinji, hoping

to rejoin Instrumentality or drown... and wakes up in her bedroom in Germany, three months before the start of the War. When she realizes she has a second chance she is ecstatic and thrilled about it.
* Doing It Right This Time: At the beginning of chapter 2, Asuka and Rei have a short talk when the latter is sleeping in the former's room and she starts bleeding.
* Doing It Right This Time" counter, which Asuka forced them to reset in her first match.
* Doing It Right This Time does not want to mess with Shinji or Asuka in presence of Rei. She has a gun and she is very trigger-happy.
* Doing It Right This Time fanfic: In the first story draft, Misato comes home and finds Shinji, Asuka and Rei fast asleep and cuddling up together. She finds them so absolutely adorable her doubts about a three-ways relationship working vanishing... and she slinks away to find a camera and take pictures.
* Doing It Right This Time: Gendo ordered Rei to take medication to "keep herself focused". Upon returning to the past the three pilots found out that her "medication" was a cocktail of mood suppressors and tranquilizers which turned her into a completely creepy and unemotional person. After stopping to take them, Rei starts exhibiting a normal emotional range.
* Doing It Right This Time him to watch how she seeming died, Shinji wonders what his father saw in her. Asuka cannot figure it out either.
* Doing It Right This Time him to watch how she seemingly died, Shinji wonders why his father would marry her and decides there is no accounting for taste.
* Doing It Right This Time in a very simple way: the three of them share each other.
* Doing It Right This Time: In chapter 2 Asuka has this reaction when she sees Rei trying a new dress. When she realizes she is staring she says herself "Stupid hormones". That scene led Asuka to realize she was not as straight as she thought and she liked both Shinji and Rei.
* Doing It Right This Time: In chapter 2 Asuka notices Rei has very nice legs.
* Doing It Right This Time: In the first story draft Rei decided to get hammered when she thought she had missed her second chance and Asuka had beaten her to the punch again because she was under house arrest (long story) for long enough for Asuka getting there and get her claws into Shinji before she did.
* Doing It Right This Time: In the original timeline Shinji thought Asuka did not like him back, Asuka thought Shinji did not like her back and he loved Rei instead, and Rei was unable to recognize her own emotions. In the altered timeline neither of them confessed for a while since Asuka was confused because she also started liking Rei, Rei was unsure about her feelings towards Shinji and Asuka, and Shinji thought he would have to choose between both.
* Doing It Right This Time, it is Asuka who reveals Kaji that Misato carries a torch for him still:
* Doing It Right This Time: Lampshaded. Time Travel? Shinji finds it perfectly believable and thinks being skeptical about it is silly. After all what has happened to him, why not?
* Doing It Right This Time makes a minor plot-point out of both Hikari and Asuka doing away with this look in favour of a more "adult"-looking hairstyle. In Hikari's case it's only for a special occasion, but Asuka has made it permanent.
* Doing It Right This Time: One of the fans of this story makes illustrations of several scenes.
* Doing It Right This Time opens with one of these for Ritsuko and Maya. And boy is it a memorable one!
* Doing It Right This Time plot, Kaworu needs a huge amount of energy. More than even an S2 Organ can generate in normal operation. The hastily jury-rigged overclock does work, but...
* Doing It Right This Time Ritsuko changes completely her behaviour towards Rei, treating her like her little sister and being quite overprotective from her.
* Doing It Right This Time: Ritsuko was so engrossed in her work and her scientific research, and so driven to differentiate herself from her mother, that all her

relationships prior Gendo had failed after a few months.
* Doing It Right This Time: Sakura and Nozomi know about her brother and her middle sister (respectively) and other people being time-travelers and are keeping it secret... despite Sakura being very loud and indiscreet.
* Doing It Right This Time: Sakura Suzuhara is tiny, cranky, demanding, and constantly follows her big brother around. The "Don't like being called 'a kid'" came when Asuka did do right that.
* Doing It Right This Time: Shinji, Asuka, and Rei are more determined than ever to save the world after having gone through the canon's events and returned the past. They are also more sarcastic than ever due to be fully aware of having been puppets used to fight massive alien monsters and cause the end of the world.
* Doing It Right This Time: Shinji, Asuka and Rei's minds were sent back in time to three months before the beginning of the Angel War (and later they find out they are not the only returnees). Asuka jokingly suggests they pretend everything was just a prophetic dream or something, and theorizes Kaworu has something to do with their return.
* Doing It Right This Time: Shinji, Rei and Asuka were fourteen when they met (the latter was thirteen to be precise). Shinji liked both girls and they liked him back, but due to their psychological issues they were unable to make a connection. After going through a war, the end of the world and returning to the past they do not want to repeat past mistakes and they are very sick of romantic angst, jealousy and woe so the three of them get together.
* Doing It Right This Time situation, but the one to take the biggest direct step towards derailing the Scenario is Rei... and to a lesser extent, the late Naoko Akagi. Shinji still needs some convincing that they can pull it off.
* Doing It Right This Time's shoulder. In order to talk with them, she leaps from the giant robot and lands on the catwalk in this position.
* Doing It Right This Time: Subverted. After hearing how his father treated Rei, Shinji wants to kill him… and then he thinks of a better idea: giving him exactly what he wants –reunite with Yui- and then watching while his mother gives Gendo a piece of her mind.
* Doing It Right This Time: Subverted. Gendo loves Rei more than Shinji... However, Gendo being Gendo, it only means he treats her in a slightly less crappy fashion.
* Doing It Right This Time: Subverted. When Asuka begins to suspect that Rei's feelings towards Shinji are not sisterly at all she gets jealous... and then stops herself, remembering that was when everything started to go wrong in the original timeline (she loving Shinji but being unable to spit it out and being jealous of Rei because she thought that Shinji liked her was a major factor in her break-down).
* Doing It Right This Time: The Angels -giant alien monsters- of canon, fought in the original timeline. Now the main characters have returned to the past, the battles have become quite different.
* Doing It Right This Time, this trope naturally comes up quite a lot:
* Doing It Right This Time, to which Hikari rather crossly retorts that the man is actually a carpenter who injured his hand in a workplace accident.
* Doing It Right This Time: When Asuka announced Rei was moving with them, Misato demanded knowing what was going on and why they were acting so out-of-character. The three Children figured out that she would find out sooner or later so that they told her they were time-travellers.
* Doing It Right This Time: When Asuka meets Shinji she mentions on passing she had been constantly hitting on him… and getting exasperated because she could not tell whether he was dense or not interested:
* Doing It Right This Time: When Kaworu decided to send himself and the other Children back in time to prevent the end of the world, he thought he might avert to play his role in the Dead Sea Scrolls prophecies if he changed sexes. So he turned female.
* Doing It Right This Time: When Misato and Asuka argue about Shinji's shooting skills, this exchange happens:
* Doing It Right This Time: When Misato is teaching Shinji about gun safety:

* Doing It Right This Time: When Rei meets Gendo for the first time after travelling to the past, she slaps him and informs him all of his planning was for nothing because he would fail. Gendo was pretty... shaken afterwards.
* Doing It Right This Time: When Rei tried a new dress and innocently asked Asuka if she looked good, Asuka felt very flustered and very hot all of sudden (that was her first hint that she liked both Shinji and Rei).
* Doing It Right This Time: When Shinji tries new clothes Asuka spends a while thinking of how yummy he looks.
* Doing It Right This Time, whereas Ritsuko and Maya's was heavily hinted at but finally revealed in Chapter 3.
* Doing It Right This Time, whereas Shinji just decided to pick "a look that works" and stick to it. Asuka cajoles them both into expanding their wardrobes some.
* Doing It Right This Time with a full understanding of how much he had screwed up her life as well as Shinji and Asuka's lives, Rei - of all people - delivers one of these to Gendo in the first chapter. It was strong enough to send him sprawling and knock his glasses off his face.
* Doing morally questionable things like sacrificing others' lives for the team's sake is a recurring theme in
* doing so is another thing entirely, as powerful magical beings (like the Children of Oberon) are basically the raw energy equivalent of the world's nuclear arsenal. But technology can keep up for a while, such as in "The Gathering", where Xanatos uses a force field to temporarily fend off Oberon. That episode also features an explicit invocation of this trope:
* "Doing" someone has traditionally been gangster or assassin slang for killing someone (perhaps short for "doing them in"), but nowadays is more often thought of in terms of sexual intercourse. However, there are still informal senses such as the one of "doing" someone if you paint their portrait or perform an impersonation of them.
* doing the skinning in hyper-realistic detail. What is truly baffling about these dreams is that they can and do occur to people who are well adjusted, and don't reflect reality to a great extent. In other cases, intense horrifying imagery is one indicator of repressed emotions, trauma, and emotional baggage. Even then, the nightmares may seem disproportionately frightening. And God help you if you have nightmares 5 times per week. That'd ruin the relief of rest.
* doing the splits on cinderblocks while balancing eggs on single chopsticks and on his head.
* doing this continually. appears on the viewscreen, causing Worf to leap the tactical console and nearly fire his phaser right at his image. Lampshaded by:
* Doing this is referred to in some medical circles as "against medical advice", or "accident my ass". Trying to claim that you were "standing on the corner, minding your own business" has been shortened to the acronym "SOCMOB" and is treated as equally implausible. Another name is "Eiffel syndrome" (no, don't think about an
* Doing this sort of thing is incredibly common in the espionage business.
* Doing this to Hades (and occasionally other gods of death) has become its own subtrope, see
* "Doing Time" it in there, simply because she doesn't have to deal with SpongeBob anymore. Well, at least until SpongeBob and Patrick visit and attempt to help bust her out of prison, much to her dismay.
* "Doing Time": Mrs. Puff being sent to solitary confinement turns out to be
* doing what David Beckham does best turning Beckham from one of England's most hated footballers (after his petulant red card at the previous World Cup) into one of its most beloved.
* Doink the Clown across multiple promotions. Osborne would reprise the role in some later guest appearances on WWE TV.
* Doink the Clown (at least during his heel run) dressed like a stereotypical clown and played pranks (not all innocent ones either) on fellow wrestlers, yet his technical wrestling skills were always put over by the announcers.
* Doink the Clown is an identity that has been donned by various wrestlers through

the years, no less than 12 in WWE alone.
* Doink the Clown match, with the "Kill the Clown" chants starting at 4:40.
* Doink the Clown run is generally considered the only aspect of the gimmick worth watching.
* Do I Really Sound Like That?: A character hears themselves speaking and is astonished at how they apparently sound.
* Do I Really Sound Like That?: Somebody is surprised by what a recording of their own voice sounds like.
* Dois Filhos de Francisco, the children who will grow up to be a famous country duo (one of them, at least; the other dies young and is replaced by another brother) is forced to eat raw eggs by their father who wants them to be musicians.
* do it. And the humans don't care in the least and are not troubled by it at all. If the evil CEO Mom orders her robots to do so, they comply.
* do it, but even the famously conquer-happy Romans sometimes just had to content themselves with client kings). How loyal the former enemy was to their new lord varied, of course. If they proved truly intractable, a more amenable cousin could easily be offered this trope instead.
* do it chapter "Rena Rouge" does Marinette reveal that she knew that she was Alya.
* doit death. After all, does death show any qualm about laughing at us?). This is a simplified version of the original quote:
* Do It For Me: The "Awake" ending has the protagonist refuse to kill anyone and turn the girlfriend in to the police, and no one dies, including the girlfriend.
* "Do It For Them" opens with Dipper having a nightmare inspired by the events of "Sock Opera".
* do it?" The doctor ponders on this for a second or two and then smiles. "There should be no problems at all. The human race encompasses all shapes and sizes and there's nothing physical that's going to prevent you both from enjoying a healthy sex life... The problem is, you won't have anyone to talk to."
* Do It Transitions between the features were represented by the pages of the magazine turning.
* DO IT YO8 COW8RD KILL M8 KILL M8 KILL M8 KILL M8 KILL M8 KILL M8 KILL M8 KILL M8 KILL M8
* Do-It-Yourself Plumbing Project: Someone tries to fix their plumbing themselves with hilarious results.
* "Do It Yourself" Theme Tune perform the theme song, so the song is an example, just not in the way the image suggests.
* "Do It Yourself" Theme Tune: The theme song is written/sung by one or more characters (but not necessarily within an episode).
* Doja Cat, American rapper, has stated that she is attracted to both men and women.
* Dojima actually does make it to Nanako's side for what appear to be her final moments.
* Dojima's instincts catch onto the MC and the investigation team almost immediately, but he can't bring himself to suspect the person who watches over his daughter.
* dok'aebi, as frustrating as that might be for poor human victims. Many surviving folk legends depict them as benevolent tricksters, but historical accounts still suggests that they were also seen as monstrous forces as heartless as natural disasters. The translation convention for dok'aebis used to be "ogres" due to their aesthetic association with Japanese oni, but because of their characteristic, terms such as "goblins" or "fae" have been taking over recently.
* Dokapon Kingdom female characters who use the Robo-Knight character class turn into robot girls with floating ponytails that turn into wings.
* Dokapon Kingdom game in the series. Both these enhanced remakes came out the same day in Japan.
* Dokapon Kingdom has an item called the Skeleton Key, which allows you to choose the item you get out of Item Spaces, including red ones.
* Dokapon Kingdom has Heck (the game is silly) as the last area the adventurers go into. The first section of the dungeon is the typical fiery wasteland, and the

heroes have to fight their clones. The second section is more of a dark and evil castle, though.
* Dokapon Kingdom makes the Gates of Heck appear somewhere in the kingdom, and the players have to travel down into Heck and beat him up.
* Dokapon Kingdom, one of the random map events is that your character will be abducted by aliens. This causes them to disappear off the map until the start of their next turn, when they are returned with a change to their stats. If this happens to sync up with an end-of-week hairstyle contest (itself a very rare event), the game will comment that your character 'was not around'. This can lead to one person winning by default.
* Dokapon Kingdom), where you can interrupt a fight between another player and a monster and deliver the killing blow to take all the credit for yourself.
* Doki Doki Literature Club! and you get the "END" card backward. The game then goes back to normal as if nothing happened.
* Doki Doki Literature Club! at first, anything and everything that it has to do with a trope like this has to be pretty spoilery.
* Doki Doki Literature Club!, but has no issue with people headcanoning any of them as trans.
* Doki Doki Literature Club! by calling his first day in the Literature Club "the day [he] sold [his] soul for a cupcake".
* Doki Doki Literature Club! courting said girl has no effect on whether he will deny it. The only girl he never has to say this about is Monika.
* Doki Doki Literature Club!, Dan Salvato noted that "'Sayori' was some kind of unholy fusion between 'Sayuri' and 'Saori', and to this day I’m not even sure if it could pass off as a real Japanese name." However, "Sayori" (さより) is an actual Japanese girls' name (as well as the name of the Japanese halfbeak fish), albeit an uncommon one, as seen with voice actress Sayori Ishizuka.
* Doki Doki Literature Club!, despite being a brutal, horrific deconstruction of such, has gotten many into visual novels, thanks to its popularity extending far beyond visual novel enthusiasts.
* Doki Doki Literature Club! disturbing things do make sense, though, with the rest being just additional flavouring.
* Doki Doki Literature Club! Fittingly, her eyes are an emerald green.
* Doki Doki Literature Club! game since all your saved data was deleted.
* Doki Doki Literature Club! gives one to the player character, and he could reciprocate her feelings.
* Doki Doki Literature Club! has Natsuki's poem "Amy Likes Spiders". The poem is about a girl the narrator can't stand due to her interest in spiders, going so far as to not let her touch her, and thinks anyone who's friends with Amy will become a spider-lover, too. As such, this can be read as a metaphor for a homophobe feeling disgusted by a gay person, thinking that their mere touch and companionship will turn the people around them gay. This is, of course, helped by the fact that the narrator of the poem is intended to look like a bigot who judges people for things that don't hurt anyone.
* Doki Doki Literature Club!. However, what is really happening is that to advance the story, you have to start the game again from the beginning, and this time it will be... different. Let's just say different.
* Doki Doki Literature Club! is to do this to Sayori. The mod begins with the Main Character barely stopping Sayori from killing herself, and it's obvious that she's going to try another time. It's up to the Main Character to help Sayori with her depression and make her outlook on life less bleak.
* Doki Doki Literature Club! longs to destroy every reality where an iteration of the game exists as part of her gambit for vengeance on Monika. She had already destroyed 30 realities already by the time the story starts.
* Doki Doki Literature Club Loops has Monika in this role, as implied in the source canon.
* Doki Doki Literature Club Loops, one of Yuri's knives is made out of cardboard. It's still far, far more effective than any normal knife.

* Doki Doki Literature Club Loops. The duo have been together ever since.
* Doki Doki Literature Club Loops. This gets an excellent lampshade in chapter 9:
* Doki Doki Literature Club! Monika decides the Literature Club is a place for no happiness and deletes the whole game to spare her friends from her pain.
* Doki Doki Literature Club!, Natsuki uses a swivel chair to reach a box of manga from a high shelf, and the protagonist helps by trying to keep the chair stable. He realises that he could look up Natsuki's skirt from his position, so he tries to look away. Unfortunately for him, Natsuki notices this and then accuses the protagonist of setting her up.
* Doki Doki Literature Club! port also got a special inner coversheet resembling a notebook.
* Doki Doki Literature Club! premium version on June 30, 2021 adding side stories, bonus content, and HD graphics.
* Doki Doki Literature Club!'s face disappear at a moment when she's being mind-controlled.
* Doki Doki Literature Club! such as a sticker sheet, standees of the characters, a club membership card, and a special poem from Monika.
* Doki Doki Literature Club! Surreal though it is, it makes sense eventually — but before that, if you don't already know, it's just inexplicably freaky for a long time.
* Doki Doki Literature Club! that followed couldn't match the surprise and uneasiness of this.
* Doki Doki Literature Club!, the game hits you hard when you find Sayori having committed suicide in her room. Then it gives you a twofer when you return to the main menu and find that both her character portrait and the new game option are heavily corrupted, both foreshadowing the events to come and that the player had not reached a bad ending.
* Doki Doki Literature Club!: The girls in the club have their own tics.
* Doki Doki Literature Club!, to emphasize the surreal nature of the scene.
* Doki Doki Literature Club! was blamed for the suicide of a 15-year-old boy in Britain by the boy's father and various news outlets. The game was accused of "dragging kids in" to suicide.
* Doki Doki Literature Club!. What qualifies for this trope are the details: if you look closely at the CG, Sayori has blood on her hands. Monika later brings up in the third act that Sayori didn't jump high enough to snap her neck, and instead slowly asphyxiated. The blood was from her attempts to tear herself free, whether out of having second thoughts or survival instinct kicking in.
* Doki Dok I Literature Club, when Yuri and Sayori are just getting to know each other, Sayori tries really hard to make Yuri happy as with everyone else — by reading a rather difficult book with her — and this makes Yuri think Sayori's not treating her like a normal person but going out of her way to help the socially unskilled weirdo. It escalates when Yuri's reaction (together with Sayori's own feelings of inadequacy) makes Sayori try even harder the next day, which of course feels even worse to Yuri, leading to a brief enraged "I don't want your pity!" reaction, although Yuri immediately feels awful about it and knows she's not communicating what she's actually thinking and feeling.
* Doki Doki Literature Club!: Yuri has purple hair and eyes, and Natsuki has pink hair and eyes.
* Doki Doki Literature Girls. After deleting the game, Monika is confronted by Sayori in the void, and Sayori pushes Monika to reset the world, firmly believing that there was still hope for the Literature Club despite Monika's pessimism.
* Doki Doki Literature Girls. As such, teh player is mentioned in passing, but plays no important role in the comic.
* Doki Doki Literature Girls, there is Sayori. In the Friendship arc, Sayori reveals that she had known that her new friend Ako was infatuated with her, but she opted to be oblivious to it. While she does this as a way of preventing having to break Ako's heart since she was dating Monika, it instead comes off as Sayori being deceitful and playing with Ako's emotions.
* Doki Doki Literature Girls, this is to be expected. Natsuki realizes that she

lived in a visual novel making her concerned that she didn't have free will, but she eventually sheds that belief due to Monika's reassurance that the love she felt for Yuri was of her own volition.
* Doki Doki Literature Girls, Yuri ends up becoming enamored with Natsuki despite of their writing styles and personalities.
* Doki Doki Panic was defeated, explaining why World 7 only has two levels when all other worlds have three.
* DokiDoki! Pretty Cure and kill everyone there. Apparently, according to this movie, if there is no future to look forward to, the present will cease to exist (despite the fact that going to the future and changing things there affects jack squat in the present).
* DokiDoki! Pretty Cure, calls out Mana and even abandons her for trying to befriend Regina, who shares the blame for destroying Makopi's country.
* DokiDoki! Pretty Cure can and does do a lot of amazing things, but singing is not one of them, no matter how much or loudly she tries.
* Doki Doki Pretty Cure can only stay transformed for no more than 300 seconds. She's also the only Cure from the franchise who transforms from a kid into a late teen/adult.
* Doki Doki Pretty Cure - despite the name, she does not have any sort of sword.
* Doki Doki Pretty Cure has King Jikochuu who is much taller than the towers of Trump Kingdom, so he's about the same height as Jaaku King. Makes you wonder how he gets a daughter who appears younger than the heroines.
* Doki Doki Pretty Cure in the group pose sequence. The transformation music promptly died out when the girls found that out. The dentist meeting earlier caused Makoto to got too scared to transform upon knowing that the Jikochuu is related to dentists.
* DokiDoki! Pretty Cure, normal security cameras somehow managed to capture Mana's first transformation on video.
* DokiDoki! Pretty Cure said this when her friend, Alice, caught her and Rikka's transformation.
* Doki Doki Pretty Cure, Sebastian reverse-engineers a Commune to turn himself into the superhero Cure Sebastian to help out his master Alice. He used it a grand total of once before somebody stole it and used it herself, while he eventually learns he doesn't need to use it so long as he can help Alice in some manner.
* Doki Doki Pretty Cure. She has overall different powers and a very different transformation.
* DokiDoki! Pretty Cure take this mantle instead, to a much more degree of success than the past two seasons.
* DokiDoki! Pretty Cure, though, like Tsubomi, she wears her occasionally. Unlike Tsubomi, who's given contacts, it appears Rikka's just a little near-sighted, as she'll wear them if she needs to see something too far away.
* DokiDoki! Pretty Cure uses a drill due to being based off a dentist. Because Makoto is afraid of dentists, the drill scares her so much that she refuses to transform... at first.
* DokiDoki! Pretty Cure was a character that had never appeared before.
* Doki Doki Pretty Cure, we have Marmo and Regina. And Regina is the superior one.
* Doki Doki Pretty Cure, when Rikka spends nights with Mana, they sleep in two futons next to each other. The very close futons can be considered as one bed. Makoto spends a night with Mana, too. Also Alice spent some nights with Mana.
* Doki Doki Pretty Cure where it also uses the suits of cards motif for the four main characters, Mana Aida/Cure Heart (Heart), Rikka Hishikawa/Cure Diamond (Diamond), Alice Yotsuba/Cure Rosetta (Club), Makoto Kenzaki/Cure Sword (Spade) and Aguri Madoka/Cure Ace (Ace).
* DokiDoki! Pretty Cure. While not magical, it gives a regular person the same abilities as a Precure. It gets destroyed near the end of the episode and never mentioned again.
* DokiDoki! Pretty Cure with ribbons adding extra volume to her lower limbs.
* Dokidoki School Hours ends with the realization that Mika might not be teaching anymore due to marriage... though falls on its face after the meeting.

