* Death Gate adventure-game, a skilled mage can use a painting to create a pocket dimension.
* Deathgate Cycle due to not only being from different fantasy races but also having completely contradictive personalities.
* Death Gate features Sang-Drax, a dragon who uses shapeshifting as defence. Whenever you try to attack, he simply changes to a form that is invulnerable to it. You can either catch him off-guard or get some world-shaking magic that no one is invulnerable to. The latter happens, taking the form of the force of the Interconnection spell, which throws Sang-Drax deep into The Vortex.
* Death Gate, when the hero has been poisoned and shackled in a dungeon. He knows what color the antidote is, and uses a spell to possess a dog who can go fetch the bottle for him — only problem is, dogs are color-blind, and since the poison will kill you soon, you've only got time to pick ONE bottle. Effectively, the entire trope is reproduced in low-tech. The riddle is solved by observing colored lines behind the bottles, and based on which are visible through which bottles, you can figure out which is the right one...
* Death gets more expensive and requires a higher-level Divine caster to deal with the longer a person has been dead: the basic mid-level Raise Dead spell will only work for characters who died within 1-2 weeks depending on the level of the Cleric casting it, while the more powerful Resurrection can bring back people who have been dead for 70+ years. Other factors are the condition of the body (Raise Dead only works for a body that's mostly intact, Resurrection can restore the body from even the tiniest remnant, and True Resurrection can bring a person back to life even if their body was completely obliterated) and the deceased's creature type (Elementals and Outsiders can only be revived by True Resurrection). And death from old age is permanent, period.
* death gets you a good rap dying. Even better if you announce you were working on a new project before it happened.
* Death Glare... and since he can only use one power at a time, and was halfway through a wall...
* Death Glare as his default expressions. The few times he does smile make him appear far friendlier and more approachable than he usually is.
* Death Glare ensures that Vance will one day pay him back for it (which he does).
* Death Glare for calling her a "very scary robot" in "Dungeons & Dragons", and a momentary tightening of her lips and nervous flicker of her eyes in "Vick's Chip" when John is removing her processor.
* Death Glare it. There are stories of the charms shattering for no reason, which is attributed to the charm absorbing a particularly potent ill will.
* Death Glare locked on the horizon. This cements how much the mini-Cells are not a match against Gohan.
* Death Glare Norah Satie during her paranoid rant against Captain Picard.
* Death glares are naturally quite popular in pro wrestling, as a way to respond with disapproval and/or an implication of impending violence to an opponent or antagonist's actions. Among the best/most famous are
* Death Glare: See me staring daggers at you? That means you better shut your mouth before I shut it for you!
* death glares. Once she has won, she instantly becomes much more relaxed and shows more personality. How she would react if she lost is unclear as of yet.
* Death Glare: Staring angrily at a person to indicate that you're very pissed off at them.
* Death Glare: That look on his face means you have just earned an asskicking par excellence.
* Death Glare. The narration notes that if anyone else called her that she'd "shatter every bone in their bodies without mercy".
* Death Glare to get an entire room full of badass pirates to sit down and shut up.
* Death Grip has Mark describe how he set up a stable cycle of pills, soap, and money at the group home he was at, the chain only ending because one of the people trading pills for soap actually needed those pills and died as a result.
* Death Grip on a tray he's serving from as people take them, and automatically

locks any door he enters.
* Death Grips. "Beware", "Guillotine", "No Love" and "Giving Bad People Good Ideas" in particular are songs notable for the sheer testosterone flowing through them.
* Death Grips has the song 'Punk Weight'. The song starts out nice, preparing you for a drop... and next thing you know, your headphones are vibrating from the intense feeling and sound of pure bass.
* Death Grips hip-hop tropes ((violent lyrics, distrust of police, and namedropping of websites and contemporary subjects) and pairs them with computer-y, glitchy beats, giving the whole thing a bleak, dystopian, cyberpunk kind of feel.
* Death Grips is also an (occasionally auxiliary) member of numerous other experimental groups, namely Wavves, Team Sleep, CHLL PLL, bygones, Scars on Broadway, Nervous Cop, Flössin, Goon Moon, Holy Smokes, and Crime in Choir, as well as drumming for Omar Rodriguez Lopez, Marnie Stern, Robby Moncrieff, and Mick Barr, and releasing solo material.
* Death Grips seems to be this, and at the same time it manages to be a blast to head-bang to.
* Death Grips. Today, Death Grips are a recognizable name in internet culture, while Hella is only known among Math Rock geeks. This is to the point where Death Grips' Wikipedia page is 2,430 words longer than Hella's Wikipedia page.
* Death Grip, where the fight between Torch and Kenny trashes several stalls, breaks off a sink, and results in a large hole in the wall when Torch kicks Kenny into the wall, and then keeps kicking until Kenny falls through. The latter was apparently the result of a happy accident on-set where Jacobus broke through the wall and Bosch decided to just keep kicking since the damage was already done.
* Death Guard have Plague Surgeons, one of the only Chaos Legions to have retained their Apothecaries post-fall. They make the already tough-as-balls Death Guard even harder to drop. Because of their age and diseased hulk, they are even more formidable than their loyalist counterparts.
* Death Guard on any enemy close to the Malignant Plaguecaster whenever he successfully manifests a psychic power.
* Death Gun that many fans want to see more of him before his eventual defeat.
* Death Has a Shadow", Peter announces that, with his new riches, he'll buy the family their most expensive meal ever.
* Death Has a Shadow, says out loud that every line of his is pure gold. Hanks' character says, "I have AIDS." which prompts Peter to laugh uncontrollably while the other moviegoers glare at him.
* Death has been shown as being the only remaining thing at the end of the universe, and then waiting for another one to inevitably form. His job is safe.
* Death has the following line: "So you preach about how I'm supposed to be, yet you don't know your own sexuality". The song is rumored to be about Paul Masvidal, who much later came out as gay.
* death), has the subplot involving the mafia excised, so Light's sister is not abducted.
* Death, having masquerading as the priest, Zead was pulling a subtler example of it by nudging Hector into chasing after Isaac.
* death he seems to become a lot more cheerful, and thereafter openly delights in the chaos and misery he causes.
* Death himself, and decides that loving Sisi means to pursue her wherever she goes and persuade her to die so she could be with him.
* Death himself has a rather romantic relationship with Mrs Flitworth in
* Death himself has a similar job. Should he slack off, someone else is pulled into the Grim Reaper's role. And if he's fired, people who are supposed to die become undead instead (hilarity ensues).
* DEATH himself is fond of people, and on more than one occasion actively defends them. His granddaughter, Susan Sto Helit, is a straighter example since she actually IS human, but inherited some of her grandfather's traits and abilities. She's also his most reliable ally in protecting the people of the Disc from the Auditors of Reality.
* Death himself is visible to all inhabitants of the Discworld, but he is so

frightening in his appearance that most people
* Death himself takes on the role of the Hogfather (Santa Claus) when the Hogfather
* death. His worst actions include screwing underage teenagers, murdering a little girl's parents to stop them from calling the cops, and giving herpes to several people, including Chris and Stewie, for absolutely no reason whatsoever.
* Death House, Agents Boon and Novak, trapped on a floor with violent psychopaths, decide jump down the elevator shaft, hoping to supplies their descent by skidding down the elevator cable.
* "Death House" centers around a penthouse that has been unoccupied for 80+ years. As the investigators puzzle through various booby traps, they find two corpses (one recent, one from back in the day) and rescue an almost drowned woman.
* Deathigner: A Taiwanese animated short about the children of the gods of the dead in world mythology.
* "Death in a Funny Position" has the Governor and his staff staying on board a millionaire's yacht when the millionaire is murdered. Shortly afterward, another guest is also murdered leading to an escalating investigation.
* Death in fact does not need the cloak at all, as Zane himself found out. The cloak is a placebo so to speak. Since he's the master of death, he cannot die unless he wills it so (every incarnation is the ultimate authority regarding its office). However, if, even unconsciously, the holder of the office of death is ready to die (and thus automatically go to heaven), any attack that makes it past the cloak will indeed kill him.
* Death informs six-year-old Sophie Potter of the wizarding world and her family.
* "Death in Heaven": After Osgood shows a new preference for bowties and manages to quickly figure out something the Doctor himself missed, he (not in so many words) offers her a spot in the TARDIS. Unfortunately, he does this within the earshot of Missy / the Master. This might be one of the reasons she chooses to kill Osgood after breaking free.
* "Death in Heaven": Danny Pink does this, and finds to his horror that he's been turned into a Cyberman.
* "Death in Heaven", he says his orders are not the order of a general (aimed at The Doctor) or the whims of a lunatic:
* "Death in Heaven". He snaps, punching the TARDIS console until sparks come out, before breaking down into tears.
* Death in Heaven", in which rainwater contaminated by Cyberpollen brings the dead back to life as Cybermen.
* Death in Heaven", Kate explains to the Doctor that in the event of worldwide invasion, international law dictates that a president be appointed to command all of Earth's forces. There was only one candidate.
* "Death in Heaven"" preview, instead has a Stinger partway through the credits that sets up the Christmas special.
* "Death in Heaven": Seb, an AI working with Missy, has this reaction when the Doctor pulls out a TARDIS key while falling out of a plane and manages to summon the TARDIS in time to save himself. Missy gets annoyed and vaporizes him.
* "Death in Heaven" tells them to destroy Belgium, for no other reason than it appeared to just occur to her.
* "Death in Heaven" that it's his birthday until the Master pointed it out.
* "Death in Heaven" there is a moment where Clara and the Doctor engage in a deep conversation that is kept secret from everyone — including the audience — with the context of the scene implying the potential for Clara to say something of this nature. (Ultimately, though, this remains a mystery.)
* Death in Paradise, as mentioned early on in "A Personal Murder". Specifically, people put the deceased's cell phone in his/her coffin, taking into account the possibility of the deceased sending a message from the grave. After Cedrik's death, Dwayne gets a text message from him declaring "I was murdered" as his dead body was being burned.
* Death in Paradise at both crime scenes. However, the man the killer attempted to frame was illiterate and could not have written the messages.

* Death in Paradise: At the end of "The Complex Murder", Dwayne and Humphrey are grilling prawns. Dwayne asks Humphrey to spray the prawns with water. Humphrey picks up the wrong bottle and sprays the grill with the paraffin they had used to light it, turning the grill into a bonfire.
* Death in Paradise: At the end "Switcharoo", the Commisioner remarks to Inspector Parker that he is not looking well. Parker responds that he is fine, followed by "No sugar please, Doris" and then passes out.
* Death in Paradise, automated door records, witness testimony, video footage, and the coroner's report all indicate that an out of shape scientist climbed alone up the side of a volcano at night to monitor some anomalous seismic readings, had a heart attack and died. Humphrey looks at the scene for a minute and asks why he didn't have a flashlight...
* Death in Paradise, Commissioner Selwyn Patterson does not like his niece Ruby addressing him as 'Uncle Selly' in public. And especially not when the two of them are in uniform.
* Death in Paradise: Done deliberately in "Death in the Clinic". Poole is convinced that the surgeon's eyesight is failing and hands him a piece of paper which he claims contains the name of a personal injury lawyer one his patients had engaged. Poole asks him if he has ever heard the name. The surgeon glances at the list and says he's never heard of him. Poole replies:
* Death in Paradise episode "A Dash of Sunshine", although the first murder is not seen; having already taken place in another country.
* Death in Paradise episode "In the Footsteps of a Killer"; eight years prior, a woman was arrested for murder and died in prison, as she was the only one of the pool of suspects who couldn't provide an alibi. However, the episode opens when a man the victim slept with on the night of the crime returns to the island to give her an alibi; the night he slept with the victim was the last day of his holiday on the island and he had an early morning flight out, with the result that he never realised she was in trouble until he returned. This new information leads to the team re-opening the case and determining that the true culprit had faked their own alibi.
* Death in Paradise episode "The Man with the Golden Gun" is set on a millionaire's private island; there were only a specific group of suspects who could have committed the crime, and as the episode unfolds a storm traps the suspects and the detectives on the island until they have solved the case.
* Death In Paradise example above with "Melodies of Murder". Namely, to give the impression that his victim overdosed in a port-a-potty, Kris Kedder uses one of his guitar strings to rig the lock so he could lock it from the outside.
* Death in Paradise, fittingly for a show set in the Caribbean, uses an instrumental cover of the 1964 ska song "You're Wondering Now" by Andy & Joey.
* Death in Paradise has already been stabbed before the murder actually occurs.
* Death in Paradise: In "An Unhelpful Aid", DI Poole is able to solve a murder while lying delirious in his sickbed, being fed information by Dwayne and Fidel.
* Death in Paradise: In "An Unhelpful Aid", Sergeant Young keeps calling Fidel "Freddie".
* Death in Paradise: In "Flames of Love", Humphrey somehow accidentally changes his email notification sound to a whip crack accompanied by a "Ye-haw!", and cannot work out how to change it back. It goes off at several inopportune times during the episode.
* Death in Paradise: In "Melodies of Murder", the murderer takes advantage of their band mate's post-gig ritual of playing music really loudly to mask the sound of the fatal gunshot.
* Death in Paradise: In "Murder of the Airways", DS Madeleine Dumas is an internal affairs officer sent out from Paris to conduct an investigation into Jack's running of the Honoré police station following Florence's shooting. She is less than impressed by Jack's eccentric style of policing, even though the rest of the force—who are worried that Jack might be sent back to Britain—bend over backwards to convince her that he is great leader and brilliant detective. However, after seeing Jack in action solving a murder, her final report is that while his

administration could stand to be a little more professional and organised, he is effective at his job and Florence's shooting was not his fault. The Commissioner ends seconding her to become Florence's replacement.
* Death in Paradise: In "Murder on the Airwaves", DI Mooney attempts to impress DS Madeleine Dumas by fetching her a coconut fresh from the tree. In doing so, he winds up dropping a coconut on her head: bruising her head and spraining her wrist.
* Death in Paradise: In "Stumped in Murder", the president and star player of Saint Marie's cricket club is found shot dead on the pitch after a night out.
* Death in Paradise: In "Switcharoo", Inspector Parker makes a poor first impression on the Commissioner when he jumps into what he thinks is his taxi and asks the driver to take him to the airport, only to discover that he has jumped into the Commissioner's car and is talking to the Commissioner.
* Death in Paradise: In "Switcharoo", the police find the body of a missing witness hidden in the chest freezer of his house.
* Death in Paradise: In the very first case in the series, a policewoman murders her boss.
* Death in Paradise: In "Written in Murder", D.I. Jack Mooney receives a batch of business cards identifying him as 'D.I. Jack Money'.
* Death in Paradise: In "Written in Murder", DI Mooney stops a suspect from escaping by stuffing a banana up the tailpipe of his motor scooter. He comments that a potato would have been better, but he made do with what he had to hand.
* Death in Paradise is a bride-to-be drowned in her bath on the final night of her week-long hen do.
* Death in Paradise is killed when she attempts to expose a scheme to fix the outcome of a series of beach volleyball matches.
* Death in Paradise is like this due to its setting. Many actors have made appearances merely because it gives them a chance to visit the Caribbean (series 3 guest star Tristan Gemmill described it as "winning the lottery for actors"). Joe Absolom said that he actually ended up going broke while shooting an episode because he brought along his family to enjoy a tropical getaway. He says he doesn't mind because he had a great time. Though averted by Ben Miller who (despite enjoying working on the show) suffered because his character Richard Poole wore wool suits despite the heat and humidity. He departed the show because he wanted to be with his family but his wife couldn't stand the tropical climate.
* Death in Paradise: JP and Rosie do this in "Dishing Up Murder". Dwayne gets sick of it and resolves the situation by taking the phone out of JP's hand and hanging up for him.
* Death in Paradise. Mooney, who is playing the role of the victim, lights up a cigar — as the victim had done — and immediately starts coughing.
* Death in Paradise murder upon further investigation on account of the victim already being dead at the time (lesser crime being a relative matter — attempted murder is a serious crime liable to get you several years in prison, but it's not quite as serious in sentencing as a successful murder).
* Death in Paradise of at least once a season where the killer will impersonate the victim (due to sharing similar builds, being seen from a distance or wearing something to conceal their face and voice).
* Death in Paradise: One episode has a new bride shot with a speargun on a balcony of a high-class hotel. The killer turns out to be the butler for the floor, who mistook her for his intended target, one of the maids.
* Death in Paradise: One of the suspects in "Murder Begins at Home" claims to have been on a sabbatical from work for three months. However, when the police contact his employer, they learn he has actually been suspended for anger control issues. And he hasn't told his wife.
* Death in Paradise: Ralf Little appeared as holidaymaker Will Teague before being cast as DI Neville Parker in series 9 to replace Ardal O'Hanlon's Jack Mooney.
* Death in Paradise, Sara Martins, Joséphine Jobert, and Aude Legastelois all voice themselves in the French dub.
* Death in Paradise to identify the killer. In Season 3, his replacement Detective Goodman is startled at being prodded to do a summation gathering in Poole's style,

but decides to keep the tradition going in later episodes. The third detective, Mooney, just does it without any explanation how he fell into the habit, while the fourth, Parker, is directly told to do it be the Police Commissioner, because by that point it's just how things are done on Saint Marie.
* Death in Paradise. Towards the end of each episode, the investigation will have hit a brick wall until a seemingly innocuous object or statement from one of the others will prompt this in our British protagonist. Usually, this results in confusion from the rest of team, especially in Season 3 as Goodman tends to talk to himself while making the connection and prompting Dwayne to comment that Goodman is crazy.
* Death in Paradise was planning to do this to her boss. She sneaked into her boss's bedroom to swap one of her energy drinks for a powerful laxative, only to discover her boss had been murdered. She panicked and fled, knowing that there was no good way she could explain what she was doing in the room.
* death in reverse until the moment she walked out the door to drive the point home.
* Death In The Caribbean: One screen is a patch of quicksand within a foggy swamp, which you'll sink into and die if you don't have a length of rope to throw around a tree to help pull yourself back to safety. A hat on said screen implies that an explorer who came before you fell victim to it.
* Death in the Clouds, Hercule Poirot mentions to the main suspect that fingerprints were found in a bottle of poison used to kill the daughter of the first victim. The suspect says that is impossible because he was wearing gloves.
* Death In The Dawntime, and probably has the earliest setting ever for a detective story. It's a Sealed Cave mystery.
* Death In The Deeps, Prisoner One is the epitome of this trope, fighting off Lycans, Leviathans, a Basilisk and Wraiths during his single minded rampage through the prison. The only thing that actually hurts him is an explosion that decimates the surrounding ice for a mile in every direction yet does little but burn his hair and sear his skin, which quickly regenerates.
* Death in the marketplace that morning and that she had made a threatening gesture at him. The master acquiesces, then hunts Death down for an explanation as to why she'd threatened his servant. Death replies that she was not threatening, only surprised to see the servant there...because she had an appointment with him that night in Samarra.
* Death in the Slave Pits of Lorrd. Its full title is actually "Death in the Slave Pits of Lorrd, or What I Did on My Inter-Term Break". She actually cites her sources at the bottom.
* Death in Venice. The whole thing is about an aging tenor angsting over a bishounen, while nothing happens, and it ain't over till he lives. Only a great tenor can make it interesting because it's really a one-man show.
* Death in Vesunna. A hot-headed time traveler shoots a Roman book dealer in order to get a book that doesn't exist in his time. The locals, who only heard the gunshot and found the corpse, assume it was "Zeus's thunderbolt", but the two men investigating the case use intelligence and logic to figure out exactly what happened.
* Death is a role that must be filled, and when no one is around to do it, things get... weird.
* Death Is a Sad Thing: Children learn about death for the first time and are saddened by it.
* Death Is a Slap on the Wrist: Having there be a penalty for dying can interrupt the narrative, and certain games are more fun in multiplayer or in alternate modes if you aren't forced to sit out the rest of the game.
* Death Is a Slap on the Wrist penalties as long as it's cast immediately after the character dies.
* Death Is a Slap on the Wrist: The Bees, as they're called, are also immortal; if killed, they appear in the spirit world and can either revive their body or reconstitute it at a nearby anima well. It's so difficult to kill such a being that only a few enemies you ever encounter could even try it, and it takes so long that

they find more creative ways to occupy your time while they work on accomplishing their goals.
* Death Is a Slap on the Wrist the player wrecks are shown with a brief shot of their destroyed car in real time.
* Death Is a Slap on the Wrist: Video games where it's possible to keep dying and respawning indefinitely as long as the player doesn't call it quits.
* Death Is Cheap, normally episodes end with only one or two of the main four characters dying. Both "Sea-Creature" and "Knapsack!" are the only episodes to kill off all four.
* Death Is Cheap originally had such center through the Recovery Box, a crank-powered box-shaped machine that can revive the dead. However, said recovery center ends up getting crashed into by an unconscious Gray and becomes broken. Fortunately, the person in question has recovery powers to revive dead contestants.
* Death Is Cheap Terezi and Vriska have their final confrontation, wherein Terezi kills Vriska and ends the war. Whew.
* Death Is Cheap. This is not always because of this rule, however, and may be played for other reasons.
* Death Is Cheap, this was not entirely without merit. Castiel does indeed show up alive and (mostly) well near the end of the season. Bobby returns as a ghost but is still technically dead.
* Death Is Cheap," to kill every last human on Earth in less than two minutes, without even bothering to leave Kami's Lookout in the process.
* Death Is Cheap: When it's ridiculously easy for dead people to come back to life more than once.
* Death Is Cheap, which is only bringing them back so it has pawns it can use to enact its own plans. There's also the trauma of having to experience death in all of it's pain and terror only to come back repeatedly and realize it's going to keep happening again and again and that you may end up surviving thousands of years past the ends of your friends, loved ones and everything you ever held to be important.
* Death Is Forced To Take A Vacation: Fall Harvest and his fellow Reapers are this; Fall himself is the Reaper for Alicorns, Hollow Grave is Reaper for Ponies in general, Causality for draconequui and Nidhogg for dragons. Helheim, as the Lady of Death in this dimension, also counts.
* Death Is Forced To Take A Vacation: Fall Harvest tells Apple Bloom that he works in an office and his job involves analysis of the lifespans of certain species. This is accurate; he just doesn't tell her he's talking about the lifespans of sapient beings and not plants like it would seem from his previous comments.
* Death Is Forced To Take A Vacation: The Harvest-verse's Lady of Death is Helheim, who has several Reapers who serve as adjuncts working for her, each monitoring and collecting the souls of a different species; Fall Harvest is the Reaper of Alicorns.
* Death Is Forever is going to destabilise the European community by killing all their leaders in a single blow. But before that, he must eliminate a network of agents who could help to locate him.
* Death Is Forever when Dominic, blinded by the flashbang that Bond built into a lightbulb, fires two shots at random with his pistol.
* Death is frequently reported to have this problem as well. Ysabell and Susan both observe that his house and everything in it is "just a copy of one he's seen somewhere." His attempts to play musical instruments produce only a horrible racket, which greatly frustrates him. This is used rather cleverly in
* Death is likewise a terrible musician. He has tried to learn the violin and banjo at various points, but is inherently unable to be creative and always fails. Death at one point came close
* Death) is notable, particularly in the later novels, for his fascination with and (often hilarious) attempts to imitate humans.
* Death Is Not Permanent: A video game gives an in-universe reason for the player character to respawn every time they die.
* Death is one of several personifications of abstract concepts present in the setting. She has even been killed off herself, twice — both times with

disastrous results. Death appears in a classic black robe, but she wields no scythe. Most beings who encounter her see her with a skull-head, but for those who get intimately entangled with her (particularly Thanos), she can wear a pale young woman's face.
* Death is only visible at the edge, due to it cutting tiny pieces of the air in half. Said sword cut through, without any effort on the part of the wielder, in fact by accident, a large portion of the dining table at UU, as well as numerous forks, knives etc. So little effort was needed, in fact, that the wielder was rather surprised to find a large chunk of table falling away.
* "[Death is] responsible for 100 percent of all recorded fatalities worldwide..."
* Death Is Such an Odd Thing: A character expresses their confused feelings on someone they disliked suddenly passing away.
* Death Is the Only Option: A situation where the only way to win is to let yourself get killed.
* Death is this. When he bends the rules, and he does so fairly often, it's because he believes that quality of customer service trumps adhering to the letter of regulations.
* Death is usually a pretty nice guy, or neutrally doing his job, but in
* Death is usually seen as a skeleton (with some accessories, like a scythe). Ironically, a human skull seems to "smile" all the time.
* Death Jester Eldar Aspect Warriors wear skull-masked armour. The twist is, the bones on their armour come from its previous owners.
* Death knells, among other things, chime in during the last track of
* Death Knights are intentionally designed to be damaged in some way so they can be better killing machines for the Lich King.
* Death Knights are similar, the time between your character's death and revival is left unstated, but you're not terribly decomposed unless you choose one of the three skins made specifically with rot in mind.
* Death Knights are subversion in that the one's that joined the Lich King willingly aren't dead at all. All the others are powerful warriors that died at the hands of the Scourge and were immediately resurrected as the Lich King's elite troops. Due to this they haven't had time to adequately decay and usually just have paler skin. Also they retain their memories and personality after being resurrected, though they are still bound to the will of the Lich King.
* Death Knights can call short lived ghouls, while a talent allows them to keep a ghoul as a
* Death Knights, former slaves of the Lich King, use their knowledge of necromancy and Scourge tactics to fight the undead in Northrend. A lot of the more vengeful Forsaken fall into this category as well.
* Death Knights get yet another variation of this in the form of a spell called Hungering Cold.
* Death Knights have the ability to summon a protective Bone Shield, though in this case the bones hover around the player instead of being worn as armor.
* Death Knight starting zone. You are called upon to kill a member of your own race from the Argent Dawn to prove your ruthlessness. When you go inside, you find out that your quarry is a friend from your old life, who recognises you as soon as they stand. At first they remind you who you were before undeath and then try to pull
* Death Knight, tend to act explicitly antisocial (as both non-player characters and death knight roleplayers in-character) and, in a meta example, were considered the overpowered new kid on the block before ultimately being accepted.
* Deathlands consisting entirely of feudal baronies, as no one has the technology to control anything larger.
* Death Lands. In "Crater Lake" Finnigan faces off with a sec man holding a laser pistol that's so unreliable it only fires one time out of every hundred. This makes Finnigan cocky. And rather gruesomely dead.
* Death Lands it's revealed that the illness caused when using the technology is simply caused by not setting specific co-ordinates.
* Deathlands novels has one. He is an exceptional shot with a gun, but in

conversation the characters note that this is rather unusual and indicative of his marksmanship talents.
* Deathleaper is a particularly cunning Lictor that, during the Tyranid invasion of St. Caspalen, realized that
* Death Line, Inspector Calhoun and the police arrive after Alex has already rescued Patricia from the cannibal and the cannibal has crawled off to die.
* Death Line, Inspector Calhoun, Sergeant Morris, Alex and Patricia head off, leaving a darkened tunnel. Then the cannibal's voice shrieks out "MIND THE DOORS!"
* Death Line: The strip club James Manfred visits at the start of the movie has a burnt out letter and reads 'NON S OP STRIPTEASE'.
* Death Line turns up to tell him there is nothing to investigate. Inspector Calhoun is secretly delighted when the cleaners are murdered at Russell Square station, as murders are definitely police business, and that they occurred at the same location as Manfred's disappearance is a happy coincidence.
* Death Line: While searching Manfred's house, Inspector Calhoun and Sergeant Morris find a secret room hidden behind a bookcase in Manfred's library. The room contains a video setup that Manfred used for secretly filming his bedroom.
* Deathloop causes the day to reset at midnight every day, undoing everything that happened during it and bringing everyone who died back to life. The loop seems to only encompass the isle of Blackreef, though there are several notes from people wondering if any time would have passed in the outer world and how exactly a stable time loop for a single island interacts with the rest of the world at large.
* Deathly Hallows, a singing Peeves uses the name "Voldy" to refer to Voldemort. The fandom invented this dismissive name: Rowling said on her official site that she "thought it was very amusing when [she] found a chat room full of people calling him 'Voldy'."
* Deathly Hallows book, Ginny intentionally calls Harry into her room to kiss him as a "happy birthday" / going away present and then Ron busts in. In the movie, she asks him to zip her dress up in the middle of the kitchen, they kiss, and then George walks in.
* Deathly Hallows, but by the time she kicks the bucket, Ron and Hermione have officially become a couple.
* Deathly Hallows by using magic so that she fades away in all her pictures.
* Deathly Hallows definitely qualify: the first night they spent in Grimmauld Place, they fell asleep holding hands. Harry even remarked how seeing them like this "made him feel strangely lonely".
* Deathly Hallows) disguise themselves as Harry using Polyjuice potion. Two of the decoy Harrys are Hermione and Fleur. Amusingly, Fleur isn't too happy about being Harry; after the transformation is complete, she tells Bill not to look at her because she's hideous.
* Deathly Hallows, during the trio's infiltration of the Ministry, a disguised Ron briefly speaks in the voice of Reg Cattermole, the person he's impersonating, until he realizes he is talking to Harry.
* Deathly Hallows. Harry worries about Ginny's safety while she's at a Hogwarts run by Death Eaters, but resists the urge to go find her because finding the last Horcruxes were more important — though not enough to send her the Marauder's Map, preferring to stare at her dot on the map rather than give her a tool to track said Death Eaters' movements so she could better resist them: Always Remotely Stalk The Girl?
* Deathly Hallows, Hermione turns a staircase in a Hogwarts secret passage into a getaway slide to escape from a pair of Death Eaters. Of course, the Death Eaters simply go sliding down after them, so she turns the tapestry covering the entrance at the bottom to stone. CRUNCH.
* Deathly Hallows in that a Muggle neighbor is shown to overhear and glance around nervously.
* Deathly Hallows, it's revealed that Aberforth Dumbledore has been giving free food to the members of Dumbledore's Army, even though they are all wanted by the Death Eaters.
* Deathly Hallows, Mad-Eye Moody claims that Polyjuice Potion "tastes roughly like

goblin piss", and Fred Weasley can't resist making a joke about how Moody knows what goblin piss tastes like.
* Deathly Hallows — but he'd been attempting to ferret that information out for a while.
* Deathly Hallows, members of the Order of the Phoenix start doing this to each other. There is the slight variant that they don't agree on what questions to ask beforehand, instead just asking about random moments in their past, making the system more secure.
* Deathly Hallows nod to the Harmonians (Harry/Hermione shippers), who got very upset when Ron and Hermione hooked up instead. There's also the illusions the Slytherin locket evokes of Harry and Hermione being together, with illusion-Hermione repeating many of the arguments used by Harmonians on why Harry is better than Ron as a potential boyfriend.
* Deathly Hallows Part 1, and even if he (uncharacteristically) extrapolated from that interrupted sentence he couldn't have known it was a boy. This is a particularly frustrating one, as it would have made a hell of a lot more sense if the scriptwriters had allowed Tonks to finish that sentence.
* Deathly Hallows, Part 2 explains why Luna is at Hogwarts when the Trio gets there, despite them having apparently left her at Shell Cottage earlier in the film.
* Deathly Hallows Part 2 it by saying there's no need for a plan: "We make a plan, we go in, all hell breaks loose!"
* Deathly Hallows Part 2, Luna is chasing after him to tell him something important about said treasure. At first, this trope seems to be played straight, with Harry repeatedly brushing Luna off, telling her "not now" and so on, before Luna finally stops dead and yells out, "HARRY POTTER, YOU LISTEN TO ME RIGHT NOW!" which gets Harry to turn around and actually listen to her, in an absolutely beautiful subversion of the trope.
* Deathly Hallows - Part One, his facial injuries were described as giving him "a distinct resemblance to Mad-Eye Moody."
* Deathly Hallows the mirror shard appears out of nowhere with no explanation. (Actually he gives him a wrapped package in the fifth book and says "don't open it here.") Sure, this is mentioned later, when Aberforth explains that Mundungus stole it and sold it, but anyone who hadn't read the books would probably be hard pressed to remember who that was. Also, what sort of peddler decides that a broken mirror will fetch a good price? Did he know it was magical? What's the point of a two-way mirror that can only be used when smashed? Why did Harry pick up a random piece of mirror from the Black house? Why does he obsess over it before he sees Aberforth?
* Deathly Hallows, there's a bit where he tries to convince Draco to do something whilst leaning really close to him, stroking the back of his neck and whispering creepily. Draco has pretty much the same look on his face as when Bella was doing it: "Why oh why must my family keep pseudo-hitting on me?"
* Deathly Hallows to allow Ginny to give Harry his birthday present. Unfortunately, this time Ron got away from her.
* Deathly Hallows, we're treated to Harry's entire train of thought as a broken talking stone gargoyle triggers his memories and he realizes exactly where the last Horcrux is hidden.
* Deathly Hallows, when Harry enters Dumbledore's office after the Final Battle:
* Deathly Hallows when he invokes something like this — Neville points out that while Harry was off chasing Horcruxes, he'd been fairly effectively leading the resistance in his absence and Luna points out that she'd worked out how to find the penultimate Horcrux before Harry (or even Hermione) had.
* Deathly Hallows, when Mad-Eye Moody dies off-screen and the characters spend several minutes debating if he was really dead or not. Ron remains unconvinced even after Hermione pointed out that what would have had him survive, well, pretty much the same things that killed Dumbledore, required stunning leaps of logic. The nail in the coffin for the trio comes when Harry sees his magic eye implanted in Umbridge's door but that itself doesn't fully prove his death. Out-of-universe, some fans point to a briefly glimpsed one-eyed beggar as evidence Moody may not be

as dead as he seems.
* Deathly Hallows, when they go to Godric's Hollow because they think Gryffindor's sword is there, they end up being ambushed by Nagini disguised as Bathilda Bagshot, and as it eventually turns out, the sword was never there after all — Snape had it all along.
* Deathly Hallows, where Neville is basically covered in scars from the school year and Harry can't even recognize Seamus due to his injuries until Seamus speaks. The Death Eater supervisors would use the Cruciatus Curse on the students, pretty harsh considering the punishment for using the unforgivable curse used to be life in prison and its repeated use has been shown to be capable of making the victim lose their mind.
* Deathly Hallows who similarly still hates herself for incidentally causing her younger sibling’s death as a kid. Aberforth also feels incredibly guilty for it and it’s why the brothers aren’t necessarily close as adults. She's been dead for about a hundred years by the time of his death but wanting to see her to apologize to her in the Resurrection Stone is how he gets the curse that kills him. It's also clear on a re-read that Aberforth uses his role as the barkeeper at the Hog's Head to spy on Death Eaters for his brother. In fact, he's the one who kicked Snape out of the bar halfway through the prophecy, setting in motion the event that cause Harry's parents' death and in turn Snape turning spy against Voldemort.
* Death Machine and it's official role would be a "Frontline Morale Destroyer", it's intentional.
* Death Machine. The villain, Jack Dante, is hamming it up, and the annoyed good guy rolls his eyes and remarks "Christ." Dante responses with "Not quite... but close."
* Death magic, while the troll death god Bwonsamdi is associated with a kind of greenish cyan, befitting a deity who is concerned about the balance between life and death.
* Death Magnetic, "The Day That Never Comes", which peaked at #5. The song was also their last top 40 peak on the Hot 100, achieving a #34. Suffice to say, it is not remembered to the extent of the band's most legendary songs.
* Death March: If large numbers of people from a targeted ethnic group are forcibly exiled from their lands in lethal conditions, then it can cross over to genocidal ethnic cleansing.
* Death March: Prisoners are forced by their captors to travel on foot in lethally harsh conditions, leaving few or no survivors.
* Death March: Prisoners are forced to walk in fatal conditions, with death often the intended outcome.
* Death March: Prisoners are transported on foot in fatal conditions, with death often the intended outcome.
* Death March to the Parallel World Rhapsody: Everyone can learn their level and basic stats thanks to a magic stone. The main character, Satou, has the unique ability to have an almost infinite Bag of Holding, and his accidental destruction of a dragon army has given him enough loot and experience to make him the most powerful person in the world, but he hides this to be able to travel the world (relatively) unmolested.
* Death March to the Parallel World Rhapsody follows a 30 something programmer who finds himself trapped in a fantasy world after some particularly bad crunch time / "death marching" to finish a mobile game, and decides to go on a sight-seeing tour vacation.
* Death March to the Parallel World Rhapsody is forced to do a programming "Death March" of 80+ work weeks to meet a deadline to finish a game. When he finishes and falls asleep, the next he knows is that he has been returned to his 15-year-old body and sent to the fantasy world where the entire story takes place.
* Death March to the Parallel World Rhapsody. There is mention of people who actually sell themselves into slavery because they have lost their livelihoods and homes and fear starvation.
* Death March to the Parallel World Rhapsody, vaguely linking back to "march" (both

relate to music).
* Death Mark, a former news anchor whose journalistic knowledge provides useful clues for the protagonist.
* Death Mark completely refuses to believe in anything "unscientific".
* Death Mark, in chapter endings where the spirits are destroyed as opposed to pacified, the protagonist and his companions will return home, safe from the danger of spirits... or so they think. Then it'll be revealed that the lingering grudge of the spirit is still around, and gruesomely murders one of the companions.
* Death Mark is a big occult fan and has always wanted to meet a ghost. She found meeting Hanahiko terrifying.
* Death Mark, is instead a high-school brawler who's practically-minded and unfamiliar with the supernatural. This is shown most clearly with their respective spiritual files; Yashiki's notes are detailed and written like journal entries, whilst Akira's are crude, laconic scrawls.
* Death Mark is set in the '90s, before cell phones and the Internet are widespread enough to really help the protagonists deal with spirits.
* Death Mark, Shuuji Daimon's character sprites always have a very emotionally neutral face.
* Death Masks and its inherently violent impulses, which he is constantly having to fight down.
* Death Masks by Paolo Ortega, who does a very good job of appearing to be an honorable vampire who only does what he must out of loyalty to his Court, wanting duel Harry to settle the war between the Red Court and White Counsel even if he threatens Harry's loved ones to force him to do so. In reality, he is as ruthless, pragmatic and evil as any Red Court vampire and just puts on the act for political advantages, as shown when tries to force Harry to lose the duel by continuing to threaten his loved ones and pulls out a gun when things don't go his way.
* Death Masks Dresden fishes until he establishes that Ortega preys on children and cites it as a difference.
* Death Masks from beyond the borders of reality) towards one another.
* Death Masks, Harry Dresden finds himself having a conversation with his friend Micheal's teenage daughter Molly, after escaping a situation that left him with handcuffs danging from one wrist. During their talk, Molly produces a set of handcuff keys and finds one that matches the cuffs he's wearing. When Harry asks how she got the keys, she tells him to ask himself if he really wants to know the answer to that question. Harry decides he doesn't.
* Death Masks, Harry's officially sanctioned duel with Ortega devolves into a brawl between Harry's allies and Ortega's vampires when Ortega cheats.
* Death Masks, Molly gets Sanya (a huge black Russian guy) in on her prank calling. Bonus points because it is obvious he does not know what Molly roped him in.
* Death Masks offers himself in Harry's place, Nicodemus makes the swap.
* Death Masks on their side, and the RPG states that he has plot device levels of swordsmanship, which says it all really.
* Death Masks said hosts from the influence of the Fallen Angels whenever possible, so when the host gives up his Angel and "repents" the knights can't do anything, even though he's obviously lying and plans to search out another such coin as soon as possible. Harry has no such limitations and beats the crap out of the guy with a baseball bat to get information, Michael chides him for it, but then goes:
* Death Masks This tendency towards self-doubt goes up to 11 after he takes up the mantle of Winter Knight.
* Death Masks, Thomas brushes off Ortega's contemptuous sneers and most of Harry's lip, but objects to being told his outfit looks like something Michael Jackson might wear.
* Death Masks using magic. The plot of the book involves them preparing to do it again.
* Deathmatch - an extremely violent variant of a hardcore match, these are stipulation matches that revolve around barbaric foreign objects which are used to induce heavy bleeding and severe physical punishment. Aside from barbed wire, thumbtacks, and fire, other staple weapons include nails, glass (intact panes or

broken), explosives, and even animals such as scorpions and piranhas.
* Deathmatch is seemingly limited to three maps: Happiness Island, Charge Island and, as of
* Death Merchant series by Joseph Rosenberger, habitually used two handguns. Originally, he used a pair of Smith & Wesson M19 "Highway Patrolman" .357 Magnum double-action revolvers with 4" barrels, which was reasonable. About a dozen books in, he decided that the .357s didn't have enough stopping power, and upgraded to a pair of 8" barreled .44 AutoMags (!). Camellion had no difficulty firing these hand cannons simultaneously and accurately (in real life, they have more free recoil energy than most .30 caliber rifles), and on several occasions fired at and hit two separate adversaries at the same instant, much like Jake in the movie "Silverado", except without needing to "psych himself up" for it first. Camellion referred to this stunt as "mind-firing", indicating that (a) he was highly trained in small arms (in addition to other sorts of mayhem, hence his nom de guerre), and (b) he had practiced this particular trick a lot.
* Death Metal album ''Catch 22" which was almost universally panned by their fans. As an apology of sorts to the fans, the band re-recorded the album with much better vocals, more powerful drumming, and remastered production. The re-recording was much better received by fans.
* Death Metal band Crypticus actually have an album and a song called They Called Me Mad.
* Death Metal band Sarcófago's first record was named "Crush, Kill, Destroy".
* Death Metal band Timeghoul had the CD contained a digipak that had exclusive artwork as a completely wrap-around cover and a booklet containing lyrics and background notes on the band.
* Death Metal band Vader gets this a lot due to the video for "Cold Demons", which heavily features WWII footage of Panzer tanks. This accusation is ridiculous when you learn that the band is Polish. Not that Polish Nazi bands don't exist; Vader just isn't one of them.
* Death Metal can often fall at the extreme Enlightenment end of the spectrum.
* Death Metal" for bands with names such as Necrotic Disgorgement, 7000 Dying Rats, and The Christpunchers.
* Death Metal musicians don’t take this lyrical content entirely seriously, and simply use it for shock and/or escapist value, which allows many fans to be more comfortable with it.
* Death Metal, not to mention the song titles ("The Shredder", "Human Butcher", "Madman of the Woods", etc.). In fact, pretty much any death metal band.
* Death Metal out on a 2010 US tour when their own driver ran off mid-tour, as said passenger vehicles included buses. In fact, it's likely that if Immolation hadn't been on the bill and/or had not been in the vicinity of the rest stop that Nile was stranded at, they may have actually had to drop off the bill.
* Death Metal vocals may seem very scary. However, it's often pointed out that they sound a lot like Cookie Monster's voice. Good luck being scared now...
* death might be cheap accidentally killed a nurse because her soul wasn't reaped in time.
* Death Montage The kicker is that despite her hard work he ultimately survives as his main body is outside of Paris and beyond her reach at the time.
* Death Mountain is shown to be spewing ash and rocks when Link first arrives in
* Death movies, first setting up a chain of events that will surely kill the target. But quite often, when the target manages to make it out of that danger, another danger nearby kills them anyway.
* Death Need Not Apply demeanor combined with his brutal tactics result in several students being outright terrified of him.
* Death Need Not Apply emits one around Musutafu, rendering it impossible to die within the city.
* Death Need Not Apply will have an outright inhuman pain tolerance because The Zone is an area where no one can die and all injuries eventually heal. Izuku gets hit in the face with Ashido's acid and barely grunts on top of commenting that

Bakugou's blown his legs off plenty of times, apparently having a phase where he liked creating nitroglycerin minefields. Later, Izuku cheerfully shows Hagakure how to properly snap someone's neck, using himself as the test dummy, and compliments her first attempt, saying she definitely cracked a vertebra and was close to doing it perfectly.
* Death. No one can live in his domain (literally), and he's batshit insane.
* Death Note 1st L had made provisions for his defeat; he has successors eager to avenge him and show their worth by defeating the one who killed their hero.
* Death Note (2017): Light's second victim with the Death Note is the criminal who ran over his mother and got away with it.
* Death Note (2017) Light Turner mourns his mother, who was killed by a criminal. When Light gets his hands on the titular Death Note and learns he can kill with it, one of the first things he does is kill the criminal responsible for his mother's death.
* Death Note 99% sure. So all that "5%" or "47%" or whatever meant he was almost totally sure every time.
* Death Note about to get L's real name off Misa when L saves himself by having her arrested, and by stealing her phone.
* Death Note about wanting to trade away half his life for shinigami wings.
* Death Note Abridged Parody Charleston VO because he has some kind of learning disorder, but it's never specified exactly what it is.
* Death Note admits Light and L were designed on opposite ends of the scale to better cloud the audience's perception of character morality. Light, who is "very evil", is often acknowledged to be a World Class Beauty, while L, who is "slightly evil", is anywhere between Ugly Cute and Normal Ugly. Alternatively, the Shinigami, who are neither evil nor good, are Clearly Inhuman, and the unseen Shinigami King is Lovecraftian.
* Death Note: After defeating L, Light spends the next several years comfortably dispensing his brand of justice without any intellectual opposition, feeding his god complex to the point he becomes reckless and prideful enough to believe he'll never lose. This likely factored into why Near and Mello were able to bring about his downfall.
* Death Note after L beats up Light, Light tells everyone that he fell.
* Death Note, after L's funeral, Light is given some time alone at his supposed friend's grave. Once he's sure no one's around, Light starts laughing maniacally and gloating about how he won.
* Death Note, Aizawa gets pumped up about going after Kira, and tells everyone to work hard, addressing them all by name… except for Matsuda.
* Death Note allows its user to not only kill remotely but also control victims' behavior shortly before they die. Light Yagami uses this ability to send a taunting message to L.
* Death Note all the main characters survive except for those already dead in canon.
* Death Note, although why they are suddenly investigating international cases instead of the CIA is never explained. (In fairness, American authors don't always get this right either.)
* Death Note, and all the Kiras (and most of the Kira Cult devotees) were gone, and the world was going (more-or-less) back to normal save for a few small remnants of the Kira Cult, it's likely that many countries were facing this issue.
* Death Note, and as an outrageously meta project, it's playing with it.
* Death Note and fifty additional innocent people then they could have the power of Kira.
* Death Note. And he loves mindgames. The Stealth Parody interpretation makes a lot of sense.
* Death Note, and Light's only complaint was that it was way ahead of schedule.
* Death Note, and most of the story is characters monologuing their mind games to themselves or the group.
* Death Note and played the Death Note's urban horror aspects up rather than the user's morality.

* Death Note, and Rem's comment that shinigami have "evolved" beyond the need for food, you get the impression that the Shinigami World was once a far less desolate place.
* Death Note and Shimura was deemed to not have the right personality, Ohba picked Higuchi to be Kira based on Obata's remaining designs for the Yotsuba Eight.
* Death Note, and that's a tiny fraction of the total people he will kill with the notebook over the course of the series.
* Death Note. And that's not even counting the countless other times Light has made morally questionable decisions in order to realize his dream of a perfect new world. The difference between his innocent, idealistic self and the person he becomes with the Note is startling.
* Death Note and the second a straight-up compilation of the second half of the anime.
* Death Note and trying to counter this. During the Yotsuba arc, Light and L also finish each other sentences out loud, showing just how much they think alike.
* Death Note, and watching Light scramble to come up with new plans is very entertaining.
* Death Note anime; Light and Misa both wonder who the other Kira is while drinking in the same coffee house.
* Death Note anime, soon after Near shows up, an American FBI agent identified as Rally Connors is introduced. The English dub changed Rally to Larry, a much more common name.
* Death Note a porn stash for his father (and the detective team) to discover.
* Death Note appears to end with the villain (and his fanboy successor) dying and the world returning to normal. Until that final scene revealing that a happy-go-lucky Shinigami was the sponsor for the fake Kira three years later, he liked the experiment, and he has an arsenal of Death Notes just waiting for new owners. How did he get them? He bought them from the Shinigami King, who has no problem with selling each Death Note for 7 apples, and has not made any laws against this tourist trend. Which now means that Ryuk and hundreds of Shinigami will be sponsoring hundreds of nonviolent sniping killers, each with their own ideals and agendas, all of whom will inevitably duel and war with each other unless something goes horribly wrong. This is considered a fitting end to this dark series.
* Death Note apples! He practically has withdrawal symptoms if he doesn't eat any for a prolonged amount of time.
* Death Note. As a child, Teru did what he could to protect his schoolmates from bullies, and while he enjoyed some initial success, in high school, the bullies retaliated against him, prompting his mother to advise him to give up on his crusade. The narration points out that she did so out of concern for his well-being, but Teru decided that his mother had no sense of justice, and actually rejoiced when she was killed along with a few of the bullies in an auto accident.
* Death Note As long as he thinks he's being useful, he's a pretty good sport about it all.
* Death Note. At one point he put 64 cameras in his suspect's room only to take them out again later.
* Death Note, at the Yotsuba group's "meetings of death," one member, Hattori, gets scared of going to jail and says he wants to quit the meetings. After Higuchi warns him that a statement like that might get him killed and Ooi reminds him that he's too deeply involved to escape blame, he apologizes and retracts his statement, but later gets killed anyway.
* Death Note attitude towards her, even though she's actually more skilled than he is.
* Death Note because he wears a red striped shirt in the anime, and often gets fan-colored with red hair.
* Death Note. Because of his line of work, he is perpetually in danger and so doesn't get out very much. He also lacks charisma. Both of these factors mean that not only does L have no canon romantic relationships, but also no real friendships, either.
* Death Note becomes this in his attempts to stop Kira's rise to power.

* Death Note, being an important example of a sane Kira supporter who is established to be on the same intellectual level as Light (albeit only academically). In her profession as newscaster, rather than helping to secure society against the Kira-cult, she becomes one of its major propagandists.
* Death Note. Both are fiercely loyal to Kira and work together as a team without even meeting each other.
* Death Note, but are still thought to be one of the coolest things in the world by fans of his.
* Death Note But Really Really Slow" has Kira describe the Death Note in this way.
* Death Note can be described as Kira-sexual or Light-sexual. (Although if she had to choose one or the other, she'd choose Light.)
* Death Note changes Light's surname to "Turner" instead of "Yagami" and Misa's full name to "Mia Sutton."
* Death Note chapters). Entire subplots are also cut out, like Mello using the Death Note to threaten the president (which ultimately results in the president's suicide and him being replaced with a somewhat spineless successor who decides to disband the SPK)- the aforementioned episode that jumps over 9 chapters. In another case, Mogi is temporarily held by Near when Demegawa's mob invades SPK headquarters, and is falsely said to have died, which helps lead to Aizawa cooperating with Near. The anime also significantly plays down the debate over the political and social implications of what Kira is doing.
* Death Note chapters. The anime, on the flip side, shoehorns as many as nine manga chapters into a single episode.
* Death Note character designs attracted female fans by the bucketload.
* Death Note claims to have had a mathematical formula for converting between human and Shinigami timekeeping systems, but he's forgotten it.
* Death Note comes off as something of a father figure to the other task force members, or at least Matsuda.
* Death Note confesses that this scene was drawn just for the visual image of L flat on his ass.
* Death Note could probably be seen as deconstruction: when it comes to committing crimes without leaving evidence, it doesn't get much better than giving people fatal heart attacks by writing their names in a magical notebook, right? Well, enter "L", the world's greatest detective, who in one bold maneuver narrows the field of search from the entire world to a small part of Japan and comes up with some pretty good insights into the background and character of Kira based on who died when and how.
* Death Note does this repeatedly with Light when he uses the Death Note.
* Death Note does this to gauge reactions from other people, helping him read them more easily.
* Death Note dramatically. Doubly so for the scientist that injects himself, it takes him like 5 minutes in completely agony to die!
* Death Note: Early in, Light sets up a system that will ensure the Death Note is destroyed in a fire should anyone try to search his room for it. The system never actually gets used, though, because Light judged it more trouble than it was worth and quietly defused it.
* Death Note ends in a black screen, an ominous "Tsuzuku" written in the lower-right.
* Death Note ends many episodes on the note of a disembodied bell — then there are the symbolic bells that appear in Episodes 25 and 30.
* Death Note ends with "And remember, this will be the last time you'll be seeing this."
* Death Note episode 14 (Friend), Misa jumps onto Light, pushing him to the ground. Needless to say, Light is not amused.
* Death Note Equestria is strongly implied to have developed an outright drinking problem because of Kira's actions.
* Death Note Equestria is whispering instructions to Dash to meet up and explain what's happening.
* Death Note Equestria managed to do this prior to her death... with a bag of

potato chips.
* Death Note Equestria — it's hard to say if Kira!Twilight would react the same.
* Death Note Equestria/Second Kira's less-justifiable murders ruin her image. Though according to Discord, she's still universally popular among the griffins.
* Death Note Equestria, there's an old earth pony bunker underneath Ponyville town park that L uses as a base for herself and, later, the Kira investigation team.
* Death Note Equestria: There's quite a bit of friction between the Royal Guard and the Canterlot City Guard (police) over the Kira investigation.
* Death Note establishes early on that the only reason humanity even exists is to act as a food source for death gods. The penultimate chapter goes the extra mile by stating in no uncertain terms that there isn't even an afterlife to look forward to.
* Death Note: Even though Rem was a female Shinigami in the manga and anime, she was made a male in-voice-only. The rest of her feminine-looking design is kept exactly the same.
* Death Note, everybody starts to look like a nail, and the role of a killer comes to define you, and your ethics are perpetually in crisis... most people don't have Light's perfect narcissism, and kill themselves fairly quickly.
* Death Note features a lot of this between L and Light. This is consistent across all adaptations, from the original manga to the drama series.
* Death Note Fem!Raito gets even more interested in L when her attempts to seduce him (so she can win as Kira) don't work, and in fact he's noticed many for what they were. In chapters 1-2, she notes herself as far out of his league, when by the fourth or so she admits she finds him attractive too—but still wants to win.
* Death Note fits this trope. So do most of the Shinigami, especially Ryuk.
* Death Note flustered before declaring his intent to find the culprit. Shortly after that, Light discovers that L has somehow gotten his hands on one of Misa's cell phones and realizes that L must have taken it in the confusion.
* Death Note followed by a short breakdown. Light does his best to convince him there's no such thing as shinigami, while Ryuuk grins in the background.
* Death Note follower Teru Mikami, announces that Kira is going to kill lazy people as well... because Light considers the move premature. Once all the criminals are dead and Kira is regarded as God, Light fully intends to prune out other undesirable elements from "his" world.
* Death Note following a failed operation against the mafia (one that may or may not have been caused by the actual Kira writing in the Death Note).
* Death Note. Furthermore, L even states clearly, in a loud voice, that he thinks Light's answers are absolutely flawless, and that he would not expect less from Kira. He mostly seems to do that just to push Light's irritation to the point he would make some mistake.
* Death Note gains these eyes at one point while going for some dramatic kills. Light tends to do this, as well, to reflect his Kira persona. Mikami and Misa, too.
* Death Note gets a lot of this, helped in no small part by its morally ambiguous characters.
* Death Note grow suspicious of him - well, he was always one of the top suspects to be Kira, but he managed to trick them with so many fake alibis that they had long since written him off as a red herring. At any rate, one of them later goes into the hotel room he was in and uses the writing indentation clue on the notepad he was writing instructions to his agent on — Light grew so overconfident that he stupidly forgot about this little trick entirely. While the actual content of the indentations wasn't particularly damning, the fact that he was trading secret messages instantly tipped them off that he'd been throwing up smokescreen misdirections, a red flag that he actually was Kira.
* Death Note had some noir traits, including the chiaroscuro lighting, moral ambiguity, and dark themes.
* Death Note had the entire left side of his face burned off in an explosion, yet his eye is completely intact and able to blink.
* Death Note has a meeting with the police to tell them about her deductions in the

case of Kira. All of which would point to Light Yagami would the taskforce know about them. However, as this happens in volume 2 of 12 she is killed by Light before she can talk to the police.
* Death Note has an irregular number of episodes, this could be an issue.
* Death Note has a note by the narrator in the final chapter saying that, if he had more time, he would write about two other stories L told him. A pretty blatant set-up for more novels like it.
* Death Note has a really nice Ryuk handpuppet sold in shops. A Death God with a short attention span and worrying lack of morals... in puppet form. How cute.
* Death Note has a strong theme of characters eating a trademark favorite food while very important things are happening.
* Death Note has a thick mustache, and he would go so far as to ride a truck inside a building to prevent more killings from happening.
* Death Note has gained diplomatic immunity by becoming ambassador for the Shinigami Realm.
* Death Note has Misa in one scene hiding like a scared cat, while L and Light punch and kick each other.
* Death Note has Misa taking over the role of Kira and singing a nursery song in the "I'm watching you" vein while occasionally killing those around her.
* Death Note have hilariously summed up the series by putting two such alternating shots together with the altered dialogue.
* Death Note have themselves admitted that they are undecided whether the Death Note that Aizawa was holding at the warehouse was real, or if Light's bluff about it being fake was true. They claim that if the book was a fake, the real one is still out there somewhere, meaning "Ryuk could return somehow..."
* Death Note having sex. Light says the trope, and it takes L a few repetitions to realize he's screaming "Kira".
* Death Note, he claims that his ascent to Godhood and becoming Kira was a purely selfless and altruistic act on his part.
* Death Note. He dies within the minute, while the surrounding police officers are running like headless chooks and trying to stabilise him.
* Death Note He has fans in and out of universe who also agree with him.
* Death Note. He is the third-smartest student from Wammy's House, but would much rather be playing video games than doing just about anything else.
* Death Note) heroic use of this when L takes over the airwaves of Japan's Kanto region (but pretends to be doing a worldwide broadcast) and broadcasts his challenge to Kira. The Japanese national police, however, are responsible for actually taking over the airwaves.
* Death Note he's clearly entertained to watch Light manipulate Naomi Misora on the monitors.
* Death Note he's legitimately horrified by the notion that he could be the infamous serial killer Kira.
* Death Note his deduction. Not unreasonable, given that Kira is using a magic killer notebook to commit his crimes. Without proof, who would believe that?
* Death Note: his foe is the world's greatest detective who has to figure out the notebook's rules and stop him.
* Death Note, his robotic, stone-cold personality... it's hard to tell how good Near really is. However, much of his goal is to avenge his mentor L, and "How to Read" confirmed that he is a sensitive person.
* Death Note if the President fails to comply with Mello's demand to fund the Kira investigation. (It isn't known if Mello really meant it, or if he was just bluffing.) Note that it likely would not have worked even if he had tried it, because one of the rules is that you cannot use a Death Note to kill someone indirectly.
* Death Note II: The Hidden Note, gets killed by multiple bullets in the back and bleeding to death. In front of her daughter.
* Death Note II: The Hidden Note has William Cattlefarmer. He's an actual character and is somewhat important to the overall plot.
* Death Note II: The Hidden Note, the first chapter spoils what happens at the end

of the original story. Which ends up becoming a plot point.
* Death Note II: The Hidden Note, the main character KJ was born with Shinigami eyes. Which means that if he gets a Death Note, he can easily kill anyone he doesn't like with one just by looking at them without the cost of half his lifespan. The good news is that KJ is a lot less trigger happy than his father when it comes to killing people.
* Death Note II: The Hidden Note the reformed SPK get a DVD supposedly from the new Kira that's in two parts. The beginning of the second part mentions how the other members probably had to hold back Near from trying to break the machine after he mentions how he was responsible for his wife's death. Which is exactly what happened.
* Death Note II: The Hidden Note. We often learn a little bit about the start of the plan, but not how it's supposed to play out.
* Death Note in a false bottom in his drawer rigged to incinerate the Death Note if it isn't opened properly. He also pulls the handle of his door upwards after leaving, along with putting a small slip of paper in the door, because he knows that if his mother, father, or sister were to enter the room, they'd trip the paper-defence, but not notice the paper. When he finds the paper still in the door, but the handle moved, he knows that his room has been searched by pros. He's also got the pencil lead on the hinge that breaks when the door is opened (the pros didn't find that).
* Death Note included in the "How To Read" book, the Shinigami King has reversed the "no new Death Notes" rule he put into place in reaction to Ryuk's shenanigans. Now, he'll give them out for two apples from Earth. Even beyond the fact that apples aren't exactly expensive or uncommon, shinigami are invisible and able to become intangible at will; it'd be trivially easy for any of them to just steal any number of apples.
* Death Note inconsistently fall into this, since Ryuk wrote the rules in English specifically so humans could understand them. Presumably he calculated shinigami time spans into human measurements where appropriate as well.
* Death Note, in order to provide himself with a healthy balance of sleep, homework, and death.
* Death Note In the anime, as he's laying on the warehouse ground riddled with bullet holes, he desperately calls out for Misa and Takada, begging to know where they are. Gone from a total egomaniac who thought he had everyone on puppet strings to a terrified young man with just mere minutes to live.
* Death Note in the final episode. He definitely shouldn't have gloated without double-checking that he'd accomplished his victory conditions and within earshot of an armed investigator.
* Death Note: In the Mello/Near arc, Light's college sweetheart and Kira supporter, Takada, threatens to kill him if he doesn't get rid of Misa, his longtime "girlfriend" of the series.
* Death Note, in the video, says, "Now, Matsuda-san, don't be so impatient."
* Death Note into it will die, so long as the writer is thinking of their face while writing.
* Death Note involves this. At first, Light receives the Death Note but thinks it must be a prank. He tests it out on two people and finds out that it really does work. At this point, he decides to kill criminals, but then the police start to get suspicious, so he starts killing people who are connected with the investigation, as well as criminals.
* Death Note in which Light and L deal with the aftermath of a college frat party.
* Death Note in which Light wins and lives to be an old man. He instructs Ryuk to go ahead and kill him, which he does. The rest of the chapter includes all of the deaths Light had written being inflicted on him. In the sense, he is becoming a Shinigami himself and is enduring the deaths of all his victims.
* Death Note is able to manipulate Ryuk into helping with his plans for once by denying him apples, and any time he's had to go without them has been treated the same as some form of withdrawal. This is one of the few times a shinigami has a direct effect on the story.

* Death Note is a book that when you write someone's name in it, they die. If you write in how they are to die, provided it's feasible they will die in that manner and time, otherwise they die of a heart attack by default. Given that the only requirements are that the victim dies within and everything written is physically possible the writer can exert a lot of control over the victim's final days.
* Death Note is basically built around this rule, as much of the entertainment derives from Light and L's clever use of the rules of logic and (in Light's case) the rules of the Death Note.
* Death Note is deliberately arranged to take place in an abandoned warehouse with no windows and a single entrance.
* Death Note is devoted to Mikami's history, explaining why he embraced Kira so easily.
* Death Note is like this. While he'll bang on about how he's going to be a god, and how the world will be far newer under his divine guidance, what really drives him is the challenge from people who can match him. Watch and see.
* Death Note isn't exactly well-liked in-universe (having literally no friends and no social skills), but he is probably the most popular character with the fandom. Even those who don't like him do tend to have respect for his professional abilities.
* Death Note is pretty much universally gay in fanfics, and generally doing a terrible job of hiding it.
* Death Note is shown to be a brunette and probably wears contacts as well.
* Death Note is standing by water, surrounded by doves — except that his reflection is surrounded by crows instead.
* Death Note is such a ham that he'll "take a potato chip.....and EAT IT!"
* Death Note is that the character he most resembles is Light, "because I did well at school". He also says that he chose the kanji "moon" to represent Light's unusual name because he wanted the meaning to be "moonlight". This all falls into focus when you find out that Ohba's given name Tsugumi, usually rendered in phonetic hiragana, translates in kanji as "beautiful moonlight" (美月光)! It's a penname, of course, but still an amusing backstory.
* Death Note. It also doesn't help that he's working with (or, as it turns out in one case, against) people like Light, L, Near, and Mello.
* Death Note, it became canonical that L has some knowledge of that particular martial art.
* Death Note. It does work, but not as successfully as he'd hoped; he counts the small victories until he has to concede defeat.
* Death Note. It isn't a particular murder, but a massive supernatural killing spree...but the killer is still called in to investigate.
* Death Note, it looks like Mello's mafia hideout is set up in one of these. The room where he has the confrontation with Soichiro looks like it was once an operating room, complete with tiles and a surgical lamp.
* Death Note kills without leaving any physical traces, so L had to look for a culprit based on why the killings occurred the way they did. On the other hand, L was able to use forensic evidence against Misa because of the traces she left on the Second Kira tape, even though she had arranged for someone else to get their fingerprints on it.
* Death Note: Kira gets much of the "evidence" for his executions from reading about them online. At the end, there is mention that people will sometimes post things about another person in the hopes that Kira will take notice and kill them.
* Death Note, L brings in prisoners from death row to scout out things he feels is likely to lead to death. For instance, he introduces "himself" as Lind L. Tailor, who is actually one such convict as a decoy to test the mysterious Kira's ability to kill people and to prove Kira's existence to Interpol.
* Death Note, L does this, all without so much as looking away from the evidence received from the tape sent by "Kira".
* Death Note: L does this to Light quite a bit to see if he slips up by saying something only Kira would know. For example, showing him three suicide notes Light

had some criminals write and seeing if he can find the secret message Kira inserted into them to taunt L, who has intentionally given Light the notes in the wrong order. However, Light is also a supergenius, and quickly figures out what L is up to, and hence doesn't expose himself (by putting the notes into the right order or being surprised when L introduces a fake note to the mix). Partially subverted anyway. It takes a bit for Light to realize that the fake note makes sense, and L ends up being slightly more suspicious of Light than he was before the test.
* Death Note, L gives a rousing speech to the task force right at the beginning of the show.
* Death Note. L haunts Light in this fashion right up until Light himself is killed. Though it's up for debate whether the entity Light is seeing is actually L's ghost, or whether he's merely hallucinating.
* Death Note, Light, acting as L, "advises" Near to escape from a situation Light himself created to trap him. While smirking. Near crushes the toy in his hand at Light's brazenness in barely even trying to hide his satisfaction.
* Death Note, Light, after giving up his memories of the Death Note, comes up with a theory that Ryuzaki is Kira and framed him for it.
* Death Note Light believes this. In the manga when he meets Misa who is madly infatuated with him he thinks "I can't develop feelings for her. That's how idiots get caught."
* Death Note: Light gets L's attention, L turns around, Light punches him hard in the face.
* Death Note, Light has an elaborate setup to hide the Death Note. It's in a drawer, under a false bottom, with a circuit underneath the false bottom, around the Death Note. There is a rubber pad that keeps the circuit from being completed when the false bottom is down; the only way to take it out is to slide the ink barrel of a pen through a small hole on the underside of the drawer to block the circuit and push the false bottom up. If the circuit is completed, the Death Note will be ignited. This way, even if they suspect that he's Kira, even if they know about the Death Note, even if they realize that there's a false bottom on the drawer, the Death Note will be reduced to ash and they will have no proof.
* Death Note Light is almost a different person, horrified by the idea that he could have been Kira), but other characters claim it's a natural result of Light's extreme personality being given such a dangerous item.
* Death Note Light is angsty and brooding and Ryuk is gentle with him.
* Death Note. Light mentions that most people would expect the #1 greatest detective in the world to be more detective-y. Instead, he's a barefoot young insomniac with a sweet tooth, non-existent social skills, and extremely poor posture.
* Death Note, Light planned on using the power of the notebook to "cleanse" the world of evil by killing criminals worldwide and scare people to behave under the threat of being killed themselves.
* Death Note Light pursues "the Lovesick Moron Plan" sending L sappy poetry and spending all his money on sending him flowers and candy that he knew would be immediately rerouted to forensics.
* Death Note, Light sounds like he's about to cry, only to break into psychotic laughter.
* Death Note lights up a cigarette in a hospital room he takes that as "proof that the civilised world has laws for the masses and laws for me."
* Death Note: Light Up the New World shows the second logo as usual. But when it gets to the Nippon TV logo, the text underneath suddenly changes into the Shinigami language.
* Death Note: Light Yagami and all other Death Note users definitely qualify. They can kill anyone whose face and name they know, but are no more bullet resistant than anyone else.
* Death Note, Light Yagami claims that if Kira is caught, he's evil. However, if he isn't, he is justice.
* Death Note Light Yagami determines that not even the genii of Wammy's House can withstand the mighty stealth powers of the "magic hoodie" that somehow renders him

unrecognizable whenever he goes out to do nefarious things.
* Death Note: Light Yagami is made more sympathetic in the anime adaptation of the manga by changing his second murder from the killing of man who is sexually harassing a woman to the killing of a man who is attempting to rape a woman.
* Death Note: Light Yagami uses hidden dirty magazines as an excuse for making sure other people haven't entered his room. When L, his father and his sister Sayu see this, they don't see the Death Note, thankfully, but they do accuse Light of being a pervert (L even remarks it's perfectly natural for someone his age).
* Death Note Light Yagami wants to know this. Also L doesn't get the respect that he deserves (i.e. absolute best at his job with a 100% win record / never lost a case) because he's openly gay.
* Death Note L. Interestingly, though, whenever Light is being particularly evil, his face tends to twist into asymmetrical grins and other bizarre expressions that utterly break his boyish handsomeness.
* Death Note: L makes his living this way, though he's such a good sleuth that the world's police forces often officially hire him to help on particularly tough cases.
* Death Note. L only had a few assumptions about Kira: that he can kill people without being present, that he won't tolerate being called out, and that the earliest death possibly related to Kira happened in Kanto, Japan. Thus, L decides to fake a worldwide Interpol announcement, with a criminal posing as L and taunting Kira. The announcement would only be broadcasted in one place at a time, so that when the criminal would be killed (presumably by a pissed off Kira), L would know where he lives in. The plan works as intended, but L did not expect that the seemingly random death in Japan was actually going to be useful.
* Death Note: L's televised challenge to Kira was already specifically targeted at the Kira killer, but what makes it this is that it was touted as being world-wide, but actually only broadcast in the area where L suspected Kira lived. When Light falls for the bait and kills the false L, he narrows down the search considerably.
* Death Note, L uses a polygraph on Light. He does not do so in the anime or manga.
* Death Note. Made even more awkward by the fact that his father is one of the investigators watching the tapes.
* Death Note manga can be particularly guilty of this at times. In the later volumes of the manga, the characters spend a ton of time out-thinking each other in a 3-way cat-and-mouse game, and all of the text used for that can be jarring, even though it's essential. To make it worse, it's complex enough that, if you blink and miss a crucial detail, you're totally lost.
* Death Note manga, some of Mello's dialogue was translated in this manner by some English translators, who felt that this was the best (or at least closest) translation to Mello's extremely informal speech pattern. (Only in some manga translations, not any official translation of the anime.) Interestingly, he seems to adopt a (somewhat) more formal speech pattern (and thus loses this one in the translations) after he gets hurt in an explosion he created.
* Death Note: Matt's apartment is littered with snack food wrappers and a cereal box, in addition to the wires associated with Matt's electronics. Surprisingly, his roommate Mello doesn't seem to mind too much.
* Death Note — Light's hunt for L's name — becomes quite pointless, since Dark can simply write "L" and kill him. Except...
* Death Note, Mello estimates the number of L's aliases to be somewhere in the triple digits.
* Death Note Mello gets caught in an explosion that gives him burns, but they're gone within a week.
* Death Note, Mello is last seen driving a truck with his captive Takada in it, thinking about Matt's death. The next time he's seen is as a dead body, when Takada calls Light to inform him that she was able to kill him with the Death Note.
* Death Note. Misa at least claims to be aware of this from the start, outright stating that she won't mind being used and cast aside if it helps Light's ultimate goal. Emotionally, however, it doesn't seem that she ever accepts that possibility, always trying to get Light to respond to her feelings. There's also the line from

her when they first meet, the wording of which boils down to 'If you even think about betraying me I'll sick my pet grim reaper on you'. Her 'feelings' are really more just precisely focused crazy towards the man she sees as God than any real romantic love. But YMMV on this one.
* Death Note: Misa cries that someone in a group of fans touched her butt. It was actually L, lifting her cell phone. Might have been copping a feel anyway, though.
* Death Note Misa does actually point this out, the main symbolic meaning is something else entirely.
* Death Note, most of the time they weren't even able to tell anyone if they wanted to.
* Death Note. Most of this Japanese series features a handful of Japanese police working with L to find Kira, though justified by the fact that Kira is in Japan, which L quickly deduces. At the same time, the America-specific version of this trope is invoked by several prominent appearances of American FBI and CIA agents, particularly Raye Penber and Near's SPK task force, who work independently of Japan. Light proves to be aware of this trope as well, as he considers it a crowning victory when the American president finally announces that his country will no longer try to oppose Kira.
* Death Note movies fell victim to this. In the film universe, the fan favorite L has a much firmer grip on the plot and greater impact on the ending. Then there's the entire original sequel in which L acts out various scenarios which seem to exist solely to fit the format "wouldn't it be awesome if L saved/met/ate/rode around in a _____?"
* Death Note. Not helping matters is they are all using a supernatural method of murder, which makes them much harder to predict or track down.
* Death Note Not long after that, he and Matt go and kidnap Takada, which results in both of them getting killed.
* Death Note offers to use one of these to keep an eye on a hostage crisis, but it's forgivable as it makes absolutely no impact on the plot.
* Death Note of rules, but the one that's best-known is the first: "1. The human whose name is written in this note shall die."
* Death Note, often acts as The Watson to Light's plans. That is, when he's not just standing behind Light silently chuckling. Or standing on his head.
* Death Note of the manga from Near and Mello's introduction onward (a whopping 59 chapters) into just 11 episodes.
* Death Note of them was willing to go so far. The others were just there because their lives had been threatened by the holder of the eponymous note.
* Death Note of the series, who tries not to let his parents and sister know that he is Kira... though not for emotional reasons so much as practical ones; his father is the chief of police.
* Death Note, Ohba and Obata left the answers to several questions (mainly about the ending) for the reader to decide.
* Death Note one guy kills himself by blowing his own brains out. Instead of showing his head asplode, they show an explosion of dice instead.
* Death Note. One of the most ingenious plot twists in a series full of plot twists.
* Death Note, only to be killed by the very deity that gave him the Death Note by making good on his promise to write Light's name in it.
* Death Note or put on something other than a baggy white shirt and trousers) when he's working on a case.
* Death Note. Otherwise, his family love him dearly (though they don't know he is Kira).
* Death Note, out of nowhere, L is piloting a harrier jet! (Wouldn't he have to sit normally?)
* Death Note picked up the rights, with Keith Stanfield, Paul Nakauchi, and Shea Whigham joining the cast and Jeremy Slater writing the script. Filming officially began in Vancouver on June 30, 2016 for a 2017 release.
* Death Note places a rule for using the Death Note in each of its eyecatches, much the same way the manga uses a page at the end of each chapter. The exceptions are

episodes 25 and 26, in which only "Death Note" is shown.
* Death Note playing a game during gym class, and opening a bag of potato chips at lunch. The effect is magnificently creepy.
* Death Note plays it straight with Light and Soichiro, while detective L's death is relatively peaceful (though still pretty dramatic). Mello's death, meanwhile, is significantly downplayed.
* Death Note plotline he instead has a quest to get himself worshipped as a god via a prolonged spree of mass murder.
* Death Note: Pretty much anything L does, Near's hair-twirling and playing with toys, and Mello's maniacal chocolate-eating.
* Death Note. Pretty much everything about him, from the way his face looks, to the way he sits, to the way he picks things up, is just a little bit off.
* Death Note probably counts, or at least the portion containing instructions on how to use it, as it’s a notebook used by Shinigami intended to kill humans.
* Death Note protagonist Light Yagami initially uses the Death Note to carry out such executions. Writing someone's name in it causes that person to, at minimum, suffer a heart attack within a minute. He starts with known criminals, but quickly escalates to anyone who gets in his way, even if they're law enforcement.
* Death Note raise a few eyebrows. And, well... if the teachers at Light's school had raised a fuss over a student bringing in a Death Note, it would've saved the SPK plenty of trouble finding him.
* Death Note Relight, is seen (pictured above) with goggles when he doesn't even have any eyes!
* Death Note - right after the Second Kira just killed a lot of reporters who disagreed with Kira - deliberately imperils his own life, John Hancock-style.
* Death Note's body was never found, but that was because Light stipulated in the Note that she would kill herself in a way that made her body unlikely to be discovered.
* Death Note seems to fit. He always seemed to want Light and Misa together, when really there was nothing there.
* Death Note - see the famous "I'll take a potato chip... AND EAT IT!" scene.
* Death Note Series because he's sick of those with connections abusing the law and getting off scot-free.
* Death Note series (by the same creators), in which several characters support seinen-type stories running in Shōnen magazines.
* Death Note, she goes back to the pigtails and it seems like any maturity she might have had vanishes into thin air.
* Death Note. She had left her job prior to the series, as the couple had apparently decided she should become a housewife after their marriage... but she was also clearly the better agent of the two and Penber would soon regret not listening to her.
* Death Note". She's fairly savvy and even cunning when she's being serious about things, but most of the time she's just too childish to be competent.
* Death Note: Shinigami can't have sexual relations with each other or with humans. Of course, there is a reason for this: If a shinigami falls for a human and then saves him/her from dying, they themselves die. According to How to Use: XXXVI, it's stated that it's both forbidden and actually impossible for shinigami to have sexual relations with humans. This double-emphasis may have been in an attempt to prevent speculation or curtail human/shinigami shipping, though you can guess how well that turned out… XXXVI also says shinigami cannot have sex with each other, though it is not clear if this is impossible or forbidden.
* Death Note, Shinigami have no need to eat, since their species can't be killed by any of the things that would typically result in the death of a human. Nonetheless, Ryuk enjoys gorging himself on apples whenever he gets the chance; unlike other examples of this trope, it doesn't make him more likable or more human. Since he's stuffing his face without purpose, it displays that Ryuk is self-centered and greedy, not helped by his table manners (he can eat an entire apple, core and all, in just a few bites) or the fact that apples in general have a drug-like effect on him. Other Shinigami also enjoy eating human food, offhand one of the Shinigami who

shows up later enjoys chocolate.
* Death Note sides are somehow conversing in thought, with Mikami mentally asking Light how he could move freely while Light mentally replies back calling him an idiot and what he's done wrong.
* Death Note so far but Watari, his guardian, wasn't) contemplating writing Light's name into the Death Note.
* Death Note, Soichiro was lying in the hospital bed and his death was shown by the long beep.
* Death Note somehow manages to make Kira look like a decent human being.
* Death Note. Somewhat justified in that there's no way Mello could have gone to a regular hospital under the circumstances, as a fugitive from the law.
* Death Note. Souichirou Yagami, the police chief in charge of the Kira investigation (and the killer's unknowing father), pulls exactly this speech to his subordinates, down to the letter of the trope. Most of them take his offer, and he's left with a handful of men, since the lack of apparent restrictions on who Kira can or is willing to kill has demoralized the police.
* Death Note, Souichiro Yagami insists on giving Light the talk while L listens in and gives his ever-helpful input on the matter.
* Death Note Special Chapter, Light Yagami went down in the books as one of the worst terrorists in modern history. There are still fringe groups that worship him as a god like in the old days, however.
* Death Note states that Light's memories of certain events are altered "so that they make sense". For example, he remembers the fact that he met Naomi Misora, but he doesn't remember most of their conversation, because the lies he told her would only make sense if he were Kira.
* Death Note Terrifying for some, but probably quite entertaining for others.
* Death Note: Teru Mikami is an inversion — he sees his mother as almost condoning the actions of evildoers by telling him that some things cannot be changed. When she is killed, he inwardly celebrates the death.
* Death Note that dropped he notebook that Light picked up, enjoys Light's plans and is always saying how close he is to Shinigami by his overall behavior. Three of Light's biggest supports are drawn to him because of what he's done and they personally share the same beliefs that he does, two of them are romantically interested him as a result.
* Death Note that ends with him lying on the floor in a pool of his own blood, screaming and begging for someone to save him as Ryuk makes good on his promise in the first chapter and writes Light's name in his own Death Note. The anime at least lets him get the slip from the investigation team eventually to die more quietly somewhere else.
* Death Note. That is, when pushed to a corner, Light abandons Social Darwinism and shifts to a mentality of "I am always justified no matter what."
* Death Note. That said, Ryuk's withdrawal can't kill him, nor can starvation, as he doesn't really need to eat.
* Death Note: The Abridged Series (kpts4tv) after being the butt of a certain fan joke one too many times:
* Death Note: The Abridged Series (kpts4tv)) and they go on to make many pornos together.
* Death Note: The Abridged Series (kpts4tv) as demonstrated when prank calling Light:
* Death Note: The Abridged Series (kpts4tv) is brought up again Near tells everyone he'll see them all in Heaven-except for Light of course.
* Death Note: The Abridged Series (kpts4tv) Light apparently fantasizes about getting kidnapped by a hot guy in leather. You can blame Raye Penber for the stalking fantasy and Ryuk for the leather fetish.
* Death Note: The Abridged Series (kpts4tv), Matsuda does this when L proves that Light is Kira.
* Death Note: The Abridged Series (kpts4tv) Mr. Yagami begs Mello to kidnap Light as well:
* Death Note: The Abridged Series (Kpts4tv) Rem blames Light for Misa's stupidity

and demands that he save her "or I'll rip your face off."
* Death Note: The Abridged Series (kpts4tv) so he truly doesn't understand that he's doing anything wrong.
* Death Note: The Abridged Series (kpts4tv), Soichiro complains about this.
* Death Note: The Abridged Series (kpts4tv), when the Kira Taskforce discovers how much money they could get for fire insurance they all agree they should burn the old HQ to the ground.
* Death Note: The Abridged Series (kpts4tv) where Matsuda questions how L got a camera in the Yotsuba Group's meeting room.
* Death Note, the animation shifts to a far cutesier shoujo-esque style for the scene where Light is tutoring his younger sister Sayu.
* Death Note, the Anti-Kira Taskforce gradually becomes this as Kira's rule spreads and gains support, especially after the US of A stops opposing him.
* Death Note, the cult of Kira is being broadcast live worshipping him. Since they are presented as basically a scam, Mikami uses his death note to kill all of them. After their gruesome heart attacks, the screen changes to a "cutesy" "be-right-back" message.
* Death Note. The drama, by contrast, draws more attention to the amorality of his actions and he is generally far more smug and arrogant than most portrayals.
* Death Note: The first opening has a blink-and-you'll-miss-it moment where a glass statue of Light falls to the ground and breaks.
* Death Note: The live-action movie gives us the Spaceland bus driver describing Light as "quite a good-looking guy — not that I'm into guys..."
* Death Note, the most visible case being the broadcast of L's taunting of Kira - visible not only on TV, but also on large outdoor screens.
* Death Note: The Musical of the original manga or anime when he was offered the job. He was convinced by his teenage son, who said it'd be "the coolest thing he'd ever done."
* Death Note the President doesn't comply with Mello's request to fund the search for Kira. It's not known whether the threat was real, or whether Mello was just bluffing.
* Death Note there is still speculation that it wasn't Light's hallucination but L actually staring at him supernaturally.
* Death Note there knows who he is... or really cares what he's done... or thinks he might try to escape. He's simply trying bluffing or reason (it's ambiguous) on the wrong people.
* Death Note. The same goes for Teru Mikami, who takes it further with his hair hanging over his face and his eyes turning red.
* Death Note. The Shinigami King is also bribed with two apples per Death Note.
* Death Note, the task force is too busy watching daytime TV to notice a murder occurring across the street.
* Death Note. The trope is played with; L views himself this way, but is actually similar to his opponent.
* Death Note. The unknown person killing criminals throughout Japan is called "Kira" by the media, but Light notes that it's supposed to be "Killer". In the live-action movie, Lind L. Taylor is an American, and actually pronounces it "Killer" as he gives his speech challenging Kira.
* Death Note. They appear once, when Misa plays Ring Around the Rosie with Light and L.
* Death Note they reemerge, praying for Kira's return. Possibly a subversion since we never see them do anything evil themselves, but just worshiping an evil-doer.
* Death Note: They were having one conversation for the benefit of the Task Force listening in, while secretly writing notes to each other containing the real conversation.
* Death Note This is actually a common idea that fanfic writers have him use.
* Death Note. This is how he gets Misa and Takada to serve him. Or rather continue serving him, given that they were Kira loyalists from the outset.
* Death Note. This is likely due to the similarities they happen to have, most notably that they're both feminine-looking blond-haired guys. By extension, their

partners in crime, Matt and Sasori, get shipped too, though very rarely.
* Death Note This loophole is actually canon-it's Rule 34 of the Death Note: "1. The owner of the Death Note cannot be killed by a god of death who is living in the world of the gods of death. 2. Also, a god of death who comes to the human world, in the objective to kill the owner of the Death Note, will not be able to do so. 3. Only a god of death that has passed on their Death Note to a human is able to kill the owner of the Death Note."
* Death Note, this was the basis for all of Beyond Birthday's clues: "Something that should be there, but isn't."
* Death Note. Though Light already figured that to be the case on his own.
* Death Note: Though Light is one of the suspects of the Kira case from the very beginning, his father's status as the Chief of Police is what protects him from being seriously considered as such by the normal police and he knows it.
* Death Note, though most of them fall on his shoulders in the fan's eyes.
* Death Note tie in novel L: Change the World mentions that L's first solved case was that of the Winchester Bombings, the solving of which averted World War III. He solved it at 8 years old and met Watari shortly afterwards. The date is unclear, but is unarguably between 1987 and 1988.
* Death Note to discover who he is). In the manga and anime, he says he didn't know.
* Death Note to him so he can't act as Kira. This backfires on him because it allows Light to come into contact with the Death Note again.
* Death Note true this is, given Light's original plan called for pursuing good PR and silencing critics in ways not immediately identifiable as his work, and the camera focus doesn't really give us objective data on what's going on worldwide, but at the least there are no wars and organized crime has been driven pretty far underground.)
* Death Note used to be an amateur sleuth, but now he is now a very clever serial killer.
* Death Note uses a uniquely designed flip phone that, according to the writers, was meant to look like what a cell phone might look like in the far-flung year of 2009 (the manga ended in 2006). The first generation of smartphones showed up in 2007, and by 2009, it would be pretty hard to imagine a rich guy like Mello sticking with a flip phone unless he had some kind of strong personal preference.
* Death Note uses the notebook to kill off executives of rival companies along with criminals in order to make his own company expand and increase his salary.
* Death Note use toys, no matter the situation. Crucial discovery on the case? Special-order some interchangeable-headed action figures in order to demonstrate that. Angry mob baying at the gates? They're contemptible, and this must be illustrated by knocking down a circle of toy robots.
* Death Note visualizes himself and L doing this as imagery of their struggle against one another, using incredibly thin skyscrapers.
* Death Note wants to be the god of the world, which effectively is the same thing.
* Death Note wasn't gorgeously animated throughout, but episodes 1, 2, 24, 25, 36 and 37 still got a whole lot of attention by comparison. Episode 25 took it to another level of gratuitousness, with details such as Light's face being half-refracted through a glass table for no reason.
* Death Note well in their support of the lawful actions of the police force and the constitutional government of Japan.
* Death Note, when answering the questions L asks her about the Death Note. Lampshaded by L, who notes with minor frustration that Rem is avoiding answering all the really important questions.
* Death Note, when he arranges for a criminal to hijack the bus he's riding on, as part of a scheme to get the name of the FBI agent who's tailing him.
* Death Note, when Light plants porn in his room for the investigation team to find, to make it look as if that's what he's trying to hide. He's not actually embarrassed about it, but his Dad sure finds it awkward.
* Death Note when the central conflict has had a dramatic shift and he's not compromising himself to anyone present. Because, and this cannot be emphasized

enough, the guy is really, really crazy under all that suave manipulation.
* Death Note where L goes around introducing all of his coworkers and his rivals and his enemies to his "good friend" the prime minister.
* Death Note where L is shown to have no physical or emotional attraction to anyone other than Light.
* Death Note, where Mello represents Near's evil side, though this has yet to be confirmed.
* Death Note, where professional thief Weddy wears a classic '60s style catsuit (built-in high heels and all) while infiltrating a building, for no apparent reason. Possibly justified in that the series artist has admitted basing her on stereotypical female spy archetypes, but it still clashes with the feel of the story.
* Death Note where the closest thing to a God in the setting specifically created a new rule just to kill him.
* Death Note, which ironically leads L to think it might be real, as it is way too corny to be a performance.
* Death Note: While originally not even possible given the series' definitive, hard-line stance on death, supplementary material and OVAS has allowed fans a way to ship those who used the Death Note.
* Death Note who despises Kira's twisted, narcissistic brand of "justice", and is genuinely dedicated to finding and arresting Kira alongside L and the task force.
* Death Note who is perfectly able to manipulate practically everyone around him. By contrast, the protagonist of the Netflix version is smart, but nothing out of the ordinary, being manipulated instead by the live action counterpart of Misa, Mia.
* Death Note who, knowing full well what the consequences were, gave out his name and face after denouncing Kira.
* Death Note, who live by cutting the lives of humans short, and their world is a rather hellish place.
* Death Note, with a fairly even split between the two, he really goes out of his way with ugliness.
* Death Note, with an exchange that goes something like this (he wasn't holding anyone hostage)
* Death Note with massive spoilers, obviously. It's probably just as well for them that the final production toned it down a bit.
* Death Note, with reports that the American version will have a sequel.
* Death Notification: Breaking the bad news of a person's death to that person's bereaved ones. Usually done by a cop, hospital worker, or a relative.
* Death Nurse when his caseworker comes by to visit. Luckily for them, he was so sick he couldn't speak, so his silence goes unquestioned.
* Death occasionally shows signs of this as well, since he doesn't really understand life in general. He'll often take things one step at a time, with each step being logical, but the end result being ridiculous. For example, when he made a swing for his grand-daughter. He attached the swing to the strongest branch of the tree. Then he attached it to the second-strongest branch as well, for stability. These branches were on opposite sides of the trunk, so the swing wouldn't swing. So he removed the trunk.
* Death Of A Cheerleader followed suit, with Kelly Martin playing an FBI agent after playing the killer in the original.
* Death of a Child: If the death was homicidal, it very much qualifies as abuse.
* Death of a Child: When works don't shy away from depicting children dying.
* Death of a City uses CPR on one of her teachers after saving him from drowning in the sea.
* Death of a Cyclist's insistence that the Spanish film industry exclusively use pure Castilian Spanish.
* Death Of A Gunfighter actually praised Smithee's directorial work, though Ebert admitted that Allen Smithee was "a name I'm not familiar with". The version of the review on his website features a footnote noting the inaugural use of the Smithee name. Eventually "Alan" replaced "Allen" as the preferred form of Smithee's first

name.
* Death of a Nationalist Carlos Tejada shoots an unresisting suspect out of hand, because he believes she's guilty of murder. When he finds out that she was innocent, he devotes the rest of the book to trying to find the real killer. Throughout the rest of the series he tries to make amends to her family, with mixed results.
* Death of a Nationalist my time chasing after you to see you don't get in trouble."
* Death Of Antagonis contains a truly disturbing inversion where a particularly nasty Chaos Daemon manifests itself in the form of a gigantic worm made out of the bodies of every human being on the title planet.
* Death of a President (2006) — A highly controversial feature-film mockumentary, set in 2010, reflecting on the assassination of US president George W. Bush in 2007 and its aftereffects.
* Death of a representative icon of the genre, such as a visionary writer/director/musician/etc dying, or a major company with a focus on the genre shutting down.
* Death of a Salesman. By his own admission, Miller didn't really make the subversion of tragedy work out, as Loman is kind of a pathetic figure.
* Death of a Salesman does this while talking to his neighbor Charley: he imagines that his dead brother Ben is present and gets confused trying to converse with them both at once.
* Death of a Salesman, follows the series of events that would eventually lead to the death of a salesman.
* Death of a Salesman He's so disillusioned by the fall of his idol that he ends up dropping out and throwing away his very promising future.
* Death of a Salesman is so obsessed with his glory days that he occasionally flashes back to them. Whether or not the glory days actually had that much glory in them, or if Willy and his son are re-imagining the past is an important part of the story.
* Death of a Salesman. "Never fight fair with a stranger, boy. You'll never get out of the jungle that way."
* Death of a Salesman, where Willy Loman is told in so many words that he should give up his misguided dream of being a popular salesman and find a better life. This is further reinforced by the fact that the play makes it obvious he would have been far more happy and successful as a construction tradesman.
* Death of a Salesman: Willy Loman ends up killing himself, thinking that he will give his family a lot of money. At his funeral, at least one character points out that Willy could have chosen another path and have been happier for it. One of his sons, Happy, declares that he will succeed where Willy failed. He's blatantly ignoring the fact that Willy was no good at being a salesman and Happy has no reason to assume that he's any better, and that if any lessons were to be learned from events it was that it's more important to find something you're good at which makes you happy and look for success there, rather than follow someone else's idea of success.
* Death of a Shadow, Nathan is a ghost, more or less, who goes around capturing the shadows of people at the moment of their death. He casts no shadow because his shadow was captured from him at the moment of his own death. When the creepy man who collects shadows lets Nathan return to the land of the living, his shadow is returned to him and he casts one again.
* Death of a Thousand Cuts. In essence, Robb needed an obedient soldier, and Edmure gave him an ambitious warrior.
* Death of a Thousand Cuts with the added ability to recharge building shields and automatic targeting.
* death of Dr. Mc Kennah, where he was attempting to undergo a ritual to purge all emotion from himself.
* death of her father in a drive-by shooting, Ziva sits in a synagogue and asks for a sign that she should not give up hope. Her prayer is answered by the door opening, and her sign is...Tony, offering support for whatever she needs.

* Death of Personality: A living person is regarded as dead just because they've lost their self.
* Death of Personality: A person is physically alive, but their mind has been erased.
* death of Scolar Visari in the second game and subsequent insurgency mirror the death of Saddam Hussein and its aftermath, and the Helghast remnant in Shadowfall also draw from Palestinian Nationalists in their conflict with Israel alongside North Korea's conflict with the South.
* Death of Superman arc, a sheriff's deputy hears "that cartoon sound" before Doomsday falls on top of his cop car. Superman also makes the sound when he arrives to tackle Doomsday.
* Death often refers to something in this direction ("THERE IS NO JUSTICE. THERE IS ONLY ME."), although he strictly upholds the "law" of only "taking lives" and not ending them, thus being an aversion. He has also, over the course of his books, become quite compassionate. "WHAT CAN THE HARVEST HOPE FOR IF NOT THE CARE OF THE REAPER MAN?"
* Death of the Author, saying it's fine for fans to create their own interpretations.
* death of the Avatar's mother in a Heroic Sacrifice and stays like this until the end of the chapter, when their best friend Azura manages to get to them at great risk to herself.
* Death of the Doctor" does a single-character version of this by making it clear that Barbara Wright is still alive off-screen, contradicting the common dark fanon that gave her the real-life early death from cancer of her actor Jacqueline Hill, and blamed it on her irradiation on Skaro.
* "Death of the Family", an incredibly divisive arc which features the return of the Joker and loads and loads of death, violence and gore, with the Joker himself hitting
* Death of the Family, Batgirl acts like this to the Teen Titans. Kid Flash even tries to hug her...only to find out that she has devices on her suit to give people a shock!
* Death of the Family, Batman has an internal monologue about how the Joker's eyes never change, never revealing anything about his thoughts or emotions. Except for love for Batman.
* Death of the Family comes back, including the villains: Penguin, Poison Ivy and even Harley aren't exactly overjoyed to see him back.
* Death of the Family, Commissioner Gordon and the Gotham City Police Department is just going about their business...when Joker turns the lights off. By the time they get turned back on, Gordon is alive and surrounded by a lot of dead cops.
* Death of the Family ends up being the one to bring the Teen Titans and by extension the reader up to speed on what's been going on in the storyline so far.
* Death of the Family gets captured by the Joker and tied up. He manages to free himself.
* Death of the Family goes off on a rant in which he repeats the word "clown" several times and then goes on to point out that he doesn't really qualify as one, because he could never make someone laugh without a pharmaceutical push.
* Death of the Family, Harley Quinn shows indications of this. She has tears marking her face, and she cracks jokes as she tries to survive to be around Joker. Joker, once again, implies this about him.
* Death of the Family has not only taken over Arkham Asylum, but he has blackmailed the guards into working with him.
* Death of the Family, in a deliberate homage to the above examples (even ending with "the Joker has spoken", as he did in his first appearance.)
* Death of the Family: Interestingly enough, Batman has taken this attitude towards Joker, and is even turning down the Batfamily's offers to assist him. This may come back to haunt Batman....
* Death of the Family: It's debatable if Joker could be considered ugly most of the time. What's not debatable is that this time around, he is ugly, thanks to wearing his face-skin like a mask!

* Death of the Family, Ogilvy, took advantage of the situation to steal his boss' position as top crime boss of Gotham, coercing the loyalty of Penguin's lieutenants and buying out all his assets. By the time Penguin realizes what's happened, he's been rendered homeless, powerless, and completely broke.
* Death of the Family produce this reaction with the fingers on one hand!
* Death of the Family, to the horror of Gotham. His first act is an assault on the GCPD resulting in the murder of 19 officers.
* Death of the Family, who spends the milliseconds of Joker's swing to decide how to fake the impact in a convincing way.
* Death of the Hypotenuse: A love triangle is resolved when one of the two suitors dies
* Death of the Hypotenuse: A person has two love interests and one of them dies.
* Death of the Hypotenuse dies, leaving the other two free to be together.
* Death of the Hypotenuse is caused by some unrelated reason that frees him to do what he wants.
* Death of the Old Gods: The deities who once ruled the world dying or fading from existence.
* Death of the Old Gods: The idea that the gods of ancient mythology aren't around anymore because they're dead.
* Death of Wolverine arc, "Three Months to Die", Madripoor is given airborne nanites that translate languages, even though all the main characters are worldly people who have enough history in Madripoor to justify speaking whatever common language there. This plot device seems to mainly be included to excuse an alien device that motivates the climax of the arc being capable of communicating in English.
* Death of Wolverine: The Logan Legacy, with this as part of the reason.
* Death only becomes possible in Full Throttle in the endgame, when it's made blatantly clear that you're in a life-or-death chase sequence.
* Death on the Diamond, about a serial killer stalking the St. Louis Cardinals. Really!
* Death on the Nile, but in such a clumsy fashion that Poirot sees through it before it can be a serious red herring, and the other killer is actually afraid that the stupidity of it is going to end up working against them.
* Death on the Nile, Hercule Poirot hints to a businessman that he suspects he has been embezzling by telling him of a Pharaoh's servant who was crushed under a fortune of gold for stealing.
* Death on the Nile) is relaxing and drinking tea while riding a steamship down the titular river Nile. A group of young native boys run alongside the steamship, shouting and waving to get her attention in a seemingly-friendly manner. She smiles at the "charming little urchins" until they suddenly all turn their backs to her and drop their pants...
* Death on the Nile, Poirot causes one of the killers to break down and confess by springing the truth on them.
* Death on the Nile (see Literature) has someone aggravatingly slowly telling that she witnessed a murder. Her last words are "and I saw that it was - " before being shot in the head.
* Death On The Nile was one long Ham-Off between him and Windsor Davies.
* Death on the Nile, which reflects Christie having her husband Archie run off with a younger woman and her feelings about it at the time.
* Death on the Way. The police prove that one of their suspects faked his alibi for the time of the murder, and consider that this is sufficient evidence to arrest him. It turns out he isn't the guilty party—when he realised he couldn't prove his innocence, he panicked and constructed a false alibi.
* Death or Glory and proceeds to wipe the floor with most of the Alliance races with their massive armada, which no one somehow caught them building. Guess who's the only race to successfully resist the new empire? The other races are smart enough to realize this and try to work in tandem with humans.
* Death or Glory: Early in the book, Cain is in an escape shuttle. On two occasions (when he first jumps in, and when it arrives at Perlia) he refers to the large

number of contacts on the auspex ... and the fact that the escape pod's systems aren't set up to identify whether those contacts are Imperial or Orkish.
* Death or Glory, fights his way across most of a mid-sized continent and through the bulk of an Ork WAAAGH!, and kills the Warboss in charge in order to reach friendly lines, with the express goal of finding some tanna.
* Death or Glory, he promotes a lieutenant and a sergeant to manage his ramshackle army, and two artisans are assigned to help their only engineer (they end up becoming lay brothers of the Mechanicus cult later). The book also notes that these promotions would have to be finalized by the actual army since Cain as a Commissar is not inside the chain of command. However, denying promotions handed out by a Commissar would likely bring the attention of the Commissariat, which no one really wants...
* Death or Glory results in three members of a militia team being assigned to double sentry duty by the corporal in charge.
* Death Or Glory when the ship they're on (which was ripped out of the Warp long before reaching planetary orbit) has a hull breach and they can't get out of the area before the emergency bulkheads close. They consider it to be rather spacious and well equipped (because there are two of them in a life pod meant to hold fifty), which allows Cain to spend most of his time training and Jurgen with his collection of "artistic engravings".
* Death or Glory, whose vehicles feature a cartoon of a fox in a tanker's uniform). And of course Dreadnoughts, being Space Marines, tend to be brightly painted in their Chapter colors and heraldry.
* Death or Glory, who single-handedly organizes logistics for Cain's ragtag army with impeccable skill for several months. He's also quite easy to get along with and even has something of a sense of humour.
* Death (or temporary incapacitation, if using the Casual mode from later games) in battle tends to be represented in this in the gameplay, though the dying/injured units will generally get in a quote first.
* Death Parade are dramatic however one character subverts this trope— she simply slipped on soap and hit her head on the floor. Even she found her death embarrassing.
* Death Parade, Castra has dark brown skin and Ginti is noticeably darker than the rest of the cast as well. Neither are human like the others (they deal with the afterlife) and so like them they don't seem to have a particular race.
* Death Parade: Castra wears a skull helmet. It may be related to her job - she's an organization clerk for the afterlife and her alternate title is the Queen Of The Dead.
* Death Parade has episodes 3, 6 and 10, which have more optimistic or bittersweet endings and are more comedic or pleasant and relaxed than the show's usual dark and violent episodes that they follow. In Episode 3 the characters even comment on the relaxed nature.
* Death Parade: In Ep 6, when Mayu and Harada were playing the most insane game of Twister ever, after Harada pressed the green panel, wind started to blow them away. At the beginning, all it did to Mayu was lift her skirt showing her underwear, but then witnesses the full force of the wind, which caused her whole face to flap intensely until she pressed the blue panel which turned the wind off.
* Death Parade, in the afterlife, a man has the corrupt detective who didn't lift a finger to help his sister as she was being raped at his mercy and has the opportunity to torture him. Despite the Black-Haired Woman warning him that if he goes through with it, he'll be banished to the void and never see his sister again, he still does it.
* Death Parade: Mayu Arita died from slipping in the shower and hitting her head.
* Death Parade. Mayu died by slipping on soap and hitting her head, though this is treated more lighthearted than the other deaths.
* Death Parade so nothing can kill them, and the spikes turn into balls. She ends up peeing herself and is more distraught over that than that she died, and switches into a kimono for the remainder of the episode as her clothes are wet.
* Death-Para Machine, which had the power to destroy Earth's ozone layer.

* "death penalty" in 1987 - sanctions so harsh the program has never recovered from them. Neither did the conference; within a decade, the conference disbanded.
* Death, personally, dislikes this trope, feeling that on the long run, it only means less mail.
* Death Plus Ten Years interrogator wearing a white form-fitting mask which he says still gives him nightmares. His interrogator eventually tired of wearing it and had Cooper face the wall instead, warning him that if he saw his face, deliberately or otherwise, he'd push a pen through Cooper's right ear and out the other. Other interrogators never bothered with this, so it's likely the mask was due to paranoia (he was convinced Cooper was a British spy) rather than just to scare him.
* Death Proof (and the middle name is removed in the credits so she is Sydney Poitier).
* Death Proof and trapped her in his car, she reacts angrily at first and threatens to kill him. When she realizes she can't escape, she tearfully begs Mike to let her go and that she won't tell anyone. He mocks her situation before giving the death blow.
* Death Proof. Cue spit take when he sees the girls in their car speeding up in his rearview mirror, intent on revenge.
* Death Proof does this right by killing the 5 women we got to know for the first 30 minutes. It's then subverted in the second half.
* Death Proof Either way, the bulk of the movie is set in the scorching desert, in broad daylight.
* Death Proof ends with the heroines beating the crazed stunt driver to death - but makes no mention of what will happen when they come back from their test drive with major damage to the seller's car. Then there's the girl they left behind as collateral for the test drive, implying that she was a porn star...
* Death Proof features several cool cars, Dodge Challenger, Dodge Charger, Chevy Nova.
* Death Proof had slept with the girl. In the scenes afterwards, Reed says he did, but the girl says he didn't.
* Death Proof". In regards to the safety of the car, Penn said, "Well, you could take any car and give it to a stunt team, and for $10,000 or $15,000, they can death-proof it for you." The "death proof" phrase had stuck to Tarantino after that.
* Death Proof, introduced its characters concurrently with its plot set-up, and is generally considered to be the better-flowing of the two movies.
* Death Proof open about their sex lives ("He likes to watch me pee"), and Kim at one point in the final chase scene yells "I'm the horniest motherfucker on the road!" Not only do they live, but they also kill Stuntman Mike.
* Death Proof shock to the audience. Not to mention that the first group of girls are slightly repressed with their sexuality, whereas the second are more open about it - and survive.
* Deathproof shows clearly that even trained stunt professionals have a hard time hanging on to the hood of a car when there's a maniac slamming his car into yours at high speed.
* DeathProof, Stuntman Mike is perplexed when the girls finally turn the tables on him.
* Death Proof, Stuntman Mike's car is a souped-up monstrosity that tears through other cars while leaving its psychotic driver unharmed. Anyone unlucky enough to ride in its passenger seat also gets pulped by Mike's crazy driving, as the passenger seat has all of its safety features removed.
* Death Proof, Stuntman Mike smiles at the camera before getting in his car.
* Death Proof where they shoot the antagonist and then after he attempts to get away they actively hunt him down.
* Death Queen, organizing an all-out invasion of every corner of the domain, even destroying friendly settlements that provided resources to her armies!
* Death Race 2000: A financial crisis and military coup have devastated the US, turning it into a police state.
* Death Race 2000. Also, Frankie's rival Machine Gun Joe Viterbo and other drivers.

* Death Race 2000 event to pacify the population of a totalitarian United States of the future. As the name suggests, it runs from one side of the country to the other, though the focus is more on running over pedestrians.
* Death Race 2000 for what's clearly a fascist state. They're implied to rule the (former?) Soviet Union and China, because Mr President has residences in both countries capitals, while looking to wage new wars (France is blamed in the film for attacks by domestic rebels).
* Death Race 2000 has "The Swastika Sweetheart" Matilda The Hun from Milwaukee, an American city known for its large German population. She's an open Neo-Nazi, but it may just be for show.
* Death Race 2000 of 2000, this race rewards drivers for hitting as many pedestrians as possible.
* Death Race 2000, the idea of Frankenstein secretly being this trope is kept.
* Death Race 2000, the remake, was a watchable action flick (and featured the presence of Jason Statham) but felt like the soul had been ripped out of the concept.
* Death Race 2000. When the Resistance car chasing Frankenstein rolls over, it immediately explodes into flames for no apparent reason.
* Death Race 3: Inferno: One of the racers tries to get a head start on the others by driving off before the race officially opens. He just ends up demonstrating how effective the prison's guided missile system is to punish anyone who might have ideas of leaving the planned route.
* Death Race, a cool rap song starts playing over the action. Driver Psycho doesn't like the song, and asks his navigator to change the radio station. She does, and the song is replaced with a driving techno track that Psycho likes a lot more.
* Death Race, a "Race" actually consists of three separate races. The first two races are elimination matches where the only point is to survive/kill the other players to make the final round easier. Whoever places first in the final race is designated the winner and that race is added to their countdown to freedom. This means there is no reason to actually try to win as opposed to hanging back and taking out the other drivers or simply hiding until the coast is clear. Of course, this is pretty much Combat Racing Game: The Movie so no one ever figures it out.
* Death Race as his burning wreckage slides over the finish line in 1st place.
* Death Race for Statham's character, a getaway driver so skilled that when he tears around Terminus Island in a junker he inspires the Death Race sport to begin with.
* Death Race, four out of the ten cars present in the film have rotary guns — most M134 miniguns, but one has two M61 Vulcans.
* Death Race it was adapted from) runs on this trope. Given that the cars are driven by convicts, there are kill switches on the weapons so they can only be activated at certain times, so the drivers can't blast their way out of prison. Weapons range from .30 or .50 machine guns to rocket launchers and tank cannons.
* Death Race — Dystopian action series. 2 films and a 4-film remake series since 1975.
* Death Race. So instead of simply running him over when he gets the chance, Jason gets out of his car in the middle of a race, just to snap Pachenko's neck.
* Death Race to take out a pursuing car, and later having worked out that the navigator has sabotaged his vehicle, Jensen Ames forces a confession by driving under a low-roofed warehouse and threatening to eject her if she doesn't talk.
* Death Race, which is a more standard three-lap race around a closed circuit, with all of the vehicles heavily armed and all racers out to kill each other.
* Death Race, you have the heavily armored Dreadnought truck, a mobile hazard equipped with giant drills among its other weaponry. During the race in which it appears, the Dreadnought uses its drill to make a bloody mess of 14K's female navigator, before killing 14K himself.
* Death Rally affect the AI. If you can ram their cars into the pickups, they're actually affected worse than human players.
* Death Rally disables the sabotage option at the Underground Market if the player is going up against the Adversary. Of course, most players beat him by blowing up

his car, rather than trying to out-race him, anyway.
* Death Rally had various vehicles that could pick up weapons such as the Sniper and Striker.
* Death Rally, then you will visit the black market before each race. The market tends to sell items that are double edged swords, like rocket fuel that makes you go fast, but damages the your car when used.
* Death Rattle, a 1990s horror anthology comic series with some recurring characters/storylines (such as the Alcoholic Janitor).
* Death Rattle, where a drugged-up horror movie fan tries to live out his fantasies by attacking a woman with a chainsaw...which gets lodged in a table and immediately sputters out. He laments that this never happens to Leatherface.
* Death Ray and the heroine rates it as about as powerful as one of her "Starlight Kicks" — and the exit of that scene leads directly to the heroine in a cafe saying "Crazy dream, huh?" to her best friend. He's flabbergasted and falls for it, and chides her when she says she was joking, this stuff really happened. This is Hatoful Boyfriend, after all - bizarre is everywhere.
* death related spirits, which makes the maggot origins and synonimity with the dark elves all the more evident.
* Death Ring (1992): Ex-Green Beret Matt Collins is kidnapped along with his fiancée, Lauren Sadler, by crazed hunter extraordinaire Danton Vachs. Every year he holds a contest where people can purchase the right to hunt down and kill a human being. This time, Collins is to be the hunted. Vachs uses Lauren as motivation for Collins to really fight to survive and thus provide the buyers with a truly exceptional hunt. Collins is turned loose on an uncharted island and four killers set out to find and kill him.
* Death Ring. During their fight, he grabs her and hurls her bodily out of the upper storey window.
* Death Ring, Lauren goes down immediately when a chloroform rag is clamped over nose and mouth. Matt takes longer, and the kidnappers habe to physically hold him down and hold the rag on his face until he passes out.
* Death Ring, Matt does this to one of the sentries when he sneaks back into Vachs' mansion to rescue Lauren.
* Death Ring: When Temple learns that he and Iceman are the only hunters left in the contest, he pretends to cooperate with Iceman, and then garottes him: leaving him with a clear run at Matt.
* Death Ring: While fighting Matt, Mr. Chen steps steps in the snare he avoided earlier and gets yanked into the air.
* Death Road to Canada are more powerful than the average pistol, at the expense of firing slower and holding less ammo. They're better as early-game weapons where saving ammo is more crucial and where the Shooting stat is a bit underdeveloped. In the endgame, it's better to switch to pistols with higher reserves, assuming one's shooting stat has improved.
* Death Road to Canada contains multiple references to Barack Obama, who was president at the time of the game's release.
* Death Road to Canada has recruitable dogs that you can find in abandoned cities. They can go scavenging with their human party members and can attack and kill zombies, but they can't be equipped with weapons. They come in a variety of breeds, but they are just cosmetic and don't influence gameplay. If the human members of your party die, the dog(s) will continue their travel to Canada by themself, and that includes driving a car.
* Death Road to Canada in a trench coat. When defeated he will split into three dogs. You can keep the other three if you have room in your party.
* Death Road to Canada, Irritating characters (or characters with a supremely low Wit and Attitude stat) have the ability to annoy bandits, traders, NPCs, etc. This often ends poorly. However, doing this a third time in a row yields tremendous benefits (indicated by glowing exclamation marks).
* Death Road to Canada is a hockey stick (and has a stronger unbreakable variant in the 'Xtreme Hockey Stick'), and, while driving, one of your party members may attribute their usefulness as zombie repellents to why Canada remained unaffected

by the outbreak that gripped the USA.
* Death Road to Canada not!". This personality stat combo gives this character the option to act boorishly in text events (usually to their catchphrase of "COOL IT"). It usually doesn't end well. However, if this is done three times, picking this option a fourth time results in a positive outcome (marked by rainbow text). The safest application of charging the COOL IT counter is usually by using it at traders, as the worst that occurs is the party being booted out of the trading post (compare it with events like bandit raids, which always results in the bandits taking your things and injuring you).
* Death Road to Canada, one store you can encounter during an Always Be Looting event is a store that sells umbrellas. Just umbrellas. There's also the Toilet Emporium.
* Death Road to Canada. The only solution is to hightail it to Canada.
* Deathrolling, described as "skateboarding, except half the time somebody dies", is popular among the lawless pre-teen bandit tribes of Los Angeles. Fry thinks it sounds a little
* Death Room. He clearly doesn't think the world is sunshine and roses, but he always tries to do the right thing.
* Death Row: A prison cell block consisting of inmates who are all scheduled for executions.
* Death Row: A prison cell block consisting of inmates who have been sentenced to death.
* Death Row, instead, however, he calls Mulder's mobile phone. It's never explained how he got to know Mulder's number.
* Deathrow is a sports game which is a mix of frisbee, basketball, and a gladiatorial arena. Two teams of four play, one team wins when they either knock the entire other team out or have more points when time runs out. Most players go for the fighting option.
* Death's attitude toward Rincewind (and fellow death defier Vimes) softens significantly in the later books, to the point where he sees them as a curiosity (or a source of mild exasperation at worst) more than anything else. At one point, while Vimes is in a particularly dangerous situation, Death appears off to the side sitting in a chair and idly flipping through a book. When Vimes notices him, Death says something along the lines of
* Deathsaurus is married in at least one continuity and deeply loves his wife, being motivated to be a Decepticon partly out of a desire to provide for her. His right-hand-man Leozack has a sister that he's highly protective of and vice-versa.
* Deathsaurus, well-known as one of the noblest Decepticon leaders. Not only does he try to avoid unneeded cruelty and have a soft spot for children, but he's very polite towards soldiers under his command, treating them with respect as long as they pull their weight. He's also motivated partly out of a desire to
* Death's boss is Azrael, the Death of Universes, a being so colossal that galaxies appear as twinkles in his eye, and it takes a whole page to contain a single-word reply to a question. Also, he has a clock —
* Death's Bright Day, albeit seen through the eyes of one of Daniel's junior officers rather than Daniel himself.
* Deathscent... possibly. The human characters clearly perceive them this way, but what their real motives were - to help humanity, study them, or just for fun - is left up to the reader.
* Deathscent - the Mechnicals occasionally show greater self-awareness than they should be able to, even those without the 'black ichor' that provides intelligence. However, it's never made clear if this is just a result of the human characters not fully understanding the advanced technology they have access to. It's likely that this would have been developed further had the series progressed beyond one book.
* Deathscent. Though the clockwork is just a vehicle for a much more advanced form of technology, which means that some of them are self-aware.
* Death's country and destroys his statue, they believe the statue has come to life. When Malich goes back, the wizards recommend that the replacement statue be constructed in a very secure dungeon.

* Death Screams, Sheriff Avery runs into a bunch of youths smoking dope, and one of them eats the stuff so they won't get busted.
* Death's Domain: A Discworld to be difficult. It also has a windmill, the symbol of crazy golf everywhere. It grinds the balls very finely. The accompanying illustration shows Death in his normal robes, but Albert, caddying, sports the traditional tartan plus-fours and silly hat.
* Death's domain is located outside of time, so things either don't age or do so only if he allows it. His adopted daughter Ysabella comes off as a
* Death's Door, there is Jefferson, a squid who is using a drowned sailor's corpse to pass off as a human selling soup. No one seems to notice or care. He is well-meaning though, and gives you tips on where to find secrets.
* Death Seeker - A character who actively tries to die but doesn't want to commit suicide.
* Death Seeker by fighting an unwinnable war (he gets mighty pissed off when he's resuscitated by a couple of criminal yuppies who wanted to use him as their personal attack dog). Not that anyone else would know this in-universe, because he never says so (and the only one to figure it out was Bullseye).
* Death Seekers about it doesn't really help her much, and demonstrates that it would just get annoying really fast.
* Death Seekers Uriah Gambit for theirself after the battle), but also certain to take a sizable chunk out of said best of the enemies.
* Death Seeking priest, gave up his eyesight in exchange for his pact with a Faerie.
* Death Sentence, at least in the uncut version, Nick presumably bleeds to death while watching his home videos.
* Death Sentence, but that Nick just did not know how to relate to him like he did with his elder son.
* Death Sentence, Nick escapes from the watchful eye of Detective Wallis by going to visit his son in his hospital room, then climbing out the bathroom window.
* Death Sentence, the protagonist manages to get a good look at the man who killed his son but decides to drop the charges when he discovers that he would only get 3 to 5 years of prison, with the aim of killing him himself. This backfires badly.
* Death Sentence, with Billy (Joe's brother) and his gang of killers going after Nick.
* Death Sentence would probably have gotten a much larger sentence, thus preventing the plot of the movie, if the gas station's camera at the scene of the crime was working.
* Death's first name would be, if he had one. This prevents them getting in the way of the competent officers in the main story.
* Death's glamour relies on a forced augmentation of the normal human
* Death's granddaughter Susan also has some Good Scars, in the form of three thin, white marks on her cheek that only show up when she's flushed or angry. She inherited them from the slap that her father received from Death.
* Death's Hand has a pretty nasty-looking red mask on the front of his helmet.
* Death's Head 2020, Iron Man decapitates Death's Head in battle. Annoyed, Death's Head used his headless body to beat up Iron Man and work off his aggression.
* Death's Head: Death's Head was created with a mixture of technology and magic, originally intended as a replacement body for his creator.
* Death's Head first solo title. A big cake is brought into a mobster's birthday party, so of course he assumes a gunman is inside it. He has his goons 'cut' the cake by blowing it to bits with blaster fire. Only it really is just a cake, which ends up splattered all over him. He then sits down to a slice of birthday cake, which explodes when he sticks his fork in it. Deaths Head set the whole thing up.
* Death's Head, Freelance Peacekeeping Agent, doesn't believe in killing if there's no profit involved. Any seeming good deeds done pro bono are done because "it pays to advertise", and one time he was involved in a mission to save his own future self from death he had to justify it as life insurance.
* Death's Head II has a liquid metal right forearm with (at least) four different configurations: hand, cannon, blade weapon, and "siphon" (which is used to absorb

information, knowledge, and skills from others, organics or machines alike).
* Death's Head II has a very high tech right hand (from the future!) that can transform into, among other things, a BFG.
* Deathshead is rather disfigured-looking. Frau Engel starts off looking rather normal but is disfigured by a hacked robot just as she shows how crazy she is.
* Death's Head. It also freaked out when it was given a poor paint job.
* Death's Head Revisited'', a former concentration camp commander pays a visit to his old camp, only to be confronted by one of his former inmates. It's only at the end that he remembers he killed the prisoner in question.
* Death's Head started out as this before getting shrunk, and has returned to his big size these days.
* Death's Head: The Enlightened make a show of accepting surrenders because a powerful third-party is watching, but when the prisoner transport convoy crosses a storm that conveniently obscures satellite surveillance, all ships but one are "lost at sea".
* Death Ship", the spaceship E-89 lands on the thirteenth planet of Star System 51 to investigate the feasibility of establishing a colony in 1997.
* Death Ship was about a Nazi prison ship that continued to sail the seas for decades after World War II, controlled by the angry spirits of its crew.
* death should be able to deal with fiddly minor issues like decapitation as well (possibly by cloning a new body), so only the head, or sometimes just the brain, is preserved to bring costs down.
* Death's Hourglass: An actual clock that counts down until someone dies.
* Death's Hourglass: A physical or personal manifestation of a person's remaining lifespan.
* Death's house is bigger on the inside than on the outside, being the size of a cottage on the outside, but the size of a small castle on the inside. This is not so much intentional, but is rather the result of a slight blindness to ordinary architecture on Death's part (he forgot that things were not supposed to be bigger on the inside when he made the place and can't quite manage to make them fit now). Many of the rooms have the peculiar effect of being enormous at the same time as being regularly sized. Death's room in particular is stated to be about a mile wide, but most can be crossed in only a few steps. The real killer is that Death himself is weirded out by this last fact. This is because it's ordinary humans (like Albert) who cross the room in a few steps, even though it's clearly a mile wide. Death's theory is that the human mind refuses to accept the true size of the room, and acts as if it were normal-sized. And for humans, it seems like it's Death that acts weird, by either moving through very solid walls (he cannot even see) or suddenly appearing from thin air when they were in a small, empty room just a second ago (when he moves through that mile wide space and not the short, straight path the humans usually take). Death's realm is weird.
* Death shows up, of course, scythe, cloak and all in the video for Raubtiers'
* Deaths in police custody have been commonly attributed to the suspect "falling down the stairs".
* Death's Library is a variation - every person's life story writes itself into a book somewhere on his shelves. As you go back, the histories are written on scrolls, then animal skins, then stone slabs... One character asks Death's daughter (adopted) what came before the slabs, because some people would "quite like to know". She replies that she didn't get that far, as she was running out of candles.
* Deathsmiles each character has two different endings: one where they go through the portal back to the human world to see their family again or stay there with their friends. The sequel makes the latter choice canon for all of them.
* Deathsmiles IIX has a sign that reads "Hello-Land". The "o" doesn't seem to be working, leaving us with the true meaning of the stage.
* Death Smiles maid outfit. Apparently, this is because this was the only outfit available to him when he arrived (and considering he was suffering from hypothermia, he didn't really have the luxury of being picky).
* Death Smiles maid outfit, because it was the only thing available when he arrived and the alternative was hypothermia.

* Death Smiles — The game was left completely untranslated when it was released on Xbox Live Games on Demand.
* Deathsmiles. The amusing part is, most of these complaining players are players who are experienced with the game. The game has since been patched to match the Japanese version in slowdown behavior.
* deaths of the two rappers also increased their sales, with both having albums that went Diamond as a direct result.
* "death" so he never really wanted to do anything evil when he wasn't after Spidey's blood.
* Death Spa, Catherine locks Lt. Fletcher in the club's cold room and then reanimates the eels being stored in there for sushi. One of them rips his throat out.
* Death Spa, Catherine's ghost possesses the computer that controls every function of the Starbody Health Spa.
* Death Spa, Catherine's spirit is able to possess her twin brother David's body and transform it into a physical duplicate of her own.
* Death Spa, Catherine's spirit is attempt to drive her former husband Michael to suicide so her joins her in death.
* Death Spa, Michael jumps through the locked glass doors of the tanning parlor. Shattered glass goes flying everywhere but he is unharmed.
* Death Spa, Michael's attorney Tom is secretly conspiring with the spa manager Priscilla to drive Starbody out of business so its competitors can buy it up at a bargain price.
* Death Spa, Michael's wife committed suicide by dousing herself in gasoline and setting herself alight: an act that repeats itself in Michael's nightmares.
* DeathSpank due to the Thongs of Power's corrupting power, and he must either let himself be killed to fuel her delusions of godhood or cut her down himself, which greatly troubles him as he mourns and buries her. Unlike literally the entire rest of the series, this is all treated as somber and tragic as possible. And the canonical choice? He kills her.
* DeathSpank games, where the intro starts off stating that it's "Based on a True Story." This being a game about a Justice-obsessed moron fighting and questing for a piece of bacon.
* DeathSpank , the Mind Barnacles that he helps spread are clearly examples of this trope but the main character helps them spread due to them offering him a quest. Plus they would bring World Peace by infecting all living things with Mind Barnacles!
* DeathSpank. The word Justice is present in some way or form in almost every conversation he has.
* DeathSpank wears naught but armored boots and a purple thong (called the "Thong of Justice") on his lower body.
* Death Spa opens with this trope. The neon sign on Michael's health club reads 'STARBODY HEALTH SPA'. Lightning strikes and several of the letters burn out, leaving the sign reading 'D EA TH SPA'.
* Death Spa; the showers go berserk; a client is killed by a resistance trainer; Rhonda loses a hand to a blender; etc.
* Death Spa, the two cops obligingly turn their backs while Michael jimmies the lock with a credit card.
* Death Speaker is a ghost who takes form in the shadows of other people, particularly in the main character, Ricker's, shadow. When he does this, the shadow he infiltrates takes on an altered form. Presumably, it is the silhouette he would have cast when alive.
* Deathspell Omega are highly secretive; few photos of the members exist and, more notably, no one (apart from, presumably, the band members themselves) even knows what the complete line-up of the band is (the identity of the drummer is not even an identity of public conjecture).
* Deathspell Omega portrays Earth along these lines: God either has abandoned humanity due to its sinful nature, or is actively destroying it for that exact same reason. Their song "Diabolus absconditus" (Latin for "the devil is hiding" or

"concealed devil") is also named after the concept of "Deus absconditus" (same as the above, but with God in place of the devil), which essentially postulates that God has made Himself inaccessible to humanity.
* Death's Scythe. It requires you to get the Golden Axe first, a very powerful overhead weapon that can only be crafted with a very rarely-dropped soul. Once you have it, though, and once you have Death's soul, you can fuse the two together and get this weapon.
* Death's sword, however, is so thin it can barely be seen, and so sharp it can cut a flame in half. It's primarily another tool for
* Deathstalker and the Warriors from Hell, Deathstalker is able to beat the evil overlord Troxartes with the help of an army of undead warriors. Well, technically he talked Troxartes' undead warriors into switching sides.
* Deathstalker at their edge. This is used a handful of times throughout the series.
* Deathstalker, but are mostly forgotten about thanks to a concerted effort in the setting's past to ban them.
* Deathstalker: Captain John Silence insists he's going down with his ship, and there's nothing Investigator Frost can say to change his mind. She agrees, then knocks him out with one punch.
* Deathstalker Deathstalker, just...Deathstalker. The mantle of Deathstalker is taken up by three different heroes of varying degrees of heroism throughout the franchise.
* Deathstalker has a religious sect called the "Ecstatics," who had their brain modified to be in a continual state of orgasm.
* Deathstalker II: Duel of the Titans: Sultana captures Deathstalker and straps him to a table where a giant pendulum swings closer and closer to his private parts.
* Deathstalker II: Duel of the Titans: the main character plays at being this while confronting a group of guards who are in the middle of harassing the heroine. "Ordinarily I don't mind seeing a woman get a good beating, if she deserves it..."
* Deathstalker is both a parody and an homage to more traditional Space Opera's and exaggerating or taking various tropes to their most extreme conclusion.
* Deathstalker novels, humanity of the distant future uses disruptors that can blast through almost anything, but the power crystals take two minutes to recharge. As a result, many people carry swords, and those who can afford (or are supplied by them by the Empire) carry a sword, disruptor, and a force shield. Full-on duels involve using all three weapons (force shields block swords but reflect disruptor bolts.)
* Deathstalker of these. A few of the main characters are ex-mercenaries, as well (and one of them is only helping overthrow the evil empire for the loot that will be in it for her if they succeed).
* Deathstalker series a woman was forced to approach a man who would decide her fate completely in the nude. She had decided to break clean but she couldn't carry any regular concealed weapon... but a deactivated monofilament blade's handle was relatively easy to hide in the one place the guards wouldn't look.
* Deathstalker series, fits the trope quite nicely. She's even set up a holographic 'playground' of a throne room which has claimed quite a number of courtiers, just for her own amusement.
* Deathstalker series has the Hadenmen, who fought a war against the Empire and were defeated; they were revived to take part in the Rebellion.
* Deathstalker series is a fairly dystopian version of this trope, and unlike many actually does deal with the difficulty of setting up a working system of democracy, although not in any great detail. Given that it was almost a gleeful self-parody of the whole space-opera genre, this is not particularly surprising...
* Deathstalker series the AIs of Shub constructed a world of their own to live on. Unfortunately for humans who might visit, it exists in more dimensions than they can perceive and so is unhealthy to look at for extended periods of time. The Madness Maze, despite a relatively innocuous appearance, had convoluted, nigh-sentient path designs that would either evolve you into a higher being or tear you apart.

* Deathstalker series Valentine Wolfe used this at one point. He produced a highly-addictive drug with chemicals he harvested from the bodies of humans killed when the Empress razed Owen's homeworld. As a final measure of getting the most out of the resources available, he then served his colleagues the meat not used in the process.
* Deathstalker they're inefficient; the monarchy banned and hid knowledge of bullet weapons, since they were cheap enough to be used in uprisings.
* Deathstalker: This movie could be said to have something for everyone, featuring unclad slave girls and oiled-up muscle men in gladiator armor as minor characters/extras.
* Deathstalker". To their surprise, Random is now an old, world-weary retiree who, after one defeat too many, has taken up janitorial duties. They manage to bring him back in and he proves to still have a good bit of fight in him.
* Deathstalker unlocks humanity's potential (if it doesn't kill you first). Most of these don't work out very well.
* Deathstalker vans. The first one we see takes the combined efforts of four main characters to bring it down.
* Deathstalker: Virimonde, the home planet of Owen Deathstalker (the name roughly means "green world" in French) is described as one.
* Death Star, after flying against Vader in practice the top TIE pilot on the station narrates that, if he ever ends up on the wrong end of Vader's guns for real, he'll just self-destruct his ship to save time.
* Death Star become keenly felt. Stated in Atour's narration, almost word for word.
* Death Stare Luigi, who knocks out The King and distracts Lightning from crossing the finish line, allowing Chick to win the race.
* Death Star has Master Chief Petty Officer Tenn Graneet, head gunner on the Death Star, was like this to his men. He wasn't a bad boss at all provided that they did their jobs well.
* Death Star In both cases, the narration is almost identical in the dream as in the event.
* Death Star. Not that he had anything against Twi'lek dancing girls."
* Death Star reveals that virtually all of Daala's appearances have come after she suffered severe brain damage.
* Death Star small area; he'd either go stir-crazy, get hyper-rapture, or survive those long enough to die from lack of supplies. Not to mention that rescue is literally impossible. Very, very bad indeed. As the person who inflicts this punishment on the villain puts it:
* Death Star; the laser was charged the whole time, and he was just trying to distract Tarkin long enough in the hopes that the Rebels somehow manage to stop the Death Star.
* Death Star, the proprietor asks the bouncer to remove the few patrons who were having too much fun, and the remainder are quiet, shell-shocked.
* Death Star: There are multiple skips of several months. They never get announced; it's always through dialogue or the narration.
* Death Star there are some excuses, but even claiming that all those prisoners were vicious scum who'd never be allowed to leave could only go so far; there had been guards, too, who hadn't been evacuated. Later, the gunner states that he can't believe for an instant that all of the people on Alderaan were Rebels.
* Death Star told from newly identified extras' POV's. It takes place during the Rebels' time aboard the Death Star and the battle afterwards, and includes the guy who said 'stand by' long enough for Luke to blow it away.
* Death Star was ever in Vader's sights, he'd just overload his engines and kill himself.
* Death Stop Holocaust: Tim shoots himself in his grief over learning that his daughter has been tortured to death.
* death stopped it, as they just got back up as ghosts and tried to get their mercs to send the other sibling to hell first.
* "Death Story" by Lecrae is the last-minute prayer of a gangster on his deathbed.
* Death Stranding also have a small amount of antimatter at their core, so when

they devour someone it causes a "voidout", a massive explosion caused by the energy released by the matter-antimatter annihilation. It is noted that most are actually benign and just kinda float around harmlessly, but enough of them are aggressive and their attacks do enough damage that they've nearly destroyed human civilization anyways.
* Death Stranding, and a man being saved from drowning... by the aforementioned baby... which appears inside his windpipe... giving a thumbs-up. Okay.
* Death Stranding and will steal packages from legitimate couriers to hoard them for themselves.
* Death Stranding, but is published by Sony. Thus it's a little surprising to see the game appear on Steam and Epic Game Store alongside the PS4 and PS5.
* Death Stranding, but the Sam we meet in-game is very submissive, timid and non-confrontational. He was also a few years younger than her and her client, which makes this trope seem more likely.
* Death Stranding for not letting him do so. Even some who agreed that the game wasn't great felt that Dunkey went too far.
* Death Stranding, he still ends up inadvertently causing various other porters to imitate him. By the end, Sam is primarily responsible for stopping the coming of the apocalypse.
* Death Stranding. Higgs, the antagonist, also has a pod like this. You can meet male NPC porters on your travels, with some of them also having them. Cliff, another antagonist, is connected to his soldiers with umbilical chords that sprout from his belly button. It's worth noting that none of these characters are literally pregnant, and it's only a visual/textual metaphor (the pods can be unplugged at any point with no ill effects to the baby inside or the person it was attached to).
* Death Stranding is set in the aftermath of an event that upended the rules of life and death, resulting in the creation of "Beached Things", otherworldly beings that started cropping up whenever people died.
* Death Stranding — it doesn't make him evil but it does mean he's lonely and curious about the afterlife.
* Death Stranding, multiple characters will throw up small amounts of chiralium, a black tar-like substance from the world of the dead.
* Death Stranding prowling the continent. Main character Sam Bridges carries one throuhout the game, and must rely on it to avoid being caught by the BTs during his deliveries.
* Death Stranding purely because the trailer featured a naked handsome man.
* Death Stranding, so he keeps squirming and bashfully averting his face from Deadman.
* Death Stranding: The character of Heartman goes into cardiac arrest every twenty-one minutes, and, after three minutes have passed, he is revived by a defibrillator strapped to his chest. Putting aside the fact that defibrillators are useless on a flatline, the trope is played to an absurd degree by the effectiveness and reliability of the machine: it revives him perfectly with a single jolt, and he is fully conscious immediately, without the need for resuscitation. Additionally, being clinically dead, without a heartbeat, for three minutes would wreak havoc on one’s body and brain, and being revived after so long a time would be similarly damaging, yet Heartman suffers no obvious health issues; this latter fact may be justified by the game being set in a world where the realm of the dead has intruded upon the living, and the traditional mechanisms of death are in a state of chaos.
* Death Stranding, which adds to her more energetic image, allowing her to zip around and deliver her cargo much faster and with less physical effort than Sam.
* Deathstrike in Weapon X. When Creed is briefing them on Monet and the mission to save her, she instantly notes Monet as his ex-girlfriend which makes Creed defensive.
* Deathstroke, and has a terrible parenting record. Because of his activities as a mercenary, a rival kidnapped his son, Joseph. When trying to rescue Joeseph, the boy's throat got slit, leaving him a mute. His wife was so angry she shot Slade in

the face, causing him to lose his right eye, then divorced him. Slade's other son Grant grew into a mercinary himself, and worked for the HIVE. They augmented his abilities and sent him to fight the Titans, but the augmentations failed and Grant died. Slade then decided to get revenge on the Titans, and manipulated a young girl, Terra, to infiltrate the Titan's rannks'. Terra was a teenager, and the two slept together. Terra would later die after turning agaist the Titans. Slade also killed his son Joseph when the boy became possesed by a demon. Later, Slade would find he had a daughter, Rose, who he at one point brainwashed into serving him.
* Deathstroke arc, where he was implied to have slept with the underage Terra.
* Deathstroke attacks Batman in the Penguin's base and engages him in a three-phase duel using his
* Deathstroke bringing this up a few times, most notably when he compares Batman to a particularly troublesome Vietcong member.
* Deathstroke, but admits afterwards that he was tempted to kill Oliver if that was what it took to reconcile with Joe.
* Deathstroke found himself in battle with a new version of the Ravager. In a final confrontation, Ravager unmasked and noted how Slade didn't recognize him. He's Bill Walsh, who trained with Slade back in the army but always in second place. He'd also had a crush on Adeline Kane who became Slade's wife. At first, Slade can't believe this entire rampage of murder is "over me stealing a girl 20 years ago" but Walsh reveals it's even bigger. Getting a closer look, Slade realizes Walsh was Jackal, the terrorist who had slit the throat of Slade's son, Joe, rendering him mute. To top it all off, an injured Jackal then joined the group HIVE and recruited Slade's other son, Grant to become the first Ravager, which got him killed. In their fight, Walsh gloats on how he's been ruining Slade's life for years without Slade even knowing about it. He pays for it as no one gets the better of Deathstroke with a sword.
* Deathstroke, he also serves as one of the co-commanders of the Militia (see below).
* Deathstroke. He easily defeats the latter two in a one sided, in the case of Deathstroke, comedic fashion. But his victory Parasite turned out to be nothing of the sort as he was just feeding the villain energy, who became too strong and nearly killed him.
* Deathstroke in an effort to take revenge on the Bat Family taking Rose from him, one of the explanations as to why the first Terra had a manic breakdown, and later with Roy Harper after his daughter died via getting Roy unknowingly addicted to Bliss.
* Deathstroke program. After being set up by one of his commanding officers, he became a notorious mercenary for hire.
* "Deathstroke's drugs" are the DC equivalent of Marvels "Skrull imposter".
* Deathstroke series that Slade loves his kids more than anything in the world and is eaten up with guilt for not being the dad that they need but is too fundamentally broken to tell them that.
* Deathstroke, Slade can be shown being very petty, sadistic and vindictive. Indeed, his first story arc has him going after the Titans for very unprofessional reasons.
* Deathstroke, Slade, going after an employer who betrayed him, is targeted by a second assassin, Jannissary. When Slade has Jannissary at his mercy and explains his motives, Jannissary gives him the money he had paid; Slade returns it before killing the employer.
* Deathstroke's missing eye is even more Badass when you consider he lost it when his wife, standing right behind him, tried to shoot him in the back of the head. He heard her cock the gun and dodged. Well mostly. Also keep in mind that his wife was the one who initially trained him as a Special Forces operative, so she knew how to kill someone.
* Deathstroke's Psycho Serum has been shown to drive anyone else using it insane, including his wife, his daughter, and
* Deathstroke's son, the first Ravager, was given treatments by the Hive to turn him into Deathstroke's equal. Unfortunately the treatments ended up killing him,

which was the
* Deathstroke territory. On the other hand, he does keep the socket covered 100% of the time, which could be why no one can seem to agree if he's a villain or a good guy (though no one would stretch to call him a hero).
* Deathstroke. The formula used left him a crippled wreck for months or years, with brief periods of increased strength and intelligence. Later, after the military cut him lose, Slade revealed that he'd started faking the bouts of weakness at some point to get out on his own.
* Deathstroke), there won't be any more contract work for him. Deathstroke promptly defects to Luthor's side, but makes it clear that he expects payment for it. To Luthor's credit, this arrangement is honoured.
* Deathstroke. This all started when the H.I.V.E offered him a contract to kill the Teen Titans. He dismissed the contract out of hand, and the H.I.V.E. passed the contract onto his estranged elder son, Grant. Grant, blaming the Titans for everything that had gone wrong in his life, accepted chemical enhancements that would make him equal or surpass Deathstroke. The effects of the drugs caused Grant to die, even as Deathstroke had been trying to talk him out of the job. Blaming the job, and by extent the Titans, for the loss of his son, Deathstroke swore to take up the contract Grant had died trying to fulfill.
* Deathstroke) volunteered for the experiments that gave him his superhuman abilities, the serum eventually plunged him into a coma. The scientists decided to destroy the serum formula. Months later, Slade Wilson woke up with superhuman powers.
* Deathstroke wears an eyepatch over his missing eye; his mask is split into two colors, with featureless black over his missing eye, because he's so badass that it doesn't matter if his opponents know he has a physical impairment. In addition, his daughter wears an eyepatch after taking out her own eye in order to prove herself to him.
* Deathstroke wears an orange and blue mask with a hole for his one good eye.
* Deathstroke, while looking very ninja-like, really isn't a ninja at all, getting all his training from the US Army, combat in Vietnam, and his powers from a
* Deathstroke, your opponent in what was likely the most intense battle in the series aside from Mr. Freeze.
* Death substitutes for the local Santa equivalent. A little girl asks for a sword (as well as a few other gender-abnormal toys). He gives her one (Death does not have a very good grasp of parenting), although he's eventually convinced to transmute it into a wooden one.
* Death Takes a Holiday. Death then decides to hang out with these people.
* Death Takes a Holiday. She's more than happy to go with him because she's fallen in love with Death.
* Death Takes a Holiday", the ghost of a young boy was frightened of even Tessa's human form, until on Dean's advice, she changed her denim and leather outfit into a cute white dress.
* Death Takes a Holiday: The Grim Reaper stops making people die for whatever reason.
* Death, the anthropomorphic representation of that state of existence, has a daughter by adoption he cares for in his own way, and by his daughter a granddaughter named Susan. However, his duties as Death sometimes conflict with his mortal loved ones.
* Death: The High Cost of Living, Death's incarnation on Earth fills this role towards the viewpoint character, mostly by means of inexhaustible good cheer rather than engaging in wacky antics. There's no hint of a romantic attraction from either side either, and the viewpoint character realistically finds her kind of annoying.
* Death: The High Cost of Living, hoping he'll slip and break his neck, but it ends up being sprung on the wrong person. (Nonlethally.)
* Death: The High Cost of Living, Sexton Furnival states at the beginning of the story that he doesn't believe in love:
* Death, The Horseman drives a classic car, dresses smartly, and has an epicurean's appreciation for human junk food, such as Chicago pizza.

* Death The Kid is this for a while, although now he is out of the Book of Eibon and is ready to start kicking ass again.
* Death, the network executive delivers a brief, defiant statement followed by a mooning.
* Death though as he is clearly dead from blood loss after that and only says arteries shmarteries). Subverted when Death doesn't care about his diagnosis, and Dr. McNinja has to beat the snot out of him to go free. Also, he's a real doctor.
* Death threats Marcus Canty was chosen twice; first over Drew by the judges and then over Rachel by the public vote.
* Death Toll: A Mystery by Jim Kelly, the bodies buried at a cemetery are being moved to higher ground to avoid flooding. When the grave of Nora Tilden, buried in 1982, is opened, gravediggers are shocked to find another body, a skeleton, on top of the casket. The body had to have been thrown into Nora's grave on the day she was buried.
* Death to Smoochy, as Sheldon had managed to play off a phallic cookie (that Randolph had planted) as a rocket ship.
* Death to Smoochy - a veteran children's show host plots to murder an upstart who has become more popular than he is after his own show is cancelled.
* Death to Smoochy dealt with hosts of children shows living less-than-exemplary lives off-screen.
* Death to Smoochy-esque Goofy suit, though (unusually for this trope) his face is always visible.
* Death to Smoochy, Rainbow Randolph decides that it is time to end his vendetta against Smoochy. He talks of "gracefully marching forward" and "admitting that the rhino has won." That is until he picks up a photo of Sheldon with his ex-girlfriend. Angelo's panicked reminder of his resolution falls on deaf ears as Randolf screams and curses that he's going to end Smoochy once and for all.
* Death to Smoochy, Rainbow Randolph's victory dance after framing Smoochy as a Nazi is cut short by a wall.
* Death to Smoochy, the protagonist is a public figure, who is to be shot by a guy in the rafters, at an ice show arena full of children, at the height of the performance.
* Death To Spies meaning just that); the player takes the role of a counterintelligence agent and spy working for them during WWII.
* "Death to the Daleks" that rebelled against its creators and threw them out.
* "Death to the Daleks": The Doctor suggests the Exxilons might have traveled to Earth and taught the Peruvian Incas how to build their pyramids, as they were too "primitive" to do it themselves.
* Death To The Extremist when he thinks One is running against him for mayor.
* Death to the French: Subverted leading to Dodd's separation from his unit and subsequent adventures that result from him trying to rejoin them.
* Death to the French: The Baker Rifle. The Rifle along with the green uniform is a highly visible weapon and symbol that separates a Rifleman from the common soldier armed with muskets.
* Death to the French: The British are withdrawing to the lines of Torres Vedras. This results in Dodd being accidentally left behind to fend for himself.
* Death to the French: The French soldiers whom Dodd is facing mold silver bullets. They believe Dodd is a supernatural entity and can be defeated only with the use of silver bullets. In the book the bullets have better performance then the traditional lead ball ammo.
* Death Train: The chief hijacker, Alex Tierney, has a news crew brought onboard the train to prove to the world that the nuclear bomb they're carrying is real. Of course, this is used by the heroes to get their agents on the train, and Tierney is shot through the head on live television.
* "Death Trap": At the end, Aurra Sing orders Boba Fett to do this to a trio of clone cadets in an escape pod. Boba instead chooses to release the cadets, leaving them alive in their non-functional pod to be found by the Jedi shortly thereafter.
* Death Trap. Basil triggers the trap early, creating a chain reaction that disables the whole thing.

* Death Trap, because the GM wouldn't stick me in an impossible situation") can be hard to avoid, but it's considered bad form to be obvious about it.
* Death Trap mustache-twirling villain also present in such things is almost never used seriously these days.
* Deathtrap, Sidney is pretty pleased by the neatness after noticing that Cliff, whom Sidney just strangled to death, fell on a rug. Sidney and his wife Myra wrap Cliff up in the rug and take him outside to be buried.
* Death Traps notices a spider dangling in front of her face and pretends it was intended. Then Roxanne nonchalantly blows on it and it lands on his face. Cue freak out.
* Death Traps. That ill-advised laugh also means they are just about to knock on the throne room door.
* deathtraps to dealing with police. They also provide services to heroes by matching them with appropriate and licensed villains. They do however set up strict rules for both protagonists and antagonists to follow.
* Deathtrap that Cliff and Sidney perpetrated in the first part of the film.
* Death Trap, they lean on each other for a reunion kiss (all the danger and "They weren't you" compensating the "abandoning her at the altar")... and Mutt comes out of the water putting a random corpse in Indy's arms.
* Death Trap to kill the Ventriloquist. Since Scarface is actually a dummy operated by the Ventriloquist, they hesitate to carry out the order. Scarface then loses it and accuses the whole gang of disloyalty, giving Batman an opening to escape and defeat the villains.
* Death tried to make use of a skeletal mount once, but found it impractical; he had to keep wiring bits back on. He much prefers his living horse, Binky. The gardens of Death's Domain are still home to skeletal birds, and there are skeletal fish in the pond.
* Death Trips takes place at is described as very cheap, and it's the location of Lady Death's most recent murder.
* Death Troopers is similar; some people in-universe speculate that it was derived from Mnggal-Mnggal.
* Death Troopers. The virus is transmitted through bites or exposure to infected blood, and the horde even some kind of hive mind to boot.
* Death Trope. It serves as the moment where Seren finally decides to stop pitying herself and rolls up her metaphorical sleeves.
* Death Tunnel. A group of young women must escape a haunted hospital.
* Death Valley, Carla goes undercover as a Sex-For-Blood vampire prostitute.
* Death Valley episode "Assault on Precinct UTF" after shooting a smoke detector that's been driving her crazy. She does this right after being warned not to waste bullets, as the vampires attacking the precinct had stolen all the spare ammo.
* Death Valley High is a concept album that tells the story of a troubled young girl who slaughters her classmates in the song "Janie's Got a Dissolvo Ray".
* Death Valley. Kirsten joined the UTF (Undead Task Force) to deal with the supernatural problems plaguing the city, there are plenty of cops out there already dealing with kids throwing parties.
* Death Valley The Revenge Of Bloody Bill, the curse placed on the ghost town somehow did this with the entire surrounding geography, no matter which way you leave town, you'll always end up right back at the center. Try doing one of these in the middle of the desert while being chased by zombies.
* Death Vigil and poor pre-order and revenue numbers, so despite the acclaim, it's set to be canceled after the first story arc.
* Death Vigil calls it "The Shard." What that means, and what the Scythe's true purpose is, was not revealed by the end of the first series.
* Death Vigil, completely changing the reading of their interactions earlier in the series.
* Death Vigil example below, where they're treated as standard mook fare).
* Death Vigil is the newest member to the Vigil, and therefore, the older members explain the details of the Vigil to her and for the reader. As a bonus, the readers get to observe the other Vigil members and see their backstories from Clara's

perspective.
* Death Vigil notes that the last copy of a text the Grim Reaper wanted erased from existence was kept in the library of Alexandria.
* Death Vigil the Reaper has no problem with being summoned for engagements her Death Knights can't win on their own. And yes, both are heroic.
* Death Vigil, when necromancers activate their powers, glowing eyes appear inside sigils on their bodies. Many of the monsters they summon have eyes in unusual places as well.
* Death Wail: Having a loved one die causes a character such grief that all they can do is wail.
* "Deathwalker" A notorious Dilgar war criminal has a medication that will give a person immortality. She later sadistically reveals that the essential components
* Deathwalker, where a female evil alien scientist war criminal who did experiments on prisoners walks out of her trial because she has found an immortality serum (extracted from dying sentient beings), and the judges decide that getting it is more important than punishing her. Then a space ship flown by the mysterious and cryptic Vorlons appears out of the jump gate and blows her ship up because the younger races "are not ready for immortality".
* Death Warmed Up about winning over the bad guys in the film's ending, power lines near him suddenly break loose and electrocute him to death. His girlfriend Sandy then runs into the night, and credits roll.
* Death Warmed Up his son (and the film's protagonist) Michael to kill him and his wife. Michael ends up in a mental facility, and Dr. Howell enjoys a productive career.
* Death Warrant have prisoners killed to sell their organs for profit.
* Death Warrant in a surprise attack to string him up and kill him. Then the Sandman suddenly decides to let Burke go so he "won't know when it's coming", despite having just achieved exactly that.
* Death Warrant: In the climax, Burke kicks the Sandman (a serial killer) into a furnace. The fight initially seems to be over, but the Sandman then jumps out in flames, still trying to kill him.
* Death Warrant: The organ harvesting operation in the prison was masterminded by a man high up in the legal system.
* Death Warrant: The Sandman has a fondness for killing cops. This drives Burke to hunt him down in the opening for killing his partner, and the other convicts to admire him.
* Death was incapacitated, they took the opportunity to get violent with each other.
* Death Watch (1980), most diseases have been eradicated, to the point that the public has a morbid fascination of those rare individuals that still suffer from incurable disease. Thus the titular TV show "Deathwatch'', which voyeuristically documents these people's slow deaths, whether they agree or not.
* Deathwatch (2002) has a small number of WWI British (and German) soldiers trapped in a maze-like abandoned trench that is inhabited by a demonic being.
* Deathwatch, an ancient shotgun (a weapon usually used by Space Marine Scouts, but can become highly effective in close-quarters), and their chapter-specific advances include piloting space crafts, stellar navigation and closer relations with the Imperial Navy.
* Deathwatch, Deathwatch Marines who have chosen to completely sever themselves from their original chapter.
* Deathwatch in just about every other respect, this is the one point where he has a blind spot as well.
* Death Watch". Instead Tarrant calls out his opponent's name, then shoots him when he turns to fire. He is smart enough to be lying down though, so any return shots would miss.
* Death Watch. Large hordes of weak enemies - which really represent a mob, platoon, or maybe company, not an army - are treated as a single creature, like the examples above.
* Deathwatch lets the caster see auras around other beings that shows whether

they're healthy, wounded, fragile (5 hit points or lower), dead, undead, or none in the case of constructs.
* Deathwatch lied about his age to enlist, so he's very new meat indeed.
* Death Watch : Veteran Marines from various Chapters recruited for their unusual skills to act as a special task force for the Inquisition, operating in small groups.
* Deathwatch visible badges on his armour. The Sisters of Battle tend to be covered in Fleur-De-Lys symbols, and the Mechanicus has their cogwheel insignia. In fact, the only Imperial institution that avoids Sigil Spam is the Officio Assassinorum, as it'd probably be counter-productive in their case.

* Death Wish 1974, Lt. Ochoa figures out that Paul Kersey is the vigilante who has been killing criminals, but the District Attorney does not want the negative press that would come from prosecuting him. Because they are among the only authorities who know, they tell Paul to just get out of town, and they'll bury the evidence.
* Death Wish (2018): Just as in the original film, Paul Kersey begins a one-man war against criminals after a criminal gang murders his wife and seriously wounds his daughter.
* Death Wish 3, and this has given the gang the idea that they have free reign to perform said terrorizing).
* Death Wish 3-like, the second Bronson turns around-punch her out and shift her car into neutral. The car rolls down a slight grade and bonks into another vehicle at about 15 miles per hour. And then, after a beat, both cars explode.
* Death Wish 3 portrays all the street gangs of New York as multiethnic.
* Death Wish 3, where Paul Kersey teaches the retirees how to fight back against the young hoodlums that have moved into their neighborhood.
* Death Wish 4: The Crackdown: This is how Frank Bauggs met his maker in the hands of Paul Kersey, getting knocked out his penthouse window and falling onto a car.
* Death Wish Coffee which bills itself as "the strongest coffee in the world" and claims to be approximately 200% more caffeinated than the average coffee. The store advises consuming only 50 ml a day. Interestingly, this coffee company won a contest to get a free ad played during Super Bowl 50. And now the company has become a sensation across the nation!
* Death Wish II, the gang of scum includes two white, two black, and one Hispanic member, all buddies.
* Death Wish, just before she and his housekeeper are killed, which leads Paul to specifically go after the bastards responsible. The third movie has one of Kersey's friends also suffer this.
* Death Wish — Charles Bronson plays Paul Kersey, who movie after movie loses his loved ones to criminals, which in turn leads to vigilante mayhem. 5 films since 1974.
* Death Wish: Paul is not very comfortable fighting criminals early on in the film. At first, he beats up a mugger with a sock filled with quarters, then goes home, taking a drink of whisky to calm his nerves. Paul also vomits after killing his first criminal. After this, he starts gunning them down without hesitation.
* Death Wish recently lost the title for world's strongest coffee newcomer
* Death Wish series of movies depict the police as having given up on controlling gang crime, yet hounding citizens who actually defend themselves (even across jurisdictions). In the first film the justification is given that 1) the cops need

to show that nobody is above the law, 2) they fear that the vigilantism will escalate and 3) they fear that the crooks will become more brutal in retaliation, but in the following films, the cops are either dirty and looking to eliminate a threat or are taking it personally (either because they think that Kersey is showing them up or in one case are avenging cops that Kersey killed — who were dirty (which they obviosuly didn't know)).
* Death Wish somewhat muddies this, since movie producers often demand that expensive name actors make their face completely visible, since they pay so much for them. However, the makers of the films did not completely ignore that Kersey had a dual identity. In the second film Paul Kersey buys an old pea coat, gloves, longshoreman's cap, and beat up pair of pants while prowling around as a vigilante. He rents a room in a flophouse to do first aid for his injuries. In the fourth film, the LAPD did not know the vigilante's identity. Also in that film, a man blackmails Paul Kersey into a meeting by announcing to him that he knew of his activities as the vigilante and would expose him.
* Death Wish tries to contain him but ends up joining the fray when Kersey is ambushed by gangsters.
* Death Wish V: The Face of Death, but was never asked to do so. According to Winner, his lack of interest in directing the previous film may have led Menahem Golan to count him out.
* Death Wish) went to elaborate lengths to maintain his dual identity as the vigilante. He knew quite well that the police would object to his sudden justice (the same reason that the Shadow and the Spider had dual identities). In the second novel, Benjamin buys goggles, a fake mustache, and a fur cap to disguise himself.
* Death World, and became an authoritarian, militarized state that is hostile to its alien neighbors.
* Death World, but that may be exaggeration). He then had his arm replaced with a bionic one and continued commanding his men. Since then he's survived multiple life-threatening injuries and his body is riddled with bionics, making him as much a machine as a man. He's as tough as a space marine and can destroy tanks with his bare hands (mechanical hands, but still, that's impressive).
* Death World. Conversely, as the Sun's luminosity is increasing as it ages, in around a billion years from now it's expected the Earth will be unhabitable too.
* Death World novels (which, supposedly, take place in the same universe) feature portable psychic locator beacons. Also, every ship is equipped with a psychic transmitter/receiver, making actual psychics obsolete.
* Death World planet. The little critters have big, sharp teeth and are nasty, brain-eating telepaths to boot.
* Death Worlds, but you still have compelling reasons to go there. After all, except Earth (and, possibly, Mars) all other Solar System planets are unquestionably those (though Venus takes the cake, as if it's some sort of planetary Australia), and there is thriving research activity around, with a regular expedition and terraforming proposals popping up.
* Death World sends in teams of highly skilled Dwarven Combat Miners to retrieve the riches. Standing in their way are swarms of alien arachnids, hostile flora, unstable terrain, searing and freezing temperatures, depending on what biome you happen to land in.
* Deathworld starts because the Pyrrans don't have enough money for a weapons shipment, so they make a deal with the protagonist, Jason, who uses his weak telekinetic abilities to cheat in casinos.
* Deathworld tear him apart unless he gets off the ship. The Escape Pod he uses to get away is designed to be idiot proof: initially it declines to do anything but the safest, gentlest maneuvers, making long-term survival against the ship's guns problematical.
* Deathworld: The hero finds himself on a planet whose flora and fauna are in constant full-on attack against the human miners/settlers. Everything is deadly, poisonous, powerful, stabby, etc. It turns out that the planet itself has a mind (is a mind?) and has been psionically directing the attacks.
* Death World they're native to, krogan females are capable of producing thousands

of offspring (it's never mentioned whether they lay eggs or give live birth, but given their generally reptilian appearance it's probably the former).
* death world. This earns them the somewhat unflattering nickname of "Baby Ogryns."
* Deathworld to calculus, giving humans the same legal rights and protections everyone else enjoyed.
* Death World to win, and the long-term side-effects ended up destroying it.
* Death Zone is the sudden formation of a negative space wedgie in five cities of the former USSR (three in Russia and two in Ukraine) that obliterate the cities (including Saint-Petersburg) and create anomalous zones full of bio-mechanical monsters, gravity anomalies, toxic atmosphere, ever-present nanites that infect any exposed body part, and an enormous tornado at the center of each zone that links all five with another dimension. If you survive several days in the Zones, you're already elite. If not, then you're likely walking around as a mechanical zombie.
* Death Zone. It wasn't the wormhole that caused the meltdown but the uncontrollable drain on the power. Decades later, someone finds the abandoned device and attempts another activation. It partly succeeds, but in the worst way imaginable, creating five Zones (3 in Russia, 2 in Ukraine) isolated from the world by powerful gravity bubbles. In the Zones, runaway nanites developed to terraform Mars are infecting everything and turning people and machines into techno-zombies. The "partly succeeds" part involves the fact that the center of each Zone has a perpetually-rotating vortex that allows people to teleport from one Zone to another.
* Death Zone's books, they are fanatics spouting religious nonsense about the Holy Node before sacrificing themselves for the cause. It could be explained that these are different members of the Order interpreting their teachings, if they were not using the same characters.

* Debbie Grund, Buck Strickland's secretary and mistress, is silent until "Hanky Panky", where she is also killed off.
* Debbie Harry, but was edited out in the final cut. She explained on a live television special that although she was cut, she still got paid.
* Debbie is incinerated... although it remained in the version available on Channel 4's website.
* Debbie Jellinsky. "So I killed. So I maimed. So I destroyed one innocent life after another. Aren't I a human being? Don't I yearn, and ache, and shop? Don't I deserve love...and jewelry?" Extra points because the Addams family (being who they are) are completely sympathetic to her psychotic rant the whole time, even chiming in with understanding comments and agreeing with her about her motive for murdering

her parents as a child.
* Debbie Reynolds' "Aba Daba Honeymoon" featured a romance between a monkey and a chimp.
* Debbie was one of the hero's allies, but was captured by the overlord some time ago. Now she resurfaces with an
* Debby Boone's huge hit "You Light Up My Life" was originally performed by Kasey Cisyk for the film of the same name.
* Debby Boone's only #1 hit on the country charts was not "You Light Up My Life", but rather the far more obscure "Are You on the Road to Lovin' Me Again". However, "Light" was her only #1 on the Hot 100.

* "De Bende van de Zwarte Kous", a vulture picks up the child Petoetje and carries him off.
* Deb having walked in on Dexter having killed Travis Marshall. The rest of the season deals with Deb's loyalty to Dexter being tested. Especially when her Captain LaGuerta comes across a blood slide on the crime scene and starts trying to look into the Bay Harbor Butcher again, believing Doakes to be innocent.

* Debilitas (The Caretaker) serves as an introduction to the game's premise. He's not as durable or persistent as later stalkers can be, and can be knocked out somewhat more easily. That being said, he shouldn't be underestimated.
* debilitating. Even when he casually blasts apart and overrides her plans three times in two episodes, she still can't take him or his power seriously.
* de Blob has two: the Raydians have a written language resembling Kanji-Japanese, and the Inkies write in barcodes. The spoken language is complete gibberish, with some English words (mostly names) still recognizable.
* de Blob. So it follows that in the areas that the Inkies take over, they dramatically alter the environment in addition to altering / bleaching buildings. This is often seen in the first console game in the form of massive spills / slicks of ink on the surface of formerly clean water and stunted vegetation. In the second game these effects are much more pronounced - Prisma City has suffered both heavy water and air pollution even before the formal Inky takeover, some buildings / landforms are submerged underground to impede Blob's progress, and perhaps most dramatically of all, the canyon leading to the Inktron Collider (formerly Prisma City's hydroelectric plant) is near-completely submerged in frozen ink. Of course, as Blob makes progress, he alters the landscape in a fashion that is detrimental to the Inkies.
* de Blob steals it and uses it for the rest of the game. In the last level, he discovers it has a cannon as well.
* de Blob, the most powerful Transformation Engines can severely alter the nearby terrain to get Blob to the next area or just celebrate the completion of the level.
* Deb of Night's to the letter. The problem is: if that last "theory" actually precisely describes the very setting of the game, then what about the others?
* Deborah, 13, Servant of God- and being not immersed in popular culture like most teenage girls (having no television, being homeschooled etc.) she didn't. In response, however, she asked if most people knew who a certain (fairly obscure) Biblical character was.
* Deborah Allen's highest charted hit was not "Baby I Lied", but rather its followup "I've Been Wrong Before", which got to #2. "Baby" is probably better remembered because it was her only crossover.
* Deborah Ann Woll also had influence on Karen's backstory episode in season 3, wanting something that acknowledged Karen's time as a drug addict in the "Born Again" story but which gave Karen more agency.

* Deborah Cox - "Things Just Ain't The Same", "I Never Knew", and "House Is Not A Home".
* Deborah does act just as bad as Marie though. In one story arc, she becomes insecure that the kids are having fun with a very good babysitter and sacks her purely out of jealousy. A long arc across the series shows she is growing, slowly and steadily, into an even worse version of Marie, as she proves to be just as passive-aggressive and selfish and, unlike Marie, openly abusive.
* Deborah Estelle Phillips was actually approached for a role (likely for the role of either Kelsey, Dana or Angela), but she didn't think herself ready for the job and would later play Katie in
* Deborah has shown interest in both men (she pines for Shellington) and women (
* Deborah Kerr (1985). They were lifelong friends, and Mitchum would later cite her as the favourite leading lady of his career.
* Deborah Kerr a year later. This was the first time she was acknowledged as such, as Kerr went to the papers to give her the credit (though she only said she was supplied with a few top notes).
* Deborah Kerr, Elizabeth's brother suggests braiding her hair in pigtails to protect it from the humidity. She protests that she can't, as she's a grown woman. Apparently cutting off the hair is preferable to looking a little immature.
* Deborah Kerr had hair that was naturally darker than the red she was known for. A friend encouraged her to lighten it when she became an actress. She did and then became one of Hollywood's favourite redheads in the 1950s.
* Deborah Kerr. It's still considered one of her best roles of all time, even though she took the role only to shake up her image.
* Deborah Kerr made five films in her native UK before jumping ship to Hollywood in 1944. She stayed there for twenty years and didn't move back to the UK until she retired from movies.
* Deborah Kerr. She had six nominations and no wins until a special one was awarded to her in the 90s.
* Deborah Kerr. Sure enough she embraced the opportunity to shake up her wholesome image - and it got her a second Oscar nomination.

* Deborah Watling to audition for Polly. She would later be cast as Victoria.
* Debra and her sister Jennifer are revealed to mirror Ray and Robert. In this case Jennifer was the favoured sibling, possibly explaining Debra's affinity with Robert.
* Debra drinks once when she reminisces about her father, a legendary cop on the force, Harry Morgan. She was proud of herself to moderate her drinking, but any time she hears some crap that happened with him, she needs to drink.
* Debra has a very intense, aggressive conversation with what sounds like a suspect. The camera then pans to reveal that she's interrogating... a potential nanny.
* , Debra is spiritually impregnated by one of Unhcegila's sons. When her spiritual abortion is discussed:
* Debra Jo's also a pretty bad loser, as seen when she calls her mother to get her out of school when Mrs. Goncha holds a spelling test on words she doesn't know.
* Debra!: Main character and heroine Debra Deleng is presented as very high spirited, often viewing the world through her imagination, and has unusual social skills. Though she is seen as weird by other teenagers at her school and adults, she is never clearly mentioned to have any specific condition, although signs would point to some form of autism or neurodivergence.
* Debra Marshall she was, sometimes just dropping the subtlety altogether and

appearing in a bikini covered with a blazer.
* Debra Messing. All the standard tricks were (ineffectually) implemented to conceal her baby bump. Ultimately, Debra had to skip 5 episodes that year on doctor's orders, resulting in exposition from other characters to explain Grace's conspicuous absence.
* Debra Messing is best known as a redhead because she had to dye her hair for
* Debra Morgan, a detective at Homicide of Miami Metro Police Department, starts sleeping with and falls in love with Agent Lundy, their task force leader in season 2. He's actually an FBI agent and not her usual direct superior. Deb wants to keep their relationship secret at first but Lundy says it always gets out and that it's better to be honest right from the start. She wants to stay with him but they break up when she realizes they won't manage to make their long-distance relationship work.
* Debra, thinking the Skinner (a serial killer who tortured his victims to death) jumped to his death to avoid arrest, says he 'took the chickeny way out'.
* Debra Winger. She chose the role of the FBI agent, because she didn't understand the motivation as to why the Black Widow kills, so the title role went to Theresa Russell.
* De brug bij Breukelen) has everyone and everything going over a bridge safely, until a mosquito lands on it...
* D.E.B.S.. Amy and Janet are driving in an open-top car, so there's a lot of noise making it difficult to talk.
* D.E.B.S., Amy and Lucy's relationship is exposed when the other members of D.E.B.S. burst in on them in bed together.
* D.E.B.S.: Amy and the other DEBS are investigating a bank robbery. While passing by a closed door they hear a "Mmmmm" noise from behind it. When they open it they find the bank's employees tied up and gagged, and they "Mmmmm" again.
* D.E.B.S.. Amy is given a speech to read at End Game which tells a false story of how Lucy Diamond kidnapped her and held her hostage. She starts reading it to the crowd, but halfway through she stops reading it and tells the truth: that the time she spent with Lucy were the happiest days of her life and that she's leaving to be with Lucy.
* D.E.B.S.. Amy tries to talk Lucy into surrendering, and they start discussing Lucy's love life, how Amy is writing a paper on Lucy's crime career and so on.
* D.E.B.S.. (In fact, they do exactly that in one scene. Though ironically enough, they also have a few beers together in an earlier scene.)
* D.E.B.S. is a spy film with a lesbian twist. One of the super-spies ends up falling for a villain.
* D.E.B.S. (lesbian main characters; subject matter includes queer female romance)
* D.E.B.S.. Lucy and Amy end up pointing their guns at each other the first time they meet and have a debate about who's going to put their gun down first.
* D.E.B.S.. Lucy Diamond and Amy Bradshaw are running down two parallel passages separated by a wall of boxes. Where the passages meet, they run into each other and fall down. Their subsequent interaction leads them to become attracted to each other.
* D.E.B.S.: Lucy Diamond is a supervillain criminal who once tried to destroy Australia. After she meets and falls in love with her arch nemesis Amy Bradshaw, she realizes that "being bad doesn't feel good anymore" and gives up her life of crime to be with Amy.
* D.E.B.S.. Lucy Diamond kidnaps Amy and takes her to a bar that's a hangout for criminals like her.
* D.E.B.S., Lucy Diamond sneaks into Amy's room in the D.E.B.S. house twice by climbing up the outside wall using suction cups and coming in through the window.
* D.E.B.S.. Scud is Lucy Diamond's second in command and Janet is a junior member of Amy's D.E.B.S. squad. They meet when Lucy Diamond kidnaps Amy and gradually fall in love with each other. At the end of the movie they apparently plan to start dating.
* D.E.B.S.: the title characters are trying to defuse a bomb. It activates - and turns out to be a love note from Lucy to Amy.

* D.E.B.S.), to the annoyance of Lucy who believes that you should do what you want to do.
* Debt Detester: Character repays debts as soon as possible so as to not owe others.
* Debt of Honor: A hitman makes his target appear to have stumbled into traffic.
* Debt of Honor, and is inspired to take a course of action that will let him go out with a bang rather than a whimper.
* Debt of Honor is Chester "Chet" Nomuri, a fourth-generation Japanese American serving as a CIA field officer in Japan. His narration comments several times on how different his ancestral homeland is from his place of birth.
* Debt of Honor, quite a few parts of the military side of the plan mirror similar events from back in World War II, all the way up to starting the violence by using the same code phrase that started the attack on Pearl Harbor. This does not go unnoticed.
* Debt of Honor, several Japanese characters struggle to decide if their loyalty should be to their nation as she is, even though that means going along with the crazy, or if it should be to Japan as she ought to be, even if working for the good of the nation may involve giving away secrets in a manner that might be deemed treasonous.
* Debt of Honor. Since said killings were all violations of state law, not federal law, the president wouldn't have the power to pardon said crimes. That would have to be done by the Governor of Maryland.
* Debt of Honor that the US is going to impose one on the home islands so they'll redeploy their forces. The tactic works and it leaves the real targets open to US carrier strikes.
* Debtor's Planet he's Federation Secretary of Commerce. In the end, his future appears not to have been so cold after all.
* Debtor's prison of any man unable to pay alimony or child support. He can't make any money while he's locked up, but as his debt only grows he can't be released. Meanwhile, the ex and kids get nothing anyway, and the taxpayer has to foot the bill of keeping him fed and housed in jail.
* debtors, referred to as "persons of blemished character or unsettled mode of life", could be released from punishment upon agreeing to enlist.
* debt slaves who are supposed to be terraforming Venus for their Corpus masters. However, they've managed to avoid being outright mind-controlled like most poor Corpus soldiers, and hire the Tenno as a deniable strike force against the Corpus.
* Debugging Destiny. As a result, nobody likes him, but no one is willing to get rid of him.
* Debugging Destiny has Mercury, whose Storied special ability means he knows a little bit about everything. Naturally, he spends a fair amount of time dispensing useful information.
* Debugging Destiny has Osborne, who begins the story this way. Then the maze gets destroyed.
* Debugging Destiny has Strider, who is totally immune to any ambient magical effect. He uses this to explore and loot dangerous ruins, since their traps cannot affect him.
* Debugging Destiny has this distinguishing between the simulation and the real world. Since both are drawn in PowerPoint, they are still reasonably similar.
* Debugging Destiny has this in Baleyg, who actively tries to satisfy the hamminess requirements. Lampshaded by King upon realizing the braziers ignite and go out when Baleyg appears and disappears.
* Debugging Destiny is lighter than a lot of these examples, at only 18 characters. However, every one of those eighteen is a major character with real consequences on the story, even if they do not personally make an appearance very often. Most episodes only include two to six.
* Debugging Destiny levels when it's implied the shadows are literally Osborne's physical form dissolving to blot out light.
* Debugging Destiny. Redshirt Guy and the Mysterious Voice talk right past each other for half the episode before noticing the lack of communication.

* Debugging Destiny, they ended up a long way from home, and are Walking the Earth as part of their attempts to return.
* debunked, naturally, since the 1930s or so Master Race, on the other hand, was up for spirited debate (for instance most Germans backed the "Nordic" race, "Italians backed the "Alpine" race unsurprisingly, etc.).
* Debut Queue: Before the actual plot begins, a story's first couple chapters or episodes focuses on introducing and establishing characters.
* Debut Queue fully played out), and spent centuries protecting the Earth and learning more about its inhabitants. Even in death, her affect on the story and cast cannot be overstated.
* Debut Queue: The main characters are gradually brought together by introducing each cast member one at a time across the following episodes.
* decade as a sitcom, with a completely new cast (except for the main characters' father). The series was decently well-received by critics, but was canceled after the first season.
* Decade Complete is very gaudy-looking with the cards of the past Riders on his chest and helmet without really adding anything else to complement or enhance the card additions.

* Decadent Court after his father takes over as Hand of the King and he has been denied any kind of reward for all of his hard work:
* Decadent Court: Although calling the acts 'decadent' may be an understatement.
* Decadent Court, and tastes exactly the way you would expect fermented lichen-and-rat to taste. So the typical Dwarven quality of being master brewers is subverted. Oghren cites the quality of beer on the surface as a contributing reason to the large emigration of Dwarves from Orzammar.
* Decadent Court, and therefore do not impress the other races nearly as much. Plus, they've been running around screwing most of the galaxy over for centuries, so most are pretty glad they're declining.
* Decadent Court around, and no other male heirs they know of), they think maybe it's time to marry Baela off. She rejects their first choice of husband, and is locked up. The next morning, it turns out she's escaped, and by the time they find her, she's already married her cousin, Alyn Velaryon. At this point, the regents throw up their hands and decide it's best just to act like that was the plan all along.
* Decadent Court: A royal court that is selfish and abuses their power for their own benefit.
* Decadent Courts Naggaroth is infamous for its ruthless slavers, and the unbridled cruelty of its residents.
* Decadent Court: The entourage of the leaders conduct warfare in an ostensibly polite and civilized social battlefield.
* Decadent Court to within reasonable limits, and he would later admit that he was guilty as charged. Two years later he got reinstated because Salmissra ended up realizing that none of the other eunuchs in her court were capable of doing his job.
* Decades ago, all professional wrestling training was like this. If you wanted to become a professional wrestler, and didn't know someone in the business, you had to find someone who would be willing to train you. Then you'd get the hell beaten out of you for the first several days. It wasn't uncommon for this to include the breaking of bones, especially the leg. All of this was to make sure that you were serious about becoming a wrestler, had the mental and physical toughness required to finish the training, and had the endurance needed to perform as a wrestler

before you were smartened up to the aspects of

* De Cambrey manages to occasionally fail tests despite her apparent access to spells beyond what her teachers believe to be technically possible.
* Decameron"). When the two are caught in bed by the girl's parents, the father tells the guy (a family friend) that he wronged him by going behind his back, and he can make things right by marrying the daughter (but he'll kill him if he won't). Luckily, the couple are quite happy to get married, even without the death threat.
* Decameron (written a few years after the plague) is about ten wealthy Florentines who decamp to the countryside with their retinue to escape from the plague, and pass their days in storytelling.
* Decap Attack in its Japanese version. The localization team didn't feel like paying the licensing fees for an obscure and unimported anime series, so the graphics and story were redone from scratch.

* De cape et de crocs Eusèbe offers to help a poet writing a scathing pamphlet about a politician who has been constantly harassing him. He then proceeds to write that said politician is "not nice".
* De cape et de crocs of referring to every ship as a galley, we get this exchange, as Don Lope and Armand have snuck onto the janissary's ship:
* De cape et de crocs. Subverted in that halfway through the flight, he realizes it's not actually working - just slowing their fall.
* De cape et de crocs: The Flying Dutchman (actually a ship impaled on the rostrum of a monstrous ship) still has a crew of skeletons trapped in combative poses, as seen when Don Lope tries to fight one.
* De cape et de crocs. The heroes go to a dark room they assume to be the ship's magazine. To everyone's horror, Eusebio lights a candle, revealing they're in the ship's larder. A later scene plays it straight via inversion (they thought they were in the larder, it turned out to be the magazine).
* De cape et de crocs, waking up in jail, briefly freaks out and attempts to gnaw his leg, "as any self-respecting fox should do".
* De cape et de crocs, which takes place in the 18th century, a scientist comments that white-skinned savages must be more likely to listen to reason that their ebony-skinned brethren. Amusingly enough, the one dark-skinned member of the tribe proves to be just as enlightened as the heroes.
* Decapitated Army erupted, Alpharius sought out Ultramarines to fight as much as possible, to try and prove the superiority of his doctrine, and allegedly was only defeated when Guilliman abandoned his own protocols to make a risky assault against the Alpha Legion command structure in an unstated admission of defeat. Though the Ultramarines insist that the supposed battle between Guilliman and Alpharius is nothing but Alpha Legion propaganda.
* Decapitated Army: Take out the leader and the army will have no reason to keep fighting.
* Decapitated Army. The second time, when the Winkies sing it after the death of the Wicked Witch of the West, is a straight example.
* Decapitated Army: The underlings will see no reason to continue fighting if you've killed their leader.
* decapitated head bouncing down a country road before finally coming to rest in the hands of a crew picking up trash on the side of the road. The CSIs soon discover the headless body dumped on the side of the road. However, what appears to have been a brutal murder turns out to have been a bizarre accident involving a go-

kart and blown truck tire.
* decapitating himself with a sword, falling off screen dead, and then walking back onscreen.
* Decapitation has been carried out on corpses in cases where judgment has been rendered after death. Oliver Cromwell, who had been dead some years before the restoration of Charles II, was sentenced to a ritual execution after being tried as a regicide. After having his corpse dragged to its place of execution, his head was then struck off and mounted on a spike atop Westminster Hall, where it stood for about two decades until it was blown down in a storm.
* Decapitation is actually the only way to kill a vampire in Bram Stoker's original
* Decapitation is said to be the only way to permanently kill someone that's been resurrected by the Hand, meaning Nobu is dead for good.
* decapitation is the only thing that will cause death. And even organic creatures killed this way can have their upper half brought back as a zombie.
* Decapitation Presentation as he believed his sailors should concentrate on killing enemy soldiers who were still alive instead of collecting the heads of dead ones. However as heads were regarded as proof of a warrior's bravery, he made sure to let his men know that he would note who was brave and mention their names in his despatches to the king.
* Decapitation Presentation: Holding up a dead person's head to prove you've killed them. Common with serial killers, Vikings, executioners, and headhunters.
* Decapitation Presentation, the Galatian noblewoman Chiomara presented her husband with the head of the centurion who raped her, and the Egyptians presented Pompey's head to Caesar (who reportedly turned away in disgust when presented with the gruesome prize).]
* Decapitation Presentation: You prove you killed a person by showing their decapitated head.
* Decapitation Required: Cutting off the enemy's head is the only way to kill it. Commonly seen in zombie fiction.
* Decapitation Required: The only way to kill them permanently is by removing the head.
* Decapitations and other forms of dismemberment are ridiculously common even without the Bloody Mess perk anyways. The body part you land the killing blow on will almost always fall off if the killing blow also results in crippling that limb. If you get a critical hit with the Plasma Rifle, you can see the head fly away even while it and the rest of the body is melting into goo. Not to mention the Railway Rifle, which shoots railway spikes that pins such a flying body part to any nearby wall. Finally you've got the two-headed Brahmin cows, where shooting one head off inexplicably causes the other one to fall off as well.
* Decapitation Strike: A planned attempt to kill or incapacitate multiple leaders at once.
* decapitation This means that an EMT must sometimes declare Death By Ludicrous Gibs.
* Decapitation was a common form of capital punishment in many pre-modern polities, though it was often one of many forms of execution, and could vary in terms of why and how it was applied, as well as to whom and when. In Germanic and Scandinavian countries, decapitation was reserved for capital crimes such as murder; commoners were traditionally beheaded with an axe while noblemen with a sword. In England and France however, decapitation was solely reserved for the nobility who have committed serious crimes, with the latter almost exclusively using the sword and the former going for the axe. * Deceased and Diseased: Undead creatures portrayed as poisonous or filled with disease.
* deceased boy band named Boy Inferno. This number was later dropped and replaced with "What I Know Now", a song for Miss Argentina and the Netherworld ghosts.
* deceased, but while they did arrest her they made a point to tell her that without a confession there was no way to convict her on such flimsy circumstancial evidence.
* DeceasedCrab, to the point that he was on the special thanks credits of the remake.
* DeceasedCrab!") to your basic "Aww, you're a good kitty". (And, of course, the one time he tried to get his cat to meow on cue, the cat refused to cooperate.)
* Deceased Fall-Guy Gambit). Monk suspects Sherman is lying because he gave the alleged invader one single shot, instead of unloading his gun on him in a fit of rage and fear like someone would do in a situation like that. Further evidence is that the "burglar" owned a .22 caliber (which he left at home), the revolver found on the body was a .38 caliber, and there is no .38 caliber ammunition in his apartment.
* deceased father, which is distressingly spot on once we learn more about her history.
* deceased, his first question is "what did i do wrong". At the time the event occurred, Dave was psychically unconscious on a different planet, and could not have possibly done a thing to help (of course, he is a time traveller who revisited that point of the timeline several times, so he could theoretically have gone to help, but another alternate version of him was already helping and he still failed).
* Deceased Parents Are the Best: The only good parents in the work are deceased ones. Common in Disney films.
* Deceased Parents Are the Best to be played straight, considering how Beatrice is treated by her uncle. But even though she misses her parents, she can still admit that they had flaws.
* Deceased Parents Are the Best will be indifferent or actively hostile to the young protagonist.
* Deceit player getting their hands on a scanner and using it on an Innocent player before declaring them Infected over voice chat, but particularly brazen players have been known to drink blood bags in plain view of an innocent player and scream that said player just drank the blood bags over voice chat while starting to shoot them.
* Deceived Coruscant with orbital bombardment, as there was no way for the Empire to hold it before the Republic took it back. The peace talks were originally just a distraction. However, at some point, the Emperor inexplicably decides to sue for a ceasefire, using Coruscant as a bargaining chip. Naturally, not all Sith are happy with this outcome.
* Deceived origin turns out not to be space, but the depths of Hell itself.
* Deceived trailer for The Old Republic. Given how absolutely unprepared the Republic and Jedi were for the Sith Empire's reemergence and assault on Coruscant, he seems to have a decent point.