* Doki Doki School Hours has a thing for petite women, which just happens to apply to her teacher - and she is not at all shy about showing her affections.
* Doki Doki School Hours: Shizuka "Iinchou" Nagare the Class President.
* Doki Doki School Hours used a cover version of "Furare Kibun de Rock'n'Roll" by TOM CAT as its ending theme.
* Doki Doki School Hours, where an extremely short school teacher was teased by one of her students that this would happen to her. A few of the students proceeded to tie a bunch of balloons to the teacher's obi (they were at a summer festival) and the first student lifted the teacher up so it looked like she was floating away.
* Dokidoki! Tama-tan, Tama-tan is given a magical moon jewel and gains the ability to turn into a Lunar Lady.
* Doki-Doki Universe does this for the cinematics and loading screens.
* Doki-Doki Universe has a meter that tells you how much they like or hate you, which you can influence by summoning things they like or hate, or by picking them up and throwing them around.
* Doki Doki: Yuuenchi, a 8-bit Nintendo game never released outside of Japan, took place entirely in one of these.
* Doki has her donning these, apparently to show that she is, at times, rather girlish.
* Doki may be crippled with cerebral palsy but she'll make you look like
* Dokkan — calling her "Mama" in front of her entire class to boot (and neither Doremi nor Momoko realizes it is the toddler until she says her name).
* Dokkiri Doctor and some of the students, and he tries to help everyone out the best way he can, leading to hijinks.
* Dokkoida?! more serious than the rest of the show, and included some truly epic action.
* do know is that he was a "spiritual brother" of the Air Nomads, and a personal friend of Aang's airbending teacher and father figure, Monk Gyatso.
* Dokonjou Gaeru in 1970. To date that's his only successful series, spawning two anime series and a ton of merchandising in Japan. Since ending it he created dozens of other mangas but none of them are well-known.
* Dokonjou Gaeru is a frog, and they naturally don't have bellybuttons. This was pointed out a few times, and is even part of the lyrics in one of the ending songs.
* Doks if they locate the abandoned equipment of the Waaagh! they're descended from.
* Dokuhime little girls are purchased for the purpose of bringing them up to be Poison Princesses and exposed from the time they're in their cradles to poison in order to build up immunity. Many don't make it, the successes are trained to be assassins whose very touch is deadly. They have to keep ingesting poison to function properly.
* Dokuro has one of these, where the future warden Kawashima is the head, and children are horribly abused.
* Dokuson in person, while other characters, even if they're not affected by her temptation spell, seem to at least acknowledge that she is a beauty (for example, her appearance is Youzen default choice any time he needs a beautiful female form).
* Dolan comics are like this. The appeal of the comics is how intentionally terrible they are.
* Dolan days, when the meme looked nothing like its current self and was all in Finnish. Doge hipsters swear allegiance to the "Daily Doge" blog from 2012, before the now-well-known "shibe" face and the associated captions ("wow", "so", "such", etc.) had become standardized.
* Dolan Life Mysteries videos, especially in the videos animated by Klowncar or ReturnOfGoo.
* Dolan. One of his more infamous incidents involves giving Gooby a car as a gift, only to reveal that it was a stolen vehicle, resulting in Gooby being framed for grand theft auto.
* Dolan's Cadillac a sign so he drives into a construction zone's hole rather than reversing it; the protagonist notes the man he wants to trap wouldn't have fallen for the latter.

* dolce vita epics never ceases to captivate anyone. Plus, the country brought us the greatest thing in the world: pizza.
* do learn to defend themselves, but remain among the more unambiguously good characters in the series.
* do leave the poor girl alone, imagine her disappointment if she happened to say yes!"
* Dolemite Is My Name calling the film coarse, rude, crude and vulgar. Moore tells his co-workers that such a review will make people curious to see just how coarse, crude, and vulgar the film is. Sure enough, when they arrive to the film premiere, the first showing is sold out, and there’s a line down the block to see the next one.
* Dolemite Is My Name. That said, the final product ends up being a surprise hit.
* Dolemite lampshades this, showing off that Rudy Ray Moore, though bighearted and energetic, had no martial arts training whatsoever (which is a problem when you're playing a purported kung fu master).
* Dolemite mayor then takes the reins, but is himself killed by a secondary character. With only a few minutes of screen time remaining, we're introduced to group of assassins hired by the late mayor.
* Dolemite, where supposed police officers actually inhale the cocaine they seize, before declaring it "the good stuff all right".
* Dolichovespula maculata spp.). Yellow jackets, especially the queens, are also often called "ground hornets".
* Dolittle, a dragon has an intestinal blockage that needs to be cleared, and Dolittle proceeds to shove a large leek into her butt (making her exclaim "Oh good heavens!") as a tool to begin removing things.
* Do Little Mermaids Wet Their Beds? and stops wetting after a dream adventure with a mermaid, whose bed is always wet being under the sea.
* Dolittle started and forced theaters to close, significantly reducing its theatrical run.
* Dolittle the good doctor and Chee-Chee try to play chess using mice as the pieces, keyword: try.
* Dollanganger Series, Cathy's eldest son is named Julian after his father, but is known in the family as Jory, which is a combination of his real name and that of his late uncle Cory. Cathy's brother Chris, meanwhile, calls her "my lady Cath-er-ine."
* Dollanganger Series fills in the gaps as a prequel which tells the story of Cathy's grandparents and how they came to disown their daughter. It's just about as complicated and soap opera-ish as it sounds.
* Dollanganger Series theirs together—would be quite convenient.)
* Dollar coins are used as the primary legal tender instead of dollar bills and pennies have been phased out.
* Dollar Flu/Green Poison, as civilization had all but collapsed from his man-made plague at the beginning of the game.
* Dollar Shave Club has several commercials that portray store employees as ranging from indifferent to downright abusive with customers trying to buy razors, doing things that would likely get them fired or even
* Dollars Trilogy, his beating reflects the flogging of Jesus while the party outside is staged to look like The Last Supper. He rides into town on a mule, and during the final duel he appears to "resurrect".
* Dollars Trilogy in other places of Spain as the provinces of Madrid and Burgos as much if not more than in Almería.
* Dollars Trilogy is smart, handsome, intelligent, always wins, and is the sort of guy that audiences feel they want to be.
* Dollars Trilogy: The Man With No Name's hat has a repaired bullet hole in the dead center of the crown. We never learn the circumstances surrounding it, its just another mysterious element of the character.
* Dollars Trilogy: The Man With No Name's poncho is the definite western example.
* "Doll Bones" by Holly Black is centered around a china doll made from the ground-up bones of a murdered girl. The children have to find the girl's grave and

bury the doll or be cursed/haunted forever.
* Doll by Mitsukazu Mihara is an anthology series about humans interacting with robots, so it's only natural that many of its characters are robot specialists.
* doll crucial moment, the entire game's events could have been averted.
* Dolled-Up Installment, but with changes made to certain sprites, including Pac-Man himself, where he looks more like Namco's official artwork.
* Dolled-Up Installment: Practice of inserting a work into a franchise which it was not originally intended for.
* Dolled-Up Installment: Slapping a franchise onto an initially unrelated product.
* dolled up to be a Bajoran to infiltrate the Maquis, and Chakotay felt responsible for not catching on to her as the leader of the cell she infiltrated, especially after he learned later that he had missed other spies among his ranks (including science officer Tuvok). It was only when Tuvok admitted that Seska had deceived him while they were in the cell, as well, that Chakotay got over it.
* Dolley deals with the context for only actual historical invasion of the United States, by the British Army and Royal Marines during the war of 1812.
* Dollface Dollface had her mask magically sealed by the man who gave it to her, and she couldn't find him again when she went to have it removed.
* "Dollface" - name for a woman when a man is pleading his case or apologizing
* Doll Factory and decide to perform a ritual from the book there for a goof. The goof was on them.
* Doll Factory in a sword fight in the titular factory in the film's climax.
* Doll Factory, Sheriff Barclay has his head sliced off with barbed wire by the dolls.
* Doll Factory: Sheriff Bart Barclay is the sheriff of the town who helps the kids deal with evil killer dolls.
* Doll Factory: The intro happens on Halloween Night, 1976. The rest of the film is set in the present day.
* Doll Factory: The titular dolls are little grey bald-headed people in black dresses who are trying to collect souls for their master.
* Dollhouse: Adelle DeWitt - charming, morally grey ballbuster who is equally at home with threats and seduction, and approaches Darth Vader levels of nastiness in the second season. She is. In. Charge.
* Dollhouse Alpha eventually transform into a new type of being with multiple personalities simultaneously inhabiting the same person. When Echo is asked if she would want to go back to her original personality Caroline, she states that she is no longer that person and is now her own entity.
* Dollhouse: Alpha's entire goal in "Briar Rose" and "Omega" was to turn Echo into a composite like himself. Composite!Echo's first act was to hit Alpha with a pipe. Justified in that, since he was a doll, most of his personalities are hopelessly lovelorn romantic rape-slaves specifically designed to put their assigned sexual interest on an absurdly high pedestal, and many of them were tailored to work with Echo specifically. Not all that many of the fractured components of his personality were dispassionate, experts in psychology and engineering, or particularly smart in any field but infiltration.
* Dollhouse, although occasionally DeWitt steps into this role (although more as a strategist than a technical expert).
* Dollhouse. Ambrose, Harding and 'Clyde' change bodies several times. An interview with Alan Tudyk revealed that Alpha planned to do this, as well.
* Dollhouse and is suddenly kissed by her adult son. She quickly pushes him away and starts gagging.
* Dollhouse and revealed that the Dollhouse's technology would destroy civilization if used just a little bit more creatively.
* Dollhouse, and so on. It got renewed anyway but the second season was the last. The second season may have been simply because the execs knew they'd get complaints if they canceled it after only one season.
* Dollhouse and then hired out to clients, many of whom (though not all) specifically do so to indulge in romantic fantasies. While the Actives' original personalities effectively signed a contract to be used as sex slaves with the

Dollhouse beforehand, it's only offered to people who were in some sort of dire straits, nor would such an agreement hold up in any modern court of law.
* Dollhouse: A non-villainous example occurs in "Haunted", when Margaret (a middle-aged woman) is uploaded into Echo's younger body. She briefly feels her own breasts and jokes to Adelle about how they're now "pointing at the sky".
* Dollhouse, a recurring character in a hostage situation (and bomb vest) because of a psychotic kidnapper with multiple personalities refers to a previous good time as "a blast". He's blown up when the psycho points out "Who doesn’t love a pun?"
* Dollhouse are eventually revealed to have formerly been a landscape architect and a sociology grad student, respectively.
* Dollhouse arriving speaking one language and replacing it with an English version.
* Dollhouse' assignment, it turns out that Echo is helping her give birth, having been programmed as a midwife.
* Dollhouse. At the start of Season 2, a pissed-off Dr Saunders puts lab rats in Topher's cupboard, in a not-too-subtle message of what she thinks of him. His female assistant Ivy has to retrieve them while Topher climbs the nearest railing to get away.
* Dollhouse, Ballard thinks this is the secret of the titular facility, that the Dollhouse kidnaps young men and women and forces them into some sort of human-trafficking ring. The truth is more complicated than that.
* Dollhouse been made by someone else, there's no way it would've gotten that far, if only because of the inboxes full on hate-mail his fans could unleash like no other.
* Dollhouse, Boyd Langdon crashes in through a window and punches him out.
* Dollhouse, but as Topher is an egotistical genius he prefers to do it all himself while using Ivy for routine tasks and fetching his snacks.
* Dollhouse. But it's like Whedonites have a constant persecution complex up and running — All. The. Time.
* Dollhouse, but when he gets into a grappling, head-slamming fight with another agent in his office over a personal insult, it's hard to imagine how he's able to continue going about his investigation afterward.
* Dollhouse can be used to generate this effect, as Bennett shows rather graphically to Echo.
* Dollhouse, Caroline!Wendy says, "The wrongness of this is SO large!"
* Dollhouse couple (Priya/Sierra and Tony/Victor) had a son between "The Hollow Men" and "Epitaph One” but Tony and Priya had a falling-out and split, leaving Priya as a single mom. However, they are reunited eventually, and all three survive to the end of the series.
* Dollhouse decided was too confusing and didn't get into the action quickly enough, and so they didn't run it. Therefore, the episode count for the broadcast run was reduced to 12. However, delivering just twelve episodes would violate the contract they had with the company putting out the DVDs, so a stand-alone thirteenth episode was created strictly for the DVD. As a result, the DVD set has fourteen episodes: the twelve episodes broadcast, the stand-alone thirteenth, and the original unaired pilot.
* Dollhouse deleted scene where he tries on some goggles that are meant to go with his interactive computer screen.
* Dollhouse. Despite being a single woman who lives alone, she seems to make lasagne in gigantic portions. It's no real surprise that it works on Ballard.
* Dollhouse developed personalities, or even her fellow Dolls Sierra and Victor, who managed character development early on via their romance.
* Dollhouse develop. When confronted by Echo, he even taunts her to shoot him, pointing out that he'll just download into another body.
* Dollhouse do this (hacking the body up and dissolving it) with a death that he technically allowed to learn that "actions have consequences".
* Dollhouse, Dr. Saunders has numerous thin scars across her face as a result of an attack by Alpha. They seem to be getting less noticeable each episode, and really

don't do much to detract from her beauty.
* Dollhouse: Due to the multitude of personalities that are downloaded into Echo's consciousness, it's not surprising when she speaks mostly in Spanish in one episode to gain the trust of an abused female immigrant, which she does freely even in the presence of the police guards since they can't understand what they're saying. One of her personalities is a Russian girl, so she knows that language as well (although the actress is pretty bad at it).
* Dollhouse. Echo is programmed to believe she's a baby's mother in "Instinct". At the end of the episode when she's forced to give the child up, she sits in a playground in the park at night with her handler.
* Dollhouse, Echo talks to Paul even though he's brain-dead. Seeing Paul, even like that, is implied to be necessary for her mental state and she freaks out when he's moved.
* Dollhouse episode "Briar Rose", FBI agent Paul Ballard muscles his way into Stephen Kepler's apartment, where there are some suspicious-looking plants:
* Dollhouse episode "Haunted", Echo gets imprinted with the personality of a wealthy woman who wants to attend her own funeral. The woman's son makes a pass at her; she's suitably disgusted.
* Dollhouse episode "The Attic" is a parallel nightmare world in which inmates' fears can kill them not only in the dream sphere, but also in real life.
* Dollhouse episode "The Left Hand" sees Topher downloading a second copy of himself into Victor.
* Dollhouse episode where Echo is working as a backup singer for a pop star, she tells her boss, "Bitch, you can fire me, but don't think you can take me."
* Dollhouse "Epitaph Two" makes it worse, as Rossum executive Matthew Harding seems to wear his bodies with rich food and then discards them, putting himself in a new, fit body.
* Dollhouse. Even after Bennett finds out Caroline was only using her to get access into a laboratory, she agrees to help her.
* Dollhouse except even more obliging and unambitious. They're basically like children on Valium.
* Dollhouse. Except for the whole "violently seeking revenge on Caroline's body" thing...
* Dollhouse explores the unmasking of a technology that is originally thought to be an urban legend.
* Dollhouse features a mysterious "memory drug" in the season one episode "Echoes". Supposedly, it triggers suppressed memories. Effectively, the characters in contact with it act like they are on a strong psychotic substances like mescaline.
* Dollhouse features attempts on the life of a pop singer, some of which occur onstage. In one case a stunt double is killed in her place.
* Dollhouse finale, when Ballard takes a no-fuss, no-warning stray bullet in a gun battle.
* Dollhouse had a light, comical version. When Caroline first meets Bennett in college, she guesses Bennett is a neuroscience major. Bennett is shocked she guessed that so easily and asks how she figured it out. Caroline says it's because Bennett is eating a tuna sandwich, and fish is brain food...and also because Bennett is carrying a large stack of neuroscience textbooks.
* Dollhouse had another example of real-life relatives: the series finale has Eliza Dushku's younger brother Nate as Clive Ambrose's latest body. Her real-life boyfriend, Rick Fox, also cameoed.
* Dollhouse has a client hire the Dollhouse to program a mother for his newborn whose actual mother died in childbirth. He blamed the baby and could not give him the love he needed. In a rare subversion, the client knew it was irrational and still wanted the child to be loved which was why he had them program Echo to think she was his mother. By the end of the episode, he's gotten over his issues and takes care of his son on his own.
* Dollhouse has a different version, having taken one of the sleeping pods and stacked his books and personal items around it. He's also writing on the side of the pod.

* Dollhouse has a few of these. Most used is simply "would you like to go for your treatment?" or "it's time for your treatment" which is said to an engaged Active by their handler. This immediately makes the Active stop what they are doing and go with their handler back to the Dollhouse to be mind-wiped.
* Dollhouse has Echo, slave to the titular organization and all too aware that she and her fellow Actives are being exploited. This curse, however, comes with the ability to call on skills from any imprint she's ever received.
* Dollhouse has the sci-fi variant with Victor and Sierra. No matter how many times their personalities are deleted, no matter who they're programmed to be, they fall in love with each other, every time. This serves as powerful evidence against the Dollhouse's claim to be able to programme genuine emotions- at one point Victor breaks up with the woman he's programmed to be in love with, because even though this incarnation has never met Sierra he knows there's somebody out there who he loves more.
* Dollhouse. He even refused to sleep with Echo, whom he's crazy in love with, for a long time, because she was messed up from being a doll and he felt it would be wrong.
* Dollhouse humans referred to as dolls aside, there was the episode where a serial killer collected women who look like his relatives, drugged them with paralytics, dressed them up and 'played pretend'.
* Dollhouse: Implied in the episodes "Man in the Street" and "A Love Supreme" in the Internet tycoon Joel Mynor's relationship with his late wife, Rebecca, who Joel recalls "was beautiful and she knew it."
* Dollhouse, in a sense, given that they are implanted with a full set of memories going back to infancy when they are imprinted for engagements, despite having signed their bodies over to the Dollhouse as adults. An Active can thus have a lifetime's worth of training as a thief, assassin, or soldier.
* Dollhouse, in a way, by having her mind imprinted into a Doll. Technically dead and most of what we know about her comes from hearing her loved ones talk about her... despite her (or her memories in someone else, anyway) being the protagonist of the episode.
* Dollhouse in De Witt's office. Her only comment? "I think we can both agree that that carpet is finally done for."
* Dollhouse into the body they want, then removed and stored for later when the "engagement" is done.
* Dollhouse is about a memory-erasing brothel and the individuals who live inside and work there. The Epitaph episodes have strong elements of this, as well as biopunk. Mag and Zone's survival gang and Victor's tech-heads especially embody the attitude and aesthetics.
* Dollhouse is an expert in playing the politics (and just plain manipulating everyone) in order to protect her House.
* Dollhouse is revealed to be a long chain of nightmarish Mental World scenarios chained together to be a giant super computer.
* Dollhouse is this. Although their villainy lessens over time, especially in season 2 as a Greater Evil is uncovered.
* Dollhouse, it's not a person but the title business. It largely survives because it has a lot of rich and powerful people, including at least one senator and the Governor of California, on its client list.
* Dollhouse?). Later, several of the Dolls and their human handlers are sent to investigate an outbreak, but the handlers are only given cover identities as private security. Topher, as a joke, programs the Dolls to think they are NSA Agents, who act like jurisdiction-stripping jackasses to their handlers.
* Dollhouse may be for hire, but most of the agents and administrators display the best intentions for their work.
* Dollhouse — who are the focus of the show — are all named from it. (The ones at the Washington, DC branch are named after Greek gods, suggesting that each branch uses a different scheme.)
* Dollhouse. Not that, frankly, they seem particularly ready for the tech themselves.

* Dollhouse. One episode even has vox populi interviews about the subject.
* Dollhouse) outright requests that he give her a "treatment" so she can help him better.
* Dollhouse pilot "Echo" was deemed too confusing, as it threw viewers right into the deep end with the show's high-concept premise and began showing the Dollhouse's organisation falling apart right from the get-go. Instead, the network ordered that the show's first five episodes would be mostly-standalone stories showing the Dollhouse functioning more-or-less as it's supposed to before the cracks start to show in episode six. Scenes from the pilot were incorporated into episodes throughout the first season – notably, the last shot of the pilot became the last shot of the aired season finale "Omega".
* Dollhouse plays Graham Tanaka, a white FBI agent with an Asian last name.
* Dollhouse recruited its doll volunteers from people who were desperate to forget something.
* Dollhouse resembles a Zombie Apocalypse. A signal was sent to all telephones on the planet that would wipe the listeners' minds, and program them to kill anybody who didn't hear the signal. As a result, rabid hordes of lunatics hunt down the few remaining normal people in the ruins of the civilization; a very strong similarity with this trope.
* Dollhouse reveals that before being forced to become Echo, Caroline sabotaged a Rossum Corporation laboratory with the help of her roommate Bennett Halverston, a Rossum employee.
* Dollhouse - second season. Sierra is made to return to the evil, evil man who forced her into the Dollhouse, permanently imprinted to love him this time. Topher finds a heart and gives her her original personality. So what does she do? Instead of bashing the guy on the head at the first opportunity, she sits there and smirks and is super-smug about how she never, ever, really loved him, and how she's in love with another man - what did she think was going to happen? Of course he starts beating the crap out of her and attempts to rape her.
* Dollhouse serve pretty much the exact same function in their respective houses.
* Dollhouse. She anticipates this and the last line of the will says as much.
* Dollhouse. She appears in two episodes. In the first episode, the issue of her sexuality never comes up. In the second episode, an offhand comment indicates that she's lesbian, and has been out for some time. Although Zone had to have it spelled out for him.
* Dollhouse. She is part of a team of cybernetically-enhanced vigilantes who can download specialized skills to their brains and store them on thumb drives. When asked what she takes out of her head to make room for the extra knowledge, she holds up a thumb drive labeled "MERCY" and grins.
* Dollhouse similarly took advantage of Enver Gjokaj (Victor) having an identical twin brother. He stood in as the second Victor in a dream sequence.
* Dollhouse's non-actor twin was used in a dream where Victor had to continually fight an enemy version of himself.
* Dollhouse sometimes sleeps in her office, all so she could properly monitor and take care of the "Dolls".
* Dollhouse. So they have to pretend to be the mind-wiped Actives while they work out how to escape; unfortunately, this means going into the co-ed showers. Victor plays the baseball flavor of this trope straight and out loud, reciting the Mets roster by fielding position after catching a glimpse of incredibly hot Sierra all wet and naked.
* Dollhouse sound like a music box in minor key. Appropriate, given the title.
* Dollhouse started airing the second season, the only way to see any promos for the show were minutes before the episode aired.
* Dollhouse's Topher, who is tolerated by dint of being the only one around who knows how all the big shiny brain-scrambling devices work.
* Dollhouse, the Actives are meant to be released with their original personalities after five years.
* Dollhouse: The Dollhouse is once hired to assist a DEA operation. As the Dollhouse is already an illegal entity, everyone involved is upfront about the iffy

nature of this operation.
* Dollhouse the first time we ever see Alpha, although he's not attacking anyone, he is naked. Then the camera pans to show us a dead woman and blood all over the floor, implying this trope.
* Dollhouse) the heroes intervention. Other than that, it plays this trope to a T.
* Dollhouse the Madonna (their innocent resting states) and the Whore (a fair amount of their requested personas) and are celebrated for both roles. Adelle is not amused.
* Dollhouse, there's a whole behind the scenes look at all the cast and crew who return to work with Joss for the show. He's got a production posse that doesn't just act, but also write, produce, shoot, etc.
* Dollhouse, the title organization is hired to protect a rock star from a loony fan. Echo becomes a back-up singer, while another Active becomes a fan.
* Dollhouse. The titular Dollhouse is made up of people who, for whatever reason, volunteer to have their minds uploaded and put in dead storage while the Dollhouse rents out their bodies to high-paying clients, imprinted with personality composites made to order so they can serve a variety of purposes for rich clients (usually prostitution). Of course, it's not long before the show begins to examine the grander implications of the technology involved.
* Dollhouse. This has no significance to the main character at the time as she has no idea who this person will be, but it came as a shock for the viewers.
* Dollhouse, this is Alpha's plan at the end of season 1. It doesn't go well.
* Dollhouse. This is particularly glaring when the characters look down from the top balcony of either show.
* Dollhouse) told them — the genie is out of the bottle. They didn't believe him.
* Dollhouse: Tony chose to become an Active and have his memories erased because his PTSD made it difficult for him to adjust to civilian life. When his contract is up, he enlists with another program that threatens to erase his personality completely, because he'd rather be a cog in a machine than be Tony again.
* Dollhouse took this to a new extreme: the technology that will reprogram humanity into a horde of mindless engines of pure violence and bring about the apocalypse? Let alone allow the technology that would allow the villains behind said apocalypse to gain immortality via erasing innocent peoples' minds and over-writing them with their own mind? It came from technology that allowed for prostitutes/escorts to be programmed into personalized sex puppets.
* Dollhouse Topher takes it away from him, assuming he was just being an idiot; it turns out he's actually one of the villains.
* Dollhouse to produce a show for her so that she could get out of her contract to Fox. To hear Whedon tell it, Fox treated him very much the same way that Rossum treats its "Actives", which may go a long way towards explaining why the show is much darker than most Mutant Enemy shows.
* Dollhouse underneath Los Angeles is pretty much a self-sustaining spa eight stories down.
* Dollhouse usually uses real names but often makes up nicknames. Most are only used once; his most persistent one is "Man-Friend" for Boyd.
* Dollhouse version of this as the Dolls are human beings that have their memories erased of their past and implanted with new personalities between clients. While not all missions are for sex, a large number of them are.
* Dollhouse, was not aired on television but was put out on DVD. So for those who did not buy the DVD, the episode made little to no sense.
* Dollhouse was originally impossible to find, let alone break into or escape from, until the end of the first season. After that, characters seem to be able to get in and out whenever the plot demands it.
* Dollhouse. We don't see what it actually does until late in season 2, but it's mentioned well in advance...
* Dollhouse, when Echo only leaves her client this way when her programming glitches.
* Dollhouse when he's ordered to permanently turn Sierra over to Nolan Kinnard.

* Dollhouse, which aired 2009-2010 on Fridays. Despite poor ratings, Fox renewed it for a second season (still on Fridays), although it was canceled fairly early in its second run due to the already low ratings declining further.
* Dollhouse, with the dolls regularly having new memories and personalities downloaded, along with various abilities, such as Sierra turning into an expert with gunwoman to rescue Echo. In the post-apocalyptic conclusion of the series, several of them had memory sticks loaded with programming so they quickly download skill sets (usually combative in nature) at the expense of other less important (at the moment) skills, like "Mercy".
* Dollhouse. Worth noting here is that Gjokaj's accent was so good and his name so exotically Eastern-European (though he's actually Albanian) that a lot of viewers never thought to guess his character was anything but what he seemed at first.
* Dollicious, as well her sisters. The run a restaruant and are all exelent cooks, but Ramen is noted to be the best one of them all and adored by the rest of the siblings and friends for her talents.
* Dollicious is about family of seven sisters running a restaruant in a magical land where all the foods in the world live personificated as little girls. A lot of stories focus on cooking or food (but not all of them)
* Dollicious is an incredibly energetic, jolly, and crazy girl. It fits as Guarana fruit has more caffeine then Coffey and the character is meant to be a personification.
* Doll is about artificial humans called, of course, dolls, which are hardwearing and very expensive, usually used for service positions.
* doll moving dolls with AI installed in them, it's almost obvious. Least of which when an easy to find bit of dialogue not long after the switch is "Reko" questioning why her body is the way it is. Now, why would she say that unless there was something wrong with her?
* Dolls are a recurring symbol/motif for Asuka. She calls Shinji & Rei "dolls" who make no decisions of their own.
* dolls are often like this. For example, Alpha's Handler suggests he watch his step when he gets caught coming onto Echo. Alpha does exactly that: he walks away by staring at his feet.
* "Dolls/Dames" - Girls/women collectively. If you happen to be a private detective, use it whenever you can justify it.
* Dolls Fall, this is what the students of Jiaiin Girls Dormitory are, whether they are alive or dead.
* Dolltopia are all living toys who came to the titular city to live their own lives rather than what humans dictate for them.
* Dolltopia soon after leaving his life like Kitty did. When he gets to Dolltopia, the doctor is quick to fix him.
* Dolly herself, notably, doesn't mind the displacement. Unlike many of the other original artists featured on this list, she
* Dolly is sort of shoehorned into the role of a levelheaded and headstrong leader in
* Dolly — it lasted one season and was considered a huge gamble even then.
* Dolly Parton AC. There's also the curious case of "Two Doors Down", which was sent to country in a version by Zella Lehr, while Dolly's version never charted at country (it was the B-side of "It's All Wrong but It's All Right"); however, Dolly's version is the only one that country radio plays.
* Dolly Parton, also appeared in a few episodes as the sister of Robby Ray.
* Dolly Parton, and her comment was that she looked like a midget next to them since most of them were around six foot.
* Dolly Parton had several, including "It's All Wrong, but It's All Right"/"Two Doors Down" and "Baby I'm Burning"/"I Really Got the Feeling". Both sides went to #1.
* Dolly Parton hiding behind a tree." (Substitute any other well-known busty woman, as appropriate.)
* Dolly Parton original, it's more like "IIIIIIIII will alllllllll-waaaaaaaaays love yoouuuu..."

* Dolly Parton's "9 to 5", which she takes such a liking to that she quotes part of the song to the Union Counsil while defending her colony of Moclan refugees.
* Dolly Parton's famous blonde hair is a wig; she's actually a brunette. In her day-to-day life, or if she wants to go out with her fame-averse husband, she wears her natural brown hair, minimal makeup, and modest clothing, at which point she just looks like an average Southern woman. What also helps the "disguise" is that she has several tattoos that aren't part of her public persona, hence why she pretty much always wears long sleeves for publicity appearances.
* Dolly Parton's famous song "Jolene" paints the picture of this variety of love triangle. Jolene (with her "beauty beyond compare") is the Veronica, and the singer (who "cannot compete with you, Jolene") is the Betty. The song consists of "Betty" begging Jolene not to steal her man.
* Dolly Parton's song "Jolene" (also recorded by Olivia Newton-John and Kesha among others), where the narrator begs Jolene not to steal her man.
* Dolly Parton was raised in a one-room cabin in the woods with dirt floors and little money. Her parents worked hard to stretch a dollar.
* Dolly Parton wrote "I Will Always Love You", she was on Porter Waggoner's syndicated TV show. She wanted to leave the show to foster her budding solo career but wanted him to know that she appreciated all he did for her, and her thoughts resulted in the song. After she played it for him, he decided to release her from her contract as long as she had "Love You" recorded. It would go on to become a huge country hit and the rest is history.
* Dolly the sheep had three mothers: one that the nuclear DNA was taken from, one that the egg cell was taken from, and one that it was implanted in.
* Dolmann, a quirky inventor, had a small robot doll for every occasion, though it was never very clear whether they legitimately possessed minds of their own or Dolmann was using his skills as a ventriloquist to pretend he had some company. Even so, they seemed to
* Dolmio) has a bizarre, multicolored hairstyle akin to a poodle's without explanation. The hair was explained soon after in a series of follow up shorts that had the theme of the family members having a bad day they immediately forgot about then Mama served dinner: she went to a new hair dresser and it didn't go well. In later shorts, Sophia had straight brown hair like the rest of the family, meaning this wasn't her natural hair.
* Dolochimps have the heads of dolphins, the bodies of chimpanzees and the legs of giant locusts.
* Dolohov's signature spell involves purple fire. When cast non-verbally, this
* Dolomedes) is attacked by a parasitic wasp, the spider will usually try to evade it by going underwater. However, some wasps have been observed following the spider underwater, stinging it, then dragging it out of the water.
* Dolores both undergo character development into this. In the second game, the new pilot of Jehuty actually teases A.D.A. about her apparent crush on her original pilot.
* Dolores, but the host of abandoned plot threads still gives the impression that you did something wrong.
* Dolores catches Eddie with his pants down (he had just gotten out of the shower and was getting dressed) when
* Dolores Claiborne, father and daughter share a bond until he starts sexually harassing and molesting her.
* Dolores Claiborne, Selena sees the back of her own head while facing a mirror. When she tries to turn around, she has no face. This happens just before her bad memories come back.
* Dolores Claiborne), the protagonist's husband hits her across the kidneys with a piece of firewood, then says "Why did you make me do it?" It doesn't end well.
* Dolores Claiborne was a long-suffering wife of an abusive relationship. However, what pushed her over the brink wasn't her husband's treatment of her, it was his treatment of their children (emotional abuse of one son, sexual abuse of their daughter, and cleaning out the college savings accounts Dolores had worked long and hard to build up).

* Dolores does this as a prank on Humbert in the 1997 film adaptation of
* Dolores Duffy has playing the bongos on her professional resume so Iris Puffybush played the bongos in one episode of
* Dolores, i causes a massive wave after falling to earth at hypersonic speeds, inundating a city up to at least the second floor. Although the damage is blamed on the heroes, there are oddly no fatalities mentioned.
* Dolores Jane Umbridge happily employs this during her tenure as a teacher. She finds it difficult to counteract Hermione's vast array of knowledge, and so she allows her to make one statement or raise one question, then promptly turns her back on Hermione and pretends to not notice her raised hand.
* Dolores O'Riordan before her untimely death in January 2018. The band intends to donate proceeds from the song to her children, and the music video is dedicated to her.
* , Dolores strangles her landlord while giving him a massage, and her friend Luis, who runs a struggling empanada shop, disposes of the evidence by mixing it into the meat. The "special" proves quite popular.
* Dolores Umbridge does not have any official ties with Voldemort, but she gleefully uses her post to enforce his
* Dolores Umbridge exploited this trope. She doesn't want Hogwarts students trained in offensive magic so she fills the Defense Against the Dark Arts class with lessons like 'negiotation' and 'non-retaliation' on the premise that these skills are just as important for future Auror teams as curses and counter-curses. While this might not sound like a bad idea, the fact that she is imposing these restrictions while a wizarding civil war is brewing in the background make it clear that, in this case, being The Face is less useful than knowing how to defend yourself from homicidal lunatics. It's also clear from what happens a couple of books later that she's deliberately watering down the students' skill-set so that they'll be less of a threat to face when there's a coup.
* Dolores Umbridge has a high tittering laugh...which hides her sadistic nature.
* Dolores Umbridge is an interesting example. There are eviller villains in the series, to be sure, but none of them are quite so
* Dolores Umbridge, who, as a distinguished and high-ranking Ministry official, is able to get most people to overlook her child abuse in
* Dolorous Edd admits he abandoned Sam in "Valar Morghulis" because Sam was fat and slow.
* Dolphidile (dolphin/crocodile), cockager (tiger/cockatoo) and ralk (rabbit/elk)
* Dolphin Rider Koishi has the fishmen who explode into fish when killed.
* Dolphins are depicted similarly (and, in fact, the Howler mindset is directly compared to theirs), which means that this trope applies to
* Dolphins, Dolphins Everywhere — These creatures make everything a splash.
* Dolphin Sextina Aquafina summarises her personality - "I'm a dolphin, we have sex for plea-sure".
* dolphins (official materials suggest Dolphins and Whales serve aboard the Enterprise-D as navigators.)
* Dolphin Tale: Made in 2011, set in 2005. The 2014 sequel, in turn, is set in 2008.
* Dolph Lundgren as he needed the money to pay his lawyers during his divorce.
* Dolph Lundgren features an alien drug "collector" who overdoses humans with stolen heroin so he can extract endorphins from them for sale off-world.
* Dolph Lundgren has a rather manly, squared jaw that has only become more pronounced over time.
* Dolph Lundgren has played more than half a dozen Russian characters, despite actually being Swedish.
* Dolph Lundgren holds all true to the actor: he studied chemical engineering, moved to the States with a Fulbright Scholarship to MIT, and started working as a bouncer which led him towards a completely different career.
* Dolph Lundgren in the 1980s, and they started a short lived relationship.
* Dolph Lundgren in the Spring of 1991, though it was still released theatrically overseas.

* Dolph Lundgren, led by evil Yakuza boss Yoshida, who murdered Kenner's parents long ago.
* Dolph Lundgren was almost entirely deleted for time reasons, and he only appears as a silhouette.
* Dolph Lundgren, who earned a Masters in Chemical Engineering in 1982, which he studied for while competing in European karate competitions; he holds a 3rd dan Black Belt in Kyokushin karate.
* Dolph Ziggler and Hornswoggle. Funnily enough, her BFF AJ locked lips with the last two as well, and AJ is with Dolph Ziggler as of December 2012.
* Dolph Ziggler are an evil power couple, but seem so blissfully happy together that it's hard not to root for them.
* Dolph Ziggler began his WWE career as Spirit Squad member Nicky (he was a brunette then). Since then, he bleached his hair blond (except for a few months in 2011 when he was a brunette). He's since stopped bleaching it, with the tips of his hair being blond and the rest brunette. As of 2017 he let his natural hair grow out.
* Dolph Ziggler is partial to this. He often yells and hollers when entering a match and when he is in control of a match. He sometimes does this after winning as well.
* Dolph Ziggler more intense than average Joe) and that he is always looking for something to eat.
* Dolph Ziggler: Occasionally does live comedy and even writes sketches for both himself and other comedians.
* Dolph Ziggler: Peaked in 2013 when he cashed in his Money in the Bank contract to win his second World Heavyweight Championship (his first reign in 2011 lasted less than an hour).
* Dolph Ziggler's caddy in the short-lived and controversial Kerwin White gimmick. Once that gimmick was canned, he reappeared as Nicky, a member of the Spirit Squad. He finally debuted as a singles wrestler with the Dolph Ziggler name in 2008, where he eventually became World Champion in 2011.
* Dolph Ziggler who revolutionized how entertaining selling could be and for making his opponents look strong. Speaking of which...
* Dolph Ziggler, who wanted to know who he was but Dolph was too flabbergasted to answer.
* Domain, a horror novel about giant killer rats, one of these aggressive rodents gets stuck twice — once by its shoulders, again by its hips — while squeezing its body through a gnawed hole in a door. Any exterminator, or any rat-fancier who's ever tried in vain to put a collar on one, knows that real rats can fit their entire bodies through any opening large enough for their heads.
* Domain: Dominique Vazquez gains this status in the second book after a more supporting role in the first one. Lilith Mabus also counts.
* domain hacking. Also, the Christmas Islands revoked the infamous "goatse.cx" domain in 2004.
* Domain Tnemrot and he and the JAD artist are working on something else as well. And on his facebook he mentions working on three other projects he hasn't mentioned yet. Apparently he doesn't sleep.
* Domain Tnemrot as almost all tech in the future being based around the touch screen.
* Domain Tnemrot. Dae is one of the last living soldiers in a resistance war and has essentially become the leader by default.
* Domain Tnemrot doesn't see as much action as Dae in the arena, but is shown to be a much more capable fighter than him. The main reason she doesn't fight in Tnemrot is that she's recovering from abuse and still has some suicidal tendencies.
* Domain Tnemrot has numerous cases of the crowd cheering their enthusiasm for someone to deal a deathblow.
* Domain Tnemrot. In a blog post, Herbert says the original 4th chapter gave a history that conflicted with the one mentioned in the About page, so he changed everything around at the last second.
* Domain Tnemrot once said no one was famous until this trope was inflicted on

them.
* Domain Tnemrot, though, the author insists that this is in no way a political comic and it's all just a part of the setting, while the main character's views are just a product of the environment he's grown up in.
* Domain walls - basically a cosmic string in two dimensions, not just one, that would divide the Universe in a sort of cells.
* do manage alright on Hershel's farm for a while, but even that gets overrun with zombies eventually.
* Doman gets subjected to this from Gintoki, who hits him with a kancho multiple times while Gedomaru bends him over, and was also given the same treatment from Seimei in the past (which is a joke on the fact that his family name of Shirino literally means "butt").
* Domaris, which would be deeply dishonorable if it were true since it would violate their mentor-student relationship.
* Doma when she was about to finish him off but suddenly snapped out of it at that very moment.
* Dom DeLuise gets only a few minutes near the start of the film, but kicks off the plot by convincing Kermit to go to Hollywood and get into showbiz.
* Dome is set at a futuristic undersea research lab. One of its residents volunteers to be genetically modified into a fish person in order to better survive the underwater environment.
* Domenica alla Frontiera, and a typical week-end activity for families is traveling to the end of the Universe and watching the nothingness beyond.
* Domenico; in fact, they occasionally have sex — to settle arguments.
* Dome of the Deep (Maraqua): Chiazilla, Giant Spectral Mutant Walein, Koi Warrior, Slug Monster, The Drenched
* Domes are also really drafty, leak badly (think of all the joints on the outside and the fact the outside is all roof), and have really weird acoustics (you can hear someone from the other side of the house but might not be able to easily hear someone in the same room). There's a reason why people like Lloyd Kahn, who actually wrote several books on dome construction, no longer think they're a good idea. Not to mention they have terrible re-sale value and most banks are really hesitant about making loans on them and you get traditional construction winning out over futuristic.
* Domestic Abuse: Almost always by the heroine's husband. Otherwise, it's her own mother or her mother-in-law.
* Domestic Abuse: A person harms their significant other either physically or emotionally (or both), often to control them.
* Domestic Abuse: Characters who abuse their families/spouses/lovers often cross this.
* Domestic Abuse: I can do whatever the hell I want with my own family, like beating them to a pulp!
* Domestic Abuse: Inclined to abuse their partners either mentally, sexually, verbally, physically, or emotionally.
* Domestic Abuse. It's gained a following amongst wolf fans due to its sad, sympathetic lyrics about a wolf trying to abandon its instincts to kill rabbits.
* Domestic Abuse. Noah berates his wife when she told him that giving a rifle to Brandon is not the smartest birthday gift, and leaves her when he's attacked by Brandon. It's hard to tell if the latter is just him not thinking straight, saving Brandon, actually leaving his wife, or all three.
* Domestic Abuse: Remember kids, she's actually flirting if she's verbally or physically abusive!
* Domestic Abusers, with ostracism from a community (such as relatives, or a religious community), or with abandonment, just to name a few ways.
* domestic abuser who controls his girlfriend Bunny with threats and acts of violence while isolating her from people who could help her and using emotional manipulation to his advantage.
* Domestically-produced cartoons inverts this rule, as it's much cheaper to outsource animation to another country than to produce it locally because of the

difference in dollar values. As a result, domestically-animated projects tend to have lower production values than outsourced ones despite having the same budget, since producers have to pay more for local animators than for animators in Japan or South Korea.
* Domestic Appliance Disaster: Modern appliances are not that prone to derail any more, they have auto shut-offs the most often.
* Domesticated pigs. Fat, often pink creatures with curly tails that look too tubby for their little legs, stuff themselves on near everything and look ridiculous when they're running around. As any farmer will tell you, though, pigs are incredibly dangerous when riled, and have been known to kill and eat their caretakers if they're provoked into it (or
* Domestica the couple in the story end up staying together, despite all their differences and the fighting.
* Domestication involves doing this to certain animals. Even if the animal's life cycle can be observed within a human's lifetime, the process still takes decades. Breeding for docility can have very profound effects on the animal's appearance in addition to its behavior. One experiment to breed domestic foxes had them become very similar to domestic dogs
* Domestic cats. A lot of feral cat colonies are entirely composed of female adults and kittens, so matriarchy is default, but if there's a few tomcats in the colony the "alpha cat" is still more likely to be a queen. Though weaker, female cats can sometimes dominate the males through bluff; females are much quicker to hiss and swat. And tomcats would rather save their energy for the mating competitions, anyway.
* domestic comedy. While the father is mostly annoyed by her presence, the other family members generally enjoy her company.
* Domestic Disturbance) by incinerating it in a brick kiln. When the young protagonist immediately reports this to the police, they handwave it away by saying that an investigation would entail expert criminal pathology.
* Domestic dogs also do this sometimes to their owners, especially when they're upset over something said owners have done (forgetting to feed them, taking them to the vet, etc). Huskies in particular have been known to give out
* Domestic dogs have served in this capacity for a very long time too, even back into the days when the strange noise in the night might
* Domestic ferrets are commonly mistaken for Black-Footed Ferrets. They are, however, separate species. Mistaking them is comparable to mistaking a Husky for a Grey Wolf. This confusion is so prevalent that it's led to ferrets being banned in many regions due to fears that they're dangerous wild animals who can cause harm to the environment if they got loose.
* Domestic Girlfriend as much as possible despite the time difference. Their relationship is complicated a bit because Natsuo has several girls who consider taking advantage of his girlfriend's absence to seduce him, and his girlfriend has a sex-crazed roommate who keeps trying to convince her to go on dates.
* Domestic Girlfriend: Natsuo happens to see Hina masturbating while muttering her ex-boyfriend's name.
* Domestic Girlfriend Rui are her daughters. From then on, all the obvious complications of such a relationship begin to arise.
* Domestic Girlfriend. When she tells Natsuo what she's worried about, he tells her in no uncertain terms that he doesn't feel that way about Hina any more.
* Domestic Girlfriend, while he met the younger, Rui, in a casual outing with his friends and ended up losing his virginity to her. Then his father announces he's getting married again and, surprise, the woman's daughters are none other than Hina and Rui.
* Domestic Girlfriend who tries to ruin Natsuo's career and later tries to murder Hina.
* Domestic sheep are also considered this, due to having such low intelligence they can even be defeated by
* Domestikator the animal, which the artist claimed was not the intended meaning.
* Dom Fera videos as well as fans of the videos nagging him to hurry up on the next

one.
* Domina and slaughtered hundreds of people. Lilith was more careful after that, but the idea stuck. By the time the story starts fifteen years later, she is revered throughout the city as the Mother Monster. When negotiations need to be made with America, she is sent to lead the ambassadors, and they follow her orders without a word of dissent. She does privately admit a few times that the burden is a bit beyond her. "Parenting is hard enough with a handful of kids, or even just one. I have over four hundred million. I can't possibly look after them all."
* Domina defeated Perfecto Bundy and Sebastian Joestar in a three way dance to become International Heavyweight Champion of the Chile based Xplosion Nacional de Lucha Libre in December of 2016.
* Domina device known as the toy maker, so everyone else who uses it sees her as the "Mother Monster." Lilith herself is annoyed at being called that, but still fills the role as best she can.
* Domina does when he finds out the city is being attacked by super-powered zombies is go on TV, explain everything, and warn people not to panic.
* Domina. Elites are referred to as "honored," and each culture has their own title for them—vampires would be addressed as "Honored Nightstalker," angels "Honored Daybreaker," and so on. Then above that are the warlords, who also get their own honorifics; in addition to the title itself (which is basically a rank), men get referred to as "Knight," and women as "Dame." Ex; "Knight Derek," "Dame Laura."
* Domina (especially everything involving bathrooms) and resolves to turn back into a machine as soon as possible. It's a slow process, and she's interrupted by an emergency, leaving her as a strange sort of cyborg.
* Domina. Gang politics are not the focus of the story, but multiple characters are still gang members, which influences their actions one way or another.
* Domina guides him to a place of relative safety, and then he asks where he should meet up with the other survivors. She sadly says there are no other survivors, and details how the zombies managed to overwhelm every single defense in the city.
* Domina is described as bronze-skinned, golden-eyed, and over six feet. Sounds like the description of a Greek goddess.
* Domina is that the Lucifers should have been called Samael, but the Arch-Saints sort of skimmed some parts of traditional angelic lore.
* Domina. Maybe. He looks like it at first, but then he was able to shoot a zombie without so much as blinking, so maybe he doesn't really count for the "naive" requirement.
* Dominance Through Furniture: A villain proves their power by using someone as a chair - or worse.
* Domina no Do!: Takeshi's father lost his job months earlier but his wife and son only find out when Takeshi gets abducted. All this time he pretended to go to the office, when in fact he just spent his days in internet cafes.
* dominant hand, regardless of direction. If Haledjian had been correct here, then people would use a different hand to flip back through a book than to flip forward through it. Even animators knew this wasn't true. Also, Haledjian would be discounting the possibility that he was flipping back a few pages, perhaps to find a passage.
* Dominant Species by Michael E. Marks centered on a Marine Rapid Assault Team in powered armor; the depiction took a serious (rather than fantasy) approach to the depiction of powered armor capabilities and vulnerabilities.
* Dominant Species Genes: Cross-species couples have kids of one species.
* Dominant Species Genes: Two creatures of different species have a kid that has the traits of the most "dominant" parent.
* Dominant Species Genes: When species X and Y have kids, the kid is always an X.
* dominant the Tour de France. Using "dominate" as a noun or adjective is also a common error in BDSM fiction.
* Dominaria has two moons, the Mist Moon and the Glimmer or Null Moon. The latter turns out to be an artificial
* Domina) shotgun as one of his main weapons. Although that's pretty small compared

to everything else on this page, that's basically the biggest shotguns get in real life.
* Domina, since it means that a group of insane women with armies of monsters at their command are changing unpredictably.
* Domina, something called the "toy maker" lets people modify their bodies relatively easily. It's described as "like stem cells, but without the moral implications." The products are called "toys," and are split into cosmetic "cosmos" and functional "buffs." It's not limited to humans, either; the fey think it's funny to release augmented animals every once in a while.
* Dominate when they attempt to break the spell on a dominated paladin by disguising Belkar as lord Shojo, said paladin's master and lord.)
* Domina: The city started as a prison-island, and it's implied a few times that the guards were killed decades ago. Technically Necessarius acts as the police, but they're mostly just the largest gang in the city. To make their jobs easier, they give the warlords of any sufficiently large gang the authority to seek "retribution" for crimes against them. While sometimes retribution is settled financially, it usually just involves the victim shooting the perpetrator in the head in front of a Necessarian witness.
* Domina: The city was originally populated by criminals and abandoned by the mainland soon after. Therefore, the local laws are very loose and structured mostly around swift, harsh punishment. There are no prisons to speak of, and the primary punishment is "retribution;" if a crime is committed, a neutral judge assigns a penalty that the victim can inflict on the perpetrator. These punishments can be fines, but for more serious crimes summary execution is granted. Furthermore, if no one calls for retribution, no one will bother trying to interfere, and the two parties are pretty much allowed to just kill each other with impunity. The government only gets involved if the conflict starts to spill over to bystanders.
* Domina, the Kongeegen (usually just called "the Kongs"), are this. While they don't get much attention, they're part of the reason that there are so many gangs running around killing each other all the time, as they prefer it that way.
* Domina. The timeline changed in 1970, and apparently one of the effects is that the USSR never fell. The Cold War appears to be long over, though, and the Soviets maintain the space station that serves as the communications hub for the space colonies.
* dominating the Linear Guild's kobold rogue and using him to fight Zz'dtri.
* Dominator wears a pair of black, Converse-like high tops when she's shown as a teenager-like young girl.
* Domina to the point that he can shrug off bullets; fighting a small mech is nothing.
* Dominatrix as a means to meet potential victims. Arranging to meet clients outside the club, she lures them to private locations in order to eat them. Besides that, she also works for a human trafficking ring and lures young women with the promise of well-paying jobs.
* Dominatrix: Possibly dates back to Mesopotamia, involving rituals of the goddess Inanna (or Ishtar as she was known in Akkadian). Ancient cuneiform texts consisting of "Hymns to Inanna" suggest that these ritual involved powerful females displaying dominating behaviors and forcing men into submission to them. The same text suggest myths where Inanna did the same to her fellow gods.
* Domingo Faustino Sarmiento escaped from Argentina to Chile, during the dictatorship of Juan Manuel de Rosas. Before leaving, he wrote "Barbarians, ideas cannot be killed" in a big rock. He worked against Rosas during his exile and became president of Argentina years later when Rosas had long been defeated and gone.
* Domingo Santos) features an alien species, "rollers", which respond to human colonists with curiosity and cautious friendship.
* Dominic actually screws destiny on a regular basis; one of the advantages of being a seer who can see into the future. The only time he lost was when he suffered a "Fated Fatal": a sign that someone a seer knows is about to die, and there is