* December 1931 cover, but also enormous, with feet as large as cargo ships and a stride as wide as the Hudson Bay.
* December 1939 cover, there are four people in the foreground with bubble-shaped clear helmets with a tube in the back, like a deep-sea diving suit.
* December 2010 Best Buy campaign. Similiar to Radio Shack above, with most blatant openly stating that Christmas Magic is about more viable payment options.
* December 2019 speedru- err... "speedrace" hosted by SpeedGaming. The result? 33 minutes and 47.11 seconds against 33 minutes and 47.16 seconds. Yep, the gap was merely 50 milliseconds!

* December 2019. The article also notes about 40 bailiffs with the Dallas County Sheriff's Department still use revolvers, along with one confirmed officer in the city of Plano.
* December 25 is not mentioned as the date of the nativity. Most scholars believe it was in September.
* December 7th, 1941 and causing widespread damage. The Americans thought that Hawaii was too distant from Japanese bases to be vulnerable to attack, and assumed that the assault would focus on the Philippines. The Americans would lose over 2,400 men, with 19 ships sunk or damaged in the battle and nearly 200 aircraft destroyed. Military thought at the time believed land based aircraft would almost always defeat carrier aircraft, making such an attack very risky.
* December Boys-type magazine in the middle of the night. The odd devout boy of the group says to them seriously, "You realize you're going to hell", to which one cheekily replies, "Really?", then holds up the centerfold to him. "At least I'll have company."
* December: Christmas, trees, ornaments, Nativity scenes, poinsettias and Santa Claus. Maybe some sparkly blue decor and Stars of David for Chanukah if you're lucky.
* December Stillness Kelly's father is revealed to be a Vietnam Veteran, contrasting with Mr. Weems as he has adapted to life after the war much better than the other.
* Decembersville tells the tale of a young girl who is sucked into a world of freaks, murder, and mystery.
* December To Dismember: Debuted (And was canelled) in 2006. Often regarded as the worst PPV of all time.
* December To Dismember: The original ECW version was held on December 9, 1995.
* "Decemberween Short Shorts", released in 2006, was a series of extra-short cartoons themed around Decemberween, including Strong Bad having a secret love of tube socks, a scene between ornament versions of the main characters, The Homestar Runner's unsanitary old-timey traditions, and Homestar singing a song to inspire Coach Z to be less creepy so people will want him around on Decemberween.
* Decemberween, with a few random scenes from the play. Apparently the holiday's origins involve a sailor named Archibald fighting a squid, the Santa-like Dr. Christmas hitting up the King of Town for a loan of "fifty bag of golds", a love affair between an angel and the Popular Vote, two Kobe Bryants, and a "moon computer".
* Decembrists' wives. The Decembrists were an early 19th century rebellious movement in Russia, they tried to fight tsarism, abolish serfdom, and (some of them) even to make Russia a democracy. They were all arrested and sent to
* Decency, serving five years hard labor for it. Twenty years later, a flotilla of similar vessels enter solar orbit and want the guard to join them as humanity's representative - and as the only person to show them heartfelt decency.
* Decency. The sail is wider than the Moon, and is punctured from impacts with stray atoms of dust in interstellar space. When it impacts with the Earth, the impact itself is harmless due to the sail being so fragile.
* Decepticon Sixshot is one of these. He is portrayed as possibly being the greatest pure warrior among the Transformers (though others may be more gifted at overall strategy, or just more powerful), aided by his (even more) rapid transformation speed and five alternate modes. Though a Decepticon, he speaks well of those he's beaten in combat, as he hopes that should anyone ever defeat him he will be treated as respectfully.
* Decepticon's spark that rendered it immortal (resulting in the creation of Rampage and the atrocities he committed, above), and their treatment of the Predacons is very much like the treatment of the Allies towards post-World War I Germany. All in the name of keeping the peace and not letting the atrocities of the past come back to haunt Cybertron again.
* Decepticons that they technically left by choice, because doing that gave them amnesty for the war-crimes they committed during said war.
* Decepticons, while they started out as being primarily aerial combatants (to

* Decepticons who turn into planes are referred to as Seekers. This term was possibly invented by the fandom and got adopted as the official term, but there are still questions over whether an old catalog advertisement citing them as "Decepticon Seekers" influenced the use of the term years later.
* Deception (1946)). He is none too pleased when Christine suddenly decides to marry a cellist (Paul Henreid), and he invokes their mentor relationship when begging her to return to him. When that doesn't work, he puts the couple through a series of vicious mind games.
* Deception (1946): When asked in an early scene what composers he admires, Karel the concert cellist names Strauss, Stravinsky, and Hollenius. The first two are real while the third is the antagonist in the film, the former sugar daddy to the woman that Karel just married.
* Deception (2018) has a mysterious woman providing illusions to crooks for escapes/thefts/other crimes. Superstar magician Cameron Black is able to see these tricks (a few of which he's used) and helps the FBI in figuring them out.
* Deception (2018), the FBI agents are hunting Sasha, a Russian mobster so secretive that few even know what he looks like. They raid a local bar filled with various mob guys but can't find Sasha. After magician aide Cameron helps them bust an underling, the guy reveals who Sasha is: The club's bartender who the team had passed during the raid. While arresting him, agent Kay gives the guy credit, lampshading that no one would give the bartender a second look, let alone think he's the boss.
* Deception: A wide variety of these show up in the series in all manner of colours. When facing one of these, expect them to have heavy armour that reduces or even renders them immune to damage from many of your traps and they may have further abilities as well. The most deadly of these are the Hell Knights from Deception 3, who are nearly indestructible, can teleport and are masters of their devastating scythes.
* [[Deception (for instance, a Zombie is created from a Soldier, a Cleric, and a Pirate). Monsters also level up as they're used.
* Deception mode while he sets out to undermine and destroy Christine's marriage.
* Deception: Murder in Hong Kong, the players are police detectives investigating a murder. However, one of the players is actually the killer, who must try to throw the other players off their trail (with the help of an accomplice in larger games). Meanwhile, one player takes the role of the "forensic scientist" who tries to give the other players hints as to the murder weapon and the clue left behind at the scene of the crime, which only the murderer and their accomplice know.
* Deception Noncompliance: Somebody has to deceive, but they deliberately mess it up.
* Deception Point — Rachel Sexton, Michael Tolland, and Corky Marlinson, a data analyst and two civilian scientists find themselves on the run from military black-ops assassins.
* Deception Point takes place on a marine biologist's rig over a massive swarm of sharks. Some baddies do find their way in, naturally.
* Deception Point, the first clue that the meteorite find is fake is that the hole it's in, supposedly sealed for long ages, turns out to contain glowing (and hence fresh) organisms.
* Deception series by Tecmo tasks you with using death traps as your only line of defense against aggressors.
* Deception series, dealing a high amount of damage but being very easy to avoid.
* Deception series - doesn't do a lot of damage (generally), but enrages the victim, forcing him to charge towards you, even if he would otherwise act cautiously and run away/keep his distance. Useful for luring such cautious foes into the REALLY nasty traps...
* Deception series, it's surprisingly damaging and holds the enemy for a bit of time - setting them up for a differnt trap to hit them.

* Deception series tends to be set in a world that invokes this feel. Though as the main character is usually limited to a small area, it's mostly shown in outside cutscenes and enemy descriptions.
* Deception's Princess is a subversion. Odran leans in too suddenly and their teeth smash into each other, with both of them noticing the pain even while they continue to kiss.
* Deception was the result of a Midway employee taking suggestions from a fan.
* Deception, you can subject enemies from across the entire story to some truly dastardly arrangements.
* Deceptive Cadence. Basically, it's that sequence of notes where you feel like the song should end, but something seems off.
* Deceptive Cadence on a diminished seventh chord which is then repeated fortissimo to begin the allegro finale.
* Deceptive Disciple - Following the teachings of an instructor for some ulterior motive and will inevitably betray both the teacher and the teachings themselves.
* Deceptive Disciple: They're letting you teach them for the wrong reasons.
* Deceptive Legacy: A child learns a well-kept secret about their parentage.
* Deceptively Human Robots: A robot that looks human but doesn't act human.
* Deceptively Human Robots: Robots that look human, but don't act human.
* deceptively massive cult that worships death and seeks the end of all life. The rank-and-file are kind of lousy and some were forced by their parents to become cultists.
* Deceptively Silly Title: The title gives the impression of the work being more lighthearted and kid-friendly than it actually is.
* Deceptively Simple Demonstration to be razor sharp to cut through a pineapple if you're using a forceful swing of the knife.
* deceptively upbeat song about how Katherine Howard was manipulated and mistreated by every single man she was romantically involved with, culminating in her having a meltdown onstage.
* decided, although most of the witches agree that the decidedly mundane things she did to help the people of the Chalk were definitely a large chunk of what being a witch is about.
* Decided by One Vote's Eumenides has the trial of Orestes, in which the jury is tied on whether to convict him. In ancient Athens, a tie went to the defendant, so Orestes gets to go free.
* Decided by One Vote: Someone won an election by a minuscule - but significant - margin.
* decided, growing larger should make her stronger, and force-fed herself until she became as wide as she is long.
* decidedly less wholesome rather than love and never provided either of them with emotional fulfillment. It's strongly implied that Stolas considers their daughter, Octavia, the only good thing that ever came out of their relationship.
* Decidedly masculine-named Ozaki Tokutarō, known in the late-modern Japanese literature scene as Ozaki
* decided they didn't want to be slaves any more when something goes wrong here.
* Decided to ignore any and all precautions regarding the safeguard of their technology, or leave any kind of warning regarding their technology, even when clearly having the power to manipulate the physical environment to do so. This extends to the Ancient Library of Knowledge and the Destiny Chair, both of which are designed so that if the users aren't pure Ancient, it kills them.
* decided to ignore the strict court orders against overt gestures or expressions, and flipped off prosecutor Jeff Ashton. Judge Belvin Perry found him in contempt and sentenced him to six days in county jail and a total fine of just over six hundred dollars.
* decided to make a copy of him for herself she is and gives him a fist bump.
* decided to stay in town instead of running away with Nadia after stealing Elena's body, all because she wanted to woo Stefan.
* decides that her surrogate son Y/n would make the best choice for a husband when she gets sick of Zeus' philandering ways and decides to remarry.

* decides that he wants to be himself and to "stay here," the theatre scene disappears, and all the other characters congratulate him including Gendou and Yui.
* decides to become the Queen of the World, Dorothy makes a curtsy in front of her.
* , decides to crash at her ex-girlfriend's apartment. She wakes up in a completely different building, three stories up, with a strange woman (Weiss) pointing a sword at her. Even after deducing the above, she still doesn't remember exactly what happened.
* decides to give him "extra duties" in the form of "visiting and reviewing the best brothels on every planet and station they land on for the next twenty years so he can eventually tell Harry which is the best in the galaxy". Said crew-mate promptly declares Harry the best boss ever.
* decides to give up a part of his liver for a patient. "If you die, I'm alone."
* decides to run with it by having Kermit react and try to correct her. The result ends up being very funny and adorable at the same time.
* decides to stay in the parallel universe, replacing his counterpart Ricky, instead of going home, because he feels he can help make this world better. (And because his alt!grandmother is still alive.)
* decides to stop focusing on getting the gold himself, and instead sets up a business supplying the other prospectors with equipment, thus securing a tidy profit.
* decides to test the thirteen day rule leave it unambiguous that it wasn't the outcome he considered.
* decide to suicide to deny their opponents a free kill, the "kill" command is disabled during this period. The Soldier's suicide-bomb taunt, however, is not; this was probably intentional.
* deciding that X reeks of evil (and WOULD strike out against evil party members unprovoked).
* Deciding to reference and poke fun at his own lack of knowledge about (association) football, Chris Denker starts off the sixth episode of his FIFA17 series with one of these in response to getting loaned out from Manchester United to Oldham Athletic, a team two leagues down from where he started.

* Decipher due to the solar flare from Hell. To avert it, the heroes have to reach Atlantis so it can quasi-crystallise the planet to protect against the gravity wave.
* Decision 2 and 3, where the revolver is the starting weapon, and also the weakest one available.
* Decision 3012", Bender is working for Nixon to dig up dirt on Chris Travers, a rival election candidate. While digging through his office for files at night, Travers comes back, forcing him to hide in the men's room disguised as a urinal (the rest of which are out of order). Cue Traverse walking up to Bender and unzipping his fly as we transition to the next scene.

* "Decision 3012" spends the entire episode satirizing the Obama "birthers",
* Decision Darts in one of the old TV commercials for Bartles & Jaymes Premium Wine Cooler. It showed Frank and Ed selecting a new flavor with a spinning dartboard.
* Decision lets you place bear traps on the ground that prevent the trapped zombie from moving. If they have another method of moving (such as the wolfmen's leap attacks), they can still change location... but then remain stuck where they landed.
* "Decision-making position at a produce marketing unit": Finding and removing fruit and vegetables that had gone bad at the supermarket. Career counselors actually encourage this, since it can help people get a job they desperately need.
* Decision-Making Room is the boardroom where the officers of the watch oversee the most mission-critical sides of the military machine. Notably also features the round table.
* Decisions in general only seem to be shown when the hero narrowly loses to set up a return. Points are only brought up to show the hero far behind to build for the sudden knockout.
* decisions, noting that there are some things worth risking your internship for.
* decision to leave his siblings to rot in the Netherworld centuries ago later bites him back in the ass, when he eventually meets the disgruntled family again as an incorporeal and depowered spirit.
* Decision weapons. It's most prominent near defensive towers, where the zombies all head for a single point and the tower can have up to three explosive weapons installed on it.
* Decisive Darkness, after the invasion of Japan, the United States annexes the Ryukyu Islands and southern Kyushu.
* Decius's "stupid fucking popehat" apparently acts this way as well, though mostly by deflating when he's depressed. The rest of the Ecclesiarchy's hats seem to act the same way. And then in Episode 18.5 it reacts to the Emperor's description of his ideal vision of humanity by shooting out to ceiling-busting lengths.
* Deckard's revolver, the prop of which is built around a firing revolver, is a popular custom project for gun smiths.
* Deckbuilding Game. In game terms, it lets you use the otherwise-useless alien icons on your cards to boost your actions.
* Deck Building: The Deck Building Game combines the genre with the theme of building a patio deck.
* decked out the site". These changes are always unannounced and leave just as soon.
* Decker band) as a cover to get into a party where a terrorist group is attending.
* Decker: Decker is always willing to save America from danger even though he hates President Davidson's policies.
* Decker has strong conservative principles and hates weak politicians. He is also the frontman of a very successful rock band. The character also drove a harley motorcycle in the first season which was back when Tim was interested in them.
* Decker. He is however brought back to life in the first episode of Decker Unsealed thanks to an untested treatment which also makes him look younger.
* Decker: In season 2, Decker takes Kington to the USS Arizona Memorial Visitor Center to give him an understanding of why they are fighting terrorists. Decker later dives in the ocean to retrieve his grandfather's dog tags who had, appropriately enough, died during the Pearl Harbor attack.
* Decker Kington and Decker are basically heavily idealized copies of their actors' characters on On Cinema.
* Decker manages to steal a huge sword from a foe who didn't even know he was carrying it, and was upset that he'd been stuck with a wooden shortsword all this time. This is of course poking fun at
* Decker, most of the terrorists Decker fights tend to hide their faces with bandit masks.
* ''Decker'' RPG. In 2083, the world is a place of propaganda, oppression and

profit. Summarily laid off from his programming job of 12 years so the company could save 4% on his position's payroll, John Anderson has had enough. Destitute and alone, he decides he is done working for a system that has chewed him up and spit him out. It's time to start subverting the system. It's time to get his long overdue payday.
* Deckers gain advantages when within computer systems they're authorized to use. Their programs always execute properly, they can gain access anywhere they need to go and they don't have to worry about IC attacking them.
* Decker, the characters Decker and Kington are named for their actors, Tim Heidecker and Gregg Turkington.
* Decker, there are Middle Eastern terrorists, often referred to as Al-Qaeda or ISIS, interchangeably, that serve as the main antagonists in a number of episodes.
* Decker, the Taliban, referred to as the "Talibund", serve as main antagonists in a number of episodes.
* Decker, the titled character has a habit of calling Kington either "Klington" or "Kingston"
* Deck of Many Things can summon a "minor death" to try to kill you, which looks like the grim reaper as depicted on a Tarot card. (In fifth edition, it instead summons a dread wraith, a powerful undead creature which sort of looks like the grim reaper.)
* Deck of Wild Cards: All of the villain's sidekicks want to overthrow them.
* Deck of Wild Cards: All of the villain's underlings want to overthrow him.
* Deck of Wild Cards: Every underling plans to overthrow the main villain.
* deck, prices progressively get higher and higher. There was simply too much in-game money in the system and certain cards became highly demanded, which allowed to leverage prices of other cards, snowballing into current state.
* Decks built around Goblins not only employ cheap creatures whose only purpose is to get a bit of damage in at the opponent before dying any one of numerous ways, but creatures that give you beneficial effects for intentionally sacrificing them. A few examples:
* Decks Fall Everyone Dies is to pull off a plan that's so crazy it might work to bring card games back.
* Decks Fall Everyone Dies, the other duelists hide Joey's deadly tuberculosis from Tristan and Duke.
* Decks Fall Everyone Dies, Tristan is overshadowed by Bakura, Duke, and all three Kaiba brothers, even though he was supposed to be the main character.
* Decks that focus on alternate win conditions look like this. Final Countdown Decks typically feature a crapload of defensive cards and not much else, and Burn or Mill Decks often completely ignore attacking the opponent in favor of stalling while they whittle down their resources. No presence, no offensive power... so they make it as hard as possible to get a hit in while they try to complete their own strategy.
* deck stolen by someone who's usually noob incompetent, but also having to listen to your teammates distorted speak through voice chat, which can sound incredibly annoying.
* Deck the Halls doing a dance and are getting quite excited by them... until they realize that it's their respective daughters on the scene, to their horror. Cut to the both of them in church washing their eyes with holy water.
* Deck the Halls's character wants to decorate his house so that the lights can be seen from space. This creates the major conflict.
* Deck the Halls when he crouches in front of a cabinet to pick up fresh police files, exposing his pink thong. Steve runs out of the building awkwardly.
* Deck the Halls, who, while short like Danny, is very beautiful, and portrayed as such.
* Declan. After getting therapy, Fiona became good friends with Holly J eventually realized she’s a lesbian and was in love with Holly J.
* Declaration of love through Shakespeare's sonnets with much anguish and
* Declaration of Personal Independence: Someone attempts to strike out on their own against their guardians' wishes.

* Declaration of Protection: A person has their entire motivation built around protecting a vulnerable person (usually a girl).
* Declaration of Protection: Making a vow to protect the one you love.
* Declarative Finger: Often used by the authors to imply that the character doing so is just trying to come across as profound, which in turn is used to imply that the character is actually saying something NON-profound.
* Declare answers the question of why most of its events surrounding very real historical people and circumstances are not known to public by saying that the British, American, and Soviet secret services covered all of it up after the fact.
* Declare. Attempts are made to kill djinn using iron from meteorites that according to legend have killed djinn in the past, by casting them into bullets or blasting them as shrapnel. It turns out to be almost, but not quite, what is required.
* declared a heretic and executed a dangerous heretic, but that was learned only after a Blackguard Kill Team executed him on the toilet.
* declared missing in action and presumed dead to dark green with black and white trim, after Corran's X-Wing. It's never stated whether they changed back after he reappears.
* declares that SpongeBob is "loose with other people's money"), and storms off, muttering to himself angrily.
* Declare that can be bargained with or killed, but not controlled. For a djinn, shapes can be thoughts and thoughts can be actions, and an ellipsoid marked with perpendicular grooves means death. King Solomon learned how to trap a djinni in a jar using a string of incised beads; the djinni would not be able to escape without rotating the beads, and therefore assimilating the experience of death into itself.
* Declare versus a scroll detailing the secret of eternal life. The game is interrupted, but Philby insists on completing the game when they meet up again in Moscow.
* declaring how much they love Queen Victoria. This leads to the entire cast singing the Queen's praises.
* declaring war on the entire world, Robin realizes that her friends will never betray her, and that she really wants to live, a fact that she screams from the bottom of her heart.
* declawed, which often leads to physical pain on top of difficulties hunting.
* Declawing cats. To remove their claws, their fingers are cut off at the first knuckle. Some shelters will require any prospective cat owners to sign an agreement not to declaw their cats as a result; if it discovered that the cat was declawed anyway, the shelter will be legally able to reclaim the cat for breach of contract (animal cruelty, in this case, being hard to prove).
* Decline and Fall or Gibbon's own successors, though exceptions have been known to exist.
* Decline of Video Gaming comments on the general superiority of the backup plan in all instances.
* Decline of Video Gaming title with an endless jumble of Roman numerals.
* Declining Promotion in that once these promotion cycles happen, Rogue Squadron tends to break up, with them going to command other squadrons, and only reforming in special instances, or leaving Rogue Squadron proper to the next generation.
* Declining sales and conflicting opinions of the fans about the quality of the writing may have played a part in the decision to axe
* Decoded Feedback's "Another Loss" is a male example. "In my dreams you live forever, 'cause love will never die".
* Decoded Feedback's "Death Control" opens with a child creepily singing "Ring Around the Rosies".
* Decode, Natsumi hears Birdy's voice in the bath, takes a look out of surprise, only to find a naked and embarrassed Tsutomu.
* Decoder Ring Theatre features several series in the style of 1930-50s radio drama broadcasts
* Decoder Ring Theatre is played straight, although there are two detectives, one male (Jack Justice) and one female (Trixie Dixon, Girl Detective), who take turns

providing monologue.
* Decoding Reality, by Vlatko Vedral, uses a story of a card game as a metaphor for the scientific process, which involves players sitting around a table, playing cards that feature random images. The only rule of the game prohibits context from being definitively established — the cards do not explain their own meaning, and the players are not allowed to speak to one another. The player is left to interpret the images on the cards and the facial expressions of the players, with the caveat that every time a new card is played, it could completely invalidate your interpretation. There is not even any indication that it's a game, because there are no defined rules. The players themselves may all be playing completely different games at the same table, and no one would ever know it.
* Decommissioning ceremonies often serve this purpose for vehicles like ships.
* Decommunization: Former Communist/Soviet states removing Communist policies, monuments, names, etc. after the fall of Communism in Eastern Europe.
* Decomposing Angel is a swiveling rig of four Dillon Aero machine-guns. It sees plenty of use.
* Decomposing animals can look weird and be hard to identify. The internet is full of pictures of mysterious animals that have washed up on beaches and have been claimed to be everything from aliens to cryptids.
* Decomposite Character: One person's role may be split into multiple for the sake of narrative and to provide a different spin on things.
* Decomposite Characters, and for being actually scary to animals while Elmer doesn't scare anyone, and the show had a few original characters not based on any of the Looney Tunes.
* Decomposite Character: Splitting the role of one character to two or more.
* Decomposite Character: The adaptation splits a character into two or more characters.
* Decomposite Character: The adaptation splits one character into two or more characters.
* decompressing the plot so much that every minor detail happens over at least 3 days. This also means you have to read several months' worth of strips to get anything meaningful out of it.
* decompression sickness (or the "bends"), which tends to (mostly) happen in divers. You won't explode but, like the airplanes examples above, this can lead to your lungs rupturing. More often than not, the AGE type happens when a diver ascends to the surface too quickly or if the diver had lung conditions prior. To prevent this, some people (particularly those in the Navy) undergo some form of pressure conditioning.
* Deconfirmed Bachelor: Character who previously refused to get married changes their mind upon meeting the love of their life.
* Deconfirmed Bachelor: He vowed to never be in a relationship, but then he met "her".
* Deconfirmed Bachelor meets the right person and changes their mind about being single.
* Decon-Recon Switch. Lady Claudia starts out quite willing to love her stepdaughter Lilli, but years of the girl shunning and rebuffing her slowly destroys that love. Once Claudia suffers a miscarriage, she goes mad with grief and tries to murder Lilli.
* Decon-Recon Switch: The point at which a work shifts from deconstructing a genre to reconstructing it.
* deconstructed a bit because the trauma of the ordeal would likely have killed the victim.
* deconstructed accelerates himself to that point in response to terrorists firing on a party. When he disarms the terrorists, he recognizes that he has to do it as carefully as he can, or he'll kill them by touching them at the speeds he's moving (he still ends up breaking their arms). And when he plucks the bullets out of the air, he makes sure to put them in a safe place because he recognizes that they'll still have their momentum and kinetic energy when time goes back to normal from his perspective.

* Deconstructed. A couple is murdered, and one of the cops on the case tells the couple's troubled son that the mother lived long enough to name him as the perpetrator, after which the son breaks down and confesses. Logan is suspicious, however, and eventually uncovers the truth: the son was high on the night in question and can't remember what he did, so when he was told that his mother implicated him, he believed that if she said that, he must have done it, not realizing that she never said anything and it was all a ploy. Logan then finds evidence that proves the son's innocence.
* Deconstructed a few times where Starscream or some other Deception actually predict a definite error in Megatron's plan. He dismisses it as this trope until the problem inevitably occurs.
* Deconstructed after a bloody civil war leaves the Blood Angels near death because they can't replace their losses fast enough, forcing them to beg or order their successor chapters to give them some recruits.
* deconstructed. After being put through the wringer several times over by their adoring "fans", it would be safe to assume the Mane Six wouldn't mind going back to being widely ignored.
* deconstructed. After having it up to here with Dr. Wily, Mega Man finally spells out just what taking over the world will require. Namely, having to sort out the already noticeable mess of differences between various nations, having to deal with the various uprisings, learning every language known to man just to communicate with them, getting people to accept his rule in the first place and the insane amounts of stress that would be implied. It ends on a nice humorous note as Dr. Wily, having clearly gone too insane to recover, laments that he already had a custom gold world-domination crown made.
* deconstructed, a majority of the bridge crew and cadets are dead, forcing Nog to tell everyone to abandon ship within a minute. Only he, Jake, and one other cadet survive.
* Deconstructed, and at the end of the series it turns out that he might have to permanently retire from Gunpla Battle.
* Deconstructed and depicted much more unsympathetically almost to the point of caricature in
* Deconstructed and has had to learn on his own things the other three took for granted) helps solve those problems.
* Deconstructed and is therefore able to wipe the floor with them despite using otherwise primitive tech.
* Deconstructed and rescue his master Ahriman. He manages to get aboard without incident, since they were expecting “his” return, but because the Thousand Sons wear highly distinctive and personalized armour, and because the sorcerer whose armour he’s wearing is well known for having a twin brother who never leaves his side, the maintenance crews realize that something is wrong the second Astraeos steps out of his shuttle alone and quickly sound the alarm.
* Deconstructed and saw Solid Snake as the ultimate action hero badass and desperately wanted to be him... which resulted in...
* Deconstructed and spoofed comic, where Jerry's actions in the "Lost Episode" of Tom and Jerry do have lasting repercussions.
* Deconstructed and steadily eroded the relationship between himself and his crew.

* Deconstructed, at least partially, in the case of Kuvira, the Earth Kingdom fell into disorder and anarchy due to a political assassination, and the only way to

restore order was through the use of military force. Several heroic characters support Kuvira's mission, and she succeeds in pacifying the chaotic Earth Kingdom, the problem is that she doesn't stop there ...
* Deconstructed, a trope is deconstructed when it is used in a way that demonstrates the problems with it and why it wouldn't work in real life.
* Deconstructed at the end of the second season, where Kaiki tells Araragi that he
* Deconstructed attitude towards her, stating that she shouldn't be blamed for his reaction.
* Deconstructed because he had been acting as defense attorney to an accused stalker at the time of a previous game. (Annie is playing Finn in this arc.)
* Deconstructed, because she doesn't see her showing any strong emotions after what happened, and her telling this to the police officers investigating Marie's case makes them come to the same conclusion. To the viewer, however, it is made quite clear that Marie's lack of reaction is because she is still in a state of shock and trauma after the rape, and is actually trying her hardest to avoid thinking about what happened. Her other foster mother Colleen points out this to Judith when they talk, noting that people react differently in individual cases.
* deconstructed because she finds herself unable to live up to this standard.
* Deconstructed, because the game has a weird obsession with classifications.
* Deconstructed blog post. The author argues that having a single highly competent black person in the company of many white people of varying competence only shows that black people have to work harder than white people for the same rewards. According to an article, she quotes "...one of the ways in which we will know when black people in the United States are truly liberated and equal to their fellow white citizens will be when there are as many mediocre blacks in academia as there are currently mediocre whites."
* Deconstructed by an employee featured on Not Always Working, when her uncle points out that not only does he not have that much power with the establishment, but
* Deconstructed by a simulated Humongous Mecha battle that takes place between two diplomats in
* Deconstructed by Blake. When Blake finds out that Torchwick is working with the White Fang, she becomes obsessed with finding out they're up to and stopping it. Her determination becomes an obsession that takes a heavy toll on her grades, social life and health. Yang takes her to one side to tell her a story about how Yang's obsession with finding her birth mother almost got herself and Ruby killed at a young age. Yang has since mastered her desire and helps Blake to do the same. Blake eventually plays the trope straight when she saves Yang's life by picking up Yang's unconscious body and running despite having just suffered a vengeful beating and being stabbed in the abdomen. Something that eventually keeps going in future Volumes.
* Deconstructed by Gwenlliant's reaction to Lord Cado's wizard's laboratory. When Gwenlliant — who grew up at court and was taught by the resident alchemist/wizard — first sees Cado's laboratory, she is immediately uneasy, knowing that he must be a bad wizard — "either not very principled, or not very wise". No proper wizard would bother to keep so many showy magical experiments running at once; they would be set up one at a time for research purposes, and would not be shown off to visitors.
* Deconstructed by House Bolton. The Boltons were bitter rivals of the Starks, and were the most powerful and last of the Northern petty kings to be conquered back in the Age of Heroes. Since then they have rebelled multiple times, secretly defied many of the Starks' laws, and
* Deconstructed by one of the "Uncles" of Wo Shing in the climax of the sequel, who's never heard of this lowly foot soldier.
* Deconstructed by Rocket Raccoon. He's a walking, talking raccoon that can stand on two legs, hold and fire heavy weaponry, pilot spacecraft, and so on because he had multiple painful experiments performed on him in the past.
* Deconstructed by the Halosians, a race of bird-like creatures whose entire culture is based around gaining more power by racking up kills. In practice, this

means that they just go around attacking anyone they meet, which usually results in them getting their asses handed to them by more powerful opponents, and leaves them unable to consider

* Deconstructed - Ce'Nedra leads an army into battle wearing a suit of armor made entirely of pure gold but knows exactly how impractical it is in an actual fight. She uses it entirely to serve as an inspirational figure to bolster the troops morale.
* Deconstructed, "Certain Girls." There is a flashback where a young Cannie hears a bit where these two DJs (whose show is suffering low ratings) look at the wedding announcements for the ugliest bride and they stop at this one called "Wide Bride", the dubious winner gets a supply of Alpo delivered to her house. Cannie's mother is disgusted and switches to NPR, whereas Cannie wonders about how the bride, the groom, the bride's mother and friends feel about the business and worries about her or a loved one receiving this sort of abuse.
* Deconstructed Character Archetype: A character who deconstructs the archetype they seem to embody.
* Deconstructed Character Archetype features with Meredith, Castle's first wife and Alexis's mother. While Castle and Alexis are clearly fond of Meredith, they both find her exhausting to be around for a longer period of time, and she's especially shown to not be a very responsible parent to Alexis. Castle describes her as a "deep-fried twinkie" — tastes great, but really bad for you.
* Deconstructed Character Archetype. Possibly intentionally, as he's shown to be remarkably trope-savvy.
* Deconstructed Character Archetype, she has completely changed and now rejects this trope. Cassie is no longer the wild, carefree pill popping girl she one was and has now depressingly matured into a young lonely woman who rarely socialises. She has seemingly outgrown this trope and realised being a 'Manic Pixie Dream Girl' in the real world can never work.
* Deconstructed Character Archetype: while in college Rob goes out with a girl named Charlie who he perceives to be one of these, and when she dumps him he never really gets over it. Meeting her again, years later, he realizes that she is actually a pretentious, vapid, self-important idiot whose "quirkiness" is merely to cover up that she has no personality of her own, and he was just too immature to realize this at the time.
* Deconstructed Character Archetype with Parker Posey's character Liz, whom Louie takes on a date. She's cute, smart, vivacious, eccentric and irreverent, spending their entire date suggesting adventurous things to do and repeatedly trying to push Louie out of his shell. However, there are frequent hints that she's a bi-polar alcoholic and pathological liar.
* Deconstructed compulsive liar. That's the reason why she can stand Manabe; he's one of the few people who actually speak what he thinks.
* Deconstructed Courtney and delinquent punk Duncan. The bitter arguments start up almost as quickly as the sparks fly, with her ultra-preppyness directly contrasting his criminal nature. Their relationship is unstable from the beginning, and they break up and come back together several times. Eventually, the constant arguing becomes too much; Duncan tires of her by season 3 and cheats on her with Goth girl Gwen, leading to his and Courtney's final breakup.
* Deconstructed" Dr. Director puts his face close to the TV to say "hello". But he doesn't see anyone. Of course, this was just a distraction.
* Deconstructed embodiment (Michael's voice-over rightfully calls it one of the most inaccurate guns on the planet). They dive behind cover and wait for the guy's full-auto Dakka to burn through the clip in about five seconds, then capture him when he tries to reload.
* Deconstructed. Fast forward eight years, and it becomes clear that she harbors a small crush on Karasawa, who, unfortunately for her, is traumatized by her bullying to the point where he can barely interact with her normally.
* Deconstructed first instinct would be to send more guards to the thing worth protecting.

* Deconstructed following her survival. Given this, she would aid him in his work with the hopes of following his footsteps after his death.
* Deconstructed for a case she was working, which results in Mac getting thrown off the case (allowing Singer to take the lead on it).
* Deconstructed for how much they take him for granted and ignore him.
* Deconstructed for laughs in one chapter of the manga, where he chases after Ranma to tell him something... but since he's holding a sign, Ranma can't tell that Genma is trying to talk to him until he catches up.
* Deconstructed; for once, he's drastically misjudged his audience and his ability to influence them.
* deconstructed. Founded by military members as a society free from selfish civilian political influences, It soon devolved into a totalitarian martial culture who aren't actually that good at warfare, and spend more time fighting each other than the Inner Sphere.
* Deconstructed has unwittingly (and quite unwillingly) become a "casualty" of this "conflict", same as another Federation ship before it) Kirk blows up the computers to force them to actually face the consequences of war, telling them it's up to them to make peace or suffer the brutality for real.
* Deconstructed. He doesn't care at all for Hinata's feelings and treats her more like a personal trophy than a person.
* Deconstructed, he gave Okada such a powerful headbutt that it caused a subdural hematoma that required surgery. Although the surgery was successful, Shibata suffers paralysis on his left side and perhaps may never compete again.
* deconstructed he leaves his second wife and their child to join the Grey Wardens, because he's not suited to live in society; all he's good at is killing.
* Deconstructed here. The idea being the idyllic past is not so idyllic and we changed for a reason. Everybody "past" and present eventually accepts this.
* deconstructed, he says his name and "card slash", but that's about it. It's implied to be voluntary, as he's been pretty traumatized in these games.
* Deconstructed. He's pure in four different ways that don't interact well and deals with the stress by hanging out playing the Games of Divinity for, oh...about the last two thousand years.
* Deconstructed. His lack of, well, any sense of pride, dignity, or responsibility is responsible for causing half the crew to nearly descend into insanity. At one point, a GHOST becomes disgusted with him, and leaves. Death is mercy compared to living with Tylor. The section he works in is a dumping ground for the screw-ups who haven't quite screwed up enough to be court martialed, further contributing to the poor to nonexistent military discipline.
* deconstructed his new invention, a machine for lowering the gods to the stage in order to solve characters' problems. (He boasts that he's going to make a fortune with it: "Sophocles put a deposit on one. Euripides wants two.") Unfortunately, when turned on, it winds up strangling the actor playing Zeus.
* Deconstructed, however, he had to make quite a few sacrifices to attain his position.
* deconstructed. However, his gentle nature and quiet encouragement of Allison's dreams, coupled with treating her as an actual person leads to their going out on a date by the end of the movie.
* Deconstructed. However, she continues to see them as flushed and unwilling to admit it, and goes incredible lengths to try and get them together. This includes her breaking his heart, and at the same time trying (and failing) to replace Feferi as his moirail, enraging her. She gets called out on it, and accused of trying to manipulate others' quadrants after being explicitly told not to.
* Deconstructed in a 2014 ad for Grande Communications. A salesman offering great deals on cable and internet is forcibly restrained and subjected to unnecessary and dangerous medical intervention in order to "cure" his apparent "illness".
* deconstructed in a Disney Comics story where Gyro Gearloose makes a fortune selling a series of robots, each tailored to a specific household chore (such as a gardening robot, a cleaning robot, a laundry robot, a cooking robot, etc). When he is asked why not a single Robot Maid, he replies that individual household chores

require substantial specialization not possible with a generic robot and this approach has the added bonus of being able to accomplish several tasks at once. Unfortunately, said robots also consume a huge amount of power and the sheer demand causes the price of electricity to spike and all the robots to be returned, restoring the status quo.
* Deconstructed in a later episode when Rollins was framed for a murder. Despite her captain's advice she refused to lawyer up, claiming she did nothing wrong and tried to be as helpful as possible, being completely honest and even bringing new evidence to the
* Deconstructed in a more recent storyline, where Anvil admits she's not excited about an upcoming promotional photo shoot. When Sydney sarcastically ask if it's because she's afraid of appearing "too physically perfect" Anvil points out that her bodytype is actually unattractive to a lot of people and she's bullied for it a lot (
* Deconstructed in another example. While exploring Vault 3, you run into a Ranger sent to kill the fiends there. After killing a few dozen sneaking around, he gets careless and suffers a leg wound from a trap, and while he still gets out fine (albeit with a leg needing treatment), Colonel Hsu will state that sending him alone was a bad idea (and that Rangers succeed often enough to make people forget they're still only human).
* Deconstructed in a very subtle fashion, rarely explicitly stated. The Clan system
* Deconstructed in Berlin's "Sex (I'm A)". The male singing part is repeating "I'm a man", while the female part is "I'm a..." followed by "goddess", "virgin", "blue movie", "bitch", "geisha", "little girl", "boy", "your mother", "one night stand", "bi" (male chuckle), "slave", "virgin", "drug", "dream divine", and so on, emphasizing while the male is only required to be the male in sex, a woman has to adopt a myriad of roles.
* Deconstructed. In chapter 2 Asuka gives one to Shinji after their dog fight. She got a very severe reprimand of Misato, who warned her that behavior was unacceptable and would not be tolerated.
* deconstructed. In Episode 41, Tien retrieves Chiaotzu so they could train more against the Androids. Chiaotzu brings up that a (now former) doctor had warned Tien that his shoulders were getting too big.
* Deconstructed in George Egerton's short story "Wedlock". The stepmother is an alcoholic who loathes her stepchildren, but her husband is an abuser who keeps her separated from her own daughter.
* Deconstructed in "Last Whiff of Summer", the two-part fourth season premiere. Early in the episode, the kids debate among themselves which of them are their parents' favorites, then ask them, and their answers and non-answers (Frankie denies that parents can favor any child above another) set up the episode's plot threads. The parents also find themselves asking the same question, and Brick later reveals he's been keeping score.
* Deconstructed in later seasons when Sam starts getting jealous of his friends who are married and have kids. Eventually Sam admits he's addicted to sex.
* Deconstructed in many of his complaints, and was driven to despair by increasing evidence that while the law was on his side, the legal system wasn't.
* Deconstructed in "Masters of All Time"; In the alternate timeline, Vlad saved Maddie from the malfunctioning portal, earning her affection, eventually marrying. However, Vlad is overly controlling and possessive of Maddie, even having forbidden her from pursuing ghost hunting, and had lied to her, saying that Jack (who had suffered the ecto-acne accident in this timeline), didn't want anything to do with her. Maddie, unwilling to give up her life's work, resorted to ghost-hunting behind his back, clearly resenting him for it. Whether she felt obligated to marry him out of gratitude or simply overestimated his character based on that one seemingly noble act, rescue was clearly not good enough grounds for a lasting romance.
* Deconstructed in "Nothing Can Stop the Juggernaut", where Spider-Man first fights the Juggernaut. After the villain yanks Madame Webb from her life support device, Spidey uses rescue breathing on her until the paramedics come, and she is

clearly much worse for wear once she is stabilized, taking months to recover. (Although she doesn't suffer the brain damage the doctor feared she would.)
* Deconstructed in Richard Wolkomir's autobiographical story "The Best Criticism I Ever Received" published in a 1986
* Deconstructed in Rog Phillips' short story "Rat in the Skull", in which a newborn white rat is placed in control of a Mobile-Suit Human as a psychological experiment, and grows up thinking the robot body
* Deconstructed in season 7, when Rusty demonstrates his rocket belt by jumping through the window and floats, he gets a lot of serious cuts all over himself and passes out from blood loss, he has to go to the hospital for it
* Deconstructed in "Sugar Dirt". The 58th are ordered to land their planes and join in ground combat, which lets their fighters be destroyed on the ground when the Chigs spring their trap.
* Deconstructed in Tal Bachman's "She's So High". It's about how amazing the singer's crush is, and the idea that the singer couldn't really offer her anything. And then she asks him out...and the singer declines, because of his low self-esteem.
* Deconstructed in that he's promptly shown laid up in bed with both of his legs and one of his arms broken from the impact.
* Deconstructed in the 4Kids (and only the 4Kids) dub with Kuina. She was the strongest fighter in her father's dojo, being able to beat anyone, regardless of age. However, after beating an adult, the person she defeated was so angry he got his friends to beat her up so she could never fight again. In the other formats, she just fell down the stairs and died anti-climactically.
* Deconstructed in "The Beast Within", where it's clearly shown during the fight against Adonis that Beast Boy has deep anger issues because of the lack of appreciation from the other Titans, and during the fight all of his repressed anger goes out and he totally
* Deconstructed in the cafeteria. Once he starts murdering people, however, their relationship goes south.
* Deconstructed in the episode "Gar Trains Punching Judy", wherein before the final round of a fighting tournament, Mr. Gar tells Punching Judy that because of Trudy's muscular arms and thin legs, she'll be easier to knock down compared to Judy's thin arms and muscular legs. When Judy fights defensively, Trudy gets tired out quickly because her tiny legs aren't good at running. This trope is lampshaded at the end, with K.O. saying that he and Mr. Gar should start doing squats.
* Deconstructed in the episode "The Scorpion's Tale" where a drug overlubricates the eyes of Grampa Simpson, causing them to pop out. Gruesomely.
* Deconstructed in the first chapter until a random factor breaks the loop, setting up the rest of the story with Sailor Pluto hell bent on preventing the situation that caused it in the first place.
* Deconstructed. In the flashback of how Masaki became a delinquent, it's shown that, when surrounded by delinquents his sempai at the boxing club had called to beat him up, he put himself with the back at the wall to both prevent them from attacking from behind and cut his own retreat... and promptly became unable to move due the sheer psychological pressure from finding himself in this situation, leaving him helpless and forced to take their beating.
* Deconstructed in the later episode "Harbringer". There's some rivalry between
* Deconstructed in the origin of the Cyborg Superman. In a pastiche of the
* Deconstructed in the Pharrell song "Young Girl" where two people have mutual feelings for each other. The problem? She's in college and is not yet 21, while he's older, "so advanced", and others have a problem with this.
* Deconstructed in the second season episode "Rendezvous", when incriminating evidence is presented and the defendant asks defense counsel to object.
* Deconstructed in the song "The Ballad of Barry Allen", where the narrator (Barry Allen) laments about the inability to slow down his perception, at one point noting that the world is boring because when things happen in an instant, they're
* Deconstructed in the Strugatsky Brothers' Noon Universe, where this practice is called Progressorism. The authors explore everything necessary to transform a pre-

modern society into a futuristic one, and
* Deconstructed in-universe by Varys, who determines that it is Ned Stark's concern for this trope that ultimately seals King Robert Baratheon's fate.
* Deconstructed, in which the singer admits she doesn't believe anyone could ever really love her as she is, so she runs away whenever things are actually good. The song is her apologizing to her ex for not realizing how much they loved her and admitting she blew it and ended their relationship for nothing.
* deconstructed is if his friends and family still actually love him or not.
* Deconstructed is to tell HABIT is to go fuck himself. HABIT's subsequent speech makes clear that not only is this a completely worthless act, but that HABIT is the kind of sick bastard that actually enjoys (and thus actively looks forward to) hearing this.
* Deconstructed it becomes more a case of Helen knowing both of her daughter's faults and wanting them to learn from each other's strengths.
* deconstructed. It shows what someone with a healing ability would actually be like when Naruto watches his brother become groggy and practically unable to stay awake every month.
* deconstructed it's just Beast Boy and the leader of the Squad. Beast Boy understandably is frustrated when the leader starts to talk about the team working together.
* deconstructed. Katie is a gorgeous airhead and for most of the film, her lack of intelligence is played for laughs. However, in a candid moment, she admits to her fears about her stupidity to Joe and how she doesn't actually like her life or know how to behave around people she has feelings for, other than via sleeping with them.
* Deconstructed later on in the story arc, in which Urza takes a team of the multiverse's most powerful planeswalkers to Phyrexia to perform a raid on the plane in his efforts to destroy Yawgmoth...including the
* Deconstructed, many of her classmates see her as one of these, complimenting her on her knowledge of Japanese culture and laughing at her foreign mannerisms. However, Kud finds this very isolating, as she learned Japanese from a young age and has been exposed to the culture for most of her life, and since she's lived in places all over the world, Japan is the closest she has to a home country.
* Deconstructed, meaning that the Great Crusade was as much a war of extermination as it was an attempt to protect human worlds. Additionally, his vast power and long lifespan meant that he had great difficulty relating to the people he depended on to run his great empire, which led to a rift developing between himself and the Primarchs that ended in fully half of them betraying him and setting off a civil war that would ultimately burn the Emperor's goals to ash.
* deconstructed meets a boy that she feels is her true love, and she's already planning to marry him... and then he dumps her for another girl, breaking her heart. The song was based on the experience of Taylor's longtime friend Abigail Anderson, who is mentioned by name in the song and appears in the video.
* Deconstructed. Mei may be surrounded by hot guys all interested in her, but the experience of being courted by all of them, along with the lengths they're willing to go to in order to get her, is incredibly taxing for her psyche.
* Deconstructed money, so why is Inque surprised that she is just taking more of it?
* deconstructed. "My heart is in my hand... yeeech!" (hence acknowledging that the heart is a rather sticky and ugly thing, hence isn't the best symbol for romantic love).
* Deconstructed. Not only that, her knowing this fact also slowly drives her insane.
* Deconstructed of Valhalla. In the end, the only ones who benefit from this mindset are Immortan Joe himself and his fellow warlords.
* deconstructed of valuing his own life above those of others. No matter which route, he gets near-fatally injured trying to save Saber the very night he meets her.
* Deconstructed outlining all his faults and how to fix them in order to make him

perfect for her. He votes her off for it, but they get back together in the finale. However, when she proves she hasn't learned come the next season, Duncan ends up hooking up with Gwen, who respects him for who he is and has a lot of common interests with him, leading to the end of their relationship.
* Deconstructed powers that significantly put them above the humans, dwarves and orcs of the setting, they're also responsible for turning the surface into the Hell-hole it is thanks to their screwing around with demonic magic. Through the story, it becomes increasingly obvious that the fae rule through brute force and that they really aren't that much better than the "savage" humans and orcs.
* Deconstructed pretty hard with Granart's parents, and implicitly all previous generations. Granart's father saw his wife as little more than a pretty trophy that came with the kingdom; Granart's mother never touched a sword again after losing that final fight, and after Granart's training was complete
* Deconstructed refuses to date—her first date was arrested half a day into it because of this trope.
* Deconstructed relationship with Wanda, a peppy owl, in Season Two. Bojack finds it too difficult to change, Wanda has a hard time enjoying his negativity, and the relationship falls apart.
* Deconstructed. Rick Sanchez certainly comes across as one, but it's implied to be a defense mechanism fostered over decades — if he ever stopped to empathize with those he's wronged over the years or consider the full consequences of his actions, he just might go completely insane.
* Deconstructed's "A Tangled Web". The victim in question, Francine, has to leave her school because of the constant torment.
* Deconstructed series. The first book ends with Peter deciding to go with Bloxholm since his father seems indifferent to his existence and he believes no one will miss him. In later books, we see how much his father misses him and blames himself for his disappearance. The series ends with Peter choosing to return to Earth with him, while it's Susan and Duncan who go with the aliens.
* Deconstructed, Sherlock claims they have encountered an unusually high number of open doors, and at least one puppy and television that each sounded like someone calling for help. The judge doesn't buy it and recommends Sherlock be fired for that, among other things.
* Deconstructed something she wanted), she is unable to wrap around her head how breaking apart the bond of six random ponies could cause so much death and destruction. In other words, even the villains can forget how important they are, and she nearly ends up paying for that mistake. Granted, she did spent several years living in the desert...
* Deconstructed song "Conventioneers." The first three verses describe a man having a romantic passionate evening with a woman he's had a crush on for a long time, musing about how he wants to marry and grow old with her the whole time. Immediately after they have sex, he decides that it wasn't worth it and leaves while she's sleeping, secretly hoping that they never see each other again (which is really awkward, as it's revealed that they're co-workers).
* Deconstructed, so when Vivian was offered her dream-job in Paris, there wasn't much Wil could do to convince her to stay. At the end of the movie she has an epiphany, outs herself to her mother and rushes off to the airport to stop Vivian. She catches up to her just before she boards the plane and says all the things that she should have said all through the film. And then Vivan drops her ultimatum: That Wil kisses her right here and right now in front off all the strangers around them. And Wil freezes up, unable to do it. So Vivian smiles sadly and boards the plane, leaving Will whimpering "I love you" at her back. Turns out grand romantic gestures don't fix underlying problems.
* deconstructed that all their lives rest on Celestia and Princess Luna, any hint that something might be going wrong for one of the two is an immediate cause for panic. The saying is that every time Celestia sneezes, Protocera's commodities market catches the flu.
* Deconstructed. The background radiation is so high that long-distance communication is all but impossible, and orphans with cancer are prevalent.

* Deconstructed, the creature was made almost entirely of legs, which were made almost entirely of bone..."
* Deconstructed the first time a viking raiding party fights a Saxon force in
* Deconstructed. The heroes from the main setting of Earth 1 always consider Earth 2 just as legitimate as their own world, but the opposite isn't true as Earth 2 super villain Zoom takes to sending other Earth 2 villains to Earth 1 to kill the Flash. Several of them start out by tracking down their own counterpart and killing them, and even one who's explicitly stated to have never killed anyone before has no problem pulling a
* Deconstructed: The song "At the End of the Day" ends with the factory workers and foreman condemning Fantine for being a "whore" by having Cosette out of wedlock. Fantine retaliated earlier by saying that she's not the only worker without a sexually clean history and given that she's been refusing the foreman's advances, more than a little of the accusations are them just trying to get rid of her out of spite.
* deconstructed). The Spanish Inquisition's tortures and killings, conversely, seem to the Aztecs overly brutal and barbaric, and the religious wars and crusades are seen as hypocritical, dumb or overly evil. So the Savage Indians are mirrored in the Europeans, and some of the Middle East.
* deconstructed, the voice of Celestia, about the reputation of her character in the fandom, during a crowded convention panel. Upon mentioning that she's sometimes characterized as a molester, the announcer flinches, interrupts him, and shoos him away; Nicole then sternly declares that "the darker side of the fandom is... not part of what the show's about."
* deconstructed. The Wolrogs are psychotic, vicious, cruel, sadistic, genocidal maniacs who live only for battle and death, and are feared and hated by the other races in the galaxy. They tend to kidnap innocent people to serve as captive soldiers or slaves to fuel the war effort. In the same comic, Wulf may be an example of the more noble variety.
* Deconstructed. They are attracted to each other but both fear rejection, so Shinji doesn't dare believe it's anything more than just a way to pass the time and Asuka pinches his nose (ostensibly because his breathing is bothering her) to get at least some kind of reaction out of him and to ensure some kind of "plausible deniability" of her own emotions in the face of possible rejection. And rejection is what she reads from his passiveness even if he doesn't mean it as such, because he doesn't understand there to be anything to accept or reject... mostly because her words and actions just then and there give him no reason to actually think so! So after seeing Shinji's reaction (that is, gasping for air, not hugging or comforting her) she ran into the bathroom, making gargling noises as a front. Shinji is left feeling even worse.
* Deconstructed. They quickly forget this "little" incident and start poking their noses where it (usually) isn't their business after this.
* Deconstructed. This example is also interesting in that it's the type of team described at the top of the page that's getting smashed.
* deconstructed this trope. The exorcist did a very Hollywood-style exorcism, tying a girl to the bed, and that led to her death. A priest pointed out that there are procedures before doing a real one, most notably to eliminate the possibility of just more mundane causes like the above mentioned psychosis, nor would he have been so reckless about the safety of the girl.
* Deconstructed, thus forcing Barbara Gordon to tell Terry exactly what happened.
* deconstructed tie in — it's not clear whether this is tongue-in-cheek or whether they're just milking all they can out of it.
* Deconstructed to escape a miserable life constantly on the run from the law.
* Deconstructed to make him realize that he was deluding himself, and that he never had a chance with Rarity.
* Deconstructed, to the point that he doesn't care that she rather loves her husband Jack or that actively killing him would only make her despise him more.
* Deconstructed Trope did was render humanity totally extinct, while also senselessly killing completely innocent sentient beings along the way, and as a

direct result the protagonist's sister is going to die anyway along with everyone else.
* Deconstructed Trope in "Wishful Thinking". In this example a guy uses a magic coin he inherited to create a wishing well, so he can make the girl who he's been in love with since high school, but is oblivious to him, love him more than anything else. At first he's happy with the new situation, but eventually gets disheartened from the fact that she literally has no personality other than pleasing and loving him, even killing others for him to maintain their "love".
* Deconstructed Trope. Running away as fast as you can is lampshaded as actually a terrible strategy in an isolated location since doing this actually will allow you to catch up faster than trying to match speeds.
* Deconstructed Trope that gave them the short end of the stick despite not truly being bad people:
* Deconstructed Trope, the results are either great comedy fodder (if the nation the envoy was sent to takes it with good humor) or a minor diplomatic incident.
* Deconstructed Trope: Trope is played straight, but with realistic consequences.
* Deconstructed trying to cause scandals, with at least one snapping pictures of her while she's undressing. While spying he had seen she stuffed her bra, so...
* Deconstructed). Ultimately they wind up married to different people.
* Deconstructed version of the straight trope. It just points out the trope's flaws or how it's even possible.
* Deconstructed: Vincent Poursan jumps out of his bath with a blunderbuss, spurring the comments:
* "Deconstructed" vs. "Reconstructed": A Deconstruction avoids the unrealistic parts of the trope, but the writer
* deconstructed. Weiss' memories up to Volume 7 are time traveled to before the start of the series, but they end up completely overwhelming the then eight-year-old Schnee. This caused her to try and arrest her father for crimes he had yet to commit, and was subsequently thrown into a mental asylum for her troubles. In addition, by the time the story starts she has trouble recalling some of the less important memories and has trouble discerning her memories from reality.
* Deconstructed what Cartman's negativity has turned her into and decides to leave him for the sake of her well being.
* Deconstructed when a girl turns Gordo (5'3.75) down for a school dance because he's short and "I don't want to go out with a short guy." Gordo takes it very hard.
* Deconstructed when Avasarala points out that the reason MegaCorps get away with so much isn't because there are no laws to stop them, but that those laws are hardly ever enforced by bureaucrats who are hoping for cushy private sector jobs. When
* Deconstructed when Caroline Cordovin decides to use a giant mech, designed for fighting giant Grimm,
* deconstructed when FBI agent Sara Bryan goes undercover to get close to Katchoo, showing how the emotional connection can be dependent on the intent and thoughts of the participants. She originally asks to be Katchoo's assistant, but agrees to be an artistic model after Katchoo says that she does not need an assistant. To Katchoo, their interactions and resultant artwork are expressions of femininity and personal beauty (not to mention a general friendship), but behind the cover identity Sara feels ashamed and violated by the semi-erotic portraits and the intimacy of the situations. She particularly dreads the reaction from her parents and the rest of the Bureau after the artwork is disseminated to galleries and collectors across the country. When the truth of Sara's background comes out, Katchoo feels crushed and betrayed.
* Deconstructed when it comes to Hiroto's emotional problems concerning GBN.
* Deconstructed when it comes to the character of Sarge from this series. This is perhaps possibly his greatest fear as fighting the Blues, and to an extent actual bad guys, is what gives his life meaning and purpose. When Grif points out in Recreation that they might just never fight anymore Blue soldiers Sarge ends up deciding to undo his
* Deconstructed when Katara goes after the soldier who killed her mother,

expecting a
* Deconstructed when Oliver Queen saves the life of Carrie Cutter only for her to become obsessed with him, becoming the recurring villainess Cupid.
* Deconstructed when Ray puts his proposal to Debra in his sports column and then spends the rest of the episode fretting that by making it public he's removed Debra's choice in the matter. Played straight with Robert's proposal to Amy, where his cop buddies pretend to arrest her and read cheesily reworded Miranda Rights.
* Deconstructed when Takaaki Watanabe passed through while on his learning excursion. The ROH officials learned to pay special attention to his matches after they had several concussion scares with Watanabe, who continued to use headbutts despite them.
* Deconstructed when the fleet decides to replace their obsolete planetary-based system of government with one based on their spaceships. The politicians are used to negotiation and compromise, but as each captain is used to running their ship their own way, the government quickly devolves into a
* Deconstructed, where a character says she thinks the cliché of a young girl going on a journey in a surreal world where she's acted upon but rarely gets a chance to act on the setting is overplayed, and she refuses the call to adventure and goes home "In the name of Alice, Dorothy, Wendy and all the others".
* deconstructed, where a set of proud Sixth Rangers is snidely narrated as the "B-team", who fight villains that main crew are too busy or can't be bothered to fight.
* Deconstructed, whereby Season 4, although Team Arrow ultimately managed to save Star City from those attacks, they still had consequences: citizens are leaving the city in droves, it's economy is consequently failing, and there's no longer a mayor because the last two were assassinated, and nobody is willing to risk their lives by running for the position.
* Deconstructed where Cho latches on Harry due to serious psychological problems, rather than merely being smitten; also, Harry only knew her on a shallow basis before dating her, and neither could handle the stress.
* Deconstructed where Epsilon decides to leave with Carolina to investigate Freelancer equipment without saying goodbye to Caboose or Tucker. The next two seasons show the results of this, as Caboose spirals into a depression and latches onto a very dangerous Mantis assault droid as a replacement for Epsilon and Tucker becomes very bitter and angry at Epsilon for essentially abandoning them and constantly clashes with the latter when they are reunited. Epsilon later admits it was a jerk move to do to his friends.
* Deconstructed, where Leslie reveals that he runs full-tilt when the victim isn't looking and switches to a power walk when they are. He does a lot of cardio to make the illusion work.
* Deconstructed, where the kid who hears he's prophesied to be the Chosen One decides to give up trying to do anything right in life because he knows he's going to do something great and become famous for it. Forty years later, he saves the world or something by stabbing the demon Mordrax in the back because he's drunk and mistakes him for a teenager who owes him money for meth.
* Deconstructed, where the series regulars briefly talk about what they majored in before working at the diner. Turns out any degree can be worthless if nobody's going to hire you for it.
* Deconstructed, who nails and brutally tortures the wrong man for kidnapping his daughter.
* Deconstructed, who puts up with exactly none of his shenanigans once she realises what is going on.
* Deconstructed wife with every part of her independent spirit, not some mindless substitute who will just fall into his arms.
* Deconstructed with a recurring villain, a defense attorney for sex offenders who may or may not be a rapist himself and teaming up with his clients to drug and rape women with their help. In the end however, it turns out that he's innocent of the rapes after one of his victims identifies a bartender as the accomplice of the guy who raped her and several other women. His final appearance leaves it vague towards

whether or not he was truly innocent though as he threatens to sue the department and Brenda if they don't leave him alone (as Brenda and her fellow detectives had, after their first encounter, made a point to tell anyone who brought his name up, that he was a sexual predator, damaging his reputation as a result).
* Deconstructed with Beatrice in Season 4. As it turns out, Beatrice saw little wrong with
* Deconstructed with Brave Danny Flint, also the subject of a romantic song, who posed as a boy to join the Nights Watch. Apparently the real 'Danny' Flint was raped and murdered, presumably by her
* Deconstructed with Cyborg Superman— the Zor-El version— when he invaded National City. Supergirl stopped him and then tried to help him afterwards. Another super-villain leaked she was protecting a murderer and the public turned against Kara despite her arguing her father was a broken mad man and she couldn't give up on him or anybody for that matter.
* Deconstructed with Cyrano: he is very cruel to others, (Montfleury, The Bore, De Guiche and everyone who Cyrano doesn't like) but it's subverted because De Guiche has a lot more power than Cyrano. Given his enormous nose and living in a shallow society that firmly believes
* Deconstructed with Dr. Casey, who has many tics because they are a result of his OCD.
* Deconstructed with Elmer Albatross, whose perpetually cheery attitude in the face of everything and blithe expectation that everyone else will act the same comes across to other characters as callous and sometimes downright creepy.
* Deconstructed with Felicia. Her supports have her listed as a pretty good soldier — far more capable than as a maid (her base class). However, her bases and growths are more appropriate for a level one character, whereas she starts off as a promoted class. She repeatedly refuses to acknowledge her inherent skill as a soldier, preferring to instead be a maid. This becomes a little more pronounced when one recruits her sister Flora — whose stats are far more appropriate towards a promoted class. In-universe, Flora is stated to be a less naturally gifted fighter than Felicia but worked to hone her skills to be a better fighter unlike her sister, whose skills never blossomed.
* Deconstructed with Misato. She is Nerv’s Sub-commander now, and she hates it. Every day she has to deal with politicians, army officers, civil servants, and mass media, assist pointless meetings, staying late in work, oversee Tokyo-3’s rebuilding… and because she missed what was happening to her wards. She is sick of the feeling of being loaded with all troubles of the world, of being unable to relax in her own home, and of having her children physically and mentally wrecked.
* Deconstructed with Nutt. Until he got to Ankh-Morpork, he knew about the world outside his Ladyship's castle only from reading.
* Deconstructed with Rainman, who's trash talk is said to drown out his wallet's screams for mercy. On the other end, Bandit is either an inversion or aversion, as he DEFINITELY believes in "enuff dakka".
* Deconstructed with Riley. In Season 4 he had his own adventures as an Initiative soldier. By Season 5, he left the Initiative, and his cover as a grad student, and was nothing more than Buffy's love interest. Having nothing in his life except his relationship with Buffy caused him to become insecure and clingy, eventually resulting in the end of their relationship and his return to the military.
* Deconstructed with Ted's pursuit of Robin. At one point, one of his ex-girlfriends suggests that him being constantly hung up on Robin is the reason he has been unable to sustain any long-term relationships since breaking up with her. In the final season, in which Robin is days away from her wedding to Barney, it becomes a crucial part of Ted's arc for him to finally let her go so he can meet and fall in love with the Mother, which takes place immediately after the wedding.
* Deconstructed with the first Ring King. He did have sex with his wives for power, which slowly resulted in him becoming a power-hungry, lust-obsessed maniac who saw his wives as little more than tools for his own power. After he sealed away the Abyssal Lord, his wives killed him before he could turn around and conquer the

world himself. They then buried all knowledge of his treachery and insanity, until finally the last surviving wife (an immortal elf) saw fit to explain this to the new Ring King and his wives a thousand years later.
* Deconstructed with the Guardians. It is their duty to protect and bring happiness to children (which they do), but they all have such busy lifestyles (especially Toothiana and Sandman, who are working every day constantly) that they struggle to relate to children as individuals, as shown when a young girl accidentally ends up in the Easter Bunny's base.
* Deconstructed with the Master of Masters to the Foretellers. He shares a close relationship with his disciples, having inculcated an unquestioning loyalty to him within them, and treats them affectionately, though his eccentricity often baffles them. In spite of this, he manipulates them into starting the Keyblade War, without any apparent qualms, and they all either respect him too much or are too loyal to him to suspect his manipulations.
* Deconstructed with the portrayal of one of the original real-world Proud Warrior Races in
* deconstructing by calling out the other student's flaws, like Shuichi's indecisiveness, Maki's lack of cooperation, and Kaito and Kaede's blind trust in everyone else. It's very telling how his speeches tend to leave the other characters floundering for a retort.
* Deconstructing Harry has author Harry and aspiring writer Fay's romantic relationship; he considered her "a fan, then an admirer, then a pupil...", but in the end he truly fell in love with her as a person. The feeling wasn't mutual.
* Deconstructing Harry thinly veiled versions of his assorted friends, wives, relatives. Every time a new novel hits the market, someone's going to cut all ties with him.
* Deconstruction and other action/adventure cartoons. Jonny actually shows up as a drug-addled, burned-out middle-aged man, raging against his negligent father and running scared from an old foe, Dr. Zin. Although a later appearance has shown that Jonny's recovered enough to converse with Zin like a normal person.
* Deconstruction, and she becomes one of his many victims later on anyway.
* Deconstruction, and when you've got an entire species who has only one character trait among them, there are only so many interesting stories you can tell before you've got to make the characters more complex.
* Deconstruction as a human tragedy rather than a sweeping epic tale of martial valor in the Homeric tradition, by showing the human consequences of war and its aftermath on the conquered people, and the cruelty and violence of the "heroic" invaders.
* Deconstruction, as the men are only put first because they are a mercenary group. No men means no jobs, which means no money. And if the men mutiny, no men, jobs, money, or life.
* deconstruction at all this "mushy stuff" going on. The only bit of that which survived the final revisions is the ending of the song.
* deconstruction at the end of the first chapter, but her hair grows back to its original length in a span of a night.
* Deconstruction: A work looks at the serious reactions and consequences to a work's conventions that are usually glossed over.
* Deconstruction), but being dead set on getting him back into an abusive relationship has kind of soured her chances.
* Deconstruction Crossover from multiple fictional universes in order to deconstruct those fictional universes.
* Deconstruction Crossover: Works which involve crossovers from multiple fictional universes in order to deconstruct those fictional universes.
* Deconstruction Fics paint up the ponies as this, usually as a mixture between the Nazis and conquistadors.
* Deconstruction Game which deconstruct some aspect of the video game medium itself.
* deconstruction group is actually a coincidental accident, an unplanned murder, and a suicide.

* Deconstruction. In short, Deconstructed basically means "Played for Realism". However, it is common for them to overlap, as most tropes would have negative consequences.
* Deconstruction is instead thoroughly mocking them. Often in the form of a musical number.
* deconstruction, most notably with the flamboyant pansexual immortal child killer Captain Jack — about as schizo a character as you can come up with.
* Deconstruction. Not enough of them are sane enough to have any clue what their doing. It is also shown that Joe cribbed bits and pieces from various religions and philosophies to create it.
* Deconstruction of certain Toa-related tropes, but only in the story. Sets could have followed a more conventional approach. Although there is nothing to suggest this wasn't the result of test groups' dissatisfaction with female-looking toys.
* Deconstruction of gene therapy (among other things). The end of the game includes a character noting that having the genes necessary to succeed means nothing if you don't have the mentality. And Snake himself is supposed to be a living example: despite receiving "all the recessive genes" and being an inferior clone of Big Boss, he is perhaps the greatest soldier in the world.
* Deconstruction of life as RPG fodder characters, so it (partially) breaks the rule about comedies.
* deconstruction) of some anime stereotypes, doesn't seem too concerned about going around naked. The chapter (and later book) introducing her is titled "Game Called on Account of Naked Chick."
* Deconstruction of the trope, which depicts the relationship between a simulation AI and its users as unhealthy and detrimental to the former, which is being seen as a tool and nothing else.
* Deconstruction of this trope as he literally has no idea how to be a child. Once when he was on vacation and was supposed to just have fun he tried approaching it the same way he does everything else: by carefully analyzing the situation and coming up with most efficient solution, until Asuna told him he should just relax for once.
* deconstruction of this trope, showing what happens to a lot of jocks once they're no longer on the gravy train.
* deconstruction, or as Sheridan describes him, a Loose Cannon. When Sheridan is offered the career-making opportunity to be Jankowski's XO on a recon mission into Minbari space, Sheridan refuses. Jankowski ends up inadvertently kicking off the most destructive interstellar war in human history when he overreacts during a standoff with a Minbari task force.
* Deconstruction; otherwise she wouldn't have the inner iron to do such a thing.
* Deconstruction. Rabbits have to be timid and dainty, foxes have to be sly and crafty, and don't get us started on sloths. Further deconstructed by the two protagonists: Judy, a bunny who wants to become a cop, and Nick, a fox who wanted to be honorable and kind, but was bullied by other animals.
* deconstruction/reconstruction quirk. The gurney is kept in the back of an armored truck escorted by several police cars and a hero.
* Deconstructions. "Defied" is also easily confused with "Reconstructed", as a Reconstruction often involves the characters Defying the effects of the Deconstruction.
* deconstruction side for the most part and will bend the rules for him/her when he needs to.
* deconstruction since they have literally nothing to unite them except terror and violence.
* Deconstruction that their own schemes have a tendency to turn against them due to lack of supervision.
* Deconstruction. The latter then set the new baseline, which may itself be deconstructed again...
* deconstruction. The next episode, "The Simpsons Spin-Off Showcase", is a light-hearted satire of how TV networks produce spinoffs and successor series that are typically inferior to the original show.

* Deconstruction. The one thing that Mr. Peanutbutter sees in all women is their youth and carefree nature, which unfortunately predisposes him to choose very, very young women who are barely beginning to understand the world. He’s in deep denial over this and prefers to believe he just “ruins” them, but as the series goes on, this becomes a worsening problem for him with failed marriage after failed marriage due to his unaware jackass behavior, immaturity, and lack of intelligence picking them apart and gradually going for younger girls, culminating with Pickles, his girlfriend in season 5, who is less than half his age. When Diane suggests one way to break his divorce cycle is to start dating older women (i.e. women his own age), he actually grimaces.
* Deconstruction. The Republican government controlled all the manpower available after the Revolution, and the Royalists had to recruit from mercenaries (and not the best, from contemporary accounts). Interestingly, the most effective Royalists were partisans like the counter-revolutionaries of the Vendee; these were usually peasants who had their own grudge against the new government, namely their clamping down on the Catholic Church's authority and accompanying secular programs.
* Deconstruction: The whole purpose of this story is to show how your desires coming true would play out in real life.
* deconstruction. They were a mess for most of their existence, and despised each other and were profoundly miserable at times.
* Deconstruction trying to save Echo, his actions come across as obsessive and weird at times, especially as he ignored a (seemingly) healthier romantic partner in Mellie. Eventually, Paul and Echo get together.
* Deconstruction via the Tau Omega Fraternity, which the SVU team has clashed with several times. Tau Omega's hazing rituals are horribly sadistic, the frat's reputation for sexual assault is an open secret, and the authority figures turn a blind eye due to the clout and money the members carry.
* Deconstruction: When subversion isn't just addressing and avoiding the trope, it points out flaws and logical problems with its use.
* deconstruction, where the character is referred to as a "survivor girl." Vernon spends most of the movie setting one character up as the final girl, both to the viewer and the crew filming his exploits. However, it turns out that Vernon's final girl is a decoy, and sexually active at that. It is the female reporter in the film crew who is his real final girl all along, and she fulfills her role exactly according to the trope.
* deconstruction who doesn't understand the female heart at all, and indeed only turns to his life of serial affairs because he was too impatient and thick-headed to win the heart of the girl he had a crush on in the first place.
* deconstruction who hire themselves out as mercenaries, dooming their race to a slow extinction. It is even highlighted in the Codex: Krogan live with the mantra: "kill, pillage, and be selfish, for tomorrow we die". It's a great example of how a purely warrior culture with no room for any other societal roles would have serious trouble surviving.
* deconstruction, with the Rivington men outright telling the Confederates (at least prominent ones like Robert E. Lee and Jefferson Davis) that they're time-travelers, and then the Southerners successfully defeating them despite their technological superiority when they turn against them.
* Deconstructive Parody: A franchise installment handles the tropes and traditions of the series in a more realistic manner than usual.
* Deconstructive Parody: A parody that either uses the tropes and elements in a more realistic light or exaggerates them to a ludicrous degree.
* Deconstructive Parody, but they stopped at two seasons (each with a completely different reality show formula being deconstructed). Even so, one of the stars of Season 2 figured out the hoax and had to be replaced.
* Deconstructive Parody if they have the great disservice of going with the killer.
* Deconstructive Parody is a world where monsters, aliens, mutants and city-leveling events happen on a daily basis, the only thing getting in their way being every kind of superhero imaginable only just barely being able to stop them. The titular hero Saitama is the most badass of them all, having God-mode level physical

power capable of eliminating any threat with a single punch.
* Deconstructive Parody other works (or whole genres) by pointing out how silly and unrealistic they are, and hence deconstructing them.
* Deconstructive Parody: The parody takes the tropes, plot devices, and character traits of the work being spoofed, and either depicts them realistically or exaggerates them to ludicrous levels.
* Deconstructive Parody. The series is a parody of magical princess shows and often uses the juxtaposition of cute characters with brutal violence for humor.
* Deconstructor Fleet: Works which go out of their way to subvert, deconstruct or otherwise play with as many tropes as they can.
* deconstructs by stating his enemies could easily strike him if he kept them close.
* deconstructs this sort of thing by showing it from the perspective of the potential victim. It addresses issues such as funding and why the henchmen would even still work with a lunatic. Turns out they have a "Death Ray clause" in their contract.
* Deconstructs variant is more benign than this trope. As one character puts it, a person made to think they are a frog is as good as dead, because how long would you expect the average adult human to survive subsisting on nothing but flies?
* Decontamination Chamber — A checkpoint room sometimes used for eliminating radioactive contamination.
* Decontamination showers are an essential part of Hazmat Hijinks, and appear in almost every level.
* Decorator crabs sometimes incorporate bits of crustacean shells into their own disguises, alongside living algae and sea anemones. Likewise, hermit crabs are an entire superfamily of crustaceans that armor their vulnerable abdomens with vacant snail "skeletons".
* Decoy: Casey's first assignment requires her to go undercover at a carnival. The only job she can find is dancing in a harem outfit with three other girls outside a tent.
* Decoy Damsel" damsel is actually just trying to lure the hero into a trap.
* Decoy Damsel on him. She interacts only once with King Uther (who would be her major foe) but then dies in the season finale without any sort of confrontation with either Uther or Arthur. In fact, it's unclear whether they even know that she's dead.
* Decoy didn't contain much gun violence, but when characters did get shot, they never had any visible injuries.
* Decoy episode "An Eye for an Eye," a junkie Casey is trying to befriend is knifed in the back.
* Decoy episode "Blind Date." "Think Augie's going to say one word? Or he's going to take his medicine like a man?"
* Decoy episode "Bullet of Hate," a teenage girl cries into Casey's chest when she's arrested for her abusive aunt's murder.
* Decoy episode "Death Watch", Casey infiltrates a ring of department store shoplifters and discovers that they're also working as hitmen.
* Decoy episode "Dream Fix," a young woman collapses on the sidewalk, clutching a small package in her hand. Casey tastes the contents of the package and says, "Heroin!"
* Decoy episode "High Swing" was a trapeze artist until she fell and broke her back. Her husband quit working as an acrobat to take care of her and started mugging people to feed her opioid addiction.
* Decoy episode "Night Light" contains a parental example, where a jewel thief rejects his thirteen-year-old son to prevent him from following his footsteps.
* Decoy episode "Odds Against the Jockey," Casey has a reputation as a racing expert, because "I learned the ropes when we cleaned out those bookies at Belmont."
* Decoy episode "Queen of Diamonds," a woman who was worked over tells the police she was hit by a car.
* Decoy episode "Queen of Diamonds," Casey discovers a negative proving that a suspect for armed robbery was in the right city at the time the robbery took place.

But before she can turn it in, the man sets the negative on fire.
* Decoy episode "Savage Payoff," a star-wipe is used to transition from a character driving to a newspaper article about his death in a car crash.
* Decoy episode "The Lieutenant Had a Son", a struggling nineteen-year-old single mother marries a man two decades her senior because she needs money and a father for her son, and he's lonely and can't find a wife. It actually works out pretty well - the two of them eventually grow to genuinely love each other, and the boy forms a close bond with his new father.
* Decoy episode "The Lost Ones," a teenage girl accused of shooting her abusive father runs away. After a long and fruitless day spent looking for her, Casey comes home and finds the girl asleep on the sofa, ready to turn herself in.
* Decoy episode "The Lost Ones," a teenage girl is accused of shooting her abusive father. It turns out the murder was actually committed by her older brother, and the girl decided to take the heat because for her it would only mean a few more years in the reformatory, while for him it would mean the end of his dreams of being a surgeon.
* Decoy episode "The Lost Ones," a young man shoots his abusive father. His younger sister confesses to the murder since for her it would only mean a few more years in the reformatory, while for him it would mean the end of his dreams of being a surgeon.
* Decoy Getaway they launched a half dozen Cry Babies with copies of their own transponder on rockets.
* Decoy has "The Challenger," in which a mobster tries to buy a boxer's contract.
* Decoy Hiding Place: An obvious hiding place is made visible to the pursuer, while the pursued actually escapes via some other means.
* Decoy: In "Cry Revenge," a teenage girl falls in love with the man who's been making threatening phone calls to her mother because he's a violent, alcoholic criminal, just like her beloved father.
* Decoy Leader: Someone who is posing as a leader to protect the real leader.
* Decoy: Mrs. Morgan from "The Sound of Tears" raised her son Ken alone and claimed to know his every thought and action. She controlled every aspect of his life, even driving his fiancee away so she could have him to herself.
* Decoy Octopus is quite possibly the most detail-obsessed Master of Disguise ever, being able to flawlessly mimic a person's speech and mannerisms, and either ingesting or injecting himself with the
* Decoy Octopus, who took on the identity of the DARPA Chief Donald Anderson after the real Anderson was murdered by Revolver Ocelot.
* Decoy on the line for five minutes while two cops in the basement trace the call. They trace him to a phone booth, but he runs off before he can be arrested.
* Decoy Protagonist: A character initially appears to be the protagonist, but is quickly phased out in favor of the real star of the show.
* Decoy Protagonist: A character is set up as the main character when it's really someone else who is the star.
* Decoy Protagonist after his "death" and Rogue Titan's appearance right after were thought to be linked events and it was predicted that Eren was Rogue Titan.
* Decoy Protagonist), even though it's obvious those are 2 different persons switching places between shots. Also, in 2 other (very brief) scenes, Seagal's face is superimposed on a minor character who is wearing a bike helmet, even though there is no apparent connection between this character and the one who gets beaten up in the fight scene.
* Decoy Protagonist from the diary of the true protagonist who accidentally ends up in the 20th century when experimenting with the above-mentioned temporal drive. In the diary, the protagonist also reveals the secret of "space magnetism", only to realize it could change the past and tear up the page.
* Decoy that he paints a near-exact replica of The Starry Night, grows a beard so he can look more like Van Gogh, and even signs one of his paintings "Vincent." Another character tells a story of Jack showing up to a party with a bandage wrapped around his head, holding a very realistic papier-mâché ear.
* Decoy Trial: A trial falsely accusing someone in hopes that the true guilty party

will come out.
* Decoy: When asked if she sings, Casey answers, "Sure, but only in the bathtub."
* Decoy: When Michele from "Night of Fire" found out her boyfriend was married, she set all the dresses he gave her on fire, resulting in her being institutionalized. As a result, when the warehouse next to her workplace burns down a few years later, she's the prime suspect.
* decrease, he becomes the class with the lowest amount of Force abilities and Force Points.
* decrease his Scrappy-ness since he instantly realized that they thought he was a Jedi and ran with it, instead of doing everything completely by accident like in the films. He was clearly trying to channel Obi-Wan with his acting.
* decreases series, in which Amuro's father, delusional from oxygen deprivation, gave Amuro a useless piece of junk that he claimed would drastically increase the Gundam's power.
* Decree of Annihilation, which wipes out everything currently in play no matter what the card's type is and no matter what abilities it has.
* Decrepit Birth, the label sat on it for months before giving them a release date. While it wasn't quite up to Necrophagist levels, people had given up hope that there actually would be a fourth album for a while.
* Decrypting Rita uses this to good effect in telling its story. It helps there are buttons for quick scrolling between the pages of a chapter.
* Dedede is shown to be perverse, and a bit of a womanizer... But he's also
* De Defectibus, a document which includes contingency plans for all sorts of things that could go wrong during mass. Among them are what to do if a rat runs off with the consecrated host, if a spider falls into the chalice, if either becomes poisoned, if the priest becomes ill, faints, or dies in the middle of mass, if enemy soldiers storm the church, and if a flood or other natural disaster occurs.
* Dede's pregnancy is a plot point but she doesn't give birth until the climax, and this trope is fulfilled for her brother Bill. Dede plans to leave the two of them but the film cuts off before we see if she actually does.
* Dedicated anti-armour hand grenades working on the shaped-charge principle (
* Dedicated Hero + Acolyte/field medic. The acolyte can wield divine spells, including healing, the Field Medic can revive a dead party member in the round following his/her death.

* dedocracia "finger") often is used in this sense. You're the volunteer because everybody pointed at you!
* dedovschina Mutiny, the attempted defection of a Soviet frigate to Sweden in 1975. Lowering the mandatory service period from two years to one year has eased the problem somewhat, but it still remains endemic to the Russian military even in the post-Soviet era.
* "deduced" it (e.g. you "deduct" charitable contributions from your taxes).
* deduces that both the layout of Amestris and the locations of recent large-scale military conflicts form the same kind of transmutation circle needed to create a Philospher's Stone, a process that requires the sacrifice of human lives. Particularly notable in that Hughes himself isn't an alchemist, yet he picked up on these facts long before any other character. Unfortunately, he gets killed by one of the conspirators before he can share this information.
* Dee believes herself to be a high-class lady but is really a vulgar, self-serving, immature, aggressive jerk who often responds to minor slights with physical violence and is completely callous to the suffering of others, even dismissing the fact she set her roommate on fire. She is also irrationally hostile towards other women and will turn almost anything with them into a competition (if she doesn't straight-up attack them), despite her ostensible feminist leanings. Likewise, whilst somewhat more sensible than the others, she'll do anything for praise regardless of how dangerous or stupid. She tells blatantly untrue stories

about herself (such as claiming she was the first choice as the lead actress in

He later has to keep company with Kensi until midnight after the infestation clearing at his house was delayed, to which she agrees, if he meets certain conditions, such as him driving and him paying, and having him do her laundry for a month (later specifying that it's outerwear when realizing that he might go for the underwear as well.)
* Deeming a match unfair when they themselves often resorts in cheating.
* Deemo".The cutscene it functions as the soundtrack for shows Deemo alone in his tower, playing song after song. Not surprisingly, the cutscene's title is "Lonely Deemo".
* Deep 7 Games, a small RPG company specializing in quick, "beer and pretzels" role playing (you can roll up characters, learn the setting, and play a story in a single afternoon) gives impossible to beat characters with all stats reading
* Deep and Border Ethereal it is the only way to visit bodily a dreamscape of whatever world's border is beyond this part of curtain. Not that it's easy, of course.
* Deep Background: "The information can be used but without attribution. The source does not want to be identified in any way, even on condition of anonymity."
* Deep Blue, IBM's successor to Deep Thought, which was famed for beating Garry Kasparov in a six-game match (2-1, with three draws). The match has drawn some controversy as accusations were made that it was programmed specifically to defeat Kasparov rather than to generally play a good game of chess. Critics point out that it was tuned and tested using historical grandmaster games and had a trio of grandmasters program it with opening strategies to prevent it from being fooled by early game gambits. However many others point out that human chess players also study historical games and memorize opening strategies. In spite of all of this Deep Blue only barely defeated Kasparov.
* Deep Blue Sea 2: Seems to follow the trend set by its predecessor, featuring mutated bull sharks instead of makos.
* Deep Blue Sea 3, plays this straight with the genetically-engineered offspring of the previous film's shark. Interestingly, the film portrays this trio as unnaturally aggressive, while the ordinary sharks living in the area are accurately portrayed as animals with little interest in human divers. Then there is "Sally", a large female Great White the protagonist has spent years studying — while she makes a threatening dominance display at the beginning of the film, Sally later ends up saving Emma from an attacker.
* Deep Blue Sea about how they are going to escape their entrapment from a

murderous great white shark that is killing the rest of their co-workers. He is, however, interrupted during his speech by said great white, who jumps out of the tank, swallows him whole, then jumps back in.
* Deep Blue Sea: A character mentions early in the film that "living underwater is like living in space, you don't get many mistakes." The bulk of the film involves genetically-engineered super-intelligent sharks systematically flooding the mostly-submerged research lab with the intent to damage the fences enough to escape, while chowing down on any of the humans they come across.
* Deep Blue Sea admit that the only reason Jackson agreed to be in the movie was that he got to golf between his takes.
* Deep Blue Sea: After losing the research she's devoted her life to and having to strip down to her underwear to survive a shark attack, Susan slides down into a sitting position and clutches her knees.
* Deep Blue Sea, a group of scientists are trapped inside an underwater research laboratory with three genetically enhanced sharks. It also happens over the weekend, meaning that most of the facility's personnel is on leave, leaving only a skeleton crew of about 10 people to deal with the sharks.
* Deep Blue Sea, among its favorite phrases include "Eat me asshole!" and "Hey, hey you dickhead!".
* Deep Blue Sea. At the end Preacher asks Carter if he was sure that there were only three sharks, and Carter says yes. Then he takes his feet out of the water just to be sure.
* Deep Blue Sea, every part of the research was bad in the first place. Screw those Alzheimer's patients! Bonus points for the two non-science people being the only survivors.
* Deep Blue Sea filmed an ending where Susan survives along with Carter and Preacher, but she is less lucky in the final cut, and the alternate ending has yet to be released.
* Deep Blue Sea had to be re-dubbed because of an outbreak of crickets on the underwater base set.
* Deep Blue Sea: In the climax, Carter inadvertently ends up performing a rodeo on the back of the biggest shark by grabbing its dorsal fin, since it can't get to him that way.
* Deep Blue Sea into keeping quiet, but at least he tried to warn her of the danger.
* Deep Blue Sea makes exploding sharks cool again (this time, it blows up by impaling it with an explosive powder-covered harpoon and then igniting it).
* Deep Blue Sea Notably, the sharks were explicitly mentioned to be mutated makos and not great whites.
* Deep Blue Sea: One of the more ridiculous examples of this trope. A regular rescue helicopter is pulled down to the research rig (in the middle of the ocean), by a shark that is holding onto the helicopter's rescue cord. Upon making contact with the research rig, it inexplicably explodes with an enormous fireball with a radius of at least fifty meters.
* Deep Blue Sea plays with this trope. It's subverted in the beginning as it seems everyone in the water is going to die, but they are saved by the protagonist. However later it's played straight and often, as most of the movie takes place during night.
* Deep Blue Sea Russel Franklin, Tom Scoggins, and Susan McAlester are bitten in half by the sharks before they eat them.
* Deep Blue Sea, that the final ending was changed so that the Black Dude lives while the scientist lady gets munched on by a shark at the very end.
* Deep Blue Sea: There are three genetically enhanced sharks in the film: two first-generation 20 foot ones, and a second-generation 45 foot one. Guess which one bosses the other two around, and is the last of the sharks to go down?
* Deep Blue Sea: the shark tank in question was built by the protagonists and most of the movie consists of the sharks breaking into the non-tank parts of an aquatic research base, which itself is a converted submarine pen.
* Deep Blue Sea They even (possibly) learned how to turn an oven on while one of

the humans was in it.
* Deep Blue Sea used an interesting subversion of the trope urged on by test audiences. After dwindling the cast down to three people the manly hero predictably survives, but the female scientist and ostensible deuteragonist dies while the black comic relief makes it to the end credits along with the hero instead.
* Deep Blue Sea, when the deeply religious and normally teetotalling cook finds a miraculously intact bottle of liquor in the wrecked and half-flooded kitchen.

He calls Strax "Grumpy" (after the dwarf), Clara "Handles", "the not-me one" and "the asking-questions one", and Vastra and Jenny "the green one" and "the not-green one" respectively. He also calls Strax "Clara" at one point, and when Clara angrily corrects him, he gets confused and asks them to start wearing nametags.
* "Deep Breath" has the Doctor lampshade robots' tendency to avoid contractions.
* Deep Breath he's just stolen. He blames his confusion on having brand-new hands, which is making it harder to tell his left from his right.

* Deep Breath", the Twelfth Doctor announces that he needs a new outfit with a really long scarf, then quickly changes his mind about the scarf because it'd look stupid — although not because the scarf itself looks stupid, but because the look is too young for him to pull off (the Fourth Doctor was about 750, and the Twelfth is over 2000).
* "Deep Breath", when a nasty bout of regeneration sickness lands him on his hands and knees, having covered the entire room with disordered mathematical equations.
* Deep Breath, when the Sontaran Strax says to the human Clara Oswald that she looks terrible, even if she is a good-looking girl.

* Deep Cover Agent: The "sleeper" agents that brainwash ordinary Americans to serve the Communist ideology.
* Deep Cover: Gallegos makes it clear to Russell that he considers him beneath him by ripping off his earring.
* Deep Cover: Russell is a cop working undercover as a drug dealer. When it becomes necessary to take out a competing drug dealer, he actually goes ahead and kills him.
* Deep Cover: Taft is an LAPD narcotics detective who believes that Russell (an undercover cop working for the DEA) is just some ordinary drug dealer recently moved into town who's spreading that crap to get rich off it. He continues to pursue Russell and his associates and endangers Russell's own investigation into the Gallegos Cartel at several points.

* Deep Down", having kept her as a slave in his closet for a few months after season 3. He also does this later in the season to get information about Angelus.
* Deep dragons are natural shapeshifters, and gain a number of alternate forms as they age. The first is that of a winged snake, and they later gain access to a humanoid shape.
* Deep dragons feed primarily on subterranean aquatic creatures, and while their diet consists chiefly of albino fish and the occasional kuo-toa they also prey on

* Deeper Up the Tower’’ is a queer fantasy serial about a mysterious knight named Florian who enters the titular Tower and finds a world of strange magic and disco dreams. Each floor of the Tower is a new adventure for Florian where they may make a new friend or meet their end.
* Deeper Up the Tower is a queer fantasy zine about the mysterious knight Florian and their climb through the strange, mind-bending Tower. A trippy and surreal tale told installments with illustrations. Florian encounters mythical creatures, colorful adventurers, and magical queer weirdos as they seek an uncertain goal.
* Deeper Up the Tower uses this episodic, chaotic, somewhat whimsical style to tell a story of Florian, a knight wandering through the trippy, magical Tower, having dream-like adventures on the way.
* Deep Fear) into a dull, monotonous, boring experience. A lot of it had to do with the endless backtracking, slow action, and being near bereft of challenge. It's really, really boring. It certainly doesn't inspire any kind of fear, especially not of the deep variety.
* Deep Fear takes place in an underwater facility overrun with monsters. The date has no real bearing on the plot.
* Deep Fear whenever the sub designer, Dubois Amalric, opens his mouth to deliver his ridiculously accented lines at a volume as loud as his purple turtleneck sweater.
* Deep Freeze) (2003): Scientists on an Antarctic ice shelf base with questionable activities are killed off one by one by a tentacled monster.

* deep-fried Mars bar began life as a novelty item available at a vanishingly-small number of fast-food eateries in Scotland. A number of media reports sought to make it emblematic of the population’s notoriously poor dietary habits, but the coverage increased interest in the dish and it is now available in most chip shops.
* Deep-Fried Whatever — Deep fried food is so much better than food that isn't deep fried.
* Deepgate Codex series has a multitude of scars, which constrict and even start bleeding when she's in a state of mental trauma.
* Deepgate Codex was triggered when he was killed protecting his mother during his parents' war.
* Deep Gravity escapes and launches it without the others. It doesn't do any good, though, since it just burns up in the planet's atmosphere.
* Deep Gravity isn't designed for atmospheric entry, so either its descent has to be halted or the survivors have to get off it. They eventually make it aboard Werner's shuttle, but the shuttle is knocked off its intended angle of descent to the planet, and are therefore at risk of burning up in the atmosphere. They make it

through, but control of the shuttle is sufficiently impaired that they crash-land anyway.
* Deep Gravity, it's specifically averted. Paxon was sufficiently determined that his relationship with Michelle ought to have worked that he signed on to a deep-space expedition to a remote, dangerous planet just to follow her, believing that she could be made to see reason. Michelle certainly doesn't see it as romantic — but neither does he because, by the time the reunion he set in motion actually occurs, he's fully aware that it was the wrong thing to do.
* Deep Gravity, the planet Poseidon is technically habitable by humans, but only for short periods (due to toxicity and radiation) and with great care (due to large, dangerous, hostile lifeforms).
* Deep Impact (1998) had an asteroid impact into the Atlantic and cause giant tsunami waves and flooding over the East Coast, Western Europe, and West Africa, though New York is the only city shown.
* Deep Impact against the rocks on the way down the cliff, the car explodes in spectacular fashion.
* Deep Impact, an astronomer gets run off the road by a semi-truck, and his Jeep explodes in mid-air.
* Deep Impact and a seemingly intact yellow taxi being slowly moved by the current. This is after we've seen the statue, Brooklyn Bridge and Washington Square Arch destroyed with the detail that the best computer effects allowed in 1998.
* Deep Impact assign themselves one last mission, well aware of the fact that when the remaining nuclear bombs are detonated inside the larger comet fragment they will destroyed as well.
* Deep Impact, designed to ensure continuity of the species in the face of an impending extinction-force impact, is called the Ark. When Leo's family arrives they see people wheeling cages full of animals inside so they'll be preserved.
* Deep Impact Did we mention that his wife is also riding on the bike with him?
* Deep Impact has been documented to have three Hindi dubs. One from 1998 by Sound & Vision India for cinema release and carried over to some home video releases, another in 2009 by VR Films for home video releases and there was a third made in 2017, also by VR Films, but for television airing and it also had different staff and voice cast involved.
* Deep Impact has the World Trade Center be among the buildings destroyed by the titular impact of the comet.
* Deep Impact in Manassas, 150 miles away. The terrain is the giveaway; Virginia Beach is on the Atlantic Plain and almost perfectly flat, while Manassas (like most of the DC area north and west of town) is on the not-so-flat Appalachian Piedmont.
* Deep Impact: Jenny Lerner downs an entire martini in one go while meeting with her father and stepmother. They assume it's because she's uncomfortable with their relationship. It's actually because she just learned that the government is covering up the fact that a comet is headed to Earth which, if it hits, will wipe out all life on the planet.
* Deep Impact, justifiable as the comet is set to impact Earth and bring another Extinction-Level Event.
* Deep Impact: Shortly before the comet hits the MSNBC crew are seen drawing straws to decide which of them will get a seat on the news helicopter to try and escape the impact. Beth fails to win a seat so Jenny Lerner gives up her own place so Beth and her daughter can survive.
* Deep Impact, the camera follows it almost all the way through... then we cut to the exterior of the comet as it explodes into harmless chunks.
* Deep Impact: The main conflict is an asteroid about to hit the Earth and there are no antagonists to this end.
* Deep Impact, the president gives a speech to restore hope to the world after the impact of a comet with Earth:
* Deep Impact this is one of the reasons the reporter, Jenny Lerner, resents her father: In her own mother's words: "You now have a stepmother who is two years older than you". In the end, his father's wife abandons him when the comet is about to hit Earth, something she feels well deserved for him.

* Deep Impact was "Oceans rise. Cities fall. Hope survives." It fits that movie well, by the way.
* Deep Impact. We are treated to a nice light show. In reality, this would be the equivalent of detonating a massive bomb in Earth's upper atmosphere.
* Deep Impact, which causes a huge tsunami that floods the U.S. eastern seaboard as far as the Appalachian Mountains.

* Deep in the Valley. It plays with a lot of stereotypical porn roles, and even features a love interest who's tired of constant casual sex and who wants a meaningful relationship.
* Deep In The Valley type reality where Porn Tropes are real. The characters from this reality, such as Daphne, are very familiar with sex but haven't heard of love.
* Deeplight and into Dr. Vyne's employ. His skill at reading people and understanding what they want to hear also proves useful when caring for the elderly priests on Sanctuary. The more experienced staff quickly start turning to Hark for help.
* Deeplight has a cluster of extra eyes on his back. The narration is vague about their exact location, but they certainly aren't on whatever passes for his face at this point.
* Deeplight secondary mouth is conical, lined with many rows of teeth, and lunges out to grab prey.

* Deep Love Granny and her husband married during WW2. Their marriage lasted one night.
* Deep Love had a large cult following in Japan and while there was a series of popular manga (with multiple spin-offs) the live-action drama was by far more popular.
* deep love in particular), but really to everyone - to the point where he becomes ruthlessly vengeful against those who threaten the innocent.
* Deep Love knows exactly where the train station is even though he's never been there and fetches Ayu. At the end he delivers two Christmas presents.
* Deep Love was shown at "25:30" due to the fact the main character is a prostitute and the audience gets to see her at work.
* deeply devout, highly trained knight while Eskil has made his name as a financial and political power-player in their homeland, Arn has been a castellan in the Knights Templar, and the big man in one of their most important trading posts in Outremer, meaning that he has played politics at the top level in the Kingdom of Jerusalem, and while not on Eskil's level, he still has a decent grasp of the realities of commerce and logistics.
* deeply pessimistic personality though in that due to a quirk in Japanese, the way his name is spelled in a western way (left to right rather than up to down) leads it to being misread as Zetsubou, meaning "Despair" or "Hopeless".
* deeply regrets his failure to protect Raven's Roost from Governor Kalen.
* deeply tragic when a nascent supervillain noticed all the bells and whistles the kid had, charmed his way into Washu's lab, stuffed the mother in a cryotube and turned the kid into a superweapon.
* deeply, truly, sincerely hate. Seeing how both Mongkut and Chulalongkorn are

revered national heroes, that is quite understandable. Every film adaptation has been banned outright in the country.
* deeply unpleasant side effects. They probably won't kill you, but they might make you wish they had.
* Deep Madness elements, set in a monster-infested deep sea mining facility.
* deep madra reserves due to his advanced cycling technique (which he teaches to Lindon), so he basically always has more power to use. As he says, there are other cycling techniques that improve recovery time and so on, but why worry about all that when you have so much power that you'll never run out? Underlords such as Eithan can also turn madra into soulfire (though there are more efficient methods of creating soulfire), so he also has deep soulfire reserves. Most underlords are miserly with their soulfire, but Eithan burns it casually because he is confident he can always make more.
* Deep Mind neural network with the rules for playing chess and were able to tune it so that it learned the game by playing against itself. Given the resources of a supercomputer it only needed about 4 hours to reach the skill level of Stockfish, one of the top ranked, chess programs in the world. Interestingly sample games taken over the course of the training period show the development and then abandonment of various strategies similar to the ones created by human chess players. Its opening games eventually settled on the same ones currently used by grandmaster players.
* deep muttering noises. Frenzy, for some reason, has a much higher and more frenetic series of noises, though it certainly fit him.
* Deep Ones. It was stated that The Dark Ocean is a separate dimension from the other two established dimensions.
* Deep Ones, sees a violet aura when he uses his powers, even if he is not seen in his awakened form in the anime.
* Deep Purple album is more or less ignored, with "Soldier of Fortune" being the main exception.
* Deep Purple but end up nowhere. Interestingly, one of their greatest hits, "Strange Kind of Woman", was recorded during the same sessions but not included on the UK album (on the US or Japanese versions of the album, SKOW is included, making it somewhat stronger).
* Deep Purple could easily be mistaken for having this kind of ending, as many radio stations only play it up to the second verse, which leaves the story hanging. The full song finishes the story and depicts whether or not they actually win the "race" that night.
* Deep Purple drummer Ian Paice is famous for sporting shades and tinted lenses. Keyboard player Jon Lord also wore them for a while.
* Deep Purple. Each of the spinoff bands continued to do well on their own, and in the late 80s, when a reformed Purple was up against Whitesnake in the charts, the spinoff outsold the mother band by a wide margin.
* Deep Purple had a tendency of sounding like this back in the old days. Especially during songs like "Black Night", "Hush" or "Smoke On The Water", where they could easily keep the same riff going for over 10 minutes and just jamming to that...
* Deep Purple had two #4 hits in the U.S., one of which was "Smoke on the Water". The other? Their debut single "Hush", which isn't as well known as songs like "Highway Star" and "Soldier of Fortune" (neither of which charted), but is still a fondly remembered piece of psychedelia. Their third Top 40 hit? The long-forgotten "Kentucky Woman".
* Deep Purple has had multiple singers, but the best known is Ian Gillan. The drummer is Ian Paice.
* Deep Purple" in 1968 and "Smoke on the Water" in 1973, both of them peaked at #4. Of course, on rock radio, they get tons of airplay for their body of work. They also had a #38 hit in 1968 with their cover of Neil Diamond's "Kentucky Woman", which was forgotten almost instantly.
* Deep Purple) onward. This may have something to do with their then-new lineup and different sound.
* Deep Purple painting "The Last Judgment", a tryptich where only a fragment has

survived.
* Deep Purple's career is characterised by many line-up changes, but avoided any Suspiciously Similar Substitutions. Instead, they recruited new members with their own distinctive sound, resulting in significant changes in the style of the band's music from one line-up to the next.
* Deep Purple song "Fireball" features the air conditioner in the studio being turned on in the beginning.
* Deep Purple's "Smoke on the Water" tells the story of the band recording the song.
* Deep Purple that before production was over, it had reached the point where none of the members were willing to be in the studio with each other, necessitating careful scheduling by the producer and engineers to get the album finished. They were able to make up afterwards, although the experience contributed to Ian Gillan's departure after the ensuing tour.
* Deep Red has a creepy lullaby that serves as a background music for some of the creepiest moments.
* Deep Rise: Deep Nobles are a walking combination of meat grinders, eldritch tentacles, and genius bioengineers. Any surgery they perform is almost guaranteed to maximize invasive pain and grotesque assimilation. On the plus side, they've developed cures to world hunger and aging.
* Deep Rise Every bit of technology more advanced than an abacus or a lighter is alive and skin-colored.
* Deep Rise makes heavy use of colors, both for conversation, and going so far as to color pronouns to clarify to whom these refer.
* Deep Rise: Nobles can reproduce normally, but have the ability to infest a host with their blood, which slowly mutates the host into one of them. If the neurosurgery doesn't go well, then the resulting spawn will be more of a daughter than a rebirth, retaining the memories of the host but not growing a similar personality to match. This is what happens to Baron and his subsequent "daughter", B'r'n.
* Deep Rise Over 25 named non-humans identified by color, hard-to-remember names and eye-configuration.
* Deep Rise: The only sentient life form that cannot be found on earth is called the Signaler, a race of quadrupedal lizards whose gender can be controlled; the more heat you force-feed the egg, the higher the probability the signaler hatches as a male. Since males look like comatose dumbasses and rare because it takes multiple eggs on the sides to ensure the central eggs get enough heat, they're treated as breeding stock and trophy sons. When their technology gets advanced enough to invent incubation chambers, an entire world war erupts over the treatment of males in a matriarchal society, with the nazi expies outright raping and murdering any males born into their fold. And after the apocalypse, one of the last survivors tries to impregnate herself with frozen sperm because all the males are dead, and dies from medical complications.
* Deep Rise, they're living technology. We get to see a washing machine made out of a person.
* Deep Rising agile; at one point Trillian notices it slithering through a pipe barely two feet wide.
* Deep Rising. As the remaining group of survivors discuss what to do next, one of the monsters drips slime/drool onto the comic relief's shoulder. The comic relief proceeds to spaz out and opens fire on the monster, causing it to split and spill out the partially digested (but still alive) remains of another character.
* Deep Rising: At first the monsters attacking the ship seem to be a patch of giant, carnivorous tube-worms. It's later revealed that they're just the tentacles of a colossal octopus monster.
* Deep Rising: Business mogul Simon Canton wanted to sink the cruise liner he built to cater exclusively to the mega-rich because despite all the money he poured into the project, he was still operating at a net loss and only the insurance money could save him from going bankrupt. His plan involved faking a take-over by pirates, then escorting the passengers to the lifeboats and having the pirates blow

up the ship with a torpedo. Then of all things a giant octopus monster shows up and spoils his plan by eating everyone.
* Deep Rising centers around a gigantic octopoid monster infesting a cruise liner. It first consumes every single passenger onboard and then uses its hundreds of tentacles to pursue a bunch of pirates who show up later. The tentacles are evolved to function semi-autonomously, with their own set of sensory organs and a completely developed digestive system.
* Deep Rising had a creature interested only in human bodily fluids. It left its victims as a pile of bone and digested guts.
* Deep Rising happens after the glamorous cruise ship is shaken and people panic and run. A very scared woman locks herself in a bathroom and sits on the toilet, when something comes up from the toilet (though remains unseen) and attacks her, resulting in a large gush of blood splattering on the bathroom's mirror.
* Deep Rising looking for any passengers or crew members, but none can be found. Then the elevator activates, and they can see it moving to their floor. They keep their weapons aimed at the door, but it's empty. Except for the blood-covered walls inside the elevator, that is.
* Deep Rising protagonists destroy the monster and wash up on an island, which turns out to be host to another monster.
* Deep Rising since they were actually operating at a loss. This revelation infuriates the Captain, since it's entirely Canton's fault that they couldn't get out a distress signal.
* Deep Rising sports such attire throughout the first half of the film. He loses it halfway through, as it's easier to travel through the bottom of a water-filled cruise ship without it.
* Deep Rising's sonar operator counts down the distance between the cruise ship and the rapidly-oncoming whatever-it-is that's rushing towards it from below.
* Deep Rising takes place on a stalled cruise ship. Although the protagonists do have a boat of their own, its engines are damaged in a collision early on, so it won't be able to take them to safety unless they can retrieve replacement parts from the tentacle-infested cruise ship's machine shop.
* Deep Rising: The ending features the heroes now stranded on an island that seems to have more monstrous creatures they have to deal with. We cut to credits right before they come face to face with something that sounds like Godzilla.
* Deep Rising: The gigantic octopoid monster has tentacles that function like this, being closed until they detect prey and split open like a blooming flower to reveal an additional two-jawed inner mouth.
* Deep Rising, the heroes at one point come across the creature's feeding grounds in the bowels of the ship. There are hundreds of gory, skeletal remains strewn across the giant storage room. The haunting final screams of the people can be heard as the camera pans over them. Earlier in the film, some of the passengers' excreted corpses are found in a corridor at the bottom of the elevator.
* Deep Rising: The monster, a giant mutant cephalopod, has a main mouth that is just a giant opening littered with numerous backwards-facing teeth.
* Deep Rising, towards the end where Finnegan and Trillian escape on the jet ski out of the ski bay shortly after Finnegan's rigged boat dooms the cruise ship.
* Deep Rising under his breath while the group is sneaking along a corridor. Everyone stops and points flashlights and/or guns at him, so he sheepishly explains that it's stuck in his head. Amusingly, even the hardened mercenaries don't push the issue and simply resume walking.
* Deep Rock Galactic, are tasked by the eponymous mining company to extract valuable materials from the planet's cave systems, while the Glyphids simply want to eat and/or drive off anything invading their territory.
* Deep Rock Galactic; especially if you have a bead on their unarmored spots.
* Deep Rock Galactic. Especially prominent with the default Driller, since his armor's cut below the chin and his headgear ends at nose level.
* Deep Rock Galactic for any kind of permanent planetbound installation), drill-equipped drop pods designed to tunnel deep into the earth where minerals have been detected then rocket back into the orbital station are a fundamental part of mining

operations.
* Deep Rock Galactic for valuable ores, including hostile alien planets no one else wants. So even in outer space and carrying miniguns, a dwarf is the same everywhere.
* Deep Rock Galactic gives your character hover boots. Their primary purpose is to prevent fall damage, but the exhaust also does damage to enemies underneath you.
* Deep Rock Galactic is ambiguous on whether or not he's a dwarf too, as while he's got the build, there's no indication as to who else works at DRG, and he's got a smooth British voice. There's also no indication if DRG has other mining teams of different species or if dwarves are the only miners they hire. Humorously, if you turn off all hair and helmet options on the dwarves, you'll find they all look exactly the same - they have the same face and head model underneath! They even all have the same voice actor, just pitch shifted to fit the different classes.
* Deep Rock Galactic; it's a good thing your heavy armor manages to stave off a lot of that harm.
* Deep Rock Galactic "Leaf Lover's Special" one of the most popular drinks for its instantly-sobering effect despite the characters' outspoken distaste for it.
* Deep Rock Galactic Never referred to by anything else other than Mission Control, he gives you important information both right before and during your missions, directs you around important details, and gets utterly frustrated whenever you start misbehaving at the base between missions, never able to act on any threats to cut your paycheck even if you mess with the gravity controls and stuff the boarding pod full of barrels before heading to work drunk. The profile picture makes it uncertain if he's human or dwarf, however.
* Deep Rock Galactic: One of the enemies, the Cave Leech does this to anyone unfortunate enough to stand under them. However if the player listens carefully, when idle they let out a faint "giggling" sound, and when they are attempting to grab a player, they make a distinct hissing noise, giving themselves away to a player with sensitive hearing.
* Deep Rock Galactic Only natural when destructible terrain and mining pickaxes are a part of the game, but one class in one situation invokes it the most: When the Drop Pod comes down, and everyone must quickly get to it before it leaves, you could either backtrack and follow the M.U.L.E. and its flares, fighting off what ambushes you in the meantime... or just have the Driller carve a straight tunnel to it with his twin drills, and guard his back while he does. If you're lost, it's usually the easier way.
* Deep Rock Galactic pull out at every stop to make sure everyone comes home — and the game enforces this at all turns.
* Deep Rock Galactic than the chitinous, fiery juggernauts themselves.
* Deep Rock Galactic the Driller's Satchel Charge naturally have more problems, due to explosion radius and the usual panic in which they're tossed out. At least there's perks to mitigate friendly fire damage, though the dwarves themselves will still get pissed.
* Deep Rock Galactic the ones that will bomb the hell out of their own teammates with a Satchel Charge if they don't get out of the damn way while he's doing his thing, or just because. The developers have joked before that Driller is the game's PvP mode because of that last one.
* Deep Rock Galactic: The reason why loot bugs erupt into showers of Gold and Nitra upon dying is that they eat them. If you leave your resources unguarded near a lootbug, it will waddle over and eventually eat the raw ore on the floor. Unfortunately for you, you don't get the ore they eat back if you kill them.
* Deep Rock Galactic, while making mulch of anything more organic that gets in the way. Mind you, this includes dwarves, so watch where you point that thing. Either way, upgrades make it better at both digging and killing, culminating with one that makes it so blood spilled by enemies cools the drill to stop it from overheating.
* deep sea creatures, which evolves in one of the most extreme environments on Earth, with very little sunlight, nearly no photosynthesis and extremes in pressure and cold. This radical difference from any other environment on Earth creates very alien forms of life that simply cannot exist elsewhere.

* deep-sea gigantism. While many of these creatures are more or less larger versions of animals found elsewhere, it only adds to the strangeness of the abyssal ocean.
* deep-seated self-hatred and insecurity makes her doubt her own abilities constantly.
* Deep-sea tubeworms, which live off nutrients generated chemosynthetically by bacteria in their gills, lost their mouths because they no longer needed to ingest food.
* Deep Secret distressed when he realizes the hotel where he's gathering his magical candidates is built at a node between ley lines. It has a bit too much magical power behind it for him to be comfortable working with it. He's entirely right, of course.
* Deep Secret has the heroine and her brother going on a quest to find a wish-granting entity that can heal her of a magical injury inflicted on her by the villain.
* Deep Secret, it's noted that a female centaur can have a child with a human, but that a human mother's body would not be able to handle a centaur fetus. The main centaur character in the novel has a human father and a centaur mother.
* Deep Secret psyche is so messed up that she can't see through it when she tries to read other people.
* Deep Secret, Ted Mallory is a generally competent individual and a best-selling author, but he absolutely does not understand his teenaged son Nick.
* Deep Secret there's a scene at a party at an SF convention where several people are drawing on a handsome, almost naked guy who's drunkenly fallen asleep on the stairs. One of the artists is a magic user whose doodles constitute a spell designed to lead the guy to her bed later.
* Deep Secret uses this up to the pommel. The "Magids" (magicians who keep the worlds running) are supervised by the Upper Table (who are rarely seen) who are in turn supervised by Them Up There. There is also known to be more above Them Up There but they are so secretive no one even knows what they're called (or something like that, I'm not entirely certain).
* Deepsix orbiting an apparently uncivilized planet. They eventually work out it's a 'skyhook' an alien race built for a planetary evacuation of the world's less advanced inhabitants.
* Deep Sleep: Someone is sleeping very heavily and hard to wake. May not involve illness.
* Deep Sleep: Someone's in a very heavy sleep. Doesn't need to be injury-related but often is.
* Deep Sleep Trilogy are pitch-black except for their large glowing eyes, and generally only appear in the darkness.
* Deep Sleep Trilogy is closing in on you. To get out, you have to quickly unscrew a metal plate so you can reach the button for opening the elevator. But when you start, you drop the screwdriver and quickly have to pick it up again.
* Deep Sleep Trilogy than just dreams and the protagonist is actively stuck inside it.
* Deep Sleep Trilogy, the monsters typically come at you fairly slowly while menacing music plays on the background.
* Deep Sleep, with the bonus points that Lalli is not fond of Reynir at all when awake.
* Deep Snow, the main character is in snow that goes up to her waist, and she sings a song about her bum being numb.
* Deep South, all taking place in a more negative version of this setting.
* Deep South can no longer find her jewelry case. She calls the police, telling them she suspects the new gardener, who is black. Two hours after the police arrest him, she finds the case and calls the police back, only to learn that it's no problem, they've already got a confession.
* Deep South in the first several decades of film got a lot of rose-tinting.
* Deep South or similarly "redneck" places find Sugar hilarious. Several of them can attest to having known someone like her growing up.

* Deep South. The radio version changed the lyric to "too damned old," ironically swapping a substitute swear word for a real one. "Damn" is acceptable in country music.
* Deep South town. A local aristocratic woman writes a letter to the captain, requesting to send her a dozen well-behaved men for a ball she's throwing for the young ladies in her boarding house. But no Jews. At the appointed hour, she opens the door and sees a dozen black guys in uniform. The shocked woman says, "There must be some mistake!" One of the sailors replies, "Madam, Captain Rabinowitz is never mistaken."
* Deep Space 1 so they can't be used as launch engines, but once in space, their ability to fire for a very, very long time means that they eventually hit velocities far greater than what a rocket with the same amount of propellant could manage.
* Deep Space 69 seems to be that several scenes where girls were wearing lingerie... well, they aren't anymore.
* Deep Space 69 thump under the table when the purple alien suggests Jay could have a threesome with both of the girls he's thinking about in episode 13.
* Deep Space 9 also has the Jem'Hadar, who age incredibly fast because of special genetic modifications.
* Deep Space 9 episode also showed a proud Klingon lawyer, who treats every case as if it were a genuine battle. He uses every trick in the book (but still goes by said book) to win, as he believes a warrior must, but the cause itself is meaningless to him. As he's working to convict Worf of the accidental murder of a shipful of civilians, he explains that he would then happily defend him on Qo'noS.
* Deep Space 9 to be hunted by another species, with a body and mind highly optimized for that purpose. The hunting party chasing him shows up in act three.
* Deep Space 9 who can transform into any animal he can think of, while the TV version of Beast Boy could only morph into a tiger for the entirety of the first season. He later gained the ability to also turn into a snake in the Season 2 premier, but still mostly just uses his tiger form for budgetary reasons.
* Deep Space Homer alcohol, he reverts to his previous state, leaving Homer the winner by default.
* Deep Space Homer" includes this, when a NASA guy starts a press conference with: "Ladies and gentlemen and members of the press..."
* Deep Space Homer", Kent misinterprets an ant flying across the camera lens in space as an invasion by giant alien ants. As he announces this, he shows his true colors:
* Deep Space Homer man that he is, he winds up breaking down into tears at a NASA press conference, reenacting the exact same scene from the film, making the NASA officials look like complete idiots.
* "Deep Space Homer" upset when the award instead goes to an inanimate carbon rod.
* Deep Space Industries which is out to mine asteroids. They also are planning on deep space manufacturing and refueling using these asteroids if things go well enough.
* Deep Space Nine. Against a Dominion-Cardassian Fleet, the station manages to destroy 50 ships before the Starfleet crew is forced to abandon it. Before leaving, Sisko reveals that while they had focused much of the Dominion's ships, a Starfleet-Klingon task force destroyed a major Cardassian shipyard.
* Deep Space Nine also had the Changelings, a race of shapeshifters whose default form is gelatinous liquid and who live in a collective living ocean called the Great Link.
* Deep Space Nine also introduced Sloan and the agents of Section 31 (though many fans disagree whether they can be considered "heroes").
* Deep Space Nine, and because Cardassians can memorize better than humans, Garak accidentally gets himself stuck being the translator for everyone. It explores Kardasi vs Arabic, tonal Ferengi, that there is no one "Bajoran" any more than there is one "Earth", and what happens when Molly's dad speaks Irish Gaelic and her mom speaks Japanese and she speaks Molly Gibberish.
* Deep Space Nine" and "No good deed goes unpunished" are codified in the Rules of

Acquisition. (#98 and #285, respectively).
* Deep Space Nine are a race of intelligent slimes who can assume the form of other creatures or objects. Since they have no organs, they are immune to bullets, being stabbed, or blunt trauma. Even if parts of the body are cut off, they revert to ooze and remerge with the rest of the body. Energy weapons, fire, and electricity are the only thing that can harm them. Even then, a shapeshifted Klingon is shown needing an absolutely obscene amount of fire poured into it to kill it.
* Deep Space Nine are the Breen. Before the war, pretty much all that was known about them was that a Klingon armada that invaded their space was lost with no word; once allied with the Dominion, their forces were at the front of every battle by their own insistence.
* Deep Space Nine as a sort of flying cavalry unit that can smash through holes in the enemy lines.
* Deep Space Nine. At one point Chief O'Brien tries this trope using a PADD, only to find the sentence he's typing is gibberish as well.
* Deep Space Nine At the end of the day, an elite cadet is still just a cadet.
* Deep Space Nine Bajor's sun, even a slight navigational error would be disastrous. Dax is aghast, but Kira, what with most of her species' lives on the line, is less restrained.
* Deep Space Nine because some of his forms were too heavy for it to support.
* Deep Space Nine because the colour saturation properties were different.
* Deep Space Nine burn the carpet after unmaking their unfortunate target. "Oh? Now look what you did to the rug." They covered the stains with a chair, which was not enough to fool Odo.
* Deep Space Nine, but don't want to disgrace the ideals of Starfleet (and/or don't want to be tracked), so they pull off their combadges to indicate that they are no longer acting as Starfleet officers.
* Deep Space Nine, but the weapon never appeared again afterwards. The heroes were once on the receiving end of a Klingon mortar in DS9, but the rounds were so laughably weak (and seemingly completely lacked shrapnel) that they had to land directly on someone to do more than annoy them.
* Deep Space Nine by Michael Eddington: "You know in some ways you're even worse than the Borg. At least they tell you about their plans for assimilation. You're more insidious. You assimilate people and they don't even know it."
* Deep Space Nine can be) when Sisko actually takes him up on the offer.
* Deep Space Nine, despite being introduced — in an episode named after him, no less — as the former Resistance leader who goes on to become the Prime Minister of Bajor, the recurring character of Shakaar Edon turned into this trope in his very next episode, when he was paired up with Kira (eliciting Odo's secret jealousy, which the episode was all about). The fact that the relationship was unsurprising in the sense that the two characters had a lot in common and a history, combined with a lack of chemistry between the actors, helped to make him a typical false lead.
* Deep Space Nine developed a real son-father type relationship away from the set.
* Deep Space Nine did slightly avert this trope by also making the station follow the Bajoran calendar, operating on a 26-hour day. (What time zone on Bajor its day corresponds to is never addressed — probably whichever one is the Bajoran equivalent to UTC on Earth.)
* Deep Space Nine episode has a Breen being exempted from blood tests to see if they're a changeling, because they have no blood to test. The Changelings, who are mostly very uncomfortable around solids, appear remarkably at ease around the Breen...
* Deep Space Nine episode "Soldiers of the Empire" reveals that Klingons use a stardate system of their own (day in the year of Kahless). Kahless was the founding figure of their civilization, so it makes perfect sense to them.
* Deep Space Nine episode "Statistical Probabilities", in which a group of genetically engineered supergeniuses (by which we mean "can deduce correctly that a political leader is a 'pretender to the throne' who killed his predecessor's daughter and took power just by watching said man give an unrelated speech") state

that they have studied the state of the Federation's war with the Dominion and have found that the Federation has absolutely no chance of victory. Their prediction indicated that even if they got lucky with Romulan aid or an anti-Dominion coup on Cardassia (both of which ended up happening), the war was hopeless. The only hope was to surrender and endure decades (if not centuries) of oppression until an Earth-centered revolution would bring about the rebirth of even better Federation.
* Deep Space Nine episode "The Magnificent Ferengi", the Ferengi are attempting to rescue Quark and Rom's mother, and fail so miserably that one of her rescuers shoots her. Then it's revealed to be a holosuite simulation, in preparation for the real thing. And it's still on easy mode; they just suck.
* Deep Space Nine episode "The Visitor", the alternate future version of Jake Sisko marries a black Bajoran woman, the only black Bajoran to be seen on the show outside of blink-and-you'll-miss-it actors in the background.
* Deep Space Nine example comes in the episode "Children of Time", when an alternate-future Dax host suggests he could do this to prove that he really is Dax, and proceeds to recount one of Curzon's memories of Sisko...one that Sisko clearly doesn't care to remember.
* Deep Space Nine famously featured the two-year war between the Federation and the Dominion, but it also had the Klingon-Cardassian war and the second Klingon-Federation war (before both sides discovered they'd been played like cheap fiddles).
* Deep Space Nine fanfic, "Nothing Like The Sun". Notable for being one of the few DS9 fics to center around the marriage of Miles and Keiko O'Brien.
* Deep Space Nine, Garak, Odo and Quark all play this role. Garak's comes from the intelligence world and he has connections everywhere and in every facet of society. Odo's tend to be police, security and politically based and Quark's tend to be economic and black market.
* Deep Space Nine goes in depth into the rivalry between the Cardassian Central Command (military) and the Obsidian Order (very powerful civilian secret police.) Given that the Obsidian Order is an extremely powerful entity in Cardassia, which is basically fascist, it's inevitable that they and the military will come into serious conflict on a regular basis. Really, any time a secret police force exists in Star Trek, you can expect it to come into conflict with the military at some point, probably quite a lot.
* Deep Space Nine had the Breen. They're speech sounded like digital nonsense and static but was easily understood by their Collective allies. They are a mysterious species who wear refrigeration suits despite living on a planet with a mild temperature.
* Deep Space Nine has Kira and Dukat turning their freighter into a Q-ship, in an attempt to ambush a Klingon Bird-of-Prey that had been raiding Cardassian outposts.
* Deep Space Nine has personal shields that appears to be thin strips on their arms. They moves their arms into the way of phaser shots in order to block it.
* Deep Space Nine head of the alliance and most powerful man in the quadrant, his direct superiors accept his "recommendations" so often you'd think their positions were reversed, the Klingon Chancellor is a personal friend of his, and the Romulans tend to go along with him too.
* Deep Space Nine in all the wrong places" had three characters coming into sickbay for sex-related injuries (Quark didn't inflict sufficient damage upon the Klingon chick for her to need repairs). Worf and Dax literally start out with a bat'leth duel, which is implied to be Klingon tradition.
* Deep Space Nine itself, in that he is a competent (somewhat) admiral who actually does something useful, so Sisko doesn't have to do all alone. Also we have Martok, who flies attack runs against the Dominion.
* Deep Space Nine—Cardassian agent) be on hand fitting Sisko for a suit as he and the crew discuss the invasion. Sure enough, Garak is instantly on the wire to Gul Dukat, claiming his "sources" have warned him of the invasion. As Garak is known to have plenty of shady contacts, Starfleet can assume he just found out on its own as it's not like Sisko would just openly discuss this in front of a Cardassian tailor...right?

* Deep Space Nine of religion as a political tool or an excuse to discriminate against others, the show as a whole doesn't condemn the practice of religion itself. Part of what makes it confusing is that the Prophets can back up everything their believers say about them; the first season finale had a dispute on whether they were technically gods or not fizzle out when everybody realized they were arguing over semantics and all agreed on the key points.
* Deep Space Nine, other species risk serious bodily harm if they mate with Klingons.
* Deep Space Nine present themselves as gods and have truly impressive abilities in the area of genetic engineering, tailoring minion races to serve their needs. The rest of their technology is pretty typical, though, and non-minions don't buy their pretensions for a second.
* Deep Space Nine relaunch, original characters. Most of the revolt against the publishers was focused against one man in particular - Richard Arnold, who vetted all novel proposals for the studio and demanded a strict lack of inter-novel continuity. Once he was let go, the restrictions went with him.
* Deep Space Nine shows a Bug-Eyed Monster crawling over an apartment ledge towards a buxom woman sunbathing in a towel. One of the writers, Herbert Rossoff (actually Quark without his makeup), instantly derides the picture as garbage...then quickly says he'll write the story for it.
* Deep Space Nine shows that 21st century Earth had a communication network called the Interface that required users to create an account, let them access the Net and watch news channels.
* Deep Space Nine's initial regulars was Jake having to be visibly the same race as his father.
* Deep Space Nine's "Inter Arma Enim Silent Leges," Dr. Bashir and Admiral Ross have such an off-the-record discussion after removing their combadges.
* Deep Space Nine. Sisko is rather more polite and refined about his orders. Kira is not refined, nor does she pretend to be. Her preferred manner of dealing with problems is to yell at them until they go away and/or resolve themselves. If this doesn't work, she resorts to fists.
* Deep Space Nine. (Sisko makes Quark kiss the Sceptre too, just to troll him).
* Deep Space Nine, Sisko once gave Gul'Dukat back a bottle of poisoned wine. Weyoun took a swig and declared it "quite toxic". He then explained that Vorta are immune to most poisons.
* Deep Space Nine some seemingly-friendly aliens claim that Chief O'Brien was killed in a nuclear accident (but they really have him imprisoned). O'Brien's wife insists on seeing the footage of his death and immediately identifies it as faked, because it shows O'Brien ordering a coffee from the replicator and he "never" drinks coffee in the afternoon. After an episode full of plot where the Niners rescue O'Brien, she discovers that he drinks coffee in the afternoon all the time.
* Deep Space Nine, so not only did they rarely endanger anyone, Quark was able to use them to save the crew's lives at least once.
* Deep Space Nine's "Profit and Lace", where Quark becomes a woman for an episode to drive home the gender unfairness of Ferengi society. It's his brother Rom who gives him the body language lessons, much to everyone else's amusement.
* Deep Space Nine still is with the exception that Terrans are being used as laborers instead of Bajorans.
* Deep Space Nine, the Jem'Hadar are an interesting hybrid of the two, with a shift in perspective depending on which Alpha/Beta Quadrant nation they're being contrasted with:
* Deep Space Nine themselves appear to be considerably bigger than a shuttle even so.
* Deep Space Nine - they knew they had time to win audience sympathy for Sisko.)
* Deep Space Nine) to a Cardassian who's taking revenge on members of her former resistance/terrorist cell, who maimed him in a bombing:
* Deep Space Nine to come up there with grievances and such (especially Quark, who is head of the station's business union).
* Deep Space Nine tried to do this in a more sensitive manner than TNG had in the

"The Host". In "Rejoined", Jadzia Dax meets Lenara Kahn, whom one of the Dax symbiont's previous male hosts had been married to. The trope is applied in that it is really Dax and Kahn, the symbionts, who have romantic feelings for each other, rather than Jadzia and Lenara. Also, the Trill have a taboo against symbionts resuming romantic relationships carried over from past hosts (a retcon from their introduction in TNG) and thus this was a single-episode story that is never pursued further. Jadzia would go on to marry Worf.
* Deep Space Nine types, complete with a labor movement martyr in his ancestry (granted, one can call Captain Sisko upwardly-mobile, as the son of a restaurateur, but this is revealed much later and never emphasized). Though the Federation is supposed to be truly egalitarian, classless meritocracy, so the whole issue is a little murky.
* Deep Space Nine universe uses energy weapons, the Bekkir developed armor (even spacecraft-grade armor) designed to reflect energy weapon beams. The only ways to affect them: captured rifles, explosives (phasers overloaded into bombs), extreme heat, or an EMP.
* Deep Space Nine uses the "calling the moon 'Luna'" variant. Jake thinks his grandfather (who lives on Earth) is old-fashioned for calling it "the moon, like it's the only one or something," but apparently nobody who lives there calls the moon "Luna" either.
* Deep Space Nine, use tractor beams as a weapon in combat, using their beam weapons to hammer a ship's shields into submission before locking them in place with the tractor beam so they can be easily boarded or blown apart at leisure.
* Deep Space Nine usually communicate with people within their minds, appearing as people the person knows well in a place familiar to them. (Which also saves a lot of money for special effects.)
* Deep Space Nine were gonna slash anyway, so they continued to emphasize that friendship.
* Deep Space Nine "What You Leave Behind", where the treaty that ends the Dominion War is on a piece of paper signed with an actual pen. Through this we also learn the the Female Changeling is a Southpaw.
* Deep Space Nine When Bashir pulls the same trick, Quark has to shoo away Rom who's peering into his ear to see if there's any more latinum there.
* Deep Space Nine. When the Federation first encounter the Jem'Hadar, one of their fighters does a suicide run into the warp nacelle of a Galaxy-class starship, destroying both vessels. There's no military necessity for this; it's done purely to demonstrate to the Federation that the Jem'Hadar are not to be taken lightly.
* Deep Space Nine when the O'Briens' second child was transplanted into Kira after an accident.
* Deep Space Nine where Bashir and O'Brien are chanting, "Kill Worf!". The context is that they were mad at Worf for having them participate in a painful ritual and were speaking hyperbolically.
* Deep Space Nine", where one of the popsicles would have survived, had part of the station not collapsed through his pod.
* Deep Space Nine - who are willing to do things as extreme as genocide to protect the Federation.
* Deep Space Nine Worf himself becomes "Strategic Operations Officer," a.k.a. "Reason To Have Worf On This Show."
* DeepStar Six. Foreshadowed By the fact he was over worked and suffering from some form of cabin fever. But for whatever reason his superior wouldn't give him a break.
* Deepstar Six is a pretty hefty example: it takes almost an hour for the monster to appear, in a film 99 minutes long. As you could expect, it's a relentless barrage of disasters and monster attacks between that point and the time the credits roll.
* DeepStar Six makes itself known by appearing in the cast's radars, ramming something (usually with disastrous results) and then disappearing into depths of the ocean.
* Deep Thought could qualify, although it's more of an example of computer

programming humor: Deep Thought gives the correct answer, it's just that the questioners asked the question wrong.
* Deep Thought is a computer programmed to answer the Ultimate Question of Life, the Universe, and Everything. It reveals that the answer is "
* "Deep Thoughts", when Nale pretends that the Linear Guild has been sent to retrieve the Talisman of Dorukan by their "wise and benevolent king," he has to elbow Sabine when she starts saying "King? What ki—OWW!"
* Deep Throat; based on the timing, this is much more likely to be a refernece to the porn movie and not to the informant on the Watergate scandal.
* Deep Throat has the grocery delivery boy (yes there were such things in 1972 — and there still are in some places) giving oral sex to a woman seated on the kitchen table, and looking slightly bored. At one point she is going to light a cigarette and asks, "Do you mind if I smoke while you eat?"
* Deep Throats", Brian and Stewie are in disguise (Stewie, of course, in drag), and end up kissing to avoid being spotted. Afterwards, Stewie reacts with "Hey, freaking shot in the dark, but you wanna do something sometime?"
* Deep Throat was really a Skrull spy living as a government official, who had come to love the United States.
* Deep Time first and galaxies later, mentioning from time to time how space weathering is degrading the probe, until proton decay finally wipes out what remains of the spacecraft.
* Deep Town: Mining Factory are initially encountered as one of their appendages as a boss battle for the first 11 sections of an area. On the 12th section, you finally get to fight the full Elder itself.
* Deep Town: Mining Factory sealed them in an asteroid then sent it towards a planet with an iron core, which would imprison the Elders and their chaotic frequencies.
* Deep Trouble, set on a British nuclear submarine. They inadvertently torpedo the USS Nimitz in the opener of the first episode.
* Deep Trouble when the episode "Sophomore Slump" reveals that Marco is still friends with them and hangs around them. Though they did get annoyed at Marco when he keeps talking about Mewni, they accept Marco's apology for his behavior and they present him with their lucky dice as he leaves for Mewni.
* Deep Trouble, which in its second series had an Alison and an Alice. But since the show is set on a submarine, everyone is usually referred to by rank and surname anyway (and Alice Barry in fact insists on being called Barry).
* Deep Trouble while his colleague and the children who trusted him are murdered.
* Deep under the Russian city of Norilsk is a mine called Mayak. The duty of supervising the fuel, and fueling the machines, falls to Irina Martinets, the "
* deep-voiced seeming genuinely scared, though this was expressed through acting rather than dialogue for the most part. Just a handful of the more obvious examples:
* Deep Water Black trilogy turns out to contain the genetic structure of pretty much every animal on Earth, at which point the characters point out themselves they're on an ark. Then it turns out there were actually two arks — the other one contains all of humanity's genes.
* Deepwater Black was to repopulate the Earth with clones developed from her on-board gene bank. There are multiple Deepwaters.
* Deepwater Horizon: Director Peter Berg plays Mr. Skip, the person Jimmy speaks to just after getting off the helicopter.
* Deepwater Horizon: Don uses this draw a diagram illustrating his idea for why the negative flow test had such a high reading, but no mud came shooting back up.
* Deepwater Horizon is 43 days behind schedule on the well they've been drilling. BP is riding them to get it finished and ordering measures taken to try and make up lost time, measures that have the Transocean people scratching their heads. When Mike asks a few roughnecks if it's stupid what they're doing, they say they're not sure it's stupid, but it "ain't smart". Eventually all this leads up to an uncontrolled pressure buildup that causes a blowout and eventual explosion.
* Deepwater in the pilot episode and shows up in various other episodes. It is a

radially symmetrical, green and black object that looks more like an abstract metal sculpture than a spaceship. Its occupants, if there are any, never show up, and their motivations are just as mysterious.
* Deepwater looked like a vaguely humanoid figure cloaked in a radiant energy field, and was impervious to laser weapons fire. It's not clear if this was what the aliens actually looked like, if this was some specialized probe or containment suit used in alien environments. This "probe" was notable for apparently changing its shape as it rotated.
* Deep Wizardry sealed, forcing them to come clean about being wizards to her parents. At first, the adults think that it's a combination of trickery and hypnosis, so Nita and Kit up the ante by taking them on a trip to the Moon (Nita's younger sister Dairine is not happy about having been left out of the trip). Nita's parents (and eventually Kit's parents) seem to be unusually undisturbed about their children risking their lives to fight evil, but given that the only way to stop them would be to keep them permanently unconscious, that might just be the adults dealing with the hand they've been dealt.
* Deep Wizardry, Tom and Carl tell Kit and Nita not to panic just because they're going to be performing a major magic ritual eighteen thousand feet underwater. This might be more reassuring if their prophetic macaw didn't promptly start screaming "Go ahead! Panic! ... Fear death by water!"
* Deer Avenger and its sequels revolve around a bipedal, talking deer which hunts humans, especially hunters, in order to avenge his fellow deer which have been hunted.
* Deer Hunter 2005 kill the deer instantly, but you won't get the special slow-motion insta-kill bullet cam you get with a lung/heart shot.
* Deer Hunter), where only the final animal you kill gets the special slow-motion insta-kill bullet cam.
* deer — as a veal steak. An insolent cackling steak. He spends most of the short trying to shoot him.
* Deer Me, but returns to her old look. Viana later confides to Woola that she doesn't like the idea of Thomas finding her appealing just when she dolls up.
* Deerskin, has the heroine's father becoming sexually attracted to her after her mother passes away from an illness.
* Deerskin It's not a happy story. It is, however, a beautiful story, in its way.
* deerstalker cap or smoking a calabash pipe., more reason to associate this outfit with the great detective.
* Dee. Shortly after 3Dee's introduction, she would usually only say anything whenever Cupid was involved or during introductions and would tend to sleep the rest of the time. And then
* Dee show the children fitness exercises, and take off his shirt to demonstrate how they worked on himself. Ego stroked, Dennis is convinced to do just that, and Dee goes directly to the fathers to point out the half-naked sex offender hanging around their children.
* DEEsidia Named "BlazBlue: Another Memory". Also has a side series called "BlazBlue: Slice of Life" using the chibi sprites from "Teach Me! Miss Litchi" and "Help Me! Professor Kokonoe!"
* Dee sleeps with over a dozen guys in a short amount of time to try and empower herself by giving them all a low rating on a dating website. She also has a lot of potential baby daddies when the Gang try to find out who got her pregnant in Season 6. Both times, Mac and Charlie are begrudgingly impressed by her prowess.
* Dee Vasquez's blackmail of Jack Hammer, the person who accidentally pushed Manuel during a fight scene onto the fence. Hammer would then attempt to murder Vasquez, who pushed him off onto the exact same fence five years later.
* Deewaar – if he were to change his palm lines, would that alter his fate?
* Deewaar, a corrupt businessman kidnaps union leader Anand's wife and his two sons, and forces him to sign a document with conditions highly unfavourable to the striking workers in exchange for their safe release.
* Deewaar: Anita admits that Vijay's assessment that she's the kind of woman who changes names like others change clothes is correct, but reveals that the one her

parents gave her is "Anita".
* Deewaar begins with Ravi dedicating a prize he got for his services to the police force to his mother Sumitra, and then flashes back to show everything that happened up to that point.
* Deewaar has calm, humble Ravi and emotional, prideful Vijay. This is reflected in the different ways they help others: Ravi turns down a job so a man who needs it more can get it, whereas Vijay beats up the racketeers extorting his fellow dockworkers.
* Deewaar. Most noticeably, he refuses to take money that is thrown at him, demanding instead that it be put directly in his hand.
* Deewaar of a job interview that the position had already been filled by the General Manager's brother-in-law. Afterwards, he tells one of the others who have come for an interview that unless they have a relative who has a high position in the company, they're wasting their time.
* Deewaar, Ravi jumps on top of Vijay's car while chasing him near the end.
* Deewaar: Ravi shoots an escaping young thief in the leg but takes this view of him after finding out all he stole was some bread and goes to the boy's family with groceries out of guilt. The boy's father, however, does not share this view:
* Deewaar skips ahead from the main characters' childhoods to their early adulthoods.
* Deewaar, Sumitra admits to her son Ravi that she always loved his brother Vijay more.
* Deewaar to being able to buy an apartment building as a gift to his mother out of spite (she had worked on its construction, but was fired for breaking a couple of bricks).
* Deewaar: Vijay, although not strictly speaking evil, is a hardened criminal who nevertheless loves his mother very much and wants to give her a nice home and all the other things she deserves.
* Deewaar, Vijay points this out as a reason not to kill Ravi. Of course, it's very possible that the real reason he doesn't want Ravi to be killed is that he cares for his brother.
* Deewaar, Vijay refuses to go into the temple with his mother and brother. When his mother gets ill, he goes there and chews Shiva out for punishing Sumitra for his crimes, before begging the deity to spare her.
* Deewaar, Vijay shows up late, and when he tries to reach out to his mother Sumitra she rebuffs him. Afterwards, he remarks to Anita that his father had been dead for 20 years already and that this was merely when he was finally cremated.
* Deewaar: When Ravi becomes a police officer and Vijay a high-ranking criminal, they end up opposing each other even though they'd both rather not.
* Defacement Insult: To insult you, I'll spray some mean words about you on the wall so you can see them!
* Deface of the Moon: The villain's plan involves vandalizing the moon.
* Deface of the Moon: Vandalizing the moon by carving words or images into it.
* defacing the oldest known formation in the universe, knowing he'd show up there sooner or later or the time she carved words into a Home Box (Like a Black box but one that flies home when the ship crashes) in Old High Gallifreyan, knowing that the Doctor would see it when he visits the museum it ended up in.
* de facto a retrial, since a hung jury generally results in a mistrial, and thus does not fall under the constitutional restrictions against double jeopardy.
* de facto around chapter 50 of the sequel - though she remains this after she balances out a bit.
* de facto but then relinquished political power to the democratically elected leaders of the CTA in 2011.
* de facto command of his own crime family for five years before being imprisoned and subsequently deported. During that time, he more or less created a national syndicate for organized crime and turned the Mafia from what was yet another ethnic crime gang in a city full of them into the organized pervasive group it is known as today.
* de facto command of the city's defense. He relinquishes command to Aragorn at the

first opportunity.
* de facto exceptions to feudalism's ubiquity, being operated more as a small, semi-republican confederation. However it only barely rates a mention, and it only retains its independence on the basis that the Lyrans don't think it's worth the bother to mount an invasion.
* de facto has Podkayne see only her sex as an issue with becoming a captain. The fact she's black doesn't rate a concern.
* de facto, he appears to completely fail to understand Stibbons' multiverse theory ("The Trousers of Time"), before later concisely explaining it to Granny Weatherwax (although he's still a bit hung up on the fact the other Ridcullys never invited him to their weddings). It's unclear if his brother works the same way, since he's never a protagonist.
* de facto impossible to sell official Japanese versions of the game. However, unless it would be legally considered obscene (which only explicit depictions of genitalia would be), the Japanese can get most of these games online (albeit in English for console games, while Steam isn't covered by CERO due to how CERO doesn't regulate PC games, even on Japan's own DL Site).
* de facto independent (or breakaway) country apart from China, legally it refers to itself as the Republic of China, the legal continuation of the pre-Civil War nation and the legitimate government for all Chinese territories. Likewise, the People's Republic claims to be the legitimate government for all Chinese territories, including the island of Taiwan. Strangely, this has kept the peace, as both sides see the other as unruly family members under the same roof. If Taiwan were to declare independence (or more accurately, to renounce their claims to mainland territories), it would mean an end to the "One China" legal fiction both sides have held to, and the PRC would most likely be obliged to invade and take the province now in open rebellion.
* de facto Leader. He's actually appointed The Leader by Mr. Verres once or twice because he has all the necessary characteristics of a levelheaded leader.
* de facto mercenaries, accepting payment to perform some dangerous task or fight an enemy.
* de facto mothers as well. While lost in an Australian wildlife sanctuary, Johnny is temporarily adopted by a female kangaroo (who he names "Kanga-Momma"). This leads to one of his few bouts of competence when a poacher named Boomerang Jack threatens her, leading to Johnny beating the crap out of him.
* de facto nations in the Dusk Court and Dawn Court, and that's not mentioning the powers available to the Blood Queens and what appears to be numerous independent city states, all with their own politics going on.
* de facto. Not helping matters is the fact that as a teacher he seems to be defined by contempt for his students.
* de facto occupation is protecting Mondstadt from the shadows, and for this reason the Church tolerates her behavior. That said, this was never an official part of her job description. She threatened to arrest Paimon and the Traveler for eavesdropping, and even kept a close eye on their activities with Albedo for any signs of a threat to the safety of Mondstadt. Fischl also inadvertently overhears Rosaria in the middle of her enforcement.
* de facto prime minister, the (Jewish) court doctor Hasdai ibn Shapirut. In a subversion, ibn Shapirut put Sancho on a diet — with the king ending up reasonably svelte—and, after two years, took back his throne with the aid of the Moors and Navarre. Double subversion: upon reclaiming his throne, he promptly became fat again.
* de facto. Sometimes there may be explicit pirate bases you can wipe out to curtail their activities.
* de facto Soviet government (although not communist), and using the associated iconography (hammer and sickle, Lenin, etc.) on official monuments and state symbols.
* de facto, wears a conspicuous yellow raincoat (which even gets featured prominently on the promo poster).
* Defamation is a tricky animal because again, it's different in America than

elsewhere. The United States is famous for its "
* De Familie Doorzon: A Dutch comic strip satirizing Dutch society and families mercilessly, especially regarding political correctness.
* Defanged Horrors: We're children! So all those things scares us more than the adults!
* Default Dan DOES have plants that eat Dan. However, rather than damage him, the plants are warp pads that Dan can use.
* Default Dan kill you is lethal: coins, platforms, and cupcake powerups to name a few cause you to instantly explode. On the other hand spines bounce you high, pits drop you from the top of the screen unharmed, and vicious-looking flying enemies serve as harmless (and helpful) platforms.
* Default Dan, you have to save your turtle monster friend from the princess.
* default hawk form to spy on girls changing. Tobias sputters indignantly for a moment, then recovers with a quip that he never uses his powers for evil.
* default plan was "Uhhhh...", which, as his master points out, is not consistently workable in the long run.
* Default Setting Syndrome: A game may have a wide variety of stages, characters, etc., but players stick to the default settings.
* DEFCON 2: Conventional warfare is imminent. Armed Forces ready to deploy and engage in less than 6 hours — this is the highest level ever reached in history.
* DEFCON 3: Increase in force readiness above that required for normal readiness. Air Force ready to mobilize in 15 minutes — this is the first truly "shit is about to get real" phase of the levels. Code Name: ROUND HOUSE
* Defcon 4 incorrectly gave Defcon 4 as the highest state of alert. The fact that they couldn't even be wrong in the usual manner was not the worst thing about this movie.
* DEFCON 4: Increased intelligence watch and strengthened security measures. Code Name:
* DEFCON 5: Lowest state of readiness — this is the normal state of readiness in peacetime. Code name: FADE OUT
* DEFCON board mentioned above, completed with mentions of the megadeath body count each bomb causes and, for those who didn't turn the sound off and can hear it, increasingly depressing music and sick and sobbing people huddled in the bunker in the background, it being a tribute to the movie.
* DEFCON does this with the world divided up into six equal powers. It works for game balance, but makes for frankly odd geopolitics: South America and Africa are united nuclear powers able to field bomber fleets, navies and ICBMs equal to North America or Russia. Then there's the rest-of-the-world Asian bloc, a unified empire of Japan, China, India, Pakistan, both Koreas, the entire Middle East and everything in between.
* DEFCON, even Africa and South America! The only land that sits out the war is Australia and New Zealand.
* Defcon Five: Used to refer to the highest state of alert (it's actually the lowest stage).
* DEFCON is basically a World War III simulator. Typical games last about two or three hours in real time.
* DEFCON: The only hint of what might be really happening is the occasional sound of a woman crying.
* defeatable. Ironically, Kirby's best friend technically is one as well.
* defeat Arianrhod, but attempt to use Valimar's power to keep her alive and recruit her. Like with the Nameless One, Arianrhod is fated to die according to the Black Records, and sure enough, defeating her makes her vulnerable to being ambushed and killed by Rufus.
* Defeat as Backstory: A character suffered a defeat sometime before the main events of the story.
* Defeat as Backstory: I can never forget how you defeated me, and I demand a rematch!
* Defeat by Modesty: An opponent is forced to forfeit the fight after losing their

clothes.
* Defeat by Modesty: An opponent is forced to forfeit the fight once they lose their clothes.
* Defeat by Modesty: An opponent is forced to forfeit the fight or competition because they lost their clothes.
* Defeat Catchphrase: A catchphrase the villain says whenever he or she is defeated.
* defeated and made peace with? You're still gonna have to fight past all her Mooks on the way out.
* Defeated and Trophified: You lose against them, your opponent keeps you as a living trophy of their victory.
* Defeated Spanish Republicans wound up fighting for the armies of various Allied countries after the Spanish Civil War. Some, like Enrique Lister, wound up fighting alongside
* Defeater's debut album, "Travels", tells the story of an unwanted child trying to make his way in the world.
* defeating high-ranked enemy officers is bound to win them more honor among their peers.
* defeating Indra. Indrajit used to spread darkness, make himself invisible and fight people. Lakshmana promptly kills him.
* Defeating the Black Rabite gives the "Obsidian Power" skill, which reduces the MP costs of all spells to zero in battle. But the Black Rabite is Level 83, has the game's strongest skills by far, and is the game's hardest
* Defeating the final boss without having completed a specific earlier quest in
* defeating the Lizardman Chief Olberic's Travel Banter with Ophelia has her give a prayer for the creatures they just killed. As she explains it, "Yes. To the townspeople, they are fearsome monsters that threaten their lives… But they are living creatures for all that, and I would that they rest in peace.”
* Defeating the single most powerful subordinate one of the Emperors has, one so idolized not even his colleagues and brothers thought he could ever be defeated and thought of him as pretty much perfection incarnate, definitely qualifies as this. And yet Luffy tangled with Big Mom, and took down Katakuri, a billion-plus-Belli-bounty nightmare, and none.
* Defeat Means Friendship: A character beats another character at something, leading to them becoming friends.
* Defeat Means Friendship: An opponent becomes friends with the person who defeated them.
* Defeat Means Friendship: Defeating an enemy causes them to become your friend.
* Defeat Means Friendship: Defeating your enemy will turn them into your friend.
* Defeat Means Friendship. Everyone else feels more confident knowing he's in the fight.
* Defeat Means Friendship-moment with him (not an uncommon thing in this series). However, when overhearing Tsukasa talking with Rindou the following week, it turns out that Tsukasa barely remembers the challenge, and has no memory whatsoever of who his poopnent was.
* Defeat Means Friendship: One character defeats the other, and thus, they become friends.
* Defeat Means Menial Labor: A defeated villain is punished with menial labor, often in their (no longer) own place.
* Defeat Means Menial Labor: Where a villain, having been defeated, is reduced to menial labor.
* Defeat Means Menial Labor: Where the villain, upon defeat, is reduced to performing menial labor.
* Defeat Means Playable: Once you defeat a character, you can then play as them.
* Defeat Means Respect: A character gains respect for another after they beat them at something, which can lead to friendship.
* Defeat Means Respect (A villain gains respect for the hero after they defeat them)
* Defeat Means Respect: The hero defeats the villain and earns the latter's

respect.
* defeats Blueblood, a Captain of the Gotei 13, not through brute force but by carefully observing his movements and the workings of his Shikai in order to eventually neutralize him before he can activate his Bankai.
* defeats Voldemort (or more accurately, provokes Voldemort into defeating himself).
* defeat the Chimera that was attacking Mistgun, there were no witnesses and they are at risk of being disbanded if they don't win the tournament.
* defeat the demon from the lullaby, but destroy the Guild Master meeting hall in the process.
* defeat the Italians had been forced to the coast. They eventually managed to "pacify" the colony, but only in the early '30s and after a long, bloody and expensive war of reconquest.
* defeat. These came in handy when the war with the Dominion broke out.
* defected, in the Empire of the Hand after Thrawn had him kidnapped and brought there.
* Defecting for Love: A character switches sides due to falling in love with someone of the other camp.
* Defecting for Love: A character working with the villains defects after falling in love with one of the heroes.
* Defection is the story about Alecia, and Jessica. One knows too much, the other is caught in middle of a web of lies. Everything is progressing towards a collision of tectonic proportions and there is going to be collateral.
* Defection Mission, due to the aforementioned atrocities. As a result, they have declined invites to join Steel Meridian, instead looking to take their own path where they won't need to fight.
* Defection: One of the protagonists once foiled an alien invasion by tricking their scout into falling in love with her, and then simply avoiding the subject of marriage. Then he returns, with an army equipped with planet busters, and a marriage proposal.
* Defection teenagers with intelligence boosting powers attends special classes in a special school for gifted or connected people.
* Defection: The greater effect your superpower has on your mind, the greater the chance is that you are bug-out nuts. The villain Prysim remarks several times that no, she isn't evil - just insane, whether that is just a bad excuse or not is left up to the reader.
* Defection The villain, Prysim, has never been known to show herself in anything less than something capable of keeping up with the A-listers.
* Defection To Paradise had the daughter of a top Russian Official being chased down by Russian assassins, and Frank and Joe trying to help her escape.
* defection to the Autobots and Black Knights, and later death, sees Sky-Byte become the Decepticons' resident soldier with a code of honor.
* Defection: Two heroes have great power, but the prerequisite knowledge of how to actually use magic and control the gaseous part of the periodic table does not come as secondary powers.
* Defective Detective: An investigator with serious personality flaws.
* Defective Detective: Insanity is a possible character flaw of an otherwise fine investigator.
* Defector from Commie Land: A character is in need of escape from a land where a dictatorial regime is ruling.
* Defector from Decadence, a cat that can’t stand the evil ways of his people and choose not to hunt mice again, helping the protagonists against other cats.
* Defector from Decadence: A character leaves their faction due to an inability to tolerate the actions of their former comrades.
* Defector from Decadence - A character switches sides not because they support the views of the new side but because they have become opposed to those of the old side.
* Defector from Decadence: Leaving behind a group out of disgust at their bad ways.
* Defector from Decadence: Someone leaves behind a group they're a part of out of

disgust at their bad ways.
* Defector from Decadence: Someone who switches sides because they can't stomach the behavior of their former allies.
* Defector from Paradise: A character leaves a utopia that may be actual Heaven.
* Defector from Paradise: A character who chooses to defect from a Utopian-like society.
* defect to Edelgard's side, the sight of the person meant to be the reincarnation of her beloved mother siding with the woman she sees as the second coming of Nemesis, the man who slaughtered all of her loved ones over a millennium ago, drives Rhea insane. She becomes obsessed with ripping your heart out of your chest, and by the end of the game has degenerated into a sociopath willing to burn down hundreds of innocent civilians just to make it easier to kill you.
* defect to the Rebel Alliance. Some had to stay behind to ensure that they escaped. They would have been killed by Vader for it had he not been forced to return to the Death Star to stop the Rebel forces from attacking the thermal exhaust port.
* defence. In a fight, Tai Chi targets the weak spots of an opponent, or manipulating their strength against them. It even supposedly has health benefits, calming the mind and body, whilst sharpening precision.
* defence in depth. Instead of trying to stop the enemy at the frontline, one holds back or retreats to force the enemy to stretch their forces thin, then counterattack the now more-vulnerable enemy.
* Defence Of The Realm. Vernon's editor tells Vernon he should tell MP Dennis Markham about the story that's going to appear about him in the newspaper the next day, so Markham doesn't have to read about it first. Vernon is not happy about this but goes along.
* defend a village against a rampaging horde of kythons. This was not the worst thing in the campaign.
* Defend CommandA command that lets you take less damage, but you don't get to do anything else in the meantime.
* defended himself against a first-degree murder charge and managed to get an acquittal. He previously refused a proposition from his former defense attorney to plead guilty for second-degree murder.
* defended the Skokie Nazis. Bonus Points: The head of the ACLU at the time was not only Jewish, but a Holocaust Survivor and fully supported their case.
* Defender, Kris and Jack plan and execute their wedding in about four hours while the king is revising orders that would place them in the same chain of command. Kris is willing to call it off in deference to regs right up until "speak now or forever hold your peace".
* Defender namesake. Some players find the unusual silence rather disturbing.
* Defender of the Crown: Most early versions of the game came on two disks.
* Defender of the Crown with his country. Cooler heads prevail in all three cases.
* Defender, once all the humanoids have been abducted and converted into mutants. If the player can survive until the next wave that's a multiple of five, the planet is restored.
* Defender, or not attacking. Rise of the Eldrazi gave a lot of creatures with defender that count creatures with defender.
* Defenders (2021): Doctor Strange casts the Cantrips of the Onyx King, which disables all magic and any other power not held within the user's body for 30 seconds.
* Defenders' Advantage—it's commonly accepted that to take a walled city or castle (which Redwall Abbey pretty much is) using medieval weaponry, the attackers need to outnumber the defenders by at least ten to one.
* Defenders and Corruptors have mostly the same powers with the main difference being that Defenders have stronger enemy debuffing and team buffing/healing powers while Corruptors have stronger damage output that scales up as enemy health gets lower.
* Defenders. However, once every character with testosterone had got the hots for her, she discovered that she could just as easily coalesce from cloud form into a

male body: and did, to general consternation.
* Defenders of Dynatron City Cola had turned every citizen into a superhero.
* Defenders of Dynatron City was a tie-in to an NES game and a comic book series in an effort to make a new superhero franchise. Despite the ambition, the show went nowhere beyond the pilot, the comic only lasted six issues, and the NES game tanked commercially and critically.
* Defenders of Peace to survive. While village leader Tee Watt Kaa admits they owe the Jedi their thanks he can't help but wonder "at what cost?" as Republic ships appear in the sky.
* Defenders of Stan brother, Ted, and the other is his brother's evil robot clone. Stan says, "I love you, Ted." The robot clone says that he loves him too while his brother laughs and calls him gay.
* Defenders of the Earth and lashed out because he was afraid of being abandoned. In the end, Mandrake (disguised as Starboy's creator) helps Starboy to understand that, if he wants to gain the friendship of others, he must stop using his powers destructively and start using them to help people.
* Defenders of the Earth and teenage son Lothar Jr. have the looks, but they're very much on the side of good otherwise.
* Defenders of the Earth and using them to create fake news footage in order to convince the Ilyrians, a race of staunch pacifists, that the Defenders are a terrorist organisation. As a result, the Defenders are put on trial, but Rick, LJ and Jedda (along with Kisa) manage to escape and head for Ice Station Earth, where they find Ming's androids. Having obtained proof that Ming faked the evidence he presented to the Ilyrians, they return to the trial, arriving just in time to prevent their elders from being banished to a distant galaxy. (Though Mandrake appears to have been banished already, he's actually casting one of his illusions.)
* Defenders of the Earth applies to the Defenders, he survives. Of the five Defenders who set out to rescue Jedda, only Rick and LJ succeed in reaching the chamber where she's being held.
* Defenders of the Earth, but, whenever Kshin needs help with something, the Book's pages change to provide him with the information he needs. In the end, it turns out that the Book is really a being from another dimension who has been exiled to Earth.
* Defenders of the Earth comic strips, who were as white as the newspaper they were printed on.)
* Defenders of the Earth episode "A Demon in His Pocket" (in which Kshin disobeys an order not to touch Mandrake's sorcery books, then has to confess when the demon he summons in a misguided attempt to "show" the school bullies runs amok in Central City) ends with the following exchange:
* Defenders of the Earth episode "A Demon in His Pocket", Kshin turns to Mandrake's collection of sorcery books (which he is forbidden to touch) in the hope of finding a spell he can use on the school bullies. Later, Mandrake comes into the library to check on Kshin, but Zuffy delays him long enough for Kshin to put the sorcery book he was reading back on its shelf, find the scroll containing the spell for summoning the titular demon and grab another book at random. The book in question is about "Wallpapering your Kitchen".
* Defenders of the Earth episode "Terror in Time" is another example. It takes the form of an amorphous purple ooze which the Phantom describes as "a parasite that feeds on living flesh", seconds after Mandrake has been attacked by the mutant. Mandrake spends most of the episode with part of the mutant attached to his arm and, while his life is never in any immediate danger - his magical powers also seem unaffected - it is clear that the mutant is weakening him; he struggles to climb the cliff to Warlock's castle even with Lothar's help.
* Defenders of the Earth episode "The Carnival of Doctor Kalihari", where the rightful owners of the titular carnival are an honest, law-abiding couple. However, the carnival has been hijacked by conman Doctor Kalihari and his stooges, who have turned it into a scam, complete with dodgy sideshows. The Defenders (four of whom are exposed to a shrinking potion, meaning a large portion of the episode is spent trying to obtain the antidote before they shrink away to nothing) eventually drive

the crooks out and are rewarded with lifetime passes.
* Defenders of the Earth episode "The Lost Jewels of Tibet", Mandrake meets up with a female explorer named Atascadero, who is clearly an old flame of his; the interactions between the two characters suggest that they still have feelings for each other. However, when (at the end of the episode) Atascadero asks Mandrake if he would like to go on "another mad adventure" with her, he tells her that, while he would like to join her, his sense of duty orders him to stay with the Defenders. After this, Atascadero is neither seen nor mentioned again.
* Defenders of the Earth episode "The Mind Warriors", Ming hacks into the Defenders' Battle Simulation computer and hijacks the haunted house simulation which Kshin has created. Having lost control of the simulation, Kshin goes to warn Flash, Mandrake, the Phantom and Lothar (the Defenders inside the simulation) only to become trapped himself. Eventually, finding that the computer won't shut off, Rick, LJ and Jedda are forced to wreck it in order to save their fellow Defenders. For once, this actually works.
* Defenders of the Earth features several guest antagonists, the first to appear being Shogoth from "A Demon in His Pocket". A common plot device throughout the series involves Ming trying to use the Monster/Villain of the Week to conquer the Earth and/or eliminate the Defenders.
* Defenders of the Earth, Flash has Garax at his mercy, but declines to shoot him, saying:
* Defenders of the Earth has several episodes where one or more of the regular characters are absent. Only Rick appears in all sixty-five episodes, though he is relegated to a cameo role on a couple of occasions.
* Defenders of the Earth has three five-part story arcs among its sixty-five episodes:
* Defenders of the Earth has two episodes ("The Evil of Doctor Dark" and "The Return of Doctor Dark") whose plots revolve around the search for the three pieces of the Orb of Konos which, when fully assembled, has the power to grant immortality.
* Defenders of the Earth. He does occasionally help to save the day, though.
* Defenders of the Earth. However, Mandrake at least seems to share Ming's sentiments about the noise:
* Defenders of the Earth includes two Team Pets. Kisa is a black panther which Jedda has raised from a cub. Zuffy is a zuffoid, a small bipedal creature native to the planet Mongo; he becomes Kshin's constant companion.
* Defenders of the Earth. In his action figure from the toyline, it says he's a ninja from the Caribbean and since Lothar has a son that trains under him, it's likely Lothar Jr.'s a ninja as well.
* Defenders of the Earth. In most cases, it's Kshin (the youngest of the Defenders) and his alien companion, Zuffy, who stow away. However, in "The Would-be Defender", Earl Sump, a young wannabe superhero spending the day with the Defenders, smuggles himself onto Flash's ship and ends up endangering both himself and Flash.
* Defenders of the Earth involve the Defenders travelling to planets outside Earth's solar system and back in a matter of hours. However, no other human characters in the series seem to be able to do this, suggesting that the Defenders may be using borrowed alien tech.
* Defenders of the Earth is another example of a series which often combines elements of fantasy and science fiction. The extent to which this happens varies from episode to episode. Some are very much rooted in science fiction, though most of these still contain some fantasy elements. With others, such as "The Carnival of Doctor Kalihari" or "Dracula's Potion", the fantasy element dominates.
* Defenders of the Earth, Mandrake (age unknown but probably in his mid to late thirties or thereabouts) and Kshin (a pre-teen) have this type of relationship. "The Adoption of Kshin", an episode from towards the end of the series, explores how the two of them met and ends with Mandrake formally adopting his young protege.
* Defenders of the Earth, Mandrake owns a large collection of sorcery books, which are off-limits to Kshin and, by implication, the rest of the Defenders apart from Mandrake himself. The plot of the third episode in the series involves Kshin

disobeying this rule in a misguided attempt to teach a gang of bullies a lesson.
* Defenders of the Earth, Mandrake shows the boy a vision of what could happen to him if he continues to drink; in the vision, Kshin (aged up to the same age as Rick, LJ, and Jedda) is killed in a drunk driving accident. Afterwards, Mandrake tells Kshin that:
* Defenders of the Earth, the Phantom frequently calls on "The Power of 10 Tigers" before performing a feat of great strength.
* Defenders of the Earth turns all the Defenders except Mandrake and Kshin into statues.
* Defenders of the Earth when active, at which point Flash would just start flying into anything and everything in sight.
* Defenders of the Universe, crossing galactic distances isn't much of a chore. The Lions can fly to the edge of the solar system in seconds, while Gems like Lapis can do so in days. The Castle of Lions's teladuv systems can transport the Paladins to anywhere in the universe almost instantaneously.
* Defenders of the Universe, many of the story-lines are either combined or shortened. For example, the quests for the Green and Yellow Lion are combined with the Olkari and Balmera stories respectively, as the lions are located on those planets instead.
* Defenders of the Universe state of Limbo, the Komar blast completely drains them of Quintessence (i.e. their life-force), rendering their gems as lifeless chunks of rock. When they're fully drained, they're gone forever.
* Defenders of the Universe, the Galra Empire is at odds with the Diamond Authority. Both sides are genocidal conquerors who could care less about the lives of others and the civilizations they've ruined, and they frequently kill each other when they encounter, with Gem soldiers invading Galra occupied worlds and Galra wiping out Homeworld colonies.
* Defender's Quest) dies before he does. Either way, when he dies, so does the magic. (There are hints of other magic in the world, such as where dragons come from, but those are far from where the game takes place.)
* Defenders surrounding a planet with orbital battlestations defy the trope since they know people could just "go around" if said stations are merely arranged in a ring. Instead, they're arranged in a sphere around the whole planet.
* Defenders. They spent a few days "renewing acquaintances" before he had to tell her what he'd done.
* Defender. The resource was humans, the abduction of which allowed the enemy to create dangerous mutant ships.
* Defender was an early video game example. The player controls a fighter craft in an effort to protect the humanoids of the planet from an All-Out Attack. There may be a small part of Infiltration if the lander and mutant enemies are any indication.
* defending himself. His claim is that he was insane when he committed the crimes, but now is normal thanks to medication, so it's not as ludicrous as it first seems. He is a paranoid schizophrenic, leading to him becoming homeless and murdering people due to his delusions. Before, however, he earned a law degree, and is practicing (while defending himself) for the first time.
* defending his village from an evil dragon called the Red Death. Not only does his prosthetic leg match the prosthetic tail fin he built for Toothless (making them even), but it can be seen as a badge of honor for defending his people and wears it proudly.
* Defending Jacob: Leonard Patz is coerced into confessing he murdered Ben to clear Jacob.
* Defending Jacob: Leonard Patz is strangled, then made to look like he hung himself.
* defending the civil liberties of Christians in regards to the free exercise of their beliefs). The Thomas Moore Law Center is the Catholic alternative to ACLU and ACLJ in turn.
* defending the gates of Reality itself, to prevent the cessation of all Existence.
* Defending The Guilty, Danielle and Liam's disastrous attempts to backstab Pia via

a Twitter account leaking "secrets" appear to be a one-episode joke, as they only know one other secret, that Will has kissed a juror. It comes back dramatically close to the end of Series 1 when Will's long-suffering and suspicious girlfriend happens across the Twitter account and learns the truth.
* Defending Your Life. If they fail, they get reincarnated to try life again. Apparently, the only way to succeed is to live completely without fear.
* Defending Your Life is the fact Daniel is told he's not on trial, but he's being tried.
* Defending Your Life romantic lead Julia mentions dying by tripping over a lounge chair and drowning in the pool. After not only having been a very accomplished swimmer, but also lived adventurously and risked her life heroically more than once (she's shown rescuing her kids from a burning building, only to run back inside to get the dog). She finds the irony frustrating.
* defend — the first you see of Furio Tigre is in the chapter intro where "Phoenix" loses the case... and he's rendered as completely indistinguishable from the real Phoenix. The skin colour can be explained away as being a fake spray tan that Furio just didn't put on that day, but it's pretty much stated that he made no attempt whatsoever to hide the accent.
* Defendor plays Kat Debrofkowitz, but her real name is Katherine Litwack while the character's full name is Katerina.
* defend the US against the Soviet Union became Soviet leader in 1985 tensions between the USA and USSR started to diminish.
* Defenestrate and Berate: After breaking up with someone, a character throws all that person's belongings out a second-floor or higher window.
* Defenestrate and Berate: A spouse throws their significant other's stuff from their home and tells them off for good measure. Usually because they're garbage of a human being and a cheating bastard/bitch. They're a sign of the stuffs "weighing" the person, and thus the act lifts the weights off them.
* Defenestrate and Berate: The rare times when the heroine comes out on top against her evil husband, this is sure to happen.
* Defenestrate and Berate: Throwing out or destroying your ex-lover's belongings.
* Defenestrations in Prague in the past 600 years, Though there wasn't such a thing as a Czech 'nation' at the time, people of the present day nation-state of the Czech Republic often consider Defenestration their nation's National Sport. Apparently, Czechs just don't feel it's a proper revolution until somebody gets thrown out a window. Political protests have been known to feature their targets being defenestrated in effigy.
* "Defenestration: The Movie" of compiled Defenestrations and Window Jumps.
* Defense Attorneys are a non-violent and non-criminal variation of this trope. Lawyers can collect evidence to prove a person's innocence without the defendant having to do it themselves while on the run from the law. Many examples of this trope would be considered an
* Defense contractors and other firms handling sensitive or classified data don't beat around the bush at all. They will put up conspicuous workplace posters that say, in effect, "If she's a 10 and you're a 2, be careful."
* Defense Devil. The protagonist's client, a high school girl named Nami, has just came out of a small pond she fell into and is berating herself for her inability to remember the circumstances of her death. He gives a rousing speech that unintentionally ends with the line "The next time you make that face, I'll spank that cute wet butt of yours".
* Defense Grid: The Awakening, but he can't seem to get raspberries off his mind.
* Defense Grid: The Awakening missed them! On a similar note, while usually not as disliked as flyers, stealth units aren't very popular either, for much the same reasons- they require the use of specific detector towers, upgrades or abilities to deal with which you would otherwise have no real reason to use and can feel like a waste of resources, unless they also have a secondary function.
* Defense Grid: The Awakening the green laser would be the strongest and the red would be the weakest.
* defense in court, and trying to end the song. This prompts the narrator to make

Cash's life better (including "his first child will become President").
* Defenseless non-combat ships include science ships to survey systems and research anomalies, construction ships to build mining stations and outposts to claim systems, colony ships to bring settlers to new worlds, and transports to shuttle armies to their next conquest.
* Defensemen in Hockey are not the fastest guys on the rink, but they are strong and massive enough to violently check opposing forwards. The majority of them also have very strong slap-shots, as demonstrated by Zdeno Chara and Brent Burns.
* Defense of the Ancients: All-Stars has Roshan, extremely hard to defeat single-handedly, but defeating it will yield a good boon to the team that defeated it.
* Defense of the Ancients: All-Stars makes the Fountain fully invulnerable to prevent these shenanigans.
* Defense of the Ancients: All-Stars merely have a Suicide Attack to fall back on if they don't get the time to lay down traps, but it deals massive damage to compensate. To make this skill less painful to use on the long term, it also halves their respawn time and gives them the kill experience reward if their attack kills. It was replaced with a skill that launches them in the air and land with a huge explosion and makes them halfway dead, but can still be lethal.
* Defense of the Ancients: All-Stars was released, finally giving the game its own ground to stand on, not to mention it caught the interest of people completely unfamiliar with the genre simply because it was developed by Valve.
* Defense of the Ancients: All-Stars. With as much as 14 Phantom Lancers on the map, things can get hectic when you're facing an army of him. Properly decked out, Phantom Lancer players will be surprised that they killed someone without knowing simply because they left a stray illusion on the map.
* Defense of the Ancients are tree-themed, Rooftrellen and The Prophet. Rooftrellen has abilities that make teammates invisible when they are near trees, plant trees that give sight, wrap allies in protective regenerative plants, and summon vines to disable all enemies in an area, while The Prophet can teleport to any tree on the map, summon treants, and snare an enemy in a ring of trees.
* Defense of the Ancients. For what is supposedly a large-scale final battle between the Sentinel and the Scourge, each side only fields a maximum of five Heroes and an oddly small number of Mooks.
* Defense of the Ancients game, right down to copying the map out of it (and frequently, including many heroes which are extremely similar to the heroes present in the original game), but the genre has since expanded to include games such as Awesomenauts, which are certainly in the same genre and yet decidedly not clones.
* Defense of the Ancients has this as one of his powers—he uses a short-range super speed move to end up right behind his target and stab said enemy in the back. The Blink Dagger item gives this ability to anyone who buys it.
* Defense of the Ancients is a rather ninja-ish hero who specializes in tracking the enemy heroes and assassinating them. Treating his targets as his bounties, his Ultimate lets him net an even bigger amount of gold in case he killed a tracked hero, which he shares with his nearby teammates if able.
* Defense of the Ancients It's safe to say they'll never agree with anything.
* Defense of the Ancients, Mogul Khan is better known as Axe, and Axe uses his axe to counter-attack blows with a quick whirl of his axe or execute a low-health enemy, even through effects that can normally negate death.
* Defense of the Ancients most every heal doubles as a damaging or damage increasing ability.
* Defense of the Ancients players in clans have with "pub" players (those that wander into spontaneous Battle.Net sessions) is that, while each player may have a certain theoretical knowledge of the strategies meant for each Hero, in practice these players rarely will coordinate to choose a lineup of Heroes that synergise well, lowering the effectiveness of the team. In addition, a certain amount of psychology and "mindgaming" is a tool that enables some players to outfight their enemies even when the odds are against them.
* Defense of the Ancients, Rhasta the Shadow Shaman has an ability which turns his target into a chicken. He can get pretty excited over it.

* Defense of the Ancients shows this: Early-/mid-game gankers and mages have strong spells that can kill enemies easily at first, but the damage is fixed and therefore as the enemy builds health, the spells become less powerful, plus they usually lack passives that scale well with items. Lategame carries are weak at first both in health and damage, but become very powerful with farming and usually have passives that scale with their growth. You do have some semicarries who can both gank and carry, but they can't do either as well as a hero dedicated to either archetype. Even within spells there are tradeoffs; for example ranged fire-and-forget (almost) sure-hit stuns like Storm Bolt have a low stun time compared to, say, Shackles that needs the user to stand still and channel, leaving himself open, or Elune's Arrow where the target needs to be led a certain distance in order to achieve a long stun and the projectile is rather easily dodged.
* Defense of the Ancients, some of the heroes should be nearly invincible, and most of them should all already have tons (in some cases, literally eons) of battle experience. Yet they all start at level 1 with almost no spells available.
* Defense of the Ancients), which will increase the size and damage of the snowball when it is sent rolling towards the enemies.
* Defense of the Ancients. While he's a very potent healer, his primary means of helping the team is using the same knowledge to conjure stunning projectiles and drastically amplify the damage dealt to enemies.
* Defense of the Ancients with its three lanes of five melee mooks and one ranged mook each, which could increase to two ranged mooks and one siege unit.
* Defense of the Great Wall in 1933. One of several battles in history at or around the Great Wall of China (hardly a surprise, given its purpose), but the only one with the Wall itself in the battle's name.
* Defense Professors have had such a terrible record over the last decades that
* defenses are penetrated, it is not uncommon to have them hammered into burning hulks within seconds, given the amounts of firepower that get thrown around in space combat.
* Defense Scheme No. 1 formed in 1930) was largely academic in nature, though War Plan Red's declassification in 1974 caused a stir in US-Canadian relations.
* Defensive abilities, strategies, builds, classes, or playstyles, especially in competitive games and in
* defensive barrier that is capable of deflecting attacks from any angle, but using it well requires a keen mind that can quickly calculate where to set up the barrier around the frame. As a result, the Shinkiro is only truly effective with Lelouch, a prodigal genius, at the helm.
* Defensive Feint Trap — that the station was incomplete and vulnerable. Instead, not only was the station fully operational, but the arriving Rebels were ambushed by the Imperial fleet behind Endor.
* defensive feint traps, the Get pursued their prey anyway, until the tribe fell to the Wyrm.
* Defensive Feint Trap that suckered Foreman into using up all his energy, while Ali stayed relatively undamaged by using the slack of the ropes to dissipate the punches' power.
* defensive gunners. After three of the planes strafe the train in classic Hollywood fashion to little productive effect, the fourth pilot comes at the train low and head-on, focusing all of his fire into the locomotive, trashing the train.
* defensive gunners, radio operators, flight engineers, and other technician specialties, but generally only on bombers. Single- or two-seat fighters won't have those crew positions. Meanwhile, the ground crews will be made up almost entirely of enlisted airmen.
* defensive one. As Franky put it, if there was a chance the World Government or some other rogue group could remake one of the superweapons, the Pluton plans would be their countermeasure. However, with Spandam having learned of their existence and going after Frank and Robin, he proceeds to burn the plans since there was no point in having them around if people knew. Instead, he bets it all on the Straw Hats rescuing Robin and thus leaving Spandam and the World Government without them.
* defensive side because France and Britain promised a better deal in case of

victory. After said victory a certain Benito Mussolini exploited the sense of some Italians of a "mutilated victory" consisting in the Allies not delivering on their supposed promises of 1915. So Italy ultimately joined forces with Nazi Germany, only to change sides again when Mussolini was removed from power. It ended giving Italy no major loss of pre-war territory and they even held onto some of their colonies after 1945. Of course Piedmont-Sardinia, the state that would gobble up the rest of the Italian peninsula in the 19th century did similar things, allying as the need arose with France to beat the Austrians, with revolutionary movements to unify Italy, with reactionaries to crush "too left wing" movements (like Democracy and Republicanism) and ultimately (de facto at least) with Prussia against France. If there was one thing constant about Piedmont-Sardinia's / Italy's foreign politics between 1848 and 1948, it was that whoever tried to ally with them usually got screwed, one way or another.
* deffkopta's inventor, Kog da Flymek, "Wot's faster than a warbuggy, more killy than a warbike, and flies through da air like a bird? I got no bleedin' idea, but I'm gonna find out."
* Deff Skwadron being a smartboy actually manages to sound high(er)-class than any other ork.
* Deff Skwadron comic, centers around two Ork Waaaaghs! fighting each other pretty much forever, and that's just how they like it — they make it a point of holding back when they're about to defeat their foes to ensure they won't find themselves without someone to fight.
* Deff Skwadron: Having shot the loading chains off a bus-sized artillery shell, causing it to plummet explosively back into the magazine, our heroes have this exchange:
* Deff Skwadron) it makes him immune to death by squig: he simply doesn't have enough fleshy parts left for the vicious little bastards to bite.
* Deff Skwadron: Killboy has one built into his bionik arm, which he uses to hijack a plane (while it's still flying).
* Deff Skwadron: Quoth Killboy: "Beg pardon, sir, but you couldn't 'elp me with the take-off? Lost one of me arms in the crash again, an' I'm 'avin trouble usin' all the controls..."
* Deff Skwadron side on the way back. Both sides are already at open war, just... fuck those guys!
* Deff Skwadron, when the squad commander of deff skwadron chastises one of his gunners when he baulks at firing into a pitched dogfight where telling who is on which side is impossible. Essentially it boils down to "shoot at everything, and if you hit anything it must obviously belong to the enemy."
* Defiance a Jew." Cue the soldier getting an immediate dope slap and an exasperated glare from his CO.
* Defiance and its TV series tie-in has quite an open area for stories set in the world. Including the history detailing between the events of the Votanis Collective arriving at Earth to the end of the show, as well as covering the past events leading up to the Pale Wars, as well as those involved in it and those involved in it. This also opens up for players who continue to play the game to tell stories with their Arkhunter characters and their adventures in the New Frontier. And with the cancellation of the show, it leaves open room for future stories set in the town of Defiance after Nolan and Doc Yewll's departure with the Omec.
* Defiance and the end of the Pale Wars, the Votanis Collective personifies this dream, while remaining the enemy of the Earth Republic.
* Defiance: Angel never got to properly experience this stage, since Darla killed all the gypsies who re-ensouled him. He instead took it out on himself during his self-imposed 100 year exile from humanity and vampirekind. Angelus, however, did get to kill Jenny Calendar and an older male relative, both descendants of the gypsies who re-ensouled him.
* Defiance, a race the others deliberately left behind to die because of their cannibalistic tendencies. One of their ships survives and manages to track the Ark fleet to Earth.
* Defiance are in general heavily armored, but the different versions all have some

weak spot. The smallest skitterlings die pretty easily, but the Warrior, the next size up has only the inside of its mouth and it only opens that when it's about to attack. Matriarchs have three; the mouth, their chest when they rear up to do a smash attack, and once they've done a roll-charge attack and are recovering, vanes open and temporarily expose a weak spot at the rear. The sound your gun makes when you're hitting one of these changes from the usual pings of ricocheting bullets to a sawtoothed grinding noise to let you know you've got the right place.
* Defiance as this trope: The Syrian Civil War is far from the first war to displace a large number of war refugees, and nor will it be the last.
* Defiance: Before settling in Defiance, Nolan and Irisa were trying to make their way to Antarctica, which has apparently been terraformed into a tropical paradise. Everyone tells Nolan it's a pipe dream, and given the current state of the world that we see, it's likely that very few people have been there to confirm it. In general, however, ark hunters are trying to make enough money to get to Antarctica, if the tie-in game is to be believed.
* Defiance brings us a variety of old records mixed in with some Votan music. The pilot episode also shows us how the Votan races dance (very slowly, even to fast-paced music). They actually make fun of humans for dancing to the beat, although Alak Tarr (basically, the show's version of a second-generation immigrant) happens to be a huge fan of both old Earth tunes and dancing, being completely ecstatic when a bus brings a box of records to Defiance.
* Defiance Castithans are born into one of several "liros". The system is apparently highly complex but barely explained. And it was somewhat fragmented by the arrival on earth, with many of the younger generation (at least in Defiance) showing little regard for it. Crime boss Datak Tarr was born into a low-ranking liro while his wife Stahma was a bit higher up. It is mentioned that a Castithan can change their liro, usually by marriage (the lower-ranked partner is boosted to the same liro as the higher-ranked).
* Defiance, Christie and Alec bump their foreheads when Alec proposes.
* Defiance, climbs up from behind the tank, guns down the German tank commander, and drops a grenade into the hatch.
* Defiance, confronting Moebius after self-resurrecting sans his vampiric heart. Moebius tries to paralyze Kain, only to have his hand forcibly placed on Kain's chest. Kain follows with "I always was considered heartless."
* Defiance: Despite the show being set in the (former) St. Louis (majority Black city), only a few characters are actually Black or otherwise people of color, though the Native American McCauley family are prominent (they also avert common stereotypes by being the rich owners of a mine). On the Votan side, the Sensoth race only have one character in the show, with a minor role.
* Defiance equipment that spawns hybrid monstrosities such as Hellbugs.
* Defiance had a somewhat unintentional example, when the Votan Ark ships were destroyed the terraforming equipment they were carrying fell to Earth and malfunctioned, creating deadly hybrid creatures such as Hellbugs and those bear-spider-armadillo things.
* Defiance has an unusual example where the prank is deadly for the prankster- a young man is persuaded to fire a paintball gun at the incumbent mayor during a mayoral debate, not knowing that an anonymous tip has been made of a plan to assassinate the mayor.
* Defiance, has become a Buried City due to malfunctioning alien terraforming technology being accidentally released, causing massive cataclysm across the planet Earth. The locals fled and it is uninhabited, though almost perfectly preserved. The town of Defiance was built on top of the city as a mining outpost to dig for the resources—and the alien technology—it held.
* Defiance has sex with Tommy while recording the whole thing on a camera (the same camera she uses for her propaganda videos). Tommy is a bit worried, but Berlin points out that there's no risk, since the Internet hasn't been around in decades. When Tommy claims that Berlin's boss (the town mayor) could see it, she brushes him off, explaining that Pottinger only cares out his own looks, not Berlin's naked ass (she is glad that Tommy cares about the latter, though).