* Dominic, a greyhound that lost both right legs when he was hit by a car, manages to stand, walk, run and even jump on his two left legs, an arrangement never seen in nature.
* Dominican Boy of WWC is so named because he hates admitting to being Puerto Rican.
* Dominic And Claire fifty-five times in one story to justify to Claire that he knows about machines.
* Dominic And Claire has Claire blowing bubble gum as she listens to Dominic talking. Dominic pops her big bubble with his finger, leaving her in the next panel to peel the gum stuck in her quills.
* Dominic And Claire; Rusty says she's just a friend, blushing when doing so.
* Dominic and Luna. Dominic learns that Luna's first time was an (intentionally engineered) utter disaster, so she developed some serious hang-ups about intimacy on top her pre-existing self-esteem issues. It works out in the end, though (Three words: "Worth. The. Wait.)
* Dominic Deegan. Aagh. Ten-hour-straight archive binge only to find out that there's a huge hatedom surrounding the comic.
* Dominic Deegan abounds with this sort of thing. Some examples include:
* Dominic Deegan above all else, or the Orcs approaching magic much differently than humans (for one thing, they believe ice is sacred, which allows orcs to use ice to great effect against demonic forces) but some of the clans also having extremely misogynistic values. The fanbase, as with nearly everything else, is sharply divided on this; some people feel it is perfectly justified for non-human cultures to have distinct values, while the other side claims that orc culture is insane and Mookie is wrong for depicting them so.
* Dominic Deegan after Bumper tries (and fails) to knock him out by smashing a staff on the back of his head. He was at first meant to have a much longer run, but writer/artist Mookie stated that he just didn't feel right throwing in a Berserker-type character in a magic-based world, so a raging Brok chases Stunt and Bumper into the sunset and is never seen again.
* Dominic Deegan: A more justified use in the "Battle for Barthis" arc in that the bill in question covered both rebuilding the entire town of Barthis after it was destroyed and repaying Gregory's debt to the kingdom.
* Dominic Deegan, and from several supporting characters. She has orc tusks because of a curse.
* Dominic Deegan and his allies weren't adverse to looking up new information on whatever threat they were facing before rushing off to confront it. A good chunk of the plan for the "Storm of Souls" arc only came about because Dominic researched the nature of what they were confronting and detailed a plan to counteract it. It wasn't perfect, though, as they were still instances of outdated information and simply wrong conclusions.
* Dominic Deegan, and it seems that many of the aristocracy are mages as well.
* Dominic Deegan and pops them off constantly. In this particular case it was just the wrong subject to pick.
* Dominic Deegan, and the other half into a genocidal dictator who wanted to kill everyone outside of his kingdom and then mutate half his people.
* Dominic Deegan, a necromancer and a clairvoyant make a merry drinking game out of trading insulting nicknames for the other's branch of magic. You repeat yourself, you drink.
* Dominic Deegan are insultingly referred to as "piggarts." The author commented that he wasn't sure if he should feel proud or ashamed of making up such a nasty-sounding slur.
* Dominic Deegan athlete and turns to kill the stripper he was accosting... only to get a vision of her telling her daughter good night.
* Dominic Deegan, before Szark Sturtz's duel with Scarlatti, a batallion of Callanian knights arrives as part of Serk Brakkis's entourage, to make sure the duel is fought in all fairness. They're on Serk's pay roll, and intend to make sure Scarlatti (his proxy in the duel) wins.
* Dominic Deegan, Brett Taggerty, a buff jock hopped up on White Magic, is

interrupted from beating up a smaller man by Rachel Hart. Taggerty angrily cries out "How about I break your face instead?" and punches at Hart's face with a strong right. The punch only break's Taggerty's hand, to which Hart replies "I break things with my face."
* Dominic Deegan Celesto Morgan's trademark move is to overload people with Chaos magic, causing them to explode rather messily in all directions.
* Dominic Deegan) clothes of the Travoria sisters. After her plan to have her husband assassinated in order to gain control of his wealth goes south, the would-be assassin strangles her — with her own pearls.
* Dominic Deegan darts that, bizarrely wear off moments after being removed.
* Dominic Deegan, despite Infernomancers being evil by the very nature of their powers (they sell their souls to their patron demon in order to channel that demon's power) and Hell itself showing him the evil that he's done.
* Dominic Deegan did not like the fact that Lord Sigfried — the only morally grey character in a story full of overly pure heroes and cartoonishly evil villains — was so popular among the fandom. He tried to fix it by retconning every good thing Sigfried ever did as just part of a (successful) plan to get into Jaylen's — the wife of his supposed best friend — pants.
* Dominic Deegan does this occasionally to confront his enemies. He has no combat experience or knows any offensive magic, but within their minds even powerful mages have few chances to beat him.
* Dominic Deegan, early on, the viewers are made to believe that Order equates to good and Chaos to evil (the main character even believes he is supposed to be the "Champion" of Law for awhile). We find out later, though, that neither is more inherently good than the other and both can be used for good or evil deeds; the main character is tasked with protecting the balance between them. It helps that there's no cosmic axis of Good v. Evil to complement that Law v. Chaos one; instead it's Creation v. Destruction.
* Dominic Deegan elementalist who literally rearranges quotes from characters by catching "words on the wind" in a bottle in order to have them say something completely different from what they'd meant. It doesn't work on Luna since she's skilled enough at magic to realize that the words were rearranged.
* Dominic Deegan ends with one in hell, which is powerful enough to breach dimensional barriers.
* Dominic Deegan even Dominic's ladyfriend, Luna, is inclined to agree that it's pretty funny. Dominic himself seems to recall it more with rueful embarrassment than with horror, as well. This attracted some controversy, but quickly took a back seat to what followed.
* Dominic Deegan features a variant where Dominic is about to be hanged by a group of evil wizards - one of whom is holding him up with one hand. After he drops Dominic, a stray magic bolt ricocheted off a wizard's hand in the melee cuts the rope - right next to Dominic's neck, no less.
* Dominic Deegan for a human knight, Kiya is probably one of the lightest orcs ever seen.
* Dominic Deegan forces him to do community service as the town's resident seer. A job Dominic loathes beyond measure.
* Dominic Deegan, Gregory is disguised as "ace reporter Buzz Beardman"... but Rachel recognizes him right away when she hears the name, because Gregory created Buzz Beardman as a character in a comic book he made as a child.
* Dominic Deegan had a few weaker arcs a couple years into its run. Specifically...
* Dominic Deegan had each adventure following on the heels of the last. Lately, after every arc the comic skips forward a few months.
* Dominic Deegan had one of his legs blown off when Raf Malish's soul exploded and he was caught in the blast radius.
* Dominic Deegan has a case of this whenever he uses his dark Seer powers.
* Dominic Deegan has a story arc that was partly so the characters could unwind, and partly so Mookie could do some world building.
* Dominic Deegan has a swordsman named Arcangelo Scarlatti. He is employed as a proxy (substitute) to fight Szark Sturtz, who steps in for master swordsman Donovan

Deegan. During the battle, a corrupt knight strikes Sturtz in an old and perpetually open wound, crippling him for a minute or two. Scarlatti can only look on in disgust and anger at the knight's actions.
* Dominic Deegan has been known to have some very strange things happen when he has major visions. When he first saw the Storm of Souls, he spent a week in a coma. Later in the same story arc, an accident with a teleportation spell during a vision caused white light to come out of his eyes, and he was subsequently teleported to another plane.
* Dominic Deegan has Sieg's father, Lars, called in to help with his son's exorcism. "I'm an accountant! What am I going to do, threaten it with a tax audit?" A few moments later:
* Dominic Deegan has the character of Urban Eddie, whose trump card is a necklace that nullifies any magic directed towards him. He even shows another practical use for it by strangling a spellcaster with it, rendering them helpless.
* Dominic Deegan has this when Gregory Deegan's new band, "Facebath," plays their first song. At first the audience is silent after the song ends, until Lars Sturtz stands up and yells "That was un-fucking-believable!" This breaks the silence as the rest of the audience erupts into cheering.
* Dominic Deegan, he cast a spell on a bouncy ball and lets it fly. He apparently also did the same to Dominic's crystal ball in his youth.
* Dominic Deegan. He is, however, immune to brainwashing — "No brain to wash!"
* Dominic Deegan. He lights his pipe, inhales, and... discovers that when his white mage brother Gregory healed him earlier, he also cured his smoking habit.
* Dominic Deegan. If Dominic failed any of the tests, Rilian was ready to kill him. Rilian noted once that his role requires him to be cold.
* Dominic Deegan in a rare same-sex example. Dominic's childhood friend gives Dominic the longing gaze. Luna sees him doing so and demonstrates it for Dominic. This is particularly cute because Luna used to do it for Dominic herself before they got involved.
* Dominic Deegan Infernomancer as... well. Out of Character is putting it mildly.
* Dominic Deegan. In this case it's confined to one area and is apparently caused by eating the food, so it might be that the people don't actually start out that way.
* Dominic Deegan: Inverted with Callan's "Sin City" Erossus, which has a Green Light district where what little non-seedy business the city sees goes on.
* Dominic Deegan is a frequent offender, as are the rest of his family, and anyone else who spends too much time with them.
* Dominic Deegan is a nameless monster that consists of a huge eye and a lot of tentacles.
* Dominic Deegan, is hardly what you'd call iron - more like copper or gilding metal - he takes some serious injuries over the course of the comic, including the loss of a leg and several teeth. The one time we see him go in for a check-up, the diagnosis was summed up as "I'm surprised you're not dead". The major reason he managed to keep going was that his battles were primarily psychic or on magical planes rather than physical.
* Dominic Deegan is mostly about putting on a concert to raise money for the ruined town.
* Dominic Deegan: "It's like the Bikta sanctuary, only smaller and without the killing."
* Dominic Deegan: Luna's oldest sister, Barnet, suffered from this, making her an outcast in the already majorly screwed-up Travora family. It eventually lead to her running away from home and becoming an assassin.
* Dominic Deegan Luna was mistreated by the rest of her family because of her orc-like teeth (result of a curse), her mother tried to drive her to suicide, one of her sisters had a habit of enchanting rich men into challenging her husband to duels to the death then claiming their money afterwards, another sister is a lawyer (and the second most ethical of the lot after Luna), and the third sister was an assassin.

* Dominic Deegan: Magic users have their eyes glow when particularly focused.
* Dominic Deegan — even though Dominic warned her that every applicant, except for two, would add up to this.
* Dominic Deegan: Miranda Deegan is an excellent user of illusion magic, even able to fool her son Dominic's powers of second sight at times. Her father was noted as specializing in this type of magic, implying she learned it from him. Luna also displays some talent with it and picked up a few tricks from Miranda later on.
* Dominic Deegan of effort and resources. Among others, we've seen a Golem of Law (Acibek, made from his creator's followers... whose first act was to expose his creator's crimes), a Leaf Golem (Leaflette, the (first) Forest Oracle), a Miscellaneous-Forest-Creature Golem (Dirk the Mighty), and a Flesh Golem (Quilt).
* Dominic Deegan of her parents out for their behavior (and their attacks) on Donovan for him being her choice of a future husband.
* Dominic Deegan: Oracle for Hire are quite popular among the comic's “ironic” fans.
* Dominic Deegan: Oracle for Hire: The "Storm of Souls" arc centers around a match between two champions who become the personifications of Chaos and Balance.
* Dominic Deegan. Perhaps this is proof that using powers centered around peering into peoples' innermost thoughts and history requires, or leads to, a very gray morality.
* Dominic Deegan sacrificed his highly crafted artificial leg to get a rare and precious gemstone with which to propose to Luna, which she herself noted was a type typically put into rings. She wears it around her neck rather than on a ring.
* Dominic Deegan say "Ilka tuk tak" whenever they feel like they need to let out some foul language, and it is infrequently commented as being very inappropriate.
* Dominic Deegan's father Donovan was an orphan raised by elves, and elven surnames aren't given to humans. So he took his wife's last name.
* Dominic Deegan she calls from off-panel that she "wanted a running start" before making a flying glomp tackle.
* Dominic Deegan she decided to freeze the bandit duo Stunt and Bumper.
* Dominic Deegan simply be too alien and powerful to go up against in his usual manner.
* Dominic Deegan Since he is not forgiven for his past deeds, his survives on what seems to be sheer willpower.
* Dominic Deegan sleeping. Things did eventually progress further, though.
* Dominic Deegan: Someone doing it for themselves, and someone doing it for someone else:
* Dominic Deegan's pant seat). And he can play an electric guitar (which is actually a normal guitar powered by lightning magic, which is all sorts of badass).
* Dominic Deegan, Spark notes that Quilt doesn't have a brain. When Donovan (on one side of Quilt) asks why he thinks that, Spark (sitting on the other side) looks through Quilt's ears and says, "I can see you."
* Dominic Deegan's pet cat, has just about as much deadpan snark and dry wit as anyone else in the cast. It's apparently a mutation caused by high ambient magic.
* Dominic Deegan sported an eyepatch of power ? a blindfold with long spikes on the inside, that concealed magically ever-bleeding eyes (the mark of the demonic pact that gave him his powers).
* Dominic Deegan, Stark and Pam used dummies of Dominic and Dex, respectively, to practice revealing a hard truth.
* Dominic Deegan swoons over the mongrelwoman as she slaughters a group of men who threw a net on her in "Escape from the Wild Edge". Odd in that Bort isn't the villain of the story.
* Dominic Deegan takes this view, almost never corrupting humans in his plans, but freely affecting other species. He also serves as a deconstruction of this trope, showing just how far someone with this mindset would be willing to go and what they would do in order to achieve and maintain this.
* Dominic Deegan' telepaths, i.e. physically weak while mentally untouchable. He describes himself as his body being "frail and weak, but [his] mind is a fortress you have no hope of conquering."

* Dominic Deegan that had cropped up in the forum. He settled on Quilt.
* Dominic Deegan, The Beast loves doing this. The fact that this has let someone intercede to stop him from killing his enemies something like 4 times in under an hour, you'd think he'd learn by now.
* Dominic Deegan the cave, where a completely unharmed Donovan is faking it while his interrogator is telling him to pretend to scream for mercy.
* Dominic Deegan, the main characters are witness to a fight between an infernomancer and a werewolf. Donovan Deegan mentions that, in his day, they had a name for such fights: A Monster Mash.
* Dominic Deegan. Then it turns out he was thrown directly up and he comes crushing down, landing on his neck and dying instantly.
* Dominic Deegan, the people of the Winter Archipelago have several different subgroups—werewolves vs. spellwolves, the nobility vs. commoners, young vs. old. When Mookie had one storyline focusing on the nobility, followed by another storyline focusing on their equivalent of wild college kids, he was accused of being "inconsistent" when it was really this trope.
* Dominic Deegan. They decide their love for each other is more important than fretting over formalities and take a quiet moment to reaffirm that. Their priestess friend Jayden takes the time to formally marry the two to spare them the stress of thinking about it with everything going on. The two do have the courtesy to make sure everyone knows about it, then have a proper wedding party at the end of the comic.
* Dominic Deegan thing—because he had the vision, that means he can change what's going to happen.
* Dominic Deegan to explain her behaviour even if it doesn't justify it for many fans.
* Dominic Deegan try to kill Dominic's father in order to claim his mother.
* Dominic Deegan. Unusually, it's a standard prosthetic limb with no special powers.
* Dominic Deegan used her looks to get men close enough to her to hypnotize them through eye contact.
* Dominic Deegan uses it in a symbolic sense. At the moments when a person is making a decision that has a major impact on their fate, seers refer to them as the crossroads.
* Dominic Deegan was in fact dead and the necromancer wasn't manipulating a still-living skinsuit. Squick.
* Dominic Deegan was the "Cult of the Blind Eye", a group that aimed to wipe out seers due to believing that the use of second sight was a disruption in God's plans. Magic itself wasn't the problem as the group utilized magic items themselves in their goals. It was just second sight they had a problem with. The cult ended up committing mass suicide years ago, but their weapons still played a role in one arc.
* Dominic Deegan: When Gregory starts up his own band, he and his band members draw upon a theme of "honest and ugly", reflecting the corruption in the world and Greg's own horrific experiences with necromancy and dark magic. The results are somewhat mixed, with half the audience walking out of his debut concert and some dicey reviews, but he apparently finds enough success to make a living off it.
* Dominic Deegan when the girl he's had his eye on grows spikes and starts slaughtering the guys trying to capture them.
* Dominic Deegan when the orcs around him realize he might be useful as a magical link to Dominic.
* Dominic Deegan, where the exact quote is, "Will you shut up and help me?!"
* Dominic Deegan (which is exceptionally frightening because Dominic is usually immune to magic illusions). And then THAT turns out to be an illusion, because Dominic is actually in a cage while Johann is magically dissecting his brain.
* Dominic Deegan. Whoever impresses the crowd more wins, though it's not revealed how many arguments are settled with Dance-Offs.
* Dominic Deegan who is also mysognistic, and borderline psychotic, the only use he has for women is giving him sex, and he will fly into a rage at the drop of a pin.

His most memorable scene is after breaking his hand, and finding out that Pam can't fix it in time for a game hits her so that he can hold her hostage until Greg can fix it.
* Dominic Deegan, who lost his right eye and a good part of his face during an infernomancer attack. It's subverted here, because the scar is very nasty to look at.
* Dominic Deegan, who was last seen in 2007, makes a re-appearance in July of 2012.
* Dominic Deegan with Dominic's parents... and grandparents. Miranda Deegan's parents did NOT approve of her betrothal to a bard, expressing it with magical pranks possibly reaching the level of felonious criminal assault. The first time Miranda Deegan realizes she's behaving like her parents in regards to her child's beloved, she breaks down into effusive apologies. It doesn't hurt that Luna is as intelligent as she is sweet - hard to find fault with a girl after you've offered her a position as magical researcher.
* Dominic Deegan with Donovan over Miranda, the reason he's been trying to kill Miranda is to hurt him for taking her away from him.
* Dominic Deegan with the demon of wounds, and Dominic's other brother Jacob the self-proclaimed "zombie alive".
* Dominic Deegan, with the punchline "Toupee" (as the speaker scored the winning touch in a duel, when one traditionally says "Touche", while simultaneously removing the wig).
* Dominic Deegan. Your warband occupies a hilltop overlooking your enemy's camp. Many of your warriors are master archers, while the enemy tribe has shown no ranged weapons and no defenses beyond teepees. You must carry the day, but you're not counting seconds. It follows that you should lead a charge down the hill and take the enemy by surprise. Keep your archers back, but have them hold fire until the ranks have mixed and the enemy is occupied with your fighters. Then pour arrows into the melee, but only have them hit enemies. Fight nonlethally with your clubs, hammers, spears, and rain of arrows on a ballistic trajectory, since only the enemy chief is evil. Have all of this work until the chief overwhelms you with his magic, then give the order to kill by yelling it really loud in the middle of a battle. Get rescued by two different groups of allies that snuck up on everybody on what is largely a flat, featureless plain. Party down.
* Dominic Flandry stories. A young woman wonders if a male nonhuman who has been very attentive to her is romantically interested in her; she then scolds herself for silliness, reminding herself how completely unattractive she must look from his viewpoint.
* Dominici went on to make a series of prog concept albums called "O3: A Trilogy". The first one was a solo album, with Dominici on acoustic guitar, harmonica, and vocals. The second and third were epic amazing prog metal, similar to DT.
* Dominick and Eugene, Guido tricks Nicky into delivering a newspaper with drugs hidden inside. When Gino finds out, he takes the packet out of the newspaper, opens it, and tastes the powder inside.
* Dominick and Eugene is being beaten by his father. He tells Nicky his bruises are from falling over.
* Dominick and Eugene regularly visits Mrs. Vinson, a woman who lives on his garbage route, so he can help her with her "plumbing problems."
* Dominick and Eugene: When Larry says that Gino and Jennifer must be having sex, Nicky says, "He's just helping her study, that's all." Larry answers, "Sure, and I'm the Pope's long-lost son."
* , Dominick Burke claims that he's bi and that his steady girlfriend is in Greece with her dying grandmother.
* Dominic Monaghan (Merry) and Billy Boyd (Pippin) are utterly hilarious. Especially when Billy keeps waxing lyrical about his feelings for Minas Tirith.
* Dominic Monaghan originally auditioned for Frodo Baggins before being cast as Merry.
* Dominic Monaghan originally auditioned for Sawyer, who was originally supposed to be a suit-wearing city con man. The producers were so enthused by Monaghan that the part of Charlie was altered to accommodate him - Charlie was originally going to be

a 45-year-old washed-up rock star.
* Dominic 'Nick' LaRocca: A highly controversial figure in jazz history, cornet player LaRocca was the leader of the Original Dixieland Jass Band. He's probably the first jazz musician who was ever recorded, and the first to outsell John Philip Sousa, who had the best-selling artist in America at the beginning of the twentieth century. At the same time, he was notorious for claiming that jazz was exclusively an invention of white musicians and trying to bribe other trumpeters to leave New Orleans so he could be the best in the city.
* Dominic Purcell they both arrived on set with matching haircuts, which even further confirms the perfect casting of the two.
* Dominic Smith and Heather "Calluna" McDonald also met and fell in love through their association with the site, though they broke up in early 2020.
* Dominion And Duchy and also why they spread all across the world of Pandora.
* Dominion And Duchy has at least six Elemental Manifestations. There is Luxianne, Manifestation of Light, Duister, Manifestation of Darkness, Dante, Manifestation of Twilight (which is apparently a specific type of energy), Lord Anarchy, Manifestation of Chaos, Lady Libra, Manifestation of Order and Malaenda, Manifestation of Neutrality and Balance. None of them seem to be evil.
* Dominion And Duchy has one in the Galactic Library. It is run by an A.I. known as the Librarian and apparently holds the contents of the Great Library of Alexandria. The Librarian was apparently organizing it for the humans when they make first contact.
* Dominion And Duchy is explicitly described as taking place in a multiverse. Which is at the centre of multiple multiverses held together by something called the Framework of Reality. The universe the story takes place in holds the object that all the different multiverses orbit around.
* Dominion And Duchy it looks like Earth is extremely minor, but then its discovered that Earth was the source of the extremely nasty Imperium of Humanity that was engaged in a universe-wide war.
* Dominion And Duchy: Pandora is a flat world that is somewhat unique in that it exists, possibly naturally, in a space opera setting.
* Dominion And Duchy setting, there seem to be twelve Elemental Manifestations, covering things like Light, Darkness, Twilight, Order, Chaos, Neutrality and Balance and several others.
* Dominion back in 2008. The first deckbuilding game, it was influential and spawned many expansions and imitators. The players are feudal lords trying to expand their estates into provinces and colonies to win victory points.
* Dominion created by SyFy lists exactly how the Numbers are organized and how the system operates.
* Dominion" His nemesis Mack (the actual protagonist ironically enough) was by contrast a DBZ-grade superhuman.
* Dominion: In this 1995 movie, members of an expedition are hunted by a deranged man.
* Dominion. In this early-Renaissance-themed deck-building card game, the Bureaucrat is an Attack card that forces everyone else to move some useless-in-game cards (which are sort of like deeds to lands) to the top of their decks. These cards therefore take up space in one's hand for two turns in a row, and the Bureaucrat player gets a shiny coin for his trouble.
* Dominion means that they can slip right past the human defenses designed to detect angelic infiltration.
* Dominion (Minmatar Ragnarok, Caldari Leviathan). CCP has also hinted that more doomsday weapons are on the way...
* Dominion over Man" art series reproduces different animal-human interactions with the human playing the part of the animal.
* Dominions 3 also has the nations Atlantis, Oceania, and R'leyh, all of which have fish people, though Atlantis and especially R'leyh have plenty of full blown sea monsters as well.
* Dominions. Effortlessly crushing AI enemies despite crippling cheater advantages because you know the magic system and they don't never gets old.

* Dominions gods, all warring against one another to become the one true god.
* Dominions has no way to disband a unit, and your units cost you full upkeep even when injury or disease renders them useless. Players will often send the expensive, feeble-minded old wizard on a suicide charge into the nearest enemy territory to get them out of the roster. Just send the player you're "attacking" a note; they'll understand.
* Dominions is ruled by a pretender god who can order the skeptics about.
* Dominions killing the last commander (armies can have multiple commanders) will cause the army to rout, while killing the last commander who can command the mindless undead (or magic) units will case them to freeze in place and stop fighting.
* Dominions MA nation of Nazca as due to their reverence for the wisdom of the elders they took to mummifying their priests and kings so they can continue giving their advice. The result is they they are now the true rulers of Nazca society and in-game their commanders are mummified on death and serve as undead. It is also possible for death Mages of all nations to ressurrect their nation's heroes, who come back as mummies.
* Dominions moment if he's playing an aquatic nation and summons some vamps for their immortality, only to find out that vampires killed in battle do respawn... in their underwater capital.
* Dominions previous Pantokrator), implying this isn't the first time this has happened — and indeed if you win the victory description mentions that eventually you get seduced away from being a Pantokrator by exploring higher mysteries, disappearing beyond the reach of everyone and leaving a power vacuum to be filled thus triggering a new Ascension War.
* Dominions Series of games has the endgame level 9 Conjuration spell "Wild Hunt" which unleashed the Lord of The Hunt on the world. Him and his pack of animals then proceed to prowl the forests of the world hunting down enemy priests, mages and even gods! Until the Lord himself is slain.
* Dominions, some Magic Sites are Ancient Tombs. Also, one might be found in a random event, which can provide both gold and a magic item.
* Dominions spiral-bound manual, written in a personable and readable tone and including a complete spell grimoire. Yet it doesn't even come close to explaining everything...
* Dominions, tames by their ultrasonic voices. The oldest and largest of them are considered sacred.
* Dominions, the later ages are less magical than before, with fewer magic sites and magic troops.
* Dominions, there is the spell ''Call the Worm that Walks". It is a powerful nature mage who escaped mortality by turning into this.
* Dominions, this Astral spell reveals all magical sites within a province.
* Dominions, vampires get this is an explicit weakness. They cannot directly cross rivers, even frozen ones that ordinary soldiers can, decreasing their mobility. They can cross bridges, however; only directly walking/flying over uncovered rivers is forbidden.
* Dominions, what with it being the universal grab bag of mythologies it strives to be. Krakens, bukavacs, void lords, you name it. Oddly enough, aboleth ones are just for show - guess you don't really need base, squick weapons when you can turn brains into quivering goo at will.
* Dominion Tank Police are called androids. However, Uni is the original, and Anna was actually cloned from her, suggesting a biological origin.
* Dominion Tank Police: Focuses on a division of Police who drive around Tankettes. They're more dangerous to the city than the criminals.
* Dominion Tank Police is kind of an object lesson in the problems with armored vehicles in urban combat. In particular the collateral damage.
* Dominion Tank Police is set in a dystopian city that's blanketed beneath a perpetual smog cloud. So its citizens have to wear masks to avoid inhaling the pollutants. But the bigger threat is the prevalence of cybercrimes which have gotten so out of hand, that it requires a police force outfitted like a small

battalion to deal with it.
* Dominion Tank Police manga and anime series - were revealed, close to the end of the original manga, as androids - Ostensibly 'love dolls', although they take offense at this designation. In the second manga series, their android nature was on the table all the time, even becoming a plot point on at least two occasions. Interestingly, in the anime the issue was ignored completely, even as an implication.
* Dominion Tank Police of fetish appeal when you find out that one of their features is to expel water to shrink to midget (cute) size. Could be for storage opportunity, but still...
* Dominion Tank Police should have super strength and military-grade targeting computers, but Anna and Uni probably have the excuse that their boss bought them the upgrades.
* Dominion Tank Police that flip over whatever was driving across them. They're very effective.
* Dominion Tank Police there's a scene where Brenten tastes some mysterious liquid, then is informed a moment too late that it's a urine sample. (The manga had no such gag, but it's exactly the kind of thing Brenten would have done.)
* Dominion Tank Police when the deploy order came, meaning that between scenes they left their vehicles and climbed up a flight of stairs just so they could slide down a rope to reach the vehicles they had just left behind. The one member of the cast who this action would actually make sense for (Leona, who wasn't in uniform when they got the deploy order, but was in her next scene), isn't in that footage.
* Dominion (the movie to which this show is a sequel), but the show is set 25 years after its conclusion.
* Dominion: The "Rats" card has the effect of trashing one of your other cards and replacing it with a Rats card. If you're not careful, they can clog your deck and reduce your chances of drawing something more useful.
* Dominion to be slaughtered, just to remind people of the danger... and when this results in a rampage and angelic attack on the city, he still sees things as a win, since people now remember the true nature of the situation they're in.
* Dominion War front against the Dominion while their Federation and Romulan allies found a way to get their ships functional again.
* Dominion War Martok is impressed by their audacity, even the Klingons never tried that.
* Dominique Dunne, who played Dana in the first movie, died in November 1982 at age 22, after being strangled by her abusive former boyfriend John Thomas Sweeney.
* Dominique Jackson, the first American TV show with a cast of primarily trans women.
* Dominique-Jean Larrey, the Crowning Medic of Awesome. He revolutionized medicine in the French Army during the Napoleonic Wars, invented the field ambulance (thus, by modern reckoning, beginning
* Dominique Trix can get blown up, flattened, burnt, deflated like balloons (but only in the Gamecube and Xbox releases), and more.
* Domino, based (very loosely) on real-life bounty hunter Domino Harvey. Unfortunately, it basically deletes or downplays all of the things that make Domino's story unique, and turns the character into a typical Hollywood cliche.
* Dominoes (Star Wars: The Clone Wars): Droidbait covers his armor in tally marks of everyone he's killed in combat. Eventually, his entire armor is covered in them.
* Dominoes (Star Wars: The Clone Wars): Slick, right before being killed by Ventress after betraying the Separatists.
* Domino falls down the elevator shaft in a cabin just like the ones used at the actual tower (though real ones don't have a speedometer on the floor counter). The whole scene was done with startling accuracy and the Stratosphere signed off on its name/identity being used all over the darn thing, giving it that too soon quality.
* Domino Harvey, whose real life story is significantly more unique than the cliche Hollywood turned her into.
* Domino Lady comics, Ellen's friend Lulu Chambers serves this role for Ellen.
* Domino Lady: Det. "Mad Dog" Morgan Verani provides Domino Lady with details of

cases he thinks she would be interested in.
* Domino Lady, Ellen fakes emotional distress as an excuse to go to the bathroom where she changes to her alter ego and sneaks out the bathroom window.
* Domino Lady, gangsters frame the Domino Lady for murder and she has to clear her name.
* Domino Lady knocks the crime boss Lester Musgrove out of a window in the radio station atop a skyscraper.
* Domino Lady leaves behind a literal one: a black card with white writing reading "Compliments of the Domino Lady".
* Domino Lady Lulu Chambers is married to gay movie director who is in a relationship with his favourite leading man. Lulu gets a rich and glamorous lifestyle, while her husband gets cover for his sexuality, which would be professional doom in the 1930s if made public.
* Domino Lady pulps, Ellen Patrick (a.k.a. the Domino Lady) wields a syringe full of knockout serum that seems capable of inducing instant unconsciousness no matter where it is injected.
* Domino Lady was her beauty, which often distracted and entranced opponents.
* Domino Mask: A type of mask that covers only the eyes and the area around them.
* Domino rarely holds on to wealth for a long time. In the series, where he discovers he has a daughter he did get $10 million for a good while but with his insane spending habits, he eventually lost that fortune. When he started his own mercenary outfit, his entire company got hit with this - they're superpowered mercenaries and quite a few had solid reputations including Deadpool himself at the time, money came in. But Wade is a lousy businessman and even worse intelligence gatherer, so his company's reputation soon plummeted and contracts were drying up.
* Domino Revelation: One revealed secret reveals another secret, which reveals another, which...
* Domino's brought it back in the late-00's with an ad campaign stressing realistic and silly things one can do in the thirty minutes while waiting for pizza. Of course, the small print indicates that the thirty minutes is not a guarantee due to the inherent danger.
* Domino's has ads about kids hating their specialty pizzas to advertise an added medium pizza.
* Domino's Pizza, formerly known as the cheap but cardboardy brand, completely overhauled their advertising in 2010, stressing that, basically, "yeah, our pizza sucked, but we're gonna do better from now on." One of its commercials includes a dramatic reading of complaints about the quality of its pizza, followed by claims that they're changing how they make the stuff. Surprisingly, this has proven rather successful; the new pizza is definitely seen as better than the bulk of the competition. They're doing the same with their cheesy bread.
* Domino's Pizza introduced the 'Noid, an odd claymation goblin in a red rabbit costume who makes it his business to stomp on pizzas.
* Domino's pizza is trying to avert this and have customers photograph their pizza for their advertisements instead of using any sort of fake food or camera tricks. They even had a site called showusyourpizza.com that was
* Domino Squad has two random named clones joining Mace Windu and Commander Ponds when they stumble on the titular beast and the show makes no attempt to specify which one got stomped on).
* Dominus Ghaul has a noticeable tendency to lightly clench his fists when stressed or pensive.
* Dominus Mundi The King Of Kings, a reboot of the above fanfic, the main religion of the wizarding world is a fusion of pre-schismatic Christianity and the general beliefs of the ancient Perennial cults. As such, while there are many deities around, they have the Abrahamic God as their primary deity, yet rarely referring to Him as Aion. The Aeneans also believe that His attributes are embodied in the group known as the Sacred Twelve.
* Dominus Mundi The King Of Kings fanfic, has the Graveyard, a by-product of the creation of time and standing in opposition to the Future. The Mandarin described it as the place where "time goes to die", and contains all events that occurred

before the main point of the timeline. It is stated that mortals cannot enter it, or they cease to exist due to the Graveyard's proximity to non-existence itself. It also seems to be impervious to the laws of physics.
* Dominus Mundi The King Of Kings: The Altantean Empire also serves as the precursor to all the modern civilizations on Earth.
* Dom Irerra talks about an elderly relative and says that "we lost her", then clarifying that she's still alive, his family just lost her. She's gotten so old that
* Dom Joly had a few sketches that involved trenchcoat-and-fedora wearing "spies" in
* Dom-Jot appears to be a cross between billiards and pinball, shooting a ball around an obstacle course with a spring-loaded cue.
* dom (literally "doom-chair") means "justice department" or "court". So if you are "doomed" in Sweden, it only means that justice has come to a solution in your issue.
* Dom Noble's is him being distracted by his two cats wanting attention.
* Domoverse: Amanda, who uses it to force-grow poisonous plants like poison ivy, and greenbriar, as weapons.
* Domoverse, by cultists trying to bring their god to Earth by powering their ritual with human sacrifice.
* Domoverse: Caroline runs into a tree when running with Dr. Chance while marveling at the sensation of seeing the auras of everything around her.
* Domoverse Caroline sees emotions and uses that to substitute for her sight.
* Domoverse: Glitch can project her mind into computers, and hack them, appearing as an angelic girl, reflecting her origins as a computer program.
* Domoverse: Ron, who turns into a girl over the course of several hours after getting hit by a car and his mutant power manifesting.
* Domoverse: The protagonist's idea of angels involve wings, and they're a permenant part of her digital form:
* Domoverse: The titular Master is interrupted having VR sex with the protagonist:
* Domoverse whose creations disobey the laws of physics. As said when referring to her:
* Domo Wilson, bisexual singer/songwriter and rapper and is known for the song "Bisexual Anthem" and other songs that discuss LGBT issues, mental health, and motherhood.
* Domprost of Oslo. Every Bishopry in Norway is known as a "bispedømme", actually the area where the bishop has jurisdiction. Translated into a "bishop`s doom area" it may sound more scary than it actually is...
* Dom sacrifices himself to save the rest of the squad that lasts until the Stranded leader Griffin refuses to let up on trash-talking the COG, resulting in Marcus totally flipping his shit:
* Domu failed to get into college for three consecutive years because he spends all of his time building model airplanes.
* Domu. He does nothing but lie around his apartment intoxicated and that's why his wife and son left him.
* Domu is completely filled with little trinkets that he has collected from every person he killed.
* Domyouji's mother Kaede is the rich bitch "villain" of the series. She is constantly throwing her money about to ruin the lives of Makino and those she knows to keep her away from the Domyouji family. Also, every girl in Makino's school is a rich bitch, excluding
* Don’t expect your allies to stick with you past the 2/3 mark or so, especially if you’re a stronger team. In season 10,
* Don’t Forget the Lyrics' "China Grove". Yes, it did appear within the game itself on one occasion.
* don’t steal monkeys and keep them in the house. It's reached the point where the family does the complete opposite of what he says the moment he says it.
* Don Álvaro, attended the opera's Madrid premiere (which Verdi conducted) and was not pleased with what he saw.

* Dona Flor and Her Two Husbands, where the titular Flor is the widow who is eventually romanced, and who has to learn how to open to love again. Of course, things become more complicated, what with the ghost of her first husband coming back...
* Donald and Douglas and The Flying Scotsman were very well received by Scottish people.
* Donald and Douglas get on with this too. "Love Me Tender" is one example.
* Donald and Goofy care throughout the first game; at the end of the first game, they get ready to leave Sora for good, never to see him again (
* Donald and Pluto. According to the opening titles, it's a Mickey Mouse cartoon, yet he is nowhere to be seen! (It can be assumed that it takes place in his house, but that's pure conjecture.)
* Donald Applecore egg that then explodes and destroys the entire apple orchard, leaving behind an extremely huge and extremely deep hole in its place, causing Donald to fall inside the hole and wind up in China upon falling out the other end.
* Donald A. Wollheim interrupts the game and the dwarf shoots him with a flashlight to quiet him so that they can resume the panel.
* Donald Bellisario said that unless it was dangerous Bakula would rarely use a double for anything.
* Donald Campbell's final transmissions from his Bluebird boat as he tried to break his world water speed record and died when his craft somersaulted over and crashed in 1967.
* Donald, cementing his place as one of the most famous cartoon ducks of all time.
* Donald Crease got kicked out of the CIA because he couldn't control his temper.
* Donald Crowhurst. It is believed that he eventually committed suicide by throwing himself in the ocean.
* Donald Crowhurst, whose mental state gradually deteriorated to the point of suicide during a solo round the world sailing race in 1969.
* Donald Duck (1901-2000). He got his own series in 1952, with Barks contributing stories to 1966. The titles have changed publishers several times but is still ongoing. Many other writers and artists have created Scrooge stories into the 21st century.
* Donald Duck, after being hit on the head by a flowerpot and becoming a famous crooner.
* Donald Duck. After falling something like 50 meters from the top of a sky-scraper, he lands on a pole, which cracks under his weight. Just when he's about to reach a window, a bird settles on his head and the pole breaks.
* Donald Duck alter ego named Paperinik. What are his most iconic and useful gadgets? Spring-loaded punch, paralyzing beam, and spring-loaded boots.
* Donald Duck, a man fires a gun at Donald, with a red, white and blue flag coming out. For Don the shot is as real as everything else.
* Donald Duck, an actor for the Wild West Show (according to Buffalo Bill, Scrooge actually came up with the idea!), the prospector, another stint as a sailor to pay the travel for Klondike, and the prospector again. After becoming rich he did the banker, directed a sawmill, armed ships, SOLD LEMONADE, and traveled the world to create and buy companies, mines and other things that would make him richer (including the ENTIRE STOCK MARKET in 1929), before settling in Duckburg. That's probably not even a complete list...
* Donald Duck and a Disney comic strip in the early '30s (featuring other barnyard animals) are basically footnotes in the duck's history.
* Donald Duck and a foreign Raj competing to build the biggest statue of Coot; it got to the point where you couldn't see the statues in their entirety from within the town borders.
* Donald Duck, and all Donald has is a nickel. The attorney for the defense says that Donald took his situation with grace and restraint. Cue Donald throwing one of his trademark temper tantrums.
* Donald Duck and Goofy. They had been partners years before they even met Sora, and they still have use of their bond, now that creatures of pure evil, led by a bunch of maniacs, are attacking.

* Donald Duck and his nephews in "Donald's Snow Fight". The nephews get covered in snow until they look like bowling pins, which Donald knocks down with a snow bowling ball. Donald gets not only snow but icicles dropped on him, making him look like a rhinoceros in a cage.
* Donald Duck and in some comics, is a pilot, so he may have picked up something from her).
* Donald Duck, and is only saved from a merciless pummeling when he accidentally discovers Pete has a (literal) glass jaw.
* Donald Duck, and Jones had just ordered the most expensive pizza on the menu. Donald did not in fact make it in time, but the joke was ultimately on Jones — he hadn't checked what ingredients went into that type of pizza, and the special pizza sauce turned out to be a substance he'd previously been revealed to hate.
* Donald Duck and laughed in the face of the Grim Reaper just to brag that "Donald Duck LAUGHS in the face of Death."
* Donald Duck and makes Bum Bum as lucky as Gladstone Gander in the span of a few days. Donald immediately goes crazy and tries to get the hat back. At the end, the hat is lost and they tell Bum Bum the classic "the luck was all inside you all along" stuff... except we then see a street artist picking up the lost hat and immediately getting the luck.
* , Donald Duck and Scrooge find the tomb of the eponymous seer and Donald tries to translate the text written on the grave:
* Donald Duck and the Gorilla" has an aggressive gorilla escaping from the local zoo and breaking into Donald's house, attacking him and his nephews.
* Donald Duck angry uncle lest he get a spanking himself! At least one comic has both happen at the same time, with the triplets fleeing a stick-wielding Donald who is at the same time fleeing a cane-wielding Scrooge.
* Donald Duck animal which transforms their disintegrator rays into laughter-inducing rayguns. These prove highly effective in debilitating the pirates.
* Donald Duck. A pelican keeps blowing out the candle in a lighthouse's light, and Donald promptly re-lights it. After a few rounds of this, the pelican takes the lighter from Donald and re-lights the candle, causing Don to blow out the candle.
* Donald Duck appeared in a series of cartoons where he served in the army starting with the cartoon, "Donald Gets Drafted".
* Donald Duck appeared on "How to Have an Accident in the Home" and "How to Have an Accident at Work". What makes these ones different from Goofy's is that instead of a faceless narrator, we have J.J. Fate, a fantastical duck dwarf.
* Donald Duck". A seagull looks at Donald's hat, so Donald moves away, the implication being that the seagull wanted to poop on the hat.
* Donald Duck (as he's a pig, natch). Sandham was a janitor in an oatmeal porridge factory who gained his powers when he was accidentally exposed to a procedure to "remove those nasty lumps from oatmeal porridge". Donald ends up having to dissolve him with it, and finally tosses his head, the only thing left of him, into a vat of porridge.
* Donald Duck as his advertising slogan. Not only his sales plummet, but he soon gets visited by the furious mayor, who gives him "the biggest fine ever". Cue Rockerduck screaming when he looks at the amount to pay.
* Donald Duck, because his nephews are so slow at catching up on his urgent plans. First, he asks them to gather winter clothes, and they just ask why they need them in midsummer. Then he explains that they are going to Labrador. Cue this dialogue:
* Donald Duck - "before" was a duck (one of Donald's friends) while "after" was a human.
* Donald Duck called "Early to Bed" where his bed seems to conspire with the rest of his bedroom furnishings to keep him wide awake.
* Donald Duck can clearly be read, without reading in in the unintelligible voices of Clarence Nash and Tony Anselmo. Curiously Rosa himself defied this, claiming he never wrote Donald's dialogue envisioned with the original Disney voice.
* Donald Duck cartoon, Donald's encounters with a gorilla named Ajax are accompanied by advice given on the radio on dealing with Ajax.