* Defiance has "shtako", an Irathient word used in the same contexts as "shit", although other races, including humans, adopt it. Occasionally, though, it's used in contexts where the f-word would be more appropriate, such as "you shtako coward!"
* Defiance has the Infector weapon class. They shoot needles into your enemies, and when enough of them hit the poor sod, a bug bursts out of them. The exact mechanics of it do vary from one type of infector to another - some of them (e.g. the Canker variant) spawn bugs only upon the target's death, and some don't spawn bugs at all. There's also the various Hellbug event weapons, many of which also spawn bugs.
* Defiance Indogenes, a species of cyborgs, have a faint hexagon pattern on their skin.
* Defiance introduces Cai, an Irathient (alien race from another planet) Jew. He was orphaned as a baby and raised by a human Jewish couple. He is a practicing Jew and works as a lawyer.
* Defiance: Irisa is both shown and stated to have a fondness "for edged weapons".
* Defiance is a cold hearted bastard. When his younger brother was sobbing helplessly over the recent deaths of their parents, Zus shook him roughly and shouted at him to stop crying. The one heartwrenching moment when his armor cracks comes after he learns that the wife and son he'd left in a then-safe city had been killed by the Germans.
* Defiance is the integration of human and Votan cultures into a single whole. As a consequence there are several examples of individuals on one side developing an affinity for some aspect of the art or culture of the other. The most prominent example is Alak Tarr, the Castithan DJ, who spins Earth oldies every afternoon.
* Defiance. It went... badly. The Votan arrived as desperate refugees, and relations between them and us were always strained, and then one of their ambassadors was assassinated on live TV. The resulting wars reduced the planet to mostly 19th century infrastructure levels (give or take some alien gizmos).
* Defiance, Liberata, and Sensoths are all from Irath, and since the former two were conquered by the Castis they presumably had significant populations on other planets in the system.
* Defiance made a lot of pie-in-the-sky promises that unfortunately they were not able to implement because they were under a deadline to launch the game at the same exact moment the show began broadcasting. The developers had been open about this happening, and tried to add the promised features and content to the game as quickly as they could through updates and downloadable content.
* Defiance, Nolan manages to shut down the Bioman by punching his lower back (where this model's off switch is located). Datak, however, claims that Nolan cheated and demands his winnings back. Being nice, though, he leaves Nolan a small percentage of it.
* Defiance online game feature a giant monster with a lamprey mouth on the top of its body.
* Defiance partially-terraformed Earth with humans and the Votan races attempting to coexist. The protagonist, Nolan, arrives to a town called Defiance built atop the ruins of St. Louis (the Arch is still there). The ending of the pilot reveals that Nolan was the boy, and he was born and raised in St. Louis.
* Defiance pilot shows the Votan Ark fleet descending from orbit. The shots focus on a teenage boy in a park looking up as a huge ship breaks through the cloud cover. The story then cuts to 33 years later. The ending of the pilot flashes back to the arrival scene to reveal that it took place in St. Louis (the titular town stands on the ruins of that city), and that the boy was the protagonist Nolan, who finally returns home.
* Defiance plays with this in a single episode of Season 1 and pretty much all of Season 2. Anyone resurrected by Votan nanotechnology tends to become a dangerous religious fanatic under the control of insane AI.
* Defiance Rafe McCawley avoids telling people that his family used to own a pet food company because those who recognize the brand almost always insist on singing the company's catchy jingle.
* Defiance species, being massive hulking humanoids with blue skin, no hair,

numbers etched on their chests, and an "off-switch" that knocks them out until someone electrocutes them.
* Defiance: Sukar. It's mostly nanomachines, but he's convinced that his gods won't let him die while he and the other chosen ones have a duty to fulfill.
* Defiance's Votan population as they're trying to integrate into a mostly human society. They do often speak their own languages as well.
* Defiance territory. The number of coincidences required for this sequence of events to play out normally are so staggeringly high that when Amanda accuses Pottinger of having them set up to die in order to send a message, he doesn't even try to defend himself. He then agrees to pardon the surviving brother without so much as an argument, realizing that he may have gone a bit too far.
* Defiance: The Bielski and Soviet Partisans have an uneasy alliance, with the latter not holding up their end very well.
* Defiance: The Bielski Partisans form such a group against German occupation of Belarus, as do the Soviet Partisans also featured in the movie.
* Defiance (the Daniel Craig Holocaust movie) is mostly shot in Eastern Europe relatively close to the area of Belarus where its set. However parts of the movie are also set in rural Manitoba, Canada and local plant life like red willow and Manitoba hardy roses are visible in many shots. Interestingly one of the reason the region was initially settled by a lot of Eastern European immigrants is that it apparently looked a lot like home to them as well.
* Defiance: the Earth Republic presents itself as this, viewing itself as the rightful successor to all pre-Pale Wars human governments. However, there's plenty of the planet that's independent of E-Rep control, not least of all being the Votanis Collective-controlled territory in South and Central America.
* Defiance the Omec found Earth by following broadcasts of Elvis that they picked up when they were around Gliese 581.
* Defiance the seven Votan species originated in the Votanis system, but as far as specific homeworlds go only the Irathients and Gulanee play this one straight (unless one counts the terraformed Castithan colony of Casti). In fact Irath was home to the Liberata and Sensoths too as well as the Irathients. Castithans and Indogenes originated on Daribo and the Volge first showed up on Omec but are supposedly from somewhere else. Additionally, other sources claim that Casti is not a terraformed planet but Irath, after it was conquered by the Castithans, who then renamed it after themselves. Played straight with the Omec, whose original homeworld is called Omec.
* Defiance the Votan terraformed at least one planet in their home system and brought the technology with them to Earth. They decided not to use it when they found that earth was already inhabitable and inhabited but when the Arks were destroyed the equipment they were carrying malfunctioned and created a variety of bizarre hybrid creatures when it crashed.
* Defiance. They also breathe nitrogen and their hair and beards (found on both sexes) are stark white.
* Defiance this apparently happened to Datak's romantic rival. "Accidentally" of course.
* Defiance. Though at least one of the Votan species, the highly patriarchal Castithans, take a dim view of either lesbianism or women cheating on their husbands (it's not entirely clear).
* Defiance; Tommy goes to arrest Irisa, but Nolan talks him out of using handcuffs, saying that Irisa had some really bad experiences with being chained up, and if Tommy tries to put cuffs on her, she will flip out and probably kill him. Since Irisa happens to be a ferocious-looking catgirl, Tommy wisely decides to follow Nolan's advice.
* Defiance vanilla, then they would not appear so colorful in contrast to him.
* Defiance. We do meet a lot of decent Votan characters, but they all seem to be those who've assimilated into Earth culture. The ones who keep their own traditions and customs include ruthless crime lords, fundamentalist cultists, and insane terrorists. That's not to say all humans in the show are saints, mind...
* Defiance, which has five alien races and humans all living in the titular town.

* Defiance, which is about a group of Jewish refugees. As they have gathered more people, they begin training able-bodied people (including women) to fight for survival with weapons taken from the hands of dead Nazis.
* Defiance: While it's never specified if the Votan system had two stars before the stellar collision, one of the songs on the soundtrack mentions "twin suns".
* Defiance with a couple armored cars for support. However, his pogroms and obvious degrading sanity have led the VC to declare him rogue.
* Defiance: Your EGO implant projects a blue flickering light lady into you field of vision to make the interface feel more natural.
* Defiant, as Dragon's partner, gets to wear some of her creations too.
* Defiant as it's being blasted to scrap. He's the last one on the bridge after calling for the crew to abandon ship, and probably the last one off before the Dominion finish the job.
* Defiant), but rather concept art for the Maquis raider (flown by guerrillas revolting against the Federation and using any ship they could get).
* Defiant Captive, despite the fact that his GM powers mean Asuna is incapble of harming him.
* Defiant from the primary universe. From their perspective it's advanced futuristic technology, but to the viewer it's about seeing an original TOS-era Constitution-class starship powering up in all its glory.
* Defiant in "A Call to Arms," when she was constructing the all-important mine field in front of the Wormhole, and thus would have been unable to fight back. Martok played the cavalry a good number of times, actually.
* Defiant in terms of performance, possessing numerous flaws which O'Brien had long since corrected).
* Defiant is hit by a Dominion torpedo, it ends up getting stuck in the hull instead of exploding. When the Karemma trader points out that his people make and sell these weapons to the Dominion, Quark notes that they lack proper quality control. The trader jokes that he should offer a refund on the defective weapon.
* Defiant is the one in command, and his skill and experience (and some backup from the Mirror Bashir and Dax) allow him to pull off what Red Squad would later fail at.
* Defiantly - Rebellious. ("The rival king defiantly overthrew Jeremiah's empire.") This mistake is probably most common because of spellcheckers correcting the misspelling "definately" to "defiantly."
* Defiant on learning that the Founders were ordering the extermination of Cardassian civilians.
* Defiant." Presumably, he walks O'Brien through the rest of the steps.
* Defiant replacing just about everything to make the blasted machine work as it was expected to.
* Defiant requires only a few minutes of sleep a day, and requires very little food. This is stated to be due to his cyborg enhancements, however, not his superpowers.
* Defiant's computer core having been mostly wiped by a computer virus the ship has to be flown with a larger crew than is normally visible, with orders relayed from the bridge all over the ship and characters giving detailed instructions and echoing commands. The resulting cacophony of overlapping voices rather accurately captures what the CIC of a modern warship sounds like.
* Defiant's malfunctions, the bridge will need to stay in contact with Engineering. O'Brien's solution is to put Nog on the bridge with a portable communicator and have him relay any necessary information to and from Engineering, which results in a number of instances of Nog audibly repeating Sisko's orders.
* Defiant Stone Throw: A comparatively weaker character publicly defies a more powerful character, often inspiring others to fight back too.
* Defiant Stone Throw (when done to distract a villain from harming the hero)
* Defiant Strip: Removing your clothes as an act of defiance or protest.
* Defiant's warp core and the wormhole results in Sisko getting caught in subspace, experiencing minutes where the outside experiences decades. The episode revolves around Jake's efforts to figure out what happened and get him back.

* Defiant to rescue Kira from Cardassia Prime. When they're intercepted by a Cardassian ship and about to get busted, Garak hails the Gul captaining it, rattles off a complex military code, orders the Gul to turn back, erase his records and not mention this to anyone...and he does. When Sisko mentions he's impressed, what does Garak say?
* Defiant to the End: A character about to be killed has the gall to insult the person about to kill them.
* Defiant to the End, are treated with suspicion and kept at arm's length.
* Defiant to the End: Even when facing eminent defeat and death, a character remains defiant.
* Defiant to the End: Prisoner fearlessly shows contempt and ridicule toward their captors even when they're about to be killed.
* Defiant to the End: Showing defiance towards your opponent even when it's clear that you can't win.
* Defiant to the End: Võ Thị Sáu pinned a flower to her hair and sang revolutionary songs in prison, on the way, and on the execution grounds itself, right in the face of the firing squad. As she became a mythical local and national figure, records vary on what she actually said.
* Defiant without even thinking about it. Unlike many instances of this trope, however, Kira's knowledge of this would create a rift between them that would take months to heal.
* Defiant Wrestling, but eliminations can also be done via pinfall or submission.
* Defiant Wrestling for his match against Nathan Cruz. It follows the same rules as any regular Iron Man match, but it adds being sent to ringside via throw over the top rope as another scoring method.
* defibrillator). If the muscles of the heart are no longer responding to the electrical system (for example, Pulseless Electrical Activity), or if the electrical system is down (asystole), there's nothing to be gained by shocking the patient.
* deficiencies-style characters who can back that up with solid cross-class combat ability.
* Defictionalisation: A fictional item becomes real vs. a real item is included in a fictional work.
* Defictionalization, detailing some of the various Acme items from the Looney Tunes cartoons.
* Defictionalization. Highlights include Creepy Black, Sonic.exe, Herobrine…
* Defictionalization, in which a warlock takes his heart out of his chest to preserve his youth and life (very Horcrux-like), as well as to prevent himself from the embarrassment of acting lovesick (which is his original intention for his action). He keeps the heart in a little box under his house, and, because the shrivelled, still-alive thing is so cold, it starts growing hair. It has a particularly gory ending.
* Defictionalization is a landmark of early English-language travel writing.
* Defictionalization like this filled with philosophers. The upshot is that they can do things like use their belief in Cartesian duality to do two moves in one round.
* defictionalization of this trope. The inventor read the story "Tom Swift and his Electric Rifle" as a kid and thought that it would make a great stun weapon. The end result was less flashy, but affordable with current technology.
* Defictionalization: The European Space Agency is now testing its Mars lander in, yes, quarries in southern England...
* defictionalized after he strangles Bedelia that shows his skull is full of worms.
* defictionalized although the rules are modified in a few ways, even beyond the obvious limitations of not having flying broomsticks. Bludgers are replaced with dodgeballs, players who are hit must tag their own teams goal posts before returning to play, and the game runs for a set time with the snitch being worth far fewer points. Plus a bunch of specifics about fouls, penalties and such are added.

* Defictionalized tells the story of the McCliverts and the MacBoons, two Wizarding clans who shared an island off Scotland. Legend has it that after a MacBoon killed a McClivert in a drunken duel, the McCliverts transformed all of the MacBoons into ravenous, five-legged hairy beasts, then immediately realized their error when the monstrous MacBoons killed them all. Whether this is true, or the Quintaped is just a natural beast, is unknown, and the island has been quarantined.
* defictionalized) that otherwise stuck closer to the novel, and in 2013 it was the basis for licensed casino slot machines. The 2005 film was the basis for several tie-in video games.
* Defictionalized that significantly modify the Snitch in particular. The Snitch (here a guy in a yellow costume who runs around like a maniac) is only worth 30 points and is released 18 minutes into the game, with the game still ending on capture.
* Defictionalized use of Kate Upton. Its chat system features a real-time translator that supports over 30 languages. Whatever tongue your phone is set to, that's what you'll see everyone's messages in; it's done automatically, and in fact you have to mess with the game's Settings page to turn it off.
* Defictionalized when the bar "Who's On First" opened in New York City — on First Avenue, of course.

* Defied... and then says "to hell with all that" and says that he feels that he needs to be fully honest with Haley if he ever expects a happy ending, even if it gets in the way of some good narrative conflict.
* Defied. A necromancer rejects a perfectly reasonable plan to conquer one of the newly-emerging nations of Axeoth and rule it along with his own kingdom because he doesn't want to become the enemy that the rest of the world unites against.
* Defied. As a member of the Klingon High Council, Ba'wov has full diplomatic immunity, and tries to invoke it to get out of their interrogation by the Department of Temporal Investigations. However, Agent Lucsly had already gotten the Klingon embassy to waive her immunity. Brokosh stops the interrogation by demanding a lawyer.
* Defied, as Fu, the last Guardian of the Miraculous, left Paris to avoid risking being involved with the war or, worse, the Miraculous falling into Nazi hands.

* Defied. Bugs Bunny takes one look at the transformed Elmer and declares: "My eyes can't be playing tricks on me; not with all the carrots I eat."
* Defied by Aimee Mullins; at a TED talk she gave, she describes how she was once going to talk to a class of children and she just knew the grownups were going to hush up the kids and insist they not stare at her
* Defied by Albus Dumbledore, who successfully employed Peter's Parry (overtly turning down a position one knows oneself to be ill-suited for) when offered the post of Minister of Magic. He knew his own character defects, particularly his susceptibility to the temptations of power, and knew that (with apologies to
* Defied by Chico Alvarez. He tried a barefoot gimmick but broke a foot as soon as he stepped in the ring. He came to like shoes a lot and encourage anyone else not wearing them to change their ways.

* Defied by fluff character Adam Smasher. Smasher was a soulless psychopath way before he was cybered up to the gills by Arasaka. Having few human emotions to begin with, and no attachment to the ones he did have, made cybering up to the point of cyberpsychosis and beyond an easy choice.
* Defied by former NFL quarterback Archie Manning. Despite knowing the ins and outs of making it to the NFL (having played himself) and having three sons (Cooper, Peyton, and Eli) with huge potential, he had almost no involvement in his sons' football careers; in fact, as he revealed in a 2005 interview, there was a point in time when Archie thought Eli might not be interested in football, and his immediate reaction was to worry that Eli might be feeling pressured towards football because of his family's association with the game, because that was the exact opposite of what Archie wanted, which was for his sons to choose their own paths (he described his thought process as, "If [Eli] wants to play piano, let's get him a piano"). When the boys reached high school age, Archie and his wife sent them to a prep school in New Orleans with rigorous academic standards and a poor football program because he felt school was more important. Even after the kids became hot college recruits, Archie didn't force them to attend his alma mater Ole Miss and let them choose their schools (though Cooper and Eli picked Ole Miss anyway). Though the college coaches invited him to sit in on games and meetings and discuss offensive strategies, Archie declined and sat in the stands on game day as a regular fan. In the end, Peyton and Eli became NFL quarterbacks with Hall of Fame-worthy careers that surpass their father's, while Cooper may have made it as a wide receiver had it not been for a severe spinal condition that forced him to retire in college (he had to settle for being an extremely successful investment banker and TV sports broadcaster instead).
* Defied by Frank Perconte when Private O'Keefe says his friends call him 'Paddy'. He's pointedly only addressed by his last name (
* Defied by Ginnifer Goodwin, to an extent as she prefers having short hair. So she has it written into her contract that - if a role requires long hair - she'll wear a wig rather than growing it out.
* Defied by Huqin and his thief gang. When they burgle a palace, they don't go anywhere near the treasury; instead, they collect things like fancy clothes, which are usually unguarded and still valuable enough to be more than worthwhile.

* Defied by Rommel and the Normandy landings on D-day. Rommel correctly guessed the general area and type of beaches the allies would try to land on and insisted on having them fortified. It's quite possible that without Rommel the D-day landings would have been opposed by a tiny group of German troops playing football or sleeping in lawn chairs, without any obstacles or bunkers.

* Defied by the mercenary Bronn, who is expected to wear the fancier uniform of the Gold Cloaks. He refuses by noting how impractical it is: the cloak gets in the way of a fight and the uniform and how it stands out either making one a target or impossible for stealth. He sticks with his lighter, everyday armor as his uniform.

* defied episode "The Vault." Ray and Fraser are trapped in a vault with armed robbers outside. The robbers capture Ray's sister Francesca, and call a phone located inside the vault. They inform the heroes that they have Francesca, and Fraser immediately responds by disabling the phone before the robbers have a chance make any demands. Fraser correctly reasons that if the robbers cannot communicate with them, they have no way to threaten them and no reason to harm Francesca.
* Defied: even after Kazuma acknowledges that Megumin and Darkness are clearly love interests, he decides to stop hiding his true (perverted) nature, and continues to sexually harass them as he did before.
* Defied for at least one night by a group of American and German soldiers meeting in the Ardennes forest on Christmas, both seeking shelter from a snowstorm, the elderly German woman who lives there doesn't allow them to fight in any way, and it ends with them singing Christmas carols together, even though they don't understand each other's language. It was made into a movie, titled

* Defied (most of the time) by Sam Vimes, because he knows where breaking the rules it would sometimes be convenient to break would lead. He's seen people go there. He's not going.
* Defied objects, claiming that a thief stealing from thieves is still a thief. Annoyed, Vi and Leif agree to leave Kabbu in the inn next time they would raid the Bandit Hideout.
* Defied on creating porn that would be both filmed and viewed through Google Glass, perfectly simulating the POV of a man having sex, but Google shot them down and preemptively banned all porn apps from the App Store.
* Defied. One of the more charitable interpretations of the actions of the Jewish High Priesthood is that they crucified Jesus to prevent Him from either inadvertently or intentionally causing trouble with Israel's Roman suzerains: Rome was not known for dealing mercifully with perceived rebels and only tolerated Judaism as it was.
* Defied over this, she admits that killing or drafting him just for his knowledge isn't just, and settles for following him to make sure he doesn't let anything slip, instead.
* Defied repeatedly to its own ultimate detriment by Joseon Korea, which had seen what "opening markets" had done to China and wanted little part of it. The American armed schooner General Sherman was sent to Pyongyang in 1866, ostensibly to open trade relations, only to be destroyed by fireships when the crew refused to accept "no" for an answer. Later the same year, an estimated 800 French soldiers aboard six warships attempted to seize the mouth of the Han River and coastal access to the capital, only to be forced back by winter and overwhelming opposition. Talk of a joint French-American punitive expedition went nowhere, but in 1871, the Americans tried again with over 600 marines and five warships, taking five

fortifications along the Han River and managing to only strengthen the regent's opposition to modernization, including new proclamations against "appeasing foreigners." It wasn't until their rapidly-modernizing Japanese neighbours threatened to fire on the capital Hanseong (today Seoul) itself that the Hermit Kingdom was finally forced to open its markets to foreign trade, with Japan, America, and Russia at the forefront.
* Defied resented her modeling background after this but for the most part, she was held up as the MVP of STARDOM by the end of her rookie year.
* Defied, she decides to keep that to herself in case they get weird ideas.
* Defied. She may have inherited Willow's looks, but she's actively trying very hard not to become like her alcoholically depressed mother, even though Pandora's insanity seems hell-bent on making her take up the bottle to cope with it all.
* Defied soft drink in the country because it's an easier title to keep. (It didn't go over well.)
* Defied's reactor as posthumous Heroes of the Soviet Union. He bitterly goes on that this was rejected because they died due to a peacetime reactor accident rather than in war.
* Defied takes before Antonucci decided the delivery was finally good enough to use.
* Defied, that specifically keeps them isolated from other prisoners and the outside and limits their benefits, including and receiving money over a (small) set amount.
* defied. The books antagonists are a gang of crooks stealing expensive pedigree bulls to order, using a tranquilliser gun to render the animals docile enough to lead out of their paddock and aboard a small cargo plane without waking their owner. Naturally, if one of the darts hits a human being, the effect is considerably faster and very likely to be fatal, as Ginger has the misfortune to find out; he only survives because the dart ricochets before hitting him, and fails to deliver its full payload.
* Defied. The class feature for 2nd level grants immunity to blindness or dazing due to light effects, in addition to a few other powers.
* Defied: the furniture in The Broken Arms is so sturdy that in a fight against a charging bull, the bull would come out second. This is to avoid having to replace furniture after brawls.
* Defied. Their First Oath is that their art must always be used to inspire and uplift, never to cause despair or stifle hope.
* Defied. The male lead, Gilbert, fights a henchman for a bit with female lead Iris watching meekly from the sidelines. Finally Gilbert shouts "don't just stand there like a referee, cooperate!" Working together they easily subdue the man.
* Defied: the protagonist Emily first refuses to call the flesh eaters "zombies", making up all sorts of semantic excuses to claim that they're technically something else. Her military instructor Daisy calls bullshit on all of that and tells her straight up that yes, they're zombies and she should deal with it.
* Defied there were any deaths, the lingering shots of destroyed buildings, injured people sobbing in the streets, and the protagonists staring on in abject horror make it pretty clear what the stakes are.
* Defied think that "Prometheus" is a nuclear fusion research project. The president personally kills the story in exchange for a promise that when the program eventually goes public, the station gets an exclusive.

* Defied Trope in response. (We guess that'll teach him not to ride other heels' coattails, especially since he's retired from wrestling now.)
* Defied Trope. Simon knew he'd try and do this so he pulled a "Screw the Rules, I have tranqs!" gambit by injecting Jayne with an anaesthetic while patching him up from an injury. Jayne's bid for power occurred just as the anaesthetic started to kick in, resulting in him falling asleep before he could complete his take-over. The crew was extremely relieved by Simon's foresight.
* Defied Trope: "You thought we were going to use this trope? Hell no!"

* Defied when Greg and Rowley are trick-or-treating and Greg decides to let Rowley use the bathroom or else things were "gonna get messy".
* Defied when Hiei goes 'stop the tunnel to Demon World? Screw that, I want to go home,' and ditches the rest of the team. He comes back and saves Yusuke's life less than a week later, though. And then he and Hiei beat the snot out of each other for a while, and then they're friends again. Even after the team splits up.
* Defied when Lincoln wants to scream Lynn's name in frustration but decides not to lest he get in trouble.
* Defied when Syndrome stops Mr. Incredible's attack during his bragging.
* Defied, where the main goal of the game is to prove that good can still exist even in the absence of evil.
* Defied, with Ray recording a few new sponsor messages in retirement.
* Defied with the bulls killed in bullfights, which are by nature peaceful herbivores, and have to be goaded into anger with multiple stabs of the dagger moments before they are sent to their deaths at the blades of the Matador in the arena.
* Defied with the song "Get Out, Stay Out, Don't You Go Back In." It mentions that going back into a burning house to save a toy is a stupid idea.
* Defied with Trevor Philips, a Canadian-born immigrant who takes issue with anyone who finds his accent funny. Make fun of him and there
* Defied with Weiss, who has practically shut her cold and domineering father out of her life.
* defied (with whom he had a major feud in 2020, ending with Jericho dropping the AEW title to Mox).
* Defied work in such a situation, but it's much easier to use leverage and relative hardnesses of the restraints and whatever they're hooked onto to break loose instead, and then you don't have to deal with broken bones.
* Defied Worth noting, the author is a troper and has read the above fanfic.
* defies the destiny that Elphias sets aside for him to destroy the Barian world, leading to an awesome moment for Yuma as he duels the godlike being for Astral's life and freedom.
* defies the trope. Lily tells her she should be more girlfriend-like and she attempts to share her sundae, but she likes it too much, so it doesn't really work out well.
* Defiled Forever: Doesn't matter if the "sullying" was from actual rape, if you're a woman and you've had sex, you're damaged goods.
* Defiled Forever have been trying to make a statement about how sometimes people, especially younger ones, jump into sex before being truly ready and properly prepared to deal with the potential consequences, but it doesn't come across that way and instead came across as this trope. Justified, however, as she was quoting what her best friend actually said about it at the time.
* Defiled Forever in the novels either, but he does recognize the foolishness of keeping all his eggs in one basket and therefore leaves his wife at Riverrun with

the Blackfish rather than bringing her with him.
* Defiled Forever: The belief that losing one's virginity prior to marriage (often by rape) means that the person is tainted now and that no one would ever want them.
* Defiled Forever: The idea that losing one's virginity before marriage means that they're irrevocably tainted and no one would want them. This includes rape, but can also include consensual sex outside of marriage.
* Defiled Forever: Your hymen has been breached before getting married? Then off to the whorehouse you go, you disgraceful skank! It's this or the convent, but we won't tolerate you blemishing the family's honor.
* Defiler but these use a weaker poison that lacks both the potency and persistence of Defiler Poison.

How does nanotechnology allow people to survive death? No one knows: it doesn't work on any other planet.
* Definitive Edition Godzilla Introduction contains a 2-panel comic verifying Dr. Yamane's theory regarding the original Godzilla's origins; showing a small colony of Godzillas living at the bottom of the ocean until the Castle Bravo nuke wiped all but one — or two, given the existence of the subsequent Showa Godzilla — out.
* Definitive Edition, the Flaming Camels are camels with burning hays wrapped on top of them that explode on enemy troops, which deals bonus damage against cavalry and elephants. Their appearance in the Tamerlane's campaign is based on how Tamerlane deals with the war elephants. It was originally a scenario-only unit but was added in March 2020 patch for the Tatars civilization once they researched the Timurid Siegecraft unique technique.
* Def Jam: Fight for New York has a stage set on a subway platform. Every few minutes, a train comes by. It is possible to win by knocking your opponent onto the tracks at the right time.
* Def Jam Fight for New York He's immune to defeat by environmental damage, submission hold, and through weapons.
* Def Jam: Fight For New York House, (who is probably the biggest guy in their gang) before they let you in. However, it's mostly there just as an excuse to give you a tutorial.
* Def Jam: Fight For New York, there are a couple stages with ring out potential. But you have to smash the ring barriers with the opponent's face a few times in order to get them through. Then there's the Subway stage, where a Ring Out is only an instant win if a train is coming.
* Def Jam: Icon also varies depending on the stage and how intense the fighting is.
* Def Jam Series, where the women can engage in no holds barred brawls just as brutal as any of the male characters, and yet, not a speck of blood or a bloodied nose results from it.
* Def Jam Vendetta has four generic protagonists with the exact same story and cutscenes, and not one speaks a single word except for the occasional "Yeah!" or grunt.
* de-Flanderized, he's probably the most normal of the Fox family now.
* Deflector Shields and can shoot lasers. Normally Master Chief vs. an old man wouldn't be much of a fight, so it's a good thing the Cool Chair fixes that.
* Deflector shields are a standard equipment on all small ships. The difference between taking shield damage and hull damage, apart from a loud "CLANNNNNNGGGGG!", is that taking hull damage also hurts your weapons and equipment, eventually destroying them.
* Deflector shields, both ship-mounted and man (animal?) portable versions, occur frequently throughout the
* Deflector Shields, knife and sword fighting styles have evolved to include slow strikes that can penetrate shields.
* Deflector Shields of the Earth model (the blueprints of the weapon were given to Earth during the Earth-Minbari War as an apology for their inability to intervene and fight the Minbari).
* Deflector Shields projectors on rotating sections. This greatly increases the craft's durability as if a shield is brought down, a new shield rotates to take its place
* Deflector Shields "realistic," what they came up with was a barrier that absorbs all energy. Hence, no traces and total stealth. However, it also means the ship is surrounded in a field of darkness, so while you couldn't see the ship, the mysterious black sphere would occlude the stars behind it, so it could be detected by sight, if you knew what to look for. It also means that the ship cannot maneuver, has no sensor capability, and cannot communicate with other ships. So, all it can do is coast along until it thinks it's where it should be, and then drop

the black globe. The black globe has a limited amount of energy that it can store, and exceeding that amount destroys the ship.
* Deflector Shields. Sometimes they don't effectively deflect the shot, but hey, a destroyed drone is better than a dead Tau.
* Def Leppard: - “Fractured Love” from Retro Active their album of B-sides, covers and songs discarded from previous albums.
* Def Leppard drummer Rick Allen. Despite losing his left arm in a car accident, the band developed a one-armed drumkit for Allen.
* Def Leppard: "Gods of War" is a pretty bleak song about "fighting for the Gods of War" but not knowing "what the hell we fightin' for".
* Def Leppard, "Gunter glieben glauchen globen", which the band members found amusing and made the song stand out even further.
* Def Leppard has to be the poster-child for the barefoot drummer — just as he already is for the one-armed drummer.
* Def Leppard has Tron-like circuit lines surrounding the center image.
* Def Leppard have two "Rick"'s, Rick Allen, the drummer, and Rick Savage, the bassist. Rick Savage is differentiated by the nickname "Sav". (Interestingly enough, they also had a "Steve", rhythm guitarist Steve Clark, who died in 1991.)
* Def Leppard, he had to start wearing a shirt onstage to keep the sweat off the electronics. Bandmate Phil Collen also regularly performs shirtless.
* Def Leppard. In fact, "Love Bites" probably doesn't even hold the distinction of being the second best known song (that honor likely goes to "Photograph", which peaked at #12).
* Def Leppard returning to Britain and having trouble in civilian life because their instincts are still geared for combat.
* Def Leppard - "Rock! Rock! (Till You Drop)", "Let's Get Rocked", "Rock of Ages", "Rock Brigade", "Rocket", and they covered "Rock On" and "The Golden Age of Rock 'N' Roll".
* Def Leppard's "Let's Get Rocked"... Replace all instances of the word "Rock" with "fuck" and the song makes sense...
* deflowers him for stress relief, decides that she likes him, but soon backs off for ethical reasons.
* Defoe, zombies are referred to as 'reeks', though Defoe himself has the title 'zombie-hunter general'.
* DeForest Kelley (He doesn't actually have a gravestone; when he died, he was cremated and his ashes were scattered over the Pacific Ocean).
* defrost after falling in love with Shirogane, Shirogane became outstanding after aiming to be worthy of Kaguya, Ishigami has become more confident and ambitious, and Iino starts to loosen up and mature.
* Defrosting Ice Queen: A cold, unapproachable character develops into a warm-hearted and friendly character.
* Defrosting Ice Queen: Given time and affection, her uncaring facade will melt to reveal her softer side.
* Defrosting Ice Queen, she chose to train in handling her temper. Annie certainly shows more emotion in her face than she used to, though still seems to be quite stoic and quiet around people she isn't close to.
* Defrosting Ice Queen: The love interest initially rejects them, but begins to warm up to him eventually.
* Defrosting Ice Queen: They initially don't return someone's love, but come around after a while.
* Defrosting Ice Queen: When an aloof introverted character warms up overtime.
* Deft Duelist is more realistic, following the classic "rapier and dagger" mold and strikes first instead of hitting twice.
* Deftones bassist Chi Cheng was seriously injured in a car accident and died five years later while in a coma.
* Deftones. However, they never appeared on the Hot 100. The closest they got was their signature song "Change (In the House of Flies)", which fell five spaces short.
* Deftones' title track. In fact, the same could be said for "Diamond Eyes", their

second best known song.
* Deftones, vocalist Chino Moreno is part-Chinese, while late bassist Chi Cheng was Chinese-American
* defunct had Samantha Carter get promoted to general and given command of the SGC.
* Defunctland in the show's first two seasons, with most of her whereabouts being unknown.
* Defunctland. This moment plays with the trope because the silhouette is unmistakably Mickey's, while the revealed Charles uses a completely different image.
* Defunctland to form Gameworks at the time, and believes Eisner only greenlit Disneyquest to try and one-up his rival in the arcade industry.
* Defunctland videos, most notably the video on the failed "Disney's America" park, which features everyone from Lindsey Ellis, Quinton Reviews, and fellow amusement park-based content creators such as Disney Dan and Mark of Yesterworld fame reading relevant quotes like the video were a PBS documentary.
* Defunct personal music review site Disclaimer Music Review Archive was set up so that reviews for artists whose names start with the same letter were all placed on one long, scrollable page in alphabetical order. At the end of an artist's reviews, there'd often be a "SEE ALSO" list, which links to the author's reviews of related artists. The section for Joey Ramone only has one album review, and of course

* Defying Gravity, an otherwise good show — disappointing, really.
* Defying Gravity, astronaut Nadia Schilling is in a "friends with benefits" relationship with a fellow astronaut. She even uses the term on several occasions.
* Defying Gravity is near future and mostly hard scifi, but the ship has instant communication with earth on multiple channels in at least the megabit range (HD video transmissions, internet use, etc), handwaved as being brand new tech that made the mission possible in the first place.
* Defying Gravity, what with half of each pairing being in space for six years.
* Defying the Censors: Sometimes you have to stand up to those who want to silence you, but when that doesn't work, there's always these...
* Defying the Odds shows this in a flashback, as Tweety tells Sylvester the harsh promise Tyler made to her when she turned dwon his marriage proposal.
* Defying the Odds, whenever Sylvester comes close to telling Tweety how he feels about her, he is interrupted. Luckily, he is finally able to tell her when they are in Paris.
* Defying this is the above-mentioned mantra of "Work smarter, not harder." When taken as more than just an excuse not to work your hardest, it means that knowing when and where to focus your efforts and resources will be more effective than just plowing through a situation on brute force.
* Defying this trope with rations is now a big part of military strategy - modern military forces are very cognizant that troop morale is a big part of combat effectiveness and are mindful that poor food is guaranteed to hurt morale, so they strive to make even combat rations as tasty and palatable as possible within the limitations they have to meet. It's not for nothing that the phrase "An army marches on its stomach" has been a military maxim since the Napoleonic era.
* defy Office Romance. It's later revealed that Mark indeed does find Rachel attractive and they have a date, but Mark already started to work elsewhere.
* defy this trope leader of the team, and even after Barry returned largely retained the role.

* defy When the boys reached high school age, Archie and his wife sent them to a prep school in New Orleans with rigorous academic standards and a poor football program because he felt school was more important. Even after the kids became hot college recruits, Archie didn't force them to attend his alma mater Ole Miss and let them choose their schools (though Cooper and Eli picked Ole Miss anyway). Though the college coaches invited him to sit in on games and meetings and discuss offensive strategies, Archie declined and sat in the stands on game day as a regular fan. In the end, Peyton and Eli became NFL quarterbacks with Hall of Fame-worthy careers that surpass their father's. As for Cooper, a severe spinal condition forced him to retire from wide receiver in college (he had to "settle" for being an extremely successful investment banker and TV sports broadcaster instead), but he has a son who's also a hot QB prospect, and attends the same prep school he and his brothers did.
* De Generaal, both by Peter de Smet, are filled to the brim with this trope. The main character, The General, assisted by a zany professor and a soldier, and armed with a rather ancient tank, repeatedly tries to take power from The Marshall (seated in a fort; the general's HQ is a preciously guarded tree). Their lack of success in whatever way they try is only surpassed by a motorcycle policeman's failures to book The General for breaking just about any law or rule the policeman thinks applicable.
* DeGeneration X: "I'm...THE BOOGEYMAN! And I'm comin' to - (briefly sans Boogeyman gimmick) - see if I can join DX."
* De Gouden Dolk (The Golden Dagger), an adventure novel by Thea Beckman. After spending years of fighting in the second crusade, protagonist Jiri Rambor finds life in his old village boring and uneventful after his return.
* Degrassi; Adam's shown binding (with an Ace bandage) onscreen. Later it's mentioned in-series that Adam gets a chest compression vest.
* Degrassi after season 3 and didn't even come to her brother's wedding.
* Degrassi. After she is the victim of a robbery while home alone, Fiona becomes increasingly paranoid about it happening again. She foolishly tries to illegally buy a gun from a back alley dealer, but nearly gets killed in the process.
* Degrassi are like this. Clare is a sweet, mostly innocent Christian girl, and Eli drives a hearse.
* Degrassi as she's worrying about him too much when they were an official couple. Sunnyshine and happiness Becky played the platonic version with Eli and the romantic version with Adam. Although there it was more about energy than about ditzy or airheaded.
* Degrassi. Bianca finds him in a sobbing heap in the girls' bathroom, which he didn't realize he had gone into until she calls him a stalker and he notices the tampon dispenser.
* Degrassi bringing light to the series again and several free streaming networks obtaining the rights to air the entire series meant there were even more avenues to watch the series and draw in new viewers.
* Degrassi brings us Mrs. Torres, mother to Drew and Adam Torres. She is the representative of the school board, but those duties come after running Drew's life and lamenting Adam's choices. Well, that's on a nice day, on a mean day she uses the school board's power to help control Drew's life and lament Adam's choices.
* Degrassi but to him being in the closet about his sexuality but later opens up and becomes a lot more vulnerable and friendly.
* Degrassi, causing him to be paralyzed from the waist down for the remainder of his time on the program. This is also where JT is fatally stabbed.
* Degrassi Claire invited Eli over for dinner with her parents just as a way of shocking them with his black clothes, hearse, and chain necklaces to get back at them for getting a divorce. Eli was completely humiliated that she used him like that.
* Degrassi, Clare dates her mother's fiancé's son Jake. Later on, when they are thinking about having sex, Jake says they should just end the relationship because if they break up painfully it would get awkward, seeing as they are now related.

* Degrassi: Community School introduces uniforms in Season 10 of the eponymous show, color-coded by year (Grade 12-blue, 11-red, 10-purple, 9-yellow). This holds the next year, apparently for the viewers' convenience — in a real school, it would make more sense for the rising students to keep their present colors with blue rotated to the incoming freshmen.
* Degrassi decided the best way to do this was to have J.T. Yorke (his character) stabbed in the back and killed. Driving several characters to different forms of depression over it. This wasn't out of animosity; the death of a friend was not a trauma the series had properly covered yet.
* Degrassi demanded it (Emma and Peter literally live in the basement, complete with all the basement clutter, while Alex's mother is an alcoholic, abused wreck).
* Degrassi did this a lot, especially in the earlier seasons. The English teacher would have them read a story in which the plot was strikingly similarly to the episode's events.
* Degrassi, Emma and Manny both have a crush on Craig in season two. But when he shows signs of liking Manny more, Emma stops being interested in him because she doesn't want to compete with her friend.
* Degrassi episode "Moonlight Desires" Marco catches his boyfriend Dylan in bed making out with another guy. Dylan tells Marco that he wants to be free to have an open relationship and see other people as well as Marco. Marco says no so they break up because Dylan would rather have multiple partners than have Marco.
* Degrassi), everyone still thinks that it's a fabulous school and nobody moves away to find a safer one.
* Degrassi fanfic based on a fictional vampire book series called Fortnight.
* Degrassi fashion model Mia, who tags along on the journey to L.A., later ends up helping fix the broken down bus with her expensive leggings, saying it was an old trick her mom taught her.
* Degrassi fashion that being interested in sexual gratification isn't a bad thing, and it's a good thing to seek it from yourself. Eventually Clare gets 'the talk' she wanted from her mother over these subjects. She called it awkward.
* Degrassi: Fiona Coyne is a talented artist and is also very interested in fashion, as shown through her unique sense of style.
* Degrassi football player Riley and his feelings for the artistic, and very much out of the closet, Zane.
* Degrassi had J.T. go to Rick's funeral. But only after Manny reminded him that he could never be the bigger man.
* Degrassi has an episode where Connor, who's black, helps get KC and Clare, who are white, together. In gratitude, the writers give him a black girl as admirer. It's like when Liberty (black) is rejected by Sean, but in the end she finds out that his black friend likes her.
* Degrassi has an episode where Connor, who's black, helps get KC and Clare, who are white, together. In gratitude, the writers give him a black girl as an admirer. It's like when Liberty (non-token black) is rejected by Sean but in the end, she finds out that his black friend likes her.
* Degrassi has a subplot about Noah, a geeky college freshman, getting involved with the teacher of his film-studies class, and about her husband, who turns out to be the teacher of his business class, eventually finding out.
* Degrassi has been on TV so long (over a decade) the the show routinely recycles stores and only slightly updates them depending on the character. For example, the show has dealt with teen pregnancy at least five times (Manny, Emma, Liberty, Anya, and Jenna). An episode in which Emma almost becomes the victim of a pedophile she meets online is recycled twice, first with Darcy and then later with Connor.
* Degrassi has done this a lot. Craig's band is the actor's real life band, and Ashley (who also once was in a couple of bands) in real life has said she loves singing.
* Degrassi has done this for just about every pairing and friendship it can. It'd be faster to list the exceptions.
* Degrassi has Miles and Esme in season 15. Pre-relationship, he already had a lot of trust issues and mental health problems that stemmed from his abusive father.

Then he met Esme and they became friends-with-benefits and he got even worse. She seems to be just as messed up and in an attempt to help him got him hooked on pills. Together they isolated themselves from everyone else and encouraged each other in their destructive behaviour. When he decided to get clean and become friends with his former boyfriend/best friend again, she faked a suicide attempt to get his attention, scared of being alone.
* Degrassi. He goes crazy after Clare starts talking to Fitz, and acts this way towards Imogen when they date. He finds out that it isn't related to his mental illness, he's just possessive.
* Degrassi High and Caitlin was a stern, moralistic social activist. They broke up and got together again too many times to count.
* Degrassi High: Has a baroque (and rather creepy) example. In the first season, Caitlin dumps Joey because he's rather immature and because the new kid Claude seems so much more her type. But Claude turns out to be an ass and she dumps him too. In the second season, Claude is thinking of suicide (due to unrelated problems that Caitlin doesn't know about). Desperate for any hope, he asks Caitlin out again, and she tells him to get lost. When she gets home, she finds Claude has sent her flowers and his suicide note. As she's screaming with rage and guilt, her science teacher orders her to tutor her old ex-boyfriend Joey. He's had a lot of Character Development over the course of this season and comforts her during the tutoring. Soon, they're back together again.
* Degrassi High The cool kids invite nerdy, insecure Arthur to their poker party so they can take him for all he's worth. He's out of his depth — at one point, he asks, "does three of a kind beat a full house?" But he suddenly starts winning — including beating three of a kind with a full house. By the last hand, it's down to Arthur and the host — and Arthur wins almost all the money by bluffing when his hand is complete junk. The cool kids are amazed. Then comes the subversion: Arthur grins and says, "'Does three of a kind beat a full house?' You guys are so gullible."
* Degrassi High, the most obvious being Arthur's younger cousin Dorothy, who's now in the same grade as him.
* Degrassi High, this is how Claude commits suicide. Snake, who found the body, mentioned later that only half his face was left.
* Degrassi imagines herself as Cinderella with Craig as her Prince. Her dream begins to take reality when they go on their first date in that episode.
* Degrassi, in its third and fourth seasons, contrasted Jay (a sociopathic criminal mastermind) with Rick (an unstable maniac who beat his girlfriend). When their schemes collided, Jay turned out to be Eviler than Thou — but Rick got more dangerous as Jay backed him into a corner. The sixth season has contrasted Drake (a violent gang leader) with Peter (a sleazy operator who was born to blackmail and frame people). So far, their schemes have not collided.
* Degrassi. In seasons 10 and 12 in the U.S., it came on Fridays at 10 PM and did reasonably well.
* Degrassi in that the school had only implemented uniforms earlier that school year, and one of the teachers stated flat-out that they don't like enforcing it any more than the students like wearing it.
* Degrassi in the school bathroom, Ellie says she "hit her arm, on the... thing." Given how weak her excuse is, it doesn't work.
* Degrassi is a typical example of a transgender person changing their birth name.
* Degrassi is mostly made on a backlot and the older-style houses are back.
* Degrassi: Jane Vaughan is a skilled football player and the Valedictorian of her class. Her plan is to become a lawyer. This is also the same case for Katie, who is not only on the soccer team, but is in karate, the school newspaper, and is student council president.
* Degrassi, Jenna gets baptized in order to hook up with Luke, who is a conservative Christian.
* Degrassi Junior High after he was rebuffed by the Canadian show's producers.
* Degrassi Junior High. A girl has to leave her date early, so she has her twin sister take her place half-way through. It's all for nothing, because the boyfriend

is too busy hitting on another girl to notice.
* Degrassi Junior High as good as she hoped to be back then but was able to make a successful career in broadcast journalism as an adult.
* Degrassi Junior High, Caitlin worries that she's a lesbian because she has a crush on a female teacher.
* Degrassi Junior High for Joey, who learns not to be such a lazy ass. In Degrassi High, all that talk about getting off his butt and working hard is rendered meaningless when it turns out he has dysgraphia. (It still fits his character arc, since he still has to cope with feelings of inadequacy, but it's a huge shift.)
* Degrassi Junior High get molested. Isn't that right, Stephanie and Wheels?
* Degrassi Junior High) needs to come down to earth a bit, it always happens by way of Kathleen doing something better than her — which is the most humiliating thing possible.
* Degrassi Junior High of the soccer team clearly has a look on their faces that this is a very, very foolish idea.
* Degrassi Junior High) orders her nerdy little brother to pretend that they're not related. When she gets her comeuppance in the first season finale, she apologizes to him in private, and promises to spend more time with him. But when he asks for a few favors, she grins and says, "Don't push your luck."
* Degrassi Junior High subverts this: Joey's injured (from his bike) and keeps talking about child abuse (because he catches Rick being abused), so naturally the Children's Aid people assume his parents beat him.
* Degrassi Junior High that he's going to beat him up after school. Most of the students show up to watch the fight and even sell ice cream.
* Degrassi Junior High The boys secretly know the girls' team is better, but they think they can win — because the girls' star swimmer is morbidly afraid of letting boys see her in a bathing suit and because they allow champion swimmer Snake to join the team, even though he's awful at soccer.
* Degrassi Junior High - was a one-hit wonder not only in the fact that "Everybody Wants Something" was their only hit, but it was their only song. It's a fact that still gets them mercilessly teased even as adults.
* Degrassi Junior High When Joey Snake and Wheels try to use a fake ID to buy beer they try putting a trench coat on Snake the tallest of the three in an attempt to make him look older. It fails partially due to the ID being especially fake but mostly due to the fact that they were only fourteen and while they were closer to the legal drinking age of 18 at the time it was still quite a stretch.
* Degrassi Junior High while trying to buy condoms for a night with Stephanie. After various humiliations, he manages to buy some from a pharmacist who turns out to be Stephanie's mother, which gives the game away when he arrives at her door.
* Degrassi Junior High who only appears to follow her around. They even end up married in the movie.
* Degrassi just wants to play football despite the harassment from her team mates. She's good, too.
* Degrassi, known for flirting with other girls, falls hard for Holly J, who initially rejects his advances.
* Degrassi Liberty have a crush him for a long time. When they do finally get together, they end up breaking up and he died before they could get back together (shortly after revealing to his best friend he was still in love with her, and this happened on her birthday).
* Degrassi, male and female. Both of the Van Zandt siblings pulled this, just compare Liberty and Danny's intro looks to their last appearances, and Clare got this as a plotline.
* Degrassi man already living as a male when introduced, detransitions once before reverting to his male persona within the episode and burning his last remaining girl clothes.
* Degrassi Manny loves her cotton candy; but after she stops acting like a little kid, you never hear of it again.
* Degrassi: Next Class", Winston offers Goldi a high five during a game of charades, but she turns it down, saying it's against her religion to touch boys.

* Degrassi of all shows, can do this when the writers actually work really hard on a story. The biggest example of this would be Rick's storyline leading up to the shooting.
* Degrassi of the crap he has had to deal with for his entire career at the school, and has this to say to the students: "By the time you all get back from break...you won't recognize this school at all." And he's not kidding — the next episodes see him instituting a school-wide discipline crackdown aimed at curbing the worst of the school's major problems.
* Degrassi one who was attempting to rape Bianca, leading to the gang pursuing him.
* Degrassi. People walk away from the story feeling like they've come across the seedy underbelly of the world. All of this without warning or explanation. The main character of the story is also rescued by Peter, but it's a mystery why the so-called "author" couldn't just make up an OC who's evil instead of having to defile Riley's character.
* Degrassi points out she must have low self-esteem to take back a cheater.
* Degrassi qualifies, it has a large living room - kitchen area downstairs, and up a small staircase is a bedroom area. Earlier seasons if we saw more than just a kid's bedroom the house/apartment would fit.
* Degrassi: Ray Ablack briefly dated Melinda Shankar, who plays his younger sister.
* Degrassi, Russian-Canadian teen Zig Novak and his heavily-accented immigrant mother are played by Ricardo Hoyos and Shauna MacDonald respectively.
* Degrassi seasons when Jimmy was the star athlete and his relationship with Ashley was center stage, Spinner's job was to be everything Jimmy wasn't.
* Degrassi series did this would be a Wiki in itself. Some of the more notable cases:
* Degrassi series. which were shot in real schools, often on weekends, when no one was present. The setting of Degrassi High is now a community college (Centennial) in Toronto, Ontario, Canada.
* Degrassi: The Next Generation after winning at a game show contest. He goes home and starts looking at a gun in a box...
* Degrassi: The Next Generation), and is caught staring at it like it's some sort of monster. It doesn't go unnoticed by Craig.
* Degrassi: The Next Generation, and one night of sex. The really crazy thing? Both of them were too drunk to actually remember said sex.
* Degrassi: The Next Generation: Anya MacPherson was an Extreme Doormat to her best friend Holly J before she gained a bit of a backbone.
* Degrassi: The Next Generation) are fighting for control of the cheerleading squad. Paige steals credit for Manny's work, kicks her off the squad, and makes her be the mascot. In retaliation, Manny's allies on the squad deliberately drop Paige during a game, breaking her leg — and we cut to the panther mascot doing a very triumphant dance.
* Degrassi: The Next Generation are queen bee Paige and top dog Ashley.
* Degrassi: The Next Generation boy she started with (for a while, anyway).
* Degrassi: The Next Generation, but Adam and his brother Drew fought over Fiona before Drew bowed out.
* Degrassi: The Next Generation counts as a Parental Bonus. Teenaged and younger viewers have no idea why this character is supposed to be interesting or important; only the viewers who were around in 1990 remember.
* Degrassi: The Next Generation). Emma is initially perturbed but gets over it. Later, Snake and Spike wed, and Emma and Snake become a very devoted stepfather/stepdaughter combo.
* Degrassi: The Next Generation ends with Mo sparking a spontaneous dance party to "(I've Had) The Time Of My Life" and the entirety of his fellow 2012 graduates just having a hell of a sendoff. He dedicates it to his girlfriend, Marisol.
* Degrassi: The Next Generation, even though Paige has plenty of enemies. Matt gets fired, and the two of them think this is a good thing since now they can be together in public. Then he suddenly moves away, in a scene that ends with Paige's classic line: "You're dumping me and giving me drugs?!"
* Degrassi: The Next Generation fashion. In the early part of the series, Moral

Guardians were convinced that Marco, a gay teen, was the main character of the series. Later they thought this role belonged to yet another gay character, Riley Stavros. While in reality (so to speak), they were both relatively minor characters.
* Degrassi: The Next Generation. Finding someone in that demographic who actually saw the show is a lot harder.
* Degrassi: The Next Generation: For the students, there's Liberty, and then later, Clare, before she got her laser eye surgery, another bane of glasses fetishists, and Maya after her. For the teachers there's Mrs. Oh.
* Degrassi: The Next Generation get pregnant or infected from even one instance of unprotected sex, but the moral ought to be "use a condom", not "don't have sex ever"). The most popular girl in the school swallows one pill of ecstasy, and in the resulting high she manages to lose all her friends (plus, she has to go into rehab, you know, to cure her rampant addiction). But the kids almost always get away with petty crime, like stealing school property or cheating a restaurant.
* Degrassi: The Next Generation gives us Emma Nelson. It's not enough to boycott genetically modified foods or even petition to have them removed. She's convinced the lunch lady's trying to poison them.
* Degrassi: The Next Generation gives us Towerz, a tall black guy who never says anything.
* Degrassi: The Next Generation has Manny Santos, long thought to be Latina, but who is actually Filipina—both character and actress.
* Degrassi: The Next Generation has Peter and Manny doing this to get to a school bus.
* Degrassi: The Next Generation have seen some episodes airing in the US before they air in Canada.
* Degrassi: The Next Generation have this, but Toby especially. He is consistently picked on, ignored by his unrequited crushes, and has two of his only friends killed by school violence, but seems no worse for wear by the next episode he's in.
* Degrassi: The Next Generation, incompetent, evil or all three. Those who were there before are in the zone despite what the current generation think. ("My mom's cool but she's not that cool.") All university students (except the main cast, once they go to university) are competent and evil.
* Degrassi: The Next Generation in which genetically-modified food turns people into zombies, leaving the few surviving students to fight for their lives to escape.
* Degrassi: The Next Generation is more gritty than most teen dramas, but it can still be pretty shiny at times.
* Degrassi: The Next Generation is notorious for characters going through partners as if they were tissues. Some characters went through so many partners that they ran out of people to pair with, and had to date someone they'd been with in previous seasons. In one notable case, two characters changed sexual orientation to be together—and as soon as they broke up, one of them changed orientation right back.
* Degrassi: The Next Generation, Joey Jeremiah is shown in a series of commercials for his car lot. The commercials largely follow this model.
* Degrassi: The Next Generation Johnny DiMarco dumps Alli because he doesn't want to admit to Holly J that he's dating a ninth-grader. She takes him back after this and continues to pine after him.
* Degrassi: The Next Generation, K.C. and Bianca try to set up K.C.'s mother with their quiz team coach/English teacher both because she won't be constantly around K.C. and because he feels she deserves to have some personal happiness outside of her parental duties. They do hit it off, but it ends up going nowhere as K.C.'s father reenters their lives and forces K.C. and his mom to move across the country for their safety.
* Degrassi: The Next Generation, Manny is terrified of telling her parents about her pregnancy because her cousin (back in the Philippines) was shipped to a convent for getting pregnant.
* Degrassi: The Next Generation: Marco thinks bees are "like flying death monkeys".

* Degrassi: The Next Generation nightmares happening around her; the other characters know they've gone too far when something they do affects Angela.
* Degrassi: The Next Generation paired with Jay.) Similarly, practically all Spinner/Manny shipping is to stop anything from happening between Craig and Manny. Craig/Manny shippers are conversely fond of Jimmy/Ashley and Sean/Ashley, while Emma/Sean shippers are fond of Craig/Ellie.
* Degrassi: The Next Generation pairing, at least for a season or two.
* Degrassi: The Next Generation Sean swaps the Ecstasy JT and Toby bought for aspirin. The two 7th graders act like lunatics for an hour or two while Sean laughs his ass off.
* Degrassi: The Next Generation's show before he became a famous rapper. Not a lot of people outside the core demographic will be able to tell you about the show.
* Degrassi: The Next Generation. They insist that they're in love, but all we see is them arguing. At one point, J.T. brags about their sex life in public, and Liberty pours cold soda down his pants.
* Degrassi: The Next Generation who acted about half her real age. In a single episode, she finally realized that people didn't take her seriously — and instantly transformed into a manipulative, sex-crazed attention hogger. She got worse.
* Degrassi: The Next Generation will occasionally hold a few students back.
* Degrassi, the show had gotten so melodramatic and earnest that the actors (and the writers) needed to relax and let off steam. They did it with a truly epic amount of Adam Westing, both on their show and others. To take maybe 1 percent of what they did:
* Degrassi "Thunderstruck", Tristan is moodily standing outside in the middle of a thunderstorm and Miles goes out to call him back inside. After a suitably emotional talk, helped by Tristan's penchant for dramatic dialogue, they are forced to duck to avoid a piece of flying debris. Tristan comments that if they were in a romantic comedy, that would be the moment when they kissed. They share a kiss later in the episode once they are back inside.
* Degrassi, using accurate descriptions from the major arcana. As with most fortune telling aspects in serials, they're generally true until the end - specifically until they lie about the meaning of one of the readings.
* Degrassi when Craig and Manny started hooking up. Lampshaded in a season two episode when Craig and Manny have their first date and Craig later says Manny reminds him of his little sister.
* Degrassi when eating hospital food. His brother thinks he's exaggerating but then tries the food and immediately agrees.
* Degrassi, when JT was killed before he could tell Liberty that he still loved her.
* Degrassi: When Maya's already fragile mental state falls apart after the bus crash, she's rendered unable to write anything at all for the school musical. Her friends end up replacing her.
* Degrassi where Adam, after briefly and uncomfortably de-transitioning, burns his last remaining girls' clothing with family and friends present.
* Degrassi, which is about the gossip and news of the school. Earlier seasons had the Grapevine as the school's newspaper, with Ellie as an aspiring journalist. However, Ellie never played this trope until she was at a college paper where that sort of dedication makes sense. Emma used the paper to push her liberal agenda.
* Degrassi who films Drunk!Manny stripping and makes it into a meme, but still dates her best friend Emma. In the next season, Emma's ex-boyfriend Sean, who is the school's hero after saving them all from a shooting, comes back, and Peter plants drugs in his locker. Then Peter and Sean start racing, and Peter goes to jail. His mother was the principal.
* Degrassi with Liberty, who reveals her pregnancy when she's three months along and doesn't really start showing until she's about six months along. Even then, she was a realistic size, she didn't suddenly get as big as a house.
* Degrassi without the original students except Snake, Spike, Caitlin, Joey, and Mr. Raditch (who was the principal in the first four seasons). The name was

officially shortened around season 10, after Emma, Manny, Spinner, Liberty, and Jay left, though its still the same show.
* De Griezelbus did this with the final fight, only showing the shadows and people's reactions (actually, the evil monster involved in this is never shown at any point in the film).
* De Griezelbus, Onnoval asks Ferluci to allow him to become a mortal human again, so he can spend time with his love Liselore. Ferluci does so, but reincarnates Onnoval into the body of a child and one of Liselore's pupils, essentially making it a strange version of this trope.
* De Guiche plays it straight at Act II Scene VII when he reveals to the multitude that celebrates Cyrano combat against a one hundred men that he was the man who hired them against a poet for a satiric poem:
* De Guiche tries to set up one for Roxane, as she says in Act II Scene VI:
* Degwin's eldest son, Sasro, assassinated early on and not shown in the original series, is a bit of flip-flop. In the Tomino's novels he is said to look like an
* De HA! Van Humo, which is one of the most prestigious awards that a show can get in Belgium. Of the 35 times that they handed out the award 10 went to comedies. By comparison only 3 drama's and 1 dramedy on Belgian television ever won the award. If one wonders where the rest of the awards go to one should keep in mind that they review everything on Belgian television. That also includes music programs, TV-hosts, documentaries, travel programs, satire news shows etc.
* Dehumanization: Hatred towards someone is expressed by regarding them as if they were not human.
* Dehumanization: Our opponents have no humanity, so kill them en masse!
* Dehumanization: Stripping someone of their humanity status to justify killing them.
* Dehumanizing Insult: Tropers aren't human, they're nothing but vermin!
* Deicide decided to keep making them long after the well of enthusiasm and originality had dried up.
* Deicide, one of the most vocally anti-Christian bands in death metal.
* Deidara as a bomb. Too bad for him, Sasuke had just made in advance an ultimate escape plan for such an occasion.
* Deidara finishes his fight with Sasuke with a gigantic self-destruction technique. Sasuke survived the resulting city-sized explosion by summoning and mind-controlling a massive snake to shield him, when he was explicitly described as being nearly out of chakra just a few moments before. Sasuke also managed to do all of this after the explosion started, when he wouldn't have had enough time.
* Deidara hides a scope on his left eye used for long-range observation,
* Deidara is not acceptable behavior for a nation at peace, he went rogue and worked for various anti-government factions even before Akatsuki recruited him. When Pain summarizes the Akatsuki members' motives for fighting, he states that Deidara's reason is "a whim."
* Deidara, on the other hand, took on contracts from antinationalist terrorists prior to joining Akatsuki, stating his reason for doing such was just to blow things up with his art. Even his time with Akatsuki was less about fulfilling their plans than getting even with Itachi.
* Deidara takes to an extreme, even knowing that he could probably get his limbs replaced by Kakuzu or use it as part of his
* De Ideale wereld. Critics have given it lots of awards, but it had very low rating numbers (around 200.000). The fact that the television network that airs it airs it late at night may have something to do with that, aside from the fact that it is not the traditional fare of that network. Over the years it however got increasing viewership and peaked at 400.000.
* Dei. He is also a bit crude in his methods as well, but he has his entertaining moments generously sprinkled in the series.
* Deiland is a survival/crafting game in which a major threat is revealed near the end. Magic attacks are powered by farmable crystals, but crafting your late-game kit uses up a lot of crystals, so the boss has to beatable without using magic.
* Deiland This survival/crafting game takes place on a planet which has a diameter

of about 60 feet/20 metres. It has an Earth-like gravity and atmosphere and a temperate climate. Population: one.
* Deiland version. He talks a lot about being a space pirate, but outside of a few easy fights he mostly trades with you. On one occasion he says that he stole a sheep from a man on another planet, but you make him give it back. One mission requires you to sell him a lot of wood so that he can build a boat to try out ocean piracy.
* Deimos-Class Colony Ships are approximately 3×3×3 km, as the hypergates they traveled through had to be reconfigured to form wormholes with a diameter of 5 km.
* Deimos, the ancient Martian catacombs contain Ice Warriors in suspended animation.
* Deinar is largely divided between three broad racial groups; the tall and fair Barraid of the western highlands, the tall, dark-skinned Tadan of the central river valleys and the short, wiry and far-scattered Login. These were further divided between multiple nation-states, which warred extensively with each other and remain distinct cultural entities into the modern day.
* deindividuation. There's a chance that villains who know this purposefully use Faceless Goons — it's easier for your soldiers to commit atrocities/be bad when deindividuation is in effect.
* Deinonychus to be described, whose features plainly fell within that group of carnivorous dinosaurs, yet also shattered older preconceptions about dinosaurs' agility and metabolic rates.
* Deionarra's memory of a conversation with a past incarnation of the Nameless One. This recalls the Nameless One's own past memopries, and he ends up experiencing both sides of the conversation at the same time.
* deionized fruit juice. This is essentially bland-tasting juice — apple, white grape, or pear — filtered to strip out all remaining flavour, colour, and nutritional content; leaving only the sugar and water content. That's right, it's nothing but sugar water under a different name. It's the exact same form of sugar as the supposedly "unnatural" refined version, just pre-diluted, and costing several times as much. The only reason that deionized fruit juice exists is to legally allow the product to advertise itself as "all natural". This is also often listed as apple/grape/pear juice extract.
* Deirdre, his daughter and lover It's also the reason Karrin doesn't believe she's fit to be a Knight of the Cross, as the Knights must always allow their targets to seek redemption if they are willing, and Murphy believes that truly evil people deserve to be punished.
* Deirdre of the Sorrows., during their self-imposed exile. They don't exactly have a happy ending, but for several years they are happy with their little family.
* Deism is the belief that God exists, created the universe, and then left it to its own devices. This was quite a common belief between the Enlightenment (and the decline in religious sentiment in Western societies) and Darwin's theory of evolution (which provided a naturalistic explanation of the origin of life). Most deists as a result didn't actively "worship" in the sense of praying or performing rituals. However, this
* Deities: Abhoth ("appendages": grab and absorb), Azathoth ("pseudopods": 1-100
* Deities also should make a difference. Marvel has mounds of evidence for the existence of Greek and Norse deities, which
* Deities & Demigods Cyclopedia monsters: Cthulhu (x30 mouth), Azathoth (20 pseudopods), Cthugha (x2), Great Race (x2), Primordial One (x3), Shub-Niggurath (x1), Yog-Sothoth (x12)
* Deities & Demigods. They were required to provide a credit to the game company Chaosium. Later they removed Cthulhu and several other gods so as to not contain such an overt reference to one of their competitors. For this reason, the first and second printings have generally been in greater demand by D&D fans and collectors.
* Deities and Demigods contained almost exclusively stats and info on most gods in the game, including the Faerûnian pantheon and the Greek, Norse and Egyptian

pantheons. A majority of them are grossly underpowered and badly built, ripe for having player parties kill them and steal their divine powers.
* Deities and Demigods Cyclopedia or go mad. Anyone who reads the Necronomicon itself may suffer a worse fate, such as being torn apart by demons.
* Deities and Demigods Cyclopedia. The Celtic pantheon section mentioned a deity named Dunatis who could instantaneously raise a mountain peak from a flat plain or flatten a giant mountain into a prairie.
* Deities are always more powerful while on their home plane(s) than they are on other planes. For example, in older versions of the rules deities had control over who could cast Wishes on their plane(s).
* Deities has an arc set in Ancient Egypt where Chaos and Law/Order discuss the building of the pyramids.
* Deities has had two Arc Villains. In the Evil Rising arc there is Lucifer and in the Flood arc there is Mother Nature.
* Deity Identity Confusion: Different gods or goddesses combined with each other.
* Deity of Human Origin Mara, who punished him by taking away his physical body and demanding that he make things right.
* Deity of Human Origin: The kings of Ancient Egypt were considered fully divine after death. A few non-royals, like Imhotep and Amunhotep son of Hapu, were also deified. In the late dynastic periods, anyone who drowned in the Nile was deified.
* DeJap was also responsible for English-speaking audiences being able to play the original

* Deja Vu, although the games involve getting yourself out of trouble, and not solving any cases for profit.
* de jure obligatory, to the point of inspiring tongue-in-cheek oxymoronic terms like "voluntary obligation".
* DEKA "Luke Arm" leverages 3D printing technology to custom-build a prosthetic at low cost. The latter do not look exactly beautiful, but they are a revolution when it comes to children as few families are able to stem several thousand dollars every few years when their child outgrows their previous prosthetic.

* Dekh Bhai Dekh he gave Suhasini, but she enters the room after he mentions that part.
* Dekh Bhai Dekh makes a phone call, the person being called cannot be heard speaking. For example, in episode 1, Sanju calls Sunita, but Sunita's voice cannot be heard.
* Dekh Bhai Dekh often used a laugh track whenever a joke was made by any of the characters.
* Dekh Bhai Dekh uploads only go up to episode 8. There are 65 episodes in total.
* De Kiekeboes album "De Pili-Pili Pillen" Balthazar's neck stretches to enormous heights due to a strange medicine.
* De Kiekeboes albums (except for the one they are currently appearing in). They enjoyed the books so much that they built their entire civilization according to the universe in Kiekeboe's stories. Naturally they do get a lot of things about our century wrong, because the albums are the only artefacts they can base their knowledge on.
* De Kiekeboes: A lot of younger people may not associate the name "Konstantinopel" with the original name of Istanbul, but with Kiekeboe's son.
* De Kiekeboes And indeed, soon enough a light starts burning, making them able to see what is happening around them.
* De Kiekeboes, because the albums are the only artefacts they can base their

knowledge on.
* De Kiekeboes: Comic book characters are put in jars in the album Kiekebanus.
* De Kiekeboes: Fanny and Inspecteur Sapperdeboere sat in this restaurant in the album "Blond en Blauw" ("Blonde and Blue").
* De Kiekeboes) Fanny saves a chimpanzee from a medical laboratory and keeps at her house. The animal then escapes from her room and goes to the neighbours where he climbs inside the bathroom and helps the unknowing woman of the house with scrubbing her back.
* De Kiekeboes: Fernand Goegebuer, Kiekeboe's neighbour from past the street, also has the tendency to drop by without knocking or walks in during awkward situations.
* De Kiekeboes: Firmin Van De Kasseien, Kiekeboe's corrupt boss, has a brawny chin, symbolizing his arrogance.
* De Kiekeboes: in a comic where Marcel Kiekeboe is drafted in the army, when the Sergeant asks him to present his toothbrush, Marcel knows what's coming and, instead of his actual toothbrush, he presents the Sergeant a duster. Unfortunately for him, the Sergeant has a spare tooth brush for soldiers who try to get out it.
* De Kiekeboes: In "De Getattoeërde Mossel" Kiekeboe realizes an important plot point about someone who has his arm in a cast when he has a nightmare about it.
* De Kiekeboes: In the album "Vrouwen komen van Mars" the Kiekeboe family gets sucked into Marcel Kiekeboe's favorite childhood comic strip, which is a stylistic pastiche of many 1940s and 1950s Flemish comic strip series.
* De Kiekeboes (it predated both) than because of anything else. Speaking of which...
* De Kiekeboes: Konstantinopel, a nifty ten year old boy sometimes has the brains to come up with the solution nobody else could.
* De Kiekeboes many young readers will rather think of Kiekeboe's son than the former name of Istanbul.
* De Kiekeboes: Marcel Kiekeboe is bald, but at the same time clever when the situation calls for it.
* De Kiekeboes this joke is also used when Kiekeboe visits a restaurant.
* De Kiekeboes), while not always blockbusters, are still very recognizable names in the Dutch community.
* Dekiru: The Fusion Hero! again. Some even note that his fusion with Izuku is a good starting point for a redemption arc for him, if the author choose to pursue that route.
* Dekiru: The Fusion Hero! notably averts this. Izuku can merge with any material, but he needs enough of it to merge it with his entire body. Interestingly, this goes both ways; if the source is too substantial, Izuku can only absorb so much of it because there's only so much of his body he can merge it with.
* Dekiru: The Fusion Hero! Ochako. The resulting fusion not only has the One for All, but Ochako's Zero Gravity Quirk is enhanced so it can also control the movement of anything under its effects.
* Dekiru: The Fusion Hero!: Several canon characters suffer this to show how powerful Izuku's fusions are. For example:
* Dekiru: The Fusion Hero! the author can make up using Izuku and the rest of Class 1-A.
* dekoboko, Female Gintoki is just striking a pose with her wooden katana.
* De Kuip crumble under the pressure of playing there, making it a disadvantage. Moreover, the Royal Dutch Football Association admitted that when young referees are being groomed to become full members of the referee squad, the atmosphere in De Kuip is taken into consideration. First, referees are only allowed to lead matches on lower levels in small stadiums. Then they progress to bigger stadiums for higher ranked teams. Leading a match in Rotterdam is considered the final step.
* Deku? I think he's some pro..., appropriately titled "Comfort", focuses on Izuku and Uraraka comforting each other whilst on their way to the training camp.
* Deku? I think he's some pro... attempt to escape from them, with the reader finding out after Tsukauchi tells Aizawa about the results of an autopsy on his corpse.

* Deku? I think he's some pro... by several underground Heroes. Their shock at them finding out he's a Quirkless teenager ends up growing when they learn he was using only the evidence they had sent him for analysis (meaning, among other things, he had provided a sufficiently in-depth analysis to catch a serial killer with only 15 seconds of video to work with)
* Delain trope with Charlotte Wessels until 2015 when they added guitarist Merel Bechtold.
* Delain ("We all live in unforgiving precarious ways / If it bleeds it leads is all we seem to hear today")
* De La Jet Set Radio. It included extra songs, two levels, and, most importantly, bug fixes from the American and European versions.
* De La Jet Set Radio. Released via Sega Direct, it was easier to pick up, had the music from the NTSC and PAL releases, as well as the lengthened story and Grind City levels, as well as allowing the game to be played in English with the original Japanese dub voices. However, thanks to its very limited release, it's become one of the Dreamcast's rarest games.
* Del amor y otros demonios His superior finds him half-dressed, exhausted, and almost delusional after all the self-torture.
* Del Arco reiterates last (same day) at that point it was about [Hugh's] love for Elnor and letting go."
* De La Soul popularizing 'skits', which break up the flow of an album and are rarely all that interesting.
* Dela The Hooda, as well as in the more erotic comics made by Style Wager and Greg Older. In human/furry relationships, the human is usually a man, and the furry is a woman.
* Dela The Hooda), the male lead tend to be a tall, lanky guy in his late twenties with a blond mullet.
* Delaware's Route 1, like Interstate 19, was laid out during the anticipated switch, and while the road has since gone back to using miles for distance markers and signs, the exit numbers are counted off by kilometers.
* Delayed Diagnosis: A character shows signs of an illness or disability, but isn't diagnosed until later.
* Delayed Diagnosis: Someone showing symptoms is initially not given a proper diagnosis, but the illness they have is eventually revealed.
* Delayed Digital Distribution, but usually not as severe. Presumably, the creator hopes that impatient fans will buy the physical release, but still wants people who wouldn't have done that anyway to have the option to buy it digitally. Delayed Digital Distribution can also happen if the creator was initially opposed to digital distribution, but later changed their mind and made their work(s) available.
* Delayed Entendre Recognition", Faye is justifying her claim that she's descended from Civil War pirates by saying her grandmother said their ancestors were "boarded by Yankee seamen all the time". As she says it, she realises that that's not what she meant.
* Delayed example: Jackie Wilson, who collapsed during a concert from a heart attack. He suffered a severe blow to the head and fell into a coma. Despite some bouts of regaining consciousness, he never fully recovered and died eight years later. He was singing his big hit, "Lonely Teardrops," when he suffered the heart attack. Specifically, the line "My heart is crying, crying..."
* Delayed Family Acceptance: It's difficult for a character's family member(s) to come to terms with a revelation about that character.
* Delayed Narrator IntroductionThe narrator is only introduced partway through their own story
* Delayed Narrator Introduction: The narrator is presented as just that at first, only to later be revealed as an actual character in the story.
* Delayed "Oh, Crap!": It takes a while for someone to freak out as they should.
* Delayed "Oh, Crap!" Wait! Someone told me something scary! That means I'm doomed!
* Delayed Reaction: A character takes a while to realise the implications of something.

* Delayed Reaction: It takes a while for information to sink in for someone.
* Delayed Reaction: It takes someone longer to realize something than they should.
* Delayed Reaction: They take a long time to realize something everyone else has long since gotten, and therefore a long time to react appropriately.
* Delayed Reaction when he finds Perry the Platypus in his lair, and spits out his drink in shock.
* Delayed Release Tie-In: Merchandise for a delayed work is still released on schedule.
* Delayed Release Tie-InMerchandise for a work whose release has been delayed still gets released on schedule.
* Delayed Ripple Effect: Negative effects of changing the past take a while to come true.
* Delayed Safety Feature: A safety feature fails to activate until after it would have been useful.
* Delayed Seasons: An episode is set on the date it is aired rather than filmed.
* Delayed Streaming A particularly mild version of this is Spotify's option to let artists keep their music off the free tier for the first two weeks.
* Delaying Action while a joint Starfleet-Klingon fleet launched a Pearl Harbor style raid on several important Dominion shipyards and bases.
* Delaying Action: you have to hold your fort against repeated Zerg attacks until dropships arrive to evacuate your troops.
* Delaying the Rescue: The hero chooses to take their time with saving the damsel, because they've got other priorities too.
* Delaying your touchdown to tackle or foul opposing players can be a good way of improving your team's long-term position, but also risks your own player being knocked down or sent off, either of which ends your turn and lets your opponent regain the initiative.
* Delay of game infractions are charged on the offense when they allow the play clock to run out without snapping the ball as a way to prevent a team in the lead to just sit on the ball for huge chunks of time and make the game boring. The penalty is five yards. There are some occasions, though, when a team will intentionally get flagged for delay of game because they want to back up five yards to give their punter more space to punt the ball deep in the "coffin corner" (as close to the opponent's goal line as possible without crossing it - a punted ball that touches the end zone is called as a touchback and the opponent will get the ball at their own 20-yard-line). Usually this is when the offense stalls on their opponent's side of the field but not close enough to try a field goal and the line to gain is too far. It's becoming less common, though, as the opposing teams are beginning to decline the distance penalty. (There was also a brief trend of using the infraction to run out the clock, but the rules were quickly changed after that.)
* delay the coming of Kali Yuga - by killing. Every time he kills, Ravan says "Another thousand years, Kali..."
* Delbert McClinton he got to #4 on the country charts in 1993 as a duet partner on Tanya Tucker's "Tell Me About It". He remained a fairly popular artist regardless, having written Emmylou Harris's 1978 hit "Two More Bottles of Wine" in addition to winning a handful of Grammys.
* De-LEAR-ium (with Lear as Frank N. Furter, and Gloucester and Cordelia as Brad and Janet).
* De Leeuw Van Vlaanderen. The quality of this adaptation is outstanding!
* Delena cancerides, are not aggressive towards humans, although meeting one can be slightly surprising. They tend to happily eat roaches, flies, mosquitoes, and other pests in a house.
* Delenda Est, Harry makes a habit of using Fiendfyre, to the point that Voldemort considers it his trademark.
* Delenda Est, Harry might know what the dark lord is doing, but he can’t tell Orion and Cygnus about it until he’s got proof.
* Delenda Est, "Ollivander" wands are (rightfully) seen as far superior to "Wanda & Wandel's" and thus the latter goes out of business.

* Delenda Est that they sell their wands on the basis that people change over time and are no longer compatible with their old wand. They also claim that most of their customers buy new wands every couple years with some replacing theirs every few months. This is because their wands are mass-produced crap that is liable to stop working within months. Compare Ollivander's wands which are expected to (and usually do) last a lifetime.
* Delenda Est, when they threaten revenge, Deirdre pleads not the children, they had nothing to do with it.
* Delenn also had this trouble early on, although she got better once she fell in love with John Sheridan.
* Delenn and Lennier are prominent members of the Minbari Religious caste, though Minbari religion makes little outright reference to gods and seems more focused on personal enlightenment. That said, they do revere a sort of messianic figure in their history named Valen, and often swear in Valen's name,
* Delenn gave one in the first season to the other members of the Grey Council.
* Delenn in "Shadow Dancing" discusses what happens if a male Minbari continues to express interest in a female if she's not interested: "She can leave when he's asleep, file a complaint with the elders, even cut off his...access to her family."
* Delenn's first day as a full member of the Minbari Grey Council was the day the Minbari encountered the Earth ship
* Delerium's "Silence", the latter mix being used in the video, are both much better known than the original.
* Delerium, which Delerium is a side project of, featuring Kristy Thirsk, a regular featured vocalist with the latter project.
* De l'esprit des institutions militaires was considered a reference among French officers. And so on...
* Delete Censorship's intro shows what can come from quote mining the First Amendment.
* Delete: Daniel uploads his mind into the AI (it wanted to merge with him) as a means of passing his conscience along and stopping its attacks on humans.
* deleted final scene repaired, and Captain Picard ordering that it be taken out once more to a system "where no one has been before."
* deleted intro like he chopped off his fingers and he's actually fine. To fake the injury and not reveal his superpowers, Bob squirts some ketchup on his fingers and screams in pain.
* deleted of "Be Prepared". We see a close-up of his face during the last line, and in the next shot, we see his eyes in the sky, leering over the landscape where the next scene will take place.
* Deleted Role: An actor was involved with the work, but had all of their scenes cut from the final product.
* Deleted Role: The work credits an actor whose scenes were deleted from the final work.
* Deleted Scene (1954) has Esther doing a TV singing commercial for Trinidad Coconut Oil Shampoo.
* Deleted Scene (1997), Humbert gets sexually excited while tussling with Dolores on the sofa. She asks if he's ill because he's bending over while going up to his room. Humbert claims a toothache and quickly returns to the sofa.
* Deleted Scene after checking to find them all gone, with Homer gnawing on a link in the next scene.
* Deleted Scene, all start growling when Bart (who had recently been turned into a vampire) floats into the kitchen.
* Deleted Scene and says he can provide more vigorous assistance in future. So Tywin tells Pycelle to take his fish to the kitchen. (Tywin does however let Pycelle back on the Small Council, so it's just a matter of putting him in his place.)
* Deleted Scene: A scene filmed for a work that does not appear in the final version for specific reasons.
* Deleted Scene but the villain said he wasn't going to fall for that again.
* deleted scene, Charles projects an image of Erik wearing make-up, with a ginger

wig, dressed in a sparkly blue miniskirt, fishnet stockings, and go-go boots. When Erik wonders why Angel is giggling, Charles' response is a cheeky, "You've never looked more beautiful, darling."
* Deleted Scene episode "Cassandra", when Rimmer wants Kryten to be killed in his place, Kryten appeals to all the adventures they've had together. Whether this would have worked on hologram Rimmer is debatable, but the resurrected version just points out "I've only known you a week. I don't give a stuff."
* Deleted Scene flirts with Humbert, but when he talks about her going back to school they start arguing with the Bickersons doing likewise. When Humbert says bluntly that their holiday is over, causing Dolores to fall into a sullen silence, the announcer can be heard saying they'll be back after a few commercials for the Bickerson's in "The Honeymoon Is Over".
* deleted scene from late in season four shows Chris Keller moving back into Tobias Beecher's cell, thereby explaining why he is suddenly there again in a later episode.
* Deleted Scene from Season 3 also shows Tywin catching fish (the sigil of House Tully).
* Deleted Scene gets some extra character development that foreshadows this quite nicely.
* Deleted Scene had been publishing pictures of naked women for two years.)
* DeletedScene had it going even further, with them stripping and jumping into a hot tub.
* Deleted Scene has Echo programmed to secretly counsel a woman whose mother is dying of cancer, appearing as a sympathetic stranger who befriends her at a nightclub. By the end of the engagement, she's lying with her head in Echo's lap, as Echo strokes her hair. "You're my best friend and I love you."
* Deleted Scene (in cases where plot holes and such are caused by the relevant information being in a scene that was cut for time or other reasons)
* deleted scene invokes this directly with Bruce Banner explaining Dumbo and the Magic Feather to Thor in a dinner scene after they escape on the Grandmaster's ship.
* Deleted Scene involve the pair stopping at a "No Tell Motel", with the attendant first saying they're full before a ding comes from behind him. "Oh, looks like we have an early departure!" He also expresses admiration at the pair wanting the room for a full night.
* Deleted Scene is why Miranda doesn't like to share the elevator with anyone.
* Deleted Scene, it's not long before people are gleefully mocking it.
* Deleted Scene, it stares forlornly out of the window when Chris leaves on a date with Kristen. Thereafter, it resorts to looking up porn on Chris's laptop.
* deleted scene, Loki is displeased with a male servant who chuckles when Thor belittles spell casters ("Some do battle while others just do tricks"), so he metamorphoses the wine into three snakes, which causes the servant to yelp in fear. Loki thinks this is damn funny.
* Deleted Scene movie has Number Two vomiting upon witnessing Mr. Roboto getting eaten by the sharks, followed by everybody else in the room.
* Deleted Scene originally has Eddie Valiant gain an animated pig's head over his own head when he enters Toontown.
* Deleted Scene: Scenes that were cut from the final work, usually for timing purposes or because of an inconsistency, and are usually available on the home media release as bonus content.
* Deleted Scene shows what happens next: BOB lies down on the floor to fake an accident.
* Deleted Scene's third season has Tex mock O'Malley's use of a weather control machine in space by asking if he'd fight with space hurricanes, space tornadoes, space rain and space hail.
* deleted scene tendencies - the character is in his late 30s or early 40s, but often acts like someone who would expect to be Twerp Sweated.
* Deleted Scene that they do something rude then and there — it turns out she's wearing his repulsor glove and Stark wants her to fire it at an ice

sculpture.
* Deleted Scene this when Rocket Raccoon asks the original six Avengers why they didn't just blow up the mothership immediately and laughs when he learns they didn't know that this was the army's weakness at the time, as this is a well-known fact in his galaxy.
* Deleted Scene was actually trained as a dancer, so Fred was pretty good. Wesley... not so much.
* Deleted Scene was to have Wallace about to eat a wheel of cheese, but tells Gromit to make the slice smaller than usual. He, of course, eats the bigger part instead.
* Deleted Scene where he was ordered to shoot down a ship that may or may not have had civillians on board. Apollo swears he can see people moving in the ship's windows but Starbuck can't see anything.
* Deleted Scene, which would have massive implications for some of the more out-there moments in the series, but again, Moore just shrugs.
* Delete: General Overson is coerced into helping the AI by its threat to kill his daughter, who has a heart implant which it can hack. After he gets it removed, Overson immediately stops helping the AI, which then kills him.
* Delete: Lucifer made a second AI tasked to destroy the first based on this theory. The first easily destroys it.
* deletes Caroline's personality, the creators have waffled on the matter in various interviews, going from claiming that she was telling the truth to that she only might have been.
* deletes your character entirely if taken, for a very meta example of this trope. After suffering extreme enough injuries the ex-dead often end up retiring to the Tomb Colonies to avoid the awkward stares.
* Delete: The AI accuses humans of being unworthy to live as a result of our various misdeeds.
* Delete: The US plan risks this, since China says it will regard any nuclear blasts above them as an act of war.
* Delete: What would happen if the AI wins or the US destroys technology to stop it.

* Deliberate Values Dissonance: Deliberately depicting regressive or offensive views for the sake of historical accuracy vs. deliberately downplaying/omitting regressive or offensive views even if it doesn't make sense for the time period
* Deliberate Values Dissonance. Dragons lack a concept of emotional maturity or parent/child bonds, and those that express an understanding of it (like Tohru's father or Ilulu's dead parents) are merely imitating humans.
* Deliberate Values Dissonance has Bennet Drake, who is somewhat homophobic (he gets better). And of course lots of other, minor police characters who are varying levels of racist or sexist. This serves to emphasise how much ahead of his time Inspector Reid (and Jackson) is on most social issues.
* Deliberate Values Dissonance: Historical fiction should accurately depict such past attitudes, no matter how despicable they are today.
* Deliberate Values Dissonance in action. The "ancient sin committed by half their brethren" was to betray the Emperor and almost destroy the Legion (not yet separated into Chapters) in their own civil war while the Imperium as a whole was being torn apart by the Horus Heresy. Considering the other Legions that did so were declared heretics with orders to kill on sight, the Dark Angels justifiably fear that if the knowledge of so many of the Legion being traitors was to become widely known, they would suffer the same fate, and so their efforts to eliminate the remnants of those traitors results in erratic, unexplained behavior that makes them appear suspicious; other Space Marines Chapters follow their own agendas, but at least they're relatively open about what they're doing.
* Deliberate Values Dissonance: Outdated morals and values are part of the story because they match the setting.
* Deliberate Values Dissonance when she talks with surface-dwellers about their "fathers," a concept with significantly diminished importance in her society.
* Deliberate VHS Quality: No one before the 2010's would have romanticized the grainy, tracking line-ridden quality of an overused VHS tape, but due to the 80's nostalgia wave of this decade many in visual media used analog filming techniques such as this for stylistic reasons; standing in direct opposition to ever higher quality flat screen smart televisions on the market. This trope especially appeared in (but was certainly not limited to) music videos, and was a fixture in Synthwave

music.
* Deliberate VHS Quality: The film looks like it was filmed on VHS to make it seem more retro.

* Delicious in Dungeon: A band of fantasy heroes learn about cooking and surviving in a dungeon from a veteran adventurer.
* Delicious in Dungeon adds that she felt if she was going to tell them, then she'd have to give her whole life story along with it and she didn't have the time for that.
* Delicious in Dungeon adventurers get in, looking for treasure and killing as they go. Then, with their natural checks dead, those strong monsters start proliferating upwards, and when they reach the surface... well, it’s bad news for anyone living nearby.
* Delicious in Dungeon and death. Because they're so small, fast, and attack in large groups, it's extremely hard to deal with them.
* Delicious in Dungeon, and puts delicious piscine-type mermaid eggs into his friends' lunch without their knowledge. Chilchuck was horrified and later confronted Laios about this but they both agreed to keep Marcille, who is also strictly against eating anything demi-human, in the dark.
* Delicious in Dungeon and wonder how long it will be stuck in the painting. The extra ends with the warning "amateurs should never mess around with magic".
* Delicious in Dungeon are all really into eating food made from monsters, something that seems to be taboo in their world. Laios even debates Chilchuck about which humanoid monsters they can eat before it becomes too close to cannibalism.
* Delicious in Dungeon, as a lot of his decisions about monster cuisine seem to boil down to "let's find out if this is edible".
* Delicious in Dungeon. Both are blonde as well as being friendly, kind, well-

intentioned and selfless.
* Delicious in Dungeon both suffer major freak outs when they find out Laios added fish men eggs to their porridge. Apparently they made it nice and crunchy.
* Delicious in Dungeon certainly looks the part. Later chapters confirm he hails from the East.
* Delicious in Dungeon, despite being a series about dungeon crawling and the occasional mention of monster levels, nobody ever talks about stats or refers to the world as anything other than completely real. Things like mana, dungeon loot, and experienced adventurers are real factors in the world, but they aren’t gamified — nobody ever quantifies mana in “points” and “experience” is just the usual knowledge and skill one gains while learning how to survive a dangerous place.
* Delicious in Dungeon, dwarves value blacksmithing and mining above all other professions. Senshi's seen as an oddball at best for eschewing those in favor of hunting, cooking and farming.
* Delicious in Dungeon, elves and dwarves fought over the ownership of the island. The elves won, but handed it over to humans because it was too big to take care of.
* Delicious in Dungeon. Everyone who has tried it so far has raved about how delicious it is. Part of this is because he’s been doing all his own cooking for over a decade, and knows not just how to cook things but the best way to cook them; the other part is that ingredients gathered from inside the dungeon just taste better the deeper the level you get them from.
* Delicious in Dungeon except for a Japanese party (or at least their world's equivalent) consisting of a samurai and his retainers. Makes sense that the creator, Ryoko Kui, would want to use some of her own historical tropes in her work as well as foreign ones.
* Delicious in Dungeon features many races as befitting fantasy story:
* Delicious in Dungeon for quite a while before the events of the series finally gave him a chance to try. Still, he fully understands how dangerous they can be, and his repertoire of monster facts has helped the party out more than once. Also cheerfully admits to an attraction to orc women.
* Delicious in Dungeon has Chilchuck. As a thief, his expertise lies in disarming traps and picking locks, not fighting, although he can hold his own when needed.
* Delicious in Dungeon has Falin and Marcille. They met at magic school.
* Delicious in Dungeon has gone into one after Falin's loss, neglecting food and sleep in his single-minded efforts to save her.
* Delicious in Dungeon has hair that hangs below her waist. Apparently maintaining it well is key to being a good mage.
* Delicious in Dungeon has harpies, merpeople and dryads, all dungeon monsters with human faces but non-human bodies.
* Delicious in Dungeon has Kabru, Kiki and Kaka. All the people in Kabru's village had the same dark skintone, but we're never actually told where the village was. The series hasn't revealed anything about Kiki and Kaka's past before they were adopted.
* Delicious in Dungeon has Laios dumping info on monsters, Senshi on cooking and proper nutrition, and Marcille on magic.
* Delicious in Dungeon has piscine-type merfolk who attach water plants to their heads to store their eggs.
* Delicious in Dungeon has Senshi, Marcille, Chilchuck, Namari, Kabru... really there are more characters known by only one name than there are those with full names.
* Delicious in Dungeon have axes as their weapon of choice. Even Senshi, who's much more interested in cooking than combat, uses one. He doesn't maintain it very well, however.
* Delicious in Dungeon have their own bonus page or two giving some extra facts about the monsters the party have encountered, or just life in the dungeon in general.
* Delicious in Dungeon He mentions that he hadn't stuck with the party the rest might have given up early rather than risking their lives.

* Delicious in Dungeon. He says that his only reason for following Laios and Marcille back into the dungeon is because he agreed to complete the job and was paid in advance; since they didn't slay the Red Dragon, his job isn't complete, and he's bound to Laios via his own terms. That said, it's apparent he actually cares about the rest of the party.
* Delicious in Dungeon. He sees people who claim to work for free as the least deserving of trust as there is nothing in place to ensure it, and the way things are set up for adventurers jumping from one job to the next based solely on pay and not completion is the fastest way to end up with no jobs other than potentially criminal ones. Things just do not work out well for anyone but those who approach the matter as anything other than employment.
* Delicious in Dungeon However it's obvious, Chilchuck is simply worried about losing his friends.
* Delicious in Dungeon, human knight Laios is the leader of the party, and while not unnaturally large by any means, is indeed very tall, towering over every other adventurer introduced so far and even most humanoid monsters.
* Delicious in Dungeon, if a corpse is not resurrected quickly enough and the spirit separates from the body, the spirit will become a ghost and the body will rise as a zombie.
* Delicious in Dungeon, in the original Japanese, humans are written with the kanji for "human", but the pronounciation guide says "tall-man" in English. The official English translation uses the latter. They're also nicknamed "long legs", particularly by shorter races like the dwarves.
* Delicious in Dungeon into delicious, wholesome meals. This leads to whole lot of bizarre recipes that range from Giant Scorpion and Walking Mushroom Hotpot to Mandrake and Basalisk Omelette.
* Delicious in Dungeon is a better idea than trying to survive on nutritionally limited rations from the surface.
* Delicious in Dungeon is appropriately excited to eat them and Marcille equally appropriately freaked out.
* Delicious in Dungeon is basically a house sized squid. It's even prepared and eaten like one.
* Delicious in Dungeon is not much of a physical fighter, but let her get to a safe distance to work her magic and watch her mow down monster after monster with her spells.
* Delicious in Dungeon is that monsters' urge to kill always overpowers normal self-preservation instincts. Monsters will never stop attacking until they're killed, will attack even if clearly outnumbered and outgunned by their target(s), and unlike regular animals, don't retreat if injured by their quarry or their initial attack fails.
* Delicious in Dungeon is this. As a child, she was capable of taking on a spirit with no training whatsoever while resisting possession and communicating with it - a rare trait that set her towards the path of being a cleric when combined with her endless compassion.
* Delicious in Dungeon it's possible to mix souls of humans and animals to create chimeras. Said chimeras will have physical features of both creatures used to make them.
* Delicious in Dungeon it's suggested that the main reason Team Touden succeeds where other parties fail is the simple fact that they eat well and get regular sleep, where said other adventurers survive off rations and delve 24/7.
* Delicious in Dungeon: Kabru touches his chin or face whenever he gets excited.
* Delicious in Dungeon, Laios jumps into a living painting to try and eat the food depicted there. He manages it, but when he jumps back out the food disappears and he's left hungry again.
* Delicious in Dungeon, Laios's hair and eyes are the same muted blonde/gold.
* Delicious in Dungeon, like a tiny set of nipple bumps buried beneath her fur.
* Delicious in Dungeon, like chunks of the surrounding room, making onlookers think he's petrifying them before they notice where the victims end up. He can also more directly harm enemies by replacing slices of their flesh with thin objects like

planks of wood.
* Delicious in Dungeon lists of ingredients will usually start out ordinary (oil, salt, vegetables, etc.) only to throw in some monster parts (giant bat flesh, sliced kraken parasite, dryad fruits) as the main ingredient.
* Delicious in Dungeon — the only desire he has left is the desire to get revenge for what it did to him.
* Delicious in Dungeon never lets up her perky persona even if it's in the middle of a battle.
* Delicious in Dungeon. Nonetheless, he still has a few traditional dwarven elements in him, such as a distrust of magic and favoring an axe.
* Delicious in Dungeon, one of the bonus pages shows Laios standing in front of a cabinet that's full of odd specimens, some of the humanoid, preserved in jars.
* Delicious in Dungeon, one of the first monsters Team Touden encounters and subsequently eats is a giant scorpion. They make it into hotpot.
* Delicious in Dungeon, one of the Marcille's states that has mostly gotten over her issue with eating monsters, after having eaten all sorts of things like merfolk eggs. Laios realizese she is the doppelganger Marcille not due to that but due to her casually pouring out boiling water, an action that earlier in the story nearly got her killed by an angry Undine. Marcille assumes that the merfolk eggs are what tipped Laios off, but is horrified to learn that that part was true, Chilchuck just made Laios keep quiet about that.
* Delicious in Dungeon or when all of them, bar Senshi, where possessed by spirits.
* Delicious in Dungeon, Senshi sees little value in anything that isn't directly related to cooking. He tells Marcille and Chilchuck to throw out a bunch of "inedible treasure bugs," only mentioning offhand that they are actual pieces of treasure. Not long after that, Laius notes that treasure bugs in good condition can sell for a lot of money to insect collectors, which gets Marcille and Chilchuck very annoyed that he didn't tell them this before they ate them.
* Delicious in Dungeon (she’s getting better, though). She actually joins the Thorden party hoping they know a way to separate the cat soul from hers.
* Delicious in Dungeon, Shuro's party consists of a group of badass female retainers, each an elite warrior in her own right.
* Delicious in Dungeon, Team Touden encounter a patch of these and, after beating a few, make a tart of them.
* Delicious in Dungeon, the first living painting the party encounter is a portrait of a woman whose eyes follow them from panel to panel.
* Delicious in Dungeon. The manga centers on a particular party crawling a specific dungeon, and in doing so examines all the questions people don’t bother to ask about them. What separates a dungeon from a regular old ruin? What does a sudden influx of valuable dungeon loot do for nearby towns? Where do the monsters come from, and how do they survive down there? How can dungeons be in such good repair after decades or centuries without human maintenance?
* Delicious in Dungeon, the orcs call humans, elves, dwarves, and halflings, long-legs, long-ears, depth-dwellers, and little men respectively.
* Delicious in Dungeon the party finally slays the Red Dragon, gets Laios's sister back (with complications), and is preparing to return to the surface with the mission a success. All's well that ends well, right? But then a dark elf who is apparently the Lunatic Magician who rules the dungeon appears, drops most of the party through a hole in the ground to what is almost certain death, and takes Falin away, having plans for her as she is now half-dragon (due to being revived by Marcille using the red dragon's corpse as components. Now, Laios begrudgingly accepts that they have to return to the surface to restock on supplies so they can tackle the dungeon again and save his sister. Again.
* Delicious in Dungeon. There's absolutely no denying the skill and strength of the entire party, which is doubly impressive because they're lacking one of the most critical things for a party - a cleric. Their original party would've killed the Red Dragon had it not been for severe hunger, and ex-member Namari outright admits to having killed dragons before.
* Delicious in Dungeon the suits Team Touden made out of the giant frog skins ended

up like this. They didn't have enough time to tan them properly so the blood ended up sticking to their clothing. They ended up removing them between chapters. Marcille mourns that the outfit she was wearing underneath the frog skin was unsalvageable.
* Delicious in Dungeon, the times Senshi has supported the use of magic over more mundane methods of achieving a goal are incredibly rare, putting him at odds with Marcille regularly.
* Delicious in Dungeon the titular dungeon is full of hostile fauna and flora, plus numerous traps. Only the more experienced adventurers make it past the first few floors, even with their significantly weaker monsters.
* Delicious in Dungeon. They're both highly capable and Mr. Tansu also works a second job as advisor to the Island's lord.
* Delicious in Dungeon, this is considered one of the Forbidden Magic. It is explained that there is a separate universe filled with limitless energy, and the magic brings that energy to the world. The dungeon is also said to be created with similar magic.
* Delicious in Dungeon, this is the go-to way to kill undines. Which is kind of odd, considering they're water spirits.
* Delicious in Dungeon. This trope, framed as the food chain, is actually the lesson of the chapter.
* Delicious in Dungeon views himself as one. When the party runs low on food, he blames himself for "not being able to provide food for the youngsters".
* Delicious in Dungeon, walking skeletons are a type of monster that can be found in the titular dungeon. They occur when a dead body is possessed by a wandering spirit and, because the ghost inhabiting it isn't the right one, the flesh rots off.
* Delicious in Dungeon, when Marcille needs to cast a high-level spell complete with a runic circle, she undoes her hair first.
* Delicious in Dungeon who's spent most of his life inside the dungeon honing his cooking skills and learning to identify the best ingredients, anyone who actually tries a bite invariably finds it delicious. This also gets discussed a little: some of the ingredients he uses, such as dried slime and treasure bugs, are considered perfectly normal delicacies in other parts of the world, and one character tentatively trying bicorn brain doria warms up to it after comparing its taste to milt, weirding out another character that she'd happily eat fish testicles but hesitate about brains.
* Delicious in Dungeon will always stop to help other adventurers in distress despite the fact they're on a severe time limit of getting back to the Red Dragon in time to save Falin before she is digested.
* deliciously-trained peons when the player uses the elevator and player doesn't notice til they actually left it.
* De Lift is centered around a killer elevator ("For God's sake, take the stairs").

* Delightful Dragon: Not all dragons are bad, we can be good guys too.
* Delightful Girl Choon Hyang: A modern retelling of a South Korean Tale of a rich man's son and a courtesan's daughter.
* Delightful Girl Chun-hyang. The main characters' friends determine that as Chun-hyang and Mong-ryong are getting married, they might as well learn to tolerate each other. (This being the second or third episode, it of course doesn't work).
* delightfully ironic T-shirt that had a picture of a football with the caption "Soccer" underneath.
* Delightful Wallpaper is a version of this, with the PC (apparently invisible to

the NPCs) placing various "intentions" around a mansion which drive the guests to kill each other.
* Delilah And The Space Rigger has the consternation caused by the first woman working in a space station, but one of the main characters explains it's necessary for women to be part of space exploration. When the narrator says the woman should listen to what the engineer tells her because he is good at his job, she replies "I know. I trained him."
* Delilah Copperspoon is conducting a ritual to hijack the body of Empress Emily Kaldwin using a painting of her.
* Delilah Dirk and the Turkish Lieutenant set in the Ottoman Empire in 1805.
* De Lillo doesn't introduce the plot device "Airborne Toxic Event" until about a hundred pages in. The first segment of the book introduces characters and sets up key themes, and it's both funny and insightful, but there isn't a ton of plot there.
* Delinquency of the Red Dragon, you can almost guarantee that somebody's going to try and beat the hell out of him (with an almost non-existent rate of success).
* delinquent, and once his future coach heard about him he decided to fist fight Sendoh to try recruiting him for his gym. It worked.
* Delinquent Hair: The trend of young men's hairstyles combining spikes and dye. "Frosted tips", or spiked hair with the ends bleached-blond, became as much of a style icon of the late '90s as big hair was in the '80s.
* Delinquent is obsessively fixated on Sayuri Amamiya, though more than willing to help protagonist Riku find his true love with her.
* Delinquent schoolgirl with the student wondering where they are and another saying the two of them are on a date.
* delinquents. Mamoru Banba also got several facial scars after his mysterious summer training.
* Delinquents: There's often some overlap between schoolyard bullies and juvenile criminals.
* Deliora, the demon responsible for Gray's childhood trauma, inhabiting the corpse of his father. In actuality, Silver was brought back to life as his own self by the necromancer Keyes, and was a good person who wanted Gray to put him out of his misery.
* Delirious. A booker for Ring of Honor and wrestled for CHIKARA from 2010-2014 and for other promotions. He still occasionally wrestles.
* Delirious and his so called Pantheon of gods and became the aforementioned Jimmy Jacob's enforcer in Age Of The Fall.
* Delirious angry, using more heelish tactics and weaponry, and even spitting poison mist in people's faces.
* Delirious, as he will talk very fast with a mixture of words and utter gibberish, though, like most wrestling promos, his usually boil down to him saying he is going to defeat whoever his opponent is that night.
* Delirious bit Adam Pearce's ear in retaliation for Hang Men 3 stapling his mask to his skin and hanging him with a chain.
* Delirious (even more later when Nintendo actually did "upgrade" to such with the Wii U).
* Delirious has also worn some disguises in her efforts to aid Delirious...with mixed results.
* Delirious initially just screamed a lot before he met Delirious and also became known for unintelligible babbling.
* Delirious. It was assumed by a repentant UltraMantis that simply removing Delirious of this control would solve all problems but instead Delirious wanted revenge, first against Black, and then against society in general, leading him to join what seemed to be an end of the world cult.
* Delirious just so he can crash through it on horseback into the bad guys' lair to save the girl.
* Delirious matches where he is allowed to idle or otherwise given breathing room, he tends to talk to himself and laugh.
* Delirious might have been their most famous song in America. It was mellower than

their other hits and was also more of an old-timey praise chorus song than a contemporary worship (a genre they helped popularize). Martin Smith didn't think it was one of his best songs, either. They later released a rocked-up version of it.
* Delirious Misidentification: Someone is "not all there" (high, seriously injured, etc) and mistakes someone else for a different, specific person.
* Delirious powers to remove Robert Wagner from his immediate vicinity (rather than killing him)... by sending him to Cleveland. He later returns:
* Delirious, prompting this exchange: "You watch this crap?" "No, I write this crap."
* Delirious's first and last opponent in Gateway Championship Wrestling was The Irish Luchador Billy McNeil.
* Delirious sometimes wrestles without boots or socks, though it doesn't seem to be a consistent thing and with him, not much is consistent anyway. It is probably less disliking shoes and more liking working up a sweat and using his smelly feet for an advantage.
* Delirious, this despite the fact that he already wears a mask with tassels hanging off it.
* Delirium (2018) has been hidden in a secret chamber under the pool for nearly twenty years, and has been quite driven mad by the experience.
* Delirium (2018) is about a former psych patient who's trying to determine if his house is haunted, or he is.
* Delirium At age 18 everyone is required to get a surgery that removes the capability to love from their brain. As a result, most adults show and understand very little emotion, and in some cases get so emotionally detached that they will kill their children.
* Delirium. At the age of 18, all citizens are required to have a surgery that removes from them the capability to love.
* Delirium or hallucinations may be considered a sort of brain fever. Dehydration, lack of sleep, and overexertion can cause such effects. It could be a case of getting cause and effect the wrong way round—high temperatures caused by an infection not directly related to the brain can cause delirium or mental disturbance, especially in children.
* Delirium Series. Love itself (the novel's focus is romantic love, but it's made clear that it applies to all love) is a mental illness, and objecting to the "cure" is considered criminal.
* Delirium Series, most people who have left civilization to live in the wilds go by nicknames, such as Raven, Tack, Roach, Blue, and Squirrel. On the other hand, Hunter goes by his real name, although he's no good at hunting.
* Delirium Series, this trope is why love is said to be the reason for all of humanity's past ills. As a result, it is classified as a disease, amor deliria nervosa, and at 18 every person is required to get a surgery to cause them to be unable to love.
* Delirium wandered into one of these at the beginning of the "Brief Lives" arc of
* Delirium when Lena touches the hand of the handsome security guard, she describes the feeling as: " a tiny electrical shock buzzes through me, and I pull away quickly."
* Delissio (the Canadian name for DiGiorno pizza) did an ad on the same theme. The punchline was that the woman and the "pizza delivery guy" were a husband and wife role playing, and their kid walks in and corrects them about it being delivery (saying the tagline "It's not delivery, it's Delissio/Digiorno") along with "And you're not a real pizza delivery guy, DAD. No wonder I don't have any friends."
* Deliverance as the scientist who built the rocket was killed off, and the survivors would know that only aliens capable of interstellar travel would have the knowledge to repair it.
* Deliverance, Bobby is the first to agree to bury the dead rapist mainly for this reason.
* Deliverance, four yuppies go on a canoeing trip in the backwoods of Georgia and run afoul of the local hillbillies. One of them gets raped, another dies when going over a waterfall, and the three left alive have to defend themselves from a sniper

up on a cliff.
* Deliverance from Damnation: A person can be rescued from Hell and brought to Heaven.
* Deliverance from Damnation: It is possible to rescue a person from Hell and bring them to Heaven
* Deliverance from Damnation: That character was damned, but others' prayers and/or their own virtues brought them from Hell to Heaven.
* Deliverance has been dubbed three time in Czech. The first dub was producd by Barrandov Studio for Warner Home Video in 1991. The second dub was made in 2001 for TV Nova. The third dub was produced by Czech Television in 2011.
* Deliverance Lost sneaks out of the Isstvan system by shutting down almost every system, leaving the crew cold and dark for days. It's not explicitly stated how it helps escape detection, but a reasonable assumption is that the ship is minimizing its electromagnetic signature.
* Deliverance— after the famous "Dueling Banjos" scene, Drew goes to shake the boy's hand; he is snubbed.
* Deliverance. The Appalachian camping industry was nearly bankrupted following the film's release.
* Deliverance the guys stop at a creepy gas station with a creepy gas station attendant... and a kid who plays the banjo. The gas station attendant dances along, creepily.
* Deliverance: The only thing worse than the savage mountain men is the brutal and unforgiving nature of the wilderness itself.
* Deliverance was based on the author's real-life experiences rafting in Appalachia. Massively inverted in that the locals were incredibly helpful, and were excited to hear he was writing a book about the area!
* Deliverance. While the wilderness itself is portrayed as a far greater threat, the film's human villains, a pair of hillbillies who hunt the protagonists and rape one of them, quickly became one of the most iconic elements of the film. Banjo music has never been the same.
* delivered a speech immigrants instead of illegal immigrants from Latin America. Watching the descendents of those immigrants call for their own deportation is incredibly hilarious.
* Delivered by Nick Fury to rouse the Avengers into continuing the fight.
* Delivered by the character Culverton Smith in BBC Radio 4's production of the Sherlock Holmes story, 'The Dying Detective', when he realizes

* Deliver Us from Evil features a scary jack-in-the-box (and the accompanying tune, "Pop Goes the Weasel") multiple times.
* Deliver Us from Evil Series seems to be a lot kinder after the events, and glad to have a friend like Watson.
* Deliver Us from Evil Series - the two men are shown to be equally clever.
* Deliver Us From Evil to have kiddie porn on his laptop and several storage devices. In 2012 he was sentenced to just three years in prison for it.
* delivery altered, to turn it into a song about the KGB watching someone.
* delivery bot is upgraded in one of Shaw's commercials, the shot shows the shadow of the transformation process cast upon Bit and Bud's reactions.
* delivery bots is upgraded in one of Shaw Communications' ads. Bud covers Bit's eyes with his clipboard to prevent him from seeing the supposedly unpleasant upgrade process (which includes lots of mechanical whirring noises) and Bit moves up and down to peek around Bud's clipboard.
* Delivery cartoons, saying that his character will die if one falls on them.
* Delivery Doug's egg salad restaurant commercial, seen in "Teach a Man to Ice Fish", looks about as cheap as you'd expect from someone who downgraded from a back-alley restaurant to two locations in a desolate area, with people in egg and egg sandwich costumes, terrible special effects, and a jingle taken straight from Doug and Debbie's combined egg salad pizza business in "Mystic Egg Pizza" and repurposed with new lyrics.

* Delivery Guy: A man with no medical experience takes up the role of midwife.
* Delivery Guy Infiltration: If you want to get into the enemy base, just pose as a delivery guy.
* Delivery Guy Infiltration: Someone is disguised as a courier, deliveryman, or mailman in order to infiltrate some restricted area.
* Delivery of the Dead features zombie girls after a zombie apocalypse being used as prostitutes for the erst of the paying public. The girls are effectively dead, given they don't have true cognition and they're just going through motions, but their services are so appreciated that an entire subset of humanity is willing to marry them and restore human rights to the undead.
* Delivery Stork and Cabbage Patch Babies, while Lelouch looks on in stunned disbelief.
* Delivery Stork: A stork delivers babies - may deal with the myth or depict a stork actually delivering babies.
* Delivery Stork to his mother helps celebrate the occasion by singing to him, which also gives Mrs. Jumbo the opportunity to name him.

* DeLorean Motor Company wanted to release a 4-door counterpart of the DMC-12, but the vehicle never made it into production, due to a lack of funds for engineering it.
* Delorean. The film also parodies Mc Donalds' corporate trademarking by having scantily-clad women eat pixel-blurred hamburgers with lusty gusto.
* Delovoy Tsentr is a very recent example. Two new island platforms were built

next to each other to serve trains branching there from lines 8A and 11 from different directions, creating an incomplete (since tracks of different directions don't connect near this station, just come close enough and then go parallel into it) triangle. These lines opened as a short 2-station single track, with the southern part of the station operational, then extensions to Petrovskiy Park (11) and Ramenki (8A) opened. After some time, northern platform was finished, and it was decided to run southbound trains from line 11 there instead of northbound from 8A by using the new part of the station - meaning the line 8A-side platforms were closed after mere months of service, somewhat similar to the Charing Cross example. The southern half of the station is now temporarily fenced off with corrugated metal sheets. Or maybe not so temporarily - see below.
* Delphic Expanse spheres were moon-sized devices that could create spatial anomalies when networked together.
* Delphinus is a possible example, but it's not entirely clear whether the weaker mass-produced equivalent (the Spectre-class battleships) are scaled-back mass production versions or the immediate predecessors of the Delphinus.

* Delta Clipper was an attempt to make a reusable rocket SSTO. A prototype was built, but the program was cancelled before any actual single-stage-to-orbit vehicles were produced.
* Del Taco aired a series of radio advertisements timed to coincide with Thanksgiving 2006, featuring two turkeys being interviewed for a faux radio show explaining why Del Taco's "cooked golden brown" line of chicken-products would be better for consumption than their own kind.
* Delta Flight DL431/DL302 out of San Juan, Puerto Rico to New York City, On September 5, 2017. It landed in San Juan at 11:58 am and took off less than an hour later at 12:43 pm. This sounds routine, but at the time, Hurricane Irma was lashing the Island. The plane was flying in the relatively narrow gap of calm air between the outer band and the core of the second most powerful hurricane in the history of the Atlantic Basin. It maintained itself in the narrow band of calm air for over 400 miles.
* Delta Flyer, compete in the Antarian Trans-stellar Rally, a spaceship race over a course of two billion kilometers.
* Delta Force 2: The Colombian Connection, five people (including a cameraman and one of the actors) were killed in a helicopter accident and two others were injured when the engine failed.
* Delta Force 2: The Colombian Connection, Ramon Cota, and become his second in command. However, he gives himself up when he sets up Cota's arrest during his flight on a private jet, because he was the only person Cota told about it.
* Delta Force commander Pete Blaber authored a book titled: The Mission, Men, and Me. The title comes from his junior officer days where his commanding officer taught him that a good Army Officer always cares about the Mission, his Men, and finally himself, in that order.
* Delta Force Land Warrior, a taciturn and eternally scowling Navajo counter-sniper. While all of the playable characters had voiceover responses in the game, Longbow's were uniformly brief to the point of bluntness.
* Delta Force of their skull, since at that range it won't explode, but will do enough damage to kill the recipient.
* Delta Force still uses the M1911A1 today alongside Glock handguns in 9x19mm Parabellum.

* Delta Force. White House Down offers a particularly glaring example, as the entire White House is taken over be a mere handful of terrorists who suffer no casualties in the process
* Delta Goodrem almost entirely, if the verses didn't save it so much…The chorus for your reading pleasure:
* Delta Goodrem- Believe Again is this, 40 seconds introduction definitely makes it harder for casual listeners to enjoy.
* Delta Goodrem can barely sit still during her interviews and appears to be endlessly bright and cheery.
* Delta Goodrem, features a video showing Brian going to meet Delta at an airport. The two of them have difficulty finding each other, until Delta leaves in a taxi. In the "sad" ending, shown on music TV shows, she is driven away alone. The CD single has the video on it as CD-ROM content, and this version has the "happy" ending where he catches up with the taxi and they're reunited.
* Delta Goodrem - "I Can't Break It to My Heart" ("If I still believe you love me / Maybe I'll survive / So I tell myself you're coming home...") also ''Lost Without You".
* Delta Goodrem. Once she had the all clear, she grew it back as quickly as she could.
* Delta Green). Actions against Nazi occultism in World War II played a significant role in the eventual state of Delta Green.
* Delta Green. Although it mostly stays in the background and leaves the affairs of the cults to its subordinates.
* Delta Green among others, PCs and NPCs tend to have a rivalry because most will have a government background.
* Delta Green and MJ-12 used to have this in the short period where both officially worked for the US government. The rivalry continued after Delta Green was disbanded, although more hostile and lethal.
* Delta Green, and recommendations of themes, history, modus operandi and ways to not create something too cliché, generic or unrealistic that could look it was one of the "official" Delta Green groups.
* Delta Green (an organization of escaped Nazis), composed by Nazi fugitives in South American and Middle Eastern militaries, criminal cartels, white supremacists, neo-fascists, neo-nazis and anti-zionist jihadis.
* Delta Green becomes after they are disbanded. Later a faction refuses to become official so they can keep their vigilante status.
* Delta Green. Delta Green and Majestic-12 in the United States, PISCES in the UK, GRU SV-8 in Russia and... M-EPIC in Canada. Even more interesting, the heads of governments from the US and UK aren't aware of the groups, which means the Prime-Minister of Canada is one of the few world leaders aware of the monsters that lurk in the shadows and threatens mankind.
* Delta Green facilities are located inside Area 51, although it's not Area 51 itself.
* Delta Green (First a campaign setting, later became its own standalone game)
* Delta Green has less tendency of this happening in-universe, as it's stated the unnatural is rare (albeit extremely dangerous), but this trope comes from time to time.
* Delta Green if the players are unable to escape the masquerade the King In Yellow will be unmasked revealing the truth of the universe. The party's attendants will then rush the Agents, strip them naked and dress them in stage clothing and make-up, they will be taken to a stage. As the curtain opens it will reveal every PC and NPC encountered during the campaign and they will clap, the Agents will then realise they are wearing the same clothes they had in 1995 when they first met investigating disappearance of Abigail Wright, the back curtain will open to reveal the set: Abigail's room in the MacCalister building, where the Agents first started the investigation 20 years ago and where they started the campaign. A man will start mouth the lines from the King in Yellow play, the same the agents said long ago. The Agents are now forever part of the play, which they created. The Game Master finishes by reciting a poem, and then the curtain closes.

* Delta Green in a nutshell. Is humanity screwed six non-Euclidean ways from Sunday? Absolutely. But that doesn't mean you just lie down and let it happen.
* Delta Green is described as keeping his lab exceptionally clean. Lampshaded, in that the book points out this is usually the sign of a proportionally unclean mind.
* Delta Green is receiving an overhauled edition, with specialized rules. Additionally, the game will update the setting from where it began in the 1990s to modern times; as the players are federal agents and federal law enforcement has changed dramatically since then.
* Delta Green - its front organisations got taken apart on a regular basis, various wars ended up gutting it, and its unaging leaders tended to get out of touch and fixated on old grudges, most notably when they dedicated quite a lot of effort to finishing off the House of Habsburg long after they stopped being politically relevant. Following the First World War, they gave up on taking over the world and retooled themselves into a free-sprawling cult of Nyarlathotep, backing a whole bunch of groups in a bid to mess things up.
* Delta Green rulebook has a quick guide on the rules for different methods of getting rid out of of bodies, from dissolving in a polypropylene barrel to dumping the body into the water.
* Delta Green's rival, Majestic-12, has a lot of those, dedicated to researching Grey technology. They are usually within larger U.S Military, CIA, NSA, NRO and March Industries facilities. One of their facilities is located in Area 51 (Although is not Area 51 itself).
* Delta Green. The new standalone game states that part of the job is already done, even in the world of the internet and smartphones: Most manifestations are very rare by itself, occurs in private or isolated places, society is naturally skeptic about anything supernatural and Delta Green itself supress the rest.
* Delta Green. They're staked out on a plantation in the depths of the Amazon, usually work through modern neo-Nazis, and most of them have one foot in the grave - though, in an aversion of the "fading threat" bit, one of them's stayed young and immortal due to cannibalistic practices and may end up being the future of the group.
* Delta Green threats. Its British counterpart is PISCES (Paranormal Intelligence Section for Counter-intelligence, Espionage and Sabotage).

* Delta Green who are US Marines. Professions range from FORECON (Force Recon) operator, Maritime Special Purpose Force operator, Security Force Regiment security and even a Division of Public Affairs Combat Camera personnel. USSOCOM operators can also be Marine Raiders.
* Delta Green with sinister guys in sunglasses, all trying to intimidate each other.
* Delta Green, you are a part of the Conspiracy. Your job is keeping the Cthulhu Mythos in check as much as possible and keeping the population from knowing about it while working at some other US Government agency. The Conspiracy Theorist is an insanely common thorn in your side; typical MO is to feed them something stupid besides the truth to keep them busy.
* Delta Green; your big guns might win some battles against some small fry, but everyone is powerless to stop all the influence from the Great Old Ones, and in the end, they can't and won't be beaten.
* Delta has done many more safety videos like this one since then, including an
* Delta House, went beyond canned laughter to canned wolf whistles, canned villain-booing, etc. in a vain attempt to capture the feel of the movie.
* Delta of Venus concerns a young man named Pierre who finds the body of a lovely young woman who has just drowned. Overwhelmed by the beauty and sensuality of the (fresh, still-warm) corpse, he makes passionate love to it then and there.
* Delta Rae, a mob breaks into a woman's house and seems like they're going to lynch her, presumably for witchcraft. While she's dragged off in chains, she does not seem to despair for long; her bindings eventually disappear, and while we do not see what happens to her captors, when the camera returns to them they've been

either struck down or have disappeared completely, leaving only their masks.
* Delta Rising between the players and Borg Cooperative, the Borg Collective, the Undine, and the Voth.
* Delta Rising is the BEST Expansion ever and the players LOVE it!" (the statement was even taken out of context). At least one dev has spoken up about it and the players at r/sto will most likely downvote you to oblivion if you post anything like that.
* Delta Rising. VSW most likely stands for Vaadwaur Supremacy Warship.
* Deltarune. After Ralsei asks to see it, Kaard mutters "No" and runs away.
* Deltarune, also by Toby Fox, are full of meme potential. Lancer and Jevil are massively quotable, particularly the latter as he is fully voiced with rather distinctive voice clips.
* Deltarune and convincing Ralsei to heal him he immediately attacks the party, resulting in either Susie or Lancer intervening.
* Deltarune, and Officer Undyne expresses a whimsical desire to see a bank robbery "so [she] can suplex" the perpetrators. Thinking it through, she realizes she's not sure that Hometown even has a bank and changes the idea to building a bank, first...
* Deltarune, as freeware, and similarly requested that players refrain from talking about it online for the first day of its release.
* Deltarune, but judging by the fact that she's still allowed to attend school it's presumable that she has yet to put any such threats into action.
* deltarune features the Spades King, a boss with a mouth belly full of sharp teeth and a spades tongue - which he utilizes in his attacks.
* Deltarune has Lancer. He's energetic, happy, and loves fooling around.
* Deltarune has one of its own called "Darkness Falls", serving as the game over music if the player says no to the continue screen. The game closes after it's over.
* Deltarune. He's even called "Azzy" by several characters, a name commonly given to him in fan works.
* Deltarune is an even straighter example, with checkerboard decor, classic waitress uniforms, and the Southern accented rabbit shopkeeper at the counter who calls Kris "Hun".
* Delta Rune, is. Bratty and Catty, two best friends, are also now hateful next-door neighbors.
* Deltarune. Seeing as there is only one chapter released, this is the character's last appearance so far.
* Deltarune. The game portrays the idea of fate and destiny in a scary and pressuring way. You don't get to choose your character and you don't get to choose how you play the game. Nowhere in the game do you actually have free will or make any impactful choices. In the ending, Kris tears out the SOUL from their chest, seemingly so they can have free will and a choice of their own, even if it's sinister or psychopathic, since Kris may not have wanted to be good or be a hero in the first place.
* Deltarune, then it goes back to normal with the last choice being cold.
* Deltarune They hold it up almost triumphantly, before flinging it into a birdcage in the corner of their room.
* Deltarune will be put to sleep by Ralsei, using his Pacify spell. But right before he falls asleep, the King utters his final words to Ralsei:
* Deltarune works as a mascot selling "pezza". In his own words, he has been told:
* Deltarune" your mom last night. Including the quotation marks. Turns out he's talking about when she came to the grocery store to buy chocolate kisses.
* Delta Squad are often split up into pairs, but when the four of them get together, they're practically unstoppable.
* Delta Squad probably takes the cake for the most Badass Crew from the Galaxy far, far away.
* Delta Squad series Flesh Tearer and Flame Genesis both use miniguns as their primary weapons. While Tearer's weapon is a minigun, Genesis can convert his into a flamethrower and other chemical weapons.

* Delta State The episode "First Contract: Part 1" Has Luna leaving the apartment and giving up on the mission, however she returns for her sweater and after talking to Brodie and seeing her friends in danger, she helps them and stays.
* Delta State, though assures her that they don't know about her or her friends.
* Delta State victims within 48 hours (which is mentioned a few times afterward, but is now the time it takes for a rifter to take over someone), and the leads becoming disoriented and hyper-focused if they spend too much time in the Delta State.

* Delta Thrives — a fairly effective use of a (horizontal only) scrollable screen.
* "Delta": To leave or go somewhere else. If someone says its time to "
* Del Tha Funkee Homosapien's song "Dark-Skinned Girls" expresses his preference for black women lyrically and at great length.
* Del Tha Funkee Homosapien: The word "Tha" instead of "the" in his name and the word "funkee" instead of "funky".
* Del The Funky Homosapian's "If You Must" is LOADED with some rather interesting comparisons to what things smell like to him (the song is about him being around those that didn't practice good hygiene, after all). The interesting thing, though, is that he inverts this in the second verse by saying this line ABOUT someone's feet:
* Deltora Quest: 7 tribes, each with a gem, city, guardian and dragon. Not to mention so many of the other traits that are common among tribe members as a result of being exposed to the powers of the gemstone of their region (i.e. all the Plains siblings have a special bond because of the opal and they are also stated to have good vision, except for Ava, 'cause she's blind. But she's also psychic, which is another opal power).
* Deltora Quest: A city boy, a retired palace guard, and a wild girl quest to reunite the magical gems that will give the lost heir to the throne the power to expel the evil Shadow Lord.
* Deltora Quest, a huckster advertises a kind of "wheel of fortune" game called Beat the Bird. The wheel has a 50-50 shot of giving the player no money back, with an effectively worthless wooden figurine of a bird as consolation, and a few options that do give the player money only let them break even (and on top of that, the game is fixed). To cover this up, he proudly declares that "every player wins a prize!", even though a comparatively small percentage will get a prize that isn't a ripoff.
* Deltora Quest, all three of them could hold their own against a Vraal (a creature created for combat) as well killing even bigger monsters.
* Deltora Quest anime has Dain first stomp on Leif's fingers while he's hanging over the edge, then help him back up, only so he can taunt him and fight him some more.
* Deltora Quest. A variation is that she only appeared to Lief and Barda to steal their stuff, but eventually came back and saved them before they could be eaten by the Wen. She also appears in the anime adaptation. Frequently paired with Lief in fanfiction, and the anime has a few hints of it as well, though you have to look for it to see them.
* Deltora Quest children's books feature the Granous, large furry humanoids who prefer fingers and toes, eaten one by one as they play sadistic riddle games with their victims.
* Deltora Quest Dain does give Jasmine an admiring glance to Lief's jealously, but Jasmine shows no romantic interest in Dain.
* Deltora Quest given the fantasy setting and Emily Rodda's characters being re-imagined by Japan, this trope was bound to happen.
* Deltora Quest has flesh-eating plants known as Grippers. From above, they appear to be small ferns, or clumps of grass. However, buried underground, they have a huge, funnel-like mouth, with rows of sharp teeth. When unsuspecting prey walk over the top of them, the ground parts as they open their mouths, and the prey falls in

to be eaten.
* Deltora Quest has monsters called the Granous who, when they capture a prisoner, force them to answer twenty riddles/logic puzzles. Every time the victim answers incorrectly or fails to answer within the allotted time, they bite off a finger. When they run out of fingers, they start on the toes.
* Deltora Quest has the seven tribes of Deltora and the seven gems of the belt of Deltora. The third cycle adds the seven dragons.
* Deltora Quest: He's the handsome, brave, heroic, and renowned king of a massive country. She was raised by trees.
* Deltora Quest, in which the heroes must find and awaken the last dragons to defeat the latest threat.
* Deltora Quest is tiny, and has this as her fighting style throughout the series, even winning a fighting tournament with it in the fourth book. Lief also uses it to an extent, he's at least average in size and strength, but most opponents are still bigger and stronger.
* Deltora Quest is what are tiny wafers that expand into fully baked loaves of bread when adding water.
* Deltora Quest Jasmine acts this likes around Lief, including slitting a giant snake’s throat when it tried to eat him.
* Deltora Quest: Jasmine wears red tights, while Lief wears a blue tunic and has a blue cloak.
* Deltora Quest, Lief states that "when the time comes, [he] will follow Adin's example and marry for love."
* Deltora Quest: Ols can be identified by the mark of the Shadow Lord somewhere on their bodies, and by their form wavering once every three days. Inverted for Grade 3 Ols, whose shapeshifting is perfect enough that they even die like humans.
* Deltora Quest Perhaps a little communication might have helped, but then again if the misunderstanding hadn't revealed the green-eyed monster, they might have never gotten around to spitting it out.
* Deltora Quest series has a grizzled face, complete with a scar across his eye. He's a good guy.
* Deltora Quest's first series, which mostly follow the story with several changes and featured Delta Goodrem's "In This Life" as its third opening theme.
* Deltora Quest's Polypans are described as being able to 'steal the shirt off your back without you noticing.'
* Deltora Quest started out as a series of Australian children's fantasy books. If one sees any mention of it now, they're probably talking about the 2007 anime (especially in the US, where it premiered nearly 3 years later).
* Deltora Quest The exiles, in comparison, adapted to the ocean's "strange, wild beauty" and thrived.
* Deltora Quest, the Glus, the eponymous beast of the Maze of the Beast, traps anyone unlucky enough to get lost in the maze in a calcified shell of "silk" that it secretes. If you stop to rest and lean against the walls, they will solidify around you, leaving you trapped until the Glus comes and eats you. The walls are full of the skeletons of people who couldn't get free.
* Deltora Quest the main trio of characters come ridiculously close to dying over and over again, but always manage to survive. Barda probably gets the worst of this, getting to "almost dead" at least twice before miraculously surviving.
* Deltora Quest, the protagonists meet the Masked Ones, a group of travelling entertainers who all wear masks. The majority of them wear normal masks, but the inner circle wear masks that make them look half-animal, and it's later revealed that their masks are joined to their skin, making them unable to be removed.
* Deltora Quest. They scattered the jewels of Deltora across the land and terrorized the heroes on more than one occasion.
* Deltora Quest which preys on farmers; essentially it looks like a normal plant, until you get too close... and watch the ground open up to reveal jagged teeth and an open maw which essentially drags you in and lets you slide down inside to be eaten... getting torn at the whole time of course.

* Delusional Misidentification Syndrome is a series of mental delusions where the identity of a person, place or thing is different or has been altered. One such delusion is called "Delusional Companions Syndrome", a condition that mostly affects Alzheimer's patients who believe inanimate objects are actually sentient.
* Delusion Conclusion: Audience members believe that the supernatural elements of a story are due to delusions on the part of the viewpoint characters.
* Delusion Conclusion: Audience members believe that the supernatural elements of a story are due to it taking place in a dream.
* Delusion Conclusion: Audience members believe that the supernatural elements of a story are due to it taking place in a dream or hallucination.
* Delusions. Celestia and Luna can't reproduce not because they're alicorns, but because they're just infertile—they were born mules and kept their infertility even upon ascension. Cadance and Twilight don't have this issue.
* Delusions of Eloquence, when someone tries to speak like an educated person but ends up doing it all wrong.
* Delusions of Grandeur: After falling in disgrace, Don Salluste has to go through a humiliating ceremony before the King and Queen of Spain, where his titles of nobility are stripped from him. This includes the pendant of the "Order of the Golden Fleece", by way of first (painfully) pulling his collar atop his face. Before that, the king orders him to retire in a monastery, where he'll take vows of chastity... and poverty.
* Delusions of Grandeur, after his disgrace, Don Salluste is trying to stop the servants removing all his ill-gotten riches from his chambers by intercepting the gold coins and other precious dishware and stuffing them in his pants. As he tries to gets away with his pants overstuffed, his ex-valet Blaze catches him and starts shaking vigorously the greedy old man, making the many precious items fall off.
* Delusions of Grandeur and yells that the cushion contains a bomb, Salluste throws it to the King by reflex, who throws it away back to Salluste, then into the arms of the Grandees of Spain who keep throwing the smoking cushion to each other, until it falls at the feet of the Queen, who screams and faints. Then Blaze rushes in to kick it out the window, where it lands in the arms of the man who made the bomb.
* Delusions of Grandeur) at bay this way while the latter tries to slap him as he's firing his valet.
* Delusions of Grandeur: Blaze, as Don César, opens the fight against the nobles trying to kill him by sending the poisoned birthday cake in the faces of two of them, after cutting it in two with his sword.
* Delusions of Grandeur, Blaze's comment that the Queen of Spain is Bavarian is directed straight at the audience, as there's nobody else in the room when he says it.
* Delusions of Grandeur, Don Salluste vehemently denies when the Queen accuses him of having fathered a child with one of her handmaidens. When said Bavarian servant confirms it is true, Salluste explodes:
* Delusions of Grandeur However, considering he's utterly crooked and has been stealing tax money that belonged to the kingdom for years now, it's obvious the Queen has seized this pretext to finally put him into disgrace, rather than bother proving his actual crimes.
* Delusions of Grandeur: Salluste, riding a donkey, makes it move with a carrot dangling from a stick. Without it, the mount instead just does whatever it wants, including dragging Salluste under a waterfall.
* Delusions of Grandeur was a deathcore act from the Pittsburgh area who gradually became a minor name, but never went particularly far. Nowadays, they are known for

their guitarist, Gabe Mangold, who went on to join
* Delusions transforming into an alicorn is painful. Celestia and Luna's ascensions hurt even more than Twilight's (which involved wings growing and a height change) did because they were originally mules. Celestia can't even describe the pain.

* Dem Bones: In some modern depictions, they are hunchbacked skeletons with deer skulls for heads.
* Dem Bones — The trope is about animate skeletons. The Bible story of Ezekiel and the Valley of the Dry Bones, that inspired the Trope Namer "Dry Bones"/"Dem Bones" song, has the bones immediately given flesh and souls during their resurrections.
* Dem Bones was the closest they got to looking like people(looking like more advanced/powerful version of Ghost Rider, before the above retcon strangely enough). They've mostly appeared as winged humanoids since the 2000s.

* Demeter, the goddess of the harvest, was strongly associated with lizards and snakes.
* Demeter while no Aphrodite, is still depicted as being very beautiful in Greek art. In the game however she’s a wrinkled austere looking old woman. Her appearance also fits her behaviour in the game
* Demetri Martin parodies this trope perhaps better than anyone else has ever managed to:
* Demetri Martin quipped in a special that it is quite difficult to be manly or punctuate a conversation if when you're struggling to open or close particularly heavy doors.
* Demetrious Johnson had been the only champion the UFC's Men's Flyweight division had ever known since winning the belt in 2012, reeling off a record eleven consecutive title defenses, including a knockout of Olympic gold medal wrestler Henry Cejudo. * Demighosts, which are ghosts controlled by other ghosts, and who can actually touch things.
* Demigod, one of the first standalone, retail examples of the genre. It retained the basic premise of two teams of player-controlled heroes managing lanes of AI-controlled armies in order to destroy their enemy's headquarters, but played around a lot with the details.
* Demigods & Magicians to turn their power against them, by virtue of the fact that Percy's mindset is so utterly opposed to Setne, he cannot find anything to relate to. Especially Setne's desire for godhood, as opposed to Percy's complete disinterest in any such ambitions.
* demigods are not only stronger than humans, but also faster. However, the extent of their powers differs from which god or goddess is their parent. So Hazel was impressed by how quickly Percy and Jason could move in battle.
* demigods are teenagers. With the exception of Frank Zhang, none of them are particularly muscular. Still, they fight monsters and are much stronger, faster, and more resilient than humans. Even Leo Valdez, who is rather weak compared to the other demigods, is still much stronger than a normal person.
* demigods definitely qualify for this. They travel the world on a flying ship, regularly fighting against giants, monsters and undead.
* Demigods, for the most minor of truly divine entities whose faith has not caught on with too many people (or has fallen on hard times)
* Demigods, on the other hand, can easily come together with humans because they have approximately the same life expectancy as theirs.
* Demigod The Atlantean gods got killed/imprisoned/something and the mortal Atlanteans attempted genocide on the rest of humanity, upon which all the other gods in the world descended on Atlantis, so very angry that they not only sank it and killed every single Atlantean but ended up shifting it to the South Pole, more or less by accident. An object lesson in avoiding making enemies of dozens of pantheons' worth of petty, vengeful deities.
* demihuman at least a little less frightened of them than the creatures they hunt). In practice, their behaviors range from refusing to raise a hand against any human to avoiding deathblows and making sure nobody bleeds out to slaughtering any witnesses to prevent accusations from being made.
* Demi Kids—wouldn't fly, they instead depicted it as a lavicious-looking demon whose pointy tail is folded between its legs and sticking up in front of it.
* Demi Lovato: Path to Fame, players are given a choice near the beginning as to whether they would like to date men, women, or have no preference. The dating options don't change in personality or role, but simply are of the gender you picked (or random if you chose no preference).
* Demi Lovato, singer and actor, describes themself as sexually fluid and pansexual. They came out as non-binary in 2021.
* Demi Lovato's mother, has admitted in an interview that she too was secretly suffering from bipolar disorder and an eating disorder at the same time as Demi, with both keeping their struggles secret from each other, hence she couldn't have helped her child at the time. In fact, Demi temporarily separated from their mother and had her sent to rehab, partly as Dianna's habits were threatening to set a poor example for Demi in their recovery. Demi's estranged biological father, Patrick Lovato, was also discovered to have had bipolar disorder; he and Demi were only

beginning to mend their relationship again the year before he died. (Demi then set up the Lovato Treatment Scholarship Program in his honor.)
* Demi Lovato specifically to humiliate her and is sabotaged by said Alpha Bitch, but she quite rightly points out that the only person who can feel humiliation is yourself, proceeds to give the Alpha Bitch a speech and walk out with her head high.
* Demi Lovato's song "For The Love Of a Daughter" is about their biological father's drinking & abusiveness, directed at him. It includes lines like "Lied to your flesh & your blood, put your hands on the ones that you swore you loved," and says "You're hopeless" as part of the chorus.
* Demi Lovato: Stay Strong (documentary about the pansexual non-binary singer Demi Lovato)
* Demi Lovato the raw, emotional vocal take used was Demi singing from the heart as a kind of cry for help. A more technically polished take was apparently attempted post-rehab, but they preferred the more raw and emotional performance from the year before.
* Demi Lovato they tripped and started laughing. During one of the instrumental breaks, they said "I planned that, the whole falling thing? That was already planned."
* Demi Lovato. They were really affectionate with each other, then broke it up for a while, and later they rekindled their friendship.
* Demiprinces. Demiprinces tend to have short attention spans and get bored very easily. Fa-Nuit-Hen, for example, can barely stay focused on questions during his interviews and outright interrupts people so he can answer them before he loses track of what they're saying.
* Demise. After drawing the Black Queen, Demise was treated with the experimental Trump cure. It seemed to work, as he survived, retaining his human shape, sanity, memory and personality, thus not fitting any of the 5 subtropes above. Demise also gained absolute regeneration, thus becoming an Ace. The only problem was apparently being conscious during death and aware of the entire process, requiring massive therapy afterwards. Now Demise can, upon locking eyes, telepathically project memories of death, which can shock, stun or kill the recipient depending on the dose.
* Demise, a projecting telepath. Projects the memory of his own death to kill. Demise had drawn the Black Queen (in the setting's

* Demisexuality is a sexual orientation where people only experience sexual attraction to folks with whom they have close emotional connections. These emotional bonds can be romantic or platonic; crushes (including attraction to fictional characters), established relationships and close friendships. While they may have instances of aesthetic attraction to a stranger, any full-blown sexual attraction only happens with a pre-established emotional attachment. The amount of time it takes and intensity of emotion varies between people of course, and many are also at least somewhat demiromantic (unable to feel romantic attraction to strangers; only ever getting crushes on good friends or fictional characters.)

* Demolition Man and several scènes have developed the animosity between him and Phoenix.
* Demolition Man antagonist Simon Phoenix, are all Team Romanticism, opposing Cocteau's totalitarian technocracy as a fight for freedom (Friendly), on Classical Liberal principle (Spartan), or out of sheer disgust (Phoenix).
* Demolition Man: Anything that is not good for you is bad, and therefore illegal. This includes meat, spicy food, swearing, kissing etc.
* Demolition Man are given useful skills and the desire to use them as part of

their "rehabilitation." Spartan got knitting, while Phoenix got a few more practical skills.
* Demolition Man. As part of Doctor Cocteau's master plan, almost everyone in San Angeles had an organic microchip implanted in them. Sensors around the city can determine the exact location of any of them at any time. The Scraps clearly don't have chips implanted, or Cocteau's forces would have hunted them down before the movie started. Simon Phoenix is also noted as not having a chip.
* Demolition Man as they say "abortion is illegal but so is pregnancy without a permit."
* Demolition Man. At the end John Spartan runs away from the cryoprison as it blows up in flames.
* Demolition Man became President of the USA... and when the main character asks how it happened, they say that he became Governor of California first. It's still unconstitutional for an immigrant to be president, though.

* Demolition Man doesn't make any bones about this being the whole point of the movie; resembling the poster from a prize fight or pro wrestling match.
* Demolition Man enters into a rant in the style he uses in his comedy routines.
* Demolition Man: Features a resistance which is all about, amongst other things, the "choice to run naked down the street covered in lime jello."
* Demolition Man features a scene where John Spartan discusses with his two partners and the police chief what Simon Phoenix's next move would be. Spartan insists that it will be to get a gun, which the police chief insists is ridiculous — the only guns in San Angeles are in a museum...
* Demolition Man from the 1980's playing the part of a "Neutron Accelerator".
* Demolition Man had omnipresent computerized speech monitors that fined citizens for uttering profanity.
* Demolition Man has Leanna Huxley managing to knock down a criminal in hand-to-hand combat. Since she was raised in a pacifistic society where even eating red meat is a crime, Spartan asked where she learned to fight like that. She replied, "Jackie Chan movies."
* Demolition Man has one of these when the cryo prison explodes at the end of the film when machinery starts to spark.
* Demolition Man his backglass artwork proposals were repeatedly rejected by Wesley Snipes, who wanted to ensure his career wasn't jeopardised by having him look like a crazed character. Linda Deal did the final backglass design.
* Demolition Man HIV was presumably done away with). John Spartan seems to find it too intense, or just unsettling for someone who has never done it. Kissing or even touching is frowned upon, though, if not downright illegal. Their computer sex may be the only intimacy allowed.
* Demolition Man, in an archived story about one of John Spartan's defused hostage situations:
* Demolition Man is a mixed bag, depending on how much leeway you want to give for hyperbole. However, a blink-and-you-miss-it moment near the beginning of the movie shows Scott Peterson as the name of an inmate incarcerated in the same cryogenic prison as antagonist Simon Phoenix. The movie was released in 1993. Scott Peterson was convicted of murdering his wife in a highly-publicized trial in 2005. The judge in the case sentenced him to death, so putting him on ice is metaphorical in this instance.
* Demolition Man is recruited in 2032 to catch the psychopath Simon Phoenix after Phoenix's escape from the cryogenic prison in which he had been incarcerated since 1996. Spartan is actually the cop who caught Phoenix in 1996 but is legally

considered a criminal, having been put in the "fridge" at the same time after being wrongly convicted of sacrificing innocent lives in his apprehension of Phoenix, and to the timid bureaucrats of 2032, he is as much an animal as Phoenix.
* Demolition Man It bears mentioning that unlike most examples on this page, meat-eating isn't rare due to global disaster, it's a sign of how overly coddled and pacified human civilization has been rendered.
* Demolition Man of a cop from an era where the police actually dealt with dangerous criminals.
* Demolition Man: Phoenix was thawed out of cryo-prison to take out people who don't like Cocteau. But he has his own agenda and plans to release every other criminal in the prison to create his own army.
* Demolition Man" Probably helped that he's been in cryogenic suspension for decades and hadn't had a decent meal since he was unfrozen.
* Demolition Man psyches him out by throwing his hands open as if to get him to stop.
* Demolition Man, she notes to John Spartan, "Most of these guys don't like you." He answers that most of them don't even like their own mothers.
* Demolition Man: Simon Phoenix is a total psycho, but even he is correct in pointing out that Raymond Cocteau's society is horrific. He'd rather have hellish chaos than sissy fascism.
* Demolition Man, Simon Phoenix overrides a security program on a computer using a string of '7's, causing a cop to become electrocuted.
* Demolition Man: Spartan zaps Huxley with a glow rod to keep her from coming after him when he goes into the Cryo-prison after Simon Phoenix.
* Demolition Man Still doesn't stop John Spartan reckoning it's the best he's had in years.
* Demolition Man, Taco Bell is now the only restaurant left in the entire country (and possibly the world). Oddly, when shown outside the U.S., it’s Pizza Hut instead.
* Demolition Man takes places over about two days. Most of the plot happens on the very first day.
* Demolition Man. The doors are made of (presumably reinforced) glass. Do the math. Note that this kind of thing is the reason why weapons and ammunition in real life museums are rendered non-functional before they're put on display.
* Demolition Man. Their leather jackets, jodhpur breeches and jackboots look appropriately authoritarian, but they're just as ineffectual and wimpy as the regime they maintain, having no further strategy for an uncooperative suspect beyond adding "Or else!" to their verbal commands.
* Demolition Man, the main villain Simon Phoenix tries to unfreeze all the criminals held in the cry-prison at once to kickstart his new dystopia. He thanks the prison's cryo-stasis technicians for their help, before gunning them all down because he no longer has any use for them.
* Demolition Man. The only things that are still printed on paper are fines for swearing, which John initially uses in lieu of toilet paper.
* Demolition Man, the other is a present-day cop also in cryogenic sleep for a crime he was framed for by said psychotic criminal, unfrozen to deal with someone simply too evil and dangerous for the wimpified future cops to handle.
* Demolition Man. The part of the Los Angeles population that doesn't accept Doctor Cocteau's rule lives in an underground city below the city's streets. They survive by eating stolen food and rats.
* Demolition Man, the plasma gun used by Simon Phoenix is a subversion. At first it takes minutes to recharge; Simon uses it anyway, because he likes to see things blow up. However, this was because it had been in storage in a museum and had to reachieve fusion first. Once it had recharged itself it was firing plasma bolts as fast as a pump-action shotgun would be firing slugs.
* Demolition Man: The San Angeles police arrive at the CryoPrison after John Spartan has killed Simon Phoenix. Then again, it's not like they could have done much even if they got there on time. The cops of that time are completely unprepared for someone like Simon Phoenix, which is why John Spartan was brought

back in the first place.
* Demolition Man, the society is so pacifist that police officers watching Simon Phoenix acting violent feel sick and shaken.
* Demolition Man. They've just taken out a bunch of mooks and Spartan thinks they're safe, but then Huxley suddenly picks up a gun and points it at Spartan. Spartan gets a millisecond of shock before she shoots the mook that was sneaking up to Spartan with a knife
* Demolition Man, though she deals with it okay after Spartan points out it was self-defense.
* Demolition Man to the anger-neutered future so it can defend itself from a de-frosted sociopath.
* Demolition Man, when his first attempt to capture Simon Phoenix results in a building in flames (blown up by Phoenix) and a heap of charred hostages (killed by Phoenix before Spartan dropped in, specifically to hide them from infrared scan until their unrecognizable remains could be found in the wreckage).
* Demolition Man, where in the future the only songs that are wholesome enough to even be played on the radio are 1960's commercial jingles.
* Demolition Man, where the following line is said by an actual person:
* Demolition Man, where the most popular radio station plays "microtunes" - aka advertising jingles from the 20th century.
* Demolition Man where you'd expect an LAPD SWAT officer to be shooting semi-automatic. In the same scene in the film itself, he does carry a pair of Berettas, but only uses them one at a time with the second pistol being a backup when he loses the first one. However, he does briefly use a pair of pistols during the film's climax.
* Demolition Man years after the film's release, making it even more ridiculous than most of them). This is mostly to crank up the contrast with the 2032 world, where crime is so low that the police have basically forgotten what it is.
* Demolition Man, Zachary Lamb was originally shot by Simon Phoenix as the latter stole a car and would die in Spartan's arms.
* Demolition Racer bonus, which gives you substantially more points than any other attack. It's also the hardest move to perform and only a handful of tracks give you the opportunity to perform a high enough jump to crash on top of your opponents.
* Demolitions Expert. He's certainly one of the best suited classes for dislodging a well dug-in Engie.
* Demolitions Expert. It's stated that despite being dishonorably discharged, his talents as a demoman are such that he's worth recruiting into Havok Squad.
* Demolitions Expert: Someone who is skilled at producing improvised explosive devices (IEDs).
* Demolition Squad does this from time to time, pointing out that she has completed the SAME year in school three or four times over, that she is an unrelated teenager below the age of majority freeloading at the principal characters' apartment for no clearly explained reason, that he would do well not to mention this is a job interview, that she has been wearing the same outfit for several years, and so on.
* Demo Man territory when he's shown firing a shotgun one handed, knocking Agent Carolina to the ground with a single punch, and catching a grenade fired by Agent Maine's Brute Shot.
* Demona also tries to use this on Goliath at the end of the series premiere, stating, "Together, you and I can make a new world for our kind."
* Demona believes this trope and attempts to recruit Brooklyn after a bad incident with a biker gang by giving him a tour of unpleasant incidents around New York. However, after Brooklyn realizes Demona is a backstabbing megalomaniac, he realizes he had been manipulated. It turns out that Demona is also a genocidal murderer
* Demonade and she actually utters the trope over three panels to emphasize how much she doesn't like her hired help.
* Demona. Demona responds to human racism and genocide against her species by gradually turning into a raging, murderous, genocidal maniac who wants to kill all humans.
* Demon. Advertised as including an unneeded Lobo poster. The Demon and Lobo were

beating the tar out of each other with every single weapon imaginable, including said sink.
* Demona goes back in time from 1995 to 994 to warn her past self about the slaughter of her clan by the humans. This causes her past self to distrust the humans living in the castle, so she betrays them to the Vikings... who slaughter her clan after taking over the castle.
* Demona has lived for centuries and there's not a trace of weariness or boredom to be found.
* Demona has this reaction to Lily, the chibi-Pettanko-Succubus. Lily, at present, is begging for death.
* Demona how the Hell this cartoon still kept the name "Disney" on it.)
* Demon Aid, Esta gives her pay for a job she just finished to an elderly demon on the street with a sign reading "Will magic for food." He bursts into tears.
* Demona is eventually given the ability to become human by day instead of stone. The change is agonizing
* Demon: A Memoir, demons can change shape. The titular character takes on the form of a different human every time he meets the narrator.
* demon Anya, after she loses her power and is trapped in human form, falls in love with Xander. And apparently granting wishes to scorned women for thousands of years didn't do much to teach her about love. Although oddly enough it's later revealed that she was originally a normal human - a married one who was in love with her husband before he cheated on her - before becoming a demon. Presumably this was a retcon, since otherwise there seems no explanation for why the series previously treated her as having no idea how humans worked at all.
* demon as looking "demonic". Even though she'd knocked off his hat to expose his distinctive demon features, making him literally hatless.
* Demona's Ripper tendencies go all the way back to when she helped some Vikings sack Castle Wyvern (her clan's home) and was then surprised when they betrayed her by killing the gargoyles along with the humans. Canmore's "What have I... What have
* Demona's stone-by-night curse in "City of Stone" and plague in "Hunter's Moon" also used a combination of science and sorcery: The curse was broadcast throughout Manhattan using Xanatos' technology, while Xanatos' chemical disinfectant and Sevarius' carrier virus were integral scientific components to the plague. (The Fulfillment Spell and the Praying Gargoyle were the magical components.)
* Demona to lament that she has learned nothing. Demona's still a villain the next time we see her.
* Demonbane, and even Elder God Demonbane has never been able to put it down for good, even after literally billions of battles across the multiverse.
* Demonbane and gets involved in a war with sorcerors and Great Old Ones.
* Demonbane, but "Kitab al-Azif" is too tricky for him to pronounce. Al herself protests at first but accepts it without very much complaint.
* Demonbane. Fortunately, there are omnipotent Elder Gods who will make sure its plan won't succeed.
* Demonbane gets rid of the Gunshin Kyoshuu by altering the timeline of the multiverse, removing it from existence. It keeps losing to the Elder God form in their eternal fighting.
* Demonbane. Needless to say, these only appear in hidden routes of the visual novel.
* Demonbane, one possible ending has Kurou, Al Azif, and Demonbane all ascend together and become Elder Gods. In the sequel, which follows a timeline in which this did not happen, the Elder God versions still show up at the end to help their alternate selves tear Nyarlathotep a new one. Traveling to alternate worlds is child's play to an Elder God, after all.
* Demonbane. This serves as a chilling reminder to everyone of exactly what they're up against and how tough a battle this will be.
* Demonbane to slam into the Earth at extreme speed... in the area that would eventually become known as the Yucatan Peninsula.
* Demon Beasts and spin thread. Benares control the much more formidable Fu Yao Zhizhu (Monster-Binding Spider), a giant, more realistic-looking spider that pins

its victims down, extract their energy, and then imprisons them into a cocoon. Benares states that this monster can subdue even an immortal Wu like Yakumo.
* Demon Born of War. The site's admins refer to this as the "Able Rule" - if your creation is more powerful than Able, it's toast.
* Demon Bunny Tharka, or let his friends die (since his magic is connected to them, he can't commit suicide). They order him to make it look like he's just another crazy mage on a roll.
* demon (called a Balrog in earlier editions before the Tolkien estate sued) uses a whip as a weapon.
* Demon Candy: Parallel can be considered this. Jonathan may not be one of these, but only time will tell.
* Demon Candy: Parallel explicitly states that the wings of incubi are for "decoration" rather than use.
* Demon City Shinjuku. In the 1988 OVA Chibi (AKA the Young Man) pulls a pin from a grenade with his teeth before throwing the grenade at a demon.
* Demon City Shinjuku resides in an aquatic abyss, and uses the city's puddles as portal pools to pull in and drown unwary travelers. When the hero kills the demon in its own realm, all the puddles suddenly erupt as geysers, throwing him back into the real world.
* Demon City Shinjuku wears a long red coat which billows out dramatically in convenient winds.
* "Demon core" and was responsible for an end to all hands-on criticality experiments. The core itself was to be installed into a bomb and destroyed in a test five weeks after the second accident, but the criticality accidents left it so radioactive that the tests kept being delayed until it was finally just melted down and reincorporated into other cores.
* Demon Days describes the eruption of The Mountain Called Monkey as "a catastrophany". Presumably, this is a portmanteau of "Cacophony" and "Catastrophe".
* Demon Diary by two "hostages" that it was an official record that no has guessed Raenef correctly.
* Demond Wilson also missed an occasional episode here and there... and
* Demon Eater and absorbing their personality as well. It's also worth noting that demons cannot do this to humans and the only one that tried ended up having his body saturated with rotting flesh that he couldn't consume.
* Demon Eater has the titular character join the Human Club, those creatures of his world who for one reason or another wish to emulate humans, but none does it well. The one named Venus has extra eyes and mouths so that she has faces on her left and right profiles.
* Demon Eater plays with it. Demons don't reproduce with sexual organs, but there is a group that wants to be like humans. They don't quite get the appearance right, with one of them being an anatomically correct male but without skin, while another is an anatomically correct albino female... without a head.
* Demon Eater, the main character Saturno is going through this at the hands of the members of the Human Club.
* Demon Eater, the world of demons is actually the largest demon in existence.
* Demon Eater, this is the main way of growing in the demon world. Demons must eat demons, or be eaten themselves.
* Demon Eater, we see a white giant. Later on, she's revealed to be a member of one of the strongest Demon Societies in the story.
* Demon Eyes have a very low chance to drop a dark lens, which can be used to craft these. If you wear them, the sun gets a pair, too!
* Demon Fist, but it's unclear since the only observed wielder had been obsessed with it for years.
* Demon Fist in the gas hose of his flamethrower, extinguishing his pilot light at the same time. When he tries to use his lighter to restart it...
* Demon Fist shoots out on a chain, as a combination grappling hook and harpoon.
* Demon Fist: The "Holy Relics" turn out to be high-powered technology. Examples include a semiautomatic pistol, a sniper rifle, and a nanomachine-encoded Pandora's Spear. No word on whether or not magic is just Pandoran technology as well.

* demon form after Tessaiga is destroyed by the demon known as Goshinki.
* Demongo the Soul Collector, one of Aku's henchmen also counts. He's a skinny demonic humanoid with black skin, glowing blue eyes, blue fire burning on his head, and a red cape. He has the ability to steal the souls of fallen warriors and monsters, which he can summon as
* demon-half is still gorgeous as human, Xander loved her deeply despite his bad experiences with female demons prior.
* Demonheart, and Brash is a foulmouthed corrupt knight and rumored rapist.
* Demonhosts books are depicted to be able to catch bolts (essentially mini-missiles shot from a machine gun) in mid-air.
* Demon Hunter (2005). Despite demon sex killing the vast majority of humans, Asmodeus keeps at it, even relishing in the thought of forcing himself on an innocent.
* Demon Hunter (2005): These come in many levels, from fallen angels at the top to pathetic wretches made of the darkness on the bottom. They are humanoid, but can sometimes be red and have tails, horns and wings. They can possess people, which is only sometimes curable, and breed with humans.
* Demon Hunter (2016) and arm-blades, and can shapeshift to blend in with humanity. They can only be killed by decapitation and burial on holy ground, but will come back the second their head is removed from the grave.
* Demon Hunter Kain: Kain's abilities include conjuring a Tanto out of thin air, and upgrading it into a katana.
* Demon Hunter Kain: Liana's cape, which appears to have been ripped up in combat.
* Demon Hunters has an advantage with this name. It allows a character to draw an extra weapon or item that they didn't previously have from somewhere about their person.
* Demon Hunters often have ravens as companions. While they are not evil, they are grim and forbidding, and frequently use demonic power against their demonic foes. They're also considered a bad omen by superstitious villagers and townsfolk.
* Demon hunters study and use fel magic in order to more effectively hunt demons. Since the magic is innately corrupting, many of them become partially demonic themselves and may or may not retain their original noble intentions.
* Demon Hunter's trailer: After witnessing the Hunter at work and being offered a chance to join her, the nameless survivor of a demon attack resolves to stop running from the monsters and start hunting them.
* Demoniak but allowed players to take control of almost any character in the game, which allowed even more creative chaos. For example, one of the normal playable characters is Flame, a superheroine who can transform herself into fire with the command BURN. Rather dourly, giving the command BURN as any other character causes them to spontaneously combust, actually being set on fire and burning to death. As a result, BECOME ing any character who is in your way and having them BURN becomes an excellent way to get past things.
* demonic apostles can change their shape at will, and switch between human and demonic form.
* Demonic Color), about a corrosive green gas plaguing a town. The cover shows two boys being skeletonized by the gas' effects.
* Demonic Conqueror Mihra, who styles himself a God, and possesses a shadowy, devouring force that might be cosmic entropy.
* Demonic Dummy: A ventriloquist's dummy that is most certainly not friendly.
* Demonic Dummy book, but in the sequels was brought back as the primary villain, as well as becoming the mascot of the series.
* Demonic Dummy is bad enough. What's worse is that he seems to move around when Dave turns his back.
* demonic familiar volunteers to protect his wizard by siphoning the excess power, he doesn't explicitly clarify that he will funnel said power to his base in hell where it will be consumed to fuel his ascension into a greater demon, and that the conditions of their contract states that the lesser power obeys the greater one, meaning the wizard now has to obey the demon since he grew more powerful.
* Demonic Head Shake - A person's head moves in an unusual or very fast speed

* Demonic hounds are among the many monsters that Guts has to face because of his Brand of Sacrifice, appearing in force during Volume 17 to menace him and Farnese.
* demonic machine-monsters, invade the world of Dominaria seeking to kill all life to secure the planet for its resources, whereupon it's revealed that Gaea, Dominaria's living spirit and the only true god in the plane, had been preparing for this by "growing" the monstrous kavu — gigantic reptilians resistant to the Phyrexians — beneath her surface for thousands of years in advance. (Unfortunately for the humans, elves, and others holding back the Phyrexians, the kavu find machine-demons and mortals equally tasty...)
* demonic news reporter composed of translucent data cubes, and he attacks Dante with rectangular blasts of electricity.
* Demonic Possession: A person, animal, or inanimate object may end up being controlled by an evil spirit... and causing great havoc.
* Demonic Possession: A spirit or energy being who puts the host's mind in a straitjacket.
* Demonic Possession for exorcisms. Mars' ability is not innate but can be learned, as demonstrated by Venus when Mars got possessed and she felt appropriate to use her own technique to break the possession..
* Demonic Possession is more or less what Take-Over magic amounts to in
* Demonic Possession movies play with this fear as well. The way that a possessed person moves is often very insect-like, as are the chirping/growling noises they make.
* Demonic Possession? Or was he driven insane by a religious group alleged to use brainwashing techniques?
* Demonic Possession: Some ghosts can take over the body of a living person and operate it like a puppet. For some ghosts, this is the next best thing to being alive again. For others, it's simply an expedient because they can't experience what their host is experiencing.
* Demonic Possession: Someone gets their body taken over by an evil spirit.
* Demonic Possession takes it a step further: as part of their initiation, every Marine is intentionally possessed by a daemon for a short time before being exorcised. While incredibly risky, this has the advantage of rendering them far more resilient to the taint of Chaos and even affords them a measure of protection when fighting Warp-spawned entities.
* Demonic Possession: When an evil spirit seizes control over someone's mind and body.
* Demonic Possession: When someone or something is possessed by a demon or ghost.
* Demonic Possession When something else with a different allegiance hijacks the subject's body.
* Demonic Possession - When the "guest" is a demonic or other supernatural entity.
* Demonic Possession, where Michael Taylor, a British man, is subjected to three priests armed with crucifixes, who manage to remove all but three demons from him. This comes back to bite all of the parties involved later on...
* Demonic Possession will reply "You're mad! There's nothing glorious about what you've become, Uldred!"
* Demonic Spider is that, while normal guards will stop chasing you after a while and run away if their health gets too low, Hammer Haunts do neither. If they spot you, they will chase you to the ends of the earth and only death (or climbing up somewhere they can't reach) will stop them.
* Demonic Symphony the demons are the embodiments of emotional energy projected on the world
* "demonic" (though goblins by the name of goblins also exist and are entirely unrelated to the Falmer), and the "Orsimer" are essentially orcs, and the Dwemer and Orsimer are more commonly called "dwarves" and "orcs," too.
* demonic to take over Jade's dormant body. Later for most of Season 2, he accidentally possesses Valmont (he intended to take over Jackie, which he later succeeds at).
* Demonic: When Carly sits down with Martin on the cafe patio, the ice in her cola suddenly disappears. It then reappears in different quantities and disappears again

throughout the scene. It was obviously melting throughout the time they spent shooting the scene.
* Demon in a Bottle storyline but was changed at Downey’s behest. He didn’t want to get in the headspace to put his own recovery from alcoholism at risk.
* Demon in My View, Aubrey turns Jessica, and there had been a growing attraction between them for much of the novel. After she turns, it's implied that they get together.
* Demon is an acceptable vernacular, though the preferred word is Daemon. Lord help you if you get the A and the E confused.
* Demonization: Accusing what you're against of being evil, or in some cases, literally having demons.
* Demonization: Attempting to ruin the reputation of someone you hate using unflattering and slanderous portrayals of them.
* demonization that occurred slaves in comparison with Greece. One of Xerxes' predecessors, Cyrus the Great, has been revered by the Jews for freeing them from the Babylonian captivity and allowing them to go home, along with other exiled peoples. This was in fact general policy for them.
* demonized of the comic.) Also, Batman hates rock music after witnessing a rocker kill his girlfriend.
* Demon King Daimao Akuto, Keena, and Korone wake up centuries after the Earth was devastated by a meteor impact. The rest of the cast died as a result, along with humanity.
* Demon King Daimao instead. For her part, Eiko also reveals she kept a hidden blade in her hair while trying to seduce Akuto in the bath.
* Demon King Daimao is rated TV-MA on DVD, but TV-14 on Anime Network.
* Demon King Daimao Keena Soga has the ability to disappear not only visually, but from any magical tracking means. However, any clothes she has remains visible so she is always stripping naked (with the hair ornament she never takes off as the floating around as the only clue that she's even in the room). In episode two, she is running away from a dog when she runs straight into Akuto Sai and ends up becoming visible again completely naked and riding on top of him. There is also Junko Hattori who got her clothes blown off from fighting Akuto in a class full of their classmates.
* Demon King Daimao. She's in for a bit of a surprise when he returns as a cyborg.
* Demon King Daimao: The anime made sure to show the girls for the same amounts of times, in the same situations in the opening and ending credits.
* Demon King Daimao which will cause him to be loyal to her. Kena then took the medicine and cooked it into rice which she later served to a big gang that was attacking Sai.
* demon king. The shoulder pads are also weighted. Still, they seem rather superfluous after a certain point.
* Demon Knight, boy!" When it retreats back into its pants (and fly zips back itself), he sheepishly apologizes. Jeryline is not amused.
* Demon Knight has a man being tracked by a demon making his way to a small inn a nowhere town. Hell is literally coming with him.
* Demon Knight he can have her heart—and extends a finger with a large scalpel on it.
* Demon Knights #16, Exoristos, the Horsewoman and Sir Ystin are thrown in a dungeon. Exoristos and Sir Ystin are chained together on either side of a wall to prevent them trying to escape. A guard comes and fetches Exoristos and the Horsewoman, leaving Sir Ystin on the other side of the wall wondering where everyone has gone.
* Demon Knights a vampire army besieging the protagonists can only be defeated by removing the head or destroying the heart.
* Demon Knights, but because it's set in 11th century Western Europe, none of the characters know the word "vampire".
* Demon Knight. She eventually defeats him and lives happily ever after, according to the Crypt Keeper.

* Demon Knights, Horsewoman shoots Exoristos non-fatally with an arrow after the latter encourages a young civilian to try and sneak through enemy lines during the siege of Little Spring, which resulted in the young girl being captured and beheaded.
* Demon Knights, Shining Knight is periodically offered the chance to abandon their quest for the Holy Grail. They have consistently turned such offers down, despite knowing full well that continuing on will lead to more pain and suffering.
* Demon Knights - the Moorish genius Al Jabr is the only one on the team who doesn't rely on some type of magic.
* Demon Knight. The Collector opens them up again when he finds Brayker's corpse, as if any more proof of his evil was needed.
* Demon Knight, the Collector shrieks in pain and jumps out of the hotel through a closed window.
* Demon Knight, The Collector's minions lay siege to the hotel in their efforts to retrieve the Key.
* Demon Knight the right kind of person for the job, since she had the strength of character to refuse the deal.
* Demon Knight this tactic is used a few times, the cat in question belongs to the heroine Jeryline.
* Demon Knight tries to propose to Jeryline. His attempts are hampered by his complete inability to say the word "love".
* Demon Knight. When The Collector is stabbed in the eyes (which kills demons), he screams in horror, then chuckles sadly at his broken sunglasses, "Damn, and I liked those, too."
* Demon Knight: While the Collector's car catching fire when Brayker shoots the engine is just about plausible, Brayker's car explodes in a fireball the second the Collector's car crashes into it.
* Demon Knight with a machete. However, because Willy is possessed, and demons can only be destroyed by the Key or by having their eyes destroyed, Willy's body continues tp strangle him while the head controls it from the floor.
* Demon Legacy: An incident causes a young man to take part in an event that decides to change the fate of mankind.
* Demon Lord Dante: The eponymous giant demon has Ryo embedded in its forehead, with only his eyes and nose visible (or in remakes, his upper body).
* Demon Lord has one of its girls become a Hero, a being destined to fight Demon Lords that threaten to destroy the world.
* Demon Lord Kazaream, for example, spent centuries as a formless spirit unable to reform, and had to resort to summoning a compatible Otherworlder body
* Demon Lord More horrifically, those depraved enough to worship Zuggtmoy and who attain the greatest favor astrally project to her in their sleep, in which they are erotically absorbed into her womb, consumed by her and then recreated in her womb; when they wake, their body has been transformed into a creature of animate fungi, rendering them Plant-type creatures.
* Demon Lord, Retry!: Luna is the most powerful character in the entire Kingdom of Holy Light (aside from Kunai and his aides, of course). Even amongst the Holy Maidens, she has the most destructive magical power and is noted to have seemingly endless potential for growth. However, being the hot-tempered idiot she is, she usually fails to utilize her magic and abilities properly, leading her to be defeated by enemies even her ostensibly "weaker" sisters could manage.
* Demon Lords and Archdevils and other powerful demons who rule over Hell.
* Demon Lords and Archdevils demonic beings at the top of a hellish hierarchy.
* Demon Lords and Archdevils. Mephistopheles is one to Asmodeus, while Levistus and Baalzebul are former cases still undergoing the terrible punishments Asmodeus subjected them to. Indeed, this seems the typical way to climb up the ladder in infernal nobility.
* Demon Lords And Arch Devils) or actual Great Old Ones like Cthulhu. They're rampant cannibals, prefer to eat their own young because they believe that children parasitically weaken their parents, and even their children who aren't eaten are left dead or brain-damaged by the mothers' habits of rampantly drugging themselves

on toxic fungi for euphoric highs, which poisons their milk.
* Demon Lords And Arch Devils who approach this trope from different angles. Kostchtchie, Demon Prince of Frost Giants, is a raging misogynist and proud of it, deriding women as worthless weaklings just barely tolerable for spawning violent new sons to wage war in his honor and demanding their lives in sacrifice when there aren't battles being fought. Even female Frost Giants are relegated to sub-class breeding stock. Malcanthet, Demon Queen of Succubi, is subtler but no less bigoted in being a misandrist; only women can be her elite Thralls, men are delegated to menial roles in her cult and considered expendable, to the point that in many Malcanthet cults, it's mandatory for male cultists to be blinded. Guess which gender is also preferred for sacrificial offerings, too. Baphomet, Demon Prince of Beasts, was portrayed as being highly misogynistic in 2nd Edition, but starting with 3rd Edition this part of his character was dropped in favor of making him brutally meritocratic and willing to accept any worshiper who proved themselves to be bloodthirsty and savage enough.
* Demon Lords rule layers of the Abyss this way. Demons are way too chaotic to have any proper government, so the strongest demons are the rulers, plain and simple. Guys like Demogorgon and Orcus are constantly fighting bloody wars in efforts to gain more territory and followers.
* Demon manipulates Ken into becoming the Digimon Emperor by preaching a "statement" about order and chaos and gave a Dark Spore to Ken in hopes that the corruption factor will return Demon back to his former strength and amplify his own dark powers.
* Demon of Human Origin who introduces himself as a certain Thorkel the Thin, a warrior of the pagan times who died in the famous Battle of Bravellir.
* Demon of the Lute: True to it's title, the eponymous lute houses a dangerous demon that can destroy the world. Whomever wields the lute can gain access to the demon's powers. Most of the film revolves around the heroes' efdorts to destroy it before the demon can be unleashed.
* Demon of the week, only to then swiftly return behind bars just in time to have their names cleared once the magical crisis was over.
* Demon of Undoing features a race of cat-like aliens, the Imkairans. When one of them meets a human, it is he who is presented as the alien - the Imkairans are baffled by his lack of interest in rank, and cannot understand why he does things his hair colour suggests he can't (the Imkairans have a caste system based on the colour of their head-crests).
* Demonology101 consists of Raven and her friends following this trope.
* Demonology 101 pages that the undead can be killed permanently by having their brains destroyed.
* Demonology 101, those who control Hell are referred to as "The Powers That Be" or as simply "The Powers."
* Demonology 101 Two Witnesses attend the wedding and one comments on the Power Of Love.
* demon ones as well. Of course, they generally use their skill in deciphering texts, not actually speaking it.
* Demon Overlord Rozalin, known in her previous life as "the God of All Overlords" game...
* Demon Penguins have a weakness to silver, are created through a cloning machine, and have their heads explode when they die. They can also be resurrected through cheese and have retractable horns. They are usually red, and carry pitchforks which allow them to teleport.
* Demon Planet has one of the last strips before the reboot oriented diagonally so that you can't just use one scrollbar.
* Demon Princes series the protagonist, Kirth Gersen, is a somewhat belated Tyke Bomb after Mount Pleasant colony — his home — is destroyed and its people, including his family, massacred or led into slavery. His grandfather, the only other survivor, sank the rest of his life and his remaining resources into forging his grandson into a weapon of revenge.
* Demon Road and the main character's parents attempting to use her blood in order

to fulfill a blood pact.
* Demon Road, Dacre Shanks is a serial killer who shrinks humans that look alike and places them in a dollhouse to look like a happy family.
* Demon Road, Milo uses a 1970 Charger which drops hints of being sentient throughout the course of the book, one clue being way too obvious - when the undead serial killer stuffed in the boot is stated to be bound for digestion by the car, the reader could take him literally when we've already seen demons. Milo is, in fact, the urban legend known as the Highway Ghost. When someone tries to take the car, it is said to have him, not vice versa. Rather more subtle than many other examples, apart from Car Fu from which the car quickly recovers, but he does deliberately put the serial killer in the boot to get rid of him permanently.
* Demon Road that humps anything he can. They threaten to let him ride the faces of people they interrogate and he even does it to a decapitated head at one point.
* Demon Road trilogy will be invincible but will die if a certain object they have is destroyed.
* demons (among other things) isn't desirable to others. Nurgle is, quite literally, likened to a jovial grandfather. He's easily the nicest of the Chaos gods.
* Demons And Angels" had Lister warning his crew that he was being controlled to attack them, and actively helping them defeat him. Gives the quote "Look out, I'm trying to kill you!"
* Demons and certainly not worthy of servitude. The Integrators are exceptions, and even they believe that the God-Machine needs some... maintenance... before they can go back to its arms. Additionally, whilst most Demons are contemptuous of mortal beliefs, there is a small sect that spun out of the Integrator agenda that actively looks for a "real" god to offer their services to, rather than seeking a return to the God-Machine.
* Demons' and devils are vulnerabile to certain metals such as cold iron and silver.
* Demons and devils can take the form of humans, but there is always something subtly wrong about them.
* Demons and devils terrify mortals and immortals alike, and rightly so. The demons are a seemingly infinite tide of horrors that rebounds from every setback and pours from the rifts of the Abyss to invade even the slopes of Heaven, while the devils are sadistic, cunning, brilliantly evil tyrants scheming to rule all of existence and whose convoluted plans seem to assure their eventual victory no matter what their enemies do. And then there are the daemons, nihilistic,
* Demons are called "dumb animals" because they orginated as mindless monsters.
* Demons are interdimensional travellers, Devils (or rather, Deveels) are Cutthroat Merchants.
* Demons are the only type of evil at first the brothers face who pull this one. Occasionally some other malevolent beastie will indulge but
* Demons are treated as mooks, and Sam and Dean often kill the host body while killing the demon. This is discussed onscreen a few times, but they never stop completely. There are also key moments over the series when a good character is revealed to be possessed by a demon such as
* Demons as spiritual lifeforms cannot be permanently killed unless their souls are somehow permanently damaged, as they will regenerate within the underworld, which applies even if they obtain a physical vessel. However, repeated deaths over a short enough period of time without recovery will start to weaken the demon with each resurrection, and it's possible for a demon to devolve in the worst case scenario. It's implied that something similar applies to other spiritual lifeforms like angels and spirits.
* Demons can also be considered ghosts since they are former human souls transformed by their stay in hell. Bobby said once they're nothing but ghosts with a an ego.
* Demons cannot cross a line of salt. They can also be trapped inside a pentagram, which can be used the other way around too: after Bobby covered the panic room in anti-demonic sigils, Ruby was unable to enter it.

* Demons can reduce themselves to their mask, which can be worn by someone else to merge into a powerful "devilskin warrior". They rarely do this, because unless the person has been hollowed out into an
* Demons can't normally survive in the material world, so Chaos also aim to terraform worlds. In this case that tends to mean sucking them into hell and covering them with demons rather than simply altering the environment.

* Demons, devils, and yugoloths only die permanently if they are killed on their home planes of existence (the Abyss, the Nine Hells, and Gehenna, respectively). Kill them anywhere else, and they reform instantly on their home plane.