* Donald Duck cartoon "Grand Canyonscope" has Donald and a mountain lion cause a landslide that fills up the Grand Canyon. The cartoon ends with Ranger Woodlore making the both of them fix it by digging up the whole canyon again.
* Donald Duck cartoon in a unique way: Donald enters a boxing match and, at the sound of the bell, comes out swinging punches. However, he is revealed to be ineffectually hitting the ref. The ref then points him at his opponent, who is roughly on par with a Greek Titan in terms of size and strength compared to Donald.
* Donald Duck cartoon in which he's a gift wrapper in a department store. He puts a small ring inside a large box, then tries to put a football in the box meant for the ring. He has to deflate the ball in order to fit it in.
* Donald Duck cartoon "The Flying Jalopy", the villain cuts the fuel line of Donald's airplane and lights the trail in midair, which Don then tries to outrun.
* Donald Duck cartoon "The Plastics Inventor", released in 1944, just as plastics were becoming mainstream. Following the instructions from a radio show, Donald makes a plastic airplane by melting down random junk and pouring it into a mold, then baking it. The finished plane flies like a dream, but there's one drawback: it's not waterproof. As soon as Donald flies into a downpour, the fuselage starts melting away.
* Donald Duck comic artist Kari Korhonen has put Grandma Duck in this role.
* Donald Duck comic, Donald finds out that to get the job he wants, he has to be married, so he proposes to Daisy. She is very touched at first until he tells her the reason which pisses her off and makes her throw him out.
* Donald Duck comic featured a character apparently known as Lawsuit Joe, who makes a living by throwing himself in the path of slow-moving cars and suing the drivers.
* Donald Duck comic has a "doctor" get Donald out of a difficult situation with Daisy by flashing his card. As Daisy points out in the very same panel he shows it, it's a subway ticket, but by then the man is already gone, taking Donald with him.
* Donald Duck comic has Gladstone Gander trick Donald into believing the ball he and Daisy will attend is a costume party, and that Daisy wants him to dress up like a gnome (in hopes that Daisy, when seeing Donald in costume, would be so ashamed of him that she would ditch him in favor of Gladstone). Unfortunately for him, Daisy finds out and to simultaneously get back at him and make Donald feel less ridiculous, she TOO shows up in a gnome costume.
* Donald Duck Comic magical or not — though all the granted wishes were easily explained away by coincidences, the fact remained that all the wishes did, after a fashion, come true.
* Donald Duck comics "Archimede e la spedizione all'eurekannone" has the characters head to a land inhabited by a tribe that is responsible for creating brilliant ideas and spreading them all over the globe. These ideas, it turns out, all look like light bulbs when in physical form.
* Donald Duck comic series by Silvia Ziche, "Il Papero Del Mistero" (Duck Mystery). Scrooge McDuck wants to renew his TV channel's program so he employs the whole Duck and friends family to star in a soap opera with an over-the-top plot based on improvisation.
* Donald Duck comic set in the Wild West had Sheriff Donald repeatedly mocked by his nephews for his feeble horse, which snorted in tired protest whenever required to do anything at all. Donald, for his part, insisted that the horse wasn't feeble, it just had hay fever.
* Donald Duck comics he originated in, Scrooge McDuck had to be turned into a more heroic and sympathetic character when he began starring in his own spinoff title (though even in his own comics he always remained something of an antihero).
* Donald Duck comics) makes them much less sinister than many of the example of this trope.
* Donald Duck comics story "The Head of Rama Putra", Donald's nephews cut him loose from a hanging vine that had entangled his leg. Don ends up landing head first on a rock, and as Huey, Dewey, and Louie check on him, he babbles "Yes, Mr. President, I got the license number of that broccoli... it wasn't armed..."
* Donald Duck comics the comics have, there's just nothing stopping the poor duck from either:

* Donald Duck comic story, Donald scolds his nephews for using his power tools to try and make a birdhouse, saying that one has to be careful around power tools. However, he's so distracted saying this that he does something so bad to his hands that all we see is his shocked expression and his heavily bandaged hands.
* Donald Duck comic story, "Super Snooper Strikes Back". Donald gains temporary superpowers, and tries to prove it to his nephews by running around the world super fast. But he soon realizes that his super-speed manifests itself by making everything else seem to stand still—so, even though the trip might seem fast to his nephews, it will still be incredibly long and boring to him! He decides to come up with a different test.
* Donald Duck comic story thwarted by shovel-whacking. The ad still ends up attracting thousands of customers.
* Donald Duck comic, the nephews cause the Duckburg supercomputer to go haywire, resulting in this kind of weirdness happening all over town: radio songs come from toilets, TV sets flood, etcetera.
* Donald Duck comic. When Donald refuses to reveal the location of Scrooge's money vault among the four dozen he had built, they grab a blank tax form and start filling it out for him, putting down the kind of income that, well, Scrooge would be familiar with. He caves in after that. Fortunately, after Donald explains the situation (once the vault is emptied) and gets Scrooge to stop killing him, Scrooge starts dynamiting the other vaults... where it turns out the Beagle Boys had stashed it.
* Donald Duck comic, where Gyro Gearloose has built an FTL-capable spaceship. (Something which happens somewhat regularly.) When asked how it works, he replies that it transforms the ship's particles into tachyons for the journey... prompting Hewey to mention that he thought the existence of tachyons to be merely theoretical. "Oh, they didn't exist until I invented them." was Gearloose's reply.
* Donald Duck constantly has to prove his cultural capital to impress Daisy. Then again, sometimes Daisy will admit that the theatre shows she brought Donald to are boring...
* Donald Duck, Daisy persistently tries to snare eligible bachelor Donald - at one point flailing in a pond in a park crying for help. When he obliviously walks by, she stands up in a huff in the shin-deep water.
* Donald Duck details, the legend derives from a complete misunderstanding of a 1977 political blunder; Helsinki councilman Markku Huolopainen had proposed that the financially troubled city stop buying Donald Duck comics for youth centres, but when he ran for Parliament the next year, his opponent spun this into trying to "ban" Donald Duck (and went on to beat him in the election). Some Finns did write letters to the Donald Duck magazine on the subject decades earlier, but the magazine put it to rest by publishing a picture of a ridiculous-looking duck with pants.
* Donald Duck doesn't have a belt, but he'd often chase his nephews with a stick. Used to, anyway. This is practically nonexistent in the modern strips, and these days the boys aren't in need of this kind of treatment anyway, being usually more competent and mature than their uncle.
* Donald Duck) does this to Donald's nephews, Uncle Scrooge and finally Donald himself, locking them all out on a battlement.
* Donald Duck", Donald adopts a black coat and hat when he starts imagining himself as a criminal.
* Donald Duck Donald back to his original characterization and managed to tone down his obnoxiousness.
* Donald Duck", Donald briefly imagines himself as a millionaire after Daisy calls him a "big shot", complete with top hat, monocle, and posh outfit, before the narrator points out what stealing from his nephews really makes him: a gangster!
* Donald Duck", Donald climbs the stairs of a skycraper to escape the law, and with no way out, jumps off the roof onto another building. Just barely—the bricks he tries to grasp give way one after another until he can climb back up.
* Donald Duck. Donald Duck and Fethry Duck are secret agents with a collection of nifty gadgets, including one such a ball.

* Donald Duck", Donald falls into Old Faithful Geyser just as it starts to erupt. His nephews try to plug up the geyser with rocks, but they just get sent up to hit him. Finally they throw a boulder big enough to plug it... for a moment.
* Donald Duck". Donald is leading his nephews on a hike. He orders a stop, but the last nephew is distracted and knocks the others over like dominoes.
* Donald Duck: Donald's theme tune: "Who's got the sweetest disposition? One guess, that's who!"
* Donald Duck. Donald taunts the man for his superstition and feels lucky that he got the last ticket. Unfortunately, seat no. 13 is revealed to be the seat behind the column.
* Donald Duck, Donald tries to blow up Chip and Dale's tree with dynamite, but they put the sticks out and trick Donald by popping a bag to simulate an explosion.
* Donald Duck, Donald tries to claim he knew it all along (rather than being terrified out of his wits while Huey, Dewey and Louie single-handedly solved the mystery themselves). His nephews are not amused.
* Donald Duck, dreams that he is a bumbling Nazi mook driven mad by working in a munitions factory, where he is required to heil at every picture of Hitler. This is enforced by an armed oom-pah band.
* Donald Duck episode "The Town Where Everyone Was Nice". His terrible singing was too much for the plant to take, killing it.
* Donald Duck exist some decent stories that feature an actual mystery of this sort as well.
* Donald Duck fail spectacularly and run off with the investor money. (If the movie doesn't fail, the duo will owe the investors 753% of the movie earnings.) In order to ensure a flop, they sabotage every part of the filming process that they can. This includes hiring a completely inexperienced woman for the title role, not buying vital equipment, and employing Donald (who they believe is a huge, incompetent idiot) to do whatever needs to get done, so that he'll mess things up. Unfortunately for the film makers, Donald turns out to be excellent at all his duties... Except for when they make him a cameraman. When it's time to film the big, epic battle sequence, Donald's job is to film it from above, from the top of a pyramid. But he's exhausted from all his hard work, and sleeps through the entire shooting. And this was his only chance—the scene can't be re-shot. Then he's supposed to cut the scene, but decides that it doesn't work without the perspective from above. But one of the film makers arbitrarily re-cuts the scene while Donald is asleep, as a safeguard in case Donald turns out to be a decent editor. By pure chance, the arbitrary re-cut works excellently, and the scene ends up getting praised by critics, making the movie a huge success.
* Donald Duck, features Uncle Scrooge selling hair tonic to the "Chillyboot Indians", which actually causes baldness. Donald later returns with a hair tonic made by Gyro Gearloose; that one works too well.
* Donald Duck fridge-raiding. Pour on the food a drug that made the users' faces green. When it was Donald and not the nephews who had a green face, Donald finally realized he was the one eating the food.
* Donald Duck gets a passion for electrical work. This results in him trying to connect all the electrical appliances in his house together. After the expected massive short circuit he sits smoking on the floor with a melted screwdriver in his hand, and Uncle Scrooge, who was on his way to visit, comes up to him.
* Donald Duck going in circles, only by then, he's created a circular trench around the rock.
* Donald Duck: Goin' Qu@ckers, keeping in contact with Donald and guiding him throughout the game.
* Donald Duck: Goin' Qu@ckers (PS1 and GBA versions, Ubisoft Shanghai)
* Donald Duck: Goin' Qu@ckers, who passed away the year the game was developed.
* Donald Duck got his fifteen minutes of fame by (unwittingly) polesitting the smallest pole in the world, they misprinted his name as "Roland Dunk".
* Donald Duck, Gus takes a straw and sucks up a line of peas across the dinner table. Donald takes a straw of his own and tries to suck up the last pea, and the two engage in a tug-of-war until Gus traps the pea in a teapot.

* Donald Duck had Donald in the studio while the writers are storyboarding his next cartoon. Each of the writers keeps adding in things they think should be in the cartoon (like the nephews and Chip N' Dale) to the point where there is no room for Donald in the cartoon. Donald proceeds to blow his top and start screaming at the writers.
* Donald Duck has been on the receiving end of this several times in golden age Disney shorts.
* Donald Duck has done this to gifts his nephews got for him, partly due to some of the underhanded trickery they pulled off in order to get the gift in question.
* Donald Duck has found himself on the receiving end of this more than once.
* Donald Duck" has him trying to tear away his wanted poster, but reveals another poster underneath with a higher price on his head. Donald keeps tearing off until the zeros go past the poster and into infinity.
* Donald Duck. He is actually sitting on the fender on the other side.
* Donald Duck, however, we never get to see the invasion-fleet show up, but presumably, they'd be in for a nasty surprise...
* Donald Duck in Duckburg so he can get a job at an arctic mining station. Sure enough, it turns out that it's actually part of a smuggling operation that Donald has to dismantle.
* Donald Duck. In his more dramatic moments, you can sense the inspiration from the Batman himself.
* Donald Duck: In "The Secret of the Dragon's Den", an adventure story by Ron Fernandez and Patrick Block, a warrior, his beloved, and his dog are all thawed from a block of ice centuries after having been frozen there. They immediately come back to life with no ill effects.
* Donald Duck: In the war short "The Old Army Game", Sergeant Pete yells this when he thinks Donald got cut in half after he threw him (in a box) onto some razor wire.
* Donald Duck is a stone age duck who ended up in the present, much to her disgrace.
* Donald Duck is clumsy, dim but strong willed, and very temperamental.
* Donald Duck is outfitted with an army uniform several sizes too big, which is doused with water and shrinks until it fits.
* Donald Duck is the victim of this in the Disney short "On Ice" (1935), losing his sweater as it doubles as a makeshift kitestring.
* Donald Duck "Lucky Numbers" made Huey, Dewey, and Louie into teenagers for just one short, as the plot required the trio to be able to drive a car.
* Donald Duck makes him a bank robber, and he worries about becoming a social outcast who has to hide out in the dark corners of the underworld.
* Donald Duck — 171 theatrical animated shorts between 1934 and 1968.
* Donald Duck/Mickey Mouse cartoons and replace the main characters with José. Since they made sure to only use English stories that weren't localized yet, it sort of worked, at least if you ignore José acting out of character or interacting with characters he doesn't normally interact with (such as Goofy).
* Donald Duck miserable life when his new in-laws also move in. After waking up to see that it was all a dream, he frantically runs from her house and joins the Foreign Legion to escape his potential fate.
* Donald Duck (more prominently in PK2), Agent Kay K and his friend's love interest, Stella, from their respective comic both flirt with him a little or praise him. And he doesn't quite know what to do with the attention.
* Donald Duck, of all things, features this as its story. Donald tries out for a singing competition organized by a renowned musician, and gets successfully recruited by having his voice altered by an apparent twin of this musician. It's later revealed that the entire world is actually the dream of Ar-Finn, a primordial cephalophoid monster which slumbers in the ancient city of Sp'too at the bottom of the sea. The two twins are manifestations of the monster's conflicting subconscious desires to either continue sleeping or wake up (which Donald's voice will make it do). When the creature does exactly that, the rest of the world vanishes as it no

longer creates the world-dream, and everything in its vicinity shapes itself into its image, resulting in Donald and his nephews growing tentacles and stick eyes. It's eventually put back to sleep, but the story ends on a rather dark note as Donald contemplates everybody's existence as mere parts of the creature's imagination.
* Donald Duck of the bug, and set up the entire mission so the Beagle Boys would be distracted from the real diamond coming in from elsewhere. Of course, Donald and his nephews had no idea of this scheme, and were a little sore that they busted their tail feathers for almost nothing.
* Donald Duck of the restaurants stars, and the man in the suit turns out to be just a traveling salesman.
* Donald Duck once took a job as a messenger and the first person he delivered a message to was so furious she started throwing stuff at him. It wasn't the matter of the news being good or bad. She just hated the sender and took it out on Donald.
* Donald Duck on him. However, the Ranger appears and gives Donald back the hose, leading to a round of hot potato that ends with all three soaked.
* Donald Duck, placing Donald in "Nutziland", where everything is shaped like Swastikas or Hitlers Face (Der Führer's Face). He has to work really hard for the Führer, and everybody is clothed in Nazi Uniforms.
* Donald Duck refused to loan Mickey out; in still another (thought to be the most likely) version, Walt was willing, but his brother Roy pointed out that their studio was in debt at the time and could not afford "to be making cartoons for other people."
* Donald Duck sees them firing candy balls through a phone. Donald tries to turn the tables by placing a stick of dynamite inside and calling them, but they don't pick up... and trick him into answering his phone again just before the explosion.
* Donald Duck short "Bellboy Donald", Donald has to put up with a sadistic little kid while being threatened with termination if he lays so much as one finger on him. Once he has been pushed way beyond the brink of tolerance, Donald accepts his firing with manic glee and begins spanking the living hell out of the brat.
* Donald Duck short "Canvasback Duck," with a small boy at a fair really being an adult anthropomorphic dog in a boy suit and mask.
* Donald Duck short '"Donald's Diary'', Donald carves a heart on a tree for him and Daisy. The scene then cuts to the opposite side of the tree, revealing carvings from Daisy's past boyfriends.
* Donald Duck short from 1944, "The Plastics Inventor," in which Donald follows a radio announcer's instructions to create a plastic airplane. By baking it. In his oven. Not a toy airplane, a life-size one that actually flies... at least for a while. Somehow Donald makes the plastic base material for plane-baking by combining a bunch of random garbage. Even stranger, it melts in water.
* Donald Duck short "The Riveter" has Donald work as a construction worker, and incurring the wrath of his boss after his jackhammer goes out of control.
* Donald Duck short "Wide Open Spaces", Donald inhales a huge amount of air ballooning his own body to blow up an air mattress.
* Donald Duck short "Wide Open Spaces" ends with a wobbling tree branch pounding onto the pump attached to Donald's air mattress, which floats up in the sky as it expands.
* Donald Duck show up to save kappa from the villainous tengu. They quickly realize the samurai is just Donald Duck in disguise...after they see him running away in panic in Donald's distinctive way.
* Donald Duck's mother and sister and Scrooge's parents, and Scrooge has two sisters, a brother and a half-brother making regular appearances. His mother got around.
* Donald Duck's nephews, Huey, Dewey, and Louie in Carl Barks' comics. In one story they are in kindergarten; in another they are shown driving a car! (The "kindergarten" they are attending is a rather unusual one, however; in the background of the first panel, there appears to be an
* Donald Duck's sane ideas never work, but the crazy ones do. He demonstrates again and again that his crazy ideas do indeed work. For example, the above statement was

a comment on Donald taking a mouse and bug spray to go after an armored man armed with swords, muskets, and a cannon... And it ended with his foe completely unarmed and unarmored while Donald is training his own cannon on him.
* Donald Duck's superhero/antihero alter ego, had many different interpretations:
* Donald Duck's superhero/antihero alter ego), where our hero switched from a M1911 handgun to a multiuse pistol that included, among other functions, a disintegrator ray. Considering it was wielded by the infamously irascible Donald Duck, it's a miracle he never used it on people before switching to a paralyzer-only gun.
* Donald Duck still looks exactly like him, though, and is still covered by the agreement.
* Donald Duck stories had the titular duck discovering a previously unexpressed aptitude in some obscure field, like counting objects or instrument playing. Gyro Gearloose also qualifies as this.
* Donald Duck story. He and his nephews go to a foreign country and the nephews climb a wall. On the other side of the wall, a furious man calls their attention to a sign at the top of the wall and asks if they can't read it. As the sign is written in the country's language instead of one they knew, the nephew who answers truthfully says "no". (The wall is so high nobody would be able to read the sign without climbing it first.)
* Donald Duck story, Indian Ghosts suddenly appear in Donald and the boys' house (after Donald made a huge short circuit by wiring all household appliances on one plug hole). Subverted, as the boys first think it's a case of ole' Indian burial ground, but it turns out, that it's an ancient Indian relaxation spot, and they find the house comfortable.
* Donald Duck story "Paperino e la voglia irresistibile", Donald falls prey to Uncle Scrooge's prototype subliminal advertising. The advert causes him to become single-mindedly obsessed with getting a bottle of drink, with blatant disregard for any property damage he might incur on his way. Donald's nephews turn the tables on Scrooge by showing him a prepared tape which convinces him to give them a thousand dollars each, thus giving him a lesson.
* Donald Duck. That, and the expense of using such a phone, were among the reasons that Donald and Daisy gave up on using it.
* Donald Duck, the Beagle Boys steal money from Scrooge McDuck, but don't notice the new money paper is razor-sharp until they dive into a pile of it. When they get arrested, they taunt the police by saying: 'You'll never find where our hideout is!' but they soon retort with: 'That's easy, we'll just follow the drops of blood.' and point to a blood trail nearby.
* Donald Duck", the moose is voiced by the film's director, Jack Hannah, while the usher is voiced by writer Milt Schaffer.
* Donald Duck. This quickly gets him into trouble when people start seeing him as rude or potentially insane, even going as far as to ask him to sleep in the forest so he doesn't bother his neighbors with his loud laughing. When Donald finally gets a chance to tell his joke in a TV show about best jokes, his inability to tell the joke without laughing ends up disqualifying him due to his time running out. The host finally suggests that Donald just write the joke down. Donald does so and then hands the paper over to the host. Upon reading it, the host concludes that it's actually a really old joke that everyone knows. Cue everyone laughing at Donald's misfortune.
* Donald Duck, though many family members were introduced later on in the comics.
* Donald Duck time travel stories generally uses this rule, at least in the sense of characters having a limited period of time to hang around in the past. Sometimes it's justified by the time travel mechanism; the machine didn't actually travel with them, but just sent them to a time and location, so they had to prearrange a time when the machine would pull them back to the present.
* Donald Duck to do his bidding. Instead of pay, he usually promises to cut a meter off the list.
* Donald Duck to get away with really stupid crimes (like stealing one certain kind of sandwich), just to piss off police and the judge. However, it backfires because the judge later finds other loopholes that make them guilty anyway (stealing that

one kind of sandwich is not a crime... as long as you don't eat it before dusk).
* Donald Duck to this Voodoo priest who then sent said Zombie after him.
* Donald Duck tries to fly away from a rogue airplane ride, but it ends up not working at all, and he still plummets. By that time, his arms/wings were already anthropomorphic enough that they clearly weren't wings anymore, though.
* Donald Duck until the 90s when a male voice actor was brought in to sound more accurate to Tony Anselmo and Clarance Nash's Donald voice.
* Donald Duck used to be a rather successful Casanova before falling for Daisy and is still good at (unwittingly) attracting ladies in spite of being completely faithful to Daisy.
* Donald Duck" was originally titled "Donald Duck in Nutzi Land", but was changed when the song became a runaway hit (though some people call it "Donald Duck in Nutzi Land" regardless).
* Donald Duck were much more mischievous and aggressive in their earlier appearances.
* Donald Duck where a municipal government or a board for/of youths decided to stop their order of the comic due to their poor financial situation. They had joked that the reason was because of Donald not wearing pants, but that's all it was: a joke. One that got picked up by some foreign (as in not-Finnish) newspapers as fact and it continues to spread from there.
* Donald Duck where Donald made the wish that he were alone without all his friends who were annoying him. No points for guessing he didn't like it when the wish came true, though there was more to the plot than that.
* Donald Duck, where he and the nephews go camping. Donald puts ketchup on himself to get his nephews thinking he's severely injured, but gets bandaged up from head to toe, as is typical of those shorts.
* Donald Duck which of course doesn't detonate by shock, it needs a triggering explosive to go off.
* Donald Duck while attempting to show the audience her karate skills. Moments later, he is completely bandaged up.
* Donald Duck who is also stated to have died years before the story, and the second story introduces the figure of Dolly Paprika, Fantomius' lover. Fans have interrogated themselves on their story for years, until they got a series about their adventures... But where did they disappear to still remains a mystery.
* Donald Duck, who learned how to do the voice from the original VA himself, Clarence "Ducky" Nash.
* Donald Duck who used a homemade jetpack to rob a bank. To prove Donald's innocence, Huey, Dewey, and Louie suggests to the police to put him and the doppelgänger through an intelligence test. Donald visibly struggles with the test, while the doppelgänger aces it, leading the police to let Donald to go as he, quite a bit to his humiliation, simply was not clever enough to could have pulled off the heist.
* Donald Duck with retold classics, movie and music references and the like, providing lots of kids their first contact with Greek myths, Shakespeare's plays, classical history, etc.
* Donald Fagen's song "I.G.Y. (What A Beautiful World)" deliberately invokes Zeerust, depicting a world where the US definitively won the space race, computers are benevolent overlords, and everyone wears spandex jackets in a world with perfect climate control.
* Donald Fauntleroy Duck shows him running up a giant pachinko machine head-first, plowing through every steel peg on the way up.
* Donald F. Glut has stated in many interviews over the years that he had little regards for his work as a writer for 80s cartoons (the
* Donald F. Glut is a screenwriter (children's television) and director (exploitation films), but is best known for having written the novelization of
* Donald Gennaro, after abandoning the Hammond children in a car to go hide in the bathroom when the T-Rex shows up, gets the ignominious honor of being nommed on the toilet after the
* Donald Gets Drafted, for example, actually satirized how the real condition of

enlistment and training compared to the glamorized propaganda by mocking Don's awful experience in boot camp after being enticed by military recruitment.
* Donald Gets Drafted (said to have inspired the "Disney bomb" bunker buster).
* Donald Glover as direct inspiration, who in turn became one of the most popular characters introduced in the 2010s.
* Donald Glover episode had Glover hosting and Gambino as the musical guest.
* Donald Glover had this moment when talking about Shaft in his special, "Weirdo"
* Donald Glover, he also does stand-up and did a Comedy Central special in 2011.
* Donald Glover (Troy) takes the opportunity to demonstrate his skill at rapping.
* Donald himself had a long-suffering guardian angel who put up with all sorts of abuse from her devilish counterpart until she got fed up and a
* Donald in Maui Mallard a surprisingly creepy game about the short-tempered duck. Die and you're treated to a scene of him getting dragged into hell by a demonic hand. Dramatic enough to make a native hold his wig as a sign of respect, but not dramatic enough to stop him from simply shrugging it off a few seconds later and happily moving on with his life.
* Donald in Maui Mallard feel and Maui's prose in the game's manual and cutscenes befit the genre.
* Donald is addressed as "Seaman Duck," yet wears a (upside down!) petty officer third class crow.
* Donald is one of the nastiest characters in the story, and his blood-red eyes combined with paper-white skin give him the appearance of a vampire.
* Donald is so unlucky that he cannot even capitalize on it (winning the "Unluckiest Man in the World"-contest, working as a
* Donald Kingsbury is about a generation ship whose captain uses a time-stretching field to live for "centuries" while generations toil and die on the ship itself; the society comes to worship him eventually.
* Donald Kingsbury, the overclans are all priest clans, ruling by religious right. Basically, the whole world is a theocracy, although given the harsh conditions of survival on Geta, a fairly pragmatic and not-very-hierarchical one.
* Donald McBane was regarded as the best swordsman of his century. A career soldier, he participated in over two dozen battles and fought over 100 private duels. He also fought 37 times as a
* Donald Moffitt's, the Cygnans speak a complex musical language based on absolute pitch of a tone instead of the relative pitch.
* Donald Morgan, Harry's old parole officer who would have killed him without much guilt on the matter, fell into this category; she knew Harry was likely stashing him somewhere. This all started when he was sixteen years old and his actions led to a young man being killed by a supernatural monster that was stalking Harry just because it could.
* Donald Na is to be believed then he's also loyal, kind, talented, and just overall perfect.
* Donald Oberman, meanwhile, takes the "rich dad who bails him out" part to new heights; His father is the
* D.O.N.A.L.D. or so), but the "book" he saw in his vision was really a kind of smartphone, and its pages were more like wiki pages - but since those didn't exist on Earth at that time, he drew a book instead.
* Donald P. Bellisario, includes the former naval officer's Vietnam Marine buddies T.C. and Rick.
* Donald P. Bellisario of his family both before and behind the camera.
* Donald P. Bellisario) tend to be more than appreciative of his other shows. And much of the talent, both in front of and behind the camera is recurring.
* Donald P. Bellisario when scfi-nut Bud sees Bellisario's star on the Hollywood Walk of Fame:
* Donald Pierce and his Reavers play with the trope rather than playing it straight: Pierce is one of the first
* Donald Pierce is at willing to be civil to Wolverine and other mutants and even expressed respect for the former. The comics character is an egotistical
* Donald Pleasance's killer wine connoisseur from "Any Port In A Storm" was