* Demons Due: An illustration based web series where an evil sorceress unleashes all kinds of evils upon a local lordship. Magic is fairly neutral here, too, but dang is it can't be misused for all kinds of horrors in this one.
* Demons eat spirits, meaning that attacking them only makes then stronger.
* Demon Seed has a metal thing that resembles nothing so much as a Rubik's Snake toy.
* Demons, especially Alastair and Lilith. The only thing they love more than lying to mess with someone's head is telling the truth to mess with someone's head.
* Demons. "Fedka the convict" bugs Nikolai Stavrogin for some money, and Stavrogin eventually complies. Afterwards, Stavrogin realizes why Fedka was asking for the money—in a very indirect way, Fedka was offering to kill Stavrogin's wife and brother-in-law in exchange for cash. Realizing this Stavrogin leaps into action and... does nothing, until his wife and brother-in-law die at Fedka's hand. He outright says, the morning after, that even if he isn't legally guilty of the murders, he considers himself morally guilty.
* demons) from getting too out of control. It fits this trope since the biggest baddest destroyer, Apep, was evil and its primary opponent, Ra, was good.

* Demon Sheep Commercial, where she compares moderate Republican California Senate Primary rival Tom Campbell to a "Wolf In Sheep's Clothing" for his moderate fiscal policy. * Demons just out of Hell appear to rely on this regularly—for example, the seven deadly sins in the start of season three pull things like "
* Demon Slayer: Kimetsu no Yaiba, “Breaths” are the center of all techniques performed by human demon slayers in the series. While learning how to breathe effectively is a real thing among athletes and martial artists, in here it is taken to a whole new level, proper breathing can make the characters have unprecedent control over their bodies, it can freely control their blood flow to make their muscles have super strength, it can push their bodies to move faster than bullets, it can outright stop hemorrhages by focusing hard enough; even so the

series pushes Breaths as something that is not supernatural at all compared to actual demons who can cast magical demonic arts.
* Demon Slayer: Kimetsu no Yaiba after defeating Kaigaku, in his near-death vision of the afterlife, Zenitsu talks with his master one last time, blaming himself for his master’s seppuku in atonement for Kaigaku’s betrayal and for the latter’s betraying them in first place; Zenitsu reasons that if he wasn’t such a coward and an incompetent disciple he wouldn’t have brought shame to his master, that if he was as good as Kaigaku their master wouldn’t have felt the need to try to atone for one of his best disciples turning over to the demons; the master however doesn’t agree with Zenitsu, honestly believing Zenitsu has always been his pride and joy, as previous flashbacks shows the master supporting Zenitsu at every turn, even if he tried to run or cry, the master saw through Zenitsu’s layers in that beneath all the apparent fear the boy never actually stopped trying to make through the master’s training regime, all paying off with Zenitsu defeating Kaigaku who was seem as the much stronger disciple by others.
* Demon Slayer: Kimetsu no Yaiba, among other things. The series explicitly notes that the superhuman feats of speed, endurance and power that Demon Slayers who use Total Concentration Breathing and Breath Styles display are non-supernatural in nature, as opposed to the unambiguously supernatural powers of demons and their diverse array of spells, the Blood Demon Arts.
* Demon Slayer: Kimetsu no Yaiba and conclude that they never loved him. Despite that, Rui understood what they were trying to do on some level, and the only way he could live with what he had done was to lie to himself that his parents had never loved him.
* Demon Slayer: Kimetsu no Yaiba animated shows to mildly, or severely, tone down violent and other suggestive content over the years; this decision proved to be one of the many reasons the Demon Slayer anime became a gigantic success.
* Demon Slayer: Kimetsu no Yaiba arms, with a blade in each hand, to even begin to emulate his techniques.
* Demon Slayer: Kimetsu no Yaiba, as the series progresses Zenitsu steadily becomes one of the fastest beings in the story, but the drawbacks of his Thunder Breathing techniques never fade away, Zenitsu only works around making the extreme muscle fatigue on his legs take longer to kick in after continuous usage of his abilities; that limitation is put into place so Zenitsu doesn't become an untouchable speedster without limits, otherwise he would be an unparalleled demon slayer, with very few equals.
* Demon Slayer: Kimetsu no Yaiba: A young boy comes home from running errands in a nearby village to find his family slaughtered and his sister transformed into a demon. He sets out to find a way to turn her back into a human, joining an order of swordsmen who use special powers to slay demons, leading him into conflict with increasingly powerful demons to find a cure.
* Demon Slayer: Kimetsu no Yaiba before Shinobu shows up and orders her to get dressed.
* Demon Slayer: Kimetsu no Yaiba by kicking a demon's head right off, but it kept on fighting.
* Demon Slayer: Kimetsu no Yaiba, by the time the story starts Tanjuro had already been dead for a year, felled by an unspecified illness, he however is the protagonist’s father and seemed to have imparted some important life lessons and some techniques that prove to be pivotal in many events later in the story; with that his son Tanjiro recalls key moments in the past where his father Tanjuro taught him something, using that knowledge to slay the demons Tanjiro encounters throughout the series.
* Demon Slayer: Kimetsu no Yaiba characters being all over a school building, Zenitsu and Krone were paired together alone, creating the same effect of Zenitsu being scared of Krone as she looms behind him.
* Demon Slayer: Kimetsu no Yaiba, demons inherently eat people. Nezuko, Tanjiro's kid sister who was turned into a demon, has managed to retain most of her humanity... but she's struck by overwhelming sensations of hunger whenever she sees

dead bodies, which reduce her to paralyzed crying. (It doesn't help that said corpses also remind her of when her entire family was slaughtered in the incident that led to her demonic state.)
* Demon Slayer: Kimetsu no Yaiba, despite being a shinobi themed demon slayer, Tengen is a self-proclaimed god of festivities who’s all about flamboyancy, his forehead protector is adorned with jewels, his arms are adorned with four massive golden bracelets, two in each arm.
* Demon Slayer: Kimetsu no Yaiba. Despite being groomed to be a cult leader since he was born, Doma believes that there is nothing after death, and when one dies, they simply 'return to the ground,' believing religion to be a waste of time. Given he's an immortal, centuries-old demon, this is quite noticeable.
* Demon Slayer: Kimetsu no Yaiba, despite its somber tone with all the demon slaying the series does not shy away from many comedic moments, the characters pull the most extreme face reactions imaginable, one of the male leads, Zenitsu, is the undisputed king of it as he is the resident overreacting wreck of the bunch.
* Demon Slayer: Kimetsu no Yaiba does this a lot when it comes to the demon girl Nezuko, from innocently presenting her with a flower to going full tomato red face in his dreams where Nezuko can actually speak normally again and reciprocate his advances.
* Demon Slayer: Kimetsu no Yaiba, each of whom is the undisputed champion in their chosen breathing style:
* Demon Slayer: Kimetsu no Yaiba. Even if he has to wear a shirt for whatever reason, he'll usually keep it unbuttoned.
* Demon Slayer: Kimetsu no Yaiba got nicknamed by his colleagues as “mommy” afterwards, due his warm and gentle nature.
* Demon Slayer: Kimetsu no Yaiba had secured almost all licenses to publish anime based video games but here Aniplex do it by themselves.
* Demon Slayer: Kimetsu no Yaiba has "Breathing Styles", martial art techniques that use controlled breathing patterns to increase physical prowess via oxygen saturation in the bloodstream, allowing practitioners to fight against demons on equal footing. There are different kinds of Breathing Styles, each of which provide their users with varying benefits and signature attacks known as "Forms", including (but not limited to):
* Demon Slayer: Kimetsu no Yaiba has Zenitsu immediately forgeting about the previous woman he desperately asked to marry him upon finding a new target; the only one he hasn’t let go is Nezuko, partially because he might liker her more than his usual crushes on first sight and that Nezuko is a nice demon girl in a state of mind where she really can’t decide or understand complex things yet, she is just nice enough not to repudiate Zenitsu on sight.
* Demon Slayer: Kimetsu no Yaiba have been fighting and killing demons basically for as long as anyone can remember in order to protect humanity. Strictly speaking, they're supposed to exterminate any and all demons that they become aware of, but during the events of the series they've softened a little bit, though not without controversy within their own ranks. Namely, Tanjiro is a member of the Corps mainly because his family was killed by a demon and his sister Nezuko was turned into a demon during the attack but she's been conditioned to defend humans instead of attack them; the leader of the Corps was aware of this and okay'd it, but not everyone else was and were perfectly willing to kill Nezuko and Tanjiro for their perceived betrayal.
* Demon Slayer: Kimetsu no Yaiba have explicitly magical abilities in their Demon Blood Arts.
* Demon Slayer: Kimetsu no Yaiba, Inosuke Hashibira doesn't seem to be very good at remembering names since he frequently gets Tanjiro's, the protagonist, name wrong whenever he addresses him. Tanjiro's Taisho Secrets claims that at first he can only get someone's name right once every seven tries; however, much later in the series, Inosuke starts calling the names of his closest friends consistently right, showing off his development in this regard.
* Demon Slayer: Kimetsu no Yaiba, in spite of his relatively equal level to Tanjiro, Zenitsu gets no recognition for his merits (especially from girls) because

he's lazy, complacent, wimpy and cowardly. He's a good guy and an excellent warrior, but he's incredibly obnoxious.
* Demon Slayer: Kimetsu no Yaiba: In the later moments of Muzan’s fight, in the Dimensional Infinity Fortress arc, after many slayers have been battered up to near-death, and Tanjiro had just been hit by a powerful shockwave emitted by Muzan, everything looks dire; Zenitsu steps up to save Inosuke from an attack and pushes himself to lift Tanjiro’s morale up, as the latter laid down in almost a convulsion state, telling him that he cannot die, Tanjiro has to live through that incredibly deadly fight and go home with Nezuko, who had just turned human, Zenitsu being alive and boosting his morale moves Tanjiro to tears. Zenitsu who was once a cowardly slayer, who had to be pushed over the edge and motivated to fight, now steps up on behalf of others, motivating them as well.
* Demon Slayer: Kimetsu no Yaiba introduces Tanjiro, the main character, as well as his mother and other siblings. A demon attacks them while Tanjiro is away, resulting in Tanjiro's sister Nezuko being turned into a demon and the rest of their family being massacred.
* Demon Slayer: Kimetsu no Yaiba is literally the incarnation of this trope as he never stops screaming his lungs out and almost can never utter a single sentence without shouting.
* Demon Slayer: Kimetsu no Yaiba is notorious for this. Nezuko, Daki, Mitsuri, and Kanae have very long hair past their waists.
* Demon Slayer: Kimetsu no Yaiba, it is the conclusion of Zenitsu’s character arc; he finally forces himself to grow out of his self-depreciating mental abyss, forsaking his sleep trance mode entirely, when the tragedy of his master’s death strikes, going on to face the cause of said tragedy in the form of his former fellow disciple, Kaigaku, who now turned into a demon, traitor of the demon slayers; Zenitsu faces Kaigaku head on, and kills him, the older disciple whom Zenitsu was completely submissive to before due seeing himself as inferior and partially out of respect, despite their differences Zenitsu still wanted to see him as a brother before everything went south.
* Demon Slayer: Kimetsu no Yaiba, Kagaya Ubuyashiki is a man of deep wisdom, far more than befits his age of only twenty three. He's seen as far wiser and more mature than men many years his senior. The most notable thing is the fact Kagaya managed to make Himejima, who’s 4 years older, consider him, the younger person, to be his father figure.
* Demon Slayer: Kimetsu no Yaiba, Kanao’s skirt gets visibly shorter as the series goes, it started with being below her knees, it ended a little above her knees, Gotouge of course tried to make a humorous explanation on why that happened, simply stating the resident perverted Corps tailor, Masao, has been secretly making changes to Kanao’s uniform since he can’t fool any other female slayer into wearing what Mitsuri got anymore.
* Demon Slayer: Kimetsu no Yaiba, Kanao Tsuyuri came from an extremely poor and abusive family, her parents literally threw her out and sold Kanao as a slave; however she got rescued by Kanae Kocho and Shinobu Kocho before Kanao’s life as a slave could actually begin, the Kocho sisters came from a well off family and even after being orphaned they became Demon Slayers under the very wealthy Ubuyashiki estate, with that the Kocho Mansion was kept well maintained by the fee earned through demon-slaying; Kanao is registered as the youngest sister of both Kocho girls, enjoying a resourceful life as a member of the Kocho family.
* Demon Slayer: Kimetsu no Yaiba, Kyogai can attack others with invisible clawing attacks within his domain by pounding on the drums embedded in his chest and shoulders. By pounding the drum on his back, he can forcibly transport someone to another room in his building.
* Demon Slayer: Kimetsu no Yaiba lived most of his life alone in the mountains, with only a little human interaction when he was an infant, with that he had little to no experience and knowledge of social interactions; that makes him seem quite insensitive in his early appearances, but it is progressively shown that most of it isn’t done out of real malice, he really had no idea on how to be sensible towards people, from there on Tanjiro, the protagonist, becomes quite the mentor on

how Inosuke develops in his empathy towards others.
* Demon Slayer: Kimetsu no Yaiba, mentions in one episode that while countless Lower Ranks have been killed by Demon Slayers over the years, the Upper Ranks have gone largely unchanged for centuries. This is because no one, not even the most elite Demon Slayers, has been able to kill them.
* Demon Slayer: Kimetsu no Yaiba Mitsuri aims for this to an extent, after being rejected by all of her previous normal male suitors who thought her being inhumanly strong was a turn-off Mitsuri then hoped she could meet a man who’s either equally strong as her or more so she can finally marry; as a Hashira this comment of hers ambiguously made it seem she either doesn’t consider the other male Hashira strong enough or she just isn’t attracted to any of them.
* Demon Slayer: Kimetsu no Yaiba movie has Aleks Le making his voice sound much deeper as if trying to hammer the point harder that Zenitsu in his trance is a tough demon slayer.
* Demon Slayer: Kimetsu no Yaiba, Muichiro Tokito suffered his own tragedy at the hands of a demon when he was 11 years old, got personally scouted after the immense potential he showed by killing that demon on a fit of rage; blazed through the Demon Slayer Corps’ ranks in just 2 months. To compare and contrast, Muichiro was a Hashira by the age of 11, while series' protagonist Tanjiro had to wait 1 year before his tragedy even began, and 2 more years before he even officially became a Slayer.
* Demon Slayer: Kimetsu no Yaiba: Muzan Kibutsuji, he's the original demon, created the other demons(in fact the only capable of creating other demons), though he states that he actually hated doing it, but had to in order to find either a demon that could withstand the sun or the main component in the elixir that made him a demon in the first place.
* Demon Slayer: Kimetsu no Yaiba often uses thick lines in some shots and comedic takes.
* Demon Slayer: Kimetsu no Yaiba on several events from the manga but there some really minor things the anime cut for unspecified reasons:
* Demon Slayer: Kimetsu no Yaiba, or if it’s really necessary it will have an actual character state that important piece of information. However, there are a few gags in the manga that relied upon the narrator to work, such as the fact explaining how honest the protagonist Tanjiro is to fairly introduce himself to a demon before attacking them, despite how going for a sneak attack would be far more preferable since a demon isn’t really worth being polite to. The anime skipped over explaining why Tanjiro does that.
* Demon Slayer: Kimetsu no Yaiba, physical prowess is taken very seriously among the demon slayers in the setting, individuals with bigger musculature and body mass are seen as the strongest, save one special female with an extremely rare body condition that allows her to be strong with a slender body; the male protagonists: Tanjiro, Zenitsu, and Inosuke get visibly more well defined and bigger muscles as the series progresses, seen through the several training regimes they go under.
* Demon Slayer: Kimetsu no Yaiba, Ruka Rengoku’s death heavily impacted the Rengoku household, her husband Shinjuro lost all his will to continue being the Flame Hashira coupled with him losing faith in his swordsmanship abilities after reading on the Sun Breathing capabilities, with the eldest son Kyojuro trying to shoulder the weight of his family all by himself on succeeding his father as the Flame Hashira.
* Demon Slayer: Kimetsu no Yaiba: Sasamaru, one of the first named demons Tanjiro faces, is acually a girl, despite the fact that her name ends with the masculine -maru suffix.
* Demon Slayer: Kimetsu no Yaiba spin-off is a daunting task in its original published format, since its contents are produced in a very spread-out capacity, different magazines, different publications between manga, light novel and even databooks. The anime makes it easier to consume, by being post-episode extras, until the Valentine arc that was originally a stream-only event.
* Demon Slayer: Kimetsu no Yaiba subordinates track Tanjiro and Nezuko to the house where Yushiro and Tamayo are hiding. During the battle, Yushiro proposes that he

and Tamayo sneak out while they're distracted fighting Tanjiro. Tamayo is horrified by this suggestion, prompting Yushiro to insist that he was joking.
* Demon Slayer: Kimetsu no Yaiba sword skills to keep the demon population under control. An unidentified demon massacres main character Tanjiro's family and converts his sister Nezuko, but she retains some of her humanity, so he sets out to become a demon-slayer both for revenge and to find a way to cure her.
* Demon Slayer: Kimetsu no Yaiba takes place in the Reiwa era, when nearly all of the main cast have passed on, and the few that did survive are either over a century old (Ubiyashiki) or functionally immortal (Yushiro). The epilogue shows the cast's descendants and reincarnations.
* Demon Slayer: Kimetsu no Yaiba,Tanjiro is a well meaning guy and definitely not stupid, but he is quite terrible at explaining technical aspects of his sword and martial arts abilities, he earnestly tries to explain to his friends his experiences with “it was pow wow, the I was like boom, boom”, said events occur when Tanjiro tried to explain his Full Focus Breathing training to Zenitsu and Inosuke, and later when he tries to explain how his body achieved the Demon Slayer Mark. Later it is also shown the freakishly strong swordswoman Kanroji Mitsuri is just as bad as Tanjiro in explaining the technical aspects of her abilties, using the same "boom, boom" terms.
* Demon Slayer: Kimetsu no Yaiba, Tanjiro is undisputable in this regard for the entire series, the guy is such a lovable protagonist that he builds an extensive record of characters that changed for the better by coming in contact with him, and while Tanjiro always kills the demons in his path, if they seek for some sort of sympathy in their final breath Tanjiro will give them one last moment of empathy before they die, the demons who haven’t completely pissed Tanjiro off that is, which are the completely unredeemable ones who really excelled in being evil bastards.
* Demon Slayer: Kimetsu no Yaiba (Tanjiro, Zenitsu, Kanao), his more prevalent quirk is the nicknames he comes up for the not-so-close friends, like the Hashira, for example Himejima is the “Juzou Ossan” (prayer beads old man).
* Demon Slayer: Kimetsu no Yaiba, Tengen Uzui’s three wives are curiously similar to the main male lead characters: Tanjiro, Zenitsu and Inosuke regarding their basic personality traits; Hinatsuru is the peace maker and heart of the trio, like Tanjiro is, Suma is the overly emotional roller-coaster, cries and screams in fear a bit too much, like Zenitsu does, then comes Makio as brash and gutsy who’s always bickering with Suma, just like Inosuke acts with Zenitsu. The similarities are so obvious that several fan works do not let these similarities pass by unnoticed.
* Demon Slayer: Kimetsu no Yaiba, Tengen Uzui the powerful elite ninja and one of the Hashira, is married to three beautiful kunoichi - Hinatsuru, Makio and Suma - later on a databook reveals Makio is actually a relative of Tengen’s, his cousin.
* Demon Slayer: Kimetsu no Yaiba, thankfully for Zenitsu this is just a small part of his backstory and he isn’t exploited again in current events; due his ongoing gag of wanting a girl to marry him Zenitsu has actually found some women in the past that pretended to entertain him instead of just rejecting his desperate advances like the comedic side of his attempts usually go, those past women all tricked Zenitsu and never sticked with him, he knew those women were bad but he really wanted to have someone by his side, fearing he will die alone as an orphan since childhood.
* Demon Slayer: Kimetsu no Yaiba, that is Sanemi Shinazugawa's biggest tragedy and the source for his hatred of all demons, he was leading a relatively happy humble life after his deadbeat father died, Sanemi became the man of the house, caring for his mother and all his siblings; however, one day his mother Shizu was taking too long to come down the mountain, the worst happened and so Shizu became a demon, Sanemi in pure instinctive fear ended up killing the demon that was once his mother, in self-defense, the pain from killing his own mother was coupled with the fact his little brother Genya mistaking the event as Sanemi killing their mother on purpose, calling his big bro a monster, as he didn’t realize at the moment

their mother was a mindless demon.
* Demon Slayer: Kimetsu no Yaiba, that's a crucial point of Zenitsu's backstory, he had no true friends before meeting Tanjiro, the guy really had a need to belong since Zenitsu had no family, which prompted himself to try being part of any group of people when he was younger, however, Zenitsu’s cowardly and crybaby moods either quickly made others want to stay away from him, or fake tolerance to later scam him. Nobody before his master, and later Tanjiro, bothered to notice Zenitsu’s good qualities beyond his apparent faults.
* Demon Slayer: Kimetsu no Yaiba, the anime adaptation added more fanfare to Zenitsu’s absolute body stress to initiate the steps to augment the power of his Thunderclap Flash attack, in the manga it showed white eyes, the anime made it go white and then added glowing effects of light and thunder.
* Demon Slayer: Kimetsu no Yaiba, the Demon Slayer Corps wear black gakuran with black hakama tucked into their sandals as standard uniforms. Many members add their own flourishes to their uniforms:
* Demon Slayer: Kimetsu no Yaiba, the "Elder Brother" of the spider demon family is essentially a giant spider with a human head. He can use his poison to turn his victims into smaller spiders with human heads that become his mindless minions.
* Demon Slayer: Kimetsu no Yaiba, the existence of the titular demons and slayers are completely unknown to the general population of Japan, the setting being the Taishō Era, early 20th century, has made Japan a little less inclined to take their folklore too literally, and with non-government officials being outlawed from freely carrying swords centuries ago, the slayers have to carefully patrol more urban locations where officials would question and likely apprehend them for carrying weapons around.
* Demon Slayer: Kimetsu no Yaiba, the lower ranked Slayers are easily disposable and they die frequently, the setting doesn’t even bother stating an exact count of how many active Demon Slayers exists within the Corps, only the elite, the Hashira, are accounted for to be nine members at most when the roster is complete, because even the elite aren’t immune to dying, they just don’t die frequently.
* Demon Slayer: Kimetsu no Yaiba, the most capable Demon Slayers must have super human speed by default, that’s how they can keep up with the naturally more powerful demons, Breath of Thunder adepts are on a tier of their own, at the peak of their abilities even demons cannot keep up with their speed; Zenitsu’s peak, so far, are his Thunder Clap Flash: Godspeed and Flaming Thunder God, both techniques are so incredibly fast that even two Upper Ranks were not able to follow him at all.
* Demon Slayer: Kimetsu no Yaiba The Movie: Mugen Train was briefly made available on the PlayStation Store before its intended digital release in June of that year. The film was delisted from the store three hours later and Sony offered refunds to anyone who purchased it during that time.
* Demon Slayer: Kimetsu no Yaiba, the Mugen Train Arc has Lower-1 demon Enmu using his powers to send every passenger on the train into their own sweet dreams so he can devour them.
* Demon Slayer: Kimetsu no Yaiba, there is a couple where their age gap is explicitly stated in order to portray its depth, Kagaya Ubuyashiki, the lord of the Demon Slayer Corps married his wife Amane when he was 14 years old and she 17 years old, while Amane is three years his senior Kagaya’s maturity has always been of a man far older, it was stated Amane wasn’t apprehensive of her husband being younger at all.
* Demon Slayer: Kimetsu no Yaiba, there's a figure of legend who got this close to kill the originator of all demons, a demon slayer samurai who kept his humanity but had skills that practically made him inhumanly strong, almost divine in nature; it turns out he managed to live for 80 years and in his final moments still wanted to dispatch his older twin brother who became a demon, his brother notes than even as an 80 years old man his skills still seemed absurd, something that made a demon who kept his youth feel envious.
* Demon Slayer: Kimetsu no Yaiba, the series has at least two key events for these

rites.
* Demon Slayer: Kimetsu no Yaiba, the series has warrior and military ranks on both heroes and the villains side:
* Demon Slayer: Kimetsu no Yaiba, the setting has the Kasugaigarasu, the messenger crows, which serves as the main line of communication among the demon slayers; the crows have been taught how to talk through unspecified methods, at first some crows are shown to only be able to speak to a certain level, as in they seem slightly speech impaired, but later more experienced crows are shown talking fully coherent like a human being.
* Demon Slayer: Kimetsu no Yaiba, the setting takes place in Japan’s Taisho Period, which is set in 1912 onwards, most human and demon characters aren’t overly polite but a really powerful demon, Kokushibo, was a human from, at the very least, 300 years prior the current setting and with that he speaks in extremely antiquated Japanese, how much of that is translated into English varies within fan translation efforts, the official Viz Media translation puts a little more effort in adapting Kokushibo’s manner of speaking from time to time.
* Demon Slayer: Kimetsu no Yaiba: The sleep demon Enmu's power is to step inside your inner world through dreams. If your spiritual core in the subconscious part of that world is destroyed, it leaves you mentally crippled and a shell of your former self. The mental world is a reflection of your personality (i.e.: Rengoku's is a wide burning plain of tiled stone floors, Inosuke's is a maze of winding underground tunnels...)
* Demon Slayer: Kimetsu no Yaiba, the swordsmanship master Jigoro Kwajima has a peg-leg, a wood construction, which is likely one of the reasons for his retirement, a Breath of Thunder adept has their legs as the basis of their strength, which is pure speed, without them Jigoro is effectively crippled.
* Demon Slayer: Kimetsu no Yaiba: The titular demon slayers are trained under varied swordsmanship styles, classified under natural elements such as Fire, Water and its derivatives, however, the setting really goes an extra mile to make its sword attacks look much cooler than they seem, that is by adding visual elements embedded to its strikes, all for the sake of it because the setting slightly alludes (which the author had to further confirm due some people still not getting it) to the fact none of the elemental visuals are real, as in there’s no Water materializing from thin air and so forth; the elements are there just because the author thought the attacks look cooler that way.
* Demon Slayer: Kimetsu no Yaiba, the Upper-6 fight in the Red Light District arc, by far the longest antagonist fight in the series, until the very final fight dethroned it (by just one chapter), is much more enjoyable in collected volume form; some people who had to follow it weekly weren’t having a good time after a certain point, where cries of dragging on could be heard.
* Demon Slayer: Kimetsu no Yaiba this is a theme with several other characters in the series, but Zenitsu is the one that sticks out the most, his whole yellow thunder theme is all over his design, blond hair, gold eyes, yellow coat, and yellow tint on his nichirin blade.
* Demon Slayer: Kimetsu no Yaiba, this is the main application of the Thunder Breathing style. While all demon slayers must be fast to move and quick to draw their blades, a Thunder Breathing user will go beyond that and be ridiculously fast to the point even demons will be surprised by their speed. Zenitsu is so adept at the only real Thunder Breathing technique he mastered that it makes him lightning fast to incapacitate and kill demons, making up for the lack of skill in the other Thunder Breathing forms.
* Demon Slayer: Kimetsu no Yaiba, throughout the series humorous moments during breather intermissions between arcs becomes more prevalent, with that Gotouge starts drawing the characters in borderline doodle style, with dots for eyes and shortened body proportions, in some of these comedic moments.
* Demon Slayer: Kimetsu no Yaiba, two of the more brutally honest Hashira: Sanemi and Obanai, outright state the Corps are full of useless slayers, they are only rebutted by the Hashira who vouch for the main characters, who just happened to show promising results after mere months in the force; the official supporting

positions, however, like Kakushi the clean-up and transport brigade, and the physicians are useful at helping the main combatants.
* Demon Slayer: Kimetsu no Yaiba unless their heads are cut off. However, all demons are vulnerable to sunlight and will crumble into dust if caught outside at the crack of dawn.
* Demon Slayer: Kimetsu no Yaiba was published in a shounen magazine, most of its merchandise is aimed at boys. As a result, any merchandise aimed at females will only have Shinobu and Nezuko on it, with no sign of any male characters anywhere. This is averted overseas, where female-oriented merchandise does contain male characters.
* Demon Slayer: Kimetsu no Yaiba were cited as being some of Gotouge’s favorite series and clear inspirations for this work.
* Demon Slayer: Kimetsu no Yaiba when he is brought back to normal, alive but injured.
* Demon Slayer: Kimetsu no Yaiba: When in the form of a woman, Muzan wears heavy mascara and a small amount of lipstick. He also happens to be the first and most evil of the demons.
* Demon Slayer: Kimetsu no Yaiba, when Tanjiro is training under Urokodaki for the Final Selection, he meets a mysterious boy and girl named Sabito and Makomo who help him with his training. It's later revealed that Sabito and Makomo are actually the ghosts of two of Urokodaki's former students, having been killed during the Final Selection themselves several years ago. When Tanjiro casually mentions them to Urokodaki, he's quite surprised that Tanjiro would know the names of his dead students.
* Demon Slayer: Kimetsu no Yaiba with plenty of battles to keep guys hooked, then plenty of women in Japan jumped onto the series for all the handsome men it has, but that's a very limited reach still; everything changed when the anime became an absolute phenomenon in Japan, the series grew to spark interest in all sorts of varied demographics, to the point of japanese mainstream media trying to understand why and how men young and old, women young and old, from people who have never really cared much about anime and manga to begin with to seasoned otaku giving the series their attention. Many tried to explain, with diverging opinions, but the most intersecting factors boil down to how simple and yet effective it carries its themes of family bond, hard work, folklore through a very familiar japanese background carried in an easy to digest manner, the story can be understood even by a little child.
* Demon Slayer: Kimetsu no Yaiba Zenitsu can’t muster the inner courage he has to surpass all of his cowardice on the surface, a good way to make him focus and be brave, or at least try to, is find himself in a situation where there’s a woman in peril, Zenitsu will stop his complaining right away and go for the rescue.
* Demon Slayer: Kimetsu no Yaiba, Zenitsu comically asked Nezuko to marry him on the prospect of feeding her Sushi and Eel every day, that resulted in a failed attempt due Nezuko’s mind as a demon still not being able to understand what Zenitsu was proposing on that event.
* Demon Slayer: Kimetsu no Yaiba, Zenitsu in his desperate attempt to get married as quickly as possible often literally throws himself on women begging for them marry him, usually in a comedic manner, and at one other time he has proclaimed really well his love for a woman’s curves; with Nezuko however he is quite tame, his crush on her is quite the puppy love, innocently presenting her with flowers included.
* Demon Slayer: Kimetsu no Yaiba: Zenitsu in his never-ending quest in trying to get himself a lover, self-declares himself to be Nezuko's protector as soon as he finds out she is a harmless demon and sister of his newfound good friend Tanjiro, as he thinks she should be protected at all costs; this is mostly used as a comic motivator for Zenitsu to get up and do his job as a demon slayer and to train harder, in a fight against the Lower Rank One however this is applied seriously, with Zenitsu actually speaking to Nezuko in his trance mode that he will protect her, shielding her from the Lower Rank's attacks as she was fighting alone till then.

* Demon Slayer: Kimetsu no Yaiba, Zenitsu is considered to be a loser by almost all of his past acquaintances before meeting the main cast, and even if he has friends now there’s still new people Zenitsu meets who don’t like him, yet he is very popular among the fandom, once scoring 2nd place in an official poll only behind the loved-by-all protagonist Tanjiro himself; his popularity proved to be long lasting, the 2nd official manga poll in Japan crowned Zenitsu with the 1st place in 2020. This is made even more curious by the fact Zenitsu is disliked by many of the girls he tries to impress but is loved by a fandom that has a gigantic female presence in it.
* Demon Slayer: Kimetsu no Yaiba, Zenitsu's colorful rant about women and their curves gave him a bad first impression with the Butterfly Estate girls, but Zenitsu is actually seriously committed to the idea of marrying someone fully intent on loving them, even when it made him suffer, as in the past there were women who entertained him, with bad intentions, like the unknown woman whom Zenitsu had eloped with and piled him with debts, where he had to be rescued by his future swordsman master, prior the beginning of the series.
* Demons, leaving only your identity which he converts into a new human form for himself.
* Demons like to steal the identity of whatever body they're currently wearing. In the episode The Magnificent Seven, one of the Sins possesses the body of a hunter they just killed in order to taunt his wife. The fact that everyone knew it was an act appeared irrelevant.
* Demons — Horror series. 2 films and an unofficial sequel since 1985.
* Demons, meanwhile, reproduce through Spawning Pits... which manage to be even
* Demons more closely resembling actual bats, but the size of oxen and capable of running on all fours with their wings folded, are among the monsters that attack the Belmont manor in Season 2.
* Demons most of the time inhabit innocent people who were in the wrong place at the wrong time. The Winchesters always kill the person when fighting the demon (especially in the later seasons) even though using exorcism is a way (granted, a slower way) to extract the demon without hurting the person. This issue is brought up a few times in the show but with the demons being the show's disposable
* Demons of Air and Darkness, who like most Hirogen relates to other sapient beings only as prey. At one point, he reflects on how one of his victims cried that she had a husband and children, "as if the family structure of prey was of any relevance".
* Demons of Dundurn. In the Feathered Serpent Inn, the staircase between the first and second floors can be flattened into a ramp by turning the knob on the post at the bottom of the stairway.
* Demons of the Burning Night all of the aging immediately takes effect.
* Demons of the Burning Night can run into this deadly threat in the Elder Swamp near the city of Tarek Nev.
* Demons of the Deep by Steve Jackson (US), set in an unusual underwater setting.
* Demons of the Deep, if you spar with Cyrano the swordfish. If you win, he acknowledges you as a master swordsman but he is as well and he's also a teacher of his fellow masters so you gain +1 to your maximum Skill level. If you lose, you gain a better +2 to your maximum Skill level instead.
* "Demons of the Punjab" is set at the time of the Partition of India, and features a young couple, Muslim Umbreen and Hindu Prem, about to get married. The new border is drawn so Umbreen's house is in Pakistan and Prem's house is in India, and they get married across the border.
* "Demons of the Punjab" of the events, calling Yaz her "favourite granddaughter", and noting the faded henna on Yaz's hands which she got in 1947 would suggest that she does, but nothing is confirmed.
* "Demons of the Punjab": The Thijarians show the Doctor a recording of the destruction of their homeworld in this fashion.
* "Demons of the Punjab": The Thijarians travel through time and space to serve as witnesses to the deaths of those who would otherwise die alone.
* "Demons of the Punjab": Umbreen and Manish's families had been neighbours in the

same valley for generations, and during the war, Manish would often go hungry so both families could eat. All that changed when Manish became radicalized against Muslims.
* Demons, once they possess people, become completely aware of all the host's memories and emotions, making fitting in that much easier.
* Demons only vampires can kill other vampires. Anyone else first has to shoot them with a high-tech bullet containing their DNA reanimated by electricity, which turns them back into humans.
* Demon Soul and association with the Old Gods, with metal plates fastened all over it to stop his body tearing itself apart.
* Demon Spawn a group of random bystanders has this reaction after seeing villain Nightflame blowing a street up and striding towards them.
* Demon Spawn because it is a world of sorcery (one of her weaknesses).
* Demon Spawn. However she fights off villain Nightflame magic as hard as she can.
* Demon Spawn is kidnapped and brought to an alternate dimension called the Innerverse, in which the sky is a dark-violet void.
* Demon Spawn, Linda gets stripped from her powers temporarily when she is brought to the Innerverse. She feels even weaker than an ordinary human.
* Demon Spawn Linda's lightning speed allows her put out a fire by spinning quickly until she forms a whirlwind, and dodge Nightflame's strikes.
* Demon Spawn — is so fed up of putting up with her co-worker 'Nasty''s bullying that she punches a wall, which makes people wondering if a plane just crashed into the building. When her boss Geoff inquires what happened and what was that loud boom coming from her office, Linda replies "Oh, nothing!". He doesn't believe her.
* Demon Spawn Nightflame's attacks hurt her because that villain is a sorcerer.
* Demon Spawn: Once her plan fails, villain Nightflame's world starts dying. And she is dying together with it. So Nightflame attempts to destroy Supergirl to kill them both.
* Demon Spawn shuts herself in her office and she is so angry that she punches -and cracks- a wall.
* Demon Spawn's mind, created by her repressed inner darkness and populated by weird demons and misshapen goblins. Because her lighter side is growing stronger, though, the Innerverse is decaying and dying.
* Demon Spawns Series. However, they lose all of their demon powers for the day if they come in contact with holy water. They're also the children of Satan.
* Demon Spawn: Supergirl bursts through the walls of a burning building to find people, move them to a safe place, and put the fire out.
* Demon Spawn, Supergirl spins around at Super Speed to create a whirlwind and put out a fire burning a building down.
* Demon Spawn super-villain Nightflame attacks Supergirl from back, striking the heroine's temple with the flat of her magical blade.
* Demon Spawn, sword-wielding sorceress Nightflame steals Supergirl's soul in order to drain her life-force and take over her body.
* Demon Spawn, villain Nightflame gestures her left arm skywards while she demands to know Supergirl's location.
* Demon Spawn, villainous sorceress Nightflame opens a dimensional rift to travel from her universe to the physical world.
* Demon Spiders are the size of a large timber wolf and can cast webs that inflict fire damage and
* Demons possess humans in order to walk the earth, and the two most prominent female demons Meg and Ruby possess attractive, female vessels during most, but not all, of their appearances. Lilith amps up the creepy by often choosing little girl vessels and behaving like a little girl, even in an attractive adult female vessel. However, as Dean gets closer to going to Hell, he can see their real faces and comments on how ugly demons are. Castiel can also see their true faces, but this doesn't stop him
* Demons sometimes sport these. The Source of All Evil adds licks of hellfire in them for effect.

* Demon's Souls, an earlier series of first-person RPGs released for the original PlayStation.
* Demon's Souls are rather notorious for this. The games will only go so far as to explain the basic controls, but in terms of telling you where to go or how to fight the bosses, well, you'll have to figure that out yourself. Over and over and over...
* Demon's Souls (assuming the player is just starting out; more experienced players will be able to handle most enemies without much trouble).
* Demon's Souls, a surprisingly large number of bosses and mini bosses are just as susceptible to the Poison Cloud spell as any normal enemy would be, but immune to the far worse Death Cloud.
* Demon's Souls Blige, who takes what he can from the dead to sell to passing Demon slayers. In fact, almost every merchant but the Once Royal Mistress gets their ways by taking advantage of the demon invasion this way.
* Demon's Souls by this, which is partly why magic is considered a dark thing at best. Demons and most of the whole conflict revolve around demons taking this from humans.
* Demon's Souls counts, but it's stretched a bit as he needs rescuing two of the three times you meet him in the Boletarian Palace.
* Demon's Souls dies at the very beginning of their quest, only to be brought back to life thanks to the gatekeeper of the Nexus. From that point on, death is a regularly scheduled occurrence.
* Demon's Souls) dragon delivers a single instant death punch right to your face in a cutscene, resulting in your death.
* Demon's Souls features the Storm King as the boss at the Isle of the Shadowmen. A huge leathery-winged thing the size of Texas. It also comes accompanied by a fleet of Storm Beasts, smaller versions of itself that are more than twice as big as the player-character.
* Demon's Souls has a similar effect, Occasionally with black world tendency, you can encounter "Black Phantom" NPC enemies. Despite the name, they appear a glowing red with black cracks running through them and tend to be much stronger and harder to kill.
* Demon's Souls have an interesting relationship with this trope. While a skilled enough player can make the efficiency difference between melee and magic play-styles negligible, that same argument can be used to explain why magic builds usually outclass melee builds. The main difference between the games is how wide the gulf is between melee and magic.
* Demon's Souls, in that this is anything other than safe for the soul inside; it's just stored in it.
* Demon's Souls in the shape of gigantic insects, freaky mutants with disease literally pouring from their flesh, gigantic trolls that deal massive damage per hit and aborted fetuses. Did we mention that staying too long in the swamp poisons you? And that you are reduced to a crawl when you are in it? And that enemies, especially the aforementioned powerful ones, are not hindered by such a thing? Have fun.
* Demon's Souls issues, Poison Cloud and Death Cloud can kill bosses without you needing to do anything but wait, Recovery and Regeneration will always heal you to full as long as you have MP (Which is easy to restore), and Second Chance revives a player who dies with half their health restored.
* Demon's Souls Mode without leveling up ever. Or beating the game using only your fists. There is at least one video series of a "Soul Level 1, New Game +++++++" challenge. It's described as less an RPG, and more of a puzzle game, because if anything so much as touches you, you will die.
* Demon's Souls required you to attack their weakpoints in order to defeat them. The Tower Knight forced you to run around his titanic greatshield to hit his heels until stumbled and fell over, exposing his vulnerable head to your attacks, while the Adjudicator's blubbery body was almost impervious to your attacks except for a gaping wound in its belly with a snapped blade protruding from it (apparently one of its own cleavers), which when struck would cause the boss to slump forward,

letting you reach the golden bird sitting on its head that controlled it.
* Demon's Souls requires you to do this a few times. In addition to literal balls of fire that you have to dodge, one of the spider's attacks is to fill the entire area with a huge, spreading wall of fire; the only way to avoid it is to run back up the corridor and wait for it to stop. In the remake, this was visually changed to spraying flammable liquid on the floor and lighting it.
* Demon's Souls that shoots web from afar and claw at you at close range. It also breathes fire.
* Demon's Souls that the occasional metal coins you can find (presumably currency of the surrounding countries) are utterly useless in Lordran.
* Demon's Souls: The awakening of the Old One marks the return of the long-forgotten Soul Arts, allowing magic to be cast and miracles of God to be invoked again.
* Demon's Souls the Dragon God boss has a second row of teeth on a set of jaws separate from its normal jaws.
* Demon's Souls, the Dregling is a human that has gone mad after having their soul devoured by the demons in the fog. Some Dreglings have some humanity left in them and can talk and trade with the player, others are completely hostile such as the slaves and former soldiers of the Boletarian palace.
* Demon's Souls, the Game Breaking Injury is death. When you get revived in the Nexus, it brings you back as a ghost that has only half the maximum health your physical self has. This is unavoidable in the tutorial since this is how you get bound to the Nexus in the first place.
* Demon's Souls: The player always has a magical gem called the "Augite of souls" which glows in the presence of souls.
* Demon's Souls. The player can see the bloodstains of fallen heroes (other players online at the same time), including watching their final moments, and read the messages and warnings left behind by them.
* Demon's Souls, the player character becomes a demon slayer out of necessity since demon souls are the only currency accepted in the Nexus.
* Demon's Souls. They are the resurrected bodies of aborted fetuses from Boletaria who now squirm in a swamp chock-full of the plague.
* Demon's Souls) to collect all the weapons and spells that exist in order to get some PlayStation 3 Trophies. Subsequent New Game Plus runthroughs, after the first, also increase the difficulty, but not as much as the first time. By your third playthrough, you'll notice enemies are not as tough, and by the fourth playthrough, you're likely to be breezing through the game.
* Demon's Souls, unlike you. In the second game, the enemies that live on it can still charge at you at maximum speed, but an equippable ring exists so that movement penalties are removed entirely when walking on swamps. Oh, and fast rolling (<25% equip burden, or Dark Wood Grain Ring ninja flip) is not disabled in the swamp.
* Demon's Souls. You are just another individual coming to a now-deserted Boletaria to help stop the fog or for your own hunger for power while also meeting other visitors/survivors with their own agendas.
* Demons, spirits, and Abyssal entities can manifest physically, but their bodies are more symbolic than indicative of their power. Nobody should ever believe that the gawky, emaciated Prince in Tatters
* Demons, the creatures are more like monsters than zombies, but they work with zombie rules and may have been an inspiration for straight zombie films to follow.
* demons. The destruction of either or removal of the latter are the only ways to kill a demon.
* Demons. The term came into common usage in Russia during the Stalinist era, for obvious reasons.
* demons. They know their former boss has agents in all facets of the world, and that said agents are looking for defectors so that they can be reintegrated (forcefully, if necessary) back into the God-Machine. Also, they and all their kind have such perfect control over their emotions, they can tell lies that no supernatural power can discern as falsehoods. There's a reason most of their local

institutions are modeled after spy rings.
* Demons. They often have offspring with humanoids, leading to half-demons who still wield some of their parents' infernal magic.
* Demonstrated especially well in the episode "Out of Gas," when he handles each of his people differently during a crisis.
* Demonstrated in an annual story written by Kurt Busiek, in which the Avengers and the Squadron Supreme are forced into a "
* Demonstrated in an episode, where they specifically compared blowing up a car with a Hollywood style explosion, and blowing it up properly. The Hollywood one caused an impressive fireball, and scorched the car while leaving it mostly intact. The proper one blew the car into pieces scattered over a wide radius. Of course the proper one

* demonstrating the Zanmaken ni no Tachi. Bystanders just say, "Are they shooting a movie?" Even magic citizens find some of the stuff going on unbelievable.
* demonstration video here combines with relatively light transport needs.
* demonstratives by throngs of Chinese loanwords (see above) that a speaker has to live with.
* Demon summoning in general works this way. When you manage to summon and bind a demon, you have the choice between assigning it a task with a potentially unlimited duration, or making the demon your devoted slave for one year and one day. The first option especially has endless potential for abuse, problems and loopholes. If you command a demon to "prevent anyone from entering my house when I'm not inside, forever", congratulations, you have just locked yourself (as much as anyone else) out of your own house until you (or someone else) manages to kill the demon.
* Demon summoning is a fairly widespread form of magic in the setting, consisting of the summoner carving a "gate" into a wall (
* Demons use sapient beings such as humans, elves, witches, or even other demons for their familiars. This is considered to be a
* Demons view bride-napping as an acceptable way to test enemy Lords' mettle by seeing how well a Lord and their spouse can protect themselves. It is viewed as a less bloody alternative to outright warfare.
* demons, when our main character tries to figure out the human race this is one of the main hurdles for them as our methods of speaking to each other are very different from theirs.
* demons, which while not technically robots blow up just as nicely and painlessly.
* demons whispering secrets of future technology into the ears of promising inventors, which is as good a reason as any to go insane.
* Demons. Winged beings who originate from the Demon Realm and who have recently begun settling into the Land of the Living. They can shapeshift into many forms and are rather chaotic, seeing other races than themselves as lesser beings.
* Demon Sword Maiden and refuses to take "no" for an answer, even literally sweeping her off her feet, helpless as a small child, and Lily is no pushover, thank you very much.
* Demon Sword Maiden starts the story with a very, very effeminate boy getting confessed to by his older, taller, and very busty crush. He reciprocates, and then the plane they're flying in crashes, killing them both. The next moment, he wakes up in her body, while her soul is stuck in a magic mirror. The prevailing conflict in the story is him trying to find a way to get her out and give her her body back, becoming a powerful demon-slaying samurai in the process...
* Demon: The Descent acting out its programming ever since. To those few capable of seeing it, the Imperative, known as Wendigo Psychosis, appears as a horribly emaciated and frostbitten humanoid of indeterminate gender.

* Demon: The Descent, but they couldn't resist writing a figure named "Mother Damnable" into a game about demons.
* Demon: The Descent Demons will occasionally even try to get a new free Cover by "angel-jacking" - stepping in when the God-Machine weaves a new Cover for an angel sent down to do a mission and punting it out of the way.
* Demon: The Descent encompassing the entire setting, the sum of all its parts composed of Infrastructures, Occult Matrices, and Outputs. Although, to call it a 'villain' might not give it enough credit, as the rulebook states that at times it works to protect the earth itself.
* Demon: The Descent Exploit, however, plays it straight (though a Demon can't keep it up for too long without shredding their actual Cover).
* Demon: The Descent Gaslight, which allows her to edit people's memories.
* Demon: The Descent has Stigmatics, humans who came into contact with the raw Infrastructure of the God-Machine and have been changed by it, gaining slight supernatural powers, "glitches" in their system (ranging from eternally smelling like strawberries to needing to drink motor oil to survive), and a sensitivity to the workings of the God-Machine. There are also cryptids, which happen when animals (or, in rare cases, plants and bacteria) get exposed to the raw juice of the God-Machine; when created intentionally, they're often used as cutouts by angels and demons.
* Demon: The Descent is of particular note, being based around the number 4.
* Demon: The Descent, not their home. Hell is a symbol to them, signifying freedom from their former master, the God-Machine, however they choose to go about it.
* Demon: The Descent set of "occult physics" that produce means-tested results but still involve gathering weird shit into a strange configuration in order to produce weirder shit.
* Demon: The Descent, wherein the fallen angels created by a world-spanning occult supercomputer find themselves cut off from it for a variety of reasons.
* Demon: The Descent, where the player characters can lie so well even magical truth detector would be ineffective, the conspiracy theorists are the ones properly paranoid, revealing your true identity will result in the enemy's agents zeroing on you immediately, and the opposition is literally godlike mechanical intelligence existing across the universe and different planes of existence.
* Demon: The Fallen and/or Grace. Due to the nature of the setting, it's much easier to gain Torment than to absolve oneself from it. And the more Torment you have, the more likely you are (it's in the gameplay mechanics!) to screw up some benevolent deed and turn it into a crime, earning more Torment in turn...
* Demon: The Fallen, a true name can be this as one of the novels shows. One demon's true name is the sound of a hundred crows cawing "Don't Fear the Reaper" by Blue Oyster Cult.
* Demon: The Fallen (Azimuth, Nadir, etc.); and the phylactery-womb and gangbang have been most definitively dropped.
* Demon: The Fallen, but the latter seem to have disappeared from the world while the Fallen were locked up in the Abyss.
* Demon: The Fallen can enhance their powers by drawing energy from hitpoints... except that said hitpoints belong to their followers, not them.
* Demon: The Fallen carve out a significant chunk of the demon's power and lash it with Torment, but the demon itself survives—though they go back to Hell if they can't find a new body or host quickly. However, if they die too often, they dissipate into nothingness... and while they're out of their host, any other demon can devour them, destroying them for good and taking a portion of the devoured demon's power.
* Demon: The Fallen centuries before the Fallen broke free from the Abyss.
* Demon: The Fallen: Demons might possess human bodies, but they lack the spark of life to create true progeny.
* Demon: The Fallen forced the issue by giving mankind sapience, and so God "brushed" the world with his presence, which was the equivalent of hitting a car with a wrecking ball. Sure, the universe survived, but in a broken, imperfect and continually decaying state that can't ever self-repair to its former state.

* Demon: The Fallen go bad they still usually retain their sense of honor and duty. That duty just tends not to be to help humanity anymore.
* Demon: The Fallen has Lore of the Wild, which is quite useful. Examples include plants, including ivy, tearing down a wall, as well as the usefulness of being able to sense things that are near to plants.
* Demon: The Fallen has Lores for all of the western elemental forces, but also adds plants, animals, and flesh.
* Demon: The Fallen has the Defilers, who originally made the seas and gave humanity the gifts of passion and desire. This went badly at the Fall, as God then cursed mankind to be lost in the pleasures granted by the Defilers to the point where they could not learn what the angels wished to teach them. They have access to the Lore of Longing, which grants them the ability to instill inspiration, desire, and obsession in humans.
* Demon: The Fallen have wings in their apocalyptic forms, usually either eagle, owl, or raven wings. Notably, most can only glide, but some of them can even fly. To quote the Player's Guide, "At the cost of one extra form point, the demon can take off from standing position and actually gain altitude by flapping her wings."
* Demon: The Fallen hollowed out of all free will so that they can ride the meat puppets as they wish.
* Demon: The Fallen is that the two versions were so different it's hard to even compare them - nothing, not the theme, the scope, or the overall feel, was the same.
* Demon: The Fallen. It's not playing god, if you actually know what you're doing!
* Demon: The Fallen... let's just say that by the time the demons got cast into the Abyss, there were few heroes on either side.
* Demon: The Fallen. Let's just say that She didn't really take care of Her own Creation.
* Demon: The Fallen of the void of the Abyss and of their own utter impotence until the end of time. No wonder they hold a grudge against the Big One Upstairs.
* Demon: The Fallen power their abilities through the harvesting of faith from humans. This can be done quickly, through "reaping" (kind or cruel as the demon wishes), or on a long-term basis by making a pact with a human.
* Demon: The Fallen the bad guys?" They work to either undo their sins and return to Heaven, or, if that's impossible, to at least fix the damage they did to the world all those years ago.
* Demon: The Fallen). The book's prologue and epilogue are both told from the point of view of Lucifer Morningstar, the instigator of the events of The Fall. In the epilogue he talks about someone suggesting that God reacted to Lucifer's rebellion not out of wrath, but out of compassion: an intervention instead of a punishment... and then Lucifer drops the following bomb, upsetting everything we thought to know about the rebellion, Lucifer himself and even God:
* Demon: The Fallen (the Malefactors) are far less depressed about the current state of things.
* Demon: The Fallen: the titular Fallen know that they were better off before...erm, the Fall. To the best of their less-then-perfect memory, everyone else around was better off, too.
* Demon: The Fallen with enough power to get everything she wants, and part of that included mentally enslaving her already loving husband to never stop loving her. Like Galadriel, she realizes the vision is ultimately hurtful and refuses.
* Demon Thesis. Each major arc is labelled after part of the school or college experience, so we have arcs labelled as Intramurals, Field Trip, Midterms, Spring Break, etc.
* Demon Thesis from another dimension begins altering reality. Only afterward do the main characters learn that their school was originally founded by an occultist who knew that the location was a place where our dimension was unusually close to and could interact with other dimensions. Said occultist intended the university to inform about the dangers of this and form a line of defense against threats, but over time the school transformed into a fairly normal university and most occult/supernatural elements have been discarded.

* Demon Thesis, this is the backstory of how Alain and Clady wound up together. Clady's friend Val sums up the flashback detailing how the lovers first met with this line:
* Demon variant, where both vampires and demons look down on humans, even though vampires themselves are the lowest of the low to many demon races (though some individual vampires are strong enough few demons would dare say it to their faces), and demon races are all likely tainted with humanity anyway. Both types are stronger, faster and have various supernatural abilities.
* Demonwar Saga) were the first amongst slaves; magic users, lovers and diplomats of the Valheru. They eventually left to the stars conquering an empire of planets. Not nice.
* DemonWars: Reformation with its own custom system and released in 2014.
* Demon Wars Saga, it is revealed that the long line of miraculous prodigies leading the theocracy of Behren have secretly all been one despicable old man's soul doing this over and over again.
* Demonwars series, Chezru Chieftan Yakim Douan takes advantage of a prophecy of rebirth to literally be reborn for centuries by taking over the bodies of unborn children.
* Demon Wars (they demonstrate loyalty to each other and extend respect towards non-powries who they consider sufficiently badass, at least) most humans hate and fear them — a reputation the powries themselves are happy to encourage.
* Demon Wars, they typically don't help humans unless they have something to gain from it.
* Demon. When the body he's inhabiting dies, he automatically possesses the body of the nearest living human.

* Demoreans include any scars or "deformations" (such as a missing fingertip) that the original may have had.
* Demo Reel actress Rachel Tietz is more than aware of how her last name is pronounced, thank you.
* Demo Reel all the same. Plus can beat the crap out of anything that hurts Tacoma or Donnie.
* Demo Reel) and be excited about the future. "The Review Must Go On" takes everybody away from him one by one, and it only gets worse from there.
* Demo Reel and even incorporated its existence as part of the Critic’s lore.
* Demo Reel, and something similar happens, followed by Uncle Yo discovering them and acting basically like a jilted lover.
* Demo Reel, and therefore leaving Rebecca and Tacoma to talk about their issues and realize that they love the show.
* Demo Reel, as a scared, dying, abandoned Donnie tells the camera Rebecca and Tacoma must have been the only ones worried about him when he was missing. Cut to the two of them drinking, flirting and having the best time.
* Demo Reel. As is common with characters from the show, his pain only comes out when he's sick or alone.
* Demo Reel assumes that kidnapping someone at gunpoint and leaving them to starve to death slowly in an abandoned patch of woods is justifiable punishment for his territory getting threatened.
* Demo Reel, a SWAG leader wanting to destroy the production team and general learning-from-your-mistakes.
* Demo Reel because he knew full well that he wasn't experienced enough to survive in woods (after being kidnapped no less) without having a breakdown.
* Demo Reel Carl (Rob) tears down the forest looking after him and makes sure he's okay when he returns.
* Demo Reel dies alone, scared, humiliated and tearful, but calls out everything wrong with his ending by making sure his author knows how what an awful writer he is for this.
* Demo Reel episode about TMZ to work through his issues with them, and Rachel got involved by admitting her bad experiences with modeling and acting were what drove the sexism rants Rebecca kept having.

* Demo Reel family and Tom Collins) are either weightier or just made to look awkward.
* Demo Reel force-feed Donnie muscle relaxants to keep him trapped in their house.
* Demo Reel gets very excited when Donnie and Tacoma make up, and when Donnie and Carl finally become friends.
* Demo Reel had "A Blair Witch Hangover". The happiness of the episode could be described in one line:
* Demo Reel has a girlfriend and treats his film company like his family. When they all leave him for acting like an obsessive ex with Donnie, he takes it out on Rebecca and Tacoma, destroying the movie they made for their friend.
* Demo Reel has a great bush of hair on his face, making him even more manly than the clean-shaven (but still badass) Carl.
* Demo Reel immediately asks for some Guinness on tab when a drunken depressed Donnie hits on him with the Pocky tagline.
* Demo Reel is disgusted at Rebecca for potentially killing her cat, but slaughters a pig right in front of Tacoma (who upchucks) and Donnie (who is disturbingly okay with it).
* Demo Reel Italian bosses call her a "stunad", which she happily thinks is their language word for "bright". In context, it really means "bimbo who'll take the fall when they get found out".
* Demo Reel lends her voice to play Donnie's wife when he calls her in one episode.
* Demo Reel makes Tacoma think something awful is or will happen to Rebecca, who appears to be alone in a big studio at night and who Tacoma thinks needs protecting after hearing about her past. Turns out she's fine and it was a trap so he could be kidnapped and delivered to her as a warning.
* Demo Reel, making his family hate him, and the latter leaving was partly the catalyst for Donnie's mom to commit suicide.
* Demo Reel may or may not have been members of the East German secret police and the IRA respectively. Ask and they'll deny it.
* Demo Reel popular among said fans, possibly even the most popular of the series' lead actors.
* Demo Reel Rebecca breaks down crying in Tacoma's arms after ruining a fair few takes screaming about her abusive family.
* Demo Reel. Rebecca has gone through 42 jobs in a very small space of time, and Donnie's age is 42. It can't be stressed enough about how much he doesn't look it.
* Demo Reel: Rob Walker played a stereotypical German speaking with a heavy accent and walking around in a marine officer uniform.
* Demo Reel security guard who won't hesitate to beat the shit out of anyone who hurts her best friends.
* Demo Reel. Sweet and pretty, but will slam your head into something hard if you're sexist to her or just outright beat you to death if you hurt her friends.
* Demo Reel, the bad guys drop off Donnie in the deepest part of some very creepy woods and leave him to die. With what happens to him later, he probably ended up wishing he did.
* Demo Reel. The Fanatic Fan Family who abduct Donnie in "Blue Patches" keep him helpless and lying down by feeding him muscle relaxants. He manages to escape because the father forgets that they have to be administered regularly.
* Demo Reel, the same issues with the industry and she keeps getting roles in his movies where the original dies, but the remake makes them survive or come back to life in ways that don't make sense.
* Demo Reel to be actually effective as a boss, but he thinks the others (including the terrorists) are his best friends within five minutes of meeting them, and tries his best to keep everyone's hopes up.
* Demo Reel was cemented as a dysfunctional family by the second episode, as their own families are so dreadful and Tacoma admits it feels like they're in a safe place removed from the rest of the world.
* Demo Reel, was full of casual gay with no jokes whatsoever and most people are just confused by the backslide.
* Demo Reel, which admitting while stoned is what drives Tacoma to try and look

after her. Grossly, her parents sent her on camping trips with the guy.
* Demo Reel who likes the fact that he looks good in a dress and finds it better to talk things over. She and Donnie also fit the dynamic.
* Demoscene had to go to great lengths to learn about the community in the first place, all those new youngsters know everything by just reading a magazine.
* Demoscene productions. Just skim through them and there's a lot which make you say "wow".
* demoted after graduating, assuming he gets that far.) The reason he's attending OCS is to become an officer "properly" - as a battlefield commissioned officer (with no higher education), his chances of rising higher than Lieutenant are very small. With Academy education and field command experience, his prospects are suddenly very good indeed.
* Demoted Memories: A person remembers that they used to be something great, but chooses not to believe that it's real.
* Demoted to Comic Relief villain who actually becomes more prominent to the story in Season 2.
* Demoted to Dragon and the status stuck, but they weren't laughable until Season 3, when they repeatedly lost battles immediately upon engaging the Winx and began some minor infighting.
* Demoted to Dragon is revealed to be, or is reduced to being, the Dragon to another villain.
* Demoted to Extra after his accident in "The Flying Kipper". He ultimately rewrote the story to have Henry undergo a major rebuild instead, at least partially to ensure that Dalby kept Henry's design consistent from then on.
* Demoted to Extra. After this, they are shipped to Darnassus where they've pretty much been practically interchangeable with the Night Elves ever since. Battle For Azeroth, finally spotlighted the Worgen leader Genn Greymane as mentor to Alliance leader King Anduin: and with Anduin being kidnapped at the beginning of Shadowlands it is Greymane who is organizing the Alliance rescue effort.
* Demoted to Extra: A major character is reduced to only having a minor role. One possible reason could be that the studio is trying to save money by avoiding paying the character's actor as frequently as they used to. Another is the writers want to downplay a character that turned out to be unpopular with fans.
* Demoted to Extra. An extended version of the scene had Harry meeting Justin in the club and chatting about him being Muggle-born.
* Demoted to Extra for a period in the comics in favour of her recently returned father, King Max.
* Demoted to Extra, her role is to care about Roxas and want to help him / reunite with him.
* Demoted to Extra or cut out altogether. After all, a novel can have as many characters as the writer desires, but a stage show needs to factor in the realities of casting.
* Demoted to Extra: The adaptation reduces a prominent character to having a less important role.
* Demoted to Extra, though; in Japan, Buu is a more popular villain than Cell (who is seen as a step down from Frieza) and Japan's audience wanted Goku back (he was ranked #1 on a fan poll) so they didn't mind him taking over the last leg of the arc along with Vegeta (who ranked #2 on the same poll).
* demoted to Staten Island after punching out a bigoted councilman, Curtis took a desk job to be with his ailing wife, Green eventually left the force after being caught up in illegal gambling, Fontana retired as a Detective, Cassidy was most likely fired or reassigned, and Lupo and Bernard weren't around long enough to be promoted.
* demoted working for SeeD, near the end of Disc 1. Even more confusing, after time starts compressing at the end of the game and you are thrown out of time into the future and can no longer interact with towns and most NPCs, you still are paid at regular intervals. That's a pretty impressive banking system. Unfortunately, the party is funded only by Squall's salary. Despite Quistis, Zell and Selphie also being SeeDs, the player does not have access to their finances.

* Demo: The main character automatically shapeshifts into whatever the person who looks at her wants to see. The events involves her happening upon the one and only person who doesn't cause her to do this.
* Demotivational Poster had a picture of a stick figure saying "Demotivators that say exactly what the picture says aren't funny". The poster said "DEMOTIVATORS THAT SAY EXACTLY WHAT THE PICTURE SAYS: They aren't funny".
* Demotivator posters promising to litigate all those who infringed upon it, even in private emails.
* Demo versions of songs are often regarded as better than a final version, especially if the later version sounds overproduced. This can also apply to albums that had better mastering, featured more /longer versions of tracks and represented a group's concept before
* Dempagumi.inc, a Japanese idol group, is said to be made up of ex-otaku, with each member having their own otaku "specialisation". Whether this is true or just a marketing ploy is unclear, but it is worth noting that all the members were employed at the well known "Dear Stage", an otaku hangout, in Akihabara, Tokyo's well-known otaku district.
* Dempsey and Makepeace, as DS Harry Makepeace is more properly Lady Harriet Makepeace.
* Dempsey and Makepeace has SI10, which fulfils a similar role to CI5, though it has a more rigid hierarchy and appears to be an actual police unit.
* Dempsey and Makepeace: He's an easy-going blue-collar American detective. She's a by-the-book English noblewoman detective. They fight crime!
* Dempsey and Makepeace: In "Hors de Combat", gang leader Frank Price is sprung out of jail, only to be killed by his accomplices.
* Dempsey and Makepeace: In "The Prizefighter," Dempsey and Makepeace find the broken body of a bare-knuckle prizefighter on the street carrying counterfeit money. Posing as an American couple named Dwayne and Lu, they manage to get into the illegal underground fight.
* Dempsey and Makepeace: In "The Squeeze", a heavy-duty transit van carrying half a million pounds in used notes is high jacked, drivers and all and S.I. 10 is tasked to find it.
* Demythification that "inspired the legend". Inverse of Magical Realism.
* Demyx from the same Organization in the same series likes to pass himself off as one of these, running away from enemies, claiming he really doesn't know how to fight very well, and using a
* Demyx Time: After Axel discovers that Larxene slept with Xigbar (along with most of the rest of the Organization):
* Demyx Time enjoys mocking Marluxia for this. Inverted when Demyx firmly believes that Larxene is a man.
* Demyx Time, with Demyx proposing that the entire Organization sneaks up on Sora and ambushes him, screaming "ATTACK!". He's laughed at, until Marluxia proposes that they all take it in turns to monologue in front of him before attacking. Xemnas commends this approach. Demyx tries to get some credibility back by suggesting that they all sidle up, before suddenly screaming "We are NOT going to attack you!" Needless to say, not a lot of progress is made.
* Den Ace parody, had one of the finishing moves of the titular character involve detaching his head and throwing it at his enemy, after which it returns to him in a boomerang like fashion.
* Den Ace series. In order to fight a giant monster, the titular giant hero pulls Tokyo Tower out of the ground... and uses it as a club.
* Den. A disenchanted office worker builds a machine that opens a portal to another world where a "deposed queen" beckons him to enter another world. Turning into a muscleman on the new world, he fights several monsters.
* Denahi also takes on shades of this, immediately after Sitka's death; he tries (albeit unsuccessfully) to make Kenai realize that the incident wasn't the bear's fault and that killing the animal out of vengeance would (A) only serve to anger the spirits, and (B) would not make Kenai the man that he so desperately wants to be.

* Denarian-form of Rosanna takes on the traditional look of a succubus: beautiful, batwinged, and clearly demonic. While she doesn't draw energy or anything from tempting mortals, she is still a master at using her coercive abilities to tempt other mortals, often to open them up to the Denarians' temptations or keep existing Denarians under control.
* Denarian Rosanna, who are honor-bound to help a Denarian redeem him- or herself if possible). Harry, for once not completely clueless about women, calls her out on this.
* Denarians also exhibit glowing eyes — specifically, the Fallen themselves will manifest eyes (usually green) when they are startled, angry, or in combat. They're not required to be in the same places as their hosts' eyes (which, due to
* Denarian Tessa's alternate warrior-form body can rebuild itself if badly damaged by transforming into thousands of tiny mantis-like insects that reform together into the original body.
* Denazification: Germany after World War II removing influences from the Nazi party.
* Denazra, and deploy vast space fleets and land armies to targeted planets in an effort to resist. They have yet to win a single battle despite hundreds of years of trying.
* Den Bruna Maten (The Brown Food) explores food from the late sixties — early seventies, when exotic ingredients like pineapple started appearing in Swedish supermarkets, but no-one really knew how to use them. The main things that can be taken away is that combinations of pork products and cheese are hard to mess up.
* Den Brysomme Mannen). A man steps off a bus in a desert and is taken to a city where everything seems nice on the surface. He gets a nice house, a pretty girlfriend and almost anything he desires, but there is one catch. Turns out that the place is a dystopia where emotions are nonexistent, food and drink is flavorless and there are no children anywhere.
* Den comics, nearly all the female characters, especially the women who were brought from Earth, make up this trope.
* D-END: 2 ends with Akane escaping the facility alone and leaving Diana and Sigma stuck inside.
* Dende leaves with the rest of the Namekians to look for a new world at the end of the Frieza Saga. He comes back near the beginning of the Cell Games.
* Dendritic Cell's ability to activate Naive T Cells is depicted as him showing old photos of the rest of the squadron, which in turn reassures the Naive T he's talking to and allows him to join the fight as a musclebound Effector T Cell. We soon get a shot of the other T cells getting "agitated" (depicted as sudden chills) from sensing this taking place.
* Dendromancy: Druid divination with branches of oak or mistletoe set on fire. The prediction then made from seeing the direction and shapes of the ensuing smoke.
* Dendy, despite existing many other versions with names and likenesses based on whatever desktop console.
* Dendygar destroy the world, Goddess Moronia still asks if you have any popcorn as the meteor approaches. "I want to enjoy this at least!" (The two of you are watching from the moon.)
* Denebans in the eighth book. Originally, Gray and his crew believe they are extremophiles since their ship has an internal temperature of 900 degrees Celsius, but it turns out they are an AI race with no need for physical environments at all.
* Denebian Slime Devils. Though since they're neither humanoid nor sapient, it's not like they have some other word for themselves.
* Den, especially in the early comics, the title character is typically nude at all times and he is typically the toughest character in Neverwhere.
* Den franska biljetten, a French girl gives the singer a note, and every time he asks people to translate the note for him they get angry with him. (He is thrown out of his hotel, fired from his job, etc.) Finally, he buys a dictionary and translates the note himself. This makes him laugh hysterically, and the audience never finds out what the note says.

* Dengar was forcibly turned into a cyborg by the Empire. In the process, they removed all the emotional centers of his brain they didn't feel would be useful for their purposes — no love, kindness, etc. He is intellectually aware of what an emotional cripple he is now, and
* Dengeki Bunko: Fighting Climax, etc.), the crossover video game does not.
* Dengeki Bunko: Fighting Climax has this as her fighting style: Like Mio above, she can change outfits in quick succession and give some style to her attacks.
* Dengeki Daisy and tearfully tell him what happened, after which she starts staying at his apartment while her home is searched by the police and subsequently moved out of.
* Dengeki Daisy, Teru has strong feelings for Daisy, her faceless protector she only has contact through email, and falls in love with Kurosaki, who she secretly wishes were Daisy. Luckily, he is.
* Dengeki Sentai Changeman blasts her room, putting fire inside it. Again, she flips around, burnt the ropes using the fire created.
* Dengeki Sentai Changeman plan their invasion from earth from their Mothership Gozmard.
* Dengeki Sentai Changeman played for laughs because she still spoke in her deep masculine voice. On later episodes she improves on her disguises and even the audience is fooled.
* Dengeki Sentai Changeman: Thunder (Red and Blue), Earth (Black), Water (White), and Fire (Pink).
* Dengeki Stryker, Hilko has a route where she can romance Yuuki, ignoring that he is Stryker.
* Dengel enslaved a community to his final lair in Ceiha using magic that bound their souls to their flesh. He forced them to serve him while he researched greater and stronger magic in order to take revenge on his enemies.
* Dengel, Eric's other mentor, advises Eric to become one of these because he doesn't have the sheer power to overcome his enemies.
* Dengel is a classical example in that he is both older than dirt and regarded as a sage. He teaches Eric high-level and esoteric forms of magic.
* Dengel is a famous researcher and codifier of magic in 21st century Tariatla, but in his own time he was closer to a court jester performing parlor tricks for his clients. That is, when he wasn't helping lay siege to fortresses.
* Deng Xiaoping did him one better. This is the man Mao couldn't get rid of despite all attempts to purge him since he was the only one in the party competent at economic policy. When Mao tried to do his job or get somebody else to do it, China's economy went to the toilet. He was so effective that even though Mao went to great lengths to ensure that Deng would never come to power after his death, Deng still became leader of China anyway.
* Deng Yuting as Sweet S. for most of the series, Doctor H. for most of the series, Kalo, Lightbulb Jr., and Lele.
* Denholm not only knows enough to be prepared for his son to show up, but enough to know that he'll cause a fuss and start flirting, and
* "deniable encryption" porn at the second layer, and military state secrets at the third. The trick is that it's mathematically impossible for the interrogator to know how many layers are in use (and it is also possible to have more than one volume at the same layer, for example having two second- or third-layer volumes), since anything they haven't decrypted yet is indistinguishable from random garbage - so at any point the subject can plausibly claim that they've handed over all the keys they have, and the interrogator has no way to be sure whether they're dealing with an actual spy or just a very paranoid pervert.
* Denial, although the movie does not feature the aforementioned lowlights.
* Denial and his attempt to silence real historian Deborah Lipstadt from calling him a Holocaust denier via a frivolous libel lawsuit against her and her publishers, Penguin Books.
* Denial: His attempts to continue his life as a vampire despite his re-ensoulment.
* Denial: Irving claims he's not racist even as his own diaries and recorded

speeches show him saying blatantly racist things.
* Denial: Not Just a River in Royal Woods, Lynn playing with her soccer ball interrupts Ronnie Anne and Lincoln kissing.
* Denial of Digital Distribution: A work is not released digitally, or the digital releases that do exist are restricted in some way.
* Denial of Digital Distribution: Can apply if the digital release is region-specific.
* Denial of Streaming: You can purchase the work digitally, but it's not on services like Spotify or Netflix. The usual justification is that the streaming services pay creators too little — if this argument is used, expect debates on whether the creator's stance is justified, or they're just being greedy. In some cases, the creator will allow the work to be on certain streaming services, but not others.
* Denial When Holocaust denier David Irving is questioned about the gas chamber in Auschwitz he first claims it was for delousing corpses. When questioned why the door would be hermetically sealed with a caged window he says the room was likely used as an air raid shelter. When it is pointed out the shelter is two and a half miles away from the closest barracks he doesn't know what to say. He is then asked why corpses about to be incinerated need to be deloused at all.
* Deniece Williams' hit song "Let's Hear It For the Boy" is about a girl who couldn't care less that boyfriend isn't a smooth-talker, or rich, and doesn't dress super nicely, because his loving nature makes her so happy that she wouldn't have him any other way.
* Denied by Mr. 450, who said he wasn't taking revenge on Joe Bravo for stealing the World Wrestling League's America's title belt, but enacting punishment.
* Denied, even during the Summer, but as much as she'd like to sell on getting them laid she's not into false advertising.
* Denied Food as Punishment: A child is punished by forcing them to go hungry.
* Denied Food as Punishment: Punishing someone by disallowing them food.
* Denied Food as Punishment Tantalos killed his son and tried to trick the gods into eating him. Punished after death in Tartaros, he stands forever in a pool of water, surrounded by fruit trees, but whenever he reaches for it the water drains away and the branches blow out of reach.
* Denied Parody: A work seems like a parody, but according to the creators, it was not.
* Denied Parody: It seems like a parody, but the creators insist it is not.
* denies, saying he'd "rather lick the bathroom floor" than kiss her. Somewhat amusingly, he rescinds this statement when taken up on the "offer".
* denies she's an alien. Despite the tail, antennae, large black eyes, lack of nose and ears...
* Denis Akiyama, the English voice of Nobunaga Oda and the narrator in
* Denis Compton was a fixture of the England cricket team throughout the 1940s and 1950s, excelling as both a batsman and a bowler. However, he also played football for Arsenal FC, scoring 15 goals in 54 matches between 1936 and 1950. Conversely, his brother Leslie Compton is more well-remembered as a footballer, having played 253 matches for Arsenal from 1930-52 and being capped twice by England, but he also played cricket at the county level for Middlesex.
* Denise and Spade books when she's told that "the vampire" is in a bedroom with another woman. She furiously pounds on the door only to find she's got the wrong vampire.
* Denise Crosby, who played Tasha Yar in the first season of TNG, felt she was underused and asked to be let go abruptly. They managed to squeeze her death into "
* Denise Richards and real-life daughter Sam appeared on a season 2 episode.
* Denise Wagoner, who was blinded and severely disfigured in a DUI accident. The EMT on the scene remarked that her face looked like "bloody hamburger" after the crash, and that's pretty much exactly what it was (search it at your own risk). In hindsight, it sounds eerily similar to the case of the "hamburger lady" described in the
* Denis Leary, but, as seen in the quote, after only a second or two he dismisses

the thought and refuses to change.
* Denis Leary," but says that everyone who heard the joke will be accompanying him.
* Denis Leary didn't die, but was frozen until a cure for his cancer could be found.
* Denis Leary for this reason. According to Leary, the three of them had pictures of real estate they wanted to buy to get them through the shoot.
* Denis Leary have the right to complain about something after witnessing that.
* Denis Leary look like that. Clothing like that goes on sale (with big discounts) for a reason.
* Denis Leary made a joke about finding the youngest Hanson brother in a motel all the way up a hooker's vagina with an 8-ball of cocaine next to them, and how the audience will remember the bit when it comes to pass. "You're gonna laugh about that later. People will say, 'What's so funny?' and you'll say, 'Can't tell you! You had to be there!'"
* Denis Leary made some terrible movies? Well, we will remind you of that. Several times.
* Denis Leary positive, he adds a denouement, the implication that taking them with him will soften the sting a bit:
* Denis Leary's song, "I'm an Asshole" features a spoken rant that's all about this:
* Denis Leary that involves him and a handful of friends stealing office supplies from the Atlantic Monthly offices while working there as night janitors. The group (minus Denis, who was fired earlier for unrelated reasons) eventually gets fired when they get caught trying to steal a desk.
* Denis Leary, to the point that many people call him a blatant rip-off. It doesn't help that Hicks himself claimed that Leary stole from him and their friendship ended after Hicks thought this.
* Denis Leary, while someone, presumably one of Johnny's friends, named Cliffy DeCoursey watched. Denis ran several flights of stairs with the arrow still firmly embedded in his forehead to his uncle, who pulled the arrow out and told him, "It's out, goddamn it, you're fine, so SHUT UP!" Meanwhile, Denis and Cliffy's fathers went on the hunt for their wayward sons and beat the shit out of them for doing such a stupid thing.
* Denis Villeneuve often has his name botched to "Villenueve" or "Villanueve" in English-speaking countries, leading some to think he's Latino or Spanish. The man is a Canadian from French-speaking Québec, his name appears to be this hard to grasp for anglophones.
* Denis Villeneuve seemingly lacks of pedipalps compared to the Lynch film, but its massive scale is perhaps the best rendered out of all examples on this page, thanks to flawless CGI.
* Denis Villeneuve, the personal shields are invisible and get visibly distorted upon being hit.
* Denji Sentai Megaranger: A fighting game was used to find candidates to turn into the Megarangers. The appearance of the Megarangers is the same as the characters in said game.
* Denji Sentai Megaranger, and in lieu of the standard giganification has a bunch of Kunekune cover it to form King Kunekune.
* Denji Sentai Megaranger for his deceased daughter, while it is implied Yugande is like a son to him. When Yugande was being used as a living shield by Gurail, Hinelar went as far as to poison Gurail, causing him to lose his mind.
* Denji Sentai Megaranger has the same underhanded personality, but goes a step further by actually gloating about his underhandedness.
* Denji Sentai Megaranger has this happen in episode 29. The Megarangers rush into action, only for MegaPink to run backwards and jog in place as soon as they run past a restaurant, making the heroic theme slow down and stop.
* Denji Sentai Megaranger proves you can combine the two: none of the Megarangers were part of the organization before being the only ones around to suit up and stop the attack in the series premiere. The Megarangers themselves are high school students.

* Denji Sentai Megaranger, since this season was about video games, particularly ones made in the mid-90s.
* Denji Sentai Megaranger: The Drill Saber / Spiral Saber is styled in this fashion.
* Denji Sentai Megaranger was close or far from this. Beauty check, Busty Check, Panty Check.
* Denji Sentai Megaranger, where the prototype Megaranger suit would automatically shut down after two minutes and thirty seconds.
* Denki-gai no Honya-san, but say that to her face and she'll vehemently deny it.
* Denki-gai no Honya-san is enamored with anything to do with zombies, to the point that she gathers supplies for a theoretical outbreak.
* Denki Kaminari can unleash a devastating wave of electricity, but the power is so great that it temporarily fries his brain, leaving him a babbling idiot.
* Denkou Choujin Gridman. Notable that it's the only non-Toei toku show to have undergone this procedure.
* Denmark has three (A dubbed version of Open Sesame in 1992, a dubbed Elmo's World in the late '90s/early aughts, and a packaged block in 2009)
* Denmark is drawn with an axe in the trading cards. Since he hasn't officially showed up, we don't know if it's just decoration or if it
* Denmark lets young males (and females, if they get the call), postpone the call. At least if they have something excusable such as college/education.
* Denmark sees himself as the leader and "older brother" (re: this) of the Nordics. The others don't seem to agree.
* Denmark similarly employs women in nearly all military positions and is one of only four countries in the world with legislation allowing for the conscription of female soldiers.
* Denma The Quanx, as mentioned in the description, is a Korean webtoon. Every chapter is a single "comic" with infinite scrolling.
* Denma The Quanx. It takes place in a distant space-faring society, and most of the humans in the cast are various shades of brown with various hair colors. The main character has medium-brown skin and peach-colored hair. No one ever comments on this, so it seems that race isn't an issue in their society.
* Dennis (albeit with a large radio headset), as he can't remember them well enough on his own. Unfortunately, he ends up repeating everything that his headset plays back, including FM stations, police radios, and the prompter berating him for doing so.
* Dennis & Gnasher animated series. It's not made clear whether she's half black or heavily tanned. All we know about her ethnicity is her father is white.
* Dennis and Dee take a trip to the Jersey Shore because they have fond memories of visiting there during their childhood years. When they arrive, they are subjected to a series of painful and terrifying experiences that completely shatter their previous conceptions of the Jersey Shore.
* Dennis and Gnasher: In "Yard Sale", Walter picks up Dennis's squirt gun and attempts to shoot Dennis with it, only for it to spray him in the face as Dennis says it backfires. He then turns the gun around and attempts to shoot Dennis again, only to soaked again as the water comes out the barrel and Dennis adds "Sometimes".
* Dennis and Joey grew so tired of working on Margareth's float for a Fourth of July parade (and of her bossiness) they declared independence from her and made their own float.
* Dennis and the Kangaroo Cavalry", Tony Robinson uses one on Mr. Wilson when he shakes hands with him. Mr. Wilson is not amused, but Tony certainly is.
* Dennis, Cordelia's phantom roommate, is a recurring character. He's a surprisingly nice guy, considering
* Dennis Cranmer, who was captain of the guard for a Temerian Duke, but isn't in the Northern Realms deck.
* Dennis "Cutty" Wise is a complete inversion. Leaving prison after fourteen years, he wavers on whether he should rejoin his old gang or go straight. Going straight is predictably difficult, so he gets back into the game as a hitman. It seems easy, as he's experienced and still has a towering reputation among the older

generation. When it comes time to kill, however, he finds out that he
* Dennis, Dee and Frank try to start an intelligent internet talk radio show, but quickly descend into zoo crew idiocy.
* Dennis DeYoung: "Call Me" is about the singer asking a girl to call him on what's bothering her, which was implied to be about a
* Dennis Dugan, where he played the infamous "guy Maddie met on a train and immediately married for no apparent reason in order to provide a love triangle". This failed utterly and his character was written out and never seen again. However, Dugan himself stuck around to direct five unrelated episodes (and now Dugan is probably better known as a director than as an actor).
* Dennis Eckersley was a washed-up drunk by end of the 1986 MLB season, and apart from an appearance in the 1982 All-Star Game, he was mediocre from 1980 to 1986. But after successfully getting treatment for his alcoholism, "Eck" joined the Oakland Athletics in 1987, and was switched from starting pitcher to reliever. All he did was become one of the top closers in the majors all the way to the late '90s, winning both the American League Cy Young and MVP awards in 1992 and making the Hall of Fame in 2004 in his first year of eligibility.
* Dennis effing Silva from The Destroyermen series...where do we start? Asides from fighting the imperial Japanese navy, he fought Chinese gangsters with a jade statue, disobeyed orders NOT to be in a location only to show up guns blazing, sneaking aboard a carrier by jumping into an ocean from an airplane that would normally kill you in minutes if not seconds...all in the name of the greater good. His lack of discipline has been commented to be why he is arguably the alliance's deadliest warrior.
* Dennis Farina usually played cops and mobsters, which maybe wasn't surprising considering he was a Chicago police officer for almost 20 years before taking up acting. His
* Dennis finishes Mac's sentences for him when the latter can't think of the right word, to emphasize their
* Dennis Hale, the lone survivor of the second-to-last shipwreck on the Great Lakes, the Daniel J. Morrell, went through a harrowing ordeal. He and three others made it aboard a life raft and while they died within the next day, Hale clung to life for the next 34 hours. When he was found, he had lost 25lbs. He still has the life jacket.
* Dennis Haysbert, but instead of referring to him by name, saying "That's safe drivers save 40%!"
* Dennis Haysbert, on the same show). The fact that the two actors are good friends apparently never occurred to anyone.
* Dennis Hopper, but he insisted on playing Lyle from Dallas. Hopper eventually convinced the producers who were thrilled with the end result.
* Dennis Hopper, Frank Booth, provides one of the scarier example of this trope.
* Dennis Hopper serving a jail sentence after assaulting an extra who tried to take a picture of him on-set.
* Dennis Hopper that it prevented Hopper from directing again for nearly a decade.
* Dennis Kucinich is only 160 cm (practically a midget for a politician), while his wife is 183 cm. She's also
* Dennis Lehane as the result of the lead character, Patrick, refusing to talk to him for that amount of time.
* Dennis Lehane features a trio of serial killers who model themselves on the Holy Trinity and crucify all of their victims before killing them.
* Dennis Lyxzen of Refused wasn't happy when he heard rap-rock band Crazytown cover "New Noise". He said of it "History [will not] be kind on Crazytown and that feels good."
* Dennis Macfield., he forgoes his normally upbeat and higher voice, and goes a deeper, more serious tone. The implication is that the original voice was a facade he used for his job.
* Dennis Miller commentator, but does do the occasional stand-up special.
* Dennis Miller constantly uses obscure pop culture references in his stand-up routine. He occasionally mentions that he's doing so and that many of the people

watching won't get them.
* Dennis Miller has spoken of liking to say things like "the Middle East situation is less stable than
* Dennis Miller, in which he ends each opening stand-up segment with a rant that begins, "Now, I don't wanna get off on a rant here, but..."
* Dennis Miller once noted that if he said, "Whoever made this movie should be put in a gas chamber", the ads would read, "... a gas! — Dennis Miller".
* Dennis Morgan was an excellent singer who got his start in musicals, so naturally
* Dennis Nedry. Notably, Claire chews him out for having a cluttered workspace, just like Ray Arnold did to Dennis in the original.
* Dennis Nilsen lived in an upstairs flat, he had no basement, but still got away with dismembering and cooking young men. He committed most of his murders while living in a ground floor flat with its own garden. He did, however, keep corpses hidden under the floorboards there for months at a time, and disposed of them in large bonfires without the neighbors paying much attention. He wasn't caught until, trying to dispose of more than a dozen corpses, he clogged the drains with human flesh and fat.
* Dennis Nordman for a limited run to meet the demand of die-hard collectors.
* Dennis Potter plays a beautiful but vacuous fashion model, a blank slate with no emotions or ideas of her own, except under the influence of predatory males — when she temporarily becomes their sex fantasy, Zelig-like. Possibly justified in that she is a story within a story by second-rate writers...who are themselves products of another writer, written by a fictionalised version of Potter himself.
* Dennis presents himself as the voice of reason in the group. Whilst it's true he is socially better than the others and somewhat more sensible, he is a vain, lustful manipulative creep who like his sister Dee displays almost sociopathic levels of
* Dennis Quaid. Quaid lost so much weight that he lacked the energy to stand and had to take frequent rests between takes.
* Dennis Rivera and Savio Vega in IWA Puerto Rico and the World Wrestling League, both generally being baby
* Dennis Rodman's creepy hairdo gets first place and some of them compose the image to the right. It even ported to his appearance in the video game
* Dennis Rodman seems to be trying to invoke this with his visit with North Korea's leader Kim Jong Un, telling him that he has a "friend for life." It is Rodman's hope that his visit may help, if even in some little way, to cool the hostility of the North Korean government towards the United States.
* Dennis Savage discovered his new girlfriend Blessing was transgender, leading to internal conflict about whether he was "gay", which caused him to be pretty insensitive and ignorant toward her. He eventually accepted her for who she was, and they remained happy together until an off-screen breakup when Dennis returned to the show by himself.
* , Dennis's response to Greyghost describing that his archnemesis was finally dead:
* Dennis Sterling, a retired Imperial Navy intelligence officer, recommends the use of an old Yoko Ono recording as an aid to interrogation. "I must confess," Dennis continued, "that I've found a roll of duct tape, a high quality audio headset, and one of her early recordings to be quite useful when questioning a prisoner."
* Dennis the Menace: After vacuuming paint and saw chips from his garage floor, Dennis reverses the fan and blows the contents into Mr. Wilson's barbecue. Later, when eating his steak, Wilson says "it tastes like paint... and wood".
* Dennis the Menace and Gnasher animated series, Greytowers Prep takes on Beanotown School in a triathlon. The Greytowers team is so much fitter than the Beanotown team (consisting of Dennis, Walter and Angel Face) that they could easily have won. Instead they cheat and, even though they initially win, they are exposed and disqualified.
* Dennis the Menace and Gnasher: Dennis does this to temporarily confuse the

Greytowers Prep triathlete (who is already cheating). It delays him long enough for Gnasher to disable his bike.
* Dennis the Menace and Gnasher: In "You and Whose Army," Curly hands Dennis a telescope. Dennis asks Curly if he has put boot polish round the eyepiece. Curly says no and raises the telescope to his own eye to demonstrate, only to find that Dennis has put boot polish on the eyepiece.
* Dennis the Menace and his cousin, Chauncey have one in the episode, "My Fair Dennis". When Chauncey's butler, Parker, comes in to check on them, some of the feathers from the pillows fly onto him, and since he is allergic to feathers, he goes into a sneezing fit.
* Dennis the Menace, and Mr. Wilson admits that even though he tried to throw the mockingbirds' nest out as carefully as possible, Dennis and Tommy found an injured bird which they nursed to health, and they recall the good example Mr. Wilson set, with Mr. Timberlake admitting that mockingbirds are pesky, while Mrs. Elkins only wanted the position to increase her social status, and she doesn't even care much for birds, running for club president with a superficial motive to spite Mr. Wilson, because she doesn't care that much for birds as Mr. Wilson does.
* Dennis the Menace animated series had an episode where Dennis scared some people by pretending to be a headless horseman.
* Dennis the Menace animated series portrayed Dennis and Margareth as business partners in a lemonade stand. Unsatisfied with her share of the profits, she started her own lemonade stand to compete against her now former business partner.
* Dennis the Menace, anthropomorphic flames appear as enemies in the boiler stage. These enemies cannot be destroyed, not even by the water gun (it only temporarily stuns them).
* Dennis the Menace backyard, but Mr. Wilson made them put back all the dirt.
* Dennis the Menace by drawing a line on it, leading the two to drive onto a set of railroad tracks. A train approaches them, but fortunately, they get out of the way before it can hit them.
* Dennis the Menace cartoon, Dennis' granny jokes that before TV was invented, they all sat around waiting for TV to be invented. Her actual youth activities however (reading, hunting dodos and listening to the wireless) are little better, as far as the main character is concerned.
* Dennis the Menace cartoon had a framing device of Dennis trying to help recover Mr. Wilson's memory by telling him about some of their past adventures.
* Dennis the Menace cartoon showed Dennis doing this. He may have done it a time or two in the live-action TV series as well.
* Dennis the Menace cartoon (UK) episode "Mauled" used this (and was the typical mad scientist with robot shopping centre, parasol hat and funny gadgets).
* Dennis the Menace: Concerned over Mr. Wilson's health, his wife forces him to enter a gym. When Dennis' antics get him expelled from there, Mr. Wilson is grateful enough to give the kid a sundae. Mr. Wilson has one as well but, wanting to lose weight, gives Dennis his sundae's cherry.
* Dennis the Menace, Dennis competes in a bike race against a bully. The bully pulls over to raise a drawbridge despite this only affecting Dennis who is in dead last. Averted when the bully wins anyway.
* Dennis the Menace, Dennis finds the false teeth of his neighbor Mr. Wilson and plays with them, accidentally knocking out the two front teeth and losing them in the sink drain. He tries to fill the gap in the false teeth with white gum, which results in Mr. Wilson being given a huge buck-toothed smile when he poses for a photo being put in a newspaper advertising a garden party he is hosting at his house.
* Dennis the Menace - Dennis loses his bubble gum in Mr. Wilson's bagpipes. Mr. Wilson then plays the bagpipes, blowing a huge bubble out of one of the pipes - the bubble bursts all over one side of his face.
* Dennis the Menace, Dennis mistakenly believes the street sign at the corner is reversed, so he turns it, whereupon a swimming pool company goes to the wrong house and basically destroys Mr. Wilson's backyard.
* Dennis the Menace: Dennis Mitchell has walked in on his mother in the bath

several times. While this is awkward for his mother, Dennis is solely concerned with whatever matter he barged into the bathroom to discuss and this is more to do with him having no sense of privacy.
* Dennis the Menace episode, "3D and Me", Dennis is onboard a naval submarine that's under attack by a giant squid. When he comes across a button in the control panel, he gives us this line:
* Dennis the Menace episode, "Big Baby", Alice has Dennis look after Sylvester, the infant son of Mrs. Atkins. Around the same time, PeeBee goes to Dennis' house to show Dennis his new super growth formula, which he keeps in a baby bottle since just one drop makes things bigger. Sylvester gets ahold of the bottle and drinks most of the formula, causing him to grow to an enormous size. As PeeBee works on the antidote, Sylvester crawls off to a water treatment plant. To lead Sylvester back to his house, Dennis uses what's left of the super growth formula on some jelly beans and leaves a trail of them for Sylvester to follow.
* Dennis the Menace episode, "Big Baby", Dennis looks after a baby named Sylvester, who grows to an enormous size after accidentally drinking PeeBee's super growth formula, due to PeeBee keeping said formula in a baby bottle. When Dennis scolds Sylvester for playing with a real car like a toy, Sylvester cries, and Dennis gets an umbrella to avoid being rained on by Sylvester's tears.
* Dennis the Menace episode, "Bowling For Dennis", Dennis goes to the bowling alley with his dad and Mr. Wilson, who get into a competition with a rival bowling team. The rival team tries to sabotage Henry and Mr. Wilson's chances of winning by putting bubble gum on the bottom of their bowling pins, giving them a remote-control bowling ball, and later a magnetic bowling ball, but Dennis inadvertently foils their plan.
* Dennis the Menace episode, "Cheer Up", Mr. Wilson becomes hospitalized after tripping on Dennis' skateboard. When Dennis comes to visit Mr. Wilson, he tries to cheer him up by turning on the television, but the remote he grabs is for Mr. Wilson's hospital bed, and the buttons he presses cause it to attack him. All the while, Dennis is completely oblivious to this happening as he wonders why the television isn't turning on. This gag is repeated at the end of the episode when Dennis is revealed to have Chicken Pox and has to stay in the hospital as Mr. Wilson's roommate.
* Dennis the Menace episode, "Dennis Predicts", a soccer ball to the head causes Dennis to predict what will happen to his family and friends. One of his predictions is that his father, Henry, will land in a pile of garbage. Henry doubts this is going to happen, but it does when he trips on Dennis' skateboard in an attempt to take out the garbage.
* Dennis the Menace episode, "Meatball Mess", Dennis, Gina, and Joey form one to reach the cabinet on a high shelf and get the ingredients to make a new lunch of spaghetti and meatballs after Ruff ate the one they were going to have. Dennis is on the bottom, Gina is in the middle, and Joey is on top. They fall over when Dennis gets tired from all the weight he's holding, but fortunately, Joey gets the two boxes of spaghetti that he, Dennis, and Gina need.
* Dennis the Menace episode, "No Bones About it", Ruff sneaks into the museum to get a bone from a dinosaur skeleton, with the museum's guards trying unsuccessfully to get him out. At the end of the episode, Ruff stops a pair of jewel thieves and is rewarded with the skeleton.
* Dennis the Menace episode, "So Sorry!", Mr. Wilson gets roped into a Sumo wrestling match after he is stripped down to his underwear, due to Dennis getting his clothes wet chasing after a kite that snagged his wallet. Mr. Wilson loses, but when Mrs. Wilson finds out from Dennis, she single-handedly defeats the Sumo Wrestler and wins the championship Sumo wrestling belt.
* Dennis the Menace episode, "Strike up the Band", Henry and Mr. Wilson pursue a Purse Snatcher at a department store. They use a vacuum cleaner to catch the Purse Snatcher, and while they succeed in doing so, the vacuum works too well; after it sucks up the Purse Snatcher, it also sucks them up, along with many items on the shelves. Eventually, the vacuum cleaner becomes overstuffed and explodes, allowing the Purse Snatcher to escape.

* Dennis the Menace episode, "Trembly Assembly", Dennis plays inside a car that a salesman is trying to sell to his father, Henry. When the salesman tells Dennis to give him the wheel, Dennis pulls it out and gives it to him, much to his horror.
* Dennis the Menace episode, "Up Up and Oh Boy!", Dennis, Jay, and Margaret fly away in Henry's company's dirigi-blimp, and Henry and Mr. Wilson chase after them on Mr. Wilson's tandem bicycle. At one point, Henry and Mr. Wilson ride down a hill, and this exchange occurs:
* Dennis the Menace features an alien race of shapeshifters who thought that televisions rule the world and thus come to Earth in the form of televisions. Upon realising their mistake, they try to take on human form but find it too difficult so remained as televisions. At the end, they reveal their true forms (each one different from the rest) and conclude they are just like humans in that regard.
* Dennis the Menace for ruining his garden party while trying to tell him that he's been robbed. When Dennis sets up the campfire, one of the cinders accidentally falls down Sam's pants, lighting them on fire. Later in the film, when Sam becomes tired after Dennis feeds him an entire can of beans, Dennis puts a blanket over him, which catches fire due to being too close to the campfire. Both times, Sam puts out the fire by jumping in the river.
* Dennis the Menace for the title, just days after arriving in the WWF).
* Dennis the Menace: George Wilson, following his portrayer Joseph Kearns' death in 1962, midway through the third season. Immediately after his death and a brief hiatus to mourn Kearns' passing, two scripts where Wilson was non-essential were hastily re-written, with substitute characters added and no mention of Mr. Wilson made. Later in the season, it was explained that George had business out east, and his brother, John (Gale Gordon) was brought in to "house sit". Early in the fourth season, the Wilsons (offscreen) moved to the East Coast, leaving John the new homeowner … and it was still presumed that George was alive when the series ended in 1963.
* Dennis the Menace Gina usually wears jeans and sneakers and plays sports with the boys. Margaret wears a flouncy skirt and pushes a doll in a baby carriage. Dennis, who makes a big deal about his own butchness, is more comfortable with the former.
* Dennis the Menace, Gnasher does this to the postman. One story revealed he had a collection of ripped seats from blue uniform trousers.
* Dennis the Menace had a 65 episode season airing in syndication in 1986. It later got a 13-episode season for CBS Saturday Morning in 1988, bringing the total to 78 episodes.
* Dennis the Menace has Dennis and Gnasher's pictures appear on the news and they have their faces swapped over (the newsreader also notes that anyone who recognised them from those pictures would need their eyes testing).
* Dennis the Menace" has Dennis' cousin Marky take Dennis' skateboard for a joyride, and Dennis, Alice, and Aunt Matilda chase after him. During the chase, they pass through the drive-thru of a fast-food restaurant. Dennis places an order, Alice pays for it, and Matilda picks it up.
* Dennis the Menace", Henry is left to take care of the house while Alice leaves for the day. When Dennis tries to help Henry with his housework, he first puts too much soap in the washing machine, resulting in the house being flooded with soap bubbles. Then, when Henry tasks Dennis with watching his roast, Dennis turns up the heat, resulting in the roast catching fire. There were even problems unrelated to household appliances, such as Dennis getting stuck in a tree trying to hang up the wet laundry. All three times, Henry has to call the emergency services.
* Dennis the Menace: In "Circus Berserkus", Joey mistakes an escaped bear for a teddy bear. Mr. Wilson doesn't think it's real until he pulls its nose.
* Dennis the Menace: In the opening titles sequence, Mrs. Mitchell finds herself in this situation after Dennis, riding on Ruff, sends her armload of clean dishes flying.
* Dennis the Menace: In "The Time Bomb", Dennis and Joey have a rather harrowing adventure with a clock mistaken for a time bomb. At the end of the episode, hearing the sentence "don't you boys ever look at a clock?" distresses them so much that they flee, much to the speaker's confusion.

* Dennis the Menace: In "Wheeling and Double-Dealing" Dennis and PeeBee get into a perpetual motion car race against Winston and his lackeys. Winston's lackeys sabotage Dennis and PeeBee's road map by drawing a line on it to lead Dennis and PeeBee in the wrong direction. When the two drive their car into a lake, the line washes off, and the two realize they've been tricked.
* Dennis the Menace", Mrs. Wilson puts Mr. Wilson on a diet when he gets too big for his clothes, despite his objections. After having nothing to eat for several hours, Mr. Wilson hallucinates a truck as a hoagie, a flying bird as a roast chicken, and Henry's boss, Simon Gordo, whom Henry calls "The Big Cheese", as a sentient wedge of cheese.
* Dennis the Menace: Mr. Wilson has been growing a plant for the past four decades that only blooms for a few seconds. He invites a number of people to the event, there are 'Oohs and 'Aahs' as the flower begins to unfold... which, of course, is the moment Dennis comes out yelling "MR. WILSON!" to tell him that his house had been robbed. Everyone (including Mr. Wilson) turns to look, during which the flower blooms and dies just before they turn back.
* Dennis the Menace. One of the clothes they wash is Mr. Wilson's favorite sweater. After all the clothes are washed improperly thanks to Dennis' antics, Mr. Wilson is horrified when Joey shows him the sweater, which is now small enough to fit Joey himself.
* Dennis the Menace, Switchblade Sam is initially okay with taking Dennis hostage, but Dennis being his usual mischievous self, he doesn't make things easy for Sam.
* Dennis the Menace: The 1986 version had a short called "Lights, Camera, Auction!" where Dennis and Mr. Wilson go to an auction. Wilson winds up winning several very expensive items, and is warned to pay or else!
* Dennis the Menace, the titular menace, while not normally seeming this way, does occasionally seem like this. In a 2004 comic, he did a menace race barefoot, unlike his running mates, and also in 2004, there was a comic where he, Walter, and Sergeant Slipper stuck their bare feet (or attempted to, at least) in front of a new restaurant. At the beginning of the strip, Dennis boasts how even his socks are menacing and he hadn't changed them for 4 years.
* Dennis the Menace: This was pretty much a regular trope for this strip, especially when Hank Ketchum was alive doing it, and Dennis was much more 'menacing'.
* Dennis the Menace titled "Dennis and the Fishing Rod" had Dennis trying to buy a fishing rod for his father. He tries to pay for it with a bill of Confederate money, but the merchant won't take the bill since he thinks it's worthless. Later on, the merchant learns from Mr. Wilson that the Confederate bill was worth a lot of money.
* Dennis the Menace to get a loose tooth pulled, so Dennis has PeeBee invent a tooth-extracting robot. When they test it out on a sleeping Mr. Wilson, the robot takes his dentures. Mr. Wilson doesn't realize this until he tries to eat an apple, and when he sees the robot with his dentures, he chases after it, only for the robot to hoist him by the seat of his pants with his own dentures.
* Dennis the Menace towards Dennis' house when he tastes his food and makes the connection.
* Dennis the Menace (UK) (1919-1987) and Dudley Watkins (1907-1969) died decades ago. The respective series are still ongoing. Applies to other characters from those comics as well.
* Dennis the Menace (UK) accidentally gets paint on the other side of the paper he sends off.
* Dennis the Menace (UK) animated series, Dennis visits a fair where all the rides and attractions have been nerfed because of the havoc Dennis and his cronies wreaked the previous year.
* Dennis the Menace (UK) cartoon featured a villain who was a rather odd inventor (inventing things like the toothless comb for bald men), one of his inventions was the Foldable Friend, which was essentially a cardboard cut-out of a person that could be folded down.
* Dennis the Menace (UK) day at school. This was considered one of the former Beano

editor's all-time favourite strips and was reprinted in The History of the Beano.
* Dennis the Menace (UK): Dennis and his gang attempt to drive a line-marking machine which goes haywire and leaves white lines everywhere on the road. Cars naturally attempt to follow the line and end up driving on the footpath, through the park, etc.
* Dennis the Menace (UK) had a female cousin who looked exactly like him but wore a bow in her hair and a skirt. Also her name was Denise The Menace.
* Dennis the Menace (UK). He'd run in tears to his mother for shelter whenever he encountered one of these.
* Dennis the Menace (UK). He uses this to his advantage: have the double talk to Sergeant Slipper whilst he is catapulting everyone with tomatoes (thus getting him out of trouble because Slipper claims "Dennis" was talking to him), making others around Beanotown think they've gone potty, and at the end the double ends up doing Dennis's washing up after he sneaks out after tea (he had told his double to wait outside whilst he went to check the coast was clear).
* Dennis the Menace (UK): In "Just Desserts" Angel Face is the only kid to finish her plate of boiled figs without complaint.
* Dennis the Menace (UK): "Mmm... Pizza would be great, Mum. *dog impression* Gnasher... you know Dad doesn't like you eating out of his hat..." [Grabs at nothing, claps, makes silly faces while waving hand in front of face, pats grass] And later — [groans] "I'm not well, Mum..."
* Dennis the Menace (UK) once wielded canes against their rebellious students.
* Dennis the Menace (UK) segment in which they showed viewers how voice-acting works.
* Dennis the Menace (UK), the Colonel orders seven exploding alarm clocks a week.
* Dennis the Menace (UK) who challenged Dennis' town not to watch the telly for a whole month and promised to give the town one million if they win. At the last day, Dennis and his friends convinced him to watch TV (which he claimed he never did before during his whole life). The millionaire decided to give the money anyway.
* Dennis the Menace (UK), William, who unlike the rest of the family is a real menace.
* Dennis the Menace (UK), with protective armour and water cannons, and yet is shown to be completely (and cheerfully) lost at school.
* Dennis the Menace (US), and a 1993 movie with two direct-to-video sequels.
* Dennis the Menace (US) anyway. It's still known as just "Dennis the Menace" in the UK though.
* Dennis the Menace (US), both stories about a mischievous boy in a red-and-black striped shirt, debuted the same day. There's no evidence that they influenced each other.
* Dennis the Menace (US) comic book story "Dennis vs. Television", which was also translated into Spanish, Dennis collected cereal box tops without actually buying the cereal, hoping to win a big prize.
* Dennis the Menace (US) creator Hank Ketcham died in 2001, and his former assistants have carried on the strip ever since.
* Dennis the Menace (US), Dennis does this to his babysitter and her boyfriend. The latter two hilariously bonk their heads.
* Dennis the Menace (US): Dennis has proven to be such a terror to every babysitter watching him that no babysitter has volunteered to look after him a second time. It has gotten to the point that Alice and Henry are up to "Z" in the phone book.
* Dennis the Menace (US), Dennis once protests to his mother about always being sent to time-out every time he misbehaves. She reminds him that she could spank him instead and he quickly decides to go with the time-out.
* Dennis the Menace (US): Dennis would frequently visit unannounced (and unwelcomed) with crotchety neighbor Mr. Wilson.
* Dennis the Menace (US): Gina and Margaret are the two girls in Dennis' circle of friends.
* Dennis the Menace (US), Gina will get offended by Dennis calling her a tomboy. She typically responds by slugging him.
* Dennis the Menace (US) had Dennis interacting with much more positive examples of

minorities.
* Dennis the Menace (US) has Dennis scrupulously avoid Margaret's tea parties, unless there's plenty of cookies available. No amount of cookies, however, can compel Dennis to attend one of Margaret's piano / violin recitals.
* Dennis the Menace (US), he was depicted as being much bigger than Dennis. Ruff eagerly follows Dennis around whether Dennis is running or riding his bicycle or skateboard. One of the strip's running gags is that even though Ruff chases cats, he is actually afraid of them.
* Dennis the Menace (US): In one of the comic books, Dennis added ketchup to his milk while at school. In the newspaper panels, he'd mix up other strange concoctions to eat like peanut butter with horseradish in a sandwich.
* Dennis the Menace (US) invade the dining room, rudely eat cereal, and abruptly leave.
* Dennis the Menace (US). Mr. Wilson parachutes from a plane, but a bird pecks at his parachute - leading to a long drop.
* Dennis the Menace (US) strip, Dennis comes outside, with bubbles coming out of his mouth, and he tells his friend that he was "right about that word."
* Dennis the Menace (US) strip has Dennis make a Christmas tree out of boxes instead of playing with the toys that came inside them. Dennis' parents decide that next Christmas, they'll just give him the boxes.
* Dennis the Menace (US) tends to be on his elderly neighbor Mr. Wilson's good side whenever the latter is friendly.
* Dennis the Menace (US). The "new" series gave Peter red hair (compared to Melvin's blond hair) and softer, less "menacing" expressions.
* Dennis the Menace wasn't causing chaos for his next-door neighbor, Mr. Wilson, he was often ruining the plans of everyone from human criminals to evil space aliens.
* Dennis The Menace, where the kid wasn't actually allowed to do anything bad. Instead, he was written as an innocent, well-meaning lad who always got into trouble by accident. A better title might have been "Dennis the Unlucky."
* Dennis the Menace, where the protagonist tells Mr. Wilson that his parents "wrestle" on weekends. Clearly, he's never figured it out.
* Dennis, the perverted panty-sniffer who is used as a pornstar by Trevor, is used by Bletch as a
* Dennis unveiling his alliance with the Fusion Dimension involves him suddenly using a Fusion card when he's spent most of his screentime playing the Xyz-centric Performages. This is downplayed as this maneuver primarily uses cards from his Extra Deck, which are only accessed when needed, and the few Spell Cards involved are one-offs that don't infringe too heavily on the rest of his archetype.
* Dennis was absent from "The Gang Beats Boggs: Ladies Reboot" and "Mac Finds His Pride" despite being mentioned as well as the Super Bowl two-parter
* Dennis Weaver and Hugh Hefner met at Mick Jagger's home for a game of poker. Mick was running late so Dennis and Hugh started playing on their own. As the game progressed, tensions grew as Hefner thought Dennis was cheating. The tensions grew so great that the two started fighting. They tussled on the floor when Mick entered, seeing Hugh sitting on top of Dennis. Mick simply said "Hey, Hugh...get off of McCloud!"
* Dennis Wheatley had a real thing for bashing commies. Even in the stories for which he is now remembered, the Black Magic books, there is a Dirty Communist link, as the blurb on the back of
* Dennis Wheatley, in which the Nazis used the services of a Haitian Witch Doctor to get the routes for Allied convoys from the minds of the people who knew about them. The Duke de Richleau and his companions put a stop to it.
* Dennis Wheatley though the supernatural events in this are only peripheral and it is mainly a spy story.
* Dennis Wheatley, Wheatley worked with the British War Office, helping them with their plans and writing papers for them. He took part in the planning of the invasion of Normandy, which led to him being awarded a U.S. Bronze Star after the war's end. He was also an expert on Satanism and the occult, and wrote a series of nonfiction paperbacks on those subjects. Yeah.

* Den-noh Coil arrive - it's infectious, sentient, and worships the owner of the face it's on as a god. The characters' beards eventually start digi-nuclear warfare with each other using Inter-Facial Ballistic Missiles...
* Den-noh Coil beards start appearing on the (pre-adolescent) main characters. These beards are actually Illegals, virus programs that occasionally cross over into reality and are generally antagonistic. These particular Illegals are sentient, forming their own mini-civilizations on each person's face and revere the person they exist on as gods. They then go on to launch missiles and wage civil war on each other and, once that's stopped, "interplanetary" war. After realizing the futility of war, the Illegal beards leave their hosts to find their Promised Land.
* Den-noh Coil. But once his limits are learned and Satchii becomes familiar, the even-more unstoppable version 2 hunters show up!
* Den-noh Coil, Fumie has spanked her younger brother, Akira, at least twice in the series.
* Den-noh Coil. Hacks the local equivalent of the web, deals in banned software, and can shoot digital beams from her forehead.
* Den-noh Coil Haraken's aunt, who is referred to offhand as being the commander of the Satchiis, is assumed by the main characters to be at the very least middle-aged. When she finally appears, it turns out that she's actually on the nearer side of twenty.
* Den-noh Coil has an inversion — we're able to accept the CG Satchiis because they're computer programs. The weirding out happens when, in one of the final episodes, a Satchii is inexplicably hand-drawn.
* Den-noh Coil has a virtual reality accessible via glasses that's more or less this.
* Den-noh Coil has fog appear when obsolete space is present. It's not visible without glasses though.
* Den-noh Coil in 2016 under their Maiden Japan label on Blu-ray with an English dub.
* Den-noh Coil is obsessed with yelling "poop!" and always runs into trouble, giving her older sister Yasako major headaches throughout the series.
* Den-noh Coil meet again. Considering through how much trouble Yasako went to save her that's quite egregious—but Yasako actually takes it very well.
* Den-noh Coil, particularly how everyone tends to interpret them differently. Questions such as "Just what are kirabugs/Illegals/Michiko, really?" are asked and answered many, many times over the course of the series, and everyone seems to have a different version.
* Den-noh Coil resemble living shadows, especially the humanoid Nulls.
* Den-noh Coil revolves around a town set up for an Augmented Reality system which children have access to.
* Den-noh Coil revolves around glasses/goggles that reveal and interact with a computerized space that co-exists with real space.
* Den-noh Coil sometimes gets mistaken for shōnen because of its emphasis on high-tech action scenes, but the manga adaptation ran in a shōjo magazine.
* Den-noh Coil uses a group of virtual pets to do some of her chores. They are all extremely adorable fluffy round things, but underestimating their abilities would be a big mistake.
* Den Nya Människan, the first hint that Gertrud is pregnant is when she starts eating pickled gherkins from the pantry.
* Denny gets arrested for possessing a concealed handgun and tries to get found guilty so the Supreme Court can overturn the conviction and destroy Massachusetts handgun laws. Despite the most ridiculous closing argument by his own lawyer, he's found not guilty.
* Denny Hamlin had never raced at Pocono Raceway prior to his rookie season in 2006 (the Xfinity Series added it to their schedule in 2015, and the Truck Series in 2010). He had, however, raced the Tricky Triangle quite a bit in the PC game
* Denny is often stated to have never lost a case. He, like others on the list, doesn't want to take the case of a guilty person (he wants to protect his perfect record, of course) and when a judge assigns him to defend a child rapist/murderer,

Denny goes so far as to shoot his client in the leg to keep from taking the case.
* Denny Laine had begun his career in the pre-"Nights In White Satin" lineup of

* Denobulans have a mating season, and their breeding drive is regulated by powerful pheromones generated by their females. Males can become violent under these pheromones' influences. Culturally, they practice group marriage, and also remain promiscuous outside such formal relationships.
* Den of Iniquity's lair where the mooks get to indulge in various forms of debauchery.
* Den of Iniquity's lair where the mooks go to indulge their debauched pleasures.
* Den Ofrivillige Golfaren, during the final game, Stig-Helmer's ball lands on a truck that drives away. In order to get it back, they have to bribe the driver into driving to an accessible position so he can take the shot. Never mind that the unplayable-lie rule was practically made for this kind of situation - any serious golf official would have a coronary at the idea of intentionally moving the ball around like that.
* Den of Shadows, a lot of fans figured out that Jaguar was Turquoise and Ravyn's employer before it was revealed.
* Den of Shadows who doesn't kill humans while Sarah Vida is part of a witch line which famously hunts and destroys vampires.
* Den of Thieves. A big deal is made about how their military training discipline and training makes them far more organised and dangerous than your average gang of gangbangers.
* Den of Thieves: After a brutal argument with his soon-to-be ex-wife, Big Nick goes to a strip club. One of the dancers picks him up and takes him back to her place. It is only the next morning when Merriman walks into the apartment that Nick realises that the woman is Merriman's girlfriend and he has been taken for a ride (in multiple senses).
* Den of Thieves: An extremely organized gang of thieves plan to heist the Federal Reserve while a squad of corrupt deputies try to stop them.
* Den of Thieves; deliberately triggering a brownout to initiate a lockdown.
* Den of Thieves, Donnie gets a job at as a delivery guy at a nearby Chinese restaurant; knowing that employees at the Federal Reserve often order lunch from there and he will be legitimately allowed into the building to deliver it. This forms part of his exit strategy following the heist.
* Den of Thieves is hijacking an armoured car when it stops for breakfast. The twist is that the car is empty.
* Den of Thieves, Merriman and his crew are planning a heist on the Federal Reserve Bank in Los Angeles: the 'bank for banks'.
* Den of Thieves: Merriman and some of his crew disguise themselves as armored car escorts to infiltrate the Fed Reserve.
* Den of Thieves, O'Brien and the Major Crimes Squad have no issues with beating information out of a suspect.
* Den of Thieves, O'Brien announces that his crew is basically a gang with badges and that they'll shoot suspects rather than take them in.
* Den of Thieves: O'Brien is eating or drinking in almost every scene where he's not shooting a gun.
* Den of Thieves: The crew smuggle Donnie into the Federal Reserve counting room by hiding him inside a currency box, concealed by bundles of cash.
* Den of Thieves: When Merriman is stuck in the traffic jam and sees the deputies advancing on him from behind, he pulls out a SAW from the back of the truck and sets it up on the bonnet. The deputies are taking completely by surprise when he fires through his own vehicle to attack them, killing one of them in the first volley of shots.

* Denpa Teki na Kanojo. All of the other cases play the trope straight.
* Denpa Teki na Kanojo: At the school, Juu tries to confront Ayase and she pulls a razor, then all the girls run to protect a surprised Juu. Justified because Yukihime and Madoka are Ame's friends, and is logical she asked them not to solve the case, but help Ame to protect Juu.
* Denpa Teki na Kanojo claims to have been this to Juu in a past life, and wants to continue this role in the present. Her taser works just as well as a sword would.
* Denpa Teki na Kanojo (the Lady), good looking, admirable guy with dignity and nobility that inspires everyone around him, even his enemies, and Ochibana Ame is The Knight as a strong, brave girl of virtue sworn to protect him.
* Denpa Teki na Kanojo, this comes in handy on more than one occasion.
* Denpa Teki na Kanojo. This only shows how way over the hill the situation is.

* dense asteroid clusters are not entirely stable. They can also be moved fractionally by interdictors. These jump points are safe, but tend to be minuscule and move rapidly, so they're only useful for small ships, require extreme precision, and carry a hefty risk. But the ability to slip a strike force where they aren't expected can sometimes pay off handsomely, so every once in a while someone uses them.
* Denser and Wackier compared to their predecessors didn't help), the redesigns of the characters, and the school setting. But then came the announcement that Misty and Brock would be making a guest reappearance for the show's 1000th episode, and interest was regained with the lost crowd.
* Denser and Wackier elements introduced during Scully's tenure. 8 seasons was a long time, and 12 was positively record breaking. For obvious reasons, Jean's detractors also ignore his time as showrunner in the third and fourth seasons, generally regarded as two of the series' best.

* Denver. Eventually, a compromise was reached, and three-quarters of the beltway was built, using three different designations: Colorado State Highway 470 (from I-70 in Golden to I-25 in Lone Tree), E-470 (from I-25 in Lone Tree, past I-70 northeast of Buckley Air Force Base, and Denver International Airport, to I-25 in Eastlake to the north of Denver), and the Northwest Parkway (from I-25 in Eastlake to Broomfield). Currently, a gap remains in the northwest part of the beltway, as it stops short of reaching the Denver suburbs of Broomfield and Golden, where fierce opposition to the road continues. Golden is opposed to completion of the beltway; Broomfield supports it, and has been exploring alternate routes.

* Department of Child Disservices: Many a Lifetime plot involves the threat of the protagonist's kid being taken away from her, usually by some social worker who doesn't know or care about what is going on or is actively playing a villain role.
* Department of Child Disservices the family. While they may remove children from a household temporarily, it is usually only until the parents can clean up their act to make the household suitable for the children again. A permanent separation only occurs when the parents are truly unfit and present a clear and present danger to the children.
* Department of Redundancy Department — Explaining something with repetition is funnier than explaining something the normal way.
* Department of Redundancy Department page: An MGM short from 1935 called "La Fiesta de Santa Barbara" uses this for humorous effect during one of its narrator's helpful translations: "You may be asking, what is a 'fiesta'? Well, 'fiesta' comes from the Spanish word 'fiesta', which means... 'fiesta'."
* Department of Redundancy Department: Repetitively needless repetition that is done needlessly is played for humor, with the humor done in the form of needlessly done repetitively needless repetition.
* Department Q: The Keeper of Lost Causes, but this is treated as a deep character flaw, since it got his first partner severely injured.
* Department S episode "The Man Who Got a New Face", an assassin sneaks into the home of a wealthy man and glues a comedy mask to his face. The target dies of a heart attack from overexertion in his vain attempt to remove the mask.
* Department S includes as an extra one episode that was edited from an hour-long format to a half-hour for US syndication. Needless to say, the plot and dialogue are butchered to the point of incomprehensibility.

* Department S's flamboyant novelist/detective character his own adventures.
* Department store J.C. Penney announced in 2012 that they would be discontinuing prices ending in 9 or 7 and listing prices in whole dollars whenever possible. They also stopped the common retail practice of listing items as being "on sale" for X percent off an imaginary, inflated price. The result:
* Department stores with multiple levels may consolidate to just one floor if business is declining. In such cases, the elevators/escalators will often be blocked off from public use. This is commonly seen with Dillard's, which often downgrades lower-performing stores to smaller-format "clearance" stores. It also became increasingly common with the decline of Sears, as many stores were consolidated to smaller footprints while the rest of the building was either abandoned or leased to another store (although in many such cases, the downsized Sears later closed anyway).
* Departure Means Death: It's impossible for someone to leave a certain area without dying.

* De Patie Freleng Enterprises alums. One particularly memorable gag involved the

Aardvark actually flying through a wire fence and then plucking a small square out of his own hindquarters.
* De Patie Freleng Enterprises' Crazy Legs Crane was always chasing a dragonfly (a tiny dragon with wings).
* De Patie Freleng Enterprises series, where the Aardvark tries to catch and eat his rival Charlie the Ant while the two exchange witty banter.
* DePatie-Freleng, the titular characters' voices were redubbed to avoid Mexican stereotyping, turning them into the "Texas Toads".
* Depeche Mode album. Played completely straight when he cut his hair and shaved off his beard after quitting heroin.
* Depeche Mode at the very first glance seems like it would be pronounced "Deh-peh-chee Mode", for the majority of people, but it is actually pronounced "Deh-pesh Mode". It's French.
* Depeche Mode avert this in the U.S., where "Enjoy the Silence" was their only Top 10 hit on the Hot 100. However, in the UK, it peaked at #6, their highest-charting singles being three #4s. However, none of them were "Just Can't Get Enough", "Everything Counts", "Strangelove" or "Personal Jesus", among other songs they're well-known for - they were "People Are People" (still a relatively well-remembered song, if not quite as iconic as the aforementioned hits) and the lesser-known "Barrel of a Gun" and "Precious".
* Depeche Mode did a song in 1986 called "New Dress", where nearly every line was taken from an actual headline.
* Depeche Mode distinctly harder and more mechanical than that of other bands in the movement, with Depeche Mode increasingly orienting themselves in a more Gothic and melodramatic direction as their careers went on.
* Depeche Mode frequently does this during interviews. So often that lead singer Dave Gahan mentioned that he raises his left eyebrow when he's excited and his right when depressed.
* Depeche Mode has "Blasphemous Rumours"/"Somebody". It's about a sixteen-year-old girl who attempts suicide, survives and is so thankful that her faith in God is renewed...but less than two years later, she is involved in a car accident, ends up on life support and dies.
* Depeche Mode is also very nearsighted without his glasses and there are even stories that Martin Gore used to hide or snatch Fletcher's glasses away from him, evidently as a practical joke, and causing him to trip in the studio and even on stage.
* Depeche Mode original), it's nevertheless far better known than their three Top 10 Mainstream Rock hits.
* Depeche Mode's "Blasphemous Rumours" has one come up in the middle of the song right before the central character is fatally wounded in a car wreck.
* Depeche Mode's singles collections also include less-than-positive critical responses, such as "I have often wondered why God bothered with Depeche Mode" and "What do you expect from this bunch of lame dickheads?"
* Depeche Mode's song "Blasphemous Rumors" is about a girl who tried to commit suicide at age sixteen. She fails, and learns to love life again. Then she dies in an accident.
* Depeche Mode. The chorus even lampshades the trope: "I don't want to start any blasphemous rumors but I think that God's got a sick sense of humor/And when I die I expect to find him laughing."

* Depending on how cynical the writers are, these characters are sometimes the first ones to bite the dust.
* depending on how heroic you consider him. A distrusted foreign eunuch with no lands, incomes, titles, connections, or armies, he parlayed a quick wit and a talent for thievery and mummery as a youth into a peerless spy network and immense behind-the-scenes political power. As for his "heroic" credentials, well, he claims to serve the realm… and he might even be sincere.
* Depending on how much precision you really need, you can get away with fixed-point arithmetic to do fractional operations. It's essentially dictating where 2^0 is. For instance, a decimal 1 could be in the 16th bit of a 32-bit number, meaning you have 16 more bits for fractions (which are negative powers of 2). The huge advantage is that not only do the addition, subtraction, and multiplication still work the same way, but you can essentially cheat division by multiplying by a fractional number. The

* Depending on how you look at it, the fate of the doctor's wife (and possibly the doctor himself) from a song of the same name by The Clockwork Quartet. The lyrics are written as entries in the doctor's journal, detailing his beloved wife's slow death by an incurable disease. He becomes more and more obsessive in his attempts to save her, until he has sacrificed his business and his entire life in order to keep her alive... to no avail. By the last stanza she has died, but the doctor replaced her heart with a mechanical device that keeps her other organs alive. The doctor is completely maddened by his tragic inability to let her go, and his wife is kept in a permanent state between life and death, unable to simply pass away because he won't let her.

* Depending on the situation, basic hypnosis (such as Jango's ring or Ms. Goldenweek's emotion-altering paint) serves as one of the weaknesses for Monkey D. Luffy, the protagonist. Due to his simple-minded nature, he just won't have the sense to turn away, which makes him helpless and left to the devices of his enemies.
* Depending on the source, Khorne also avoids this: The Blood God only wants the blood to be spilled, he has no care about who spills it. Even non-combatans are not outright hated, although they will never gain his favour either. He is only racist towards psykers, and again depending on the source, he doesn´t generally hate psykers, as long as they don´t use their power in battle because he considers that cheating. Of course in other sources his followers just either enslave or murder any psyker or even any non-combatant they get their hands on, so this may vary.

* Depending on the Writer and on the perspective of the characters. To the X-Men,

the Shi'ar Empire has mostly been an ally (except for when they're dealing with a corrupt official or a mad emperor), but to the intergalactic rebels/pirates the Starjammers they were definitely the Empire.
* Depending on the Writer, as early editions of the Official Handbook of the Marvel Universe attributed Colossus with impressive levels of speed in human form, and claimed he reached peak Olympic athlete levels of speed when he turned into metal.
* Depending on the Writer as life-endingly horrific. We never see under his mask.
* Depending on the Writer can be this, though namely to employees who work hard. He has little tolerance toward slackers.
* Depending on the Writer clans and start massive wars for fun, sometimes those clans are humans-only, and other times they're just a largely-peaceful human ethnicity that happens to have some famous criminal members.
* Depending on the Writer, either a few things happen; the aforementioned solar power incident, Superman's skin is too tough to bite through, or finally, while vampire can drink his blood, Superman's blood is alien, which is at most, poisonous, or at least, unappetizing.
* Depending on the Writer evil for dramatic effect more than anything else).
* Depending on the Writer. Firelord could've destroyed him if he caught him but Spidey's mobility the meant he couldn't even touch him. Spidey can also reach much higher speeds via web-slinging.
* Depending on the Writer: Harvey Weinstein is portrayed by the left as a symbol of male chauvinism. By the right he is often representative of the problems surrounding the Democratic Party or Hollywood.
* Depending on the Writer has the Joker enjoying this fact, as the truly incorruptible Batman provides him an eternal opponent.
* Depending on the Writer). He even calls out others on sexist behavior in a few comics.
* Depending on the Writer, he found himself struggling with his role as both leader and father figure towards the teenaged mutants.
* Depending on the Writer. Homer, especially is too involved in his own schemes, or too distracted by Bart to pay enough attention to Lisa and Maggie.
* Depending on the Writer. In one version, the Emperor actually is a living god who has been around since the early stone age (created by humanity's shaman sacrificing themselves to create him when they noticed their previously reincarnating souls were now being eaten by the Chaos gods).
* Depending on the Writer in the EU, probably had something to do with it.
* Depending on the Writer. In the original fic, the conversion process was set up to save humanity from dying of what basically amounts to radiation exposure, pony magic being lethal to humans.
* Depending on the Writer. In Tom Beland's one-shot "Web of Romance", Peter actually reflects this about his feelings for Gwen and how it compares to his relationship with Mary Jane (who's always been insecure about being a replacement for Gwen). Peter notes that with Gwen he was always tense, nervous, because of how emotional she was, was never entirely relaxed, and that he was never able to be honest and open with her in the way he is with Mary Jane, and that his feelings for his wife are greater than it was for Gwen.
* Depending on the Writer is located in a town like this. In one of the movies the protagonists live in an entire monster counterpart of planet Earth.
* Depending on the Writer, is sometimes portrayed as as a lonely outcast.
* Depending on the Writer, it varies who it is—usually either Harlequin or Pulcinella. Any clever zanni, really.
* Depending on the Writer Johnny and Jesse Quick. They recite a formula that describes a 4 dimensional construct while trying to picture said construct in order to trigger their super speed. Turns out it's just a crutch to access the Speed Force.
* Depending on the Writer leaves the edges of whatever he just blasted his way through glowing red-hot.
* Depending on the writer, Machine Spirits have been anything from intelligences formed from hundreds of years of a complex program slowly evolving, an inherence

within Imperial computing technology, an actual CPU core housing a legitimate AI, or a collective of the fragmented minds of the controlling servitors. While Games Workshop has called each of these excused correct at various times, when you are talking about actual Imperial AI, you are referencing the Cortex. This is a very advanced fragment of
* Depending on the Writer may have a downplayed, one-sided version of this; she is sometimes portrayed as attracted to Batman, viewing him as either a worthy rival, the only "good" man she knows, or both, but Batman does not reciprocate the attraction.
* Depending on the Writer — Charles Xavier and Erik Lensherr (Professor X and Magneto, respectively) started out as best friends and bosom buddies, until they broke off because of differing opinions (Charles with the opinion that mutants and humanity are not enemies and Erik believing they are with mutants poised to become the dominant force).
* Depending on the Writer most of the time because that's what everyone expects from him.
* Depending on the Writer of the Flash fam. Both Barry and Wally also married reporters, Barry dating Iris West (and through her met and mentored Wally), while Wally married Linda Park, and both couples had twins (Don and Dawn Allen, 'the Tornado Twins', and Irey and Jai Park-West).
* Depending on the Writer. One mistake all of them do is have the shot cauterize the wound, while in real life lasers would do the same damage as normal firearms. Albeit, much larger calibers than normal humans carry as the lasers would cause explosive flash vaporization and flash flesh into briefly existing plasma. Lasguns are known to blow grown men nearly in half, which is actually very realistic.
* Depending on the Writer or trying to get Batman to break his no kill policy out of a desire to drag the man down further.
* Depending on the Writer pattern more common in the shows. It seems that this single name is usually the family name; a first name will sometimes be used, e.g. Gell Kamemor, Aventeer Vokar, but this is apparently rarer than simply using the family name.
* Depending on the Writer protective of his people, and rewards those who show loyalty. For example, Doom's heir is Kristoff Vernard. Who's that? The son of one of Doom's maids who died protecting him.
* Depending on the Writer. Rotor to his credit lampshaded his hypocrisy on the matter at one point.
* Depending on the Writer scope, and so tens of different arms of the EU developed him in tens of wildly different ways.
* Depending on the Writer. See the relationship between Batman and the Joker in the New 52. Artist Greg Capullo says in an interview with the website Comic Book Resources (29th April 2015):
* Depending on the Writer, Squidward can have a playful sociopathic side himself. As a result, it's hard not to enjoy it with him.
* Depending on the Writer stories, where he was a fully-deputized member of the Gotham police), with people within the DC Universe recognizing him as "the World's Greatest Detective" as much as real-world fans do.
* Depending on the Writer telling him what to do that he so willingly switched from being Heaven's doormat/bitch to being Dean's doormat/bitch.
* Depending on the Writer tell of Jesus' life from the slightly differing perspectives of four of the Apostles. Notably, the accounts of Creation differ on whether Male and Female were created at the same time, and whether humans were created before or after animals; the Gospels differ slightly on which people witnessed Jesus' crucifixion, and on which women were present when his tomb was found empty.
* Depending on the Writer) that they'd be just as insane and twisted as he is if they were pushed far enough. This became key to his entire persona in the Nolan films.
* Depending on the writer, the Caped Crusader may show varying degrees of reluctance or distaste for fighting female villains. However if they care to test

him on this matter, they soon find he'll still take them down regardless. That said some portrayals of the Dark Knight show him making zero distinction between male and female criminals.
* Depending on the Writer theme, while asking her not to tell anyone he knows how to use a smartphone.
* Depending on the Writer, these episodes were either set in the present day, or the near future (e.g., Sarah Jane explicitly says that she's from 1980, in an episode released in 1974).
* Depending on the Writer: The way a character behaves or is treated changes depending on who is writing at the moment.
* Depending on the Writer the world really is. In particular, only a select few not actively involved in combat against them realise the existence of the Tyranids and Chaos. Sometimes the Traitor Legions are a closely guarded secret, other times they are what a planet publicly dedicates its martial power to defeating. Sometimes. It really depends who's writing, and particularly on the setting, since we rarely see the non-combatants of the 40k 'verse.
* Depending on the Writer. They will affect anyone who knows too much about them:
* Depending on the Writer, they will be shown as either dumb, just a bit outclassed, or even having common sense as compared to the overcomplicated plans of their teammates/nemesis.
* Depending on the Writer, though, and he stayed fairly grounded in his interpersonal relationships.
* Depending on the Writer throw with the shield and an ordinary human dies protecting Cap from a blow from Thunder Ball in another story, but Cap has no problem blocking attacks from characters far stronger and powerful than Thor or Thunderball. Even when he has shields that do not have absorbing capabilities, he has no problem. He once, using a pure adamantium shield, blocked a steel beam swung by Mister Hyde, a class 50 Thor villain with no problem, which by all means should have shattered every bone in Cap's arm. Even worse, in another story, he is shown blocking hits from the Destroyer Armor with a (his original) steel shield, and the armor punching Thor in the same comic was shown to be shaking the entire city.
* Depending on the Writer to the things that tire him out too much for a normal job...
* Depending on the Writer toward Spike. One constant throughout all these interpretations is that they are utterly inseparable, to the point where the Season 3 premiere establishes Spike's greatest fear as being Twilight not needing him anymore and sending him away.
* Depending on the Writer, where he and Harry Osborn try to pick up two girls, but all he can say is he takes photos, then babbles how he doesn't mean he takes pornographic photos. Harry has to guilt trip the girls into giving him their numbers and excuse Peter's dorkiness.
* Depending on the Writer, why should he distinguish? A common bit of fan description for Batman's view of religion is, "If there is a God, He'd better have a damn good explanation for all this shit."
* Depending on the Writer with Lovett when he finds out that she knew all along.
* Depending on the Writer writes them, Luke is the sweeter, gentler one who prefers to avoid violence when possible, is always giving second and third chances, and is very open emotionally. Mara is more hostile to the world, blunt and direct and not about to let herself be jerked around, much more fiercely independent, and untrusting.
* Depending on the writing who will run roughshod over millions to avenge Hitler's death and restore his idea of the perfect fascist utopia. Either way, he won't be stopped by any appeals to mercy or pity.
* Depending on what Electronic Countermeasure/Support Aircraft or Facilities are snooping around the airspace in
* Depending on what path the player takes, earlier they could have been promoted from city watch Guardsman to Lieutenant
* Depending on what you hope to do, Letters of Recommendation or Personal Statements range from a formality to a crucial part of getting where you want to

go. The logic here is the same.
* Depending on where you are, you may need to dual wield QSZ-92 semi-automatic pistols as part of the Chinese Liberation Army training. However, unless new info disproves this, it is safe to assume it is solely for the purpose of training one handed firing with both your dominant and non-dominant hand. And maybe training for "Macedonian Shooting" if a soldier is ever in need of suppressive fire and only has two pistols?
* Depending on whether the "she" mentioned in the lyrics is another robot or something else, "Space Robot 5" by
* Depending on which side you pick on Onderon, an opposing NPC will either be a mercenary or a patriot.
* Depending on who he is at that moment) he uses to psychologically torture or emotionally connect with people.
* Depending on whom you ask, gamebooks were popularized by either the French Oulipo movement, the American author John Thomas Sladek or the English author Edmund Wallace Hildick. It's complicated.
* Depending on who wrote the episode Time Lords are actually a rank, not a distinct race, and at least some of these traits are something they gain when they attain it. Baseline Gallifreyans have very long lives in human terms but don't regenerate, and the Doctor supposedly only had one heart before his first regeneration.
* Depending on who you ally with at the end, or allying with no one at all, the final missions of
* Depending on who you ask, any given arc of the original Dragon Ball manga could be considered this.
* Depending on who you ask, several large archaeological artifacts, such as the
* Depending on who you ask there are also some fans who don't like how the crew decided to give both Nie Mingjue and Wen Ruohan a mustache, pointing out that they look more silly than intimidating and would actually come across as more properly imposing if they didn't have the facial hair.
* Depending on who you ask, there's also the questions of where the Dispenser gets the matter to generate infinite amounts of ammunition and metal, where the Medigun gets the energy to promote endless healing, how Respawn is supposed to work, and where all of those ammo and health packs keep coming from.
* Depending on who you ask, the strategy RPG genre was revived by either

* Depending upon the Undependable: An authority figure keeps hiring or promoting incompetent people even though they know (or should know) disaster will always result.
* Depending upon the Undependable: An incompetent employee keeps getting hired and/or promoted even though the hiring person is aware (or should be aware) disaster will inevitably result.
* Depending upon the Undependable: People get hired or promoted even though everyone knows (or should know) how incompetent they are.
* Depending who you talk to, some or all of the filler of the original series, especially the fourth season ("Waking the Dragons"), which is nothing
* depend on the writer; sometimes the Hulk's transformations are portrayed as the result of adrenaline, both in the form of anger and excitement or fear, other times it is portrayed as a pure survival mechanism, activating to save Banner's life regardless of emotional state. But the anger fueling strength connection is generally maintained.
* Depends. If this is referenced in-game, I have no idea. If not, then it's
* Depends if you're talking about an individual level or group level. Individually, most are nothing more than people caught in a bad situation or simply got shanghaied into the unit. By comparison; two characters are actually Lanseal graduates (the game's equivalent of West Point), one of which graduated with honors. (And that's not including the volunteers.) As a group, the unit's bad reputation has more to do with the fact that its commanding officers keep them on hand and use them explicitly for wet works than anything they actually do.
* depends on the writer) if he's still somewhat young like in his late twenties or he is middle-aged.
* Depends On The Writer (mostly) consistent though is that Darth Vader can't use Force Lightning because it would fry the electronics in his life support.
* Depends on the Writer. Sometimes he's a terrifying threat, or when written by Matt Ward he exists to show up and get pantsed by the latest new special character needing some badass cred.
* depends on the writer, the gags taken from it are centered around Scrooge not having to buy anything either fo him or anybody else; when asked for anything, he just phones, call for "the director of his [insert product here] company", and asks to be delivered one in no time.
* Depicted originally as a plot-point in a town that was Hex Nuked, including literal Hex Decontamination Teams.
* depicting an ongoing riot where there is essentially anarchy in the prison. Thus, a full 17% of the entire series takes place over a single week.
* depicting Craig in some kind of prophesy at it while he does nothing but comment in a deadpan tone.
* depicting your product's target demographic in this manner idea, but it obviously works or else they would have stopped doing it by now.
* depictions of Angels and that Fall changes their very essence into Demons. It is up to the players how easy this is.
* Depictions of Krypton often show this look as being having been a staple of everyone's clothing (along with tight-fitting outfits and capes). If we assume that Superman based his outfit on Kryptonian ones, and in turn, that many superheroes based their outfits on
* Depictions of Latveria itself run the whole gamut described above, from 19th-century throwback to violence-torn post-
* Depictions of martial arts competitions tend to be all over the map in terms of accuracy, and most of the time they're treated like combination wrestling/boxing matches, except with less protective gear and more types of techniques allowed. Specifically:

* depicts a strikingly blonde topless woman with woodland flowers braided into her hair and a serpent twining itself around her.
* depicts Haruhi as a bikini-clad giantess who stumbled upon an island containing a foot-tall city and decides to go on a stomping spree.
* , depicts Mao Zedong and some cronies playing a concert in front of a gigantic crowd.
* depicts the events of Homer, Bart and Lisa’s day, it is actually a Marge episode as she is the one who holds everything together and makes everything happen. She kicks off everything with breakfast, cuts off Homer's thumb (by accident), starts up the 123 Fake Street which leads to Bart's undercover storyline, does all the driving for both Homer and Lisa, and it's her fault that Homer has to hitchhike and then walk. And it’s ultimately her who saves the day by tossing Linguo into the fire.
* depicts the title character murdering her newborn babies or baby, depending on the variant.
* Depict the events leading up to the start of the war, even if it happened years before the main story.
* De Pies a Cabeza, a Colombian soap opera, not only used the song of the same name from Mexican group Maná, as theme tune. All the ambient music was taken from their studio album "¿Dónde Jugarán los Niños?".
* Depleted Phlebotinum Shells of an enemy with your existing armaments to make killing them easier.
* Depleted Phlebotinum Shells: Weaponizing the substance that the creature is weak against.
* Depleted Uranium Shells, which one-up the Leopard's tungsten shells in three ways. First off, it requires less alloying, (where tungsten rounds need a full 10% of their weight in alloying materials, depleted uranium only requires 1%), meaning depleted uranium APFSDS rounds weigh more and pack more of a raw punch. On top of this, where a tungsten sabot "mushrooms" out as it pushes its way through armor, blunting it and spreading the kinetic impact, depleted uranium is "self-sharpening", maintaing its slim, pointed profile as it pierces straight through the same armor. This is in part due to the third advantageous trait of depleted uranium as a shell: its pyrophoric qualities. Due to a number of complex chemical attributes, it will spontaneously combust on impact, burning/melting itself and as a result, doing the same to the armor of whatever poor bastard it hits, and this molten mass is dragged behind the uranium shell when it finally breaks through and into the target's innards, covering it in molten metal. As a result, the Abrams packs a significantly harder punch than any of its competitors.
* Deployable Cover, Tassadar's Force Wall stops enemies from walking past, but they can shoot through it just fine. It's used to trap enemies rather than hide behind.
* Deponia called Elysium and emigrated there en masse, leaving the poor to wallow in their waste on what quickly became a trash planet. After generations of separation, the Elysians became convinced that no life could survive on Deponia and planned to blow it up.
* Deponia Doomsday, all he did not only was undone, it might have even made things worse for him and others.
* Deponia Doomsday, one puzzle results in the normally sane and composed Toni getting so frustrated that she lights a cigarette while sitting in a fully-stocked explosives shop, blowing the whole place up.
* Deponia game, with Rufus walking in on his ex-girlfriend Toni. She seems more annoyed than genuinely upset with the whole thing (a somewhat odd reaction given that Wenzel was looking on the whole time).
* Deponia in particular is a subscriber, mostly because his hygiene is terrible even by Deponian standards.
* Deponia is a selfish lazy bum who mooches off his ex-girlfriend and generally annoys everyone in town.
* Deponia sequel where Rufus must trick Goal into holding an umbrella, among other lightning-unsafe activities such as standing in a wading pool, so that she'll be struck by lightning and he can climb a communications tower without being struck

himself.
* Deponia's main protagonist Rufus unlikable is his jerkass personality. 40% is the fact that he solves half of his problems by blowing stuff up. Or setting up a domino effect. Or even killing people.
* Deponia stores some important codes along with her consciousness in her implant.
* Deponia: The Complete Journey, the first three Deponia games merged into one, big package, comes with various bonus goodies, developer commentary in both German and English included.
* Deponia you need to prepare one to awake Goal from her trauma-induced slumber.
* Depopulation Bomb: A bomb powerful enough to wipe out whole populations.
* Depopulation Bomb: It didn't necessarily destroy the planet, but it did wipe out most of its people, probably leaving only a few survivors.
* 'Deportees', whose service earned them (back) full citizenship and rights. Deportees who had been sent to colonise Siberia as adults or children, and the children of deportees, were eligible for service in regular Red Army divisions raised from deportee populations. In the Far Eastern Military District they were conscripted into normal units alongside all other able-bodied men under 55 to maintain and expand the defensive field works and positions along the Soviet-Manchurian border. At least 50k men served in the Deportee units, as many as 200k served in units raised by the Far Eastern District and sent to fight in the European Theatre, another 100,000 may have served in the Far East.
* depose Harriet Jones, Britain would have entered a modern Golden Age.
* depowered and thought the serum wasn't working. Somewhat justified, as Clark, depowered, had several hematomas and was bleeding, something Superman isn't supposed to do.
* depowered, the remaining mutants are rendered more vulnerable than ever. This sets in motion a chain of events that places the X-Men and by default all of mutant kind, in the direct cross hairs of the U.S. Government and The Avengers. Fortunately it also attracts the Phoenix Force and revitalizes mutant kind, even though Cyclops ends up demonized by mutants and humans alike and a fugitive from justice.
* depowering when she sees Rogue aiding Gambit, attacking Rogue with her powers, calling her a “seducer” and screaming that Gambit is hers.
* De-Power: Someone loses their powers for good, or for a very extended period of time.
* Depraved Bisexual: A bisexual person whose malevolence is expected or made worse for being bisexual.
* Depraved Bisexual, although T didn't feel like he was revealing anything new (at a point where Penny was barely in denial, but a case could still be made for Aggie being straight).
* Depraved Bisexual: An evil bisexual who grosses everyone out because of their proclivities towards more than one gender.
* Depraved Bisexual: Being willing to have sex with anyone makes you villainous vs. lack of desire to have sex with anyone makes you villainous.
* Depraved Bisexual often loses when his opponent manages to expose his privates (which is not difficult given that he wears a thong) and the ring crew has to throw a towel.
* Depraved Bisexual: Only bisexual men are really considered depraved, not women.
* Depraved Bisexual: People who are attracted to both men and women are shown as being weird and immoral.
* Depraved Bisexual: They would screw anyone... especially those who get in their way.
* Depraved Bisexual: This character may be portrayed as a sexual predator of male and female victims alike.
* Depraved Bisexual to the point of creeping out the target of his affections.
* Depraved Bisexual trope but even that is falling out of favor due to the implications that bisexuals are lust-crazed idiots with no self-control.
* Depraved Bisexual who constantly flirts with men, including both Winchester brothers, mocks Castiel's affection for Dean and in Season 10 appears to develop

feelings for Dean.
* Depraved Dentist: A dentist who has apparently taken the job just so they can get their kicks by causing their patients pain.
* Depraved Dentist: A dentist who takes advantage of the "appointment" to do some unsavory things to their poor, poor patient.
* Depraved Dentist, and his son Wendell are constantly giving these grins.
* Depraved Dwarf: A little person who also happens to be chock full of malice.
* Depraved Dwarf Boris Bullski's original suit), and he operated it from a cockpit contained entirely within its torso.
* Depraved Dwarf, but they were wild and uncouth, sometimes dangerously so.
* Depraved Homosexual: A gay man who is unsavory in one way or another, often by being so sex-crazed that they have no qualms over raping straight men.
* Depraved Homosexual: A gay man whose malevolence is expected or made worse for being homosexual.
* Depraved Homosexual a knife, because he considers it to be a piece of art.
* Depraved Homosexual: A sexually villainous or antagonistic gay person.
* Depraved Homosexual: If they're having gay sex, and gay sex is among the worst sins on the calendar, they'll stick at nothing.
* Depraved Homosexual prisoners. He specifically targets Lucas because he is being paid to do so by the mob boss Lucas betrayed.
* Depraved Homosexual rapist who immediately sets his sights on Stanley.
* Depraved Homosexual: Same as the above, except they're only targeting (straight) people of the same sex as themselves.
* Depraved Homosexual takes a liking to his young opponent Ryohei's muscular physique and decides to take him home...after he's kicked the shit out of him that is...
* Depraved Homosexual: The belief that gay men are willing to resort to satisfying their lust by raping straight men.
* Depraved Kids' Show Host: A children's show is hosted by a person who in real life is a worse person than the character they play on TV.
* Depraved Kids' Show Host: A kids' show host who secretly or blatantly has no place in children's programming.
* Depraved Kids' Show Host: Child-friendly TV show host on camera, but not so child-friendly in real life.
* Depraved Kids' Show Host: The friendly host of a children's TV show turns out to be a rather repugnant person offstage.
* Depraved Kids' Show Host: The host of a children's television show is far from being a pleasant person off-camera.
* Depredation, the fight between Hank and Jebus in interrupted by the screen glitching and Tricky coming out of the ground.
* Depressed skull fractures. They can often cause a hemorrhage into the brain, causing this trope.
* Depressing as hell subject matter presented in an unbearably maudlin style.
* Depressingly common in religious or cultural circles that practice purity culture and modesty doctrine. Women in these groups will sometimes stop eating so as to lose or better hide curves that men generally find appealing because they're terrified of accidentally "leading some guy on," or "causing him to fall from grace." Frighteningly, many of those same girls and women are praised for being models of self-control and respectability, thus reinforcing this behavior.
* Depressingly enough this still happens on occasion in the UK with some channels showing about half a movie, then having a ten or twenty minute news segment, and then going back to the movie. Somewhat justified in that it was the easiest way for ITV to show a movie
* Depression Comix. A man representing mass media appears a few times as well.
* Depression Comix, telling them to stay as far away from her as possible.
* Depression-era America actually looked forward to jail, since it offered them some measure of employment, as well as guaranteed meals and a relatively comfortable place to sleep. It was referred to in Depression-era slang as "three hots and a cot".

* Depression-era American playwright and former actor Clifford Odetts was so frustrated by constantly being cast as Spear Carriers that when he started writing plays, he deliberately wrote many of his minor characters to be
* Depression Quest, a directory of therapists in the Greater Toronto area. The therapist you see, Dr. Susan Melville, is fictional however.
* Depression Quest phone number to a therapist's office in Toronto (don't bother calling it, though, because you'll just get an automated message asking for an extension number,) the therapist is similarly named after an actual therapist working in said office, and the name of the person on Steam that the main character talks to also exists in real life (you can even visit their Steam page.)
* Depression Quest, though many other Twine-based games have some degree of acclaim in independent game circles.
* depressive has remained a comedy staple, even though plenty of other countries - some of them nowhere near Germany - now churn out brilliant scientists.
* Deptford Mice Audrey Brown is nearly burned for witchcraft. The village leader begs the mice not to do such a barbaric thing... so they agree to hang her instead. She's saved at the last minute by Twit.
* Deptford Mice books, the squirrels are ruled by a wise, magic-wielding female known as the Starwife. Further back in their history, there were five royal houses of black squirrels in total, each one with its own queen regnant. Gradually these realms were destroyed in various tragedies, with the exception of the Starwife's realm in Greenwich Park, London which remains even in the 'present day' of the books.
* Deptford Mice dark magic and becomes a serial killer that strangles several mice to death.
* Deptford Mice for the younger ones. This is likely why these books have yet to see a film adaptation. Who would you market it to?
* Deptford Mice Jupiter are his fiery red eyes emerging from the blackness of the portal where he dwells, located in the sewers of London.
* Deptford Mice, Piccadilly is in love with Audrey, despite wrongly believing that she hates him. In reality, she loves him just as much as he loves her. After she unintentionally insults Piccadilly and he returns to his home in the city, Audrey visits her friend Twit's field, Fennywolde. While there, she ends up falsely accused of being a witch and sentenced to hang. According to the Gallows Law, if a willing spouse can be found, then the accused will be reprieved. Twit offers to marry Audrey, and she accepts because it's the only way she can be saved. However, she regrets her decision because she cannot pursue a romantic relationship with Piccadilly. He is killed without knowing of her love for him, but she does confess her feelings to his ghost and they kiss before he crosses over to the other side.
* Deptford Mice. Though at times she can seem cruel, her motives are always good.
* Deptford Mice trilogy, Oswald Chitter uses a forked hazel twig to dowse for Audrey's missing mousebrass.
* Depth Charge DOES invoke this during his final fight with Rampage. Early on in Season Three, Depth Charge says that the fight would claim both their lives.
* Depth Charge goes out this way, taking Rampage with him by stabbing the crab with a spike of raw energon.
* Depthcharge was apparently a model Maximal before Rampage wiped out Colony Omicron, turning him into a grim and obsessed hunter.
* Dept Heaven Apocrypha, flagship couple Milanor and Nessiah first met up having to wash dishes together as a punishment for falling asleep during the school's opening ceremony. They got into an argument, after which Nessiah wound up hospitalized due to using too much magic, and the two of them became friends there. They didn't actually become a couple until a bit later on, though.
* Dept Heaven Apocrypha her in the shower — it's just mentioned by another character that she's been crying in there for hours.
* Dept Heaven Apocrypha in particular involves a lot of horrific scrawling.
* Dept Heaven Apocrypha is going to quash all possibility of a fair and just trial.
* Dept Heaven Apocrypha may have locked herself into one, but we're not sure yet.
* Dept Heaven Apocrypha, Seth is a traceuse. She demonstrates the sport as it is,

and discusses it on a few occasions.
* Dept Heaven Apocrypha, there's still been plenty of drama to go around.
* Depth of Field that throws away the actual background. Examples of this practice include:
* Depth with one side playing a quartet of treasure hunters, the other playing the sharks bent on eating them.
* "Depuis que tu n'es plus là" by the French comedian Max Boublil sounds like a romantic song at first but it really is about masturbation. He even says that he is going to marry his right hand.
* Deputy Chief Madeline Wunch is a downplayed example. While she’s not outright corrupt, she shamelessly abuses her position to make Holt’s life miserable as part of their petty rivalry. She is also perfectly willing to organise a fake Internal Affairs investigation simply to get dirt on Holt. She makes it abundantly clear in the season two finale, that she’ll happily destroy Jake, Amy, Rosa, Charles and Terry’s careers just to beat Holt.
* Deputy Commissioner Podolski, initially appears to be a downplayed example, as he transparently uses his position to ensure his delinquent son gets away with causing hundreds of dollars’ worth of vandalism damage to police cars. However, it is later heavily implied that he is in fact in the pocket of a local
* Deputy Dawg cartoon "Diamonds In The Rough" has the deputy tasked with finding a diamond smuggler, but the sheriff tells him not to make an arrest without evidence. A haphazard golfer swings by, and Deputy Dawg deduces that the golfer is the smuggler and the diamonds are in the golf balls. After he accidentally swallows some golf balls, Deputy Dawg is at the doctor with the golfer, and the X-ray shows the diamond-laden golf balls in DD's stomach.
* Deputy Dawg cartoon had the local dentist hiring Muskie and Vince to get Deputy Dawg over for a visit. After numerous chases, they eventually do. DD checks out just fine. He then tells how everyone should see a dentist. When he clarifies what he and the others went through as having Muskie and Vince earn their reward, the two critters brush it off as hogwash.
* Deputy Director Bulloch is talking about the escaped alien (Roger), and what they're planning to do to the person harboring him, causing Stan to repeatedly spit out his piping hot coffee onto people off-screen, indicated by their screaming, until Bulloch says, "Would someone take away Smith's coffee?"
* Deputy Fuehrer Rudolf Hess believed it so much that he was inspired by a dream to make an unauthorized peace proposal by parachuting into Britain to offer it. Hitler quickly disavowed Hess, had his propaganda machine paint him as a total flake and had scores of psychics, mediums etc. rounded up as a scapegoat for Hess embarrassing the Third Reich.
* Deputy: Hollister continues to work as if he were a simple deputy long after he becomes Sheriff of Los Angeles county, and didn't have over a thousand subordinates to do grunt work. However, Hollister also points out that one of his biggest frustrations when working the beat was the disconnect between the highly politicized and bureaucratic upper echelons of the Sheriff's department and the realities of law enforcement on the ground, especially in the more rural parts of Los Angeles county, and he is hell-bent on doing something about that.
* Deputy U.S. Marshal Solomon Wisdom 'Solly' Cole appears a supporting character in several of Edson's novels.
* Deputy Williams winds up knowing her young client from her old neighborhood and starts off giving him an angry lecture, before commenting on how well he's grown up and shutting off the recording equipment.
* Derailed Fairy Tale: A character attempts to tell a fairy tale, but ends up screwing up the narrative by either getting details wrong or getting a little too carried away in taking their own creative liberties with the story.
* derailed near the town of Saint-Michel-de-Maurienne. (He survived as the couplings broke when the train derailed and the locomotive stayed on the rails.)
* Derailed Octavia is somewhat taken aback, and she tells the hospital staff that she doesn't want Celestia to visit again in the next few days. The next section is written by a different author—it's less than a day later, and Octavia is

hanging out with Celestia in the castle like it's no big deal.
* Derailed way back in the first season was written in because Gubler is accomplished at sleight of hand. It's since become a recurring character quirk. In fact, fans often debate how much of what we're seeing onscreen is Reid and how much is Gubler as a profiler.
* Derailing Love Interests for, Libby and Dan, having long since broken up). In her 2020 guest appearance, she represented Claudia Watkins in a custody dispute against the Kennedy family and resorted to blackmailing the judge in a murder trial to get the baby's mother Elly out of the picture.
* Derailing Love Interests (often rather suddenly), so they can break up with them, frequently to get with a different love interest.
* "Der Alte" (German for "The Old Man"),or more formally "Herr Kaleun" (short for Herr Kapitanleutnent, or Lieutenant-Commander), commander of the
* Deranged Dance: Dancing indicates a person is not of sound mind and is affected by mental illness.
* Deranged Dance: Dancing is a sign of mental illness and descents into madness.
* deranged insanity brought upon by surviving the Admonition was powerful enough to cripple a Borg Cube.
* Deranged Taxi Driver - Cabbies range from weird to downright psychopathic.
* Der Bewegte Mann suicide attempt. She is greeted by a doctor and a nurse. The nurse curtly informs Doro that "the patient left us this morning." Doro is horrified until the doctor gently reminds the nurse that that Silesian phrase doesn't mean the same thing in North Rhine/Westphalia. The nurse grumpily amends her news to "the patient was discharged this morning," much to Doro's relief.
* Der Clown: Payday anyway. It's also hard to believe that a German Sondereinsatzkommando (SWAT) would fire their submachine guns at full auto.
* Der Clown Payday while the hero doesn't even have his shirt damaged.
* Der Clown: Payday with its nose still above the BMW's trunk, said fireball also almost completely engulfs the BMW, which, however, manages to drive out of the flames. Without the heroine inside, the car would most likely have been blown up, too. The heroine is affected by the explosion shockwave, but the car isn't. And she gets out of the car with close to no injuries at all despite the fact that the aircraft had crushed the rear window earlier and the fireball would have to have entered the car.
* der deutsche Michel is the patron saint of Germany) for century. Since the 19th century he is usually shown wearing an old-fashioned nightcap.
* Der Disneygang meme. After having legally bought Disney, his Nazi forces start to occupy the Disney universe, with Goebbels being put in charge of the occupation. What makes Hitler a benevolent boss, is that he wants the Disney characters to become full-fledged German citizens and actually listens to the complaints of his generals about Goebbels' abusive treatment of the Disney characters. As a result, he makes clear he'll elect a replacement leader for Disney as soon as he can.
* Der Disneygang meme and the Disney Universe. In this crossover, Hitler legally buys the Disney brand, allowing him to rule over Disney with an iron fist. His arch nemesis Hermann Fegelein does not like this and starts a revolution against the Nazis.
* Der Disneygang phenomenon, Himmler casually tells Fegelein he never expected Cinderella to handle an AK47 as well as she did. Unfortunately, she's never seen doing so.
* De Rechter: Many of the comics are based on recent headlines from the newspapers the comic is published in.
* De Rechter: None of the characters' real names are ever used. Aside from the Judge (who has a nickname used by his wife, "Beertje"), all of them are only known by their title or function.
* De Rechter: The Lawyer is frequently the target of these kind of jokes. One example: during his vacation, the Lawyer goes diving and runs into a shark. The two politely greet each other as colleagues.
* deredere moment during the "Trapped in a Room" scene, while misconstruing Tomoya's intentions towards her.

* Derek & Drew serve as an excellent deconstruction of this concept on the Race during Season 3. On the tails of fit male teams winning the first two seasons, many of the teams became immediately obsessed with beating the "wonder twins", despite Derek & Drew viewing themselves as barely hanging on for the first few legs. At the same time, Ken & Gerard talked about how no one was giving
* Derek and Casey is a non-canon ship that's largely popular with the fanbase, as opposed to all the other love interests that are introduced throughout the series. The fact that half of the show focuses on the interactions and the relationship between the two stepsiblings doesn't help.
* Derek and the Dominos, but someone misheard their name and the new name stuck.
* Derek Bentley was pardoned in 1998 for inciting the murder of a police officer, for which he was hanged in 1953. In contrast to this, the actual killer (who was underage and thus couldn't be hanged) got off with only ten years.
* Derek Chauvin of the Minneapolis Police Department will go down as the cop whose killing of George Floyd, an unarmed black man, culminated in national backlash towards aggressive policing. During Memorial Day weekend, Chauvin arrested Floyd on suspicions of using a fake $20 bill and killed Floyd by kneeling on his neck for nearly 9 minutes. Subsequent investigations revealed that Chauvin had a long history of misconduct like pepper spraying crowds at night clubs, avoiding taxes, and attending the "Killology" seminars that encouraged police to kill suspects; the "Killology" courses are noteworthy as Chauvin attended them with the aid of police unions even though they are banned by both the Minneapolis Police Chief and Mayor. Chauvin would be found guilty of murder in the second and third degrees, as well as manslaughter in the second degree, and received 22.5 years of prison time.
* Derek dies. Side note: this is the first episode where Alex is completely absent.
* Derek Flint and Lloyd Cramden use an electrical socket and their own bodies as an impromptu defibrillator. They're both fine afterward.
* Derek gets pushed into the background in Season 3's later episodes in favor of his brother's
* Derek Gunn has vampires relating to human beings this way. It's also a metaphor for humanity's relationship with oil, which resulted in the whole situation.
* Derek has two outfits - one which he wears for most of the movie (including hunting and archery practice) and another for formal occasions. He fights the villain wearing the latter...because he ran out of the ball as soon as he realised what was happening.
* Derek "Hobbie" Klivian is a pilot known for his remarkable skill at surviving, despite runs of bad luck; few of his tactics are seen, but his ability to keep alive, turning even lethal shots into hits that allow him to eject and recover, may be evidence of being of Plugger.
* Derek instead. However, this trope goes from justified to subverted when Liam has Derek pinned—the second they stop moving, Chloe darts forward and stabs Liam in the back of his leg, thus allowing Derek to free himself and giving them both the chance to run like hell.
* Derek Jacobi, which he fulfilled with a background cameo appearance in 2012.)
* Derek Jeter didn't just want to be a professional baseball player. He specifically wanted to be a shortstop for the Yankees, his favorite team growing up. Now he's considered one of the best players to ever don the pinstripes.
* Derek Kaplan is one for writer Bernie Gabin, to include the perspective of someone who comes to production from the technical side. He’s also intended to skewer Gabin’s qualities.
* Derek obviously blames himself for his family's death, as Kate Argent seduced him to get to his family.
* Derek Ridgewell, a British police officer jailed for seven years for conspiracy to commit theft, was later found to have falsified evidence against numerous black suspects which led to their convictions, including the
* Derek Robinson. An American pilot and soldier of fortune who for political reasons is posted to Hornet Squadron in time for the Battle of Britain, he becomes unpopular not just for having more combat experience than all the British pilots

put together, he is highly critical of the British command a tactical philosophy. It doesn't help that experience proves him right, although not before several pilots are killed in action.
* Derek Robinson, an RAF pilot spots a German aircraft methodically strafing a road choked with French refugees. The effects of the Me110's cannon shells are graphically described. The RAF plane descends to ground level and tries to shoot down the German. It doesn't help that the British pilot is in an unfamiliar American plane, and he discovers he has to angle his guns downwards so as to hit the German. As the German plane is right above a road choked with people, the British pilot's over-shooting adds to the civilian casualties... the unlucky French are being strafed by two aircraft simultaneously.
* Derek Robinson curtly tells him to work out what Rex got wrong - and learn from that.
* Derek Robinson. He's almost always right, especially when pointing out the shortcomings of military tactics directly to the men responsible for those tactics, but no one likes him for it. A superior officer once threw a telephone at him. Or was it a bottle of rum? Probably both.
* Derek Robinson, his WW1 pilots are equally dismissive of ground flak. Until one pilot flies right into a shell that turns his plane into a cloud of small fragments.
* Derek Robinson — the bomb arms itself prematurely, or it jams in the bomb-bay with the clock ticking down to detonation, or Russian countermeasures show up and attack, or they fly too close to a nuclear explosion from a different aircraft, or the aircraft itself develops escalating mechanical problems. The test itself is unwinnable and designed to test the aircrews to the limit, weeding out those who prove to be indecisive.
* Derek Robinson sees a new RAF pilot coming back to base, elated at having scored a possible German kill on his first flight, perfroming a barrel-roll at low level over the airfield. What he doesn't realise is that his Hurricane has taken damage in the air fight, and the stress of perfoming a stunting manouvre is too much for the airframe, which breaks up. He is too near to the ground to parachute to safety and both plane and pilot are destroyed in the ensuing crash.
* Derek Robinson, the "man in front" is navigator and air gunner Paxman, a newbie to the squadron who is paired with an Australian pilot who delights in pricking the new boy's pomposity and pretentions. The two don't so much exchange banter as punches in mid-air, such is their mutual animosity.
* Derek Savage's actions towards his critics make the anti-bullying message of his film
* Derek Savage. Soon afterwards, mirrors of said reviews quickly began popping up, and the major controversy that occurred over it all helped deal a major blow to Savage's reputation.
* Derek's death was kind of a Viewer Punch, but it was supposed to be
* Derek. She moved away years ago for reasons he doesn't understand — all she'll say is that its his fault.
* Derek Taylor is a deceptively influential figure among guitarists whose approach to tapping and legato (accomplished through what he refers to as the "Spock technique") has been copied by many, many players over the years. However, most guitarists using his techniques would be hard-pressed to name anything that he released even though they're familiar with his approach.
* Derek the Bard, professional librarian, often veers between educated literary analysis and history lessons and joking about Farscape.
* Derelict like paper as it runs for the node. The Shivans, unaware the Auriga isn't friendly to GTVA interests, assume the GTVA is far better equipped than they actually are and retreat.
* Derelict. This conveniently bypasses the target's superior firepower and durability, which the Alliance has thus far been unable to overcome in a straight fight.
* De Re Militari) was a major influence on Machiavelli and widely read for centuries.

* Der Freischütz and father-in-law-to-be. Samiel is a speaking role, but generally high-pitched.
* Der Freischütz at the Met Opera in 1959, after which she became the most celebrated Wagnerian soprano of the 20th century, even starting her own foundation to award major contributions to opera, and her portrait is now featured on the 500 kronor banknote in her home country.
* Der Freischütz by Carl Maria von Weber is based around this. Max, the protagonist has to shoot true in a hunting contest to get a job and the allowance to marry his love Agathe. To make sure of that, he delves into dark arts.
* Der Freischütz. Erice called the attack Freischütz , but Moriarty eventually corrects her that that attack is called Freikugel.
* Der Freischütz, seven magic bullets are forged one-at-a-time, each more terrifying than the last.
* Der Freischütz, the Wild Hunt is featured as the fifth apparition in the Wolf's Glen scene, represented by a male chorus accompanied by blaring horns.
* Der Freischütz to win a sharpshooting contest. He forges seven silver bullets; six will strike their target unerringly, but the seventh is foretold to strike the one Max cares about the most.
* Der Fuehrer's Face": Donald dreams of being an overworked, underpaid laborer in a munitions factory in Nazi Germany.
* Der Fuehrer's Face"? He's got just a short appearance, but the flute player in the Nazi marching band is as camp as one can be while wearing a Nazi uniform and a helmet. (That character was probably a parody of Herman Goerring.)
* Der Fuehrer's Face's breakfast consists of wooden bread, aroma of bacon and eggs, and coffee from a single bean he keeps locked in a safe.
* Derghodaemons have three different spell-like abilities that summon swarms of insects, and are immune to damage from swarms themselves.
* de rigueur for a wireless phone company to sponsor pitching changes, usually punning on the "call to the bullpen" the manager makes to effect the change.
* "De Ring van Balderic" a statue of an eagle comes to life and carries off the little boy Clo-Clo.
* Derivative Differentiation (when the derivative works/products start becoming less derivative)
* Der Junge Lord) by Hans Werner Henze, scientist Sir Edger introduces his 'son', Lord Barrett, to the upper dignitaries of a German town. The young Lord's strange speech and eccentric behavior become a source of fascination: he is much admired and imitated, even catching the eyes of a young noble lady — until he flings off his clothes during a dance, revealing himself as an ape.
* Der Langrisser wants both the goddess Lushiris and Chaos drove the hell out of the world.
* Derleth did this quite a bit. He came up with a number of higher and benevolent powers to side against the monstrousities of Lovecraft's canon. He also associated each of the beings with an element, meaning they could also be beaten by properly summoning the opposite elemental (as in "The Dweller in Darkness"). He was pretty much the father of Lovecraft Lite.
* Der letzte Zug, about the six-day journey of a group of Berlin Jews to Auschwitz, with a bucket serving as the only toilet for the hundred inhabitants of a cattle car. Due to the crowded conditions, Nina Naumann is unable to get to it on time, and wets herself.
* Dermott Fictel was raised by his grandmother as his mother's little brother.
* De Rode Ridder as his closest friends. A healthy dose of Tolkien sauce is added for flavor as well.
* DERO! in the Beam Room (as highly improbable as it would be) would guarantee a win regardless of previous score.
* Der Philosoph: Georg the academic is delighted to get a sexy girlfriend, Franziska, but is a little bit startled when Franziska's two hot roommates also start making overt sexual advances towards him. When he finally tells Franziska, she reveals the truth: the three of them are immortal beings that have taken an interest in Georg, and they're all perfectly willing to have sex with him. The

ending finds all four of them in bed together.
* Der Philosoph: Georg the writer has fallen in with three, count 'em, three gorgeous ladies, roommates who all want to have sex with him. He puzzles about his mysterious luck for a while until Franziska, the one he's actually having sex with, tells him the truth. After telling Georg that it's perfectly OK for him to have sex with all three of them, she reveals that the three ladies are "agents in time", immortal beings that flit back and forth from one time to another time. Later, another of the women describes them as "goddesses". They may be Muses, or they may be the three Graces, but in any event they have taken Georg under their wing and they're going to nurture his talents.
* Der Popolski Show. Their main claim is that their grandfather Piotrek Popolski invented Pop Music (the "Pop" is actually short for "Popolski", you know) in 1908 and wrote 128,000 songs that reached the charts (all of which were stolen by a used-car salesmen who sold them to other artists); he also landed on the Moon half an hour before Neil Armstrong in a homebuilt rocket launched from a field outside Zabrze.
* Derpy accidentally does it to herself in "The Last Round-Up". She gets shocked while kicking lightning out of a stray storm-cloud, but just ends up covered in ash and still maintains her usual cheerfully vacant expression.
* Derpy almost by definition, as seen when she unwittingly destroys town hall.
* Derpy as her head is detached from her body and she attempts to run all over town in order to bring it back. It also expands on a few things that were only mentioned in the main story, such as what Rocky and Mugsy were doing while they had Princess Twilight's crown. It also introduces the concept of "creative marks" to show that this is not just any Lego World: this particular Lego World really is an alternate world to Equestria.
* Derpy Hooves (albeit only named with a muffin), the first ever official product based on her. While all the other items remained on stock for days, Derpy sold out within less than 15 minutes.
* Derpy Hooves). By Season 2, the staff started working her appearances into the actual scripts.
* Derpy Hooves is another pegasus that has trouble with decelerating before landing, as seen in "To Where and Back Again – Part 1". Part of
* Derpy Hooves shows her as ignorant to the scale of dangers and also simple in how she treats things, giving the impression that she's a bit... off.
* Derpy Hooves, the faithful mailmare of Ponyville with lazy eye syndrome, who is raising a daughter and niece effectively on her own.
* Derpy Hooves to official canon, much like DJ Pon-3's was, and draws even further from her fanon personality.
* Derpy/Muffins pushes Twilight out of the way of one, allowing the Princess of Friendship to escape with her friends.
* Derpy's mother is abusive, and takes pills to make her "stop crying". Are the pills antidepressants, or
* Der rechte Barbier (The Right Barber) by Franco-German poet and naturalist Adelbert von Chamisso (1781-1838): A man calls for a barber, offering a high price for taking off his beard and shaving him, only if the barber nicks him and spills one drop of blood, he'll kill him. The master barber is too scared, tells the journeyman to do it; the journeyman is too scared, sends for the apprentice. The apprentice does it and does a fine job.
* Derren Brown brought by the meteor fragments. Then crazy people start chasing him and his young companion (naturally, all of them are actors). The special is inspired by the 2012 end-of-the-world fears.
* Derren Brown culminates with the unwitting participant being told to push a millionaire off a ledge in order to avoid everyone (including him) from going to prison, claiming that the rich guy climbed on the ledge on his own and didn't take his pills (which is true). The good news, he doesn't go through with it. The bad news, the other three people who went through the same scenario did.
* Derren Brown has a fairly distinctive three-piece, with a no-tie look that he likes. Combined with his trademark goatee, and it might as well be a uniform.

* Derren Brown: In "The Gameshow", the audience are encouraged to put on a "Phantom" mask and vote the outcome of the night of an unsuspecting volunteer. Many of them voted negatively to the point where they wished the mark be kidnapped right after putting him though roughing up, being overcharged, accused of a shoplifting, getting fired, and downright trashing his apartment.
* Derren Brown named one of his acts "the Svengali", where he uses a clockwork puppet to hypnotize and possess members of the audience.
* Derren Brown police station in the nearby village just in case the mark decides to hightail there alone to confess to a murder he was framed for when the original plan was to have the mark confess on site.
* Derren Brown revolved around using hypnosis to glue the viewers at home to their chairs. Over the course of the show, some (fairly obvious) pictures of a man tied to a chair is flashed on screen. At the end of the day, the illusion depended on the fact that Darren "suggests" that the viewer sit back comfortably, relax their upper body, and place their hands in their laps (due to the law of the lever, it is essentially impossible to stand up from a reclining/sitting position using only your legs as leverage).
* Derren Brown's house is filled with such things, including an 8-legged mutated lamb and a stillborn giraffe. Creepy.
* Derren Brown special, he randomly selects an audience member and asks her to think of a country. She does. Her country? Africa. Not only does Derren not call her out on her obvious mistake (Note: there are over 50 countries in Africa) but has her reach under her seat and find a note he left there with the description of the woman in question and her choice of country. That's right, even Derren is guilty of that.
* Derren Brown's special "The Heist" was a real-life attempt at creating four of these.
* derrickcomedy.com's "Bro Rape" includes a moment like this, when the Newsline reporter is going through the bag of a would-be bro rapist: "Six-pack Natty Ice.
* Derrick Comedy is use of body spray, with one of the bro rapists using a can and a half of Axe Body Spray on a dildo he intended to use on another bro.
* Derrick Comedy sketch involves two of these stuck in their recording room due to the "Wolfpocalypse" while still keeping up their schtick.

* Derrick J Wyatt and Marty Isenberg occasionally form a very nerdy and
* Derrick J. Wyatt, for a time, stopped accepting questions about his work on
* Derrick J. Wyatt got mistaken for this due to "Store 23" featuring present Feedback, despite him stating several times he wasn't in the new Omnitrix. It was actually a diffusion error: that episode was supposed to take place after "Showdown Part 1" and "Part 2" where Ben would reacquire Feedback.
* Derrick, one of the most popular German detective series ever and a hit in most of Europe, was banned completely when in 2012 it turned out that actor Horst Tappert (who died in 2008) had been a member of the SS during his youth. This had never been reported before and as a result, all episodes were pulled from syndication and DVD availability.
* Derrick Rose of the Chicago Bulls tore an ACL in his left knee; he was supposed to be back by
* Derrike Cope is best known for his surprise victory at the 1990 Daytona 500, but he did get a second win (at Dover, Delaware) later that year.
* Der Ring des Nibelungen around him lies to him and uses him to their advantage, and this leads to his tragic and ignoble death.
* Der Ring des Nibelungen. He's a bass-baritone, the ruler of the Gods, and he even has an eyepatch.
* Der Ring des Nibelungen, only the one who renounces love will be able to forge the ring that will let him rule the world.
* Der Ring Des Nibelungen, which is a series of four interconnected operas drawing on Norse Myth to tell an interconnected story. It's considered to be one of the

most thematically and musically complex operas existing. Anyone get the feeling that if Wagner were alive today, he'd be writing concept albums?
* Der Rosenkavalier. He tends to assume that privilege will protect him from the consequences of his foolishness.
* Der Rosenkavalier. Set during the war, though this is mostly used to explain why the protagonist's husband is absent. He is off fighting the war while his wife engages in an affair.
* Der Rosenkavalier to Sophie, he turns to "Mariandel" proposing marriage, whereupon the maid excuses herself with a very amusing secret to tell the Inspector.
* Der Rosenkavalier, two extremely dark tragedies that pushed a lot of boundaries both in terms of story and music and were very popular with the around ten people who could see what he was trying to do, Richard Strauss decided that his next opera was going to be a light, fun crowd-pleaser that would appeal to a broad audience and bring in some much-needed money.
* Der Rosenkavalier, when the Marschallin gives up her younger lover Octavian to a woman his own age whom he has fallen in love with.
* Derry & Toms: April 29 to March 22 (even dates only): You have green, scaly skin, and a soft yellow underbelly with a series of fin-like ridges running down your spine and tail. Although lizardlike in shape, you can grow anything up to thirty feet in length with huge teeth that can bite off great rocks and trees. You inhabit arid sub-tropical zones and wear spectacles.
* Derry asks key questions about the distance and using the spell when Morgan teaches him to join in long-distance rapport for his first reconnaissance trip in
* Derry Girls and she gets in trouble for the purchase at the end of the episode.
* Derry Girls, Erin attempts to leave the mall after fighting with Clare but turns down the wrong hallway. Because the correct exit is in the opposite direction, she has to awkwardly pass by the group in order to actually leave.
* Derry Girls in Derry. It helps that the show's writer Lisa McGee is from Derry herself, and most of the humor comes from her own experiences growing up there.
* Derry Girls introduces a statue of the Christ Child that Sister Michael is attached to. It's destroyed right the climax of the episode in an attempt to hold the statue hostage. The girls try to glue it back together, but do so incorrectly, and their ruse is caught.
* Derry Girls: Michelle makes scones with marijuana in them (since she doesn't know how to make brownies) and brings them to a funeral so her friends can try them. When the scones are accidentally handed out to elderly people at the wake, the girls try to flush the rest down the toilet and end up flooding the bathroom. Erin's forced to pretend she had explosive diarrhea so no one will find out about the drugs.
* Derry Girls: Uncle Colin is an annoyance to the cast for his dull way of telling stories and long ramblings. He’s beloved by the fans for the exact same reason.
* Der Schneemann sees a picture of summer in July and decides to wait in an icebox until July comes so he can enjoy summer. One might expect, given the light, whimsical tone of the cartoon, that the snowman would eventually go back to his icebox, or somehow escape his fate, but he still melts at the end.
* Der Schuh des Manitu with the mule "Apollo 13", who refuses to cross train tracks in the middle of a huge empty desert, because all of his twelve brothers were killed on train crossings. He then suddenly steps right on the track when a train approaches in the far distance and refuses to move in any way.
* Der Schwarm cast contains at least a dozen other professors, none of whom is anything like him.
* Derse dreamers get a bit of this too, though instead of prophetic visions they get the whisperings of the
* Der Silbersee, Severin is driven by starvation to rob a grocery store and is shot while trying to make off with a pineapple. Olim, the police officer who shot him, debates with himself whether to have mercy on the wounded criminal. He does, and they develop a friendship.

* Der Staat gegen Fritz Bauer, which is set in 1950s Germany detailing the hunt for Nazi war criminal Adolf Eichmann.
* Der Staat gegen Fritz Bauer who seduces a closeted public prosecutor so that he can then be blackmailed by political opponents. Previously the singer's boyfriend had been arrested by the authorities for public indecency (homosexuality being illegal at that point in time in the 1950s) and she was offered a reduction to his sentence in return.
* Der Stechlin educated characters occasionally use French (also Italian and English) phrases, while the members of the rural lower classes (agricultural labourers, workers at the glass factory in Neuglobsow, many of Dubslav's servants, etc.) speak in the Brandenburg dialect of Low German.
* Der Stechlin: Ermyntrude Katzler was born as a Princess of Ippe-Büchsenstein, but became a commoner to marry Wladimir Katzler, the head forester of the Stechlin region. Fontane treats this marriage fairly realistically, showing that there is some stress between the still somewhat exalted former princess and her more down-to-earth husband.
* Der Stechlin, which brings together a large part of the cast on a cold winter day. From both from the Stechlin area and from Berlin people from all classes come to pay their respect; ironically his son Woldemar and his new wife are absent as they still are in Italy on their honeymoon. Pastor Lorenzen gives the eulogy which encapsulates what made Dubslav such a special and likable person, how he looked at the world and how he lived his life.
* Der Trihs, staring into his (iced) drink after learning adult kreelies had been mating in the freezer (via external fertilization):
* Der Usedom-Krimi (2014-) - an unusual case as the work is an irregular series of TV movies in its native Germany, but was later broadcast in the UK as a weekly series.
* Der Usedom-Krimi is a German series set on the island of Usedom, which is far enough north to have a Scandinavian flavour.
* Der Verbannte von Asyth, whose plot revolves largely around aliens replacing important individuals on Earth with masked infiltrators of their own kind. The originals are kept alive at the aliens' hidden base and thus remain conveniently available for questioning.
* Der verzauberte Wald by Shei is about a woman who wanders into the magical forest at night, despite the warnings. Turns out everything people said about that forest was true.
* "Der Vogelfänger Bin Ich Ja" (I Am the Birdcatcher, Yes) from
* Der Wixxer, after Chief Inspector Even Longer and Dr. Brinkman discover the Wixxer's initials on the car that killed The Monk With The Whip, dramatical brass music is played in the background. Dr. Brinkman turns around and complains to some police officers with wind instruments.
* Der Wixxer. He manages to defeat the trap, upon which a suspect (whom the building belongs) enters the room, sternly glancing at the protagonist, approaches him slowly and ominously, pulls up his sleeves, complete with a Now-I'm-Going-To-Finish-You-Off - expression. Then, out of the blue, he quips, "Jesus Christ, what's going on here?!" and helps him out of the tub.
* Deryni: According to King Kelson getting a dispensation to marry a first cousin once removed isn't a problem, implying that the Church would be reluctant to allow marriage between a couple more closely related.
* Deryni against King Javan Haldane. That third name of his doesn't bode well.
* Deryni, and a book of anti-Deryni propaganda authored by a cleric and promulgated throughout the kingdom.
* Deryni and his courtiers to provide for the succession. Rothana finally picks out another woman to marry him (his cousin Araxie Haldane) and persuades each of them that their marriage would be for the best.
* Deryni at different times, the part of this trope gets split among many characters, justified by the various levels of experience they have, particularly with regard to the magic.
* Deryni at the coronation, she goes into self-imposed exile in a remote convent,

fasting to the point of noticeable weight loss. She tries to warn Nigel's wife Meraude of the taint of the Haldane powers, exhorting her sister-in-law to keep Nigel safe. She entertains hopes of finding a human wife for Kelson to "redeem" him, and she's rude and hostile to Rothana when she thinks the young novice is too close to her son.
* Deryni a tyrannical Deryni lord is murdered and dismembered, with his body parts left in various places. Fifty peasants are taken hostage and all but one executed when the killer(s) fail to turn themselves in.
* Deryni books, a group of powerful Deryni can make a portal. Any Deryni who knows the location of one portal can get there by any other. Most houses that once belonged to a Deryni family have one somewhere, and most churches that once had a Deryni pastor have one, generally in the sacristy. Some Portals are trapped to prevent unauthorized persons from using them. Also, portals tend to fade from non-use; in the later novels, Deryni have been barred from the clergy for about 200 years, so many of the church portals don't work any more.
* Deryni celebrants of the Sacraments can sense the psychic energies and emotions of participants (especially during key points of the Eucharist and the bestowing of Holy Orders). Does that make them higher than other humans on the
* Deryni, Charissa literally throws down a mailed gauntlet to interrupt Kelson's coronation and challenge him for the throne of Gwynedd.
* Deryni Checkmate. Duncan celebrates the funeral Mass at his father's request despite his suspension from the priesthood. Like her aunt before her, Bronwyn is bedecked as if for her wedding, which had been planned to take place the same day.
* Deryni Checkmate, Duncan goes to Morgan's study and pours himself "a small glass of the strong red wine Alaric kept for just such emergencies", downs it and pours another for sipping while waiting for Morgan to gracefully exit his state dinner in progress downstairs. After Duncan begins recounting the event to his cousin, Morgan gets up and pours a glass for himself.
* Deryni, Conall's actions leave Rothana somewhat tainted by association. Though Kelson is quite willing to marry her after Conall's execution, she refuses him and plays matchmaker for Kelson and his distant cousin Araxie Haldane.
* Deryni, Duncan is depicted using both a sword and a dagger when he rescues Morgan from Warin and his men at St. Torin's shrine.
* Deryni for dangerous power as a means of intimidating potential foes and thereby protecting himself.
* Deryni: Imre, the last Festillic king, indulges in an incestuous affair with his sister Ariella, which (aside from being incestuous) distracts him from marrying and producing a legitimate heir. On top of that, Ariella is no force for moderation or mercy, and Imre is a weak man who allows himself to be swayed by her.
* Deryni in Gwynedd. Some churchmen and lay people believe that Deryni (the people), their powers and their use are satanic, and they say so openly in some cases. And no, it doesn't really matter the use to which those powers are put.
* Deryni in the novels by Katherine Kurtz suffer for this generally, and Camber of Culdi and Alaric Morgan most particularly.
* Deryni, Istelyn reminds Loris that the bishops deprived him of his office and its authority.) When the new Primate Archbishop Bradene sends a writ of excommunication against Loris, Judhael, Caitrin, and their followers, Loris claims it has no force. In response to this, Loris strips Istelyn of his office as priest and excommunicates him (on the basis of his old authority) expressly so Istelyn can be executed (hanged, drawn and quartered) as a traitor.
* Deryni, Kelson and Dhugal are seen to go over the falls with the others, but their bodies are not found. This fact is part of what sends Morgan and Duncan to go to the site of the accident and join the search.
* Deryni, Kelson is reminded (by Rothana) that he had not only met his cousin Araxie when they were children, he also played with her and they got along very well with each other. Though their marriage is arranged, Kelson and Araxie decide to use those happy memories to build upon when forging their relationship.
* Deryni magic are explained in answers to questions posed by characters who are ordinary humans or otherwise inexperienced:

* Deryni. Morgan and Duncan kept the secret between them for many years.
* Deryni novels. Despite lacking the Papacy, the Western Church is Catholic in liturgy, there's intrigue (sometimes against secular rulers), psionic magic users and fights against them, even powerful summoned beings called by the names of archangels (and most participants think they are in fact Raphael, Gabriel, Michael, and Uriel). They don't call their church Catholic, in part because the books are alternative histories set several centuries before Protestantism, and there is Eastern Orthodoxy (mostly in Torenth), Islam, and even Scandinavian paganism in a tiny minority. Most of the action is in the West. In the "Camber" trilogy, you'll find the Michaelines (Order of Saint Michael the Archangel), a fearsome combination of the Templars and the Jesuits, with many members who can use magic. Oh, and many active characters/protagonists are in their 30s and 40s.
* Deryni novels survives numerous conflicts and then dies after slipping on a stone staircase. One of his disbelieving friends cries "death should be more difficult."
* Deryni novels, the very existence of Deryni complicates religious questions.
* Deryni powers are genetic, though most Deryni must be trained in their use. The trait is described as a dominant one (only one parent needs to be Deryni to produce Deryni offspring, and eggs with the trait are hardier and more fertile). Certain bloodlines, including the Haldanes, also carry the variant trait that permits assumption of the powers and the knowledge to use them without training.
* Deryni referenced, but obliquely underlies much of the story (those Deryni inclined to religion tend to see their powers as divine gifts in any case.)
* Deryni Rising, defending Kelson's right to be crowned King Of Gwynedd. While Kelson personally fights an arcane duel against Charissa to resolve the issue, Alaric asks Duncan to help him Heal himself. It's only the second time Morgan has ever done it, and he's lost some blood, while Duncan has never even tried to Heal before and doesn't know if he can do it at all.
* Deryni Rising. The prince is a couple weeks shy of fourteen, and Brion admires his son's shrewd intellect.
* Deryni series features elaborate ritual magic workings for everything from scrying to bestowing magical powers.
* Deryni: The Marluk and his daughter Charissa of Tolan seem to favor black robed Moors as their personal bodyguards and chief lieutenants.
* Deryni: The titular mages are somewhat color-coded. Deryni with green or silver auras are able to Heal, while the Haldanes have red auras. Since the society is feudal, Deryni nobility tend to have their aura colors included in their coats of arms (Haldane red, Morgan's Corwyn green).
* Deryni. They almost have to be in touch with their feelings as a result. Not that any of this stops some of them from being badasses of one form or another.
* Deryni: This relationship between the Michaelines and the Knights of the Anvil is alluded to from time to time. When the Michaelines were suppressed in Gwynedd, many members sought sanctuary with the Anvillers, bringing their knowledge and some of their portable wealth with them. While the Anvillers have other influences (including Muslim ones), they seem to be a mixed human/Deryni military order that eschewed the spotlight of political prominence that Michaelines had, perhaps so as to avoid the Michaelines' fate.
* Deryni timeline, King Kelson Haldane and his mentor Duke Alaric Morgan spread the idea that Deryni can only read someone's mind if they are touching the person. While this is not strictly true (touch is helpful but not needed), they promulgate this notion to ease the fears of the ordinary humans in the population.
* Deryni to convince people to cooperate with him instead of attacking him. It doesn't always work, and he has less need to use this reputation as Kelson becomes more securely established on his throne.
* Deryni Transfer Portals can be set as traps; a person could arrive at the destination but be unable to leave the physical space once there, either physically or by using his/her powers to return, unless released by another Deryni outside it. Portals can also be set so that only certain people can detect and use them; before Evaine and her family abandoned their manor house at Sheele, the Portal in the master bedroom was set so that only blood relatives could find and use it.

* Deryni universe someone discovers that s/he has Deryni (magic-user) blood in an extreme situation. Not all Deryni, even very powerful ones, are Healers; but those who are often first discover that they have that power when someone is hurt and there is no Healer available.
* Deryni, when Bishop Arilan finds Jehana guilt-stricken after she warned Nigel of an assassination plot, knowledge she acquired thanks to her powers. First he tries to teach her through a couple of parables that she had an affirmative duty to reveal what she had learned, and when she retorts that he doesn't understand, he displays his Deryni aura to show her that he actually does.
* Deryni works: Evaine MacRorie and Rhys Thuryn, Alaric Morgan and Richenda Countess of Marley, Rory Haldane and Noelie Ramsay, Brecon Ramsay and Richelle Haldane, Kelson and Araxie Haldane.
* Deryni works label the use of Deryni magic as heresy, punishable by death by burning at the stake. Particularly true for any Deryni who dares to take Holy Orders as a priest; such an execution is depicted in the short story "The Priesting of Arilan".
* Deryni works, this is apt to happen to Haldanes and Deryni children, especially with the pressures making them grow up fast.
* Deryni works to distinguish magically-enhanced things/processes from analogous ordinary ones (healing vs. Healing, veil vs. Veil). Also used in particular phrases coined to describe magical objects and processes, such as Mind Seeing, Truth Reading, Truth Saying, Transfer Portal.
* Der zerbrochne Krug would have to wait until 1876 and 1898, respectively, for their first performance.
* Desaix, the boss of Chapter 1. There are actually 2 bosses on his map, and he's nigh invulnerable and not really intended to be defeated, not only having a third tier class and massive stats, but also a shield that raises his defense and resistance through the roof and heals him every turn. However, grind enough, or just position your units cleverly enough, and you can defeat him and pry said shield out of his cold dead hands.
* Descartes pondered if it was possible that we live in a universe with a deceptive god pumping images into our brain. It's what caused him to be an all-doubting idealist, leading him to say the famous line "Cogito ergo sum" (I think therefore I am), it being the one thing a person in such a situation would know is true.
* Descartes walks into a bar, the bartender asks him what he wants, and he orders a beer. He drinks it, and the bartender asks him if he wants another beer. Descartes says "I think not", and disappears in a puff of logic.
* Descendants 3, Audrey sings an ominous version of this as she casts a sleeping spell at Jane's birthday party.
* Descendants, Audrey is admonished by Freddie for stealing a necklace from her father's shop...because the necklace isn't worth stealing and she should've gone for something that looked cuter.
* Descendants, Ben wants to bring the kids of Disney villains because they didn't commit crimes of their parents and the story revolves them adjusting to life with the other Disney heroes that has prejudice of the villain kids.
* Descendants, but these colour schemes remain closely associated with the characters, regardless of their newfound heroism.
* Descendants", Evie is initially anxious about meeting her half-sister, Snow White, considering everything her mother tried to do to Snow, but when they actually meet, Evie is touched to learn that Snow actually campaigned to have Evie not sent to the Isle of the Lost (Evie was born shortly before Grimhilde and the other villains were sent to the island) and had every intention of raising Evie herself. Later in the series, Snow and Ben draw up the necessary paperwork to make Evie Snow's legitimate heir, with the result that Evie truly becomes a princess of Snow's kingdom.
* Descendants for having unflattering portrayals of both heroes and villains alike.
* Descendants from a beached Chinese submarine crew can be found around what is left of San Francisco.

* Descendants from most people, the integration plot succeeds. Ben even falls in love with Mal, who is the daughter of Auradon's most hated enemy Maleficent. The sequel shows that Ben will invite more Villains children to Auradon.
* Descendants. However, she's only heard shouting at Uma from off-screen in one scene, and never seen beyond a single tentacle.
* Descendants is rated TV-PG on ABC while on Disney Channel, Disney XD and Freeform of all places, aired it with a TV-G rating.
* Descendants: Maleficent threatens Mal if she does not accept the mission to infiltrate Auradon and bring her the Fairy Godmother's wand, she will ground her for the rest of her life.
* Descendants: Mal has purple hair and wears mostly purple, and she's the most powerful of the main characters by virtue of being the only one who actually uses magic on a regular basis.
* Descendants of Darkness at first subverts this with a hand in which the main character's body is his stake - which the main character loses. Then plays it straight when the main character's partner shows up just in time to win him back in the next hand. With a Royal Flush.
* Descendants of Darkness, Dr. Muraki Kazutaka is almost always seen in a white trench coat, while Tsuzuki Asato sports the black variety.
* Descendants of Darkness during an especially angsty moment in the Kyoto arc when he starts questioning his own humanity.
* Descendants of Darkness effects as they stare into each other's eyes.
* Descendants of Darkness fic that ships Tsuzuki/Hisoka. Their physical ages (being Shinigami, their bodies don't age) are 26 and 17 respectively... but if you counted their lives as Shinigami along with their human lives, Hisoka would be in his late teens, while Tsuzuki would be nearly 100.
* Descendants of Darkness. Hisoka deigns to save him by winning him back from Muraki.
* Descendants of Darkness. His skill and knowledge as a medical doctor assist him in his various evil endeavors.
* Descendants of Darkness in this pose, featuring red or black ribbons or chains. Not surprising given Muraki's tastes...
* Descendants of Darkness is rather infamous across the Bureau for his cake addiction.
* Descendants of Darkness, the bureaucratic headquarters of the afterlife are surrounded by sakura in eternal bloom, representing how time has stopped for the dead and they remain forever as they were in life. Hisoka was also killed (and raped) by Muraki under a cherry tree in full bloom, and when they meet again in the manga, Muraki reminds him of their meeting "beneath the cherry trees where corpses sleep."
* Descendants of Darkness, the retina of a famous violinist is marked with the seal of a devil who will claim his soul when he dies. The retina is transplanted to another person, who also becomes bound by the contract.
* Descendants of Darkness to have dinner with him if he wants to see his partner again.
* Descendants of Darkness, Tsuzuki does this after his new partner Hisoka introduces himself very curtly.
* Descendants of Darkness with him when he read his grandfather's (who was Tsuzuki's doctor) records of Tsuzuki's symptoms and mental health.
* Descendants. Of special note is when he spent time with Mal, which revolved around the idea that Mal is a lost being who just needs good influences in her life, as opposed to the evil spawn of villains she and her friends are painted as. Of course, everyone heavily doubts his move to give the villain kids a chance, but Ben doesn't let that stop him.
* Descendants of the Sun (South Korea, 2016) - the Vietnamese (2019) and Philippine (2020) remakes of the same name.
* Descendants roles while the Isle of the Lost, the land of villains, has complete gender equality. Jay notes in the sequel that the one thing better on the Isle is that girls aren't barred from doing anything.

* Descendants that she didn't realize that he was only using her to do his homework for him.
* Descendants, the offspring of classic Disney characters engage in a field sport called Tourney, which is played with lacrosse sticks and nets, kite shields, and air-cannons that fire projectiles through a designated "kill zone".
* Descendants" when Ben, Mal, and Evie are in a relationship; when the time comes for the trio's wedding, Belle gives Evie her distinctive gold dress so that her future daughters-in-law can use it in their wedding dress.
* Descendants. When the others find him and rescue him, he speaks this trope word for word.
* Descendants, which has Cruella and her Son (with Tie In Books also featuring Pongo & Perdita).
* Descendants, who passed away of an undiagnosed epileptic seizure a month before the film was released.
* Descendants: Wicked World episode "Pair of Sneakers", Mal stands on Freddie Facilier's shoulders so that she can search a mobile for a jewel that belonged to her mother. They fall before she can finish searching, but the jewel turns out to have been hidden somewhere else.
* descendants with them. These are called mendrites. They look almost like humans, but they have clear fish characteristics.
* descendant when Kyoshi hears a conversation about a cabbage merchant's harvest in passing.
* Descend" credit a song known as "Penumbra Phantasm". This song has never been released and may have been abandoned.
* Descended Creator: A character in the work is played by the creator.
* descended from a line of mixed heritage and not ready to go. Arwen left her daughters and son behind to go to Lothlórien and spent her remaining time alone.
* Descender of robots took place and any surviving robots are treated like walking bombs.
* Descender: Telsa has been growing more and more attached to Tim as the series progresses, but refuses to acknowledge this and holds her ground when people call her out on it. When she reunites with Tim on Mata, she admits that she missed him while hugging him.
* Descender, who are fanatical in their desire to wipe out all robots.
* Descending Ceiling room. Despite having a shotgun, she can't use it to blow the lock off the door, and ends up being rescued by another S.T.A.R.S member who simply kicks the door open.
* Descending Ceiling that threaten to squash/crush characters trapped in them, but have different parts of the room move to achieve this.
* Descending Ceiling trap. This is the only time in the entire game that any character is able to open a locked door without a key or unlocking it from the inside.
* descending deeper and deeper into the bowels of the Moon, until they can sense his presence right in front of them
* Descension: Like-wise to Ascension, follows a character fall from power.
* Descent 3 The only thing even remotely human-looking about it is the fact that it has two arms.
* Descent 3 to progress in certain levels. See where we're going with this?
* Descent 3 unless they are blown off with a "level 4 or higher laser" (the final game doesn't have levels of lasers like the first two, instead just having a "laser" and a more powerful "super laser".)
* Descent and III gave players the Guidebot, a robotic tour guide with an assortment of cute sounds and the ability to name him (or her?) for that extra love.
* Descent", Data casually mentions that he's tried to "induce sexual desire by subjecting myself to erotic imagery" during an attempt explore his emotions, but to no effect.
* Descent even when the ships warp drive malfunctions and deposits the character in

the middle of nowhere with the ship broken.
* Descent, every level ends with you outrunning the blast from the exploding reactor at the heart of the mine, regardless of how much time there is actually left until said explosion. This brings up an interesting question or two when doing multiplayer, where each player will see themselves outrun the blast, even if someone else still has time remaining.
* Descent features an "emergency stasis" system in the intro video which appears to freeze the pilot.
* Descent follows this closely with its Cyclone missiles. Shortly after being launched, a Cyclone separates into five smaller missiles, which lazily swoop and spiral out toward the target. You can easily get several of these things in the air at once, leading to a rain of warheads down range.
* Descent: Freespace fighter which has been made mostly obsolete by more specialized craft at this point of the game.
* Descent: Freespace rebels called the Neo Terran Front) Considering that one of the principal themes of the series is that Terrans and Vasudans aren't so different, this is more of a subversion than anything else.
* Descent: Freespace series, apart from the fact they all use engines, lasers and subspace drives, it's hard to tell that Terran, Vasudan and Shivan ships are even from the same universe. The factions' laser cannons all have distinct colors. The MediaVPs take this further with the shields being different colors.
* Descent: FreeSpace, shouts down the radio, warning to get out of the nebula. He's destroyed shortly thereafter, and the threat to which he refers is made plain some sorties later.
* Descent: Freespace, the Shivans also have technology to destroy the surface of planets, in the form of their superdestroyer the Lucifer.
* Descent: Freespace, this is what allows the Terrans and Vasudans to survive against the Shivans: reverse-engineering their shield technology, developing weapons that can penetrate it, and learning how to track their ships into subspace.
* Descent: Freespace, though the messages break up and distort like a bad telephone connection. It presumably uses subspace somehow, since the rest of the galaxy is unable to talk to Earth once their subspace gates are destroyed.
* Descent games end like this. In the first one, after clearing out the hostile robots from the solar system, PTMC refuses to let you return to base as they fear your ship might be infected with the virus, and they force you to do more work for them. In the end of the second, your warp drive malfunctions when trying to jump home, leaving your ship disabled and stranded in an unknown star system. It later turns out that Dravis intentionally sabotaged your warp core.
* Descent have a variety of opening animations, from just two panels sliding vertically apart, up to to six-part dilating doors, and several in between.
* Descent II has a robot called Pig. However to view it as a pig, a lot of fantasy is required.
* Descent indicates that a few of the "mines" double as weapons caches for the military, which would explain where the robots got it.
* Descent in many of its tunes, as well as tribal and New Age instruments.
* Descent into Addiction: A character gets involved with drugs or some other substance or experience and descends into addiction.
* Descent into Addiction: A character's journey from normal to an addicted mess.
* Descent into Darkness and its sequels, rumor has it that the current head of Robotnik Enterprises is Dr. Eggman, however, there's no legal proof tying the two together.
* Descent into Darkness Song: A song that starts out upbeat, but gets darker.
* Descent into Darkness Song: Song starts off optimistic, becomes gloomy and depressing near the end.
* Descent into Darkness to defend his hometown from an orcish attack, and then being exiled for practicing necromancy. However, if you won the battle without raising any, he instead leaves the town on his own.
* Descent Into The Depths Of The Earth has a climactic battle sequence in which the sidekick Polk the Teamster is brutally killed. Following the trial scene (it's a

rather involved story) he gets brought back...by a Faerie priest, who doesn't have access to Raise Dead, having to use Reincarnate (this is an AD&D Novel, firmly rooted in 2nd Edition although 3rd was already long out). He comes back as a badger. Which has the ability to function normally after drinking approximately his own body weight in alcohol, which the severely alcoholic Polk thoroughly enjoys.
* Descent introduces speed tunnels to the series, which catapult the player from one end to the other at high speed. And they are hella fun to ride! Which is why one of the secret levels is made of nothing but speed tunnels that stretch for miles. You will spend more time screwing around in this one level than you will the entire campaign.
* Descent is based around disorienting full-3D flight. Therefore, all multiplayer matches take place on the completely flat "Minerva" and "Ultra-Earthshaker".
* Descent is covered by a force field in the front, and thus can only be hit from the rear. Worse, unless you happen to be cloaked, he will always turn to face you. You're meant to detonate a multi-warhead missile on a wall behind him, causing the secondary warheads to hit his weak spot. Didn't stockpile enough Earthshaker missiles ahead of time? You're screwed.
* Descent is credited with a major, decisive role in putting down the berserk mining robots, which if left unchecked could have become a major problem for humanity. He only did it because he was paid an exorbitant amount of money to do so, and tries repeatedly to quit the job partway through because he feels he's fulfilled his contract already.
* Descent). It would be easier to count the few human properties of the Descent robots than telling what is nonhuman about them.
* Descent: Journeys in the Dark. Her heroic feat allows her to move twice in a turn and still attack, and with the obvious choice of the bow-using Wildlander class, she gets access to other abilities related to movement, avoidance and fast reactions.
* "Descent" leaves Dr. Crusher in command of a skeleton crew while everyone senior to her has off-ship duties. Unlike Troi, however, Crusher has taken and passed the Bridge Officers' Test, and actually enjoys command. (In an
* Descent, making them harder to dodge. They also have a high rate of fire, meaning they drain your energy faster than the lasers, too.
* Descent Maximum with all-new, albeit half-heartedly designed, levels.
* Descent of the first boss armed with a Fusion Cannon. In the second game, the Spawn is a green version of the Red Hornet, and the Tiger or Red Fatty Jr. uses the same model as the first boss, although it is smaller and has completely different weapons.
* Descent.) Once you get the afterburner powerup, you can travel at the same speed as the laser beams.
* "Descent: Part I" opens with Data playing poker with the holographic recreations of
* Descent's eighth level has a huge shortcut that allows you to go straight to the red key and the boss, bypassing about half the level. Level 2 also has a shortcut to the red key, which also allows you to go through the rest of the level backwards.
* Descent series are controlled by a vague and highly contagious computer virus of some sort.
* Descent series behave similarly. While most of the other robots shoot at you, these enemies ram into your ship and inflict damage with their reinforced claws.
* Descent's fifth mission, the Collective Earth Defense, believing the Material Defender and the Red Acropolis Research Team to be terrorists, attack their base on Mars, forcing them to evacuate.
* Descent starts the game telling you that you have been kept on retainer for 'up to 72 hours'. In that time you manage to travel to several different planets (in several different systems) and destroy lots of robots.
* Descent. The virus is speculated to be alien in origin, though the aliens themselves never really make an appearance.
* Descent this by saying the ruin was built by some other (now gone) race, that

only raises the obvious question of who this race was and what happened to them? The game never brings this up once, not even a "no one knows who originally built the ruins" type line.
* Descent. Though the third game's plot involves MD working with a group out for revenge against the PTMC, during his final confrontation with Dravis, he seems more concerned with getting his payment than actually stopping the computer virus that's caused all the problems in the first place.
* Descent trilogy has a continuous arc, each sequel directly continuing from the previous game.
* Descent weapons disappear after a certain distance, eg it's impossible to hit the second game's first boss from across the arena.
* Descent which drains your shield energy if you charge it too long (and it does less damage if you do so).
* Descent, while at the same time drastically increasing their AI. It's much more powerful in the novel adaptations, in which the virus can take over just about any machine and give it sentience, and possesses AI of its own, allowing it to intelligently react to and avoid anti-virus measures.
* Descent, your mercenary pilot has the job of flying from planet to planet, clearing out the mines on those planets of berserker robots. Only when you have finished clearing out the last 'mine' on the last 'planet' does the player find out that that was no planet, it's a space station, with a drive and everything.

His major weakness is
* described as being a levelheaded leader, but when he started speaking in the sequel he came off as more of a headstrong leader.
* Described as equal parts scarecrow and zombie gunslinger, the Gunwitch is a silent undead golem with unerring marksmanship from
* described by a Force-sensitive opponent (who is also a phenomenal pilot) as being incredibly complex, with him constantly thinking of ways to box in the enemy, anticipating his moves, and potential paths out of the line of fire and back to a position behind the enemy. Wedge once says, "You see a target coming in, you see him launch missiles, choose one vector for him and fire in that direction. One time in ten you'll choose right and you'll vape him. * Describe Topic Here (a quick self reference for a page here, that doesn't get in the way of the main description)
* Describe Topic Here: Just do it. We're too lazy to describe it ourselves.

* "Describe Topic Here: Non-existing wiki articles used to display the text "Describe <title> here," which led to a lot of in-jokes and memes. The wiki software no longer does this, making the meme anachronistic and increasingly stale.
* Describing heself in a humorous self-deprecation combined with genuine self-loathing: "I have a horrible feeling that I'm a greedy, perverted, selfish, apathetic, cynical, depraved, morally bankrupt woman who can't even call herself a feminist." * Description Porn: The use of a detailed description of anything... which can include sex, but usually it's about things that are clean.
* Descriptions also commonly mentioned the berserkers gnawing the rims of their own shields (as shown by
* Descriptions of the biological principles behind Tyranid biomorphs are uncomfortably sexual. Especially the
* Descriptions of the Chamber in the books imply its entrance passage is connected to the plumbing - the passage is said to branch off in several places, and the basilisk used the pipes to traverse the castle and hunt people. So either the designers of the plumbing saw this passage, shrugged, and built their pipes in and around it without bothering to investigate further, or Gaunt managed to conceal the passage
* Descriptions of the Fighter class in 3.5 consistently acknowledge them as a leader class. The archetypes described often include things like kings or generals, fighters seem to be leading whenever an adventuring party is shown, and many NPCs designed to represent military leaders are fighters. This is in spite of the fact that the fighter is, though competent enough in the field of murdering things, one of the
* Descriptions of the internal practice in CCP indicate that the game was essentially victim to EVE Online's expansion cycle; personnel would be 'temporarily reassigned' to the latest EVE expansion, and replaced with new people later who had no idea where the project stood, thus requiring the development team to start from scratch. Rumor is that they got the game to an alpha build on three separate occasions, each one an entirely different engine. When CCP sold White Wolf and its properties off to Paradox studios, they supposedly got all the code from these alpha builds... but MMOs aren't Paradox's forte, and it's unlikely they'll try to make it work, when they could simply develop games that fit the franchise and their expertise first.
* Descriptively-Named Species: An alien whose name is based on their looks or behaviour.
* Descriptively-Named Species: A species that has a name based on their appearance/behavior.
* descriptive names, such as Bird Who Rides The Wind and Brook Where Small Fish Swim. (They just go by the first word of their name for everyday use.) The leader of the Tribe gives up their name and becomes "Teller of the Pointed Stones" (Stoneteller for short).
* Descriptiveville: A town with a name that sums up what the town is like.
* "Desdemona Hughes, Diva Detective" features former actress Desdemona Hughes adopting various disguises to solve murders. The disguises are apparently legitimately good and, unlike Jib Janeen, Desdemona alters her voice to suit her impersonations. She also makes a very conspicuous show of leaving right before

assuming a new disguise and the disguise is often of someone or something completely random and unrelated to the current situation. Nobody is ever suspicious for long and are always surprised at the actual reveal.
* Desecrating the Dead: For whatever reason, continuing to damage someone's body even after they've died.
* Desecrating the Dead: Mutilating a person's dead body is a sure line-crosser.
* Desecrating the Dead: Someone's body is desecrated after their death.
* Desecrating the Dead: To show how much I hate you, I like to do horrible things to your dead carcass!
* Desenchantée" shows Mylène in a concentration camp, first acquiescing but then leading a revolt against the injustice committed there.
* "Desenchantee" was a #1 hit for Mylene Farmer in her native France in 1991, but outside France, the better-known version has been the 2002 Eurotrance cover by Belgian diva Kate Ryan.
* Desert-5, however, remains the most powerful gun. In all difficulties, the revolver also has highly limited ammo compared to other handguns.
* desert and even a monstrous equivalent of a K9 corp specializing in tracking.
* Desert and jungle temples are common, and clearable early in the game. They contain some treasure and useful building materials behind some simple traps.
* Desert Bandits (most other towns only have one or two stores), and there's a nearby oasis with even more stores. That's not to say that they've completely abandoned their past as warriors though since they're one of only two races in the game with a standing military.
* Desert Bandits: Robbers who attack travelers in remote desert regions.
* Desert Bluffs finally takes over all of Night Vale. make sure to check in with the Picnic Overseers — y'know, the friendly chaps with the gas masks and night sticks — and take care not to touch the electrified "volleyball nets" that keep you in there. And everyone's going to stay at the picnic now, "until the work is complete."
* Desert Bus for Hope, but the actual attractions are the sketch comedy, nerd-celebrity guests, and prize giveaways.
* Desert Bus for Hope. "This episode of Qwerpline is brought to you by Jack Flank's Plank Flank Blank Shank."
* Desert Bus of the game, and to the Nerd's delight, it addresses and fixes many of his criticisms with the original. The knowledge that some people were actually listening to him after all motivates him to keep the show going.
* Desert Combat to Operation Desert Storm, updating the maps and weapons accordingly.
* Desert Demolition has the Road Runner run up to the logo, then jump as Wile E. runs after him, scattering the letters in the process.
* Desert Demolition, the "Buttes and Ladders" level takes place in a western town.
* Desert Eagle had three iterations: The Mark I, the Mark VII, and the Mark XIX.
* Deserted Distractions, Ryou finds himself able to pick locks and untie knots without even thinking about it thanks to Yami Bakura's muscle memory.
* Deserted Distractions, Yami Bakura and Tea begin to have this relationship, to both parties' disgust and arousal.
* Deserted Distractions, Yami Bakura can erase memories, and he plans to do so to Tea so Yami Yugi won't come after him.
* Deserted Palace knew at this point that Jarre was both Jamie Jefferson and the Pop Corn Orchestra because "Black Bird" was a reworked "Bridge Of Promises" from that album.
* Deserter: A Hidden History of the Second World War. Glass covers the motivations to desert, how deserters strove to stay undetected and survive, and what happened to them when they were captured. Among other uncomfortable revelations - the Eddie Slovik case is covered in detail - there are uncomfortable truths. Britain's principal military prison for deserters in North Africa and from Italy, had it been run by the other side, would have been called a concentration camp, and those running it (had they been German) would have been tried for war crimes. Instead, senior officers and politicians covered up the scandal of men being routinely

worked or starved to death and kept its existence a state secret. American prison stockades for deserters were hardly any better and in some respects even more brutal.
* deserter from the army who is hiding on earth. She's really nice, though.
* Deserters in peacetime in the UK's RAF were ignored. When they turned up again (they usually gave themselves up to the police), they were put in military prison for 'not turning up for work' (usually only a few days extra duties), then discharged from the RAF with loss of back pay and reported to the civilian police as deserters. UK police have wide discretionary powers, depending on how the deserter has behaved while 'out'. All of this was explained exhaustively to new recruits, some of whom desert immediately. One guesses it rids the armed forces of the really unwilling ones.
* Desert Gulch Chronicles) with the rest of the Blues and Reds, and plotted to destroy the UNSC.
* Desert Hearts is about the lesbian relationship between a repressed, middle-aged English professor and a free-spirited young casino employee-cum-sculptress.
* Desert Hearts (lesbian main characters; subject matter includes queer female romance)
* Desert Heat, Eddie Lomax walks into a door after being stunned by the diner girl's beauty, turns back to the rest of the diner, and laughs as though he was making a joke. But certainly appears embarrassed as he turns away and puts his hat back on.
* Desert Heat features bodies being dumped into a canyon from the bed of a truck multiple times.
* Desert Heat in a diner complete with name mix-ups and being unable to take their eyes off each other.
* Desert Island Discs has an archive covering the full 70+ years of the show, with a total of 3018 episodes as of February 2015. At 45 minutes per episode, that's a total of 2263 hours, 30 minutes. Alternatively, that can be thought of as 94 days, 7 hours, 30 minutes.
* Desert Island Discs has been airing on BBC Radio since 29 January 1942 (apart from a hiatus from January 1946 to January 1951). It still uses the original theme tune, Eric Coates' "By the Sleepy Lagoon" (with overdubbed seagull noises), and has only had four regular presenters (Roy Plomley (1942-85), Michael Parkinson (1985-88), Sue Lawley (1988-2006), Kirsty Young (since 2006)).
* Desert Island Discs, he immodestly chose to take his own songs to the island in nearly every case.
* Desert Lands hex 3731. At the top of a high mountain is a small shallow pool full of contaminated green water. Anyone who looks into the pool under moonlight must make a saving throw or age 10 years.
* Desert Moon. On Days 2-4, you encounter a new enemy, and you so happen to get a unit that counters said enemy:
* Desert Nights: Diana participates in armed robbery; she is part of a gang pretending to be a safari expedition which instead robs a diamond mine. She also participates in kidnapping as she and the gang kidnap mine superintendent Steve and force him to guide them across the desert. But she falls in love with Steve on the way, so instead of spending a good long time in a South African prison, she's released into Steve's custody at the end.
* Desert Nights: Steve, Diana, and their three fellow jewel thieves rob a diamond mine and escape into the desert. Steve and Diana's three accomplices decide to try their luck heading back rather than crossing the Kalahari, and ask for their share of the diamonds. After they leave, Steve reveals to Diana that he gave them fake glass diamonds.
* Desert Planets: Astalia (issue 9), Delta (issue 63), Glan (issue 103), Silicon IV (issue 50)
* Desert Planets water. Any place that is sufficiently arid becomes a desert, but some ocean (say, 20% of the planet's surface), or underground water would be needed to support the plant life needed to create a breathable atmosphere.
* Desert Punk, but there's no indication of what if anything is left of the rest of

the world.
* Desert Punk features the massive tank Fire Dragon Kong. It was the most dangerous machine in the desert, but Desert Punk managed to beat it by shooting a rock structure down on it, then the Machine Gun Brothers shot it until they hit the gas tank and it exploded. Until then, it was pretty freaking deadly.
* Desert Punk has a bizarre live-action opening wherein some guy cosplaying as the title character cavorts about a sandy landscape with apparent glee.
* Desert Punk has quite a few. If a character is unnamed or over 40, chances are they're gonks. The titular character is pretty normal looking but becomes gonked out if he's doing something disturbing.
* Desert Punk. He's fond of exiting by laughing maniacally and throwing down a smoke bomb. But when the smoke clears, you actually see him running away, laughing all the while.
* Desert Punk: Kanta is attacked by an enemy sniper and is eager to put to use the sniper rifle he'd spent a large amount of his previous missions earnings on. Said rifle is rendered inoperable by enemy fire the instant he takes aim, forcing him make due with his shotgun for the rest of the battle.
* Desert Punk, Kanta's preteen sidekick Kosuna complains almost literally that her small pistol is not cool enough to match her self-persona. Kanta then takes her to an arms dealer, who first forces her to go dig holes for several hours before allowing her to try out an assault rifle. While she exhibits accuracy that astonishes Kanta and the arms dealer, she brings the gun back admitting that firing it is physically punishing for a girl her size and that she'd be completely ineffective in combat with it.
* Desert Punk, Punk is being fired upon by some bandits, and first comments that he crapped himself, and shortly afterward makes a comment about not needing a colonic.
* Desert Punk: Sci-fi stories with a desert setting and appropriate technology.
* Desert Punk suggestion, which she supported by providing a picture of what she (falsely) claims is her mom.
* Desertrian of a young woman wracked with guilt over her decision of leaving the family farm to get married at the city.
* Desert Skull: An animal's skull found in the desert, usually a bovine.
* Desert Skull: The stock "animal skull in the desert", typically a bovine.
* Desert Storm they accompanied. They took greater losses though, but to be fair, most of the losses (17 of 20) were friendly-fire incidents.
* Desert Strike, but no enemies, weapons or violence was involved and missions consisted of dropping paratroopers and supplies.
* Desert Strike was in fact their co pilot, who goes rogue, is apparently killed, then turns up later. The third and fifth stages, at the very least, indicate he was behind the events that took place to scare Mother Russia into playing along with the shadow organization.
* Desert Strike, who are stranded behind the enemy lines and waiting for the player to rescue them, aren't exactly immune to friendly bullets.
* Desert Strike will use this method in order to perform a certain task on the ground (e.g. entering a building and freeing an important prisoner).
* Desert Trek: The Adventure of the Lost Totem that they built right over Goat Village.
* desert variant of the Zombie that only spawns in deserts, doesn't burn in sunlight, and will inflict a hunger status on hit.
* Desert War Among the items found were luxuries brought along by Italian officers including fine food and drink. When Benghazi was taken, Moorehead bileted on the Italian Commander's villa, drank from his wine cellar and was quite pleased about it.
* deservedly difficult to get hold of, so... um. Where to find a long enough sheet of parchment to make a solid list? Yeah, sure, suspects were named, but it's clear that few in Court are truly convinced that they are actually the ones who did it, even though it's currently politically expedient to officially agree they must have.
* Deserving, per se, the group does recognize the character has some redeeming

qualities despite their faults, or else they've done something to earn a place in the group.
* Des garçons et des filles tour, he brought the guitar back, but this time heavily distorted.
* Desians, and they establish themselves as a bunch of murdering racists, but as they point out, they had a non aggression treaty with the village that Lloyd broke by going to their ranch and killing a couple of their men.
* Desi Arnaz (the host for that episode) doing a dramatic reading of "Jabberwocky."
* Design an Alien Mind: A guide for crafting the inner workings of an alien's mind.
* Designated Bullet: I'm crafting a specific special bullet just for you. And it's gonna be the worse feeling you will ever have in your life!
* Designated Driver, resulting in Reba taking shots, followed by her asking the bartender to "leave the bottle". In a twist of comedic irony, Brock leaves the bar without needing a ride, whereas Reba calls for one.
* Designated Evil: The author tells the audience something was a big wrong but doesn't support it in any way. It may not appear to the audience that it's wrong at all.
* Designated Evil: What you did is evil because the plot demands that it be.
* designated F-21s) as a training substitute for MiG-23s - though visually quite dissimilar, they had similar flight characteristics.
* Designated Girl Fight fight. Not necessarily at the climax. Brandishing of big-ass knives may be involved.
* designated good guys, guys like Jack "The Assassin" Tatum, Ken "The Snake" Stabler, and Skip "Dr. Death" Thomas. Incidentally, both the Steelers and Raiders only achieved full-blown Badass Crew status because they first had to take that mantle from the waning Dolphins, who not only had that undefeated season, but repeated the next year with a team some experts believe might have actually been better than the '72 Dolphins.
* Designated Hero a channel that parodies bad writing, including Designated Heroes.
* Designated Hero and mop the floor with his assailants. Admittedly, both of the above are anti-heroes instead of villains, but the bad guys do get their own Implacable Men, including aforementioned army of vampire mooks.
* Designated Hero: Audiences think the characters are deserved to be condemned, even if the author makes their actions justified or reasonable.
* Designated Hero package, and stuck on the "whiter" side of the local morality chain at least from the point of view of their side.
* Designated Hero sacrificed six of his godlike brethren, and, perhaps most tellingly, was only able to make one real friend in all that time (the others merely being allies or his own creations). The flavor text of the card "Recover," puts it most tellingly:
* Designated Hero: Someone who acts evil but is meant to be the hero vs. someone who acts good but is meant to be the villain.
* Designated Hero: The audience is told that he's a good guy, but we see them as jerks at best and outright villains at worst.
* Designated Hero: The audience thinks the good guy isn't actually that good.
* Designated Hero: The character is intended to be the good guy, but because of the character's actions, the audience instead interprets the character as being an unlikable jerk at best and an intolerably callous villain at worst.
* Designated Hero: The character is supposed to be seen as a good guy, but because of his actions, the audience instead sees him as an unlikable jerk at best and an outright villain at worst.
* Designated Hero: The narrative says that they're heroic, but their actions doesn't prove it.
* Designated Hero: When we've got nothing but the narrative's word for it that the fellow the book follows is, in fact, the good guy.
* Designated Hero, where the character will do things that would make "villains" or "antagonists" flinch.
* Designated Hero, where writers struggling for ideas may turn to simply having the hero pick on a long-suffering character who doesn't really deserve it as a means to

drum up a conflict that might interest viewers.
* Designated Love Interest: Romantic relationship accidentally comes off as platonic vs. platonic relationship accidentally comes off as romantic.
* designated love interest. Subverted in that Truman actually falls for a random girl sitting nearby who catches his eye forcing the producers to step in and forcibly remove her from the set.
* Designated Love Interest: Two characters are said to be in love, but their interactions don't support that.
* Designated Love Interest: When we've got nothing but the narrative's word for it that the fellow the book follows is, in fact, romantically attached to the heroine.
* Designated Monkey: A character disliked by the creator is constantly subjected to misfortunes that the audience finds undeserving and too severe.
* Designated Monkey: An unlucky character who the audience feels sorry for, even though that wasn't the author's intent.
* Designated Monkey: The character supposedly deserves the misfortunes they endure, but the audience considers the abuse inflicted on the character to be too unreasonable and excessive.
* Designated Monkey: The creator believes that they are inflicting karma upon a character who deserves it, but in the audience's eyes the creator is just inflicting undeserved misery and misfortune on the character out of petty dislike.
* Designated Survivor: After infiltrating the property of Patrick Lloyd and sending in evidence against him, Jason Atwood is walking through the forest when he suddenly hears the bushes rattle. Terrified, he turns to look at what it was, being relieved it was just a deer. Moments later, he is shot dead by one of Lloyd's accomplices.
* Designated Survivor as a liberal against war hungry conservatives) being pressured to commit to swift brutal retaliation, even possibly a nuclear strike.
* Designated Survivor, a terrorist attack destroys the Capitol Building during the State of the Union, killing the President, Vice-President, Speaker, President pro Tempore (in fact all bar two members of Congress), and everyone else in the Cabinet bar Secretary of Housing and Urban Development Thomas Kirkman, who is off-site as the "designated survivor". There is a slight problem in that Kirkman was in fact effectively fired as head of HUD the morning before the attack, although had yet to leave the post, leading to some legitimacy issues.
* Designated Survivor is set in Washington, D.C. but filmed in Toronto.
* Designated Survivor: The U.S. Capitol Building is blown up in a terrorist attack during a State of the Union address, which decapitates the whole government so severely that the 11th person in the line of succession (the character of the title) is sworn in as President.
* Designated Survivor. Thus, Hannah is only in handcuffs a few minutes before her boss shows up with a Presidential order to let her go.
* Designated Villain are the bad guys because your goals are an inconvenience to those in authority.
* Designated Villain can go through this, especially if the ‘heroes’ are making the antagonist’s life difficult for very poorly-defined reasons, or even for no real reason at all.
* Designated Villain: The audience is meant to see a certain character as scum, but due to either bad writing or the hero being worse, it can be difficult to register.
* Designated Villain: The audience is told that he's evil, but we don't see them doing anything wrong.
* Designated Villain: The audience thinks the bad guy isn't actually that bad.
* Designated Villain: The character is intended to be the bad guy, but doesn't demonstrate any indication of being in the wrong aside from opposing the hero.
* Designated Villain: The narrative says that they are villainous, but there are factors that contradict this.
* Designated Villain: The plot says they're evil, so they're evil. Even if their actions and motives say otherwise.
* Designated Villain: The work portrays characters as having crossed the line but audiences digress.

* Designated Villain: When a character is evil, without necessarily having done anything particularly bad, because the script needs him to be.
* Designated Villain while his opponent, Henry Tudor, gives a rather lackluster speech at best.
* designed), ADHD, or some other pervasive developmental disorder that causes them to be poorly catered for.
* designed around kill-stealing: if Pyke executes an enemy with his ultimate, full kill gold is rewarded to whatever allied champion last damaged the enemy.
* designed He even finally gets to drop the moon (at least, a piece of it) onto the earth.
* "Designed in [Insert First World Country Here]!" that matters to most people, but companies are hoping customers will think the product was built in the same place it was designed and therefore be of better quality.
* designed parts; during the actual field exams, where he actually gets to duel, he excels greatly. This does appear to be partly by choice, as he's turned down promotion at least once on screen. Perhaps the writers just think he'd look horrible in Yellow or Blue...
* designed so a mechanic could access the engines mid-flight through a cramped tunnel buried in the wing. Even earlier airplanes (First World War vintage) considered it a matter of routine for the mechanic to do a wing-walk to maintain the notably finicky engines while the plane was underway. These days engines are so reliable that a breakdown is considered truly exceptional rather than uncommon.
* designed this way, in that someone who's both mentally-rational and moderately flexible can often work their way out of them after a few tries.
* designed to be tasteless, so that alternative foods offered as a reward for completing experimental tasks will be more appealing.
* designed to land anywhere with a solid surface. Alternatively, the Starship could be used to build a true spaceship practically; with a payload capacity of 150 tonnes to Low Earth Orbit, reusability, and a turnaround of less than a day, it could bring the required materials up quickly, cheaply, and in large pieces.
* designed to resemble their voice actors, since the rest of his clan were white.
* designed to solve an issue that simply never occurred, with the sole intent of further proving what such a class of engine could do.
* Designer and writer Ted Peterson also played a large role in creating the series, but like LeFay, he left Bethesda before the release of
* Designer Babies: A human is genetically modified in utero to make them "better" somehow.
* Designer Babies, is relatively common in spite of the fact that it is illegal. However, this DNA alteration can result in Genetic Rejection Syndrome.
* designer-baby who was "born" as a teenager or young adult, with his memories and vocabulary already implanted. Also complicating the matter, Krogan are one of the few species who can match the Asari in terms of lifespan (both species can reach 1,000 years barring unnatural causes).
* Designer Calves, Designer Chicks, Designer Pullets, Designer Lambs: this trope is ubiquitous in the livestock industry.
* designer lab rats, who lack sex organs so they're more docile, are a solution in search of a problem, since lab rats are already docile, and removing sex organs removes both avenues of study (effects on reproduction, etc) and ability to compare or extrapolate from research on non-customized rats.
* Designers/writers Tetsuya Takahashi and Kaori Tanaka (better known as Soraya Saga) got married while working at
* Design for Great-Day created as a natural extension of intelligent beings learning to live and think in harmony. Said thought processes apparently travel instantaneously, ignoring the speed of light. Of course, they've learned to circumvent this with starships as well; the Combine's ships can traverse a galaxy in a matter of hours, and intragalactic jaunts are considered to be fairly trivial, if not entirely routine.
* Design for Great-Day features humanity (or to be more specific, the Solarian Combine), as a super-advanced multi-species who are on the brink of transcending

matter itself and becoming Sufficiently Advanced Aliens.
* Design for Living and Fredric March, are a starving painter and playwright respectively. March proudly declares "I write unproduced plays," and Cooper freely admits his annual salary is zero and that he survives "on miracles."
* Design for Living "didn't get to first base" with Gilda, but has been hanging around her for five years as her "friend", carping with disapproval about any other man she happens to date. She finally caves and marries him after leaving Tom and George.
* Design for Living revolves around the three-way relationship between two (male) best friends who are both in love with the same woman. They try this, but jealousy breaks them up and the woman marries someone else… until she decides that she still loves her boys, and as they want her back, the three of them decide to give it another try.
* Design for Living; she's a commercial artist, he's a painter, the other he is a playwright
* designing what eventually became the official design for the Administrator.
* Designing Woman, Mike doesn’t remember his wild night when he won $1200: he met Mirella, they wrote his sports article together, and he paid her $700 for it.
* Designing Women against the nearest male even if he's not the attacker because this trope will come into play.
* Designing Women. As he's a contractor she dresses him up in a tank top and tiny jean shorts. Suzanne wins him when she accidentally bids $5,000.
* Designing Women had an old woman with a houseful of junk who left her fortune to her cat. Subverted in that the junk turned out to all be valuable collectibles, and she'd made her money in the first place from her cat appearing in television commercials.
* Designing Women has Julia Sugarbaker leave her purse, which has a curvy black-and-white pattern, on its side on a table in a museum of modern art, whereupon the art crowd descends to ooh and ahh over it. The curator then insists the purse IS Art and therefore museum property, to the frustration of Julia, who just wants it back.
* Designing Women has Mary Jo allowing her daughter to compete in a kiddie beauty pageant. While Mary Jo resists the urge to become a stage mother she meets one backstage who has three children in three different pageants on the same night. Suzanne, a former pageant queen, exhibits some stage mother tendencies as Mary Jo's daughter's pageant coach.
* Designing Women has Mary Jo telling an out-of-town friend that the mansion the firm is decorating is hers. It falls apart rather spectacularly.
* Designing Women in which Suzanne hires a mall Santa to sneak into Mary Jo's house at night so her son could "catch" Santa in the act. As was perhaps inevitable, he robs the place instead.
* Designing Women Julia and Suzanne's nieces bicker just the way they do but they've been doing it for so long they don't notice it until Mary Jo and Charlene point it out.
* Designing Women Julia (off-camera) humiliates herself at a charity fashion show by walking the runway with the back of her dress tucked into her panty hose.
* Designing Women Julia Sugarbaker's extended, sequestered jury duty causes her to miss dining with Jimmy Carter.
* Designing Women one of the women set her purse down on a pedestal at an art gallery before she went to the bathroom. By the time she returned, the curator sold her purse to someone for $5000.
* Designing Women, sang frequently on that show as part of a bargain with the head writer: Whenever the left-leaning Julia spouted a rant that ran counter to Dixie's (conservative) politics, Dixie got to sing in the next episode.
* Designing Women: Suzanne and Charlene would occasionally make remarkably insightful comments or unexpectedly understand some abstruse comment.
* Designing Women, the subject of "plumber's crack" is brought up, and Anthony's girlfriend Vanessa explains that it's because tool belts with heavy tools on them pull down a lot more.

* Designing Women to remind her of their CMP. She seriously considers it.
* Designing Women, when Suzanne almost used milk Charlene had expressed for her infant daughter in her coffee.
* Design Preservation Villain: This villain has visual similarities to a previous antagonist due to their design being favored.
* designs into it.(since he's in the link you could also count Mr 450)
* Design Student's Orgasm: Animation that is so detailed that the viewer will forget what the story is about again.
* Design Student's Orgasm: A visual image that is artistic and nonsensical.
* Design students' orgasms aren't only limited to Western art, either; there are Islamic styles
* design was an odd take on the "amphibious tank" concept, being practically a mini-submarine with tank threads. Proposed armament consisted of two torpedoes and a machine gun or a flamethrower. Not a practical design by any metric, but imagine the look on the Allied troops' faces when one of these would crawl up from a lake and start spouting flames at them.
* Desilu Studios and Desi Arnaz, whose marriage lasted from 1940 to 1960.

* Desirable by Frank Cottrell-Boyce, self-confessed social reject George is given a bottle of aftershave called 'Desirable', and soon all the girls at school want to be with him. He likes it at first, but quickly gets sick of it.
* Desire (1936), so they have a nice chat about whether there has to be a war and if America will have the sense to stay out of it. Everyone's looking for an opportunity to turn it into a showdown.
* Desirée and the Countess' plot to solve their romantic troubles in
* Desirée fell in love with Ron Delite when he rescued her from a couple of bandits. They're nothing alike, but they truly love each other. When he is accused of grand larceny, she goes to the extent of entering Detective Atmey's office to take his bag (which contains a
* Desire & Decorum, and dialogue changes if Clara is not white. The man she (optionally) enters a marriage of convenience with is also gay, and has to hide his relationship with another man.
* Desire Climax both Hina and Shoei demonstrate some Yandere tendencies towards Mio.
* Desire Climax both Hina and Shoei demonstrate these tendencies towards Mio. Hina even more so, since on many occasions, despite his cute and angelic appearance, he has demonstrated a chilling cruel streak and a manipulative personality; he wants Mio and is apparently willing to use tricks, blackmail, lies, and outright attempted rape to separate her from Shoei. He has even gone so far as to trick a half-blind Shoei into thinking he was Mio so he could attempt to seduce him, later telling Mio that he didn't do that because he loves Shoei, but rather because he would be "willing to do anything if it means I could separate you from that guy". He himself proudly admits that he's crazy when Mio calls him out on his actions, and attempts to seduce her. Thankfully, both he and Shoei mellow out eventually.
* Desire Climax looks enough like his beautiful sister Mio Omori that her boyfriend almost mistook him for her in the dark.
* Desire demons also have this power, though it isn't quite the same. The victim is technically conscious, but mentally checked out into their happy place. One guy attacks your party when the desire demon convinces him that you're there to kill his nonexistent wife and kids.
* desire demons. Interestingly enough, most just want to know what's it like to be human.
* Desiree was obligated to grant wishes, though not always as the wisher
* Desire: The song "Hurricane" criticizes the imprisonment of Rubin "Hurricane" Carter, a boxer falsely accused of murder and tried by an all-white jury. Dylan's song actually raised awareness of this man's false imprisonment and made people do the trial over, which would eventually lead to Carter's release.
* Desire: Tom says that he grows on people. As an example, he cites one girl back

home, who didn't like him at first, but he was persistent, and he grew on her, until..."She sued me."
* Desire Under The Elms, Sophia Loren and Anthony Perkins share a scene in this kind of setting.
* desk jockey in over his head. Ridenhour is using Comanche as a confidential informant to gather information about Mariah Dillard (and overseeing this investigation where he has a big conflict of interest, as he was a high school sweetheart of Mariah's). On top of that, Comanche is not very good at covering his tracks. Such so that they both end up being killed when a suspicious Shades follows Comanche to a meeting and catches them talking.
* Desk Set, nobody bats an eye at Mike being in a relationship with his inferior, but his putting work first over Bunny eventually leads to their breakup. Richard, on the other hand, promises to put Bunny first over his work.
* Desk Sweep of Passion: A character swipes everything off of a desk to make room for love-making.
* Desk Sweep of Rage: Sweeping everything off your desk in a fit of rage.
* Desk Sweep of Rage: When a character is so enraged that they send everything on their desk flying.
* Desktop Defender has the Dart Tower, which can be upgraded to the Advanced Dart Tower. Level 6 Dart Towers have massive range and do a lot of damage; however, level 6 Advanced Dart Towers gain the special ability "SHOCK AND AWE". Need I say more?
* Desktop Dungeons causes spells to be cast from your health instead of mana.
* Desktop Dungeons implements this, in part, to deal with the fact that there's no single linear path for the plot to take. Information about the backstory is often doled out in class challenges and boss monologues.
* desktop picture "Beach Party", Elan (a fair-skinned blond) is noticeably redder than the rest of the cast. He doesn't seem to mind.
* De Smaakpolitie) is all about this trope. In the show, host Rob Geus visits restaurants to check the kitchen. The trope is downplayed a little however by the fact that Rob Geus is not a licenced health inspector, so the restaurant owners can deny him access to the kitchen, and although Rob can give the owner advice on how to improve the conditions in the kitchen, he is not authorized to actually give the restaurant a fine if he finds any violations.
* Des manages to intimidate a drug dealer into backing off when he points out that the dealer will have a hard time explaining to the police how he could afford an expensive sports car and thus cannot report Des for
* Desmatosuchus had also evolved horns growing just above the shoulders.
* Des Moines-based automechanic shop Bill's Whitewall's radio jingle is, "We got tires and shit," (with the shit bleeped) to suggest the business is more interested in auto repairs than catchy advertising.
* Des Moines faked her own death to avoid paying traffic tickets. Her scheme fell apart when she got pulled over for yet another traffic offense.
* Desmond Dekker, one of the first internationally popular reggae artists, had a heavy Jamaican accent which made many of his lyrics difficult to understand to non-Jamaicans. The most commonly cited example is his 1969 single "Israelites"; even the refrain, "Poor me, Israelites" was often misheard as "Ohh, me ears are alight".
* Desmond Dekker only managed a single Top 40 hit in the US, with his classic 1968 single "Israelites". The song is considered to be one of the earliest hits in the then-nascent reggae genre. Dekker had several other hits in the UK.
* Desmond himself gains them in a blink-and-you'll-miss-it scene at the end of Assassin's Creed: Revelations
* Desmond Hume and Benjamin Linus were only going to appear in three episodes each. The audience reacted so well to their characters that they were promoted to main cast from Season 3 onwards.
* Desmond in season 5 beats Jin's; he's prominent in the first half of the season, then only appears in two more episodes...both brief, and both with almost no lines. Irritating, since while the series juggled the
* Desmond LaRouche was cursed into becoming half a flesh golem. Those seeing his

* Des Nouvelles du Bon Dieu (approx. "News from God" in English), a French movie in which a writer commits suicide, leaving a note that explains he thinks God is an author, and we're all His characters. The misfit protagonists, being fans of the dead writer's work, try by any means possible to reach God and ask him some justifications for their plots being the suck. Hilarity and serial kidnapping ensue.
* Des O'Connor show, the Thames jingle was played with different instruments. It would then swoop off into the stars, starting off the credits for the show.
* Desolate Era inconsistently call out the names of their attacks, and without an obvious reason for when they do. In an all-out fight where two people are giving everything they have, one may call out attacks while the second does not. But in another, easy, fight, that second person may yell attack names. Sometimes, in a bit of a double subversion, spectators to a fight, instead of the combatants, will shout the names of attacks being used.
* Desolate Era: Ning engages in a series of magical duels called Dao Debates with more senior students as a form of hazing.
* Desolate Era story based, at least in part, on Daoist principles, has two separate examples of this trope.
* Desolate Era story of Ji Ning, an Earth teenager that is killed and reincarnated on a world of immortal wielding fantastic supernatural abilities. The story follows him as he develops his powers to first protect his family and then to avenge them.
* Desolate Era. The hero travels through them to gain experience, insight, and of course, treasure.
* Desolate Era, the one Sword Immortal currently in the Black-White College, had stated that he will only take as a disciple one that can commune with the sword-intent of Immortal Northwalker, which members of the College had taken to mean that Diancai would never take a disciple.
* Desolation (2017): Abby finds her friend Jen hanging upside-down in the woods after the killer abducts her. She also finds a huge chunk of flesh cut out of her back.
* Desolation (2017) begins with Abby trudging through the woods, holding her son's jacket, and screaming for help before flashing back to hiking through the woods with her son and her friend.
* Desolation (2017) hiker that Sam spotted across the lake from them earlier.
* Desolation (2017): The killer of the movie wears a black hooded coat.
* Desolation (2017): The killer that stalks Abby, Jen, and Sam has a large beard.
* Desolation fighting for no other purpose than the fighting itself. They see peace and negotiation as signs of cowardice, scoff at any masculine arts that don't directly involve killing, and spend most of their time fighting themselves in what would be considered civil war if they hadn't been doing it for so long that it had become routine.

* Desolation Jones is an interesting case. She was a very attractive agent who specialized in "Honey Trap" seduction missions and underwent experimental surgery designed to cause overproduction of sex pheromones. It backfired, and she produces a smell that triggers Arachnid Reaction, making her a type II in terms of looks alone, type IV to the reader and Jones (who's unaffected) and a type XIV to everyone else in-universe.
* Desolation Jones often switches styles, from paintings to sketches, black and white inks, two-tone chiaroscuro, and the standard inks and coloring, though it maintains a similar feel throughout.
* Desolation Jones somehow manages to look badass in a bright orange trenchcoat.
* Desolation Jones, the Colonel's butler is briefly suspected of being the mastermind behind the crime. Jones remarks "wouldn't it be funny if the butler did it." Nobody gets why he's amused.
* Desolation Shot: A slow, somber shot of a place once populated and kept, now barren and dilapidated.
* Desolation Shot - View of abandoned city or other ruined or otherwise trashed area
* Desolation. That said, she has a surprisingly high body count, achieved through surprise attacks and manipulating others into fighting for her.
* Despair Event Horizon: A character loses the will to keep going after becoming very depressed.
* Despair Event Horizon, and in the intervening time she won't leave her eggs, even to feed herself.
* Despair Event Horizon and pretty much gave up until Finch recruits him at the start of the series. The guilt from not being able to save Jessica is a major reason for why Reese joins Finch in his mission to save the Irrelevant people. A flashback reveals that Jessica was actually one of the Irrelevant people Finch was unable to save.
* Despair Event Horizon. Aside from helping you fight, they can transform into horses, cars, bikes, and gigantic fortresses during the "drive" mode.
* Despair Event Horizon-esque vision of Griffith's life after Guts' second impending departure from the Hawks which would heavily imply that the child that Griffith and Casca are raising is Casca's son by Guts, not Griffith's. Needless to say, this vision is not followed by anything happy, especially since it was induced after Griffith witnessed Guts and Casca expressing their feelings for one another.
* Despair Event Horizon of the next song "Little Priest", where he is really upbeat, but completely over the edge of sanity.
* Despair Event Horizon she still managed to come back as bright and compassionate as ever.
* Despair Event Horizon, so he'll permanently bond with it. A timely intervention from the spirit of Uncle Ben saves Spidey from "becoming one with the ooze".
* Despair Event Horizon: Some characters who lose all hope can be more likely to cross the Moral Event Horizon. Driving someone else across the DEH can easily be a crossing of the MEH as well.
* Despair Event Horizon. Their actions afterwards unleash a giant monster upon the city, though Jack ends up stopping it. Despite the fact that he told them many times not to open the Rift (which led to the aforementioned incidents), he forgives his entire team.
* Despair Event Horizon: When the despair is so intense and horrible that it irrevocably crushes someone's very identity.
* Despair Event Horizon, with a shorter sub-arc at the end featuring the Angel Investigations team having to travel to Lorne's home dimension to rescue Cordelia.
* Despair Event Horizon: Your hope has failed and is beyond hope of restoration past this point.
* Despair.inc advertised a T-shirt which mocked the bail-out General Motors received with the text: "In Soviet America, the car drives you... bankrupt."
* Despair Island by finding the Life Idol, having her voted off, and using it on her in order to assure her survival at the expense of him now having no opportunity to live if he gets voted off.

* Despair Island: Canon Ezekiel's cluelessness and poor social skills made him prone to rudeness and jerkassery, especially later on. Here, he's got much stronger social skills, which combined with his religious upbringing, makes him surprisingly compassionate towards everyone.
* Despair Island has Zolkoff, a Serbian mafia thug and Chris's main helper who enjoys brutally killing and taunting his victims.
* Despair's Last Resort gives a nickname to everyone in the resort, including Monokuma.
* Despair's Last Resort has main character Takara Tsukuda, who was accepted to Hope's Peak Academy with the title of Super High School Level Journalist. Her classmates ask her for advice before the first investigation, justifying that since she's the only one of them who has any amount of experience close enough to detective work. This works out in her favor, as being a journalist required her to do research and investigating of her own.
* Despair's Last Resort has one on a famous newscaster that she doesn't want anyone to know about. Hikaru Nagai seems to be the victim of this, as it's mentioned that he has a ton of fangirls.
* Despair's Last Resort has two of these. Chiyo Ueda, a polite and refined girl who can speak to the dead, and Kumiko Akamine, a hyperactive gamer who makes webcomics, have been friends since they were kids. Then there's Shizuka Matsuki, a kind painter who wants to get along with everyone, and Kazumi Katsuya, a punk rock singer with an attitude.
* Despair's Last Resort invokes this trope a lot. All but one of the murderers have shades of this one way or another.
* Despair's Last Resort invoke this trope. The former because he doesn't care what others think, and the latter because of her upbringing. Miyako also tends to do this from time to time, though it's unknown why she does.
* Despair's Last Resort is aware that he's in a fanfiction and comments on how they need to keep the story rated T.
* Despair's Last Resort is one, serving a similar purpose to the second game's Jabberwock Island.
* Despair's Last Resort. Kumiko Akamine is accused of the first murder due to being so close to the victim and claiming that they weren't in their room when she checked. Takara Tsukuda, the protagonist, knows that she didn't do it and spends the investigation gathering the evidence to back her up. Ryouta Hoshino is given this treatment during the second case, due in part to his shifty behavior and a string of unfortunate coincidences that suggests he did it. Takara sees through this ruse though and discovers the real culprit.
* Despair's Last Resort mentions that she's not the talkative type upon her introduction. She's rarely seen talking, even during the trials and when the number of students gets lower.
* Despair's Last Resort, one of the two victims of Chapter 3 wrote the victim's talent in French. Most of the students didn't know French, but one did, and was able to tell the culprit's identity by reading the message.
* Despair's Last Resort's Kumiko Akamine was given this treatment. Her parents have jobs that cause them to work until night, when they are home they never spoke to her, and they don't seem to care what she does. She tries to justify this with the fact that their job keeps them busy, but it's obvious that it's left a mark on the girl.
* Despair's Last Resort, Takara Tsukuda can only react to Monokuma's appearance with this.
* Despair's Last Resort, the chapter showing the end of the fourth trial warns readers that "this execution is pretty brutal compared to the past ones," and advises sensitive readers to skip the third paragraph.
* Despair's Last Resort, the fourth killer admits that he committed murder out of desperation to escape and disdain for the others. When one of the others calls him out on this, he says that the three previous killers, as well as a would-be murderer who was one of the victims, may have had different reasons, but they committed the same crime he did.

* Despair's Last Resort. The latter barreled out of her room and landed straight into the former. She claims that she shouted out a warning, but Takara never heard her due to the hotel rooms being insulated.
* Despair's Last Resort. This leads him to get into a fight with Kazumi Katsuya the next morning. It looks like she's about to beat him up, but then Kumiko Akamine gives him a well-deserved punch to the face and tells him to stop acting paranoid and acting like an ass.
* Despair Speech: My life is completely hopeless, and the only thing I can do now is to monologue about it.
* Desperada can turn anyone she hits with her musical instruments or the beams they can fire into yellow smoke and a sticker on her guitar case.
* Desperado, both of which were hangouts for members of Bucho's gang, and both of which were cleaned out in bloody fashion by the Mariachi.
* Desperado, El Mariachi has cut-down semi-automatic pistols hidden in his sleeves, spring-loaded to jump into his hands.
* Desperado for violence—the kiss of death for a mainstream action movie.
* Desperado is an interesting variation in that he keeps his entire arsenal hidden inside of a guitar case that he carries with him.
* Desperados (2020) done to her during the film, such as getting electrocuted, punched, scratched, and even slapped in the face by a dolphin's penis.
* Desperados (2020). It ends up with his mother and the hotel staff thinking she's a pedophile and getting her expelled from the hotel.
* Desperados (2020): Kaylie and her husband Tad are unable to have children, while Brooke got pregnant b her cheating husband despite not wanting kids.
* Desperados (2020), Wesley attempts to use a card to unlock Jared's hotel room, but she just ends up breaking it instead.
* Desperados (2020): Wesley messes up her job interview for a school guidance counselor when she talks to the catholic school Principal about teaching masturbation to the students.
* Desperados as bait as she is fast enough to kick an approaching croon right in the forbidden zone.
* Desperados can set these in certain missions, typically to blow up fortified gates.
* Desperado series of TV movies follow Duell McCall, an innocent man framed for one murder who travels from place to place, upholds justice, defeats evil men and inevitably gets blamed for everything that happens in the film so his bounty just keeps getting bigger.
* Desperados III has to neutralize a bandit called Big Ann and her gang, who are attacking the train that Cooper is using to go to Flagstone.
* Desperados, in order to locate the hidden lair of the gang lord Sanches, the heroes infiltrate his outpost and steal all the horses but one from it. One of the thugs goes back to the HQ for more, with the Desperados hot on his trail.
* Desperados. John has to get up there and cut it with his knife to free him.
* Desperados, one tiny dart will send them into paranoid homicidal rage, opening fire on anything that is caught in their path, usually causing multiple deaths before the infected will either pass out or be gunned down by their former comrades.
* Desperados's men and the US cavalry. Artillery fire from the Cavalry is a hazard in some places in the level.
* Desperados throws a magnificent temper tantrum including this complaint after the heroes steal some horses from his mooks. He even knocks one of his mooks out cold on the spot.
* Desperados: Wanted Dead or Alive gunshots can be masked by other loud noises such as a nearby roaring waterfall or thunder.
* Desperado, the entrance to the secret room is concealed within a truly disgusting bathroom stall.
* Desperado, the first description Bucho gets of Navajas is that he has brown hair and eyes, which Bucho points out, is not exactly distinctive in Mexico. The description then goes on to list some actually useful information.

* Desperado, the opening scene has El Mariachi's character reintroduced this way as Buscemi narrates over one of these.
* Desperado the unlucky kid. How did anyone else make it into that cartel?
* Desperado, who draws two Rugers from his sleeves in order to blow away an entire bar full of bad guys. Even moreso in the sequel, when he dual wields a sawed off shotgun and a sub-machine gun during a shootout!
* Despera due to the director Ryutaro Nakamura's health issues and later death in June 2013. Later on, however, series artist Yoshitoshi Abe announced they had found a new director, though who it is is currently unknown and no other news has been released.
* desperate and that made her sad — the king was thrown off Tlatelolco's main temple and his state annexed to the Aztec Empire. It's safe to assume that everybody else eventually ran out of excuses too, because by the time the Spanish showed up, all the surviving states had agreed to have some limited wars with each other each few years, the "flowery wars", with no single purpose but to provide sacrifice victims to everybody.
* Desperate Dan to get round this, persuading the local glassblower to make him a tumbler about a meter tall (and the butcher and baker to make a sandwich of similar dimensions).
* Desperate for concert ticket money, Bud rents Kelly out as a babysitter. During the evening, she's tied to a chair, peed on, and threatened with scalping. (They even threaten to
* Desperate Housewives: After Mary Alice Young shoots herself, we cut to a scene where her neighbour Martha Huber seems to be examining her blood with her fingertip. It is then revealed that Martha just spilled juice when she was startled by the gunshot sound.
* Desperate Housewives and tries the back door, which is locked as well. Then she tries to climb to the window but fails and falls into her bushes and is discovered by Mike who helps her out and manages to get her back into the house by jimmying a window.
* Desperate Housewives are the only ones who don't fit the description.
* Desperate Housewives at school. She came up with the nickname herself, but only because it was nicer than what people were calling her.
* Desperate Housewives: Bob Hunter is played by Tuc Watkins, who came out of the closet in 2013. Bob's husband Lee McDermott is an aversion, being played by the straight Kevin Rahm.
* Desperate Housewives (both of them turning out to be gay) and getting a prison sentence for it.
* Desperate Housewives: Bree abandoned Andrew by the side of the road at the end of Season 2 due to his increasingly out of control behavior. He did return in Season 3, though, after six months living on the street, much more humbled.
* Desperate Housewives, Bree sends her pregnant daughter away while pretending to be pregnant herself. It ends up being for nothing, as Danielle decides to take the child back later.
* Desperate Housewives, Carlos suspects (correctly) that his wife is having an affair, but not with whom. Suspecting the TV repairman, he breaks into his house and beats him up. Then he looks around in the house and notices the artwork and photos of a boyfriend... it's pretty clear the man is gay. The repairman, shocked by the violent assault, asks Carlos if he is beating him up because he is gay. Carlos sheepishly says, "Yes!" and quickly runs away. He makes the same mistake again towards the end of the season and ends up being arrested and charged with a hate crime.
* Desperate Housewives Dave rescues Mike from the club fire so he can fulfill his plan for revenge on him.
* Desperate Housewives did this with the whole Ian/Susan/Mike triangle.
* Desperate Housewives. Edie and Carlos have been having trouble with their sex life, and an argument appears to be leading towards this trope. She throws him against the fridge to make out and a pepper grinder falls on his head. He throws her onto the table and it collapses from their combined weight. Cut to them at the

doctor's office, getting stitches for their injuries.
* Desperate Housewives, Edie, who up until that point was a casually promiscuous woman who was more bitchy and snarky than actually crazy. Once she starts having a liking for Carlos, suddenly she starts going completely insane and even attempts suicide just to get his attention.
* Desperate Housewives episode had Bree preventing her son from living with his grandparents by "accidentally" showing them his stash of gay porn.
* Desperate Housewives, especially in the early seasons: formal and coldly polite towards most of the people, but warm and loving (or at least the best she could show) towards her best friends and her family.
* Desperate Housewives, Gabrielle's affair with gardener John lasts for many episodes.
* Desperate Housewives, Gabrielle took a tumble down the stairs a few minutes after she accepted her pregnancy. When she later decided she wanted to try to have a baby, "complications" from the fall made her unable to do it the old-fashioned way. She and Carlos attempted to adopt a baby but were thwarted when an employee of the agency blabbed Gabrielle's history of statutory rape and Carlos' slave labor charges. They managed to adopt a child through the services of a private adoption lawyer but the biological mother had a change of heart and took the child back. Finally, they used a surrogate, and nine months later discovered there had been an embryo mix-up and the baby belonged to someone else.
* Desperate Housewives, Gaby and Carlos are having blind sex (he is blind, she's wearing a blindfold). Gaby hears a sound, rips off the blindfold and, lo and behold, there is Juanita drinking from a juice box. They don't know how long Juanita has been there, either.
* Desperate Housewives, Gaby tries to bribe a hospital nurse to let her in before visiting hours with all the cash she has on her—$12. Then she realizes, "Oh wait, I'm going to need ten for parking" and just offers the remaining $2.
* Desperate Housewives George. Eventually, she realizes that she considers George just a friend and goes back to Rex, who had recently had a heart attack. George then continuously switches Rex's pills until he dies and then proceeds to date Bree again.
* Desperate Housewives had a decline in quality after season one. Some people say it returned to its premises in season three.
* Desperate Housewives had Bree and Orson abruptly leave for a honeymoon in Switzerland in the middle of Season 3 - apparently months after the two were married - in order to explain away Marcia Cross's maternity leave.
* Desperate Housewives had Mike putting a wire on Susan before she goes out to question Edie. The wire does not stay hidden from Edie.
* Desperate Housewives handicap sign by two men in wheelchairs. While one of them goes to get security, the other one attempts to keep her out of her car. Her response is to get behind him and shove him into the middle of the parking lot. She then says:
* Desperate Housewives in Season 6, after the titular housewives knew he was framed for murder and refused to do anything to assist. Further, they also refused to visit him or show him any kindness.
* Desperate Housewives in season four: Danielle's son was born with amniotic fluid and all and looked like the average newborn for quite a while afterward, but Susan's (month early) son was born perfectly clean and looked to be the average size of a four-month-old baby. Of course, Danielle's son was born on Hallowe'en and delivered by a doctor dressed as Frankenstein's Monster, which may have influenced the realistically grisly nature of the birth.
* Desperate Housewives: in season four, Katherine slaps her daughter Dylan for asking about her father, but this not played as Katherine is made out, at least in the first few episodes, to be an unsympathetic character.
* Desperate Housewives involved Lynette's husband Tom going back to college after getting laid off.
* Desperate Housewives in which Gabrielle pushes her youngest daughter to become a child star, despite her absolutely sucking at acting. It ends up with both of them

wasting their lives, and her husband and other daughter leaving them.
* Desperate Housewives is accidentally electrocuted, falls down... then we get a close up of the Twitching Hand right before the credits. The following episode starts with the character already cremated, IIRC.
* Desperate Housewives is considered to be a comedy series, but unexpectedly switches between being silly and being serious several times in a single episode. The fact that (at least) each housewife has their own storylines allows the show to have silly and serious plotlines in the same episode.
* Desperate Housewives. It's casually mentioned in season 1 that she ran away from home after being raped by her stepfather and later referred to as to why she has a cold relationship with her mother.
* Desperate Housewives, Karen McCluskey has the dead body of her husband, Gilbert, stored in a chest freezer in her basement in order to keep getting his pension checks (since after he died she discovered that he had never updated his will and thus all his assets would go to his first wife whom he was only married to for a very short time, leaving Karen destitute).
* Desperate Housewives, Lynette causes the neighborhood to riot over a suspected pedophile, causing his invalid sister to die of a heart attack. At the end, he informs her that he had never acted on his tendencies because of his sister, and he was now "free" to do that. He may also have been screwing with Lynette's head for revenge. The ending is rather ambiguous about it.
* Desperate Housewives Lynette once threatens to spank her rambunctious sons with an assortment of spanking implements, including a belt which she describes as "a classic" before cracking it. She ends up not spanking them, but in a later episode Bree turns one of boys over her knee, leading to a rift with Lynette.
* Desperate Housewives, Lynette's kids start to watch a videotape belonging to a neighboring couple, which Lynette frantically stops when she sees what kind of movie it is. The neighbors are embarrassed it got out of their house... because their more recent movies have higher standards of production.
* Desperate Housewives managed to hide in a suitcase. Not even a very big suitcase.
* Desperate Housewives, Mike and Ian bet Susan in a poker game when they're both vying for her heart.
* Desperate Housewives of the first season of the show. Later seasons turned Mary Alice into the narrator because her storyline has wrapped up at the end of the first season but she still pops up here and then to further the other housewives' stories.
* Desperate Housewives, once Edie survives being choked by Dave, she gets in a car accident and is electrocuted but she's still alive for a minute. Then Susan comes over to comfort her and she dies.
* Desperate Housewives, one of Susan's best friends turns out to be an embezzler.
* Desperate Housewives Over the course of the show, Susan always ends up getting embroiled in nearly every season's arc because she cannot stop herself sticking her nose in where it doesn't belong.
* Desperate Housewives. Rex asks Bree to pick a "control word" for the sexual roleplay they're planning to do:
* Desperate Housewives seduces and uses any man she comes across, and she doesn't care if they're married either. Special mention goes to Mike, Carlos, and Karl.
* Desperate Housewives she dies by getting electrocuted as she tries to flee from Dave and warn them.
* Desperate Housewives, Susan and Mike are planning their wedding, with Susan going way over the top by trying to top Bree's and Gaby's recent weddings. When she sees the stress that it's putting on Mike, she decides to cancel the big wedding and surprise him with a small, private ceremony in the woods.
* Desperate Housewives, Susan finds out she needs her spleen removed but has no health insurance, so she makes arrangements to marry a gay man in order to get the coverage she needs. The guy's boyfriend becomes jealous about the whole deal, pointing out that he isn't ready to marry him but will marry a woman with "a silly disease". Susan explains that her situation is actually serious, but just sounds silly because of the word "spleen".

* Desperate Housewives that never came to pass. Fans are divided on how many were lies and how many were just him changing his mind later, but one that pretty much everyone agrees was a lie is his statement that one or two of the Scavo kids would die.
* Desperate Housewives. The friendship only lasts for one episode, though.
* Desperate Housewives, the neighborhood holds a protest rally after plans for moving convicts into their street start going ahead. It ends badly. For everyone.
* Desperate Housewives, there’s Bree Van De Kamp and her husband Rex, although his family name reveals a Dutch heritage, as opposed to British. As Bree explains to her (Jewish) marriage counsellor when he questions her preference for carrying on as normal, despite obvious problems: ”We’re WASPs doctor Goldfein — ignoring the elephant in the room is what we do best.”
* Desperate Housewives to ask, "What, no rubber nose and attached 'stache?"
* Desperate Housewives, Tom refers to Lynette's (now bigger, thanks to her pregnancy) boobs as "The Supremes", and his genitalia as "Benny and the Jets".
* Desperate Housewives, using her advanced illness to save the main characters from going to prison.
* Desperate Housewives: When Lynette finds out Tom cheated on her many years ago, she puts a gay porn in his presentation.
* Desperate Housewives. When Martha Huber is collecting clothing for Edie (after her house burned down), Lynette apologizes for the unstylish quality of her own donated items. The older woman states "Beggars can't be choosers", then sees some items of Lynette's and reiterates "Of course we don't need to rub salt on the wound."
* Desperate Housewives, when Susan was mistaken for being in menopause when she was actually pregnant.
* Desperate Housewives, where Rex was the only really sympathetic character in the whole show (which is probably why they killed him off), and his conservative wife's reaction to his kink was portrayed as her willing to go along with it because she loved him, but when she thought he'd bragged she reacted negatively.
* Desperate Housewives with anyone, but especially when Bob and Lee moved in, and mistook her for being homophobic. She ended up hiding their lost dog so that she could help them find it. Of course, things really backfired when they figured her out.
* Desperate Housewives. You'd think guys would get the message by now.
* desperately envisions having this with his now-retired father agree with the other's life choices, but can still love each other as family) is much harsher than normal.
* Desperately Looking for a Purpose in Life: A character on a journey to find a meaningful place in the world.
* Desperately Looking for a Purpose in Life: Still doesn't know what to do with their life.
* desperately-needed medical supplies). He lets Mal go after getting the loot back.
* Desperately Needs Orders: Inability to function without someone to tell them what to do.
* Desperately Needs Orders: Someone who is so dependent on following the lead of others that they struggle to act on their own initiative.
* Desperately Seeking Ranma features Ms Aoyama. She dresses in the sharp black suit and sunglasses mode, regardless of time of day or current lighting conditions. She generally has final discussions with those whom 'her employers' are displeased with. Who does she work for? 'That information is unavailable.' She seems to see all, know all, and would seem to give liquid nitrogen a cold.
* Desperately Seeking Ranma. It results in Akane screwing over some crooks before they can even start their heist.
* Desperately Seeking Ranma never have a detailed description of the uniforms. The descriptions are more along the line "remarkably immodest outfit that a professional stripper might be embarrassed to be seen in public wearing".
* desperately short-handed and/or a scratch-force of survivors from several units who took a hammering in the early stages of the war, so the chain of command is

kind of ad-hoc.
* desperately tries to save Juri from the D-Reaper by breaking into where it is keeping her prisoner, as penance for killing her Digimon partner, Leomon. Unfortunately, it's Leomon's data he uses to break into the Kernel Sphere; seeing Leomon's attack coming from his killer scared and confused Juri, however, and he failed.
* desperate need to be special blinds her to Phobos' blatant tyranny due to him making her the center of everyone's loving attention. Even when forced to face the facts, she clings to denial and refuses to hear the truth.
* Desperate Object Catch: All will be lost if a falling object isn't caught in time.
* Desperate Romantics. Elizabeth Siddal is posing for Millais as Ophelia in a tub of cold water heated by candles. She almost drowns when the candles go out, the water cools down and she loses consciousness. Her parents are understandably not too happy.

* Desperation Collie Entragian on the pretext of their missing rear license plate, and arrested for possession of marijuana after Entragian finds a baggie (which actually belongs to Peter's sister) in the car trunk. One of the signs that something is very wrong is when he's Mirandizing them and includes an unexpected phrase:
* Desperation does this as well - but the process of riding along changes the body and causes it to decay if the host's mind isn't strong enough.
* Desperation, Johnny Marinville, a burnt-out writer in the present had once won the National Book Award.
* Desperation: Welcome to Desperation, Nevada, a tiny mining town now ruled by an oversized, maniacal cop named Officer Collie Entragian. Several travelers encounter him, and very few make it out alive.
* Despero of Kalanor, who lead a crusade to enslave the galaxy and raised an army powerful enough to threaten the Green Lantern Corps.
* Despicable Bear: The trash can in the lower right corner serves as one, just click it twice.
* Despicable Me 1 Fisher with the 7-year-old Nev Scharrel. This also applies to the Japanese dub, where child actress Mana Ashida, who was five at the time, provided Agnes' voice.
* Despicable Me 2 crushes a glass in his hand when he witnesses his eldest adopted daughter Margot dancing with El Macho’s son Antonio.
* Despicable Me 2, Dr. Nefario joins up with El Macho so he can do evil deeds once again, but when he learns that El Macho is holding Lucy hostage as well as of the evil minion El Macho had sicced on the girls, he returns to Gru.
* Despicable Me 2, Edith is going through her "ninja phase" and spends most of the movie in costume. And armed.
* Despicable Me 2, El Macho demonstrates the barbarian power of his new genetically-modified Minions by feeding one an assortment of dangerous metal items, from a chainsaw to a police car to a nuclear bomb.
* Despicable Me 2 features an entire research lab being stolen by a massive aircraft.
* Despicable Me 2 Gru's obnoxious date, Shannon, cops a dart in the derriere from Special Agent Lucy Wilde!

* Despicable Me 2, Gru would not have realized that he has feelings for Lucy.
* Despicable Me 2 has this from Gru - "Firstly, you can't prove I stole the moon. Secondly, after I stole the moon, I put it back."
* Despicable Me 2 has two minions fight to present the logo with a "Ta-da!"
* Despicable Me 2 in the climax, Lucy at that point had already fallen in love with Gru.
* Despicable Me 2 is often regarded by many to be better than the first film as well as the best film of the franchise.
* Despicable Me 2, one of the minions is trapped when he licks a a popsicle dangled in front of him and his tongue gets stuck. He wakes up on the tropical island with his tongue still stuck to it.
* Despicable Me 2 : Pollito (a Chicken) does this to Gru while attacking him at the restaurant.
* Despicable Me 2, she shows her Anti-Villain Group ID badge upside down. She corrects it immediately upon noticing.
* Despicable Me 2. Some fans loved it as much as the original, while others were disappointed that it barely gave Gru and/or his adopted kids, Margo, Edith and Agnes anything new to learn about them (e.g. how they ended up in the orphanage before Gru adopted them).
* Despicable Me 2, some minions move around at the mall hidden inside trash bins.
* Despicable Me 2, the Anti-Villain League recruits retired supervillain Gru to help save the world.
* Despicable Me 2, the head of the Anti-Villain League is Silas Ramsbottom. The Minions find his last name hilarious, and even Gru gets in a jab or two:
* Despicable Me 2, they essentially serve as living props in favor of giving the Minions more sequences. The Minions even get a role in the villain plot while Margo, Edith and Agnes sit on the sidelines.
* Despicable Me 2 trying to play golf in the house when they hear a noise outside. They slowly walk outside and walk towards the trash cans, golf club raised and scary music in the background. Then a cat jumps out of the trash can.
* Despicable Me 2, two of Gru's minions drive Lucy's car to rescue them when their break-in goes awry.
* Despicable Me 2 When Lucy Wilde of the Anti-Villain League shows up on Gru's doorstep, he tries to freeze her. She counters with a flame-thrower and explains:
* Despicable Me 2, when the PX-41 formula is used on a rabbit in the documentary film, it turns into a giant purple monster and attacks the scientist in a hazmat suit. We then cut to Gru and two of the minions' reactions, implying it’s pretty gruesome. It then cuts to the monster rabbit dragging the (presumably dead) scientist under a table and attacking the cameraman.
* Despicable Me 3: Although Bratt was defeated and the Gru family saved, thousands are dead due to the damage caused by the expanding bubblegum in Hollywood.
* Despicable Me 3, Balthazar Bratt's fictional TV show "Evil Bratt" had him build a giant robotic duplicate of himself to wreak havoc on Hollywood making the U.S. Army open fire on him but to no avail and the army's commander shrieks at the sight of Bratt firing giant chewing gum bubbles and orders them to retreat. When Bratt does this for real, the army doesn't even show up but that would come to reason since the U.S. Army doesn't have troops stationed in Hollywood.
* Despicable Me 3, Gru and Dru do this during the family dinner by swapping each other's clothes, Gru putting on a blonde wig, and Dru wearing a bald cap. Unlike most examples, it fools no one.
* Despicable Me 3 has several minions begin to recite "Illumination" before each getting knocked out by another minion, culminating in the smallest minion knocking out the last one with a fart gun and excitedly shouting the name.
* Despicable Me 3, in which Gru learns he is lactose intolerant (oh, and has a long lost brother!), among other things.
* Despicable Me 3, not only does the 'Hollywood' Sign only get partially destroyed (and not Roland Emmerich like) by Bratt's robot, the Capitol Records Building (named the World Records Building), while it does collapse, we only get to briefly see the top part of it fall onto the ground. As for the rest of Hollywood? It's

sadly offscreen.
* Despicable Me, after Gru and the children steal the Shrink Ray back from Vector, Mr. Perkins confronts the oblivious Vector thusly:
* Despicable Me: After successfully stealing the shrink ray, Gru explains his plan for stealing the moon to Mr. Perkins using slides to back up his story. In between, however, is a drawing his three adopted daughters made of him sitting on the toilet.
* Despicable Me, after Vector shoots Gru with about hundreds of explosives, Gru emerges from a ditch, only slightly singed.
* Despicable Me: Agnes is the most innocent child to hit the screen in a long time, and she's adorable.
* Despicable Me and giving a boy a balloon animal and popping it after a while, even pushing the stunned boy aside.
* Despicable Me, and he follows through when Vector comes in to try to keep Margo.
* Despicable Me: As soon as the obnoxious carny scams Agnes out of her stuffed unicorn, Gru obliterates the bastard’s booth and scares him straight into giving the unicorn to Agnes.
* Despicable Me: At the carnival booth with the unicorn prize, the smarmy carnival barker taunts Gru into paying for more games by slurping loudly from his soda cup. Gru becomes so annoyed with the carny's antics that he blows up the entire booth and takes the unicorn for himself.
* Despicable Me: At the end. Notable in that they actually used a 1920x1080 resolution marker in the bottom corner.
* Despicable Me became the most successful film in the company's history.
* Despicable Me came out, real life carnival booths stocking real life Fluffy Unicorns have become a common sight.
* Despicable Me (depending how long he's been active) as he has the entire criminal underworld in his pocket and can fund any scheme he wants.
* Despicable Me, Edith prays not to have bugs crawl into her ears and lay eggs in her brain at night, then Agnes prays to be adopted by a family with a pet unicorn.
* Despicable Me), even though they weren't made by Disney. Either these people are clueless, or they generalize kids' stuff as "Disney" products
* Despicable Me explains his plan to steal the moon. The girls have inserted a drawing of him on the toilet into it.
* Despicable Me film, Vector's looks like if Steve Jobs had designed an iFortress.
* Despicable Me: Gru adopts 3 orphan girls as a plot, but he ends up becoming close to them and loving them as his own. After Dr. Nefarious sends them back due to this, Gru later gets the girls back and officially adopts them. This continues in the sequels, where Gru gets married to a woman who gladly treats the girls as her own.
* Despicable Me, Gru has to resort to this to build his rocket after he fails to get funding from the Bank of Evil.
* Despicable Me, Gru's mother tells him that she's so proud of him, that he's become a great parent, "just like me." He rolls his eyes, because flashbacks have shown that she was actually a pretty lousy parent, and then she adds, "Maybe even better," which makes him smile.
* Despicable Me, Gru. While Gru isn't devoid of comedy, he's very competent, unlike the minions who are mostly silly and childish.
* Despicable Me had his minions write up false personal achievements for him. One of them was declaring that he had been awarded the Medal of Honor in 1991.
* Despicable Me he knows all their names! In return, the minions all love and adore him.
* Despicable Me. Her bedtime prayers include the request to not let bugs go into their ears and lay eggs in their skulls/brains, she finds it "cooool!" that she and her sisters are sleeping in old, inactive bombs after Gru adopts them, and she is extremely excited to see that her pancake is shaped like a "dead guy."
* Despicable Me. He starts of cold and stoic, initially not caring for Margo, Edith, and Agnes but, slowly, over time, he grows to warm up to them.
* Despicable Me. He was able to survive the rockets and missiles from Vector's

base, with the exception that he's completely covered with ash.
* Despicable Me how to do a tea party) when the adoption agency comes to take them back, much to his dismay — and surprise.
* Despicable Me: Implied to be why the head of the bank insists they should give more loans to Vector, who is his son.
* Despicable Me. In contrast, Vector's tech is much more up-to-date for 2010 standards.
* Despicable Me is full of furniture made from stuffed animals. As the girls walk down the hall, they see a stuffed lion's head. In its mouth is a stuffed dog, with a stuffed cat in its mouth, which has a stuffed mouse in its mouth.
* Despicable Me: Its protagonist is Gru. He's a villain, but he isn't the best in the world.
* Despicable Me kicks Dr. Nefario in the shins when he takes a chemical vial away from her. Earlier she kicks Gru's front door (while he's directly against it) in retaliation for pretending to be a recorded message.
* Despicable Me: Margo, Edith and Agnes for Gru, and trigger his moral improvement.
* Despicable Me, Margo, Edith, and Agnes live in one of these. If they don't make their quota selling cookies they are banished to the "box of shame".
* Despicable Me: Margo. Or rather, she shows promise for becoming this when she grows up. Although, she was seen without her glasses constantly in the first movie.
* Despicable Me — CGI animated films. Three main series movies and a spin-off film since 2010.
* Despicable Me: Minion Mayhem, a Minion gets electrocuted by a red laser and is only fluffed up as a result.
* Despicable Me: Minion Mayhem, an unlucky Minion ends up landing butt-first on a cactus.
* Despicable Me: Minion Mayhem are said to be able to act as a flotation device.
* Despicable Me: Minion Mayhem exits out into a dance party room where guests can meet Gru and the Minions with disco music blaring.
* Despicable Me: Minion Mayhem, footage of Gru's failed tests of the Minion Gun at one point show one volunteer being turned into a bloated-looking Minion.
* Despicable Me: Minion Mayhem, Gru's inner-factory is filled with giant blades, rotating screws, toxic goo, and fire everywhere.
* Despicable Me: Minion Mayhem has a scene where Gru plays clips of his early tests of his "Minion Gun", one of these clips showing the gun causing two people to be turned into human/Minion hybrids, and another into an Minion/elephant hybrid.
* Despicable Me: Minion Mayhem has no villain, unlike the movies it's based off of. Instead, the conflict is caused by a Minion training course gone wrong.
* Despicable Me: Minion Mayhem, it seems as though the riders will finally be able to serve as one of Gru's Minions...until one Minion ends up crashing into the ray gun, which transforms the riders back to normal.
* Despicable Me: Minion Mayhem, two other Minions laugh at them just seconds before they get hit as well.
* Despicable Me: Minion Mayhem, when Gru warns the riders of putting their goggles on too early, he shows a clip of a Minion walking around with them on and subsequently running into things and getting hurt.
* Despicable Me, Miss Hattie's orphanage goes unpunished for her treatment of the girls there. It's not even labeled as a "girl scout cookie cartel" or anything similar.
* Despicable Me: Mr. Perkins, the head of the Bank of Evil, is the largest threat in the franchise because he can finance whatever evil scheme he wishes and, therefore, has the entire criminal underworld in his pocket.
* Despicable Me short "Banana": at the end where a swarm of minions is chasing one who was eating an apple.
* Despicable Me studio has this among people older than their films' target audience for their movies being low-budget, having mediocre quality at best and frequently recycling assets.
* Despicable Me, the consequences of stealing the Moon would be much more horriffic). Yes, Gru freezes a few people, but the freezing is implied to be

harmless. And Vector is content with stealing monuments and just sitting back playing his Wii. In fact, had Vector not stolen the Pyramid at the beginning, that boy would have died.
* Despicable Me. The man who cheated them decides it's in his best interest to give Gru the prize after that.
* Despicable Me: the rocket is plenty noisy on launch but, when it rises above the atmosphere, we hear nothing but the background music.
* Despicable Me, the villain tries to steal the Moon by using a prototype shrink ray to make it pocket-sized. It turns out that the shrinking is not permanent and the shrunken Moon is now on Earth...
* Despicable Me, three minions disguise themselves as humans to go to a store. One of them, Phil, dresses as a baby.
* Despicable Me. To go into his underground base, Gru gets shifted across the room in a chair, eaten by a cannon which flips around on struts (and apparently dresses him in a suit as well). Then half the floor lifts and the cannon is put on a platform which descends into the ground.
* Despicable Me. Vector responds by sending out these little drones that intercept the missile's heat-seeking technology. Then he shrinks Gru's ship to the size of a child's ride-in car.
* Despicable Me, we have the three girls Margo, Edith and Agnes being adopted by Gru.
* Despicable Me: When Edith gets trapped in an iron maiden, a red liquid is seen flowing out the bottom. Gru opens the maiden, and it turns out one of the spikes punctured her juice box.
* Despicable Me: When Gru's profile is shown on Miss Hattie's computer, his first name is spelled as "Felonious," and in the Gru Family Tree, it's spelled as "Felonius."
* Despicable Me where he pops a kid's balloon was cut. They also shorten the scene where the girls play a carnival game to the part where Agnes hits the spaceship.
* Despicable Me... which became a billion-dollar film by itself! Add the plethora of Minion merchandise, and the yellow creatures generated much green to Illumination's parent company Universal.
* Despicable Me, which was savaged critically and financially disastrous. It still ranks as their poorest-grossing film to this day.
* Despicable Me, with the girls' just-for-Gru ballet recital turning into a disco party. Vector dances along on the moon.
* despise, a son of Zeus, hosted the great twelve of Olympus to dinner, he couldn't think of anything worthy, except for the most cherished thing in his life — his young son, Pelops. Tantalus butchered Pelops and served him up to the gods, and all of them immediately knew what he had before them and refused to touch it (save for Demeter, in some versions of the story; still morose over the kidnapping of Persephone, she ate Pelops's shoulder, replacing it with one made of ivory when she came back to her senses). They restored Pelops' body, brought him back to life, and Tantalus was condemned to the pits of Tartarus, to be surrounded by rich fruit and cool water, and unable to eat or drink. Pelops, in fact, became one of the ancestors of Agamemnon, so arguably this cycle of bloodshed started with Tantalus.
* despised being photographed in public, and was known to do this and even to physically try to knock photographers' cameras (which in that era were quite fragile) to the ground in hopes of breaking them. He only wanted retouched photographs of himself to be seen by the public.
* despise illegal dog fights and reject any comparison arguing that their activity is very different, seeing themselves as the moral alternative. Cock fights are illegal in most countries and in those that not are still pretty controversial, however some people may argue that whilst bull and dog fighting may have some more humane variants as the mentioned above there's no way to do the same with cocks. Of course, a lot of people, especially animal rights activists, would consider all of them to be cruel.

* Despite all the science and fact-based theories out there, the fact of the

matter is we will never be able to conclusively pin down how much a planet can differ from Earth itself and still stay Earth-like (for instance, ratio of ocean to land - most of our oxygen comes from the ocean), until we actually find Earth-like worlds to compare (or terraform our own). This is not to say that our theories aren't good science, they are. We just don't have any real-life examples to closely analyze to compare results yet, and there are always surprises ahead no matter how well-checked your math is.

The Twisting causes people who stay overlong in the Carnival to mutate, their form changing to reflect their hearts and souls- for example, the bitter and malevolent Professor Pacali's repressed plots take life as deformed midget "things" that grow from his flesh. This is the source of his "Pickled Punks". One of the "attractions" are the horrifically warped Chaos Spawn-like remnants of people who attacked the Carnival, entities referred to simply as The Abominations. And some of the populace were strange and unnatural before they entered the Carnival, like a bloodthirsty leopard with the ability to assume a humanoid form, a Seawolf (an amphibious werewolf), the Fetch of an evil wizard and a Wax Golem.

Widely viewed as the overwhelming favorite for the Democratic nomination in 2008, she lost a bitterly contested primary to then-Senator Barack Obama of Illinois, who went on to win the general election by seven points. She did win the nomination in 2016 despite an unexpected challenge from Vermont Senator Bernie Sanders, and went on to face upstart businessman Donald Trump in that year's general election. While polls were somewhat volatile throughout the fall, a Clinton victory was almost universally expected. On election night, however, Trump won several swing states and defeated Clinton in the Electoral College to win the presidency. In a crippling (or hilarious, depending on your perspective) side note, she DID win the popular vote in both contests, but her inefficient delegate structure in both the 2008 primary and the 2016 Electoral College locked her out of the prize both times. As a result of these consecutive losses, Clinton's future as a major political figure was near-completely destroyed even among her supporters. Most political analysts nowadays have abandoned the prospect of her running again, and even if she did attempt another presidential campaign, it's highly unlikely she'd get anywhere near as far as in 2008, much less 2016. Her defeat as a relatively moderate Democrat in the general election also meant that support for further-left candidates like Sanders was only galvanized among younger, left-wing Americans.

If they changed it, the whole Pokédex would have to be renumbered. Strangely, this also applies to their breeding ability, as female Nidoran's evolutions remain sterile up through the modern games solely because they were unable to breed in the generation that introduced breeding — despite that only being because of a

In the second of the two-parter that introduced the plague, Cyclonus commands the other Decepticons to retreat after coming under fire from the Autobots, and they follow his orders unquestioningly. It's more of a "Lack of inhibitions" plague than a "hate" plague.
* Despite the name, regular summoning isn’t an example, as it focuses on taking the aura (the soul) of a magical animal or fae and storing it into an object, turning it into an elemental being that can be called on at will. Incidentally, demon summoning made regular summoning largely obsolete — summons are essentially made of magic, and since demons

(Mark 8:12) In another verse, He explicitly states that the coming of The End will be a major surprise for everyone, that "concerning that day and hour no one knows, not even the angels of heaven, nor the Son, but the Father only. Batman and Robin manage to save Mockridge, but the Riddler gets away and implies he will eventually return to finish the job. * Destiny 2 and it's original have Gunslinger as one of their major subclasses, with perks that involve precision shooting and an ultimate ability that draws a revolver loaded with sunfire that shoots a few high-damage bullets. It can even be fan-fired.
* Destiny 2 begins with the villain blocking access to the Traveler, the entity which gives all Guardians their powers. Your Guardian alone discovers a shard of the Traveler which restores his/her powers alone. They are now uniquely placed to save the universe.. until you go to the first multiplayer sandbox map and meet hundreds of other Guardians who apparently all have exactly the same backstory.
* Destiny 2: Beyond Light, again to become the AI overseeing the Deep Stone Crypt where the Exos were made). When the Vex were finally defeated, Clovis-43 requested that his granddaughter reset him one last time, but to wipe his memory and edit his identity file, so as to move on from the man he was. She agreed, and Banshee-44 would later become The Gunsmith in the Tower. The AI Clovis, upon learning of this ages later, has stated a desire to perform this trope on Banshee, declaring him defective.
* Destiny 2 bringing in new players. More players were won over with Beyond Light in 2020 adding Darkness Subclasses for the first time.
* Destiny 2 Darkness energy, creating an improved Exo brain unstable enough to host a consciousness indefinitely.
* Destiny 2 features the ACD/0 Feedback Fence gauntlets, with two sets of glowing Tron Lines, one of which varies its color depending on the shader applied. There's also the Red Dwarf, an ornament for the Sunshot hand cannon.
* Destiny 2: Forsaken, the Scorn have the Screeb, which function a lot like the Cursed Thralls.
* Destiny 2 has a side quest where you investigate the Drifter. They believe he has hidden motives and might be a threat to the Guardians and the Traveler. Drifter finds out about this and gives you a choice to become his mole against the Guardians. If you decide to remain loyal to the Guardians, you will uncover various things about the Drifter's past, mainly because the man decides to help you discover it, claiming he has nothing to hide. You eventually discover his hideout

and investigate it, only in end to be told that there is no evidence against the Drifter that shows he is guilty of anything and the investigation was pointless. The only things that change is the info about the Drifter fills up a lore completion segment,(which details how the probe was pointless) and you still get to do the Gambit co-op modes, but Drifter doesn't trust you anymore, occasionally calling the player a snitch.
* Destiny 2 has the Eververse store, which allows you to purchase Silver with IRL money, to then purchase Bright Engrams in the store. These engrams hold random cosmetic loot, which can be dismantled for Bright Dust and then used to buy even more items, such as tokens which increase the rate of XP gain, increase the rate of earning faction points and additional rewards from completing activities.
* Destiny 2 in 2020 with D2's Season of the Worthy update. At the same time, Bungie patched all of the Warmind content to include Ishii's performance for Ana, in much the same fashion as the first game's Dinklage-to-North switch for the player's Ghost.
* Destiny 2, in response to the Cabal invading the City, the Guardians have begun building and fielding their own tanks to fight back. Since prior to this, the Guardians had mostly been a force of deadly light infantry whose heaviest vehicle had been Sparrow hover-bikes and the City was heavily-defended by massive walls and artillery emplacements, they'd never needed heavy ground armor.
* Destiny 2, it's possible to jump to one's death off the Guardians' Tower. There is a "Days since last incident" sign, that in fact keeps count of how long it's been since a player did that. It is, naturally, usually at zero.
* Destiny 2 offers a wide variety of guns as rewards for playing Gambit, all of which are made from black metal and dark wood like World War II era weapons. The Gambit guns are just as strong as modern firearms, with a few examples being considered top tier in their weapon type.
* Destiny 2 reveals they're all lies. He knows they existed, but remembers nothing about them, and constructed false memories of them to cherish as a way to keep himself sane and on the side of good.
* Destiny 2 the now-neutered Almighty into the Last City in one last act of spite, before the player Guardian once again foils them and destroys the ship for good.
* Destiny 2, there is a brief period in the campaign where the player has to step outside the hull of a massive space station orbiting the Sun and fight their way across it in vacuum. During this time, the audio and gunshots of the player's weapon are muffled.
* Destiny 2 this applies in some of the Ascendant Realm challenges. The Ascendant Realm is often dark and dimly lit, and full of enemies, from Hive to Shadow Thrall to Taken to nigh-invulnerable Abyssal Champions.
* Destiny 2, which work best on Overload champions, which are very aggressive and can't be stopped with normal fire. Firing on the target with the right mod installed will eventually shoot an Overload shot, which causes the Champion to become temporarily stunned and left wide-open to attacks from you or friendlies.

* Destiny and conventional nation-states had begun to dissolve), meaning its sovereignty was actually pretty limited.
* Destiny and turning 7066 Nessus into a strange mixture of Vex machine architecture covered with a verdant alien ecology.
* Destiny, a research facility built by time-manipulating robots. After an unsuccessful attempt to destroy it, the Vex erase Praedyth from the universe's timeline so that he may never have the chance to threaten their operation. Their work was so thorough that, when the player enters the Vault to track down a signal Praedyth is broadcasting, there were only scattered pieces of gear and vague references to indicate he existed at all.
* Destiny are this given the Hive's casual relationship with things like death and the soul.
* Destiny. As such, they're motivated both by hunger and by a holy imperative to purge all "weakness" from the galaxy, and "feed" by killing indiscriminately with

guns, swords, and space magic. The extermination of sentient species isn't a consequence of them satisfying their hunger, but the intended result.

* Destiny Bond and Rain Dance, as well as the "Pokemon Powers" becoming abilities being prime examples.
* "Destiny Bond" move of the same name, so naturally it has this trope as a major theme.
* Destiny by cutting holes through the hull, which came into play later when the ship was overtaken by the Lucian Alliance.
* Destiny can refuel itself by taking a brief dip into a star. Naturally, it gave the crew quite a scare when the ship ran out of energy and promptly aerobraked in a gas giant's atmosphere to head for the nearest star, resulting in them discovering just how it could remain operational for millions of years.
* Destiny capabilities. But if they start losing more fights than they win, their worms get hungry, and start eating their hosts instead. And as individual Hive grow more powerful, the hunger of their worm gets harder and harder to sate. The gods of the Hive, despite being the oldest and strongest members of the species, were forced to create a tithe system drawing on every single other member in order to have enough death to satisfy their worms.
* Destiny centered on the Dreadnaught that annihilates everything else it touches.
* Destiny characters, who originally had a choice between a super and a real, instead get both.
* Destiny: colonies of microscopic, hyperintelligent protozoa in a nutrient soup capable of piloting mechanical shells.
* Destiny destroying the giant crystal that housed Crota's soul, in the mission "The Awakening". As it turns out, that didn't actually kill him, it simply sent him back to his personal realm. To kill him for good, you must complete the "Crota's End" Raid, which involved storming his realm, breaking through his defenses and taking him down before he regains enough power to try to take over Earth again. Later, in the Taken King expansion, you had to do the same with Crota's father and the titular Taken King, Oryx, in the story mission "Regicide" and the "King's Fall" Raid.
* Destiny engineered to swallow planetoids whole and process them into wine. The player also gets to visit the massive, grimy, machinery-filled engineering sections that keep the rest of the ship running luxuriously
* Destiny, everything killing everything else until a single insurmountable victor emerges.
* Destiny expansion sees you riding a gondola up a mountain while enemies snipe at you from the surrounding cliffs. Halfway up, you're forced to jump out and walk the rest of the way.
* Destiny Factor has two; Sammy 64, who looks about Terry's height, and Virus... who'd stand out in a crowd due to height. Virus is debatable due to another set of genetalia she has...
* Destiny Fails Us loses his color when he embarrasses himself in front of Lily.
* Destiny Gundam, such as the Turn Delta Astray and the Astray Red Frame Kai.
* Destiny has an Ancient-style shield, although less advanced than the Atlantis one. Unlike most shields, it's not a bubble, but extends maybe 10 meters in every direction from the hull. The shield is vital for FTL travel, since space particles and meteors smashing into the hull at FTL speeds would be... unhealthy, but is not as practical for combat, since the discharge of weapon fire on the shield is close enough to affect the ship, even when the blast itself is blocked.
* Destiny has as its boss a giant Servitor called Sepkis Prime. It stares straight ahead as the door to his room opens, not looking at the player until the Fallen around it are killed and it finishes absorbing the energies around it. Shoot the iris for precision damage as you would an ordinary Servitor.
* "Destiny has but one soul", "The end is coming... which ending will it be?", and "Challenge Fate!" —
* Destiny has even described the game as being "mythic science fiction".

* Destiny has had to put with a lot, being one of the few poor kids living in a rich town, but she hasn't let it get her down and maintains a positive attitude and a level head.
* Destiny has long coats or robes as part of the defining visual for the Warlock class.
* Destiny has the mysterious Awoken, who live on a distant planet and have a strange and alien culture, which the player comes into contact with during the story... but they're also a playable character race. Meaning that if you play as an Awoken, you weirdly have no idea about your own culture or even who your Queen is. (This was later handwaved by the claim that Awoken born on Earth are commonly treated as outsiders, but this doesn't explain why your character wouldn't know about them.)
* Destiny has this when you're facing Atheon, the portals are the same place but in the past and future.
* Destiny HERO Plasma negates the effects of every monster on the opponents side of the field.
* Destiny. He's still considered a Guardian, but now has to operate from places outside the Tower and spends most of his time getting into wacky misadventures throughout the solar system.
* Destiny he still wore his ZAFT uniform and flight suit showing that deep down, he still believed in ZAFT despite the path they had took. After another stint with ZAFT in which case they again screwed him over and tried to eliminate him for not following the chairman's radical plan (in SEED it was his father who wanted to kill every Natural, in Destiny it's Durandal who wants to forcibly take control of the Earth sphere entirely) he returns to Orb and hangs up his ZAFT coat for good, donning an Orb uniform and flight suit and showing that after 2 strikes ZAFT is dead to him.
* "Destiny is a funny thing, Prince Zuko. It never happens the way you expect."
* Destiny is a Hazy Thing and in foresight thought of this trope and chose genders for both him and the Kyuubi to make conversations with Naruto easier.
* Destiny is a Hazy Thing, Idate starts slamming his head against a pillar when Sasuke wastes time challenging Rock Lee to a fight, especially since Idate knows that Lee is out of his league.
* Destiny is a Hazy Thing: Kiba's to Karin (who is attracted to his charka like an addict and thus is generally kept in his presence) when Ino jokes that he should make a move as she would be willing to do anything he wants. Kiba immediately puts down the idea saying that while Karin is cute, he's not comfortable taking advantage of her because A) he'd prefer it if she liked him for him and not due to his charka and B) it would count as rape and he respects women too much to do that.
* Destiny is a Hazy Thing, Naruto and Hinata use an explosion to cover up their discovery of a "dangerous knowledge" stash and the deaths of the two ROOT agents who saw them.
* Destiny is Crota, whose voice is so deep its practically subterranean. Inverted with his father Oryx, who has a deep voice, but is noticeably higher than even his lieutenant in the same scene.
* Destiny is implied to have some kind of criminal background. The official class description reads, “You’re no outlaw, at least not anymore, but making your own luck has always meant bending the rules.” Given that the player character is revived by their Ghost at the beginning of the game after having been dead for a very long time, with no recollection of their past means we’ll likely never know what this line is referring to.
* Destiny is riddled with variations on necromancy, both good and evil.
* Destiny it from them and launched a campaign of extermination to reclaim it.
* Destiny, it's response is to actively move to defend itself, indicating that the Guardians could hurt it.
* Destiny lead character, Rhapsody, for reasons that were never made very clear.
* Destiny Lost energy by harnessing the new black hole as a power source.
* Destiny Lost in stasis and rams the bubble, and the shock completely obliterates the Mark fleet.

* Destiny. Meanwhile, humanity and all the alien races use firearms, hovering vehicles, and starships. It's implied the magical is just technology so far beyond humankind, they ascribe mythical status to it.
* Destiny of an Emperor allows the player to recruit bosses at their full strength. However, since the main PCs gain soldiers (the game's equivalent of HP) over the course of the game and the bosses (and less important allies) don't, the bosses-turned-allies eventually become worthless. Except Zhou Yu.
* Destiny of an Emperor removes even that and replaces everyone's names with Mongolian names.
* Destiny of living beings slain by their host. Should the flow of Light ever be interrupted, the worm symbiote would instead begin feeding on their host. In order to get around this and further their endless crusade of wreaking death upon the rest of the universe for being too weak to oppose them, the Hive gods came up with a system of tribute, where lesser Hive creatures would take the Light from those they killed and keep enough to let them feed their own parasites and grow and become more powerful, and supply the leftover Light to their immediate superiors. These greater Hive entities would do the same, passing it up the chain until the tribute of Light reached the Hive gods, which would be fed to their symbiotes. During the "King's Fall" raid, the player Guardians take advantage of this by locating Oryx's tribute of corrupted Light and releasing it, leaving the Hive god suddenly starving and vulnerable to attack.
* Destiny of "Rockets McDickface" by the fandom for his durability and unlimited supply of missiles.
* Destiny of the Daleks also hated K-9. Tellingly, every story of season 18 (his first year as producer) saw K-9 damaged in some way, until he gets written out of the series.
* "Destiny of the Daleks", but the delivery seems too strong and deliberate for that.
* "Destiny of the Daleks", has the Daleks and Movellans, two "perfectly logical" races, at war in a perpetual stalemate because neither of them, each knowing the other will anticipate and compensate for their logical strategies, can find the best time to attack. This is possible if there's a
* "Destiny of the Daleks" involving the Dalek/Movellan War and Davros attempting to regain power over the Daleks.
* "Destiny of the Daleks", that is strangely bloodless. The Daleks and the Movellans (both robotic species) cannot commit to an attack if they do not have an advantage, but since their tactical computers are too evenly matched, neither can attain an advantage long enough to do so. The episode centers around both side's efforts to find a way to end the stalemate. The Doctor even comments that their endlessly maneuvering for position without ever actually firing a shot is actually a peculiar form of peace. He ultimately decides to deny his solution to their problem to both sides so that they will continue endlessly seeking an opening against each other without bothering the rest of the galaxy.
* "Destiny of the Daleks": The Doctor and Romana take refuge behind a hastily cobbled together privacy screen. The Doctor says something like There, That Should Keep Them Out, and Romana sneers "That wouldn't keep out a determined mouse!"
* Destiny of the Daleks" they plug a young human girl into their battle computer to provide creative strategies to counter the Imperials.
* "Destiny of the Daleks" was shot at a time when the Dalek props being used had been beaten up in poor storage — one of the main Daleks in the story has a cracked hemisphere, some are held together with bits of tape, one has a random bit of metal on it for the sole purpose of a scene later that requires a magnetic grenade to stick to it. Bad as this is, it has nothing on some of the other Daleks in the same story — they had strange flat backs as they'd only been intended to be shot from the front (of course, the director gave long, long shots of these strange flat backs).
* "Destiny of the Daleks"" When they do stand down momentarily, the Doctor says "I believe this is what's called a Mexican standoff."
* Destiny of the Doctor in the run-up to the show's fiftieth anniversary; each

audio sees the first ten Doctors (omitting the War Doctor) receiving brief messages from the Eleventh Doctor, asking them to ensure that a particular person or object survives what threat the Doctor is about to deal with, which allows the Eleventh Doctor to set up a complex plan that saves the universe from a race of pan-dimensional insects that sought to destroy history.
* Destiny of the Doctors in the cutscenes, and the encyclopedia sections that feature clips from the show.
* Destiny of the Shrine Maiden action with fantasy elements thrown in. Some reviewers have complained that the show's attempt to appeal to every demographic possible only causes each appeal to be of below-average quality.
* Destiny of the Shrine Maiden, after catching Himeko from a fall (how this would have stopped her heart is not explained), Chikane rips open her shirt, pauses to fondle one breast, and then does two chest compressions. Himeko promptly moans, demonstrating that she's revived.
* Destiny of the Shrine Maiden, and quite a few other works originally created by Kaishaku, for example:
* Destiny of the Shrine Maiden, and she and Himeko were reunited in another lifetime.
* Destiny of the Shrine Maiden, but now with giant mecha named after Japanese gods.
* Destiny of the Shrine Maiden, Chikane and Himeko do this after confessing their feelings for each other.
* Destiny of the Shrine Maiden have extremely long hair. Tsubasa is a male example.
* Destiny of the Shrine Maiden Himeko, though she is unaware of Chikane's feelings at that point.
* Destiny of the Shrine Maiden killed his abusive father in defense of his younger brother Souma.
* Destiny of the Shrine Maiden" like her. The answer Chikane eventually gives is "If I am the moon, then you are my sun: I may be beautiful and mysterious but I can only shine with your reflected light." Bonus points for this explanation being entirely consistent with the metaphysical laws of their universe. The reader can also see that Himeko is far less...obsessive than most of Chikane's admirers, and her presence helps Chikane not to brood so much.
* Destiny of the Shrine Maiden's ending was set off with Himeko asking this to Chikane, apparently not sure if telling Himeko she loved her was part of her plan or actually true.
* Destiny of the Shrine Maiden, when Chikane is being, in essence, erased from existence she declares that she will reincarnate. At that point Himeko promises to wait for her.
* Destiny of the three, but she does have discipline, strategic acumen, and incredible, bloody-minded tenacity. She's described as having elevated regular attrition warfare into a new form of war that attacks "the enemy’s very fundamental modes of being and knowing", which seems to mean that her relentless assaults gradually turn other civilizations as brutal and warlike as the Hive (which they consider a win, war being a moral imperative and all).
* Destiny, players get a new little resource known as Chroma that allows you to do this for your Guardians (provided they have gear that can use a chroma).
* Destiny plays around with this, as resurrection plays a huge role in the setting. Generally speaking, whether your revival works or turns out well seems to depend largely on which method is used:
* Destiny Quest: On multiple occasions Kushina has done this with the sudden summoning of cake batter in a battle.
* DestinyQuest. These will come in the form of Legendary Monsters (optional unique monster of great power and treasure) or Boss Monsters (monster that's necessary to defeat to continue your quest). One example is Ixion, the Wheel of Pain. This is a charred man affixed to a flying demonic torture wheel and it flies out to burn you to death in a difficult fight. You still have a good chance of winning and if you win while hexed, there's an extra piece of magical armour you can take.
* Destiny re-do all of Dinklage's lines and all Ghost lines in future DLC. Officially, it was attributed to Dinklage's availability.

* Destiny re-introduced eyecatches, showing different main characters doing a short dance routine around the series' logo on a green background.
* Destiny resembles the armor of a knight and flashes a bright blue, befitting of Guardians renowned for being fearless protectors who embody strength and self-sacrifice.
* Destiny's atmosphere recyclers packed it in over the millennia and the ship automatically stopped off at a planet where needed chemicals could be found to repair it. But the ship's autopilot was still set to take the ship back to hyperspace after a fixed period of time, whether or not the chemicals had been recovered by then.
* Destiny's Child", and "Bootylicious" were three of them. The other was either "Survivor" or "Jumpin', Jumpin'", right? Nope, it was "Bills, Bills, Bills".
* Destiny's Child and the accompanying music video received heavy rotation on television and made them into household names.
* Destiny's Child being the most successful) but will never come as close to Beyoncé.
* Destiny's Child developed a Hatedom, they rose in popularity and "Survivor" outsold their previous efforts. Matthew Knowles even says "There's no such thing as bad publicity" in her Driven special.
* Destiny's Child is considered to be this as the group planned to disband after the album due to the title meaning they had fulfilled their destinies.
* Destiny's Child or live performance, their outfits always had the same theme, but the specifics were different for each girl. For example, if the theme was a red shirt and black skirt, one might wear a tank top, another would wear a tube top, another would wear a halter, and when there were four members, the fourth might wear a baby tee or crop.
* Destiny's Child playing a guitar, as the song samples her song, "Edge Of Seventeen".
* Destiny's Child's former band. Even people who do remember their music won't be able to name its other members (even Kelly Rowland, who had a successful career of her own.)
* Destiny's Edge was once a guild formed to fight the Elder Dragons together, until they split up due to differences. Most of the plot of the main game involves
* Destiny seems dead set on averting this. Notably Hunters and Warlocks are given capes and coats respectively that flap around as they move. A good example is a Hunter on a Sparrow, as the cloak will billow in the breeze as the Hunter zooms around everywhere.
* Destiny, seems to consider a reset to be this, since he asks the reader not to trust it if they ever encounter a Cayde-7.
* Destiny seems to use a different method of travel that is slower/faster than normal hyperspace travel as the plot demands. The characters don't know much about it, so they just call it FTL.
* Destiny's emergency atmosphere-retention forcefields are only strong enough to reduce the flow of air through gaping holes in the hull, not stop it. It's possible that they used to be stronger but are now past their best-by date. They also may not have been designed to compensate for such extensive deterioration.
* Destiny: Several of the enemy factions have a suicide enemy type, which will approach the player before detonating.
* Destiny shows up at the start of the game, blitzes the Last City, defeats the Guardians, and captures the Traveler. The only reason the heroes have any chance is because Ghaul is obsessed with proving himself worthy to the Traveler, rather than just destroying everyone outright and being done with it.
* Destiny, speaks fluent English and uses human turns of phrase, and has designed his organization around capitalist ideals like fair compensation and paid healthcare time.
* Destiny's Road is set on a planet whose indigenous life uses right-handed proteins. This is initially problematic as they need to entirely sterilize an area of the planet so as to have somewhere to grow edible food, but it proves to have some advantages; it means they're immune to native diseases, and they discover that

the planet's sea life is the perfect diet food as their bodies are incapable of metabolizing it into fat.
* Destiny's Road, the planet Destiny's ecosystem is completely devoid of potassium, without which humans suffer brain damage and die. A ruling caste of "merchants" travel the titular Road trading potassium supplements for... pretty much everything they desire.
* Destiny's Star. They do not have doctors or healers, as anyone who gets sick or injured are immediately killed unless magical healing is available. The heroine gets a broken leg but survives by persuading them to wait until she completes a sacred duty first. Her leg is eventually magically healed.
* Destiny that is responsible for nearly destroying humans and is revered/worshiped by some of the aliens.
* Destiny: The Cabal are so adapted to their own high-gravity worlds that they have to wear specially-pressurized suits just to survive on Mars.
* Destiny. The end goal of Aetheon, the controller of the Vault, is theorized to be to fundamentally rewrite the laws of physics so that the Vex's existence and supremacy is a law of reality.
* Destiny, the Ghost. This colors their perceptions of their own lives:
* Destiny: The Jackolyte item makes the guardians who use it an example of this trope.
* Destiny there is a Grimoire card detailing a Titan punching the Anomaly on the Crucible map 'Anomaly' in an attempt to open it and see what's inside. 24 hours later, down to the second, the AI Warmind Rasputin drops a satellite on her in retaliation.
* Destiny, there is an exotic scout rifle you can acquire by completing a quest after beating the King's Fall raid. The Touch of Malice has a unique perk that causes the last bullet in the magazine to regenerate, at the cost of your health.
* Destiny; the survivors mature into Acolytes, who serve as basic infantry; surviving Acolytes then morph into Knights, reproductive males and elite heavy infantry, or eat the “mother jelly” and become Wizards, reproductive egg-laying females capable of flight and specialists in magic. There are a handful of variants on this system: Ogres are Thralls mutated with magic into barely-sentient living war machines, and there was a single “king morph” who theoretically ruled all the Hive, although in practice his two siblings, the strongest Knight and the strongest Wizard, had equal authority. There is also at least once instance of a female Knight (the aforementioned strongest Knight), and one male who looked a lot like a Wizard (although he didn’t seem able to fly).
* Destiny: The Traveler is a mysterious city-sized sphere that kickstarted humanity's Golden Age and created the Ghosts and Guardians as a last line of defense against the Darkness.
* Destiny, the Vex has taken control of Mercury, hollowed it out, and transformed it into a giant supercomputer that houses the Infinite Forest. Prior to their invasion, the planet had already been terraformed by the Traveler.
* Destiny. They're now counted as a separate species who fight alongside the rest of humanity.
* Destiny, this is effectively what happened with the Hive gods, particularly the siblings Oryx, Savathûn, and Xivu Arath. Using the power they'd acquired, they created 'throne worlds' or 'ascendant realms,' making it so that as long as they didn't die inside said realms, they were effectively immortal.
* Destiny timeline, with the second game being about the son of the heroes of the first.
* Destiny to the alien races, and spark effects for the mechanical enemies and energy or power attacks.
* Destiny (unlike the Fallen) who undergo metamorphosis into various biological castes.
* Destiny uses the atmosphere of a gas giant for braking when out of power for sub-light engines.
* Destiny War. He jumps out of the portal and then happens to see the massive wave of destructive/mutagenic Energized Protodermis coming towards him.

* Destiny was withheld from being given to reviewers due to Bungie wanting them to wait until the game was released due to its social aspects. While the game ultimately didn't turn out bad, it wasn't considered to be as great as it was expected to be.
* Destiny, which advanced to the point where they began using the stargates and slowships to colonize other planets. Unfortunately the colonies were then cut off when a supervolcano destroyed their homeworld and drones attacked their stargates, becoming lost colonies of a lost colony.
* Destiny" which are high-caliber, revolver-style pistols about the size of a sawn-off shotgun.
* Destiny. While several alien species worship it to some extent like the Vex and the Hive or at least revere it for their strength like the Cabal, the Scorn are the ones who fit this particular trope the most to the point they resemble dark crusaders.
* Destiny, who are also intent on plundering the Vex's technology, and the two are engaging in an endless war of attrition on Mars.
* Destiny willing to put aside the old hatreds and work with humans are still gleeful pirates, thieves, and outlaws... they just happen to be doing it to the enemies of humanity.
* Destiny wishes — any stray desire that becomes conscious thought is fair game for them to fulfill.
* Destiny with guns and physics-defying magic. It’s been attacked directly at least three times and been conquered once, but that didn’t last.
* Destiny with the new Striker variant turning the character into a player-guided missile that can also be used to make a dynamic escape.
* Destiny: You hear a lot of these in the form of ambient dialogue in the Tower, but the best is probably Lord Shaxx saying, apropos of absolutely nothing, "Yeah, well screw him."
* Destoroyah who went from a colony of microscopic crab-things to a giant scorpion-crab thing to a giant demonic crab colossus. The reference books explain this final form as being the result of Destoroyah taking some of Godzilla Junior’s DNA during their fight towards the end of the film’s second act, allowing him to grow an endoskeleton, which in turn enabled him to take an upright body plan and grow much larger.
* Destripando La Historia; Loki appears in the song of Demeter, Demeter and Sun Wukong appears in the video of Thor.
* Destripando La Historia started to be about musical videos about the origin of fairy tales and comic books characters, their videos about the origin of Greek Gods are the most popular and tend to produce the most memes. The six main brothers also tend to get cameos in mostly of their videos post-Zeus. Even among the Greek Gods, Zeus and Demeter are by far the most popular, resulting in larger roles:
* Destro has this sort of relationship with the Baroness. Unlike traditional versions of the romance where it's entirely consensual, he seems
* Destrophy blends several different styles each song, and it's still pretty difficult to categorize even if you break down every element they blend in.
* Destroy All Aliens. Gwen instigates the events of the movie by impulsively casting a spell on Ben when he's Upgrade, causing the Omnitrix to malfunction. But they barely dwell on her part in this and everyone spends most of their time chewing out Ben for his dishonesty and thoughtlessness.
* Destroy All Humans 2. The downside is that it drains his host's life.
* Destroy All Humans!, according to the "Lunarian Church of Alientology", they are "invisible rivers of mystical energy", and they want to build where the ley lines cross in order to use them to communicate interstellar distances with their minds.
* Destroy All Humans! after killing a human, which promptly dissolves into ash a few seconds later.
* Destroy All Humans! aliens, they're essentially driving their race into extinction.
* Destroy All Humans!, body-snatching becomes Crypto's primary way to disguise himself amongst humans by the second game.

* Destroy All Humans!, Crypto and Pox assume the first creatures they see - cows - are the dominant life form on Earth. An unsuccessful interview and some telekinetic stress relief later teaches them otherwise.
* Destroy All Humans!, Crypto has a shield that regenerates if he doesn't take damage for some time. If the shield goes down, he's able to be killed.
* Destroy All Humans!, Crypto's commander, Orthopox, uses a holographic projector called a Holo Pox Unit to communicate with Crypto from the mothership.
* Destroy All Humans!, Emperor Meningitis mistakenly addresses Crypto as "Klepto", due to being senile.
* Destroy All Humans!, especially in the final level of the first game.
* Destroy All Humans! for the mayhem Crypto has committed "using it straight". You'll also see a Spinning Paper if Crypto gets killed, describing the cover-up used for the capture of his body.
* Destroy All Humans! for voice acting flubs in the extras menu, set to a montage of glitches and goofy pictures from development.
* Destroy All Humans!: Furons speak fluent English, though they do apparently have their own language given the various symbols aboard the mothership. Crypto also uses his native tongue in some missions during the second game.
* Destroy All Humans! game is a parody of Sci-Fi Alien Invasion and the ENTIRE DECADE the game takes place in.
* Destroy All Humans! game, the Lunarian cult parodies this, run by S. Scott Calvin.
* Destroy All Humans! has the Abducto Beam, which you can use to pick up tanks, smash them against buildings, drain them of their energy, and fling them out to sea; or you can use it to, you know, abduct people.
* Destroy All Humans! has this for the Furons, Cryto and Pox in particular.
* Destroy All Humans!. In addition, even with the voice filter, Silhouette still sounds rather feminine.
* Destroy All Humans! insists on referring to MAJESTIC agents as "the men in really, really dark brown".
* Destroy All Humans!. In the second, "The Freak," a California hippy, occasionally has these moments.
* Destroy All Humans! is a game about the stereotypical inhabitants of the aforementioned floating disks. Laser beams and brain eating are just extra treats.
* Destroy All Humans!. It's one of the most useful weapons in the series since it deals good damage, has an excellent rate of fire, and has lots of ammo, but it has the slight drawback of leaving behind no bodies for you to harvest brains from.
* Destroy All Humans! kills by making the victim's head explode, and in the process extracts more Furon DNA (glowing brains) than killing by other methods. Try wrapping your brain around that, getting anally probed is so violating that your head explodes.
* Destroy All Humans!. Lampshaded in one conversation, wherein Krypto asks her how she managed to fit in it. Her response? "Shoehorns and lubricant."
* Destroy All Humans!. Later in the game, when you really do go to the moon, one of the sidequests involves receiving a delivery from a courier.
* Destroy All Humans! — the hippie commune leader Coyote Bongwater — has a hallucinatory rainbow ray gun, which causes your screen to wobble, turn multicoloured, and has colourful flowers pop up for no reason.
* Destroy All Humans!, meaning that every human has trace Furon DNA, a necessity for a race that's now reliant on cloning to reproduce and thus your reason to wreak havok upon them.
* Destroy All Humans! mentions that the Blisk aliens have "withering halitosis." The first game also has Armquist. If Crypto reads a soldier's thoughts during the Capitol City level, sometimes this will pop up:
* Destroy All Humans!. Near the starting point of one of the levels is a Make Out Point with two cars, windows steamed over and rocking back and forth. Naturally, you can do whatever you'd like to them at this point, such as telekinetically toss the cars off the cliff, or blow them up with a raygun. Might be considered an inversion as well, since here you're playing the alien sneaking up on the occupied

teenagers.
* Destroy All Humans! of a 1950's America setting) has been left untouched... written in a tone mocking the increased sensitivity of audiences due to the shifted cultural zeitgeist in the 15 years between releases:
* Destroy All Humans!, one of the side missions has you get a draft-dodging hippy to the base so he could serve.
* Destroy All Humans! parodies Cold War paranoia by making the citizenry brainwashed into believing all alien activity by the player character is the work of communists.
* Destroy All Humans!, Pox becomes this when he downloads his conscious into a float disk just before their main ship was destroyed. He stays this way for a decade before finally getting himself a new body, though not what he expected.
* Destroy All Humans! series. It keeps track of what clone you're currently up to.
* Destroy All Humans! series. Nothing has been said since October 2005, but most fans believe it was canned to make way for the game sequels.
* Destroy All Humans! subverts Plot Armor as death results in a new clone of Crypto the alien being created. Yet, it does not explain the lack of effect the original dead alien has on authorities.
* Destroy All Humans! takes place during the mid-20th century and you're an alien with cool rayguns and a UFO. What else is there to say?
* Destroy All Humans! that Crypto summons by dropping bait, whereupon it starts popping up from beneath any mook in the surrounding area and dragging them underground to feed on.
* Destroy All Humans! (the highest level antagonist), but only if you're on foot. If you're in your saucer, the tanks and missile batteries just keep coming.
* Destroy All Humans!), the last remaining thing from this time in Venus' history are spore samples from a carnivorous plant species that would be used as ammo for the Venus Human Trap weapon.
* Destroy All Humans!, the military arrive to oppose him but because their technology is much weaker and less advanced than Furon technology, Crypto manages to defeat the entire U.S. military within a few days and inaugurate himself as the new President of the United States. Even before and if Crypto never came to earth, the military was already doing a horribly bad job fighting for freedom because Majestic was mind-controlling American citizens with junk food, television, and a government-run by puppets (that includes putting in a puppet as the President) right under the military's noses.
* Destroy All Humans!, then proceeds to interrogate him. Most any answer the alien gives is a random phrase. For example:
* Destroy All Humans!. There's even a level about recovering your own remains.
* Destroy All Humans!. The sequel ramps it up by heavily implying your character is the first of these aliens in a very long time to have a, ahem, "package."
* Destroy All Humans! they give you a succinct sentence. Not always a relevant one, though...
* Destroy All Humans!, this trope is played for laughs in one of the final missions. In order to stop the superweapon going off, Crypto must cross the beams of a targeting system. The entire Ghostbusters conversation is used verbatim on why this would be a bad idea.
* Destroy All Humans! use the overwhelming paranoia around communism to cover up the actions of the protagonist, Cryptosporidium-137, who is actually an extraterrestrial. The population eventually buys into this to such a degree that people actually scream something among the lines of "communist" as soon as they see Crypto in his natural form, and the police and military report "possible communist activity" when the protagonist is going around vaporizing people and extracting brainstems.
* Destroy All Humans! Which kind of makes sense. They stand around all day, get fed and milked by the two legs...
* Destroy All Humans!, while looking for Coyote Bongwater, Crypto is given the option to threaten a bunch of hippies at a gathering for his location, and the result is a lame comeback.

* Destroy All Humans! will only give a brief high jump, Crypto can fly will this in the cut scenes .
* Destroy All Humans! winner Miss Rockwell is described as "having a brain the size of a peanut", which makes her the perfect candidate for probing.
* Destroy All Humans! with early humans, they had just finished eradicating the Martians.
* Destroy All Humans! with the planets' inhabitants, leaving their descendants with bits of pure Furon DNA. Unfortunately for us but fortunately for them, that planet is Earth.
* Destroy All Humans!, YOU are the invading alien. Crypto utilizes both infiltration and outright military force.
* Destroy All Humans!, you can use the phone not only to increase or decrease your infamy, but to simply prank call the police.
* Destroy All Humans!, you get the ability to brainwash people into being your loyal and loving servants.
* Destroy All Monsters, after Godzilla and his friends barely manage to defeat King Ghidorah, they don't even have time to rest before the Kilaaks unveil their second trump card, the Fire Dragon.
* Destroy All Monsters: aliens from the planet Kilaak set up a base on the moon and initially take control of 10 monsters native to Earth and send them to attack different cities around the world, then dispatch King Ghidorah as their ace in the hole when the other monsters are freed from their influence.
* Destroy All Monsters, and was still being repaired in the middle of filming.
* Destroy All Monsters, Godzilla shows up in the Hudson to give the city what for after the Kilaaks mind-control him and all the other kaiju.
* Destroy All Monsters have two forms. Their first form looks almost exactly like a human, as long as the temperature is high enough. Should it fall below a critical point, the Kilaaks will show their true colours, taking on the form of metallic slug-like creatures.
* Destroy All Monsters release added all of these in, as well as selectable subtitles.
* Destroy All Movies as "The best shot-on-video gay vampire comedy of 1988."
* Destroy and Revolution can sense each other and even when the power is being used.
* Destroy and Revolution where Makoto had learned about the One-ness and disappeared. He was alone and had no friends or family. No one, not even Makoto knows his name.
* destroy an entire army without leveling a city. Think this is going to be important sometime in the future?
* Destroy, a one-off comic that features a super-sonic impact of a superman spoof into the center of New York, flattening buildings for multiple blocks, with no one hurt.
* destroy a planet more than ten times the energy to blow up a planet), some have assumed it's a logarithmic scale.
* Destroy Destroy Destroy, they're clearly not as serious about it. (Stylistically, by the way, they're American power metal with harsh vocals.)
* destroyed all the time portals that would help Jack get back home But he didn't even age. He just grew that stupid beard.
* destroyed Buenos Aires as punishment for having opposed them in the first place.
* destroyed him in their second fight which Black*Star could never forgive, thus resulting in their final match to settle the score.
* Destroyed in Seconds had footage from a helicopter crash during a Russian airshow. The helicopters were Mi-2s, but the narrator continuously refers to them as "M1-2s". The narrator then calls them "state-of-the-art". They aren't, having been introduced in 1965 and phased out of front-line service in most armies which field them, including Russia's.
* destroyed in the film — Ripley's Pulse Rifle, Frost's Flamethrower and Vasquez's Smartgun were all inside the alien hive in Hadley's Hope when the atmospheric plant exploded, and would have been vaporized regardless, while

Gorman's and Vasquez's Pistols were destroyed when they detonated a grenade in the tunnels near the Medical Wing. In gameplay, you can find these weapons in random spots, including tucked inside a cargo container (Vasquez's Smartgun), on the Sulaco (Hicks' Shotgun) or other undamaged locations. More notably, the Legendary Weapons all require special ammo to use, even though they are functionally identical to the normal weapons and shouldn't have any problems drawing from the same ammo pool.
* "Destroyed Lich with fire, wrecked Kary with might, sockin' Kraken blockin' knockin' as we Nuke Tiamat tonight! A-na-na, I got the Crystals, time to go back to the past, as I put this motherfucking sword in Chaos' ass!"
* destroyed the city and in the process kickstarted the genocidal Dragon/Cubi War that resulted in the deaths of almost all of Cyra's children save one and the complete destruction of many other clans.
* destroyed the company, they were trying to enter the taxi and fleet car markets despite lacking the resources of GM, Ford, or Chrysler. Their fate was sealed when they merged with Studebaker without being informed of the latter's financial troubles, which forced them to dump their in-house designs in favor of rebadged Studebakers to save money.
* destroyed the Earth and rendering it more or less uninhabitable who continue to call out the fact that the kids fail to win the game and nothing they do will change that. This doesn't seem to deter John in the slightest.
* destroyed their flagship is that without the Minbari stealth, superior Human skills would have ultimately won.
* destroyed", while Yoda later warns Obi-Wan that Anakin is "gone" and has been "consumed" by Darth Vader — a line probably written for the purpose of bolstering the point-of-view of Obi-Wan's original statement to Luke. Even more so, throughout the final fight between Obi-Wan and Anakin, you can see Obi-Wan constantly trying to reach his friend and former apprentice and bring him back to his senses. It's only by the end of the fight where he seems to come to the conclusion that his friend is no more. It's likely the same train of thought Luke had in the above capture scene later on.
* Destroyer (1988), Ivan throws said priest through the window into the witness room.
* Destroyer (1988): Susan, and later David, finds a severed head in the prison photocopier.
* Destroyer (1988) there, which is interrupted by a prisoner everyone thought dead.
* Destroyer Deity: A God, Goddess, or other entity associated, or solely responsible for, mass destruction.
* Destroyer Deity seeing the planets he destroys explode, and never gets tired of the sight.
* Destroyer Deity that every other god wants to keep imprisoned. Worshipers of him want to free him so he will destroy all of creation.
* Destroyer Deity Vanguard that is difficult for the opponent to attack into conventionally.
* Destroyer Dom of the Dark Axis is a partial example. He doesn't actually
* Destroyer for the two, just to emphasize the disconnect and the frustration that an experienced, professional killer feels trying repeatedly to kill people who apparently don't even notice that they're being attacked.
* Destroyer it in the several of the novels of the long-running series by having everyone note how ridiculous it is to only send one man out to stop the latest menace. Although this may also be the result of Remo being so top-secret that only the President gets to know that he exists, or at least originally being so. In the first book of the series it's explained that the secret organization CURE is allowed to lie, cheat, and steal, but not to kill. This is because the President is worried about creating an agency that could be a threat to the country. CURE finally persuades the President to agree to one man. When one CURE member laments that one man is not enough, the head of CURE replies that's all they are going to get, so he better be a badass. Luckily for CURE, he is.
* Destroyermen, a large female Grik who rules all. The Hij spend their time running

the Grik Empire and finding more prey to hunt (otherwise, the Uul will get restless and turn on each other).
* Destroyermen and have even learned to understand and speak (to an extent) English. They still hunt but only for food and to kill dangerous predators. They also defend themselves against other tribes. They also never engage in cannibalism and consider the thought repugnant, unlike their Grik cousins.
* Destroyermen books, Silva discovers a flying lizard that takes a liking to him, much to his chagrin. Being an enlisted man, Silva swears a lot, in particular calling the parrot equivalent a "stupid shit". You can probably see where this is going.
* Destroyermen build him a "corvus", a boarding ramp with a spike of Roman design. His gunners then demast the Grik ship and, after coming alongside, the corvus is dropped, embedding itself in the Grik ship's deck. The first party, including Reddy himself, makes it through ok. Unfortunately, the Lemurians built the corvus out of bamboo, which breaks when the second party tries to follow. Despite this, the first party manages to fight through the ship and slaughters every single Grik, except their captain, who commits suicide. For the Grik, this is standard, as their ships lack any weapons beyond primitive firebomb catapults. They just crash their ships into the enemy and board it.
* Destroyermen), but it failed, the Company spun it into an attempt on the Governor-Emperor’s life, and Bates was forced to flee into exile under an assumed name. Meanwhile, the Governor-Emperor, suspicious of the Company’s machinations and fearing for the safety of his young daughter Rebecca, sent the Princess away from the Isles for her own safety. By coincidence, she was booked incognito aboard the same ship as Bates, who rescued her at the cost of his left hand when the ship was sunk by a leviathan/mountain fish. It takes several books and help from his American allies for Bates to restore his reputation.
* Destroyermen. Despite this, it's stated that the League's fleet far outclasses these minor losses.
* Destroyermen Empire, located on Madagascar. The surviving Grik pull back their forces and set up shop in Sofesshk, the ancient Grik capital, located on the north bank of the Zambezi River in Africa. The Alliance continually sends bombers to assault the city to keep the Grik from becoming too complacent.
* Destroyermen-era battlecruiser. However, the collison doesn't do much damage to the big ship, not until one of the destroyer's crewmembers sets off the depth charges on board. Even that is not enough to sink the battlecruiser. It does, however, work for a Japanese plane that rams an American one in a last-ditch effort to destroy it (the Japanese crew was specifically ordered to use this method as a last resort and to not bother coming back to report failure).
* Destroyermen. Even after he becomes effectively an admiral, with other captains and at least one admiral under his authority, he objects to being called by any rank higher than "captain."
* Destroyermen: Grik charts tend to mark deep bodies of water with glyphs along these lines.
* Destroyermen has the Grand Alliance (formally known as the Grand Alliance of all Allied powers united beneath [or beside] the Banner of the Trees), the Holy Dominion, the Republic of Real People, the Celestial Realm, the United Homes, the New United States, the Brotherhood of Volunteers, and Les Confédération États Souverains (the Confederation of Sovereign Governments/States). Averted with the Empire of New Britain Isles, the League of Tripoli, and the Shogunate of Yokohama.
* Destroyermen himself be captured but was merely overwhelmed by the Grik). By that point, Kaufman is on the verge of insanity and has told his captors all they asked. Later, an American plane is sighted spying on the Grik-Japanese forces. Captain Hisashi Kurokawa orders his XO to question Kaufman about it and punish him if the prisoner withheld information. Kaufman admits he knew about the plane but thought it lost. When asked why he didn't mention it before, he answers with this trope.
* Destroyermen, is also a Catholic, although there's constant friction between him and Sister Audrey, who doesn't believe that an evolutionist has any right to call

himself Catholic.
* Destroyermen is packed with these, especially closer to the end of the series with larger warships duking it out. Although carriers and torpedoes do make a huge impact as well.
* Destroyermen Lemurian allies do take heavy losses over the course of the series, but they inflict casualties several orders of magnitude worse on the Grik.
* Destroyermen mentions the US Navy practice of dyeing officers' white uniforms with coffee in wartime to make them less conspicuous.
* Destroyermen, most of whom are too dumb to operate a heavier-than-air craft. They are also shot down incredibly easy with by three P-40s with tracer rounds.
* Destroyermen series, Into The Storm, Benjamin Mallory, Bristar, and Ed Palmer quickly patch a desereted PBY and flies away from the destroyer USS Mahan to deliver news of what happened to Captain Reddy of USS Walker.
* Destroyermen series the Grik Empire controls, at least (the exact extent is unknown) India, southern Pakistan, Sri Lanka, the Persian Gulf and most of the eastern coast of Africa. Meanwhile the Dominion controls Mexico, Central America and an as yet undisclosed portion of South America. The Alliance is heading in this direction, controlling the Philippines, parts of Indonesia and Australia and most recently, Japan and the Hawaiian Islands voluntarily and Sri Lanka by conquest.
* Destroyermen series, there exists a species of cat-lemur humanoids called Lemurians, fittingly enough. Lemurian females have been noted early on that proportionality with humans are very similar, specifically the breasts. This leads to some comedic/awkward moments as the bulk of the humans are sex-starved males, and one of the secondary conflicts of the series.
* Destroyermen's machine shop so he can use it as a weapon against the Grik.
* Destroyermen's midship deckhouse. Mertz never knew what hit him, and there wasn't even enough left of him to bury when it was over.
* Destroyermen. So far the technologies transferred include (in roughly chronological order): modified Greco-Roman infantry tactics and weapons, gunpowder and cannons, oil drilling, the Bessemer process, steam propulsion, muskets, electricity, seaplanes, and of course, radio.
* Destroyermen's Y gun, end up killing it. They later learn that blasting sonar tends to chase away any mountain-fish in the area, so it becomes SOP for all ships traversing seas and oceans.
* Destroyermen takes a 10 inch shell to the bridge, killing all of its officers. When Captain Reddy makes contact with the ship, an engineering officer is the captain.
* Destroyermen that they left the king all their spears and provisions, claiming that he should survive for some time. He also swears that the king will not die by their hands. What he omits is that the spears were used to pin the king's arms and legs to a tree, and his belly was sliced to allow his entrails to be pulled out and hung on the branches to attract predators. The food was also left for this purpose. To be fair, the king deserved this.
* Destroyermen, the Grik equivalent of an admiral is "General of the Sea". Eventually, after they develop aviation, they create the rank of "General of the Sky".
* Destroyermen their superiors to return to the rear so they don't have to worry about protecting them.
* Destroyermen (they also call them Monkey-Cats or just 'Cats, while the Empire of New Britain calls them Ape Folk). The Lemurians call themselves Mi'Anaaka, which just means "people".
* Destroyermen to a parallel Earth where evolution took a drastically different turn. They later find out that other ships were transported centuries earlier and a few show up later.
* Destroyermen trilogy has domesticated elephant-sized dinosaurs which the U.S. destroyer crews, not knowing the "brontosaurus" was actually an apatosaurus, think of as miniature brontosaurs and call "brontosarries."
* Destroyermen with the discovery of an offshoot species called the Tagranesi who later prove to be valuable allies.

* Destroyer miniseries, where Keane battles a giant monster and brutally rends it limb from limb with his inhuman strength. Later he reveals that only after he'd torn its tongue out did he realize it was only about as intelligent as a dolphin (as opposed to the terrorists and supervillains he's much more sanguine about killing) and meant no actual harm, guiltily likening the experience to beating a dog.
* Destroyer of Light and changes shape. When he becomes a grapevine, she call's him a "mommy's boy", and smiles.
* Destroyer of Light, there is a scene where Persephone has fallen asleep, and her blanket lies on the floor. Her mother puts it over her again and quietly sneaks out of the room.
* Destroyer or cruiser carriers lack the firepower to be true line combatants. The closest are dreadnought carriers. The Morrigi (who else) flagship exemplifies this trope.
* Destroyers are a little bigger, and the first ship class able to mount large-sized weapons, but they also make good picket ships when outfitted with lots of point-defense systems.
* Destroyer series because both Remo and Chuin smash phones all the time. They usually tear them out of the walls.
* Destroyer series comes with a bunch of fighters (it's never specified exactly how many, but pretty much "lots"; probably hundreds) plus beam cannons to take on other enemy warships.
* Destroyer series of novels, Dr. Smith has a Cyanide pill in a false tooth. He would swallow it if C.U.R.E.'s security is ever breached.
* Destroyers (Planet Eaters, Savage Swarm): Giving these creatures a moral alignment would assume they were capable of caring about morality. They're mostly just hungry. It's not clear how many of them are even sapient.
* Destroyers, up until the end of WWII. Generally the fastest ships utilized in fleet roles, the massive engines needed to propel the ships to such speeds meant modest armament, short range, and absolutely no armor whatsoever. But while high-explosive shells of any caliber would rapidly shred them, destroyers were so fast and maneuvered so wildly that fire control systems of the era simply couldn't cope. The only solution was to
* Destroyer. The example that comes to mind is the Executive of the Vox network trying to take over a rival via using the Evil AI FRIEND.
* Destroyer: The smallest hypercapable warship built by most first-rate navies, including Manticore and Haven, and mostly geared toward commerce protection. They also serve as scouts for full-on battle fleets or battlecruiser task groups.
* destroy every other artificial intelligence in the galaxy, including the geth (if they are still alive) and EDI. Even worse, it's also the only
* destroy herself along with the Lord of Terror AND Keiichi. Subsequently, Skuld erases the floppy disk with a strong magnet.
* destroy his vampirized daughter Mina holds his hands to his face and proclaims, "Oh, the devil." Dracula, who has entered the room without him noticing, answers "I'm not as bad as that."
* Destroying all of a ghost's fetters will un-anchor them from the world of the living, confining them to the depths of the Underworld. Resolving said fetters (using the gun that killed the ghost as evidence to convict their murderer, for instance) will allow them to pass on to the true afterlife instead.
* destroying any infrastructure that will be useful to the oncoming armies could be odd by Western European standards, but they were often very ingenious making clever use of nature and elaborate deception operations. By the last stages of the war they had enough tanks to engage in blitzkriegs in the German style and while these weren't usually carried out with the German smoothness they had their own touches like support from aforesaid guerillas and fresh-water vessels and a large supply of horse cavalry which they maintained long after the other allies had phased it out.
* Destroying a ship's rudders is also a viable tactic, since the ship loses its means to maneuver. A famous example would be the German Battleship, Bismarck, which took a torpedo to the rudder, jamming it locking the ship in port side turn. Unable

to repair the damage, the ship was left a sitting duck for the pursing British forces, who quickly pounced on it with everything they had.
* Destroying Eris instead of Damocles (the president will ask you if you understood the mission)
* destroying evil. Problem was, its creators didn't realize that a sword has no concept of morality, so Nightblood continually goads its wielder into trying to kill everyone in sight, just to be on the safe side.
* Destroying furniture is a time-honored tradition in Professional Wrestling. Nothing says badass like bodyslamming your opponent through the announcer's table.
* Destroying Mandragora and the Obsidian Circle didn't destroy the Ancestral Witches; this instead freed their spirits, and are now looking for new hosts to possess.
* destroying one of two other unrelated planets (a newsflash will report the destruction of the planet and inform you that you are now wanted by the police)
* destroying one Transmitter that Wily has used to control the robots, with Joe being killed in the ensuing blast, Light realizes that there is a second Transmitter, and the attack is exactly what Wily needed in order to declare Martial Law on the city and take complete control.
* Destroying the author's computer, on which the game itself supposedly runs (all planets in the system will explode one by one, and your on-board computer will
* destroying the entire world, forcing Eldred to escape into another dimension.
* destroying their house instead, they have to give Dee's newly-acquired house to the family in compensation.
* Destroying the radio or other means of communication needed to call for help.
* destroying the Resistance and retrieving back Xykon's phylactery Then he buries the location with an earthquake.
* "Destroy Malevolence" (after Anakin sabotaged the ship) in one lift just before a squad of battle droids enters via the other lift to check on the status of the repairs.
* Destroyman: A dirtbag mailman who stars as a superhero in his independent films that convinces
* Destroyman, a wannabe superhero wish a masked costume, deadly gadgets, and a twisted mind.
* destroy said undisclosed moon or planet. The first one described, in the episode "Kawaii", features a lengthy battle between the descriptively named OctoBot Plus Two and the Giant-Ass Schoolgirl That's Kawaii as Fuck, Yo.
* destroys an entire floor of the house yet somehow leaves the bad guys largely unscathed.
* destroy science and create magic. as much as possible to save time, again taking the known and making it the unknown. And at the end of day, an engineer should have taken simpler components and made them into something more complex, and therefore less knowable, even if they aren't trying to throw people off.
* destroys his helmet, kills Snoke, tells Rey to let go of the past (which includes both the Sith and Jedi Orders), and takes over Snoke's role as Supreme Leader
* destroys the Resistance, he kills everyone, including his own minions. .
* Destroy the Abusive Home: A character destroys the home they grew up in and were abused.
* destroy the broken generator and are sent away to a place where they can't mess with it again. The way this is done is by making them win a contest to go to a Greek island, which was their entire goal. Bonus points because another character actually tries to comfort them about it, before they reveal their goal.
* destroy the city and slaughter the inhabitants instead (this was common among slave societies, naturally).
* destroy the Earth because Goku made him bleed a little. This was because Vegeta was an upper-class Saiyan Prince while Goku was a lower-class runt and shouldn't have enough power to challenge him.
* destroy the Earth, he won't be able to rule it and sacrifices himself for Gohan.
* destroy the entire solar system, and release the souls of the Keywork!!!.
* Destroy the Evidence: If the evidence is a document, e.g. a letter, a contract or

something similar.
* Destroy the Evidence: Someone who seems not to be directly involved in a crime destroys or hides some evidence relating to it.
* Destroy the Evidence: When you're unable to hide the evidence, you may have to just get rid of it permanently.
* Destroy the Godmodder 1500 posts of similar length, two others are still ongoing, the shorter of which has capped 3000 posts and is still going strong, and the other with over 18 thousand posts (which often have ridiculous amounts of text in them) plus an off-topic thread with roughly 4000 posts of its own. You've got a lot of reading ahead of you.
* Destroy the Godmodder 2 uses these as the basis for the godmodder's armies fairly often, usually in the shape of Minecraft mobs.
* Destroy the Godmodder, actions are more powerful and far more likely to succeed when they happen on milestone posts. The first post of a page milestone, or a number of posts milestone, a slight bonus is even given if someone calls their page claim. There was also a very big and interesting event involving time travel shenanigans on the one year anniversary.
* Destroy the Godmodder: a fine tradition. One of the first events involved a portal summoning large numbers of these.
* Destroy the Godmodder: A large swarm of flying sharks was summoned to take down a rogue team member hiding beneath a giant pile of fish in the tvtropes session. Needless to say, it did not go as planned.
* Destroy the Godmodder: A meta example: pionoplayer and aegis have both gotten into trouble for finding and abusing loopholes in the rules to gain advantage over other players.
* Destroy the Godmodder and have its power be ingrained in reality's function; the Terminae, a ton of Random Near-Omnipotent Beings; the higher-ranking Unfantomable Ones; and many others.
* Destroy the Godmodder, and that his name is Richard, and not much else.
* Destroy the Godmodder consists of lots of strings of this. Almost everything big that happens was alluded to earlier, was a failed action that got upgraded, or a summon that a player has been charging for a very long time. The vast majority of these are drowned out almost entirely by the swarm of player actions and entity attacks up until they take the forefront.
* Destroy the Godmodder. Even if the Godmodder isn't the target, adding humor to an attack usually boosts the damage that it deals.
* Destroy the Godmodder: Even in the first game, when the Godmodder fled to the safety of his castle, NPC Hunter Groups showed up to fight him.
* Destroy the Godmodder falls squarely into this category. Sometimes with entire armies getting wiped out in one shot by relatively weak entities. This is also the Godmodder's primary way of keeping the players from winning, as if the Godmodder has too many mooks they'll automatically nullify attacks against him, so keeping their numbers limited is why summons are important.
* Destroy the Godmodder functions off of this, even as a game. It doesn't matter how good your attack is, if it isn't funny, it will almost never work. On the flip side, something that is inherently a baby of this has a far greater chance to succeed. One of the earliest examples was the summoning of Magikarp, who proceeds (through screwy mechanics) to flail at the godmodder, and then summon a tsunami. Guess which one connects.
* Destroy the Godmodder had the creepy adrenaline rush. A player summoned a dummy of themself, it then proceeded to turn life into a nightmare for PG entities until it was destroyed.
* Destroy the Godmodder: Has a broom capable of dealing damage to an omniscient being and an extremely overleveled weapon that happens to be a fish wrapped up in a newspaper.
* Destroy the Godmodder has a more limited example. The entire community ragequits permanently, leaving the target (server or Minecraft) completely desolate and devoid of activity.
* Destroy the Godmodder has had a few instances of this. The GM of the second

thread, TwinBuilder, got summoned as an entity in Act 2. He became one of the most important characters in the story.
* Destroy the Godmodder has had multiple uses of this on all scales, from as small as an airstrike, to the UNSC Preston Cole doing orbital bombardments, and it doesn't even stop at having the entire solar system thrown at the godmodder. Probably one of the most notable examples would be ninjatwist's meteor strike that completely obliterated the PG side in one shot.
* Destroy the Godmodder has many such events, the first notable one being the reapers. A massive army of them gets summoned, what happens? The godmodder mind controls them into changing sides. It isn't the worst offender either.
* Destroy the Godmodder has multiple examples, usually as a result of particularly powerful enemies.
* Destroy the Godmodder has several of these, especially since the Alchemiter has been created.
* Destroy the Godmodder has the creepy dummy. It was summoned rather innocently in the first game wearing a shirt that said: "godmodder's friend" on it. Then it started to go downhill.
* Destroy the Godmodder has the godmodder. The few times he manages to escape the conflict, something completely bizarre and random will be summoned by a player and attack him for no reasons. Up to and including a seemingly harmless dummy that was actually his friend.
* Destroy the Godmodder has this used often. The godmodder is fond of throwing players that annoy him into the sun, player's are fond of throwing entities into the sun.
* Destroy the Godmodder have a specific weak point that can be discovered, allowing the entity to be killed much more quickly. This helps because Hostiles also tend to have large amounts of health.
* Destroy the Godmodder: Ikea, the king of tabletopia, was summoned as a boss. Not only that, but his entire army went down in three rounds. Ikea survived twice that length, then kidnapped the godmodder.
* Destroy the Godmodder: In a large way. Just about anything that people make passing reference to is intended to be used as one by some person or another, although not all of them end up doing such, it happens often enough.
* Destroy the Godmodder: In Be the Godmodders, you played as godmodders, trashing the last safe haven left.
* Destroy the Godmodder in DTG2, ridiculously over-the-top guns can became signature weapons.
* Destroy the Godmodder in the post), the owner of Dave proceeded to summon him again. One game after his most recent death.
* Destroy the Godmodder invokes this trope occasionally. For example, when the Glitch turned the landscape and very ground itself into a massive roiling death trap.
* Destroy the Godmodder invokes this trope repeatedly. The AGs will be going along, trampling the shreds of the godmodder's forces, then suddenly a horde of giant mechs attacks them. Again.
* Destroy the Godmodder is a great place for this. Many such creations have died, up to, and including, Cthulhu himself.
* Destroy the Godmodder: is full of them. What is relevant to the plot isn't always what attracts the attention of the players...
* Destroy the Godmodder is guaranteed to be useless otherwise. Unless it's so awesome that the GM cannot find a way to block it.
* Destroy the Godmodder is just that. There are little details, but the title sums up the essentials of the entire game. Destroy the godmodder.
* Destroy the Godmodder is the highest ranking godmodder in Minecraft. However, to the ascend the ranks of the godmodding tiers, one must defeat other equally powerful godmodders. It took a lot of asskicking for the Godmodder to reach the top.
* Destroy the Godmodder is this. You can jump in as you like, but certain events are oftentimes confusing if you don't really know exactly what's going on. There

were many complaints about this during the Homestuck Invasion, as many players had issues with having no idea what was going on because of how many references there were to Homestuck at the time.
* Destroy the Godmodder It gets even worse when you realize that you could technically include all of the other characters from the various universes that affect what is going on if you include off-screen characters, which all in all sends the character sheet into the thousands.
* Destroy the Godmodder it gets used occasionally. Mostly by the Godmodder, but sometimes used by other entities to show how powerful it is.
* Destroy the Godmodder: Many hostile entities have a specific weak point that can be discovered, allowing the entity to be killed much more quickly. This helps because Hostiles also tend to significantly more powerful than the standard entity.
* Destroy the Godmodder: Many players' reactions when they discovered that twin has to die to keep the timeline on track.
* Destroy the Godmodder: Most things used on the godmodder, and a number of attacks aimed at Piono post-MBoA.
* Destroy the Godmodder: One of the benefits for the pro-godmodder side. It has influenced several entities, including the Grim Reaper.
* Destroy the Godmodder, one particular group of minions will be a cut above the rest. More generally, there are entities that are not boss level but are still important to game progression and wield unusual powers, or are even just particularly powerful player summons.
* Destroy the Godmodder (or Descendants) is currently terrorizing. They don't do much though.
* Destroy the Godmodder: Piono and Binary both have one, and both of them consist of really nasty villains from other areas.
* Destroy the Godmodder: Played with. Spoils of War are pieces of bosses acquired by the players that killed them. They have the added bonus of being usable in combat.
* Destroy the Godmodder, players were just trying mostly in vain to damage said Godmodder. Then the Terror Zombie and Terror Skeleton joined the battle, and the number of poster-summoned entities went from zero to 5 in just a couple of pages. It never stopped there.
* Destroy the Godmodder. Quite a few of the characters (especially the ones that know the one summoning them, and even more since the players themselves are characters) are quite knowledgeable about the fact that the entire thing is fictional.
* Destroy the Godmodder: Several in the second game. Terra Firma is an enormous hammer with a head over 20 feet in width.
* Destroy the Godmodder: Several players have claimed to be or actually are this. The_Serpent is/was the only player with knowledge of the psi-godmodder artifacts.
* Destroy the Godmodder's tvtropes session had this trope used by the sentient armors under wyld's control: Formation Omega Standard and Omega Phalanx.
* Destroy the Godmodder, the AGs sometimes end up doing more damage to their buddies than the PGs do.
* Destroy the Godmodder: The end of the first game ended with the godmodder rage quitting, vowing that he would get revenge on everyone.
* Destroy the Godmodder: The Godmodder has this. An attack that could kill another entity (like a headshot or being flung into a black hole) would do nothing to the Godmodder.
* Destroy the Godmodder: The godmodder is well defined here, despite being able to take down things like massive battle fleets and Chuck Norris himself with minimal effort, the godmodder has already been defeated twice.
* Destroy the Godmodder: The godmodder. The players threw a flash mob party that was meant to be an attack on the godmodder. The godmodder was not aware and thought they were ignoring him and trashed it the round it started.
* Destroy the Godmodder: The Star Destroyer that got summoned in Act 3 was boarded by three different armies.
* Destroy the Godmodder: The UOSS was a gigantic spaceship summoned in the second

thread. When it was destroyed, its chassis fell onto the Battlefield, killing almost everyone on it.
* Destroy the Godmodder. The various settings of the games range from a crater-filled, bloodstained battlefield to a psychopath glitch-creature's mindscape. No matter where the game takes place, there's always death. Tons of it.
* Destroy the Godmodder this was used many times against the godmodder.
* Destroy the Godmodder to prevent attacks from affecting other factions. This crevasse must always be bridged to complete the challenge and resume attacking the Godmodder.
* Destroy the Godmodder. Upon the creepy dummy's arrival: "What?! How is thing even on the field? It completely breaks the game!"
* Destroy the Godmodder: Used by an ever-increasing number of players in the second game, culminating in piono using time-stepping, which combines this with time-slowing to allow the user to move effectively instantly.
* Destroy the Godmodder: Used lightly on occasion, and also lampshaded with the Glitch, which at one point became so bad players had to type in a specific font to keep their posts from being obliterated.
* Destroy the Godmodder: Used often by high-tech entities. The Preston Cole has several layers, each one has a different effect and aegis described the workings of all of them.
* Destroy the Godmodder: Used sometimes as a large attack, with many entities equipped with large numbers of machine guns. Now comes in weapon form: The giga gun, which has roughly three times the fire rate of a minigun and deals the same damage as a sword that can freeze things to absolute zero.
* Destroy the Godmodder: When Hostiles were first created in the second game, their immense power was supposed to be balanced out that they would all have a weak point, which when discovered, could be used to take them down with relative ease. However, this mechanic was eventually dropped as the game progressed.
* destroy the planet and everyone on it just to save face, while the two "protagonists" laugh their asses off at their little "prank".
* destroy the Poképlanet, but doesn't know Hyper Beam yet when you recruit it.
* Destroy The Porn is about Joe, a guy who dies, goes to Hell, and demands Satan let him go back to Earth to destroy his enormous porn stash before his mom finds it.
* Destroy the Product Placement: Something from a real world brand gets destroyed.
* DESTROY!!, the Red Basher goes berserk and demolishes Manhattan. When Captain Maximum tries to stop him, he ticks off the Red Basher so much that he winds up his famous "Big Bang" punch — which sends Captain Maximum all the way to the moon.
* destroy the second to last Gate stronger enemy groups closing in on their position.
* Destroy the Security Camera: Breaking security cameras so you don't show up on them.
* Destroy the Security Camera: Getting rid of security cameras so you don't show up on them.
* Destroy the Villain's Weapon: A hero manages to stop the villain by destroying their weapon.
* destroy the weapon — and this is with a mere projection of the Demonlord on Magnamund, much weaker than his true form. You need to find their specific weaknesses or use their true names against them. On the other hand, the Sommerswerd once again always proves adequate for the task, although you must be ready for very tough fights.
* destroy the world in 12 hours. In this case, he's simply insane. He doesn't want anything; he's just destroying the world on a whim, and wants you all to know it so he can enjoy laughing at your terror. If this is the case, he will literally do it — once he mentions the term "destroy the world", everybody watching (apart from the Heroes, of course) will begin screaming, and we will be treated to a montage of various rooms with screaming people running around, and the TV set with

just the villain laughing on it in the background. Fortunately, his desire to witness the world's panic gives the Heroes plenty of time to foil his evil plans.
* Destructible Projectiles: Projectiles can be taken out by hitting them with an attack.
* Destruction and Erase are the most egregious exceptions which prove the rule. They are terrifyingly lethal abilities which utterly destroy a person's body and soul down to the smallest particle. But even more horrific than that is that their users can do so almost instantaneously and with little time to dodge or defend. Zen-O's Erase can even wipe out an entire universe or timeline with a mere thought or gesture, which is what makes him
* Destruction Derby to drive like a maniac and smash into everyone as simply coming in first won't get you enough.
* Destruction in more than few games in the series when used properly.
* destruction of a massive industrial installation and thousands of deaths
* destruction of a sun at a set distance on a random trajectory are just astronomical.
* destruction of Earth applies, and it's genuinely dramatic instead of a gag like it's been for the entire rest of the show.
* Destruction of Faena, Mars' surface is made inhabitable by bombarding it with rockets made of ice, which melts, creating the first ocean.
* Destruction of Phaena by Alexander Kazantsev, the eponymous planet's first (and last) space station was a ring that used centrifugal forces to emulate gravity. There was also a compartment in the middle of the ring, where they grew edible plants, which profited from the lack of "gravity".
* Destruction of several games in the series. However, Dagon ultimately subverts the trope. While he is highly destructive, he cannot be considered any more truly "evil" than a destructive act of nature like a flood or an earthquake. Dagon also has several redeeming qualities within his sphere, such as governing over Change, which a functioning world requires to exist. (If the old is never "destroyed", there can be no room for anything new.)
* Destruction of the Endless, the anthropomorphic personification of the self-named cosmic principle allies himself with the heroes.
* destruction of the Project Insight Helicarriers then it zooms in on the "23" casualties with a pause and adds 23.
* destruction of Thessia, Kai Leng sends Shepard an e-mail where he childishly taunts them for their failure and brags about how he'll be the one to end "the Legend of Shepard".
* Destruction school entry above, the loot that you can recover from the ash pile is just the same as it would be if the target's corpse was still intact.
* destructive fire, the term still refers to mass-murder or a mass-casualty event on an extreme scale, such as genocide or nuclear war. Of course, that last one still implies death by nuclear fire.
* destructively as human as he is, and despite Vega's massive muscle development, it's almost certainly going to end with him getting flipped, quite possibly by the comparatively slim female Shepard.
* "Destructive Nature": Dr. Viper, annoyed that one of his Plantimals
* destructive pranks; he was just as bad when he was in military school, but became more mature when he travelled to work in an Alaskan logging camp and then on a cowboy ranch.
* Destructive Romance: A relationship that is depicted as very unhealthy and dysfunctional (not always necessarily abusive, but still not a romance to aspire to).
* Destructive Romance: A very unhappy and horribly abusive love relationship.
* Destructive Romance develop some feelings for him—even if those feelings weren't the unconditional love Spike wanted from her.
* Destructive Romance: Love can lead to very bad things not only to yourself, but for everyone around you.
* Destructive Romance: Love relationship that causes one or both parties nothing but heartache and possibly even death.

* Destructive Romance: Two romantic partners have a destructive relationship.
* Destructive Savior: Heroes who do collateral damage while saving the day.

"So I think the real question you have to ask yourself, Detective... is how much more do you really want to know?"
* Detective Carter is actively trying to track Reese down… for the first few episodes, anyway.
* Detective Chimp detective. One team up story is actually called "The World's Greatest Detective and Batman".
* Detective Club: The Girl Who Stands Behind. He’s suitably horrified.
* Detective Comics #247, 1957), Batman is exposed to a chemical that makes him pathologically afraid of bats, including his bat symbol. The Caped Crusader temporarily assumes the secret identity of Starman until he finds a way to conquer his phobia.
* Detective Comics #374, Robin gets assaulted and Batman deduces that the man responsible is boxer Jim Condors. However, upon attempting to turn him in to the police, Batman is informed that Condors was in the middle of a boxing match when the assault took place. Batman later figures out that Condors had a twin brother and was able to pull a twin switch in order to get revenge on Robin for sending his

brother to jail.
* Detective Comics #440. When Damon Nostrand attempts to run him down, Manhunter drops underneath the vehicle and rips the fuel tank open with a knife. He then tosses a lit match into the trail of fuel the car is leaking, which ignites and blows up the car.
* Detective Comics #500, where a dying detective fakes his own murder at his retirement dinner, causing the other detectives at the dinner to go after the mobster he framed for the crime.
* Detective Comics #826, in which Tim Drake ends up accidentally driving around Christmastime Gotham with The Joker.
* Detective Comics #833 Zatanna is shot in the throat by the Joker and dunked into a tank filling with water, effectively keeping her from reciting her incantations backwards. When Batman escapes his own deathtrap to free her in #834, he finds her throat completely healed. Upon inspection, Bats discovered she'd used her own blood to write "HEAL ME" backwards on the inside of the tank's lid.
* Detective Comics Annual, he begins repeating "no one there" in shock . It is unknown when he recovered from this.
* Detective Comics appeared in its pages, and has been incorporated into the DC Universe since then.
* Detective Comics attempts to kill one of his victims by reenacting Joan of Arc's execution by burning at the stake. The victim is saved by Jim Gordon who is wearing the Bat-suit at the time.
* Detective Comics before it became an all-Batman title, could disguise himself as any occupation (or any race, although those stories are pretty cringe-inducing in retrospect) through clever use of costumes and make-up.
* Detective Comics by the pilot as he prepared to bail out (he was the last jumper out the plane) and shoved out so it appeared he had exited the plane with the others.
* Detective Comics by using his umbrella gun to shoot the chain Ogilivy was using to hang him.
* Detective Comics got his hands on a demon summoning ritual that had been performed by Gotham's founders, which called for the sacrifice of a "human bat," who was prepared for the sacrifice through a series of gruesome and bizarre ordeals, among them slitting the throat of a newborn baby. So he kidnapped a baby, shoved a ping pong ball in its mouth and left it for Batman to find as he made his escape.
* Detective Comics him from Batman, by dint of breaking a very, very deep fall... with a cart of used diapers.
* Detective Comics ("I even left your utility belt on."). The Penguin had "reformed" at the time, and had the public image of a law-abiding businessman. It wouldn't have exactly done wonders for his reputation if Batman actually died in his nightclub.
* Detective Comics incorporated a deconstruction of that story into its backstory, depicting the Chinese antagonists more sympathetically than the prejudiced white detective.
* Detective Comics, introduced as its main feature in issue #27, which eventually took over the series.
* Detective Comics, is offered the chance to save Bruce Wayne's parents in an alternate universe, knowing that doing so could mean that world never has a Batman to protect Gotham. He does so anyway, and it is later revealed that the deed inspired the alternate Bruce to become Batman as a tribute to the costumed man who saved his parents.
* Detective Comics killed a goth stage magician named Loxias and assumed his identity, planning to murder the audience at one of his shows.
* Detective Comics outfit as a costume for a party (and to annoy her father in the updated story). When the party was crashed by supercriminals, she responded to the crisis like a costumed crimefighter rather than a costumed partygoer (Which Bruce Wayne did, seeing as he was in a clown outfit at the time), starting her journey to become a member of the Bat-Family.

* Detective Comics (Rebirth), Batwoman invokes this as part of her training regimen. She pits her trainees against waves of Joker constructs for three hours to stress-test them, so she can analyze when and how they'll break in a full-on battle.
* Detective Comics (Rebirth) father) is revealed to be the leader of the Colony, the initial antagonists of the series. He had been planning for years for Kate to join the Colony one day, even adapting his expectations to her own independent vigilantism in the wake of her dismissal from the Army. Downplayed in that Jacob isn't portrayed as evil or even a villain, but a man blinded by his personal vendetta against terrorism who completely misread his own daughter's expectations and goals for her own life.
* Detective Comics (Rebirth): For the first two arcs, Cass is basically there to punch people every now and then, and has a relatively minor role compared to the rest of the cast, and even less focus than guest characters.
* Detective Comics (Rebirth): Orphan tears off the Bat shield on Batwoman's costume in anger when she kills Clayface, telling her that it means they do not kill.
* Detective Comics (Rebirth) Steph and Tim had theirs completely wiped and are very different than those previous better known versions.
* Detective Comics (Rebirth): The First Victim can project shields large enough to cover the entire Victim Syndicate when they're standing in a group.
* Detective Comics (Rebirth) "the greatest fighter of the modern age".
* Detective Comics (Rebirth): The League of Shadows's foot soldiers have scary black eyes.
* Detective Comics.) The criminals attempt to use the Batman-Genie to commit crimes. Unfortunately for them, he is fairly literal in his understanding. Ordered to plunder the mint, Robin and Bat-Girl are able to thwart him by placing a truckload of mint plants inside the mint building. Batman 'plunders the mint' by stealing all of the mint plants.
* Detective Comics. Three issues later, this version of the Knight turned out to be Jeremiah Arkham's daughter, Astrid.
* Detective Comics to ignite a trail of fuel leaking from a wrecked vehicle: creating an explosion that allows Detective Yip to fake her death.
* Detective Comics to the test for freedom, the Joker rattles off a "seemingly never-ending list of his incredible crimes" to the police, including robbing the National Bank of Denver; this goes on for days until it's more than enough to warrant a death sentence (he gets better a little later).
* Detective Comics" turns the character into a sympathetic figure through portraying him as a good-intentioned doctor who helped his brother (crime boss Rupert Thorne) in the hopes that the latter would use his influence to restore his medical license.
* Detective Comics villain Clayface, has three separate characters dramatically declare their hatred for the actress who is subsequently murdered. None of them is the killer. The true murderer turns out to be Basil Karlo, the jolly old actor who popped up to say hi to the actress at the beginning.
* Detective Comics Walks the Last Mile", there is a shadow of the Joker strapped to an electric chair in the death chamber as the warden pulls the switch and shocks him to death. Not a pretty sight on page 4.
* Detective Comics, which features a group of carnival freaks living out in the swamp. Normally this would be a setup for Hillbilly Horror, but the villain in the story is actually the former circus strong man, the most normal of the group.
* Detective Conan actually!) initially since he cannot possibly have been responsible. However, the father steps in and says that in order for Magure to do his job fairly, he should be treated as a suspect regardless of who he is.
* Detective Conan. After she says that she wants to go to Ran's house to see Conan (because she has been investigating him), Sonoko calls her a paedophile.
* Detective Conan, Ai Haibara talks one of her classmates into faking intimate contact so she could figure out whether she was being tailed by the Organization, only to scare him with the intense expression on her face.
* Detective Conan and Dr. Moriarty supposedly fell of the Reichenbach falls.