nothing if not this. His murder was a crime of passion, committed because his brother was going to take away his vineyard - the only place where he'd ever felt truly happy.
* Donald Pleasence, and even then his face is only revealed for less than a half-hour.
* Donald Pleasence had spent time in a German POW camp during WWII. When he tried to offer director John Sturges advice based on his experience Sturges told him to keep his "opinions" to himself. Once someone explained Pleasance's background to him Sturges quickly started asking Pleasance for technical advice.
* Donald Pleasence was released, where he reprised his role as Dr. Loomis a final time.
* Donald Rumsfeld adopts an uber-right wing and hyper-capitalist ideology, becoming an impoverished backwater and a pariah state.
* Donald Rumsfeld (played sprint football in college, followed by a long career in politics and US government service)
* Donald Rumsfeld (R-IL): U.S. Secretary of Defense (2001–2006, 1975–1977), White House Chief of Staff (1974–1975), U.S. Ambassador to NATO (1973–1974), U.S. Representative from Illinois's 13th district (1963–1969).
* Donald's court martial more resembled a Captain's Mast/Non-Judicial Punishment Hearing (or Admiral's Mast one supposes), and is still pretty off. He had no JAG lawyer present, no JAG judge presiding, no jury. And to nitpick, a trial for treason would probably take over a year to put together, and he would have been put in the brig probably for close to life, not merely busted down and booted from the service.
* Donald's Crime", Donald briefly turns into a skunk when he's about to steal his nephews' money to go on a date with Daisy.
* Donald's Decision (the conflict between Donald's inner angel and devil).
* Donald's Dilemma chronicles Daisy's breakdown after her boyfriend Donald leaves her, all played humorously. One part shows her almost attempting suicide. Not only does she have a gun to her head, but she's also prepared a noose and has a bomb, knife, grenade, and bottle of poison on the table in front of her.
* Donald's Dilemma" when Daisy manages to get Donald's squawky voice back while he's crooning for his audience.
* Donald's Dream Voice, just replacing the autograph paper with bills.
* "Donald's Duck": a tiff between Duck and Donald starts a playful prank war between the railwaymen. First Duck's crew leaves a duckling in Donald's tender — and the amused crew keeps her around as a sort of pet. Then Donald's crew leaves an egg under Duck's bunker at night, and Donald insists he laid it. This is enough to make Duck laugh and tell Donald he's won.
* Donald's iconic temper tantrums in the original shorts and comics often were targeted at the triplets. However, given how it would provide bad vibes of
* Donald's not in it, but a later story had Daisy writing in her diary about being determined to stick to her diet, naturally everything she then sees or hears (or smells) is solely about delicious food. In desperation, she finally locks herself in her room to avoid temptation... then gives up and bites a chunk out of her notebook in frustration.
* Donald's Penguin 1939 Donald Duck thinks that his penguin pet Tootsie ate his pet goldfish and spanks her bare bottom until it turns red. When he sees the fish are still there, he feels ashamed.
* Donald's Snow Fight 1942 Donald Duck launched an ice missile at Huey, Dewey and Louie that splits their flagpole into 3 parts spanking the nephews' feathery butts.
* Donald Sterling, the former owner of the NBA's Los Angeles Clippers, was thrust in the center of a scandal in April of 2014 when audio was leaked of him asking his girlfriend not to "bring black people to Clippers games", amongst other things. Having already been accused of racism in his capacity as a real estate mogul, once the NBA authenticated his voice, they decided to ban him from setting foot on NBA property for life, and removed any and all authority he held over the team. (That said, they had to force him to

* Donald Sutherland, Dale Dye, was a captain in the Marine Corps. He has made a secondary career out of playing military officers.
* Donald Sutherland for this reason. He was so sure the film would flop that he took a straightforward salary over a percentage of the profits. This turned out to be a very poor decision.
* Donald Sutherland says he only needs glasses for a few things, like "reading, driving, seeing movies, walking..." He nonetheless passes the NASA eyesight test by memorizing the letters: "I may be blind, but I have a perfect memory!"
* Donald Sutherland. This made director Philip Kaufman nervous because the catwalk at the pod factory was nearly 50 ft up in the air and there were very real explosions. In fact, Sutherland barely missed one of them; an extra, however, missed his cue and was injured by it.
* Donald Sutherland to director Gary Ross so he could be cast as President Snow, having seen the script by accident and being moved by the character.
* Donald Trump, accusing him of abuse of power. While it passed on mostly party lines, one notable dissent was Hawaii Democratic representative and 2020 Presidential hopeful Tulsi Gabbard, who voted "present" instead of "yes" or "no". She reasoned that the entire impeachment ordeal with purely political and that the voters should decide if Trump should go or not. Making matters worse was that she attempted to introduce a bill that would instead censure Trump rather than impeach him. Liberals and conservatives both called her out over this, feeling that she was trying to suck up to the other side at best or that Hillary Clinton's accusation of her being groomed by Republicans as a spoiler candidate, like Jill Stein was in 2016, might have some merit to it. Ironically, Gabbard’s favorability numbers fell precipitously afterwards with Democrats, potentially harming her ability to serve as an effective spoiler.
* Donald Trump amused by this show of bad faith and promptly got the lawyer to respond with a more straightforward "yes".
* Donald Trump appearance online. Public outcry over his presidency has included calls for the rescission of his Hall of Fame membership.
* Donald Trump avoided serving in Vietnam thanks to a medical report that he had bone spurs in one of his feet... written by a doctor who was a tenant in a building owned by Trump's father. Trump has demonstrated no ill effects from said spurs before or since, and hasn't been entirely clear on which foot was affected.
* Donald Trump (best known as a businessman before becoming US President; former owner of the New Jersey Generals in the United States Football League, a failed attempt to compete with the NFL)
* Donald Trump bought air time just to inform Trump of things he would need to know but doesn't seem to. Their ads are a parody of a catheter ad, but they don't sell anything; and while a few make more or less clear who their intended target is, the rest don't make it obvious.
* Donald Trump by narrow margins, all states that Clinton had an overestimated but still comfortable polling lead in and none of which had voted Republican in a Presidential election since the 1980s. This is attributed to the high turnout from non-college educated white voters and a decline in reliable Democratic demographics. Trump won the electoral college and therefore the presidency. While the polling industry was widely criticized for its perceived overconfidence in Clinton winning, the one thing most polls did accurately predict was that Clinton would receive substantially more votes than Trump nationwide, with her winning the popular vote by 2.9 million and a margin of 48%-46%.
* Donald Trump, even after said lies have been debunked, by appealing to emotion. The terms "Fake News" and "Alternative Facts" stem from this idea.
* Donald Trump filling, if they aren't outright trying to tear down his legacy entirely.
* Donald Trump floated this idea at the end of his term but didn't go through with it.
* Donald Trump graduated when his parents discovered he had made frequent trips into Manhattan without their permission.
* Donald Trump has taught Jewish, black, and gay jokes to countless children. Peter

insists that they don't use as many gay jokes anymore.
* Donald Trump he'd accidentally coined and apparently compelling then-press secretary Sean Spicer to imply it was some sort of codeword or in-joke if challenged on it.
* Donald Trump is portrayed as an unrepentant bigot in "Donald Trump vs. Hillary Clinton", making flagrantly misogynist insults towards Hillary, bragging about deporting Latinos from the country once elected President and almost saying the N-word before Abraham Lincoln interrupts the rap battle. This is dialed back considerably in "Donald Trump vs. Joe Biden", where he doesn't say anything outright offensive, but implicitly belittles the protests against systemtic racism and insults Joe Biden by calling him "Barack's shadow" before remarking that he doesn't like the shade, which could be interpreted as admitting that he is a racist.
* Donald Trump made the building of a wall along the Mexico-US border a huge part of his 2016 campaign, though in his four years in office hardly any of it was completed.
* Donald Trump). Of course, if you claim you're worth billions of dollars, you can afford some self depreciation.
* Donald Trump protests. Both would end up losing re-election with Trump becoming the first one-term president since Bush himself.
* Donald Trump put a halt to economic production. Between that and his response to the pandemic itself, Trump was ousted after only one term. However, unlike Hoover, Trump just barely fell short of winning another term.
* Donald Trump putting the man in his place. After the debate, most people agreed that Trump came off as a bully due to his combative approach and constant badgering.
* Donald Trump reportedly subsisted on fast food and Diet Coke while on the 2016 campaign trail. Even now, he continues to eat fast food on a regular basis.
* Donald Trump rioters who attempted to disrupt the process earlier in the day. As Lamb gave his speech, Allred spoke in a foul manner to Harris, resulting in a shouting match between the two. Given the heightened tension surrounding the riots, the two congressmen had to be physically separated to prevent a fight from breaking out. Speaker Nancy Pelosi (D-CA) even had to verbally reprimand Harris and Allred before dismissing them.
* Donald Trump, some of the Northern Most Counties threatened to secede back as the State of Jefferson (not that this was the first time they made such threats, just the first time they made the threat after full State Secession was discussed.).
* Donald Trump's personal schedules revealed large blocks of what was labeled "Executive time", which turned out to mean "sitting around watching television and doing nothing in particular", inspiring the use of the term by people goofing off at work or lazing at home.
* Donald Trump stands out, which is just the two of them trading insults back and forth.
* Donald Trump's three oldest children agreed in a TV interview that Ivanka was his favorite, while she continues to call him "daddy" into adulthood. After he took office as President, this has led to charges of nepotism since she and her husband moved into the White House with him.
* Donald Trump's upset victory, the plot had to be scrapped as the writers could not come up with a feasible continuation, and they had to basically start from scratch with a turnaround of only one day.
* Donald Trump's xenophobic statements about Mexican immigrants, in which he criticized them for several crimes committed by the more vicious among their ranks, included the assessment "And some, I assume, are good people."
* Donald Trump tells Peter that people have gotten their favorite jokes about Jews, black and gays from his show, to which Peter responds "In fairness, we've been trying to phase out the gay stuff." A day later, the show's producers confirmed that the show will be phasing out the homophobic jokes that have long been an infamous aspect of the series.
* Donald Trump that a vote for the show is a sign of support for him (the show has

won two Emmys, and the awards are known for their anti-Trump stance).
* Donald Trump that he is proud of all his adult children, though he specifically mentioned that it was "to a lesser extent" with Tiffany.
* Donald Trump. The outcry problably helped Bush as unlike some of his other remarks it was a joke, and people saw that.
* Donald Trump. This may be to complete the editing "story" about why someone is getting fired, or simply to insert something more eloquent than what was actually said.
* Donald Trump was leading in the states he needed to win, and he was finally declared the winner five days after the election when his home state of Pennsylvania put him over the winning threshold. Although many people had actually anticipated that there would be a "Red Mirage" due to the fact that Democrats increased their use of absentee ballots while Republicans largely eschewed them; that initial results, being largely from in-person voting, would favor Trump and make it look like he was going to overwhelmingly win, but that the later surge of returns from mail-in and early voting ballots would favor Biden, potentially to a significant enough extent to flip key states.
* Donald Trump when Trump put out a Facebook invite to his inauguration.
* Donald Trump "You're fired!" So did a former contestant whom he fired. Both applications were turned down.
* Donald Westlake are killed anyway after he deems that they lack any valuable skills or resources.
* Donald Westlake has a political crony confidently (or rather over-confidently) declare that he's put a stop to a crooked political donors efforts to sabotage the presidents burglary operation (something affecting millions of dollars and all kinds of political favors) by threatening to revoke his invitation to the inaugural ball.
* Donald Westlake wrote a series of humorous short stories about the small starship
* Donald Wollheim of Ace Books was notorious for changing titles he didn't think were "science fictional" enough, usually into something really pulpy and juvenile. A joke usually attributed to Terry Carr was that if Ace under Wollheim were ever to put out a copy of the Bible, it would be a double-sided cover called "War God of Israel"
* Donal Noye, the one-armed blacksmith of the Night's Watch, uses a warhammer in the battle against the wildings. He also happens to be the person who forged Robert's hammer.
* Don Alonso Quijano, the real identity of Don Quixote, is introduced in the first paragraph as being almost 50 years old. Later, he's said to have graying hair and a black moustache. Yet any adaptation depicts him as a bumbling old man in or around his 70s, most often with completely white hair and beard.
* Don also has his moment in the same number when he and the rest of the Price and Son's employees show up on the runway wearing kinky boots:
* Don Ameche. They would step out of character at the end of episodes to reassure the audience that while their characters fought all the time, the actors were good friends.
* Don and Sam Flack. Don is a straight-laced police detective while Sam, his sister, is a recovering alcoholic and has a felony record.
* Don arc; and by extension, disparaging Zorua got him in further trouble from numerous Zorua fans.
* Donatas Banionis is an example of the trend in Soviet casting where actors hailing from the Baltic republics (Estonia, Latvia, and Lithuania) were a favorite choice for playing Western foreigners of any type. For example, he has played Americans, Englishmen, Swedes, Germans, and Italians, to name just a few.
* Donate at least ten bucks to the Comic Book Defense League through Hero Games official website and you'll have one of the company's official NPCs named after you.
* Donatello accidentally slips up when he's trying to convince April to try some pizza gyoza.

* Donatello had a #6 hit in 1955 with "Nuttin' For Christmas". He was only 6 at the time.
* Donatello is decked from head to shell in various gadgets, including goggles mounted on his forehead and stereotypically taped
* Donatello's David in marble), which is made all the more amusing when you realize he's only wearing the hat and boots.
* Donatien Alphonse Francois de Sade. Her constant life of being raped is placed in deliberate contrast to how pious and innocent she is. The typical reaction is more negative than anything else.
* Donbe and Hikari have a fairly long lineage in Japanese releases and cameos, but have only been seen outside Japan four times: a cameo in
* Don Black...is a white supremacist. Not entirely out of place as his surname also means "evil".
* Don Bluth, after losing their homeworld, humans are viewed as sort of sentient, endangered vermin unleashed on the galaxy.
* Don Bluth, Anya wears white opera gloves like the other ladies attending. Grand Duchess Marie's gloves are daubed with peppermint oil, which triggers a childhood memory of Anya's about spilling some peppermint oil on the palace carpet. This absurd fact proves to the Grand Duchess that Anya is no imposter, but rather the true Princess Anastasia.
* Don Bluth. As the bulk in the movie takes place in Russia, this aspect is downplayed, since (as noted above) things weren't so great there at the time. Once Anya and friends arrive in Paris however, it's this trope all the way.
* Don Bluth at least kept it on the radar with young children the longest, even if adult animation fans dismissed them).
* Don Bluth at the end, where the cel-shaded pieces of staircase are the ones that Drake punches away while trying to attack Hubie.
* Don Bluth behind it that he renounced his director's credit for that movie.
* Don Bluth behind the scenes though, whether that really excuses the movies or not.
* Don Bluth, but the studios wouldn't let him because they wanted the films to appeal more to kids.
* Don Bluth: by killing Charlie Barkin with a Flash Gordon thermo-atomic ray gun.
* Don Bluth, Chanticleer was too weary to crow, and the sun came up nonetheless. His farmyard peers laughed and jeered at Chanticleer, so he ambled away to the big city. There, he became a singing sensation, though still morose about losing his "sun-raiser" status.
* Don Bluth Disney regained its powerhouse status in the 1990s and Bluth couldn't keep up, leading to the closure of his original studio and then later his second studio.
* Don Bluth, Dmitri is hit in the head with a stone in the climax and appears to have died from the blow. But he's okay — he was just knocked out.
* Don Bluth. His diminutive but eager nephew Hunch is tasked with intercepting the party of heroes seeking to retrieve Chanticleer, Hunch is woefully outclassed, as even Patou narrates: "He's more a hoot than horrible ..." and he's voiced by the late Charles Nelson Reilly.
* Don Bluth in his peak year films, but as he was forced to tone down the content of his films, the scares usually went away with them:
* Don Bluth movie too. In fact, Bluth has gone on record to say that as long as the story ends Happily Ever After, then kids can handle whatever dark and depressing stuff happens beforehand (and in Bluth's earlier movies, happen it does).
* Don Bluth, numerous death scenes show the player character - Dirk or Ace - either being eaten alive or the eater preparing to do so.
* Don Bluth ones. Bluth idolized the style, and wanted to keep it alive through his work at a time when Disney was moving away from it.
* Don Bluth, Rasputin's bat sidekick abandons him at the climax and is awarded a female bat at the end with no explanation.
* Don Bluth, show-stopping musical number, comes charging out of nowhere, reprising the aforementioned song as he barrels into the support beams, causing the dock to

sway and Carface to sink and be at the mercy of King Gator.
* Don Bluth, the farm animals believe that the rooster Chanticleer causes the sun to rise when he crows. Except one day Chanticleer doesn't crow and the sun rises anyway, so the animals make fun of him until he leaves. Then while he's gone, the sun never rises on the farm because Chanticleer isn't there to crow. So why did the sun come up that one time?
* Don Bluth touch on the atrocities of Tsarist Russia: the protagonists are Jews fleeing from a Russian pogrom.
* Don Bluth version was. Don Bluth didn't make Mumfie, Britt Allcroft did.
* Don Bluth, when Anya prays for a sign, a dog steals her scarf and runs over to the path to St. Petersburg.
* Don Bluth, when Chanticler learns that his boss Pinky has captured his friends, he refuses to work for him anymore, only for Pinky to threaten the lives of his friends.
* Don Bluth when there are Don Bluth fans around. You'll be sure to irk someone.
* Donbot introduces his two henchmen as "the entire robot mafia". So the criminal organization consists of the boss Donbot and goons Clamps and Joey Mousepad.
* Don Callandar's novels: Pyromancer, Aquamancer, Geomancer, and Aeromancer.
* Don Camillo, and as the sharecropper is now about to be evicted he could face serious consequences. He and Don Camillo (the local priest, who decided to help to protect the sharecropper from his own stupidity) manage to move it where it can be "found"... But not without Peppone shooting the dove statue on the Monument to Peace the Communists had recently built.
* Don Camillo and there are unexploded mines in the area. It gets adapted in the fourth live-action movie, in which the thief is a different character and Don Camillo gets a different revenge.
* Don Camillo collection, he wrote the first Don Camillo story very quickly because he was under a tight deadline and had to fill a page in his newspaper pronto.
* Don Camillo e Peppone series, there is one arc where Peppone (the mayor of the village) has to take the primary school finals because, like most men in the village, he had to leave school and work very early. Despite his earlier self-confidence, he's so nervous he almost fails; Don Camillo trades the correct solutions for political concessions.
* Don Camillo — 5 movies between 1953 and 1965, based on the eponymous novels, and some non-canonical entries afterwards in the seventies and eighties.
* Don Camillo often has a conversation with Jesus himself whenever he is close to a crucifix (and even with the Virgin Mary once in the first movie). The Christ does not respond to him when he is overwhelmed by anger though.
* Don Camillo: Peppone dropped out of school in third grade and is only literate in the most technical sense. It doesn't stop him from eloquently arguing politics, turning his blacksmith's shop into a successful auto repair business, serving as his home village's mayor for over twenty years or out-scheming his arch-enemy, the village priest, with surprising regularity.
* Don Camillo short stories has Peppone admit in confession that he ambushed the priest and hit him over the head some time before. Don Camillo wants to hit him back, but Christ forbids it, saying, "Your hands were made for blessing." He assigns Peppone some prayers in penance, but then, as the mayor kneels in prayer, Don Camillo thinks his rump would be a perfect target.
* Don Camillo short stories reference the Fascist signature practice of forcing their political enemies to drink castor oil. One story features Dario Camoni, who back in the days had forced both young communist Peppone and young cleric Don Camillo to drink a glass of castor oil each; then, when Dario Camoni makes a reappearance after the way, Peppone tries to get his own back... In another story, when two Maoists bad-mouth Peppone, his son Michele becomes incensed that he forces them to drink a glass of ... cod-liver oil each. Peppone is almost relieved: "God be praised, at least they can't say I raised a fascist son!"
* Don Camillo stories, partisan leader Peppone and village priest Don Camillo collude to hide a lot of incriminating weapons this way, once from the German occupiers and once from their British liberators, who are keen for the partisans to

disarm and disband.
* Don Camillo-stories, the old schoolteacher Signora Christina dies, and asks with her dying breath to have her coffin draped in the flag of the old Italian monarchy. Several leading local political figures, both on the left and the republican right, protest this, until the Communist mayor Peppone declares that it's a good thing he is the mayor and not them, because he will make sure Signora Christina goes to her grave with her flag on the coffin, and personally kick the ass of anyone who tries to start anything over it. In the end, Peppone helps carry Signora Christina to her grave, flag and all, wearing the red scarf he wore as a Communist partisan. The narrator notes with pleasure that even in places where the living fight for any and no reason, the dead are still respected.
* Don Camillo story by Guareschi, Don Camillo provokes the murderer by getting shaved by him, essentially bringing over the message "You can kill me but you won't escape divine nemesis!".
* Don Carlo goes berserk after realizing her beloved Don Carlos is in love with the queen.
* Don Carlo is based on Carlos, Prince of Asturias, but the storyline is based on a rumour that he was secretly in love with Princess Elizabeth of Valois, who is married to his father King Philip II of Spain. Furthermore, while Don Carlo's desire to rule Flanders is good-hearted in the opera, in reality, it was most likely rooted in egotism.
* Don Carlos both have fanatical priests with political power as the main antagonists.
* Don Carlos's final act. Elisabeth sings a massive aria, then an endless duet with Carlos. All while the best characters are either dead, exiled, or not present. Then thank God King Philip and the Spanish Inquisition appear and it ends very, very quickly.
* Don Carnage's favorite tool for torturing people was a clawed glove...
* D, once the player, as Laura, has started the second disc (after the Indiana Jones-esque boulder escape) Laura can walk over to an innocent looking painting of an indifferent-looking girl. Upon pressing the action button, the girl in the painting will inexplicably smile (with a non-lipped laugh) before the painting flips to a clue for the next in-room puzzle before it goes back to the same girl who goes right back to looking indifferent.
* Don Cheadle that he wasn't aware of what the plot of the film was either.
* Don DeLillo, the assassination of John F. Kennedy originated as a false flag operation to fake a failed assassination attempt. In the confusion of a postmodern world, however, the plan to fail got lost along the way, and the plan became a real assassination attempt that succeeded.
* Don Denkinger's blown call in Game 6 of the 1985 World Series. The former Major League umpire is blamed for the St. Louis Cardinals losing the 1985 World Series due to his blown call at first base in the ninth inning of that game. This ignores that 1) the Cardinals had a 3-1 series lead over the Kansas City Royals and scored only two runs in the last three games, 2) They made three defensive mistakes after the call that all contributed to the loss, and 3) They were more focused on blaming Denkinger than trying to win Game 7, which the Royals won 11-0.
* Don Diego de la Vega. As soon as his grave is left alone, he breaks out of it.
* Don discovers that he can't have Pete Campbell fired for endangering an account because Campbell's family is
* Don Doko Don, features a pair of dwarves who hit enemies with hammers.
* "Don Donald": At the end, Donald falls into a puddle and his huge sombrero shrinks into a tiny beanie.
* Don Draper and Megan. After they get married and Megan throws Don a surprise birthday party, we find out that Don is forty while Megan is in her mid-to-late twenties. Don is not super excited about Megan's younger friends and her modern ideas.
* Don Draper can disappear from work for days without any long-term consequences. However (as Duck Phillips discovers to his dismay), Don doesn't have a
* Don Draper describes this expression as over-simplifying things. Basically, he