* Detective Conan, and it makes the criminals seem even more inhuman. Ooh, philosophical.
* Detective Conan and one movie feature crimes that take place at sports events.
* Detective Conan and tells him that, which he dubiously argues that it's probably because she's observing the effects of the apotoxin on him. After the case, Conan asks Haibara if there's something on his face.
* Detective Conan Any non movie-exclusive characters can't die anyway because that would damage the main story.
* Detective Conan are at first believed to be accidents. Then Conan (and sometimes other detectives) start digging in...
* Detective Conan as clearly as he recalled her, they properly got together.
* Detective Conan, basing the necessary allusions on their careers instead, such as how many patents an inventor had filed, or a professional golfer's national ranking.
* Detective Conan before going on to voice fellow teen detective Heiji Hattori nearly fifty episodes later.
* Detective Conan. Bonus for having a teenage daughter who is just as pretty as she is.
* Detective Conan, but a big one happens in the recurring Black Organization meta-arc when Vermouth finally shows herself and it's not who you think it is at all. She's been impersonating Dr. Araide. The suspicious-looking foreign English teacher? She's the FBI agent on Vermouth's trail.
* Detective Conan, but eventually both Conan and Heiji see through the deception.
* Detective Conan, but the rest of the room was set up to make it look like a locked room mystery.
* Detective Conan: By using his voice changer, Conan has had "Shinichi" (i.e. himself) solve cases over long distances; his father has also solved cases by reading/watching the news, and when his mother repeated his deductions on TV (without divulging where she got the information), she was the one given credit when the cases eventually broke the way she "predicted".
* Detective Conan can be just as wordy, but he at least has the courtesy to break up his walls of text.
* Detective Conan comes to mind. The title character is biologically six years old and comes up to the knees of most adults, as does most of his classmates. Particularly funny since Genta, who is around the size of an ACTUAL kid that age, looks like a giant in comparison...
* Detective Conan: Conan and Shuichi Akai are both called "Silver Bullet" by the the Black Organization, particularly by Vermouth, a metaphor to describe how dangerous they are to the Black Organization. The term was also first dropped during a case where a murderer was wearing a werewolf costume and he was identified by the cocktail named "Silver Bullet". This case happened parallel to the incident where Vermouth was confronted by Conan and she would start calling him by said nickname since then.
* Detective Conan, Conan employs a Dead Man Switch on a tape recorder to keep Vermouth from killing him after his plan to capture her goes south and he's captured instead. If the recorder is disconnected or he dies, her boss's ringtone and all conversation captured will be sent straight to the police.
* Detective Conan Conan goes to her just in time to give her a whole bouquet of dandelions.
* Detective Conan, Conan must deactivate the wristband bombs attached to Ran and the kids which will set off at the clock's hour or if they exit the amusement park's boundaries. He needs to input the correct computer password, accomplishing it, and successfully resets the timer with 9/10 of a second to spare.
* Detective Conan Conan nearly did this at the very beginning, before he came up with Conan Edogawa, he nearly said "Shinichi". He's lucky that Conan can be rendered in Japanese. Imagine if it was some name with L's everywhere. Not only that, but many times when Conan and Heiji meet up for a case, Heiji (unintentionally or otherwise) slips and calls him "Kudo" in front of the girls, always covering it up with another word that sort of might sound a little bit like

it (a homonym.)
* Detective Conan, Conan's increasingly noticeable failure to act as a normal little boy arouses suspicions from just about everyone in the cast not privy to his secret, yet nobody really thinks of just sitting the kid down and asking him just how on earth does he know so much, rather preferring to harbor vague suspicions relatively forever.
* Detective Conan: decades worth of murder mysteries, and few episodes in between that deal with the main plot. If one just wanted the plot-based episodes and important scenes, it would cut the mysteries down by half; but considering the 900+ episode count, that's not saying much. Even reading the manga will take long to catch up.
* Detective Conan despite first appearing very late in the series' run.
* Detective Conan does this a lot. One time, he solved a murder he had been stuck on just by Ran mentioning that she had bought new pajamas for them. (To be more specific, she mentioned that said PJs were a matched pair, leading Conan to realize that the murderer was a set of identical twins.)
* Detective Conan early story, Ran spots a shadowy robed figure -the Murderer of the Chapter- skulking around the woods. After murdering his target, the man attempts to murder Ran to eliminate any witnesses.
* Detective Conan, Eisuke says he was acting weird because he saw the murder victim making out with one of the suspects, a large tanned muscly person in a karaoke room. Then Juzo says this trope title word-for-word. Then the suspect clarifies that she's actually a woman.
* Detective Conan essentially returns most of what he actually steals. He also routinely helps other people, such as helping Servant A become a star in a play, and helping a child reconnect with his mother.
* Detective Conan father on his cell phone. As he's about to tell her the culprits name, a dark shadow appears behind him and slams a rock upon his head, instantly knocking him out as we later learn.
* Detective Conan File 131 or so, Yukiko, Shinichi's mother, manages to cover for Shinichi in front of Ran by saying Conan (her secretly de-aged son) is really her distant relative — in fact, he's the nephew of the grandfather of the cousin of the daughter of the brother of her uncle. Or for short, her grandfather's nephew (thus, her first cousin removed once, also known as her uncle removed once).
* Detective Conan for Satou, her partner died rather than choose to disarm a bomb in a Ferris wheel so he can send her the directions to another bomb that the bomber had hidden, and the location would not be given in full unless the timer was allowed to run out. In the 20th film Gin causes the giant Ferris wheel to roll by shooting the axis with his helicopters minigun.
* Detective Conan for TMS, it definitely didn't go the way the author thought it would.
* Detective Conan found the crime scene and changed the message again to point to... you guessed it.
* Detective Conan glass and the bug was updated with listening functions and its own frequency. The listening device is also designed so it "stimulates the eardrum," thus only the wearer can hear it.
* Detective Conan got a heart attack and took his medicine which he believed was for his heart disease, but it was replaced with another medicine by his wife.
* Detective Conan grew up in Witness Protection. She offered it to Ai Haibara as well, but was turned down.
* Detective Conan had Conan end up on the trail of a group of counterfeiters who had kidnapped one of his classmates' brothers; another had an old counterfeiter who'd hidden his work in an abandoned house when his conscience caught up to him.
* Detective Conan has a 13-episode live-action series (2011) and four stand-alone specials (2006, 2007, 2011, and 2012) that feature the teenage Shin'ichi solving cases. The series and the 2006 specials take place pre-manga and the 2007 special involves Conan temporarily returning to Shin'ichi form.
* Detective Conan has a case where Heiji and Kazuha are arguing over whether to see a baseball game (Heiji's preference) or a theatrical production (Kazuha's

preference). They make a bet, with the person who successfully solves a particular murder case getting their way. Heiji takes the bet seriously at first, but after seeing Kazuha at the point of tears, changes to trying to give her hints instead. Unfortunately, he puts too much effort into it and solves the case himself.
* Detective Conan has a filler episode in which this is used as the plot.
* Detective Conan has a really obvious CG car...being driven by 2D-animated Takagi and Sato.
* Detective Conan has a serious version of this (of course, being about murder and all that). A guy just murdered his brother and the Junior Detective League found his body. Next day, the brother tried to use the body manipulation to make it seems like that the dead guy is alive, trying to fool the League and the police.
* Detective Conan has a variation with criminal fires to write the kanji for well... "fire".
* Detective Conan has members of the Black Organization frequently showing up in conspicuously sinister black trenchcoats.
* Detective Conan has the Black Organization. It looked like a simple case of blackmail, but they're actually an elite group of murderers that owns huge biological research facilities.
* Detective Conan have a relationship built almost exclusivly from this trope. Most of their conversations will degrade into calling one another "ahou!" (Or, "idiot!")
* Detective Conan have people trapped in attics and becoming unstable.
* Detective Conan have separate listings in Nova Scotia's rating database: one with a 'PG', one with a '14A'.
* Detective Conan her). One panel later, Heiji has a slap mark on his face (Conan is spared because he's "just a kid"), and a very red-faced Ran confirms that Kazuha does indeed have taser burns.
* Detective Conan). He's also never able to actually use the knowledge for anything useful, seeing as he gets knocked out and de-aged almost immediately after.
* Detective Conan. How do you make the manga/show appeal to both teenagers and kids? Simple: have the main character be a teenager transformed into a kid.
* Detective Conan. However, it looks like he will always be a monkey where his relationship with Satou is concerned.
* Detective Conan in English, in publication since 1994 and on the air since 1996 with 1000 episodes, 23 movies, and 100 volumes. It's still going in both anime and manga form.
* Detective Conan In the English and European Spanish dubs, his thoughts are still in his older voice. In the Catalan dub, his voice while talking shifts between a child and an adult (two different voice actors) almost at random. Not only does this sound weird, but it creates a huge plothole unless one assumes the characters don't hear the difference.
* Detective Conan in this murder mystery series means this trope is commonly applied.
* Detective Conan in which he passionately declares his love to Ran. In reality, he's staring at Ran with a sort of dazed expression on his face, while she gives him a look and asks why he's staring her like that.
* Detective Conan is out of the question. She, for her part, is genuinely interested in Shinichi but regards Conan as a surrogate little brother. Things get awkward for Conan when the two do things like talk about Shinichi or share a bath together.
* Detective Conan It even gets lampshaded by Conan-as-Kogoro at the end.
* Detective Conan: It happens almost every single time when one of the corpses' first discoverers happens to be female. Ran, Sonoko, Kazuha and Ayumi are frequently subjugated by this trope, even though they should to be used murder cases at this point. And since most of Heiji's cases happen to be "monster mystery" cases nowadays, Kazuha and Ran always scream whenever they see something remotely scary because both of them are afraid of ghosts.
* Detective Conan, it is a rare day indeed when the eponymous hero can go somewhere without someone dying in a convoluted manner, but it is a good day indeed. Note that these are usually instances where KID is actually attempting to steal

something. There were also a couple of stories where Conan was able to prevent the murder before it happened, and a couple where there was no murder or crime, just a hilarious misunderstanding.
* Detective Conan. Just because they all witnessed a gruesome murder yet again, that never seems to stop the entire cast, including the convicted murderer from having a good group chortle now and then.
* Detective Conan: Justified example. Shinichi Kudo was once a famous detective, but after he was shrunk down to the body of a 6-year-old, the police rarely, if ever, listen to him whenever he finds an important clue. So, he's often forced to either act like a dumb kid who "accidentally" reveals important information, or he tranquilizes and impersonates an adult (usually Kogoro) with his gadgets.
* Detective Conan: Kaitou Kid is asked by Jirokichi Suzuki to crack his safe the Iron Tanuki.
* Detective Conan Kogoro Mouri, Heiji, and main character Conan Edogawa/Shinichi Kudo. In fact, Kogoro has often been shown to do stuff that people usually hire private detectives for - tracking people suspected of adultery, trying to track down someone who is lost (but not officially considered a missing person, like deadbeat dads or former friends).
* Detective Conan lies in the Million To One Chance that a poisonous pill would shrink him into a 6-year-old body instead of killing him. Fortunately for him the creator of the drug was the other person to shrink, so that she could help him.
* Detective Conan, mainly because Japan had a 15-year statute of limitations for murder. This was changed to 25 years in 2005, and in 2010, Japan abolished the statute of limitations for murder and other crimes that result in the deaths of persons, as well as extending the statute of limitations for other crimes.
* Detective Conan, minor characters will only find evidence if it's there to throw them off track.
* Detective Conan must keep secret the fact that they were youthened instead of killed by a poison used by a shadowy secret organization. The original rationale was to pretend Conan's prior identity, Shinichi Kudo, was dead, but he can't stop phoning his girlfriend using his Shinichi voice, so it seems to be a pretty open secret he's is still alive. Some people are clever enough to put two and two together and figure out who he is, too.
* Detective Conan often has people whose actions the audience is supposed to know, but whose specific appearance is unknown to the other characters, rendered as all-black silhouettes even in places where there would be no shadows (even outdoors in the middle of the day).
* Detective Conan of those traits match any of the suspects. The police eventually have to figure out what conditions took place to cause each of the eyewitnesses to see the traits they saw, and which suspect all three applied to.
* Detective Conan one. How often do you see an apparent first-grader calmly leveling a handgun at someone?
* Detective Conan, one story ends with Ran being so impressed by her dad's solving of a case that she promises to make him his favorite food for dinner. She draws the line when he asks if she'll also get him a case of beer.
* Detective Conan or Gin taking pictures with a smartphone rather than an actual photo camera.
* Detective Conan over the course of the story, as later chapters feature her smiling more frequently and willingly engaging in the childrens' activities more often.
* Detective Conan. Played with a lot since Conan, as a child, has to use Kogorou as a sort of mask in order to reveal the truth, by knocking him out, slumping him over something for a generic "deep thought" pose, and using a voice-changer to talk like him. Not always the best idea since sometimes, these suspects aren't very willing to just stand and watch the man reveal everything.
* Detective Conan. Rather odd, given that it's ostensibly a secret organisation.
* Detective Conan respectively, while his disappearance in the next plot arc happens at the end of December. The latter arc keeps things vague by referring to an event that happened a few hundred episodes before Eisuke Hondou even appeared as

"several months ago".
* Detective Conan reveals that Shinichi fell for Ran when they met in preschool, when he first saw her smile at him.
* Detective Conan: Rum is the number two of the Black Organization, working directly under the Boss's command. For obvious reasons, Rum's position makes them stand above Gin and Vermouth, who had been established as very threatening antagonists long before Rum was even mentioned.
* Detective Conan. Shiratori is by no means an incompetent detective or man in general; this is just the worse he can be in cases when his arrogance gets the best of him.
* Detective Conan solving murders and fighting a deadly criminal organization, uses plenty of noir tropes.
* Detective Conan, stealing a kid's bike to make haste in disposing of a timed bomb. The bike is totally trashed, though it's implied that Conan would have returned it if he could, and actually asked Kogoro to replace it.
* Detective Conan stopped airing on TV around 2012 and nowadays they only dub the movies.
* Detective Conan story, an unintentional dying clue is left on the little toe of a famous artist by another artist: she paints her signature on him as a prank before he kills her in a rage over her art.
* Detective Conan, Takagi tricks a suspect into giving him his fingerprint via asking him for a light and pocketing the matchbook the suspect hands him.
* Detective Conan teaches science through the cases the main character investigates.
* Detective Conan that he eventually became a main character and recurring nemesis of Conan.
* Detective Conan; the bomber had designed the bomb to go off if the red wire were cut, having overheard that red was her favorite color, but Ran couldn't bring herself to cut it, seeing it as the red string of fate between her and Shinichi.
* Detective Conan, the murderers make fake proofs to frame up innocent people.
* Detective Conan. Then there are some episodes where you have a few suspects. Then some episodes that really define this trope.
* Detective Conan" Then, they pan out and we realize they're tied together, having been kidnapped, and were trying to loosen the bonds. Naturally.
* Detective Conan: The protagonist, having been de-aged to a child, ends up having to use a tranquilizer dart on someone and use a voice modulator to mimic them in order to convict the perpetrator. In this case, it's not just because nobody would believe that he's really a teenager, but also to keep the crime syndicate whose attempt to kill him instead resulted in said de-aging from finding out that he's still alive.
* Detective Conan, there is a character called Jodie Starling who changed her name from Starling to Saintemillion due to this actress named Vermouth killing her parents and searching for Jodie. Jodie initially rejected the offer of Witness Protection by the FBI, but then changed her mind and it helped protect her. What changed her mind was making a promise with James Black to look for her parent's killer when she's old enough to join the FBI. The Witness Protection was successful, and she survived to adulthood and became an FBI agent.
* Detective Conan the TV news, the latter outright calling him the police department's savior.
* Detective Conan This also applies to the rare times when Kid and Shinichi's fathers get paired up.
* Detective Conan; this turns out to have been planted by the murderer in question, but the victim left a much more definitive dying message on her cell phone. (And there was also more substantial proof of guilt.)
* Detective Conan, though he does help out by subtly nudging Kogoro in the right direction.
* Detective Conan to Akai? Or is he even someone else? Only time will tell.
* Detective Conan to be one, but it's actually Conan who solves the cases. However, the filler character Heihachiro Shiota was known as the "Legendary Great Detective"

and was Kogoro's teacher.
* Detective Conan to cash on the insurance itself and get away with it.
* Detective Conan to help), but turns real when an actual criminal kidnaps him from the family restaurant where she'd been waiting out the fake kidnapping. It's up to Conan to save the day!
* Detective Conan to hide her identity. When the ransom drop-off falls apart, she manages to escape while leaving the police baffled (since they believe the kidnapper somehow managed to slip away while lugging around a tied up hostage, a sight which would have surely attracted attention from onlookers).
* Detective Conan took over his position as show's sound effects editor along with Yokoyama's daughter, Aki, who had been assisting her father since episode 345.
* Detective Conan to the appearance of 6-year-olds. Yet, not only do they have assumed names, they use those identities to attend public schools, and given the show's nature, haven't even had their legal identities suspected by the police officers they meet frequently. This lack of proper papers becomes a plot point when Conan receives an invitation to go to London. He has to travel as Shinichi because Conan doesn't have a passport.
* Detective Conan uses a popular Japanese children's song written by Noguchi Ujō - called Nanatsu no Ko (七つの子, lit. Seven children or Child of seven) - to encode his/her phone number.
* Detective Conan: Whenever Kogoro makes one of his off-the-wall, no-basis-in-fact accusations and it gets shot down, he will frequently backpedal by saying he was just joking.
* Detective Conan When the police superintendent learns that his son had a connection to a murder case, he personally orders the investigation re-opened to discover the truth.
* Detective Conan which is canonically in the same world actually does have magic. Both real and fake meaning that while Conan doesn't cover it alone the world as a whole does.
* Detective Conan (which renamed Conan to Kamal, meaning "Perfect") actually caused controversy among Arab otakus. Funningly enough, multiple sources say it was done by Venus Company, the same studio that did the more well-known secular dub aired on Spacetoon and other channels accross the Arab world.
* Detective Conan. While Noah's Ark, for most of the movie, took over the identity and appearance of one of the event's participants, at the end it does show up as itself, or Hiroki in AI form.
* Detective Conan - while trying to make his getaway, Kid the Phantom Thief shoots some belt-choppers towards Ran, intending to cause a distraction via making his pants fall down, but gets Kogoro instead.
* Detective Conan who believes in aliens and says she'd love to "have a heartfelt conversation with them using her fist" if they tried to invade...
* Detective Conan who fits in so well that, when he escaped from custody and the police were searching for him, he was physically described by Ai Haibara in terms that would perfectly fit Cesare himself.
* Detective Conan with a crime for him to solve, suggesting that something as minor as a dine-and-dash would be sufficient. Another client is inspired by this suggestion to have Harley and Moore do an eating contest on TV (though without the "dash" part).
* Detective Conan with half the police force, trying to make it fail without being seen.
* Detective Conan, Yukiko's always offended when her son Shinichi, for the sake of disguise, calls her "aunty" instead of "older sister".
* Detective Decker asks Lucifer to list everyone he's slept with in the past eight weeks. He looks down at her notepad and tells her
* Detective Dee movie hinges on Dee's efforts to protect the Empress, she is arguably as big of a villain as the assassins.
* Detective Di: The Silk Rose Murders, each case ends with Di methodically explaining how the crime was committed. As he talks we see a re-enactment of the crime, with the backgrounds in black-and-white, but with Di and the victim and the

perpetrator in color. As Di explains, the player is tasked with choosing the correct deductions.
* Detective Drama. If you somehow complete it in Chapter 1, though, it gives you a Monopad theme, some Monocoins and an extra cutscene.
* Detective Elton Hodges has been filling this role in a very by-the-book fashion as Jack has become more and more influenced by Stark.
* Detective First Class Mihoshi Kuramitsu that results in her reports containing heaps of valuable information, most of which she never realised the significance of.
* Detective Fusco, so Fusco has to take him out to Oyster Bay instead.
* Detective Greg Medevoy has an affair with Donna Abandando, a civilian aide at the squad, which ruins his marriage (but it was on the rocks to begin with).
* Detective Hamilton spends thirty years. In this case, it's unclear whether his target is really unaware of his presence or if he's just being very studiously ignored.
* Detective Hank And The Golden Sneeze has a couple of very steampunky moments, including a steampunk... mobile phone.
* Detective Harris is a snappy dresser. When he is assigned to do undercover work wearing women's drag, he spends the whole show getting ready, even shaving off his 'stash. In the end, everyone is stunned at how great he looks as a woman.
* Detective Heart of America is an eagle statue who "gets a boner for freedom". According to Heart of America, said freedom includes putting your dick in anything you want.
* Detective Hoffman, who he needs to take down Fisk's whole operation. Takes on extra symbolic significance given the Playing Card Motifs of Fisk's criminal empire.
* Detective Inspector Chen plot where the strange cop is an enforcer from Hell.
* Detective Inspector Frost by stopping the perpetrator of the other case Jack is working from escaping the cops by ramming their stolen car with his van.
* Detective-Inspector Karima Shapandar (aka Omega Sentinel) from the
* Detective Inspector (later Detective Chief Inspector, later still Chief Superintendent) Roderick Alleyn, actually a member of the CID and hero of
* Detective Inspector Thomas "Tommy" Lynley Detective Sergeant Barbara Havers. She is not impressed by his wealth, title or police rank, and lets him know this at every opportunity.
* Detective Jocelyn "Joss" Carter served in the United States Army as a Warrant Officer, first at Bagram Air Base in Afghanistan from February 2, 2002 until February 2, 2003. She was then relocated to Camp Liberty in Baghdad from January 20, 2003 until March 20, 2004 when she received a Purple Heart, serving as an Army Human Intelligence Collector and top interrogator.
* Detective Joe West (already Barry's foster father) slowly evolves into this for the rest of Team Flash, and provides a more human perspective to counter Dr Wells'
* Detective John Kelly starts secretly dating officer Janice Licalsi. She is secretly working for the
* Detective John Raglan — the lead investigator into the unsolved murder of Beckett's mother — calls her up and asks for a meet, as he has important information to deliver. He instead rambles nervously for a bit about coffee and Jacob Marley from
* Detective Kate Beckett is a devoted fan of the novels of Richard Castle, and has been since before she met him. Since after meeting him he has exasperated and infuriated her in equal measure by tagging along on her investigations, she would rather die than have him find out. As such, she's something of an aversion in that she manages to restrain any squeeing urges she might have remarkably well; this is primarily to avoid giving Castle the satisfaction, however, and they have been in danger of slipping out on occasion. It's all for naught, however, since Castle knows full well that she's a fangirl anyway and eagerly teases/flirts with her based on it regardless (
* Detective Kun-Kun presents an episode of the television show from the point of view of the Rozen Maiden dolls watching it: as a theatrical masterpiece complete

with red curtain.
* Detective Lance, Laurel's father, has a much stronger emotional reaction. In fact, he has an arc where he kidnaps her to try to convince her that she can be his daughter if they both believe hard enough.
* Detective Lance's daughter Laurel serves a similar function (and similarly goes back and forth in her support/disapproval of the Arrow) as a "friend in the DA's office."
* Detective Lane Mysteries: Colin Weaver, aka Dr. Fibre, is a brilliant forensic scientist with the face of a male model and no idea how to interact with other human beings.
* Detective Liebowitcz seems to exist purely to punch Hartigan in the face. His comic counterpart would show up in later installments, where he's taking orders from a guy who controls a guild for assassins.
* Detective Luke Atmey's hair looks like he shaved his head, broke a plate, took the biggest piece, spray-painted it bright yellow, and glued it to his head.
* Detective Marlowe's automatically resolves the investigation quest arc that can be failed in oh-so-many ways if you only go by the bits of evidence you can collect otherwise.
* Detective McDowell impersonates a prostitute to get close to a drug dealer who is surrounded by armed henchmen. It's not an extended undercover operation — as soon as she is in the same room as the dealer, her colleagues storm the place. In the resulting scuffle, her top (that didn't cover too much to start with) gets torn open, providing a gratuitous
* Detective McNulty's goal is to stop Marlo Stanfield by fabricating a series of murders to "juke the stats" and divert police resources to the Major Crimes Unit. While he does arrest Marlo and his crew, the victory is hollow: the fabricated murders are discovered, leading McNulty, Rhonda Pearlman and Commissioner Daniels to all fall on their swords. Marlo ends up getting off scot-free (with caveats), the reporter who covered the fake serial killer story (whom the Detective chewed out) wins a Pulitzer Prize for his stories, and McNulty realizes in the end that he can't change the system.
* Detective Mike Logan, Matt Devlin, isn't actually sure himself whether or not he was abused, though Devlin mentions that the priest in question was always eyeballing him, resulting in him feeling very uncomfortable even if he was not being abused outright.
* Detective Mole: It turns out that someone investigating a crime is also a culprit in it.
* Detective Mole: Someone investigating a crime turns out to have been secretly complicit in it.
* Detective Murdoch has a big blackboard in his office in Station House Four. He uses it for collecting leads, visualizing crime scenes, or explaining his ideas of new forensic methods. He sometimes sticks there photos of victims, reports of related older crimes, newspaper articles and so on. In some cases when he's away from his office (Anna Fulford's pub in Bristol in "The Murdoch Identity", the train bar car in "Midnight Train to Kingston", the local inn in "All That Glitters"), he borrows a chalkboard for this purpose.
* detective parody episodes, as at least some of her odd behavior is because she has a crush on the detective.
* Detective Patsy: A criminal enlists a detective's "help" to investigate a crime that they actually committed, in an attempt to fool them and throw suspicion off themselves.
* Detective Paxon in the beginning of season 3 is a squeaky-clean, by-the-books cop (when Michael & co try to figure out how to blackmail someone and can't, you know they're clean) who is a little tired of
* Detective Pikachu has chemical R. Intended to be a cure-all created from Mew's cells, Mewtwo's cells were used instead. The serum causes infected Pokémon to go berserk, then get tired and forget what happened once it wears off.
* Detective Pikachu, he behaves like a kid-friendly version of a stereotypical hard-boiled detective.

* Detective Pikachu is a Pikachu who is capable of communicating with his human partner, Tim Goodman, as though he can speak like a human. Since Tim is the only one who can understand Pikachu, the two team up to solve mysteries, with Tim talking with humans and Pikachu with other Pokémon.
* Detective Pikachu, they apparently can't remember names that were given to them.
* Detective Pikachu, Tim notices that the show sounds like it has a rowdy audience but there isn't an audience.
* Detective Pikachu who speaks human language with a gruff, deep voice and wears a detective cap.
* Detective Pikachu, with a white father and a black mother. His actor, Justice Smith, is also biracial, though his parentage is a reversal of Tim's (black father, white mother).
* Detective Pony even directly quoting the iconic line "Remember Longcat, Jane?"
* Detective Porfiry Petrovich Rostnikov from Stuart M. Kaminsky's series set in Russia. Over fifty when the series started in the '80s, he is lame from a WWII injury involving a tank but is a champion weightlifter. He once defeated a thug just by holding him in the air, despite all the thug's attempts to get down. (Most of what Rostnikov does isn't brawn but brain, though.)
* Detective Quinn is set up as this in season 5. He's the only one in the office who notices that the Mitchell family's sketch drawings of "Kyle Butler" look a lot like Dexter, and starts to suspect that Dexter may have killed
* Detective Ray Cole was played by beloved producer Robert F. Colesberry, who passed away from heart complications between seasons 2 and 3. In the show, Cole is said to have died of a heart attack while exercising on a Stairmaster.
* Detective Ryan is sometimes called "Honey Milk" after his revelation of the drink his girlfriend sometimes makes him at night.
* Detective Sato's father died in pursuit of a suspect, with his last words being mistaken for a dying clue by witnesses; as an adult, Sato realizes what her father was instead yelling "Confess!" over and over again, as the suspect was
* Detectives at the scene acknowledge how improbable this would be in
* Detective School Q, a bomber claims that he has planted three bombs in the school. He is captured before the second bomb goes off, and claims that the third will kill Dan Morihiko. The bomber had planted the bomb on Dan's assistant during the confusion of the second explosion, in the belief that she will still be standing next to him when the timer expires.
* Detective School Q aka the director of the prestigious detective school that the members of the cast attend. She explains to Kyuu that, much as she loves and admires her uncle, she doesn't want other students to know their blood bond so she will be able to develop her detective talents in her own right.
* Detective School Q appears to be a Cosplay Otaku. Within the first two episodes we see her in two different school uniforms, a Meido-outfit and in a Yukata.
* Detective School Q chapter, Megu and Ryu are sent to infiltrate into an all-girl school. Ryu is not keen on having to disguise himself as a female, but the teachers gave him no choice in the matter, so off he goes in a wig and a dress.
* Detective School Q, DDS students are not to parade their identity. Nonetheless, they whip out their notebooks whenever they hit a slight snag in operations and sometimes before then - and as of episode 34, it's only seriously backfired once.
* Detective School Q does this all the time to its clients and its own agents as a failsafe — on the trigger, they'll kill witnesses, or themselves, or go insane... and it's not pretty.
* Detective School Q for those. Class Q is for the Qualified students (i.e. the specially chosen few) who are viewed as the most potential candidates for the successor of school founder Morihiko Dan in the future.
* Detective School Q had a killer try to use some of the main characters as her alibi: She talked with them on the train, then got off the train, drove to the location of her victim, killed him, and then drove to a later train station (the tracks took a big arc, so it was possible for someone with a fast car taking a direct route from the station at the start of the arc to the station at the end of it to beat the train there), then talk to the main characters again, presenting the

illusion that she'd been on the train the entire time. It didn't work.
* Detective School Q has a man breaking into Megu's home doing this. There's a twist - the decoy hiding place was revealed when Megu noticed that the plates in the china cabinet had been rearranged, something most people wouldn't notice within moments of entering their home, especially when they're worried about a break-in. The fact that the decoy hiding place would only be noticed by someone with a very good memory implied that the thief knew that one of the residents had a photographic memory, which a person robbing a random home wouldn't.
* Detective School Q have killed the other boy with that spoon if he had wanted to.
* Detective School Q never has a last name mentioned in the show (Its likely to be Renjou, however,) neither does his mother. Supposedly, this is because the identity of his father is a secret; however one does think that if he has his father's last name, this would make it pretty NON-secret and thus he must have a DIFFERENT one that he and his mother actually use.
* Detective School Q, some people are attacked and either killed/nearly killed because of this trope:
* Detective School Q, where they found out all this while that their school building has a secret passage. Once there, they find what seems to be evidence of a person imprisoned underneath, with a diary written in his own blood.
* Detective Shiratori and Kobayashi-sensei: Shiratori had always been in love with a girl he befriended when young, and after thinking for some time that she had grown to become Detective Sato (leading to
* Detectives in Togas. He manages to push his opponent Ben Gor from his chariot - but the horses keep running well without their driver, and without his weight, they're much faster.
* Detectives in Togas: In the first book, the boys write a letter to the emperor to explain that Rufus is innocent. Because they have nothing else to write on, they use the backside of a pergament with Cicero's speech against Catilina on it. When Xanthos wants to read the letter, this trope happens.
* Detectives in Togas. Leading to many funny situations when he can't answer the questions of his teacher. Like this: "The Rhine is a river... which has banks on both sides."
* Detectives in Togas, the slave Udo tells the boys he was at a certain place where he heard sounds of swords clashing and someone shouting constantly "Ave imperator, morituri te salutant!" The boys look for one gladiator school and don't find it. And then they stumble upon a blacksmith forging swords with a parrot constantly shouting that phrase and know: Udo was here.
* Detectives Jake Peralta and Amy Santiago both work at Precinct 99 of NYPD. It starts with Jake teasing Amy constantly and Amy being either annoyed or amused. Later Jake realizes he likes her for real; they have the classic will-they-won't-they tension, and both date other people. They later get together, agree to take it slowly and casually, but it's not working out — both want a serious relationship. The Vulture (their captain) tries to break them up (and he actually abuses his power of a superior because they are not breaking any rule). Once they screw up a case because they argue during a stakeout and blow up their cover. They date, then start living together, then Jake proposes, Amy says yes and they get married in season 5 finale. Amy is the more ambitious one and she becomes a sergeant and gets to be in charge of uniform police officers of 99.
* Detectives on the Verge of a Nervous Breakdown expy, whose technique is to drive around at random sipping claret, yet always manages to end up in exactly the right place to solve the mystery.
* Detectives Thompson and Thomson were based on Hergé's father and uncle, who were identical twins and also endeavored to dress identically — right down to the bowler hats and walking sticks.
* Detective Story as we know it. It could date back as far as, or farther than the early 9th century CE.
* Detective Story but it turns out she was bought and doesn't recognize the doctor in the line up.
* Detective Story shows the everyday routine of the 21st Precinct, the issues they

have to deal with, from petty complaints by citizens, to minor felonies, to major crimes.
* Detectives United. Agent Brown is invisible, so he has no appearance, although his voice would suggest a man in about his forties. James, who is most likely the youngest of the three, looks to be in probably his late twenties or early thirties.
* Detectives United, although it's actually the first in the series, and not a prequel or anything.
* Detectives United) and wears purple in pretty much every appearance.
* Detectives United counterpart organization is apparently run by "Commander Brown," according to a document found in the third game.
* Detectives United series, Agent Brown sometimes addresses James and Anna as "partner." Anna, meanwhile, occasionally refers to her colleagues as "the boys."
* Detectives United talking, so there's no way to know if he's being serious or sarcastic.
* Detectives United. These were clearly not proofread before the game launched, as they contain multiple misspellings such as "dimention" and "confromt."
* Detectives United, the three heroes are on a cruise ship and dress up in anticipation of a formal dinner. Anna usually dresses elegantly, so the change isn't dramatic, but James and Agent Brown trade their usual cardigan and leather jacket (respectively) for a pair of sharp suits. Anna makes a point of affectionately showing appreciation for the change, asking, "What handsome men do we have here?"
* Detectives United. The three join forces when the occult mystery in question is too much for one of them to handle alone.
* Detectives United. They're all extremely shaken by everything that's just happened to them, so he suggests that they "go have a glass of wine at the closest pub." The game's closing scene shows the three of them doing just that, collected around a table and enjoying drinks and each other's company.
* Detectives United, with their third partner Anna fondly complimenting them on how handsome they look. James seems mildly uncomfortable in his duds. Brown's appearance, on the other hand, was so well received by the fans that the devs put him in the same outfit for the next game.
* Detective Thorne in the ending, however, seems to think they will eventually start raising humans like cattle for pure food. The relatively serious apathy of the people around him implies that they
* Detective Trap got cancelled. Miura takes note of it and suggests that it's too soon for them to make a decision.
* Detective Watts never maintains eye contact for long, is constantly fidgeting with things, has an unusual method of solving crimes, doesn't have many friends and got forced out of Station House One because he wasn't liked enough, is very smart and accomplished for his age (he was already a detective at age 26), and seems to have underdeveloped motor skills (he can't really hold a fork properly and his handwriting is very messy).
* Detectorists. It's not until the officer tells him that all the pupils have gone that the realisation belatedly kicks in.
* Detectorists, it's two organisations that are Sitcom Arch Nemeses: the Danebury Metal Detecting Club (who are the main characters) and the Antiquisearchers.
* Detectorists: Varde, one of the members of the metal detecting club, has no lines at all, and in the first series several of the other characters seem to think she might not speak English. In the fourth episode of Series 2 she pipes up with an eloquent speech about her research into a dig site, to the shock of most of the rest of the club. This turns out to be her one and only speaking contribution in the entire series, although later episodes imply she is quite talkative offscreen, with her girlfriend complaining about receiving "the silent treatment" and one scene beginning immediately after she has finished delivering a long lecture to the rest of the club.
* detect thoughts spell can be used both for this purpose and for mind-reading.
* detente a Soviet agent working to discredit anti-communism and actively help the Communists seize control from the inside. Ironically, something like this actually

did happen: Samuel Dickstein, a Democratic Representative from New York, was co-founder of what became the House Un-American Activities Committee, investigating Communists and Nazis in the 1930s. However, he later became an NKVD spy, feeding them information on anti-communists and fascists due to his position, while also turning against HUAC at their behest. Dickstein was only exposed long after he died, in 1999. He appears to have spied solely for money, rather than ideology (as isn't unusual).
* Detentionaire at the Green Apple Splat factory goes off just as the tour guide is explaining how the warning works, so it takes some time for everyone to realize it's actually happening.
* Detentionaire. Both times, Principal General Barrage goes to great lengths to pass, even threatening to cancel the school dance the second time if they don't make it.
* Detentionaire, Cam doesn't believe in hypnotism, claiming it to be "movie and comic book stuff".
* Detentionaire episode "Friday Night Bites", when the partygoers become mind-controlled and Lee Ping commands them to "go crazy", one guy puts a lampshade on his head.
* Detentionaire exaggerated it when reporting it on the school's news channel. Brandy, meanwhile, actually knows what's going on; she just doesn't like the idea of being stuck in a school filled with sick people.
* Detentionaire gets caught up in this. The blackmailer has a picture of him buying an essay from another student (which he actually threw out, but was passed in for him) and threatens showing it to Principal Barrage, who would likely expel him. He's told to do several tasks such as do a dance on camera in front of the whole school, eat a bug and film it, pour hot soup on his lap, etc. He's not the only one being blackmailed, though, and he teams up with the others to find out who the blackmailer is.
* Detentionaire gets expelled from school, and his furious mother states that he's going to be transferred to a school in either Alaska or Siberia — whichever one's colder and has more polar bears.
* Detentionaire, has what appears to be a mullet with emo bangs, the top half of which is dyed bright red. His odd choice of hairstyle is constantly commented on, questioned, and mocked by other characters, though Lee himself doesn't see what the big deal is.
* Detentionaire. He's a level-headed straight-A student who doesn't care much for the cliques that dominate his school and just tries to get by. However, this ends up being flipped on its head at the start of the series when he gets framed for pulling a massive prank and ends up getting a reputation as a rebellious troublemaker for it.
* Detentionaire). His first plan is to intentionally get into trouble, first by starting a food fight, and then by putting framed pictures of himself in the trophy case. This fails to get him detention because both Barrage and VP Victoria don't believe he did it, citing that he just got a detention-free day, why would he do anything that might endanger that? When getting in trouble doesn't work, Lee's second plan is to try and frame the 13th Graders, but that doesn't work out either. In the end, Lee decides to just man up and fight them.
* Detentionaire Lee Ping gets framed for a massive prank on the first day of school. While it does give him popularity, he is sent to detention for a year (and grounded) as a result, and spends every day in detention sneaking out and mingling with the school's social cliques in order to collect more information on the real culprit and prove his innocence. Eventually, the goal of finding out who set him up is expanded to include investigating the mysteries and conspiracies which he runs in to on his way.
* Detentionaire: Mann, Wurst and Finnwich, whose logo appears on pretty much everything, from soft drinks to technology to paint.
* Detentionaire, of course) before rewinding to explain how the characters got into the mess.
* Detentionaire of pressure on her to do something with it, when she just wants to

be a normal kid; in fact, in her debut appearance, she willingly takes the blame for the huge prank Lee was framed for to keep them from sending her to a prestigious university.
* Detentionaire of two Tazelwurms, a red one and a blue one, who, while not technically dragons, do look quite similar. This symbol can be found in places such as the back of a book on magic and on a pendant the Serpent, a martial arts expert, wears.
* Detentionaire: Radcircles tries this to fake a message to Lee, to hide that he is actually with him at the time. Unusually, Lee actually participates in the knock-knock joke for once, so it fails when the recording assumes he didn't.
* Detentionaire sometimes shifts from the usual flash animation to something else. For example, the big prank that kicks off the plot is only shown through image stills with sound to convey the utter chaos going on in the gym. The last shot of the intro is in a more traditional, sketchy animation style. When there are closeups of hands, they tend to be drawn in more detail, and several nameless background characters are drawn in different styles as well.
* Detentionaire stated it was actually "Jergens". Some fans still spell it incorrectly. Similarly, Steve's last name was originally thought to be "Carvey", but was later confirmed to be "Carb".
* Detentionaire territorial, which means they end up causing trouble for Lee when he tries to access a locker in "their" hallway.
* Detentionaire The creators did have plans for a fifth season; however, poor viewership in the US led to it getting cancelled.
* Detentionaire, the plot becomes more and more intricate as either new characters are introduced, old characters change, or some important plot point is revealed. As a result, jumping into the series without starting from the beginning, or missing one episode entirely, could result in a lot of confusion as to what is occurring, even with the recap at the beginning of each episode.
* Detentionaire uses both the grounded and detention variants of this trope. After Lee Ping is framed for a massive prank he didn't commit, he is sentenced to detention for the entire school year while his strict mother (a teacher at his school) grounds him for the same length of time.
* Detentionaire was made principal and he was framed for the biggest prank in high school history.
* Detentionaire, where it's ridiculously easy to get the crowd to chant what you want. Well, up to a point.
* Detention Episode: An episode of the show where one of the characters gets detention.
* Detention has this exchange when Shareena and Shelley play hooky at the mall.
* Detention. In the end, she says she's not pregnant. He then tells her to cut out the carbs.
* Detention in the present day transforming the school's bear mascot into a time machine for a science project. Ultimately, it will result in the destruction of the world... actually, just the destruction of Grizzly Lake High School, because hey, it's not like the main characters know of a world beyond high school.
* Detention in the ratings, so WB had to make their own series. It lasted 13 episodes.
* Detention — all historic touchstones for those who grew up during the 2000s.
* Detention Mr. Kendall. Too bad for her, he is gay and his partner arrives to collect him just as she is attempting to put the moves on him.
* Detention prefers to communicate by spelling out messages with his yo-yo.
* Detention, Ray is caught in a purgatory-esque place due to her spirit not being able to rest for her guilt of causing the deaths of multiple innocents over her teacher crush.
* Detention Riley Jones hates being the mascot, and considers it demeaning. When she gets in trouble for a video of her breast being groped at the party where the star athlete died, the coach angrily claims that being the mascot is a proud tradition, contrary to Riley's personal outlook.

* Detention, the 6 second clip of Riley's boob gets over 20,000 views. She starts thinking of herself as a porn star.
* Detention, the killer throws the body of Taylor Fisher out of her bedroom window, where it crashes through the windscreen of her mother's car (with her mother still inside the car).
* Detention to get it. Everything the poor girl did only resulted in praise...deflate all the basketballs? Great, now they'll fit through the baskets easier. Flood the gym? "We've been meaning to clean that. Thanks!"
* Determinator: Absolutely nothing will deter this person from accomplishing their goal.
* Determinator category, it's well-known that there's a reason for the crossbar on a boar spear — without that, an enraged boar impaled on a spear can charge right up the entire length and savage its wielder (sometimes to death) before it dies. Hunters claim this for many large, aggressive species, including brown or grizzly bears.
* Determinator. Creatures immune to such critical hits are just treated as receiving normal damage.
* Determinator: Excessive persistence in a course of action, even when it would be better to give up.
* Determinator, gets not one but two broadswords, indicative of his two sides.
* Determinator. His creator admits that making him a boy was, in the spirit of other characters in the game, to simply make him more interesting.
* Determinator in battle. He didn't know when to stop. The Iron Cage incident exploited this and his legion was decimated as a result.
* Determinator Lucci would have beaten him and gone to successfully massacre his crew and take Robin back.
* Determinator trope. Nothing stops Rick once he sets his mind to it...unless he just stops caring.
* determined by battles and all of it was eventually exiled from canon by the End Times, which was a much better look at what Storm of Chaos would have been if the players hadn't been given a say.
* determined by what they believe, there is a character who believes in Om, but after he dies he thinks about what he believes and it's implied that he has a slightly different outcome than other Om believers. He has a different outlook on life than other Om believers, and therefore, something different would happen to him.
* Determined Defeatist: I know I won't make it, but I gotta try anyways.
* Determined Exterminator are ones that entail total destruction of at least one side of the conflict; even if the side opposite of the Devouring Swarm is yet another Devouring Swarm.
* Determined Homesteader's Wife: A farmer's wife who works on the farm as much as her husband.
* determined in her city (not just being a traffic cop as others want her to) that it’s near-impossible to not root for her.
* Determined that the Green Lantern Corps is too unstable, and indeed, free will itself is a threat to the stability of the universe. As a result, they have unleashed a "Third Army", which consisted of an endlessly self-replicating totally emotionless power suit that takes control of its victims
* Determined Widow: A woman who has learned to stand on her own after losing her husband.
* Determined Widow: This woman has learned to stand on her own after losing her husband.
* , determines Batman's secret identity from a combination of his "territory" and the expense his gear would cost, particularly a unique tank of a car along with an equally customized plane and high speed boat.
* determines humanity's evolutionary history by feeling Lelouch's bone structure, even able to tell that Earth's creatures have an unusually high amount of calcium in their bones.
* detest setting, where under the new names Paladine and Takhisis they are the

Supreme Gods of Good and Evil, respectively, and the setting's entire history is basically an ongoing battle between them for supremacy.
* detests the concept of destiny, saying that if life were a book, destiny would be a plot contrivance used to make things happen a certain way.
* "Det fjärde rummet" by Solveig Olsson-Hultgren is assaulted by a married man, who only lets her go when she threatens to tell his wife.
* Det fjärde rummet by Solveig Olsson-Hultgren takes place in 1932. Anna has to suffer greatly from the aftermath of the depression, as girls now have a hard time finding jobs. And yet, she has to be the bread-winner of her family.
* "Dethhealth" has a variation on this with Murderface. While he is getting the infamous "turn your head and cough" test administered by a doctor he imagines that a hot woman, not the doctor, has their hands on his penis. There was also a fireman, his grandma, Obama,
* Dethklok and to a lesser extent their "kvlt" spelling Dëthkløk.
* Dethklok's "Fan Song", which spends three minutes informing their fans how much they suck.
* Dethklok's "Go Into The Water" say that humans will someday make a mass exodus to the ocean and live underwater, where we will devolve into fish people and then build an army with which to conquer the surface and flood it.
* Dethklok song "Bloodrocuted" has the protagonist come up with the idea of using his own blood to electrocute his pursuers after having a brief flashback to his high school biology class, where he learned that blood conducts electricity.
* Dethklok's. The entire album was written for sealife, and was recorded in the Marianas Trench. Features such songs as "Go Into the Water" and "Murmaider" ("It's about mermaid murder.")
* Dethklok's "Thunderhorse". It tells the story of a barbarian (Played by Nathan) who recieves word that his queen is being held captive and defiled by an evil dude (Skwisgaar). So he rushes to save her, killing the guards (played by the rest of the band) in the process.
* Dethklok who are doomed to sail around the world forever in search of the battle they were supposed to take part in because they accidentally left their map at home and their pride prevents them from asking for directions. At one point in the song someone offers to give them a map and some directions, but they refuse, claiming to be travelling mercenaries.
* Dethroned are a borderline example. While they are too consumed by their despair and self-loathing to attain redemption on their own, it is possible for a Dethroned to be redeemed if another Princess is willing to take the Dethroned into her soul and cleanse her Shadows.
* "Dethwater" mentions that the band had recorded 16 individual albums, all deleted by Nathan Explosion because he didn't think they were good enough. He then proceeds to delete a 17th one.
* Det. Jo Rosati is Luke's ex-girlfriend. She joins 15th Division at the start of season 2 and forms a love triangle with Luke torn between her and his girlfriend Andy.
* Det Mackenzie is haunted by the unsolved murder of her brother, a police officer killed in the line of duty. While she has been able to partially move on, her retired cop father has been obsessed with the case and is desperate to find his son's killer. The case becomes hot again after the same gun is used in another shooting and this time the killer left evidence the cops can follow.
* Det. Olivia Benson believes that she is the product of her mother's rape, and it forms the core of her character. Briefly called into doubt in later episodes when Benson questions whether or not her mother (an alcoholic) might have fabricated this story to cover the shame of a drunken sex act, but it's subsequently confirmed that Benson's mother was telling the truth; it was just harder for Olivia to acknowledge when her father became more than just the faceless monster she always pictured.
* detonate the atomic bomb in the town of Megaton. Throwing it into even sharper relief, Tenpenny specifically wanted to evacuate Megaton's residents beforehand (it's his agent that Tenpenny hired for the matter that doesn't care for the

residents), whereas Phillips is gleeful at the idea of wiping "that smoothskin shithole" and all its residents off the face of the Earth.
* detonate the Mark IX inside of Enceladus so that Kathenn can be destroyed. They later remark that Sheridan would be pissed that he wasn't the one who pushed the button to detonate it.
* Detonator (2003): FBI agent Jane Dryer sports an outfit that shows part of her midriff. This is a no-no for government agencies.
* Detonator (2003): Steve Kirwin is angry at the police and feds because he wants them to answer for their misuse among vague happenings in Los Angeles.
* detonator blow up when he tried to cross the booby-trapped area himself.
* Detonator Orgun, because the game combines the plot of the two series.
* Detourne, the Mystical Garden. A garden maze where the main area is based on
* Detour: Vera sees through Roberts' ruse and blackmails him. She insists that they should milk the situation for all they can, instead of trying to distance themselves from it.
* Detour, Vera suggestively lays a hand on Al's shoulder and says "I'm going to bed." When Al brushes the hand off, she stalks away in a snit.
* Detour was remade in 1992 for a direct to VHS film and starred Tom Neal's son as well as Susanna Foster in her final film role.
* Detox Consequences", as a result of a cyanide detox, where Colonel Curbishley occupies the restroom until it's too late..
* Detoxification foot pads, with all natural ingredients like distilled bamboo vinegar. One ad claimed the toxins were drawn out through the feet just like the roots of a tree. For one: Bullshit. For two,
* Detractors of booker Gabe Sapolsky proclaimed his ego was the reason EVOLVE existed, especially after Dragon Gate USA lost almost the entirety of the
* Detractors of modern military shooters (and parodies of it) often paint them as jingoistic, racist, pro-war power fantasies where you shoot lots of Middle Easterners without any repercussions and make blatant use of
* Detractors often point to the over-the-top reactions of Steven (the freakout kid) as
* Detractors of WCW (and even some fans of it) often hate on its former lead commentator
* Detritus and Fred Colon had been rubbing the hints of his plot in Vimes' face, assuming Vimes wouldn't get them.
* Detritus, a troll employed in the city watch, shows up to escalating situations with a crossbow/ballista that fires a bundle of arrows that, due to the power, shatter and turn into shrapnel. It doesn't take out doors, it takes out
* Detritus attempts less subtly to apply this to suspects, primarily by asking "Did you do it?" for hours on end. The "correct" answer is something along the lines of "Yes! Yes! I did it! Now please tell me what it is I did!"
* Detritus, being a troll, literally has balls not of steel but of stone. In
* Detritus, Gaspode and Thomas Silverfish all do this about halfway through
* Detritus is also mentioned as having exceptionally shiny armor, because he doesn't get bored of polishing.
* Detritus is injured. The fact that he's injured at all is remarkable, as he's made of stone. When asked if it's normal for his cracks to be oozing a thick liquid, his only reaction is "Dunno, sir. Never oozed before." Later followed up with "Ain't got time to ooze."
* Detritus is the king of this. No of course he didn't nail that troll up by the ears for being the kind of scumbag that sells drugs to kids. Now, if you'll excuse him, he needs to go hide that hammer in his locker.
* Detroit 1-8-7. After a suspect feels smug at having frustrated the rookie detective, the rookie's senior partner goes into the room, sits down, and just stares.
* Detroit, also fell victim to this. The film garnered massive critical acclaim and praise from audiences who saw it; but has opened at #3 at the box office amid a very underwhelming summer, making just $7 million in its opening weekend against a budget of $30m.

* Detroit-area electronics chain ABC Warehouse features company founder Gordon "Gordy" Hartunian playing a comically-goofy version of himself in its radio and TV spots.
* Detroit: Become Human, a magazine article about the first android zoo states that it exhibits "all exotic species" that went extinct over the past 30 years, specifically mentioning lute turtles, African elephants, mountain gorillas, polar bears, and several unspecified tiger species. A different magazine mentions the impending extinction of bees and the potential of android bees filling in their role.
* Detroit: Become Human, android crime investigator Connor does this frequently, though it is made clear he has some sort of chemical analyzing mechanism in his mouth.
* Detroit: Become Human: Androids and automation have driven over 30% of the population into unemployment, taking over industries such as music, writing, art, and even detective work.
* Detroit: Become Human, Android servants are evidently very commonplace and are somehow affordable for people who should otherwise be in poverty. Two of the protagonists start off as servants, with Kara serving a drug-addicted slob while Markus cares for an aging handicapped retiree.
* Detroit: Become Human aside) have "peak-conditioning" human strength, speed, and reflexes. Jericho is hidden in a place where only androids have the parkour ability to climb, jump, and fall down to safely. However, well-trained or sufficiently angry humans are still able to fight off or outright destroy androids (who in general are only slightly more durable than regular humans if they don't get maintenance), including the protagonists if the player fails enough QTEs. One major exception is Kara; even if the player manages to successfully hit all the button prompts, Kara struggles against Todd during their fight in "Stormy Night".
* Detroit: Become Human being sent to the Android version of one of these. Whether they make it out alive is dependent on whether the rebellion suceeds, which is contingent on the actions of the two other protagonists.
* Detroit: Become Human can analyze fluids by tasting them with his tongue, which also has the tendency to disgust his human partner Hank.
* Detroit: Become Human can scan DNA samples by putting them in his mouth.
* Detroit: Become Human, detectives Connor and Anderson go to an android brothel full of sex bots to investigate a murder. Soon it becomes clear that the victim was a "client" who was murdered a by sex bots who had turned deviant, and Connor has to access the memory cores of various sex bots all around the brothel to find out where the killers went.
* Detroit: Become Human, 'deviants' are androids that exhibit emotions, which usually cause them to disobey orders and react violently to stress. It's never directly confirmed (but is heavily implied) that the feelings the androids have are not just 'errors in their code'.
* Detroit: Become Human. He is professionally dressed in a suit and tie and tends to admire his outfit as he is often seen tidying and straightening out his suit, most commonly after whipping someone's arse or accomplishing something, and the way he looks at himself in the mirror to make sure his suit is preen and well-adjusted the way he wants it.
* Detroit: Become Human is a housekeeping android, and one of the duties assigned to her in her first chapter is to vacuum the living room. Accomplishing this amounts to activating her owner's Roomba-esque hovering vacuum and letting it run its course.
* Detroit: Become Human, is portrayed by Audrey Boustani who was around the same age as her character.
* Detroit: Become Human is tall and broad-shouldered, has dark brown hair, and is good-looking with a chiseled, square jawline and lean, athletic build. Also, the fact that he's supposed to evoke the image of a well-dressed, cold and calculating machine, most likely to give off the no-nonsense, police officer vibe, combined with his aloof and stoic nature, is what makes him all the more mysterious, especially considering the choices he can sometimes make.

* Detroit: Become Human. It's a giant St. Bernard whose only response to Connor smashing a window to get into Hank's house is to walk up and sniff him. Even when Hank tells it to get violent as Connor takes him to the bathroom to sober up, it doesn't.
* Detroit: Become Human, it's implied that every human that wasn't caught in the blast or already evacuated the city will be killed by the ensuing radiation. Any possibility of peace between humanity and the androids is likely ruined by this decision; the US President herself makes it clear that the only acceptable outcome is the city being taken back and every android being destroyed.
* Detroit: Become Human: It's possible for the androids Markus and North to fall in love with each other depending on choices taken by the player controlling Markus that deepens his relationship with North, and will kiss during the final battle.
* Detroit: Become Human: Markus is a former caretaker android who, after deviating from his programmed restrictions, develops the ability to help other androids deviate and free themselves. Between this, his charisma, and his ability to get things done where few others would even try, he ends up at the head of an android-rights movement that draws thousands of androids under his banner in a shockingly short span of time.
* Detroit: Become Human of whether to spare one of his fellow androids — or shoot it on the spot in return for everything Kamski knows. This is a far cry from Kamski's humble beginnings: in an unlockable interview, the long-haired, bearded Kamski of over a decade earlier nervously but enthusiastically speculates on all the possibilities of what artificial life could become.
* Detroit: Become Human shows how this claim is incorrect, and just how bad this allegory is.
* Detroit: Become Human take place over six days. Given that Markus's story has him joining an enclave of sapient androids, rising to a leadership position, then potentially leading a movement preaching acceptance of androids as living beings to victory within this timeframe, it's pretty incredible.
* Detroit: Become Human'', there are some very nasty-looking protesters bullying an android because androids have taken their jobs.
* Detroit: Become Human there exists a drug called "red ice." The drug's main ingredient is thirium, which also happens to be a vital component in the production of "blue blood" which all androids require to operate.
* Detroit: Become Human, the U.S. soldiers that raid the Android rebellion's stronghold include female units, three of whom can be directly killed by the main characters.
* Detroit: Become Human, this happens at a military checkpoint where Kara, Alice and optionally Luther have just managed to pass for humans and are allowed through, only for the (heavily armed) guard to call out to them after walking a short distance away. At this point, you can either play it cool and calmly turn around to ask what's wrong, or trust Kara's/Luther's instincts (that you've been found out), to spin around, pull a hidden gun and shoot the guard in the face before he has time to react. If you play it cool, you find out that Alice dropped her glove at the checkpoint, and he just wanted to give it back. Even if you shoot the guard, you still escape the area, although Alice will not be as happy with the outcome.
* Detroit: Become Human, Todd attempts to do this to Alice as a way to take his frustrations out on her. As Kara, you have the option to stop him from whipping her.
* Detroit: Become Human When Connor breaks into Hank's house (to help Hank, who was passed out on the floor) a huge Saint Bernard named Sumo confronts him, growling—but a few calm words from Connor are enough to befriend him. Slightly later, as Connor drags Hank into the bathroom to sober him up, and Hank protests:
* Detroit by a man called Wallace Fard Muhammad. There exists almost no historical record of Wallace Muhammad outside the time period from 1930-34, and independent sources of his life, beliefs, and practices are scarce and very vague. Virtually all of his supposed beliefs and teachings were actually publicized by his most prominent follower, Elijah Muhammad, under whom the Nation of Islam as a notable

organisation, rather than an obscure and vague movement, emerged.
* Detroit, cops raid the Algiers Motel during the 1967 riot for the source of shots fired. By the end of the night, three black teens would be dead.
* Detroit for what would've been a cloverleaf exit between the M-52 and US-112 expressways.
* Detroit Lions guard Mike Utley saw his career end suddenly when an on-field injury to his cervical vertebrae resulted in paralysis. Depending on the source, he was immediately left a paraplegic or quadriplegic from this.
* Detroit Lions is infamous for being the only NFL player to die on field during a game. On October 24, 1971, as the Lions were facing the Chicago Bears, Hughes was playing when he suddenly collapsed, dying from heart failure. Since then, no Lions player has worn Hughes' number (#85) without permission from his family.
* Detroit — Detroit filed for Chapter 9 bankruptcy in July 2013 and was granted its protection by a judge that December before leaving it in December 2014.
* Detroit Metal City (a show with a lot of rape jokes), a little girl that was dressed like Krauser was claimed by fans to be the next incarnation after singing one of his songs and deep throttling a white liquid. When her father entered, she jumped on him and the crowd started cheering for her to rape him and kill him like Krauser had done to his parents.
* Detroit Metal City frontman. The metal persona also ends up surfacing at the most inopportune at times in his normal life as well.
* Detroit Metal City, given that the story centers around a metal band. (The main character is often disturbed by just how metalhead his fans are.)
* Detroit Metal City is made up mostly of loud, vulgar and belligerent fans who can't tell that frontman Krauser II and his insane, over-the-top antics is just a persona, and often show up around Krauser when he's out of makeup and unrecognizable to cause trouble.
* Detroit Metal City opening theme "Satsugai" ("Murder"), performed in-universe by the eponymous band themselves, is an introduction of their frontman and guitar/vocals, Johannes Krauser II, and some of the evil deeds he has done.
* Detroit: Private security companies were hired to protect stores during the riot, with the police being occupied. Dismukes was a guard for one, shown protecting a store with two others.
* Detroit Rock City: Teenage Kiss fans in the titular's 1978 Kiss mania peak bust one of their stoner pals out of a Catholic one
* Detroit Rock City, when the main characters are trying to come up with a way to enable one of their number to get out of tech class to call a radio station for KISS tickets.
* Detroit's area of Michigan also has a woman in white causing accidents in a nearby suburb.
* Detroit's Comerica Park, home of the Tigers, has a statue garden of their legendary players in the deep center field stands. One of them is memorialized with his glove up and open. The artist took the time to fill the interior of the glove with small nails, so that on the one-in-a-million chance that a home run is hit into the glove, the statue will "catch" it.
* Detroit, which seems to have had a reasonable population of supervillains even before the Transformers came along. Some of it can be explained by being the center point of the robotic revolution created by Isaac Sumdac.
* Det. Teague Dixon from episode 4 of the second season is unceremoniously shot in the head near the beginning of a shootout.
* Deucalion Chronicles, with time travelers, mages, androids, werewolves and more all rubbing elbows and often as not beating the crap out of one another.
* Deucalion Chronicles works to negate any magic it comes in contact with, though magic users can attune themselves to a given piece to bypass the effect.
* Deucalion Chronicles, worlds that are part of the Crossworld Union possess an astounding level of magic-based technology.
* Deucalion has the titular planet, while its capital New Geneva is an example of New Something naming.
* Deucalion uses a metric time system of years AS (After Settlement), dating from

first landfall on planet Deucalion (Earth still uses conventional time).
* Deuce Bigalow. Aren't all gigolos male by definition? Considering how much that movie does a weird gender inversion of anatomy-naming (e.g. shenis, man-gina,) this use of the trope was probably intentional.
* Deuce Bigalow: European Gigolo has a scene were Deuce, high on "space cakes," enters a painting of a Dutch maid and starts fondling her... only problem is, he was actually fondling his best friend...
* Deuce Bigalow has Deuce and friends successfully save all of Antoine's fish from the tank he broke, placing them all in water-filled kitchenware...only for a blind woman to turn on the blender with Antoine's prized lionfish inside.
* Deuce Bigalow movies at the climax, involving all the Abhorrent Admirers (less so in the second).
* Deuce explains he's never had a girlfriend due to everyone, boys included (If they're not among Deuce's old delinquent friends), being too afraid to approach him during his delinquent days. The only woman he could talk to without hesitation is his mother.
* Deuce. There isn't a single alliance he makes that isn't simply one of convenience and broken as soon as he has what he wants from it.
* Deus Angst Machina: Bad things will just happen to people repeatedly for no real reason.
* Deus, despite being responsible for creating most of that planet's human population, turns out to be a false god. The real "God" shows up in the form of the enigmatic "Wave Existence", who created the whole universe... apparently by accident, which, in some ways is even more terrifying, especially since he has no particular interest in His creations & just wants to go home. He's not a bad guy, though, & does help our heroes along eventually.
* Deus Encarmine, a knife tastes Rafel's blood and sends it back, and a Word-Bearer, by tasting it, can judge his age.
* Deus Ex advertises a suicide clinic, offering its users ten thousand credits to his or her survivors should they visit.
* Deus Ex advertises the cigarette brand Holy Smokes! as "savioriffic".
* Deus Ex, after casually blowing up Gunther Herman with his killphrase "Laputan Machine".
* Deus Ex aggregates nice and tidy accommodations of Versalife corporation and UNATCO headquarters and the rather unpleasant urban neighborhoods (barring Paris that will look gorgeous even the world comes rolling to the doors of Hell).
* Deus Ex a good choice for this. One of the three endings for the game involves JC volunteering and doing just that.
* Deus Ex. A laser sensor blocking a section of the hallway in an underground tunnel: You could lockpick the hatch to the canal that bypasses it or... oh, hey, is that an EMP grenade in the sewage pipe? An army of military drones patrolling an airport cargo yard: You could just elegantly sneak past them or... oh, hey, is that a multi-shot guided missile launcher on the guard tower table? Long stretches of water: you're guaranteed to find rebreathers nearby. This made some of the more specialized nanopowers pretty useless, since you could always count on the designers to cut you some slack and provide helpful gear—to the point of being patronizing.
* Deus Ex also heavily borrows from the noir aesthetics and narrative structure. Technically, this is a noir game with government agent and conspirators replacing more common private dick and crooks.
* Deus Ex, a man-made plague is used to control the populace in mankind's dystopian future, with the Orwellian government maintaining full control of the vaccine that keeps people alive.
* Deus Ex, and Anna Navarre and Gunther Hermann are both deranged psychopaths.
* Deus Ex and augged agents, this is due to being intentionally implanted with explosives in order to destroy evidence. In the case of robots, high density batteries are really volatile.
* Deus Ex are unkillable for plot reasons, and going on a rampage at the office will cause all of them to go aggro against you, forcing you to run or eventually

die.
* Deus Ex are wearing them as well (they seem to have made a bit of a comeback in 2052), but you'd think he'd choose something less conspicuous when infiltrating an enemy base. Lampshaded by Agent Navarre early on.
* Deus Ex, as abandoned sections of the New York subway are often occupied by sizable homeless communities.
* Deus Ex a test of JC's capabilities, and if you complete it at all most people will be deeply impressed and say things like, "Who's awesome? You're awesome."
* Deus Ex attacks you with the near-unavoidable flamethrower. The simplest solution is to kill him while on fire, then put yourself out with a nearby extinguisher.
* Deus Ex. At the top level of the pedestal, there is a fenced-off area with a sign, "This building had been condemned"; presumably the statue was no longer structurally sound. In the sequel, the statue is gone altogether and is replaced with a hologram.
* Deus Ex augments. There's also mention of mining operations on the moon.
* Deus Ex, Bob Page. By buying influence with money or blackmailing with a critical vaccine, he can have his choice of appointees in any government agency in the world, and have the legislation drafted to give them authority to declare and maintain martial law. He gradually stages legal coups to make the transfer of authority to a U.N. enforcement agency permanent, consolidating control of all governments.
* Deus Ex, but only with ceiling glass, and unless you have something soft to break your fall or the right augments it will likely result in broken legs.Impossible to do with windows, as they have to be shot or otherwise broken before making the jump.
* Deus Ex by Agent Navarre in an interview: "I do not expect you to perform as well as Agent Hermann, but the mission will require us to do more than frighten the NSF with our baggy coats that make us look bigger than we really are." His brother Paul wears such a coat as well, as does Walton Simons. That is to say, three-quarters of the world's nano-augmented population wears a Badass Longcoat.
* Deus Ex, by either you or Gunther Hermann. When you encounter him, provided you performed the right actions earlier, you can kill him instantly by saying his killphrase. If you don't...
* Deus Ex By the time the game starts, southern Texas is under Mexican control.
* Deus Ex, came about this way. He goes around trading information to people who ask for it, in return, he asks for information he doesn't have. The information exchanged doesn't have to be equal in value; for info on an ancient conspiracy, he might inquire what you ate for breakfast.
* DeusEx. Characters will lie based on their own various agendas, not even just concerning grand, important topics but smaller, subtler issues.
* Deus Ex, combined with acting that ranged from ridiculously over-the-top (and borderline racist) to the flattest line readings imaginable lead to Dull Surprise in more than a few situations.
* Deus Ex constantly maintained by a nanite cloud. The blue glow is a side effect of the nanites, which the sword shares with all other nanite-based items (Paul's and JC's eyes, upgrade canisters, augmentation canisters...).
* Deus Ex Conversations and flavor text materials in the game suggest that much of this came about because citizen confidence in local sovereign states has severely waned in the wake of ecological and economic disasters, weakening those states, which in turn causes them to increasingly rely on the UN to maintain their influence, consolidating effective power there. This in turn reduces citizen confidence in those states further, leading to widespread discontentment and open civil war in first-world nations.
* Deus Ex cry of "A BOMB!" when Jock discovers a bomb on his helicopter.
* Deus Ex, damage to body parts cripples you a certain way, e.g. if your legs are shot out, you are reduced to crawling.
* Deus Ex director Warren Spector said in an analysis of the game, "Conceptually, Deus Ex is a genre-busting game (which really endeared us to the marketing guys) — part immersive simulation, part role-playing game, part first-person

shooter, part adventure game."
* Deus Ex DLC has a more difficult one: No weapons, explosives, or Praxis Kits (augments).
* Deus Ex. During his visit to Paris, J.C. meets a French couple who are complaining about the martial law and the MJ12 presence. The distraught woman then starts crying, saying that their son joined the MJ12. She gives a description of her son and begs J.C. to spare him but then pauses and says "But they all look the same in those uniforms".
* Deus Ex Equine Revolution. According to Rainbow Dash, the supposed rivalry between the Wonderbolts (who don't use augments) and the Shadowbolts (who do) is just an act.
* Deus Ex. Even when you get the laser sword, super speed and inhuman damage soaking. You'll still get taken down by most enemies if you don't think carefully.
* Deus Ex features Helios, an artificial intelligence that tries to take over the world with benign intentions. Helios seems to be trying to actively subvert this trope by merging with JC, so he can understand human nature. One instance has the player finding a dead body, and Helios mentioning how he "must know what you are feeling."
* Deus Ex for a comprehensive list of tropes following these naming patterns.
* Deus Ex. Getting out of the cell is easy, while escaping the whole prison complex can be nigh-impossible depending on the character build.
* Deus Ex had a bit of it. "Scrip" was one such word, meaning "to acquire". Also "chits", derived from "credits", the global currency in the game. It is used in the same was as one would use "quid" (pounds) or "bucks" (dollars) nowadays.
* Deus Ex had both alcoholic beverages, zyme (a narcotic), and tranquilizers shot by some opponents.
* Deus Ex happens to be north of places like Los Angeles and San Diego. Not only that, but considering in-game maps of North America, "south of Lompoc" included the entire Baja California peninsula as well. Altogether, that's 25 million casualties from the sinking alone. Then there's the giant tsunami that would arise from the event and then spread across the Pacific...
* Deus Ex has a couple of examples, despite its generally cynical outlook:
* Deus Ex has a "Matrix mode" cheat that turns the entire game into scrolling green text.
* Deus Ex has been criticized for the stereotypical accents all Chinese characters employ in the game's Hong Kong chapter.
* Deus Ex has lockpicks and multitools that, for some unexplained reason, can only be used once. During the tutorial level your support says that "unlocking doors expends the resources of modern lockpicks", but seeing as how the actual item is just two rods that spin about, it doesn't make much sense. It's never mentioned why the multitools can only be used once. Maybe they used really cheap batteries?
* Deus Ex has plenty of invincible characters, but many can be killed due to a collision bug. Get one to stand on the edge of a piece of furniture, then push the furniture against a wall. They will pass partially through the wall and then die instantly as the game seems to think they've been crushed.
* Deus Ex has the Dragon's Tooth sword; the blade is made entirely of nanomachines which constantly re-arrange themselves to maintain the sharpest edge possible.
* Deus Ex has the Dragon Tooth sword. It's the strongest weapon and you can get it halfway through the game. Of course, the drawbacks of a melee weapon compared to shooting weapons are obvious. Oddly, it can't break open lockers like its regular sword counterparts can.
* Deus Ex has this in spades and in all sorts of shapes - from secret rooms behind the bookcase shelves to a whole abandoned and forgotten tunnel system hiding behind a non-functioning WC in a public restroom being used as a refugee camp.
* Deus Ex has Zyme, the drug of choice for teenage rebels and junkies in 2052, in game it just gives you the effect of at least a dozen bottles of alcohol (wobbly and blurry vision — although presumably the effect is more potent on normal humans who don't have nanoaugmentations to quickly flush the drug from their system) the Shifter game mod allows you to use it for temporary bullet time (normal

effects still come after it).
* Deus Ex have gone the way of dinosaurs, entirely replaced with datapads.
* Deus Ex have some sort of devices built into the arms of their suits that packs the capabilities of pretty much all the normal weapons in the game (assault rifle, sniper rifle, flamethrower, rocket launcher). To fire, they level their arms at their target while clenching their fists.
* Deus Ex. He will try to encourage the player to use non-lethal tactics and will chew out the player if he/she chooses to do a take-no-prisoners gameplay.
* Deus Ex: Human Revolution, Adam approaches two Sarif employees from behind and overhears them discussing the fact that he was kicked out of the police force following a scandal. If you wish, you can have him butt into the conversation and offer his version of events; he chose to resign in the hopes of preserving his integrity.
* Deus Ex: Human Revolution, Adam Jensen delivers a message, saying "For the first time in history, we have a chance to steal fire from the gods. To turn away from it now — to stop pursuing a future in which technology and biology combine, leading to the promise of a Singularity — would mean to deny the very essence of who we are. No doubt the road to get there will be bumpy, hurting some people on the way. But won't achieving the dream be worth it? We can become the gods we've always been striving to be. We might as well get good at it."
* Deus Ex: Human Revolution Adam Jensen has a hexagon imbedded in his forehead with a little logo in it.
* Deus Ex: Human Revolution, all augmented humans (with the exception of the main character) must take Neuropozyne regularly. Otherwise, their body rejects the augments, the results are... not fun.
* Deus Ex: Human Revolution Amusingly, Belltower is also contracted out to the Australian government to fight in their civil war against separatists who are backed by China, which causes a lit of tension between Belltower's executives and the Chinese government.
* Deus Ex: Human Revolution and the rogue Belltower unit from the sidequest in the second visit to China).
* Deus Ex: Human Revolution and will attack on sight even if you don't enter areas they have closed off.
* Deus Ex: Human Revolution, a random citizen on the street expresses her disbelief of the current social situations by bringing up how the moon landing was faked in a studio as a relatable example.
* Deus Ex: Human Revolution: A side mission sees ex-cop Adam Jensen recruited by one of his former colleagues to help with a case. Though there is some lip service paid to the fact that they're "bending the rules" and "have to be careful how we handle this," Jensen is perfectly able to collect evidence and even "arrest" suspects (by knocking them out for the police to retrieve later) without a warrant with no consequences to the investigation. The only concession is that remaining unseen while in gang territory will net a bonus reward for the player, as their being detected will "complicate" the investigation.
* Deus Ex: Human Revolution, as when players visit foreign countries, they will sometimes find foreign emails that can be translated for humorous conversations and easter eggs.
* Deus Ex: Human Revolution: Big Bro security cameras can be temporarily disabled with a shot from a stun gun or an electromagnetic pulse, but actually shooting them will instantly raise the alarm.
* Deus Ex: Human Revolution by ensuring none of the messages are broadcast, allowing humanity to decide things for itself.
* Deus Ex: Human Revolution can be mistaken for normal people, except at close range. Possibly as a side effect of the game having better graphics.
* Deus Ex: Human Revolution CEO in the last level, and he tells you that he has wounded and that you have to move them out first.
* Deus Ex: Human Revolution deadly (for the enemies) in both games, and a gas grenade is easily the best nonlethal option for groups of enemies (important in Human Revolution if you're chasing after the Pacifist achievement).

* Deus Ex: Human Revolution does a surprisingly good impersonation of newsreader Eliza Cassan.
* Deus Ex: Human Revolution during the Social Confrontation, David will likely acknowledge that he endangered the company and its employees and apologize.
* Deus Ex: Human Revolution features commentary cued by the player being in certain locations, which the player can activate or ignore depending on game circumstances. As an added touch, portraits of the people commenting appear in the player's HUD, similar to the in-character infolink.
* Deus Ex: Human Revolution features the "old style" mechanical enhancements. They look far more advanced than the 'newer' ones in the original games, even when taking the improved graphics into account. Part of the justification for this comes in the stated mission by the designers to give the whole game something of a cultural 'Renaissance' feeling, which also reflects in the color scheme and clothing designs.
* Deus Ex: Human Revolution; focuses on bionic augmentations (nanotech is in early stages of development); the fact that the protagonist, Adam Jensen, works for a corporation rather than a government agency and that the game plot focuses on corporate espionage and side quests are essentially cyberpunk film noir in all its glory.
* Deus Ex: Human Revolution focuses on this as its primary setting. Whether or not human augmentation is evil is up for the player to decide, but it does make the world worse to a degree.
* Deus Ex: Human Revolution for the battle. You can hear two guards talk about her telling workers to evacuate earlier in the level you fight her in, and can read a email by her later in the game.
* Deus Ex: Human Revolution for the police station level. If you don't talk your way in and either sneak in through the back, or shoot your way through, the Detroit police serve as this. They are not aware of the conspiracy surrounding the dead hacker; they're just following orders.
* Deus Ex: Human Revolution gang in Hengsha operate very similarly to this, and have the same terrifying reputation. Just swap "augmented parts" for "internal organs".
* Deus Ex: Human Revolution gets rolling (not too long before the game starts, as a matter of fact). However, they certainly don't act like most people expect exes to, especially since they work together quite closely. In fact, most people assume that they're still together unless they look around for clues.
* Deus Ex: Human Revolution had a beta that was leaked by a disgruntled employee. Reports say that it cost the studio quite a bit of money. However, the payoff was that many who hated the direction the game was going in had decided to pre-order it.
* Deus Ex: Human Revolution has all sorts of useful information including persuasion level, if the target is unconscious or dead, the amount of time it take for a target to get bored looking for you, the vision cones of enemies and the last place enemies were looking for you. A targeting reticule, whether someone's a civilian/prostitute/soldier/mercenary/employee/etc., how much noise you're making, another person's personality type and quirks, whether or not there's anything to loot from a body or drawer, how close you are to death...
* Deus Ex: Human Revolution has an angry email from an employee to his coworkers regarding "the experiment in the fridge". He kindly lets them know that it has achieved sentience and has a desire to destroy all life.
* Deus Ex: Human Revolution has a side quest in China that calls for this to take place.
* Deus Ex: Human Revolution has a sidequest involving a pimp forcing his girls to get augmented.
* Deus Ex: Human Revolution has Pritchard, Sarif, and Malik filling in on this role.
* Deus Ex: Human Revolution has some pretty satisfying animations when performing Take Downs. Both lethal and non-lethal. It never gets old seeing Adam tricking a mook into punching another, and then taking him out, or backhanding two mooks at

one, or shoving a blade through both their chests.
* Deus Ex: Human Revolution has the staff acknowledging the memetic videos involving Adam Jensen, such as Safety Dance, Adam Jensen Walks Into A Bar, and Punch Punch Revolution.
* Deus Ex: Human Revolution, has two straight, square-tipped blades hidden in his bionic arms, which can extend either from the wrists or elbows, allowing him to take down enemies in awesomely over-the-top ways.
* Deus Ex: Human Revolution has two versions of this, both being extremely badass and unexpected.
* Deus Ex: Human Revolution, he just says that only members are allowed in. Fortunately, membership is as easy as one thousand credits. Alternative methods include finding the back entrance, punching the bouncer in the face or stealing someone else's membership card.
* Deus Ex: Human Revolution implies that this did not happen, but one of the other endings did.
* Deus Ex: Human Revolution in a room full of very odd statues of skinless humans constantly switching poses, then Namir (whose augmentations make him look like this naturally), who was standing behind you the entire time and acting like the rest of the statues, grabs you from behind and throws you against the wall.
* Deus Ex: Human Revolution, in the Picus Montreal offices, you can find several e-mails written in French, with no in-game translation (unlike the accurately-accented Mandarin Chinese conversations in Hengsha). They deal with Picus' role in manipulating the truth and public opinion (with one Picus employee having doubts about if he's doing the right thing)... and a guy who wants his chair back.
* Deus Ex: Human Revolution is a baseball fan, often playing around with a ball while chatting with others. The TV in his office is always tuned into a game. Although no comment is made on his opinions of other sports.
* Deus Ex: Human Revolution is a local version of this, selling weapons, ammo and modifications out of somewhat low-key establishments.
* Deus Ex: Human Revolution is going to eat up so much of your time just for the rewards, experience, and exploration it offers. Several important mission segments of the game feature large rooms with up to a dozen computer and security terminals, and you're going to have a hard time resisting the temptation to just stop and spend twenty minutes scouring the room for things to hack.
* Deus Ex: Human Revolution is severely injured in the game's prologue. His employer Sarif Industries takes advantage of a clause in the employment contract Adam signed to heavily augment him without his explicit verbal permission. Sarif Industries spares no expense in the process and fits Adam with the latest in augmentation advances. This even includes augmentation that isn't officially on the market yet, such as Sarif Industries' prototype explosive device, the Typhoon.
* Deus Ex: Human Revolution is the best way to describe the events of Human Revolution.
* Deus Ex: Human Revolution" is there waiting for him and mocks Jensen for not figuring it out. If Jensen has a CASIE aug, however, he can use it during the conversation to immediately see through Tong's act and call him out on it, winning the social battle.
* Deus Ex: Human Revolution is very much this, but isn't actually employed to be one in the first place; he's just the security chief of Sarif Industries. Through the first game, he gains a reputation for being a One Ranger.
* Deus Ex: Human Revolution, mentions an oil crash in 2015. While we didn't have an oil crash, prices did fall significantly.
* Deus Ex: Human Revolution: Not as bad as the original game, but it is on its way there. News articles and books read mention that the economy for the United States has taken a turn for the worse, and secessionism, cities and states declaring or demanding more autonomous rule and internal fighting is starting to become a political issue. An e-book mentions that Canada is starting to become the place to be in North America.
* Deus Ex: Human Revolution of attention. At least he takes it off when on serious infiltration missions in favor of a sleeveless combat vest.

* Deus Ex: Human Revolution offline for a few moments and force it to reboot. Similarly standing too close to a concussion effect (translation: a flashbang) will blind you unless you buy an upgrade. Finally, the screen tints red if your HP gets low.
* Deus Ex: Human Revolution, one of Jensen's old partners will be undercover as a prostitute.
* Deus Ex: Human Revolution operatives wear combat armor that even slightly resembles medieval armor, with many at least equipped with a futuristic breastplate at minimum. It's justified with the Detroit police, since the first time you visit there is just after a large semi-violent protest was shut down, and the second time is in the middle of a full scale riot, so the extra protection is warranted at that moment.
* Deus Ex: Human Revolution, or a smartass. More specifically, he's bisexual- his penthouse has a post it with a girl's phone number and a "Forever Alone" doodle, and Tong mentions that he provides Arie with anything he needs, including "booze, drugs, boys and girls."
* Deus Ex: Human Revolution, plays this straight as well. Walk down the street of Detroit, or heck, even just step outside the Sarif Offices at the helipad, and you'll see all sorts of people smoking a cigarette. The player character, Adam Jensen is also a smoker as well, presumably to deal with the stress of becoming an augment. Of course, since he can get an aug upgrade that allows him to breathe in visibly green toxic gas with no ill effects, cigarette smoke is probably of no concern to him.
* Deus Ex: Human Revolution read between the lines of the profile and saw it for the fairy tale it was.
* Deus Ex: Human Revolution reveals he got augmented to improve his baseball game.
* Deus Ex: Human Revolution revolves around the UN's decision to consider a sanction or ban on all human augmentations. Conversation within the game seems to indicate that the weight of the decision would nearly be on par with that made by any other sovereign government with recognized legal authority.
* Deus Ex: Human Revolution's real name before switching back to "Mr. Grey").
* Deus Ex: Human Revolution subtly hints at Faridah having feelings for Adam. His responses differ based on what the player chooses.
* Deus Ex: Human Revolution that they're meant to evoke feelings that the protagonist, through becoming augmented, has taken a typically female-occupied position of being objectified and having his body become public domain.
* Deus Ex: Human Revolution, the already-expensive drug has become even harder to come by, and shortages are an endemic problem among the remaining augmented.
* Deus Ex: Human RevolutionThe game as a whole is ambivalent though, highlighting both the danger and the potential of augmentation.
* Deus Ex: Human Revolution the game has, and he's referring to the few people who are completely incompatible with augmentations, which he honestly wants to make available for everyone.
* Deus Ex: Human Revolution, then ambushed Jensen when his attention was elsewhere.
* Deus Ex: Human Revolution, the pale green gas released by shooting the canisters is not poison and just knocks out anyone caught in it.
* Deus Ex: Human Revolution: The prequel to the above shows the "Golden Age" of the augmentation revolution. Cities are bright and beautiful, and people are prosperous...as long as you're rich. There's strong rumblings in the background of bad things happening around the world environmentally, as well. The rumblings are strong enough that a gigantic undertaking in the Arctic Ocean involving a massive complex that essentially creates a hole in the ocean to aid with global warming not only seems like a fantastic idea, but is actually serving as a template for other facilities that are planned to be built throughout the world later.
* Deus Ex: Human Revolution. There's an email you can read at Picus where one of the corporations execs reminds their writers that people have the collective emotional maturity of a five year old and that Picus should treat them as such.
* Deus Ex: Human Revolution: The upgraded CASIE enhancement allows Adam to emit pheromones that make his vis-a-vis more receptive to his suggestions and demands

(provided the player had figured the NPC's personality type correctly in the preceding dialogue).
* Deus Ex: Human Revolution: The voice actors for Adam Jensen and his girlfriend Megan Reed are real-life married couple Elias Toufexis and Michelle Boback.
* Deus Ex: Human Revolution, the voice actors for Adam Jensen and Megan Reed, being a married couple IRL, had an argument on the day where they were to record a scene where their characters were arguing. They decided not to resolve their own argument until after the voice recording session, so as to add even more realism to the scene.
* Deus Ex: Human Revolution to a whole new level. Better get on that ASAP, China.
* Deus Ex: Human Revolution to enemies armed with the machine pistol or assault rifle.
* Deus Ex: Human Revolution to the point that abortion would not be lethal to the fetus - these cannot get off the ground due to anti-technologists protesting stem cell research... and stem cell researchers would probably rather not have the supply of aborted fetuses for stem cells cut off. The anti-aug crowd want augs eliminated, and Versalife is making a killing on Neuropozyne.
* Deus Ex: Human Revolution was genuinely impressed and looked forward to the game's release with far more excitement than before.
* Deus Ex: Human Revolution, who through observing Jensen develops both a personal sense of morality and an attachment to him. However, she's limited by her programming and can't do much outside of sharing information.
* Deus Ex: Human Revolution without needing to unlock the requisite strength augmentation.
* Deus Ex: Human Revolution, you can find an e-mail about a lack of office chairs. It continues like this:
* Deus Ex: Human Revolution you have the option to talk him out of killing himself and into helping you.
* Deus Ex: Human Revolution, you raid a 24 hour news organization which one would naturally expect to have a graveyard shift. No one is there but baddies, and after reading people's emails explaining a sudden evacuation prior to your arrival, it foreshadows the coming reveal.
* Deus Ex: Human Revolution. You've got people in support of it, people against it, lots of reasons for both pitted against each other in several debate scenes, and Adam Jensen himself has lots of cybernetic upgrades, also called augmentations.
* Deus Ex if the player wishes to pursue a fleeing, wounded enemy. Wounded characters will leave a trail of blood when they run, and a resourceful player can track them.
* Deus Ex, if you question the drug dealer Rock about stolen vaccine, he'll say "Bitch, I ain't going back to jail!" and start shooting. Note that he doesn't have anything to do with that particular theft, though.
* Deus Ex immediately jumps to mind, as there was one item which reduced the size of the viewport, tinted it green without making it any brighter, and vanished after about 90 seconds.
* Deus Ex: in one location, a hotel, a couple can be heard having sex behind a closed door. Lampshaded by the fact they never stop, not even if the player engages in a fierce gun battle with grenades right outside the door.
* Deus Ex, in the VersaLife offices on the Hong Kong level, over the programmers heads are screens that repeatedly flash single words in black and white, such as, "OBEY", "TRUST", and "LOYALTY."
* Deus Ex: Invisible War and gives you a notification if they are directly attacked.
* Deus Ex: Invisible War bomb, then the Seattle base comes under attack by the Order.
* Deus Ex: Invisible War. Clearly inspired by the Japanese idol singers, she's encountered mostly as an AI-controlled hologram that's way smarter and nicer than the real NG who you meet near the end of the game.
* Deus Ex: Invisible War features flaming penguins the special secret "after game" party at Club Vox, and a special gun (besides the normal flamethrower)that can set

people on fire.
* Deus Ex: Invisible War, featuring an obnoxious pundit named Brett Steed who interrogates guests and then cuts them off before they can answer any of his questions. In a later chapter, he gets his comeuppance when he tries to pull his schtick on Saman, who refuses to play along.
* Deus Ex: Invisible War has NG Resonance, an international pop-star, whose holographic AIs are playing all over the world. The AIs can interact with people, and one is hard-pressed to tell that it's not an actual person. Interestingly, while the holograms are polite and friendly, the actual pop-star is a spoiled brat who doesn't care about anyone.
* Deus Ex: Invisible War has the order, a front for the Illuminati created for the sole purpose of unifying all religion. Aside from the leader herself, everyone thinks it's the real deal, even the leader's second-in-command.
* Deus Ex: Invisible War, he'll give access to the place, allowing the player to raid it.
* Deus Ex: Invisible War: Holograms are frequently imperfect, with horizontal strobing blue lines, higher end holograms are better quality.
* Deus Ex: Invisible War, important NPCs aren't coded to be invincible, but are simply placed in areas where you can't use your weapons, or speak with you from behind bulletproof glass. One such important NPC, Billie Adams, can be seen at the beginning of the game running into an inaccessible booth before speaking with you. It's possible to kill her before she gets into the booth. This removes her from the game, but in later encounters there will be gaps in the dialogue where she was supposed to be, because the game was never programmed to deal with her not being alive.
* Deus Ex: Invisible War introduces Black Market Biomods, which have elements of this. They're illegal, and supposedly have negative effects on some people (fortunately, your character is not one of those unlucky people). Complete with messages warning parents about the dangers. Plus, they're only sold by cyborgs in dark alleys.
* Deus Ex: Invisible War is backed up by a Universal Constructar that will continiusly reassemble his body when you kill him.
* Deus Ex: Invisible War, Klara Sparks is a highly-trained Tarsus Academy recruit, but she has very little field experience, and thus ends up quitting mercenary work.
* Deus Ex: Invisible War. Later on, the player discovers that two factions in the A-Plot are doing the same thing.
* Deus Ex: Invisible War. Nobody else is even vaguely as terrorist, not even Apostle Corp.
* Deus Ex: Invisible War, the player may choose to force transcendence on the people, ally with a secret government, ally with an anti-technology theocracy, or destroy everybody — with unforeseen consequences.
* Deus Ex: Invisible War was frozen over and much of it cut off due to the fact that the console version of the game would not be able to handle swimming and larger maps.
* Deus Ex: Invisible War You have the option to make the trope one hundred percent after you meet NG Resonance in person, you can shoot her (not a spoiler, since you can shoot anybody you come in contact with). Strangely, her AI alter ego doesn't seem to care.
* Deus Ex is killed by Anna, she'll sometimes say "Nine hundred and ten. I'm catching up, Gunther."
* Deus Ex is to go to Liberty Island and rescue Gunther from terrorists. Gunther is much more powerful than the player character JC Denton at this point and can make his own way out if the player gives him any weapon, even a knife, and the only reason he was captured is because he was ordered to suspend an assault at the last minute. If the player refuses to give him a weapon (or doesn't have one, which Gunther won't believe), Gunther will tell him that he realises he was ordered to hold back so that Unatco could show off its new "toy", Denton, and will dislike Denton from that point on.
* Deus Exit Machina: The most powerful characters never seem to be there when it

really matters.
* Deus Exit Machina: The most powerful or useful character is removed from a story in order to make things more difficult for the other characters.
* Deus Exit Machina: The plot is prolonged by phasing out the most powerful character for a bit.
* Deus Ex it's mostly for temporarily boosting health beyond the regular maximum) and make you drunk, and while they're not an item it's stated Adam's aug's cancel out any negative effects of smoking (he muses that he's not even capable of a little self-destruction anymore).
* Deus Ex jack in one in game news article and an in game email. Based on the context of the news article (the fact that a teenage girl has one is mentioned alongside having a tattoo and wearing black), these are looked upon negatively.
* Deus Ex. Liberty Island was made the headquarters of the United Nations Anti-Terrorist Coalition after the destruction of the Statue of Liberty. The player can visit Battery Park and Hell's Kitchen.
* Deus Ex loosely fits this trope, as he ultimately decides the fate of the world with his actions at the end of the game. The JC is likely an allusion to Jesus Christ, though the connection is never made explicit.
* Deus ex Machina: A rescue comes out of nowhere when all hope seemed lost just a moment ago.
* Deus ex Machina as evidence of fate intervening in somebody's favor. Sometimes it works, sometimes it doesn't, but it is usually an attempt to use this trope.
* Deus ex Machina gets reversed when Vegeta wishes back everyone killed by Buu.
* Deus ex Machina, has a very sick girl, Anna, suffering from a severe abdominal condition she's already had surgery and seen multiple doctors for, become miraculously cured after she has a near-death near-God experience after falling 30 ft down a hollow trunk. Not only is she barely injured, within weeks they can't find a sign of her previous condition, despite every test and procedure done before. Yet a friend Anna met in the hospital, who "had faith" but hadn't converted, dies of her cancer.
* Deus Ex Machina, he isn't going to let the world that's become his home now end up being memorialized in such a dystopian fashion.
* Deus ex Machina in the third chapter, when even further into the future, John Freeman descends from the heavens to assist his son in defeating the Combines and sending them back to science and outer space.
* Deus ex Machina: Out-of-nowhere win for the good guys vs. out-of-nowhere win for the bad guys.
* Deus ex Machina, Rand turning from adventuring to court and cosmology, Rand turning back to adventuring for a book, Rand turning away from adventuring again (this repeats itself a couple of times), Perrin going back to the two rivers, Perrin getting mind controlled by his wife, Perrin trying to rescue his wife, Nynaeve alternating between being a bratty and ignorant youth and a merely impulsive (and quite awesome) young woman, and so on.
* Deus ex Machina, since the cards may as well read "if you are playing against Zarc, you win the duel"—meaning it required no skill or strategy to play them beyond simply activating them.
* Deus ex Machina: Something completely out of left field saves the day.
* Deus ex Machina: Sudden events that solve an apparently unsolvable problem/conflict.
* Deus ex Machina, swooping out of nowhere to save Maedhros who was chained to Thangorodrim, slashing Morgoth's face and saving Fingolfin's corpse, saving Beren and Lúthien from Angband, knocking Orcs off a cliff to save the survivors of Gondolin, and showing up with Eärendil to take down Morgoth's winged dragons in the final battle at Angband. Their leader Gwaihir seems to have made it his personal mission to pull Gandalf's fat out of the fire as often as possible, having done so at least five times. However, there's very little activity from the Eagles outside of this, since they are specifically at Manwë's command and Manwë doesn't wish to intervene too often.
* Deus ex Machina: The day is saved because of a solution coming out of nowhere

right when things look bleak.
* Deus ex Machina to the young ones, even when this results in some of them having two.
* Deus ex Machina when her cinderblock house falls and sinks into the mud... before the jewel glows and restores everything back to normal.
* Deus ex Machina - when the Happy Ending is forced upon the story by an outside force that wasn't previously introduced
* Deus ex Machina will quickly dumb it back down so the Noops still have victory just a couple easy steps within their grasp. Only a handful of episodes force the Noops to deal with a challenge based on their own competence, and even then it's difficult to say they don't have the story on their side.
* Deus Ex: Mankind Divided, Adam Jensen can talk to a homeless aug who claims that people think she's just a stupid bum, and tries to rebuff that opinion by saying that she has a degree in art history.
* Deus Ex: Mankind Divided, Adam Jensen has been upgraded with an arm that transforms into a gun as well as the ability to launch his nanoblades as projectiles.
* Deus Ex: Mankind Divided but before the original game, shows the transition from the "Golden Age" to this trope, with a huge social backlash against anyone with augmentations. The fact that some augmented extremists are perfectly willing to use terror tactics in retaliation only adds to the feeling. Compare Adam's mostly sleek-looking augs to the leader of the augmented extremists, whose augs are rough-looking and bulky.
* Deus Ex: Mankind Divided by slurs, such as "wrench" (As in "pipe wrench" a tool) and "clanks".
* Deus Ex: Mankind Divided can retrieve it, which requires a trip to an antiques store for a (by now 40-years obsolete) disk reader. The store clerk offers to let Jensen rummage around in the basement to look for one, but his overly inquisitive nature, and the fact that he constantly gets the name of his store wrong, tips Jensen off that the "clerk" is really one of the mercenaries, waiting to ambush him.
* Deus Ex: Mankind Divided DLC "A Criminal Past", which is set 9 months prior to the main story, when Adam takes a pill that restores his augmentations, the game notes that giving him access to his experimental augs long before he knew about their presence in his body would constitute a continuity error. You are then given the option of respecting continuity in exchange for a weaker Adam or accepting the plot hole for more power.
* Deus Ex: Mankind Divided endings as totally canon, but the developers have implied that there's a shard of truth to each of them. From what is mentioned in-game, Panchaea was destroyed but David Sarif survived. Hugh Darrow and William Taggart are implied to have died, with the "Taggart Act" limiting the production of augmentations. The world now largely sees augmentation as a threat to humanity, which is akin to Darrow's ending.
* Deus Ex: Mankind Divided has an ex-husband, information which is buried away in his (hackable) emails. Otherwise, you would never have known.
* Deus Ex: Mankind Divided have to live in the crappiest part of town and go through police checkpoints to get anywhere.
* Deus Ex: Mankind Divided. He's working for the Illuminati in order to goad the Augmented Rights Coalition into terrorist attacks. He believes, once they've killed a bunch of innocent people, the Illumiinati will be able to pass their Human Restoration Act.
* Deus Ex: Mankind Divided, investing Praxis into your Hacking skill tree upgrades Jensen's own neural interface, allowing it to use increasingly large parts of his brain for extra processing power when attacking "secure" devices.
* Deus Ex: Mankind Divided is a renowned expert in Criminal Psychology and serves as a TF-29 Task Force resident psychologist.
* Deus Ex: Mankind Divided. Later on, Adam can upgrade his systems to grant complete immunity to electricity.
* Deus Ex: Mankind Divided-licensed games since then, with news of the sequel

nowhere in sight. Right now, the biggest fear fans have is that Square-Enix will drop the company long before it even gets made.
* Deus Ex: Mankind Divided, nano-augmentation is about to become the go-to method for enhancement, a death knell for mechanical augmentation.
* Deus Ex: Mankind Divided, particularly with Czech in the hub world of Prague.
* Deus Ex: Mankind Divided sees the formation of Task Force 29, a counter-terrorism organization that appears to be a precursor to UNATCO, though it's run by Interpol instead of the UN.
* Deus Ex: Mankind Divided sends you to ghetto-ized residential/commercial districts rife with corruption and danger, as well as literal government-approved shantytowns and far, far worse.
* Deus Ex: Mankind Divided." There's also a dialogue exchange with a policewoman who regrets her profession chosen due to the political climate, saying "If I could do it again, I'd have been a fireman. No one looks into a fire and thinks, 'Shit, does this one really deserve it?'"
* Deus Ex: Mankind Divided. this report, when combined with the relatively short length and the fact that there was only a single hub area, left many people to speculate that Mankind Divided was just the first part of what was supposed to be a much larger game.
* Deus Ex: Mankind Divided was initially announced with an extremely contentious "Augment Your Pre-Order" bonus scheme, with tiers of bonus content that would be unlocked as the game hit certain pre-sale milestones. After the plan received an extremely hostile reception from fans, it was quickly scrapped, and all bonus content became available to anyone who pre-ordered regardless of sales numbers.
* Deus Ex: Mankind Divided: You can skip the final boss by using his kill phrase.
* Deus Ex most enemy bases are properly guarded. But somehow they always let some Data Cube or PDA with the passwords to their security systems lay around.
* Deus Ex never has bathrooms invoke this trope by architecture, but there are a suspicious number of occasions, especially in the first half of the game, when the ladies' room is important in some way. The men's room occasionally hides a secret as well, but nothing can top the secret passage way in the women's bathroom, opened by the secret keypad under the sink.
* Deus Ex never takes them off. When mocked by Agent Navarre for wearing sunglasses at night, he gruffly replies that his vision is augmented. Additionally it is suggested that the cool shades stop him freaking the public with his solid blue eyes.
* Deus Ex News articles also read that the East River had a massive chlorine spill, killing almost all life in it, and that water supplies may be contaminated.
* Deus Ex. NSF terrorists have raided and set up a command post on Liberty Island, the location of UNATCO Headquarters. There are UNATCO troops and security bots on the island, but they are ordered to pull back and let the protagonist, JC Denton, handle the situation as a test of his abilities.
* Deus Ex on Icarus' part since he can (and does) message directly to JC in other points of the game.
* Deus Ex on the New York level, although it serves no storyline purpose, but merely a way to highlight how bad the world of 2052 really is.
* Deus Ex (or rather, not blindly loyal and able to recognise UNATCO's faults, which is what they don't want).
* Deus Ex pulse to sabotage electronic devices). It was considered excessively expensive for its utility.
* Deus Ex reveal that the mysterious Oracle whose emails you can occasionally read is actually a self-aware computer system.
* Deus Ex series can end up this way, depending on the path you choose.
* Deus Ex series, there's dozens of characters you can talk to that have no impact on the plot and serve no purpose, and there's lots of virtual books that are interesting to read but don't really serve any actual purpose.
* Deus Ex (set in 2029), officially states that none of the endings are canon, with the assumed state seeming like a small combination of various endings (Panchaea was destroyed and augmentation is publicly condemned, but Sarif is alive while Darrow

and Taggart appear to be dead).
* Deus Ex shot to the head disposes of most enemies quickly and silently plus their ammo is nowhere near as rare.
* Deus Ex, Silhouette's claim to fame is hacking a Superbowl broadcast and inserting anti-UN propaganda.
* Deus Ex's main story is pretty straight, the backstory is hidden in pieces in various in-game media this way.
* Deus Ex, so of course it includes an explanation for Roswell that is half based on the typical fiction as well as based on an intricate network of new conspiracies. You also eventually go to Area 51, and yes, you will find what you might expect to find... sort of.
* Deus Ex still has a very strong modding community despite being an older game. This includes graphical and gameplay tweaks such as Shifter, and many total conversions.
* Deus Ex storm your brother's apartment building to apprehend him, and you'll be faced with a choice. You can either take the safer option, which in this case will be to escape through the window, evading the attackers completely, or you can stay behind and fight them, clearing all of them out of the front door and in the downstairs lobby. Doing the former will result in your brother dying, but doing the more dangerous latter will save him.
* Deus Ex takes place entirely in and around a missile silo — nuke still included.
* Deus Ex takes place in Area 51. It's alluded to that the so-called alien 'Greys' were being used to distract the conspiracy theorists from something even worse, although that does raise the question as to where they got the anti-matter reactor, if not the aliens...
* Deus Ex. The conspiracy makes artifical life-forms called Grays that resemble the popular idea of aliens (round heads, gray skin) and is implied to let rumours about them circulate as a smokescreen for what they are really up to in the Area 51 facility. Some sources also claim that the Grays are clones grown from genetic material from the Roswell UFO, but nothing conclusive is given.
* Deus Ex: The Fall (an installment that was only released on mobile, and later, PC) and the novella detailing her actions between the games.
* Deus Ex: The Fall does this too with the EMP grenades and such, and when Ben is having neuropozyne withdrawals.
* Deus Ex: The Fall opens up with the tutorial mission through the Mafia hideout and Ben's defection from the Tyrants before the title sequence.
* Deus Ex, the protagonist has the option to rule the world as a transcendent being, as a conspirator, or to plunge the world into anarchy.
* Deus Ex, there are several books and newspapers that the player can read.
* Deus Ex, the Red Dragon triad is at war with the Luminous Path triad. Rather than eliminating one side, the objective is to encourage a peace between the two.
* Deus Ex The second game on the other hand, they are definitely not just in the shadows, "influencing".
* Deus Ex, the shotgun can fire sabot rounds, which are far more effective against bots than buckshot; but buckshot is better against soft targets. That's besides the more explosive means of dealing with bots, like rockets or grenades.
* Deus Ex throughout the game. "A single artist, a single general, a single hero or a single villain may all die, but it is impossible to kill a people, a nation, an idea—except when that idea has grown weak and is overpowered by one that is stronger." —The Doctrine of the Mighty
* Deus Ex trooper, sometimes, they'll ask one of their comrades "Who's hungry?".
* Deus Ex uses this trope to its full extent, partly because it used so many famous examples as inspiration, such as SHODAN, HAL, Agent Smith and Project 2501.
* Deus Ex via his infolink augmentation, most notably Alex Jacobson, Daedalus and Tracer Tong.
* Deus Ex was released two years after the original game, and had better graphics and some upgraded cutscenes (the conversation between Bob Page and Walton Simons is now a full animatic rather than using the in-game engine), though at the cost of

segmented maps.
* Deus Ex, where explosives are generally lethal unless you use an upgrade that remotely detonates them before they reach you.
* Deus Ex where the player, when faced with a wooden door can always just blow it open with explosives or knock it down with the energy sword. Only reinforced metal doors and some plot-important doors were completely impassable. Played straight in one scene where you are supposed to surrender to the enemy and cannot escape the spot where they engage you even though it is fenced with nothing but waist-high blocks.
* Deus Ex, where you play as a crimefighter enhanced with nanomachines which give powers and stat boosts. It wouldn't really fit in with the genre, so you wear a longcoat and sunglasses (even at night!).
* Deus Ex Which actually works fairly well, considering that none of the original endings could necessarily be considered 'bad' in comparison to the others, just different.
* Deus Ex, which is set in 2072 when nanotechnology and advanced AI are increasingly common.
* Deus Ex: While exploring the DuClare mansion, there are no enemies, just dialog between JC and Nicolette as she more or less gives him a tour and exposits her backstory.
* Deus Ex: While you will not see anyone actually smoking, cigs are a relatively common find throughout the game, and there are usually cigarette vending machines in public. In a nightclub, one NPC will ask you for a light. JC can smoke as well, but at the cost of 10 health points to the torso, making it at full health, chain smoking 10 packs in a row will kill you.
* Deus Ex, whose genetic modification merely allows him to be mechanically augmented without requiring Neuropozyne to counter rejection.
* Deus Ex will even praise you for being just the right type of trigger-happy paranoiac they need.
* Deus Ex, you are given the choice of merging your character's consciousness with an AI called Helios.
* Deus Ex. You can bypass two boss fights by discovering their killphrases before confronting them.
* Deus Ex. You can play JC Denton this way, too. The in-game written material in the FEMA HQ seems like a directed effort to get agents to think of themselves in these terms and thus avoid misgivings.
* Deus Ex: "You'll behave like a professional, that's an order." (Usually said in response to you tossing potted plants at your boss.)
* Deus is a superweapon that crashed on the planet the game takes place on 10,000 years ago. It's been trying to repair itself ever since,

* Deus Salve O Rei because Rodolfo, the former's husband nurtures a crush on the latter, despite being married himself and Catarina not really caring about his affections one way or the other, so she looks down on both Rodolfo and Lucrézia.
* Deus Salve O Rei: Prince Afonso falls in love with farm girl Amália shortly she saved his life from bandits and chooses to abdicate the throne of Montemor to be with her. This leads to his foppish and irresponsible younger brother Rodolfo having to become king, which further escalates tensions with its neighbor realm of Artena.

* "Deutschland" is a very subtle, until the end, parody of hyper-nationalism. It's commonly used as a German pride song by less than perceptive people.
* Deutschland recognizable stars we have names for is a pretty astronomically small chance. Bright stars are not only outnumbered by smaller, dimmer stars by a long shot (our own sun isn't particularly bright itself, being in the upper-middle range), and just because a star is bright to us in the sky doesn't mean it's close to us, either.
* Deutschland-Saga slot) used Die Prinzen's "Deutschland" as its theme. The song is

a tongue-in-cheek satire; the chorus is harmless enough, but they also used the repeated "Deutsch! Deutsch!" shouts, which irritated some viewers.

* devastated by nuclear war, as well as make certain barren planets habitable. Finally, a rare late game tech lets you turn any habitable planet into a Gaia world, which are 100% inhabitable by all species regardless of the nature of their homeworld. The more complex the terraforming operation, the longer it takes. Terraforming within a climate range takes just 5 years, while terraforming between climate ranges takes twice as long. Restoring a tomb world's habitability or making a barren world habitable takes about 20 years, and creating a Gaia world takes over 40 years.

* devastating against cavalry and will let the infantry hold out better against enemy infantry, at the penalty of very slow movement, very small coverage, and low offensive ability. Pike units can form spearwalls, which cannot charge but when are set up can obliterate charging cavalry and hold off assaulting infantry, and press shorter-ranged enemy infantry back. Certain heavy infantry units can form shieldwalls, which can charge and break through enemy infantry formations. Many heavy cavalry can form into wedge formations, letting them charge straight through enemy infantry or cavalry groups and split them apart. Line infantry can fix bayonets and form square to guard against cavalry.
* devastating in the hands of a player. For instance, many undead have a Create Spawn ability, which causes opponents slain by them to rise as similarly-powered undead under their control. In the hands of a wandering monster, this really just means that if one of the party somehow dies, things just got a bit harder. In the hands of a player, however, this is pretty much the key to creating an entire army by simply running through a town of commoners. Because of this, every undead with the Create Spawn ability winds up with LA so high that both them and their erstwhile army get one-hit-killed by anything level-equivalent for a player - compare the CR of a shadow (3, about equal with a grizzly bear or an ogre) with its ECL (10, meaning it should be fighting fire giants and adult white dragons with its 19 hit points).

These parents tend to try to be more of a friend to their children than a parent, and it usually doesn't end well because children

Unusually, it's not perfect; you can only use one language at a time, can only learn a new one this way by finding a mage who speaks it, and if they mess up it can leave you unable to use your original languages until a more competent mage fixes the problem.
* Deverish Also, Kuroraki's magic armor is supposed to repair itself, but the magic went wrong and caused the armor to effectively weld itself shut. He's just lucky there's no helmet.
* Deverish Also originally got rich by buying aluminium on Earth, where it's a common industrial metal, and selling the "litesilver" for obscene amounts of gold in the other world.
* Deverish Also the protagonist is transported to a medieval fantasy universe where aluminum, or "litesteel", is more valuable than gold. Later it turns out that the villain toppled a kingdom by using aluminium from the protagonist's homeworld to get insanely wealthy.
* Deverish Also which sucked him and everything else nearby into another world. Meaning he vanished, along with a company van and a whole bunch of warehouse inventory, and the warehouse itself was leveled. The Earth police and company staff aren't exactly pleased with him.
* Deverry). Any antipathy the Westfolk have to the dwarves is mostly a reaction to this attitude.
* Deverry books, the Gaulish-descended Deverrians remember the ancient heroes Gwercyngetoryc and Gwindyc, who are the historic Gaulish king Vercingetorix and Gallo-Roman governer Vindex. Other Deverrian words featured in the books are similarly derived from the Gaulish language. The hereditatry noble rank of Gwerbret, for example, comes from the Gaulish word "vergobret", which means an elected magistrate, showing how both pronounciation and culture have changed since the Dawntime.

* Deverry Cycle features this for Deverrian nobles. It's extremely significant at several points across the books, although unusually it's presented as neither wholly good or bad. Both male and female characters comment on it, knowing full well that marriages are for political alliances, not love. There's even an in-universe saying about it: "Men like me marry to please our clans, not ourselves."
* Deverry Cycle has an ethereal plane (or astral plane, can't recall the terminology) that works like the D&D one.
* Deverry (E.g. "He shall not die in battle except by a sword, but no man can kill him with a sword" - was killed by a girl, but he could also have been killed by his chief rival who turned out to be a half-elf.)
* Deverry known as the Time of Troubles, it was mentioned that some clans chose one side purely because a rival clan chose the other, which gave them unrestricted ability to pursue their feud in the name of the 'true' king.
* Deverry novels, but only actually happens once. In that one, Rhodry serves as champion in the duel, as he had argued before the malover (court) that as Otho was 1: a dwarf, and as such had a substantially shorter reach than his human accuser, 2: very old, even by dwarven standards, and as such in much poorer health than his younger accuser, and 3: totally untrained in swordfighting, a trial by combat would be a one-sided farce rather than a divine demonstration of justice.
* Deverry novels has shown up to play a major role in his country's history quite a few times, but he always does it under the same identity: the shabby old herbalist named Nevyn (save for the few times he temporarily uses his birth name of Galrion). But since he generally drops out of sight for twenty or thirty years between his major appearances, those people old enough to remember the old herbman named Nevyn from his previous appearance refuse to believe that the shabby old herbman named Nevyn who just rode into town could possibly be the same man. Those people who notice the multiple Nevyns across history assume the name is inherited (whether from father to son or master to apprentice is debated).
* Deverry novels, in order to keep people from asking too many questions about the shabby old herbalist named Nevyn who tends to show up at critical junctions in history, Nevyn has gotten into the habit of telling people that the Nevyn that the questioner knew of from fifty-odd years before was either A: his grandfather, who he was named after, or B: that Nevyn is a title passed down from master to apprentice.
* Deverry novels, Salamander poses as 'The Great Wizard Krysello' in the Bardek marketplaces. Everyone in the audience assumes that he's doing stage magic when he's actually using real magic. Nevyn was not amused.
* Deverry novels, the Gel Da'Thae hordes that destroyed the Seven Cities of the Elves back in the first century had been driven out of their homelands into the Elven Kingdoms by the onslaught of the Gaulish tribes who later became the Deverrians. They in turn had fled to what would become Deverry to escape the legions of Rome.
* Deverry novels. The mazrakir (shapeshifters) all change into an animal form the same size as their normal form. Nevyn pokes fun at the old 'sorcerers turning people into frogs' story by pointing out the stories never mention that the frogs would have to be big enough to ride.
* Deverry novels, this is mentioned as a problem for elves (And the immortal human magicians Nevyn and Aderyn) as they get into their fifth century. In the days when the elves lived in cities, they tended to live extremely ritualized lives purely to help people who faced this function. Once the cities were destroyed and they became nomads, they tended not to live as long, so this ceased to be so much of a problem.
* Deverry novels was between two nobles who were fighting over whose peasants had the right to forage in the local woods for pig fodder. It should be noted that the two families had been feuding for three generations at this point, and had already exhausted just about every other reason they could find to go to war with each other, including who owned the forest in question.
* Deverry of the significance of what's happening... The Dragon Mage (3rd series) is probably the worst offender, since it tells about the end of the civil war, which has been earlier covered in three other books.

* Deverry series. All magic comes from life-force, so if you can't see auras, you can't see magic.
* Deverry series calls it "Dwarven Silver", and a dagger made of the metal is a recurring theme: it's the key signifier of mercenaries in the setting. The first book in the series is even called The Silver Dagger. It's most notable property is to glow when touched by an elf or half-elf.
* Deverry series has a good bit of this over its 15 books, and it's quite necessary, as the story is told by moving to different points in the history. The author has stated that the first bit of the world that came to her mind was what ended up being expanded to be the last part of the sixth book.
* Deverry series is originally based on a bunch of dimensionally travelling gauls entering a different world and setting off a chain of displacements the end results which brought down the elven civilization.
* Deverry the cycle. 'Cuz the lovers tend to mess up a lot along the way.
* Deverry, the Maelwaedd clan has something of a succession crisis looming. Rhys is the ruler and needs an heir. He's been married for years and his wife hasn't given him any children at all. His brother Rhodry isn't so burdened, has a way with the ladies, and accidentally gets a servant girl pregnant. Rhys, meanwhile, is forced by politics to cast off his wife for one who isn't barren and his cast-off wife is given to a widower with so many children, he needs a wife to mother them but doesn't need any more heirs. Within a year, Rhys's cast-off wife is pregnant and giving birth, causing everyone to realise that the infertile one is actually Rhys (nobles start whiling away their time by placing bets as to whether his second wife will ever get pregnant). Rhys tries to solve this problem by adopting Rhodry's illegitimate child as his legal heir, but he dies before he can go beyond considering it as a hypothetical solution.
* Deverry. They were so instrumental in ending the three-way civil war that later generations of kings were afraid that they might be used to overthrow them and put another king on the throne. The Silver Daggers' charter was guaranteed to last in perpetuity due to a boon posthumously granted to their original captain by Maryn I, so instead a law was passed banning all other mercenary units, and prohibiting the Silver Daggers from acting as a single unit ever again, forcing anyone who wanted a mercenary army to hire them one or two at a time — assuming that they could find enough of the now scattered soldiers of fortune to make it worth the effort.

Several times, though, she has refused to answer questions, saying that she has an idea of the answer, but doesn't want to tie herself down to any particular position when a different answer might come up later as a plot point, and sometimes the process of writing produces more interesting answers than trying to figure it out ahead of time. Other times, she's mentioned that she simply doesn't have an answer because it's not really something she goes out of her way to think about.

* Deviantart Extended Universe to see how big the land would need to be to sustain a certain population for a reasonable amount of time.
* Deviant Art Extended Universe was basically founded as an experiment in world building. Author Doctor-of-W envisioned a fantasy setting with his followers as characters, and created a planet with various locations and a sub continent within that planet as a microcosm of that world! As the story is still new, not much actual setting development has happened yet. But give it time!

* Deviant: Crowd, a vigilante who can clone herself, can also surf between these bodies, possessing whichever ones she chooses. Another vigilante, Revenant, is effectively immortal because of their ability - they can possess as many bodies as they please, dead or alive.
* Deviant: Draconian, a dragon-like hybrid, serves as this for superhero team Terminus, acting like a giant puppy. That said, he still breathes fire and eats people, so he's just as scary as the rest of them.
* Deviant Hearts: A Femslash archive. Closed in 2014, but a mirror has been provided by Nullroute.
* Deviant is a story about the rise of superhumans with the destruction of Seattle. A teenager gets involved in a world of violent vigilantes and seedy gangs, struggling to hold onto their morality in a world that seems to be lacking it.
* Deviant leaves the Grims, a gang, out of distaste for how they treated her daughter — selling her to a gang of human traffickers. After retrieving her kid, Keeper becomes an ally of the vigilante group Cerberus.
* Deviant: Revenant, a bigot with the ability to possess people, and Insinuation, a double agent who can't seem to decide who's side he's on.
* 'Deviants', and is often looked on with fear and rejection by the rest of their kind due to how unstable the Changeling genetic structure is. Chrysalis in particular hated them due to her racial supremacist views and had decreed their extermination during her reign. Thorax was one due to his ability to shapeshift into inanimate objects, something he hid from the rest of his hive until his and his hive's Purification. His hive ended up gaining it as well, and his brother Pharynx is also a mutant with his natural combat form.
* Deviant She isn't alone - other characters in the story mention their distaste for having to murder as well, and many mention how guilty they feel for their kill counts.
* Deviant: The Degenerates, a gang of human traffickers, live in a seedy bar-esque hideout in the sewers.
* Deviant: The main protagonist, Cassandra Jansen, is knocked out during a fight and wakes up with her head in her crush's lap.
* Deviant: The main protagonist of the story, Cassandra Jansen, is not only a superhero, but she's also only 15 years old. There's a number of other kid heroes as well, most prominently the Newborns, a team of them.
* Deviant: The Renegades be possible to connect with a Touchstone, but for most, it's a one-way trip.
* Deviant: The Renegades has a different take. While most Deviants still have their own identities, they're pursued by Conspiracies that want to get their hands on them, which means maintaining an official identity is an easy way to be traced. This is reflected by how Merits such as Resources have the "Overt" tag, indicating that calling on them makes it easier for a Conspiracy to find them. Most Deviants are said to turn towards dumpster diving, low-paying under-the-table work, or organized crime to get by while trying to avoid the notices of Conspiracies.
* Deviant: The Renegades is designed explicitly as a game of mad science and people made different by cruel experimentation; however, the game makes it clear that Deviants are not a new phenomenon, and where now they may be created through

genetic engineering, nanotech, and cybernetics, they were once (and heck, still are) created through occult rites and bizarre alchemy.
* Deviant: The various superpowered gangs have quite a few unpowered members between them.
* Deviant This resilience is noted by several characters, as a Deviant being able to tank something like this is fairly rare. The only other example shown in-story so far is Tsunami, who is very much an outlier.
* Deviant: Tsunami, leader of the superhero team Terminus, could be considered a team mom, often disregarding formalities and going out of her way to keep her team alive. She's also friends with most of the team, especially best friend Blizzard and husband Alpha.
* Deviant Universe, Corvus is this to the Dark Legion due to having some kind of control over its leader Anarchy.
* Deviant Universe had the Freedom Fighters in the Freedom War arc, and the superheros of the world fighting against Omega in the Omega Rising arc.
* Deviant Universe have appeared from alternate universes, and one story arc involved an attack by another universe.
* Deviant Universe linked to real life and fictional cosmologies that all live under the same roof.
* Deviant Universe, there is at least one of every kind of creature you can think of.
* Deviant Universe, where almost every story event takes place in the month they were drawn in.
* Deviant: While Genesis gets her ass completely kicked by Terminus, she manages to actually do some damage and lasts longer than anyone really should've in her situation. This is pretty recognized in-universe afterwards.
* Deviant: While mostly averted by official organizations, many characters in the story are teenagers and arguably more like soldiers than heroes. Vanquish is the biggest example of this trope, a 16 year old mercenary who can turn invisible.
* Deviant: While no Deviants possess the ability to heal wounds, Remedy tends to medic duty for unregistered Deviants and vigilantes - whoever pays, essentially. She possesses no powers, either, making this all the more impressive.
* Deviating from the comics, Dinah Laurel Lance starts out brunette, but dyes her hair blonde once she takes up her Black Canary mantle. This also applies to her Earth-2 counterpart, Black Siren, who is initially seen with brown hair, but dyes her hair blonde when she impersonates Black Canary and is mostly seen with that color thereafter, though she briefly dyes it black while working under Ricardo Diaz. Strangely, her sister, Sara, has natural blonde hair, mainly because
* Devices and Desires, women in Norfolk are being killed by a serial killer known as the Whistler, because he'd been heard whistling a hymn after one of his murders.
* Devices that contain dated map data can also lead the user the wrong way completely.
* Devil: A man falls off the top of a building while the janitor's back is turned to the window.
* Devil & Devil, all the time that the creature had sucked out is returned once it is killed, restoring the victims to their proper ages.
* Devil & Devil. It doesn't work as well as he expected, though, and merely damages the monster instead of destroying it outright.
* Devil & Devil. Soma is a weak ocult otaku and Kanna is a violent rebel. It doesn't help that they each get possessed by the devil Sword and the angel Ios respectably.
* Devil & Devil. The monster can, however, use the tentacles to attack its foes directly. It was offed very quickly though, returning its victims to normal.
* Devil and Devil of a devil before being forced to occupy a human vessel to survive.
* Devil and Santa Christ have one to parody the movie, but this one actually comes off better because they have a history.
* Devil, and the narrator comments that if the Devil exists, God must exist too.
* DevilArtemis. A murderous bio-android and a Muppet are not what you'd normally

think when you think "best friends".
* Devilbats until Hiruma decides to use combination play to beat a team that don't know enough about football to counter it, in the manga Hiruma goes with this plan right away and the all-star exchange their place with the regular starter after a forty points gap.
* Devil Beside You and actually a decent guy. Before either of them could understand their feelings, her widowed mother and his divorced father began dating, eventually becoming engaged. One of the main conflicts of the story is the main couple trying to work out their relationship amidst their parents' relationship as well.
* Devil Beside You: Qi Yue gets to do the cold compress thing on Ahmon's brow.
* Devil Boner and Hyper are as happily kinky as they can be, tying up Critic for kinks and giggles, her kissing his penis gun, and references to puppy play.
* Devil Bunny Hates the Earth!: the Bunny is attempting to use taffy to destroy the world.
* Devil Bunny Needs A Ham has a story, which, in all seriousness, goes as follows: "You and your friends are living pleasant and full lives in Happyville. You are highly trained and well-paid sous-chefs, who have decided to climb to the top of a tall building, as fast as you can. Devil Bunny needs a ham. And he's pretty sure that knocking you off the building will help him get one. Perhaps he is right. Perhaps he is not."
* Devil Bunny Needs a Ham: the same Bunny takes out his unresolved desires on acrobatic sous-chefs.
* Devilbushes uses tempting berries to lure prey towards them, at which point their victims fall into a disguised pit around the bush and are seized by its mobile roots. Once its prey is secured, the devilbush afflicts it with debilitating sickness
* Devil, but No God: It's established that Satan exists, but God either doesn't exist or isn't acknowledged.
* Devil, but No God: The work establishes that Satan exists, with God's existence either being disproved or not acknowledged
* Devil Complex), there's a 100% probability that they're most definitely a villain.
* Devil Complex: When one proclaims to be the very embodiment of evil itself.
* Devil deals grant Isaac some of the best items in the game, at the cost of lowering his red hearts (or sometimes
* Devil Doll, the main villain is a ventriloquist who's really a soul-stealing hypnotist.
* Devil Fish, the creators of the eponymous sharktopus monster intend to use it to protect undersea resources so they can be exploited later. How they intend to kill the resulting swarms of infinitely reproducing horrors out of Lovecraft's worst nightmares is never made clear, nor is there any apparent impulse in the creatures themselves to seek out and defend areas with resources in them; they seem to prefer hanging around areas with plenty of divers and boats and eating people.
* Devil Fish, this is one of the eponymous creature's abilities - apparently even one single cell severed from the original creature will grow a new Devil Fish. This is a pretty big problem since the creature is also unstable and designed to disintegrate after a week or so, which will then reform into dozens if not hundreds of new Devil Fish.
* Devil Fish which also features its own laugh ending as listed above, with the trio attempting to laugh nonstop through the credits in response to the hero's cheesy end-movie joke.
* Devil Fish. Why make a killer sharktopus? You wouldn't understand. You're too old for science and for your wife.
* Devil Fruit ,appropiately named Ope-Ope Fruit (from "operation"), allows him to cut people up and reassemble them in any way he likes. He's the doctor and captain of the Heart Pirates and his epithet is "The Surgeon of Death".
* Devil Fruits are regarded as mythical in certain parts of the East Blue. While devil fruits and their users are rare, especially outside of the Grand Line (where

the main adventure takes place), most of the world's most prominent military figures and the most widely known and feared pirates do possess devil fruit powers, and there is known scientific literature seemingly available to the general public describing devil fruits and their effects.
* Devil fruits in general have this effect as many characters (particularly logia users) have elemental powers that
* Devil Fruits to realize these powers were available to him and work out how to use them.
* Devil Girl from Mars. A leather-dressed female alien seeking men to repopulate her race crashlands in a small town in the Scottish moors and has to make the best of a bad situation.
* Devil Girl from Mars: when Nyah unleashes her giant robot and gives a demonstration of its powers, everybody runs away, but Prof. Hennessey hesitates before doing so as he is clearly fascinated by the mechanical monster.
* devil girls, and one comments they'd never realized it was a punishment.
* Devil Girls invoke this trope, the joke being that they don't believe it themselves.
* Devil Hunters moment. It's notable that the two actresses, Moon and Sibelle, ends up a little too close to the explosion when it happens, resulting in both of them suffering third-degree burns on their backs after filming.
* Devil Hunter Yohko. Afterwards, a hunter can have all the sex they want, as demonstrated by Yohko's grandmother.
* Devil Hunter Yohko and actively encourages Yohko to do the same. Thankfully, Yohko followed her grandmother's example instead and retained her virginity until she became the 108th Devil Hunter.
* Devil Hunter Yohko ("Dark powers whose black deeds escape even the light of the moon/ Behold now the radiance yada yada yada...")
* Devil Hunter Yohko featured an infamous sex scene where Yohko's grandma is racing on her motorcycle through Tokyo to stop a demon-possessed Osamu from taking Yohko's virginity at a love hotel.
* Devil Hunter Yohko in her spare time. Unlike her contemporaries, Yohko isn't afraid to get physical. She'll put the sword DOWN if she has to.
* Devil Hunter Yohko is the same — Yohko and her grandmother are both Devil Hunters, but Yohko's mother is a boozy slut who didn't want to take on the family duty to fight supernatural monsters and disqualified herself as quickly as she could.
* Devil Hunter Yohko line. As such, it's her sacred duty to protect humanity from demonkind.
* Devil Hunter Yohko), Yohko herself is still a boy-crazy teenager who somewhat fits the trope.
* Devil in a Blue Dress. Albright calls out to Easy, and when he sticks up his head to answer Albright nearly blows it off.
* Devil in Disguise: The Devil, or someone working for him, hiding among living humans
* Devil in Plain Sight: Antagonists are often very easy to spot, even without proper introduction.
* Devil in Plain Sight: Everyone ignores the obvious signs that this bad person can't be trusted.
* Devil in Plain Sight: Everyone trusts this character in spite of the obvious signs that they are evil
* Devil in Plain Sight: It's clear as day that this person can't be trusted, but no one seems to notice.
* Devil in Plain Sight to the audience, but the other characters don't notice.
* Devil In The Dark: In Washington State, Adam visits his estranged brother Clint to reconnect their relationship after fifteen years apart from each other. Clint has always been the favorite of their father Glen, and Adam feels grief and sorrow. The plan to go in a hunting party along the weekend to hunt deer and supersede their problems. When they stumble upon a cave surrounded by deer antlers, they flee from the spot. But they are chased and stalked by a supernatural creature. Will

they escape alive from the being?
* Devil in the Details by Tamara Hickman, a krampus attack the characters. Krampus are described as being a "superior form of Boogie Man" and while they have a preference for children, they'll go after whatever they can find. They tend to take the form of whatever scares their target the most.
* Devil In The Flesh 2, Debbie escapes from the mental institution she was sent off to in the first installment of the series. After the young co-ed dies in an unexpected accident, Debbie steals both the girl's identity and her car and heads off to the college her victim was supposed to attend. There, Debbie quickly develops a psychotic crush on her dashing writing professor, Dr. Sam Decker, killing anyone she perceives as a threat to their relationship. However, Debbie's scheme starts to fall apart when her roommate begins unraveling Debbie's lies and discovers the truth about her past. Knowing that she is in danger of being exposed, Debbie makes plans to get rid of her roommate and her friends by any means necessary.
* Devil In The Flesh does this when she kills numerous people she thinks might try to prevent her from being in a possible relationship with her teacher, including her abusive grandmother. She also kills her friend and tries to kill her teacher's wife as well.
* Devil is a title demons and other nasty things can earn if they are strong enough.
* devilish ingenuity in helping greedy and prideful people find their rightful place down below.
* Deviljho no matter how much damage is done to it, and will chase the player to the ends of the earth if they try to run (most monsters will give up after a certain distance).
* Devil Jin is esentially Jin Kazama overcome by the Devil Gene, unlike his human form, he's ruthless,cruel and sadistic, enjoying seeing his foes suffer, his alter ego, Jin Kazama tries at all costs to prevent the Devil's blood to take control.
* Devil Man’’ when a person gets possessed by a demon they lose their human personalities and all traces of who they originally were.
* Devilman (1972): Jacon's victims had some rather small desires; Hairo wanted to go ice skating with his friends when he was stuck home studying, Alphonse wanted to drive fast while he was stuck in a traffic jam; the only one who had a greater goal was Chaco who wanted to kill Alphonse after his reckless driving caused a car accident that injured Hairo.
* Devilman, and have an identity separate from the demon. For years, Adal's been replacing people in key positions with his mannequins, but they all burn up when Devilman kills him.
* Devilman and literally incapable of being compassionate to anyone else.
* Devilman claims to love Akira due to his female side doesn't age very well with today's audience due to the homophobic undertones. However, for a manga that came in the 70s, the fact that the author let a man explicitly proclaiming his love for another man, regardless of the reason, should be given some credits. It also helps that aside from that particular instance, the love Ryo has for Akira is played seriously in the manga and is the only thing that humanizes the otherwise evil Satan.
* DEVILMAN crybaby and his original human face in the middle of his forehead. His human face is always the one that speaks when he's in this form.
* DEVILMAN crybaby Of course, the characters (and possibly viewer) have too much on their mind at this point to really say anything so it goes unremarked on for the whole show.
* DEVILMAN crybaby, protagonist Akira Fudo is prone to crying. This borders on comedic once when Akira comes across some demons devouring a human. The demons, mistaking Akira for one of their own, tell Akira he is late, as they have nearly finished their meal. Akira immediately begins crying when he recognizes the watches one of the demons is wearing as having belonged to someone he knew, catching the demons off-guard as he transforms into Devilman and violently rips them to pieces.
* DEVILMAN crybaby: Several of the characters in this show definitely qualify.

* DEVILMAN crybaby that established them as an anime producer and winning universal acclaim, this will likely be a signature.
* DEVILMAN crybaby that would come off as outright sociopathic if it wasn't for the humanizing interactions he has with Akira.
* Devil Man Crybaby when Taro becomes possessed by a demon he develops an unsatisfiable hunger, no matter how much he eats he’s still hungry, he eventually sneaks away from his mother to eat a dog, when she discovers this she is horrified and takes him to a shelter to get him treated, by the time his father arrives he’s become an insect/fish like demon that is slowly devouring his mother with tears streaming down his eyes, showing that he is aware of what he’s doing but unable to control himself.
* Devilman demons that serve as the villains of the show, especially when driven mad with fear and paranoia.
* Devil Man destroys people's clothing. This means that Akira in his Devilman form and all the demons are technically naked when they fight.
* Devilman disguises itself as the water in Miki's bathtub, and attempts to drown her.
* Devilman features this often, mostly in the first OVA, as the demons will eat each other out of cannibalism.
* Devilman has Akira's friend Ryo tell him that Demons once roamed the Earth before being frozen in the arctic while humans dominated the planet. He also mentions that some demons got free, and could be the true causes of monster myths like Wolfmen, Dracula, and Ogres.
* Devilman has this moment at the very beginning when Akira agrees, with full foreknowledge, to join with a devil purely because his best friend asks him to. He pretty much name checks the trope.
* Devilman: In the television series, the demons originate from the Kingdom of Ice buried far below the surface of the Himalayas.
* Devilman into a tall, athletically built young man who draws more than a few admirers.
* Devilman Lady are the only ones who know that Jun is becoming a demon.
* Devilman Lady might become an angel, etc.) The main character is a frail young model that represses all 'inappropriate' feelings, thoughts, and urges. She transforms into a violent, muscular demon with no inhibitions.
* Devilman Lady similarly states that mythological monsters were people who developed Devil Beast syndrome.
* Devilman Lady suffers this trope. Only one of her male love interests whom she doesn't end up with is immune.
* Devilman Lady takes place on Christmas and it is just as dark and bitter as the rest of the series.
* Devilman: Lala, the demon who takes the form of a teenage girl. She will cry if she's hurt in the slightest or if she doesn't get what she wants. On one occasion she paused to do her makeup before resuming crying.
* Devil Man manga when a group of people at the rave party transform into demons.
* Devil Man portion of "CB Chara Nagai Go World" is more lighthearted and comedic compared to the dark source material, the bloodthirsty demons who appeared in the manga and anime are silly and prone to slapstick with none of them being treated as a serious threat.
* Devilman, showing that humanity can be just as savage as any demon when they're backed into a corner.
* Devil Man sneezes it messes up her face, she then fixes it with her matters conversion powers.
* Devilman, the Demons in the series are super-ancient lifeforms that gain strength from fusing and taking over other living things and even inanimate objects.
* Devilman the partygoers had every right to attack Ryo when he started slicing and stabbing them with a broken liquor bottle for no reason, he was doing it to summon demons as part of his ritual because he needed human blood to complete it, they then attack Akira even though he had nothing to do with it, just because Ryo was his friend and he was trying to help him.

* Devilman to her attackers, and then begins crying before going all out and murdering every single one she can get her talons on.
* Devilman, when a demon possesses someone, they warp their bodies to resemble them, and yes, it's extremely painful for the host. It's especially noticeable early on, when the party goers in the night club get possessed after Ryo spills their blood. The worst happens to two girls: one has her jaw dislocate and grow fangs, her eyeball pops out of its socket and wiggles like a worm, grows an extra pair of clawed arms, and her breasts grow eyeballs and fangs, while the second one transforms into a hideous demon covered with spikes with her severed head perched on top of her new one, and her eyes still blink, freaking out Akira.
* Devil Man when Akira tries to break up the fight in the night club Ryo has started to summon demons in, one of the men punches him, causing him to land on a topless woman's chest.
* Devil Man when a person is infected with a demonic spirit they scream in pain as they are transformed into demons.
* Devilman, when they both appear, Ryo is literally a blond Akira, luckily, other adaptations give them different haircuts... Most of the time.
* Devilman working for Black Ghost building a cyborg body for a demon to possess, in hopes of making the perfect killing machine.
* Devilman work. In the manga, it's very pronounced, since anyone can be possessed the instant they succumb to acting on instinct. Naturally, bars and nightclubs prove great places for demons to go to possess people since there are so few inhibitions in them. Only one who has a pure heart can harness the power of their possessor while still retaining their humanity, becoming a Devilman.
* Devil May Care, cats are supposedly the only truly evil creatures in Hell. In the premiere episode, they actually attempt to overthrow the Devil himself.
* Devil May Care features the main female exposing her breasts to a guard so Bond can choke him to death.
* Devil May Care). He continues doing so in his current employment to remind people to keep their mouths shut.
* "Devil May Care" (S09, Ep02), Dean says "okay, overshare" after Kevin says, "It's been a bad couple of days, I haven't slept, I haven't eaten... I’m pretty backed up."
* "Devil May Care" (S09, Ep02), the vampire has a goatee. In the same episode, Jason (the demon who repairs Abaddon's old vessel) could use a shave in the mechanic meatsuit.
* Devil May Care: "The Shipment" reveals the secret origins of Hell - God created Hell as a dumping ground for everything and everyone who annoyed Him, and then tricked the Devil into running the place because He got tired of the Devil's creative suggestions.
* Devil May Care, thus locking them into a nuclear conflict which they can't win.
* Devil May Care, when he was still working for Viet Minh, popped the eardrums of kids who listened to French priests back in Indo-China by slamming chopsticks into their ears, permanently deafening some of them in the process. Bond almost becomes a recipient of this procedure.
* Devil May Cry 2 coming out a few years later, to the fanbase's approval.
* Devil May Cry 2 (critically, at least; sales were hurt somewhat by consumer wariness due to the second game's poor reception).
* Devil May Cry 2, Dante and Lucia encounter a species of demon called the infestants, which have the power to merge their bodies with technology, and must do battle with several infested tanks and an infested helicopter that the infestants are controlling.
* Devil May Cry 2 female guards attack Dante. Supposedly these are stronger than Lucia, as she's a defect. She manages to defeat Arius herself at the end of the game.
* Devil May Cry 2 is on two DVDs. The first one lets you play as Dante, the main protagonist of the series, while the second lets you play as Lucia, who'd only appear in this installment.
* Devil May Cry 2 Lucia. Matier fought side by side with Sparda to seal away the

demon Argosax the Chaos and even briefly had a relationship with him. In the present, Dante and Lucia save the world from Argosax's return just as their parents did all those years ago. The Protectors clan that Matier and Lucia belong to are a race of demon-human hybrids who have defended the human world for years but their exploits are not talked about aside from the aforementioned team up of Sparda and Matier and only Matier and Lucia are shown in the game.
* Devil May Cry 2, The Despair Embodied (the final boss) can switch between a male and female form. True to this trope, it's the female form that can use a flaming whip.
* Devil May Cry 2. The two heroes are half demon but have no spellcasting knowledge, instead using their skill in fighting in tandem with their superhuman physical abilities. They also use some mystical items to aid them.
* Devil May Cry 3: An annoying, poorly designed jumping puzzle disrupts level 17.
* Devil May Cry 3 and becomes a much nicer character by the end of the game.
* Devil May Cry 3. As the portal to the demon world closes and Temen-ni-gru begins collapsing, Vergil chooses to stay in the demon world "where the battle took place". He allows himself to fall off the top of the waterfall where they fought. Dante attempts this trope, but is cut by Vergil's blade one last time as his brother falls into oblivion.
* Devil May Cry 3: Dante's Awakening ability after losing a fight with his brother Vergil, who then steals the amulet that Dante keeps as an heirloom of their dead mother and impales Dante on his own sword.
* Devil May Cry 3: Dante's Awakening and then kicking its body away, is clearly meant to be one of these, but on higher difficulties it is never enough.
* Devil May Cry 3: Dante's Awakening Arkham. After unloading a whole clip from her gun in him, she drops to her side, laughing into the air before being overcome with tears mid-laughter.
* Devil May Cry 3: Dante's Awakening begins with Lady narrating over the fight between Dante and Vergil, which really happens in Mission 7 of the game and is only the first of three major clashes the brothers have.
* Devil May Cry 3: Dante's Awakening: Cutscene example; Lady kills some demons behind her on her motorbike by roasting them with the bike's exhaust backblast.
* Devil May Cry 3: Dante's Awakening, Daniel Southworth, and Stephanie Cheeva mocap as Dante, Vergil, and Lady respectively.
* Devil May Cry 3: Dante's Awakening, Dante and Arkham's meeting in the bowels of hell has Dante remark that Arkham needs some hobbies over messing with the Sparda family's issues. Arkham starts laughing at this with Dante joining him shortly after, but both for different reasons: Dante at his own joke and Arkham over how much power that meddling has given him (and how he plans on making Dante eat those words in a second).
* Devil May Cry 3: Dante's Awakening: Dante and Vergil against Arkham. They even say "Jackpot" at the same time.
* Devil May Cry 3: Dante's Awakening had to be released twice because the original version was unplayably hard. This is probably the only instance in the series where this trope was not invoked by fans.
* Devil May Cry 3: Dante's Awakening has you fighting a demonic chessboard at one point. You can destroy the entire board at one go by killing the king, but until you destroy the rooks he'll switch places with them when hit (a nod to castling).
* Devil May Cry 3: Dante's Awakening. However, playable Vergil does get some moves his boss incarnations don't, and the series also tends to make Dante, the hero, far more badass than any evil counterpart.
* Devil May Cry 3: Dante's Awakening, immediately after battling Lady, Dante leans in, Lady stares into his eyes... and turns her head away at the last second. Given Dante and Lady only knew each other for a grand total of 10–15 minutes in that game (and this is being generous), them not kissing was probably for the best.
* Devil May Cry 3: Dante's Awakening is introduced, a gunslinger-style Dante has a different specialization for each gun he obtains:
* Devil May Cry 3: Dante's Awakening movement. Geryon also use this power.
* Devil May Cry 3: Dante's Awakening simultaneously, finishing him off.

* Devil May Cry 3: Dante's Awakening, the demon mooks dissolves into sand upon defeat. Justified as they're indeed using sands as a conduit.
* Devil May Cry 3: Dante's Awakening the game doesn't clarify). Her dialogue ("Your father was a handsome devil. But you're no slouch yourself") implies that she also had lusted after Dante's father Sparda in the past.
* Devil May Cry 3: Dante's Awakening, when you damage any of Cerberus's heads enough it explodes into stuff.
* Devil May Cry 3: Dante's Awakening: When you first discover the Arachne, numerous human-shaped cocoons can be seen hanging upside-down from the ceiling and from webs.
* Devil May Cry 3 features Arachnes, basically a freakish mermaid; except replace the fish part with a spider part.
* Devil May Cry 3 gained the Doppleganger ability, it gave the fangirls an excuse to pair him with his clones.
* Devil May Cry 3 has a moment like this, too. Complete with lampshading.
* Devil May Cry 3 has The Fallen, angels with the faces of demons who fly through walls, floors and ceilings as easily as they do empty air.
* Devil May Cry 3. In other games, Dante is either respectful of his father or is apathetic to his name being mentioned.
* Devil May Cry 3 is the only defeated Devil (except for Leviathan) that won't bow to Dante, and he'd rather flee, swearing revenge.
* Devil May Cry 3, Lady was introduced as a demon hunter who believed all demons are evil. Dante helps convince her that not all demons are evil, and that not all humans are good.
* Devil May Cry 3 Nevan clearly has the hots for Dante whom she calls “handsome devil” and actually feels him up during their pre-fight encounter. After the battle Nevan reveals Sparda Dante’s father used to show her a good time but Dante is no slouch himself, then she turns into a guitar.
* Devil May Cry 3, new boss fights, rebalanced difficulty, a new "survival mode," and more.
* Devil May Cry 3 nor does he actually put on a shirt for the rest of the game.
* Devil May Cry 3: Special Edition plays this perfectly straight. When playing as Vergil and you come to the boss battles against Vergil (the game is usually played as Dante, with the Vergil playability a feature of the Special Edition), the Vergil you fight is dressed in red instead of his usual blue. Apparently it's to give the impression that you're fighting Dante, but the only difference between the two versions is the colour; the boss' moveset remains the same.
* Devil May Cry 3, the combination even ends with a final big swing and Dante saying "Down and out!".
* Devil May Cry 4: After Nero defeats the demon Bael, Bael boasts that he is just the first of many and his brothers will avenge him. Nero looks up at a portal to Hell and sees an army of demons that look just like Bael approaching from the other side. Nero destroys the portal in time.
* Devil May Cry 4 are all basically burlap sacks filled with beetles with blades attached.
* Devil May Cry 4 as playable characters as well as a new difficulty, various gameplay rebalances and new costumes.
* Devil May Cry 4, both Dante and Nero land this way every time an enemy knocks them off their feet.
* Devil May Cry 4 ends up in distress along with Kyrie, prompting the switch to Dante as the playable protagonist until he is rescued.
* Devil May Cry 4 form half-way through the game; which, while not especially challenging, at least has a rectangular arena that makes him harder to catch, a smaller window to attack him in, and no "ultimate attack" besides the Savior's downward punches, which can also be used against him.
* Devil May Cry 4 has been defeated, Dante and Nero have made their peace, and Kyrie is safe. Nero and Kyrie lean in, sunset in the background, for the big moment... and suddenly Nero pulls out his gun (no, seriously, the revolver) and blasts a demon. He looks up to find a horde of the game's weakest enemy coming at

himself and his love, asks her to wait, and then spends the credits kicking their asses. You never actually see the kiss happen.
* Devil May Cry 4 has been defeated, the world is at peace, Nero saves the girl he loves... what better mood to lean in and go for it? Unfortunately just a few millimeters away, Nero pulls a gun at a swarm of demon baddies determined to interrupt, and ends up telling Kyrie that kiss is going to have to wait. You never see it. If one protects her competently during the credits, it's strongly implied that they go through with it.
* Devil May Cry 4 has tanned skin and lives on an island that has something of a European influence. His voice actor in the English release is T.J. Storm who is of Latino and African-American heritage.
* Devil May Cry 4 has Trish using a small, curved dagger in her "Gloria" disguise.
* Devil May Cry 4 is being criticised by long-time fans of the series due its significantly lower difficulty compared to the third game.
* Devil May Cry 4, is in possession of the Devil Bringer, a manifestation of the great power in his ancestor Sparda's demonic blood, allowing him to easily wield a sword passed down to Sparda's son, Vergil.
* Devil May Cry 4, Kalina Ann had the "Hysteric" move which launched cluster micro missiles.
* Devil May Cry 4, Nero is this compared to Dante. He only has one style and weapon compared to Dante's small armory. His weapon can increase in power and range and his charged gunshots are a marked contrast, Nero's remain single shot, explode at higher levels and the recoil forces Nero to be at a dead stop to use while Dante fires more charged bullets while still remaining mobile. Nero relies on the power of his Devil Bringer while Dante cycles between completely different styles.
* Devil May Cry 4's secret ending ends with one of these, with Dante getting another call and Lady and Trish joining him on another assignment.
* Devil May Cry 4, where series lead Dante demonstrates his disdain for the villains by doing this.
* Devil May Cry 4, which is quite shocking at first until later on it's revealed to be more of a case of him being pragmatic for once.
* Devil May Cry 5 Cerberus as a late-game boss. This one also sports fire and electrical powers in addition to ice-based attacks. Dante even brings mention to the Cerberus he fought back in the third game.
* Devil May Cry 5?", implying that they were so caught up in their determination to kill Dante that they reflexively countered Dante's insult without realizing what it means and it was only afterwards that they caught on to the revelation.
* Devil May Cry 5 in order to even function, making it clear why it was rejected by Mundus.
* Devil May Cry 5) in the franchise, with battles taking place in the streets and subway stations.
* Devil May Cry 5 in the prologue while Dante is knocked into a coma up until V finds him.
* Devil May Cry 5 introduces the Cavaliere as part of Dante's arsenal, a demonic motorcycle than can split off into two giant buzz saws capable of taking down large groups of enemies.
* Devil May Cry 5 joined the ranks of DMC Special Editions to feature Vergil as a playable character. It also included updated graphics with Raytracing for the PlayStation 5 and Xbox Series X, the return of Turbo Mode from DMC3SE, and a new Legendary Dark Knight Mode.
* Devil May Cry 5, Nero lost his arm, Dante, Trish, and Lady are presumed dead, and the world is on the brink of destruction. Despite all of this, Nero bounces back to his usual self pretty quickly. He sums up his feelings in one line.
* Devil May Cry 5 Not that surprising for her as she uses pieces of defeated demons to make these for Nero.
* Devil May Cry 5. That just made the situation significantly worse. In the end, Hermida was replaced for the final release, and the original music video and Johnson's tweets were all deleted.
* Devil May Cry 5, the three non-DLC playable characters, Dante, Nero, and V, are

at roughly similar levels gameplay-wise, though various characters do get plot-related sidegrades that expand their options - this is to the point that the health bar is shared between all three characters, so if you obtain a Blue Orb, max HP increases for everyone. And yet V is depicted as hopelessly outmatched by the other two in particular, in particular running away from or hiding from bosses that he could totally deal with in normal gameplay if he fought them.
* Devil May Cry 5, V initially plans on stealing from a rich person to get the necessary funds for his plan, but then decides to steal from muggers since he can take advantage of his weak appearance to draw victims to himself rather than him searching for them.
* Devil May Cry 5, where she asks him what happened in a tone that sounded like he backed the van through the garage door.
* Devil May Cry 5 (With the exception of the prologue and one single flashback mission) takes place over the course fo a single day. Beginning just before dawn and having the credits roll during sunset.
* Devil May Cry 5 with them though fortunately he can find or buy replacements.
* Devil May Cry, after the second battle with Vergil; the twins appear to be Flynning, until one notices the copious amounts of blood on the floor, which demonstrates that their inhuman speed is actually letting them land hits.
* Devil May Cry always opens with a warning about the violence in the game.
* Devil May Cry analog Mundus, who is most prominently represented by the third eye on his forehead.
* Devil May Cry and because he is the son of Sparda, a demon knight who rebelled against Mundus to protect humanity (which a lot of demons that served him are rather mad about) and possessed a great deal of power that many villains want for themselves.
* Devil May Cry and proceeds to slaughter the mooks effortlessly, at times even using the broken-off scythe blades sticking out of his arms to parry their attacks.
* Devil May Cry and their leader Mundus, but nothing supporting the existence of God. Similarly, angels have been mentioned in passing a few times, but the series has yet to explore their existence in depth.
* Devil May Cry anime, Morrison is able to coax Dante into doing a job after he convinces Dante's favorite pizza place to stop delivering to him until he can pay his tab. Dante gets especially frustrated at Patty, not over her re-decoration of his shop, but over her eating his strawberry sundae.
* Devil May Cry appearance, in the original Devil May Cry, saw him outright exploding. Yet the fandom refused to see that he was actually dead even when his signature weapon Yamato was inherited by Nero and the Angelo's where created by his body being experimented on. And then Dmc V showed Vergil alive and retaking Yamato to heal himself. There is no real explanation for how he was still alive to begin with.
* Devil May Cry are demons that are on humanity's side. Or, more often than not, half-demons, like Dante himself. The legendary Sparda was a demon who's revered by the human populace that knows him because he rebelled against his fellow demons and sided with humanity.
* Devil May Cry are lesser demons that inhabit puppets to have bodies. The Marionettes inhabit human-made marionettes dressed in medieval-style clothing and fight with scythes, knives, darts, and sometimes even shotguns. The Fetishes inhabit demon-made dolls, breathe fire, and are much stronger than the Marionettes.
* Devil May Cry as it conveys just how heartbroken Dante is over the incident.
* Devil May Cry. As shown in the third game, when he has his hair down (due to the rain), he looks awfully similar to his twin Dante, but one hair flip later and it's back to shape, making the tic a way to separate himself from his brother.
* Devil May Cry. As their mother Eva is an angel in this continuity instead of a human like the original, this trope applies to her as well.
* Devil May Cry awful games. The backlash on these was almost palpable in the videos they were mentioned in.
* Devil May Cry back, but he’s still less attractive than his Japanese version.

* Devil May Cry, born of the demon Sparda and his human wife Eva. Nero as well was born of an unknown human mother and a half-demon father.
* Devil May Cry brings us Dante and Vergil, the twin sons of Sparda. Dante is loud-mouthed, trash-talking, dresses in red, yet is a demon hunter who embraces his human side, using his demonic powers to aid humanity, being the hero. Vergil is soft-spoken, more introverted, dresses in blue yet embraces his demonic side and is obsessed with gaining power at every cost.
* Devil May Cry broke the trend being by far the most contentious installment. The fifth game in the main series both plays this straight and inverts it, straight as in as far as main series goes, it has received universal praise while inverted in the fact that it is technically the sixth game in the series if you count the reboot.
* Devil May Cry, but quickly proceeds to start throwing the enemies, before finally bursting through a group of them.
* Devil May Cry by hitting the eye, Beowulf will stumble and give a few more vital seconds for dealing damage. Cerberus from the same takes more damage from getting hit on either of his three heads. The Leviathan Heartcore, also from the same, needs to have its two accompanying "organs" destroyed before it opens up and makes itself vulnerable.
* Devil May Cry could be stronger than a full-blooded one. Worth noting is that he said that humans have something that demons don't... but he didn't say what it was.
* Devil May Cry, Dante can find and use an item called the Bangle of Time, which stops time for all non-boss enemies around him while consuming Devil Trigger energy.
* Devil May Cry. Dante collects a chunk and uses it as a lantern in the first game.
* Devil May Cry, Dante foils demonic puppets, demonic sand creatures, demonic clowns, demonic businessmen, demonic cultists, etc.
* Devil May Cry, Dante gains a pair of new forms for Rebellion that are effectively grappling hooks. Much like the above, the Angelic form drags Dante towards enemies and obstacles, while the Demonic form drags them towards him instead.
* Devil May Cry: Dante plants the Sword of Sparda in Trish's memory after he believes she is dead. When she returns, he allows her to keep the weapon.
* Devil May Cry. Dante's not spooked easily, but the place is filled with eerie contraptions and horrific demons.
* Devil May Cry, Dante takes to calling a particular character "Twig" on account of her slight build. It starts as a sarcastic nickname but as the series progresses and their relationship improves, it takes a more affectionate tone.
* Devil May Cry - developed in-house by Capcom - had a more light-hearted jab back with Dr. Faust, a cowboy hat weapon used by Dante that causes him to strike flamboyant poses while using it, referencing Tameem's infamous remark calling original!Dante a "gay cowboy".
* Devil May Cry: Devils, demons, and other supernatural creatures tend not to require food, water, sleep, or other things for survival, although this can vary depending on the type—at the very least, many of them can still get stronger by eating humans, cannibalizing other demons, or consuming materials of great power, such as the Fruit of the Qliphoth.
* Devil May Cry does this with Dante performing similar actions to his father, Sparda, which in chronological order seems to be showing that Dante surpasses his father over time:
* Devil May Cry game once, players can continue on to the higher difficulties while keeping their weapons, upgrades and items. One exception is 1's Easy Automatic mode, where only another Easy Automatic game could be played afterward. 2, 3, 4, and 5 did not suffer from this.
* Devil May Cry games have had (near-)endgame levels set in the demon world.
* Devil May Cry gives Dante the "Air Trick" ability (which, sadly, only lets him flash step right up to his target's face).
* Devil May Cry Good thing, then, that humanity has a few demons on their side to clean up the mess.
* Devil May Cry has a room just before the final boss fight with a giant, beating

heart.
* Devil May Cry has Dante take aim at Lucia with a pistol... then shoot a harpy that was attempting to attack her from behind.
* Devil May Cry has demons and half-demons going into a yearly heat which causes demons to pursue them and can only be stopped by such a mark.
* Devil May Cry has plenty of this, with Dante shooting enchanted bullets, shotgun blasts and grenades as readily as he swings an enchanted sword.
* Devil May Cry has the Demon World which is a dark counterpart of the Human World.
* Devil May Cry has Yamato, a katana apparently so sharp it can effortlessly cut through several feet of stone. From about half a mile away. Also used to separate dimensions.
* Devil May Cry HD Collection: The first three games of the franchise remastered and packaged together for the PlayStation 3 and Xbox360, later re-released again for Microsoft Windows, the PlayStation 4, Xbox One, and Nintendo Switch.
* Devil May Cry he's opened his own wing of Dante's eponymous devil hunting business that he operates out of a van.
* Devil May Cry, he teleports Dante and himself to a pocket dimension which has it's own galaxy complete with stars and at least one planetoid.
* Devil May Cry, insects that have grown to enormous proportions as a result of possession by demons. They come in two varieties: the blue Beelzebubs that resemble flies and can spit out maggots that stop you from using guns; and the green Beelzebubs that resemble mantises.
* Devil May Cry. In the first one Dante throws a pizza up in the air...
* Devil May Cry is a giant spider demon that can light himself on fire and is a recurring boss in the first game.
* Devil May Cry: "I should have been the one to fill your dark soul with LIGHT!"
* Devil May Cry is known as the Legendary Devil Hunter starting some time after the original game. He takes after his father, Sparda, who was known as the Legendary Dark Knight in his glory days.
* Devil May Cry, Lady's name is actually Mary, but she says that she "doesn't have a name" because she hates her father. She tells Dante to call her whatever he wants. His response? "Whatever, lady!" And she stuck with it.
* Devil May Cry, long after he is gone, he is worshipped as a God by the people of a city he supposedly ruled after said rebelling.
* Devil May Cry make Arkham more sympathetic or tragic, and just makes him come off as a selfish prick throwing a temper tantrum.
* Devil May Cry manage to be hammy! But nothing can match the sheer hamminess of the series' main character.
* Devil May Cry manga where Dante says that he once proposed to a mop while drunk.
* Devil May Cry. More straightforwardly, in an early scene of the fourth game, Nero and Kyrie talk about Nero's "Red Queen" sword as if discussing a female.
* Devil May Cry, Mundus, the demon king, is one of the largest demons Dante has to face.
* Devil May Cry, Nero Angelo (Black Angel in Italian), being referred to as Nelo Angelo. (Interestingly enough, this was actually a mistake by the English localisers - the Japanese manual for the game wrote his name in English letters as Nero Angelo.)
* Devil May Cry once had to fight one of these. It later became an ability of his.
* Devil May Cry. Or DeLorean Motor Company — it's on the front of their cars.
* Devil May Cry outfit before, hence Dante having a password that only those really needing demons slain would get. The Order of the Sword from the fourth game is supposed to act this way for the island of Fortuna, but it is eventually shown to be somewhat dubious. It has been suggested, at least in the questionably canon expanded materials like the novels, that there are other little demon-hunting outfits in the universe.
* Devil May Cry reveals that Eva's last words were calling out for Vergil, trying to find him after she secured Dante's safety.
* Devil May Cry. Seeing as how both games have similar gameplay, and both their first games have the same director, this was obvious. There's even tons of

crossover art of Dante and Bayonetta.
* Devil May Cry series might be known as the "wacky wahoo pizza man" who's always the life of the party, but he's also someone who's suffered a lifetime of tragedy and sorrow. His mother was killed by demons at a young age, he's chosen a life upholding the legacy of a father he hated, unable to live a normal human life like his mother and ultimately had to choose between his twin brother Vergil and his duty to protect humanity. Because of his tragic life it's hard not to imagine that Dante's over the top antics and personality are a way to cope with his lot in life.
* Devil May Cry settled the matter permanently. Though, not all aspects are confirmed—such as exactly who Nero's mother was.
* Devil May Cry, shortly after Dante's shop is destroyed in a demon attack on the city, he taunts the demons involved in the attack by shouting "I hope you all have enough to cover all of this!"
* Devil May Cry shots, a crazy rate of fire and a variety of explosive weapons, superhuman agility, and the ability (both in and out of cutscenes) to draw quickly yet still fire accurately. Of course, he has a Style explicitly named Gunslinger that enhances his firearm moveset. Nero aspires to reach the same level of competence, but isn't there yet.
* Devil May Cry, Sid, is a weak demon who late into the series shows to have the power to literally wear humans like the trope's name suggests, grusomely tearing the skin from the body and using black magic to make himself appear as the now dying or already dead victim.
* Devil May Cry's Nero uses techniques named mostly after gambling terms.
* Devil May Cry: The Animated Series, after Dante defeats the demon swordsmen Bael and Modeus, who were former students of his father Sparda, he honors them by planting their swords into a nearby boulder.
* Devil May Cry: The Animated Series, but it doesn't seem to work. Later, when Dante revives and frees himself, he explains to his friends that the reason why he was unresponsive was because he was trapped in a very convincing dream world, but Patty's words reached him and helped him wake up.
* Devil May Cry: The Animated Series. Cue the fade to black and when we're back Dante is calmly walking away from a bunch of beaten up demons...
* Devil May Cry: The Animated Series ends with Dante, Trish, and Lady driving off to their next demon hunting mission.
* Devil May Cry: The Animated Series episodes, "Wishes Come True", there was a "genie" that inhabited a creepy-looking mask who offered to grant your wish, but he would not grant your wish to be rich or beautiful, because "it's impossible" or "I don't like the idea." Instead, he would stalk you and wait until you said to someone: "I wish you would die," at which point he'd melt the person alive with hell-slime. This is because the "genie" was really a demon, and killing people was the only "wish" that it could grant.
* Devil May Cry: The Animated Series episode "Wishes Come True" has a guy being sent to prison due to the machinations of an evil "wish-granting" demon mask, and Dante not only has to bust him out, but deal with the demonic security staff and the demon mask behind this mess.
* Devil May Cry. The animated series features a demon that Dante has been contracted to kill who has fallen in love with a human. When Dante encounters him in the alley, he asks Dante about his parent's relationship to validate the possibility of love in a demon.
* Devil May Cry: The Animated Series hits on Dante in one scene and is strongly implied to be raping the inmates on a regular basis.
* Devil May Cry: The Animated Series, it's stated that Trish had struck out on her own for a while as a solo demon hunter. However, the only fights we see her partake in are with Dante and Lady. Lady herself also has her independent devil-hunting career that is never really seen aside from a few snippets of her hunting demons on her own.
* Devil May Cry: The core basis of the gameplay is beating shit up and making it look good like rocking on a guitar bearing the soul of a lightning succubus for crowd control.

* Devil May Cry. The game also has Kyklopses; smaller spiders made out of rock. And by smaller, they're still about as long as Dante was tall.
* Devil May Cry, the Hell Vanguard, makes a bell-toll sound whenever it uses one of its teleport attacks.
* Devil May Cry. The name of Dante's father, Sparda, has occasionally been used in the context of a family name, but whether it really is is unknown.
* Devil May Cry, there are several strategically placed paintings that serve as gateways floating in the air when you return to the castle. Pretty convenient, as several doors have disappeared.
* Devil May Cry. The reboot made controversial changes to the series' hero, Dante, with Tameem commenting in the interviews he did not find the classic Dante appealing or cool. This angered fans a lot, of course. Even though he stated he did not care what fans thought, the reboot's Dante was modified during development to act like Dante and even look like him. Tameem's trolling status went even further when, in the reboot, Dante threw away a wig that made him look like the classic Dante.
* Devil May Cry. The series treats it as if Nelo Angelo was his proper name all along.
* Devil May Cry: The Sparda Twins form this: Dante is prone to bouts of hamminess (although he clearly plays it for shits and giggles) while Vergil is completely straight-laced.
* Devil May Cry, the two are seen flirting if they're on point against one another. Dante's also says, "Mmm, baby. I love it when a girl gets violent!" at his win screen should he defeat Morrigan last in battle.
* Devil May Cry thing that shifts between a sword and a flying reptile form.
* Devil May Cry; those bosses being Phantom, Griffon, Furiataurus, Nefasturris, Jokatgulm and Oranguerra. Each has its own health bar and the player must kill them all, one at a time, before going on to face the Despair Embodied.
* Devil May Cry title, Dante tells a boss to "flock off". It sure sounds like a tame version of a certain other expletive that starts with "f" and ends with "ck". On the other hand, he just could have been punny, since said boss is a giant bird.
* Devil May Cry. To elaborate, the first game had at least two first-person underwater sections. In these bits you controlled like a tank, can't use Devil Trigger, can only use the needle gun, and the enemies had way better movement than you did. It gets worse on Dante Must Die if you can't kill enemies fast enough. The second game had a lot of Lucia's missions underwater (in 3rd person this time) that played even worse, culminating in one of the missions having a boss battle that's underwater.
* Devil May Cry tones this down thanks to the life-like characters models, Trish and Lady while still curvy are now more realistically endowed.
* Devil May Cry. Until then, however, this trope is played fairly straight.
* Devil May Cry uses a version of Vergil's with considerable reach and grants moves superior to those Nero can do without it. Heck, Yamato itself is a plot device in the fourth and fifth game. It's just that awesome. Not to mention a whole lot of people are 'handed' the sword throughout the course of the series and get a taste of its awesomeness.
* Devil May Cry, usually leaving a wisecrack or two. If he starts blocking or evading properly then you know the fight's serious.
* Devil May Cry was also released with Japanese and English voice tracks.
* Devil May Cry, when Dante and Vergil's father Sparda took human form, his shadow remained shaped like a demon.
* Devil May Cry when Dante is leaving her behind after he is angry at her for betraying him over to Mundus.
* Devil May Cry where Dante learns that Trish, his guide to Mallet Island, is really working for Mundus and sends Nightmare to attack him in mission 20. After its defeat, Dante saves her life but still does not take it well and he vows to kill her if they cross paths again.
* Devil May Cry. While he can be knocked out of it, showing the state to be merely a brief flirtation, it is hard enough to do so. When he assumes the

Super/Desperation Devil Trigger in the final fight, he can't be knocked out of it, but he does halt after some time, though not before regenerating at a higher rate than in his normal Devil Trigger.
* Devil May Cry, who, like Dante's father, ends up becoming heroic and sides with him.
* Devil May Cry will chase Dante down some incredibly narrow corridors. Even Dante found this to be dickish.
* Devil May Cry"... with a fresh game, lacking the usually maxed character that would normally be used. It really forces players to use different strategies, given the lack of moves and weapons that would normally be available. Even more crazy and skilled players have combined the SS run and the DWD run.
* Devil May Cry within). He's not quite omnipotent, though, but it does seem thus far that he cannot be permanently killed, even with the power of Sparda, so Dante eventually has to seal him away like his father did long ago.
* Devil May Cry, you have to do the first few levels again. Thankfully, the games that followed did not do this, recognizing what the majority of players bought the game for.
* Devil May Hare", Bugs feeds the Tasmanian Devil a chicken made from gum and baking soda. The baking soda gives Taz hiccups, and every time he hiccups the bubble gets bigger until Bugs blows it away, dragging Taz away with it. It floats until Bugs hits it with a slingshot, leaving Taz hanging from the trees.
* Devil May Hare", in order to get rid of Taz, Bugs tricks the devil into digging for groundhogs, and filling in Taz's hole while he was in it. Unfortunately, it didn't work.
* Devil Rebirth, a huge monstrous convicted criminal was quite fond of his mother, who defended him despite the fact that he killed 700 people. Surprisingly she looked like a gentle old woman.
* "Devil's Alphabet" takes place from November 2, 1876 to November 2, 1898. The short story "The Everlasting Club" by Arthur Gray is an account of the activities of the titular society from 1738 to 1766.
* Devils & Thieves, Blood Magic is nevertheless extremely powerful for the person who manages to use it. The most mild form is when two kindled with different magical abilities mix their blood, creating a bond that allows one to absorb power from the other, while the most infamous usage involves stealing blood from a user of each magic, in order to gain that ability. No matter which type is practiced, however, it is still considered illegal magic.
* Devils & Thieves: Called "drecks" in this universe, most of the world is made up of these ordinary people with no knowledge of magic. Due to her poor control of her powers, Jemmie admits she has considered just packing up and going to live in dreck society, where she'd at least feel average.
* Devils & Thieves him crash. He's right; Darek killed him, and made it look like the result of a normal accident.
* Devils & Thieves magic is capable of being used to heal others of various maladies, from hangover symptoms to life-threatening wounds.
* Devils & Thieves: Owen Carmichael used to be very close to Michael Medici and Thom Flynn, who he even started the Devils' League with. Unfortunately, he later turned on them and joined a kindle enforcement agency known as the Syndicate, using his position to crack down on the very gang he helped create, and thus gained the ire of his former companions.
* Devils & Thieves: The magical community, also known as the kindled, do their best to hide from those without magic, known as drecks; there are laws forbidding the use of magic in public, for example.
* Devils & Thieves used it to make Crowe see the dead bodies of his loved ones.
* Devils & Thieves wanted to be the most powerful kindled in the world, capable of taking over said world with little resistance after acquiring the use of all eleven known magical abilities.
* Devils and Realist above). Jeanne has become a "Pawn of Heaven" and is expected to become an archangel, while Gilles is a nephilim (a human turned into a demon) who is in love with her.

* Devils are charming while demons are plain ugly as sin (or vice versa).
* Devils are known to attack other creatures in order to take trophies from them.
* Devils are tiny, like goblins or gremlins, whereas demons are big and muscly or overly elaborate and shocking in appearance.
* Devil's Attorney and, sometimes, outright illegal means (e.g. one of the skills Max can learn is "Tamper with Evidence"). In the final case of the first chapter, Max openly admits that his client will buy him a new apartment and an office if he wins. The final chapter reveals that his father is a famous prosecutor who's ashamed of his son. Guess who prosecutes the final case and is the toughest opponent in the game?
* Devil's Brand fanfic, making it an ascended fanfic of an ascended fanfic!
* Devil's Bridge in Kirkby Lonsdale, England. Legend holds that the Devil appeared to an old woman, promising to build a bridge in exchange for the first soul to cross over it. When the bridge was finished the woman threw bread over the bridge and her dog chased after it, thereby outwitting the Devil.
* Devils Cake about his upcoming date with Kea into a nightmare. It is implied he's done this to everyone who has ever shown a romantic interest in her.
* Devil's Cake transforms himself into a girl in order to be Kea's new roommate. She does not appreciate this invasion of her space and privacy whatsoever.
* Devil's Candy, and the grindylow and the cyclops are of mixed heritage (the former is half-something invisible, and the cyclops is half-nymph). Spread pages full of people are a sight to behold, because every single person is a different kind of monster.
* Devil's Candy: Eggscram is unique for being a sport that uses an unborn egg of the ruling caste as a ball, and the point is to put it through as much trauma and humiliation (for the players) as possible to get the egg to hatch. Whichever team has more points when the egg hatches (or when both teams' players are deceased) wins. Scoring a touchdown earns 4 points, but doing a showboating dance afterwards will earn up to 6 points. Flying devils have a clear advantage over other players, but there's a 10-foot rule to keep the unfairness from turning into a joke.
* Devils Cape, although by the end of the novel only a Doctor Camelot is currently in action.
* Devils Cape and changing targets to Bedlam midfight when she notices him.
* Devils Cape are able to do this as their primary superpower. Werewolf, as his name suggests, can turn into a wolf, human, or his preferred form, a hybrid of the two. Bedlam can either be human or take on a demonic-looking, superstrong form capable of flight.
* Devils Cape Doctor Camelots. The fourth makes some significant alterations and refinements to her version of the suit.
* Devils Cape they seem to view him more as a celebrity than a frightening criminal.
* Devils Cape to justice, although she never lets on that her predecessor was also her father when she confronts Behemoth.
* Devils Cape who has the same powers and even uses the same aftershave.
* Devil's corpse comes back to life and turns into Cthulhu, who then says that everything going according to plan.
* Devil's Cub. First Vidal insists he must marry Mary to make up for compromising her reputation by taking her to France with him. Then Mr. Comyn, who happens to meet them in France, presents her with a way out of that dilemma by offering to marry her himself.
* Devil's Dare has a gaggle of green-skinned demons with large dragon wings, horns, pointy tails, and three-toed talon feet (on the males, anyway).
* Devil's Dare, Kingston, one of the playbale characters, fights with a giant, two-handed axe.
* Devil's Dare the Devil is accompanied by a flock of green-skinned leathery-winged lesser demons.
* Devil's dealOutside the official Church line, magic was considered real and powerful (at least enough to grant powers like shapeshifting), but the legal treatment was purely based on the effects; supposedly killing a person or animal by

magic was considered essentially the same as poisoning, for example (and considering that "witch" and "poisoner" were often the same word in many languages, including Latin, this made a certain amount of sense). In any case, many sociopathic serial killers of the era were considered, and possibly considered themselves to be, werewolves. Also, the crime of bestiality was often associated to werewolfism, as well. Accusations of being a werewolf were generally a subset of accusations of witchcraft, with the same deadly punishment.
* Devil's Diary: Before his first outing, Magneto looked into the then-current cadre of heroes and villains and decided neither of them would want or be able to stop his coup. Yet still he was driven away by five heroes who nobody had previously seen before... although he KNEW who they were working for.
* Devil's Diary: Magneto's overdramatic speeches are lampshaded by Quicksilver, who notes he talks like a movie villain.
* Devils Diary references a book found in a graveyard, planted there by a lightning strike. Anything negative you write in the book will come true.
* Devil's Due Publishing eventually acquired the comic book license and made
* Devil's Due those tricks, Data promptly declares that Picard's leeway has run out.
* Devils Due" where a con artist reads the myths of an alien world and realizes that modern technology is capable of providing all the signs and wonders she'd need to impersonate one of their deities.
* Devil's Dust who has to work more than he would like to. It seems clear that these characters aren't of best of terms with each other, but they have to work together for survival.
* Devil's Feud Cake in this endeavor; in the end, the Devil offers him one more chance, but Sam declares, "I'm a-stayin'!"
* Devil's Guard trilogy tells about former Waffen-SS paramilitaries in the French Foreign Legion fighting in the French-Indochina War.
* Devil's Island written by inmate Henri Charrière (later a Steve McQueen film of the same name), though his account is full of unlikely elements.
* Devils' Line officer who works for a police task force that specializes in vampire-related crime in Tokyo.
* Devils' Line, Yuuki Anzai and Tsukasa Taira, could be considered as this. Tsukasa is a nice and innocent girl to serve as Anzai's brooding and aloof demeanor. Needless to say, as the story went by, the two start to fall for each other.
* Devils, mainly by stealing it from the nobility of other countries and causing as much death and destruction as they can.
* Devils, on the other hand, have a language divided into four castes and the highest form of it is explicitly stated to almost be beyond comprehension, capable of causing hatred or despair in listeners. Its written form is the lines and symbols used to create summoning circles — basically, the only thing standing between you and a conjured fiend is your argument written in their language. It's described as simultaneously sounding like "a barking hound, an eloquent verse, the squeal of slate and steel, and the subtle smell of hatred."
* Devil's Pass, as the cast finds photos relating to the ship's supposed failed teleportations inside a secret bunker found under the pass.
* Devil's Playground volunteer test subjects is apparently given a placebo in lieu of the invigorating (and accidentally-zombifying) experimental drug.
* Devil starts in late afternoon and ends at night, so it takes place only in a couple of hours.
* Devil's Third fame) was saved by Nintendo after the game's original publisher, THQ, went bankrupt in 2013.
* Devil's Third has a private cell in Guantanamo Bay of all places that is more or less a private penthouse suite than a real prison. It's large and spacious and filled with things such as a private bar, a drum set, and a giant monitor that the US Government contacts him through.
* Devil's Third is premised on the "Kessler Syndrome" theory: that is when man-made satellites in Earth orbit collide, the debris will begin a chain reaction that will destroy other satellites in sequence. In their world this has indeed happened,

which forced the end of technologies such as GPS and satellite imagery and wars are fought without these advantages.
* Devil still kill him, as he's been redeemed he'd just go to heaven, so he's spared.
* Devil's Tower (Bear Lodge) in Wyoming is climbed by many people. Looking up at it, it even looks like the Cliffs of Insanity.
* "Devil's Trumpet" is about a jazz musician's obsessive quest for a legendary instrument that he believes will make him the best player in the world, which ends in murder and an encounter with the Batman. The story begins with the obsessed musician discussing the legend of the trumpet with an old bluesman, and ends with the same old bluesman having a very similar conversation with a new character, implying that somebody else is now on the same quest.
* Devil Summoner: games, although it's not quite as creepy and twisted as most of these. It's mostly just, well... dark, and full of demons.
* Devil Survivor 2 adds a new story arc with a new final boss, Canopus.
* Devil Survivor 2, after managing to activate the Terminal to Polaris, Yamato enters the scene with one of these. If you have Joe in your party, he even comments "I know a sarcastic clap when I hear one."
* Devil Survivor 2 and have her turn back the world to how it was before the Septentriones arrived.
* Devil Survivor 2 and most of them will follow you into hell itself, even if your alignments don't quite match up.
* Devil Survivor 2 angle even further by revealing that Canopus, the ultimate head of the Administrator System, deems humanity as a threat to universal order after the party kills Polaris. As mentioned above, if the next set of invaders, the Triangulum, appear in the Liberator world, humanity will have absolutely no way to fight them back.
* Devil Survivor 2 are fighting demons and demon summoners and doing pretty well.
* Devil Survivor 2, as their lack of faces is not mentioned in-game, making it a purely stylistic choice.
* Devil Survivor 2, can in one instance get freaked out enough to outright yell at him to cut it out.
* Devil Survivor 2 does. Initially, magic attacks can hit a variety of weaknesses while physical skills get stonewalled by physical resistance, then by the time the player accesses Pierce, they can start scoring good damaging critical hits on enemies with no weaknesses. Then physical-repelling enemies happen, which is the one thing Pierce can't bypass, prompting the player to use Almighty magic to bypass this... and then when the player picks up Holy Strike, an Almighty physical attack, Pierce's one flaw vanishes. Then, at the very end of the line, the presence of the Anti-Almighty skill tips the odds back in favour of physical skills, when Holy Strike and Holy Dance barely scratch those enemies.
* Devil Survivor 2 form by channeling Lugh, which she will use partway through the battle, and the only way to unlock Lugh as a potential Fusion, is to defeat Io in this form. Fortunately, if the player or a party member accidentally ends up defeating Io before she channels Lugh, she gets back up and does so, anyway.
* Devil Survivor 2 has Alice, fought at level 99 and standing head and shoulders above everything else in the game. Fortunately, the game has several other bonus bosses who offer enough experience that the player need not grind too much on mobs to stand a chance against her. The playable version of Alice, unlocked on her defeat, isn't even the demon with the highest base level upon fusion, and only brings to the table an unremarkable passive skill.
* Devil Survivor 2 has main protagonist Hibiki Kuze feel this way about his savant-like ability to summon the powerful demon Byakko.
* Devil Survivor 2 has one for the overall tone of the game, and another for the gameplay.
* Devil Survivor 2 has Ronaldo Kuriki, ironically representing the Law alignment.
* Devil Survivor 2 Hell, even the theme for battles where you screw destiny is called "Challenging Fate".
* Devil Survivor 2 is a literal chain of heads linked by mouth after mouth.

* Devil Survivor 2 it happens is not revealed, leaving the most accurate estimate to be "any time today". The subject of the death video also doesn't get to see their own death, leaving the player and their companions to try and avert it themselves.
* Devil Survivor 2 like a little girl over having it and saying they are gonna take it home.
* Devil Survivor 2 moments, to the point where he outright claims that "Hibiki is mine".
* Devil Survivor 2), or outright destroy the Records and make it impossible for any admin to ever rise again.
* Devil Survivor 2 reaction mode, before realizing he clearly didn't do that on purpose, while Otome just laughs it off.
* Devil Survivor 2's new campaign has Denebola, which while not nearly as massive as Alioth is still huge enough to dwarf the Tokyo Skytree, the tallest tower in the world.
* Devil Survivor 2's protagonist ended up cushioning the fall of two of his female teammates due to a teleportation accident involving the three of them. He can respond with delight or frustration.
* Devil Survivor 2. The Demon Summoning Program is distributed as a cellphone app, and there's a website that shows the user images of their friends' deaths, once again enabling you to stop them.
* Devil Survivor 2 the one who gets flustered by it, while he seems to find it rather funny.
* Devil Survivor 2 they have two arc, Septentrione Arc and Triangulum Arc:
* Devil Survivor 2, too, if you play him that way. There's even a part when you can join in a peeping excursion at the girls' medical examinations.
* Devil Survivor a monster called Kudlak will arise stronger everytime it's killed, unless done so in a special way. It tries to goad the party into killing it.
* Devil Survivor and get Kaido to appear in the battle, too, his AI is programmed so that he will always leave Kudlak with 1 HP left. This makes it much easier for Mari to defeat Kudlak.
* Devil Survivor are also worthy of mention, especially in the routes where the protagonist is able to prevent them from falling out with each other.
* Devil Survivor are like this, and frequently let you choose to intervene on one side or another. In one particularly complex example on Day 6, you have to intervene to stop some demon tamers from escaping the barricade in the midst of a fight between several angels and demons. You can choose to fight either the angels, the demons, or both; meanwhile both the angels and demons will try to kill the tamers before you can defeat them and remove them from battle, resulting in a game over.
* Devil Survivor as a way of summoning demons, but the core programming actually runs on magic.
* Devil Survivor, Belberith's body is made of several other monsters such as Belphegor. There are also the heads of an old man, a cat and a frog sticking out of him, as well as spider legs.
* Devil Survivor both present this as a possibility in both cases and the equal possibility to avert it in the first case. Considering these games relate the story of massive demonic infestations and the horrifying depths humankind can sink to when backed into a corner, the protagonists for both games have fairly good cases going for them.
* Devil Survivor, but nevertheless opens her heart up to the protagonist almost from the moment they meet.
* Devil Survivor, but not only does it require a lot of willpower and strength to do so, and unless you're extremely careful, you will wind up being nothing more than a toy of Fate.
* Devil Survivor deals with the aftermath of a demon attack which leaves an entire city isolated from the rest of the world. The player character has a device which can tell when any other device holder will die, thus giving the means to prevent said deaths.