argues, people want to
* Don Draper has a seemingly meaningful relationship with Rachel Menken, a Jewish client of Sterling Cooper.
* Don Draper lost his virginity when he was raped by a prostitute as a teenager, as revealed in the sixth season episode "The Crash." When his mother found out about it, she beat him with a wooden spoon.
* Don Draper's first mistress is a bohemian artist Midge. Her friends know about them, but people in Don's job don't, and he keeps it secret from his wife.
* Don Draper sleeps with Rachel Menken, a Jewish client of Sterling Cooper advertising company. Rachel starts falling in love with him, but breaks it off when Don offers to run away with her without any consideration for his wife or kids.
* Don Draper sleeps with Sylvia Rosen, an older but beautiful housewife of a doctor who live in the same building as Don and his wife Megan. Don is disgusted with himself when his daughter Sally accidentally sees them in bed.
* Don Draper, still married to Betty, romantically pursues Susan Ferrell, his daughter's young idealistic teacher. She resists — at first. Later she is sorry they can't date publicly for fear that they would be seen. Susan's brother visits her when they are together and figures out something is off. Don breaks it off when his marriage starts crumbling.
* Done a bit elaborately, but for the same dramatic effect, in the intro of
* Done a bit more fairly a few episodes later. Sai Saici is pursued by a
* Done accidentally by Doctor Manhattan, when he teleports a television show's studio audience away and some of them die of shock. He also breaks up a riot this way.
* Done a few more times later in the duology, such as with the Geometer scoutship.
* Done a few times, when the usual "They killed Kenny!!"-"Bastards!!" routine was subverted and Kenny's death was met with amusement.
* Done a few times with the droids in the original trilogy, but perhaps the most memorable is when 3PO gets destroyed in
* Done a fourth time in the season 6 finale, with a twist: at the end of the episode, Brennan reveals that she's carrying Booth's baby (the previous episode had implied that they'd slept together), and they actually
* Done after Launchpad McQuack crashes a spaceship right into Scrooge McDuck's swimming pool.
* Done again (And Lampshaded and Played With) when McClane trades up from his Yugo by stealing a Mercedes on the expressway. Zeus points out how pissed the other driver must be, until McClane reminds him that Zeus forgot his bar of gold in the Yugo's back seat.
* Done again belonging to a crook. The trick here is that they can only be freed from the illusion once they are all fully awake, which is a problem since Meowth (who, at that time, was traveling with Ash and friends), instantly goes back to sleep every time they try to wake him up.
* Done again by both parties during ep 12, right before each of them attacks the
* Done again for Jim Henson vs. Stan Lee, where they mostly limit themselves to shout outs. When Stan Lee actually says something hurtful he
* Done again for The Sacrifice campaign and comic version to explain to fans how exactly
* Done again in another anime filler during Water 7 in which Zoro has helped a mother and her foster kids get out of trouble with a debt collector. Zoro, who's been trying to escape from her, is finally let go and heads off to re-join with his crew. Until the mother tries to call out to him for something. He starts running, assuming she wants him to do something for her. Turns out she was trying to return his shirt that she had washed for him earlier.
* Done again in another episode after Danny's parents tell him Jazz ran away from home, and he quickly realizes that she left to catch a ghost after telling her she was a lousy ghost hunter. He then has to come up with a reason to leave and find her after blurting out why she left in front of his parents.
* Done again in another episode, where a few thugs are looking for a hard drive at a hacker's house, but as "the place is like a friggin' Radio Shack", they think it

is
* Done again in "Chuck vs. the Ring", in which it transitions from the Jeffster! (
* Done again in "Geothermal Escapism". For context, they're playing a game of "The Floor is Lava" that's gotten way out of hand, and are dueling to knock each other of their chairs.
* Done again in "Marge vs. Singles, Seniors, Childless Couples and Teens and Gays", when Ms. Krabappel tries to make Bart go home (It's complicated. Maggie has gotten addicted to an annoying children's show. Okay, maybe not
* Done again in "Sleepwalk Surprise" when Doofenshmirtz see his dream demon while awake. When asked about it, the demon disappears.
* Done again in the interim between Shadows Over Innistrad and Eldritch Moon. Avacyn has now gone mad, driving the whole plane insane with her, and Sorin saw it fit to erase her to bring an end to the madness. All this accomplished, however, is that it's removed the last line of defense for Innistrad and allowed Emrakul to encroach on the plane, twisting everything around her. And Sorin is no longer around to defend the plane after Nahiri trapped him in the Helavault out of spite.
* Done again in the sequel, where the same cop seems to be used to Frosty, and then meets his new wife...
* Done again in the sixth season "The Duh Vinci Code", as an extended
* Done again in "Too Many Pinkie Pies" after the Pinkie clones have been rounded up in the town hall.
* Done again in "Troq" when Starfire saves the life of Val-Yor, an example of
* Done again in, with Fozzie and five other Muppets each operating one limb of a human disguise to sneak into Miss Piggy's office.
* Done again much later, with Florence concluding that she has to assume very dedicated and experienced programmers are helping with
* Done again the first time we see Puu. We find out that the egg that Yusuke got when he was dead is about to hatch. Koenma goes on to warn him how even he doesn't know what will come out, or what it will do. Yusuke stands to face whatever is about to appear. The egg hatches, he looks around.
* Done again when Hilda ends up pregnant with Bobby's child, who her family disapprove of, instead of Archie's, who is she is dating.
* Done again when John Oliver asks an anti-Muslim pastor who said he wouldn't let Muslims worship at his church if he thinks that a mosque would ever let Christians worship there. When he says no, John plays a pre-recorded video of himself at a mosque where that exact thing is really happening. He then pops up in the foreground and insults him.
* Done again with Clara and the Doctor (magical) and Danny (muggle), though it's implied that she would not have been happy with anything other than a life of adventure whether the Doctor was there or not.
* Done again with one of the Doc's soldiers, Tank Man. Midnighter realized his adversary had a similar origin story to him and talked him into giving up and going away. They exchanged letters afterwards.
* Done all the time by Naraku. He's constantly employing lesser villains to help him out and ultimately they die, sometimes due to his direct influence. Seemingly subverted when
* Done almost verbatim in the Kursaal Flyers song "Little Does She Know", which was a British top 20 hit in 1976. The chorus is:
* Done another time by El Tigre himself in "Fool's Goal" when he drinks out of a water bottle and does a spit take right in Frida's face.
* Done as a farewell in lieu of a hug between Viggo Mortensen and the stuntmen he fought alongside or against at the end of filming the
* Done a second time when Kim feels like she's lost her mojo when her signature costume gets shredded and is discontinued. However it was subverted in that it was less those specific clothes as having a distinct set of mission clothes, and with the help of some criminal fashion designers she's soon back to her ass-kicking ways.
* Done a second time with Knight-Commander Meredith. In Act III of the story, the mages believe that Meredith is slowly going crazy trying to uproot

* Done as part of a quick gag. After Timmy receives a threatening note from the Francis that he initially thinks is from the nerdy kid in front of him, he gits a flirty note. Francis points behind him to a pretty girl. When Timmy tries to flirt, she points to an
* Done as straight as an arrow in season 8, episode 23 with Mike Franks' last stand.
* Done at the end of Bart's nightmare in the episode "Treehouse of Horror II," The nightmare parodies
* Done at the end of "Beautiful Girls" by Sean Kingston, to reflect the final words of the song: "You'll have me suicidal, *the background music trails off* suicidal, *the vocals follow suit* suici—"
* Done backward in the case of Bond's Scottish ancestry. It was added into his history by
* Done between a squad of Army rangers and Sector Seven agents in the 2007
* Done bizarrely in the episode "A Tale of Two Springfields" where a badger slashes Homer's torso open,
* Done by a four-member gospel choir in a video ad for Gain Flings laundry additive.
* Done by a Headbanger to a group of Hairbangers after he and his friends join Eddie. IF you have the language censor on, it's covered by a big PMRC sticker.
* Done by Alisa on Nanoha when she gets annoyed at the lead character's
* Done by Arya to Jon in the second episode after he gives her a sword he had made for her before their family is separated. This is done to demonstrate that of all the Stark siblings, she has the closest relationship with Jon, despite sharing only a brief few seconds onscreen together in the previous episode, a plot point that the show was unable to go into for reasons of television and time limitations. She does it again in Season 8 when they meet after years of separation and
* Done by Candace and Stacy in "The Klimpaloon Ultimatum" after they miss a high five.
* Done by Gemini Paradox not too long after being defeated by Dragon Ryuhou in episode 33 of
* Done by Joschka Fischer, member of the German Green Party, in 1984. Fischer, then member of the German Bundestag, addressed Richard Stücklen, then vice president of the Bundestag, who had suspended a party member of Fischer's: "With respect, Mr. President, you are an asshole." Fischer later became one of Germany's most popular—if not beloved—politicians, and was Vice-Chancellor and Minister of Foreign Affairs under
* Done by Knuckles, who punches a fault line near the Carnival Night Zone. Since the Carnival Night Zone was built on the edge of the Floating Island, Knuckles completely smashed off that portion of the Floating Island, removing the Carnival Night Zone from the island and sending it falling to Mobius, slightly cushioned by some remaining power of the Master Emerald. The crash-landing of the ruined Carnival Night Zone was a shock to one Emerald Hill boy who had just before wished that the Carnival Night Zone was closer then it crashes in front of him.
* Done by Leila Khaled, one of the hijackers in the Dawson's Field hijackings in 1970, according to an interview she gave in 2000:
* Done by Lockon II and a heavily-damaged Cherudim in the final battle, using a half-second's worth of
* Done by Megadeth on a few occasions, most notably with "Poison Was The Cure" and "Dawn Patrol" on Rust In Peace.
* Done by Mr. Burns a second time in the Treehouse of Horror III segment "King Homer" while taking Marge to Ape Island:
* Done by necessity in Season 1. The production team had no idea if they would be renewed for the back half of the season, so they closed off the storyline by having Jack rescue his wife and daughter in the thirteenth episode and all plots being tied up. When
* Done by one of the stone SpongeBobs at the very end of "SpongeHenge".
* Done by Prince Charles to the documentary cam after his disastrous defeat at
* Done by Ruel in episode 10, all over his friend Calben, from Amalia's yell

surprising him.
* Done by the hijackers in s5e10 in the same manner of a police procedural with the villain starting the hijacking by dual-wielding submachine guns and shooting up into the air.
* Done by the Monarch's henchmen in the 'best entrance EVER' scene from
* Done by the Mordian Iron Guard regiment, who wear fantastically gaudy dress uniforms into war. Many enemies have been fatally surprised to discover that the flashy uniforms are being worn by fiercely disciplined and competent soldiers. The concepts of coloured uniforms helping morale similar to their use in Napoleanic Warfare's smoky battlefields likely applies to the Mordians as well, amplified by them frequently fighting
* Done by the two women identified as "Love" and "Evil" on the backglass of
* Done by the younger Digidestineds/Chosen Children to their youngest member Cody/Iori in
* Done by Walder Frey after Robb apologises for breaking his marriage pact.
* Done deliberately in "The Last Resort" to make the swingers next door jealous.
* Done during Negi's fight with Rakan. Jack patronizingly tells Negi that while he's impressed with his progress, he should just give up because he really has no chance to win. Negi
* Done during the half-track assault in the otherwise quite realistic 1945 film
* Done earlier in the original series. When Goku is laying siege on the Red Ribbon Army, he comes to a room with no stairs, but there's an elevator. Goku doesn't know what an elevator is, so since there's no stairs he gets up to the next floor by jumping and crashing the floor above him.
* Done entirely seriously in the (Daniel J.) D'Arby the Gambler battle in
* Done even better when a news report shows the devastation being caused by the terrorists. The newswoman says, "....these villagers are left to wonder: WHO, if anyone, will help..." As the newscast is playing, Tony is stewing in impotent anger while tweaking his hand repulsor glove after learning that Stane was double-dealing under the table to the bad guys; at that moment in the newscast, Stark blasts loose a workbench hood light with his brand new repulsors in inarticulate rage... and then after thinking a second,
* Done even earlier with Nami and Robin, who, despite having become attached to Luffy and the rest of the crew in spite of not being inclined to view their association with him as a temporary alliance, don't think he is willing or able to overcome their problems. Nami in particular does this by stealing the ship and pretending to kill Usopp to save his life from Arlong, which actually temporarily succeeds in convincing Zoro into thinking that Nami is truly evil (but by the time Robin is thought to have betrayed the Straw Hats, he remains open to either possibility being true).
* Done even more significantly in the following arc, Impel Down. Luffy and the prisoners he's broken out are making their escape. Hot on their tails is the prison warden, Magellan. Normally taking on one guy wouldn't be a problem for Luffy and his allies, except Magellan's power is generating poison, and he's one of the most powerful characters seen at that point in the series, on his own domain, which he would protect at all costs.
* Done even more straight with a recent bonus, where he's threatening
* Done extremely effectively in one episode when, after the killer commits suicide, Castle is shown going over crime scene photos with about 5 minutes left in the episode, only to deduce that the body they found was
* Done face-to-face between suspect and witness at a police station in
* Done far, far earlier when he briefly became the overlord of hell, with all the power and cowering minions the title provides, only to be shoved back into his former body before he could destroy it.
* Done for a humorous role reversal in the episode "Ponyville Confidential". The town is mad at the Cutie Mark Crusaders for their gossip rag. They try seeking forgiveness from Applejack and Big Mac, but Applejack only responds in Macintosh's usual "yep" and "nope"s, while Macintosh chews them out for what they did.
* Done for comical effect, when Ukyo tries to give Ryoga and Akane some time alone

together. He's petrified of the idea because he doesn't know what to do in that sort of situation. Cue Ryoga clinging to her, begging her not to leave him, while she whacks him with her oversized spatula.
* Done for deliberate stylistic effect (and to avoid essentially hand-drawing each frame on the desktop, thus enforcing the trope all over again) on a lot of modern
* Done for laughs in a Chevy ad displayed at Universities. Certain words are in dramatically larger font than the rest, such that from a distance the poster reads "CHEAT ON YOUR EXAMS".
* Done for laughs on the third-rate variety show ("Second-rate variety show!")
* Done for the last time in the strip not to Wily, but by him. As he's right behind Zero as he talks about the future.
* Done for the same reason lawyers do: Any informality or lack of precision may become an issue in court.
* Done hilariously in a cartoon where Sylvester greases up Elmer Fudd's stairs and thumb-tacks his walkway in an attempt to deter him from interrupting his caterwauling. The hilarious part is that after having going through all that, Elmer then runs through it again to go inside and get his shotgun, and then runs through it a
* Done hilariously in "Window of Opportunity". As more time loops go past, O'Neill and Teal'c learn more of the Ancient language they need to decipher to end the loop. In one scene, Daniel is writing out the translation on a board and Teal'c AND O'Neill correct his translation. Later, we see Daniel sitting back flabbergasted while O'Neill and Teal'c write the translations themselves.
* Done in a Dairy Queen commercial for their popcorn shrimp, with a shrimp couple. The wife asks "Hold on, where are they kids?" after looking at the popcorn shrimp box, they scream in horror, realizing they ate their own children.
* Done in a dramatic scene by Satoshi to Shion, when she beats his sister Satoko. Also done by Satoko to Keiichi; the latter is particularly jarring because Keiichi is twice her size and seems to be pushed back at least five feet.
* Done in a marvelously over-the-top fashion in Trey Parker and Matt Stone's
* Done in an Australian ad for insurance, aka CUA, where many people are blocking their ears and singing 'LA LA LA LA' all for just insurance rates.
* Done in an episode where Homer goes to a power convention with his coworker Mindy. At their hotel, the Bellhop says a bunch of words, onomatopoeia, and other sounds to hint that Homer and Mindy are going to have sex.
* Done in another not-so-serious scene in Rei, where Satoko gets launched AT LEAST 10 feet by a Rena-paunch for trying to break up the
* Done in a roundabout way in "The Leap Between the States" when Sam leaps into one of his ancestors, a Union soldier during the Civil War. Near the end of the episode one of the characters, a runaway slave, discusses the surname he wants to take once he's free. Since being a free man makes him feel like royalty, he chooses the name King...and Al confirms the young man is the great-grandfather of Martin Luther King, Jr.
* Done in a single finger-way scratches this in favor of a "let's ignore those idiots" look.
* Done in a Southwest Airlines commercial. A couple is seen heading towards a door, the wife turns to her husband "...And furthermore, Aunt Whatever is rather sensitive about her mole". Cut shot to doorbell, and the door opening.
* Done in a way where during a gun fight, one of the defenders breaks a small window in a 5x4 window frame. The next defender breaks a new window and so forth. In the end a very small man shows up and he jumps in front of the window while under heavy fire for about 15 seconds before he manages to break and fire out of the last window, which was on the top row.
* Done in card form with the Living Weapon ability from New Phyrexia; artifacts with this ability spawn a 0/0 Germ Token when they hit the field and automatically equip to it, but can attach to another creature at will, which kills the token. The most basic Living Weapon artifact, the
* Done indirectly by Goro Majima to Makoto Makimura in the conclusion of
* Done in Episode 7 of Season 1 where, as punishment for sneaking out of the

school and causing trouble, the principal strips the main characters of their powers, forcing them to stop a monster using brooms and soap. The special based on the season released by Nickelodeon altered this into a project for new students.
* Done ineptly by Faith Lehane after she accidentally kills the deputy mayor. She ties weights to it and dumps it in a lake, but the weights apparently come loose and the body is eventually found. The
* Done in excess with the majority of the Heel roster in any fraction or franchise in fictional wrestling, just to make sure the audience knows who to boo. Almost every bad guy wrestler is an overblown
* Done in-game after the Pyromania update with the Pyro. Any of the new items for the Pyro, or anyone wearing the pyrovision goggles, shows that the Pyro sees their weapons as handing out rainbows, sparkles and bubbles. People laugh as they lay down to take naps while covered in dancing colors, and the landscape (of certain maps) filled with lollipops and happy clouds.
* Done in live-action outdoors using a long series of paired signboards in the film version of
* Done in one episode, and rather fiendishly. Jane, via flashback: "That was so sweet, I think I just threw up in my mouth a little..."
* Done in one of the entries in an amateur script competition by the now-defunct Insomniak Theatre Company in Pennsylvania. The director read all of the stage directions out loud while the play was being performed. It was particularly egregious because the characters were
* Done in "One Pull Up" where Eileen helps Rigby, who overgrew his muscles with a machine (long story), reach the chin-up bar so he can perform one to keep his job. Afterward, he's being wheeled to the hospital and thanks her, offering to hug her though she doesn't wish to accidentally crush her spine. She lets him do it anyway, citing it was "worth it".
* Done in "Slide Whistle Stooges" when SpongeBob starts to worry about Squidward's sanity.
* Done intentionally in a story where Brigitta had been visiting Scrooge and, seeing he had an oral thermometer giving out a temperature of almost a hundred, went crazy with the frenzy of curing him from his tremendous fever. When Scrooge could finally get a word in, he pointed out she had wrongly assumed his thermometer gave the temperature in Celsius but it actually gave it in Fahrenheit.
* Done intentionally to a soldier obstructing Aziraphale and Crowley in
* Done intentionally with the actresses playing the Weeping Angels, to make them look
* Done in the Disney Comics Beagle Boys story "Short Order Crook". After being instructed to by "Cousin Half-Pint" (a short Beagle Boy), the Beagle Boys have torn off their numbers so they can't be identified but then become confused about which of them is which, not even remembering their own numbers and as two of them are discussing it, Cousin Half-Pint looks out of the comic at the reader and scowls while jerking a thumb at the other two, as if to ask "can you believe how stupid they are?"
* Done in the episode "Idiot Box". It begins with the titular character buying a humongous flat-screen television, only to throw it away. It's quickly revealed that he actually bought it for the cardboard box it was packed in. Humorously enough, the television itself may be worth less than it seems as when Squidward took it, he found the TV came with only box-related content.
* Done in the episode "McStroke", with Peter, Brian, Mr. Cow, and two McBurgerworld security guards.
* Done in the episode "Phobia Factor," where we see a shot of millions of slimy pink worms squirming around in an empty wooden hot tub as Chris reveals that Beth's challenge is to
* Done in the episode "Wormy" when he and the rest of Bikini Bottom are running away from Sandy's pet butterfly, the eponymous Wormy.
* Done in traditional fashion with the player character (Lt. Nick Reyes) during
* Done in-universe by O'Neill when he refuses to have a funeral for Daniel after one of his many "deaths".

* Done in-universe in the blooper reel, with a bunch of muppet hobos explaining a joke they'd just made to Hobo Joe,
* Done in-universe would make for compelling drama, and saw traditionally heroic and competent characters as "cartoon fiction" and his own as realistic.
* Done in where the titular character is reported to have sliced Macdonwald "from the nave to the chaps" right before the play begins. This is done to establish right away how bloodthirsty MacBeth is.
* "Done It" Duncan, who will confess to anything and everything (up to and including stealing fire from the gods). Can actually be a good source of information: if he says "It wasn't Bob who did that burglary, it was me", you can be pretty much sure that it
* Done later with Taito flipping her work desk in rage after Square Enix gives her too much work - the desk breaks open the door and hits Square Enix.
* Done literally in an out-take of episode 28. The actual scene depicts Scar grabbing Father's face, growling as he unsuccessfully tries to blow it up. However, in the outtake, Scar's growling is removed and replaced by a battle cry of "YOUR FACE ASPLODE!"
* Done literally, when Luna uses a spell to turn her shadow into a localized version of the heat death of the universe to destroy the honesty elemental. Comes complete with a creepy
* Done many times by Cartman throughout the series. However as of lately it is suggested
* Done more lightheartedly when Julian and O'Brien come off the holodeck dressed as Spitfire pilots, and raise a pint of bitter "To Clive!"
* Done more literally in "Walk in a straight line blindfolded", which has Adam blindfolded in the intro and Jamie uses signs to talk to the audience without Adam noticing.
* Done more literally with sleeping couples: the husband wears blue pajamas, while the wife wears pink pajamas.
* Done more seriously in "What's the Deal with Yuumi?" which breaks off the character design discussion after a few minutes to rip into Riot Games for having such terrible management and organisational culture.
* Done more seriously when, halfway through a mystic Carib blood ritual to separate Kenny's soul from Cartman, Chef's parents suddenly realize he hasn't brought a "victim child" to transfer the soul into.
* Done multiple times in "The Greatest Caper Ever" by Strong Bad and The Cheat. Normally, when this trope gets used by
* Done negatively by Triumph the Insult Comic Dog, who says things like:
* Done occasionally, when a "live conversation" taking place between someone in the ring and someone being broadcast over the big screen, turns out to have been a prerecorded statement as just a distraction for the wrestler to run up behind his target or conduct some other nefarious business backstage. Then again,
* Done offscreen: after Dave and Helen hook up, it's hinted that they use the "gender-swap tablets" seen earlier in the strip's run to... interesting effect (as well as the anti-gravity generator, and the nutrient tanks, and the containment room with the padded walls, and the electrodes, and the Steam Caverns of Mars...) One of Dave's laments after they break up is "
* Done on a much larger scale in "Donald Duck and Reginella's Wedding", when one of the weapons Donald uses against the middle ages-armed army of Bingo, the guy who wants to
* Done once, when Karn and Ardam are browsing the web and find what is implied to be some very risqué material of Karashi.
* Done on purpose by the villain the 1960s comic strip where the TARDIS crew meet
* Done on several occasions, most notably when Han hides by sticking the
* Done on the regular during the more extended beat-em-up segments of the
* Done painfully in "The Body", with Buffy imagining the EMTs reviving her dead mother.
* Done peculiarly in the Fourth Doctor's first season — half of the creative team wanted to differentiate the new Doctor by making him

* Done properly in the video "Stupid Mario Maker 2" for fellow YouTuber
* Done purposely by Alan when Charlie and his girl are in the shower in
* Done rather disturbingly in the Cocoa Puffs commercials. The cuckoo will try to give up chocolate, only to see it everywhere until he breaks down and exclaims "I'M CUCKOO FOR COCOA PUFFS!", going on a rampage until he gets his cocoa fix. If one didn't know better,