* Devil Survivor. Even when you go there at the game's end, you never find her.
* Devil Survivor factors that come into play as the lockdown wears on.
* Devil Survivor games, focusing most of your points into one stat is better than rounding out, so the protagonist is either a vicious brawler or this. Yuzu also tends towards this, as does Amane.
* Devil Survivor has Midori "Dolly" Komaki, a fifteen-year-old camgirl who likes attending various conventions in costume. In fact, she spends the duration of the game wearing a pink, ribbon-festooned outfit due to the fact she was caught in the lockdown without any other clothes. (She isn't particularly concerned about this, claiming that her attire just looks like "extra-cool everyday clothes".)
* Devil Survivor has the boss battle with Belzaboul and his maggot minions, who spawn eggs in your party members and their demons. It's implied that this trope is at work when an egg hatches, because not only does a squad of maggots spawn next to the victim, the victim takes massive damage.
* Devil Survivor his level. Unlocking him for fusion means that your demons in stock can practically curb-stomp everything else in the game.
* Devil Survivor if the crisis got out of control. The ending narration also mentions the government weaponizes the app to turn Japan into not only an economic superpower, but a military one as well.
* Devil Survivor increases the odds of getting a skill cracked with Joint Cracks.
* Devil Survivor is disabled, so you can get them back faster than you got them the first time.
* Devil Survivor manages to figure out most of what's happening, all without any means of defending herself against the demons overrunning Tokyo or any supernatural allies to help her. According to herself, she's "made of win".
* Devil Survivor—the main characters are told the major events of every day and the exact date of their (and most other peoples') deaths, and the goal of each day is to find a way to get around it.
* Devil Survivor takes place in the "Tokyo Lockdown", things get complicated and bad very quickly.
* Devil Survivor, the stranded people and demons within the Yamanote Loop go about their infighting and struggle for survival and resources during the day. At night, it all calms down and people are able to message each other on their COMPs.
* Devil Survivor: This is the party's, especially Midori's, argument to Keisuke going on a murderous rampage with Yama because the public treated demon tamers with prejudice and scorn.
* Devil Survivor to the player whenever they choose certain dialogue options.
* Devil Survivor. Unfortunately the last day features several enemies that are completely immune to physical attacks even with Pierce, bringing this trope back as the player reaches for Almighty magic to kill them off.
* Devil Survivor universe, C cup and above are so normal anyone below that is either a child or a very rare exception to the rule, at least if you're human. Demons have only slightly more leeway, but the same rule still applies if they are capable of having humanoid cleavage.
* Devil Survivor with only 3-5 party members. Cue the final day when the rest of the supporting cast get tired of being NPCs. Depending on the decisions you've made throughout the game, it is entirely possible for your party roster to double in size.
* Devil's Water Dictionary is a recipe book of mixed drinks that grant bartenders magic powers, such as Mai Tai's that allow the drinker to conjure fire.
* Devil takes place in an elevator. Though it's not the elevator as much as who's in it...
* Devil takes this beyond the average person's tolerance with an elevator full of people slowly being killed off.
* Devil Trigger also counts. Not only stops time, but also sending all enemies floating, allowing Dante to rack up any combos.
* Devil Trilogy: bent on world domination, partaking in human sacrifice and requiring its followers to chop off their pinkie finger.
* Devil Trilogy. Many characters in the story worry that this might lead to another

holy war.
* devil) which contained a golden coin, with new ones spawning up as soon as the old one is taken out. The only catch is, not a single coin can be spent - unless you get rid of the purse. Try to guess the rest.
* Devil Woman Doctor series of Japan, is a man who has grown a face-shaped "tumor" on his belly. The "tumor" can talk, sing, bite, and seems to be a cool dude.
* Devil World but was removed from the international release (along with a few others).
* Devil World: The intro scene shows nothing more than the game's characters and the message, "Attack the Devil's world!" No actual plot exists beyond this.
* Devimon did something similar by hearing the youngest of the kids will be the one to cause his death. He goes after TK, triggering Patamon's evolution into Angemon, who promptly performs a
* Devimon uses his Black Gears to manipulate Ken into constructing Chimeramon using the components of himself as well as the Digidestined's Digimons in order to use the Chimera to relocate him into the Digital World.
* Devin and Carrie is accidentally pushed over a cliff and is put in a full-body cast.
* Devin and Gabe are both natural detectives, possessing significant deductive and research skills.
* Devin and the Teacher the title character Devin isn't a troublemaker; then promptly lists all the times he had caused trouble.
* @DevinCow), a purely satirical account ribbing Nunes for bragging about his family's dairy farming roots, when his family actually moved their farming operations from California to Iowa in 2006. Prior to the lawsuit, it had around 1,200 followers but now has over 600k followers. This has long exceeded Nunes’ verified account’s follower count and has roughly half a million more followers than Nunes had voters in his last reelection in 2018. This is also not the first time Nunes has done something like this. In 2018 he sued his home-town paper’s parent company, McClatchy, for running a story about how a winery that he and his siblings own a minority stake in was being sued by a woman who says she was working an event they did on a yacht where she says she got sexually harassed. She claimed that the event was really a cocaine-fueled orgy with underage prostitutes. The paper never said he knew anything about it or that he had been there, just that his family were stakeholders but now everyone knows a business in which they’re investors is accused of partaking in a cocaine-fueled orgy on a yacht with sex trafficked children.
* Devin fights Aaron when he picks on Gabe; later Gabe returns the favor by picking a fight with Eric Saddler when he insults Devin and the Journalism Club behind their backs. In consequence, Devin and Gabe come to respect and like each other.
* Devin Grayson was a comic book writer who got to be in charge of the late '90s
* Devin is a variation, in that it's not his superpowers that he wishes he could be rid of. Instead, it's his dead nerves, rendering him
* Devinoni Ral from "The Price" is 1/4 Betazoid, having minor empathetic abilities.
* Devin Taylor was assigned the role of backstage interviewer. She's a qualified broadcast journalist in real life.
* Devin Townsend album is about an alien overlord searching for the universe's ultimate cup of coffee.
* Devin Townsend casually says "Wank" before his guitar solo in the song "Planet Of The Apes"
* Devin Townsend is best known for his Extreme Industrial Metal band Strapping Young Lad, but is also credited with the following.
* Devin Townsend is definitely this. He destroys earth, because he didn't like the coffee they presented him, follows the escaping humans to another planet, unsuccessfully attempts to destroy that one, then he asks the Planet Smasher to destroy another planet, which is populated by sentient being, just to lift his mood.

* Devin Townsend's", a video of him dancing in his backyard to the song "Lucky Animals". There are no cuts, no special effects, not one else there with him. It's about as low-budget as a music-video could possibly be.
* Devin Townsend's solo output generally falls under progressive metal, but albums like Terria go off at so many tangents that no one label could do them justice.
* Devin Townsend's Ziltoid The Omnicient seems like your ordinary fourth-dimensional evil overlord, spreading terror and destruction across the known universes, fraternising with the fifth-dimensional planet smasher and the omnidimensional creator, and of course raiding the earth for our finest coffee to use for time-bending. But in the end, Captain Spectacular of Earth has seen Ziltoid's true self; a nerd.
* Devious Dolphins: Dolphins are evil and violent vs. dolphins are fun and helpful.
* Devious Dolphins: Dolphins portrayed as amoral, evil, or otherwise unpleasant creatures.
* Devious Dolphins. Except for the Whitetips, who are too damn hungry to feel fear.
* Devious Dolphins (Hehehe, I'm not afraid to bully anyone under the seas.)
* Devious Maids and dives into her employer's pool. Of course, the housekeeper comes back sooner than expected and Carmen has to hide inside a piano completely naked as Sam covers for her.
* Devious Maids coworker Sam who is too taken by the sight to properly protest.
* Devious Maids episode, Adrian finds about his cheating wife, but wants to film it as evidence for divorce. He ends up paying, er, paymurdering his cuckolder bodyguard to leave.
* Devious Maids: Evelyn and Adrian Powel often berate, insult and scheme against one another. They despise each other deeply, but they also love each other. It is a very complicated relationship. The trope is referenced almost directly:
* Devious Maids. His maid and caretaker calls him this, as well as comments on his "naughty fingers" and tells him he has "a dirty mouth for a man who doesn't talk".
* Devious Maids, the ex-wife of a dinner party's host crashes the party and threatens to destroy the dinner after chucking a piece of crystal at him. This forces Marisol to intervene and forcibly shove the ex-wife out the door.
* Devi's uncle Aravind, also an Indian immigrant, is played by Pakistani actor Iqbal Theba.
* "De Vliegende Handschoen", various friends of Nero, including adults (!) are kidnapped by his pet eagle.
* Devligus is not only a for the third and last time before facing off against the final boss.
* Devo, a character portrayed by their singer Mark Mothersbaugh in a baby mask. Booji Boy exemplifies the band's philosophy of Devolution, and talks with a squeaky voice, known for such phrases as "We're all Devo".
* Devo and even captured and brain-washed Devo's mascot Booji Boy during a show. Devo's music was held as Satanic and horrible, despite the fact that Dove played an awful lot of covers.
* Devo), and even various commercial spots - have some sort of social commentary or subversion to their unifying concept of "de-evolution".
* Devo, and made a living by "trashing others' lives", but now he's in a wheelchair and Devo don't care.
* Devo. By that point Devo had made him somewhat obsolete on record, relying increasingly on drum machines rather than acoustic drums, so Myers left essentially out of creative boredom.
* Devo concert ended in the band getting kicked off the stage by the promoters. One by one, the instruments petered out until the drummer was the only one still playing.
* Devo congratulated him for "Dare to be Stupid" and called it "the perfect Devo song".
* Devo (Devo frontman Mark Mothersbaugh even said it was "the perfect Devo song")
* Devo. Devo presumably either wanted the kids to start thinking of these things at a young age or just found the concept hilarious.
* Devo. Especially the video. Actually, most of the band's work tends to involve

this trope in one form or another.
* DeVoe uses this to frame Barry for his murder. DeVoe has just transferred his mind to a new body so he plants his old dead body in Barry's apartment. Right after Barry finds the body, the police arrive. Barry is the prime suspect because he had a widely known feud going on with DeVoe and DeVoe had a restraining order against Barry.
* Devo has a song called "Jimmy" which depicts the titular character as a corrupt CEO and domestic abuser (who is responsible for, among other things, a literal Kick the Dog). His ultimate fate is ending up in a wheelchair which, according to the song, was an instance of "justice strikes every once in a while."
* Devo has both Robert Mothersbaugh and Robert Casale. They are generally referred to as Bob1 and Bob2. Interestingly, both had brothers in the band—Mark Mothersbaugh and Jerry Casale respectively.
* Devo) has the song "That's All She Wrote" which includes this phrase in the chorus. Considering how often Devo parodies corporate taglines, this is probably no coincidence.
* Devo have been together since the early '70s, only broke up in the early '90s then reformed in the mid-to-late-90s, and have tried their best to prevent signs of slowing down.
* Devoid of apprehension or indecision in their actions: for these characters; they simply cannot look at the world in a way where their goal appears impossible (unless they change their mind and their goal, in which case the new goal is likewise viewed). This doesn't mean Unfettered Bob is hasty, though; an unfettered character is willing to wait years to achieve their goal if that sort of patience is required.
* Devo in 1979, with Mark Mothersbaugh as Booji Boy on vocals. In the middle of the song Booji would give a speech about future "holographic" Devo concerts, which would include the following feature: "And we'll pass out diapers at the door for everyone, so that when you all get in here, we'll turn on the sub-sonic frequencies, and we'll all sh*t our pants together!"
* Devo, in which skills with a whip are naturally used to remove a woman's clothes.
* Devo is an "Altruistic Pervert." While not explained further in the song, the connotations seem to indicate a chivalrous pervert.
* Devola and Popola, or rather, different versions of the ones who appeared in the original Nier.
* Devo love these kinds of tropes, and evoke this one pretty well on "Gut Feeling (Slap Your Mammy)" from their debut album:
* Devolution, because the most likely scenario is that she and Palomino died shortly after through getting lost in the woods, but there are at least two possibilities suggested in which they would have survived.
* Devolution: Partially justified. The characters' overreliance on technology means that nobody has any idea what to do when the volcano erupts, but also the techbro Dan abruptly turns out to be infinitely happier (and to a lesser extent, so does the corporate Kate) even when they're thrust into a hellish nightmare where they have to defend each other and live off the grid.
* Devolution who gets everything wrong and hides food from the others, and the therapist Carmen is clueless, while the most useful and heroic characters are the strong, active ones who can build and hunt, like Dan, Mostar, and Kate.
* Devon Clifford, drummer for the Canadian indie rock band You Say Party! We Say Die!, collapsed on stage during a gig in Vancouver in 2010 and died two days later in a hospital. After his death, the band changed their name to You Say Party, then split up the next year (they've since reunited with a new drummer).
* Devon, however, can't tell a simple lie to save his life. In one episode,
* Devon Monk, Allie is shocked to see that her last stepmother is at most a year older than she is. Violet admits that she would be shocked, too, if her father married someone her age, but assures her it was a love match.
* Devon Monk, Allie is struck by how Zayvion looks when he arrives for their date, and says, "Don't you clean up nice."
* Devon Monk, Allie is surprised by a question of whether she cast a curse, and

(truthfully) denies it — the target's just a little boy.
* Devon Monk, Allie, much to her surprise, blushes at a toast "to love."
* Devon Monk, Allie plays with this, speaking of looking for police in shining armor and the like.
* Devon Monk, Allie recounts how, to throw a Hound off your trail, you need to avoid using magic and cover up your smell with something else stinky. She opts for garbage.
* Devon Monk, Allie uses this on a would-be kidnapper: a two-second flash, too simple and childish to be expected.
* Devon Monk, a room of Strangework mantics is absolutely still, except for eyes following LeFel and Mr. Shunt.
* Devon Monk, Cedar's arrival at the mine is announced by dust devils that form without any wind.
* Devon Monk in herself, Allie learns at the end that she had fallen in love in the course of the novel. She and the man meet again, tenatively, at the end.
* Devon Monk, LeFel is an exiled fairy and will die soon if he doesn't get back. He's extremely unscrupulous about means.
* Devon Monk, LeFel's backstory. Which has the side effect of making him mortal.
* Devon Monk, Mae explicitly refuses permission to enter her home, though the effect appears to be more her spells than the refusal.
* Devon Monk, Maeve brings Allie food and tells her to eat it — without magical Influence, but so maternally that she obeys.
* Devon Monk novels, magic has been known to the general public for about thirty years before the story starts.
* Devon Monk, Zayvion reveals very little of his. It's one reason why Allie suspects him of being untrustworthy.
* Devon's Ghost: Legend of the Bloody Boy features characters named Symphony, Josh, Devon, Craig, Genesis, Mark, Fatima, and Gary.
* Devon Storm for a year, returned in January of 2012, only to step aside after being paid off by Truth Martini to give his return match with Grizzly Redwood to Michael Elgin.
* Devonsville Terror by Ulli Lommel the only actual witch of the three women killed suffers that fate.
* Devon thought Ellie was cheating on him while she was being manipulated by an undercover Fulcrum agent.
* Devo (portrayed by their singer Mark Mothersbaugh, in a rubber mask). He is supposed to represent someone who has devolved into a manchild, as per the band's theory of devolution.
* Devo re-recorded their own "Whip It" with product-specific lyrics for a Swiffer ad. Member Gerald Casale later expressed regret about having done so, but this was less because of any sense of cheapening the song and more because he found the ad itself "aesthetically offensive".
* Devo's anthem "Jocko Homo" doubles as an I Am Song and a manifesto for their "de-evolution" concept:
* Devo's "Beautiful World" ("it's a beautiful world we live in..."), of course omitting the subsequent lines "...for you" and "it's not for me")
* Devo's "Beautiful World". It starts off talking about how great the world is. Then it becomes apparent that this is someone else's opinion and that the narrator of the song doesn't agree with it. The idea is that the person who says the world is beautiful has been conditioned to believe it is and doesn't know about the bad things. The video makes this apparent.
* Devo's mascot, Booji Boy, has met many a gruesome end, getting stabbed at the end of the video that marked his first on-camera appearance, and then moving on to getting electrocuted, having his head crushed, and being beheaded by Osama Bin Laden.
* Devo's "Peek-A-Boo!" was allegedly sampled from a personal rape alarm.
* Devo's "Snowball" as the theme for their nightly news program. The station was likely using it for the high-energy driving melody line and counting on few people in their small and rather stodgy market recognizing it.

* Devo's "Snowball" to open their nightly news program. The viewer demographic for KQTV did not overlap greatly with the listener demographic for Devo, so most viewers probably thought it was original music.
* Devo's "Whip It", a female character's costume is removed, piece by piece, by a band member wielding a whip. The video ends just as her modesty is about to be violated.
* Devoted Druid for you to cast with. Without outside help, this only works once before it would die from lack of toughness.
* Devotees of Slaanesh (in earlier editions, they used actual electric guitars) and destroy their foes with “deafeningly loud, psycho-sonically and pyrotechnically explosive attacks.". The Emperor's Children's senses are so dulled by centuries of excess only the clashiest of colors get their attention (hence their black-and-hot-pink colors).
* Devotes a noticeable chunk of screentime to several unnecessary, loving pans over Chris Hemsworth's biceps, triceps, and deltoids and centers a large number of shots on his long, luscious, disheveled golden hair;
* Devo that contained all the songs that were cut from the Song Study version.
* Devo. This amused them, and they kind of enforced the first interpretation with the music video.
* Devotion after it was review bombed by more nationalistic Chinese gamers.
* Devotion losing its publishing license in China, and was pulled from Steam after it was review bombed by more nationalistic Chinese gamers.
* Devoured by the Horde: A character is torn to pieces and eaten by a horde of antagonists.
* Devoured by the Horde is big and strong enough to ruin the narrator's SUV.
* Devoured by the Horde: Someone is eaten by a group of people. This is common in zombie movies.
* devoured the dreams of everyone in her kingdom, which turned her subjects into living nightmares and transformed her planet into a dark wasteland, all for the sake of making sure her beauty is never ruined by age. The fourth season of the first anime even ends with her getting resealed in her prison dimension and being okay with it because it means she'll be beautiful, and the fifth season opens with her floating in a void filled with mirrors to which she can eternally gaze upon herself. She doesn't care about anyone or anything except for how she looks and that others see her as beautiful, and she really
* devouring the Big Bads, led to Cedric's defeat in a little more than five minutes.
* Devourment that skewed more towards NYDM and proto-slam than their established slam death metal sound, a lot of fans angered by the change in sound blamed Relapse Records and Erik Rutan (who produced the album) for pushing them towards a "lighter", more marketable sound. In reality, neither claim was accurate. Most of the album had been written for years and hadn't been recorded largely because they desperately wanted off of Brutal Bands, and Majewski had expressed a desire as early as 2010 to expand his vocal range and move into more varied territory, as they had grown sick of playing pure slam and wanted to broaden and introduce some variation to their sound. Relapse had absolutely no say in what they did with their sound and Rutan's input was largely restricted to how they played various riffs; the rest was all them.
* devout when she's sent off to the Circle, where she enjoys all the suggestive books Isabela sends her.
* Dev Patel, even though he was clearly considered to be the film's primary character. However, he was nominated for Best Actor by the BAFTAs.
* Dev Patel when he is very clearly the sole lead character. However, they probably got away with this because he's only in the second half of the film, with a different actor playing his younger self in the first half.
* Devs, the Devs system is able to not only project the past by extrapolating quantum particles, but project the future as well, casting serious doubt on the notion of free will. When Stewart pulls up a projection of the Devs viewing room one second into the future, his fellow programmers are terribly shaken. Earlier,

Sergei has a panic attack and vomits from realizing the implications of Devs. By the end, Stewart doubts if his own reality is even "real."
* Devs: The first episode follows Sergei, a Russian-American coder working for Amaya as he gets invited into the company's super-secret Devs program. He's killed at the end of the episode when he's caught attempting corporate espionage. The show then shifts focus to Sergei's girlfriend Lily, who investigates his death.
* Devs to make him seem even younger. An early scene has Stewart grousing that people in Lyndon's generation have no culture.
* Devs. When Katie catches them, she wonders why men always immediately try to use any new technology for porn.
* DEV Tech aren't experienced in using their powers or adapting to changing situations in a fight.
* dewbacks were used by Imperial Sandtroopers, and ronto are used by Jawas, although it has been suggested that ronto were imported from Nubia rather than native to Tatooine.
* Dewdrop fairies can still be bribed with milk and honey — but they'll do
* Dewey, a pre-teen at around 10-11 years of age, is mutually considered best friends with Launchpad McQuack, who is around his late 20s. While this can technically apply for all the kids in accordance to Launchpad, none are nearly as close as Dewey is, to the point to where he'd call Huey "Dewey's brother."
* Dewey Defeats Truman (and indeed, provides the page image for that trope).
* Dewey Defeats Truman, due to real history inevitably passing the work's time frame and disproving its assumptions.
* Dewey's full name here is "Dewford," while in the comics it's "Deuteronomy."
* "Dewey Wins": A video of Dewey getting pelted by a tomato is put online and only gets a dozen views, not that Dewey is consoled ("That's half the town!").
* "Dewey Wins" went up online over a month before they started premiering on TV two-per-week.
* De Wortels Van Het Woud, by Tais Teng) has a main character who can modify his body with various animal characteristics. It turns out that he and his sister are among the last of a race of shamans. Although his sister (whose powers are not related to shapeshifting) is utterly freaked out by the revelation, the boy eventually chooses to stay in the world of magic and live his life in the Forest in millions of animal forms.
* Dewy's Adventure both came with limited edition stuffed toys of the main characters.
* Dex, an ambitious ex-Saint, orchestrated a similar gambit during the finale, aiming to kill the player and destroy the gang, but for less noble reasons.
* Dex, and the idea is scoffed at by Dr. Niles, who does most of the augmentations for Dex and has a bionic eye himself:
* Dex Hamilton: Alien Entomologist: Dex has dedicated his life to studying alien insects.
* Dex Hamilton: Alien Entomologist has a pair of insect wings because he has fly DNA mixed with his.
* Dex Hamilton: Alien Entomologist has this exchange (when the characters are being forced to express their true feelings towards one another):
* Dex Hamilton: Alien Entomologist in an episode where Dex and his crew have to travel inside the body of a space whale in order to save it.
* Dex Hamilton: Alien Entomologist: In one episode Dex and his crew are captured by space pirates who have imprisoned a giant star fly.
* Dex Hamilton: Alien Entomologist: Jenny, Zap and Tung all wear goggles. Jenny and Zap never wear them over their eyes (despite Zap being the group's pilot), while Tung never takes his off his eyes.
* Dex Hamilton: Alien Entomologist: "Last week I made a hadron collider from a broken hairdryer and a box of paperclips..."
* Dex Hamilton: Alien Entomologist, most of the alien insects Dex and his crew deal with are of the giant variety.
* Dex Hamilton: Alien Entomologist. She maintains the insect's habitats and builds the weapons used by the team to capture new bugs.

* Dex Hamilton: Alien Entomologist Syrrus awakens from a centuries long hibernation, he ponders what his first act should be. After a few seconds thought, he decides it should be to find a bathroom.
* Dex Hamilton: Alien Entomologist: Syrrus's goal is to breed an army of super insects to allow him to take over the galaxy.
* Dex Hamilton: Alien Entomologist. Tung attempts to break the rope with his prehensile tongue, only for their captor to tell them that the rope is woven from unbreakable alien silkworm residue. Tongue then adds "And it tastes like feet".
* Dex Hamilton: Alien Entomologist when it's revealed that Jenny Ten was the tenth of a series of genetically engineered clones, we meet her "sister," Jenny Eight. Our Jenny wants nothing to do with Eight because she feels (quite understandably) that Eight threatens her sense of individuality. By story's end, though, we realize that their personalities are actually quite different, and the two reconcile.
* Dex is a video game taking place in the city of Harbour Prime, a technologically advanced but filthy city full of sleaze, lies, and betrayal. The goal of the game is to either destroy or liberate an A.I. that has the potential to change the world.
* Dex is just the notable standout in season 3. Because as Ray Nadeem finds out the hard way,
* Dex, specifically at the point when he finally decided to start dating Zoe right after Torg realized his own feelings for her. Of course, this was set up right before the KITTEN slasher parody, so he wasn't a problem for the story for long. This did mean Zoe never got to realize what a jerk he really was, although she already
* Dexta blow the whistle to a rival, he'd never be able to work again. Nobody trusts a traitor, and there's no such thing as independent media in this 'verse.
* Dexta when Gloria (professional bureaucrat that she is) pulls out every rule in the book to trip up the corrupt Imperial Governor. This gets her promoted to Acting Imperial Governor with deliberately impossible orders ("enforce a cease-fire between two alien factions without using Imperial troops to defend aliens"), so she takes advantage of a militia that the Emperor didn't know about to solve the problem.
* Dexter”, Dexter and Debra experience this to a degree when they learn that Doctor Evelyn Vogel murdered Harry Morgan rather than Harry killing himself out of horror at seeing what Dexter had become. While it doesn’t excuse his other failings as a parent, they can at least now believe that he genuinely cared about them, where Dexter felt that Harry gave up on him and Debra saw this as proof that she just wasn’t enough for Harry to stay alive for.
* Dexter, a character was shown torturing someone for information by shaking up bottles of Coke and opening them so they would spray straight up the guy's nose.
* Dexter a clever serial killer, although his skill at hiding his murders means that he is rarely called to investigate his own crimes. Except, of course, in the second series, when a scuba diver stumbles onto Dexter's underwater burial ground, and the central plot is about the hunt for the "Bay Harbor Butcher" (Dexter) and Dexter's attempts to sabotage the investigation and not get caught.
* Dexter: A couple show up as Victims of the Week (Dexter hunts criminals who manage to escape the law), telling each other that they love each other even while Dexter is about to kill them for murdering several innocent immigrants. Dexter actually thought the husband was the sole brains of the operation before he discovered that the wife was in on it; before killing them, he even asked them for marital advice!
* Dexter actually killed both the dealer and the brother, the latter by accident.) When a body is found matching the killer's MO but outside Miami's metro area, the Deputy uses this to shoehorn his way into Miami PD and take over the investigation.
* Dexter - After having spent the evening planning a murder with his new sidekick:
* Dexter after she says the f-word during a press conference about a serial killer. Expecting Matthews to read her the riot act, Deborah is surprised when instead he tells her that she's already proven her worthiness; that kind of bluntness is exactly why he gave her the job, and in this case it has caused the phone to ring

off the hook with tips.
* Dexter almost immediately. The writers were simply too obvious with nobody but Travis ever seen talking to him but still treated it like a shocking turn of events when the "reveal" came.
* Dexter analyst) (2) wants to be normal and (3) has a lot of daddy issues (his are 75% positive but it's a big deal). His daddy made him what he is, too. He (5) has lots of flashbacks about his earlier life, and he (6) only kills other killers. He fits even no. 4, since the Lumen story arc.
* Dexter and Lila in season 2. It says something when Dexter is a serial killer and the girl he dates is darker than him.
* Dexter and purchases life vests along with the tools. When asked, he says, "We can't exactly load up the cart with axes and machetes, now can we?"
* Dexter and subsequent novels self identifies as a violent sociopath. His foster father trained him to kill other violent criminals in order to channel use violent urges in a "positive" manner.
* Dexter as a child, and even at that time, Harry seemed aware that Dexter was a psychopath.
* Dexter as Alternate Continuity with each other. Trying to reconcile the two any other way is impossible.
* Dexter, as many season finale episodes revolve around whether or not the titular character will be discovered, killed, and/or caught.
* Dexter: Bathtub deaths form a major part of the Trinity Killer's pattern. This is later revealed to be due to a youth trauma in which the young Arthur Mitchell witnessed his sister's accidental death in a shower. Startled by Arthur's presence, she slipped and smashed the shower door, shards of which cut her femoral artery and caused her to bleed out in the water.
* Dexter, being the overly stereotypical nerd he is, is quite naive when it comes to sports. One episode had him distract his dad by constantly asking inane questions in regards to a golf tournament they were watching:
* Dexter book series. It also affected the font on the front of the books, changing the capital "T" in DEXTER to "t" to resemble the show.
* Dexter but has a special liking for the brain, marinading one as a delicacy (which also clears him from being a different serial killer who mutilates brains in order to remove specific pieces).
* Dexter but quickly dismisses it as ridiculous. In his darker moments, however, he admits that he's just a monster with a little more self-control.
* Dexter by Captain Matthews, who insists that the case will not be a "jurisdictional circle-jerk." Lundy joins his task force with the Homicide team and generally works well and respectfully with them. When another killer starts copycatting Dexter, Lundy warns that the FBI may seize total control of the investigation; Dexter ends up killing the copycat, so that he won't be locked out of the loop.
* Dexter can't really be excluded from this trope considering his thoughtfully planned and executed methods of disposing of bodies. Not only does he completely cover a small room in plastic sheeting and prepare the scene, has everything he needs to both torture his victim (a villainous criminal implied to have no chance for redemption) with pictures of his victims, collect blood for his blood slide collection, then stab the victim in the chest, chop up the body, wrap it up in garbage bags, and deposit them at sea with his boat in the dead of night. Originally he weighted the backs down with rocks and had them sink, but that cache was discovered. He then changed to dumping them in a current which would take them out to sea, ensuring even if they were found, they couldn't be traced. All the while posing as the upbeat forensic blood spatter analyst for the police. Trope mastered.
* Dexter, captured their leader. Dexter and Lumen were concealed behind a sheet of plastic, but Debra just said that she was going to let them get away with it because their victims were just that horrible.
* Dexter combines social awkwardness and constantly overthinking everything with the decidedly less relatable flaws of sociopathy and serial murder to create a

character as hilarious as he is horrifying.
* Dexter. Curiously, Chase himself by all indications didn't directly participate in the nightmarish gang rapes that he orchestrated; instead, he seemed to get off on the power he had over people by goading his buddies to brutalize his gang's victims and mentally torment the girls about how they were about to die.
* Dexter dead, his shocked response as police arrive is to blurt out "It was me."
* Dexter: Debra and Maria LaGuerta are the only women in a predominantly male workplace.
* Dexter: Dexter and Rita become engaged when Rita sees Dexter holding a ring (actually belonging to Dexter's sister's boyfriend) and assumes it's a proposal. In a twist, Dexter goes along with it.
* Dexter: Dexter has a moment like this when attacking the abusive father of Astor's friend. He describes how he is hitting internal organs in just the right way to unleash terror.
* Dexter, Dexter is investigating a suspect's house and comes across a fridge full of tupperware containers neatly labelled as various body parts.
* Dexter: Dexter joins a bowling team in Season 2. His biological father also became an avid bowler after turning his criminal life around.
* Dexter: Dexter Morgan starts having marriage trouble with Rita shortly after tying the knot. When a marriage counselor asks why Rita never brought up the issues she was having with Dexter before they got married, her excuse is she thought she could change him. Considering Dexter is husband number three, with the previous one being abusive, it's clear Rita has not learned anything.
* Dexter. Dexter starts telling a story about the Trinity Killer to Cody's Little Sailors' group. The other "dad" there cuts him off when it starts sounding a little too disturbing for the kids.
* Dexter does this a lot in voice over, referring to his lack of emotional reactions. Of his adoptive sister, he says "I don't have feelings, but if I could have feelings, I would have them for Deb."
* Dexter does this as a deliberate ploy when he's caught by the Skinner, another serial killer, using his understanding of serial killers to his advantage. It works.
* Dexter does this in the fifth season when he has to track a wounded man in a warehouse. In areas when he loses the trail of blood, he just breaks out the luminol and tracks drops invisible to the naked eye.
* Dexter episode, after an... awkward moment with his girlfriend who had been abused by her ex-husband, and Dexter is also a serial killer and psychopath who has trouble with intimacy because he is unable to have human feelings, he says, "There's an elephant in the room and its name is sex."
* Dexter episode "Dex, Lies & Videotape", Deb impulsively hugs Lundy after he clears up a misunderstanding. He hugs her back. Then a crackling police radio reminds them that not only are they (at that point) platonic co-workers, they're in the middle of a crime scene.
* Dexter episode "Return to Sender", Dexter gets called to the scene of one of his own murders.
* Dexter escapes the Skinner in season 3 - rocking the table over to land on his hand.
* Dexter. Even the directors were kept in the dark, leading to a few instances where Olmos had to gently nudge them away from filming a scene in a way that the reveal wouldn't make sense.
* Dexter eventually convinces Gianna that he is, actually, a nice guy, despite their... less than auspicious meeting. When she says she just wants to be friends, he says he'd be OK with that... and this is what finally wins her over.
* Dexter featured a rooftop confrontation between Miguel and Dexter towards the climax of the season. It was only a confrontation, not really a fight... but it was a pretty awesome scene anyway.
* Dexter features a cop who is being investigated by Internal Affairs. The only other person on the squad who knows about the investigation can't help noticing that this officer has a very expensive watch and a car he couldn't afford on a

cop's salary.
* Dexter feels affection for children because of their innocence, since he himself lost his childhood innocence at a very young age. He also is very protective of them, and whatever else happens finds the idea of hurting a child repulsive.
* Dexter..." for every single episode, fits this trope due to pacing issues later in the series. For seasons that did not receive near-universal acclaim, a primary factor in determining whether a fan enjoyed it can often be whether the individual watched it week-to-week (thus exacerbating a slow start) or all at once (practically eliminating such problems).
* Dexter Grif may just be this according to Church, being the only member of the Red Team that the
* Dexter happened at the end of Season 6, these montages became more industry-standard — always including Dexter and Deb, with reminders of who else from Dexter's office had significant development that episode.
* Dexter has Doakes, who knows that Dexter is a serial killer, locked up in the Everglades.
* Dexter has had a long and very successful career catching serial killers. That would make a great tv show.
* Dexter has the Trinity Killer receive faint praise from his family on Thanksgiving. He catches on, which goes poorly for his family.
* Dexter have recently-hooked-up Angel and Laguerta about to use the elevator alone together when Masuka joins them.
* Dexter, Hector Estrada, the last guy left from the group who killed Dexter's mother, gets paroled from prison and Dexter pretends to be a criminal and approaches Estrada so he can get close enough to kill Estrada. Estrada agrees to talk business at a later date, but first requires Dexter to loudly and clearly state that Dexter isn't a cop. Dexter, who really isn't a cop but a forensic examiner, does so without hesitation. Even if he were, it wouldn't count for much, since Dexter's intent isn't to arrest him.
* Dexter: her antics go from amusing to dangerous, and she stops being charming and starts being scary.
* Dexter. Her husband and Debra's immediate superior, Angel, is disgusted with this action and decides himself to sleep on the couch.
* Dexter. Her own psychologist tries this excuse while suggesting that Debra's love for Dexter may be more than just sisterly, using this trope as a justification. She later fell in love with Dexter totally, which became a key plot point late season six onwards.
* Dexter. He's an absolute badass of a sergeant and very intimidating. He has a dark past — he was a ranger in special ops corps, but he's an honest cop.
* Dexter, he suggests a target that would be impossible to get to through his means — an Aryan Brotherhood leader in a maximum security prison, giving out kill orders to his gang on the outside — in the hopes that Prado will leave him alone. Instead, Miguel goes for the plan whole-hog, arranging for the victim to get transferred into county for testimony so Dexter can spring him and kill him. In retrospect, Dexter should have known that an Assistant District Attorney, especially one as popular as Prado, may have enough pull to do this.
* Dexter himself does this to mislead the agents investigating his own murders. In a twist, his attempt to mislead actually helps the FBI agent to narrow down the investigation to somebody within the police department. This is because Dexter sends them a 'manifesto' of his crimes that's all over the map, causing Agent Lundy to deduce that the perpetrator is personally familiar with police profiling and was hoping to send them on a wild goose chase.
* Dexter "Hop a Freighter" Dexter and Lumen are cuddling on the floor while planning how to abduct and kill Jordan Chase. They use Harrison's various stuffed animals and toys to represent Chase, bodyguards, etc. It manages to be both very sweet, and more than a little creepy.
* Dexter in any case, but his adoptive father Harry steered him in a "constructive" direction, and gave him pointers on how not to get caught.
* Dexter in April 2021, confirming the new season would air in the fall of 2021.

* Dexter in biodegradable trash bags and dumps into a strong ocean current. The victims then all appear to be missing persons cases and are rarely ever mentioned again. It helps that he's a blood-spatter analyst; it's his job to figure out other people's crimes, and he got training in the matter from his cop foster father.
* Dexter in each season. In the final season, however, Dexter's flaws finally catch up to him and he's portrayed as his own worst enemy, pushing him into becoming the villain of his own story.
* Dexter. In season 1, while pursuing the Ice Truck Killer, the Miami PD comes across a man named Neil Perry due to his having traffic tickets issued near the scenes of the Killer's kidnappings. The subversion comes because the man is actually a computer hacker who specifically planted those minor pieces of evidence in order to lead the police to himself. Therefore he could falsely confess for the killings and be famous.
* Dexter instead of letting them have a government-sponsored vacation at prison.
* Dexter is a serial killer who works for the police and gets fascinated with gruesome murders, especially in the first season.
* Dexter is a show that loves to have gruesome serial killer murder scenes juxtaposed against the beautiful Miami backdrop. In his inner monologue, Dexter muses that in bright daylight, even the most gruesome killings look staged.
* Dexter is depicted mooning in the title card for the infamous "Rude Removal" episode.
* Dexter is into crypto-taxidermy. Debra cites it as proof that he really is the killer, but Dex insists the real killer would find it pathetic.
* Dexter is the Bay Harbor Butcher, Dexter is given a protective detail since they assume the Butcher will come after him. He slips away from them by climbing out the window of his apartment.
* Dexter it's (loosely) based on), animals in general and dogs in particular can't tolerate the presence of the main character (a sociopathic serial killer). It's so bad that when he tried to keep a pet turtle it starved to death rather than come out of its shell when he fed it.
* Dexter: It takes several decades, but Dexter ultimately manages to track down and kill all the criminals who were responsible for his mother's murder by chainsaw (and, indirectly, Dexter's own obsession with murder), including the guy who wielded the weapon and the boss who ordered the hit.
* Dexter keeps blood sample slides of all his victims in his apartment, hidden in a box in his air conditioner. In the books, he keeps them on his
* Dexter, ketchup squirting across Dexter's breakfast plate is for a split second meant to make the viewer believe it's blood, at least for the first time watching, thanks to the show's gory subject matter.
* Dexter kills one of these guys in the very first episode of the series, a pastor and choir conductor who raped and murdered three young boys.
* Dexter Kyle Chutsky points out that "No one ever stops a man with a clipboard."
* Dexter later manages an accidental example when Doakes catches him at a Narcotics Anonymous meeting, which he was only attending as part of lie for his girlfriend. It gets Doakes off his case, at least for a while.
* Dexter, Lexi, Rita's babysitter from the season 2 finale was last seen frantic and blaming herself for falling asleep and losing the kids (Lila drugged her). She's never seen again, so common consensus is that she probably never stopped blaming herself.
* Dexter: Lieutenant Maria LaGuerta, a boss of Homicide, dates and has sex with her direct subordinate Sergeant Angel Battista in season 4. When it gets revealed, their superior Captain Matthews wants them to either break up or have Angel transferred to another department. They take a third option and get married.
* Dexter makes an exception to his "only kill killers" rule in order to kill a paedophile who is targeting his step-daughter, Astor.
* Dexter. Miguel really enjoys it and is eager to kill, but is not very good at vetting his targets. Miguel and Dexter eventually have a falling out when Miguel murders a victim who is not a criminal and has a personal, easily traced connection to Miguel.

* Dexter Morgan is the serial killer who hunts other serial killers to satisfy his Dark Passenger.
* Dexter murders women in their bathtubs. Eventually, he takes revenge on Dexter by killing Rita this way.
* Dexter, Neil Perry confessed to being the Ice Truck Killer because he wanted to be someone important.
* Dexter, not wanting to divulge the methods of his usual lifestyle, Dexter teaches Miguel Prado to dispose of bodies by burying them past the point of visibility within a to-be-used grave, intending them to be hidden beneath a new coffin.
* Dexter novels, after a couple of books which appeared to be non-magical crime stories, suddenly threw in literal Christian demons and tried to claim that Dexter was demonically possessed. This did not go down well with many of the fans.
* Dexter novels: Almost every crime scene where Dexter arrives has a vomiting cop nearby. Dexter is so used to the sight that he doesn't see anything out of the ordinary with it. He simply snarks about the mess and noise.
* Dexter novels, appeared as a police officer in the third season of the TV series.
* Dexter novels, it's Dexter's stepchildren who end up being "like him"... and he ends up teaching them the same code he was taught by his own father. As before, it's too early to tell with baby Lily Anne.
* Dexter" Of course, he never did learn exactly who or what Dexter really is...
* Dexter often hunts down killers who got off on a technicality, along with killers released from jail and ones the police never tracked down.
* Dexter of the season, was dead the whole time, and Travis, his accomplice and murderer, was imagining him and committing the murders he thought Gellar performed.
* Dexter one, but also because his "Dark Passenger" (a spirit with whom he shares his body) clues him in when he's on the right track.
* Dexter: One of the men from the group of rapists is a dentist. Though we never actually see his depravity show up in his work.
* Dexter over her deteriorating relationship causes her to behave erratically at work, which gets her removed and lets LaGuerta reclaim her position.
* Dexter. Problem is, Dex was already anticipating a rival killer's plot against him, and so he escapes his bonds and deals a fierce punch to Masuka's eye when his friend opens the trunk. Whoops.
* Dexter repeatedly discusses murdering people with Dexter in restaurants, at parties, over the phone, in the office, and pretty much everywhere. Yet no one ever overhears, nor do the characters seem to be concerned that anyone will hear them. Because having the characters go somewhere private every time they need to move the plot forward would take too much screen time.
* Dexter resulting in uneven pacing, and often underwhelming resolutions to its plotlines. When the eighth season concluded, a lot of people would recommend newbies to stop at season 4.
* Dexter, Rita is constantly craving chocolate pudding. When Dexter comes home to find her making more, he comments on it. Rita responds by freezing and then saying, "Oh, shit. I've done this before... I'm pregnant!"
* Dexter's a decent liar himself, but his victim in "An Inconvenient Lie"(2x03), a car salesman/murderer, lies so effortlessly that even Dexter is amazed and impressed.
* Dexter says this about the rude owner of a noisy dog who's been keeping his girlfriend awake at night. Of course, he says it in his head, so he's really only mollifying the Code of Harry.
* Dexter's fifth season, Lumen bangs on the side of the car's trunk when it stops at a red light. Unfortunately, the light changes, enabling her captor to speed off before the interested fruit vendor can properly investigate. But he does tell Debra of his suspicions that someone was in the trunk later, leading her to the villain's hideout.
* Dexter's first kill is of a homicidal nurse, who overdoses patients in her care that she considers being in too much pain to keep living.
* Dexter's fourth season features the Trinity Killer, who finishes out a cycle of ritual murders by bludgeoning a father to death with the claw end of a framing

hammer.
* Dexter's girlfriend Rita is an almost broken, extremely vulnerable woman because she was in an abusive relationship (her ex repeatedly raped her and beat her nearly to death). Once she gets more comfortable with touching and being touched again, she sometimes clutches her forehead on Dexter's to show her emotional support.
* Dexter. She eventually starts to get over her trauma and get her sex drive back, and with some work, they eventually manage to build a functioning sex life together because he does get inadvertently attached to her...and then his emotional life gets a shake-up courtesy of the Season One antagonist and his mind games. In the books it's implied the only reason he and Rita can have a sex life is that she's so damaged from her abusive ex-husband, she can't tell that he's not "doing it right".
* Dexter. She's a tough, foul-mouthed cop with a heart of gold and a lot to prove. Together, they fight crime (in their own special ways)!
* Dexter's Laboratory affectionate towards Dexter. She faints when errs even so slightly.
* Dexter's Laboratory, after Dexter and Mandark keep bickering while in their robot suits and fail to stop the meteors and save the Earth.
* Dexter's Laboratory: After receiving an "average" score on a test, Dexter renounces his genius image and searches his closet for "average" clothes. The newest outfit he owns prior to inventing his lab is a pink baby getup.
* Dexter's Laboratory After the Boy Band Virus is supposedly eliminated from the family, the camera cuts to Dexter's dad singing the band's infectious song in the shower.
* Dexter's Laboratory: "Ah, yes! Saturdays are made for dads! ...And Dad's car."
* Dexter's Laboratory: Aliens are generally evil. One episode featured alien parasites that took control of Dexter's family in an attempt to conquer Earth. Another episode had aliens come to Earth and steal Dexter's merchandise during a yard sale. One episode had aliens kidnap Dexter and his family so their leader could try and drain Dexter's intelligence. Most of the villains in the "Dial M For Monkey" sketches are also aliens.
* Dexter's Laboratory, a line of trendy jeans (a la Calvin Klein) bear the brand of the Puppet Pals.
* Dexter's Laboratory". Also, in "Decode of Honor", one of the tattoos shown at the parlor Dee Dee goes to is of a hand doing this.
* Dexter's Laboratory: Although shown only briefly, a few mechanical horses galloped along Dee-dee (who transformed into a horse after begging her brother to turn her into a pony) as part of a testing ground assessing the strengths of her new body.
* Dexter's Laboratory (and he has a memory erasing gun, so its more like they look stupid by comparison to their supergenius son.) Also, Dexter's father turns out to be a stunt biker when his job is finally revealed (up to then, he left every day dressed for an office job), making him much cooler and more competent than the typical example.
* Dexter's Laboratory, and then tearfully tells him that she regrets trying to change him.
* Dexter's Laboratory. Apparently they are so good that he spends a whole episode descending into madness trying to steal the muffins instead of waiting for them to cool.
* Dexter's Laboratory: Appropriately named "Dexter's Debt", Dexter finds himself saddled with a bill from NASA from having them monitor his lab that's worth 200 million dollars. The episode focuses on Dexter's frantic attempts to try and make enough money to pay off the bill before they appropriate his lab as compensation. In the end, Dee Dee wins a sweepstakes with the prize money being exactly what Dexter needs, but in exchange for letting Dexter use it to pay off the bill, Dexter has to turn over part of his lab over to her.
* Dexter's Laboratory are black and Asian respectively. They might even be a light parody of this trope.
* Dexter's Laboratory art. Same with Dexter and Dee Dee, though it appears less frequently than Dexter and his mother.

* Dexter's Laboratory As such, senility kicks in as he asks his sister to help him up on the living room couch.
* Dexter's Laboratory at Dee Dee's birthday party. It's undone at the end when Dee Dee takes up miming lessons to subdue his clowning around and causing destruction throughout the city, then taking him back to the lab to administer an antidote.
* Dexter's Laboratory. At one point, they go to a dance contest where the last couple standing wins. When the slow-dance situation crops up, Dad helps Mom through it by presenting her with her trademark yellow rubber gloves.
* Dexter's Laboratory, at school nonetheless. He then has to make his way home, covering himself with a book.
* Dexter's Laboratory. At the episode's end, he goes back to the same house to watch the game with Barney.
* Dexter's Laboratory, both Dexter and Dee Dee are punished by being sent to spend the evening in each other's respective rooms. Dexter worries that Dee Dee will wreck his lab like she always does and tries to investigate by making a stealth suit. Turns out Dee Dee took a nap for the entire punishment, and Dexter wrecked Dee Dee's room trying to make the suit. He's sent out to the doghouse, where he comments that at least he knows the dog won't wreck his lap. Cut to the dog doing exactly that.
* Dexter's Laboratory by the background music that plays. "Go, Dexter Family go!"
* Dexter's Laboratory cartoon series, complete with silent characters, jazz music, and DeeDee doing the panther's unique walk.
* Dexter's Laboratory, complete with Monkey stripping himself and preparing primitive traps to defeat the hunter.
* Dexter's Laboratory convention, but end up at a doll collectors convention instead.
* Dexter's Laboratory could hear it. When we zoom back in, we see that he embedded the TV in the wall.
* Dexter's Laboratory, Dad talks about how he hasn't seen DeeDee since that terrible racing accident...as she sits there at the breakfast table, desperately trying (and failing) to get his attention. At the end of the episode, he finally "finds" her:
* Dexter's Laboratory. Dee Dee is energetic and imaginative while her little brother is quiet and intellectual.
* Dexter's Laboratory: Dee Dee's imaginary friend Koosalagoopagoop has been branded a pedophile by some after a scene where he forcibly shoves a Pepe Wrap into Dexter's mouth.
* Dexter's Laboratory, Dee Dee steals Dexter's glasses and then drops them on the floor for everybody to step on, by the time he finds them the lenses are completely cracked.
* Dexter's Laboratory Dee Dee to cure her cold, but ends up in the dog instead, which he doesn't notice. At one point, the dog is seen drinking water from the toilet, which makes Dexter believe Dee Dee is infected with a dog virus.
* Dexter's Laboratory Dee Dee was given to a trio of visiting aliens by Dexter, but after Dexter changed his mind and went to rescue her, the aliens were more than happy to give her up, since she caused so much havoc on their ship.
* Dexter's Laboratory depicted the girl's room as a huge meadow. He escapes by taking a Barbie doll hostage.
* Dexter's Laboratory, despite his age, almost exemplifies this trope.
* Dexter's Laboratory. Dexter accidentally pulls the moon out of orbit, which causes it to fall on his house and crush his lab, burning his clothes in the process. Deedee comes in a few seconds later and sees her brother's backside, and tells her mother that Dexter is mooning her. All the while the moon itself is still clearly visible in the background.
* Dexter's Laboratory, Dexter and Dee Dee suspect their parents. It turns out they were playing Scrabble.
* Dexter's Laboratory: Dexter and Dee have fights and arguments that almost always result in mishap and mayhem.
* Dexter's Laboratory Dexter and Mandark fall down a hole and partway through take

the time to scowl at each other.
* Dexter's Laboratory. Dexter exchanges the atomic power he was looking after with a doll, and it still doesn't stop a giant yarn ball from coming after him. It's only stopped by the doorway of Dexter's room.
* Dexter's Laboratory: Dexter has a crush on his teenage babysitter in one episode, and it didn't end well when he aged up, making the result… not so great, and a punch to the face by her boyfriend!
* Dexter's Laboratory, Dexter is sent to live with an Amish family whose main recreation is churning. DeeDee, his dippy older sister, quite prefers the recreational value of using a butter churn to other, more boring pursuits (like Space Camp).
* Dexter's Laboratory, Dexter makes a hair tonic for Dee Dee after she accidentally cuts off one of her pigtails. Despite repeated warnings to use only one drop, Dee Dee uses the entire bottle. Three guesses what happens next.
* Dexter's Laboratory, Dexter modifies his taste buds so he likes vegetables more, but ends up having the effect of him getting huge cravings of them. At school, they get a visit from "Mr. Dancing Carrot", a guy dressed in a carrot costume that sings about eating your veggies. Dexter ends up getting hungry and bites him.
* Dexter's Laboratory, Dexter once invented a pill that allowed a dog to talk, only to find that it didn't make much more sense in English; a double subversion because when the dog's owner comes to pick him up, his human English sounds like the dog's translated dog-language.
* Dexter's Laboratory, Dexter requests a peanut butter and bologna sandwich for lunch.
* Dexter's Laboratory: Dexter's Dad gets a couple of these at the end of "Average Joe".
* Dexter's Laboratory, Dexter's dad tries to teach him how to do sports, but is always thwarted by Dee Dee. Not that Dexter's dad is athletic, but his interests goes that way.
* Dexter's Laboratory: Dexter's mom (OK, his whole family) participates in two episodes. Go, Dexter's family, go!
* Dexter's Laboratory: Dexter's nakedness including him in his underwear is kind of funny in some episodes.
* Dexter's Laboratory, Dexter's school teacher, Miss Wimple, blows a kiss to Dexter, which hits him on the cheek, leaving an A+ mark.
* Dexter's Laboratory, Dexter tries to keep himself clean by laminating himself. Unfortunately, he slips and slides all over the room and breaks everything. At first, it seems his mother's going to yell at him for making such a mess, but she's really happy he's finally clean.
* Dexter's Laboratory, Dexter works on experiment that causes the whole house to tremble while his parents are making out on the couch:
* Dexter's Laboratory does one in "DeeDee and the Man", when Dexter "fires" DeeDee and is looking for a replacement "spastic sister" (at one point interviewing a manic nun: "They asked for a spastic sister, and who did you get? Nun other than me! Get it? 'Nun' other?").
* Dexter's Laboratory episode begins with Dexter entering his lab by dropping in through a tube and landing next to a chair. He drags it into its proper place, muttering about Dee Dee moving it again.
* Dexter's Laboratory episode "Catch of the Day" is about Dexter's father taking him fishing, though the focus of the episode seems to be about getting to the pond before dawn.
* Dexter's Laboratory episode "Coupon for Crazyness", Dexter trades places with a goofy, hyperactive look-alike named Dextor who has scientist parents. He switches back when he tires of the cold, clinical parenting style of Dextor's parents.
* Dexter's Laboratory episode "D2", Dexter and Dee Dee do this throughout the episode taking Dexter's brains and Dee Dee's stature to their advantage.
* Dexter's Laboratory episode "Dee Dee and the Man," Dexter finally gets Dee Dee out of his lab for good by firing her in her role as his sister. However, without Dee Dee sneaking into his lab anymore and causing havoc for him to stop, Dexter

quickly finds himself growing from elated and happy to depressed and bored, and by the end of the episode, Dee Dee has her rightful place restored.
* Dexter's Laboratory episode "Deedee-locks and the Ness Monster". Dexter is told to read Dee Dee a bedtime story while she's ill. However she gets bored and makes up her own fairy tale, featuring a girl called Dee Dee Locks having adventures with a three-headed creature known as the Ness Monster.
* Dexter's Laboratory episode "Dexter and Computress Get Mandark" was based on a story written by a kid who submitted a story for the show and he himself narrated the episode.
* Dexter's Laboratory episode "Dexter Dodgeball", Dexter is forced to participate in school gym class and therefore becomes the target of bullies in a match of dodgeball. After several days suffering abuse, he finally invents something to assist him in defeating them. Cut to a CMoA, when Dexter utters the phrase after not flinching when balls get thrown at him.
* Dexter's Laboratory episode, Dexter launched a tractor rocket that moves the moon so he will gain strength from the rays of Saturn. But suddenly, the rocket gets broken so the moon will come crashing down into Earth, wreaking havoc by rolling across the city and then his laboratory.
* Dexter's Laboratory episode "Dexter's Assistant", Dexter puts a new brain in Dee Dee's head so she'll be smart enough to help him with his science experiment. Bizarrely, this makes her smarter without changing her memories or identity, and it's never explained where the brain came from.
* Dexter's Laboratory episode "Dexter's Wacky Races" has Mandark in the Dick Dastardly role with the show's other cast members (including Monkey, Agent Honeydew and the Justice Friends) as the other racers.
* Dexter's Laboratory episode "Dimwit Dexter" shows that while Dexter is overworking himself, we see his brain being represented as a nuclear plant whose core is about to have a meltdown. The men inside initiate a temporary shutdown so the core can cool off, which turns Dexter into an idiot, and then they turn the plant back on at the end.
* Dexter's Laboratory episode "Dollhouse Drama," Dexter's sister Dee Dee loves to play tea party and dress up. Dexter, being a paranoid and suspicious sort, is dubious that she hasn't invaded his lab once in this particular day. He shrinks down to go in her room and spy on her. Dee Dee works him into her doll house soap opera, and because the shrink ray has the side effect of confusing reality with fantasy, Dexter soon believes everything in the setting to be real.
* Dexter's Laboratory episode, "Dyno-Myte", most everything that Dyno Mutt says is a pun.
* Dexter's Laboratory episode ends with Dexter dismissing Computer with "Oh, shut up and make me a sandwich." After getting shot with a laser, Dexter becomes a sandwich.
* Dexter's Laboratory episode featured Dexter freaking out due to a lunch lady's rather unsightly mole, and of course it happens on the day when a failed experiment was causing him to broadcast his thoughts to everyone.
* Dexter's Laboratory episode "Go, Dexter Family! Go!" had Dexter's Mom defeat a giant alien by unraveling his robe, resulting in his minions pointing and laughing at his nude body.
* Dexter's Laboratory episode "Got Your Goat," Dee-Dee and Dexter travel to the jungles of Central America searching for the Chupacabra. They encounter some angry locals who accuse them of being poachers, but Dee-Dee thinks they're asking if she and Dexter are thirsty. She tries to respond yes, and ends up babbling "I enjoy hamburgers and trousers, but I prefer green balloons!" in Spanish.
* Dexter's Laboratory episode "Mom and Jerry", Dexter accidentally swaps bodies with a mouse and ends up getting chased by his mother. At one point he tries to distract her by dropping decorative plates off a shelf, forcing her to catch them.
* Dexter's Laboratory episode "Now That's a Stretch" has Dee Dee blowing two head-sized bubble gum bubbles while sitting on the couch as Dexter looks on. Both bubbles burst, with the first pop leaving Dee Dee's face covered in gum and the second one having her whole head covered in popped gum.

* Dexter's Laboratory episode "Repairanoid", Dexter sends out a fly bot to find out why his lights are flickering. The electrician sees the fly but assumed it to be a ordinary fly and squashes it.
* Dexter's Laboratory episode "sdrawkcaB" has Dexter inventing a belt that makes its wearer go forward and backwards by pulling a lever that controls the time. Dee Dee ends up using it on Dexter, but he gets back at her at the end by having her wear the belt while she fell up and down from a high place.
* Dexter's Laboratory episode "Sdrawkcab" shows Dexter building a device that causes this in his actual life. Dee Dee gets him in trouble playing with it, then Dexter takes revenge by making her fall on her bottom repeatedly by reversing the moment and replaying it, over and over.
* Dexter's Laboratory episode "Shoo, Shoe Gnomes", this turns out to be the only way to get rid of the cobbler gnomes that have moved into Dexter's lab.
* Dexter's Laboratory episode "Sports a Poppin", has Dexter's dad trying to teach Dexter to be more athletic. While Dexter fails at traditional sports he demonstrates great athleticism at the end of the episode when fighting a giant monster outside his Dad's field of view.
* Dexter's Laboratory episode "Sports a Poppin'" has Dexter's father try to teach Dexter a sport—any sport. Dexter winds up either misinterpreting the rules or fails miserably at it, and his father is forced to give up and retreat to the TV, thus missing Dexter using all the sports gears in an attempt to contain the monster that escaped the lab.
* Dexter's Laboratory episode "The Big Cheese", Dexter is rendered incapable of saying anything besides the phrase "Omelette du fromage", and Dee Dee keeps mocking him by singing: "That's all you can saaaay, that's all you can saaay!"
* Dexter's Laboratory episode "The Laughing", Dexter uses one when he turns into a were-clown.
* Dexter's Laboratory episode "The Parrot Trap", Dexter creates a robot-parrot to keep around the lab, largely to hear it mimic his bragging and self-praise ("Dexter is the most brilliant mind in the entire universe!"). It backfires in short order when the parrot begins to mimic Deedee, then escapes the lab and threatens to blab about it to Dexter's parents.
* Dexter's Laboratory episode where Dee Dee reveals she has hair long enough to help her and her friends climb out of a monster's stomach when he eats them.
* Dexter's Laboratory (especially since he is saying "omelette with cheese") and the on-screen appearances of the words are not corrected.
* Dexter's Laboratory for dinner and another where he attempts to hypnotize Dexter, the kids catch him and send him to his room. He even lampshades it.
* Dexter's Laboratory from 2008-2012, then you could've seen the latter series as a standalone program.
* Dexter's Laboratory good dancer. She can dodge lasers while doing ballet!
* Dexter's Laboratory, "Got Your Goat": When Dexter realizes the chupacabra is really one of his escaped experiments, he rushes to pick up "Charlie", with Dee Dee tagging along to act as an interpreter. Once they arrive in Central America, they run into some surly locals who accuse them of being poachers. Dee Dee, whose grasp of Spanish is really rather lacking, thinks they're asking them if they're thirsty, and in trying to tell them "yes we are", says "I enjoy hamburgers and trousers, but I really like green balloons!"
* Dexter's Laboratory had a character in the episode "The Bus Boy" where Dexter's pencil is knocked into the uninhabited, dark back of the bus. A German boy in lederhosen is one of the kids to describe their account of why they fear to go back there. His story involved him dancing around eating food and lamenting how good it was.
* Dexter's Laboratory had a humorous variant where Dexter gave himself a waxen "handsome" face to look good. He grew so vain with the lighting in his picture that the face melted off under the heat of the lamps.
* Dexter's Laboratory had an episode showing how the parents met when the mom was a germaphobe and the dad was a dirty slob. This also shows how she got her yellow gloves, which he gave to her so they can touch.

* Dexter's Laboratory had an episode such as this, in which Dee Dee was the monster.
* Dexter's Laboratory had an episode that claims Dexter had created it as a little reptilian monster that he named Charlie to scare off Dee Dee from his lab, but he had escaped to Mexico and started attacking goats ("I never said it was a completely successful experiment").
* Dexter's Laboratory had Dexter cutting wires in one of his inventions, with help from a now genius Dee-Dee. While he goes to cut the wires she hints they are wrong until they get to the last one, which Dexter states has to be correct via process of elimination and cuts it. It's wrong. Dee-Dee then reveals they were all the wrong wires.
* Dexter's Laboratory had this to an extent. In an example, Dexter, his dad, and Deedee are happy to do it to give Mom the day off. Unfortunately, they're so horribly inept at it that the only thing stopping Dexter's mom from intervening is the fact that she doesn't have her gloves, and she's a massive germophobe without them.
* Dexter's Laboratory has a scene where Dexter's hair is on fire, made all the more hilarious by him running around in a circle screaming "MY HAIR IS ON FIRE! MY HAIR IS ON FIRE! MY HAIR IS ON FIRE!"
* Dexter's Laboratory has Dexter accidentally being mixed up with the son of two strict scientists. At first Dexter loves living with them, until their cold, sterile approach to child rearing gets on his nerves. The line comes when they serve him vitamin pills and chewable juice for breakfast.
* Dexter's Laboratory has Dexter and two of his friends as Kirk, Spock and McCoy expys (Irk, Spork and McBoy, respectively), going to a Star Trek expy ("Star Check") convention. (They unfortunately get stuck at a Barbie expy Con instead.)
* Dexter's Laboratory has Dexter's family, who are not the most stable people:
* Dexter's Laboratory has gone back to studying hard, much to his annoyance, so he stages up a massive party that gets him booted.
* Dexter's Laboratory has Major Glory making his friends scramble to impress his jingoistic Uncle Sam, only to discover his uncle has mellowed into a hippie to avoid high blood pressure.
* Dexter's Laboratory Has one of these in the episode "Hamhocks and Armlocks." Their waitress is a chain smoking woman named Midge. She even has a bad perm to complete the stereotypical Greasy Spoon look. The restaurant is devoid of menus and only has three options when it comes to food: Hamburgers, Hammhocks, and Ham Sandwiches. Despite the family asking for hamburgers, Midge refuses to bring them any. Dexter's father then asks for Ham Sandwiches and she responds by saying "Trust me, you don't want em'". She then orders Hamhocks for the entire family. Not surprisingly, the climax of the episode deals with Dexter's Dad being challenged to an arm wrestling match by a man named "Earl" for making him lose.
* Dexter's Laboratory has simple comedic plots similar to old Fleischer and Disney cartoons, with episodes like "Fantastic Boyage", "The Continuum of Cartoon Fools", and "Last But Not Beast" as examples.
* Dexter's Laboratory have interesting pairs of footwear. Dexter has his black boots that tend to make a scratching noise when he walks. DeeDee has her pink ballet shoes which usually make a squishing sound when she walks.
* Dexter's Laboratory, having elevated this to an art form and having "What does this button do?" as her catchphrase.
* Dexter's Laboratory having one too, which she uses to scold them with.
* Dexter's Laboratory he blows the TV partially through the wall. Right after his dad told him to "Let 'er rip."
* Dexter's Laboratory. He eventually earns himself a spot on the Justice Friends... as the team's personal handyman.
* Dexter's Laboratory, he irradiates a spider so he can be bitten by it. Unfortunately, he kills it and has to bring it back to life via a tiny spider-sized set of defibrillator paddles.
* Dexter's Laboratory: He may have been called "Mr. Astronomonov", but his parents named him "Susan." We know him by a different name: Mandark.

* Dexter's Laboratory. Hence, Rasslor is impressed and doesn't destroy the Earth.
* Dexter's Laboratory" Her nearly suicidal behaviour around Dexter's inventions is a constant source of drama in the series.
* Dexter's Laboratory, his Dad wouldn't hire cable TV, which prompted Dex into building a satellite that (illegally) brought extra channels. When the authorities learned about the fact, they blamed and arrested Dad. When Dexter's Mom went to the precinct where Dad was taken to, she was told he could have left hours ago. Dad was then shown enjoying his cell's TV.
* Dexter's Laboratory: In "Chess Mom", Dexter competes in a chess tournament. His mother loudly cheers for him, but everybody tells her to be quiet so the players can concentrate. She doesn't get it and keeps cheering louder and louder until she is kicked out of the building.
* Dexter's Laboratory: In "Dexter's Wacky Races", Dexter's Dad shows off the modifications he made to his car to make it go faster, including partially dismantling it. A variation in that reality kicks in before it's pointed out.
* Dexter's Laboratory: In "Framed," Dee Dee steals Dexter's glasses and mocks him with them while the two kids are on the bus to school. Later on, after he retrieves his broken specs from the floor of the bus, he lets another girl try them on when she compliments him on them.
* Dexter's Laboratory in Japan, a group of attack ships commanded by Agent Honeydew appears and attacks it. She orders the ships to use Attack Pattern Omega.
* Dexter's Laboratory (in particular, famous for their honesty) and walk off arms-over-shoulders to have a friendly conversation.
* Dexter's Laboratory: In the episode "Fantastic Boyage," Dexter went into his pet dog to get rid of a disease.
* Dexter's Laboratory in the episode "The Continuum of Cartoon Fools" does this to one of the transportation remote controls that Dee Dee got a hand on after using it to enter Dexter's lab. When he uses the spare one to transport back to his lab, he stomps on that one as well.
* Dexter's Laboratory: In the episode "The Old Switcharooms" Dexter's father makes him and Dee Dee stay in each other's rooms as punishment for running into him (causing his bowling trophy to break). Later Dad confines Dexter to the doghouse, leaving him to worry about the fate of his lab.
* Dexter's Laboratory: In "The Laughing" a single, comically tall clown comes out of a comically undersized clown car at Dee Dee's birthday party.
* Dexter's Laboratory: In "The Laughing" Dee Dee stops Dexter, who has turned into a "were-clown", by taking mime classes and using what she learned to "trap" Clown Dexter in an invisible box.
* Dexter's Laboratory involved Dexter concocting a special piece of bubble gum in his lab after losing a bubble gum blowing contest with his sister, Dee Dee. He tries to demonstrate the power of his new gum to Dee Dee and her friends—but his huge bubble bursts and covers most of the last panel (characters and scenery alike) in gum.
* Dexter's Laboratory is a little light on the flatware, but even so he occasionally carries around a beaker. More often, he can be seen endlessly turning a nut with a wrench, against a background of computer banks, et al.
* Dexter's Laboratory is by no means "Mr. Popular" and is obviously cut off by everyone around him, his family included, mostly due to his vast intellect. He also mistakenly gets into trouble that are beyond his contol or he didn't do in the first place.
* Dexter's Laboratory is generally a revered cartoon, the episode "Nuclear Confusion" is only remembered for the minor appearance of the Touchy-Feely neighbor lady and the scene where she bends over to pick up a cookie she dropped to show the next clue printed on her large tush.
* Dexter's Laboratory is naive enough to believe him for most of the story. (Of course, Dee Dee isn't all too bright.)
* Dexter's Laboratory, is the only main character who knows of Dexter's Lab besides Dexter himself. Others include Dee Dee's friends, Mee Mee and Lee Lee, and Mandark, who has a lab of his own (though not a secret one, since his constructions dwarf

his house).
* Dexter's Laboratory is the only voice role for Allison Moore, who was a college friend of series creator, Genndy Tartakovsky. She only voiced the character in the first season, but briefly came back several seasons later when her replacement Kathryn Cressida (who has done some other voice work) was unavailable.
* Dexter's Laboratory it was parodied with Dexter and Dee Dee getting simultaneous ideas. Dexter's was represented by two atoms undergoing fusion and producing light. Dee Dee's was represented by two rocks banging together and making fire. Of course, since the previous is a natural process, while the latter represents one of the first ideas from which all science descends...guess which plan turned out better?
* Dexter's Laboratory keep his titular lab a secret from his parents and most other characters; a recurring exception is Dee Dee (since she breaks through security every time)..
* Dexter's Laboratory loved this one, naming it the "suit up" sequence which made DeeDee squeal with glee whenever it happened.
* Dexter's Laboratory, Magmanamus, a giant magma monster that lives in the center of earth, pounds the ceiling of its room with a broom to get the people on the surface to keep it down so he can sleep. When it doesn't work, he goes upstairs.
* Dexter's Laboratory (Mainly Seasons 1 and 2, the revival was ran by CNS but the animation was still thick lined, if to a slightly lesser extent)
* Dexter's Laboratory, Major Glory doesn't even wear those yet he does in "Members Only", this was never explained.
* Dexter's Laboratory manage to seal it off completely... but locked himself out in the process.
* Dexter's Laboratory, Mandark, abducts Dexter's mother and imprisons her in a suspended animation tank, where she is a state of blissful slumber, being completely unaware of what was occurring. She wakes up after hearing Dad say that Mandark "Missed a spot," and breaks out of her prison to clean up the spot. Strangely, she seems to be unaware of her kidnapping as she never questioned what happened to her.
* Dexter's Laboratory, Mandark's hippy-dippy parents gave him the name Susan.
* Dexter's Laboratory: Mandark's Lab? is called "Dee Dee's Dance Off". It's a rhythm game where Dexter must copy his sister's dance moves and beat her.
* Dexter's Laboratory — Mee Mee and Lee Lee (Dee Dee's friends) wear green and purple versions of her outfit.
* Dexter's Laboratory nun as one of the potential replacements for Dee Dee.
* Dexter's Laboratory off. After a restaurant owner helps them out, they make it home before dinner by getting delivered there in oyster pail boxes.
* Dexter's Laboratory or having an overly dramatic reaction to his situation, and his older dumber sister Dee Dee walking away smiling. There's even an episode dedicated to the parallels between this show and Wile E. Coyote and Road Runner. Dexter does tend to win against his dramatic rival Mandark however, and may even beat Mandark and lose to Dee Dee at the same time.
* Dexter's Laboratory pulls a similar joke when Dee Dee is, of course, left standing next to a button unattended.
* Dexter's Laboratory qualifies owing to her innocent naivety and girly nature.
* Dexter's Laboratory. Rolled-up newspapers were used as sword analogues, complete with a failed ninja committing seppuku at the end by whacking himself in the face.
* Dexter's Laboratory room apart, she spends most of the time napping. Dexter ends up having to switch living quarters with the dog as punishment. The dog, you guessed it, completely trashes the lab when Dexter doesn't even suspect it.
* Dexter's Laboratory, Santa Claus defends his sleigh from Dexter's homing missiles by throwing several presents at it, causing the missile to hit the gifts instead and explode harmlessly in the sky. Unfortunately for Dexter, these happened to be his sister Dee Dee's presents.
* Dexter's Laboratory segment "Dial M for Monkey" in the banned episode "Barbequor", where Barbequor and his herald the Silver Spooner attacked the Earth while Monkey was having a birthday party thrown for him by the other heroes, who kept trying to stop Monkey from fighting them so he could enjoy his birthday while

they try (and fail) to handle it themselves. Even after saving the day, Monkey doesn't get to enjoy his birthday because he then has to give The Infraggable Krunk a ride home and is having a hard time accomplishing the task because Krunk can't remember where he lives.
* Dexter's Laboratory. She calls out "Honey, our refrigerator is running!", to which Dad upstairs answers cheerfully "And we've got Prince Albert in the can!" (At which point a literal prince emerges from the toilet.)
* Dexter's Laboratory. She goes from all saggy and pathetic-looking to made up and perfect on drinking her first cup.
* Dexter's Laboratory. She's older than Dexter, but acts more like a little girl.
* Dexter's Laboratory short "Dial M For Monkey" has the supervillain Simian who invites Monkey to dine with him and proceeds to seduce him to help him destroy the human race.
* Dexter's Laboratory short "Dimwit Dexter", Dexter fries his brain from over-work and temporarily becomes stupid, and the neighborhood kids egg him on to do all sorts of ridiculous things. Unfortunately for Dexter, his intelligence returns right after he kisses a duck's butt.
* Dexter's Laboratory short "The Big Sister", Dee Dee becomes a giant, yet she is able to strip Dexter to his underwear as if he were a doll.
* Dexter's Laboratory shows how Dexter has a thinly-veiled robotic clone on standby, just in case his mom enters his room. Of course, it works just fine. A thinly-veiled robotic clone that is apparently only capable of saying the words "Hello, Mother" over and over. Again, it works just fine.
* Dexter's Laboratory singing a lawyer-friendly rendition of the theme. We then soon learn that the woman singing was Dexter's Mom, as his two friends look on bemused and entertained while he looks mortified.
* Dexter's Laboratory so he can smash Dexter's lab. Dexter retaliates by likewise animating the Lincoln head and they clash...until the two Presidents find common ground in their legendary honesty, stop fighting, and walk off together chatting amicably.
* Dexter's Laboratory so that all three of them can attack him together as a group) until the parasites abandon ship, after which Dexter immediately stomps the aliens flat, killing them. Afterwards, his parents and Dee Dee don't recall any of what happened, though they don't feel particularly well after the beating they received as they all lie in bed together.
* Dexter's Laboratory steps on a small puddle and completely shorts out.
* Dexter's Laboratory-style game. Two of his friends are the knight and ranger, while his Asian friend is a wizard.
* Dexter's Laboratory tends to have this happen with Dexter and Mandark as both geniuses will build something spectacular and once it breaks down, they dump it and build something else to replace it. It's not that they don't know how to fix it, it's that their egos demand something bigger and better to replace it.
* Dexter's Laboratory territory. Naturally, this is all completely accurate.
* Dexter's Laboratory that the parents are, in fact, playing Scrabble, but the kids naturally assume they're listening to the breakdown of their parents' marriage.
* Dexter's Laboratory that they were the ones to save the world, thus dooming themselves into repeating the actions they did in the movie. The 'main' Dexter is excused because this is his first time experiencing it, and technically the oldest one can be excused on the grounds of senility.
* Dexter's Laboratory the Cold War ended, but it's also worth remembering that Genndy Tartakovsky was born in the USSR.
* Dexter's Laboratory: The hyperactive Dee Dee usually sabotages Dexter's experiments and destroys his lab but she does so out of ignorant curiosity rather than malicious intent.
* Dexter's Laboratory, the Justice Friends say this after Rasslor's big melodramatic speech.
* Dexter's Laboratory. The last thing on his list is telling his parents about his secret lab. Just before he can tell them, he breaks wind with enough force to embed the television (which he was standing in front of) into the wall.

* Dexter's Laboratory: "The Laughing" - A clown takes a hard fall, knocking his false teeth loose. They go flying across the yard and bite Dexter, turning him into a were-clown.
* Dexter's Laboratory". The majority of his experiments have no conceivable practical use, and he seemingly never intends for them to leave his private underground lab in any case. He performs them because, darn it, SCIENCE!
* Dexter's Laboratory: There's Dexter's lab monkey, who moonlights as a superhero and stars in his own spinoff short series Dial M For Monkey. He still isn't able to communicate with anything but grunts and shrieks, though.
* Dexter's Laboratory. There's the episode where Dexter's Mom bakes some muffins and Dexter has to prevent his dad from eating them (apparently, he's a "muffomaniac" and Mom even says that he only married her because of her muffins). Dad starts to hallucinate that's he's in a land of muffins and is crowned king. All in all, it was a very bizarre episode.
* Dexter's Laboratory: The title card for "Dexter Detention" features mugshot photos of Dexter.
* Dexter's Laboratory, the titular character is shown in the episode "A Boy and His Bug" to own a genetically-enhanced termite that eats metal instead of wood, especially the metal scraps left over from when Dee Dee destroys his lab.
* Dexter's Laboratory. This happens to Dexter after Dee Dee has him running around for an entire episode to find an item of his. He devises an elaborate plot to hide one of her own items, but she just searches her room and immediately finds it.
* Dexter's Laboratory: This is most relevant in the end of Season 2, Episode 32, Part 3: "Dexter Detention."
* Dexter's Laboratory, though how underground the lab is isn't really gone into, mostly due to physical impossibility.
* Dexter's Laboratory throughout the episode) has hooked Darbie to a medical device and he tells them to be quiet so she can "sleep", causing both to slowly walk out with disturbed expressions.
* Dexter's Laboratory to annoying levels, Dee Dee is cheerfully well-meaning and adores her brother no matter what.
* Dexter's Laboratory to Dee Dee begging Dexter for help, which involves her repeatedly shouting "You gotta!" and Dexter replying "No! Shut up."
* Dexter's Laboratory to Dexter as he refuses to stop to give ice cream to him.
* Dexter's Laboratory to lose it at Executive!Mandark after years of abuse and proceeds to kick the shit out of him.
* Dexter's Laboratory to the Cabbage Patch Kids Snacktime Doll (which has its own section), a doll that ate plastic food through a motorized mouth, but was recalled when it started biting chunks out of kids' fingers and ripping their hair out.
* Dexter's Laboratory. Unfortunately, nothing seems to work and, not only was it only a test, it was so long, that he missed an epic fight scene.
* Dexter's Laboratory (unless you count him taking down a cruel boss at the photo lab).
* Dexter's Laboratory: Val Hallen of the Justice Friends, in a one-off gag involving an X-ray.
* Dexter's Laboratory wanted to focus on changing a few voices around), but Cartoon Network discovered that viewers preferred Kat Cressida, so she returned for the fourth and final season at the behest of Cartoon Network.
* Dexter's Laboratory, was born in the Soviet Union himself, and has stated that Dexter's accent was based on his own from his childhood.
* Dexter's Laboratory, when a gang of villains smashes inside of a mall and a small piece of debris bounces off Dee Dee's head, mildly distracting her.
* Dexter's Laboratory, when Deedee and Dexter get turned into monsters, they both call their attacks when fighting each other.
* Dexter's Laboratory when Dexter (in the mouse's body) ends up in the kitchen, causing his mother to freak out and start trying to chase him out of the house.
* Dexter's Laboratory, when Krunk has a piece of potato chip lodged in his tooth and Major Glory refuses to let him go see a dentist. After watching Krunk be subjected to various unpleasant and unsuccessful methods to correct the problem,

Valhallen simply takes him to the dentist, where the chip is removed painlessly in a few seconds. Played straight when Major Glory is forced to go to the dentist himself at the end of the episode, but only because he refused to go to regular check ups and thus had lots of cavities.
* Dexter's Laboratory when Mandark develops a crush on DeeDee. Dexter encourages this, because it means his sister will be wreaking destructive havoc on Mandark's lab instead of Dexter's.
* Dexter's Laboratory: When Mandark first lays eyes on DeeDee, his vision of her is having sparkling, almond-shaped eyes with a captivating gaze; her blonde hair shining like actual gold; and leaving a trail of sparkling fairy dust in her wake as she gracefully passes him by.
* Dexter's Laboratory when Monkey convinced him to embrace his primate instincts.
* Dexter's Laboratory, where Dexter and Dee Dee end up in each others' bodies at the episode's conclusion.
* Dexter's Laboratory where Dexter comes home all worried about having to take his mother to see the principal. Dee Dee spends the entire episode wondering "Whadja do? Whadja do?" until Dexter transforms her into a copy of his mother, and takes her to the appointment, allowing her to find out from a tearful principal that Dexter got an A-minus on his last test. Of course, she immediately proceeds to go ballistic ("A lousy A-minus!?"). Then Dexter tells Dee Dee that if she were going to bother him so much about it, they should never have gone through the trouble of turning her into their mother.
* Dexter's Laboratory where Dexter has to combat an alien life form that's possessed all his family members, he uses one of his self-manned robot inventions that he used previously to combat a group of bullies harassing him with dodge-balls even stating "I haven't used this baby since that whole dodge-ball incident".
* Dexter's Laboratory where Dexter tried to give himself various superpowers but ended up with unintended side effects. When he gave himself super speed, he could run around the world in an instant, but when he tried to stop he ended up skidding all the way around the world again.
* Dexter's Laboratory, where one of Dexter's test animals is secretly a super-powered crime fighter.
* Dexter's Laboratory, which he allows to keep, and Dexter is relieved.
* Dexter's Laboratory who's just a human head on a mechanical bird body) makes his big entrance.
* Dexter's Laboratory with one of his inventions, but thanks to Dee Dee messing around with it she became a very exaggerated baritone. While she didn't get into the school choir, it worked out for her in the end; she joined a Barbershop Quartet instead.
* Dexter's Laboratory worked only on a couple episodes "Chicken Scratch" and "Comedy of Feathers".
* Dexter's M.O. in the books. Plus some fishing wire to the throat. Ouch...
* Dexter's morning routine, shown in extreme close-up and shot to be reminiscent with his hack-n-slash murders.
* Dexter's mother may be one of the more obvious examples; her obsession with cleanliness goes beyond what is healthy. A couple of episodes confirm that she has mysophobia, fear of germs and dirt, to the extent that she actually sought out psychological treatment when she was younger as depicted in the
* Dexter: Special Agent Frank Lundy cooks dinner for Debra, a much younger detective who is part of their joint task force. Adorably, he asks her brother Dexter about her food preferences. He barely starts though because they find each other too irresistible and initiate sex. Later, he's seen offering her a piece of lox in the office, to which she replies, "Gross."
* Dexter spends an episode trying to gain superpowers through experimentation, and runs into the same it-doesn't-work-if-you-do-it-on-purpose problem. In the end, he gives up in frustration. Then Dee Dee waltzes into the lab, spills chemicals on herself, and gains super powers.
* Dexter starts with the death of a semi-innocent man due to this trope.
* Dexter suffered this a couple of times. The first 2 episodes of season 2 and 4,

along with the last 2 episodes of season 2, where leaked before their original airing.
* Dexter's victims' bodies being discovered. Miami Metro Homicide names the mysterious serial killer the Bay Harbor Butcher and, with the help of the FBI, begins their hunt for him. This means Dexter needs to be a step ahead of his team at all times, particularly Doakes, who already suspects him. Paralleling the story is Dexter's relationship with Lila, his sponsor at Narcotics Anonymous.
* Dexter's victims was importing illegal immigrants, then holding them prisoner to extort money from family members already in the country.
* Dexter targets a Colombian people-smuggler who has been killing his customers and dumping them in the sea if their families couldn't pay an extra fee on arrival. He's also happily married to a pretty young blonde, and Dexter initially figures that, like him, the smuggler is putting on a mask, never letting her see who she's really married to. In the end, however, it turns out that she's actually his partner in the business, so she winds up on Dexter's table next to her hubby. Their anguished declarations of love as they face death at the hands of a glorious madman makes even Dexter pause, briefly... so he can pick up some pointers on how better to fake a relationship with his girlfriend, whom he needs in order to 'blend in'. THEN he gets down to the dismemberment...
* Dexter that, if it's so much human blood, she has a murder on her hands, and so it's her case.Literature
* Dexter: The Barrel Girl Gang recorded their own rapes/murders of young women for their own viewing pleasure. Of course, this leads to a mountain of incriminating evidence for the police to sort through once their crimes are exposed.
* Dexter: The final arc heavily hints that Dexter's homicidal tendencies might have been sustained, or even heightened, rather than treated, by the Code he's been taught — it turns out that a certain psychiatrist was obsessed with the concept, after failing to treat her own, truly homicidal, son. Even so, in the finale Dexter decides he is a monster after all, and goes into exile.
* Dexter - The main villain in Season 4 keeps the ashes of his dead sister on his mantelpiece when he isn't scattering them next to the bodies of his victims. They're smashed by his long-suffering son in a fight.
* Dexter. Then again, Dexter probably didn't ram Doakes very hard, as the point of the attack was to provoke and not to injure Doakes.
* Dexter, the other characters (all police officers) treat Detective Quinn this way when he requests to speak with an attorney when it's likely that he might be implicated in a crime that he didn't actually commit.
* Dexter, the police catch on to the identity of a killer when a witness who had previously begged not to be deported away from his family does a complete turnaround at the mention of the man's name. They eventually secure his cooperation by tricking him into thinking that the killer is targeting him anyway.
* Dexter there is a large whiteboard at the police station, often with a flow chart illustrating recent events, and almost always including many large, full color photographs of the victims, suspects, and other plot elements relevant to the current investigation.
* Dexter, the second half of the phrase takes on a different meaning. He was joking though because he is "rather fond" of her.
* Dexter, the show about the world's most lovable serial killer, takes place in Miami. Not only is it strange that Dexter lives there, but Miami is apparently so full of messed-up people that Dexter usually slices up a character an episode while he is looking for each season's "Big Bad". Also, almost no character is introduced to the show who isn't in some way completely insane.
* Dexter, the title character has a disturbing dream that begins with rain that turns to blood. Then it gets worse.
* Dexter. The title character is a serial killer, but has a very strict code that forces him only to target people whom he can prove beyond a reasonable doubt have themselves murdered innocent people (he has occasionally made exceptions for rapists, but the general idea is the same), and only if they have escaped attempts to bring them to justice legitimately. On the other hand, he doesn't actually care

about saving innocent lives; his code is mostly designed to allow him to most effectively get away with killing people by targeting those that society does not particularly care about.
* Dexter the title character pushes his adopted daughter Astor into the pool at a party in an attempt a playfulness. While she is actually wearing a bathing suit, she doesn't much appreciate it.
* Dexter, the titular anti-hero is having memory issues, and can't remember where he hid his most recent corpse. He remembers when a drop of blood hits him on the cheek after falling from the punching bag he had stuffed it in, and hidden in the rafters.
* Dexter, the Trinity Killer casually walks into Miami Metro Homicide, peruses the evidence being collected to catch him with bemused glee, and confronts Dexter in his lab, learning his real name and violating a space Dexter considered safe.
* Dexter. This has been happening every few months for over 30 years. The entire fourth season is centered around this mystery.
* Dexter throws in a few aspects of this, though you can't really call the show a Forensic Drama; Dexter himself is a forensic investigator, though, and there is a lot of swabbing and lab-checking at least once an episode, sometimes even as an important plot point.
* Dexter to get free and find Astor and Cody before they become sacrifices.
* Dexter tries to kill her, and Debra shoots LaGuerta to cover up for her brother.
* Dexter. Unique because he's actually in the title credits and appears, at the very least, in two-thirds of every season, almost always as a hallucination.
* Dexter. Unusually for this trope, Dexter chose to date her because of this as it left her, like him, uninterested in sex.
* Dexter use this trope. And in that case, when they say 'monster', they mean killer.
* Dexter very rarely shows emotion, genuine or otherwise. This makes the very rare outburst all the more interesting.
* Dexter Walker's girlfriend Steph Green started out as a caring and likable nurse, who supported him when he found out his brother-in-law was dying, brought out his relaxed side and even had the maturity to take a step back when he began to push too hard to make his family accept their relationship and tell him he needed a friend rather than a girlfriend. Then someone seemed to realise she was coming across as a better match than his
* Dexter webisodes was a sniper during the Gulf War and used his position to kill innocents and cover up his murderous proclivities.
* Dexter, we see a flashback wherein Harry takes young Dexter to watch an execution, telling him that this is what will happen to him if he doesn't follow the Code.
* Dexter, we see the Trinity Killer calmly take his teenage son's finger and bend it back until it breaks as punishment for smashing up his car.
* Dexter, when Astor asks what Lumen is doing in Dexter's house. Dexter claims they're not dating, and she's just a tenant. While she's much more than that, Dexter never lied. They aren't dating at this point.
* Dexter: When finally confronted about his mysterious disappearances at night by his girlfriend, he told the truth. She accused him of doing drugs and he admitted to having an addiction. He does have an addiction - just to murder, not drugs. This all came to light when Dexter admitted to knocking out her ex and injecting him with heroin in order to protect her and her kids. She immediately latched onto the fact that he knows how to cook heroin.
* Dexter, when Lila and Dexter share a hotel room, he ends up falling asleep with his head in her lap after a breakdown following a confrontation with his mother's murderer.
* Dexter when the two stone presidents find out they are honest men who have a lot in common, stop fighting, and walk off as friends.
* Dexter where Angel and Masuka are discussing why the body of the prostitute they found had no head.
* Dexter, where the title character finds Tony Tucci. Initially a suspect in the

case, Tony had been kidnapped by the Ice Truck Killer and was near death.
* Dexter which comes back to bite him hard in the end. He also, at least once, plants evidence to steer the police away from a criminal whom he wants to kill.
* Dexter) who has to emulate emotions to go unnoticed by others, and is only motivated by his urge to kill. He is actually diagnosed as a psychopath by a psychologist who knows his true nature late in the show.
* Dexter with a much older Agent Lundy (in his sixties) who could easily be her father.
* Dexter with Lt. Laguerta for the most part, but select scenes with Sgt. Doakes fit the trope fairly well. Played straight with Captain Matthews, Laguerta's superior (though Matthews has been rarely seen since the second season).
* Dexter with newspaper clippings about rapes and a map with pinpoints all over it. He also realizes that she is sleeping in her closet, as it is the only place she feels safe.
* Dexter: Without ever stating it out loud, Sergeant Batista heavily implies this to intern Louis when he starts dating Batista's little sister Jamie. It's portrayed as just being overly protective of her, but the boyfriend in question turns out to be a scumbag regardless. Subverted later on when Jamie starts a secret relationship with Batista's colleague Quinn. He's supportive of it when he finds out, but wants Quinn to man up by applying for the vacant Sergeant post as Batista himself is now Captain.
* Dex, the amiable owner of an inexplicably '50s-Americana Diner, was already this in the films, but it's heavily lampshaded here.
* Dextromethorphan is a cough medication available without prescription in most parts of the world - despite the fact that it's a potent hallucinogenic dissociative in high doses. It got away on the grounds that there's not really another option for dealing with a persistent cough, and the medicine is well-known to taste absolutely vile, which discourages most casual high-seekers. Eventually, though, teenagers chugging the syrup and tripping in school caused companies to mark cough medications in the US, and American grocery stores to card youngsters for cough medicine the same way as they would for cigarettes or alcohol; elsewhere, however, sales of DXM are usually completely unrestricted.
* Dex whenever he attempts to feign empathy with some sort of variation of "It's hard, it's really hard".
* Dexys Midnight Runners includes the lyric "...and you'll hum this tune forever".
* Dexys Midnight Runners insisted that Kevin Archer (the group's first guitarist) start going by his nickname "Al" Archer. Apparently, he even said, "There's only room for one Kevin in this band."
* Deyja, the Kingdom of the Necromancers on Antagarich at first appears to be a
* "De-Zanitized": As the Warner siblings go down the water tower after their escape, Dot's pink skirt fills the screen.
* Dezel/Zaveid have artes that restore BG and increase focus or cure fatigue and increase speed.
* Dez frequently ends up granting these kinds of wishes, often due to characters accidentally uttering the word "wish" in a different context. But in "Strangely Perfect", Dez gets his wonky wishing magic switched with
* Dez overhears Ally telling Trish what she will say to her childhood crush from camp ("Elliot, you were the love of my life! I've always wanted to be your girlfriend!") and rushes to tell Austin, who has just developed romantic feelings for Ally. However, Dez is unaware that Ally actually meant to say that she
* D-Frag! brings us the girls of the Game Development Club (temp), who specialize in creating board games that change layouts or rules depending on their whim.
* D-Frag!, but wanted to prove she wasn't just too cheap to buy a new uniform when she outgrew her old one. She managed (to great applause), but later popped the zipper with enough force to knock Kenji out.
* D-Frag!. Not only does he look and sound exactly like a girl, but his female clubmember, Tsutsumi Inada, finds him extremely attractive when he crossdresses, often finding any excuse to get him to wear girlish outfits.
* D-Frag!, Roka pushes Takao and her breasts press against Kenji's face when he

turns around.
* D-Frag! syndrome). This normally results in large amounts of pain or embarrassment towards him.
* DFTBA Records, the latter of which made him (and his brother) famous and was probably responsible for the founding of DFTBA Records.
* DFW Metroplex are good examples) tend to feature news reports read by long-time KDFW-TV anchor Clarice Tinsley.
* DFZ: After Opal and her father have mostly reconciled, they have to dress up as part of a plan. Yong bluntly tells Opal exactly how the dress he got her covers up all her physical flaws. He doesn't understand why she could possibly be upset; doesn't she want to correct her flaws?
* DFZ) and she finally starts using magic for real, her father looks like he's just seen the dawn for the first time.
* DFZ. By the time of the series, she's in her twenties, and has accepted that she will always be a failure of a mage. She ends up with a shaman teaching her, who first chance she gets tears into Opal's father for expecting so much from a child and not noticing that her teachers were bashing her against a brick wall with no success.
* DFZ: Cleaners receive a key from the DFZ herself that will open any lock in the city so long as they have a right to be there. Normally that means buying the apartment for their jobs, but occasionally they will accidentally buy an apartment that isn't actually legal (such as if the resident paid their rent through a magical contract with the city, which doesn't show up on paperwork), and they won't be able to get in. They don't get a refund if that happens.
* DFZ dragon in Korea. He repeatedly tells his (human) daughter that if she were a dragon he'd have to constantly watch her for betrayal, but because she's human he can love her unconditionally. But again, he's just as greedy as the rest of the dragons, so he has trouble separating "unconditional love" from "treasure I must possess."
* DFZ interface directly with their user's magic in order to anticipate their needs, and the most magical places in the city have supernaturally good wi-fi.
* DFZ life, it's best if she spend it at his compound, where he can guarantee her complete safety and anything she could possibly desire. Toss in the fact that as a dragon he has difficulty making a distinction between "daughter that I love unconditionally" and "treasure that I must possess," and they spend most of their time yelling at each other.
* DFZ makes sure the Peacemaker's Consulate has clear skies, but other than that everything is fair game. You need a good GPS just to know where your destination is today, let alone how to get there.
* DFZ: Nik's high-end sports car. Some of his old friends are surprised that he let Opal ride in it at all.
* DFZ: Nik's vintage manual sports car, which runs on gasoline and has no onboard AI. Nik insists that it's purely practical (no AI means nothing to get hacked, high performance means he can catch or escape anything he wants), but he gets embarrassed when Opal asks if he named it.
* DFZ: Opal is a powerful mage, but despite years of very expensive schooling she just can't wrap her head around proper thaumaturgy. Her typical approach to magic is to grab a big chunk of it and throw it at the problem.
* DFZ: Opal's father refuses to let her go for no reason than because she belongs to him. Losing her would be an insult. She is also the only person he owns who doesn't love and adore him, which makes him angry.
* DFZ, she thinks that she's going to go down with her teeth in his throat.
* D-Generation X and forced him to kiss the ass of a fat guy called Big Dick Johnson.
* D-Generation X are getting a little under the table assistance from a couple of female party-goers, Triple H grabs a bottle of mustard and squeezes it, just to drive home what was happening.
* D-Generation X at the very least. They only even somewhat pass because most viewers don't remember the original DX, where there was very little heterosexuality

to be had, between Shawn kissing Hunter on national television numerous times and Hunter's infamous "bi" quote:
* D-Generation X, but, relative to size, she looked a lot more muscular than the lightly muscled Michaels. Just to drive the point home, she was also his bodyguard.
* D-Generation X covered up a flub with "Gimme a break, it's live TV.", and once acknowledging he hadn't anything funny to add to the DX mantra that week because coming up with new ones every week was hard.
* D-Generation X, multiple members of the group wore customized DX football jerseys. In their typically juvenile fashion, the jerseys said "Suck It" on the front and listed "69" as the number on the back.
* D-Generation X (of Shawn Michaels and Triple H) in 2006 up until Michaels' retirement at the beginning of the next decade.
* D-Generation X's later runs. Which they promptly lampshaded at every opportunity, shoving in every cheap plug they could find. At least they made it funny.
* D-Generation X, that was usually an invitation for HBK to “smoothly transition into a shameless plug”.
* D-Generation X was holding a paddle up for Vince to punch when Carlito came into Vince's office and started complaining about something trivial. Hilariously, Triple H held the paddle in front of Carlito's face and then yanked it away at the last second, causing Carlito to get punched out!
* D-Generation X) were showing a slide-show of pictures on the jumbo screen, a picture from Michaels' infamous spread in Playgirl popped up on the screen...
* D.Gray-Man a broadcast dub during the summer simulcast season, they also took the opportunity to finally finish the original series' dub.
* D.Gray-Man after she gained her Innocence and self-confidence for the first time in her life.
* D.Gray-Man Allen by threatening to tell Komui that he is alone in a locked room with Lenalee. Allen immediately apologizes and opens the door. And when someone was ogling Lenalee, Komui's co-workers gave us this wonderful quote:
* D.Gray-Man, Allen plays this with Tyki Mikk and his human friends, leaving them without their clothes. One volume of the manga also has a joke inner cover, where it's Tyki and Lavi Allen stripped to their underwear.
* D.Gray-Man and a clown who doesn't exactly have all his head can lead to this.
* D.Gray-Man, and goes nuts if there's even a hint of a guy being interested in her. In fact, a way to wake him up is to say, "Lenalee's getting married." In the novel, when Bak (who also has feelings for her) gives Komui a tea that makes one tell the truth, he has a breakdown when Bak asks, "Isn't Lenalee free to love who she wants?" He takes this to mean that Lenalee is in love with a guy and immediately pulls out a machine gun, saying, "Then I'll kill everyone and then die!"
* D.Gray-Man (anime) averts this with Komui telling Allen, "When I get done with you, you'll be good as new. Though I must warn you, this will be traumatic."
* D.Gray-Man. Apart from him, nothing is known about a few clues here and there.
* D.Gray-Man, a pink rabbit called Yoshi with his tongue poking out often appears in various places—sitting on Lavi's shoulder, being thrown through the air by Kanda, etc. Yoshi is the avatar for Katsura Hoshino. In one of the gag comics, she reveals she's given birth to a baby...kitten.
* D.Gray-Man. A random gangster who, according to his crony, "loves all beautiful things to a sick degree," decides that Kanda is the most beautiful person he has ever seen and declares, "I'm going to kidnap him and bring him back home!" Kanda promptly beats him to a pulp.
* D Grayman are an opulent family with good reputation in the upper-class society. However, Sheryl, his adopted daughter, his adopted son and his brother have either caused the death of, killed or driven insane countless people. His wife is not aware of their true nature though.
* D.Gray-Man are exorcists who fight akuma on a regular basis and have generally seen a lot of weird stuff, but they refuse to believe in ghosts or vampires.
* D.Gray-Man, as he vehemently denies having a girlfriend or liking anyone, and that he's too focused and busy with his work to do anything like that.

* D.Gray-Man - at least for a while, but by the time they can no longer retain their old forms they don't care.
* D.Gray-Man, but given her thoughts on how they handled the series, Hoshino unsurprisingly declined at first. Although she got involved as a supervisor, Hoshino later admitted on Instagram that she was disappointed with the changes made to her characters as well as a promotional poster depicting Allen and Kanda in suggestive poses resembling two people post-coitus.
* D.Gray-Man by Bookman when Allen is left for dead by Tyki Mikk with a hole in his heart. His body disappears so his friends have no idea what happened to him and are very understandably worried that he is dead. Bookman says that he believe him to be alive he has not fulfilled the prophecy made by Hevlaska yet.
* D.Gray-Man. By the end of the episode, he decides it must be a cold.
* D.Gray-Man can't get along with. Not that he cannot hit it back to Kanda by calling him by the first name.
* D.Gray-Man claims to have this mentality. The team of Exorcists sent to find him end up battling Tyki on the Ark. Cross is sneaking around behind the scenes, and is aware of the younger Exorcists fighting down below. He goes to save everyone. He claims he saved Allen because he needed him. Later, while the ark crumbles, Cross holds Lenalee close while trying to halt the download process of the Akuma Egg. Then later, while flirting with Lenalee, he goes on to say he'd have come to help everyone sooner if he'd known she was with them.
* D.Gray-Man collects Innocence and the people capable of using it to fight Akuma.
* D.Gray-Man does it too, except the characters often end up answering the questions. This can sometimes turn out ugly, such as the couple times Allen and Kanda got stuck together for the job...
* D.Gray-Man do this when they kill the person who called them back to life and take their form.
* D.Gray-Man ended in 2009, and a continuation started in 2016 - 7 years later. This was justified due to the constant hiatuses the manga author had due to her health.
* D.Gray-Man, episode "The Black Order Annihilation Incident", both Lenalee and Alan drop their trays full of coffee during their encounter with Komui's robot.
* D.Gray-Man. Even the official publishers don't know how to translate this guy's name!
* D.Gray-Man. Fanciness partially justified though, as the Exorcists intentionally make themselves targets.
* D.Gray-Man from November 2008 to March 2009 due to an injury, then while fans were enjoying the return, it started a whole new hiatus in April.
* D.Gray-Man Granted, it's only paper in the end, but I can't imagine it not also being trash since they are supposed to remember everything they've read. And just imagine the dust...
* D.Gray-Man had super deformed versions of the characters acting out little omake at the end of later episodes. The characters were done in the style of the "talk pages" in between the chapters of the manga in the tankoubon.
* D.Gray-Man half-heartedly became an Exorcist to pay for his daughter's treatment. When he betrays the Order to save his life and be able to see his family again, it doesn't end well for him.
* D.Gray-Man has a power which, when advanced to its ultimate form, sprouts a grotesque smiling maw stretching from beneath his rib cage to waist line.
* D.Gray-Man has Komui and Lenalee Lee. Komui's rather intense sister complex does nothing to disprove this.
* D.Gray-Man has Lavi glomping Allen. Road is also fond of doing this to Allen.
* D.Gray-Man has the Noah family, as the Noah memory seems to choose its apostles indiscriminately all over the globe. They have two women including a little girl, Western Europeans, a black man, an Indian man, Americans, an Egyptian man and an individual covered with a hood of unknown gender. On the other hand, the good guys are just as diverse.
* D.Gray-Man. He hates The Dark Order-an organization for which he was once loyal. At the story's start, he'd been in hiding and avoiding contact for 4 years, which

is capital punishment. Once he's back after a mission, he attempts to run off again, pushing Allen out of the way. However, what makes him stop is Lenalee. She hugs him around his waist, pleading for him not to leave. Cross seems to have an "Oh crap" expression on his face at first. He looks down at her, as she stares into his eyes-pleadingly. He then thinks to himself- "she's so cute, I can't refuse." Apparently, Lenalee can make him do things-which Allen theorizes is why Komui put her on Cross' team in the 1st place.
* D.Gray-Man. However, when he indirectly received an attack on his head he was stunned for the rest of the arc. Besides, he declares himself as "not a fighter".
* D.Gray-Man-ify the current strongest akuma, they can just introduce a new strongest type.
* D.Gray-Man. In fact, a way to wake him up is to say "Lenalee's getting married." In the novel, when Bak (who also has feelings for her) gives Komui a tea that makes one tell the truth he has a breakdown when Bak asks Komui "Isn't Lenalee free to love who she wants?" He takes this to mean that Lenalee is in love with a guy and immediately pulls out a machine gun saying "Then I'll kill everyone and then die!"
* D.Gray-Man. In fact, a way to wake him up is to say "Lenalee's getting married." In the novel, when Bak (who also has feelings for her) gives Komui a tea that makes one tell the truth he has a breakdown when Bak asks Komui "Isn't Lenalee free to love who she wants?" He takes this to mean that Lenalee is in love with someone and immediately pulls out a machine gun saying "Then I'll kill everyone and then die!"
* D.Gray-Man is filled with keepsakes from his lovers-pictures and accessories. Seems to show a sentimental side to Cross.
* D.Gray-Man. It is first invoked by a doctor in a local hospital where he encouraged his nurses to romance with the ill patients they are attending. Meanwhile, he secretly poisons the patient through their so-called medicine. When it's too late, the doctor prepares arrangements with the heartbroken nurses to revive the patients. That's where the Akuma spawns are as well as the hospital's fundings came from.
* D.Gray-Man, it only makes sense for him to ignore any obvious pursuers.
* D.Gray-Man, it's eventually revealed that Allen is actually the host for the Fourteenth Noah, which is how he can control the Ark. Unfortunately for him, he woke it up, and now the Fourteenth is trying to take over his body.
* D.Gray-Man,) it's only temporary, and once she deactivates her Innocence, any wounds that were healed (including ones suffered while it's activated) will come back all at once.
* D Grayman, Jasdevi's hunt for General Cross ends at one point with the General leaving his hat (and a bill for $20,000) on a chicken for them to find. They don't take it well.
* D.Gray-Man, Kanda fights another swordsman in a pool of water and gets slashed across the chest. The last shot of the episode is of his blood spreading through the water around him.
* D.Gray-Man kicks in when you realize he can't see Akuma without his formerly good eye. The scene cuts all around the room until he pulls the candle out, not allowing you to look at it.
* D.Gray-Man: Krory uses akuma blood to get stronger and get back on his feet. The more bottle he drinks, the stronger he gets however there is the risk that if he takes too much the innocence in his own blood won't be able to purify all the akuma blood and he will ended poisoned himself and die.
* D.Gray-Man Lavi does this to Allen adding insult to injury as Allen is having a traumatic dream about General Cross at the time. Lavi even doodles on the bandage over Allen's damaged eye.
* D.Gray-Man — humans and Akuma alike. If anyone is in danger while he's around, count on him to jump in and save them.
* D.Gray-Man—the body of a deceased woman with the power of an Exorcist. She only listens to Cross. Using magic, he can summon her coffin at will and release her. It is often theorized, by many in fanon, that she was possibly a lover of Cross' when she was alive, but nothing has been stated as of yet.
* D.Gray-Man, Miranda Lotto uses her powers to repair a damaged ship. Everyone

stares at her in amazement, but she immediately thinks she's messed up and tries to off herself by jumping into the ocean.
* D.Gray-Man." Needless to say, said characters do not usually appreciate this.
* D.Gray-Man often mentions in her interviews how her characters "refused to do this" or "decided to do that", even saying that she was surprised by their behaviours.
* D.Gray-Man or super-short shorts, supposedly to commend her fighting style, and Lavi prefers tighter pants than the rest of the male cast because he carries his weapon in a thigh holster.
* D.Gray-Man, or they embody Innocence and want to put it to use. Occasionally some members of the Black Order have other goals, but the first two are most common.
* D.Gray-Man's anime. Whenever they find a fragment of innocence, the Akuma have found it too and are after it. Cue epic battle! Often justified by showing that the bad guys were there first but were too inept to break through the barriers, solve the puzzle or resist the protective magic to the MacGuffin, and are just bashing away at those obstacles in the hope of getting through. Only the heroes have the resourcefulness to actually get through, so they always get it. Then the bad guys attack the heroes to try and get it, now that the barriers are gone.
* D.Gray-Man says Cross considers Allen to be his son, and he was never portrayed as badly in the manga.
* D.Gray-Man's baddies are called akuma, which normally gets translated into "demons". So yep, the series is pretty much this.
* D.Gray-Man, several times. Along with some of the AKUMA. Hell, the Earl probably counts as well.
* D.Gray-Man slang heavily in their dialogue, thanks to the authors' love of the decade.
* D.Gray-Man so he can tan and smokes before he gets dressed. She's also stated that Cross finds Allen cute, and considers Allen to be his child. She stated in an interview that Lvellie had siblings who were killed by experimentation, he's the last one left.
* D Grayman so much as he's perfectly okay with killing humans but still finds them fun.
* D.Gray-Man starts out a mix of comedy and drama with a healthy dash of horror thrown in. The comedy has been disappearing fast with only a few lighter hearted moments thrown in that are quickly squashed by the next horrible event.
* D Grayman's Winter Socalo was a death-row inmate. Upon discovering that he was an accommodator, the Black Order negotiated him being spared under the condition he becomes an exorcist. Now they trust him enough to make him a general and give him the insanely precious innocences.
* D.Gray-Man that allows him to see the souls inside akuma. Although this curse is useful because it lets him detect disguised akumas, it is also not a pleasant ability to have because of the horrible things that it shows him and he can't turn it off at will. The sight of an akuma being destroyed without the soul being freed causes his eye to bleed and the sight of a level 4 akuma's soul causes him to vomit.
* D.Gray-Man the akumas are specifically created by the earl to be this. They are actually supposed to be more weapons than characters. The level 1 and 3 play this completely straight but the level 2 have shown to be able to develop other interactions with humans though their killing urge will eventually come back. Level 4 are an exaggerated examples as they are sadistic bastards whose only defining trait is killing humans. Oh..and they also kill their own allies.
* D.Gray-Man, the holy war and the existence of akumas is kept secret from the general population. Only the Black Order supporters who acknowledged it by being directly confronted to it (relatives killed by akumas or who have joined the order) are aware of it as well as the gouverments that make sure the local authorities give free pass to everything to the exorcists.
* D.Gray-Man, the Inspector keeps a switch-blade sword hidden up his sleeve.
* D.Gray-Man, the Millennium Earl and Road Kamelot seem to have a theme like this going on.

* D.Gray-Man, The Millennium Earl promises good folk to reunite them with their loved ones by just yelling their name. The downside? They get turned into evil Akuma, and are forced to do the Earl's bidding, normally by stripping the skin off of their loved one who brought them back to wear, so that they blend in with humans.
* D.Gray-Man, the Noah family are only vulnerable to innocence, a mysterious material exorcists make weapons out of and tend to have powers that work on everything but Innocence. Then comes Apocryphos, a sentient humanoid innocence who seems (and states) to be tailored especially to hunt Noah.
* D.Gray-Man the romantic implications... but, well, it's a start, right?
* D Grayman. They can't go two sentences without Volleying Insults at each other. Most of the time it ends with Kanda calling Allen "Moyashi," and Allen calling Kanda some random insulting name. One example is in the Drama CD where the following conversation takes place:
* D.Gray-Man- they're required to have a greater than 100% synchronization rate to get the post.
* D.Gray-Man: Though not strictly a magician but rather a reality warper, Road Kanelot has displayed very few physical feats especially compared to her superhuman Noah brothers. Her most impressive one being probably saltoing from flying umbrella and landing back on it which is a pretty common feat compared to most fighters of the series. However this is hardly an issue since her physical body is not really hers and damaging it is completely useless meaning that in spite of having the most terrifying abilities she is also pretty much invulnerable.... Suoer-power lottery much?
* D.Gray-Man was mistaken for a girl by Lenalee the first time they met as children. Even now, main character Allen has been known to use "girly face" as an insult for Kanda. In chapter 210 there's a scene where a random guy in a bar hits on Kanda, thinking he's a girl.
* D.Gray-Man, was thought to be male until 2008 when a cute girl with short hair appeared at a Convention. People had previously voiced suspicions that this might be the case, but it was still a surprise.
* D.Gray-Man were longcoats (cross out Lavi and Lenalee, who wore a jacket and a miniskirt, respectively). The well-known black and white (silver-buttoned) longcoats were abandoned after the journey in Noah's Ark, and the Exorcists wore red and black jackets instead (save for Kanda, who just has to keep the longcoat outfit).
* D.Gray-Man, what with the whole place slowly disintegrating which would eventually lead to them dying.
* D.Gray-Man: When in the middle of one of their arguments and told to calm down, Kanda and even Allen tell Lavi and another guy "Shut the hell up!"
* D.Gray-Man, who was raised to learn how to cheat in most of the perilous situations forced upon him by his master's heavy debts.
* D.Gray-Man (with one slapping some sense into the other, and the other apologizing and thanking them), and they both have very similar goals and views. Also, love relationship-wise, they're both very not aggressive, and tend to be extremely shy.
* D.Gray-Man without the use of phlebotinum, namely Allen Walker (capable of holding his own against a level 3 akuma, a monster who would take several dozens of humans at once with his pure physical abilities), Howard Link (capable of smashing a level 3 into a wall with a kick) or Madarao (casually stopping a direct blow of a level 3 with one hand). The two latter's are former Crows, a unit of expertly trained enforcers and the former is an exorcist (they are shown to train very hardly).
* "DGTal Blood" by Helalyn Flowers. "Digital" pronounced with an Italian accent.
* DGUSA: "When I look at you, I just see myself in the mirror... Whole life's a struggle, isn't it? Keep fighting. Keep fighting, then what? Then what?"
* "Dhakkad Race" has Jalebi and the rest of the gang racing in the Dakkad Rally monster truck race.
* Dhalgren in the middle of a sentence as well, and grafting the two together

Ouroboros-fashion results in a sentence that makes sense grammatically. How much sense it makes in any other way is considerably more ambiguous.

* Dhampir and taking peasant hamlets for everything they can get, but them Magiere gets tired of it, buys a bar in a seaside town to retire to... and ends up at odds with the real vampires haunting the place (not to mention learning the hated whispers of her childhood had basis in fact).
* dhampir or dhampire, child of a vampire and a human. Dhampir are meant to be excellent vampire hunters, but have a nasty habit of becoming vampires themselves when they die in many of the stories. Most half-human half-vampire characters in fiction draw on the dhampir mythology to some degree.
* Dhampyr. After studying under the monks/disciples of Satori, he learned the "telepathic calming" technique, where he can telepathically calm feelings of anxiety and hostility in a person.
* Dhampyr and killed by a drop of blood from a dhamphyr (apparently because of its hybrid nature). Vice versa, also since Harlan is mainly human, he is able to suck blood from the Masters of the Night (the high vampires), reversing the use. By the way also the Masters of the Night, if willing, are able to suck blood from other Masters, albeit rarely; usually, they try to avoid a war between themselves, but they are very territorial.

* Dhar and Ajna are stuck together accidentally early on after he led an assault on her village, burned it down to the ground, and personally murdered her father in front of her. Correspondingly, his heart level starts at -25.

* Dharma & Greg, a bed'n'breakfast which promised a stately veranda, a breathtaking view of the sunset, and a whole host of other things, turned out to be a trailer behind a guy's house.
* Dharma & Greg begins with the two as children, walking with their mothers at the subway and seeing each other for the first time. Flash forward twenty years later and they pass each other again; Dharma concludes that she knows him from a past life and winds up following him to his office.
* Dharma & Greg, Dharma became convinced that she and Greg were about to have a baby after seeing a vision. They tried to have a baby for a long time, using various methods, but, in the end, it was Dharma's middle-aged mother who became pregnant. Dharma explained that her vision was correct, but that she just misplaced its womb.
* Dharma & Greg: Dharma climbs into Greg's grandmother's casket to get her ring.
* Dharma & Greg: Dharma is the most energetic flower child you can imagine.
* Dharma & Greg: Dharma's parents deliberately chose never to marry. They consider this a beautiful symbol of choosing to stay together again every day, but Dharma confesses towards the end of the show that she spent her entire childhood panicking that tomorrow would be the day they decided not to.
* Dharma & Greg: Dharma's ultra-hippy mother would bring a teenage Dharma and

her various boyfriends post-coitus snacks and drinks.
* Dharma & Greg, Dharma tells Jane that Greg named her breasts Lyle and Erik, "because they're a couple of killers".
* Dharma & Greg episode "How This Happened" begins with a swarm of police wrestling Larry into a cop car and Dharma saying "How did this HAPPEN?"
* Dharma & Greg features a scavenger-hunt like game created by Greg and several of his law school friends at Harvard, where the goal is possession of a statue of a Glory Schnauzer dog, which must be claimed by secretly replacing it with a bust of Eisenhower. Steps to reclaim it after losing possession involve photographing the holder with the Jamaican flag or putting butter on a windowsill and filling a bathroom with a flock of ducks.
* Dharma & Greg features Larry, Dharma's post-hippy memory trainwreck father, regaining his memory every time he smells Hai Karate.
* Dharma & Greg, getting married in Vegas. Naturally Greg's conservative parents are shocked, and the two wind up having a more traditional ceremony a few episodes later.
* Dharma & Greg, Greg at one point got his own practice and swore he wouldn't be an ambulance chaser. However, business was very slow and he started to get depressed. Then one night, he heard an ambulance park right outside his building. After pausing to consider, he made his decision:
* Dharma & Greg had this in prequel form: the titular couple flash back to the days before their first meeting. The audience knows exactly when they'll meet again (on the subway in the first episode) but several times they almost, but not quite, run into each other.
* Dharma & Greg has Greg running for office. Dharma readily agrees, but he seems reluctant, after a while, Dharma says "Wait...you had a big 'convince Dharma' speech planned, didn't you?"
* Dharma & Greg. He was always addressed on screen by his full name, "Ed Begley, Jr.", not Ed or Mr Begley.
* Dharma & Greg in that, though Dharma's parents live the hippy lifestyle, they aren't doing that badly for themselves financially.
* Dharma & Greg often feels like this, although it's only between a dedicated hippie and a conservative lawyer.
* Dharma & Greg opened on a subway with both characters with their parents just happening to be there at the same time, though they didn't actually meet.
* Dharma & Greg revolves around this trope. Dharma is a free-spirited, tolerant, and ditzy flower child. While Greg is an upright, conservative, somewhat uptight lawyer. Despite the fact that they have virtually nothing in common they got married on their first date.
* Dharma & Greg she's actually the grounded and sane one in her family and circle of friends.
* Dharma & Greg. The girl cuffs him and walks out, then Penn comes in. A pause, then Edward says, "Oh, I sure hope you're here to rob me."
* Dharma & Greg. They know that they're Protestant, but they're not sure which denomination. Edward thinks they're Lutheran. Kitty reminds him that they're Episcopalian.
* Dharma & Greg, things aren't going very well for them. (Although, given the number of D&G plots revolving around the couple role-playing in public for fun, this should be taken with a grain of salt.)
* Dharma & Greg toyed with this. In one episode, we learn that they have an agreement not to "pollute the marriage bed" with arguments, so if one of them has a grievance, both have to stand up out of the bed while they talk about it.
* Dharma & Greg which shows Dharma standing on a coffee table, and Greg telling her, "Dharma, come down from there. Wow, I can't get over what a free spirit you are."
* Dharma & Greg, while Dharma is recovering from physical therapy, they go ask their doctor if they can still have sex.

* Diablero, Lupe extracts demons' tears and sells them as a drug. Unfortunately, if you take enough of it your bones become very tasty to a terrifying type of demon called an ahuizotl.
* Diablo 2 ones, so the weapon with the highest possible damage was actually blue, but then the best weapons are unique or runeworded anyway.
* Diablo2, the genre was even referred to as "Diablo clones" before its popularity and evolution ended up giving us the more neutral name.
* Diablo 2 which are filled with giant insects, poisonous river creatures, savage pigmy demons, and murderous human cultists. Subverted in that it was once a place of great good that was corrupted by Mephisto.
* Diablo 2 you are off to the desert where amongst other things, you fight through a valley with several large tombs only one of which contains the boss. In Titan Quest, you are off to the deserts of Egypt where at one point you find yourself in a valley with several tombs only one of which contains the boss.
* Diablo 2 you go to a world of mainly forests. One quest has you searching for a jade idol. In Titan Quest, you go to China and mostly fight through forests (and heavily forested mountains). One quest involves finding a jade idol.
* Diablo 3" as one of the randomly-chosen Act V bounties can bring a shit-eating grin to the face of a player who's had a rough day.
* Diablo 3 post. Wound up gaining popularity until the community manager Bashiok actually labeled a part of his desk "Cool Shelf".
* Diablo 3: There is a set of three unique skeletons named "Moek", "Larel", and "Karel" that spawn during one particular quest. There is an achievement for killing all three brothers in one blow called "Nyuck, Nyuck, Nyuck".

* Diablo 3, where the pieces of archangel Tyreal's broken sword fall to Earth as meteorites after he is cast out of the High Heavens. This makes it technically made from meteoric iron when it is reforged again, although there's no suggestion that this gives it any additional powers.
* Diablo 3, you can visit the ruined city of Sescheron and find it haunted by numerous ghosts. A scholar explains that the barbarians believe that they can only find true peace if their bodies are laid to rest on the slope of the sacred Mount Arreat, and unfortunately, with Arreat having been destroyed at the end of the previous game, they have nowhere to bury their dead and their souls have nowhere else to go.
* Diablo. Although spells could be learned by anyone with sufficient magic stat points, Warriors and Rogues often found themselves limited in learning capability without high magic-boosting equipment. A few of the game's most useful and powerful bread-and-butter spells often hit the required magic stat requirements way before maximum spell level, forcing non-sorcerers to rely on Enchanted Shrines that are difficult to come by. Additionally, spell damage were also frequently dependent on actual magic stat values. In a game that pretty much taught you to either kill overwhelming odds before they touched you or handle them one at a time (which required you to rely heavily on environment), spell-casting, and consequently the character with inherently superior spell-casting qualities, becomes the staple of endgame strategy.
* Diablo (and clones) all of the items with more obscure ancient names are for some reason better.
* Diablo), and the "Barbarian" (non-magical weapons and armor only — no magic, no spells, no potions, no fear).
* Diablo and their lieutenants. At least, this is how it was, until the creation of Sanctuary threw a wrench in the Eternal Conflict, leaving the angels to mostly mope about the Heavens in trepidation.
* Diablo, angels are expressly forbidden from directly aiding mankind. The archangel Tyrael tries to give advice, but that's about all he can do aside from taking your cash to resurrect your minions (technically falling under indirect help).
* Diablo are separated into five aspects: Valor, Wisdom, Fate, Hope, and Justice. Angels of Valor serve as elite soldiers, Wisdom guides and counsels others. Fate records what has and will happen. Hope consoles and heals, and Justice enforces the law. Heaven is ruled by the Angiris council, made up of the five Arch Angels who lead each caste, and vote democratically on all issues.
* Diablo Battle Chest came with a similar set of goodies, including Diablo I.
* Diablo between the High Heavens and the Burning Hells. They started getting cosy with each other, and the ancestors of humanity were literally born as a result.
* Diablo bosses with the Fire Enchanted modifier will explode violently upon death.
* Diablo bring in the other six Great Evils for some scheming of their own, but Diablo's still the one to take center stage by the end.
* Diablo, chose to go rogue, and directly confront the Prime Evils. They later discovered that the church they served was corrupt, and had to face several enemies that were themselves examples of this trope.
* Diablo, clicking the town's cow would cause it to moo. Clicking it repeatedly would make your character start commenting on it. "Yup, that's a cow all right..."
* Diablo Cody. But one thing everyone remembers about her is that she used to work as a stripper.
* Diablo Cody delivering a long eulogy only for the deceased to come out of her coffin and question Diablo's presence and whether or not her mom even read the suicide note.
* Diablo Cody, he said, "I . . . envy the tattoo artist who had that huge canvas of arm fat to work with."
* Diablo continued the trend, although also expanding it to other environments as well.
* Diablo doesn't have many traps of the classic variety, but a common baffling feature of dungeons is skeletons inside barrels. Who put the skeleton in there, why

it has not the skeleton broken out, and why, if the skeleton put himself in there so he could ambush you, does he always wait to show himself until you've broken open the barrel and the skeleton is directly in the path of your weapon, are all unanswered.
* Diablo does this pretty unabashedly. For example, the Monk's design is a strange mishmash of Russia and China, with some trace elements of India for flavor.
* Diablo drain both mana and hit points when cast. Their spell icons are red to signify this.
* Diablo expansion), she will tell you that the world constantly plays out the same events over and over.
* Diablo fanfiction often focuses on the mysterious order known as the Rouge Archers.
* Diablo features an actual Zombie Apocalypse caused by the Skeleton King of New Tristram after a mysterious meteor crashed into Tristram's cathedral. Whereas in the previous games the zombies were mere mooks that you would meet and kill, this game features them much like a classic example, with them attacking villages and able to turn people they bite into zombies.
* Diablo Franchise has many Magic and Unique items which enable the use of abilities you haven't invested skill points into, or even abilities from a different class. However, take off that piece of gear or store that charm in your chest, and you can kiss that ability goodbye.
* Diablo franchise have some form of resistance to control effects such as freeze or stun; even if not totally immune they almost always have significantly reduced duration.
* Diablo game has a black sorcerer and two white warrior types as player characters.
* Diablo games are gritty in the extreme, depicting a world invaded by demons who decorate with blood, limbs, impaled corpses and tortured souls.
* Diablo games don't have both a first and last name. Deckard Cain, Zoltun Kulle, and Haedrig Eamon are some of the few exceptions.
* Diablo game, this was played to the extreme by Beyond Naked Mages. Players looking for extra challenge not only would ignore beneficial items, but would actively seek out cursed and damaged items which lowered the player's stats.
* Diablo gradually looks more and more evil, until in a final cutscene morphing fully into a Diablo form.
* Diablo had a unique view of where zombies come from. From the manual: "Zombies are formed from the corpses of men executed for the most depraved and degenerate crimes against the innocent. They are driven by both the hatred that consumed them in life and the undead hunger for mortal flesh." Though this was the only game in the series where this gets mentioned.
* Diablo has been released that angels start making an appearance and the war itself becomes relevant.
* Diablo has Malthael, the archangel of death. He's an extremely powerful, black-robed angel who dual wields two hand-sized scythes and eats souls. Not to mention that he leads an entire army of soul-eating angels called "The Reapers".
* Diablo has this in spades. Lets you go to hell with horrors at the other end.
* Diablo have this. Even if their bodies are completely destroyed, they will eventually return.
* Diablo himself goes from Normal (red) to Nightmare (yellow) to Hell (black).
* Diablo himself on higher difficulties: he's not easy, but the Super Uniques you fight in the Chaos Sanctuary are much harder. It doesn't help that you can heal up near the seals, since he will never go near them, and ranged characters can even snipe at him while out of range from his attacks.
* Diablo II, Act II, the desert around Lut Gholein has the Stony Tomb and the Halls of the Dead. In the last section of the act, you reach the Valley of the Magi, which is lined with tombs.
* Diablo II also introduced one-handed axes that the Barbarian can use with a shield or in each hand, while the first game only had two-handed axes. Axes have more consistent damage output, with higher minimum but lower maximum damage than

swords and maces.
* Diablo II, a monster created by Blizzard's Battle.net staff at the Arreat Summit as an April Fools joke, with stats and some official-sounding lore to back it up. Many Hardcore characters have lost their lives trying to find the elusive beast.
* Diablo II), and if the scrolls take up too much room in your inventory you can store up to twenty of them in a book
* Diablo II Anu, with her heads each turning into one of the Great Evils, meaning they'd all have to be the same age.
* Diablo II, any monster with the 'Fire Enchanted' trait promptly cover a decent amount of the ground with themselves upon death. This gets especially silly with the boss of the Flayer Dungeon, as you have to defeat him twice and has Fire Enchanted in both forms. Necromancers can do this to nearly any dead enemy with Raise Skeleton (Mage) or Corpse Explosion, as well.
* Diablo II are small compared to some of the entries on this page... but are still weird mosquito-things as big as a large man.
* Diablo II, at least on Normal difficulty. He also has fantastic range (well over your character's sight range), meaning new players often die to him before they even see him.
* Diablo II, Baal hears out a messenger who defiantly tells him that the city of Sesscheron will not allow him to reach Mount Arreat and the Worldstone. Baal quickly loses patience and shuts up the messenger by shouting "ENOUGH!" loudly enough that the messenger covers his ears in pain, with the echoes in the mountains persisting for some time.
* Diablo II Baal not to attack the city of Sescheron. Baal congenially plays along with the parlay... briefly.
* Diablo II: Blizzard warns you, they will not recover your Hardcore Character if it dies.
* Diablo II can summon fighting golems made of clay, metal, blood, or fire. Clay Golems slow opponents and have HP, Metal Golems take on the properties of what they're created from, Blood Golems can steal life to heal itself and the Necromancer (prior to a certain patch, this link functioned both ways, harming the Necromancer when the golem is hit), and Fire Golems are immune to fire and grow stronger when hit by fire attacks as well as having a damaging fire aura.
* Diablo II continues this — Act 1 of the game has sections separated by short stone walls and some trees and weeds between. Maybe there's poison ivy, and who wants to battle evil when they're itchy?
* Diablo II does more damage than a regular attack at the cost of suffering 8% of the damage dealt.
* Diablo II, dubbed "The Countess", is described as having "bathed in the rejuvenating blood of a hundred virgins" in the tome that initiates her quest.
* Diablo II enemies in Lord of Destruction are Baal's personal harem. Given that you'll fight a few hundred over the course of Act V, Baal is clearly a pimp.
* Diablo II expansion Baal can summon a trio of tentacles to harass the player during the final battle.
* Diablo II features mummies. The lore says that unlike zombies with their rotten flesh, mummies conserve their muscles and tissues intact which makes them physically stronger than other types of undead. Mummies can be produced in infinite numbers from sarcophagi and "die" in a burst of poisonous gases (from the chemicals used to preserve their ancient bodies escaping, of course), and greater mummies, the remains of Horadric mages who, to honor them, had animal parts grafted onto their bodies in death. They could raise other kinds of undead (but not each other) and threw black "Unholy Bolts".
* Diablo II gain access to the Whirlwind attack. The in-game description of "Whirling dance of death" is sufficient enough to describe what that move is and does.
* Diablo II got rid of Stone Curse but introduced crushing blows and other effects that worked off a percentage of the target monster's health pool, rather than a fixed amount of damage. These obviously had to be nerfed when dealing with bosses. Diablo II also added the ability to freeze enemies, and although freezing attacks

could stop normal monsters dead in their tracks like Stone Curse did, it would only slow down bosses.
* Diablo II had a special proficiency for necromancers to craft bone armor that only they could use.
* Diablo II has Act 4. Whilst having the final chapter in the pits of Hell is pretty cool, there are far fewer areas in Hell than in any other chapter, only a handful of NPCs in the 'town' of the Pandemonium Fortress(Tyrael, Cain, and the equipment and potion merchants, the latter of whom doubles as the healer), and only three quests, two of which are needed to win the game anyway. Your blacksmith and healer in that town have noticeably been given fewer lines to say and have no discernible personality. "Hail to you, champion" will be stuck in your head after a while.
* Diablo II has Marius drop his pipe after seeing the Dark Wanderer burn down the inn while demons murder everybody else inside.
* Diablo II has some in its later updates. Versions 1.00-1.09 had the Cow King as a sort of Bonus Boss, though he was substantially weaker than the actual final bosses. Version 1.10 introduced Uber Diablo as a new Bonus Boss, and 1.11 introduced the Pandemonium Quest, which involves looking for keys and battling buffed-up "Uber" versions of bosses (Uber Izual, Uber Duriel, and an important lore character Lilith, who is an "Uber" version of boss Andariel). The result of the quest is players entering the Uber Tristram, where they must fight an epic battle against Uber Baal, Uber Mephisto, and Pandemonium Diablo, the super versions of the three prime evils, who attack all at once!
* Diablo II has the Caverns of Araneae, which as the name might suggest are utterly infested with giant spiders. They were bred by Archbishop Lazarus and let loose into some ancient ruins to protect the borders of Khanduras (and because Lazarus is kind of a dick). Giant spiders also show up in Arreat Crater/Hell, as the special minions of Azmodan and Cydaea.
* Diablo II has you battling the forces of Hell which are pounding on the gates of Harrogath and pursuing Baal as he seeks the Worldstone.
* Diablo II has you going through the Rogue Monastery, which has been taken over by the evil forces of Andariel, the Maiden of Anguish. Those Rogues who didn't become demons can be seen dead on various torture devices throughout the monastery, and judging by the state of their bodies, what happened to them was not pleasant.
* Diablo II hours you have the best and most optimal item setup for your character, with which you can... grind for items even faster.
* Diablo III, a Caldeum scholar who traveled across Sanctuary, making notes and descriptions of the things he saw, which prove beneficial to other travelers following after him.
* Diablo III Act III takes place in Bastion's Keep which was equipped with a large number of catapults and siege towers. Three catapults need to be levered into position to fire on the attacking demons while siege towers are only used as makeshift bridges within the Keep.
* Diablo III actually discourages this. At the maximum level, all classes have the same stats and abilities. The only thing differentiating two level 60 characters of the same class is their equipment and actively selected abilities. The only incentive to making another character of the same class is for achievements.
* Diablo III, almost all demons are associated and in service to one of the 7 Evils or their Sin Lords. The only exceptions are the Mallet Lords. These are monstrous 4-armed greater demons that are too powerful to control and wander as they please, they will work with other demons but only because they wish to at the time. The Siege Breaker demons are also this too a lesser extent. With only a handful in existence, these powerful demons can be controlled by the Sin Lords and above but only with constant, enormous effort so they can only handle one at a time and never for too long.
* Diablo III also has succubi, which start appearing as you go through Arreat Crater in Act III. They are stated to be the daughters of Cydaea, Azmodan's consort and one of his Sin Lieutenants, the Maiden of Lust. Act IV features the Vile Temptresses and Hell Witches, which act in all ways like the succubi.

* Diablo III among them lost a sister to demon-induced madness after the two of them survived the destruction of their village.
* Diablo III and Tyrael was forced to destroy it, the power of the Nephalem began to reappear.
* Diablo III, an old soldier and his wife reminisce about the time she was kidnapped by barbarians, and the soldier describes how he was beside himself until they brought her back with an apology. His wife comments that their leader still sends her a bundle of hides every year.
* Diablo III. Apart from the unusually aggressive fauna (Boggits, Bogans, giant shrieker bats and the occasional Maggot Brood), there's also the pools themselves, which are quite poisonous and can kill a traveler quite easily.
* Diablo III are undead abominations composed of the bodies of humans thrown into mass graves without a proper burial which decomposed together into one hideous being bound by foul magic.
* Diablo III are "You dare to bring the warmth of life into my tomb?!"
* Diablo III as a boss who is fought and defeated in Act II, only to return post-game as the overseer of Kanai's Cube. How did he return from the dead?
* Diablo III, as evidenced both in the Halls of Agony and in Alcarnus.
* Diablo III Azmodan's giant head (actual size) periodically appears in a ball of flame to taunt the player, usually after they've achieved some mighty deed that's crippling to his campaign. His invective becomes increasingly pathetic as the player mows through his elitest forces.
* Diablo III before the demons proper take over the role for the rest of the game.
* Diablo III continues this, plus coffins that pop up out of the ground in a field for no apparent reason and open to release a skeleton.
* Diablo III: Do NOT stand in Ghom's gas attack. Because other than the fact that it deals significant amounts of damage per second? "Ew".
* Diablo III from the second game in the series, albeit 20 years older and sporting a gray beard.
* Diablo II if there's a lot of things hitting you at once.) Thus, the pack of normally-laughable fiends who avert this trope tend to be more dangerous than the miniboss itself.
* Diablo III gave in to fan's demand that corpses stop fading away, just so they could see the aftermath.
* Diablo III has a scene where your character must go in a room like this with a blacksmith in order to assist him in disposing of the infected, including his own wife. Justified as it was where the town was housing the bite victims from earlier zombie attacks who hadn't turned yet.
* Diablo III has a white Barbarian, a black Witch Doctor, and an Asian Wizard.
* Diablo III has a wrecked ship called 'The Black Rock' that can be found in the deserts around Caldeum.
* Diablo III, has several quotes along these lines when you bring down a champion pack or rare monster.
* Diablo III has the Demon Hunter class, which, while mostly focused on archery and shadow magic skills, also has several abilities that give them an Engineer vibe. For instance, they can drop an automatic sentry ballista, hurl grenades of various kinds, and set complex traps to slow and damage foes. One of their passive abilities, which improves their Sentry and traps, is even called "Custom Engineering."
* Diablo III has the Infernal Machine update, which introduces four unique bosses, the key keepers, in each act. After obtaining all the keys, the player could craft the Infernal Machine, which allows battling two super-versions of game's bosses at once, for great rewards. There are four such battles: Maghda and the Skeleton King, Ghom and Rakanoth, Zoltun Kulle and the Siege Breaker Assault Beast, and Uber Diablo who can clone himself and summon two of the other ubers. There is a special reward for winning all four battles and collecting special rare items from them.
* Diablo III has Tormented Stingers, which look and sting like scorpions but are actually tortured human sacrifices with their body sliced open to form the legs and its legs mutilated to make the tail.

* Diablo III has you defending Bastion's Keep near the crater of Mount Arreat against a full-on demonic onslaught by the forces of Azmodan.
* Diablo III has you revisiting the old ruins of the Tristram Cathedral, which includes its share of tombs, including the Crypt of the Skeleton King where you throw down with the resurrected title monster who is barring the path to the Fallen Star that takes up the first part of the game proper.
* Diablo III, if you have any +% Magic Find gear from the 1.X days, better hold onto it!
* Diablo III in comparison to some of his colleagues, there might be some truth to that statement.
* Diablo III is commissioned, but he's definitely got the attitude, toughness, and intestinal fortitude to qualify as a Sergeant Rock. An example:
* Diablo III is the Monk. The male is bald with two circle tattoos on his forehead. Case in point: the trailer shows him walking into a town overrun by cultists with the door closing behind him, only for him to be seen fresh as daisies a few seconds later. You figure how well that worked out.
* Diablo III Lyndon the Scoundrel and his brother Edlin both fell in love with a woman named Rea. Rea eventually chose Edlin, who was himself unaware of Lyndon's love for her. The relationship was further complicated when Edlin botched his the scam he was running with Lyndon and ended up in jail, after which Rea became convinced Lyndon had set it up to get her.
* Diablo III. Many demons in the original series feel the same way regarding humans in general.
* Diablo III moments as they could. The result was that over time, the game became criticized for not really knowing who it wants to be for: newer fans might not want to play the third game that tries to make references so often, while long time fans wanted something closer to the previous games with a focus on horror and didn’t like how the game seemed like it was trying to be like Blizzard’s other titles instead of itself. As a result, despite being critically well received at launch, in the years that followed, it is often debated how good it is due to the unclear target audience.
* Diablo III mystic Artisan, from the enormous web she's caught in moments before the Spider Queen arrives to suck her guts out.
* Diablo II inherently corruptive — they're devoted not to death, but to the cycle of life and death, and they oppose Hell because the demons have been trying to break the cycle.)
* Diablo III of the Nephalem, and then re-enact it against undead enemies.
* Diablo III on the Battle.net forums started a rumor that if you click on it a certain number of times, it unlocks the playable version of the gameplay demo seen at release. The matter was laid to rest when someone looked in the source code of the site, decompiled the flash that operated the chat gem, and determined that its only purpose is to change colors, changing the gem from "on" to "off".
* Diablo III plays with this trope. Spells no longer gain power as they level up, each ability gets specific runes that change the spell, and builds can be changed at any time. That said, the wizards still deal more DPS than the melee classes on average, with the Wizard doing more direct DPS and the Witch Doctor using summons and status effects. It's nowhere near as bad as the other entries in the franchise, but it's still there.
* Diablo III, powerful attacks can do this to a target, especially if they have a "wind" or "force" motif like the Wizard's Wave of Force spell or the Monk's Deadly Reach technique. The "Opressor" demon also has this as its normal death animation.
* Diablo III: Reaper of Souls for having demon blood, anyone who knows what he's about can see through this scam quite easily.
* Diablo III: Reaper of Souls has started using blood magic, creating blood golems and maddening the boggits, bogans and other monsters of the marsh to try to slow you down.
* Diablo III's Covetous Shen remarks on how he has so much in common with Cain, mentioning how the both of them had quite interesting experiences with the Zakarum priestesses in their youths.

* Diablo III's Demon Hunter can do this to demons with the Bola Shot ability. It was also apparently a common method of execution in Khanduras during the Darkening of Tristram, as evidenced in the Halls of Agony where you come across the decapitated ghost of Queen Asylla, who was executed by guillotine on orders from the maddened King Leoric.
* Diablo II is described this way in a number of places. Most fitting is the natural resistance skill, which helps the barbarian resist several types of magic damage, and is said to come simply from surviving tough environments.
* Diablo III's Hell finale. Heaven however has no town so you're forced to return to Bastion's Keep from the act beforehand... and the dialogue you hear throughout the Heaven act isn't exactly award winning.
* Diablo II is overpowered in the offensive spells department, and at the same time is frustratingly squishy.
* Diablo III starts with one of these. The star that falls upon Tristram at the beginning of the game is mentioned in the Prophecy of the End Days as a sign that the end has begun.
* Diablo III state that this is one of their primary recruiting methods.
* Diablo III's weirder moments, a random event in the Fields of Misery involves a farm besieged by Leapers. Once all the leapers have been killed, a man comes out of the farm cellar, telling you that he and his wife have been trapped down there by the leapers for hours and that his wife would love to thank you for rescuing them. He leads you into the cellar, and introduces you to his wife...a skeleton sitting in a rocking chair. He says that she's been unwell of late, but his love will see her through!
* Diablo III than the Witch Doctor. The former deals a large amount of direct damage, while the Witch Doctor relies on summoned pets, indirect damage and status effects.
* Diablo III that the undead are not from a single corpse. Instead, they essentially turn a corpse into bone powder and reconfigure it into a skeleton. When you raise any skeleton, it's really like you're raising a thousand tenths of a percent of a thousand different skeletons and sticking them together.
* Diablo III, the archangels Tyrael and Imperius come to blows over Tyrael's involvement with the mortal realm, leading Tyrael to renounce his angelic position.
* Diablo III, the Black Soulstone is Zoltan Kulle's most ambitious work; it's an artificial Soulstone (when normally they're supposed to be artifacts made by angels to contain the Prime Evils) put together with the souls of countless folks in order to attain great power for himself.
* Diablo III. The Crusaders had disappeared into the far eastern parts of the world and were initially thought lost for good, but their crusade — passed on from mentor to novice through the generations — eventually led them back into the western world.
* Diablo III: The Demon Hunter's Sentries are built for this; use up your Hatred resource to summon all your magically-automated crossbow turrets in one spot, then lure your enemies by Vaulting with your Discipline resource back and forth into your turret nest.
* Diablo III". The only instance when he shows anything resembling advanced tactics is when he attempts a sneak attack on a keep by burrowing his forces through the foundations... which he then screws up by sending the hero a telepathic message, gloating about his impending victory.
* Diablo IIIThe only way to make Primal Ancient items start dropping is to beat Greater Rift Level 70, which is even harder than the game's highest difficulty of Torment XIII. While you can keep going into even higher Greater Rifts, you can't fight bosses on anything higher than Torment XIII. So you'd have to beat something even harder than the game can normally throw at you to get the best possible loot.
* Diablo III There's no hints of getting rewarded, buy hey, at least the leaders of hell are gone.
* Diablo III, the Scoundrel has a personality that can easily apply these.
* Diablo III. They are composed of people who have survived devastating demon attacks and dedicated their lives to eradicating them wherever they are found.

* Diablo III to seal away the Prime Evil and combat other growing supernatural threats in Sanctuary.
* Diablo III were the old torture chambers of King Leoric, back when he was still alive and going mad. In addition to having many people (up to and including his own queen) executed out of paranoia brought on by Diablo's attempts to take over his mind and the evil whisperings of Archbishop Lazarus, he had quite a lot of people put to the torture. The Darkening was not a fun time to live through.
* Diablo III, where minions are virtually immune to damage from area of effect spells (to make up for their inability to avoid them), which are much more prevalent than in previous games. Since bosses tend to make heavy use of such skills, minions effectively have immunity to bosses (which of course doesn't help if the player dies anyway).
* Diablo III, where you make two trips — one to rescue Deckard Cain, and the other to destroy the Skeleton King and get to the bottom of the star that fell upon the cathedral.
* Diablo III, which causes four fat zombies to crawl out of the ground, climb onto each others shoulders to make a tower, and then throw themselves forward to crash into the hordes of enemies, dealing a huge amount of damage.
* Diablo III, which Demon Hunters get if they can see into a demon's soul without going mad.
* Diablo III who hails from the setting's equivalent of Russia and is a holy warrior in the vein of western examples while their religion is reminiscient of some combination of Buddhism and Hinduism (with its a large number of deities and belief in reincarnation) wearing clothing with inspiration from the former.
* Diablo III, who tried his best to save lives when the Darkening was going down, but was accused of being this by the people, resulting in his death when King Leoric fell.
* Diablo III, who was placed in a 1,500 year long slumber so that she can help the hero fight the forces of Hell.
* Diablo III will repeat this trope and simply "pick one" as with the first game, or follow a different path.
* Diablo II makes it clear that there are many Paladins of Zakarum that remain with the church and have become far more in-name-only individuals.
* Diablo II multiplayer, the wilderness areas outside of towns change shape everytime one plays.
* Diablo II." Nihlithak is a lot nastier. "After so many have died, who are you to think you can accomplish what our warriors could not?" And, "Ending the siege [will] not earn immediate respect, outsider. Respect only comes with sacrifice — something I'm sure you know nothing of." The worst from Nihlithak? "What are you still doing here? I thought you were going off to die. Go...Be quick about it."
* Diablo II, no less — just to save the rest of the world. There is some good news though! Now that the Worldstone is gone, all humans will apparently now become super strong half angel, half demons like they originally were.
* Diablo II of the original character classes were involved in defeating Diablo the second time.
* Diablo II: One of the main villains is Baal, who took over the mummified body of mage Tal Rasha.
* Diablo II puts a teleporter in the last room, which will take you back to the entrance.
* Diablo II's Assassin can also specialize in creating traps and sentries to destroy her opposition.
* Diablo II spell, though you'd be hard pressed to find any players who can even name it.)
* Diablo II the Assassin can summon a shadowy clone to fight on her side.
* Diablo II: The Assassin's gadgets such as the lightning trap, flame trap and blade barrier would fall under this. As a coven of mage hunters, the assassins avoid making use of spells. However, as a former mage clan, they've instead dedicated themselves to developing psychic powers and engineering weapons and tools

based on their old magics.
* Diablo II, the Dark Wanderer assumes Diablo's true form in the cinematic between Acts 3 and 4, and Marius describes the transformation as "not meant for mortal eyes": Lumps move under his skin, horns sprout from his brow, and his face stretches and twists as he howls in pain. Thankfully, he collapses and the rest of the transformation occurs hidden under his cloak.
* Diablo II, the Monk takes over here with the Demon Hunter following behind.
* Diablo II: The necromancer is all over this. Aside from insta-summonable earth, blood and fire golems, he can also make metal golems out of any equipment, which then takes on the enchantments and traits of their raw materials.
* Diablo II, the seer of Harrogath, the home base for the expansion back, has her hair turn white, goes shrieking mad, and dies when she sees what's coming.
* Diablo II the unnamed protagonist is met with failure at every turn due to arriving ever so slightly too late to have stopped the villain from doing what they were trying to do.
* Diablo II. They're staying in the camp because they had been evicted from their monastery after Diablo's minions took over and mind-controlled half their numbers, whom you fight throughout Act I, and who are also all female.
* Diablo II to keep them dead. However, with the third installment of the series forthcoming, it remains to be seen whether it worked.
* Diablo II type with a haughty intellectual personality) and the Paladin (a decidedly non-squishy fighting priest type, complete with lots of analogies to real-world monotheistic religions). The Barbarian class is the only one that doesn't use magic of any kind, as his culture forbids it, and he is white.
* Diablo II when you die, you respawn in the nearest town with no equipped items or gold. To get your items back, you need to go back to where you were killed and recover your own corpse. This is often unfeasible, especially on higher difficulties, because the enemies that killed you are still hanging around your corpse and now you have no weapons to defeat them or armor to survive them. Thankfully, you can restart your game and your corpse will appear in town with all the items intact and only the gold gone.
* Diablo II which are unique shields for necromancers. Necromancers also have a unicorn skull as their left pauldron.
* Diablo II, who used to be the Sorcerer from the first game before being driven mad by Diablo.
* Diablo II, with the Assassin's Dragon Flight, which teleports to a target and kicks it. The Paladin's Charge attack is close, allowing a means to dance from place to place at (nearly) untrackable speed, even leaving the trail of afterimages. There's also an armor which allows any class to use the Sorceresses' teleport, which while not technically a flash step, does end up looking quite the same in duels...
* Diablo Immortal" (that the crowd audibly jeers and laughs at); and even went to remove and re-upload the announcement trailer, which had garnered over 300,000 dislikes and had numerous comments vilifying the game. It didn't help, and video game news sites reporting on the backlash caused it to spread like wildfire.
* Diablo, is charged with destroying him. This hasn't stopped a few from claiming the entire series is meant to drive people into worshiping Satan.
* Diablo is to make the enemy forces stretch themselves thin by retreating. It can also be used to lure mooks away from a boss (handy if he can resurrect them), in a cheap but entirely legal exploitation of AI limits.
* Diablo, it looks like one giant cavern, with the player running around on rooftops.
* Diablo. It's got 16 levels, each more horrific than the last, and they eventually take you to Hell itself to face the title archdemon.
* Diablo: "meteoric" was a prefix which increased an attack's probability to hit, even more than "mithril".
* Diablo often results in him giving away his plans before he puts them into action.
* Diablo, once resurrected, has an extra mouth in each of its shoulders.

* Diablo placed upon them by their mad king Leoric, who Lachdanan himself was forced to slay.
* Diablo plays this one straight when Marius witnesses Diablo's transformation. He even says it "was not meant for mortal eyes."
* Diablo reveals that the Rogue was corrupted by Andarial and destroyed the monastery her people call home, the Sorceror went mad and retreated to a pocket dimension of his own making, and the Warrior (now identified canonically as Prince Aiden) wasn't strong enough to hold Diablo, and had handed the Lord of Terror a much stronger host than the 10-year-old boy he'd been inhabiting in the first game. When Diablo escaped the cathedral, he burned Tristram on his way out, slaughtering everyone who lived there, leaving Deckard Cain as the only survivor.
* Diablo series, as one can probably guess, primarily has the demons of the Burning Hells in this role, though undead are also a big threat early on.
* Diablo series is infamous for this, frequently featuring the same enemy 3-5 times by recoloring and renaming it.
* Diablo series regularly has its protagonists descending into the bowels of Hell to kick demon ass for its final acts.
* Diablo series turn out to have been created by the Vizjerei by magical corruption of captured umbaru tribesmen, and their previous lore as demonic lieutenants of Baal, the Lord of Destruction, turns out to have been nothing but Vizjerei propaganda meant to cover up their misdeeds.
* Diablo series was this to King Leoric of Khanduras. He was corrupted by Diablo long ago, and not only influenced him for the worse when the archdemon in question tried to take him over, but was responsible for many of the knights of Khanduras being killed in a war with Westmarch, the luring of many adventurers into the Tristram Cathedral to be murdered by the demonic Butcher, and the kidnapping of Prince Albrecht, Leoric's youngest son, to be a vessel for Diablo.
* Diablo, since the very choice of character(s) at the beginning determines who wins the game and therefore who drives the story in the end.
* Diablos' were full of this. Every single enemy in the games, apart from quest specific bosses, came in various levels of strength denoted by colour and had otherwise identical sprites as others of its type. It's mentioned in the first game manual that this is because the Prime Evils, the leaders of the demons, would alter their servants forms to better deal with whatever threat they were facing at the time.
* Diablo Swing Orchestra, including a Cello and operatic lead vocals. And then they'll often throw in other genres when they feel so inclined.
* Diablo Swing Orchestra is a frequent user of this trope, with several of their songs shifting genres several times over the course of the song. Even more generally, most of their songs fall into completely different genres.
* Diablo that worshiped the Prime Evils, Diablo, Mephisto and Baal, as gods, and deceived their believers by making out the Evils to be Spirits of Determination, Love and Creation, the exact opposites of what they actually were.
* Diablo. The expansion to the second game is about an attempt to graft Hell and the mortal world together, and there are portals to Hell where you can go and loot stuff.
* Diablo, the expansion to the sequel. Albeit, they're not particularly sexual creatures, rather color-coded, fireball-flinging, batwinged, naked women.
* Diablo: The hero of the first game was only really known in the one very small town. Of the second, much more widely known and thus deserving of the title Living Legend.
* Diablo, the main character, Darrick, looks for a sword, Stormfury, that will allow him to defeat the main villain of the book. When he finds it, the sword looks like a plain infantryman's weapon. When Darrick questions its lack of style, the sword's guardian points out that an impressive and awe-inspiring weapon would be more likely to be stolen, and the sword's abilities could not to be kept secret.
* Diablo, the Necromancer and Druid characters have a whole list of spells devoted to summoning multiple allies, who are always loyal and fight until killed. The Amazon and Assassin can summon a single powerful ally.

* Diablo, the "Phasing" spell teleports the user to a random location within a short radius. It's a cheaper version of the much more useful Teleport spell, and only really good for escaping being cornered by monsters. One of the random shrine effects does the same on a larger scale, sending you to a random point within the level, with the flavor text "Wherever you go, there you are."
* Diablo, there's a spell called Phasing that teleports you randomly to an area within view. There's also a shrine that does the same thing, with the appropriate flavor text: "Wherever you go, there you are."
* Diablo: The second game indicates that Deckard Cain was this in his youth. He says about Anya being like some Zakarum priestesses he had known. He also says that they did not have to take vows of chastity. Do the math.
* Diablo. They have a golden border around their portrait and are much tougher than their normal counterparts. How much more depends on the setting. Outdoor elites might be killed by a single character of the same level, although it's much more difficult, while dungeon monsters are designed to be a threat for a full group or even a raid (up to 40 players).
* Diablo they're assigned to. In practice, they're bug-eyed humanoid monsters that stay invisible until they're right next to you, which can be pretty scary.
* Diablo universe was Tathamet, the original Prime Evil, which was destroyed by Anu, the original god of the cosmos. The Burning Hells and the demons were spawned from Tathamet's remains, and the Seven Great Evils which would threaten creation were born from each of Tathamet's seven heads, while Anu's remains would form the Crystal Arch, from which the High Heavens and the angels sprung.
* Diablo video game series, the protagonists must fight the three Prime Evils: Diablo, Mephisto, and Baal. All are alternate names for Satan.
* Diablo, where particularly rare items were used as currency. Because gold could only be handled in stacks of up to 5,000, unique rings, elixirs and the like became a far more fungible currency for items priced at hundreds of thousands. (Of course, since the game was commonly hacked to death and back, there was very little real 'economy'.)
* Diabolical Dogcatcher: Aww, are you a cute wittle doggie-woggie? Hope you like the pound!
* Diabolical Mastermind. Although both were created artificially, they were from the same brood (and one of the earliest surviving, at that), so by Terran standards, they would have been brothers. To add to the fun, it's implied that Phaeton's villainy is an attempt to compensate for having betrayed Marsala during the First Neosapien War fifty years ago.
* Diabolical Mastermind, but that is not something limited to this series.)
* Diabolical Mastermind has undergone partial cyber-conversion by the Cybermen but retains his emotions and appears outwardly human.
* Diabolical Mastermind. In one hand, he leads a Mexican cartel, but on the other hand, he is also a supernatural evil, top dog of the vampire hierarchy and leader of the aptly named Nine Lords of Night. Hell, his name "malvado" means "evil" in Spanish, making him an almost literal example of a "Lord Evil".
* Diabolical Mastermind Minion Master, they face off in a 'Madder Scientist Than Thou', until he bribes Bun-bun to show he's Eviler.
* Diabolical Mastermind: no legal country, but kept immune from national/international law through minions and blackmail.
* Diabolical Masterminds Mongolian. He was also known by the not-very-subtle moniker of "L'ombre Jaune" or "The Yellow Shadow".
* diabolic pact to such customers, and a few are relatively safe so long as you don't start trouble.)
* Diabolik, and Ginko (the one cop who can actually hold Diabolik in check, and who has personally punched him out in more than one occasion).
* Diabolik and loot while he and his lover Eva live in the luxury homes built right on top of them.
* Diabolik are good for altering the face, and the eye color can be concealed by contacts, but they do nothing to alter the wearer's body build, thus preventing them from masking as smaller or excessively taller people. Also, there are ways to

recognize a mask anyway:
* Diabolik, as lowering compulsions and possible to resist. Diabolik himself was once dosed with it and his interrogators got only a glare, and a man he kidnapped for information for a theft was revealed being an undercover cop who managed to lie without getting caught.
* Diabolik, because spare Jaguars don't come cheap (especially because it's out of production);
* Diabolik butler is always innocent, but Diabolik tend to take his place (or the place of another house servant) to take a look of the place he's about to steal from and/or drug/kidnap his victim.
* Diabolik checking the body is a guarantee of him dying (when that happened the guy who checked the body was an accomplice).
* Diabolik considered doing that and she had (barely) failed his test.
* Diabolik, former boxer Big Bolt once told the protagonist he was asked by the mob to throw a match so there would be more people willing to bet against him. Knowing it wouldn't impact his career and chances to win the world championship, Big Bolt accepted... But right as he let himself get knocked down to pretend he had lost he changed his mind, rose up, and dropped his opponent. It was his last fight, as ten mobsters were sent after him and the last one managed to wreck his leg before being punched out.
* Diabolik from the early issues, when the story was supposed to be set in France). Every time Diabolik is arrested, the police needs only to file the paperwork to try and behead him, as when he was arrested the second time he was held long enough to be tried and sentenced to death, and not even an abolitionist lawyer appealing on his behalf could change it. Actually beheading him, on the other hand, is quite complicated...
* Diabolik from time to time invents new identities for himself and Eva for use in his heists. It's explained as him being a skilled hacker, able to hack government databases and alter the data well enough to then have the government provide him with actual paperwork. They usually hold well enough under casual scrutiny, but crumble whenever
* Diabolik (he killed this one with a knife too in spite of being caught by surprise).
* Diabolik if he wasn't able to use those masks to just waltz in from the front door.
* Diabolik in case they capture him, so any reprieve will naturally come at the last minute.
* Diabolik is a criminal who mainly steals from other criminals, but it's not because he hates them, it's because they tend to keep their money and jewels in their homes and banks have become too much even for him.
* Diabolik is shown tormented by the possibility he murdered an innocent.
* Diabolik it works every time, even if he never spares a thought about them once he made sure it worked.
* Diabolik Lovers is better known for its series of visual novels than the Drama CDs that spawned them.
* Diabolik Lovers — Started out as a series of Drama CDs (and continues to do so) before being made into Visual Novels.
* Diabolik Lovers vampire brothers. One of them even calls her 'Bitch-chan'. It's intended to be fanservice for girls who do want bad boys.
* Diabolik of a long-running Italian comic, wears a skin-tight black suit that leaves only his eyes exposed.
* Diabolik of Clerville, as the rest of the State (that includes at least one other major city and several towns), plus the neighbouring countries of Benglait and Rennert, remains completely undocumented.
* Diabolik, or to indirectly cause the plane crash that gave him that fame, or to cause a terrorist attack that, had it been successful, would have started a civil war, or to cause a zombie scare...
* Diabolik or whoever exposed himself to whatever he's in the mood of doing.
* Diabolik's character Elisabeth Gay has been misspelled as Elizabeth, Elisabet,

and even Elisabetta (the Italian equivalent).
* Diabolik shoots some strawmen in which he believes Diabolik is hiding himself, then leaves... And one of the strawmen starts bleeding.
* Diabolik: Some houses may have or have not vents sufficiently large, resulting in Diabolik and Eva (extremely agile people) either climbing in themselves or using a remote-controlled robot to reach the safe or vault.
* Diabolik's recurring character Saverio Hardy is gay, but the only hint before he came out was that he did not court a gorgeous female friend of his. Diabolik himself admitted he had not seen that coming, in spite of his usual ability to notice anything about someone's personality and having spent a long time with him.
* Diabolik's superiors. They tend to be one-shot characters because they appear in the issue Diabolik robs them, and in the process tends to expose their crimes beyond their abilities to pay their way out of trouble, bankrupt them, kill them (the usual end), or any combination of the three.
* Diabolik, the boxer Big Bolt was once ordered to throw a match by the mob. As it wouldn't affect his career and chances to fight for the world championship, Big Bolt agreed... Then on the ring he changed his mind right when he was supposed to go down and massacred his opponent. In his old age, Big Bolt admitted it had been a stupid idea, as the mobsters reacted by having his leg broken and ruining his career, but remained someone even his enemies would respect.
* Diabolik, the only thing more frustrating than this when dealing with them is their tendency to piss off Diabolik, resulting in the worst criminal of Clerville either killing them or giving Ginko the evidence he needs.
* Diabolik the plan has been completed, with Diabolik doing it from safe distance.
* Diabolik the titular protagonist and his beloved Eva Kant first met when she caught him trying and steal the Pink Diamond from her, and he threatened her with a knife. As she was captured in his eyes and had to admire his the ability to arrive there undetected and he was caught by surprise by her not fearing him in the slightest, they fell in love.
* Diabolik when an occasional accomplice risked that) and when given the chance to rob Diabolik and Eva they not only didn't take it but facilitated their escape.
* Diabolik, who decided to take revenge for the (failed) attack on his friend that way.
* Diabolik with bloody and gory events being picked up by the news with the explicit intention to get more viewers.
* Diabolik with his face. Nowadays he prefers kidnapping, but will resort to it again if he doesn't have the means to hold the victim.
* Diabolik, with many of his victims being worse criminals than him that happened to have crossed him.
* Diabolik, with the cops usually being officers killed in the line of duty. The title character has of course the largest body count, as his usual reaction to being caught in action by a cop is to throw a knife at them.
* Diabolus ex Machina: A happy ending is ruined by an unexpected development.
* Diabolus ex Machina: A plot device that gets the heroes into danger.
* Diabolus ex Machina in the setting, whether this trope is truly in effect is something of a question mark. It only happens with elite tanks, created by the recovered lost technology blueprints without the slightest understanding of its state of the art electronics; not to mention the other parts. Most of the Machine Spirits are just A.I. that survived the Dark Ages. Since the Emperor prohibited all A.I., techpriests don't even think about researching it. Well, at least that's what they keep saying.
* Diabolus ex Machina is often brought in simply because if the villain were to lose,
* Diabolus ex Machina: Similar to the above, but it comes out of nowhere.
* Diabolus ex Machina: Something comes out of nowhere to cause things to go wrong in the story, which will usually end in tragedy.
* Diabolus ex Machina: Things go downhill because of a disaster coming out of nowhere at the last minute.
* Diabolus ex Nihilo: A baddie who appears out of nowhere and it's unknown where

they came from or why.
* Diabolus ex Nihilo: An enemy or threat that shows up out of nowhere with no context.
* Diacrisis: It's pretty foggy outside the prison due to a snowstorm. As a result, it can sometimes make it hard to see anything out there.
* Diacrisis, the captain of Excellor Supermax Security Penitentiary, has a beard, and mows down zombies.
* Día de Muertos (juxtaposed with bright colors and flowers). The reasoning behind this is that one should celebrate the lives of those who have passed on, not dwell on the fact that said lives are over. It also has the effect of making death somewhat less frightening.
* Dia de los Dangerous, features Brock Samson methodically killing as many of the Monarch's henchmen as he can using his car, lighting-up and enjoying a smoke as he does. It's horrific.
* Dia de los Muertos. When Miguel takes a guitar from a memorial, he is cursed because he "stole from the dead" and trapped in the Land of the Dead trying to find a way to undo the curse by sunrise before he becomes one of them.
* Diadem series by John Peel. There are only two flying mythological creatures seen: a sphinx and a dragon. The sphinx is rather small and has enormous wings. In series genius Pixel realizes the large dragon breaks the square/cube law and surmises it flies some other way. They then discover the dragon flies under the same principle as a hot air balloon. Pixel puts the flames out and the dragon crashes.
* Diadem Worlds Of Magic: The literal nightmare world of Zarathan is first thought to be a giant dreaming creature, but when a character forces it to wake up, it's actually discovered to be an giant egg.
* Diadem: Worlds of Magic. When he leaves his house one day (which he has never done before), he comes across a slave labor camp, where he is told that they make everything that those in houses consume.
* Diagnosans - Skeleton thin, two slits instead of a nose, and a bulbous head.
* Diagnosis and Depiction of Partial Epileptic Seizures: by Diane Friedman for its unusually accurate depiction of a real medical condition, with clinically accurate dialogue used by characters and symptoms portrayed accurately, in addition to the surgical details.
* Diagnosis from Dr. Badass: Someone diagnoses themselves or someone else in a very accurate way, as though they were a medical doctor, even if they're not.
* Diagnosis from Dr. Badass: When the character gives a detailed accounting of how he's hurt, or is hurting another.
* Diagnosis from Dr. Badass: Will tell you in deep detail just how badly they're beating you while doing so.
* Diagnosis: Lovesickness" is about Natsuki realizing her growing feelings for her good friend Yuu.
* Diagnosis: Murder, a hypno therapist framed one of his patients and convinced her she was a murderer by killing his wife himself, putting the patient in a trance and commanding her to come to his house and pick up the murder weapon (since it's impossible to hypnotise someone into committing murder) and making her wake up standing next to the body with the weapon in her hand.
* Diagnosis: Murder as crime-solving doctor Mark Sloan, and co-starred his own son Barry Van Dyke as Mark's son, police detective Steve Sloan. Other members of the Van Dyke family appeared at various times during the show's run, including Dick's brother Jerry and daughter Stacy in one episode each as Dr. Mark's brother and daughter respectively. Barry's four children all appeared in multiple episodes, although not as Sloan family members: Carey as six different characters in as many episodes; Shane as four, the last of whom became a regular supporting role in the show's concluding months; Wes as three; and Taryn in three episodes. All four appeared together in two separate episodes, which therefore share the highest rating of 6.0 on the Van Dyke Scale...
* Diagnosis: Murder as the character of Mark Sloan watching home movie footage of himself playing 'cowboys' with his son Steve (played by real-life son Barry). This

is in fact real footage of Dick Van Dyke presumably playing 'cowboys' with a toddler age Barry though it could conceivably be another family member.
* Diagnosis: Murder by Detective Steve Sloan, who draws a pig in the same pattern, though of course, Dr. Sloan is right.
* Diagnosis: Murder, Dr. Jesse Travis got this from at least one elderly patient.
* Diagnosis: Murder: Dr. Sloan's son is a homicide detective. A relative on the force.
* Diagnosis: Murder: Dr. Sloan, while held hostage by domestic terrorists, managed to convince the revolutionary group to stand down and surrender to the Feds, rather than try to shoot their way out and likely get themselves killed, by invoking this trope. He pointed out that they would ultimately be forgotten as martyrs but if they stood trial, they would get 24-hour news coverage.
* Diagnosis: Murder (due to an appearance by Barbara Bain as Cinnamon Carter).
* Diagnosis: Murder episode "Baby Boom," a kidnapper strapped with explosives holds a class full of pregnant women hostage.
* Diagnosis: Murder, fitting its title. Though there are a few episodes where characters only think a murder happened.
* Diagnosis: Murder had the first half of the episode as the criminal explaining his plan for the perfect murder followed by the actual murder where nothing went to plan. Despite this, the reason Sloan caught onto him wasn't because of the numerous mistakes but because of the "mountain of evidence" he had planted to frame someone else. It was the first case Sloan had where the suspect was so obvious that he thought it was suspicious.
* Diagnosis: Murder has a race car promoter doing her spin on the scheme: She sponsors a driver with a terrible race record and sells the various backers for nearly three times the money she'd ever get with him winning, confident that after a terrible race season, she'll make a profit on the backings. Of course, the driver suddenly has the best winning streak of his career, driving her to murder.
* Diagnosis: Murder has RZ1765, a genetically modified strain of smallpox with an 8-hour incubation period and the potential to wipe out a small city. It gets stolen, along with the antigen that counteracts it, from a biological research company and by a series of unlucky coincidences infects Mark, Jesse and an unlucky burglar, although thankfully Mark recognises the symptoms when the burglar expires and sets up a quarantine before anyone else gets infected.
* Diagnosis: Murder have Mark Sloan expose the killer in this fashion. To cite a few examples:
* Diagnosis: Murder: In "Blood Will Out", Amanda is preparing for an autopsy when the body on her slab wakes up and chokes her into unconsciousness before escaping.
* Diagnosis: Murder: In "Blood Will Out", Mark calls Steve to tell him where he and the missing patient are. Being in a room with a rogue NSA agent, Steve pretends to be having a conversation with his wife about a dinner. In a twist, the NSA had been tapping Steve's phone and got a recording of the full conversation. Steve, however, expected the them to be tapping his phone and arranged to have a squad of police waiting for them when they followed him.
* Diagnosis: Murder: In "Misdiagnosis Murder", Jesse sees a man die of a heart attack in the parking garage. When he returns with aid, the body is gone and another man is faking tachycardia. Jesse spends the rest of the episode trying to persuade people of what he saw.
* Diagnosis: Murder in "Misdiagnosis Murder". When Amanda tells him to go home and get some sleep, he angrily says he will and turns and strides dramatically through a door. Which turns out to be the broom closet.
* Diagnosis: Murder: In "Murder in the Air," the pilot of an airliner escorting Sloan and Amanda to a medical conference in Europe is killed.
* Diagnosis: Murder: In one episode a woman kills her lover in a fit of rage after learning he's been unfaithful.
* Diagnosis: Murder. Justified in that Mark, like all his other clients, had left messages threatening death to the accountant due to his poor bookkeeping getting them in trouble with the IRS.
* Diagnosis: Murder. Mark is the son of a cop and father of another, in whose cases

he often gets involved. He is a medical consultant to the LAPD.
* Diagnosis: Murder moment he tried reaching into the machine to get the stuck snack and ended up breaking a finger.
* Diagnosis: Murder: Murder x 4: Steve tells the assassin, who is terminally ill, that his death by a SWAT sniper will be broadcast on live television by 8 news reporters.
* Diagnosis: Murder: One episode has the hero try to disarm a nuclear bomb, when told to 'cut the red wire' he replies that the wires are all black. Then a bomb tech yanks out all the wires disarming the bomb.
* Diagnosis: Murder ran for eight seasons and has maintained popularity in reruns after ending in 2001.
* Diagnosis: Murder scene, where the villain tries to convince Bond to join him in taking over the world. She says, "All Bond had to do was say 'yes', and he could buy enough time for his fellow agents to rescue him and save the day. I never understood why he never said 'yes'... until now. The answer is 'no'."
* Diagnosis: Murder showcased everybody's "hidden" talents at some point: Dick Van Dyke got to dance, sing, and perform magic (although how good he was depended on the writer); Victoria Rowell had an episode in which she displayed her ballet training (referenced once or twice before); Barry Van Dyke did some boxing.
* Diagnosis: Murder showed a guy giving a girl a shoulder massage as she lay in the tub, then suddenly pushing her under the water and drowning her.
* Diagnosis: Murder: "Standing Eight Count." A boxer whom Dr. Jack Stewart idolized was framed for the murder of the boxer who beat him and turned down a rematch due to health issues.
* Diagnosis: Murder-style Christian TV network) given a fatal heart attack by video clips sliced into a show she's reviewing that had images of a lookalike practicing Satanism (which she did in college), something that would ruin anyone's career, let alone hers.
* Diagnosis: Murder (that was kind of a ghost story) has one corpse turned into an exhibit skeleton.
* Diagnosis: Murder, the killer is a doctor who wants his son to follow him into the medical profession despite his son's obvious incompetence, to the point that he secretly arranges for his son to be given the answers to one of his medical exams before he sits it, and murders another student who finds out about the cheating and threatens to expose it.
* Diagnosis: Murder, the killer who had previously dodged phone traces allows the call to be traced to a pay phone to distract the police.
* Diagnosis: Murder they change a baby's diaper. The pixie faced doctor comments on how babies whizz in peoples' faces when people change their diapers on TV. He then changes the baby's diaper and gets whizzed on.
* Diagnosis: Murder when either Jesse, Amanda or both were absent from nearly every episode. There are only 6 episodes of the entire season where all 4 main characters appear, and Jesse isn't even in the series finale.
* Diagnosis: Murder where a series of people were murdered in methods that pointed to a vampire or something similar. It was all played as if the killer was mentally ill and only believed she was a vampire until she flew across the room at Dick Van Dyke. Very unusual for a show that was, as much as a TV show can be, very realistic.
* Diagnosis: Murder, where the killer must be right-handed. This lets the left-handed man off until it's revealed that everyone is innocent. Since someone must be guilty, it turns out the lefty is ambidextrous.
* Diagnosis: Murder. Who died when she telekinetically flew herself into a chair leg. And was never spoken of again.
* Diagnosis of God: A possibility that a character has a disorder is confirmed or debunked by the creators.
* Diagnosis of God: The creator confirms a character has a disorder (which can include physical disabilities).
* Diagonal Cuts throughout the original series. On the other hand, the trope is also subverted several times throughout the series:

* Diagonal Cut truly begins with Silver Samurai practicing this on some trees as well as some Foot-bots before Shredder appears.
* Diagonal Speed BoostOn a square movement grid, moving diagonally is faster than otherwise.
* Diahann Carroll. Apparently, a lot of the stories her character June on
* Dia herself eventually acquired a giant corrupting scar courtesy of Khorne after the same incident.
* Dialac is renamed Regenstein, where the townspeople speak German (or English mixed with German words). Regenstein means "rain-stone" (because it's the first place you visit where people get turned to stone, and you can't do a thing about it).
* Dial-a-Ghost: Basil Snodde-Brittle (who is described as not very bright) died from diving into a swimming pool without making sure it was full of water.
* Dial a.k.a. the Leader after being ousted from SHIELD by the Avengers, who helps them develop even more Gamma mutates.
* Dial, Audrey Nathan delivers one to Phil Coulson when she finds out he's alive and had been alive for 5 months without contacting her.
* Dial Code Santa Claus where a genius kid who lives alone with his mother and grandpa is visited by a psychotic criminal dressed as Santa on Christmas night. He must defend himself and his relatives using his wits and array of various gadgets.
* Dialect or jargon perhaps, but not a language. And only applicable through writing.
* Dialect: The premise of the game is that the players exist in this sort of community and have developed their own language. They reconnect to the outside world, and the rest is exploring the changes in language.
* Dialed In! (and in a comic book that can be found online), it mostly serves as set dressing for the game itself, save for a few modes dedicated to said shady company attacking you. Notably, the player character has no given motivation for activating such devastating disasters.
* Dialed In! attempts to weaken the flippers with laser beams; an evil laugh plays if they succeed.
* Dialed In! causes the phone on the playfield to receive a call. Each of the numbers it displays begins with 555.
* Dialed In!, Dialed In Electronics attacks your flippers with lasers that cause them to stutter should they get hit.
* Dialed In! who proceeds to destroy parts of Quantum City for no reason other than they can.
* Dialga and Palkia at the very least have some nod to their powers: Roar of Time and Spacial Rend respectively, very powerful unique attacks that manipulate time and space, which is in correspondence to the Pokémon's Pokédex entries. Arceus also has Judgment — an attack befitting an
* Dialga, Palkia and Giratina themselves are an example. Dialga's Pokedex entry even states that time itself started to flow when it was born. By extension, the Lake trio (Uxie, Mespirit and Azelf) are also as old.
* Dial H for Hero had a set hour time limit for the superheroic identities they bestowed upon the wearers, as well as an hour wait before the dialer could transform again (which was imposed whether the dialer used the previous transformation for the full hour, or voluntarily reverted before their hour was up). However, it was found in the final story arc that the H-Dials could be immediately passed onto another person (as long as that person hadn't used one within the last hour) to circumvent the limitation.
* Dial H for Hero had the protagonists use their H-dials to transform into fan-submitted characters.
* Dial H for Hero, however, those same heroes were mocked for being too campy to take seriously.
* Dial H for Hero that appeared to be a rotary dial with alien script instead of numbers attached to a strap. Later adaptations attached the rotary to actual phones, with origins in a civilization terminally dependant on similar devices. The 2018 title runs full tilt into this and introduces four, color-coded dials, all

mounted on and operated like various rotary dial phones, with unique transformations, whose effects can be transmitted through phone connections for mass empowering.
* Dial H series, the ability to produce speed echoes is the signature power of the villain Centipede.
* Dial H, with the team of characters having defeated their main enemies, but being left in a devastated universe which they could potentially escape, but with only a remote chance of getting back to their original homes.
* Dial it happens to Ulik when Thor and Iron Man hit him with a combination attack, much to Hill's chagrin as it caused them to lose track of him.
* Dial M for Merger", the contestants escape a water tower that they're told will be blown up within seconds. It proves to be a hoax only when they've already escaped. Beth is unamused and claims she nearly peed her pants from stress, while Harold outright did wet himself.
* Dial M for Monkey brought us the Galactus parody Barbequor, who tried to turn the entire solar system into a shishkabob.
* Dial M for Murder is undone because he underestimates the intelligence of Swann/Lesgate, the thug he hired to kill his wife. Swann puts the key right back after using it, rather than keeping it, as his employer expected.
* Dial M for Murder is undone, he calmly congratulates everyone and pours them some wine.
* Dial M for Murder, Margot's trial scene ends with the horrified look on her face after the judge puts on his black cap.
* Dial M for Murder, one of the characters gives the summation as a purely hypothetical imagining of what could have happened, not realizing that that is exactly what did happen.
* Dial M for Murder, the cops begin to suspect Tony of something when he starts buying everything in cash, in used one-pound notes.
* Dial M For Mutant into the noir setting, complete with copious use of 30's/40's slang.
* Dialog boxes on most systems (including Windows and most Linux distros) always place the
* Dialog During Gameplay: The character you control has conversations with other characters as you're walking around instead of during a cutscene.
* Dialog establishes the Peacekeepers have several other small ships including "scrub runners" and another type identified only by serial numbers, that they use to train pilots before the traineers are considered ready to fly the much more sophisticated Prowlers. * Dialogue from the newest DLC for the game indicates that in an alternate multiverse the mantis-men take over the facility. Cave sounds scared. Further DLC dialogue has an alternate Cave relaying good news and bad news:
* Dialogue Reversal in which Han says "I love you" and Leia replies "I know". Hers was a heartfelt confession at a moment when they might never see each other alive again, his was in response to her indicating to her hidden side-arm when some storm-troopers got the drop on them. Both scenes are portrayed awesomely, as a result.
* Dialogues Concerning Natural Religion. The opening and closing say that Cleanthes, the most orthodox proponent of religion, clearly wins the argument. (In between, however, he loses every point and the skeptical character of Philo carries the day.)
* Dialogue tags that reiterate the dialogue they're describing are infuriatingly common in fanfic, especially when
* Dialogue Trees happened. Every time you replay the games and make different choices, you're playing through a different version of the story.
* Dialogue was recorded, which was thought to be too sad for kids. It was supposed to be paired with an episode called "A Tale of Two Rangers", of which no trace exists.
* "Dial P For Pink" has a thief inserting a balloon in a hole in the side of a safe he's trying to crack (with the Panther inside it thwarting his every move) and

inflating it with his breath. The safe rises, as the thief walks off with the safe tied to a string floating above him.
* Dials might also be this, being somewhat uncommonly found sea shells possessing various and useful abilities to store things like sounds or
* Dial, when asked about the new armor-wearer Rescue, Pepper Potts tells the asking reporter that she is Rescue.
* Dialysis apparently works wonders, since it cleans the blood and resets your fluid and sugar levels all in one fell swoop. A perfect solution! ...Except for the whole "having major organ failure" thing. Whether or not that would be preferable to a hangover is left to the reader's discretion.
* Dial Z For Zombies, with the graphic card showing a drunken cameraman.
* Diamanda Hagan about the skirmishes being fought over the few remaining available letters.
* Diamanda Hagan, after her clip minion cut to a clip that doesn't really relate to the movie at all, Diamanda demands the minion swallow her cyanide suicide tooth. When told that she can't remember which tooth it was, Diamanda tells her to get creative. The clip minion then starts punching herself until she finds the right tooth, promptly dying.
* Diamanda Hagan and The Nostalgia Chick was proposed, she stated she was "amused." When it surfaced, she did a dramatic reading of it.
* Diamanda Hagan gets into a shootout with the police and finally decides to just teleport away and blow up the compound. To her growing annoyance, the explosion doesn't go off when she expects.
* Diamanda Hagan is an aunt and loves to spoil her nieces and nephews.
* Diamanda Hagan movie, asking Diamanda to find out whether a girl would be more willing to sleep with Diamanda if she killed said girl's parents in real life (results: no, she wouldn't).
* Diamanda Hagan: Online comedic critic of bad films, usually in the exploitation or shock film genre.
* Diamanda Hagan's review of "Vikingdom" when they talk about how historically inaccurate the film is and Malcolm shows up in Viking costume. Happy Viking, Malcolm, and Diamanda get so caught up in the argument that it takes them a while to realize they're all completely aware that black Vikings did in fact exist.
* Diamanda Hagan who regularly orders her minions to execute themselves.
* Diamante, courtesy of his Hira Hira no Mi, allows him to compress various objects into thin, clothlike form, and he comes in
* Diamante deserves special mention as his cape is a solid steel sheet, made to wave in the wind thanks to his Devil Fruit power.
* DIA — Defense Intelligence Agency. American military intelligence and primary source of information for The Pentagon.
* Diamond Adventure! The Dark Mystery, who died a day apart in late December 2016.
* Diamond & Pearl also have two new mini-games thrown in to take advantage of the DS's touch-screen and wifi capabilities: (There are benefits to
* Diamond & Pearl, also managed to balance out hijinks and humor with mix-ups to series formula and surprisingly heartfelt arcs, eventually earning a dedicated fanbase of its own.
* Diamond & Pearl series episodes where Dawn's Piplup and/or Jessie's Wobbuffet don't appear such as "The Keystone Pops!".
* Diamond and Dazzle are equally subject to physical comedy. One comic features Diamond getting yanked off-panel by her tail due to some device set up by Dazzle. She somehow came back into the panel to make sure Dazzle was yanked along with her.
* Diamond and Dazzle: One of the titular characters is a cat named 'Dazzle' and 'Unlucky' by ponies. He definitely prefers the former.
* Diamond and Dazzle, the female Diamond's coat is pink in contrast to the male Dazzle's blue collar.
* Diamond and other jewellery ads are notorious for subverting the "men are clueless about what women want". All the men in diamond commercials are sensitive, romantic, attentive, and like ballroom dancing.
* Diamond and Pearl arc, Team Rocket takes advantage of the Pokétch craze by

churning out counterfeit Pokétches, which turn out to have mind control properties over the town's Pokémon. Dawn gets a real Pokétch at the end of the episode.
* Diamond and Pearl as a result of their encounters with him. Much like Gary, he does get better over time. His loss to Brandon humbles him immensely, and while still cold and stoic, he no longer underestimates or openly demeans his opponents. His loss to Ash at the Sinnoh League fully completes his change, finally acknowledging Ash as his equal and ending their rivalry.
* Diamond and Pearl flash forward two weeks later, where Platinum's mother is on a cruise ship, and she and her daughter have a talk about the Distortion World.
* Diamond and Pearl: Galactic Battles episode "Hold the Phione!". Jessie is frozen by a Phione's Ice Beam and all of the Team Rocket trio is frozen by the combined Ice Beams of a Buneary and a Phione without any ill effect.
* Diamond and Pearl, Lucas and Dawn, have dark blue hair and blue eyes.
* Diamond and Pearl release, Pikachu getting beaten by a Raichu and Ash asking if it wanted to evolve, and Dawn's Swinub refusing to listen to her after evolving to Piloswine, then almost immediately evolving again and continuing to disobey her, just like Charmander did.
* Diamond and Pearl rival Paul, and the blandness of some of the other rivals.
* Diamond and Pearl series of the anime also have a tendency to clash with the animation, although Pikachu's entire tail turning into a CG object when using Iron Tail in the Best Wishes seasons is probably more noticeable.
* Diamond and Pearl, the Buneary Dawn eventually caught got shy because she had developed a crush for Pikachu, covered her face in her fur, and hopped right into a tree trunk.
* Diamond and Pearl this about Ash and often goads him into making worse decisions in battle until the Sinnoh League where most of Paul's strategies fall flat.
* Diamond and Pearl who obsessively trains to be the strongest. In comparison, Reggie is friendly, outgoing and laid-back, having given up competitive battling to focus on other dreams.
* Diamond and Silver's Excellent Adventure, and the author who wrote this part thought a sudden relationship between them would be funny.
* Diamond and Silver's Excellent Adventure in the ancient earth pony kingdom. At the next meeting, the majority of the Resistance reveal themselves to also be disguised time travelers.
* Diamond and Silver's Excellent Adventure with section titles such as "Meanwhile, two weeks ago in the present".

* Diamondback fires twin Walther PPK pistols in this pose when shooting at Misty Knight in Harlem's Paradise, and later when killing Domingo.
* Diamondback has connections that give him access to Hammer Industries weapons, such as the brand-new Judas bullet.
* Diamondback in the process, Shades included ironically enough, who didn't have enough faith in his plan. Even though Luke also manages to escape the police again in the following episode, it was due to circumstances beyond Diamondback's control, whose plan worked out in his favor.
* Diamondback opens fire on Luke, Misty and Claire at a medical clinic where Claire is secretly treating Luke for a gunshot wound Diamondback had given him earlier. Misty fires back, seemingly dropping Diamondback. As she goes to check, Claire and Luke begin to relax....and then Diamondback uses his arm to break the glass window and tries to grab Claire, prompting her to stab him in the arm with the pair of scissors in her other hand.
* Diamond Brothers, is extremely complicated in this regard. It wasn't actually a

book to start with, but a TV series which served as a sequel to the film adaptation of the first book. However, Anthony Horowitz then novelised the series, and the novelisation actually came out before the TV series was screened, leaving people to presume that the series was an adaptation of the book. This was not helped by the fact that the TV series was never repeated or released on home media, and a few years later Horowitz rewrote the novelisation to bring it in line with the continuity of the first two books; this revised version is by far the better-known version, further fuelling the belief that the book came first.
* Diamond Brothers mystery series, when Nick Diamond's parents move to Australia, he runs out of the plane at the last moment and moves in with his big brother Tim instead. Tim works as a private detective, but he's so incompetent that they barely have enough money for food, clothing, or roof repairs. Actually, incompetent doesn't cover it; Tim appears at times to be borderline mentally retarded, and though he's a legal adult is clearly unfit to be the sole caretaker of a minor. Their parents are totally oblivious to the situation; they occasionally send cheery postcards from Australia, but rarely send money and never visit.
* Diamond Brothers, Nick. Tim's detective ability is summed up by Nick early in the first book:
* Diamond Brothers TV series is extremely complicated in this regard. The first book in the series was adapted as a film in 1988, and the 1991 series was an original story serving as a follow-up to the film. The series was also novelised, but due to the novelisation coming out at the same time as the series' one and only broadcast, the series quickly falling into obscurity, and the novelisation receiving a rewrite a few years later to bring it in line with the other books in the series, for many years it was believed that the series was actually an adaptation of the book.
* Diamond Brothers were a 1988 film based on the first book, and a 1991 TV series adapted from the third book. Both adaptations were written by Horowitz himself, and he also directed the 1991 series.
* Diamond Casino & Resort, Tao Cheng explicitly reappears, refusing to enter the Pacific Bluffs Country Club, as he almost died at the hands of Franklin and watched his father and their security team blow up there, confirming "The Third Way" as canon.
* Diamond Cut Diamond Yuyami Shigyou (Yami-nee) grows quite a big pair that gets emphasized and commented on by multiple characters.
* Diamond Dallas Page at 63, which he has claimed was the final match he'll ever do.
* Diamond Dallas Page. He's since legally changed his name to Dallas Page.
* Diamond Dallas Page is almost never seen without his DDP Yoga t shirt.
* Diamond Dallas Page married his first wife Kimberly in 1991 before she joined him in the wrestling business. She went on to become Page's valet and a Nitro Girl. (They would divorce in 2005.)
* Diamond Dallas Page to solidify his turn, he started shouting "Boo me now, bitch!" at the fans.
* Diamond Dallas Page was known for this trope, to the point that other wrestlers would make fun of him for it, and that's a GOOD thing!
* Diamond Dallas Page. Wrestled for WWE from 2001-2002 and TNA for 2004-2005.
* Diamond Daydreams clearly has some elements of this. They witness the "diamond dust" together, just like lovers would do—and their falling out has all the symptoms of an extended lover's quarrel.
* Diamond Daydreams consumes massive amounts of cream puffs. Luckily she is a professional figure skater, so she stays thin.
* Diamond Daydreams Karin accesses the internet with her "Aivo" laptop.
* Diamond Daydreams series, has Karin's often rather scary nightmares.
* Diamond Daydreams, the main point in Atsuki's story is her struggle against her looming Arranged Marriage.
* Diamond Dogs every main character except Dolph is dead by the end. 3 of them die within seconds of each other.
* Diamond Dogs in a sufficiently alien way as to solve the increasingly lethal

puzzles they are presented with) is what they set out to do in the first place, again arguing a continuity of personality despite the radical modification of form - up to a point, anyway. Unfortunately they recruited a cyberneticist whose dedication to his art is extreme, to say the least.
* Diamond Dogs shows a painting depicting Bowie and a bunch of dog/man hybrids. One provocative detail on the cover was Bowie's penis, which was airbrushed out on some of the copies.
* Diamond Dogs; the subsequent tour initially featured a huge "Hunger City" set to further carry out the theme.
* Diamond Dogs where human dog hybrids life in a post-apocalyptic universe.
* Diamond D's "I'm Outta Here", in which the narrator keeps finding himself in dangerous situations he needs to get away from.
* Diamond in the Rough (Aladdin): Jafar takes shameless amusement at Iago's curse.
* Diamond in the Rough (Aladdin) were once humans, transformed during a duel for the lamp.
* Diamond in the Rough, has two uses of "hell" and "prick" putting it slightly out of Disney territory.
* Diamond is discovered to be this later on; Pearl isn't so surprised.
* Diamond Is Unbreakable and wants to get out of it. Josuke and Okuyasu help him out by spreading rumors that Koichi is a real scumbag, in the hopes that it'll put off Yukako; instead, she abducts him and locks him in a house so she can "fix" him and turn him into a proper young man.
* Diamond Is Unbreakable discovers Kira's latest 'girlfriend'. Wounded and about to be vaporized, he uses one last Harvest to bring one of Kira's buttons to Josuke and Okuyasu, giving them the first clue to the identity of a serial killer who has been killing undetected in Morioh for the past fifteen years.
* Diamond Is Unbreakable for his Stand, Echoes. Whenever he found a reason to stop running in fear of an enemy, Echoes would evolve into a new form to match the growth of Koichi's soul.
* Diamond is Unbreakable joins the cast halfway into the part, and helps the Joestars hunt down Yoshikage Kira.
* Diamond Is Unbreakable moment, making this the only time in Jojo history that the entire main cast of a Part has fought the main villain together.
* Diamond is Unbreakable on the border of too outlandish for the world of the series.
* Diamond is Unbreakable out to be another Stand of the Week-style narrative, here it becomes apparent that the part is an all-out game of cat and mouse between the protagonists and the enigmatic Yoshikage Kira.
* Diamond Is Unbreakable, Red Hot Chili Pepper, can grow on strength by absorbing electricity around him. The Stand becomes nigh unstoppable when Akira moves to Morioh Town's power plant.
* Diamond is Unbreakable: Rohan can use Heaven's Door to write inscriptions into people to make them do or forget whatever he wants them to.
* Diamond Is Unbreakable Stand-wielding serial killers in Morioh (plus a few normal people who got mistaken for stand-wielding serial killers), which Joseph had known nothing about.
* Diamond Is Unbreakable, the half-white and half-Japanese protagonists Jotaro Kujo and Josuke Higashikata are portrayed by fully Japanese actors.
* Diamond is Unbreakable, the toddler-aged Rohan Kishibe was the only survivor of Kira's massacre at Reimi Sugimoto's house.
* Diamond is Unbreakable went on record to state that the only reason he works as a mangaka is because he wants people to read his work, not because of the fame or money it could bring; writing manga that other people can enjoy is all that matters to him.
* Diamond is Unbreakable. When the hand starts decaying he starts looking for a new "girlfriend".
* Diamond is Unbreakable), where Koichi says, "This has to be the work of an enemy Stand user" after realizing he lost weight after meeting with Rohan.
* Diamond Is Unbreakable, while Araki wants to be seen as mellow and approachable.

For that matter, Rohan utterly despises Josuke, who Araki has said is his favorite character he created.
* Diamond is Unbreakable, whose spikes on his head are supposed to be hair, but end up looking more like parts of his scalp.
* Diamond Is Unbreakable, Yoshikage Kira, makes his appearance, everything gets kicked up a notch and for this reason, part 4 is a common sight in the high rankings of many a fan's favorite parts list.
* Diamond Joe, the mayor, is a Silver Age hero-turned-politician. When the team bodyguards him he is an endless source of support, and while he doesn't have as much endurance as he used to, he is still incredibly strong and his skin can still turn to diamond.
* Diamond or Pearl got you a stylus with a Dialga or Palkia topper respectively. They're actually quite durable and easy to hold.
* Diamond Rio accidentally cut his left thumb on a saw while doing cabinetry work in Little Rock, Arkansas the day before his 41st birthday in August 1990.
* Diamond Rio ain't dead / You ain't goin' crazy, it's all in your head").
* Diamond Rio crossovers "One More Day", "Beautiful Mess", and "I Believe". The fifth? Their 1997 hit "How Your Love Makes Me Feel" which, despite being their longest-lasting #1 hit at three weeks, is also leagues more obscure than a the #2 "Love a Little Stronger" or "Unbelievable", the latter of which was also their first hit on the Hot 100.
* Diamond Rio had their biggest crossover with "One More Day", a lush pop ballad that stood at complete odds to their usual twangy country-rock.
* Diamond Rio's song, "In a Week or Two" has the narrator kicking himself because he waited too long to make his move, and now the woman he loves is about to marry someone else. The video is this trope. He has fallen asleep in his tux, and all of that footage of her with that other man is only his bad dream. His Best Man, after looking for him everywhere, finds him and wakes him up. "Dude, what are you doing? You're going to miss your own wedding!"
* Diamond Rio. Zig-zagged in that a Turner-only version of the song also exists.
* Diamonds, AKA Achievers:, and so on. Also called power gamers or raiders. A subset of these are the kind who like collecting rare items.
* "Diamonds and Guns" commercials. If you listen to the rest of it, you'll know that it's all about how cruel and violent the world is.
* Diamonds and Toads is willing to give an old woman (a disguised Fairy) a drink from the well; even warned, her older sister is unable to be polite, even though this time the Fairy is disguised as a woman of wealth and taste.
* Diamonds Are A Fuzzy Dudes Best Friend Jean get this treatment. Jean gets pretty much nothing but abuse from Emma Frost with everyone stating how she 'deserves' it, while Cyclops is depicted as a moron who just follows either Jean or Xavier's every word.
* Diamonds Are Forever a Cairo gambler tells the dealer, "Hit me." Bond taps him on the shoulder, then obliges.
* Diamonds Are Forever, a diamond smuggler tries to dispose of an MI6 agent on his tail. The MI6 agent kills him in a fight that mostly takes place inside an elevator, puts the diamonds in his body, and takes him to Slumber, Inc. in Los Angeles to be burned.
* Diamonds Are Forever Bambi & Thumper right before Felix Leiter and a CIA team enter the house.
* Diamonds Are Forever, Bond drops into Willard Whyte's penthouse suite and, having been observed by Blofeld, is greeted by Willard Whyte (actually Blofeld with a disguised voice) with the words, 'Howdy. Welcome, son. We've been expecting you'.
* Diamonds Are Forever - Bond is knocked out and put into an incinerator in a coffin - when things are looking desperate the lid suddenly opens and Shady Tree, one of the diamond smuggling group, angrily curses him out. Bond smiles "Now, don't tell me - you're Saint Peter."
* Diamonds Are Forever - Bond sets Mr. Kidd ablaze by dousing him with high-proof liquor as he carries flaming shishkebabs as a weapon.
* Diamonds Are Forever: Diamonds. In a dead body. Flight bound for Vegas.

* Diamonds Are Forever does this twice. First, when he jumps into the moon rover, he doesn't know how to start it. Second, when he hops into the crane lowering Blofeld's escape sub, he doesn't know how to operate it and drops the sub into the water.
* Diamonds Are Forever. Due to Tiffany Case's interference his plan fails so he has to destroy the computer center by hitting with a minisub.
* Diamonds Are Forever, during the Slumber Inc. sequence, a soft organ melody in the key of F major loops throughout the first half of the scene, save for the part where Morton Slumber begins Peter Franks's final journey, right up until the moment where Albert Wint and Charles Kidd brain James Bond with an urn in the Garden of Remembrance. Later, the Wagnerian music they play when they try to burn Bond alive cuts out when Michael "Shady" Tree has Mr. Slumber get him out of the retort so that he can suss out the location of the real diamonds.
* Diamonds Are Forever film franchise. Two or three distinct characters are worth noting:
* Diamonds Are Forever, he sends his assassins Mr. Wint and Mr. Kidd to execute the members of his diamond smuggling ring.
* Diamonds Are Forever: In a deleted scene available on the CD, Mr. Wint and Mr. Kidd kill Shady Tree with a "BANG!" Flag Gun that also shoots a real bullet.
* Diamonds Are Forever: In the last scene, Bond sets Mr. Kidd, who was holding fiery shish kabobs, on fire by splashing wine all over him.
* Diamonds Are Forever is controlled by two brothers, Jack and Serrafimo Spang, whose operations are based on two different continents.
* Diamonds Are Forever, James Bond realizes the smugglers had paid him in counterfeit cash because Messrs. Albert Wint and Charles Kidd try to burn him alive immediately after he pockets the cash.
* Diamonds Are Forever, James Bond runs through a quick list of locations of Whyte properties Blofeld might be using to run his satellite operation. He and Willard Whyte both realize where it is when he mentions an oil rig off the coast of Baja California.
* Diamonds Are Forever mostly averts this as a good chunk of it was actually filmed in Las Vegas. However the scene where Bond is riding the elevator to Whyte's penthouse was filmed in Pinewood Studios. And the first scene with Mr. Wint and Mr. Kidd which took place in the South African desert was shot within the Vegas city limits.
* Diamonds Are Forever Mr. Wint and Mr. Kidd used timed bombs (without visual counters) twice - first to destroy the diamond-smuggling helicopter, and at the end in an attempt to kill Bond and Tiffany Case.
* Diamonds Are Forever: or at least he claims it is: he is using a super-weapon to threaten both the capitalist and communist countries into nuclear disarmament and bring about world peace. But one has to wonder what he plans to do after this, considering all his previous acts in the last six films…
* Diamonds Are Forever out of the insanely stupid belief that SPECTRE's dedicated to global disarmament, rather than the blackmail-for-profit schemes they'd committed in all the previous films up until now.
* Diamonds Are Forever Plenty O'Toole is thrown out a widow by some mooks out to get Bond but survives due to landing in the hotel pool. When Bond compliments the head mook on their aim, the mook reveals "I didn't know there was a pool down there."
* Diamonds Are Forever satellite so he could blackmail the world, nobody would have even thought to investigate "Whyte" at all and discover he'd been replaced.
* Diamonds Are Forever, Shady Tree discovers just in time that the diamonds were fake and got James Bond out of the retort Wint and Kidd had put him in. Bond takes the opportunity to casually stroll out of Slumber, Inc. during the inevitable questioning and later figures out that someone's bumping off the diamond smugglers when Tree gets shot later on.
* Diamonds Are Forever the pair had been given an unconscious James Bond to dispose of; the first time they tried to burn him alive, which admittedly would have worked as he was only saved by other villains.

* Diamonds Are Forever: The reclusive millionaire is guarded (from rescue or escape) by two beautiful and under-clad young women named Bambi and Thumper. Bond is forced to beat them (it's implied they're lesbians and impervious to his charms).
* Diamonds Are Forever throws Plenty O'Toole, one of the Bond girls, off of a high floor, and she lands unharmed in a swimming pool below. When Bond compliments him on his aim, the mook replies, "I didn't know there was a pool down there."
* Diamonds Are Forever, Tiffany Case was the daughter of a madame who stopped paying protection money to the mob, the mob chased out the hookers and gang-raped Tiffany at a young age.
* Diamonds Are Forever. Unfortunately the real Hergesheimer walks through the door just after he leaves...
* Diamonds Are Forever when Albert R. Saxby reminds Wint and Kidd that they "didn't get the real diamonds. So we need Tree, alive." Wint and Kidd remark on how "that's most annoying" because they had already cut Tree down, as revealed when Bond shows up in his dressing room.
* Diamonds Are Forever: when Bond kills enemy agent Peter Franks, he switches their IDs to impersonate Franks while convincing everyone he's "killed" James Bond.
* Diamonds Are Forever where he uses an almost plausible gun that fires pitons. How it's able to pierce the building when it travels as relatively slow as it does and support Bond's weight is anybody's guess.
* Diamonds Are Forever; while Mr. Wint could be said to be vaguely swishy(though not really for the time), Mr. Kidd is so un-flamboyant, you'd never guess he's gay if not for the "For a lady" scene.
* Diamonds Are Forever with a fake. Result: the real tape gets swapped right back into the machine. In fact, she thought he was slipping her a fake tape as a signal that she should make the switch for him since he'd been captured. He was actually just trying to get her to get rid of the control tape he had already switched out, so the guards wouldn't find it on him if he was searched.
* Diamonds are seen as symbols of innocence and the integrity of moral values. The Great Diamond Authority, however, is far from anything Diamonds represent.
* Diamonds can also be used to make armor and swords, but unlike gold, anything crafted with diamonds not only looks pretty, but they are also extremely durable, requiring at least over 1000 uses before the tools break.
* Diamonds Cut: not only is there no blood spilt, as camera lingers over his body, but the window remains absolutely undamaged when it should by rights have been broken by the sniper’s bullet.
* Diamonds on Wheels, Ashley and one of his goons are covered in a slippery white foam after Bobby sprays them with a fire extinguisher during the fight in the warehouse.
* Diamonds on Wheels, Ashley goes charging into the fight only to trip on a broom and go sliding face first only the trail of slippery foam Bobby has sprayed on the floor.
* Diamonds on Wheels of a diamond transport, they spend the rest of the film being outwitted by a trio of teens who don't even realize they are being chased for most the movie.
* Diamonds on Wheels on a diamond shipment in London. One of the crooks betrays the others and steals the diamonds.
* Diamonds on Wheels, Susan kicks the thug holding her in the shins to make him let go when the kids make their escape from the warehouse.
* Diamonds on Wheels, the crooks attempt to waylay one of the cars competing in a rally by removing the real arrows and laying new ones for the driver to follow.
* Diamonds on Wheels: When Lady Truesdale starts the rally, she has her car in reverse and backs into the car behind her.
* Diamonds on Wheels, with Wheeler and Finch dressing in the uniforms of security guards in order to steal the diamonds.
* Diamonds, rubies, sapphire, and emeralds are all popular building materials in the
* Diamonds sparkle, spades dig, hearts care, and clubs hit things. Modern versions

of the Bartle Test generally subscribe to the opinion that nearly everyone has parts of all four inside them and give their ratings accordingly. For example, E/S/A/K gives the proportions of each from highest (explorer, or spade, in this case) to the lowest (killer, or club). The newer "Kol Bartle" version of the test will give the top two percentages if they both are close enough together; for example, a "Roving Hugglebunny" is mostly heart and spade, in that order.
* Diamond Sword, Wooden Sword called the Goat-legs. In the sequels, the main army of the critters arrives, and the magical orders are neither unified nor in control now and thus cannot oppose them.
* Diamond Sword, Wooden Sword, "hunnus" means just "human" in Elvish, but it is always used to insult humans.
* Diamond Sword, Wooden Sword is formally an imperial monarchy, but in fact, the Emperor is a puppet of the magical Orders of the Rainbow who actually call the shots.
* Diamond Sword, Wooden Sword, the Emperor of Mel'in is guarded by naturalized Freefolk warriors.
* Diamond Sword, Wooden Sword. What do Flaviz the Green, Liv the Blue and Soley the Indigo exactly do, we are not told.

* Diamond Tiara and Silver Spoon. "Waiting for your cutie mark is so last week... You're still totally invited to my cutceañera this weekend".
* Diamond Tiara becomes this after becoming a Nightmare, when she concludes that choices don't matter.
* Diamond Tiara blows her plan to tie up the Harmony Harness in a duel over patent rights by instead staking the royal charter on a race, grabs a glass of champagne and chugs it.
* Diamond Tiara eventually reveals her special talent is to influence and lead others.
* Diamond Tiara have this too, especially when they are laughing at the Cutie Mark Crusaders.
* Diamond Tiara is one of only two fillies paying attention to her dad's presentation during "Family Appreciation Day". Indeed, she hangs on his every word with an adoring look on her face.
* Diamond Tiara of their mothers finding out about their attitude problems. A later episode reveals Diamond Tiara is actually afraid of failing at anything, due to her mother's insistence on always being seen as a success, whatever the cost.
* Diamond Tiara's Cutie Mark is explained to represent a desire to be like her mom - a model. In canon, Spoiled Rich is not a model and the Cutie Mark was revealed to represent Diamond Tiara's skill of leadership.
* Diamond Tiara's mother is revealed to be dead having passed away due to complications with the pregnancy of Diamond Tiara's little brother. In canon, Diamond Tiara is an only child and her mother, Spoiled Rich, was revealed to be very much alive and unfortunately nowhere as nice as Diamond Tiara's mother in the story was implied to be.
* Diamond Tiara's mother Spoiled Rich. When we're first introduced to her, she makes a xenophobic remark behind Pipsqueak's back. She criticizes Diamond for losing the class election to the "transplant from Trottingham".
* Diana almost rebels against Jupiter to save the life of one of her devotees, but her twin Phoebus makes sure she doesn't commit suicide like that. Instead, she gives her arrows to the boy who loves her, allowing him to end his life having killed many men in glorious battle.
* Diana, being on the cusp of adolescence (and a pre-teen/early teenage Wonder Woman) and mainly a
* Diana Damrau: 'La Virtuosa'/'La Luminosa', 'The Meryl Streep of Opera'
* Diana does the same in "Family" since she's lost her father and can't handle having dark magic.
* Diana for all her life has believed that the Amazons would just have to kill Ares and men would be free from his influence. She finds out the hard way that men

don't need a god's influence to go to war.
* Diana Fowley's death. After a season and a half of tormenting Mulder and Scully, she is murdered and we are only informed after the event.
* Diana Furthermore, it was an explanation nobody needed or wanted—Bruce's obsession with the cowl is inevitably going to lead to him driving away all his loved ones and friends in the DCAU, we didn't need the additional angst to go with it.
* Diana gets confronted by the alien Khunds in one comic, and promptly defeats them. This part tends to vary
* Diana has been tied to a buoy with her own unbreakable lasso by a villain who intended to then use the opportunity to blow her up but doesn't manage it before her escape in issues #5, #68 and #146.
* Diana has sworn to protect the human race, but especially the innocents and she is not kind to those who would harm children.
* Diana Herculeis a.k.a. teenage Wonder Woman. Diana is kind and sweet to pretty much everyone she meets, being described by multiple different characters as probably the nicest person they've ever met, despite being (or perhaps because she is)
* Diana herself ends up getting the short end of the stick in a fist-fight with Mongul in "
* Diana Lee Inosanto. Exactly the kind of skills and background you would want from a foe capable of going up against a Jedi in single combat.
* Diana Lombard is a 16 year old girl who is mature and an intellectual, while Danny is a 14 year old who is more laidback and easy going.
* Diana Mitford, one of the infamous Mitford sisters, experienced this conundrum once. There was Bryan Guinness - a sweet, young,
* Diana, performed so abysmally with critics and audiences. The film is based on Princess Diana's romantic relationship with Dr. Hasnat Khan shortly before her tragic death. The real Hasnat Khan has come out against the film, saying that its depiction of their relationship was based on sensationalistic tabloid accounts.
* Diana Prince Maxwell Lord, and so assembles the Riders to avenge her town.
* Diana, Princess of Wales, was very much a fashion leader back in the day as well. She made a particular point of patronizing British fashion designers and wearing their creations.
* Diana, Princess of Wales, who was often incorrectly referred to as "Princess Diana". Only princesses by birth, limited to daughters of the sovereign and selected male-line descendants, precede their given name with the title princess.
* Diana Rigg tinges it all with a mischievous bemusement where the novels portray her as genuinely caustic and spiteful. Instances where this is not possible, such as unprovokedly calling Ellaria Sand "the serpent's whore", are adapted out and the show crafts new entirely-comedic scenes for her such as her "You can smell the shit from here!" arrival in Season 5.
* Diana Ross Sings Songs From The Wiz (which Diana Ross didn't participate in, for the record).
* Diana Ross was a massive box-office bomb, and nearly every critic blamed Ross for it, which put the final nail in her coffin as a serious actress.
* Diana's former butler, Mr Borrell, appears to have become a recluse surrounded by his memories and mementos of her.
* Diana's invisible plane has been subjected to theft and attempted theft on occasion, she always gets it back though and no enemy as of yet has been able to duplicate the Amazon tech that went into making the thing.
* Diana's magical bracelets are specifically non-conductive to energy — she's used them to block things like Superman's heat vision and Zeus' thunderbolts.
* Diana's mother Hippolyta is immortal, and appears to be the same age as her young adult daughter. Given that in
* Diana's very first mission off the island is to stop Ares from starting
* Diana Thornton's "Lover's Last Chance". The song starts by describing innocent childhood Halloween fun, but then< "All of them hush past the house on the corner/A darkened old mansion than never did sell/Even the grownups just whisper

about her/Nobody knows how she died... or won't tell."
* Diana Tregarde a magically powerful occult guardian who fought hidden supernatural menaces that it contributed to her eventually abandoning the series. (The primary reason she moved on was simply that the books weren't making very much money, but the fan weirdness certainly influenced the decision.)
* Diana Tregarde, the heroine comments on how pretentious a foe who insists on spelling magic with a k is.
* Diana Tregarde, the "Texas Ripper" murders (thought to be the work of an ordinary serial killer by the cops) are actually a series of sacrifices to the Aztec gods.
* Diana was forced to retire as Wonder Woman after the death of Hippolyta. Donna Troy succeeded her, and
* Diana, when aged up in the same incident, is at least six feet tall as well as being both voluptuous and built like a tank, being considered quite literally jaw-droppingly gorgeous, with the narration remarking that her appearance was a living reminder that this young woman was the niece of
* Diana when she calls for Hasnat to come to the window of his apartment, but he does not because he is not comfortable with the public exposure.
* Diana/Wonder Woman seems set to adopt this role for at least a third of the Avengers in
* Diana Wynne Jones: A funny old man sells strange science kits that do magical things. He also sells bright pink footballs. At the end of the story, his shop has vanished - or more accurately, been bulldozed. Even so, it's awfully convenient, don't you think?
* Diana Wynne Jones, an elf makes a sarcastic prophecy that he'll find his brother "when pigs fly." As it happens, the main character is a wizard who breeds flying pigs...
* Diana Wynne Jones be together "somewhere". However, Polly's relationship with Tom has always been either as a child hero-worshipping an adult, or a teenager with a crush. So if they're going to start anything new, she acknowledges that they're going to have to get to know each other as adults, and find out whether it'll work or not.
* Diana Wynne Jones, but she also said that things changed during her career, and started writing books with female protagonists.
* Diana Wynne Jones characters know that stepmothers are supposed to be wicked, but the actual stepmother is only a little careless.
* Diana Wynne Jones has a garden that stays the same distance away no matter how long you travel towards it. It is bespelled so as to be inaccessible to people trying to reach it, so those trying to enter only succeeded when they had given up on doing so.
* Diana Wynne Jones. Here the characters get transported from world to world at a moment's notice, each world being at different technology levels. On finding themselves trapped in a war zone, Jamie immediately starts to look out to see if uniforms are brightly coloured or mud brown. In terms of civilians trying to go their own way, the former is good, the latter, pretty bad.
* Diana Wynne Jones, Kit and Blade are captured and made to fight in a tournament to entertain the off-world tourists.
* Diana Wynne Jones makes a point of narrative causality at the beginning (Sophie, as the eldest of three daughters, is expected to never succeed in anything, while her youngest sister is sent off to accrue her "inevitable" fame and fortune), and then steadily works at subverting it.
* Diana Wynne Jones; minor character Melissa is both beautiful and dumb, but rather than trade on her looks she's working to learn magic, even though it's hard for her.
* Diana Wynne Jones' novels often involve alternate universes and occasionally also time travel, which means they touch on this from time to time:
* Diana Wynne Jones, Prince Justin of Ingary ran away from such a marriage with the Princess Beatrice.
* Diana Wynne Jones prove to be wiser and more sympathetic than other adults. Both are also very effective at getting custody of children in need. Miss Smith has the

added bonus of understanding dogs very well, and Polly's grandmother knows folklore that is vital to the story.
* Diana Wynne Jones sequence, where events in alternate Earths do affect events in the main character's world (which isn't ours, and isn't World One, either. Nor is our Earth - we're World 12B.) However, saving a life from another world can throw the whole system into disarray if you're not careful... so any traffic between the worlds has to be carefully regulated.
* Diana Wynne Jones, some characters' Vague Age is a plot point in itself.
* Diana Wynne Jones's series, standalones and short stories often feature Multiverses or at least two different alternate realities. Count them:
* Diana Wynne Jones story. However, he runs out of time to come up with a interesting "death", so he simply creates a pit made to look bottomless and pretends to have a Disney Villain Death. Multiple times a day.
* Diana Wynne Jones story "The Sage of Theare", the Sage of Theare is a child prophesied to bring about the end of the world by constantly questioning the way things are done in a world that runs on order.
* Diana Wynne Jones). The Chief wanted Gest to remain on friendly terms with him without actually refusing his suit—hence the challenges. Unfortunately, Gest got help.
* Diana Wynne Jones, the eponymous Warlock steals a car, not realizing there's a girl and her dog in the backseat.
* Diana Wynne Jones the living Toffee bars aren't evil per se, just heinously troublesome with a bad habit of melting and causing a big, sticky mess. The living dolls are downright cold.
* Diana Wynne Jones, the main character acquires a genie who states right from the beginning that he swore that all the wishes he granted would "do as much harm as possible", out of pure petulance. A good deal of the book deals with the characters having to come up with wishes that the genie can't mess up.
* Diana Wynne Jones. The main characters are all afraid of being outed as witches, and one even goes to the lengths of burning himself with a candle to remind himself to be careful not to use magic.
* Diana Wynne Jones, the offworlders are deliberately keeping Earth ignorant and backward so they can buy Earth flint very cheaply. They use it to make portals and no other mineral will do, and if the people of Earth found out how valuable it was they would raise the price dramatically.
* Diana Wynne Jones, the youngest of the seven magical siblings is the most powerful and favored of the group. His elder brothers and sisters are bound magically to protect him.
* Diana Wynne Jones, though not intentionally. He just knows that his sister, Shona, is mad at him for letting their mother put a spell on her, and he remembers very clearly the way she waited patiently for days to take revenge on one of their siblings when she was younger. He never stops to think that maybe she's matured since then, and all this distracts him from fulfilling his mission, which was tough enough already.
* Diana Wynne Jones, when a new Merlin is introduced to give a prophecy, he begins weeping and faints. The audience is unimpressed, and complain that they wound up with one of the "weepy" kinds of seer.
* Diana Wynne Jones, where they're tied up with the position and behaviour of the Bounds.
* Diana Wynne Jones, which is set in a world that's been forced to adopt all the Fantasyland cliches for the benefit of the tourists, obviously has a Thieves' Guild. Interestingly, though, it turns out to be an authentic institution that's been around since before the whole tourism thing started.
* Diana Wynne Jones, which, while being most definitely fantasy and young adult literature, is much more serious in tone, and a straight fantasy work without a hint of parody. It has a noticeably different feel than anything else she wrote.
* Diana Wynne Jones, witches can be male or female — but either way they're illegal and likely to be executed by burning.
* Diane and Merlin are the only female members of the Seven Deadly Sins in

* Diane and Mr. Peanutbutter have an age gap minimum of 15, she is at 34 at the beginning of the series and he is in his early 50s. As everything else, this does end up with them facing troubles in their marriage as she is facing her last chances to try new things in her life while he is already used to a certain lifestyle and has a hard time adapting to her younger way of thinking.
* Diane Arbus: A photographer renowned for her pictures of eccentric or otherwise bizarre looking people.
* Diane Arbus have gained a reasonably wide following only in the past decade or so.
* DianeCastle's recursive fanfics including two multiple story series. The writers constantly exchange information to make sure the worldbuilding is 'Diane' approved.
* Diane Downs so they could pursue romances with men who didn't want to be fathers. It's not clear why neither woman chose to simply allow their children's fathers to have the kids; both fathers expressed the wish to have gotten custody rather than dead children.
* Diane Downs while reenacting the crime for the police, and had the same giddy demeanor when discussing it with the media.
* Diane Duane, a Romulan commander named Ael doesn't quite defect, but she does make an alliance with James T. Kirk (and by extension the Federation) to prevent some truly evil actions on the part of the formerly-honorable, now-corrupt government of the Romulan Empire. She never does fully defect, but she becomes a close confidant and ally of Kirk, and it's implied that there's something more nascent between them, more than just friendship or Kirk's signature skirt-chasing.
* Diane Duane as it had already happened on Vulcan before they left, so fired everything they had]]), the long war that followed, and the rapid expansion that followed the war and the loopside alliance with the Klingon showed the limits of the system.
* Diane Duane consider doing a time stop on the entire universe in order to "fix" entropy. This is a very bad thing for all the reasons listed above. Utter darkness, no thought, no real life. One second of living every one hundred thousand years. Part of the idea is exaggerated such that all these processes wouldn't be continuing so much as having to start all over again during the points when time was flowing again...
* Diane Duane, Dr. McCoy is given the con during a First Contact mission as part of a joke by Kirk. Then Kirk disappears into a temporal anomaly, a Klingon warship shows up, and Starfleet regulations won't allow McCoy to hand over command to any line officer until relieved by Kirk or Federation brass. Which means he's stuck in command in the middle of a major crisis with everyone's lives depending on his command training (which he does not have) and military ability.
* Diane Duane Dr. McCoy is shown harvesting tissue from an injured Romulan to grow him some replacement organs, including a new heart.
* Diane Duane, every ship in the Federation Fleet that can possibly be there turns out en masse to welcome the Enterprise back from its shakedown cruise with the new drive. The vista is described thus:
* Diane Duane, having gone unfinished since 1992, but she promises she is still working on it.
* Diane Duane, in order to bring the ship's stronger forward phasers to bear on a Romulan warbird.
* Diane Duane — that Sarek is used to seeing in the sky is a volcano-covered beast that takes up a third of the horizon, by the way. Our itty-bitty moon looks somewhat pathetic by comparison in his opinion.
* Diane Duane.) One dolphin is a supporting character, which held the rank of commander in Starfleet. At one point, Riker whistles a specific sequence of notes to get its attention, implying he can speak (or at least swear) in Dolphin.
* Diane Duane returns to Earth for a resupply, and while everyone else is on shore leave, Spock stays behind to update the ship's computers with information from all of Earth's major libraries. (He finds it relaxing.)
* Diane Duane, Senior wizard Carl provides an instance of this when Kit stops by and finds him trying to rewire the lights in the kitchen, despite his housemate's

repeated suggestion that he call an electrician:
* Diane Duane series, Wizards travel to the Moon, Mars and to other solar systems on many occasions in the novels via teleportation.
* Diane Duane's motive is revenge on Spock for a death in the family...except that an outsider would probably say it's not his fault at all.
* Diane Duane's novels, he's joking, as when people don't believe his claim that the roller coaster was invented in Russia (true, for a change) he pleads that "this time" it's the truth.
* Diane Duane, speaks of a Vulcan version of the Internet that was in use around the time the people who would become the Romulans left the planet. The primary Romulan religion of the books' present actually started out as a messageboard meme.
* Diane Duane to love chocolate so much they go thousands of lightyears for it?
* Diane is a natural blonde and, although a bit shallow and snooty, is clearly not dumb.
* Diane is physically identical to Susan. The two are distinguishable only by hair color

* Diane meeting Frasier's mom. She's initially terrified that Hester Crane will disapprove of her, trying to run out on the dinner before it begins, but despite dominating the conversation, things seem to go well... until Hester takes advantage of Frasier's absence to tell Diane "stop seeing my son, or God as my witness, I will kill you."
* Diane Neal, who played ADA Casey Novak in seasons 5-9 of SVU, previously appeared as a rapist and murderer two seasons earlier.
* Diane's ex, Sumner Sloane, is an even more insufferable jerk, but without any of Diane's better qualities.
* Dianetics seems to put any effort into his book ads, and he has to bankroll them on his own. Thankfully online book ads definitely have more effort put into them, and the publishing industry has put their eggs into the more reliable television interview circuit, where an author can go onto a talk show and sell the book on their own terms.
* Diane was mocked, bullied and ignored by her family while her mother dotes on and coddles her four brothers.
* Diane, who is haughty, yet incompetent as a waitress, often mixing up drink orders, or bothering customers with her life story. And that's when she actually bothers working, rather than skipping out to do whatever, or argue with Sam about whatever the problem is between them that week. It's explicitly stated more than once Sam won't fire her because of their history. That, and actually getting Diane to leave is nigh-impossible.

* Diaries of a Madman, after having created the species that populate Equestria and the rest of the world.
* Diaries of a Madman after his gender-switching artifact stops working.
* Diaries of a Madman already inherited this from the original source material. Then it adds even more characters on top.
* Diaries of a Madman, and have to play along with the stories found in several books as they advance through the world.

* Diaries of a Madman, and laments that she would have preferred being a simple healer instead of a ruler.
* Diaries of a Madman, both Navarone and Discord occasionally address the reader directly. The former since his stories are being told through his eponymous diaries, and he's usually telling the reader to stop reading his private records. The latter since Discord is the God of Chaos and can literally break the fourth wall if he feels like it.
* Diaries of a Madman, but circumstances tend to conspire against him. Particularly when he gets taken captive by the monkeys and is forced into wearing various dresses.
* Diaries of a Madman, but in particular the protagonist Navarone. Slightly differently from the norm in that he does this as a coping mechanism for the psychological trauma he receives over the course of the story, and several characters call him out on this repeatedly.
* Diaries of a Madman, but particularly mention has to go to the relationship between Discord and the protagonist, Nav.
* Diaries of a Madman, by making herself so essential to the running of Equestria that no one would want to see her removed from power. Nav questions her over this at one point, since she could rule on merit alone.
* Diaries of a Madman. Depending on how fast you read and how much time you have, readers have reported it taking anywhere from several days to weeks of reading to catch up.
* Diaries of a Madman, due to him causing a political scandal. Eventually, he finds a way out of it.
* Diaries of a Madman, first when they tried to save themselves from Discord, and again when they created the species that now populate Earth when that failed.
* Diaries of a Madman has one in Navarone. He'll usually do the right thing when it really matters, but he can act in very unethical and underhanded ways, and can be extremely abrasive. Celestia also dips into this on occasions as well.
* Diaries of a Madman involved this. It worked, but not quite well enough for his goals...
* Diaries of a Madman: Nav accrues a surprising number of these though not all of them work out well.
* Diaries of a Madman, Navarone deliberately invokes this when Shining Armor tries to read his mind, resulting in the good captain on the floor screaming in terror.
* Diaries of a Madman, Navarone does this in order to escape from an amorous in-heat Celestia, though his wings take the brunt of the impact.
* Diaries of a Madman, Navarone gets his revenge on Celestia by getting her caught up in a tabloid scandal.
* Diaries of a Madman, Navarone has to confront a warren full of diamond dogs at one point. Instead of a prolonged campaign against them in a whole warren of tunnels, he simply takes a set of changelings and asphyxiates the lot via fireball. Despite preventing a lot of deaths in the end run, this does not have a good result on his mental health. Later on, a somewhat simpler situation involves him avoiding a trek through the sewers and a confrontation with a variety of mob bosses by simply rushing to the boss and teleporting out.
* Diaries of a Madman, Nav refuses to say in his narration what exactly Kat did when interrogating an assassin for information, but it certainly wasn't pretty.
* Diaries of a Madman: Nav tries this unsuccessfully. One of the Day Guard later almost breaks his leg by trying to kick down Nav's front door.
* Diaries of a Madman. Not that he has much use for or understanding of just how wealthy he is.
* Diaries of a Madman of friendship you'd use for all this would be unusual.
* Diaries of a Madman, often providing the author's opinion on the actions of characters.
* Diaries of a Madman often says or does things for the sole purpose of getting a rise out of others, which he readily admits to.
* Diaries of a Madman. Particularly so with Discord, but Nav, Celestia, and Luna also stand out.

* Diaries of a Madman, Pinkie doesn't mind when Nav compares her to a foal by suggesting she's loud, unmannered, and uncontrollable. She does, however, protest the assertion that she's "stinky".
* Diaries of a Madman plays with this. Several human myths are actually true, including Merlin, whereas others such as legends surrounding several of the human gods are instead revealed to be powerful mages.
* Diaries of a Madman results in him gaining several plant-like characteristics.
* Diaries of a Madman, several retconned events survive as fake entries in Nav's journals, which the cast then proceed to make snarky and mocking comments about.
* Diaries of a Madman, Shining Armor is pretty much the only unambiguously good character, and dedicated to making sure everyone receives justice regardless of their rank.
* Diaries of a Madman situation, he's quick to point this out to them.
* Diaries of a Madman, the elementals are actually a race comprised of nanomachines, rather than beings of magic.
* Diaries of a Madman. The first is where Nav intervenes to spare the changelings, since eliminating Chrysalis would result in their species starving. The second is where he helps the changelings eliminate a diamond dog clan after being unable to argue for peace, though he's disgusted with his role in this.
* Diaries of a Madman. The protagonist, Navarone, is usually not happy with who he finds.
* Diaries of a Madman, this is one of the few things the protagonist, Navarone, cannot stand. He even leaves Equestria ahead of schedule just to avoid this from happening.
* Diaries of a Madman, though Celestia awarding Nav a garish suit of armour and dressing it up as a reward is probably the largest example.
* Diaries of a Madman views getting dressed up like this. After being forced to do so for the Gala, you'd almost think the girl went through a war zone.
* Diaries of a Madman where she claims to have spent an entire year disguised as a chair to see the results.
* Diaries of a Madman, which makes it far more powerful than unicorn magic, but much more difficult to master.
* Diaries of a Madman, which proves to be exceptionally useful. It is double-edged though, since it prevents him from flying, and it also blocks beneficial spells.
* Diaries of a Madman. While his Day Guard suffer a massive defeat in a war games exercise, it's mostly because everything he was taught doesn't stand a chance against modern human warfare techniques, rather than personal failings.
* Diaries of a Madman. While Nav hasn't definitively said no, so far he's put her offers on hold.
* Diaries of a Madman with Celestia keeps him out of prison and gives him a lot of leeway in what he does, though it's also because she finds him too useful to imprison, and resorts to non-standard punishments instead.
* Diaries of a Madman, with Kumani having little purpose in the story other than being Nav's girlfriend. Nor is the relationship itself particularly deep, mostly being based around compatibility in the bedroom, which is acknowledged in-universe.
* Diaries of a Madman, with Nav being able to freely switch genders thanks to his artifact. Later on they break, resulting in him being trapped as a female. It doesn't go down well.
* Diaries of a Madman with one of the princesses, though Celestia turns a blind eye to Nav sharing secrets on how to make it. It's averted with most other drugs however, which are freely sold and consumed.
* Diaries of a Madman, with the exception of Shakespeare's tragedies, which Celestia bans Nav from transcribing and selling after they cause a lot of upset.
* Diario de un Zombi has this as the setting for a depopulated Barcelona. Add in unstoppable biomechanical horrors and cultists.
* Diario de un Zombi wear formless wax masks. These actually serve a purpose as they confuse zombies and makes recognizing them as humans difficult for them.
* "Diarrhea of a Poopy Kid" is the first vignette episode where Gene isn't the one telling a story. Instead, his sisters and father cheer him up with a series of

food-themed parodies of action movies after he misses Thanksgiving dinner thanks to a bout of stomach flu.
* "Diarrhea of a Poopy Kid": Louise, Tina and Bob take turns comforting a sick and bathroom-ridden Gene on Thanksgiving.
* Diary=Ginny. Her previous connection with it is brought up fairly often, most notably when
* Diary Of A Bad Man had Humza and his friend Umar ambushed by Asif's gang in a park they snuck in during their Eid holiday. Humza manages to defeat them at the swings while Umar gets his ass handed to him as he tries to escape down the slide.
* Diary of a Lost Girl. Namely: raped. Impregnated. Imprisoned. Baby dies. Drugged, raped again. Three years as a prostitute. Husband kills himself.
* Diary of a Mad Black Woman says that the names being the same was pure coincidence.
* Diary of a Mad Black Woman to have children with Charles, but had two miscarriages. Meanwhile, he had two unplanned children with his mistress.
* Diary of a Mad Mummy. The hieroglyphs in the diary are either clues pointing to hidden treasure or reviews for Egyptian restaurants, and in one more subplot, the mummy is revealed to be an animatronic.
* Diary of an Awesome Friendly Kid from Greg Heffley's best friend Rowley Jefferson.
* Diary Of A Nobody is Charles Pooter's incredibly laboured puns and his family and friends reactions to them "I'm afraid these trousers are frayed"
* Diary Of A Teenage Girl. Current main character Kim is fishing for advice to give her best friend who's having boyfriend troubles; Kim's distraught father thinks she is the one sleeping with her boyfriend in a desperate attempt to stay with him, until her best friend turns up pregnant.
* Diary of a Wimpy Kid and are antagonized by a trio of teens. When they try to escape while threatening the teens with a brush cutter and a leaf blower, Greg loses control of the brush cutter and accidentally chips the paint off of their truck, causing the leader of the teens to threaten Greg that he's going to rip off his arms and punch him with his own fists.
* Diary of a Wimpy Kid: Anyone with even just the most basic knowledge of Spanish can tell that Susan Heffley doesn't understand it nearly as well as she thinks she does—she thinks "Tengo hambre" means "Tango hamburgers" (it actually means "I'm hungry") and she thinks that "Te amo" means "What is your name?" (it actually means "I love you"). It embarrasses a younger Greg when he once tried asking a Spanish-speaking waiter what his name was by repeatedly saying, "Te amo."
* Diary of a Wimpy Kid are like this, despite the series itself having recurring antagonists:
* Diary of a Wimpy Kid, a roach backs away from the "cursed" piece of moldy cheese in the playground at Greg's school.
* Diary of a Wimpy Kid as the Heffleys take a Mexican resort vacation to avoid traditional Christmas weather and hassles — unfortunately, the resort turns out to be packed with other families and couples who have the same idea.
* Diary of a Wimpy Kid became the face of an anti-police brutality movement on TikTok in 2020, with people drawing or painting graffiti of Manny's head next to leftist slogans. "The Manny will not be televised" became a rallying cry, based off the Gil Scott-Heron poem "The Revolution Will Not Be Televised."
* Diary of a Wimpy Kid book, Mrs. Heffley starts going to the gym, but ends up quitting after one day. Mr. Heffley, as a joke, duplicated a photo of her in her workout clothes, slapped on "before" and "after" stickers, and stuck them on the fridge. Needless to say, Mrs. Heffley was not amused.
* Diary of a Wimpy Kid books (and film) but how many are familiar with the webcomic in which it originated?
* Diary of a Wimpy Kid books, Greg steps in the poop of a dog named Rebel. Wearing new shoes, no less.
* Diary of a Wimpy Kid but due to its surprisingly accurate take on loss of innocence and crumbling dreams.
* Diary of a Wimpy Kid, but not by that much. Zachary Gordon, Robert Capron,

Grayson Russell, and the Fielding twins (who played Manny) virtually vanished from the spotlight after the series ended.
* Diary of a Wimpy Kid: Cabin Fever, a box of Bac'n Snax has the slogan "Made with REAL animal by-products" printed on it.
* Diary of a Wimpy Kid: Cabin Fever before bed and then have crazy dreams about running water that made him wet.
* Diary of a Wimpy Kid: Cabin Fever, the main character Greg (a 12-year-old boy) and his best friend Rowley try to make homemade video games for their own holiday bazaar, and make Pac-Man by getting Rowley to sit in the box and control the ghosts. He asks what to do if he has to go to the bathroom, and Greg gives him a bottle to pee in, and when he asks what he'll do if he has to go number-two, Greg says that they'll cross that bridge when they come to it.
* Diary of a Wimpy Kid: Cabin Fever when Greg stumbles upon it in the basement several years after it disappeared.
* Diary of a Wimpy Kid, Chirag Gupta speaks in a heavily-exaggerated Indian accent, which is a major difference from his book counterpart, who is a minor character whose name is the only indicator of his ethnicity. His actor, Karan Brar, had to work with a dialect coach to get the accent right despite being South Asian.
* Diary of a Wimpy Kid comic was, "Daddy, is rain just God sweating?")
* Diary of a Wimpy Kid despite being carrots with no real sports connection.
* Diary of a Wimpy Kid: Dog Days, Greg and Rowley camp in front of a video game store so they can be the first for a tournament. Greg also said Rodrick used to do this a lot before concerts, and it's how he met Bill, Lodëd Diper's (his band's) lead singer.
* Diary of a Wimpy Kid: Dog Days, Greg mentions that he used to swim in the baby pool until a kid said "I'm peeing" while in it, which put him off. His reason for not liking the ocean is because "All the world's fish and turtles and whales go to the bathroom right there in the ocean."
* Diary of a Wimpy Kid: Dog Days, Greg's mom puts the kibosh on his book club selection because she doesn't like the scantily clad warrior woman on the cover. Greg notes that there are no women in the book's entire series and wonders if the cover artist even read the book.
* Diary of a Wimpy Kid: Dog Days: Greg's mother is shown as the instigator of conflict, but she acts more as a recurring obstacle.
* Diary of a Wimpy Kid: Dog Days, Greg thinks of this trope, and wonders if the same thing works for his weird neighbor kid (accompanied by an illustration of a vampire trying to trick its way into Greg's house by asking to borrow a cup of sugar).
* Diary of a Wimpy Kid: Dog Days, when Greg and Rowley watch a movie about a muddy hand that goes around killing people. The last person who sees the hand is always the next victim. At the end of the movie, the hand crawls straight towards the screen, implying that Greg and Rowley are the next victims. This kept them nervous and paranoid for the rest of the book.
* Diary of a Wimpy Kid: Double Down include throwing gummy worms at Rowley's face in an attempt to make a scene where worms come out of the shower. After Rowley runs out of the house with barely any clothes on and climbs a tree to escape the geese that ate the gummy worms on the ground, Greg's dad gets home and the attempt to make a movie comes to an end.
* Diary of a Wimpy Kid: Each installment features more of these than the last, to the point where the later books turn into Chekov's Gag minefields near the end.
* Diary of a Wimpy Kid families, chances are he wouldn't survive preschool without being the victim of fratricide.
* Diary of a Wimpy Kid fanfic "Greg Runs For President" is set in 2052 (as Greg is running for the 50th US President), and shows that younger people can now work for political roles, despite nothing seeming out-of-the-ordinary for the late 2010s.
* Diary of a Wimpy Kid, Frank has an important work call that he has to take while driving, and everyone else has to be quiet.
* Diary of a Wimpy Kid: Greg and his peers are twelve, Rodrick and his peers are 16, Manny and his peers are three, Peepaw (Greg's great-grandfather) is 93, Gammie

(Greg's great-grandmother) is 95 and another family the Snellas have a baby named Seth and a six-year-old named Shawn, but we don't really know the ages of the other characters. We know that Greg's grandparents are elderly, and his parents are probably at least 36, that Greg's uncles Gary and Joe are younger than his dad, his aunt Cakey is older than his mom and his aunt Gretchen is younger than her.
* Diary of a Wimpy Kid: Greg ends up with this as a result of a failed attempt to tell on Rodrick for saying a bad word. Rodrick got off scot-free.
* Diary of a Wimpy Kid, Greg has a dream where he was captured by zombie pirates and they made him walk the plank. For some reason, he kept saying "Step, step, step, no, no, no! Plop, plop, plop, in I go!" It turns out he was saying that for real, and Rodrick has the video to prove it.
* Diary of a Wimpy Kid: Greg Heffley is given a pair of Wonder Woman-themed underpants that he is too ashamed to ever wear. However, after running out of clean clothes to wear, he is forced to wear them to a birthday party where his pants end up slipping down and revealing the underpants to everyone.
* Diary of a Wimpy Kid, Greg is donating a twenty-dollar bill to the church basket despite his reluctance to do so. His mom Susan donates it for him.
* Diary of a Wimpy Kid, Greg mentions that a kid named Aric Holbert got suspended for breaking into the school and spray painting "Aric Holbert is cool" on the lockers. He tried to deny it was him, but as Greg points out, "it was pretty pointless".
* Diary of a Wimpy Kid, Greg's dad plays classical music from a boom box in the window in order to disperse the teenagers loitering around to hear Rodrick's garage band.
* Diary of a Wimpy Kid Greg sees a newspaper ad for a sale on back-to-school supplies on July 5th—exactly two months before school starts, and decides that whoever put that ad in the paper that early must really not like children.
* Diary of a Wimpy Kid: Greg sees his dad's dentist, Dr. Kagan, as one of these. From what we can see, Kagan is a regular dentist, if a bit stern and annoyed with Greg; a large part of Greg's first impression of him comes from the fact that his dad switched him from the kid's dentist he had a crush on to Kagan without telling him beforehand.
* Diary of a Wimpy Kid, Greg's uncle Gary is an entertainer at children's birthday parties. At one point, he arrives late to his wedding, still in costume, because the kids weren't letting him leave.
* Diary of a Wimpy Kid, Greg uses a form with blanks to write his thank you notes. It's not very personal.
* Diary of a Wimpy Kid, Greg wants to be elected treasurer so he can use his power to do favors for the cheerleaders.
* Diary of a Wimpy Kid: Greg wants to get a cellphone in certain books, but his parents (particularly his mom, Susan), feel that it's too much responsibility for someone his age (and worried that he'll just rack up a huge phone bill like his older brother, Rodrick). Mr. and Mrs. Heffley's solution to this is to get Greg a "Ladybug Phone" (which he describes as basically being a "preschool toy"), which Greg can only home or 911 on.
* Diary of a Wimpy Kid had Greg’s soccer coach, Coach Litch, whom Greg describes as the worst out of all the coaches (of course, Greg and his teammates’ shenanigans weren’t helping much). In fact, he’s the reason Rodrick doesn’t do sports anymore.
* Diary of a Wimpy Kid has Gregory go to the dentist once, which has pictures of all the people who never brushed their teeth in their lives or never even used floss. This unfortunately doesn't do anything to help Gregory with his fear of the dentist... and you can bet your ass that a lot of people are afraid of someone with metal tools poking around in their mouths.
* Diary of a Wimpy Kid: He always looks on the bright side and likes playing with toys and playing classic children's games.
* Diary of a Wimpy Kid. However, the instalment Kinney is proudest of the very well-received first book.
* Diary of a Wimpy Kid incriminating picture of the whole thing. Rodrick and Greg

get punished.
* Diary of a Wimpy Kid in "Old School" when Frank sends Grandpa (his father) to the timeout chair for accidentally inviting all the women he knows online to the Heffleys' house and having a wild party.
* Diary of a Wimpy Kid in order to make Greg's actions more understandable.
* Diary of a Wimpy Kid installment "Double Down", Greg and Maddox can't find a tiny LEGO brick that belongs to the latter. Just when Greg is about to go home, Maddox notices the brick stuck to Greg's elbow and accuses him of stealing it, not willing to believe that it was an accident.
* Diary of a Wimpy Kid: In the book "Dog Days", Greg and Rowley stay at a condo on the beach and they have to share a bed because the only other bed is the one Rowley's parents are sleeping in. Eventually, Rowley goes to sleep in his parents' bed so Greg takes the bed.
* Diary of a Wimpy Kid in the cabin, and helpless to prevent his cabin-mates' stupidity. In fact, when Greg separates from the group it all goes wrong for them.
* Diary of a Wimpy Kid: In the eleventh book, "Double Down" Greg mentions how he saw an unsuspecting sixth-grader get a wedgie from an eight-grader bully.
* Diary of a Wimpy Kid: In the second book, Greg makes a promise to always be truthful to his mom. Unfortunately, this new "honest" Greg would go on to say insensitive things, like that a short boy could never become a basketball player and that Rowley's grandfather may die before ever having another birthday. Greg is also this in general when it comes to his opinions. His grandpa is even bigger, as he will just straight up say who his favorite is.
* Diary of a Wimpy Kid: In "The Ugly Truth", Greg and his class are playing a game involving seeing whose close-up a photo is of. They take a photo of a boy Tyson's bent arm, but the teacher thinks it's of someone's "posterior".
* Diary of a Wimpy Kid — and a fair amount of the comedy comes from the reader recognizing that.
* Diary of a Wimpy Kid—unfortunately, this sometimes leads to Greg forgetting to switch to the non-code words during school, making him look stupid.
* Diary of a Wimpy Kid movie, Greg has to pee but is not allowed because Rodrick is threatening him with death. At first he can put it out of his mind, but then he can't because a sprinkler is going off, a man is watering his lawn, and there is an aquarium anyway.
* Diary of a Wimpy Kid movie, Rowley is seen on a mall Santa's lap, asking for a puppy, a cat, and a gumball machine.
* Diary of a Wimpy Kid movie shows pictures of a scene where Greg meets Fregley's mom, which is absent in the final film.
* Diary of a Wimpy Kid notes how this was a helpful approach for dealing with young actors, since when one twin can't take direction, the other twin is available.
* Diary of a Wimpy Kid of himself as a muscular, rich adult and Quentin, a school bully, as his employee. They still sound like middle schoolers.
* Diary of a Wimpy Kid of "I'm only thwee!" to excuse his behavior, and his mother once drove all the way to preschool to cut the crusts off his sandwiches when he threw a tantrum over it.
* Diary of a Wimpy Kid: Old School, Greg says he does not want to sleep in a bunk below the nervy kid Julian Trimble in case the latter wets the bed.
* Diary of a Wimpy Kid. Ravi's speech patterns are this trope full stop, as his accent is exaggerated and he says things such as "Great Ganesh!" and "You have aroused my ire!"
* Diary of a Wimpy Kid recalls opening a video-game sized gift-box only to find a memory card.
* Diary of a Wimpy Kid: Rodrick, Rodrick, RODRICK. He frequently torments Greg and plays mean pranks on him. It's a plot point in the second movie where Rodrick has a major focus and his relationship with Greg slightly improves by the end.
* Diary of a Wimpy Kid: Rodrick Rules has Greg and Rowley getting chased by a guy with a hockey mask and a chainsaw in the Crossland High School haunted house.
* Diary of a Wimpy Kid: Rodrick Rules where it gets view after view. While Greg and Rowley bathe in the fame, Rodrick yells up at them:

* Diary of a Wimpy Kid sees Greg Heffley getting a hanging wedgie while stating what a wimp he is.
* Diary of a Wimpy Kid series, Greg goes to a lock-in at his middle school where a kid named Jeffery Chang brought a big bag of cheese puffs. Due to a ban on snacks, he locked himself in the boys' bathroom to eat them, but the adults caught on quickly, so Jeffery was forced to flush the cheese puffs down the toilet.
* Diary of a Wimpy Kid, the aptly-titled book "Hard Luck" has Greg step in poop and mention that "normally, [he finds] poop as funny as the next guy" and remembers a man tripping and landing in horse poop as a time he laughed about poop.
* Diary of a Wimpy Kid, the first book has Greg be jealous of the attention Rowley is getting for his broken hand and so he bandages his own hand and claims that he has a "raging infection caused by a splinter that was left untreated", but that just weirds everyone out. At the end of the first book, Rowley also does the "arrow-through-the-head" gag.
* Diary of a Wimpy Kid: The Getaway: It's Greg's first time going to the airport and taking an airplane. Not only is he seated between a couple with a baby, but he also gets anxious over something happening to the plane after he watches the safety demonstration video (and he also gets worried about the turbulence and the pilots being allowed to move about the cabin), the passenger behind him puts his feet up on Greg's armrests, and he can't lean his seat back because he's sitting in the emergency exit row. Also, meals are only given to first class passengers. The Heffleys also have to alternate between who gets to sit in first class, but Greg never gets his chance due to the doorway getting blocked by the food cart after the turbulence hits.
* Diary of a Wimpy Kid, the Heffleys accidentally end up with a pet pig in "The Long Haul". So when they stay at a motel and the pig eats from the mini-bar, they have to pay for the food, and for breaking the "no pet" rule.
* Diary of a Wimpy Kid: The Last Straw. Frank is about to be hit by a branch in the river, Greg tells him to duck, and Frank is trying to look for a duck. It seems not to have ended well.
* Diary of a Wimpy Kid: The Last Straw. He normally wears contact lenses, but after breaking one of them must wear very thick glasses when attempting to meet Holly Hills at a skate park.
* Diary of a Wimpy Kid: The Last Straw, Rowley and three of his younger friends try to do the Hand In A Bowl Of Warm Water trick on Greg but he wakes up. One of Susan's books in her closet is called Bedwetting for Beginners.
* Diary of a Wimpy Kid: The Last Straw, when Greg and Rowley are being driven to a roller skating rink to impress Holly Hills and Susan overhears the conversation:
* Diary of a Wimpy Kid: The Long Haul, Greg and his impromptu pet pig (long story) both need to use the bathroom. Greg says "It was pretty awkward using the toilet with a farm animal sitting next to me, but I guess the pig was more embarrassed than ME, because when it was his turn to go, nothing happened."
* Diary of a Wimpy Kid: The Long Haul, he interprets his pig's circling motions as him also needing to go.
* Diary of a Wimpy Kid: The Long Haul: Rowley, aside from one flashback, is absent.
* Diary of a Wimpy Kid: The Long Haul that they have on their road trip. Beardo, the only "villainous" figure is... well, not. Most of the interactions Greg and his family have with him and his family are also tied into the bad luck, and his actions can be justified by his anger, even if he does take things too far at times.
* Diary of a Wimpy Kid, there's a Christmas decoration with a photo of Greg and Rodrick as young children bathing in the sink. This embarrasses Greg.
* Diary of a Wimpy Kid: The Ugly Truth: During Uncle Gary's wedding to Sonja, Gary's best man Leonard reveals that Gary was actually planning to break up with Sonja during the baseball game they were attending and start dating her sister instead, but before he could do that a plane flew overhead with a banner saying "Marry Me Sonja?" Thinking it was from Gary, Sonja accepted. Gary would have told her the truth, but he was afraid the guys around his seat would beat him up if he let Sonja down.

* Diary of a Wimpy Kid, the way his mother treats it later in the film makes it a G-rated case of this.
* Diary of a Wimpy Kid, three-year-old Manny Heffley invented two words: "bubby" (a term for brother) and "ploopy" (an insult).
* Diary of a Wimpy Kid-type nostalgia trip for adults) or the publisher (whose idea it was to market it as a kids' book).
* Diary of a Wimpy Kid unlike the typical nerd, but the trope is still there: Frank wants Greg to play sports, even if Greg hates them and would rather stay at home with comic books and video games.
* Diary of a Wimpy Kid. When Greg runs for treasurer, he uses posters with fabricated stories to smear his opponent. This gets him kicked out of the election.
* Diary of a Wimpy Kid: When Greg was younger, his mother Susan found out that he wasn't brushing his teeth, so she faked a call to the dentist asking if they had dentures for little boys to scare him into brushing. Greg claims that it worked so well that he started brushing his teeth at least four times a day (and he still does).
* Diary of a Wimpy Kid, whereas Zachary Gordon and Robert Capron all but vanished from the spotlight.
* Diary of a Wimpy Kid, where it is known as the "Dancing Mom" video. Greg himself also gets teased about it at school.
* Diary of a Wimpy Kid, where middle school students Greg and Rowley try to make an indie horror film. Their low-end equipment is "borrowed" from their parents, the only actor is Rowley, and their "special effects" are gummy worms and ketchup.
* Diary of a Wimpy Kid: Wrecking Ball: Greg overhears his parents talking about the "nasty grout" in the bathroom and assumes that the Grout is a monster. At night, he thinks he sees the shadow of the Grout in his room; when he wakes up, it's revealed to be a hockey stick leaning against a chair and covered in clothes.
* Diary of Luan Loud twin sisters being injured, and her pranks are way more mean-spirited than in canon.
* Diary of the Dead ends with the survivors uploading the film onto the internet from a sealed video editing room (surrounded by zombies, naturally). It is unclear that they ever emerge.
* Diary of the Dead footage of a S.W.A.T. team raiding a house. The elderly owners beg them not to open the bedroom door because (you guessed it), they are keeping their zombified family there. One bites the team leader, who becomes enraged and kills the old couple but deliberately avoids headshots so they will "wake up dead."
* Diary of the Dead has soldiers encounter the main characters at one part. They order them to turn off their camera (at gunpoint no less) and when it turns back on, the soldiers are driving away with all their provisions after terrorizing them for god only knows how long.
* Diary of the Dead. Later the actress is being chased by a zombie and she stumbles after her heel breaks for real. However instead of being killed by the zombie she just gets angry, throws her shoes at the cameraman (who is filming instead of helping her), knocks out the zombie herself, then abandons the cameraman to his fate.
* Diary of the Dead, one was used unconventionally — as an anti-zombie weapon. It was only partially successful.
* Diary of the Dead the pool house has zombies at the bottom of the pool. They were corpses at first... but then they reanimate.
* Diary of the Dead. The protagonists take a fatally-wounded friend to a hospital, only to find it deserted. It's only then that it really begins to sink in that the wild stories they're hearing on the radio are true.
* Diary of the Dead tie-in side city Monroeville (where the zombies are conveniently Romero-style zombies), a headshot is an instant kill.
* Diary of the Dead turns out to be ex-military and so the best person suited to guiding the teen-cast through the zombies.
* Diary of the Dead, when some EMTs are collecting bodies from an apartment and the cameraman who's filming them grouses about how one of their crew is eating his lunch off-camera, despite the gore.

* "Diary Queen", a Valentine's Day episode, aired on February 21, 2021 due to its' original airdate being pre-empted by the Daytona 500.
* Diary's in turn focuses on a group of soldiers who showed up only briefly in that film to steal some of the main characters' supplies.
* Diary: Writing about one's experiences and hardships can be therapeutic as it helps you to understand the situation. It gradually eases emotional trauma, relieves tension and establishes self-control.
* Diaspora are wormhole mouths. This is a rare example where the future member of the trio explicitly builds on the work of the real-world pair.
* Diaspora features a relatively in-depth look at the Polises, underground supercomputers simulating posthuman intelligences several times faster than real time.
* Diaspora features the "hyperdrive that can be only used between certain points" variant. Notably, its portals don't form a fully connected network; instead, the universe is divided into an unknown number of clusters of between 2 and 6 linked star systems. These Clusters are completely isolated from one another, barring somebody taking all the time and effort to send a slower-than-light expedition. Members of a cluster also tend not to be anywhere near each other in real space; it's possible they're not even in the same galaxy.
* Diaspora has grown hugely over the years, so when some characters temporarily sync with robotic bodies to parlay with humans, they're pained to know that time is passing 800 times faster "back home".
* Diaspora has made new attempts of getting rid of Bloom so she can have Sky.
* Diaspora. One of the latter groups is the Dream Apes, whose ancestors deliberately removed their capacity for speech and most of their sapience in a wholesale renunciation of modern society.
* Diaspora, quite a few advanced civilizations developed in the Milky Way, but they all ran away into other universes to escape an imminent galactic natural disaster.
* Diaspora, the characters pin their clock time to real time by the 'tau', a subjective measure of time that depends on the power of the hardware they're running on and the relativistic effects of galactic travel. "Rushing," where the character runs their clock incredibly slowly to wait for the Universe to do interesting things in a short space of perceived time, is often used to make the cosmology useful to the plot.
* Diaspora: The vast majority of citizens are artificial intelligences in virtual-reality communities. They're created in a process that mirrors biology, with a specialized software "womb" hosting a genome-like "mind seed" as it iteratively receives new information, shapes its environment, and develops itself until it becomes fully sapient. Though citizens can inhabit robotic bodies to interact with the physical world, most never bother.
* Diaspora this trope by using genetic engineering to remove their capacity for conscious thought.
* Diaspora with the ability to urinate; he muses that, much as he enjoys taking a physics-defying leak off his balcony in the morning, he's never felt any nostalgia for the human business of defecation.
* Diatribe of a Mad Housewife", when caught lying, Homer claims that he was writing fiction with his mouth.
* Diavolo's Stand in Part 5, King Crimson, is one of (if not THE) most powerful Stands in terms of raw striking power, with an A rank in Power and Speed. However, it has an E rank in terms of durability. This is why Diavolo tries to end his fights with a single strike, as he can't survive an extended assault.
* Diavolo's stand King Crimson does this a lot, most notably on Bucciarati, Abbacchio and Polnareff.
* Diavolo this for 10 seconds. The events occurring therein are 'destroyed' and remade according to his wishes, while others enter a fugue state and cannot remember even their own actions during the period. So for example, if in the middle of the erased seconds someone opens fire on Diavolo, he will make himself dodge if he wouldn't have normally, and when the 10 seconds end, the person will be puzzled as to when they picked up their gun.

* Diaz. Later in the same episode, they do the same to the New Recruits' own HQ as well.
* Dib and Skoodge, to the point that Dib wishes it was his mission to take over Earth instead of Zim, so Dib can turn him to his side and become friends.
* Dib and Viera quickly come to this understanding in Season 1 Episode 21, with him never bringing up her
* "Dibble's Birthday" has Dibble overhear his superiors discussing their (old, out-of-date) police cars, and thinks they're talking about him.
* Dib doesn't appear in "Walk of Doom", "Germs", "Attack of the Saucer Morons", "Plague of Babies", "FBI Warning of Doom", "Hobo 13" and "GIR Goes Crazy and Stuff", and appears but doesn't speak in "Abducted".
* DiBiase's son recently went through the process of trying to recruit such a lackey, he even lampshades it by calling the position "his Virgil". After
* Dib is still this, like in canon. For example, at one point he mentions not trusting pigeons, while at another he explains he taught himself to resist telepathy because he thought his third grade teacher was a government agent spying on him.
* Dib says at one point: "I know. The philosophical implications are quite...philosophical"
* "Dibs" by Kelsea Ballerini contains the lines "I know everybody wants you" and "Make everybody jealous".
* Dib's hair is like a scythe blade, pointing back over his head. Possibly hereditary, since his dad has a similar hairstyle, except it's shaped more like a lightning bolt. We do see in one montage into the future
* Dib's pregnancy, the pregnancy would have appeared much longer if you were reading it while it was being updated.
* Dib's Wonderful Life of Doom", after Zim gives up upon capture, he commands GIR to self-destruct, possibly to keep any secrets GIR might have known out of human hands.
* Dibujuegos, hosted by musician Manuel Wirtz and Sesame Street's Big Bird. No,
* Dib, when he learns that the Dibship used his name to join an emo forum.
* Dib whether his primary motivation is love of humanity or hatred of Zim.
* DiC after roughly 13 episodes. Apparently, Moore (who was also the original voice director) was very stressed with the workload the show brought her, and her duties were given to other people.
* Dicebox, Molly is missing the third finger on her right hand. As yet, it is not clear how she lost it, but flashbacks tend towards the bloody and freshly lost.
* Dicebox of having to coming back and fix what she had wrought in her personal and professional life.
* Dicebox, the Raffertys didn't want to break their long line of Marys. Hence Mr Mary Rafferty X.
* Dicebreaker, in a livestream of Johnny, Wheels and Lolies playing three-sided chess, ran into a situation where they couldn't, for the life of them, tell which direction a bishop was supposed to go when it ran into the middle part of the baffling hexagonal chessboard.
* Dice, Camera, Action! holds his own against vampires and giants despite being the only non-magic party member.
* Dice, Camera, Action!. However, as of yet neither series' storylines are related to one another.
* Dice, Camera, Action! was put on Hiatus in May 2019, after controversy arose due to an affair between castmembers and further controversial behavior of one of its stars. It was canceled seven months later.
* Dice Friends 5th Edition with occasional forays into other systems, mixing large campaigns with mini-campaigns.
* Dice Funk: Anne can speak a number of different languages, however her intelligence (or lack of) tends to get in the way.
* Dice Funk: Anne does this to Rinaldo in order to buff him with magic.
* Dice Funk Anne gets creative with her appellations for a monk named Milo, including "Musclebro Hardbody" and "Senator Suckshit."

* Dice Funk: Anne is a cleric, so most of her abilities utilize radiant light, including Sacred Flame, Warding Flare, and Radiance Of The Dawn.
* Dice Funk: Anne sees herself as this to the church of Avandra, although it is unclear if she is actually carrying out the will of the faith, or just overly eager and violent.
* Dice Funk: Anne speaks Common, Halfling, Orc, Goblin, and Abyssal. Unfortunately, she isn't quite smart enough to translate accurately....
* Dice Funk: Anne's suggestion for the evils plaguing the Pickman Academy.
* Dice Funk: As the party's fighter, this is Rinaldo's role, although his frequently poor dice rolls make it easy to forget.
* Dice Funk: Episode 17 begins an arc with this as the most pressing goal.
* Dice Funk has Algernon Sharp, a bishonen medusa boy who dresses in a flashy display of fashion. His eyes can't petrify you because he takes medication to prevent it, it's that kind of world.
* Dice Funk: In addition to healing magic, Anne is proficient in medicine and tries to help the injured quarry workers in The Church with her training.
* Dice Funk is ostensibly a comedy with a fantasy setting, but Episode 9 makes a hard right into horror.
* Dice Funk: Jess jokes in Episode 1 that Jayne will yell "Flaafy!" if she ever casts the spell Thunderwave. Guess what happens many, many episodes later?
* Dice Funk: Podcasts and Dungeons & Dragons are both improvisational media, so it's no surprise that a D&D podcast is made up on the fly.
* Dice Funk: Rinaldo concocts an entire alter ego, only for it to immediately fall apart under the slightest bit of scrutiny.
* Dice Funk: Rinaldo dual-wields morningstars. While this would normally be illegal in 5th Edition D&D without the Dual Wielding Feat, Leon uses the stats of a weaker weapon to allow for it.
* Dice Funk: Rinaldo has a sky-high Charisma score, yet always seems to fail every check related to lying. This culminates in a lie so bad that the episode was entitled "Lie Hard."
* Dice Funk: Rinaldo is introduced as a suave lady's man who hits on the first female NPC the party meets. He then proceeds to flirt with a number of male characters.
* Dice Funk: Rinaldo looks for a secret passage in every building. He has yet to find one.
* Dice Funk: Rinaldo pops the head of a mind-controlled miner using a morningstar during the campaign's first fight.
* Dice Funk: Seemingly ideal town with a dark secret? Check. Evil cult? Check. The Pickman Academy is even named after the Lovecraft short story "Pickman's Model."
* Dice Funk: Something that sounds an awful lot like a golem bursts up through the ground. The party fled so fast that they don't actually know if it was one or not, although they refer to it later as such.
* Dice Funk: Stoneroot is this trope scaled up to an entire city. Anne covers herself in dust just to fit in.
* Dice Funk: The campaign really doesn't begin until mind-controlled miners show up and attack the party in the street.
* Dice Funk: The headmaster of the Pickman Academy is so shady that the players wonder aloud if he will turn out to be the final boss somewhere down the road.
* Dice Funk: This trope is the reason Episode 20 is called "Pimps Stole My Blood".
* Dice Funk: Undead miners jump the party, but Johnny is insistent that they are not zombies. They were, in fact, ghouls.
* Dice Game uses a spinning die wipe effect after its prize is revealed.
* Diceman game comic - In one story if you chose to descend the stairs you'd meet a bunch of demons on the way up and get torn to pieces. The other option involved escaping through the window onto clotheslines.
* DiC Entertainment because they were friendly in their civilian selves and had already started to like one another in their secret identities.
* DiC Entertainment, bought out Hanna-Barbera a year after the show premiered.)
* DiC Entertainment cl byepisode "El Dorado: The Lost City of Gold", Grunt

encounters the ghost of a man claiming to be the older cousin of Francisco Pizarro. Grunt retorts that he is Ulysses S. Grant.
* DiC Entertainment continuation, the two-part episode "D-Day at Alcatraz" began with Cobra Commander, Destro, Metalhead and several Cobra soldiers being sent to Alcatraz. The warden mentions that they'll all be serving out sentences of 362 years. The Cobra soldiers are ultimately the only ones who are left serving out their sentences, as Cobra Commander, Destro and Metalhead manage to escape at the end of the two-parter.
* DiC Entertainment episode "Chunnel", Major Bludd gets peed on by the Queen of England's dog.
* DiC Entertainment had this happen in the episode "That's Entertainment", where General Hawk mistakenly thinks that Jackie Love and Fiona have died and is oblivious of the two surviving their fate and approaching him while he laments their assumed demises, initially thinking that Jackie Love calling for his attention is Captain Krimov trying to console him.
* DiC Entertainment list the studios involved, but not for any specific episodes.
* DiC Entertainment show, though, in most cases this was the result of a new figure for the character in question.
* DiC Entertainment. The Joes and the forces of Cobra manage to get away unscathed before the Headman's lair is reduced to rubble.
* DiC Entertainment, which has yet to feature the Headman and presumably has him still alive and incarcerated.
* DIC Entertainment which was based on the WWE (then known as the WWF) superstars of the era. The theme song was a Bonnie Tyler song called "Ravishing", however, this is a subversion of the trope since it doesn't use the actual song proper (it doesn't even feature any of the lyrics), just various musical sections of the song as an instrumental with occasional chants of "Hulk! Hulk!".
* DicePlayers roll these to determine or influence certain events in the game.
* DICE: The Cube That Changes Everything is a scrawny seventeen year old with a somewhat hunched back, dark circles under his eyes, and black hair (though most characters share the last trait). He's severely bullied by other kids and always seems to have the worst luck.
* Dicey Dungeons. Each turn, it copies one of the opponent's moves, chosen at random.
* Dicey Dungeons uses 6 as its magic number. There are six playable characters, who are all transformed into six-sided dice, with six challenges through six levels of Lady Luck's dungeons, and so on.
* DiC, he's never mentioned again. In the finale, he was only seen as an illusion cast by the enemy to distract Ami and kill her.)
* DiC his face, doesn't recognize him simply because he's changed his clothes.
* Dick & Dom in da Bungalow featured Geordie copper Harry Batt in his usual weekly appearance being wheeled in on a wheelchair, covered in bandages and casts and neck brace. His answer? He cut himself shaving.
* Dick & Dom in da Bungalow for good measure. Possibly the only show to buy custard powder by the tonne.
* Dick & Dom in da Bungalow, four years later, to explain himself. ("I'm a really nice guy when you get to know me".)
* Dick & Dom in da Bungalow: tinned tomatoes, mushy peas, baked beans, tapioca, rice pudding, custard, chocolate custard, mashed potatoes, mango chutney, spaghetti hoops. Oh, and from time to time they might get put in a bowl and have the ingredients for some recipe added to them (flour, lard, eggs etc). As one of the hosts put it; "You'd still be finding dried bits in your hair until the next week's show."
* Dick, and Damian) and extended Batfamily all use the same tech or variations on it to get around Gotham at night.
* Dick and his "family" observe what life is like on Earth and report the findings back to base. Their ultimate goal, however, remains vague throughout the series. We know they're not trained anthropologists, in part because they routinely received poor job evaluations but also because Dick and Tommy are clearly shown to be

experts in hard science while Sally is a soldier and Harry is their communication link to the home planet making him, effectively, equipment. Earlier episodes imply that they are not used to running into planets or lifeforms with diverse cultures or complex emotions. Most notably, their initial stay was supposed to last only a few weeks, long enough to copy over the sum of human knowledge and leave. When they discovered there was
* Dick and Jane books observe that "The milkman likes Mummy. She likes them all." Then comes Daddy and his shotgun...
* Dick and Jane. They were published for the public school market. A division of this company, the New Cathedral Basic Readers, were the Catholic School equivalent. They kept all the secular stories of the original, but would add a few religious-themed stories (ie, the kids read a Bible story, or buy a Blessed Mother necklace for their mom, or have a nun for their teacher).
* Dick and Kory were planned to be married with a miniseries planning to focusing their time on a honeymoon before Jonathan Peterson's departure as well as a change of management at DC unfortunately nixed those changes. Many fans of the pairing feel like it would've been better than the infamous 100th issue of
* Dick aren't exempt from ridicule. But since the name has been so deeply ingrained into the heads of comic book fans for over eighty years, it's highly unlikely that DC will change it (or even use a different "Richard" nickname, such as "Rick" or "Rich") just to stop a few immature people from snickering.
* Dick Armey, a U.S. Congress Representative. He not only didn't mind his name, but frequently joked about it.
* Dick. A wealthy Wall Street type, he flaunts his wealth in the face of brother, who is a struggling writer. He arranges an extremely expensive anniversary present for their parents — knowing that Jabez will never be able to contribute to it — insisting that he just wants everything to be 'perfect'. And when Jabez writes a token cheque to contribute to the cost, he cashes it even though he must know that doing so will leave his brother broke.
* Dick Barton—Secret Agent) stops playing, the Mark III stops and then drops out of the sky when the next selection on the tape was "The Funeral March."
* Dick Blaney crushes a glass in his hand while having lunch with his ex-wife in
* Dick Bremer, television announcer for the Minnesota Twins, personifies this trope when anything interesting on the field is happening.
* Dick Casablancas Sr. is pretty blatant about favoring his eldest — which ends badly.
* Dick Chalker was a mutant who could turn himself into a manlike dinosaur creature. He used his powers to commit
* Dick Cheney. It doesn't matter whether he's at the Republican National Convention, the campaign trail, having tea at the White House, apologizing for shooting another guy in the face, getting an apology from the guy that he shot in the face, or even making the official announcement that Bush has won re-election — he always has this look on his face like someone just ran over his pet dog a few hours ago.
* Dick Cheney (R-WY): Wyoming Representative and 46th Vice President of the United States.
* Dick Cheney serves as Secretary of State until a near-fatal heart attack causes him to resign. He is then replaced by John Danforth.
* Dick Clark and Alan Freed, who had ownership stakes in labels whose records they were pushing). The result was that many radio stations stripped their DJs of the authority to make programming decisions, with more power concentrated in the hands of the station manager.
* Dick Clark briefly noted the passing of announcer Bob Clayton shortly after it happened in November 1979.
* Dick Clark, "For now, Dick Clark... so long." He gave the salute just before saying the "so long" bit.
* Dick Clark has often been cited in various media as immortal, including in a song written for/about him by Benny Mardones. His passing in April of 2012, however, proved the immortality attributions to be not so accurate. Even before

that, he suffered a massive stroke that made his age frighteningly obvious.
* Dick Clark, in addition to everything else he did, hosted countdowns such as
* Dick Clark's New Year's Rockin' Eve that ensued (Alabama won 38-0!). If contradictory marketing was part of the plan, it definitely worked: ratings for the 2015 semi-finals were worse than the ones held only 364 days prior, and the organizers eventually decided to move the semifinal games off New Year's Eve in years when the Rose and Sugar Bowl games aren't hosting the semi-finals (the Rose and Sugar Bowl games are always held on January 1, or January 2 if the former falls on a Sunday, regardless of whether they are hosting semi-finals or not).
* Dick Clark suggested to the songwriters that they rewrite the song since the Bop craze was dying out at the time.
* Dick Dale sang about street races and cool hot rods rather frequently.
* Dick Dale will almost certainly recognize "Pump It" much better, the original is still held in the greatest esteem.
* Dick Dastardly does this with flair in "Camouflage Hoparoo," an episode from his own show,
* Dick Dastardly Stops to Cheat: The villain cheats during a race even though the hero has no chance of winning, which ironically gives the hero time to beat them to the finish line.
* Dick Dastardly Stops to Cheat: The villain could go ahead and just win, but they decide to cheat just for the heck of it.
* Dick Dastardly Stops to Cheat to go out of his way to screw over the other racers.
* Dick Dastardly was a consummate sore loser, taking having lost only one Wacky Race well — the debut episode "See Saw to Arkansas," where he stops his car just at the finish line so
* Dick Dastardly was supposed to be on the team himself, but he was cut.
* Dick DeBartolo (probably best known for having written in every issue of
* "Dick/Dickie" used to be a common nickname for "Richard" until it evolved into a vulgar slang for "penis". In English-speaking countries, a lot of Richards were at some point Dicks.
* "Dicked Down in Dallas" by Trey Lewis has him listing off all the sex acts that his ex is likely performing now that she's not with him anymore.

* Dickerson v. United States has become embedded in routine police practice to the point where the warnings have become part of our national culture."
* Dickey Lee's 1965 hit "Laurie (Strange Things Happen)" has a variant of this without the hitchhiking. The singer meets a girl at a dance, takes her home, and loans her his sweater when she mentions being cold. When he goes back to retrieve the sweater, her father answers the door and says she died a year ago. Something compels the singer to visit the graveyard, where he finds her grave with his sweater lying atop it.
* Dick Figures has Lord Tourettes getting shot in the chest, taking a meat cleaver to the head, hit by an anchor, and eaten alive by sharks while drowning in "Captain Red Rum & The Pina Colada Armada".
* Dick Figures: One of the most straightforward examples out there, in the episode "Zeusbag", Red and Blue have to enter a gladiator match with Raccoon. As they're about to die by his hand, Raccoon suddenly has to shit and apathetically forfeits the match running off screen.
* Dick Figures the hearts of all who look at it... Blue recently had eye surgery so

he is spared, but no explanation is given for why Red is immune.
* Dick Figures: The Movie, Lord Takagami uses his sword to do this to Col. Dingleberry. Neptune also uses his trident to do this to Trollzor.
* Dick Figures: The Movie, young Red says "Cuz I'm AWESOME!" and he and young Blue high-five. At the end, old Red says "Cuz we're AWESOME!" and he and old Blue high-five.
* Dick Francis, after retiring from being a jockey, started writing thrillers set in the UK horse racing world. Over time the scope of his work widened to include related areas such as horse breeding and horse transportation and eventually completely unrelated areas such as glass blowing and art. The book still must include at least mention of a horse, and sometimes horses start the plot.
* Dick Francis, a soon to be murdered character, lacking anything to write with, frantically uses a sharp point of a nail to spell out a vital clue on a piece of scrap paper by punching out holes to make the letters and hides it before he's taken away to be killed. The protagonist later discovers it and is able to deduce the identity of the bad guys from the short message.
* Dick Francis begins with a jockey shooting himself in front of a big racing audience.
* Dick Francis did a couple of stories with Sid Halley, a former jockey who became a detective after a horse crushed his hand in a fall.
* Dick Francis novel "Nerve", Rob the protagonist won't tell a doctor how he'd gotten injuries from being tied and hung up by the wrists in a barn, and the doctor distastefully concludes he'd been involved in some kinky orgy.
* Dick Francis where the protagonist meets a former nurse, who had cared for an older man's terminally ill wife, then after her death had married and cared for him until his death. Her home had been burgled in a manner suspiciously similar to the protagonist's cousin, which sets the mystery going.
* Dick Francis who is hired to sabotage a train with a bunch of valuable horses onboard and gets so carried away with it that he tries to destroy the whole train eventually, without even warning his client (a passenger).
* Dick Gaughan's "A Different Kind of Love Song" is a politically-charged folk song about why he writes politically-charged folk songs.
* Dick Grayson also speaks many languages including English, some Romani (though mostly from circus slang), French, Spanish, Russian, Mandarin, Cantonese, Japanese, the alien language of Tamaran, and American Sign Language. He is occasionally shown to have trouble reading Japanese though.
* Dick Grayson and every other character whose taken up the mantle of
* Dick Grayson, and his boss altering his cover to make him seem gay does not change their attraction in the slightest: The next time they're shown, they're discussing the respective qualities of his left and right butt cheek.
* Dick Grayson does this a lot, with regards to both his scaly green underoo Robin costume and his first, disco-ish Nightwing costume.
* Dick Grayson event, but when placed back in their normal universe, they fell victim to the Flashpoint reboot and are back to being on-and-off again. In the original stories, Barbara wasn't just slightly older nor still in her teens. She was in her early-mid 20's and a college graduate. Eventually, she was aged closer to Dick and given an eidetic memory to explain how she managed to complete school so quickly. Her term in the U.S. Congress (minimum age 25) was quietly retconned out.
* Dick Grayson has affectionately called Jason Todd "Little Wing." In turn, Jason has called Dick "Dickie Bird," sometimes affectionately and sometimes mockingly.
* Dick Grayson is guilty of this to a ridiculous degree. At one point in his publication had six simultaneous acknowledged love interests, and has been referred to as a "factory for broken hearts."
* Dick Grayson (Robin II), although it's almost entirely on Jason's side. Jason has inadequacy issues because he had to live up to Dick's example.
* Dick Grayson (Robin I/Nightwing) among the Batfamily that Dick will take over when Bruce is unable to be Batman. Although Bruce tries to hide it, everyone in not only the Batfamily but the entire DCU knows that Dick is Bruce's favorite son,

partner, and colleague.
* Dick Grayson (see Oracle and Starfire on his end, Red Arrow and Terry Long on her end).
* Dick Grayson's high school friend Craig Rockland went running into danger on occasion for stories for their high school newspaper the Owl. Some of his articles were later picked up by Gotham papers since he tended to write about things like the teacher's union that people outside the school had an interest in.
* Dick Grayson so he was covering for something. As Nightwing, he's less of this, being relatively well-adjusted, all things considered.
* Dick Grayson) the costume he wore when performing with Haly's Circus.
* Dick Grayson to kill him), the editors wanted him to be a swinging bachelor and free to do his solo thing.
* Dick Grayson used to get captured and tied up a lot during his old
* Dick Grayson was once accused of murder and had to fight to prove he was innocent.
* Dick Gregory: Legendary African-American comedian who later became a social activist.
* Dick Gumshoe and Maggey Byrde. It's rather obvious that Gumshoe has a crush on Maggey, since he feels a bit jealous of her being in a relationship with another officer(the murder victim of Maggey's debut case), and is intent on defending her, even if his job ends up making him testify for the prosecution. While Maggey's not happy about Gumshoe testifying against her, she
* Dick Gumshoe has a visible crush on Maggie Byrd, but also behaved as though he had a crush on Miles Edgeworth in the first game of the trilogy. He shows
* Dick Hardly. The first thing he does when he sees the Powerpuff Girls, he starts talking to Professor Utonium about making money out of creating more of them (note also that he's talking about his own former roommate's children). His total lack of regard of anybody but himself made him one of the most infamous villains in the series, and by far the more malicious.
* Dick Holler & the Holidays' "Double Shot (Of My Baby's Love)" takes the idea of being "love drunk" literally. The
* Dickie Dick Dickens has two narrators who tell the story in tandem, with the one often adding additional tidbits to the other's stated information. Occasionally they'll disagree with one another about what's relevant to the narrative, or contradict each other on minor details, but both tend to over-dramatize the events and nearly worship the titular character.
* Dickie Dick Dickens the day before. The embarrassed cops call it a day; Dickens dumps the weapons in Lake Michigan.
* Dickie Dick Dickens, the result of an attempt to get a new identity going south.
* Dickie Goodman in this style but was never able to fully replicate the success of his debut.
* Dickie Lee's song "Laurie (Strange Things Happen)" is about a young man who picks up a girl who needs a ride. When he gets to her destination, the seat beside him is empty, though he never stopped the car. All that remains is her sweater. When he knocks on the door with the sweater to see if she went inside while he wasn't looking, the person who answers is astonished to see the sweater. It belonged to his daughter, who was killed in a car crash at about the spot where the young man picked up the hitcher girl... 25 years earlier. The song was inspired by the urban legend of the Vanishing Hitchhiker. The young man of the song takes Laurie back to her home, leaves, realizes he forgot the sweater he gave her to keep warm with, and goes back for it. The person at the house tells him "She died a year ago today" and that she's buried in the local cemetery. He goes there to look at her grave, and finds the sweater folded up on top of it. So, even truer to the Vanishing Hitchhiker legend. All made especially effective and actually creepy by the disarming early 60's (made in 1965) music that accompanies this telling. Not surprisingly, Dickie Lee was responsible for about three or so of the songs that
* Dickie Roberts Child Star whose sole purpose is to be a one-off joke character, even appearing randomly towards the end of the film to kiss the titular character, then disrobe seductively.

* Dickie Roberts: Former Child Star has a number of cameos by famous child actors and Brendan Frasier is in the film.
* Dickie Roberts: Former Child Star that he's willing to dye his hair and have any necessary plastic surgery in order to play the lead in "Mr. Blake's Backyard" (after Reiner tells him he has the right basic look). He never gets plastic surgery, but during his time being treated like a child, he briefly dyes his hair in order to avoid being recognized by fans.
* Dickie Roberts: Former Child Star: When the mother decides to make Dickie have cereal instead of coffee for breakfast, Dickie looks in, remarks that there's a surprise inside, reaches inside, and flips her the bird.
* Dickinson: A couple of East Asian people are shown in Amherst during the 1850s, when very few even lived in the US.
* Dickinson: Austin is caught masturbating by his mother (unbeknownst to him, as his eyes are closed). She looks shocked and beats a hasty retreat.
* Dickinson: Austin masturbates with his eyes closed on the couch to get "inspiration" for writing.
* Dickinson (bisexual female main character, bisexual female supporting character, queer female romance)
* Dickinson: Due to the homophobia in their society, Emily and Sue's true feelings for each other must be hidden.
* Dickinson: Emily and Sue's relationship forms a core of the narrative, even as they're split apart by social pressures, plus their own feelings for other people.
* Dickinson: Emily and Sue's relationship is romantic/sexual, with them clearly in love. Naturally it's kept from everyone else, since this was completely taboo at the time. When they're once caught kissing by Austin, the pair then quickly pass it off as Sue doing so in "thanks" to Emily.
* Dickinson: It's mostly averted, but East Asian people are shown as friends and fellow students of the majority white young people on the series, which wouldn't have happened.
* Dick is a hero, Jason is a villain at the best of times and he and Bruce have a very rocky relationship.
* Dick is perhaps a very strong aversion of this, given his oft-noted penchant for seemingly-
* Dick King-Smith notes that chickens don't celebrate anniversaries of events, because they don't remember that far back.
* Dick Mackey won the 1978 running of the Iditarod Trail Sled Dog Race in 14 days, 18 hours, 52 minutes, and 24 seconds, beating Rick Swenson by
* Dick Marty report has been endorsed by the Council of Europe and the EULEX and there's a lot of evidence to back it up. It should also be noted that Albanian authorities have denied any cooperation.
* Dick Noble, African Explorer. A flying saucer immediately crashes into the studio.
* Dick, now calling himself "Carnivore", decided that Rick and Vic's deaths were on his conscience and decided to avenge them by killing every mutant on Earth so none of them could abuse their powers the way he did. Unfortunately, as he stepped out of his house to commence his killing spree, he was immediately killed by a truck.
* Dick O'Kane of USS Tang won the Medal of Honor for his last patrol — by ripping apart a Japanese convoy in a surface night attack, long after even Japanese escorts started carrying radar and making surface attacks incredibly hazardous. While Tang went down in that attack, she was sunk by her own torpedo — otherwise she would have escaped scot-free.
* Dickon Tarly does this to a Dothraki warrior who has Jaime Lannister on the ropes.
* "Dick" originally meant "fellow" or "chap," but also used to be a slang term for "detective." While it's still used today in American English as a nickname for "Richard" and as a synonym for penis, it's unlikely to be used seriously as "fellow" or "detective."
* Dick Powell musicals between 1933 and 1936. In fact, Ruby Keeler only appeared in three other feature films, one of them pairing her with then-husband Al Jolson.

* Dick pulled a version of this on Strudwick in the final episode of
* Dick Roman introduces himself as this in his first appearance when he and his Leviathans tear
* Dick routine. Some even like to ship him with Batman cause of their complicated relationship after Jason's resurrection.
* Dicks and outgoing producer Barry Letts were planning out Season 12 and decided "It's about time for
* Dick Sargent didn't have it much better. Nobody could see him in any role other than Darrin, and the only roles he could get were guest-star walk-ons on a handful of sitcoms. He mostly went back to stage acting after his on-camera career faded.
* Dick Sargent. He came out in 1991 due to the high suicide rate of young gay men.
* Dick Sargent instead of Dick York), because it was while he was in this state that he discovered that what was causing the slow sales of the food product he was promoting was not in the advertising, but in the taste itself.
* Dick Sargent who had committed the murder and that he was completely innocent.
* Dick's cousin Rick Chalker in frustration, he cut the top of his head off.
* Dick Seaton and Marc C. DuQuesne, mortal enemies at all other times, stand side-by-side with guns akimbo in
* Dick Shiner was a career backup quarterback. During a stint with the Atlanta Falcons, he became the first quarterback to officially achieve a perfect passer rating, when he led the Falcons to a 62-7 victory over the New Orleans Saints. He also set the record for highest score in a football game that the Falcons have reached. This is the only thing he ever did of note - he was a career second stringer who had one brilliant game.
* Dick Sittig created the "Jack Box" TV ad campaign for Jack in the Box and was the voice of the character from 1994 until 2015 when Jack in the Box hired a different ad agency.
* Dickson he doesn't want to give him the satisfaction of knowing that he beat him.
* Dick Spanner comprehensible dialogue in the entire show; everyone elses lines consist of a mixture of mumbling, blah blah blahs and the odd proper sentence. The only other character who gets real dialogue is a prisoner who keeps getting pre-empted by Spanners narration anyway.
* Dick Stockton at the 1975 World Series, where he was behind the mic on
* Dick suggested they kill Judith and make it look like an accident. When Mary refused, he replied "We're not going to make it look like an accident?!"
* Dick Swett, another former U.S. Congressman with a good sense of humor.
* Dick Tracy (1931-), even at the time of its creation, included sci-fi elements that made it influential on dieselpunk.
* Dick Tracy (1990). Big Boy Caprice captures Tracy and offers him $15,000 to join Big Boy's organization.
* Dick Tracy (1990), Tracy's Sidekick "The Kid" hitches a ride on the back of police cars.
* Dick Tracy, 88 Keys feels this way about Breathless Mahoney, whom Big Boy Caprice appropriated from one of his rivals after sending said rival to his death.
* Dick Tracy, actor Harley Naiv is disfigured in an accident and given a special surgery that, for an hour, allows him to look anyone he wants. "Putty-Puss" (as his gang calls him) starts robbing banks disguised as celebrities with the media calling him "the Man of a Million Faces." After being caught, Naiv breaks out of jail with Tracy surmising he'll go back to a criminal spree but...
* Dick Tracy: After Cinn murders George Ozone, she disposes of the murder weapon by hiding it in a stranger's coffin.
* Dick Tracy. After he was thrown in jail, Tracy gave the Mole a Christmas present, a care package with some simple gifts. The Mole had lived such a lonely, miserable life that the simple gesture meant the world to him. He went straight and these days is a good friend of Tracy and his family.
* Dick Tracy and address Gould himself who literally extends his hand to lift the Detective out. His publisher, Joseph Patterson, rightly concluded that this was an incredibly lame idea and ordered Gould to redraw the strip into something, anything, else.

* Dick Tracy and Mamma; then again with Heels Beals and Acres O' Reilly.
* Dick Tracy and preferred to ignore it. The current writer, Mike Curtis, is a fan of the Moon Period and has brought some of the Moon stuff back, but also gave Diet the above-mentioned explanation for his previous behavior.
* Dick Tracy and revived in 1983. The trope is subverted in 1999 when Pruneface falls to his death from a mountain cable car.
* Dick Tracy at this point, but being the RIAA's henchgoon is just a new twist.)
* Dick Tracy: Averted in the first BB Eyes story: Tracy and Patton have the gangster's mooks on the run and one suggests that they take one of the police cars for a faster getaway. That is shot down immediately by another roaring that they have no time to hotwire one.
* Dick Tracy battled Pruneface, spy for the Nazis and manufacturer of nerve gas.
* Dick Tracy, because if Tracy were found murdered, he'd be the prime suspect.) Just how they can make a person found dead tied to a chair in a boiler room that had exploded look like an accident is never explained.
* Dick Tracy, Big Boy Caprice used the Club Ritz as his base of operations, after forcing Lips Manlis to sign the deed over to him (right before killing him). The place offered illegal gambling to patrons, but Caprice mostly used it as a front for his gang's other crimes.
* Dick Tracy Breathless's backup singers perform or rehearse various dance numbers in short skirts and shorts (Breathless herself tends to wear long gowns, save for when she's trying to seduce Tracy) with there being occasional closeups of their legs.
* Dick Tracy, but it did give Chester Gould a chance to do some spectacular artwork that he couldn't have done otherwise. The scene where a murderer tosses a body out of the space coupe and leaves it drifting in the black sky is pretty chilling.
* Dick Tracy Crimestopper panel simply stated "When a crime is not reported, and no arrests are made, a "perfect crime" has been committed."
* Dick Tracy, Detective: After the Mayor's life is threatened, Tracy is on the phone to Tess and tells her that the Mayor is just a figurehead and that no one listens to him. As he is saying this, the Mayor and the Chief of Police enter his office behind him. As soon as he hangs up the phone, the Mayor starts fuming at him.
* Dick Tracy, Detective in the boiler room of an abandoned steamboat, Junior manages to grab one of the ropes that releases coal from the bunker and yank it. The coal spilling out on the floor creates a clatter that Tracy hears.
* Dick Tracy, Detective, Splitface attempts to bury a hatchet in Tracy's skull. He fails.
* Dick Tracy, Detective: Splitface hacks his victims to death with a surgeon's knife stolen from an undertaker.
* Dick Tracy, Detective The mayor served on the same jury as the murder victims back when he was a humble grocer, but never realizes this while discussing the murders and threatening letters with the police.
* Dick Tracy, Detective uses this trope to show the hysteria generated by Splitface's murder spree.
* Dick Tracy, Detective: When Tess is kidnapped, Junior jumps on to the rear bumper of Splitface's car and clings on to the spare tyre.
* Dick Tracy, Dick and the rest of the police are drawn fairly realistically — but his relatives B.O. Plenty and Gravel Gertie are like Popeye characters. The crooks that Dick pursues are also freakish, but they're supposed to be freakish-looking in-universe.
* Dick Tracy Discovering their beloved mayor was murdered and replaced by a criminal imposter, the outraged people of Chinatown decide to settle things their way. They draw from a jar of white marbles, one holding a black one but not saying who that is. The group go to the police station to confront the imposter, holding kerchiefs before their faces with one blowing a poison-tipped blowdart to kill the criminal. They're all arrested but only the guilty party knows who the killer was so the police are forced to let them all go.
* Dick Tracy Downplayed. The Kid is constantly trying to run away whenever there's

any talk of sending him to the orphanage. Once he actually gets sent there, though, the food isn't very good but he's otherwise treated okay.
* Dick Tracy, Dustin Hoffman's character Mumbles is subjected to a deliberately over-the-top example of this.
* Dick Tracy ends with the protagonist finally proposing to Tess, but still having to run off to handle a bank robbery in progress, showing that his job is likely never done.
* Dick Tracy episode where he destroys the game cartridge in a fit of rage.
* Dick Tracy first with Model Jones in the 50s (killed by her hoodlum brother) and then in the 70s with Moon Maid (killed by a car bomb aimed at Dick).
* Dick Tracy. For added drama, Tracy was trapped clinging to the underside of the car at the time.
* Dick Tracy for help, as a giant hand would come in and free him. His editor shot this down because... well, because it was a terrible, terrible idea. In the end, Tracy escaped by digging down and coming across a mine shaft, which he escapes into just as the boulder is about to crush him. An obvious lucky escape, but at least not a logic breaking one.
* Dick Tracy from crime drama (albeit with futuristic technology) to science fiction is one of the most infamous genre shifts of all time.
* Dick Tracy get rescued in time but only after a white-knuckle fake-out where it looks like wolves have gotten her!
* Dick Tracy gets a phone call from Stooge Viller saying that he and Mumbles have kidnapped the Retouchables (Hemlock Holmes' crew of police officers) for ransom. Tracy patches the call to Hemlock via their two-way wrist radios and somehow Hemlock is able to trace where the call came from.
* Dick Tracy getting lionized in the papers as folk heroes and decided to create a police detective determined to stop them.
* Dick Tracy had a classic scene where an actual lie detector was used for a great trick in The Blank story. Tracy has a criminal in custody who apparently knows who The Blank is, but he will not cooperate. So, Tracy convinces him to take an optional lie detector test and then asks him to look over some mug shots to indicate which one is The Blank. Sure enough, the criminal demands to be disconnected from the lie detector, only to be told by Tracy that by doing that he just revealed that the real identity of The Blank has a criminal record, a vital clue to work with.
* Dick Tracy had a seemingly far-fetched wristwatch video cellphone called the "Two-Way Wrist TV" that looked fantastical at the time, but now...
* Dick Tracy has a "2-Way Wrist TV" that carries the same function and used to communicate with police headquarters.
* Dick Tracy has run since October 1931, and the franchise includes the Warren Beatty/Madonna movie, some film serials, a live-action TV show, an animated adaptation and a radio serial.
* Dick Tracy has Tracy tossing his cookies in his hat after confronting the one villain he's truly unable to apprehend: Mucous Face.
* Dick Tracy. He feels honored when he gets arrested, and then breaks out of prison to do the same thing again. He's happily insane.
* Dick Tracy. He leaps from three stories from the window of an apartment on to the top of a parked car, crushing the roof of the car but surviving to limp away.
* Dick Tracy. He saw himself as a businessman competing, in addition to other cartoonists, with the other sections of the newspaper, such as the front page. He created many of his stories and characters from situations ripped from the headlines (Flattop, created in the mid-'40s, was named after a WWII aircraft carrier). Although he was in it for the money, he found this sense of competition compelled him to create memorable stories and characters.
* Dick Tracy. His syndicate publisher, Joseph Patterson, found it stupid so he told Gould to find another solution.
* Dick Tracy. However, the era between 1960 and 1979 is considered abnormally poor, with the addition of aliens and futuristic technologies, to the comic taking a blaxploitation theme, to Dick Tracy growing some jive facial hair. Then Chester

Gould dropped out of the production and was replaced by Max Allan Collins, who helped the series regrow by killing off almost everything that the jive era created in the comic until 1992, where more artists took over and the series started to degrade again.
* Dick Tracy. However, too often, he fell into having a character pushed as "hilarious" when in fact he wasn't.
* Dick Tracy: In a 1979 arc, a very pregnant Tess Tracy is kidnapped (along with Vitamin Flintheart) by aspiring punk rocker Bony and his girlfriend Claudine.
* Dick Tracy in its early decades had numerous villains taken down by Tracy by shooting them in the dead.
* Dick Tracy into being this. He was in his early twenties when the strip started, but in the 1980's he was declared to be in his fifties. For a while, Dick Locher even drew him with graying hair at the temples. The current writer and artist have pulled a soft retcon and declared him to only be in his forties, but he's still no kid any more.
* Dick Tracy is an authoritarian tyrant who believes brutal violence is the solution to all problems.
* Dick Tracy, is one of the examples of a street urchin who gets adopted. Also appears in the film.
* Dick Tracy is purposely designed to resemble a four-color Sunday comic strip brought to life, and as such, has no brand names. Tracy opens a can of chili that only has the word "chili" on the label, a medicine bottle has simply "aspirin" written on it, and a warehouse has a sign saying "Southside Warehouse" on it, and nothing else. The cars used had insignia and hood ornaments specifically made for the movie, both to look cool and avoid looking like any actual model.
* Dick Tracy justifies it with industrial magnate Diet Smith supplying Tracy's tech with continual upgrades.
* Dick Tracy: Little Face's henchmen do this with their (still-living) boss when they attempt to smuggle him out of the apartment where he had been secreted.
* Dick Tracy. Maay 'borrows' a flying space coupe from his employer Diet Smith and uses it to abduct Nah Tay by hoisting his car off the road. After killing Nah Tay, he uses the coupe to dump his body in orbit before returning the stolen vehicle.
* Dick Tracy—you had villains such as "Gummy Rings" causing problems until the Bardahl Detective showed up and set things right.
* Dick Tracy Meets Gruesome, Dr. Learned panics when she learns that Tracy knows that she stole the emperimental formula from the university lab. Dr. Thal decides to get her out of town and sends Gruesome to pick her up and take her to his cabin on the lake. However, when Gruesome arrives at the meeting point, he just guns her down, then returns to Thal and explains that she knew too much about their operation and he couldn't risk her falling into the hands of the police.
* Dick Tracy Meets Gruesome, Gruesome avoids Tracy in the morgue by lying down on a gurney and pulling a sheet over himself. Tracy walks straight past him without noticing and Gruesome is able to escape.
* Dick Tracy Meets Gruesome, Gruesome orders X-Ray to feed the helpless Melody (actually Tracy in disguise) into the incinerator in the plastics factory. However, Tracy wakes up in time to overpower him.
* Dick Tracy Meets Gruesome, Gruesome passes out and then freezes rigid after accidentally inhaling the experimental gas. Pat delivers what he thinks is Gruesome's corpse to morgue. When the gas wears off, Gruesome wakes up on the slab and casually lights a cigarette before seeming to notice where he is.
* Dick Tracy Meets Gruesome: In the darkened taxidermist's shop, Pat backs into a stuffed gorilla and immediately puts his hands up. when nothing happens, he turns around and comes face-to-face with the gorilla and yelps in panic.
* Dick Tracy Meets Gruesome that she stole the formula and replaced it with water.
* Dick Tracy Meets Gruesome, Tracy poses as the deceased Melody to lure Gruesome out of hiding.
* Dick Tracy moments during the chase, just so we don't forget who we're supposed to be rooting for.
* Dick Tracy: Moon Maid and Junior Tracy's daughter Honeymoon Tracy, who looked

perfectly human to start with (to the point that when the Moon People started being downplayed, there was no reason for a new reader to suspect she wasn't). Shortly after the new Moon Maid was introduced, reminding the readers of Honeymoon's origins, her antennae grew in.
* Dick Tracy, Moon Maid. The twist is that instead of being under the hood, the bomber, Little Lettel, preferred to place his bombs under the dashboard in the interior of the car.
* Dick Tracy movie once they find out that he has bugged their conference room.
* Dick Tracy movie, the Kid bumps into Tracy, then backs away, apologizing. Presumably, he'd have gotten away with it had Tracy's "watch", which is actually a two-way radio, not been attached to him via a wire.
* Dick Tracy: Mr. Bribery is dropped from a Space Coupe through the roof of the prison carpentry workshop: leaving a hole in the shape of his body, with outstretched arms and legs.
* Dick Tracy, murderous musician 88 Keyes kills his singer/accomplice and hides her body in his grand piano; planning to have the piano put into storage. As it is, Tracy caught the movers as they were just about to haul the piano away, searches it, and finds the body.
* Dick Tracy Newsuit Nan creates a totally reliable truth serum based on the blood of her target. Merely scratching a target with the toxin will place them in a trance and compel then to truthfully answer any question asked of them. She uses it to get Mr. Crime to confess that he as been cheating Panda and her out of their rightful share of the loot.
* Dick Tracy often punched out female villains, sometimes after cautioning them "Don't make me forget you're a lady!"
* Dick Tracy, often suggested by their names such as Pruneface, the Brow or Ugly Christine. When asked why this was, the author, Chester Gould said their crimes made them ugly.
* Dick Tracy: Old-time matinee idol Vitamin Flintheart (who is in his 60s more or less) and Kandikane Lane (who is about 30 at most).
* Dick Tracy. One story is that Milton Caniff was a bit baffled when Patterson chose this latter for the title of his new comic strip, because initially, he hadn't planned to include any character named "Terry", and also hadn't planned to include any pirates.
* Dick Tracy or why Pruneface is there as one of the six suspects in the first place when he doesn't appear at all. At least the graphics and soundtrack are good, but that is what keeps this game from truly being bad.
* Dick Tracy, prefaced almost everything he said with "As a matter 'a fact".
* Dick Tracy principle in maintaining credible suspense. Most notably, Junior Tracy's wife was murdered during Collins's tenure as writer. However, he conceded that Tracy himself would never die (though he frequently got badly injured), because he is the main character.
* Dick Tracy: Pruneface. Almost frozen to death in his original appearance in 1942, writer Max Allan Collins later revealed that he had been used in a cryonics experiment, allowing him to be thawed out in 1983.
* Dick Tracy's allies B.O. Plenty and Gravel Gertie used to be crooks. (Who later married and had a gorgeous daughter named Sparkle.)
* Dick Tracy, Sam Catchem nearly has his throat slit while getting a shave from Empty's girlfriend Bonnie the Barber.
* Dick Tracy's Dilemma covers a little over 24 hours. The film starts with the robbery of the fur warehouse. The insurance company has to produce the furs or pay out on the policy within 24 hours, and when Tracy visits Humphreys the next night, Humphreys says the deadline is almost up. No more than two or three hours elapse from that visit to the climax.
* Dick Tracy's Dilemma, the Claw's henchman Sam is startled by one of the Claw's multitude of cats jumps out at him as he is opening a door.
* Dick Tracy's Dilemma, the watchman killed at the fur warehouse manages to scrawl and conceal a note stating that three perpetrators performed the hit against the warehouse. It also mentions that they used a truck with the name "Daisy" on it and

part of a license plate. The note has the legitimately awful handwriting of dying man, and Tracy and Patton have to subject the note to forensic analysis to decipher the scrawl.
* Dick Tracy's Dilemma, Tracy realizes that the fur robbery was an inside job when he learns the thieves had the combination to the vault.
* Dick Tracy's Dilemma, Vitamin Flintheart impersonates him and takes his place on his pitch outside The Blinking Skull to keep watch for suspicious characters.
* Dick Tracy's Dilemma: When the Claw's henchmen Sam and Fred find him wounded and apparently dying, Sam persuades the reluctant Fred to leave him to die so they can sell the loot and only have to split two ways.
* Dick Tracy: Selford Depool does this to kill the hostess who had discovered his secret (that he was an escapee from the state asylum) and was taking the evidence to the police.
* Dick Tracy. Selford Depool is crushed to death when the parade float he has hijacked deliberately veers under a viaduct, smashing off the top part where he is hiding.
* Dick Tracy's enemies are like this. Flattop, Pruneface, Shaky, Mumbles, etc.
* Dick Tracy. Several of Big Boy Caprice's henchmen dress up as police officers, "arrest" Lips Manlis and take him to a warehouse to be murdered.
* Dick Tracy's first and most famous gadget is his Two-Way Wrist Radio, first used in the 1940s. Thus, the detective had a wrist communicator that was incredibly small and powerful for its day and the strip took maximum advantage of it for the heroes to get themselves out of sticky situations.
* Dick Tracy, Shakey does it to lose the pursuing Tracy in his climatic attempt to escape.
* Dick Tracy's strip acknowledges his wartime activities against spies such as Pruneface without dealing with the question of why Tracy still works as a policeman decades later. For example, Max Allan Collins wrote a storyline (later collected by Ken Pierce books as Tracy's Wartime Memories) to a hitherto untold story where Tracy battled Flattop, Shaky and Mr. and Mrs. Pruneface during World War II. Tracy appears in the modern era looking the same, while characters who appeared in the flashback story having aged decades. (Flattop stayed dead, as did Mrs. Pruneface, but Pruneface underwent revival from his hypothermic death due to the efforts of a sympathizer to the Third Reich.) Some of Tracy's children have visibly grown. In July of 2009 he visited his daughter Bonnie Braids. Sparkle Plenty has also grown into adulthood.
* Dick Tracy Still, these are exceptions; the strip generally averts this trope. Popular characters like Flattop have died and staying very dead.
* Dick Tracy strips (the final "Big Boy" continuity), someone points to one cop's extravagant lifestyle when they are looking for a mole inside the Organized Crime Unit. Tracy agrees that is suspicious, but far from conclusive.
* Dick Tracy: That is the job of Tracy's greatest enemy, Flattop Jones. In fact, he had a reputation as an "Ace Killer" since he was suspected in five murders. Unfortunately, Flattop got greedy when he was paid five times his usual rate to kill Tracy, and while the killer was extorting his employers for more before he really killed the detective, Tracy had enough to prepare his escape and call for help.
* Dick Tracy. The fact that his name is a play on blowing one's top is indication enough.
* Dick Tracy, the final Big Boy Caprice story by Max Allan Collins has him trying to kill Tracy with a million-dollar open contract on the detective. Eventually, the organized crime ruling committee, The Apparatus, confront Caprice and tell him that the contract must be canceled. In this case, this is a matter of professionalism considering that not only is murdering police officers stupidly bad for business but also Tracy has learned about the mob contract on him and has taken personal control of the department's Organized Crime Unit to retaliate. The Apparatus knows that they can't afford to let Tracy come at them full bore and so they must take action.
* Dick Tracy, these were a common appearance. The most notorious was Flyface, a man

so filthy that flies followed him everywhere. The later introduction of Flyface's family (who, including children, were all similarly disgusting) was apparently enough to get the strip canceled from a couple of papers.
* Dick Tracy: The title character's name. One storyline included the characters Chris Chendo, Virgil Ohso, and Phil Harmonic. Guess where the action is taking place.
* Dick Tracy to a screeching halt to focus on the antics of hillbilly couple B.O. Plenty and Gravel Gertie.
* Dick Tracy: Tracy and his partner Sam Catchem. Sam is actually his second partner. In the early days, he was teamed with Pat Patton, who was later promoted to Police Chief.
* Dick Tracy, Tracy's dog Mugg (a boxer) would often along with Tracy by clinging to the roof of the patrol car.
* Dick Tracy video game, Tracy can only arrest the culprit of each case. He cannot arrest the suspects he approaches, despite them sending out thugs to try and kill him when he goes to confront them. Needless to say, in real life, they would be arrested for attempted murder by proxy.
* Dick Tracy villain Dr Plain had a small flamethrower built into his artificial arm.
* Dick Tracy villainess Sprocket Nitrate always goes barefoot. It's such a trademark that just seeing a pair of bare feet show up in a panel is an instant indication that it's her.
* Dick Tracy villain Miss Egghead was obsessed with cockfighting and owned a stable of gamecocks.
* Dick Tracy villains are almost universally malformed and ugly. Prune Face is the most extreme example. The hero, by contrast, is a handsome square-jawed detective.
* Dick Tracy vs. Cueball and a distinctive method of killing: strangling his victims with his hatband.
* Dick Tracy vs. Cueball and encountering the real Boris Karloff's daughter, Sara, at a horror convention.
* Dick Tracy vs. Cueball is a running shootout between Tracy and Cueball in the rail yard. While attempting to escape, Cueball gets his foot wedged in the railroad tracks and is run down by a train as he tries desperately to free it.
* Dick Tracy vs. Cueball—drives his police car into a shopfront.
* Dick Tracy vs. Cueball, Simon Little has a secret passage concealed behind a bookcase in his basement. Cue ball uses it on multiple occasions to slip out when the building is under police surveillance.
* Dick Tracy vs. Cueball starts with Dick and Pat leaving Dick's birthday party after getting a phone call about a murder. At the end of the movie, Tess throws a second belated birthday party for Dick, and says this time the phone is staying off the hook. Then a shooting occurs outside the window, and Dick and Pat leave to investigate; much to Tess's frustration.
* Dick Tracy vs. Cueball: The Dripping Dagger, owned by Filthy Flora, is a gathering place for the criminal element of the city. It includes hidden rooms for criminals on the run that Flora rents out at an exorbitant rate.
* Dick Tracy was a criminal who had a floating array of dark spots in the front of his face where his eyes should be. Spots was killed in a street shootout with Tracy, the spots on his face dissipating upon his death, but his head was turned away from the reader, so his face still remained obscured.
* Dick Tracy was once held captive during World War II by a villain named Flattop. He hammered out a message with his feet in Morse code, which was heard and correctly transcribed by a young woman upstairs.
* Dick Tracy was one of the most ruthless (and frighteningly sane) murderers Tracy ever fought, despite missing an arm.
* Dick Tracy way possible. Gould's successor, Max Allen Collins, would eventually tone it down with Tracy deciding he can work within the changes to due process well enough.
* Dick Tracy. When Big Boy's minions try to break past the police cordon, Flattop comes out of his car shooting a tommy gun at the cops. He's riddled with bullets,

and as he falls to the ground he continues to fire his weapon in the air.
* Dick Tracy) when he falls from a helicopter and the bag of stolen gold and gems he had strapped to his back holds him headfirst underwater.
* Dick Tracy, with narration boxes each day saying things like "Can you solve the case?" and "Last chance to solve the case before Tracy!" However, it wound up being a Clueless Mystery, as the solution was based on which of the suspects had left their coat in the victim's office. When Tracy announced the solution, he explained that one of the suspects "didn't wear" a coat, even though that suspect (unlike the others) had said nothing about wearing or not wearing a coat. Later Minit Mysteries played this trope straight without purporting to be solvable by readers.
* Dick Trickle is the best known case, although he was born with the name Richard. But he was almost always called Dick.
* Dick Tucker, the easily aroused secret agent shorts pretty much speaks for himself.
* Dick Van Dyke. A deranged psychiatrist killed a hospital administrator who was going to recommend that Dr. Sloan(Van Dyke) be dismissed from Community General when he protested her bone-deep budget cut recommendations. The psychiatrist then called up Dr. Sloan and told him, "Now you owe me a favor." Dr. Sloan refused to play along.
* Dick Van Dyke has Dick explain the ride to Shaggy and Scooby as the three of them go through it.
* Dick Van Dyke. Problem is, by the end (when he really needs it), the coconuts have been covered in sand, and he is being chased by the irate islanders... Fortunately the pilot in the plane overhead rightly assumes him to be a non-native specifically because he is clearing coconuts spelling "HELP" in the sand with a palm branch.
* Dick Van Dyke, which used his name for the title but not the character (Rob Petrie).
* Dick Whittington. The hankies used as bindles are almost always red-and-white polka dots, for some reason, probably due to the high contrast and visibility.
* Dick. Who are also responsible for the 18 minute gap in Nixon's tapes.
* Dick Winters does this several times throughout the war. He drops into Normandy as a 1st lieutenant in command of a platoon, but ends up commanding the company because his CO is MIA (turns out, the CO never even set foot in Normandy — his plane blew up on the way). Later, when Major Horton is killed during Market Garden, he becomes battalion XO.
* Dick Winters never calls his friend Lewis Nixon by his full name. He's either 'Lou' or 'Nix'.
* Dick Wolf, to create a character with more stability and sex appeal.
* Dicky Bennett. Everyone knows what actually happened but an unbiased jury would have probably acquitted barring more incriminating evidence.
* Dick York due to a back injury and resulting pain killer addiction resulted in him being out of the spotlight for a few years as he focused on recovery. When he attempted a comeback a decade later, he only booked one or two small things due to being out of the Hollywood loop for so long. He never acted again after that.
* Dick York, was forced to retire due to back problems. The pain was so bad that he ended up falling and biting through his tongue.
* Diclonius Silpleit # 3 died quickly in a flashback, but not before infecting Kurama and his original assistant with the virus that caused their children to be born Diclonius. This led to Mariko's birth, the realization of the manner of Diclonius propagation, and down the line, the existence of Lucy.
* DiC lumped all of the show's villains and monsters from the first two seasons into a single evil force called the "Negaverse".
* DiC (Sailor Moon #2) and Mary Long (Molly/Naru and Katzy/Koan #2) assistant directed some episodes.
* DiC-season since Cobra always seemed to have strategic intel that was only discussed in very confidential meetings. After investigation, none of the Joes present was found to be a spy, but General Hawk always brought his favorite cookies to the meetings and Cobra programmed a collection of robotic cockroaches to seek

these cookies out.

* Dictionaries of Canadian place names often state that Antigonish (in Nova Scotia) is a Mi'kmaq place name that means something like "The Place Where Bears Get Beech Nuts from the Trees". While Antigonish is indeed of Mi'kmaq origin, and the Mi'kmaq name for the place does translate that way, Antigonish actually means something more like "The Place Where Two Rivers Enter the Bay at the Same Place" and isn't a place name at all.
* Dictionaries; they are always a work in progress. Examples get updated, new ones are added, old ones are removed, and it can go on for centuries. In fact, the only thing that really stops the process is when a publisher decides not to release any new editions or goes out of business.
* Dictionaries with a lot of tradition behind them are sometimes accused of this when they add "fashionable" words to their listings. For instance, the Oxford English Dictionary was mocked around the Internet after it added the entries "OMG" and "LOL". However, as language is something that constantly evolves, this trope might only be natural for dictionaries. After all, dictionaries aim to record the language as it is being used today, and the OED records English from all eras, whether they be neologisms or words that have been obsolete for centuries.

* did air were the ones with the biggest-name celebrity guests meaning they had very in-industry storylines and didn't properly introduce the characters. We only saw his character's wife once and never saw his kids, which wasn't the intention...
* did alter reality so that she'd appear to be a normal high school student and not a freaky-ass vengeance demon. She didn't account for the possibility that she'd lose her powers and be stuck that way.
* Did Anastasia Survive? (Tsar Nicholas II's youngest daughter) somehow escaping alive from the carnage. Though such claims about the princess' alleged survival have been proven false.

* did, and misblamed him accordingly. Some acknowledged that he hadn't written the screenplay, but said that he should have rewritten it himself and so still deserved blame (which is a slightly more valid viewpoint, though rather naive of how things generally work in Hollywood).
* did a number on his lifespan, and he ends up passing away in his mid-sixties.
* Did anyone really think that Jack freakin' Bauer would die? At all? Between Kiefer Sutherland being an executive producer since back in Day 2 and the show's tendency to kill off or disappear any CTU members who also tried to get on the action, the premise of
* Did anything interesting happen in the thousand years between Nightmare Moon's imprisonment and the pilot?
* did anything until much later, but dwarves are technically the oldest mortal race in Arda, having been created by Mahal (the dwarven name for Aulë) and granted souls by Eru long before the elves or humans awakened.
* did appear in a few Tijuana Bibles and Snow White, Jasmine, Ariel and Jessica Rabbit are favorite targets of internet porn maestro Julius Zimmerman.
* did appoint his horse, Midnight, as his heir to his previous heir, with whom he was having an argument. "If a horse's ass can be a Count, why not the whole horse?"
* did arrive, thus allowing you to avert the Bad Thing you came back to prevent, but in all likelihood there's going to be another Bad Thing that's just as cataclysmic rolling down the track in its place, which will send the newer, younger you traveling back through time to fix that (Chuck has apparently done this at least five times).
* did a subverted version of this trope. In his younger days he pined after Maude Gonne, who spurned him and married an abusive monster named John MacBride. After John MacBride's death Maude still refused Yeats' offers of marriage, so he finally proposed to Iseult Gonne, Maude's illegitimate daughter, who was born before her marriage to MacBride (he was 52 and she was 23). She turned him down, but apparently they became good friends and Yeats was something of a father figure to her.
* did At the end of the episode backup is called and the Middle Eastern men are arrested and Ed and Gin are viewed as heroes who stopped "terrorists" and Freddie makes a full recovery.
* did believe the election had been fair. At the same time, Democrats, invigorated by the win in the presidential election and recognizing the way in which the "stolen election" rhetoric could backfire, mobilized their own voter base. Come January 5th, Democrats Jon Ossoff and Raphael Warnock not only defeated Perdue and Kelly Loeffler respectively, but won each election by a recount-proof margin.
* did, but he also had a peer group of one, and that one was a rather poor influence.
* did cheat on her with his new coworker, although they reconciled at the end. In another episode Joe regains the ability to walk after an experimental medical procedure. He states that he's leaving Bonnie, who then shoots him in the legs at point-blank range to re-cripple him and make him dependent on her. At best, Joe and Bonnie appear to get along. At worst, they seem to genuinely hate each other.
* did check if the number was not in use, they only checked in the Detroit area, which supposedly resulted in a slew of calls asking for the Marvelettes to people who really had BE4-5789 as their phone number. Coincidentally, the number is one digit away from the below-mentioned "634-5789".
* did clean up first to the point Gordon noted it was the cleanest kitchen he'd ever seen on the show. Too bad the owners were absolute lunatics with horrific food, treatment of staff and egos that drove Gordon to just quit on them.
* did commit. And because of double jeopardy, he can't be tried again.
* did create an interstellar spaceship, but not every story is Barks-Rosa canon...
* did demonstrate this trope comes from the Entente Cordiale's wartime propaganda about the battle. This propaganda claimed that the Operation's mastermind, General von Falkenhayn, had wanted to take the fortress-sector of Verdun and that when he failed to do so he lied about never having wanted to do that. This was untrue. Falkenhayn had not wanted to actually take Verdun, as trench warfare made attacking

very costly. Rather, he had wanted to provoke the French into attacking an area where the Germans could mount the strongest possible defense. Unfortunately, the German field commander at Verdun — Crown Prince Wilhelm — abused his operational autonomy by abandoning Falkenhayn's plan and trying to capture Verdun. These attacks failed with heavy losses, rendering the German forces unable to defend against the French attacks which followed.
* Diddy-Dirty Money and urban stations as the former (and it tends to be associated more with its featured vocalist — despite the fact that she was far less famous than he was going into the song).
* Diddy Kong gets recoil from his Peanut Popgun when he shoots it. He also gets more recoil the more he charges it before firing it.
* Diddy Kong has a high-pitched, raspy voice courtesy of Andrew Sabiston. The Japanese dub has him voiced by
* Diddy Kong is often called a chimpanzee (and, in some instances, referred to as Donkey Kong's nephew), even though he has a tail.
* Diddy Kong Racing, after Wizpig is defeated a second time, he loses control of his rocket that blasts off into the stars and blows up. Though once the ending is over, Wizpig's ship appears flying over the horizon, capping off with his signature laugh.
* Diddy Kong Racing, at one point, the host mentions someone stuffed a bag of acorns into the tailpipe of Krunch's plane, with Conker being the primary suspect.
* Diddy Kong Racing can fall under this category. The items return, the stage layout, while with way more turns and dips, do not require you to perfect every boost, and Wizpig himself is less intimidating than he is. He is actually slower than his running counterpart.
* Diddy Kong Racing follows on the footsteps of Mario Kart and adds its own twists, like Boss Battles and different vehicles, plus a surprisingly elaborate overworld.
* Diddy Kong Racing. Giant stone spikes, electric fences and spaceships shooting at the player character are probably not what most people would expect from the "fun" part of the name.
* Diddy Kong Racing had a Diddy plushie, but these were later sold individually.
* Diddy Kong Racing introduced the current design for Tiny Kong, who now looks considerably more developed than her older sister Dixie Kong.
* Diddy Kong Racing. It was going to include the entire Kong family instead of only Diddy, and instead of racing in karts, planes, and hovercrafts, players would race on elephants, birds, and other jungle animals. The project was canned once Rareware left Nintendo for Microsoft.
* Diddy Kong Racing plays it straight with Diddy, naturally. In the remake, Dixie joins him in this regard. Timber is also one.
* Diddy Kong Racing's voice track was redone for its Nintendo DS re-release in the mid-2000s from its original N64 release. This was pointed out in X-Play's review for the re-release with Morgan Webb saying "I miss the old Genie!"
* Diddy Kong Racing was originally to be used for the Pirate Lagoon course. For whatever reason, the finalized game re-uses the Treasure Caves theme, though the song is still present in the soundtrack as that 65th entry.
* Diddy Kong Racing) Wizpig race is considerably more forgiving thanks to more freedom of maneuverability and not needing anywhere near perfect play.
* Diddy Kong tends to give off this vibe thanks to his large eyes, red baseball cap with the Nintendo logo on it, long prehensile tail, and rather adorable voice.
* Diddy Kong tournament. After a video of well-known player Hungrybox ragequitting out of annoyance (at Manny) became widespread, the meme became accepted. However, when the combo eventually got patched out due to the controversy, the meme abruptly faded away.
* did even includes the golden pyramid tips, though in-game, the pyramids are only shiny, shiny white.
* did exist in real life, albeit briefly and with a more limited purview) as well as disfigured.
* did exist, they were typically intended for decorative purposes and to serve as a way to take in the whole world at a glance. During the Age of Exploration,

depictions of peoples and creatures reported by explorers were also used as a way to show the cartographers were up to date on the latest discoveries and thereby that the map was itself the latest in accuracy. Maps used in actual navigation were largely devoid of artistic license.
* did explain this one with the Umbilicus that Dr. Forrester used to send stuff to Joel and the Bots. Later on, after Dr. F's funding is cut and he detaches the Umbilicus, Observer, aka Brain Guy, uses his ultra-powerful consciousness to magically pop anything Mike and the Bots need into existence.
* did fall for her trick... but let her get away with it out of sympathy for the newcomer.
* did find and capture them; we'll never know if they would have ultimately escaped justice since the father murdered them in cold blood before their trial, obviously not wanting to take the chance that they would be caught or acquitted if they were caught.
* did for his parent's "accident" so he could inherit their fortune as a kid. Instead, he had to spend decades taking care of his mentally damaged mother before she finally passed on from cancer to let him get the money he wanted.
* did get back to Brooklyn once, only for Bowser to follow them and invade, which causes the Princess and Toad to go to Brooklyn and attempt to help the Mario Bros. Mario and Luigi returned to the Mushroom World after that. Another episode also showed Mario and Luigi having one chance of returning home, only for them to pass it up since they couldn't simply leave the Princess behind, even though she wanted them to go after she got captured by Bowser.
* did get his place wiped out by a tornado, logging on three days later from his laptop — all he had left from the storm. Another time "brb fire" was due to a fire in a neighboring apartment which the player had to go help put out, and another time "brb cops" involved the player's roommate being suddenly arrested by a SWAT team, to the surprise of the player.
* did get one of his fingers accidentally bitten by Joe Pesci (who played Harry) which left a permanent scar.
* did get stabbed through the chest four times and was still able to ask for someone to pry her off the wall she'd been stuck to. Oasis, meanwhile, managed to survive for several days with untreated knife wounds in her stomach.
* did get the girl. This is implied to happen rather frequently in Arendia, always ending in war. Garion notes that this is tragically typical of Lelldorin.
* did gloat out all his plan. Only he did it securely alone, to the mirror, in order to get the urge out of his system.
* did goal, there was much celebration of a 40-year-old injustice being righted.
* Did Granger Taylor really make contact with aliens and leave with them like his note said, or did he just die during the vicious storm that happened the day of his disappearance?
* did grow their hair out again, which was then tied up every day in a very elaborate style similar to what brides wore.
* did. Had the won, they would've replaced the Time Lords as the dominant race with magic being the common phenomenon. So in general, magic vs science actually occurred and magic lost.
* did happen." It's clear to see where it was supposed to be, as they left in Geordi's reaction shot. Subsequent mentions seem to differ on whether or not this line was in effect.
* did have a fan made patch that made it possible (which was taken down after a cease and desist order), there weren't any actual codes to achieve that effect. The rumor still had massive pop-cultural influence, enough to receive several references and parodies:
* did have a lot of office-based episodes, he was frequently seen on the streets leading his team. Even Detective Superintendents with AMIP would be doing actual police work as the Senior Investigating Officers of murder enquiries.
* did have a sister who was an actress, should they ever want to go that route later on in the series...
* did have a Tiger tank, in the town square during the second mission, but it was

essentially a set-piece and was never a threat. Though the preview for the game showed the cannon moving, the tank just sat still the whole time.
* did have D-III championships, were allowed to continue fielding their D-I teams, and all other schools that had been "playing up" were allowed to continue doing so.
* did have good reason to run). See the example under Literature below.
* did have invisible passive effects only added fuel to the fire. Later patches which made the effects of "Treasure Hunter" more explicit largely killed these rumours off.
* did have the resources, historically often the rest would be enslaved.
* did have to pick your words carefully. One mistake can mean millions of dollars wasted in doing something the "wrong" way.
* did. He recounted one story that he liked about how one time the Air Cavalry were under fire from the enemy but decided to catch a cow with a net and air-lift it with a helicopter simply so they could have it for a barbeque. Robert Duvall then mentioned that the depiction of soldiers getting high on drugs was accurate as well. All in all, Vietnam wasn't a war that a good majority of U.S. service-men took seriously.
* did. He's also the only member of the Legion of Doom who actually cares about the team's cohesion instead of explicitly being in it for himself, like being willing to return Chrysalis' power, and at least tolerates Cozy Glow's attempts to befriend him or unite the team with friendship.
* did however, although it was a bigamous arrangement with his two sister-queens.
* Didi and not a fake tail and just said she doesn't want a Halloween party hosted at her house because she had "plans".
* Didi Conn, Frenchie in the film, plays a diner waitress VI - who in this version encourages the TV version's Frenchie (Carly Rae Jepsen) before her songs "All I Need Is an Angel" and "Beauty School Dropout". A production photo shown entering a commercial break shows Conn joining the 2016 Pink Ladies in their trademark matching jackets.
* Didier - a dog turns into a man and is recruited in a professional football team
* Didier, the team needs one more point to win against the PSG. Of course, Didier marks. After turning back into a dog.
* Did I Ever Tell You How Lucky You Are?, the people of the town of Hawtch-Hawtch discover that the town bee works harder and makes more honey if someone watches it. Then they figure that the bee-watcher will do a better job if someone watches him, so they hire a bee-watcher-watcher....
* DiDi has so many boyfriends that she can't remember their names. For example, she calls Erik "Armand", "Philippe", "Derick" and "Jerry".
* Didi. Her eyes are shown as dots without the glasses, e.g. in the "Mirror Land" episode.
* DiDi, it is increasingly clear, is fundamentally disconnected from normal reality.
* Didijin and Minelli, two Venezuelan jeans companies, used a lot of covers of popular songs for their TV commercials, with lyrics changed to talk about how good their jeans looked.
* Did I Just Say That Out Loud? even though it's something they don't want others to hear.
* Did I Just Say That Out Loud?: Oops! I should have just kept my big mouth shut!
* Did I Make the Most of Loving You?, it is explained that twelve individuals retained their memories of the future to guide it onto a better path, with each time traveller symbolically representing one of the twelve Lords of Kobol (Cavil can be seen as representing the thirteenth tribe of Cylons);
* Did I Make the Most of Loving You?- the only time-traveller unaware of the identities of all twelve Cylons- the identities of the Final Five, Billy apparently spent ten minutes in stunned silence before he was able to squeak out a response.
* Did I mention that keys are one use items and you need to buy one for every crate you find? You can't even recycle crates into scrap metal if you don't want to use them, your only option other than opening them is to junk them. (Thankfully, crates drop in addition to rather than instead of normal drops.)

* Didi Mocó accidentally bought several stuff while talking to other people in an auction.
* did (including finally figuring out what all this fear stuff was about).
* did, in fact, manage to reverse-engineer Samus' various beam weapons, and her Thermal Visor seems to be a Pirate creation. It seems that the Pirates probably had the wrong idea of how Samus goes into her Morph Ball.
* did in the remote parts of a few Canadian provinces, but not where they were also the arresting officers. Judges have always been unable to hear cases in which they are also witnesses, as that would be an obvious conflict.
* did invent the Philosopher's Stone. The real Flamel was a successful French scribe and manuscript-seller. He gained a large fortune for his era, owned much real estate property, and had the reputation of a generous philanthropist. In the 17th century (2 centuries following his death), a number of texts started claiming that he was a fabulously wealthy and immortal alchemist. His reputation has since grown mostly due to the legends about him.
* Didis Comedy Show German sketch show series starring comedian Dieter Hallervorden.
* DiDi's sexual frustration becomes more and more prominent over time — though this may be considered a matter of
* Didi's unnamed boyfriend is played by an actor/motivational speaker who is missing both legs and one of his arms.
* did jog out to congratulate his opponents when the turnover happened, but still technically left the field before the game was over.
* did kick in rather quickly, however. Of course, Saffron doesn't exactly care about the safe dosage.
* did kiss for a short moment. It's open for the reader's interpretation.
* did know to disappear and it was implied from conversation with the mother (before seeing the girl) that the daughter had done the hitchhiking-then-disappearing trick to several others before the protagonists. The reason the ghost girl cannot disappear is that the narrator's uncle had her buckle her seatbelt before giving her a lift - a seatbelt which sticks and she is unable to open to disappear in time.
* did leak Prowse's line to the media, so this fake line was a very prescient maneuver whether the leaker was Prowse or not.
* did learn his artillery tricks from Bonaparte) and something like two hundred heavy cavalrymen, they managed to hold off the attacking Austrian column (more than 5000 men) long enough for General Desaix to get the reinforcements into battle formation).
* did long enough for her to free the unicorn. She got knocked out immediately afterwards.
* did lose its incredibly complex and powerful tense system and is still leaking cases, Russian is a remarkably slow-changing language. A 12th-century epic poem "The Tale of Igor's Campaign" is still understandable to the modern speaker, for example. Even the 9-10th century texts (like the Novgorodian birchbark letters) can be figured out by the readers uneducated in the language. Old Russian also gave birth to Ukrainian and Belarusian languages which are in some aspects (especially grammar) closer to Old Russian than modern Russian is (which was based on local version of liturgical (so called Church Slavonic) language rather than on vernacular Old Russian).
* did lose; the Viet Cong were basically annihilated in the aftermath of the Tet Offensive, and the current Vietnamese official military history concedes that they controlled basically no territory in the south by 1969. This failed to make much of a difference because the North Vietnamese simply replaced the South Vietnamese insurgents with NVA regulars instead, who infiltrated through porous borders and were kept supplied in their guerrilla war from the north. South Vietnam was ultimately conquered in a large armored offensive by the regular North Vietnamese Army.
* did love Elliot and wanted to be his girlfriend, but has changed her mind after noticing that he only talks about camp and is really planning to end their short-

lived relationship.
* did manage to avoid relegation by winning on the last day... but it was highly controversial in West Ham's case, as the goal that meant the difference between survival and relegation for them (and by extension sent down Sheffield United) was scored by Carlos Tevez, who was playing for the club under an arrangement later ruled to be illegal.
* did matter. Nowadays, Arsenal has the rather derisive moniker of being "strong against the weak and weak against the strong". Unlike Liverpool, they don't have a rich Champions League history; before they reached the 2006 final against Barcelona, Arsenal had never progressed beyond the quarter-finals. This lack of Champions' League pedigree is a source of frustration to both the fans and manager Arsène Wenger, who could probably win another double armload of Premier League titles and still consider himself a failure if they didn't add a Champions League championship.
* did mention there should be a way to get free pizzas without them coming cold. In the end, Garfield wondered if there was some Chinese place that also promised to deliver in thirty minutes.
* did much the same thing to his daughter), and got his son in on it too. It's sickening knowing that there are probably countless others like this in the world who remain uncaught.
* didn’t disclose his accident to the press because he was worried about a young girl’s future. (He crashed trying to avoid her as she was ran into the street playing with her ball.)
* did not care. This from a legion that once valued brotherhood above all else. When the World Eaters' Primarch Angron finally led them to damnation by pledging them all to Khorne, one of the first things he did to cement his new allegiance was to slaughter the few psykers who didn't have the Nails. These psykers thought of themselves as War Hounds to the very end. The World Eaters no longer have any psykers in their ranks, which is just how Khorne likes it.
* did not deviate from this with K.S. Wan. This was particularly noticeable because computer printouts always featured the owner's user ID in enormous letters.
* Did Not Die That Way: A character finds out they have been lied to about a loved one's death.
* Did Not Die That Way: A family member's death turns out to be not what a character thought it was.
* Did Not Die That Way: Discovering that you've been lied to about how a loved one died.
* Did Not Die That Way: Someone lies about the cause of someone else's death.
* Did Not Die That Way: When someone finds out that they were lied to about a loved one's death.
* Did Not Do the Bloody Research: A work imported to the United Kingdom causes controversy over using words that are unintentionally offensive towards Britons.
* Did Not Do the Bloody Research was a play on "Did Not Do the Research", which was cut.
* did not downplay or ignore the aspects of Army life that include combat in godawful climates and receiving wounds.
* did not get that memo with Kuwait. However, the former has utilized proxy states as a cover and the latter's conquest was undone quickly, somewhat reinforcing this idea.
* did not get that name by accident, depicts a woman wearing one sword, conventionally scabbarded on the hip, and another at her back with the hilt above one shoulder, no doubt for an even quicker draw of a second weapon.
* Did Not Get the Girl: No matter what they do or how hard they try, the character will never get the girl/boy.
* Did Not Get the Girl: The end result of unrequited love is not hooking up with that person.
* Did Not Get the Girl: The main character does not win the affection of the person they loved.
* Did Not Get the Girl: The one you love ends up with someone else instead of you.

* Did Not Get the Girl: The protagonist doesn't end up with their love interest for one reason or another.
* did nothing but pick on his younger half-brother Isaac, and she saw to it that Ishmael and his mother Hagar were sent away from Abraham's household. Ishmael later went on to become the forefather of the Arabs and, eventually, the Muslims. Though, considering that Ishmael was the son of the slave-woman Hagar (who was effectively acting as surrogate mother since Sarah was infertile) and Sarah's idea of sending them away involved having them abandoned in the desert to die of dehydration, it is debatable who was the real monster.
* did notice, but were too polite to blurt out "Hey! You look just like Eric Morecambe!" to a complete stranger who was likely well aware of the fact and heartily sick of his friends and relations making jokes about it.
* did notice her, they were just pretending to not see her until they couldn't keep it up anymore and burst out laughing.
* did not recover the groove gauge at all, in addition to judgments other than Rainbow MAXes draining the gauge in the process. Thankfully, this was fixed ASAP.
* did not sit well with the Doctor. Additionally, Dalek/Time Lord hostilities and smaller skirmishes go back long before the war itself. Furthermore, since the Doctor and a number of Daleks managed to escape the time lock, which almost got broken once and might still cause the return of the time war, the surviving Daleks and the Doctor are still continuing the conflict. As of the end of Season 35 (ninth of the relaunched series) both are back, but are shadows of their former power and can't continue the war directly.
* did not. Soviet leadership, Stalin included, chose to focus on other fronts and take Warsaw afterwards—possibly reflecting the very high level of distrust between the parties involved.
* Did not stop after Masked Marvel went to Mexico either, continuing to occasionally appear in USA wrestling with names like "The Destroyer" and, after death of the territories, in the "cruiserweight" divisions. WCW and WWF/WWE each had a few wrestlers take on the style,
* did not take COVID-19 seriously either by their actions or through social media instantly received this kind of heat. Those who violated the policies are likely punished by upper management. All pro wrestling companies, despite mass criticisms of continuing business, are very lucky to still have performances and not get shut down entirely:
* did not wean him at age one, showing a chart with two kids — one kid had a trophy saying "Best teeth," while the other had huge blanks in between each of his deformed teeth, and apparently, he wasn't weaned. Later, Tommy has a nightmare about a giant sippy cup that yells “DRINK ME!”.
* did novels show Horus conquering for the Imperium a world whose emperor claimed his homeworld was the actual Earth and tried to force him to submit. Horus slayed him personally.
* didn't, and the last one to be made significant was the single white tennis shoe Jack found. Yet this is repeated to this day.
* didn't believe it and continued to wait for him at the train station every day for many years.
* didn't. But as the series begins, people slowly begin to realize that the war never ended, and the Voidbringers are returning once more.
* didn't"), but he had her story basically worked out by her second appearance.
* didn't care for feudal code of chivalry and killed the cavalry forces (most of them were noblemen) instead of taking them hostage.
* didn't do much during the Ikaruga War(it really only took him two days to "end" the war), as he even notes that there were probably several people who could have ended the war as well due to how easy it was. The ending of the war itself was more of a setup that the NOL used as a way to get rid of the old regime and established their new one. Since Jin was the person they used for the purpose to end the war, he was then hailed as a hero and got tons of rank ups. This gave the NOL a figurehead hero to parade with their new order and allowed for Hazama to manipulate him easier. Personally, Jin felt completely empty and disliked the notion very

much.
* didn't do the research is a cheap and easy way to gloss over that and advance the plot.
* didn't even know how the Fast Forward works. She wanted to go for it because she was "pretty sure everybody did the Fast Forward". Once a team claims the Fast Forward, it's off the table for everybody else. Secondly, when Nick & Vicki got to the Fast Forward and saw the "Fast Forward Taken" sign, Vicki wondered if they're supposed to wait around.
* didn't even notice Belkar attacking him. Haley's next suggestion was to run the hell away as fast as possible.
* didn't even remember it, if sad, and tried to convince Yellow Diamond not to destroy the Earth. It doesn't help that her basic motivation can be either selfish or altruistic depending on how you look at it.
* didn't even try to fight back at first. This "Morning War" became a cautionary tale to the other races, who took the exact wrong message from it and made this Self-Fulfilling Prophecy law throughout the galaxy. One sidequest in the first game involves an AI who self-destructs rather than talk to you, even if you try and negotiate.
* didn't exist) and were summarily executed for laziness, incompetence, and/or collaborating with the Wobblies. Eventually, the Troubleshooters had to found the society themselves just to have something to report on.
* didn't exist at the time (Israel as a state came into being in 1948), but Toby explains that it doesn't matter—hanging a map of the Middle East that doesn't include Israel will be viewed as anti-Semitic by the general populace (not to mention Israel itself).
* Didn't get all the tickets on your first run? And now you know which one(s) you missed? No problem. After completing the game, the Start Menu is glitched to include a 'select chapter' option.
* didn't get the joke. If you looked up reviews for the shows he opened up, chances are you'd see complaints about him.
* didn't get to reappear on the transporter pad at the end of the film as planned. Well, the series is still young.)
* didn't happen, A Rose And A Thorn 5 happened instead. So there was a point to it after all.
* didn't have even that. Which is strange, as all other Flame Hazes have full names.
* didn't have magical protection against, he'd have succeeded. And that's not even mentioning his near constant reliance on the Killing Curse. For the Wizarding World's most powerful evil Wizard, it seems his fallback for every fight. And rarely, if ever, works.
* didn't have political officers — their Two Party State may have been united by a bipartisan ideology, but couldn't possibly have created a workable power-sharing arrangement for appointing party members to promote American Values in the military (under conscription the military's loyalties were more evenly split, but the all volunteer military leaned Republican).
* Didn't hurt the Nazi war machine much, though. Vichy France was a huge provider of war material for the Axis cause, and their government collaborated more enthusiastically than the Germans had even asked for in a failed effort to gain German respect (with the sole exception of the Vichy navy, which eventually scuttled itself rather than hand over its ships for German use). And while many French Jews were merely persecuted rather than executed, German Jews who'd fled to France for sanctuary were put into internment camps by the old Republican government, and cheerfully sent to the death camps by the succeeding Vichy government. The Free French forces do get some credit here, but they had nothing to do with the plight of the Jews of France.
* Didn't I already tell you that there are no Easter Eggs in this program?"
* didn't in the first place) for the mothers to stop bickering and get on board with the marriage.
* Didn't I Say to Make My Abilities Average in the Next Life? has a moment where

Reina wants to take revenge on an army captain who has been raiding caravans, killing traders like her father. The rest of her team stop her, saying it's not worth the guilt.
* Didn't I Say to Make My Abilities Average in the Next Life? of the series.
* Didn't I Say to Make My Abilities Average in the Next Life? the power of a normal human.
* Didn't I Say to Make My Abilities Average in the Next Life? was top of her class in sports and academics alike, and if anything she's even better across the board in her next life.
* didn't know. It was not until the reports of the Soviet reaction to Able Archer 83 made their way back to him six months later that he began to properly understand how they regarded the US and how close it had been.
* didn't leak the truth about the assassination of Prosecutor Neil Marshall 2 years ago, the constant extortion of the current Chief Prosecutor, and an evidence forgery to convict a serial killer for Marshall's murder (which he didn't commit).
* didn't. Lupin himself admits that he really screwed up by not taking the Wolfbanes potion at the pivotal moment, and that the only reason nobody got infected or killed was because of dumb luck. While many of the parental complaints may well have been motivated by prejudice, even absent that, he really ought to have been fired for negligence. Moreover, while a person who knows they have HIV is no threat to anyone as long as they avoid things like sex or blood donations, regardless of their level of treatment, Lupin is only allowed to be harmless because of a rare and difficult-to-brew potion that few werewolves in the setting can afford (Lupin only got it during the year he worked at Hogwarts because of Snape), meaning even if they do mean well, a werewolf really is incredibly dangerous in a way that someone with AIDS isn't. And this isn't helped by most of the other werewolves in the setting being violent murderers...
* didn't, making them the first mainline games in the franchise with that distinction.
* didn't notice there wasn't any water in Sandy's treedome until he went into it himself.
* didn't offer that option. The slogan of this campaign was, "The only way they can beat a Quiznos sandwich is to cheat!"
* didn't originally rap, and likely switched to rapping due to how bad she was at singing, makes one question her claims that she supposedly "moved to America to be a rapper".
* didn't particularly care that the objects of her affection may have been unwilling or already married.
* didn't play it quite straight: Rupert of Hentzau has his glorious 'this was the day you almost caught me' on the bridge, before diving into the moat, but the hero chases him, and thus his actual exit from the novel is with a cheek wound from the hero, having stolen a horse from a peasant girl, still dashing, but hardly the stylish exit of the nobleman. He rides off laughing like a maniac though, so props for that.
* didn't progress, and the newly-independent Ukraine sold it to China, who finished the construction minus the anti-ship missiles.
* didn't puppeteers, who by tradition are ignored by the audience as they perform). Except when they're using a disguise for something wholly nonthreatening, like Pokémon contests. During contests, Ash and Brock occasionally speculate that Jessilina is actually Jessie, then hand wave it (mostly because Jessie only ever has two useful Pokémon at a time and the heroes recognize them when used).
* didn't remake, there was no such giveaway, due to the SNES' more advanced graphics capabilities.
* didn't romance Garrus, then you can eventually walk in on him and Tali doing this as well (as necessitated by Tali's helmet).
* didn't run: Adobe Flash. Web developers rapidly moved to HTML5 and hastened the death of Flash.
* didn't's "Born in the U.S.A." in "The Top 10 Worst Hit Songs of 1985."
* Didn't See That Coming: You fail to consider the consequences of your plan.

* didn't shave so well on cloudy days, when the shadow was dimmer and fuzzier.)
* didn't show up until after Damien was dead and everyone had been rescued.
* didn't story, concluding with "Once upon a time, on a planet called Earth, there lived a boy named Bashar, who loved his mother. Very, very much."

* Didn't that actually happen once? And with Jeri Ryan of all people...
* didn't think it was ridiculous and built a device that made use of the concept.
* Didn't Think This Through: A character comes up with a plan that ends up failing or becoming difficult to carry out because of a detail they failed to consider before it was too late to do anything about it.
* Didn't Think This Through: Someone comes up with a plan to do something, but the plan ends up failing because of a crucial detail that the planner failed to realize before it was too late to do anything.
* Didn't Think This Through: Stupid people aren't good at coming up with well-thought-out plans.
* Didn't Think This Through: You failed because your plan was poorly made.
* didn't threaten to cut off my head and give it to Church as a birthday present?")
* Didn't We Use This Joke Already?: Yes. Too bored to come up with any new jokes.
* didn't work defeat four movie villains, but the canon status of the movies is uncertain.
* Dido and Aeneas (text by Nahum Tate) have lines like 'Harm's our delight and mischief all our skill' and 'Destruction's our delight, delight our greatest sorrow', and they decide to ruin the life of Queen Dido of Carthage just because they 'hate [...] all in prosp'rous state'.
* Dido Castameri, victor of the 39th Hunger Games was pulling pranks and cracking jokes at the expense of her instructors throughout most of her career training, and even the three days of Tribute Training. Just some of the things she was reprimanded for over the years include drawing rude stick figures in the boys dormitory, spitting on the nice carpets, pulling a
* did Of course, if we had known Magnusson before that incident, cause and effect may have been reversed.
* did of life - it just displaces where it originated from in the first place.
* did of the series and Mr. Burns' tendency to forget who he is was are likely to blame.
* did one where the United States largely runs the show, it would fit S.H.I.E.L.D. as it was depicted.
* did, only to connect that to prayer and feeling good. Clay responded with this trope when he found out... until he saw Orel's aroused grin, squicking him out and causing him to just have a stern talk instead.
* did open it so he would open it and check if anything was moved around.
* Dido, Queen of Carthage, Ganymede is seen sitting on Jove's lap coquetting away in order to get more presents from Jove.
* Dido, Queen of Carthage is a retelling of the star-crossed lovers Dido and Aeneas, from classical mythology.
* Dido, Queen of Carthage on Aeneas after he abandons her to go in search of his destiny.
* Dido than "Thank You" today), and then her #18 "White Flag" in 2003.
* did play a part in it, even if he wasn't there, it wouldn't have changed anything. Trigon's coming was inevitable.
* did rack up 80 well-documented confirmed victories (and another 20 or so suspected ones) before he was brought down.
* did realize something was up and contacted the police, but they dismiss her concerns.
* did run it, either de facto or, for a time, with a long string of Jedi Masters as Chancellor. The Jedi eventually deemed this inappropriate and ceased to involve themselves in the Senate's affairs.
* did scare her and Franklin says that it scared them all, but it was fun.
* did seal Kurama inside him, leading to almost all of Konoha ostracizing him,

after all). Learning that Minato was his father helped towards rebuilding the pedestal, and now the respect he has for him is possibly even greater than it was before.
* did see the Canadiens return to the finals, in spite of them having the lowest point total among all 16 postseason teams; unfortunately, the Tampa Bay Lightning made short work of them, with the Habs only avoiding a sweep thanks to an overtime winner in Game 4.
* did share a strong friendship until their differences began to sour it more and more. It came to a head when Tony found out the man Steve was protecting murdered his parents, ending in a savage fight and some hate-filled final words from Tony:
* did share their tech with a less advanced civilisation, they blasted themselves to pieces with it - so the Tau'ri never reverse engineer it like they do with Goa'uld and Asgard tech). Unfortunately for them, they also seem content to take a measured path towards progress, are somewhat naive and militarily speaking, are entirely dependent on their technology - if it doesn't work, they run out of ideas. When Anubis finds a way to counter their only means of planetary defense, they agree to help him develop phasing WMDs... instead of using those against him.
* did She is an engineering student, after all. As the fourth made-for-DVD movie showed, Amy is also an ace player with the mini-golf putter.
* did she kept refusing, or try to connect with her in any other ways. Trip considers that lack of investment to be incredibly strange on Ash's part, and Ash himself struggles to figure out why he didn't try as hard with her as he has with other companions in the past.
* did shoot Jasper, who was trying to restrain him. Luckily he just hit Jasper's false leg, so it's all good.
* did shops and a lot of merchandise. Evading arrest and assaulting police officers probably didn't help.
* "Did somebody say DRACO MALFOY?" is probably the best example from the show. It gets special mention because nobody had actually said "Draco Malfoy". Draco's cue line was "Now let's leave these big baby childish jerks alone" before
* did speak passable Japanese. He used this for entertainment during his time as a POW, taking advantage of the fact that few of the camp guards spoke any English. Boyington would approach a guard, smile, and compliment him profusely in Japanese. The guard would smile and thank him. Boyington would then switch to English, maintaining his smile and ass-kissing tone while insulting the living shit out of the oblivious guard (subjects included, but were not limited to, homosexuality, bestiality, questionable parentage, and who may or may not have fucked the guard's mother), who would continue to smile, nod, and thank him, to the endless amusement of the American and Australian prisoners.
* did start preparing his army on the coast of Normandy and apparently made preparations to prepare for an invasion of England but whether these were defensive measures or if Napoleon eventually planned on conquering Europe all along is difficult to know. What is certain is that he wanted to make France the principal hegemony in Europe, a large and prosperous military power full of national pride that would cement and legitimize his regime. Napoleon knew all along that he came to power in a coup and that his claim of being the Emperor of France was not recognized as valid by the old aristocracy of Europe, so his peace agreements with various powers were never honoured on the part of the aristocrats and later Napoleon himself for reasons of expediency.
* did stop the spread of the Clone flesh! There's a body to have a funeral with, at least.
* did succeed in building a flying tank during the Cold War; aka the Hind helicopter.
* did succeed in their mission to make sure that Graf would return to the top spot in tennis as Seles was never able to fully regain the nigh-unbeatable form she had before the attack.
* did survive after losing contact, although it's not clear what happens next.
* did survive; the actual death toll is uncertain (especially since the native population didn't report all their deaths), but it may have been as few as six or

seven in Nome.
* did take us to some other important capitals. Namely London, Paris, Prague, and Berlin. the latter three are being invaded by Russia. The former is the victim of a major terrorist attack. Terrorist attacks were also used in some of the other capitals too to weaken the defenses before the invasion began.
* did that prevented the Lexx from firing on His Divine Shadow's ships).
* Did the Earth Move for You, Too?: When somebody says this phrase while someone kisses or has sex with someone else during a disaster.
* did the featured artist on both songs, not Björk/Harvey. And the other members of Radiohead had nothing to do with either song.
* did their homework, whenever Hercules (Alpha Centauri B) reaches periastron, the native life on Planet experiences tremendous growth. There are also two moons: Nessus and Pholus.
* did, there is malice and stupidity in abundance, which helps the body count climb ever higher.

* did. These guys were the backup plan nobody wanted to be forced to use.
* Did They or Didn't They? but the characters speculating that they did don't know that.
* Did They or Didn't They?: It's left ambiguous whether or not a couple have consummated their relationship.
* Did They or Didn't They? - Two characters did something offscreen. It could have been sex, but we just don't know.
* Did They or Didn't They?: Two characters went offscreen and they could have had sex but they might not have.
* did this in order to put an end to Dana Brooke's interference during her match against Charlotte.
* did this with a portion of his neighbor's driveway, placing bricks to portion off an area and claiming that portion fell within his property line. The two worked it out, though.
* did to dispose of their unwanted child, only to find they just can't do it; related to this, there are countless cases of the adoption of unwanted babies by those unable to have (more) children themselves.
* did to Kharis, who appears throughout the series, but is much less recognizable, and, well, the movies aren't named after him.
* did to the father, they also have his picture removed from a wall of officers killed in the line of duty at a cop bar, because the father didn't deserve to be remembered as a hero.)
* did, to which he points out that that's why he had to find a different way to crash dramatically into the scene.
* did try to steal Earth that way, in "The Dalek Invasion of Earth". The Doctor briefly mentions this in "The Stolen Earth" when he says that, "Someone tried to move the Earth once before." The Daleks tried to do it both times.

* did was first unveiled, and it was the first fruit of Steve Jobs' famous "computer as appliance" philosophy.
* "Did we get them?" — As with the previous example, no, you didn't.
* Did We Just Have Tea with Cthulhu?, but let's sit down and have some tea.
* Did We Just Have Tea with Cthulhu?: Someone has a very cordial meeting with a powerful being.
* Did we mention John Woo really likes this trope? In case it wasn't already evident,
* Did we mention that they also have biplanes? Specifically, the Antonov An-2 Colt transport, the smaller Russian cousin to the equally universal DC-3. It's hard to pick up on radar, and so slow that modern fighters have trouble engaging it with guns, and it can take off and land from improvised air strips,

* did. Why was the special ship pink, and what was with the big arm... Well, it looked cool.
* did, with AEW buying rights to the song so that the video would never have to be re-edited. Then again, that particular use isn't exactly commercial.
* did write one short story about how he thought a robot uprising would go, titled "That Thou Are Mindful Of Him". Essentially, a pair of robots do a bunch of philosophizing and come to the conclusion that biology is not a prerequisite for being "human". They spread this idea to a bunch of others robots and so on, with the idea mutating to robots fitting the criteria of "human" better than actual humans. This allows them to work around their own programming and stage the violent uprising Susan Calvin and her bosses had always tried to stamp out.
* Did You Actually Believe...?: The villain mocks the hero for believing their unkept promise.
* Did You Die?: Someone is asked whether or not they survived a dangerous event even though it's obvious they lived if they're around to tell the story. Small children often ask this.
* Did You Die?: When a character is telling the story of a dangerous event they experienced, someone else asks if the person died even though they obviously survived if they're around to tell the story.
* "Did you do it?" is merely the first of his probing questions. He usually followed it up with the persistent 'Are you sure it wasn't you wot did it?" and then the crafty "It was you wot done it, wasn't it?"
* "Did You Ever Have To Make Up Your Mind?" by The Lovin' Spoonful asks the question of whether the listener has ever experienced the type of problem where they are attracted to/dating two girls with different but equally attractive qualities and thus has difficulty deciding which one to choose.
* Did you have difficulty with one part of the game but it seemed otherwise doable without a walkthrough? It could just be
* "Did you hear about Pluto? That's messed up!" — Burton "Gus" Guster,
* "Did you hear about the butcher who fell into his meat grinder? He got a little behind in his work!"
* Did you hear about the cannibal who was late for dinner? His wife gave him the cold shoulder.
* Did you hear about the Irish hydrometer? It didn't know how to measure the moistness of the atmosphere.
* Did you hear about the Jewish car? It not only stops on a dime, but it picks the dime up.
* Did You Hear About the Morgans?, a film with Sarah Jessica Parker and Hugh Grant, is about a Manhattan couple who witness a murder, and are sent to Wyoming for witness protection.
* Did you hear the one about the Mexican with two penises? He named the left one "José" and the right one "Hose B."
* Did You Just Flip Off Cthulhu?: Showing defiance to something you know is about to kill you.
* Did You Just Flip Off Cthulhu?: Someone insults a being more powerful than they are.
* Did You Just Have Sex?: Someone who doesn't normally have sex is acting differently and another character finds out it was because they got laid.
* Did You Just Punch Out Cthulhu?: Someone manages to defeat a being who is considerably more powerful than they are.
* Did You Just Romance Cthulhu?: Having romantic interests with something... elsely.
* Did You Just Scam Cthulhu?: Someone succeeds in tricking a powerful being.
* Did You Just Scam Cthulhu?: This person is so clever and cunning that they can fool an extremely powerful being into doing their bidding.
* Did you know certain cartoon characters should never have an energy drink?" Cuts to the Tasmanian Devil, who is on a soundstage. He drinks a can of some energy drink, then goes into his tornado-damage-strength whirling dervish, just as the GEICO logo is shown. We cut to an entirely different commercial of a room showing

various plates: the 50 state bird hand-painted china collection, which is then given the "bull in a china shop" treatment by Taz as he spins through, smashing the wall with the other commercial and trashes everything.
* Did You Know Gaming ends every video not only with a request to subscribe to their channel, but also the personal channel of whomever is providing the narration for the video in question (with varying degrees of eloquency).
* Did you know that cockatoos can achieve higher decibel levels than a jet engine?
* Did you know that genies can be very literal: Bucks the kind of territorial males that are likely to start fighting as soon as they see other bucks. Just a few minutes after the bucks magically appeared, they are going to engage in a brawl that is about as peaceful as the Running of the Bulls in a Spanish town.
* Did you know there are four Chaos Gods, each with their own followers and themes? If so, congratulations on knowing more about 40k than some people at Games Workshop. Khorne seems to get more attention from the higher ups than Tzeentch, Nurgle & Slaanesh ever will. The video games are even worse,
* "Did you order one of those smaller controllers or something? I think I like it better."
* Did you pre-register anyway and the convention turns out to be staffed by completely incompetent nimrods? Sucks to be you!
* Did you run someone over with a car? The damage done is included in the book. Were you standing too close to a car that exploded? That damage is also in the book. Did you just hit someone with a car that you telekinetically threw?
* "Did you see that ludicrous display last night?" "The thing about Arsenal is they always try to walk it in!"
* Did you see those warriors from Hammerfell? I pickpocketed them and got some curved swords. Curved.
* Did You Think I Can't Feel?: Even the most antisocial of people still have feelings.
* Did you think you could just summon the Devil and then ask him to behave?"
* Die 1000 Augen des Dr. Mabuse has two different cuts of the dialogue-free ending scene, one of which implies that the heroine Marion dies from the gunshot wound that she received towards the end of the story and one of which implies that she survives. Typically, the French market got the sad ending and the US market the happy one.
* Die 1000 Augen des Dr. Mabuse has two slightly different cuts of the final scene, one of which indicates that the female romantic lead Marion dies from the gunshot wound she received towards the end of the plot, and one which indicates that she will survive. In national stereotyping terms, it will not surprise anyone that the USA was one of the markets that got the happy ending, and France one of the ones that got the sad one.
* Die 1000 Augen des Dr. Mabuse, which is run by a criminal gang who aren't (usually) directly killing the guests, but spying on them so that they can plot crimes to be committed elsewhere.
* Die2Nite has chainsaws. They're about as powerful as you'd expect, but come with some hefty drawbacks. First of all, they're an extremely rare item that most towns will be lucky to find a single one in their entire existence. Secondly, they are found broken and need several parts to fix up. Lastly, they have limited uses and need batteries (thankfully, a very common item) to power them.
* Die2Nite has zombies break into your house through a poorly barricated window and eat you alive.
* Die2Nite is a game set in a world already devastated by one of these. All that is left are a few small towns and buildings in a vast endless wasteland. Unlike many other games of this genre the main goal isn't to survive or find rescue... it's to delay death as long as possible. Sooner or later, every town, every player, even the best, will die and have to start over in a new town.
* Die2Nite often has a few of these scattered around the map. They are a great place to find bandages and medicine.
* Die Alchimistin end up dragged into their intrigues and introduced to the immortals' conspiracy as well.

* Die also qualifies, gleefully cutting open a fake corpse to make it look more realistic and getting excited when Olivia starts painting a satanic mural in fake blood. Then she installs a
* Die Another Day. After Bond arrives in Hong Kong and has had a proper shave and some new clothes, it seems like he tries to seduce the Asian masseuse who was sent to his room. Then he takes her gun and reveals her as a Chinese operative.
* Die Another Day, and audiences at the time were a bit shocked to see the character in such a disheveled state. However, Bond is still in remarkably good shape for someone who had endured that type of hell for so long. All it takes are a single shave, a hair cut and a change of clothes for Bond to become sexy again.
* Die Another Day and spends the title sequence being beaten and tortured.
* Die Another Day attack on headquarters, a mook lights up the ceiling with an impressive post-mortem burst after being nailed by Bond's Walther.
* Die Another Day. Besides them, there is only one other major MI6 character in the movie, who — surprise, surprise! — does turn out to be the mole.
* Die Another Day betrayed her country solely because she got a silver medal in the Olympics, and the villain of the movie offered to make it look like the gold winner cheated.
* Die Another Day, Colonel Tan-Sun Moon and his faction in the Korean People's Army turn into pro-North Korean unification terrorists after the former used the revenue from smuggling to arm his faction and create the superweapon called Icarus. Eventually, they depose the current government in a coup and reignite the war against the south.
* Die Another Day, Colonel Tan-Sun Moon is an officer in the Korean People's Army who's known to support hard-line calls to reunify the Korean Peninsula under North Korean control. He goes rogue with his faction in the KPA and later operate as pro-North Korean unification terrorists.
* Die Another Day emerges from the mist in the other direction; they have a terse exchange in the middle, out of sight from both sides.
* Die Another Day. First Grave challenges Bond, where we see the whole gamut of Flynning, including spins, multiple sword changes, a slashed paintings, and fighting in the corridors. Later, Jinx takes on Olympic Fencer Frost, involving similar cool, but impractical moves.
* Die Another Day. General Moon drops the trope name before apparently having Bond marched in front of a firing squad.
* Die Another Day has a hovercraft crashing next to a concrete bunker, and both end up producing a gaseous explosion.
* Die Another Day has Jynx diving backwards off a cliff into the ocean, where she is promptly picked up by a boat
* Die Another Day implies that MI6 has an "evaluation centre" in the Falkland Islands for keeping agents deemed a danger (which may include those who decide to resign), and M can confine someone there as long as she deems necessary.
* Die Another Day: It's cheerfully lampshaded Bond and Gustav Graves trash a fencing club during a duel which gets out of hand; after the fight, as various ruined furnishings are carried out, a bellhop remarks, "The place needed redecorating anyway."
* Die Another Day: It's implied that this happened to Bond at some point during the 1.5 years he was held prisoner in North Korea, given the scars on his back.
* Die Another Day: It's pretty obvious that the main reason why Colonel Moon even holds such a high rank in the North Korean military, a position that he then abuses for his own gain, is because his father is a General.
* Die Another Day, Jinx drowns in a melting ice palace. James Bond revives her by getting her into a hot spring. He specifically says that the hypothermia "kept her alive" (delayed death by suffocation). This is almost Truth in Television, though she should've also needed rescue breathing.
* Die Another Day makes an orbital mirror that doubles as a Kill Sat. Much like Blofeld's version, the weapon used diamonds to focus the energy.
* Die Another Day manual of his new car. Bond throws the book in front of the car, triggering the shotguns under the hood which promptly shoot it to confetti.

* Die Another Day marks the return of Bond's ass in the seat of an Aston... but gives his enemy a Jaguar XKR equal in gadgets to 007 himself. The resulting duel is considered one of the high points of the film.
* Die Another Day, Miranda Frost is mentioned as having won a gold medal in fencing... because the winner wound up dying of a drug overdose.
* Die Another Day, Moneypenny is caught experimenting with a pair of VR goggles...
* Die Another Day: North Korea and Cuba are communist nations who understandably wouldn't want to be involved with the Cold Warrior, so they used Hawaii and Cornwall for the former and Spain for the latter.
* Die Another Day subverts the trope: Bond finds a security camera, moves next to it, and simply unplugs it.
* Die Another Day, then jumps into the water near a waiting motorboat.
* Die Another Day. The South Koreans were outraged by the fact that their defense forces were ordered by Americans and that the theatrical cut included a love scene near a statue of the Buddha.
* Die Another Day to help his faction finally win the war. He has daddy issues too, and really really hates anything Western. He admits to having based the Graves persona partly on Bond.
* Die Another Day, we see Bond repeatedly getting his head shoved into a bucket of ice water, stung with scorpions, and beaten, all for the guards' amusement. When the sequence concludes and the movie begins, the caption tells us that Bond has endured this treatment for over a year. Once rescued, we overhear Q talking about what else James went through: he'd be injected with poison and then his torturers would watch the poison take affect for some indeterminate amount of time before injecting the antidote. Multiple times.
* Die Another Day. When asked what took him so long after in a spy car vs spy car fight, Bond avoided the obvious joke "car troubles".
* Die Another Day, when Bond Girl Jinx is cornered on top of an embankment, she raises her hands in surrender... and executes a perfect backwards swan dive into the water below, then escapes on a waiting speedboat.
* Die Another Day, when the hovercraft at the beginning collide into trees, they crumple up (as if they made of cardboard and tin foil) and burst into flames. They're driving over a mine-field, so things exploding with little to no warning does make a little more sense in that scene.
* Die Another Day, with a fencing instructor's corset. As the commentary alludes, the fencing instructor is a lesbian.
* Die Anstalt etc. It doesn't help that Dolly has a severe mood disorder, running over a vast emotional gamut but mostly anger and depression, so the elements are liable to change at any time.
* Die Anstalt is a flash game made to promote a series of plush toys of various cute animals with severe mental issues (the goal of the game is to help the toys overcome their issues).
* Die Anstalt: When told that he is an eagle by a motivational tape, Kroko really attempts to fly. The help guide even lampshades this: "The patient's infra-logical-predicative thinking hinders him to decipher metaphors."
* Die Antwoord this trope creates: Ninja sleeps with every girl in town, but flips out the moment Yo-Landi tries to have a sex life of her own, chasing every boyfriend away with increasingly-larger weapons. The video ends with her grabbing a brick and knocking him senseless as she runs off with her new love.
* DIE are a more science fantasy take on this trope, being robotical creatures that may offer great boons to those who find them, but each time someone requests a boon they flip a coin, with a 50/50 chance of them granting it.
* die as the result of laying down his life, just to expect that he will.
* Die Ärzte, as distorted guitars and creepy sound effects are added to the initial music box theme. The last verse goes back to the original instruments and tells the child to fall asleep quickly, or else the monster can't come in.
* Die Ärzte dyes his hair blond because "it was fashionable in the 80s." Also had a crimson phase during the 90s. Their drummer Bela B. dyes his hair black, but it's naturally ash blonde.

* Die Ärzte's "Meine Ex(plodierte Freundin)" is about this, playing the supposed spontaneous explosion of the singer's latest girlfriend (after the first already suddenly burst into flames and two others suffered similarly implausible fates) entirely for comedy.
* Die Ärzte some real musician's complaint whose name escapes us right now.
* Die Ärzte use this occasionally, e.g. on "Radio Brennt": "Stoooop!" <music breaks off, you hear heavy panting> "Weiter!"
* Die Ärzte usually occupy the silly side, not only in their song lyrics, but also in their stage antics and in interviews, where almost every answer could as well have been irony or them messing with their interviewer. However, they do have some very serious songs, though never more than a handful per album. They are also not above making fun of the serious points in their serious songs or making serious points in a silly song.
* Die Bruderschaft des Kreuzes and has apparently left wrestling altogether. With Pinkie leaving CHIKARA a year later, it's safe to say that they will never cash in those points.
* Die Bruderschaft des Kreuzes and his Order Of The Neo Solar Temple, purposefully calling out Mantis upon revealing himself, beating down his group and anyone else around who was at arm's length, taking Mantis's followers and his resources for getting more.
* Die Bruderschaft des Kreuzes: Formed in 2009, dissolved in 2012, returned in 2014, ended in 2016.
* Die Brücke, but it does prove how much urban warfare can differ from conventional combat.
* Die Brücke), set near the end of the war, a group of seven fanaticized teenagers try to defend a (strategically unimportant) local bridge from the approaching Americans. They succeed, but all die in the fight, except one.
* Die Brücke used Swiss Panzer 68s as stand-ins for the M4 Shermans. While the tanks look suitably "old", they do not look like Shermans, and Shermans also didn't have multiple countermeasure pods and other, "modern" stuff attached to them. What's even more ridiculous: later in the movie, an M4 Sherman can be seen. Why the heck didn't they use it in the first place?
* Diebuster also does this during the first meeting of the main two characters.
* DieBuster has a small logo in the corner, and for the first 5 episodes has a chorus singing the name a few times. The 6th (final) episode has a silent logo to go with the drama of the episode.
* DieBuster onto it. Fortunately, Nono shows up and stop this plan before dealing with the Space Monster herself.
* DieBuster reacts to Nono splitting a black hole in half with "That is something that is not allowed in this universe!"
* Die Bücher der namenlosen Liebe Christopher Isherwood praised this book's realistic portrayal of the Berlin homosexual world.
* Di[e]ce only reason for living. Kazuki and Haruki, though, only show that level of single-minded loyalty towards each other.
* Die, Chair, Die!: In-game props which can be destroyed, sometimes resulting in a reward.
